"One dealer delighted us with the news that he never hears a customer ask for 'I Hear You Calling Me' without suggesting and, if such is in order, playing three or four other McCormack records. If this dealer does not have 'Cecile' on his shelf he suggests 'Millicent' or any other good waltz record, fearing that in nine cases out of ten a customer will not come back for a certain record if it is not to be had when wanted. A keying system that classifies waltzes, arias, violin solos, etc., under a code sign, enables him to pick out similar records quickly. He does not call this substitution but restitution—saving an order! He is a dealer who sends out great quantities of records on twenty-four hours' approval. For it's an active stimulant to his customers' record appetites—the more they hear, the more they want. He is the dealer who writes a breezy letter with every monthly list of records sent out on his mailing list and who calls by 'phone all customers whom he thinks might be interested in special records. And he is the very same dealer who is profiting and profiting and realizing profit on his record department.

"Another dealer makes a practice of giving monthly recitals, selecting the headliners of each record list and inviting home talent to assist—by this latter feature attracting more local interest. He says pleasant service in the store brings better results than any amount of "record-on-approval" bother.

"But one other man comes forward with a plan for boosting record business which should commend itself to your attention through its uniqueness.

"He employed a young man instructed in the mechanical workings of a Victrola, to make regular tours of inspection among all the local owners of Victor machines, testing the motors to correct jumping, to see if they make seventy-eight revolutions per minute, to see if the diaphragm is at proper tension to bring out roundly the high tones of certain instrumental records he might play (for instance, Kreisler's 'Serenade Espagnole') and to see if the sound box is properly adjusted to produce powerful vocal records such as Caruso's 'Celeste Aida" without 'blasting.' Upon finishing each inspection the young man might play a few other good numbers and leave behind a list of the latest records.

"When the man of the house gets home at night and discovers that his Victrola has been improved he will want to hear for himself. The wife and children will recall the beautiful songs and instrumental selections the young man played, will discover the list of new ones—and there you are. Following the natural consequences still further, this dealer sees neighbors and non-owners of Victrolas trooping in to hear new records on the improved instruments and going home with the "buy-it-now" instinct hard working in their minds.

"Familiarize your customers with the opera, says another retailer. Lead them into the story of an otherwise bewildering maze of music, and speak in plain United States words so that they may feel Lucia di Lammermoor to have been no one but little Lucy from the old Scotch town of Lammermoor—as, indeed, she was. Let them know that the English meaning of 'Cavalleria Rusticana' is 'Rustic Chivalry" and that the plot is based on a situation that has popped up in human events since time out of mind—that of a woman, well married, making up to a former lover. Show your customers clearly that grand opera is simply a magnifying glass which intensifies the loves and passions of human beings—although the glass itself may lend a touch of the sublime.

"While you are playing for your friends the remarkable record 88061—Caruso singing 'On with the Play'—explain that the Italian tenor is performing in character of a circus clown 'I Pagliacci'—'The Players'—and is sobbing out his wretchedness over the faithlessness of his wife.

"All this would be bringing them closer to a high embodiment of art—a consequent desire for fuller knowledge—the commencing of a grand opera library—the foundation of a growing record demand. Tell the story! Tell the story! Tell the story!

"The successful pursuit of this plan would call for your advice as to the formation of a customer's record library. You see, the assembling of valuable records should have the same painstaking attention that a book-lover gives to his collections. There are few model libraries that do not have a proportion of light fiction against heavy drama—one balancing the other to a nice degree—but in none does Robert W. Chambers approach in representation Balzac, Victor Hugo or Maupassant; nor is there a lack of Shakespeare or Milton on the shelves. In the same way 'Tipperary' should have a strong counterweight in 'Celeste Aida' and records of similar magnificence.

"Make them know it. 'Victor Book of the Opera' and Voice of the Victor will help you. Grand opera offers a broad and substantial foundation for a building of record business.

"And here read a few of our words: A record stock increased from well selected numbers is as good as old wheat in the mill—better because it turns oftener. Do not feel that, because records may be easily obtained at the present time it is possible to hold every customer off until his order can be filled here. Did you ever go into a store for a pair of shoes and, when the clerk was unable to fit you, did you agree to wait patiently until the shoe jobber or shoe manufacturer could get a pair made?—A ready stock saves many a sale.

Your record business should
equal your machine business.

"You have turned a commendable voltage or energy on Victrola business, but switching a little more current into record lines would liven up the wires for all of us, and set the sparks to jumping in a way that would warm your heart—and ours—and your customers."

PROTEST GRANTING OF TRADE-MARK

A protest was filed on July 1, by the Sonora Phonograph Corporation through their attorneys against the granting of a trade-mark to the Pathé Frères Phonograph Co., of Wilmington, Del., on a disc bearing the words "Sapphire Records," the bottom of the plate containing the words, "Made for United States Consumption Only." The Pathé Frères Phonograph Co. has been granted until August 22 to file an answer to the protest of the Sonora Corporation.

The Union Phonograph & Machine Co., of Newark, N. J., was incorporated last week with a capitalization of $25,000, to deal in talking machines and accessories.

INTEREST IN EDUCATIONAL RECORDS

Dealers Steadily Showing Greater Appreciation of the Opportunities That Lie in the Development of That Line of Business—Good Suggestions from New York Talking Machine Co.

Talking machine dealers throughout the country are realizing more and more the unlimited possibilities which are at their command to develop the sale of educational records. During the past year manufacturers and distributors have joined to impress upon the dealer that the word "Educational" does not necessarily mean that the records listed under that heading are not intended solely for use in the schoolroom, but on the contrary, can be sold for use in the home.

In this connection the following letter recently sent out by A. D. Geissler, vice-president of the New York Talking Machine Co., and the Chicago Talking Machine Co., is worthy of more than passing interest. It reads:

"Did it ever occur to you how many records there are in our regular educational list which, if brought to the attention of the parents to whom you are selling our regular catalog list, would be eagerly snapped up by them? The Victor Co., at the recent distributors' convention, brought out very forcefully the fact that many parents are in search of indirect methods by which they may educate their children without commanding them to study.

"I thoroughly believe that, if you should devote one room exclusively to the demonstration of educational records, and have one salesman in your force specialize in this work—study it and really become an expert in it, such room would pay you big dividends and at the same time would have the effect of stimulating your other salesmen to similar efforts in suggesting these records to your regular trade.

"This is a scheme which might be systematically and effectively thought out and inaugurated by you. As a suggestion—possibly the enclosed list of educational records would appeal to you as a very good list to take the initiative in." The list enclosed in this letter comprised the following Victor records:

31855 National Airs of All Nations. Great Britain, "Rule Britannia"; Austria, "God Preserve the Emperor"; Russia, "God Save the Czar"; France, "Marseillaise"; Italy, "Garibaldi Hymn"; Germany, "Watch on the Rhine"; United States, "Star Spangled Banner."

LARGE ORDERS FOR DIAPHRAGMS

James L. Frazee, 30 Church street, New York, manufacturer of "Crystal Edge" diaphragms, returned Monday from a trip to New England, during which he concluded arrangements for purchasing large quantities of raw material in order to adequately handle his fast-growing trade. Mr. Frazee now has a traveling representative in the South, and is making plans for a large fall and winter trade. He states that during the past week or two he has received a number of very large orders for his diaphragms, one order totaling $12,500.

M. J. Coats, who recently opened a drug store in the new Grace Building, on William street, Little Falls, N. Y., will also carry a line of Edison Diamond Disc phonographs.

Columbia Records TRADE MARK Note the Notes

GREAT EXPANSION OF EDISON PLANT

Present Factories Being Worked Night and Day to Keep Up with Demand and Additional Buildings Are Necessary—A Formal Statement Regarding the Situation

The factories of Thomas A. Edison, Inc., Orange, N. J., for some months past have been taxed to their utmost capacity as a result of the tremendous demand for the New Edison and Edison Re-Creations and it now has become necessary to erect a number of temporary structures in the vicinity of the works in order to provide for additional manufacturing facilities. There recently has been a tremendous increase in Edison sales, an increase that has made necessary the maintenance of large night forces and the carrying on of work in some departments seven days a week. It is to relieve some of this congestion that portions of the permanent buildings that formerly were used for storage purposes are being equipped with machinery and delivered to the purpose of active manufacturing.

A formal statement regarding conditions at the Edison phonograph plants has just been issued. "Business has attained phenomenal proportions," it states, "and the capacity of our present buildings is greatly overtaxed. We have found it necessary to divert former storerooms to active manufacturing purposes and we now are storing large quantities of raw material, as well as much of our finished product, in temporary structures that have been erected in the vicinity of our plants. Our men are working day and night, also Sundays. We have found it necessary to impose a tremendous burden on every branch of our manufacturing division in order to keep up with the demands made upon us by the sales department.

"Before the New Edison was placed on the market it was foreseen that its introduction would be followed by a strong demand for the instruments and records. It was supposed that ample preparations to fill the requirements of any market that might develop had been made. But the demand has exceeded all expectations and, as a result, we are having difficulty in meeting it. The spirit of Mr. Edison animates the entire organiation, however, and, because of this, we do not feel that anything is impossible. By making the most vigorous efforts we can satisfy the demands that are being made upon us until contemplated expansions and improvements relieve the pressure under which we are working at the present time."

E. ARMSTRONG NEW SALES MANAGER

CHICAGO, ILL., August 7.—Elmon Armstrong, who is known to the wholesale music interests in the Middle West, and very thoroughly and generally known in the musical industry from coast to coast, has been appointed Western sales manager for the Compton-Price Co., Coshocton, O., manufacturers of the Stradivara phonograph, with headquarters in Chicago.

KIMBALL CO. TO HANDLE PATHE LINE

Prominent Chicago Piano Manufacturers Close Important Deal with Pathé Co.

CHICAGO, ILL., August 9.—An announcement based on authentic information was made here to-day to the effect that the W. W. Kimball Co. has closed a deal whereby it will handle the Pathé Frères line of machines and records not only in its retail department, but also in a wholesale way, distributing the goods to retail dealers throughout the country. This is the second large piano manufacturing corporation to tie up with the Pathé line lately, as the Hallet & Davis Piano Co. made distributing arrangements on the Pathé line only last week.

It is pointed out that the Kimball Co., incidentally placed itself in a more favorable position in respect to its own machine, which is to be known as the Kimball phonograph, and which is believed will be in readiness for the market very soon. The advantage of having a library of records such as the Pathé library is cannot be overestimated in conjunction with the launching of a new machine.

SUCCESSFUL VICTOR RECITAL

Rhodes Bros. Entertain Large Audience at Recent Affair Given in Their Roof Garden

TACOMA, WASH., August 5.—Rhodes Bros., Victor dealers, recently held a Victrola recital in their building which attracted an audience of several hundred women and which was a success both from an artistic and a commercial standpoint.

The excellent attendance at this recital was made possible through the use of large newspaper space and the fact that the Rhodes Bros. building has a roof garden and tea room in which the recital was held.

In addition to the Victrola the services of two well-knwwn local musicians were secured, and the program was made as varied as possible so as to interest every one.

The impression created by this recital has been reflected in the splendid business closed by Rhodes Bros., and it is quite likely that similar recitals will be held in the near future.

B. L. Malone & Co., of Grady, Tex., have added the Edison Diamond Disc line of phonographs and records to their business.

Satisfy and Please Your Trade

Shrewd, progressive dealers do so by supplying them with the

One of the Domestic Line

The Wonderful Domestic Sound Box

The Dominance of the Domestic

DOMESTIC Talking Machines comprise the logical moderate price line to handle. And here's why:

They have been designed and are being manufactured and sold by men who are recognized experts in this field.

They are being manufactured complete, with the exception of the wood work, under one roof.

The manufacturers concentrate in one field, devoting their entire attention to doing one thing economically and well.

The organization surrounding the Domestic line is of as high standing and broad knowledge as the largest manufacturers in the industry.

The Domestic line caters to the masses where values must be and are prominent factors to insure success.

All Domestic machines are full guaranteed, and the Domestic organization stands squarely back of them.

As a dealer you do business direct with the Manufacturer when you handle the Domestic line. You have something of value, something that is distinctive and different from others.

We are prepared to make prompt shipments, have materials on hand for a large output and expect to take good care of all our dealers by giving them a superior product along with efficient service.

The great value to the consumer, liberal discounts to the dealer and a broad sales policy insure each dealer reaping the benefit of his efforts.

We are closing dealers' contracts daily and hourly; our output is increasing by leaps and bounds.

If you have not as yet applied for the agency, do so now before your neighbor secures it. One thing is certain: someone in your locality is going to handle the Domestic line.

Can you afford to lose the opportunity?

TALKING MACHINE

MUSIC TRADE MEN AT PLATTSBURG

Trade Showing Not So Large as Might Be—Chicago Talking Machine Co. Well Represented—Life of the "Rookie" Not a Rosy One, But Does Much Good Declares Keith

PLATTSBURG, N. Y., August 7.—The third camp of the season of 1916 of the Military Training Camps has finished its last week of work in a "long hike," and is breaking camp in preparation to return to business and home.

The men have had a month's intensive military training and "intensive" means that the "Rookies" have had drilled into them in that time what the recruits joining the regular army would get in three or four months. For the

Left to Right—W. C. Griffith, Corp. R. J. Keith, Arnold Lockridge

army officers who acted as instructors at the camps were expected to impart to the business men in training as much as possible of the ground-work of a military education with the idea that ultimately these "Rookies" can serve in the event of war as a nucleus around which to build a force of officers for the armies that would have to be raised.

Members of the music trade were not in attendance at the camp to any great extent—for the music trade evidently does not believe in preparedness, at least, as far as itself is concerned. There was one firm, however, that made an excellent showing, and that was the Chicago Talking Machine Co.

Sales Manager R. J. Keith was there and brought with him W. C. Griffith and Arnold Lockridge, both of the sales department. The men were assigned to the same regiment—the Seventh—but were placed in different companies, Keith being corporal of his squad.

It isn't the easiest work in the world, sometimes, to keep a lot of prosperous Victor dealers satisfied with deliveries—especially around holiday time—but it's easy compared with what the "Rookies" have to do. In the morning is "Reveille"—at 5.40 and part of the time at 4.30 a. m. Then after "setting-up" comes mess, and after that marching or drilling and sometimes sham battles in which the men carrying the full pack of forty pounds on their backs and rifle, bayonet and belt, march through the dust and heat, deploy and fight a desperate battle with another battalion of "Rookies," firing innumerable blank cartridges and ending the struggles of the losing side in a desperate bayonet charge.

Then comes the tiresome march back to camp, sousing with buckets of water and noon mess. Then in the afternoon drilling by platoon or rifle practice on the range. Then comes "Retreat" with its ceremonies, "Inspection arms" and "Dismissed" followed immediately by the supper call. After the scramble for the "slumgullion" there is a conference in which the men are given a talk on "The Use and Care of the Rifle" or "Strategy at the Dardanelles," etc. After that an hour for yourself and then "Taps" with nothing to do 'till to-morrow. On the "hike" there is, in addition, making and breaking camp and attending to one's own meals.

"Oh! they worked us, all right," said Keith, "but it has done all of us a lot of good, and we have learned the lesson that army officers have tried to teach the public for the past two years. We know that even should 'vast citizen armies spring to arms' were war to develop, they wouldn't be worth a rap for six months. We have worked for a month, and the principal thing we learned was that we were mighty poor excuses for soldiers in spite of all our sweating and drilling."

NEW COLUMBIA DEALER

Ellis Bros. & Joseph, Binghamton, N. Y., to Handle Line—Grafonolas in Burl Walnut—New Advertising Service

Among the recent new accounts opened by the Columbia Graphophone Co., New York, in near-by territory, was that of Ellis Bros. & Joseph, Binghamton, N. Y., who will handle the complete Columbia line and concentrate a considerable portion of its activities on the development of foreign record business. This concern caters to a large clientele in its territory, and the comprehensive scope of the Columbia Co.'s foreign record library will enable it to offer its customers an unlimited repertoire of foreign selections.

The Columbia Co. has advised its dealers that it is prepared to furnish burl walnut Grafonolas at a very moderate increase over the price of regular mahogany and oak finishes. The extreme scarcity of burl walnut has been the subject of considerable discussion among the dealers, as the wonderful figuring of the burl grain and its dark, rich coloring has made this finish quite popular throughout the country. According to the scale of prices announced by the Columbia Co., burl walnut Grafonolas may be obtained at the following prices, as compared with the regular finishes: Grafonola 85, burl walnut, $95; No. 100, at $115; No. 110, at $125; No. 150, at $175; No. 200, at $225. The prices quoted are the retail list prices for the various Grafonolas.

A new advertising service has just been offered to Columbia dealers whereby the dealer may tie up his name with the Columbia product in a distinctive, individual manner. Columbia distributors have been instructed to prepare a special hand-drawn design for each dealer requesting one, featuring his name with the popular "Note the notes" trade-mark. Electros can then be made in various sizes for single, double or triple newspaper column advertisements, for letterheads, billheads, envelopes or advertising circulars. This service is offered free of charge to all Columbia representatives.

PAULIN USES THEATRE PROGRAMS

Local Victor Dealer Advertises by Means of Four-Page Colored Inserts

SANTA BARBARA, CAL., August 4.—Ralph H. Paulin, Victor dealer of this city, is using a series of theatre program advertisements which embody many unusual features, and are attracting more than passing attention from theatre-goers. He has had printed special four-page colored inserts advertising the Victor line, and these are placed in the programs of the local theatre and other places of amusements. These inserts cost very little more than a regular advertisement, and serve to produce far better results from every standpoint.

The Adolph Furniture Store, of Wheeling, W. Va., has opened a Columbia Grafonola department.

The Harmonola Co., Inc., has leased the first floor and basement of 1611 Chestnut street, Philadelphia, Pa., as general offices.

LARGER STOCKS BEING CARRIED BY DETROIT DEALERS

Faith in the Future Shown by the Manner in Which Trade Is Prepared for Demands—A Little Hint on Record Salesmanship—Pathephone Dealers to Hold Convention—Talking Machine Association to Meet and Discuss Interest and Approval Questions

DETROIT, MICH., August 7.—For months and months we have been announcing in the Detroit letter of The World that business locally was showing tremendous increases as compared with previous years, so that to mention it again would be repeating "an old chestnut." But we do want to say that the number of talking machine dealers in Detroit and throughout the State is increasing very rapidly from the statements made by Michigan Victor, Columbia, Edison and Pathé jobbers. We have stated before that the city of Detroit is showing marked development in its population and its territory and wherever the new districts are developing, both for residences and business, there is a field for one of the talking machine lines. Probably the greatest development is taking place through the State; every town with a population of 2,500 people and up offers a lucrative field to someone for talking machines. In making the rounds of dealers, both in Detroit and suburbs, as well as through the State, The World representative finds large stocks are being carried—much larger than a year ago—which means that dealers are optimistic.

That the talking machine is a great educator for higher-class music is the statement made by Wallace Brown, operating the Wallace Brown Edison Store at 31-33 East Grand River avenue. "Many of our customers when they first buy their machine ask for a lot of popular records, band music, etc.," he said. "But we notice that invariably about two or three months later they buy better music—operatic selections—music that is real music."

A mistake made by many machine and record salesmen is to put on the record and then walk away until about the time the record is completed, says one Detroit dealer, who contends that this is a serious mistake in salesmanship as applied to the talking machine industry. "No matter how many times the salesman hears the record, he should sit down with the customer and listen to it again just as if he had never heard it before and was enjoying every bit of it. I never could see that method of playing records with only the machine and the customer in the room—it looks too mechanical. If we are to have salesmanship in the talking machine business, then we must see that customers get individual attention. Selling records is different than selling groceries, cigars, or other commodities."

It is expected that September will surely see a renewal of the business meetings of the Detroit Talking Machine Association, by which time most of the dealers will have returned from their vacations—the weather will be cool—and everybody will be actively interested in business problems. There is sure to be an agitation against the approval system and an attempt made to get every dealer in Detroit to charge 6 per cent. interest. If some dealers persist in not charging interest, there is very apt to be some real fighting on the proposition by other dealers, now charging interest, who say "let's all do one thing or the other."

J. R. Peckham, general manager of the Pathephone Co. of Detroit, is anxiously looking forward to the first convention in Michigan of the Pathé dealers which is scheduled for some time in September. Mr. Peckham has sent out letters to dealers and the answers indicate that Pathé dealers favor such a get-together.

It isn't often that George Smith, of the Detroit Music (Columbia dealer) Co., 288 Woodward avenue, takes a vacation, but this year he cast business aside and toured to Niagara Falls, going by way of Canadian territory.

The "Carola" phonograph now has Michigan representation—the State agency having been placed with the Michigan Carola Co., with offices in the Equity building, Detroit. The "Carola" is made in Cleveland.

The Edison phonograph is being vigorously pushed on the east side by the East Side Diamond Disc Shop, at the corner of Gratiot and Townsend avenues. The shape of the store is triangular and is very conspicuous in that section. The store is under the management of William Cummings, who has done very effective work in Detroit as an Edison demonstrator. The owner of the enterprise is a well-known East Side druggist.

Great preparations are being made at The Edison Store, Woodward avenue, Detroit, for a whopper fall trade. On every floor improvements are being made that call for greater efficiency. The Phonograph Co. of Detroit, occupying part of the same building, is also making changes to get prepared for the prompt rendering of service to its retail customers.

At Grinnell Bros., C. H. Grinnell, manager of the jobbing (Victor) department, and Harry Rupp, manager of the retail store, report good business for the first six months of 1916—better than previous years—with the outlook very bright for the balance of the year.

Max Strasburg, of Detroit, spent ten days of August at the summer home of his brother at Point Aux Barques, Mich. Mr. Strasburg told The World that he never carried as large a stock of talking machines and Grafonolas as at the present time. He felt sure that the coming fall would be a most successful one.

"The Melodophone" is the trade name of the talking machine which the Clough & Warren Piano Co., of Adrian, Mich., is just bringing out. They will be sold at all of the company's retail stores. The Detroit store is in the University Building and managed by R. L. Dupraw.

Edward Lyons, representing the Eclipse Musical Co., of Cleveland (Victor jobbers), was a recent Detroit visitor.

S. H. Nichols, district manager of the Columbia Graphophone Co., with headquarters at Pittsburgh, was also a recent Detroit visitor.

Domino RECORDS

How Big Should a Record Be?

Lincoln's much quoted opinion concerning the length of a man's legs serves as an apt guide to the solution of this problem. A record should be big enough to contain the music of a complete selection. Whether the record is seven inches in diameter, or 22, as some European records are, all we can require is that it play a complete selection.

DOMINO DOUBLE DISC RECORDS, though only seven inches in diameter, play for about three minutes, long enough for the average selection, and as long as the ordinary ten-inch record now on the market. This is possible because of the DOMINO method of recording, which allows 150 grooves to the inch as against 90 on most ten-inch records. This style of recording is direct and complete, marking a new era in record convenience.

DOMINO RECORDS play on all phonographs made to play vertical cut records and on all phonographs with a universal tone arm. When used on machines made to play only lateral cut records a small inexpensive and easily adjusted attachment is necessary.

Dealers

DOMINO RECORDS offer you the opportunity we believe you have been seeking. Their popular price—Three for One Dollar—will increase your customers' interest in the enlargement of their record libraries. This means for you many more sales and continuous profits.

Arrangements should be made now to insure prompt shipments of new Fall recordings.

INTRODUCTORY OFFER

The widespread response made to our Introductory Sample Offer made last month has induced us to repeat it. Twelve selected double disc records (selling price, 35c or 3 for $1.00) illustrating the Domino standard, popular, comic, vocal and instrumental selections, will be sent postpaid to any dealer for $2.50. Or a double sample order of 24 records for $5.00. Catalogues mailed on request.

JAMES FRAZEE, 30 CHURCH STREET, NEW YORK

AN ENTHUSIASTIC BASEBALL TEAM

Organized and Equipped by the Employes of the American Talking Machine Co., Brooklyn

Through circumstances over which they have had no control, such as unexpected vacations, etc., the members of the baseball team of the American Talking Machine Co., Victor distributors of Brooklyn, N. Y., are to be commended for their willingness rather than their accomplishments. The team has, however, crossed

American Talking Machine Co.'s Baseball Team

Standing, Left to Right: Herman Rushin, George Henkel, Albert Fountaine, James Williams, John Pittari, Gustaf Nelson. Sitting: Henry Dillon, Robert Bigelow, Albert Thraves, Max Gottlieb.

bats twice with the team representing the G. T. Williams Co., of Brooklyn, and divided the wins. There have also been a number of scrub games of unofficial character indulged in for practice purposes. The team is uniformed and enthusiastic. It is probable that it will play some other team in the trade at the outing of The Talking Machine Men, Inc., at Rye Beach, in September, although the matter has not been settled definitely.

David Bacon Richardson is the new member of the Richardson Illustrating Co., New York, the proud father being P. Bacon Richardson, head of the concern. Young Master Richardson, while only a few days old, is already giving vocal indications in fortissimo effects that he is a live issue.

VALUE OF ADVERTISING SERVICE

Offered by by Lyon & Healy to Victor Dealers Wins Commendation of Arthur D. Geissler

In a recent chat with The World, Arthur D. Geissler, vice-president of the New York Talking Machine Co. and the Chicago Talking Machine Co., Victor distributors, stated that the Victrola advertising service being offered to Victor dealers by Lyon & Healy, Chicago, is one of the best things yet put out as an aid to the dealer.

He stated that any dealer who can afford to use in his local papers the amount of space required for good, efficient advertising certainly cannot afford to overlook the opportunity offered them by Lyon & Healy to get cuts in which are incorporated high class drawings by excellent artists, together with suggestions of live up-to-date text matter which can be altered to fit his local conditions.

Only the fact of Lyon & Healy's enormous retail business and their opportunity to get up these drawings and advertising for themselves could have made this advertising service possible at the very reasonable charge asked.

Mr. Geissler states that he certainly shall recommend that the live dealers of the New York Talking Machine Co. and the Chicago Talking Machine Co. take advantage of this offer.

"BUSINESS TRULY REMARKABLE"

Says E. A. Widmann, President of the Pathé Frères Phonograph Co., In Discussing Conditions—Receiving Some Large Orders

"Business conditions at the present time are truly remarkable," said E. A. Widmann, president of the Pathé Frères Phonograph Co., New York, in a chat with The World. "We have received some unusually large orders from our distributors, and judging from indications at the present time, this fall will be a record-breaking season for all factors of the talking machine industry, and I am glad to say that Pathé dealers will evidently share in this prosperity.

"We are making every effort to increase our factory facilities all along the line, and I think that we can safely assure our distributors and dealers maximum efficiency and co-operation in their shipments this coming fall."

SHEBLE TALKS OF "DOMESTIC" AGE

Head of Domestic Corporation Says This Is the Age of Specialists in the Trade and Talks of Various Phases of the Business

While this may be the age of specialists and the era of the man who does some one thing best, in the talking machine business it is the age of the man who has grown up with the invention from the beginning, through every phase of its development."

So says Horace Sheble, president of the Domestic Talking Machine Corporation and creator of the Domestic talking machine, which in a short time has won much success. Mr. Sheble then proceeded to divide the ages of the talking machine business as historians divide the ages of life, beginning first with the experimental stage and leading up finally to present day system of greater output, reduced cost, and catering to the masses in the sale of a machine. Mr. Sheble was asked why he called his new machine the Domestic when the "ólas" were so popular with so many other makers. "Well," he said, "the Domestic isn't an imitation of any other machine, and I see no reason to suggest that it is even by name. Then, again, the Domestic is just what its name implies—a machine for home lovers for those who take pride in their home and enjoy all the comforts of life without false extravagance. No income tax list is necessary to prove that there are at least fifty million of these people whom the Domestic can help domesticate their homes."

OPERATING ENTIRE PLANT

Schloss Bros., Now Completely Recovered from Effects of Recent Fire—Buy New Auto for Local Transportation Purposes

Schloss Bros., manufacturers of talking machine cabinets at 637-645 West Fifty-fifth street, N. Y., are now operating the top floor section of their factory at full blast just as before the upper floor of the plant was wrecked by lightning some two months ago. The demand for cabinets for early delivery make the recovery of this space particularly welcome. After the fire Schloss Bros., put extra pressure on the undamaged section of their plant with the result that there was little, if any, delay in deliveries. In order to facilitate his work among the local dealers Edwin G. Schloss, general manager of the company, has purchased a new Maxwell car to solve the transportation problem.

RECENTLY INCORPORATED

The Meir Specialties Corp., of Wilmington, Del., was recently incorporated for the purpose of manufacturing and selling talking machine needles of steel, wood and bone. The capitalization is $100,000, the incorporators being C. L. Rimlinger, Norman P. Coffin and Clement M. Enger.

INTERESTING AEOLIAN-VOCALION WINDOW DISPLAY

St. Louis, Mo., August 5.—A show window display at Aeolian Hall last week showing an Aeolian-Vocalion in the midst of a vacation scene attracted much attention. The summer house was in the distance, everything being worked out nicely as to grading, foliage, lawn, lake, etc. The figures were dolls and they were having a gay time while a Model D machine supplied the music. Manager R. E. Ching originated the idea.

HOT WEATHER HELPS RECORD SALES

At Least This Is the Claim of Some Twin City Dealers—Talker Proves a Solace—Columbia Manager Preparing for Fall—Sales Staffs Being Increased—News of the Travelers

Minneapolis and St. Paul, Minn., August 7.—Hot weather does not stimulate the sale of talking machines, but it does boom the record business in a pleasing manner, the Twin City dealers have discovered since the superheated period began. When it is too warm to dance, too warm even for motoring, and the majority haven't even the energy to make their way to the bathing beaches the talking machine is a solace and a comfort, provided it is fed with new records. Hence the stimulus to the record sale.

The summer trade in Minneapolis and St. Paul alike has been far ahead of that of 1916. This is the announcement alike of the Beckwith-O'Neill Co., jobbers, of the Victor lines, Laurence H. Lucker, jobber of the Edison goods, and Robert Souders, Northwestern representative of the Columbia Graphophone Co.

The Victrola license in St. Paul held by Raudenbush & Sons, has been transferred by the Beckwith-O'Neill Co. to the Golden Rule department store, in St. Paul, which is to greatly enlarge and organize its talking machine department. The Gustafson-Taylor Piano Co., Minneapolis, has opened a talking machine department and is handling the Columbia line.

Robert Souders, of the Columbia Co., learned a lesson in preparedness last December when he was caught by an unexpected rush of orders and was unable to fill them. This will not happen in 1916. He has leased the entire fourth floor of the Childs' building, on Nicollet avenue, and has filled it with machines and supplies. This is the reserve stock and current orders are being filled from the old quarters on the third floor.

Laurence H. Lucker, president of the Minnesota Phonograph Co., Edison representatives in this district, reports that the July trade for his house was about four times as large in volume as for July, 1915. The outlook for a bulky fall trade is most encouraging as all the rural dealers are banking on doing better than ever.

Mr. Lucker recently has added two high class men to his staff, C. A. Briggs, formerly with the Edison Co. in New York, and J. R. DeSaxe, formerly with the Phonograph Corporation of New York. Mr. Briggs will tour the Northwest and Mr. DeSaxe will have charge of the advertising.

The Beckwith-O'Neill Co. has been minus the services of Eugene F. O'Neill for more than a month. He has not returned from the convention yet, but is due soon. After the big meet he visited the Victor factories and headquarters, and then went to Boston to look up friends and relatives. The company has been somewhat handicapped by its inability to obtain machines to keep pace with the demand.

Archie Matheis, of the Talking Machine Co., this city, and his wife have just returned from an interesting trip to Yellowstone Park, which they enjoyed in their motor car. The trip out took a week over long stretches of roads and trails difficult to circumnavigate, and through eighty-five miles of scenery which is so beautiful as to defy description in cold type. They had some rain and storms—enough to make it a hard trip, but difficulties of this kind are to be looked for, and they enable a man to cope with the most difficult problems in the talking machine field. Mr. Matheis, by the way, was one of the first to send a Victrola to the boys of the First Minnesota, who are down in Mexico.

The Tonola Phonograph Co. has started to manufacture phonographs at 711 Fifteenth avenue, N. E. L. A. Priess, well-known in the local piano trade, is the head of this concern.

COMPANY REORGANIZED

The Majestic Talking Machine Co. Elect New Officers and Will Have Capital Stock of $500,000—Occupy Six-Story Factory

Chicago, Ill., August 7.—Arrangements have just been completed whereby the Majestic Talking Machine Co. is to be re-organized and backed by sufficient capital to insure its being, within the coming year, one of the big factors of local talking machine manufacture. Formalities of increased stock have been complied with and the reorganized concern will have the backing of capital stock amounting to $500,000. In the past the company's activities have been hampered by a lack of capital sufficient to handle the company and its product properly.

C. A. Hartman, president of the American Bankers' Service Co., is the leader of the new interests. He is a business man of long standing and will bring to the company, in addition to new financial backing, much valuable experience in commercial affairs. Although Mr. Hartman will become treasurer of the new company, he will continue to make his offices at room 1614 Republic Building.

The six-story plant formerly used by the Gulbransen-Dickinson Co., manufacturers of pianos, player actions, etc., which is located at 312-314-316 Union Park Court, has been taken over and the first lot of 500 Majestic machines to come out of the new factory is now in the course of completion. A similar number of machines will be turned out every fifteen days until new equipment will make it possible to radically increase this number.

"We feel that we have, in the Majestic, a commercial proposition of the highest character," said Mr. Hartman, "and we also think that in the acquisition of the patents of our president, Mr. Blood, we have further cause for optimism. We will be able to handle, because of our immediate banking connections, paper of both the dealer and the consumer and we will take it in any amounts."

Mr. Blood will continue as president, Mr. Hartman will be treasurer and O. J. Kloer as sales manager. Other officers have not yet been announced.

REARRANGES BROOKLYN STORE

The Ranah Co., Victor dealers at 10 Fourth avenue, Brooklyn, N. Y., has recently rearranged its store, adding five new demonstration booths, besides enlarging their space devoted to records. The interior has been redecorated and the exterior has also been improved by being repainted.

Joseph F. Collins, sales manager of the Pathé Frères Phonograph Co., New York, returned Monday from a two weeks' stay at Woodbourne, N. Y. He confirmed his reputation for conservatism by stating frankly that his entire catch of fish during that period consisted of one lone fluke.

BANNER MONTH IN LOS ANGELES

July Trade of Most Satisfactory Proportions—Andrews Talking Machine Co. in New Home—Window Display of Records of the World—So. California Music Co.'s Departments

Los Angeles, Cal., August 7.—July has proved to be a banner month for all of the talking machine dealers in Los Angeles. Usually a comparatively slow month of the season, this hot month has upset all predictions and has shown itself as a delightful surprise to the trade in general.

The Andrews Talking Machine Co. has moved its headquarters from 422 South Broadway to 350 South Broadway. The new shop is very tasteful in every detail and up to the minute in modern fixtures. There are seven record booths, each well lighted and ventilated. The first two booths are arranged so that it is possible to make one large room out of them, if necessary. The store is lighted throughout with clusters of small electric lamps attractively arranged. The Andrews Co. will, as formerly, handle the Edison disc, Victor and Columbia.

At the Wiley B. Allen store Manager Lindsey reports a very exceptional total of July sales. Many of the force at present are away enjoying vacations, and those remaining are kept busy during the absence of the others, by the unusual summer business.

The Geo. Birkel Co. reports the best July business in the history of the concern, and the best month of the year since the winter. The Birkel people handle the Victor exclusively.

Manager Boothe, of the talking machine department at Barker Bros., reports himself as being more than satisfied with his July sales, and is looking forward to an equally good August. This firm now handles the Edison cylinder line, in addition to the Edison disc, Victor and Columbia.

F. S. Allen, proprietor of the Musical Record Co., offers one of the most unique and interesting window displays seen in the city for a long time. It consists of records made in all parts of the world. Mr. Allen collected these records while on his recent visit to New York City. In the collection may be found discs from London, Paris, Berlin, Prague, Petrograd, Peking, Smyrna, Jerusalem and many other far-away places. The Musical Record Co. carry the Edison disc and Victor lines.

E. W. Bornell, manager of the Pathé Shop of this city, tells of a fine business month and expects to have a splendid autumn, as the new model Pathé will be on the market at that time. Mr. Bornell is strongly in favor of organizing a retail talking machine dealers' association similar to that in San Francisco. Many of the local trade are similarly disposed and it is believed that efforts of organization in this direction will soon be inaugurated.

The Southern California Music Co. now has two separate phonograph departments. The Edison department, which includes all Edison Diamond Disc and Edison Amberola machines is under the direct supervision of Wm. H. Richardson. Mr. Richardson has been with the above firm ten years and heretofore has had charge of the entire talking machine department. The other department, known as the talking machine department and including all Victor and Columbia goods, is in charge of H. H. Fish.

HALLET & DAVIS CO. OPEN TEN DISTRIBUTING OFFICES

Piano Manufacturers Will Establish Branch Offices All Over the Country to Distribute the Pathé Frères Line of Talking Machines and Records—Business in Charge of Harry T. Leeming

Chicago, Ill., August 7.—Announcement is made here to-day that the Hallet & Davis Piano Co. will open here within a few days the first of ten distributing offices through which the company will distribute the Pathé Frères line of talking machines and disc records.

Harry T. Leeming, formerly with the Edison interests, will manage the new phonograph division of the Hallet & Davis Co.'s activities and will appoint in each of the ten cities to be selected a district manager who will have charge of that territory. Chicago has already been placed upon the list and the quarters of the Pathé Pathephone Co. of Illinois, located on the fifth floor of the Shops Building, at 17 North Wabash avenue, have been taken over and will be ready for business shortly. R. O. Ainslie will be office manager and Frank J. Bowers will act as special representative to be identified with the work of opening up the other distributing points for pushing this line of talking machines.

Jesse Rosenstein, of the National Piano Co., Baltimore, Md., Pathé distributor, was a visitor this week at the executive offices at the Pathé Frères Phonograph Co., New York. He spoke encouragingly of trade conditions and placed a good-sized order for Pathephones and Pathé discs.

CABINETS

Columbia Records TRADE MARK Note the Notes

DISCUSSES EDUCATIONAL VALUE

Of the Talking Machine—Interesting Views of H. A. Yerkes, Western District Manager of the Columbia Co., on Live Subject

In a recent interview in the Denver "Rocky Mountain News," H. A. Yerkes, Central Western district manager of the Columbia Graphophone Co., interestingly discussed the educational value of the talking machine, and its importance in promoting an appreciation of the better class of music.

Mr. Yerkes' talk was published in connection with the recent song contest held in Denver,

H. A. Yerkes

Col., which was described in detail in last month's World. The winners of this contest visited the Columbia Co.'s laboratories in this city and made a record which has been pronounced a signal success.

In one section of his interview, Mr. Yerkes said:

"Anything that stimulates an interest in community music should be encouraged. And certainly we cannot begin to estimate the value of a contest that brings to light talents that otherwise might have been lost to the world. Very often young singers are too timid to display their gifts. All they need is encouragement.

"The News-Times-Columbia contest was an educational thing and the Columbia Co. is always looking for educational ideas. Records are one of the greatest of all educational factors. They have brought good music to homes everywhere. In country districts, where good music was unknown you will hear the boys whistle 'Il Trovatore' and 'Faust,' for the talking machine has made the classics as familiar to them as 'Yankee Doodle' and 'Dixie.'

"Little tots learn to carry tunes from hearing the records. It teaches languages and special folklore. Its use in schools is increasing. Our company has specialists who do nothing else but seek for ways of making the talking machines of even more value to the educational world.

"All the time we are seeking to improve the Columbia Grafonola. We have four of the best inventors in the world working to make it better. We have the two best chemists in this country working for us and managers everywhere are seeking for new ideas.

"Our catalogs form a complete library of music. Each contains a treatise on the composition, the composer and the inspiration. The boy or girl in whose home there is a Grafonola learns from our catalogs the history of the piece played and the history of the composer. The catalogs give information that is educational even to the trained musician."

PATHE DANCE RECORDS POPULAR

Numbers Recorded by Rector's New York Dance Orchestra Finding a Ready Sale

The Pathé Frères Phonograph Co., New York, has just sent out a letter to its jobbers and dealers calling attention to the character of the Pathé dance records, recorded by Rector's New York Dance Orchestra. As indicative of the success of these dance records the company calls attention to the following letter recently received from the State Street Pathephone Co., of Chicago.

"The dance record, 'Honky Tonky' (No. 35038), played by Rector's New York Dance Orchestra, is a very good seller. It is played by the kind of an orchestra that the people like. It should be profitable for you to put out a number of the up-to-date selections, played by just this sort of an orchestra, in your coming monthly supplement. We have a considerable demand for 'Walkin' the Dog,' and also 'Pretty Baby' records. The new Grace Hoffman record (No. 52001) is very fine and everyone seems to want it."

NEW DISPLAY FIXTURE FOR DEALERS

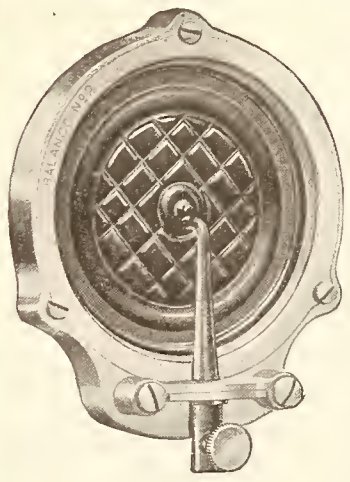
New Rack for Record Lists Opens Up in Flat Position and Is Easily Installed

The new swinging fixture for record lists just put out by the Universal Fixture Corp. of New York City, involves a new and practical advantage. The rack, instead of opening up in the usual V shape, swings back flat, no matter at what point the rack is opened up. This naturally has a decided display advantage in that it means the cards will be plainly legible clear across the room. The rack itself is surprisingly light, is finished in a handsome black and can be located anywhere with two screws.

That record lists appearing in swinging display fixtures are a great advantage in promoting sales for the lists of "timely" records is not a proposition requiring argument. The new company in the field, realizing this, are launching a campaign to cater directly to and for the dealer, whether that dealer handles Victor, Columbia, Pathé, Edison or other lines.

Order liberally now—Christmas is coming!

BALANCE SOUND BOX



Half Size No. 2

THE **new** No. 2M Balance Sound Box, with the **improved** Metalloy Diaphragm is a revelation for tonal reproduction. Several of the largest phonograph manufacturers have adopted it.

Read what this noted artist has to say about the *Manophone*.

It is a true artist's expression of approval, the greatest recommendation possible for a musical instrument.

Lucille Lawrence

Prima Donna Soprano

The brilliant American soprano whose phonographic records are among the most sought after in Italy to-day.

Miss Lawrence is a finished artist—her knowledge of music is exceptional. Read what she has to say about the Manophone. An unsolicited expression from one who knows should convince you far more than anything we could say about this new and wonderful machine.

JAMES MANOIL C

Executive Offices 60 Broadway New Y

Opinion Of One Who Knows

The Manophone

has already won the admiration and approval of those whose knowledge of music makes them competent judges of musical quality.

The Manophone leaves nothing to be desired, be it richness of tone, volume of sound, or the true reproduction of the most delicate musical instrument—all these and more are its attainments.

The beauty of the cabinet work of the Manophone is worthy of its musical quality and mechanical refinements.

The Manophone owing to its exclusively constructed tone-arm, plays all makes of records perfectly. It is one of the few machines on the market which represents how well a phonograph can be made and not how cheap.

The complete Manophone line is now ready. Its range includes models at $15, $30, $50, $75, and $100.

Every instrument is a remarkable value at the price and allows you a most liberal profit.

Our advertising will be extensive and complete. It will be of a distinctive and unusual nature. It will bring interested buyers to the stores of Manophone dealers.

Get in touch with us now and get the details of this new and wonderful talking machine.

Exclusive territory still open. An unusually liberal proposition for those who write first. Send for catalog.

PANY Inc.

Factory Newburgh N.Y.

AN EFFECTIVE LETTER FOR THE USE OF DEALERS

CHICAGO, ILL., August 8.—One of the most popular things the Chicago Talking Machine Co. has ever done for their dealers is supplying them with expertly constructed letters, neatly printed in imitation typewriting on attractive letter heads. The cut which extends across the top of the letter shows a large group of Red Seal artists clustered around a mahogany Victrola. The letter, which is designed to accompany the monthly Victor bulletin, tells about the principal numbers in a snappy, convincing manner, and is furnished the dealer with his "signature" all ready for mailing. The company also furnishes the dealer with mailing envelopes bearing his reprint and advertisement of one or two of the feature records. With the equipment goes the requisite number of bulletins also with the dealer's reprint. All he has to do is to fold letters, insert them, with the bulletin, and stamp and address the envelope. This service is given to the dealer practically at cost to the Talking Machine Co., and they get quantity rates which are only a fraction of what the dealer would have to pay otherwise, and which would prove prohibitive. One of these letters is here reproduced.

July the twenty-seventh
1 9 1 6

TO OUR CUSTOMERS:-

It isn't often that a popular song makes such a big hit that the Victor Company have to put it out again.

But that's just what has happened with "MY MOTHER'S ROSARY" and "YAAKA HULA HICKEY DULA". This time the selections are made by the Avon Comedy Four - new artists for the Victor - but very favorably known by vaudeville goers. They give a new version of these justly popular numbers.

Another number you'll surely like is "WHEN THE SUN GOES DOWN IN ROMANY" from "STEP THIS WAY" by the Sterling Trio - It's chuck full of melody.

For those who like sentiment in their music - and we all do more of less, don't we? - there's "LOVE ME AT TWILIGHT" a pretty little ballad that is very pleasingly interpreted by Herbert Stuart.

After all though, it's hard to beat the old songs for simple, sweet melody. That's why everybody will enjoy "IN THE GLOAMING" by the McKee Trio. It's doubled with a delightful new number "SUPPLICATION" played by the same talented trio.

Then there's another new artist who has joined the long list of Victor Headliners - Miss Mabel Garrison - a wonderful coloratura soprano of the Metropolitan Grand Opera. Her singing of the "LULLABY FROM ERMINIE" is exquisitely done - You'll be glad to have a record of this gifted soprano in your collection.

To balance up this unusually attractive list for August is the "STAR SPANGLED BANNER" by Geraldine Farrar - certainly a most timely offering and sung in a most inspiring way by this patriotic, truly American woman.

There are loads of other good numbers - let us play them for you. Don't forget that July 28th is Opening Day for these new August records.

Very truly yours,

HARRIS DRUG CO.

Towner, N. Dakota.

Reproduction of Letter Prepared by Chicago Talking Machine Co.

DEATH OF CLYDE H. SLEASE

Clyde H. Slease, treasurer of the Lynn Phonograph Co., New York, was killed last week in an automobile accident near Goshen, N. Y. Mr. Slease who was prominent in the business world, was thirty-five years old. He is survived by a widow and three children.

LIST OF FOREIGN RECORDS

The Victor Talking Machine Co. sent out to its dealers recently a group of foreign and domestic supplements of new records which are worthy of more than passing attention, considering the season of the year. The foreign record supplements included new Bohemian, German, Greek, Hebrew, Hungarian, Italian, Polish, Roumanian, Russian, Ruthenian, Spanish and Swedish Victor records.

A VISITOR FROM TEXAS

E. B. Shiddell, manager of the Columbia Graphophone Co.'s wholesale headquarters at Dallas, Tex., was a visitor to New York last week, with optimistic reports of conditions in the "Lone Star" State. In common with other Columbia distributers, Mr. Shiddell has been inconvenienced to some extent by the shortage of Columbia product, but he was delighted to find that the Columbia factories were increasing their output day by day.

The Motion Picture Welfare League, Inc., New York, has been incorporated with a capital stock of $5,000 to manufacture and deal in phonographs, supplies, motion pictures, etc. The incorporators are M. Perlman, G. Littman and J. H. Maynard.

Washington Dealer Recently Exhibited Art Style Vocalions in Attractive Manner

WASHINGTON, D. C., August 9.—O. J. De Moll & Co., the well-known piano house at Twelfth and G streets, N. W., which also handles the Aeolian-Vocalion line of phonographs in this city, is planning to give this line an aggressive exploitation this fall, along lines which will materially increase the prestige of this phonograph in Washington.

A Section of the Vocalion Display

A short while ago, O. J. De Moll & Co. presented an exhibit of art style Aeolian-Vocalions which attracted visitors from a number of out-of-town points. This exhibit proved a signal success, and served to impress upon music lovers in this section that the Aeolian-Vocalion is a distinctive type of phonograph, embodying original constructional ideas, with unlimited possibilities as to cabinet design.

It is more than likely that O. J. De Moll & Co. will hold similar displays during the coming season, and accompany these exhibits by appropriate musical programs. This medium of publicity not only advertises the Aeolian-Vocalion in a high-class manner, but interests the public in the artistic side of the modern phonograph, as distinguished from its every-day purposes.

The accompanying photograph showing one section of the Aeolian-Vocalion art style exhibit will give some idea of the character of the instruments comprising this special display. The warerooms were attractively decorated during the period of the exhibition, and the newspaper publicity accorded the display called attention to the individuality of each style instrument exhibited.

DISPENSARY FOR EDISON PLANT

It Is Completely Equipped with Competent Physician and Trained Nurse in Charge

A recent innovation at the plant of Thos. A. Edison, Inc., Orange, N. J., is the establishment of a medical and surgical dispensary to provide free treatment for employes who may be injured or taken sick while at work. The dispensary is in charge of Dr. A. Daniel, a well-known physician of East Orange, N. J., who is assisted by a trained nurse. No expense has been spared in equipping the plant hospital and every detail is most modern.

TRADE VISITORS TO CHICAGO

Among recent trade visitors to Chicago were J. G. Moore, Sioux City; J. M. Buck and wife, Lansing, Mich.; F. F. Pitzell, of the George B. Peck Dry Goods Co., Kansas City, Mo.; W G. Haenschen, manager of the talking machine department of the Scruggs, Vandervoort & Barney Dry Goods Co., also Lorraine Merritt, of the same company, and Julius Beckman, A. D. Geissler, New York; A. Sonergan, of Block & Kuhl, Peoria, Ill.; A. O. Farlow, Doyle Furniture Co., Galesburgh, Ill.; W. Hanke, Gimbel Bros, Milwaukee, Wis., and J. B. Williams, of the Wurzburg Dry Goods Co., Grand Rapids, Mich.

REPORTS HEALTHY TRADE DEMAND

The Mutual Talking Machine Co., New York, reports a very healthy demand for the new "Mutual Special" machine, which it announced in last month's issue of The World. The members of the sale staff state that this machine is meeting with a ready sale throughout the country, and the returns received from the advertisement in the July World have made this company enthusiastic boomers of the drawing powers of advertising in The Talking Machine World. The "Mutual Special" is a floor machine, retailing at $37.50, and playing all types of records.

INTRODUCE "NATIONAL BLUEBIRD"

The National Talking Machine Co., 118 East Twenty-eighth street, New York, has just placed on the market a new line of machines to be known as the "National Bluebird" talking machines. At present the company is concentrating on the manufacture of four styles, retailing at $50, $85, $150 and $200. Particular care was taken in selecting the cabinet designs for the "National Bluebird" machines, which embody several distinctive features, including record ejectors and castors.

John Feuerstein has opened a new piano and talking machine store in Sturgeon Bay, Wis.

NEW SONORA CORP. WAREHOUSES

Additional Space Badly Needed to Care for Rapidly Increasing Demands Upon That Concern—Used for Storage of Raw Material

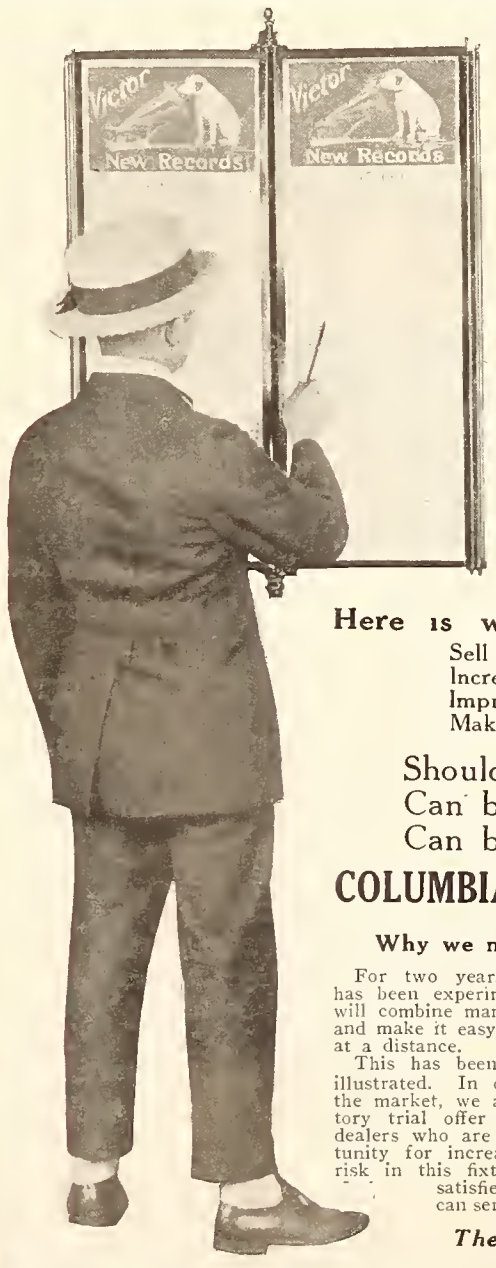
In line with the "service first" policy of President George E. Brightson, Sonora Phonograph Corp., 57 Reade street, New York, plans were recently made whereby two five-story warehouses were leased, one on Duane street and the other on Broadway, these two places to be exclusively utilized for storage purposes. Here will be stored raw material (there is no chance to store finished machines) so that as the plans mature for more increases of factory output during the fall, everything will be in readiness for the work.

Constant watch over all phases of Sonora work, although helpful, has not as yet made any material decrease in the number of orders on hand for immediate delivery. In fact, as fast as the company creates additional output, the demand seems to grow in excess of the accomplishments, and as Mr. Brightson puts it: "It seems more of a problem to diminish orders than to increase the output."

The growth during this summer over the output of the same period last year is figured to be a trifle over 400 per cent. increase, and those familiar with the policies of merchandising back of the Sonora, know that this is all "cash business" sent in by the better class of business men. In fact, the Sonora Co. selects dealers much as a man selects a site for his home.

In addition to the foregoing two new warehouses in New York, the company has also leased additional space for the use of its Chicago branch.

The McLane & Quentrel Piano Co., of Copperhill, Tenn., is now installed in a large brick building there and is featuring a fine line of pianos, players, Victor Victrolas and small goods.



A Brand New Record Bulletin Fixture

TEN DAYS' TRIAL TO THE FIRST 250 DEALERS WHO TAKE ADVANTAGE OF THIS OFFER

Holds 12 Monthly Bulletins

Every wing on this fixture lies perfectly flat

Here is what a UNIVERSAL will do for you

Sell your old records
Increase sales of new records
Improve the appearance of your show room
Make it easy for your customers to see your lists

Should be in every booth
Can be seen from any angle
Can be used for any standard size list

COLUMBIA VICTOR EDISON PATHÉ

Why we make you this offer?

For two years our "Service Department" has been experimenting to get a fixture that will combine many advantages of wing display and make it easy for customers to see the lists at a distance.

This has been accomplished in the fixture illustrated. In order to place the fixture on the market, we are making a special introductory trial offer to the first 250 progressive dealers who are willing to seize every opportunity for increasing business. You run no risk in this fixture, because if you are not satisfied at the end of ten days you can send it back to us without expense.

The trial number is limited

HERE'S THE COUPON SEND IT ALONG TO-DAY

Universal Fixture Corporation
131 West 23d Street New York

Kindly send me, the cheapest way, one of your phonograph bulletin fixtures. If this is not satisfactory, I am to return it to you at your expense in ten days. If it does what you claim, I am to remit $8.50 to you at the end of the ten days' trial.

ORCHESTRA LEADER NOW MANAGER

W. Gus Haenschen, Well Known in St. Louis Musical Circles, Manager of Talking Machine Department of Vandervoort Music Salon—Sells Records Made by Own Orchestra

ST. LOUIS, Mo., August 10.—The newest recruit to the talking machine selling game in St. Louis begins at the top. He is W. Gus Haenschen, manager of a popular orchestra bearing his name, but in the new capacity he is manager of the Victrola department of the Vandervoort Music Salon. He begins his work as an enthusiast and with full confidence that he can make it go. Already he has evidence that he has routed the "summer jinx" and has a good record to show for his first month. Another feature of Mr. Haenchen's business career is that he sells records made by himself. Recently he and a part of his orchestra had several records made by the Columbia personal service department and he has had quite a run on these. They are chiefly his own compositions, several of which have enjoyed good sale throughout the country. Local musical folk look upon Mr. Haenschen as an authority on questions of popular music and he is certain to have a considerable following in the record business because of this fact.

W. Gus Haenschen

"I did not come into this business expecting to upset old methods," said Mr. Haenschen to The World correspondent. "I first intend to find myself and learn my bearings exactly in this new phase of musical work. I think that selling is a good deal of faith in your product, enthusiasm and 'pep' and those three things I have, along with some common sense. I have found that I enjoy the situation immensely and that the fact that I am selling mechanical musical machines is not going to cause me to let up in my own music. Indeed, I find association with the records here rather encouraging to musical work." Mr. Haenschen is a native of St. Louis, a graduate of Washington University and an athlete.

TO AMUSE PARALYSIS VICTIMS

Dr. Haven Emerson, Commissioner of Health for New York City, has issued an appeal for used talking machines for the benefit of sufferers from infantile paralysis. Hundreds of little patients are now in the hospitals, afflicted with the disease, and they have little or no means of amusement. Those who care to contribute either machines or records for this purpose have been requested to send their donations to Dr. Otto J. Wilson, of the Department of Hospitals, at Sixteenth street and the East River.

SMOKING ROOM IN VICTOR STORE

SPRINGFIELD, MASS., August 9.—The Meekins, Packard & Wheat Co., Victor dealer, in this city, is planning to introduce a number of innovations this fall in the way of unusual wareroom furnishings and decorations. Last winter this company equipped one of their demonstration booths as a smoking room and a number of business men soon formed the habit of dropping in to hear the new Victor records, and enjoying a cigar at the same time. It is probable that similar innovations will be ready in time for the fall season.

STEPHENS BILL HEARINGS

It has been announced that further hearings on the Stephens bill advocating price maintenance have been postponed until later in the year when Congress reconvenes. At that time the opposition will advance their arguments, subsequent to which the advocates of the measure will probably be heard in rebuttal.

ANOTHER MODEL OF OUR 32 STYLES

Write for our new eighty-two page catalog

The only one of its kind in America. It contains every essential part of a talking machine. It has over five hundred illustrations of parts and thirty-two different styles of phonographs.

Retail **$35**

Oak or Mahogany. Size, 20¼ in. Wide. 20½ in. Deep. 44 in. High. Double spring motor, 12-inch turntable, reversible tone arm, playing all records.

LUCKY 13 PHONOGRAPH CO.
3 East 12th Street, New York

ATTRACTIVE COLUMBIA AD

The Columbia Co. carried a very attractive page advertisement in the July 22 issue of the Saturday Evening Post, entitled "The Stage of the World." The illustration used in this advertisement carried out the thought of the headline, and the text pointed out that "You have a stage of the world in your home if you own a Columbia Grafonola and Columbia records."

A. Brown, of the Good Value Bargain House, Baltimore, Md., was a caller at Columbia headquarters last week, with optimistic reports of the business outlook in his territory. Mr. Brown is making plans for a prosperous fall trade, which he states, is certain to come.

IMPORTANT CHANGE MADE IN CONDITIONAL SALES LAW

Recent Decision Rendered by the Court of Appeals Gives Buyer the Right to Claim Damages by Pleading Breach of Warranty—Sale of a Piano the Case in Question

On July 11 the Court of Appeals of the State of New York handed down a decision which constitutes an important change in the Conditional Sales Contract Law and which should be carefully regarded by piano dealers and other merchants transacting business under this law.

Briefly summarized, the Court of Appeals held "that in an action by the seller under a conditional sale agreement to reclaim the goods by replevin, the buyer may defend by pleading a breach of warranty by way of recoupment in diminution or extinction of the price."

The facts in this case are as follows: Peter C. Peuser sold to Elizabeth D. Marsh under conditional sale agreement a piano for $260, of which $25 was to be paid in merchandise, $16 in cash and the balance in monthly installments of $6 each. The defendant failed to pay the sum of $141 with accrued interest. The plaintiff thereupon commenced an action in replevin to recover possession of the piano. The defendant set up the defense that relying upon certain warranties made by the plaintiff she had paid the sum of $119, to apply on the purchase price and set up a counterclaim of $200 damages sustained by her by reason of plaintiff's breach of warranty. The lower court held that this defense did not apply to this case, but the Court of Appeals reversed this decision and decided that such a defense could be interposed in this action; thereby holding that conditional sales fall within the provision of the Uniform Sales Act.

In commenting upon this decision a number of prominent attorneys point out that it is directly contrary to what has heretofore been the law in this State.

Lorence & Harkavy, New York, attorneys for the New York Piano Manufacturers' Association, state that the courts held in two cases previously recited that the defense of breach of warranty was not available to a defendant under a conditional sale agreement until the full price agreed upon had been paid.

"The present decision of the Court of Appeals," states this firm, "makes absolutely no mention of these two previous decisions, and while it does not appear in the opinion of the court that these two cases are expressly overruled, it is impossible to reconcile such a decision and consequently, in our opinion, these two cases are overruled.

"This will seriously affect future actions of this nature and undoubtedly purchasers of pianos and other articles under conditional sales contracts will attempt to defeat such actions or cut down balances due by means of this defense. It will simply mean that greater care will have to be exercised by dealers and salesmen in making statements to customers at the time contracts are signed."

THE HEALING POWER OF MUSIC

Some New and Interesting Views on the Effect of Music Upon the Mental and Spiritual Being—How Young David Played the Harp for King Saul—Most Effective Music

Robert Haven Schauffler, in a recent issue of the Good Housekeeping magazine, says in part that "most of us suffer more mentally and spiritually than we do physically. Headache is bad enough, but a heartache is worse. A month of the grippe is by no means as difficult to bear as a month of the blues."

"Since King Saul used to have young David come in with a harp to drive away his evil spirit, the healing power of music has been known and deliberately used by an occasional wise man here and there."

Then in talking of the effect of music on everyone, he makes one proviso, "Therefore, I do not offer prescriptions which follow with full confidence that they will all be helpful to everybody, but simply in the hope of providing a starting point for each one to work out his own individual system of musical therapeutics."

For instance, he says: "What one needs as an antidote for morbidity is healthy, sunlit music like 'The Lass with the Delicate Air,' composed by Dr. Arne and sung by an artist like Sembrich; Schubert's song, 'The Trout'; the variations from the Beethoven 'Sonata in A flat, Opus 26'; 'The Sandman,' by Brahms; or Boccherini's famous 'Minuet.'

"These pieces, however, and those to be suggested later, are put down with many misgivings and mental reservations. It is dangerous to generalize about the effect of any particular piece upon humanity, because the nature of music is to be 'all things to all men,' to call up a different picture or idea in the mind of each one who hears it.

"For effacing a disagreeable impression, with completeness and dispatch, there is nothing quite so effective as well-selected music well performed. Any of the following pieces should produce the desired results: Schubert's 'Unfinished Symphony,' his 'Linden Tree,' as sung by a singer like Witherspoon; Macdowell's 'To a Wild Rose' and 'Starlight,' 'Angels Ever Bright and Fair,' by Handel; Chopin's 'Ballade' in A flat; and these things by Schumann: 'A minor Concerto,' 'Scenes from Childhood,' 'The Lotus Flower' and the 'Symphonic Etudes.'

"As another antidote for the blues, sometimes it is better to hear unlaughing music which is simply effervescent with optimism and the joy of life. I mean things like Schubert's 'Hark, Hark, the Lark' and 'Who is Sylvia'—things like 'The Heavens Are Telling the Glory of God,' from Haydn's 'Creation'; the first movement of Beethoven's 'Seventh Symphony,' or the 'Alla Danza Tedesca,' from his string quartet Op. 130. And let me recommend such waltzes as Waldteufel's 'Estudiantina,' Johann Strauss' 'Thousand and One Nights' and 'Beautiful Blue Danube.'"

Mr. Schauffler closes the article with "Lastly, as a provider of change of air, certain music is almost as good as the wishing mat in the fairy story."

Talking machine dealers might utilize Mr. Schauffler's suggestions to excellent advantage and make a special campaign for record sales among their patrons who are indisposed or "under the weather."

UNIT CONSTRUCTION CO. FILES SUIT

PHILADELPHIA, PA., August 11.—The Unit Construction Co., Thirty-first and Chestnut streets, of this city, makers of Unico demonstrating rooms, announced to-day that they had filed action in the United States Court, Eastern District of Pennsylvania, against the Huskey Manufacturing Co., of the same city, claiming infringement of design and construction of Unico demonstrating rooms, as well as infringement of literature.

This company also asks for an injunction restraining the defendant from using the design, construction or literature of the plaintiff, together with an accounting and damages.

RECORDS CHARM THE BOVINE SOUL

Denver Dairyman Installs Talking Machine in Barn to Increase Cow's Yield of Milk

DENVER, COL., August 10.—Ragtime music at milking time is an innovation on the dairy farm of W. W. Wilcox, just east of Denver. He says the herd shows its appreciation by yielding an increased amount of lacteal fluid. He recently installed a phonograph in one end of the barn.

"It serves two purposes," explained Mr. Wilcox, a former Chicago man. "It keeps the cows quiet, for the cow has an aesthetic, musical temperament; it keeps the men from talking and forgetting their work. This constant interruption from talking among the men interferes with the flow of milk and lessens the quantity the cow would yield otherwise.

"The music charms and soothes the bovine soul as nothing else can, and under such conditions she will allow even an ordinary milker a greatly increased quantity.

"I know that she pays for the music."

INCREASE CAPITAL STOCK

Frank E. Bolway & Sons, Inc., of Syracuse, N. Y., have certified to an increase in capital stock from $100,000 to $125,000.

WINS PRAISE FROM ARTISTS

Manophone Announced Last Month by James Manoil Co. Wins Quick Approval—James Manoil Returns from Trip—New Illustrated Catalog to Be Out August 20

According to reports from the executive offices of the James Manoil Co., 60 Broadway, New York, the announcement of the Manophone which was made exclusively in The World last month, was received with much enthusiasm by talking machine dealers all over the country. Although a new product, the Manophone has also won the quick approval of several well-known artists who have strongly endorsed it. Among these is Miss Lucile Lawrance, a soprano prima donna of note, and her endorsement of the Manophone which appears on another page of this issue is considered by the officials of the company as a splendid tribute. She was recently one of the soloists at the entertainment of the National Open Air Festival at the Polo Grounds, New York, when Verdi's "Requiem Mass" was sung by nearly 1,000 voices.

James Manoil, president of the company, arrived home the early part of last week from an automobile trip to Chicago, where he found a wave of prosperity throughout the country which he visited. "From what I could see," he said to a World representative this week, "we have every occasion to feel satisfied that there will be big business during the coming fall. We have had a very satisfactory demand for the Manophone, which, although just placed on the market, has appealed to many dealers owing to its several individual characteristics, and its exceptional tone quality. We are manufacturing a machine notable for its construction and workmanship and artistic cabinet design as well as containing these individual features."

The new Manophone catalog will be ready for distribution by August 20. According to B. Abrams, vice-president and general manager of the company, no expense has been spared in making this booklet one of the most artistic which has ever appeared in the talking machine field. It will contain the various styles of the Manophone illustrated by the use of reproductions of wash drawings, which have been completed with the greatest care.

LARGE INCREASE IN VOCALION SALES

New Orleans, La., August 10.—Manager H. L. O'Brian, of the D. H. Holmes Co., states that the Aeolian-Vocalion department of the store has shown a 65 per cent. increase in sales during the past month. The firm has recently been featuring a series of advertisements concerning the desirability of the Vocalion as a means of entertainment on yachts and in summer camps and many good sales have resulted from this seasonable publicity.

SECURES AGENCY FOR PATHEPHONE

Stockton, Cal., August 10.—The Pedersen Music Co. has been given the exclusive agency in this territory for the Pathé Pathephone. Henry Burgee, formerly with the Pathephone Shop of Chicago, and now connected with the local Pathé headquarters in San Francisco, who recently visited the Pedersen store, states that he believes the outlook for the Pathé line in this territory for the fall and winter to be exceptionally promising.

CHANGE DATE OF OUTING

On page twenty-five of The World this month is an item regarding the annual outing of The Talking Machine Men, Inc., at Rye Beach, the date of the outing is given as September 6. As we go to press it is announced by the association officials that the outing date has been changed to September 12, and that it will positively be held on that day.

The regular monthly meeting of The Talking Machine Men, Inc., will be held at Keen's Chop House on Wednesday, August 16, at 1 p. m., when the final details of the outing will be arranged and other matters of interest discussed.

EFFECTIVE AEOLIAN PUBLICITY

Artistic and Well-Written Advertisement Features the Aeolian-Vocalion

"Music as Wonderful as Mother Love" was the heading of an unusually artistic advertisement used by the Aeolian Co. in the Sunday newspapers to feature the Aeolian-Vocalion. An illustration pertinent to this heading was a feature of the advertisement, which read:

"Sweet and low! . . . tenderly caressing the spirit like a gentle, soft-skinned hand—a fragile, pastel-tinted thing of dreams, yet surging with a wonderment of unquestioning love—the lullaby!

"Perhaps you have sat enthralled as such a fascinating melody, glowing with a strange, an almost celestial beauty, sighed from beneath the bow of a master violinist—or breathed softly from the lips of a gifted, geniused singer. All the joy of such an experince you may have time and time again.

"For the Aeolian-Vocalion, the wonderful new phonograph, searches out from every record its last subtlety of sound—finds, even, all the delicate, elusive harmony of the music of mother love and gives it back to stir your soul like the gentle, sweet tone of distant chimes, or the hushed vox humana of a great church organ.

"A triumph of musical instrument making, indeed—this great new phonograph which voices perfectly the pale, appealing delicacy of the lullaby, or sounds truly the bold, ringing imperiousness of a fanfare of trumpets.

"As the Vocalion gives forth its glories of music, you may take the Graduola—the remarkable Vocalion expression control—and by instinctive pressure touch each phrase with a tinge of your own personality—impress each tone in the mold of your own music feeling.

"This is the real wonder of the new phonograph—it gives you all the pleasure of listening to glorious music, and the supreme joy of making music—the prime joy of creative musicianship."

TRUTH IN ADVERTISING PAYS

Snappy Letter on This Subject Sent Out by a Chicago Sales Manager—Crooked Dollar Gained To-day Means Loss of Ten Honest Dollars To-morrow—Building a Reputation

The following weekly bulletin was issued recently by the sales manager of one of Chicago's most progressive retail piano houses, which handles talking machines, and it offers a real sermon on the matter of truth in advertising and selling. The bulletin says in its introduction: "We are developing a very large force of fighters for business. The thing that is continually in my mind is: Can we develop this force as quickly as we are developing and still develop the right working principles in the minds of these men and women?" The following article gives this subject proper treatment:

The Truth in Advertising

"Listen, young man! The cleverest man in the world is the man that tells the truth, and tells it all the time, not occasionally.

"Sometimes you can profit by a lie, but it is like dodging bullets; you never know when you are going to get hurt.

"Lying is a game. Sometimes it is a very exciting game. But it is essentially gambling. And gambling, any sort of gambling, is not business.

"The fundamental laws of business are just as accurate and as well established as the principles of geometry.

"It is hard to see this, for our visual range is limited. Most of us can see the crooked dollar coming to-day, but not the ten straight dollars it is going to lose us to-morrow.

"Real business success is cumulative. It grows like a snowball. And the one thing that makes it keep us growing, even while we sleep, is our persistent truthfulness and dependableness.

"If you put an advertisement in the paper announcing goods worth $5 for sale at $2, and if the people come and buy, and find out the stuff is not worth 10 cents, you may make a one-day's gain, but you have alienated a lot of indignant customers and have started to saw away the posts that sustain your reputation.

"If you have a store rented for a week only and propose to conduct a sacrifice sale of goods that will make everybody disgusted who buys them, then perhaps you may lie with a high hand and a stretched-out hand.

"But if you are in the town to stay, and want regular, returning, increasing, satisfied, friendly customers, it will pay you to stick to the old-fashioned truth.

"Exaggeration is lying. It does not take long for the people in the community to get the habit of discounting 25 per cent. of all you say.

"If you continually overstate and vociferate, you must keep on getting louder until you soon become incoherent.

"But if you habitually state only what is soberly, honestly true, by and by everything you say will be always above par.

"A man's repute for truthfulness is as much a part of his capital as are his store and stock; so much so that he can raise money on it.

"As civilization progresses, business becomes more and more an affair of credit and trust. The very foundation of big business is trustworthiness. Therefore, if you are ever going to get beyond the peanut-stand and push-cart stage of merchandise you must establish a basis of dependableness.

"There is not one thing in this world, young man, that can be of as much value to you as building a reputation such that men will say, 'Your word is as good as your bond.'

"It is well to be clever and keen and Johnny-on-the-spot; it is well to look out for number one and to know a good bargain, but best of all is to have the world say to you:

"'Whatever that man says can be absolutely relied upon.'"

CHICAGO'S SIX BEST SELLERS

CHICAGO, ILL., August 11.—The six best Columbia record sellers here this month were "The Murray Walk" and "The Girl on the Magazine," "Babes in the Wood" and "Love Me at Twilight," "There's a Quaker Down in Quaker Town" and "When It's Springtime in Killarney," "Pua Mohala" and "Hawaiian Melody," "Simple Confession" and "Hearts and Flowers" and "Where Did Robinson Crusoe Go with Friday on Saturday Night" and "I'm Going Back Home and Have a Wonderful Time."

In the Pathé library the six best sellers were "Christmas Valse" and "La Marseillaise," "Thou Brilliant Bird" and "The Last Rose of Summer," "Silver Threads Among the Gold" and "Come Back to Erin," "My Automobile" and "Gootman Is a Hootman Now," "Honky Tonky" and "La Confession," and "Wake Up, America" and "Georgia Moon."

The August popular sellers of the Victor were "Do What Your Mother Did (I'll Do the Same as Your Dad)" and "When the Sun Goes Down in Romany," "My Mother's Rosary" and "Yaaka Hula Hickey Dula," "Uncle Tom One-Step" and "Arrah, Go On, I'm Gonna Go Back to Oregon," "In the Gloaming" and "Supplication," "Song to Hawaii" and "Hawaiian Hula Melody" and "Lullaby from Erminie."

The following were the popular records offered by the Edison Co.: "American Fantasie" and "National Emblem March," "Lo! Hear the Gentle Lark" and "Where'er You Walk," "On the Hoko Moko Isle" and "Yaaka Hula Hickey Dula," "My Bonnie, Bonnie Jean" and "Nanny I Have Never Loved Another Girl Like You," "Kangaroo Hop" and "Setting the Pace," and "Home to Our Mountain" and "Praise Ye."

PLEASED AT BUSINESS PROSPECTS

Fred P. Oliver, vice-president and general manager of the Blackman Talking Machine Co., New York, Victor distributor, returned recently from a visit to the company's dealers up-State. He was greatly pleased to learn that the Victor dealers are closing an excellent summer business, and judging from the plans now under way, the coming fall will be a record-breaking season in every respect.

Boone Medford and J. E. Massie, of Waynesville, N. C., have built up a splendid business in Columbia Grafonolas, and are carrying a full line of machines and records.

The American Graphophone Co. has declared the regular quarterly dividend of 1¾ per cent. on its preferred stock, payable August 15 to stock of record August first.

Pathé

Pathé is Making

Pathé Something New—Different—Better!

The Pathé Dealer travels an easy road!

Of course, he has Pathé Prestige in both the moving picture and phonograph fields, but his main advantage lies in the exclusive and unique excellence of the Pathé product.

The Pathé Pathephone, with its all-wood "Violin" sound chamber, is more than a mere talking machine. It is a fine musical instrument entirely in a class of its own.

Nor is there any argument or comparison where Pathé records are concerned.

Such TONE — SOUND — VOLUME — have never been equalled.

Pathé records have longer sound waves than ordinary records.

They are played with a polished ball-shaped jewel (a genuine sapphire) instead of a sharp-pointed destructive needle.

PLEASED WITH CONDITIONS

W. C. Fuhri, United States manager of the Columbia Co., and A. C. Erisman, New England district manager, made a trip through this territory recently visiting the Columbia wholesale centers and a number of the company's dealers. Mr. Fuhri was well pleased with the conditions he found in the New England States, and the dealers in turn were delighted to learn that the Columbia Co.'s increased manufacturing facilities will be reflected in a steady increase in the machine and record output.

Eli Farney, director of the Ladies' Band, at Hutchinson, Kan., and J. J. Farney have purchased the Edison Shop at 18 North Main street, from E. J. Hollister.

DEATH OF HENRY D. KING

Manager of Personal Record and Professional Departments of the Columbia Co., Passed Away in Branford, Conn., on August 10

Henry D. King, manager of the personal record and professional departments of the Columbia Graphophone Co., New York, died on

Henry D. King

August 10 at the home of Mrs. King's family, at Branford, Conn.

Mr. King had been ill for the past five months but it was thought that he was convalescing at the time he left his home in Brooklyn for Branford. He suffered a relapse, however, and died suddenly on Thursday.

During the comparatively short while that Mr. King had been associated with the Columbia Co., he had won the esteem and friendship of his associates in all departments. Few men showed greater interest in their work than Mr. King, for he never seemed to consider time or effort in the discharge of his duties.

The remarkable success of the Columbia Co.'s personal record and professional departments may be attributed in a large measure to Mr. King's indefatigable efforts, coupled with his pleasing personality and wide acquaintance in the artistic and musical professions.

Mr. King was also well known in insurance circles in this city, having occupied the position of vice-president of the National Security Co. prior to joining the staff of the Columbia Graphophone Co.

The funeral was held on Saturday afternoon from Branford, quite a number of the Columbia Co.'s executives being present. Among the many floral offerings was a beautiful wreath from the employes of the Columbia Co.

A. T. DOTY APPOINTED MANAGER

A. T. Doty has been appointed manager of the sales department of the Arion Manufacturing Co., 250 Devonshire street, Boston, Mass., makers of the Arionola. Mr. Doty is an experienced and widely known talking machine man.

RETURNS TO HIS DESK

R. G. Craig, head of the efficiency department of the New York Talking Machine Co., New York, Victor distributor, returned to his desk Monday after a two weeks' rest, upon which he conceived a number of new ideas which will be introduced to the company's dealers in the near future.

SECURES COLUMBIA AGENCY

The Heidelberg Furniture Co., Jackson, Miss., has secured the agency for the Columbia Grafonolas and records in that city. Ben Martin is in charge of the new department.

SWINDLERS BUSY IN NEW YORK

Have Numerous High-Priced Machines Sent to One Address After Making Small Payment, and Then Re-Sell Them Before Second Payment Is Collected

It has been reported to The World that a band of swindlers has been operating among talking machine dealers in New York City recently and causing some considerable loss. The members of the band are purchasing Victrolas XIV and XVI on instalments, paying $10 down and having as many as half a dozen instruments shipped to one address in a single day. The Victrolas are re-sold soon after delivery and the fraud is not discovered until an effort is made to get the second payment. Dealers are warned to be particularly careful in investigating the standing and references of those at present buying the two types of machines named.

CO-OPERATION IN SCHOOL WORK

The value of reaching the young people is being taken into really practical account, to judge by the embossed announcement-invitation recently issued by I. Davega, Jr., Inc., of New York City, the significant part of which reads "We take pleasure in announcing that, beginning with September 1, we will have a separate Educational Victrola Department, in charge of Miss H. M. Moses, who is well known in school and educational work."

NEW EDISON STORE

L. H. Walter, of the Walter Piano Co., Hillsboro, Tex., has leased the newly finished Interurban Building, where he will carry a complete line of pianos, sheet music, small goods and Edison Diamond Disc phonographs.

The Pettit Jewelry store, at Downs, Kan., has opened a department devoted to the Pathé Pathephone.

SECURING RAW MATERIALS

How the Difficulty in This Field Was Overcome by Horace Sheble, President of the Domestic Talking Machine Corporation

PHILADELPHIA, PA., August 10.—Horace Sheble, president of the Domestic Talking Machine Corporation, in an interview with The World representative, stated that Domestic talking machines are meeting with a most favorable reception from the trade.

"We are closing dealers' contracts daily," said Mr. Sheble, "under our sales plan of granting a dealer exclusive selling rights in the territory he can logically cover, and are receiving enthusiastic letters from many of our dealers regarding the favorable reception the public is extending Domestic talking machines.

"Our problems in getting started have certainly been legion, but our plant is now fully equipped, everything is in full swing and our output is increasing by leaps and bounds. Even though this is the dull season of the year we are shipping our product on orders as fast as it comes through.

"Every talking machine manufacturer has faced a serious condition during the past year in endeavoring to secure raw materials, and this situation is not improving materially as far as we can see.

"Several months ago through fortuitous circumstances plus an efficient purchasing organization, we were able to obtain delivery; not promises, of such raw materials as will enable us to operate our plant for some six or eight months to come, and such conditions place us in position to make prompt shipments and insure our being able to take proper care of our trade this fall when the real demand for talking machines starts.

"We thoroughly realize how discouraging it is to a dealer who spends his money creating a demand for a product and then finds deliveries do not materialize. From the present condition of the raw material market we believe many dealers will face this situation in the fall unless they thoroughly satisfy themselves that delivery promises are based on facts and not on manufacturers' hopes that conditions in the raw material market will better themselves.

"We have had several offers to sell raw materials at advances over cost, but our business is manufacturing talking machines, not speculating in raw materials, and we expect to devote every pound to manufacturing our product, as our aim and ambition is to give our trade the prompt service which we feel is such a substantial portion of their opportunity to succeed."

THE RECOVERY OF SMALL DEBTS

Canadian Legislature Passes Bill Enabling the Collection of Debts of $50 or Less

WINNIPEG, MAN., CAN., July 31.—A bill of interest to Canadian piano merchants will go into effect the first of August, providing for the recovery of small debts, not exceeding $50. The bill provides that a creditor may go to the magistrate of a civil court and secure a summons against any debtor who owes said creditor $50 or less, and upon service of the summons, the debtor shall appear in court and answer the allegation upon which the summons was issued. If the claim of the creditor is proven, the court will then enter judgment against the debtor for the sum in question. The costs of the proceeding are very light, and it is thought that this bill will have a very beneficial effect in enabling merchants to collect small bills which are due them and which hitherto have not been worth the rather high cost of a court proceeding.

PITTSBURGH DEALERS HOLD OUTING

The Talking Machine Dealers' Association of Pittsburgh held its second annual outing at Olympia Park, near McKeesport late last month. A large number of dealers and their friends attended, and an elaborate program of games and athletic events was given for their entertainment. Prizes were given the winners of the athletic contests, and a bountiful supply of good things for the inner man helped everyone to enjoy the affair.

A VISITOR FROM MILWAUKEE

Henry M. Steussy, secretary and treasurer of the E. O. Schmidt Piano Co., Milwaukee, Wis., was a caller this week at the offices of the Pathé Frères Phonograph Co., whose products his company handles. Mr. Steussy spoke encouragingly of the business situation in Milwaukee, stating that Pathé business the past two months had been far in advance of expectations.

CONCEITED

"Van Hamm, the actor, seems to be growing a trifle deaf. I wonder what caused it."

"I'm sure I don't know, but he claims it is the result of constant applause."

PRACTICALLY 100% PROFIT
on Every Sale of the

Playerphone
The QUALITY TALKING MACHINE

MUSIC STORES Can Make from $1000 to $5000 Extra Profits Yearly.

Selling This Beautiful Talking Machine.

It sells on sight and sound—No experience needed to sell Playerphones

Everywhere high-class music stores are handling Playerphones in conjunction with their regular business. People are demanding high-grade cabinet talking machines. There are no finer instruments built than Playerphones, and the Playerphone has the added advantage of playing *all* disc records as well or better than the instruments for which the records were made. The adjustment of the sapphire ball, Jewel point, steel or fiber needle, as the case may be, and just a slight turn of the wonderfully balanced full curve tone arm does it.

Exclusive Features—100% Profit

These and many other exclusive features make the Playerphone the most popular talking machine on the market and the easiest to sell. Our terms are so liberal that you make about 100 per cent. profit on every sale, and our time payment plan to you permits you to get your profit without having to tie up any money or incur any risk. From the way most music stores are selling Playerphones, you should make from $1,000 to $5,000 extra profit a year, handling the Playerphone.

The Price is Irresistible

That is another wonderful feature of Playerphones. While they are the utmost in talking machine construction, very highly finished in mahogany or oak, the prices of the seven sizes range from $50 to only $225. Each one of these Playerphones compares with, and in most cases is, mechanically, musically and artistically, better than instruments selling at from $75 to $400.

The complete line of Playerphones is superior in every way. They give you an opportunity for big profit and prestige you can't afford to miss. Come to Chicago and let us demonstrate the Playerphone to you. If you decide to handle our line, your traveling expenses will be refunded. If you can't come, fill out this coupon and mail it *to-day—sure!*

THE PLAYERPHONE TALKING MACHINE CO.
General Office and Show Rooms: **Republic Building, Chicago, Ill.**

3 Weeks From Broadway To Your Store.

Three weeks after Al Jolson first sang, "I Sent My Wife To The Thousand Isles"—an Emerson Record of the song was on the shelves of our dealers.

This is an excellent example of the efficiency and promptness of Emerson recording.

While other manufacturers take *months* to release a new number—we take *weeks*.

Broadway's stamp of approval is our cue to act.

Immediate service is one of the many exclusive Emerson features.

Emerson 25c Double Discs

have already taken their place in the record field.

Emerson Records are the result of combining the best talent, the most approved methods, and the leading popular selections while they are at the height and even before they are at the height of public favor.

In addition to all this, there is the exclusive Universal playing feature which makes it possible to play Emerson Records on *all* phonographs without an attachment, except one positive feed machine.

Emerson 25c Double Discs play ¾ the time of a standard 10-inch record.

You are losing valuable sales and big profits every day you are without the Emerson line.

A small investment is all that's necessary—the sales are big, the profits liberal, the turnover rapid.

The first step to big profits is to attach that coupon to your letterhead and mail it to us—take that step now →

CONCERT HALL A FEATURE

Of the Attractive and Spacious Store of the Kesselman-O'Driscoll Co. in Milwaukee

MILWAUKEE, WIS., August 4.—One of the attractive Victrola stores in this city is that of the Kesselman-O'Driscoll Co., at 1920 Fond du Lac avenue. The salesrooms are spacious and admirably laid out, while a feature of the establishment, which is proving a great attraction, is the concert hall, which embraces over 400 square feet of floor space. This hall has been placed at the disposal of clubs, societies and individuals for entertainments as a meeting place, free of charge, and has proven quite a business move. Music on the Victrola is supplied to the users of the hall, so that a goodly number of new prospects are made acquainted with the possibilities of the Victor through this means.

Concert Hall at Kesselman-O'Driscoll Store

MAKING DISC RECORD CABINETS

The Nanes Art Furniture Co., New York, is now devoting a considerable portion of its plant to the production of disc record cabinets. These cabinets have been on the market for some little time, and have won general praise from the company's dealers. One of the must successful cabinets in the line is the "Esco" wagon, which enables the owner of a machine to wheel the instrument around at his convenience.

The W. B. Smith Music Store, Marietta, O., has been moved to new quarters at 276 Front street, that city.

The Cut Rate Phonograph Shop has leased a new store at 22 East 125th street, New York City.

A GREAT PUBLICATION

Tell the average person that it takes 125 pages, 11 by 15 inches, to thoroughly report the affairs in the talking machine industry of America for a single month, and that individual will think you are a fit subject for an investigation of your sanity. The proof of the matter will be found in the current issue of The Talking Machine World, just issued from the New York offices. This magazine, while of interest to every person having an interest in the talking machine industry, is particularly appealing to the talking machine dealer. The issue just off the press carries the complete report of the recent convention of the National Talking Machine Jobbers held in Atlantic City. The convention is reported in a splendid manner by expert writers. Aside from the convention report there is more than a hundred pages of interesting reading and advertising matter appealing directly to the dealer. Altogether, it is a great publication and is better than anything yet issued by The World in its history of twelve years' publication. But we wonder how it is possible to issue such a splendid magazine at the very small price of a dollar a year. It certainly is worth more.—R. E. Cord, in the Camden (N. J.) Courier.

AUGMENT THEIR RECORDING STAFF

"We have been more than pleased with the reception accorded our records by the dealers throughout the country," said T. H. McClure, general manager of the Domino Phonograph Co., New York, in a chat with The World. "In the Middle West, for example, Domino records have not only met with a ready sale, but the dealers have voluntarily written us letters of praise regarding the musical qualities of our product.

"During the past few months we have completed arrangements with a number of well-known artists whose records will be announced in time for our dealers to feature them in our fall trade. We also have other plans which will augment our recording staff materially.

"Among our records which have been very successful are the recordings by Richard Darville, baritone, and Alan Turner, baritone, both of whom are well known in musical circles, and whose Domino records are gaining in popularity day by day."

A talking machine which announces the hours is the latest invention of a music lover. A series of records is so arranged that a short air is played every fifteen minutes, a longer record marking the full hour. It should make getting up pleasant.

GRAFONOLA PROMINENT AT EDUCATORS' CONVENTION

Work of Educational Department of Columbia Graphophone Co. Wins Praise of Teachers—Furnishes Music for Folk Dancing at City College Stadium

The Columbia Graphophone Co.'s educational division, which is under the direction of Frederic Goodwin, played a prominent part in the activities of the National Education Association, which convened in New York last month.

Folk Dancing to Music of the Grafonola

Among the events in which the Columbia Grafonola was used was at the stadium of the College of the City of New York, when 4,000 children danced to the music of the Grafonola. The Columbia Co. carried an extensive display in the musical section exhibit, and the efficiency of the Columbia school product was emphasized by the enthusiastic approval of the visiting school superintendents and teachers, some 32,000 in number.

Mr. Goodwin suggests that Columbia dealers throughout the country reap the benefit of the pleasing impression created by the Columbia exhibit, and keep in close touch with the teachers and educational authorities in their localities.

THE VALUE OF PROPER SERVICE IN BUSINESS BUILDING

It Is Through Service That the Manufacturer and Wholesaler Develop and Hold Close Relations with the Dealer—One Instance Where a Jobber's Courtesy Didn't Pay

A good classification, perhaps, of the selling factors that keep the manufacturer and dealer in close harmony, are: 1, quality of products in relation to price; 2, personality of salesmen representing manufacturer; 3, the service offered by the manufacturer to the dealer.

Without harping on the first two, let us consider the matter of co-operative service—a truly twentieth century departure. Manufacturer's service to the dealer may take almost any number of forms—it is limited only by the originality of the men in the manufacturer's employ. Among the more common forms might be mentioned such as help in the matter of copy for retail advertising; circular literature for mailing to prospects, decorative signs and placards, assistance as to efficiency in account keeping, and filling of orders on time, before time, and of a special nature—all of which costs the manufacturer a good deal in point of time and money.

When a dealer is confronted with the problem of what line to handle, his technical knowledge is brought into play in judging the quality of the manufacturer's product. Naturally this is primarily important. Next comes the personal equation which is not a matter where specific intelligence is called into play—we are influenced by another's personality not so much in accordance with our will to be so influenced as we are in spite of ourselves. There is then just one field, other than the one involving technical knowledge, which requires the exertion of critical judgment. This is the matter of service which the manufacturer offers the dealer.

It behooves the retailer to pay considerable attention to the quality and extent of service and to by all means give due credit to the manufacturer or jobber who is really co-operative in the service proffered. Too often dealers regard service as a legitimate "gift" which entitles the manufacturer or wholesaler to no reciprocation by way of repeat orders and regular business. The following incident from this year's trade may help illustrate this attitude of the dealer.

A certain retailer wanted a talking machine of a special weathered oak finish. He went to the jobber from whom he usually purchased and was informed it would be impossible to supply such a machine. The dealer then went to another jobber with whom he did some business and was likewise turned down. Finally, he approached a wholesaler with whom he did practically no business and who therefore owed this dealer nothing. Nevertheless, this last wholesaler, in a spirit of real service, offered to try, and as a result, delivered the machine two days before the specified time. Moreover, the wholesaler had to pay dealer's price for the particular machine and in addition assumed the transportation charges which covered some 700 miles.

Now, ordinarily, one would suppose that such generous treatment would warrant gratitude of a decent sort; yet when this wholesaler at a later date phoned the same dealer to ascertain if the dealer wanted some rare records the jobber happened to have in stock, there was lack of even courtesy. The dealer answered the 'phone in person, heard what the jobber had to say, and rejoined, "Wait a minute." The jobber waited for the dealer to determine whether he needed the specific records. To his surprise the 'phone was taken up by the office girl, who, after hearing the story all over again, informed the jobber that Mr. ———, the dealer, was busy. Needless to say the jobber hung up his receiver and whistled (or cursed) softly.

The dealer in question not only showed ungentlemanly action and a lack of gratitude for favors conferred at the jobber's expense, but he showed a failure to be thoroughly up-to-date in his business methods. In this stage of commercial life, the live retailer should not only recognize and appreciate service extended by the manufacturer and wholesaler—he should even seek out the wholesaler and manufacturer who offer a good product combined with the greatest amount of practical co-operative service, as the best party to do business with.

NEW AL JOLSON WINDOW CARD

A new Al Jolson window card in colors has just been issued by the Columbia Co. Al Jolson is termed by many the "King of fun-makers," and his records have achieved signal success. This new window card will doubtless serve to stimulate interest in his Columbia recordings, and thereby influence sales.

H. C. FOWLER IN NEW POSITION

H. C. Fowler, formerly manager of the Columbia Grafonola department of the Hall-Stephenson Co., of Knoxville, Tenn., is now associated with Sterchi & Haun, in the same capacity, the latter firm having secured the agency for the Columbia line from the Hall-Stephenson Co.

Two New Triton Winners

—ANNOUNCING the only single spring, worm drive motor of American manufacture. A substantially built motor of standard quality, playing with absolute accuracy of universal speed from beginning to end of a record. Ready for delivery. Sample sent on receipt of $2.75, complete with ten inch turn table.

Tone arm and reproducer No. 4. Reproducing tone of unexcelled clearness and brilliancy. The arm is of handsome, unusually dignified lines, highly nickel-plated, performing everything that may be expected of a tone arm. Ready for delivery. Complete sample sent on receipt of $2.00.

Other motors of our manufacture: Single spring gear motor, complete with ten inch turn table, $1.65; double spring, worm drive motor, playing two twelve inch records with one winding, motor without equal, complete with twelve inch turn table, accurate speed tabulator, $4.25.

We also make tone arms and sound boxes ranging in prices from $1.00 to $3.75 per set.

Triton Phonograph Co., 41 Union Sq., New York

THE SURVIVAL

QUALITY BASIS OF COMPETITION

Not Price Juggling or Shell-Game Methods—Some Interesting Observations

The world is surely, if somewhat slowly, coming to realize that quality is the real basis of competition. What's the use of buying a piano or a suit of clothes for a small sum of money if they are of such inferior quality that they cannot satisfactorily serve the purpose for which they were designed?

Advertising and the use of trade marks have brought about a tremendous improvement in business conditions which is of direct benefit to the public. The Ingersoll dollar watch has become a standard by which all watches can be measured. The public has found out what a dollar should be able to buy.

If the man who thinks 98 cents is enough to pay for an Ingersoll watch will open up an exclusive store to handle nothing but Ingersoll watches, he will find out that he has been mistaken. Or, again, if he thinks the dealer pays too much for the watches he buys from the factory, let him build a watch which can be sold for less and do the same work. He will find out again that he has been considerably mistaken.

It doesn't take brains to substitute cheap material—all you need is a yellow streak and no conscience.

Good material is good material, and its value is established. There are boundaries beyond which not even the largest corporation can go. We, for instance, use immense quantities of mahogany. Mahogany represents value. We can buy it in the open market for about so much and then we come to the limit. Even if we went to Africa and acquired certain lands on which mahogany grows, we should have to cut and ship that mahogany to the point where it can be manufactured. Having done that we should find that our own mahogany was costing as much—or more—as the mahogany we had bought on the open market.

The same thing is true in every line of manufacture, and so long as first-class material has a certain value, no one can cut prices without making it up somewhere else. That is merely robbing Peter to pay Paul.

There was a time when the wealthy manufacturer could pull off all sorts of underhand stunts and put unfriendly dealers or competing manufacturers out of business by juggling with the price and varying the quality to suit, says the "Voice of the Victor." But once a manufacturer puts a trade mark on his goods and advertises the price of them, he has given hostages to fortune—he—while he may not have intended to do so—has given a bond guaranteeing his own good behavior.

Competition, far from being eliminated, becomes even more active and of more value to the public. The Ingersoll dollar watch will continue to prosper—as it should—so long as it continues to be an eminently satisfactory dollar's worth. Any other manufacturer who can produce a better watch at a dollar is entirely free to do so, and such competition—a competition in quality—is of real and measurable benefit to the public, while price cutting or price juggling represents nothing more than a glorified shell game.

R. F. Bolton, district manager of the Columbia Graphophone Co., New York division, returned recently from a fortnight's stay at Asbury Park, N. J. In his absence his sales staff hung up record breaking figures for the month.

INDEPENDENT GERMAN-AMERICAN TALKING MACHINE CO., Inc.

54-56 BLEECKER STREET, NEW YORK CITY

REPAIRS

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

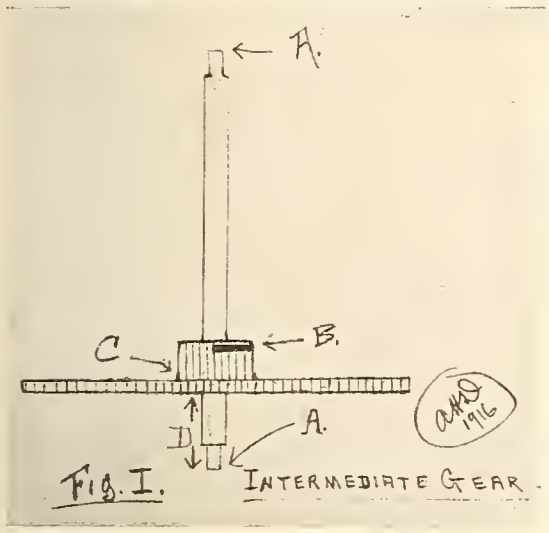
Conducted by Andrew H. Dodin

[This department of The Talking Machine World which was started with the April issue, is designed for the service of all classes of our readers, including those who make, and those who sell, talking machines. A talking machine out of order often reflects both upon the maker and dealer, and yet frequently the trouble is so slight that the simple knowledge of repairs will permit of the machine being put into proper running order, quickly and practically without expense. In the large cities talking machine repair shops are, of course, available, but this department should prove of particular value to the out-of-town talking machine men.

Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 25 East Fourteenth street, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

REPAIRS THAT CAN BE MADE WITHOUT THE USE OF NEW PARTS

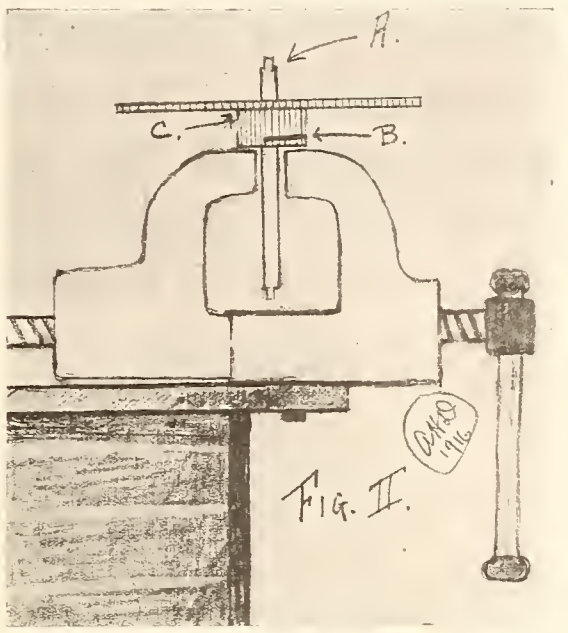
Many repairmen and dealers have at different times been confronted with the difficulty of securing the proper part to replace a broken or worn one, and particularly has it become the case at the present time when repair shops are beginning to receive in greater numbers the small cheaply made motors—both foreign and



domestic. I want to say a few words to the repairman who must get his repair out without waiting for the new part to arrive and try and show with the aid of a few simple shop drawings, how a broken gear or the broken teeth of a spring cage gear can be easily repaired.

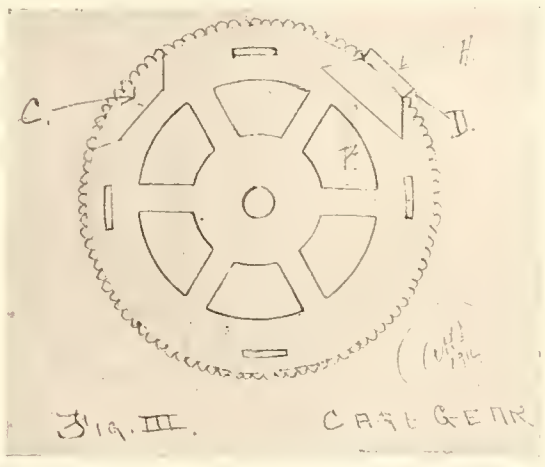
The teeth of the pinion on the intermediate gear in many cases become stripped in one place, Fig. 1, B, permitting spring cage gear to run free. As spring cage gear almost always runs in a position nearly at top of pinion—it is always possible to take pinion gear and turn same around, bringing the bottom, C, Fig. 1, of teeth or undamaged part into playing position.

To do this I place gear in vise—Fig. 2—strike shaft at A driving same through pinion



and gear—and in doing so I am very careful not to damage shaft bearing points at A. In some cases pinion is set into gear at C and it will be necessary to take a file and shape opposite end of pinion to fit into the brass gear.

After fitting pinion to gear I replace shaft getting distance from bottom of gear to end of shaft D, Fig. 1, about the same as it was originally, then place gear and spring cage into motor and see how cage gear meshes with pinion. It may be necessary to drive shaft a little further through gear in order to get



pinion into just the proper running position.

The spring cage gears on these types of motors are also a source of a great deal of trouble. The teeth are very often broken off or mashed in such a way that the gear will not run in mesh with pinion teeth on intermediate gear.

It is a very easy matter to replace the broken teeth in these gears providing you have facilities for soldering, a good file, a jeweler's saw and some small pieces of brass or steel plate.

In Fig. 3 at A you will see the outline of the piece I cut out of gear where teeth have been broken off, making my saw cuts at an angle so that when new piece is fitted and soldered into place it will be impossible to pull it out. At C you will notice outline of the wrong way to make saw cuts. When a piece of this shape is soldered in it is liable to pull out at any time. After making the cut in gear I take a small piece of material and file it into shape so that it fits loosely into cut—leaving a projecting piece at D big enough to file out the new teeth. Now solder the piece into position—file flush on both sides of plate and then shape the required number of teeth with a small file.

Before replacing gear on spring cage be sure that spring is caught on hook of shaft and that spring has proper graphite mixture. I advise the use of Ilsley's graphite lubricant, which can be purchased ready mixed in just the right proportion of graphite, oil, etc., so that it is unnecessary for you to add anything to it and for these small spring cages would use only about a tablespoonful to the cage, more than that would prevent motor from running a 12-inch record.

DESCRIPTION OF RECORD THIEF

Local Dealers Describe Negro Who Is Reported to Have Stolen Many Records from Local Stores During Past Few Weeks

At the last meeing of the Talking Machine Men, Inc., several members gave an excellent description of the record thief who has been operating to considerable extent in various parts of the city. According to the descriptions, which agreed, the offender is a prosperous looking light complexioned negro, about five feet seven inches tall, and rather stout, whose method of working is to abstract the records from their accustomed racks and place them in a false pocket in the front of his trousers. They say that the thief is very clever in finding means for causing clerks to go to another part of the store while he grabs the records. He does not appear to favor any particular records, but takes those most conveniently at hand.

The Phonograph Finance Co., of Cleveland, O., was recently granted a charter of incorporation by the Secretary of State at Columbus, O. The concern is capitalized at $5,000.

"What's a Pearsall SERVICEE?"
said a dealer

This was a new one to him, although he had been one for a number of years. A PEARSALL SERVICEE is a dealer who is served by Pearsall Victor Service; he is one of those men who know good service, and who is growing because he lets us help him.

Better find out for yourself that this is true.

UNUSUALLY HEAVY RECORD BUSINESS IN MILWAUKEE

Sales Come Close to Exceeding Those During Holiday Season—Influx of Cheap Machines Has Effect—Progress of the Sonora Line—Ministers Praise Aeolian-Vocalion—Edison Dealers in Milwaukee Forming Trade Association—Other News of the Month

MILWAUKEE, WIS., August 8.—Sales of records in Milwaukee during July reached the largest volume ever known in any one month, save only the period preceding the Christmas holidays. The enormous disposition of records actually created a serious shortage at one time during the month, but herculean efforts by the jobbers in getting quick action from the factories overcame the difficulty and at this time the trade is ready for most any kind of a crisis.

The sale of machines is being well maintained, but the recent spell of terrific heat has affected business to some extent, which naturally is to be expected in July and August. Nevertheless, dealers say stocks are moving faster than last year.

The influx of so-called cheap machines, retailing at $5 to $15 admittedly, has cut into the sale of higher-priced machines, especially for summer home and outing use. As a matter of fact, however, most of the people who buy a $5 talker for country use have purchased regular machines for their homes, and every machine sold, whether it cost $5 or $500, is a potential record customer, so the odds are about even.

The Premier Talking Machine Co., which established a Milwaukee branch on October 1, 1915, has promoted Manager Park Adams to the position of manager of the new Michigan branch, with headquarters at Detroit. T. W. Abell, of New York, has succeeded Mr. Adams as manager of the Milwaukee interests, at 220 West Water street. This branch handles the wholesale business of Wisconsin and Upper Michigan.

The Sonora phonograph continues to increase its popularity in this territory under the able direction of Charles J. Orth, 276 West Water street. Hot weather has not been a particular drawback to sales, Mr. Orth says, and inasmuch as the manufacturers now are able to make deliveries on schedule time, his July volume of sales was the largest since he took this line. As a high class piano man, Mr. Orth has established an enviable reputation, which is coming in good stead on phonograph business. Oftentimes a prospective customer calls Mr. Orth by telephone, and upon receiving his assurance as to Sonora quality, the order is placed without even a demonstration. Most of Mr. Orth's Sonora sales are above the $100 mark, and a very few are below $75.

The Aeolian-Vocalion was introduced to a distinct class of trade by the Edmund Gram Music House, 414-416 Milwaukee street, a short time ago when Mr. Gram gave a recital before 100 members of the Wisconsin Synodal convention of the Evangelical Lutheran Church. The ministers were loud in their praise of the Vocalion, particularly after the rendition of a selection like "Open the Gates of the Temple," by Evan Williams, with accompaniment on the Edmund Gram parlor grand piano by Mr. Gram himself. Paul Seeger, manager of the Aeolian department at Gram's, reports a splendid run of business, especially in the $100 and $150 styles. Every Steinway piano customer of the Gram house is being canvassed, and the campaign has resulted in a large number of sales of the costlier styles, with and without electric motor attachment. Mr. Seeger and his family have been enjoying a summer home on the upper Milwaukee River this summer.

Edison retailers in Milwaukee are forming an association for mutual benefit and sociability. Dealers and their employes will be eligible to membership, and one of the objects will be to effect a stronger co-operation between interests representing the same line in the same city. H. N. Hahn, manager of the Edison department at the C. Niss Furniture Co., is temporary chairman, and H. W. Gausewitz, manager of the retail department of the Edison Shop, 213 Second street, is secretary. The dealers include the George H. Eichholz Co., 542 Twelfth street; Edison Shop, Art B. Meyers, 460 Eleventh avenue, Miss Co., 709 Third street, and the Flanner-Hafsoos Music House, 417 Broadway.

Glynn and Sylvester Cremer, Cashton, Wis., have opened a music and jewelry store in the Granville Hall building and advertise both the Edison and Victor lines.

The remodeled Victrola department of the Milwaukee Boston Store is nearly ready for the grand opening planned by Manager James Schoonmaker during the week of August 14. Business has been conducted in spite of the handicap of remodeling work and torrid weather. The department is equipped with eight new large type booths, electrically lighted and ventilated. A large record room and a concert hall also have been provided.

Leslie C. Parker, manager of the Victrola department at Gimbel's, attended the recent World's Salesmanship Congress at Detroit, and upon his return to Milwaukee took the initiative in a movement to organize a Milwaukee Salesmanship Club. He has been given the cooperation of the Merchants and Manufacturers' Association, Advertisers' Club and other organizations. Mr. Parker is one of the leading sales managers of Milwaukee.

A. G. Kunde, Columbia jobbers, 516 Grand avenue, have had the busiest month in their experience. Mr. Kunde has been participating in numerous short excursions with the jobbers' division of the Merchants and Manufacturers' Association, and was a member of the week's handshaking tour, conducted by the Tripoli Temple, Mystic Shrine. The Columbia thus was the "official" talking machine on four special trains in less than two months. On July 31, Mr. Kunde made the jobbers' excursion to Delavan, and on the following Thursday night

accompanied the annual across-the-lake jobbers' excursion to Mainstee, Mich. The house of Kunde received valuable publicity by its donation of three Columbia machines and a supply of records to the Milwaukee companies of the Wisconsin National Guard forming the First Wisconsin Brigade now encamped near San Antonio, Tex. Letters from the soldier boys thanking Mr. and Mrs. Kunde for their much appreciated gift are still coming.

Harry A. Goldsmith, secretary of the Badger Talking Machine Co., 135 Second street, recently was elected a member of the Milwaukee Press Club. Mr. Goldsmith is a former newspaper man, and an expert writer on financial topics, but forsook the pen to job the Victor in Wisconsin and Upper Michigan two years ago.

J. H. Becker, manager of the Victrola department of the Twelfth street store, and O. Meyer, manager of the same division of the Mitchell street store of Edward Schuster & Co., Milwaukee, have been spending their annual vacations at their favorite lakes in Waukesha county. Mr. Becker spent his time at Nagawicka Lake, and Mr. Meyer, as usual, went to Oconomowoc Lake. During their absences, the work of remodeling the Victrola departments was carried on with extra vigor and rushed to completion. T. P. Lehrner, general manager of the piano and talking machine interests of the three Schuster stores, is now on his vacation.

August C. Quentmeyer, Premier dealer at Columbus, Wis., showed his public spirit by donating a Premier to the Columbus Municipal Park Commission to assist in raising funds required for building an ornamental entrance and otherwise improving the city park.

D. F. Roate, Algoma, Wis., has sold his stock of musical merchandise and will retire.

John Feuerstein is a new piano and talking machine dealer at Sturgeon Bay, Wis. He will handle the Victor exclusively.

The business of the Milwaukee Talking Machine Manufacturing Co., 416-418 Fourth street, has been incorporated with an authorized capital of $75,000. Edward Heaney is president and Frank A. Welsand, secretary. The incorporation indicates no change in the business or policies of the company.

A. J. Boden, Victor dealer at Clintonville, Wis., drove to Milwaukee in his new car to call on the Badger Talking Machine Co. Mr. Boden placed a large order for fall delivery.

The Pathephone was exhibited by the Pathephone Co., of Wisconsin, 183 Fourth street, at the recent annual convention of the Wisconsin Retail Jewelers' Association. Manager Lawrence McGreal was in charge of the exhibit and gained a number of fine dealers among the jewelers. The Pathé was the only talker represented at the convention.

"There is only one trouble," says the reporter of a Berlin, Wis., newspaper, "with the new arrangement at Neumann & Hoyer's drug store and ice cream parlor since Mr. Doering sold them one of the $250 Edison phonographs. There is such a variety of excellent music coming from the instrument, and so many good things to eat while getting the good music, that one is liable to forget that there is work to be done."

The Hatten Lumber Co., New London, Wis., one of the oldest and largest logging and lumbering companies in Wisconsin, has installed a complete Dictaphone system in its big offices.

G. F. Rueb, president of the Badger Talking Machine Co., 135 Second street, has returned from a two weeks' automobile trip through northern Wisconsin and upper Michigan with his family.

The Starr phonograph is enjoying a fine run of business in Milwaukee and throughout Wisconsin since the Hoeffler Manufacturing Co. took on the wholesale contract for this territory.

"Jimmie" Cox, former champion speedway motorcyclist of the country, and later a member of the retail force of the Badger Talking Machine Shop, is one of the Milwaukee music trades men now on the Mexican border with the Wisconsin troops. Mr. Cox has been detailed to the motorcycle squad.

Several large chair and furniture factories in Wisconsin have recently made advantageous contracts for the manufacture of cabinets for talking machine manufacturers, and much capacity is being turned over to the new work. One of the largest producers at this time is the Wisconsin Seating Co., New London, Wis., which has contracted with the Edison interests for a large part of its cabinet requirements. The Wisconsin Chair Co., Port Washington, Wis., is also building an enormous lot of phonograph cabinets on contracts.

"We have experienced a summer resort business both on machines and records that is simply wonderful," was the report of R. H. Zinke, manager of the Badger Talking Machine Shop. Mr. Zinke said there was still cause for complaint on the shortage of machines, but records are coming more freely. Outside of summer resort business, trade is seasonable, but better than in any past year. The black and white outing room told of in the last issue of The World has made such a decided hit with the Badger's trade that Mr. Zinke is now working out a Hawaiian room, furnished with real Hawaiian materials direct from the islands.

DOMESTIC CO. ON PACIFIC COAST

Walter S. Gray, Pacific Coast manager of the Domestic Talking Machine Co., Philadelphia, Pa., has opened headquarters in the Chronicle Building, San Francisco.

WILL NOT WHOLESALE TALKERS

Steinway & Sons, New York, this week officially denied any intention of wholesaling the Clayola talking machine to any Steinway dealers who might desire to handle this machine. Steinway & Sons will handle this machine in their Middle West stores, and any other rumors in connection with their activities in this direction are without foundation.

the Spokane Expert School of Business, has installed a Columbia graphophone in his school

other fellow never thought of doing—and didn't do when he was told.

Are You on the Border?

Not Mexico—but on the border of profits or no profits. To keep away the no-profit enemy, be well armed with machines and records, maintaining a battery of the different Victor styles and several regiments of records.

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., August 7.—It's really getting monotonous, this writing reviews of conditions in the talking machine trade. There is so little change from month to month. It's just the same old story—business showing a notable increase over the corresponding month of the preceding year—a continued shortage of goods notwithstanding continually increasing the output of the factories. Record stocks are in excellent condition and demands on them show that the dealers are doing considerable business right in the midst of the heated term. Never in the history of the trade have dealers generally placed their fall orders so early. Although some of the jobbers for the old established companies seemed to be a little perturbed for a while over the influx of the host of new talking machine manufacturers, they are inclined to look at the matter in a very philosophical manner now. Instead of a reduction in business it is steadily increasing at a wonderful rate. It is evident that this is going to continue, although the new concerns will also sell a lot of machines—those that are conscientious regarding their product and who pursue legitimate sales methods. It simply means that the consumer is going to be worked more intensively than ever before because there will be so many more dealers after him, and this educational process will increase vastly the number of purchasers. That's the view being taken by veterans in the distributing field, and it is no doubt the correct one.

Displays Dealers Efficiency Devices

Important changes are being made in the extensive quarters of the Chicago Talking Machine Co., at 12 North Michigan avenue with a view to giving visiting dealers practical demonstrations of the various efficiency devices and methods originated by the company with a view to enabling the dealer to systematize and organize his business on the best possible basis. The company's repair department has been housed in a well-lighted enclosure and made a model department in every way, in point of equipment, cabinets for repair parts, accessories, etc. The shipping department has been put on dress parade so to speak, and dealers are invited to inspect it and learn how the systems there employed can be adapted to their own business. Immediately opposite the demonstrating booths in the main warerooms an addition to the efficiency and service department is being established, in the way of a room 12x10 feet in size in which the various forms and systems supplied by the company will be placed before the dealer in actual operation, such as the Tomaco record racks for dealers with the stock envelope signals for automatically keeping track of condition of stock and of good and slow selling records, etc. On a convenient table will be the Tomaco stock book for ordering records, while the monthly window card service and other advertising matter will be appropriately displayed.

To Open Woodlawn Pathé Shop

R. E. Rundell, formerly sales manager of the Pathé-Pathephone Co., of Illinois, which was recently withdrawn from business and whose offices were taken over by the phonograph division of the Hallet & Davis Piano Co., will enter the retail business and will open, about September 1, the Woodlawn Pathé Shop at 1314 East Sixty-third street. Mr. Rundell will have associated with him in his new venture H. D. Blodgett, formerly of the State Street Pathephone Shops.

Cable-Nelson Catalog Issued

The Cable-Nelson Piano Co., of Chicago, has made its first formal announcement of the "Cable-Nelson talking machine" through the medium of a neat little brochure that gives a concise but very clear and complete description of the machine and the parts that go into it. An illustration of the model factories of the company at South Haven, Mich., is also included in the booklet.

Sonora Takes Additional Space

Thomas R. Johnson, in charge of local activities of the Sonora Phonograph Corporation, announces that the company has taken the entire second floor of the building at 320 South Wabash avenue, where the concern is now located on the top floor. The new space will be almost entirely used for wareroom space, although a demonstration room in which to demonstrate the Sonora to dealers may be located there also. The new space amounts to between four and five thousand square feet, and should be a great help to the Chicago distributing center especially with the approach of the busy holiday season. According to Mr. Johnson the summer season has proved to be anything but dull this year, and says his books show a doubling of business over last year.

Completes Important Deals

H. A. Yerkes, division superintendent of the Columbia Graphophone Co., is doing much traveling nowadays, and in the past month has consummated several important deals involving the wholesale distribution of Columbia goods from several pivotal points in the extensive territory under his jurisdiction. He recently made a trip, including Denver, Salt Lake City, Omaha and Lincoln. At Salt Lake City, he arranged for an extension of operations of Dalzell Bros., operating at Denver as jobbers under the name of the Columbia Stores Co. They will open another distributing point at Salt Lake, and have secured commodious exclusive wholesale quarters in the Dooley Block. They will also specialize on the Dictaphone.

On his return from the West Mr. Yerkes went to New Orleans. As a result of his visit the Columbia Co. will withdraw from the retail business in the Crescent City, devoting their energies to the dealers. Exclusive wholesale quarters have been secured in a large building on Canal street, and it will be fitted up in a manner enabling them to care for the wants of dealers in that section in a more efficient manner than ever.

Starting Right

Miss Elizabeth M. Shaw, for some years with the Chicago Talking Machine Co., and one of as pulchritudinous a group of young women as can be found out of captivity, surrendered her liberty last month and married Lloyd McLean Thomas, a prominent young business man of Little Rock, Ark. The wedding gifts were many, but none were more prized than a Victrola and records from her former employers. The standard of musical culcha will be rigidly maintained at the C. T. M. Co.

Mr. Creed hopes that Miss Shaw's example will not prove contagious, but the gleam of diamonds from feminine fingers gives rise to serious doubts.

New Stores and Departments

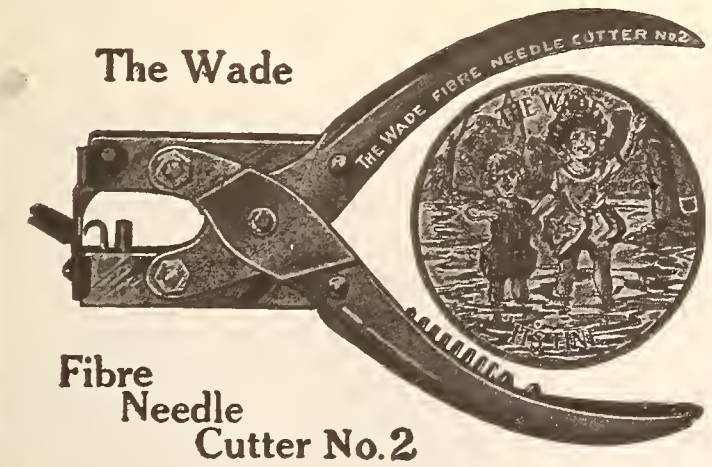
The South Shore Talking Machine and Lamp Shop is the name of a new concern that has opened very handsome quarters at 6719 Stony Island avenue. They handle Columbia goods.

(*Continued on page 73*)

THE WADE—THE PRACTICAL Fibre Needle Cutter—THE WADE

The WADE embodies the **right principle**, worked out **through long experience.** It is simple, durable and **accurate.** It trims the needle at an angle resulting in the best tone. The WADE cutters are made of the best steel and are absolutely guaranteed.

The Wade



Fibre Needle Cutter No.2

The WADE has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points from one fibre needle. No. 2 has a double action, making it especially easy to operate. No. 1 is a very popular cutter which has given excellent service. You save more than double the price of the Wade in the repointing of the first 50c. worth of needles.

Lyon & Healy

Turn that interest into sales!

DURING the Summer thousands of people have had their interest aroused in the Victrola, at camp, at the lakes, sea shore, their neighbors' or similar places. Prepare for these people now while they feel the effects of that "Buying Influence." They will greatly increase your volume of business.

An up-to-date stock and a constant supply of the latest releases is what will interest them.

Lyon & Healy have the largest jobbing stock of Victor Records in the country. We have a ***Half Million Records*** ready for immediate shipment.

Our specialty is SERVICE. We make quick deliveries. Our Victor Stocks are always as complete as possible in every detail, including many quick selling accessories.

Our SERVICE includes sales helps which make a dealer's store distinctive, sales helps which develop business and increase profits.

Enjoy the advantages of buying all of your musical goods from one house; it means one order, one shipment, one transportation charge, and a saving in freight as well.

LYON & HEALY

World's Foremost Music House

Wabash Ave. ***and Jackson Blvd.***

CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 71)

Hassmer Bros., piano merchants (905 Belmont avenue), have added a talking machine department, specializing on Columbia goods.

Nielsen & Lesher, 1961 North Halstead street, have added Columbia graphophones.

The Goldberg Furniture Co., who conduct several stores in Chicago, have opened a new one, and their largest, at 3014-20 Lincoln avenue. It has a frontage of 1010 feet and has a well equipped Columbia department as have their other establishments.

The Kennedy Furniture Co. have opened a new store at 3948 West Twelfth street. They will handle the complete Columbia line and are putting up two demonstration booths.

Other dealers who have added the Columbia line exclusively include S. Olkenitzky, music dealer, 8453 Burley avenue, Chicago.

The Central Music Co. is the name of a new concern just opening a music, piano and talking machine store at 5621 West Twenty-second street, Cicero. Richard Navatny and Joseph Chlebecek are the proprietors. They have arranged for the Columbia line.

Tells About English Conditions

Frank Samuel, general manager of Barnett Samuel & Sons, Ltd., of London, made some interesting revelations regarding the effect of the great war on the English music trades in a chat with The World this month. Mr. Samuel's presence in America at this time is mainly due to the absolute necessity for a respite from the overwork and mental strain experienced since the outbreak of the war.

The house of Barnett Samuel & Sons, Ltd., was established in 1832 and Frank Samuel is a grandson of the founder. When the war started there were four men by the name of Samuel in charge of the destinies of the old house—two brothers and two cousins. All of them with the exception of Frank Samuel, who was selected to stay in charge of the business and look after government contracts, enlisted. Edgar Samuel, a lieutenant in charge of the bomb corps, was killed in France in January. The other two are still at the front. The company manufacture the Boyd pianos and the Boyd Pistonola player-pianola. The latter created a great deal of interest when it was exhibited in Chicago two or three years ago. The company also make band instruments and drums on a large scale and handle small goods of all descriptions. They publish an enormous catalog, handsomely illustrated, with color process cuts and do a large trade with the colonies. In the last three years they have supplied something like 12,000 drums to the British army and the drum shop is the only portion of the plant which has not been hampered because of enlistments. It has been to the interest of the government, of course, to keep that department working in force. They have also sold a large number of trumpets of the national army design to the British government.

Besides their other musical instrument activities Barnett Samuel & Sons have long been an important factor in the talking machine manufacturing field. In April of 1913 they brought out the "Decca," an interesting machine which folds up into valise form, much after the fashion of the folding organs known to the American market. This was not a cheap machine as English prices go, ranging from five to ten pounds retail. It was designed originally for the summer resort trade, but when four months later the war broke out the house was quick to see the value of the machine as a means of furnishing musical entertainment and diverting the mental tension of the soldiers in the trenches. A strong advertising campaign was started in the daily papers and in periodicals advising people to send a "Decca" to the boys at the front. So far about 40,000 of these machines have been sold for that purpose. Mr. Samuel says that the talking machine business among the stay-at-homes in England is remarkably good, and that there is a greater proportion of the higher grade goods sold than ever before. The reason for this is dual. In the first place there has been a shutting off of competition of cheap foreign machines and the remarkable salaries paid to both men and women in the munition factories have made them large purchasers of what are usually termed luxuries.

Has Fine Summer Home

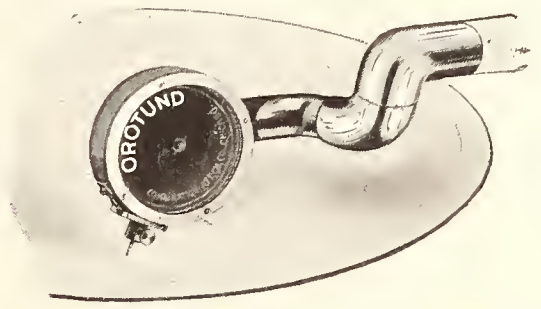
C. F. Baer, manager of the Chicago office of the Columbia Phonograph Co., gave a little "party" Sunday to a few of his friends in celebration of the completion of his fine new summer home on Lake Kathryn, near Antioch, Ill.

C. F. Baer's Summer Home

It stands on the site of the less pretentious cottage which he has had there for several years, and is one of the most beautiful and best equipped houses on the lake. Mr. Baer can spend Thanksgiving and Christmas there, if he chooses, as it is most substantialy built, and besides screened sleeping porches, bathroom and all summering conveniences, has electric lights and hot water heat. In the photograph taken Sunday and here reproduced are seen Mr. and Mrs. Baer and the two little Baers in the foreground, while the trio in the rear consists of Arthur Boland, Fred Binger and R. G. Winter, all of the Columbia forces. Ed. Blimke, of the Chicago office, was off fishing while the picture was being taken and W. W. Parsons, a former Columbia man, but now of the FlexiFile Sales Co., was operating the camera.

"The last word" in re-creation of music. Produced by the

"Orotund" Sound-Box



Dealers should handle the "Orotund" outfits to make their machines universal in playing all records. Sample price to dealers $3.50, cash with order. Please mention make of machine when ordering.

COMBINATION ATTACHMENT CO.
524 Republic Bldg. CHICAGO, ILL.

Talking Machine Shop's New Home

The Talking Machine Shop will occupy its new home at 234 South Wabash avenue, around the first of September. Though the whole building is leased by the company only two floors will be occupied by them. On the first floor there will be a reception room, record sales, and record stock room. The machine sales room will be on the second floor in addition to six more record sales rooms, office, and reception room.

Lyon & Healy Field Day

Six hundred store and factory employes of Lyon & Healy and all the officers and department heads took Ravinia Park by storm Saturday, July 29. Transportation and all expenses were borne by the house, and a delightful lunch was served in the casino and on tables spread under the trees. In the afternoon a magnificent concert by the famous Chicago Symphony Orchestra was enjoyed, and after that everybody adjourned to the magnificent athletic field where the baseball enthusiasts of the talking machine and sheet music departments, joined battle in a contest to decide the supremacy. As is usual in many such contests, the victory did not come to those who were in the lead at the start, and the skillful battery enabled the "Victrolas" to carry away the laurels. During the luncheon Miss S. G. Lessick, of the Victor record department, sang, and the L. & H. saxaphone quartet gave several numbers.

Those who stayed for the evening concert had the pleasure of hearing Mabel Garrison, of the Metropolitan Opera Co., and whose Victor record of the "Doll Song" from the "Tales of Hoffman," and which she has sung at Ravinia, is meeting with a big sale.

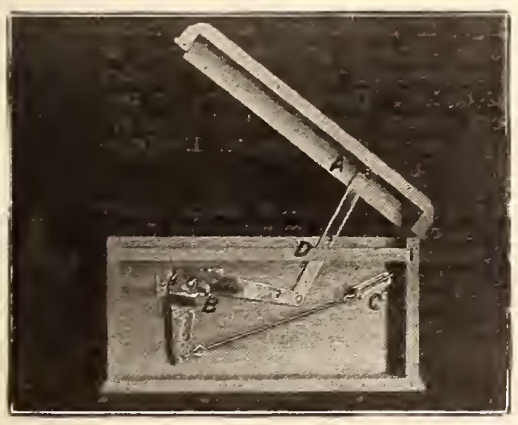
The American Phonoparts Co. reports a re-

(Continued on page 75)

THE COVER WITHOUT A CATCH



Showing How It Operates

THE COVER THAT NEEDS NO CATCH

IT needs no catch simply because it catches itself. That is, it is self-controlled. Its own weight, reacting upon itself through simple mechanical principles, robs it of its weight. Thus it makes fingers, records and the top itself safe from being shattered by dropping.

Simple, safe and easily applied. An effective talking point and a great feature.

CHICAGO HINGED COVER SUPPORT & BALANCE CO., 144 S. Wabash Ave., CHICAGO

The Mandel Phonograph
A New Entry

It is not an ordinary talking machine, nor is it an assembled product constructed merely to sell.

But the MANDEL Phonograph is a high-grade instrument, every part of which is made by us in our big phonograph factories in Benton Harbor, Mich., and Chicago, Ill.

Yes, it's a masterpiece, not only in craftsmanship but in its performance as well.

The dealer who understands the value of consumer service, has a strong grip on the underlying principles of successful selling.

Consumer service is what you give with the MANDEL Phonograph. Its chief appeal is low price to the consumer, yet low price that is consistent with high quality—quality which demonstrates that not a detail was overlooked in making the MANDEL a Phonograph that is good to the eye and ear.

And for the dealer the MANDEL line earns profits unusually large. This is prompted by a liberal policy that will secure the right kind of co-operation between us and our dealers—co-operation that spells large sales and mutual profits.

Beauty, massiveness, refinement, true reproductive powers—these and more we claim for the MANDEL Phonograph.

Our exceptional equipment has enabled us to prepare adequately—we can actually make immediate deliveries.

Write for further details and our liberal terms.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 73)

markable increase in interest upon the part of the trade in its "PlayRite" electric motor. "The trade seems to be more optimistic than ever over the future of the electrically driven phonograph and our business in this direction is increasing very rapidly," said S. S. Schiff recently. "Our motor attains an even, steady speed without making condensers or transformers necessary. No rheostats are necessary to regulate its speed. We claim that it eliminates spring troubles, is noiseless, will not blow fuses and costs but a cent a week to operate. Those manufacturers who are equipping with the electric motor seem satisfied that they are building for the future in marketing an electric-driven machine. As for ourselves we have unbounded faith in the electric's future and, of course, in the future of the 'PlayRite' motor in particular." An interesting announcement from this company appears on page 77.

Exhibits at Furniture Show

There were quite a few talking machine exhibits at the furniture show in the big permanent building on Michigan avenue last month.

The Vitanola Talking Machine Co. had an extensive showing of their line and opened a number of new accounts as a result.

The Wisconsin Chair Co., of Port Washington, Wis., showed the new Dennett talking machine named after the president of the company. An unique feature is that the machine is so constructed that the record files are in the upper part of the cabinet making it possible to procure and replace them without bending. Unusual size and length of horn and consequent volume and sonority of tone is claimed. Other exhibits were those of the Lyraphone Co., of New York, and of Schram Bros. and M. J. Foyer, both of Chieago.

B. B. C. Conference

The Brunswick-Balke Collender Co. held a big conference at their Muskegon, Mich., factories last week. Over a hundred and fifty department and sales managers from all over the country were in attendance. They were shown through the phonograph and other plants and listened to lectures by superintendents and technical men.

Special attention was naturally given to the Brunswick-Pathé phonograph, as this is one of the company's latest and most important departures. Martin Nystrom, manager of the talking machine department, gave a whole day to the crowd which was very enthusiastic over the exhaustive demonstrations of the Brunswick-Pathephone and Pathé records. The constructional and accoustic features of the machine were fully explained and sales campaigns formulated.

The company is preparing to open handsome and well equipped wholesale and retail warerooms on the ground floor of a building a few doors north of the company's general offices at 623-33 South Wabash avenue. Ivan L. Webster, who has been with the Pathé since the line was opened in Chicago, is in charge of the record department.

Personals

C. E. Goodwin, general manager of the Phonograph Co., after spending several days in Charlevoix, Mich., golfing with Gustave Babson, has gone to Duluth to finish up his vacation. He will return about the 19th. When he returns, his assistant, D. L. Dubois, will go on an automobile trip among the fishing grounds of Wisconsin. Wm. H. Guild, wholesale traveler for the Phonograph Co., is spending his vacation in Michigan. A. D. Wayne, retail manager, leaves next week for a fortnight's vacation at Eagle Lake, Wis.

Charles F. Winegar, general sales manager of the Chicago Hinge Cover, Support and Balance Co., has returned to Chicago after a sojourn among Eastern trade during which he had his headquarters at the New York office. Mr. Winegar will spend some little time visiting important prospects in the West and for the present can be reached most directly at the Chicago office. The company has made splendid progress with its specialty which is now being incorporated in the product of about a score of talking machine manufacturers.

George Davidson, of the Talking Machine shops, is accompanied by his wife and several friends on an auto trip to Denver. He is expected back about the 15th of the month.

S. O. Wade, of Wade & Wade, makers of the Wade fibre needle cutters, spent considerable time in the East after the jobbers' convention. He was accompanied by Mrs. Wade, and they were the guests at Buffalo for several days at the home of B. M. Andrews, of the house of W. D. Andrews. Distributors in New York, Philadelphia, Boston and other points were visited, and some excellent orders for the firm's product secured. Mr. Wade is now in Iowa.

Will Knabe, vice-president of the Knabe Bros. Co., of Cincinnati, O., makers of the Knabe-Crystola line of talkers, was in Chicago this week in conference with Al. Bruckner, local representative.

Fred A. Siemon, manager of the talking machine department of the Rudolph Wurlitzer Co.'s Chicago branch, is on a vacation that he is spending at Delavan Lake, Wis.

George Chopin, manager of the talking machine department of the Bry-Block Mercantile

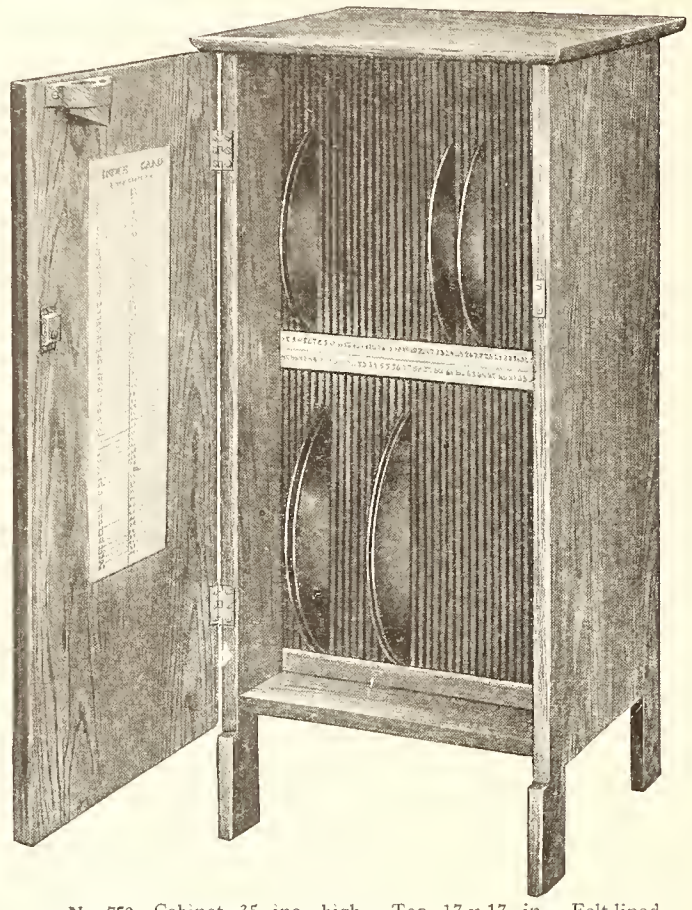
Dealers Who Sell Small Machines—



No. 752—Cabinet 35 inc. high. Top 17 x 17 in. Felt-lined compartments holding 72 records. Wood rack compartments holding 132 records. Index system, needle holder, etc. Used for small machines generally. Finished in Oak or Mahogany.

Should and *can* easily make large additional profits by disposing of a a SALTER cabinet with every machine sale.

Machine owners must have a place to put records and they must have something to set the machine upon.

They realize that and think of it at once. Here is where the cabinet sale comes in and invariably it comes quickly!

There is nothing easier to sell in a situation of this sort than a good cabinet and especially one of the

Salter Felt-Lined Cabinets

They come in a large number of styles and sizes and in different finishes.

There is no small machine that a SALTER cabinet will not accommodate. There is no machine that is too good for a SALTER cabinet and there is no purchaser who is not impressed immediately with SALTER quality.

Here are two styles that fairly sell themselves.

Wake up your salesman on this, get our catalogs and start right in!

No. 166.—Height, 30 in.; top, 25 x 20 in. Records can be laid on front when open. Felt-lined compartments hold 52 records. Wood rack holds 96. Any color in Mahogany or Oak.

SALTER MFG. CO.

337-349 N. OAKLEY BLVD.

CHICAGO

ORIGINATORS OF FELT-LINED CABINETS

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 75)

Co., of Memphis, Tenn., and E. T. Anderson, of the Cable Music House, of Rock Island, Ill., were recent visitors to the local talking machine trade.

H. R. Fitzpatrick, Lyon & Healy traveler in Michigan and Indiana, and H. Royer Smith, L. & H. booster in Illinois, are back in their territories following enjoyable vacations. J. E. Meagher, Lyon & Healy ambassador in Wisconsin, is spending a vacation in the East.

Rumors are around that Frank Johnson, of the Talking Machine Shops, is to be married ere long. The only possible clue to the lady's name is found in the fact that the young Romeo is always playing a record with something in it about "Marguerite."

Edward Williams, Bloomington, Ind., and Mr. Rix, of the Rix Furniture Co., of Big Springs, Tex., were members of the trade visiting the Great Central Market a few days past.

Messrs. Callahan and Kendrick, Pacific Coast Victor travelers, stopped in Chicago recently en route to Camden.

L. C. Wiswell, head of the Lyon & Healy talking machine department, followed up his work at the convention with a little rest that included a motoring trip through Indianapolis, Columbus, Cleveland, Toledo and back home.

J. B. Ryde, assistant manager of the L. & H. department, is on a vacation to White Lake with his family.

Mandel Brothers Establish Department

The firm of Mandel Brothers, one of the best-known of the State street department stores, has established a talking machine department, and has taken on the full line of Columbia machines and records. The section will be located on the ninth floor and will be in charge of Mr. Ling, who announces that the department will be formally opened about the middle of this month. In addition to the Columbia line the Starr, Little Wonder and Emerson records will be carried. The Stewart is to be carried in the toy department.

C. R. Ely, who negotiated the deal for the Columbia Co. is to be congratulated upon establishing the line with such a large institution.

Playerphone Making Progress

The Playerphone Talking Machine Co., of Chicago, has been making rapid progress since its inception and visitors to the offices in the Republic Building have been surprised with the activities to be seen there. In a little talk with D. W. McKenzie, the president of the company, he said, "We are opening some very large assembling rooms at 21-23 South Wabash avenue, and all five factories making cabinets for us will ship in here. We are delivering at the rate of fifty to a hundred a day.

"Williams-Davis-Brooks & Hinchman Sons, wholesale druggists, of Detroit, Mich., are meeting with great success jobbing the Playerphone. We have several traveling men on the road, shipping them from one to a hundred instruments monthly. The Oklahoma Book Co., of Oklahoma City, Okla., is doing the same thing. The J. W. Crowdus Drug Co., of Dallas, Tex., has a monthly demand as large as the two preceding companies. We closed up with quite a number of other large distributors, one in Indianapolis and several on the Western coast. The Playerphone in a very short time will be equipped with an automatic stop. We have also made improvements on our electric motors that we are going to equip our instruments with by next month."

Opens Offices for Crescent Co.

The Crescent Talking Machine Co., of New York, will have representation in Chicago from now on, as Wm. R. Everett has opened offices in Suite 502, 23 East Jackson boulevard, and is pushing the line in such fashion as to insure its being a factor in the local trade ere long. Mr. Everett has had wide experience in manufacturing and selling, and while in his past connections showed a wide knowledge of the talking machine field. The Crescent line ranges in retail price from $12.50 to $200.

Brings Out New Automatic Brake

The Perfect Automatic Brake Co., of this city, has entered the market with an automatic brake. The stop is somewhat similar to other brakes and is set by simply moving the tone arm to the inside as far as it will go and then setting the stop at the place desired. The stop is said to be very easily attached, simple to operate and can be used with any machine.

MANDEL MFG. CO. IN THE FIELD

Prominent Manufacturers Enter Into the Manufacture of Talking Machines

CHICAGO, ILL., August 5.—The Mandel Manufacturing Co., of Chicago and Benton Harbor, Mich., recent entrants into the field of phonograph manufacture, has completed both its organization and its product and has started in upon a powerful campaign for the fall trade.

The company acquired some time ago the

Mandel Manufacturing Co.'s Chicago Plant

large plant formerly occupied by the Spencer Barnes Co., manufacturers of high-grade furniture at Benton Harbor, Mich., and the splendid equipment which that plant was possessed of is seen in the construction and finish that characterize the first of the Mandel machines to be shown.

The Mandel Co. is in a favorable position in that its instruments are not assembled products,

DEALERS—A THOUSAND MORE
WRITE OR WIRE US NOW
For the Brunswick-Pathephone Agency

OUR first announcement of the new Brunswick-Pathephone and Pathé Disc Records has created a stir throughout the trade that probably has no equal. Telegrams and letters came from dealers everywhere. Hundreds applied for the agency of this revolutionary line.

Now heavy advance orders are coming daily. And we shall soon be ready to start the initial shipments.

But please remember this—our first allotment is limited. Those who secure this agency at once will be in a strong position to make a flying start when our impressive campaign of advertising starts this fall throughout the nation.

Never have values like these been known before on high-class phonographs. And Brunswick's leadership as the maker of fine cabinets plus Pathé attainments in Records and Reproduction—these two great forces bring a companion proposition that experts predict will dominate the field.

Brunswick-Pathephone *and* Pathé Records

Write us today for full particulars. See the beautiful models, the wonderful cabinet construction, the marvelous attainments in sound box and tone chamber. And get our low prices and trade-winning offer to one good live merchant in every city and town. No obligation. Don't be late.

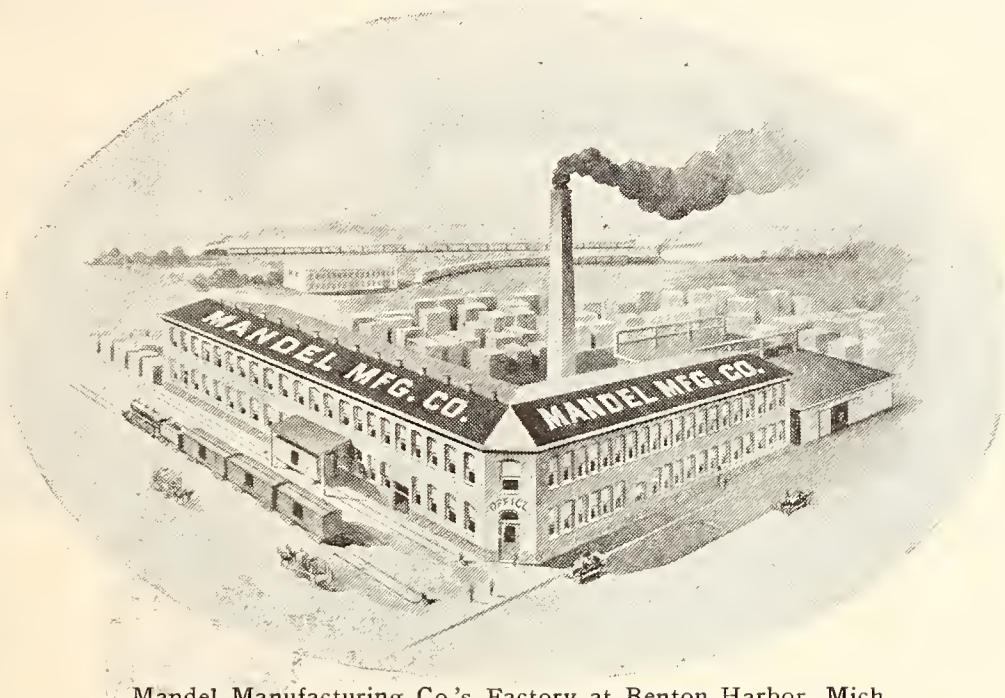
but are manufactured in their entirety, including the manufacture of all metal parts in the Mandel factories.

In addition to the styles equipped with spring motors the company is bringing out two styles that are to be equipped with electric motors.

The proprietors of the Mandel Manufacturing Co., Messrs. M. and L. Mandel, have been in the manufacturing business over ten years, and they have been, and still are manufacturing cameras and photographic materials under the firm name of the Chicago Ferrotype Co. The rise of this company from an insignificant beginning to its present large proportions speaks well for the founders, and it is predicted that their success in the phonograph business will be a duplication of their former triumphs in other lines of endeavor. The general offices of the company are located at the Chicago plant at 501-511 South Laflin street.



Mandel Manufacturing Co.'s Factory at Benton Harbor, Mich.

TO FEATURE FIBRE NEEDLES

The B. & H. Fibre Manufacturing Co. Seeks a Broader Market and Re-Establishes Direct Communication With the Trade

CHICAGO, ILL., August 7.—The B. & H. Fibre Manufacturing Co., 33 and 35 West Kinzie street, the patentee, owner and manufacturer of the fibre needle, announces that after six years it is again able to re-establish direct communication with the trade. For the past six years it has made its product exclusively under the name of the Victor fibre needles and Columbia fibre needles. It will still manufacture as in the past for these companies but will also produce fibre needles under its own "B. & H." label.

F. D. Hall, the president of the company, and who invented the fibre needle and placed it on the market a decade ago, has been tireless in his efforts to bring it to the highest point of perfection. A large force is employed in the factory on Kinzie street, and new machinery of special design is constantly being added. The merits of the fibre needle are recognized by the trade all over the country. In many stores salesmen are instructed to demonstrate with fibre needles not only because of the character of the tone secured and the absence of scratch, but also because they do not injure the records.

C. E. ELTING CO. IN MOTOR FIELD

Well-Known Spring Manufacturers Enter Talking Machine Trade and State They Are Ready to Make Motor Deliveries Immediately

CHICAGO, ILL., August 1.—The Charles H. Elting Co. has made formal announcement of its entry into the field of talking machine manufacture. In discussing the move, A. O. Elting said: "About all that we can say is that we equipped ourselves to manufacture motors the early part of May and are now ready to make deliveries. Our reason for venturing into the phonograph motor manufacturing business is that we are spring manufacturers and have for years supplied motor springs. When the present stringency of the market took place and everybody wanted springs, we could not help but feel that it would be more advantageous to use our own springs and put them into motors. This is our sole reason for having gone into the motor manufacturing business. We have unlimited facilities for any quantity of business we may get. We have all the raw material we may require and are in a position to take care of any business which may be offered to us."

A NEW RECORD FILING SYSTEM

Number of Commendable Features in New Filing Cabinets Intended for Use in Homes

CHICAGO, ILL., August 5.—A new record filing system Richmond has entered the field. The FlexiFile Sales Co., of 327 South LaSalle street, is placing on the market a patented method of storing records for instant use in the home,

(Continued on page 81)

How is This for Value?

Style 100 International
Stands 48 inches high, 20 inches wide and 22½ inches deep. Mahogany or oak.

We claim that one of the best values in the talking machine trade today—both to the retail buyer and the dealer—is in our Model 100

INTERNATIONAL
$100 RETAIL

It is finished artistically in choice mahogany or oak, equipped with fine quality nickel-plated metal parts and a powerful motor that can be wound while playing. Speed regulator and indicator. Equipped with jeweled needle to play hill and dale records. We also supply 200 steel needles for use with lateral cut records.

Our line ranges from $15 to $200 retail.

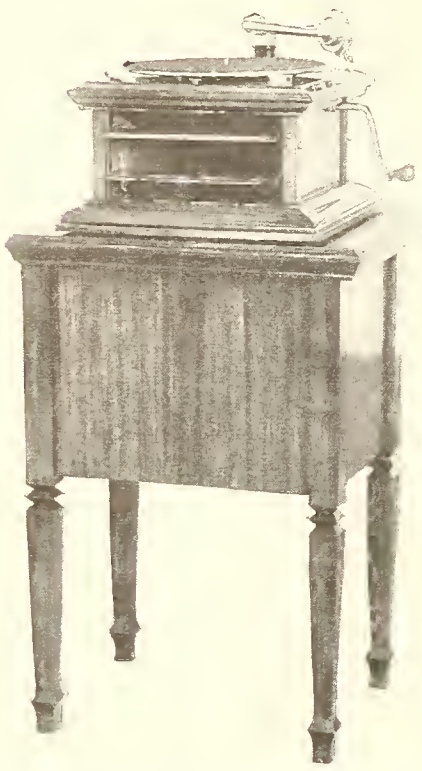
FlexiFile DISC RECORD CABINETS

Devised by Business System Experts Combining Greatest Capacity with Perfect Accessibility



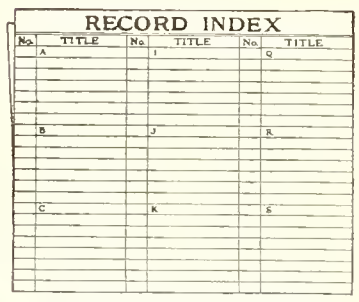
FlexiFile No. 1—(Closed)
Capacity 75 Records—10 or 12 inch
RETAIL PRICE, $15.00

THESE cabinets, made in three models, are especially adapted for machines ranging from $5 to $35 in retail price.

When a record is wanted, the top, with machine, slides to one side exposing contents of entire record receptacle. Our patented FlexiFile system, illustrated below, gives double the storage capacity of other systems. There are no albums—no wooden partitions or shelving.

Records do not come in contact, cannot break or mar, double-faced records are instantly located by a perfect alphabetical and numerical index.

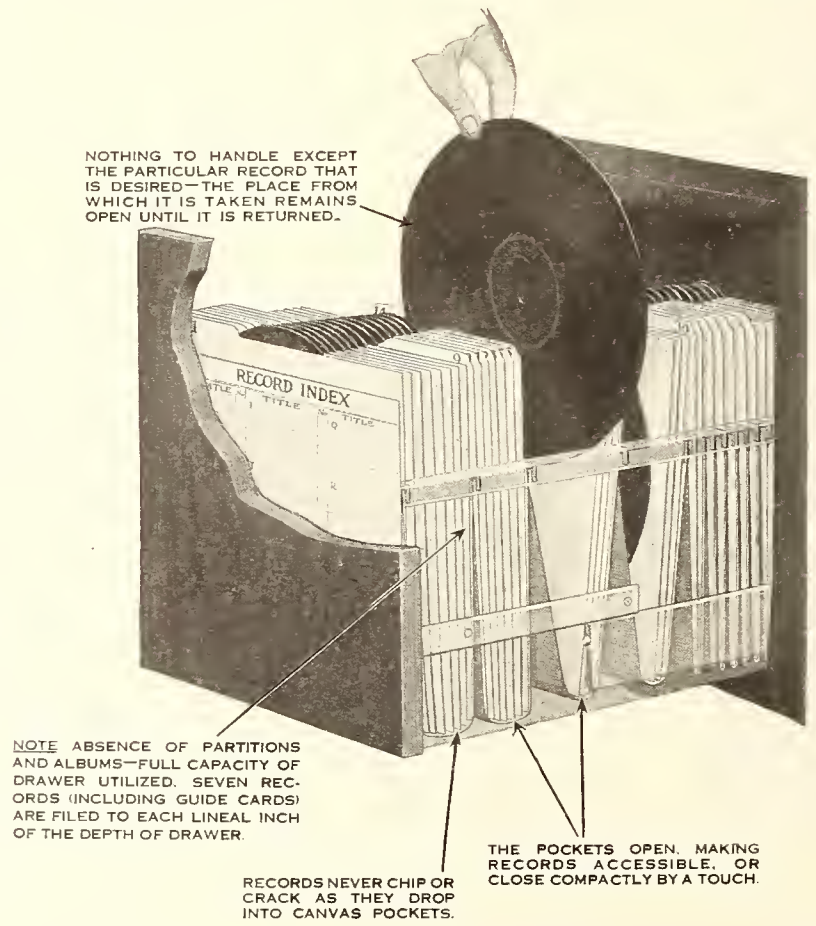
FlexiFile No. 1—(Open)
Capacity 75 Records—10 or 12 inch
RETAIL PRICE, $15.00



THE RECORDS ARE INDEXED ALPHABETICALLY AND CROSS-INDEXED NUMERICALLY SEVEN TO TEN GUIDE CARDS NUMBERED CONSECUTIVELY ARE PLACED IN EACH CANVAS POCKET. EACH RECORD IS INDEXED ALPHABETICALLY ACCORDING TO ITS TITLE AND GIVEN A NUMBER, AND FILED IN FRONT OF THE CORRESPONDING NUMBER SHOWN ON INDEX TAB OF GUIDE CARD. IN THE CASE OF A DOUBLE-FACED RECORD, IT IS INDEXED ALPHABETICALLY TWICE ON THE INDEX CARD, BUT BOTH TITLES CARRY THE SAME NUMBER.

The FlexiFile is an exclusive system fully covered by U. S. and Canadian patents.

It is revolutionizing record filing as it has office work.



LIST PRICES

Liberal Discounts to Dealers

1. (Shown in illustrations.) Extension top, 18″ x 18″. One filing compartment, capacity 75 records with 75 index guide cards, $15.00.

2. Extension top, 19″ x 28″. Two filing compartments, capacity 150 records with 150 index guide cards, $30.00.

3. Extension top, 24″ x 38″. Three filing compartments, capacity 300 records with 300 index guide cards, $40.00.

Finished in either Mahogany, Fumed or Golden Oak. Cabinets 2 and 3 have Cane side panels.

SPECIAL LINE

Special cabinets for dealers' stock records. Price on application.

Above prices do not include talking machine shown in illustration.

Columbia Records TRADE MARK Note the Notes

FROM OUR CHICAGO HEADQUARTERS

(Continued from page 79)

which appears to have most commendable features. The merit of the principle involved has already been demonstrated in the world of business and the FlexiFile letter filing cabinets are being used by many large concerns in this and other cities. To adapt the system to the task of caring for disc records was an easy matter, and this was done by President Frank P. Read and W. W. Parsons, a man well known in the talking machine field, who secured an interest in the business and has been elected secretary.

The company is already negotiating with a number of large talking machine manufacturers with a view to the incorporation of the FlexiFile system in their cabinet machines. Not content with this, however, the company is also bringing out a line of neat cabinets of their own for use with the small popular-priced machines, ranging say from $5 to $35 retail and of which there are a number on the market.

As will be seen in the illustrations on page 80, the records are kept in a vertical position, but are suspended in canvas pockets or "hammocks" which do not come in contact with the bottom or sides of the filing receptacle. There is no chance, therefore, of the record being damaged should it slip from the fingers. Each pocket contains seven records which are separated from each other by guide cards. The FlexiFile is telescopic, but when a record has been taken out the pocket remains open until it is returned. Only one record need be removed in order to get the one desired.

The alphabetical numerical index is the frontispiece, so to speak, of the file proper. By it selections on double-faced records are quickly located.

The FlexiFile record cabinet, which the company is now ready to supply the trade, is made in three models, the storage capacities of which are for 75, 150 and 300 records respectively. The top of the cabinet slides back with the machine on it, enabling free access to the records.

President Read is a man of long experience in organizing and launching important business enterprises and has devoted the last year in the promotion of the FlexiFile proposition.

W. W. Parsons has been associated with the talking machine business since 1893, at that time being associated with the North American Phonograph Co., and in later years was associated with the Columbia Graphophone Co., in 1902 having opened their Milwaukee musical store and later returned to Chicago, where he has been associated with them in executive positions until a short time ago. He is not only secretary of the FlexiFile Sales Co., which controls the FlexiFile for the entire country, but is also president of the FlexiFile Distributing Co., which controls the sales for the State of Illinois.

R. R. Schotta, formerly manager of the Office Equipment Mart, of Chicago, has opened Eastern offices at 395 Broadway, under the title of the FlexiFile Co. of New York, Inc.

LYON & HEALY'S SUMMER WINDOW

Every summer Lyon & Healy devote a show window to the unlimited pleasure that a Victrola owner can get out of a machine while at summer resort or in camp. The display occupies the large window at the corner of Jackson boulevard and Wabash avenue, and has been seen and admired by many thousands of people. In the foreground on both sides, in the shape of a right angle, is a large tank, which is arranged to look like a brook. The bottom of this tank is covered with stones and sand. Darting about in this deep pool are about two dozen large, live brook trout. The sides of the pool are covered with rocks and moss, where the fish at first were wont to hide, in order to keep away from the crowds of people at the window. In the center foreground are a man and a woman in a canoe. The young lady is operating the Victrola, while her escort is furnishing the motive power for the boat. In front of the brook some snipe are feeding, and on a log on the further bank of the brook are a family of mud turtles, while some birds are flying high in the air. This window display has caused considerable favorable comment and many sales.

An Artistic Vacation Window Display

A POSTER ON THE VICTOR "STARS"

A large folder that is designed for billboard service and which calls the attention of the public in an effective way to the wonderful galaxy of stars that are making records for the Victor library has been produced by Lyon & Healy in connection with the comprehensive Victor advertising service that the big Chicago house has designed for its dealers. This poster is being syndicated to Victor dealers in all parts of the country so popular has it been with the trade.

Another feature of the service is a series of forty-eight advertisements, four of which are furnished to the dealer in mat form each month. This copy is mainly of the "human interest" variety and in every instance bears out one or more of the manifold advantages of Victrola ownership.

INTERNATIONAL CO. IN NEW FACTORY

The International Talking Machine Co., which was formerly located at 1216 South Jefferson street, has just completed moving into a much enlarged and improved factory and has begun shipments of goods from the new quarters. The offices of the company are now located at 1719 West Van Buren street, while the factory is located on Hermitage avenue, just south of Van Buren street. The offices, however, are directly connected with the factory. Besides the office and storage space there are three floors of factory space, each amounting to 7,500 square feet. New machinery and other equipment is being installed and the company is now able to turn out a remarkably increased number of machines daily.

EQUIPMENT IN NEW SALTER FACTORY

The work of equipping the new Salter factory with woodworking and finishing machinery has been completed and the factory's capacity has taken the expected large increase without any delay.

Indications are that dealers are not to be caught napping on cabinet deliveries this year and A. H. Grim, who was formerly with the Tonk Manufacturing Co., and who now cares for the local business of the Salter Co., reports a large number of orders on holiday goods that are to be delivered immediately.

WHOLESALE TRADE SHOWS BIG GAIN IN ST. LOUIS

Extreme Heat Hurts Retail Sales But Dealers Are Busy Preparing for Unusually Active Fall—Dealers' Association to Discuss Trade-in Values and the Approval System—Election of E. C. Rauth to Presidency Pleases Friends in Home City—Other News

ST. LOUIS, MO., August 7.—The trade in talking machines is progressing nicely and some high merchandising records are being made, but the latter half of July showed a strong slump in the record business in the downtown stores. For the first time in the remembrance of downtown merchants the Victor Monthly advertisement came and went without a distinct showing in the cash sales. But at that time the mercury was reaching almost 100 daily and the dealers did not blame the customers for not going out of their way for anything even as attractive as new records. It was the same with other lines. There was only a small, steady trade and nothing the dealers could do would stir anything but more heat.

The greatest gains, perhaps, for the month was in the wholesale business. At the Columbia warerooms C. R. Salmon, wholesale manager, said, "we had a whale of a month." Mark Silverstone said, "we have more than doubled previous records. E. C. Rauth, of the Koerber-Brenner Music Co., said for the Victor line, "trade is excellent in all sections of our territory."

The jobbers are strongly of the opinion that a good many dealers are planning not to be caught short of machines next winter, and for that reason are placing very heavy orders early in the season. Most of the orders now being booked are for immediate delivery. The jobbers are quite sure that these orders, as large as they seem, will not help much for the holiday trade, as the retail trade is going forward to such an extent that the stocks that the retailers anticipated for holiday trade help will be eaten up in a hurry when the fall buying begins.

This view is founded on the trade in those sections of the country where the crop money has been cashed in. Also on the fact, which is subtantiated by the last Federal Reserve Bank report, that this section of the country is just now coming into its own in the wave of prosperity that swept the Eastern country a few months ago. Almost without exception, crops are good and money is in demand, factories are working overtime and labor is about the only scarce commodity.

Dealers' Association to Discuss Trade Matters

The Talking Machine Dealers' Association has called its next meeting for the Century Boat Club, which is high on the bluffs on the south side of the city. At this meeting the "trade in" committee will make its report, and from the amount of consideration and discussion given to this question by members, it is believed that the report will be adopted. It probably will set a value of 10 per cent. of the original price on all old style machines that are offered in part payment. Also that the customer must buy a machine priced at at least ten times the amount of this allowance to get full benefit. No arrangement has been made for setting a value on comparatively new machines, this being left for the present to the dealer. But all values put on trade-ins must be reported at once to the secretary who will card index them and report such values to any other dealer who may inquire. This latter method is depended upon to check the evil that arises over pianos and other instruments that are offered as trade-ins.

The record approval committee has not been as successful in reaching more rigid provisions than those now in force, according to reports. The present plan is that the customer must keep at least 25 per cent. of the records taken out and must make returns in twenty-four hours. It is believed that the percentage will be raised to 50 per cent.

Going After Motor Boat Trade

Retail Manager Philipps at Columbia warerooms, reports exceptional sales of small machines to motor boat owners and club houses. This season he employed as salesman a man in another trade, but whose passion is the river. He goes to the water at every opportunity and knows all the regulars. He had never tried his hand at selling, but has made good with Columbias as a side line. He has had two or more sales every week and has brought in some customers who bought high priced machines, but his own sales all have been the small ones.

I. J. Goldwasser is the latest addition to the Columbia sales staff.

Mark Silverstone, of the Silverstone Music Co., Edison jobbers, is maintaining his newspaper advertising throughout the summer months by occasional remarks in facsimile penmanship, personally signed and carried under his picture. Mr. Silverstone is already beginning to mention a forthcoming tone test in his advertising, although it will not be given until some time in October. He says that the crowd for this already is assured.

Congratulations for Secretary Rauth

E. C. Rauth went North for a vacation after attending the meeting of the Talking Machine Jobbers' Association at which he was elected president of that body. There was considerable inquiry for him here after the Talking Machine World had brought the report of the meeting, as many dealers, including those in other lines than the Victor, which is Mr. Rauth's special study, wished to offer their congratulations to him and also to the association. When Mr. Rauth got home the first of the month he found an accumulation of business and affairs awaiting him, so that he has had little time to give attention to affairs of the future. He found a good many things concerning the local Talking Machine Association, of which he has been one of the active members, that had been postponed until assured that he would be here to attend the meeting.

ENVELOPES

are far superior to wrapping paper for wrapping records. Your customers will appreciate this kind of package more than you imagine. We make them of gray or brown kraft with string and button fastener, either printed to your copy or plain. Try our corrugated paper packing boxes. Samples upon request.
J. L. GILLESPIE CO., Pittsburgh, Pa.

Manager Irby Reid, of the Columbia Co., was at Memphis the first of the month for several days.

H. A. Yerkes, district manager of the Columbia line, was here from Chicago for several days the first of the month reviewing the local situation.

Manager Hallahan, of Aeolian Hall, talking machine department, was glad to get away early this month for a vacation. The hot season, it seems, has been more wearing on the Aeolian-Vocalion staff than on the trade. As a last word Mr. Hallahan expressed amazement that the machine trade had continued into the hot season and quoted this as the progress the Vocalion was making and the hold it was gaining on the St. Louis public. At Aeolian Hall considerable pride is taken in the service department, and this feature is said to have sustained the record sales at a very high mark through the heated season.

NEW TYPES OF TONE ARMS

The Consolidated Phono Parts Corp., New York, has just placed on the market two types of universal tone arms. According to its present plans the company will have a line of four styles of these tone arms, all of which will be ready in the near future. During the past few weeks the company's sales staff closed a number of important deals for the various parts it manufactures, including two motor deals, totaling many thousands of motors.

THE FLOAT THAT MADE ADVERTISING MEN ENTHUSIASTIC

The winning by the Victor Talking Machine Co., of the silver cup offered for the best float in the parade held during the recent convention of the Associated Advertising Clubs, in Philadelphia, was told in all reports of the convention, published in all sections of the country and proved a means of publicity well worth the effort put in designing and arranging the float in question. That one of the country's largest

Prize Winning Display of Victor Co., in Advertising Clubs' Parade

advertisers secured the award is a matter of particular interest. The attractiveness of the float, which is illustrated herewith, indicates that the judges could not be far wrong in presenting the prize as they did.

For the first section of the float, one of the Victor Co.'s big Packard trucks was covered with a platform hidden under white cloth with valances reaching close to the ground on each side. On the platform the Victor trade mark, dog and all, was reproduced in mammoth proportions. Lights hidden in channels on each side of the float, similar to the foot lights in the theatre, and supplied by current from storage batteries, kept the float brilliantly lighted through the line of march. The second section of the exhibit consisted of a wagon used to transport scenery and covered with a platform measuring twelve by thirty-six feet. The float was also lighted as was the first one, with the addition of four automobile searchlights playing on the Victrola from the four corners of the platform.

On this float were thirty persons in costume—not intended to represent artists, but to be a sort of personification of the opera itself. Here, of course, is magnificent material for a pageant. Towering over everything was the Victrola. Almost as high was an heroic figure in armor of Die Walküre—at the rear an equally heroic figure of Lohengrin. There were Siegfried, Aida, Tosca, Mme. Butterfly, Faust and Pagliacci, Parsifal, Bohême and many others. Then, to emphasize the universality of Victor music, there was a chorister to represent sacred music, a violinist and a bandmaster. Vaudeville, and even the "nigger" minstrel music, were represented, though not so prominently.

The characters were costumed and made-up in the Metropolitan Opera House dressing rooms and with the aid of expert costumers. Two pages followed the floats throughout the parade, tossing balloons carrying the Victor advertisment into the crowds.

TO TAKE RECORDS TO LABRADOR

MONTREAL, CAN., July 31.—Dr. Wilfred Grenfeli, of Labrador fame, recently purchased a liberal supply of patriotic and popular Columbia records from Layton Bros., which he will take along with him on his coming trip to Labrador.

A Business Talk With Jobbers About a 7" Record

It's a changed situation. The demand for a lower priced record is even greater than it was a year ago.

In about three months or sooner the demand will be many times greater than it is today.

Probably the greatest factor in bringing about this change will be the **Majestic Record.**

Because: The **Majestic Record** is 7" —plays as long as most 10" records —qualifies with the best and sells for 25c.

When we put **Quality**—three minutes —and brought the price to 25c—we did something for the trade.

No other record sells with such ease as the **Majestic.** Deliveries in quantity **Now.**

Get in touch with us now—we are ready to "talk turkey" with live dealers where we are not already represented.

Majestic Phonograph Co., Inc., 247-253 West 19th Street New York City

THE TRADE IN NEW YORK CITY AND VICINITY

The local talking machine trade closed a very healthy July, as there was very little evidence of the expected midsummer depression, and the sales totals showed a good-sized gain over last year. August has started in equally as well, and from all indications the coming fall will be a record breaking season for all factors of the talking machine industry.

Machine Situation Improving

Machine shipments have improved considerably the past few weeks, although there is still a shortage of the machines retailing at $75 and $100, with the usual scarcity of the lower-priced models which always have a big sale during the summer months. The record situation was never better than it is at the present moment, and the distributors are filling practically all record orders on a 100 per cent. basis. The summer record supplements issued by the various manufacturers have been especially praiseworthy this year, containing a wealth of material suitable for summer presentation. The better class of music has also been well represented in these record supplements and the dealers report a very gratifying demand for these records. In fact they state that this summer's record sales have consisted in the main of the better class of music.

Getting Ready for Fall Trade

Quite a number of the local dealers have taken advantage of the summer months to redecorate and refurnish their warerooms in preparation for fall trade. The prosperity of the talking machine industry is well evidenced by the activities of the trade in this direction, and in all parts of the city carpenters, masons and decorators are busily engaged in improving the appearance of talking machine warerooms, constructing new booths and generally putting the various establishments in order for the coming season.

Price Cards Well Received

The new price cards recently prepared by the efficiency department of the New York Talking Machine Co., Victor distributor, have met with phenomenal success, and dealers throughout the country have been ordering complete sets of these cards for use in their warerooms. These cards were prepared in four different designs so that the dealer may choose the design best suited for his particular requirements. The many other dealer helps issued by this efficiency department are continuing to give perfect satisfaction to the company's dealers and have been heartily praised by Victor representatives everywhere.

Pleased With Fall Outlook

"July business was very satisfactory," said R. F. Bolton, district manager of the Columbia Graphophone Co., in a chat with The World. "Our sales totals were considerably ahead of last year, and would have been much greater if we had been able to receive sufficient merchandise from our factory. The outlook for fall is very gratifying, and we have on hand at the present time more orders for fall deliveries than at any time in the history of this organization. We expect to complete deliveries of these orders during the next two months so that our dealers will be adequately prepared for the fall trade." Mr. Bolton left Monday for a two weeks' trip up State, upon which he will visit the Columbia distributing branches in the various cities included in his territory.

Activities of the Local Dealers

A fair idea of the actual status of the local talking machine trade may be gathered from the reports of the dealers in the various sections throughout the city. For example, the stores in the Washington Heights section report a slight depression during the month of July, owing to the fact that so many of their customers leave town for the summer. At the same time, however, these dealers report business considerably ahead of last year, especially in their record departments.

Reports From the Washington Heights Dealers

The Secord Piano Co., which recently opened piano warerooms at 3493 Broadway and is handling the complete Pathé line, is achieving very pleasing success with these products. Mr. Secord is making plans for a splendid fall trade and will concentrate to a great extent on the sale of the higher priced Pathephones.

The Abelowitz Phonograph Co., at 1353 St. Nicholas avenue, which handles the Victor line exclusively, recently redecorated its store and added two new demonstration booths. This company makes a specialty of handling the complete catalog of Victor records, together with a large proportion of the foreign records issued by the Victor Co. Mr. Abelowitz, in comparing this year's business with 1915, stated that the first seven months had shown an increase of over 100 per cent.

The Audubon Grafonola Shop, 3750 Broadway, handling the Columbia line exclusively, reports an exceptionally active summer demand for Columbia records. This shop has been somewhat handicapped by the Columbia machine shortage, but expects to have its stock of machines completely filled within the next week or two.

Summer business at the Edison Shop, 160th street and Broadway, has been fully up to expectations, and preparations are being made for a healthy fall trade. This store is one of

(*Continued from page* 84)

the most attractive retail establishments on upper Broadway, being decorated and furnished along the most up-to-date lines.

The Daly & Cool Music Shop, 556 West 181st street, handling the Victor and Columbia lines, recently added three new demonstration booths for their store equipment, and generally rearranged their warerooms to accommodate these new booths. The appearance of the store has been greatly improved the past few weeks, and in its present shape every convenience is afforded visitors and prospective purchasers.

The recently opened Pathé Shop, at 3909 Broadway, which has only been in business a few months, has already developed a very profitable trade with this line. The new Pathé records have been very popular with this store's clientele and according to the plans of the Pathé Frères Co. Pathé dealers will be given every possible co-operation and service during the next few months.

Harlem Trade Very Satisfactory

In the 125th street district July business was unusually active and from a talking machine standpoint this street is gradually becoming one of the city's important retail centers.

The retail Victor department of I. Davega, Jr., will shortly be improved by the addition of several new demonstration booths, which will be ready in ample time to handle the fall trade. Herman Lowenstein, manager of this department, is most enthusiastic in his predictions for the future, especially as his company's summer business has been far ahead of expectations.

The Grafonola Shop, 143 West 125th street, handling the Columbia line exclusively, closed a very satisfactory July trade. Courtland Shaw, manager of this store, recently visited Boston, and while there gathered some new ideas in connection with the handling of his repair department, which has greatly enhanced the efficiency of this important department.

Winterroth & Co., the well-known piano house, recently arranged to handle the complete Pathé line in the company's Harlem store, at 14 West 125th street. J. E. Winterroth, manager of this store is well pleased with the results already achieved in his Pathé department, and expects to close a splendid fall trade.

Harry W. Acton, manager of the Victrola and Grafonola departments at the Kranich & Bach store, 16 West 125th street, states that business for the month of July was far ahead of expectations.

J. A. Kraus, manager of the Triton Phonograph Corp., 41 Union Square, New York, is recovering from a serious operation.

REGISTRATION OF TUNGS-TONE

Some Interesting Data Leading to the Acceptability of This Word by the United States Patent Office Filed by the Victor Co.

In a recent issue of Printers' Ink, an interesting article appeared relative to the success of the Victor Talking Machine Co. in securing registration for the name "Tungs-tone" from the Patent Office at Washington, D. C. As this article points out, below, the Victor Co. was obliged to overcome numerous obstacles before it was finally successful in its claims.

"Wonder that the Victor Talking Machine Co. was able to 'get by' at the Patent Office with 'Tungs-tone,' its latest trade-mark, has been freely expressed in advertising circles. As a matter of fact, the word was rejected by the United States Examiner of Trade-Marks at Washington until he was instructed from the office of the United States Commissioner of Patents to rule differently. The decision, on appeal, makes it appear that 'Tungs-tone' was never warrantably in danger at the Patent Office, and this opinion from headquarters may be interesting to advertisers in general as shedding additional light upon the acceptability of the suggestive word—most sought of all types of trade-marks.

"'Tungs-tone' was proffered for registration by the Victor Co. as a mark for its new-style talking machine needles or styli, and since the needle points are admittedly made of tungsten the trade-mark examiner promptly made a ruling that 'Tungs-tone' is too near tungsten. Of course the examiner had to take cognizance of the fact that the word as used by the Victor, is divided into two parts, and that in pronouncing it the average retail dealer in talking machines is prone to place the emphasis on the last syllable in pursuance of the Victor advertising policy that always plays up the 'tone' of its products. However, that aspect of the case did not disconcert the head of the trade-mark division, for he held that even though the word be divided it fell under the ruling in the case of the Shumate Razor Co., wherein it was decided, some time since, that 'Tungsteel' could not be registered as a trade-mark for razors and pocket knives.

"As a reward of merit for originality, however, the first assistant commissioner gave his sanction to the Victor Co. when it appealed the 'Tungs-tone' case. He has pointed out, in justification of his action, that 'Tungs-tone' is a newly coined word, not in the dictionary, and that therefore no one would need it in describing his needles. In other words, he holds that it leaves open to everybody else all words including 'tungsten' that would be useful in describing any quality or property appertaining to phonograph needles. * * *

"Counsel for the Victor Talking Machine Co. were able to cite, in pressing their appeal, a number of comparatively late decisions at the Patent Office as indicating the recent leniency of Patent Office practice with respect to suggestive words. That familiarity on the part of an advertiser with the concessions as to trade-marks that have been made to other advertisers may prove a genuine asset is indicated by the final 'Tungs-tone' decision which seemingly gives partial credit for the reversal of the trade-mark examiner to the mustering of precedents.

"Among the current admissions that the Victor instanced to justify the entry of 'Tungs-tone' were the acceptance of 'Porceliron' for enameled ware; 'Benzo-Boreine' for an antiseptic lotion; 'Kromoke' for leather belting; and best of all because in the musical field and embracing 'tone,' the word 'Interpretone' lately allowed for mechanical music-playing instruments. Confronted with this array the first assistant commissioner of patents said with respect to 'Tungs-tone': 'In view of these decisions and the instances showing the trend of the office practice, it is believed that this word should be allowed.'"

TO OPEN OFFICE IN CHICAGO

R. D. Wyckoff, general manager of the Emerson Phonograph Co., New York, announced this week that the company had arranged to open a branch office at 7 East Jackson boulevard, Chicago, Ill., in order to handle its fast growing trade in the Middle West. F. W. Clement has been placed in charge of this branch, which will carry a complete stock of Emerson records and make deliveries to the dealers in that territory.

L. L. McMaster, of Wakefield, Mass., has secured the local agency for the Columbia.

TALKING MACHINES FOR HAITI

Consular Agent Reports a Good Opening for Inexpensive Machines There

WASHINGTON, D. C., July 31.—According to special agent Garrard Harris, there is an opening in Haiti for an inexpensive talking machine. He says "It should be as simple and durable as it is possible to make and as near 'fool proof' as ingenuity can devise. Wax records will not do on account of their liability to breakage and also because of climatic conditions. The flat rubber records should be provided and, if possible, should contain a selection on each side.

"If an agency could be established to sell instruments on the instalment plan, the number disposed of would be large. The Haitians, or the vast majority of them, are not able to make purchases involving a considerable outlay at one time, but on a payment down and a certain sum per week will undertake and carry through financial outlays otherwise impossible. They are very fond of music and would undoubtedly welcome the opportunity to purchase talking machines, of which there are very few, indeed, on the island. There would be a limited demand for the more expensive kinds also.

"Records in French would prove most popular. Representatives should be thoroughly familiar with and fluent in the French language to be successful."

TO HOLD ANNUAL OUTING

The New York Talking Machine Co., Victor distributor, has made arrangements whereby its employes will hold their annual outing and games on September 9 at Beech Hill Inn, Rye Beach, N. Y. A comprehensive program of athletic events has been prepared for this year's outing with the star attraction in the shape of the annual baseball game between the single and married men. Last year's game was won by the bachelors, but this year's tussle promises to be even more thrilling than the 1915 game. W. L. Garber and R. G. Craig are in charge of all arrangements and a banner attendance is expected.

LOOK OUT FOR THIEVES

Sol Lazarus, the well-known Victor and Columbia dealer at 216 East Fifty-ninth street, New York, reported last week the loss of two Columbia and nine Victor sound boxes from his establishment. The thieves have not yet been apprehended, although no effort is being spared to bring them to justice. This thievery of sound boxes has been prevalent in the East the past few months, and there is apparently an organized band concentrating in this field.

D. D. O'NEILL BECOMES MANAGER

Of the Talking Machine Department of Gimbel Bros., New York—An Experienced Man

D. D. O'Neill was this week appointed manager of the Victrola department of Gimbel Bros., New York, succeeding George W. Morgan, who had been in charge of this department in connection with the piano, sheet music and musical merchandise sections.

Mr. O'Neill is thoroughly versed in all details of the Victor business and recently conducted his own Victor establishment in Philadelphia, Pa. The Gimbel Victor department is one of the most successful in this city and will offer Mr. O'Neill unlimited opportunities for development and expansion.

F. E. Fitzgerald retains charge of the piano sheet music and musical merchandise departments.

"ALONG BROADWAY" POPULAR

The latest Edison publication, "Along Broadway," is growing in popularity with each succeeding issue. It contains interviews with the great personalities of the opera, notes and comments on various developments along musical lines, and information bearing on the Edison Diamond Disc phonograph. While designed primarily for circulation among owners of Edison machines it has proven so interesting that it is being sought by persons who are not owners of machines, but who wish to keep themselves posted on musical events and progress. The magazine is attractive from a typographical standpoint, and the increasing demand for it shows that it is fulfilling its mission well.

CASES ON THE CALENDAR

Judge Mayer, in the United States District Court, called the calendar for the cases to be argued in the court's September and October terms. A number of talking machine manufacturers have actions on this calendar, including the following: Victor Talking Machine Co. vs. Sonora Phonograph Corp. (three actions); Victor Talking Machine Co. vs. Globe Talking Machine Co.; American Graphophone Co. vs. Emerson Phonograph Co.; Gibson vs. Sonora Phonograph Corp.

ENGAGE THE RIALTO ORCHESTRA

This Organization, of Which Hugo Riesenfeld Is Conductor, to Make Records for Emerson Co.

The Emerson Phonograph Co., New York, has completed arrangements whereby the Rialto Orchestra, conducted by Hugo Riesenfeld, will make a series of records for the Emerson disc library. This orchestra, consisting of thirty-five selected musicians, has proven a big attraction at the Rialto Theatre, Forty-second street and Broadway, New York.

Hugo Riesenfeld

Mr. Riesenfeld is prominent in musical circles both here and abroad, having been concert master at the Imperial Opera House in Vienna, and in recent years being associated with the Manhattan Opera House and the Century Opera House in New York. The Rialto Orchestra has already recorded several selections for the Emerson library which will be ready for the Emerson trade in the very near future.

TALKING MACHINE MEN, INC., MEET

Discussion of Misleading Advertising a Feature of Monthly Meeting

The monthly meeting of the Talking Machine Men, Inc., was held July 19 at Keen's Chop House, 70 West Thirty-sixth street, New York, and was well attended, in spite of the fact that a large number of members were on vacation.

A luncheon was served at 1 o'clock and the business session immediately followed. In the absence of President Hunt, Vice-President J. T. Coughlin presided. He opened with a few brief remarks and stated that owing to the hot weather business would be transacted as rapidly as possible.

Chairman Shepard, of the committee on credentials, presented several applications for membership, which were voted on and accepted. This committee also reported that it was succeeding in getting publicity for the organization that would be of great benefit in enlarging its membership. Mr. Shepard also stated his committee was preparing a card for use in windows and other conspicuous places, showing that the displayer was a member of the Talking Machine Men, Inc.

The association went on record against misleading and detrimental advertising. A resolution was also passed instructing the secretary to prepare letters to be presented to the different manufacturers of records giving them all the information the association possessed in regard to price cutters. After the meeting was officially adjourned, several informal talks took place.

INSTALL DEMONSTRATION BOOTHS

Prominent Concerns Find Use for the Van Veen "Bed Set" Booths—Numerous Inquiries

A. L. Van Veen, president of A. L. Van Veen & Co., New York, manufacturer of Van Veen "Bed Set" demonstration booths, stated this week that the company had received quite a number of letters of praise from local dealers for whom it had installed booths during the past few weeks. Among these concerns are the following: Kraukauer Bros., Christman Sons, Stultz & Bauer and Savidge & Reed.

Mr. Van Veen also stated that he had received numerous inquiries from dealers throughout the country who are planning to add to their equipment before the fall season starts. Baumann & Co., 162d street and Third avenue, New York, arranged this week for the installation of a complement of Van Veen booths.

RECEIVER FOR ALBANY CO.

ALBANY, N. Y., July 31.—The Albany Diamond Disc Co., retail distributers of talking machines, was placed in the hands of a receiver last week, Nathan D. Griffen being appointed as the same. The petition in bankruptcy which was filed shows liabilities of $44,000 and assets of $35,000. The receiver has been given permission to continue the business of the concern, under a bond of $20,000. The creditors of the concern are being represented by H. D. Wright, of Gloversville, N. Y.

MAKING DETERLING MACHINES

MUNCIE, IND., August 5.—The Deterling Talking Machine is being built by the Deterling Music Co. in the factory of the Bell Bros. Piano Co., space having been rented in the factory for that purpose. Contrary to a report recently published, there is no connection between the Deterling concern and the Bell Bros. Co.

THE TRADE IN THE SOUTH

TRADE BOOMING IN THE SOUTH

Crop Conditions Excellent in Most States, Though Floods Have Done Some Damage—Increasing Demand for Machines and Records

Talking machine business in the South continues to show a very favorable trend despite the fact the summer season usually brings a cessation of activities in almost every line of business. Aside from the growing popularity of the talking machine, the enhanced prosperity of the South has greatly increased the number of people to whom a talking machine is now a necessity rather than a mere luxury. The agricultural and industrial conditions in the South as a whole are very promising.

Crops are in good shape in Virginia and most of the wheat and oats have been cut and have shown a bountiful yield. Corn is making a fine showing, the same condition prevailing in West Virginia, where the setback to the corn crop which occurred in the early part of the season has been entirely overcome. In Kentucky the outlook is very bright. The hay crop was excellent and the corn and tobacco prospects are very rosy. The yield of wheat is not as high as was expected but the quality is excellent. Unusually good prices are being offered for live stock.

The recent weeks have brought a great deal of rain in the South, which, on the whole, has been beneficial. In Tennessee, however, there has been little rain, and while the cotton crop is good, the corn crop would be greatly benefited by more rain. Prospects of a good crop of cotton in Texas are excellent. There have been good rains in the southern section of the State although the Pan-Handle complains of some drought, which is not serious, however. Crops are better in Louisiana than for several years. Cotton is in full bloom and the corn crop is excellent and is practically made.

The erection of a large packing house at Statesboro, Ga., which is in the center of the finest agricultural section, and for which a contract has recently been completed, will greatly stimulate the production of live stock. Heavy rains in the southeast section have reduced crop prospects somewhat. The corn crop, especially, will suffer, and the cotton crop will show a decrease, but conditions on the whole are fairly good. The situation in Alabama is not as favorable as might be wished. The heavy rains and floods did considerable damage, although the crops on the highlands are excellent. Increasing indications of diversified farming are seen on every hand, which will enhance the future prosperity of the State.

Unusually good crops are reported from the northern section of Mississippi. In other sections of the State the outlook is not so good, as thousands of acres of corn and cotton have been ruined by the water overflow.

Continued prosperity is shown in the manufacturing centers throughout the entire South and unemployment has been greatly diminished. The people generally are making more money than they have for some years past, and they are evincing their love for music, which is characteristic of them, by investing a fair proportion of their earnings in musical instruments. Talking machine distributors in every section of the country report a demand which has actually resulted in a shortage of goods. There is an excellent call for the better class of records and the average price of talking machines sold is much higher than formerly, all of which indicates prosperous conditions in the talking machine trade, and bright prospects for a continuance of the same in the future.

ORIGINAL ADVERTISING WINS

How the Victor Department of the Rhodes-Mahoney Co. Has Increased Its Business

CHATTANOOGA, TENN., August 1.—The Victor talking machine department of the Rhodes-Mahoney Furniture Co., of this city, which is under the capable management of H. G. Ray, is one of the most enterprising in the South. Advertising in the local papers is a favorite means of concentrating attention on the establishment, and a recent ad, which called attention to the resources of this department, its offer of one year's service on any Victrola purchased, with an expert mechanic at the buyer's service, has been no small factor in the growth of the business.

A recent advertisement which contained pictures of the various styles of Victrolas and portraits of Manager Ray, Mrs. L. R. House, in charge of the record department, and J. B. Wilbanks, of the repair department, has come in for considerable praise. In this connection Mr. Ray remarked: "This campaign of advertising has more than doubled our business, and has caused considerable comment because of its originality." It is worth noting that concerns that do advertise in this original way win out.

TRADE CONDITIONS IN SAVANNAH

SAVANNAH, GA., August 1.—Trade for July and August in this locality is usually rather quiet while the cotton is in the making, for most of our people are either at the seashore or in the mountains. While there has been considerable damage to some of the crops in the Southwest and Northern Georgia by recent floods, yet this immediate vicinity has not been very seriously

affected. The local dealers handling the leading talking machine lines are looking forward to a very fine fall business. The trade outlook is excellent in every respect and the dealers are well prepared.

CARRYING TRUNKS FOR VICTROLAS

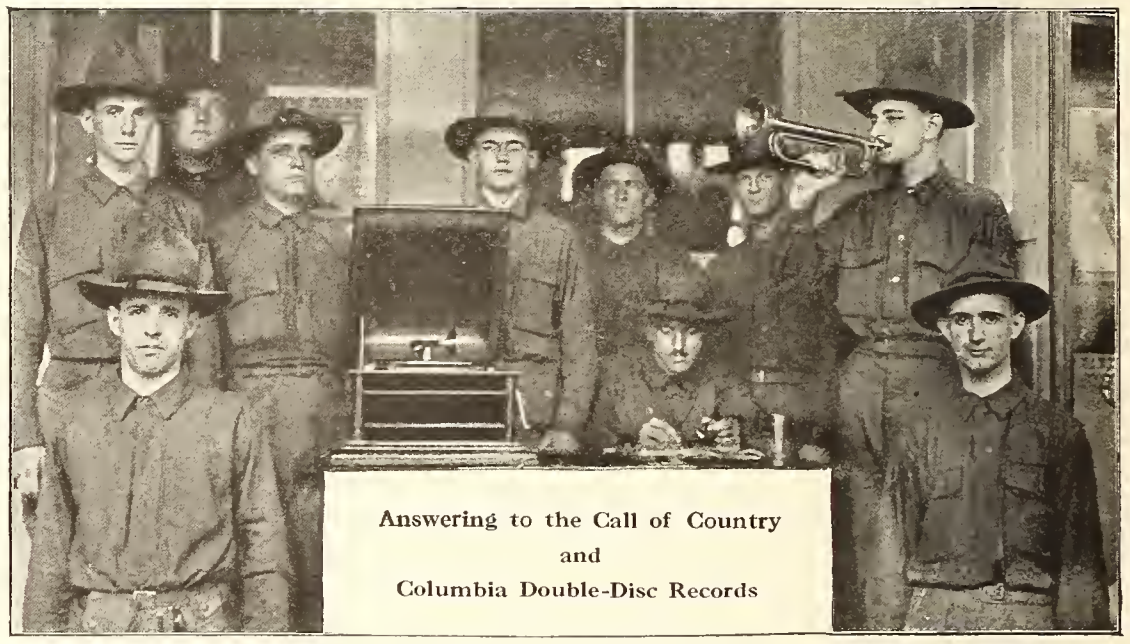
Corley Co. Announces New Convenience for the Owners of Smaller Types of Machines

The problem of the Victrola owner who desires to carry his machine to camp or country, and who has been faced with the alternative of having the instrument securely boxed or take chances on having it damaged, has been solved by the Corley Co., of Richmond, Va., which has placed on the market its new trunks for Victrolas VI, VIII and IX. The trunks are made of exact size to fit the machines, are constructed of three-ply veneer and covered with hard fibre, have metal corners and substantial locks and are fitted to carry the Victrolas securely without packing. The trunks should appeal not only to the talking machine owners but also to the salesmen who have occasion to carry sample machines on their travels. Straps are provided so that the trunk may be carried as a suit case and it is also strong enough to permit of its being checked as ordinary baggage. It should prove to be an all-year-round trade feature.

HOW THE GRAFONOLA AIDED RECRUITING IN NEW ORLEANS

NEW ORLEANS, LA., August 6.—The B. Grunewald Co., of this city, took advantage of a timely opportunity recently when the National Guard of this city prepared to mobilize in response to instructions from the Government officials, and it was found that artillery companies A, B and C lacked a full complement of men.

A recruiting office was opened and at this point the B. Grunewald Co. suggested aiding the recruiting by means of a Grafonola. The power of music and particularly the power of the Columbia list of double-disc patriotic records resulted in the three companies recruiting to desired strength in a few days.



Answering to the Call of Country
and
Columbia Double-Disc Records

LARGER QUARTERS IN ATLANTA

The Columbia Graphophone Co., of Atlanta, Ga., has leased the entire third floor of the Rosser & Porter Building at 63 North Pyror street for a term of three years. The company formerly occupied a portion of the third floor, but their increasing business made additional space necessary. Their new lease gives them 10,000 feet of floor space.

PRIZE ESSAY CONTEST ON VICTROLA

MACON, GA., August 5.—The Oberry-Williams Co., Victor dealers, recently conducted a prize contest for the best essay on the subject, "The Victrola in the Home." Many really good essays were received, the prize, a $50 Victrola, being awarded to Mrs. Louis Carter, the committee of award being composed of three ladies interested in literary work.

VICTOR ADS ON WRAPPING PAPER

ARLINGTON, TEX., August 7.—Coulter & Son, Victor dealers in this city, are advertising Victrolas and Victor records in a rather unique manner by having their Victor advertisements appear on the wrapping paper on each package that leaves their store. By changing these advertisements frequently the company has been able to carry into the homes of all visitors to its store a very effective Victor message.

The Lenoir Phonograph Shop was recently opened on West Main street, Lenoir, N. C.; a recital hall being one of the features of the new store, which will feature the Edison Diamond Disc phonographs and records.

ANDREWS

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

General Feeling of Financial Insecurity Has Effect on British Talking Machine Trade—Scarcity of Competent Workmen a Factor—Increase in Imports Reported—Planning for Active Trade Campaigns After the War—New Russian Records Listed by British Houses—What the Newest Record Lists Contain—Court Asked to Decide on Standard Record—Enterprise Shown by Certain Concerns in Face of Adverse Conditions—Records to Instruct in Wireless Operation—More German Firms Ordered to Liquidate—Shortage of Packing Boards Announced

LONDON, E. C., ENGLAND, July 26.—In the gramophone and musical instrument domain general trade conditions are not overbright at the moment. Except perhaps in particular centers, sales have fallen off considerably all over the country, mainly we should imagine in consequence of a widespread feeling of insecurity as to the effect of calling-up wage earners and business men generally for military service. These days money is not so freely spent on things-one-can-do-without, and there is now a more general desire to invest in war loans, or otherwise earmark surplus earnings for deposit in the bank. All men up to the age of forty-one not yet in khaki or exempt come under the military service acts, and this gigantic domestic upheaval obviously is going to turn things inside out. Dealers therefore fear to add to their stocks or otherwise tie up capital. The trade has reached a kind of ragtime stage when orders are placed piecemeal as conditions demand, though in bulk, quite a fair business is being done. Of the prospects for the season, I feel sanguine that trade will not be unsatisfactory, conditions and difficulties considered. Once we reach a level and know, or rather be, in a better position to estimate possibilities and probabilities at their true value, definite plans of campaign and expenditure can be more safely embarked upon. As it is, one is shy of taking action, though necessity has compelled in certain quarters commitment to confirmation of contracts. Despite little individual forebodings, which happily find only secret expression, there is, broadly speaking, an unshaken confidence in the industrial and political future. The war has reached a stage when reasonable optimism is more than ever justified. But in the present stage of the conflict it were foolish to indulge in estimates of an early peace, and we have therefore schooled ourselves to look both ways determined to make the best of things as they are, proceed cautiously, and be ready for anything that may eventuate.

A Glance at Trade Conditions

A glance at the inner workings of the gramophone trade in relation to official prohibitions, etc., may be of interest. The question which takes precedence of all others is that affecting the right of the trade to import certain necessary parts and accessories. Although the position in this respect is still a little uncertain it is becoming clearer each day, and is by now pretty well known that the Board of Trade has conceded the music trade permission to import under license a specified portion of its annual imports. France and Switzerland, I understand, may be authorized to sell us goods up to about 50 per cent. of the total value we imported during twelve months prior the prohibition order. These goods represent articles required by the whole music industry, as for instance, piano actions, and certain metal parts; gramophone motors, tone arms, sound boxes, horns, etc.

In regard to imports from America, the position is somewhat better than was at first thought possible. Official restriction, which for a long time held just against all argument, has at last been removed to the extent of permitting the importation of metal parts up to 140 tons per month. Being perhaps the freest and most flexible center of the world's metal markets at the present period, American foundries are in the best position to look after our small musical requirements promptly. The weight allowed is a mere fleabite, yet so urgent are our requirements on shipping capacity—every available foot of space being required for the transport of other or more necessary merchandise—that it was only after very considerable difficulty and argument, our officials were moved to make the concession of this small amount of tonnage. Small, yes!—but withal vital to the existence of the music trade industry, vital out of all proportion to the other interests at stake? This 140 tons will not go far. It has to be spread over the pianoforte, player, organ, gramophone, and every other section of the trade. Still, we are grateful under the circumstances, because it will enable us to keep things going pending a return to the good old times, of now, it seems, so long ago!

Planning Post Bellum Campaigns

So far as is possible under the present difficult conditions it is pleasing to note that quite a number of British gramophone firms have prepared a plan of campaign to go into effect as soon as the war is over. These plans in the main are, by the exigencies of the situation,

FROM OUR LONDON HEADQUARTERS—(Continued from page 91)

merely on paper, so to speak, yet none the less merit encouragement. As time passes they will mature and take practical shape. In examining every detail of what is likely to prove a somewhat complex situation when peace shall again reign, we are on the right track to preserve and develop our trade interests to the exclusion of after war enemy propaganda. All that can be urged at the moment is to perfect our system and organize not for defensive purposes, but for an immediate trade-war offensive the moment conditions permit. This is what we are doing, and when expedient so to do I shall advise World readers, especially its huge army of Colonial traders, just what exactly they may expect from this market.

One concrete instance of British enterprise that may now be mentioned is furnished by the house of J. E. Hough, Ltd., Glengall road, Peckham, London. Suitable plant has already been installed for the manufacture of complete gramophones which will render the firm independent of foreign supplies. The labor and supply difficulties are serious handicaps at the moment, but there is already sufficient evidence that Messrs. Hough will be in a position to meet all afterwar machine requirements. Good luck to them!

What is a Standard Record?

A novel point bearing upon the playing size of a record was raised in a recent law action between the Regent Fittings Co. of Old St. London, and Hall Bros., Heath road, Ilford. The latter was sued by the Regent people for 5 guineas, the price of a gramophone supplied. On the day of sale plaintiff demonstrated that the instrument contained a motor that would play eight records, but the next day defendant returned and complained that when he tried it at home, the machine would not play more than four records with one winding. On this ground defendant repudiated the transaction, hence the action-at-law. The evidence at the first hearing being somewhat conflicting, Judge Graham adjourned the case for production of the instrument. Subsequently this was brought into court, and on the Magistrate's advice, taken into the courtyard for purposes of demonstration. After a thorough test it was found that the motor would run not quite to the limit of five records. These particular records, it appears, were supplied by defendant whose counsel said that plaintiff had brought up a lot of records—all short tunes, and he could not allow a test with those on the ground that they were not "standard" records. Plaintiff interpolated that "defendants' records were of very large size, and it was not a fair test . . . he should take records of an average size (length) which I have with me . . . the motor will play eight." After further argument Judge Graham remarked: "I have nothing about standard records on my notes. It was suggested the plaintiff said it would do eight tunes with one wind: the defendant did not suggest the plaintiff said standard records, and when he got home he tried standard records and they would not work." Defendants' counsel: I took it for granted that it was agreed they must be standard records. Judge: You may have done so, but there is no mention of it here, and the plaintiff says he has actually got eight records which can be played by this motor with one wind; isn't that fair on his part? You have proved that it will not play eight standard records, but there is no evidence that he purchased it with the idea that it would do so. Counsel: You will recognize that this case raises a very important point in the trade as to what a record really is. We bought this gramophone to work 10-inch records, the records recognized in the trade, and it raises a big question if a man can put you off with anything. Judge Graham: I see nothing in the point. The defendant himself admits he took plaintiff's word it would play eight tunes; no mention was made of standard size, but it is not right to say it will not do eight tunes. There will be a verdict for plaintiff for the amount claimed, with costs.

As far as my experience goes, this is the first instance in law of distinction being made between tunes and records. The attempt to raise a question on what counsel was pleased to term "standard" records as measured by length of playing time, is to say the least, ingenious. Plaintiff having demonstrated that his machine would play eight records, there being no guarantee as to the length of each record, only one judgment was possible, in this particular instance. At the same time one cannot help giving expression to the opinion that the contention of defendant's counsel, from a common sense point of view, was quite good. Apart from the case in question, one must agree that in general the claims made as to the playing strength of gramophone motors are often misleading. If these claims are to be based on the number of records a motor will play, it is scarcely fair to determine it by the shortest record that can be found, any more than by the longest. An average should be and could be struck, but I am of the opinion that it would be far more honest to describe this or that machine as containing a motor that will play for so many minutes. By so doing any question of alleged misrepresentation would be entirely eliminated. Towards this desirable end, the law action under review will materially assist.

Grammavox Record for Oversea Buyers

Far removed from the district known as Phonoland, the Sound Recording Co., Ltd.,

Mr. DEALER: You Will Be SHORT OF RECORDS This Season!

You lost business last season through the demand exceeding the supply. Don't let it happen again.

Get into touch with us right away, and make sure of your stock for the busiest Fall trade you've ever had.

THE INVICTA RECORD CO., Ltd., 1 New Inn Yard, London, E. C., England ***Cables***

FROM OUR LONDON HEADQUARTERS—(Continued from page 92)

with its headquarters on Swallow street, Piccadilly, London, W., seems rather to court a certain seclusion outside the publicity limelight so frequently reflected upon the doings of other gramophone houses. While not wholly so, there is nevertheless a measure of truth in the fact that the company are not at the moment desirous of proclaiming too loudly the active work which they are accomplishing in behalf of gramophone traders abroad. Like most other firms the Grammavox record people have been seriously affected by the shortage of labor, but arrangements are now happily almost complete whereby this difficulty will soon be but a memory. In conversation with the general manager, M. W. Chapman, we were assured that the company's facilities for prompt recording and dispatch of 5,000 lots and up, will enable them to offer oversea buyers the best service towards the complete ousting of enemy firms and oversea record buyers are therefore invited to commence immediate negotiations for adequate supplies of the all-British Grammavox records at competitive prices. As an earnest of their enterprise and determination, the Sound Recording Co. has already secured additional premises in Swallow street, and as they aptly put it: "We hope to get more of this street in good time." The Grammavox record (10-inch double) has behind it many years of good reputation abroad for quality and general value, and in this direction there can be no doubt but that the company is on the high road to achieve further successes.

Issue Series of Records in Russian

The existing ties of friendship between Britain and Russia will undoubtedly be further strengthened along commercial lines after the war, and sincere commendation is due to any enterprise that will assist in bridging the wide and difficult gulf between the distinctive habits and general intercourse of each country. To a closer commercial understanding a knowledge of the somewhat intricate Russian language is a first essential. Upon that will arise the commercial edifice which it is hoped to build up. In this grand work it is encouraging to know that "His Master's Voice" will speak with no uncertain voice. The policy of the Gramophone Co., Ltd., has ever been one of high ideals and in musical and educational achievement, it stands unquestionably pre-eminent in its successful endeavors to raise the tone of our industry and place it upon a plane as closely allied to art as, under present methods of production, it may attain. In this regard the company's reputation is endorsed by the issue of a fine series of Russian language records, which will make considerably easier the students' task of learning the accent, grammar, and correct phrasing of this intricate language. The records have been spoken by a Russian master—no less a person than Nevill Forbes, M.A., reader in Russian to Oxford University. The chapters are from the "First Russian Book" (Forbes) published by the Clarendon Press.

False Declaration Brings Fine

For making a false declaration with regard to musical instruments imported to Dittlehampton and London, Messrs. Joseph Wallis & Son, Ltd., London, were recently mulcted in fines amounting to £60.

Attractive Winner Records

Oversea records buyers are offered a very attractive line in the "Winner" double disc, which, in point of popularity occupies a prominent place on the British markets at home and abroad. The Winner quality is second to none as judged by artistic and recording standards. A new list of good selling titles is issued each month, and dealers have come to place implicit reliance upon the sales value of these issues. That is the supreme test, and as the "Winner" record output increases each month commensurately with the demand, it may be accepted without question as a sign of strength and vitality. This, of course, reflects good service in that provision is made for every musical taste by the issue of records which have all passed a special examination by trained assistants. Apart from this quality test, the Winner boasts a splendid number of star-bill artists, many exclusive, and whose contributions are chosen from the very latest of London's musical programs. A typical example is the current Winner list, and dealers are well advised to obtain it, together with a complete Winner record catalog and trading terms. The company's address will be found in their announcement elsewhere in this section.

Variety in Zonophone Records

The essence of Zonophone record issues is "variety," to which also one might add 'topicality," for centered in the company's August supplement is about the most comprehensive choice alike welcome to dealer and public. It includes a "special!" What that means the Zonophone public will readily recognize. Many and varied are the songs for Tommy and Jack, but none for the tireless munition workers—until now. This Zono special, as may be guessed, is the one that fills the bill, and fills it very effectively, too! Aptly named "The Munition Workers' Song—an inspiration by, we are glad to note a young British musician, Miss Kathleen Bruckshaw—it portrays in vivid words that will evoke the admiration of all who hear them, a fine tribute to the men "behind" whose lot it is to undergo the stress and strain of continuous weeks and months of hard work at the bench, lathe, or other machine, in support of our gallant army and navy. That pre-eminent artist, Robert Radford (bass) has exclusively recorded this magnificent song for the British Zonophone Co. On the reverse is recorded "The Victor March," by the Black Diamond Band, and altogether nothing is wanting to make the record the success which it undoubtedly merits.

The Zono August list is otherwise well collated in up-to-date numbers, talent and quality!

Bid for Suffrage Patronage

Among recent record programs, we notice that the Grammavox Co. make a bold bid for the suffrages of keen buyers. It may be noted here that special attention is given to oversea trade requirements, details of which are set forth in the company's announcement elsewhere in this section. A fine array of popular selling titles, numbering well over 2,000 and covering every phase of music both vocal and instrumental, is available in big or small parcels at keen prices. Covering a host of standard songs, orchestral, band, and solo-instrumental "hits," the repertory is withal up-to-date, as witness, for example, the production of London's very latest musical delight—"Razzle Dazzle" within seven days of its stage appearance. This Revue is a remarkable success, and the Sound Recording Co. have been called upon to press heavily to insure that no order may go unfulfilled or delayed.

A find profit-making line is offered and publicity matter, lists and terms of trading can be obtained from the Sound Recording Co., Ltd., Swallow street, Piccadilly, London, W.

Interested in Canadian Suit

Great interest is being taken by British record manufacturers in the action of the Berliner Gramophone Co., Montreal, to restrain the Winnipeg Piano Co. from offering for sale the Coliseum records, which are made in London. The matter being sub judice, comment for the present is precluded. But we may say that in London trade circles there is a general desire to have this and other patents affecting the sale of British records in a British Dominion, cleared up once and for all.

Diminishing Supply of Workers

With most of their "eligibles" either in the army or about to be called up, British firms find it no sinecure to keep things going on the depleted staff at their disposal, and as may be surmised an unusual strain is thereby imposed upon those at the helm to whose lot falls the arduous duty of maintaining an adequate service. It is no wonder, therefore, that under such conditions prevalent over an all too long period nature at last rebels. A case in point is that of Frank Samuel, of the well-known musical instrument house of Barnett Samuel & Sons, Ltd., this city. For many months past Frank has been doing the work of two or three ordinary men, with the inevitable result. Upon medical advice he has been forced to take a prolonged rest, and at the moment of writing is in America. From cablegrams received by Nelson Samuel, I learn that he has much benefited by the sea voyage, and is rapidly regaining his normal good health. Mr. Samuel is expected home early in August, if not before, when we shall hope to find him completely restored.

Need Not Pay Over Enemy Debts

As British traders are unable to obtain payment of debts due to them by enemies, the president of the Board of Trade announces that they will not be compelled to diminish capital by paying to the public trustee moneys owing to enemy firms. Verb sap!

Music of New Revues on "H. M. V." Records

An attractive window poster from the Gramophone Co. reminds us that all the best and latest Revues and musical comedies may be obtained on "H. M. V." records. A few are: "The Bing Boys," "Follow the Crowd," "Bric-a-Brac," "Joyland," "Watch Your Step," "Tina," "Betty," "Pell Mell," "To-Night's the Night," and last but not least, "Razzle-Dazzle," and "Half-Past Eight." The services of the original artists have been secured for many of these fine records!

German Firms Ordered Wound Up

The Board of Trade has made orders for the following German firms to be wound up: Reifurt & Co., pianoforte dealers, 30 City road, London; Kastner & Co., Ltd., dealers in player-pianos, 191 Regent street, London, W.

In the case of Augeuer, Ltd., music publishers, a reference was made in Parliament to the transference of shares from a German to certain British nominees. It was, however, officially stated that payment for the shares transferred was made by promissory notes payable six months after the war. The advisory committee reported that they were unable to say that the transaction was only colorable, but "Steps were now being taken to transfer the (other —ed.) shares still held by German subjects to British subjects, and to place the company under British control."

Wireless Instructions on Records

Yet another field of practical endeavor is being cultivated by means of gramophone records. Made by the Gramophone Co., Ltd., the Wireless Press is now in possession of instruction records for radio-telegraphic students who are thereby enabled to perfect their knowledge of "receiving," and enter upon earlier examinations with better chances of success than under the old system of teaching. The records are usable on all needle-disc instruments and may be purchased from the Wireless Press, Ltd., Marconi House, London, W. C.

Shortage of Packing Boards

Owing to the great shortage of millboard, the Gramophone Co., Ltd., ask their dealers to use every endeavor to ease the situation by making up individual orders to not less than eight records. Each order for one or two records claims a cardboard box made to hold eight or ten records. The request calls for immediate action on the part of dealers, as otherwise the company might be compelled to charge for the box where an order is for less than eight records, in order to keep overhead costs as low as possible.

HAS HOUSEFUL OF MUSIC

How E. E. Thompson Pipes Talking Machine Music Through His Dwelling

The problem of distributing music throughout an entire house has been solved by E. E. Thompson, of Brazil, Ind., who recently piped talking machine music through his house from a central plant in the basement. By simply touching an electric button on the wall music of melodious tones issues from the cold air duct and the hot air registers in the floors. Every room having a register is provided with music. Even the cook can peel potatoes to the tune of a lively one-step or broil a steak to an aria from grand opera.

The invention of Mr. Thompson is based on the principle of the talking machine. On a large circular table in the basement, supported by gas pipe legs, are a series of ten iron discs. Each of the discs supports a standard phonograph record. All of the discs are kept in motion by a long sewing machine belt, which is propelled by a small electric motor attached to the under side of the table. In the center of the table is a big plaster of paris horn pointing downward like a morning glory. At the base of the horn is a tube which, in turn, conveys the music from the needle and sounds through the horn. Down the center of the tube is a tiny shaft which terminates in a little cork roller. This rolls around on the wavy surface of the top of a wooden rim around the edge of the table.

The needle is allowed to descend to the discs at points where it drops into the outside grooves of the records by depressions cut in the rim. After a selection is played the cork roller reaches the raise on the far side of the depression in the outer rim, climbs up, lifts the needle from the record and carefully places it on the next record. Thus the needle moves from record to record until the whole ten records are played and starts all over again, running as long as the motor is kept going, and supplying music at any hour of the day or night.

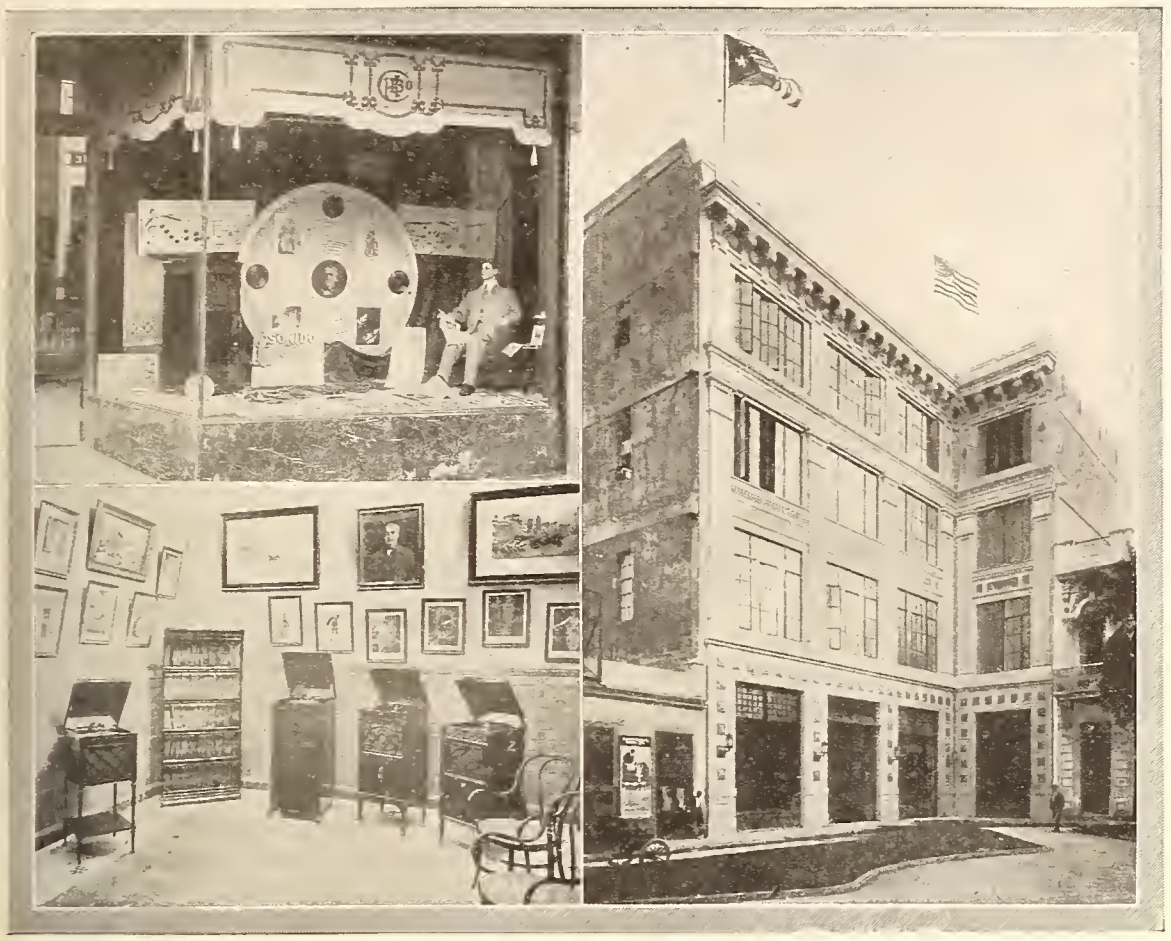
FEATURING THE EDISON PHONOGRAPH IN HAVANA, CUBA

The group of pictures herewith shows three views of the establishment the of Harris Bros. Co., Havana, recently appointed distributer of Edison phonographs and records in Cuba. The picture to the right shows the exterior of the Harris Bros. Co. building, which is considered one of the most attractive in the business section of Havana. The upper left illustration shows an unique window display. The large white disc had circular lines drawn on the face to indicate the grooves of a record. This disc was kept revolving while the hangers and cuts shown in front were stationary, thus creating a most novel effect and attracting a great deal of attention. The lower left picture shows a corner of the demonstration room.



Window Display, Demonstration Room and Exterior of the Harris Bros. Co.

G. W. LYLE ORGANIZING STAFF

George W. Lyle, who recently joined the forces of the Domestic Talking Machine Corp., Philadelphia, Pa., as sales agent, with headquarters in New York, has opened offices in the Trinity Building, 111 Broadway, and is now organizing a capable sales staff which will cooperate with the Domestic dealers along practical lines.

VISITORS AT PATHE OFFICES

Among the visitors last week at the offices of the Pathé Frères Phonograph Co., New York, were W. J. Craig, Toronto, James Malcolm, Kincardine and N. G. Valiquette, Montreal, Can. These gentlemen are the officers of the Pathé Frères Phonograph Co. of Canada, and they visited New York to discuss a number of important matters relative to the manufacturing and distribution of Pathé products in their country. They were most optimistic in their predictions for the future, stating that there is certain to be a tremendous demand for Pathephones and Pathé discs throughout the Dominion of Canada.

OPENS COLUMBIA DEPARTMENT

The Allison Furniture Co., of Americus, Ga., has opened a fully-equipped Columbia Grafonola department, with a complete line of the various styles, and a full selection of records.

ESTABLISHING MANY AGENCIES

The Mascot Talking Machine Manufacturing Co., New York, has placed on the market a line of machines ranging in price from $6 to $90. It has been establishing a number of agencies in different sections and has been particularly successful with its Styles Nos. 1 and 2, retailing at $6 and $25 respectively.

THE VALUE OF THE TRADE-MARK

A Display of the Columbia Trade-Mark Secured a Large Record Order from Japan

The Columbia department in the store of Spear & Co., 22 West Thirty-fourth street, New York, filled an order for Columbia records recently which furnished a significant tribute to the popularity of the Columbia "Note the notes" trade-mark.

Dr. Richard Goldschmidt, who had been traveling in Japan, and at the time war was declared, was interned as a prisoner of war, in a recent letter, requested a friend in this country to forward him a representative collection of Columbia records for the entertainment of himself and fellow prisoners. In his letter he particularly asked that the records be of Columbia manufacture, pasting a copy of the Columbia trade-mark on his letter.

The man who had been commissioned to purchase the records happened to pass Spear & Co.'s establishment on West Thirty-fourth street, where he noticed a large "Note the notes" trade-mark in the window, and accordingly decided to buy his records there. With the assistance of Manager Freedman, a splendid collection of records was selected and forwarded to Dr. Goldschmidt.

DIVIDEND FOR BREMNER CREDITORS

Judge Hand recently instructed the trustee of the Bremner Talking Machine Co., of 187 Broadway, to declare a dividend of 12½ per cent. to creditors. Liabilities, as filed at the time of bankruptcy, were $16,133. After payment of the first dividend there will not be a large amount left over.

Woolworth Building, New York

NEW HEINEMAN MOTOR ANNOUNCED

Otto Heineman Phonograph Supply Co. Places Model No. 3 on the Market—Some Exclusive Features Which Will Appeal to the Trade

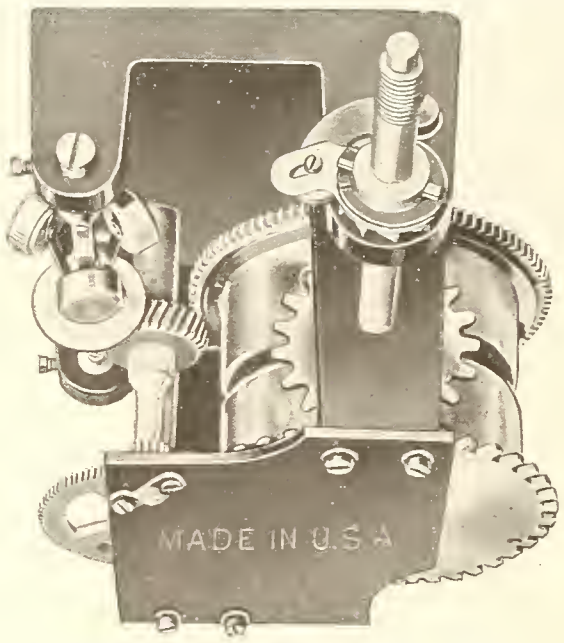
Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, announced this month the latest addition to the company's extensive motor line, consisting of a new model to be known as the Heineman No. 3 motor, 1917 model.

In a chat with The World, Mr. Heineman, referring to this new motor, said: "For several months we conducted numerous experiments and tests in our factory with the idea of developing and perfecting a new motor which could be utilized as a standard motor for floor machines. Our engineers and factory experts spent quite some time on the different phases of the motor problem and finally perfected a motor which we believe has a number of very important new features.

"We have already shipped quite a number of these motors to the leading talking machine concerns throughout the country and I am pleased to say that this new No. 3 motor, 1917 model, is giving perfect satisfaction in every respect. We are now ready to ship this motor in large quantities and the new departments which we recently opened in our factory will enable us to turn out a sufficient number of these No. 3 motors to adequately handle the demands of our trade."

The Heineman No. 3 motor, 1917 model, has a screw handle and screw shaft, the turntable shaft is on the end, burnished, hardened and polished. The governor has thrust bearings and the end of the governor shaft is also burnished and polished.

The frame of the Heineman No. 3 motor, 1917



Heineman No. 3 Motor, 1917 Model

model, embodies a number of valuable features which contribute considerably to its mechanical value. When the frame goes on the milling machines great care is taken that there is an exact and precise distance between the winding gear and the ratchet. This aids materially in making the motor absolutely noiseless. Instead of nickel plating the frame the Otto Heineman Co. has arranged to use japanned enamel on all Heineman No. 3 motor frames. This also applies to the spring barrels. The use of japanned enamel not only greatly improves the appearance of the motor, but makes it rust proof.

There are quite a number of other features embodied in the Heineman No. 3 motor, 1917 model, as for example, every screw has lock washers. No effort or expense was spared to make this Heineman No. 3 motor thoroughly representative of Heineman quality, and the reception already accorded this motor indicates that it will achieve a very large measure of success. An agreeable volume of advance orders for this motor have already been received.

LATEST UDELL LITERATURE

Just issued by the Udell Works, Indianapolis, Ind., are catalogs Nos. 51 and 52, the former being devoted exclusively to disc record cabinets for Columbia Grafonolas and the latter exclusively to disc record cabinets for Victor Victrolas.

The Udell Works has specialized in record cabinets for many years and the quality of its merchandise is well known by the thousands of merchants of this country.

Tom Griffith, advertising and sales manager, is the prime mover behind the Udell drive, which has resulted in such a big business for the house, and speaking about the new cabinets and catalogs, Mr. Griffith said, "We figure that it is better to have separate catalogs, as where dealers handle Victrolas they want a catalog that does not show anything but Victrolas, and the same is true of the Columbia dealers." Our plant is humming, and we expect this fall and winter to go ahead of all previous records. We not only have cabinets for the Columbia and Victor portable types, but will shortly have folders ready illustrating cabinets for the Pathé, Vocalion, Sonora and Empire machines.

CRAIG CAMPBELL WITH PATHE

The Pathé Frères Phonograph Co., New York, closed arrangements recently whereby Craig Campbell, a tenor who has achieved considerable success on the concert and vaudeville stages, will record for the Pathé record library. Mr. Campbell's first records will be announced shortly.

Craig Campbell has made a number of successful tours in different sections of the country, and his rendition of operatic and standard selections has won praise from newspaper and musical critics in the leading cities he visited. His repertoire is extensive and his first recordings will include selections which should meet with a ready sale.

A rather interesting feature of the September list of records issued by the Victor Talking Machine Co. is a double disc pipe organ record, which is claimed is one of unusual excellence. It is difficult to secure a clear reproduction of the pipe organ on a talking machine record.

HOW MUSIC INCREASES OUTPUT

Value of the Talking Machine as a Means of Enjoying and Stimulating Work Illustrated

The accompanying picture shows the use of a talking machine in a glove factory. The employer of these girls says that they can clean almost twice as many gloves every working day when the phonograph is playing lively music as they do on days when it is silent. Consequently, he believes that investing in a phonograph or two for use in work rooms is well worth while.

This is simply another concrete indication of the modern trend of using music as the means of relieving nervous strain in the factory. This picture first appeared in "System," the well-known magazine of business, under the interesting caption: "Does Music Increase Output?" This latter sounds like a proposition in which talking machine dealers ought to offer a pretty strong affirmative side, and indeed get some new business on the strength of their arguments that music does increase output, for the fact has been proven on numerous occasions and is being generally recognized by employers in factories and elsewhere.

Talking Machine Music Stimulates Glove Workers

SUMMER ACTIVITY IN JERSEY CITY

Leading Stores Across the Hudson Make Most Encouring Reports Regarding Conditions

JERSEY CITY, N. J., August 5.—The talking machine dealers of this city have been closing an excellent summer business, as the following reports indicate. Record business has kept up remarkably well and the shortage of machines, as a whole, has slightly abated.

Wissner's warerooms, 134 Newark avenue, states that the summer talking machine business has been exceptionally large. Miss Nellie Hanly, who is in charge of the talking machine department, says her sales have been greatly aided by the complete stock of records that her department carrics. Several new soundproof demonstration rooms are soon to be added. The Victor, Columbia and the Sonora lines are handled by this house.

The Lauter Co.'s store at 149 Newark avenue has had a good summer business with the Victor line. The demand here for records has also been above expectations. The infantile paralysis scare has kept many home who usually spend a part of the summer season at the resorts, and this has influenced sales of both machines and records.

At the Mathushek warerooms, 150 Newark avenue, Victrola sales for the summer months have been good. C. J. Collins, manager of the store, reports the sale recently of a Victrola to Chief Monohan, of the Jersey City police force.

Andrew Brunton, whose salesrooms are at 111 Newark avenue, reports many sales of Edison Diamond Disc phonographs. He is the exclusive Edison disc dealer in the shopping district. This store is doing some splendid advertising in the daily papers and is using original ideas.

At the Jacob Doll & Sons' warerooms, concerts on the Pathephone are given daily, and are greatly aiding the sales of these machines. Samuel D. Metz, manager of the store, states that the sale of both machines and records are surprisingly large and the outlook for the future never was brighter.

GROUND BROKEN FOR NEW PLANT

New Factory for Columbia Products Will Cost About $300,000—Is East of Newly Acquired Birdsey-Somers Factory

BRIDGEPORT, CONN., July 24.—Ground has been broken for the new plant of the American (Columbia) Graphophone Co., on Barnum avenue, east of the recently acquired Birdsey-Somers factory. It is estimated that this new plant will cost about $300,000, and several hundred men in the employ of the contracting company are rushing the work to an early completion.

The new building is to lie between Barnum avenue and Grant street, along Summerfield avenue. It will be of reinforced concrete, 110 feet wide by 428 feet long, three stories high. It will be similar in appearance to the former corset factory, but will be of different architecture.

Occupation of the Birdsey-Somers plant by the Columbia Co. is being taken at the present time, the corset machinery and equipment being moved out and new machinery being moved in. The Columbia Co. has been adding to its factory plants in all sections to handle its tremendously increasing trade, and it is said that the end is not yet in sight.

UKULELES

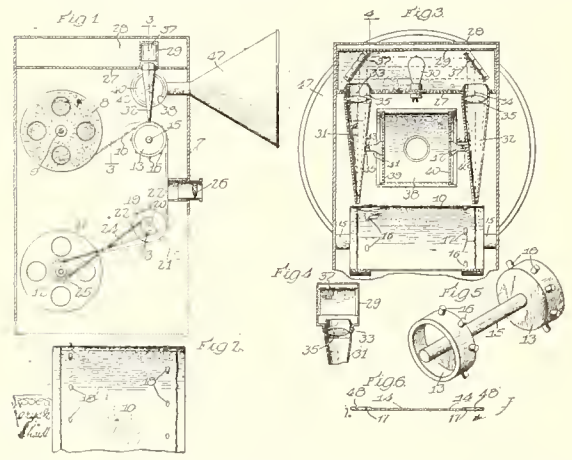
WEBER-KNAPP COMPANY
JAMESTOWN, NEW YORK

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., August 8.—METHOD OF MAKING PHONOGRAPHIC RECORDS.—Hagar H. Byron, Chicago, Ill., assignor by mesne assignment of one-third to A. H. Adams, Ada E. Pickard and J. L. Jackson, same place. Patent No. 1,185,056.

This invention has for its object to provide a new and improved method by which continuous records of any desired length may be made having one or more grooves corresponding with the sound waves to be reproduced; also to provide for making such sound grooves by photography and thus make practicable the simultaneous making of sound records and photographic records on the same medium, such as a flexible film, thereby insuring perfect synchronism.

In the accompanying drawings, Figure 1 is a vertical sectional view showing one form of apparatus that may be conveniently employed for photographing sound waves upon a continuous film and at the same time photographing views thereon; Fig. 2 is an enlarged detail,



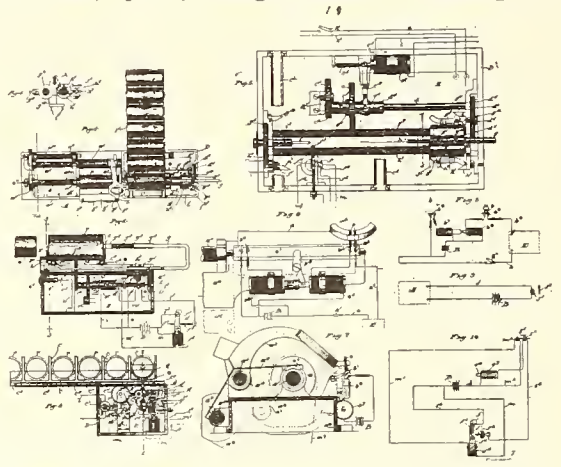
showing the face view of a portion of a combined phonographic and kinetographic record as made by such apparatus; Fig. 3 is an enlarged detail, being a partial vertical cross section on line 3—3 of Fig. 1; Fig. 4 is an enlarged detail, being a partial vertical section on line 4—4 of Fig. 3; Fig. 5 is a perspective view of the guide wheels and shaft, and Fig. 6 is a cross section of the finished record.

SOUND REPRODUCING OR RECORDING MACHINE.—George H. Underhill, Boston, Mass. Patent No. 1,185,149.

This invention consists in improvements in sound reproducing or recording machines, being particularly, though not exclusively, concerned with machines employing a plurality of records which are brought successively into operative relation with the sound recording or reproducing mechanism.

Herein is illustrated one specific embodiment of the invention as applied to a sound reproducing or recording machine employing a feeding mechanism by means of which the records are singly and automatically transferred from a traveling magazine or holder into operative relation with the sound reproducing mechanism of the machine. Subsequently, after reproduction of an individual record, the latter is then automatically withdrawn from its operative position upon the machine and replaced in the holder, which then advances to bring a fresh record adjacent the machine. The new record is then automatically transferred to the machine, the stylus mechanism restored to its initial position, and the operations of the machine, which, during the interval of feeding the records on and off the holder have been suspended, are repeated as described.

In the drawings, Figure 1 is a plan view of the machine; Fig. 2 is a sectional elevation of the record feeding mechanism taken on the line 2—2 in Fig. 3; Fig. 3 is a sectional elevation looking toward the right, and on the line 3—3 in Fig. 2; Fig. 4 is a section on the line 4—4 in Fig. 5 looking toward the right and showing the feeding carriages; Fig. 5 is a plan view on an enlarged scale of the feeding mechanism with the traveling carrier removed; Fig. 6 is an elevation, partly diagrammatic, showing the

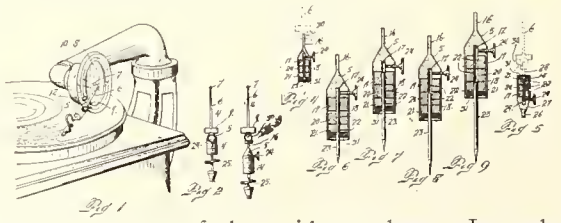


tilting shelf and the control thereof; Fig. 7 is an enlarged cross sectional view of the phonograph, showing the phonograph feed and the tilting shelf in end elevation, and Figs. 8, 9 and 10 are diagrams of the circuit connections.

TONE VARYING ATTACHMENT FOR REPRODUCING NEEDLES.—Richard H. Vesey, Denver, Col. Patent No. 1,185,266.

This invention relates to improvements in means applied to the reproducing needles of talking machines and consists in equipping the needle holder with a number of pieces or blocks composed of substances varying in hardness or density, all of them preferably being of less density than metal of which the usual needle holder is composed.

In the improvement the needle holder is simply extended, the extension consisting of a hollow part which may be integral with the ordinary needle holding member, within which hollow part is located a number of members of varying density or hardness as heretofore stated. These members are perforated to register with the recess or socket of the ordinary needle holding part. The needle, if relatively loud results are required, should extend into the metal socket or recess of the ordinary metal part. When it is desired to vary the tone by making it lower or softer, the needle is withdrawn from the metal socket so that its inner extremity shall engage one of the members of the improvement. As these members themsleves are of varying density or hardness, as many different primary or basic variations in tone may be obtained, as there are different members or substances employed. In the construction illustrated in the drawing there are shown three blocks or pieces, composed of different material from the metal holder, the said blocks or pieces also varying in density as compared with one another. Consequently four different primary tone variations may be obtained, one when the needle is in the socket of the metal holder, and others as the inner extremity of the needle is left within the other blocks or pieces of the improvement. Furthermore a great variety of sub-tone variations may be obtained by varying the distances which the needle pene-



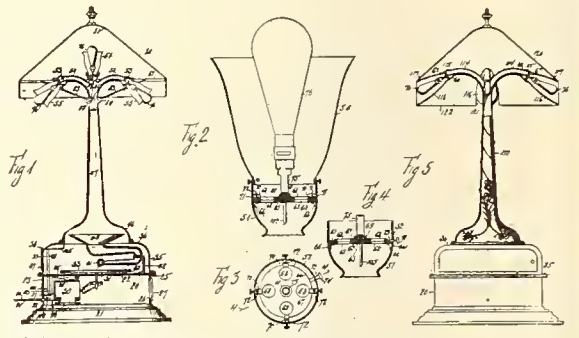
trates any one of the said members. In order to vary the tone it is only necessary to adjust the needle by moving it outwardly or inwardly as may be required.

In the drawing, Figure 1 is a perspective view of a sound reproducing machine of the disk type, the needle holder being equipped with the improvement. Fig. 2 is a detail view of a needle and needle holder likewise equipped. Fig. 3 is a similar view showing a slightly modified form of construction. Fig. 4 is a sectional view in detail showing the improvement applied to a needle holder of ordinary construction, the latter being indicated by dotted lines. Fig. 5 is a similar view showing a slightly modified form of construction. Figs. 6 to 9 inclusive are detail sectional views showing the improved needle holder construction with the needle in different positions of adjustment, the parts being shown on a larger scale than in the other views.

LIGHT AND SOUND DISTRIBUTING APPARATUS.—George E. Emerson, Newark, N. J., assignor by Mesne assignments to Emerson Phonograph Co., Inc., New York. Patent No. 1,185,987.

This invention relates to light and sound distributing apparatus, and comprises means for producing sound waves, said sound waves coacting with the heat of light rays, produced by the appurtenances of the invention, and from which results a distribution of the said sound waves.

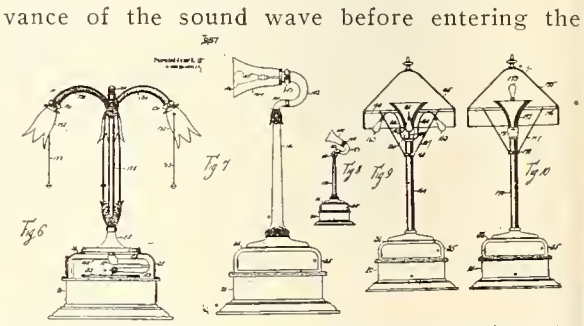
The invention assumes the form of a piece of artistic furniture, and specifically comprises a sound producing apparatus coacting with the heat resulting from a source of light, preferably a lamp, the lamp generally consisting of an electric bulb, although other sources of light may be used. The lamp is positioned to coact with the sound waves produced by the apparatus



without interfering with the vibrations thereof.

Some of the forms in which the invention may be embodied are shown and described in this application, although the disposition of the elements shown, may be varied in numerous ways without departing from the invention.

The source of light or lamp of the invention is surrounded by an envelop of heated air, the hottest layer being adjacent to the lamp, and the temperature of the layers decreasing with their distance from the lamp. The velocity of sound increases with the temperature of the transmitting medium, the velocity increasing at about the rate of 23.9 inches with one degree centigrade. The end of the sound wave nearest to the lamp travels faster than the portion more distant from the lamp. The direction of advance of the sound wave before entering the



unequally heated mass of air surrounding the lamp is parallel to the axis of the lamp, and variably heated strata of air about the lamp cause a turning of the sound wave, so that the direction of advance thereof is diverged from the axis of the lamp, thereby producing a distribution of the sound waves.

In the various forms of the invention shown and described, in which the source of illumination consists of a lamp within the sound duct or horn of the apparatus, the lamp is separated or stepped off from the latter, so that the advance of the sound waves is not obstructed. When a lamp shade is used it is preferably made of a translucent material that will reverberate from the effects of the sound waves impinging thereon, and thereby perform the functions of a sound horn.

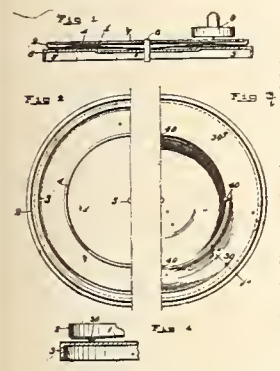
Referring to the accompanying drawings, Figure 1 represents an elevation and partial axial section of one form of the invention; Fig.

2 shows an enlarged fragmentary portion of Fig. 1; Fig. 3 is a top view of Fig. 2 with some of the elements omitted; Fig. 4 shows a section of Fig. 3 on the line 4—4; Fig. 5 represents an elevation and partial vertical axial section of a modification of the invention; Fig. 6 shows an elevation and partial axial section of a second modification of the invention; Fig. 7 shows an elevation of a third modification of the invention; Fig. 8 represents a modification of Fig. 7, and Figs. 9 and 10 show elevations of further modifications of the invention.

SOUNDING BOARD FOR PHONOGRAPHS.—Owen B. Williams, Seattle, Wash. Patent No. 1,186,869.

The object of this invention is to eliminate certain objectionable qualities in the sounds reproduced in talking machines, particularly such sounds as harsh and unnatural tones and the squeakiness or shrill character of sounds as sometimes produced. This comprises an improvement in the tonal qualities of the sounds reproduced making them a more correct reproduction of the original sounds.

Figure 1 is a vertical section taken through the rotative bell or table upon which the reproducing disc is supported while in use. Fig. 2 is a half plan view of one type of construction for the novel device which constitutes the invention. Fig. 3 is a like half plan view of the same member with slight modifications of structure, and Fig. 4 is a section showing in detail the construction of the supporting foot or projection.



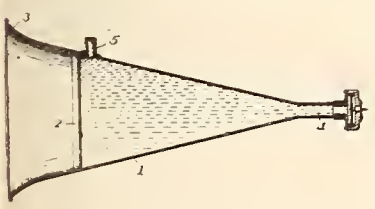
MEANS FOR MAKING AND REPRODUCING PHONOGRAPH RECORDS.—Charles F. Winch, New York. Patent No. 1,187,119.

This invention relates to apparatus for use in connection with sound recording and reproducing machines and has to do more particularly with a means for taking up and transmitting the sounds to or from the stylus or needle which engages the record.

A principal object of the invention is to produce a greater amplitude of movement of the stylus in response to the vibrations set up by the speaker or singer than is possible by previous constructions and at the same time to secure an action of said stylus that shall follow positively and faithfully the vibrations produced by the speaker or singer whose voice is to be recorded.

Essentially this invention consists of a liquid holding receptacle having a diaphragm closing one wall or side thereof and of larger area than the stylus carrying diaphragm and having also a liquid outlet by which the body of liquid with which the diaphragm is in contact may be placed in communication with the diaphragm carrying the recording stylus or needle.

The preferred form of carrying out the invention is shown in the accompanying drawings wherein a horn like the ordinary sound gathering horn of a phonograph recorder or reproducer is shown constructed as a liquid tank with a sound receiving or producing diaphragm located in or near the mouth of the same, suitable means being also provided for permitting the filling of the tank with a liquid. This particular form of the invention may be conveniently described as a phonograph tank horn.

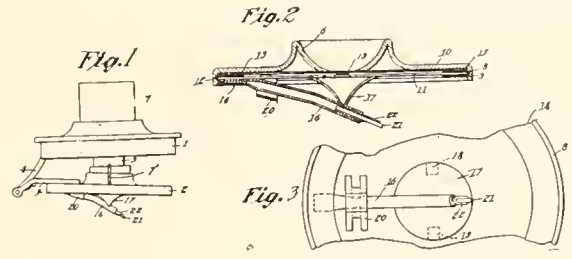


The drawing shows this form of the invention in vertical central section.

SOUND BOX FOR PHONOGRAPHS.—Newman H. Holland, West Orange, N. J., assignor to the New Jersey Patent Co., same place. Patent No. 1,187,146.

This invention relates to sound boxes and more particularly to that part of a sound box which carries the diaphragm and the stylus. It has heretofore been customary to mount the stylus of a recorder in an arm or lever disposed of at an angle with reference to the diaphragm and secured thereto both at the center and at the periphery thereof. This construction is objectionable in that the inclined stylus arm acts as a brace and thereby brakes or dampens the vibrations of the diaphragm.

It is the object to eliminate this objection by securing the stylus arm to the diaphragm in such a way that the portion of the said arm

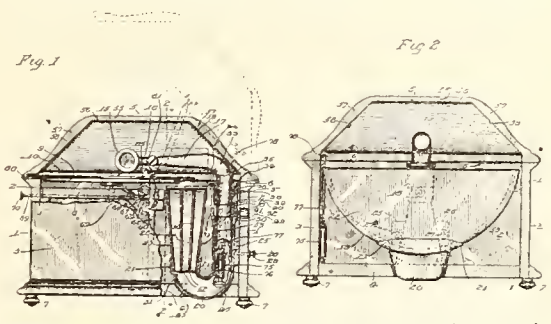


which is adjacent the periphery of the diaphragm will be movable with reference to the latter. Another object is to provide a new and improved means for securing the diaphragm to its support without the use of adhesives, screws or other similiar fastening means.

Figure 1 is a side elevation of a recorder embodying the invention; Fig. 2 is a central, vertical section of the diaphragm support and the parts carried thereby, the diaphragm being shown in end elevation, and Fig. 3 is a bottom plan view partly broken away of the device shown in Fig. 2.

SOUND REPRODUCING MACHINE.—John C. English, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 1,187,892.

The main objects of this invention are, to provide a compact talking machine having actuating mechanism, and sound reproducing and sound amplifying mechanism inclosed within a casing; to provide a talking machine having sound reproducing mechanism, and a sound amplifier inclosed in a casing having an improved adjustable cover arranged to receive the sound waves delivered from the sound amplifier and to deflect the same in any desired direction; to provide a talking machine having a record support mounted within a casing, sound reproducing means and sound amplifying means arranged to co-operate with the record support, and supported within the casing from the rear wall thereof, the sound amplifying means having a delivery end opening upwardly beneath the plane of the record support; to provide a talking machine having a casing provided with an adjustable cover and improved means for holding the cover in adjusted position; to provide a



talking machine having a casing provided with a movable cover, and improved means for preventing the sudden closing of the cover; to provide a talking machine having a casing recessed internally to permit of the use of a relatively large record.

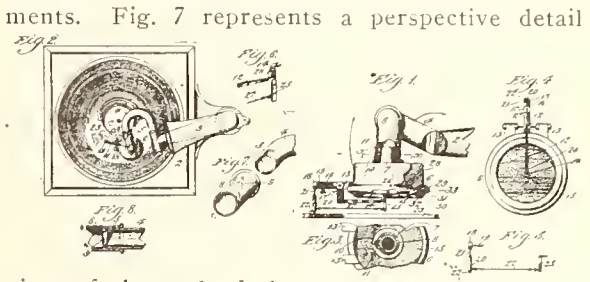
In the drawings, Figure 1 is a fragmentary side elevation partly in vertical section of a talking machine constructed in accordance with this invention, and Fig. 2 a transverse vertical section on line 2—2 of Fig. 1, looking in the direction of the arrows.

SOUND BOX FOR TALKING MACHINES.—Alva D. Jones, Philadelphia, Pa., assignor of one-half to John S. Latta, same place. Patent No. 1,188,079.

This invention consists of an attachment for the sound box in a talking machine by which such box constructed to be used with a record having its sound groove laterally waved, can be adapted to be employed with a record of the "hill and valley" type.

It further consists of means for supporting such a sound box in a horizontal plane instead of in a vertical plane from the tone arm; for attaching a tube extension between the sound box and the tone arm to present the former in the proper position to the record; means for preventing relative rotation of the box upon its support and the dislocation of the stylus.

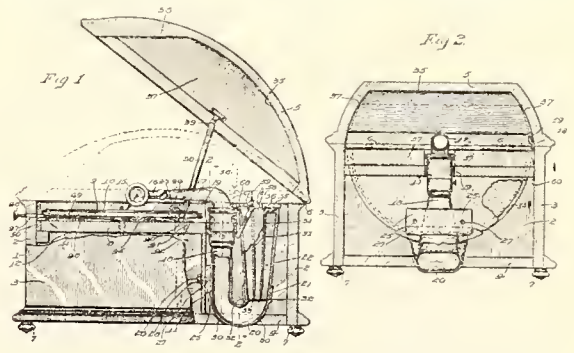
In the annexed drawings, Figure 1 represents a side elevation of the end of the tone arm, of a gooseneck and sound box of a talking machine embodying the invention. Fig. 2 represents a plan view of a talking machine having the invention applied to it. Fig. 3 represents a section on the line x—x in Fig. 1. Fig. 4 represents a plan view of the sound box and stylus mechanism. Fig. 5 represents a detail view of the tone intensifying elements. Fig. 6 represents a detail view of a detachable form of such elements. Fig. 7 represents a perspective detail



view of the end of the gooseneck and of the sound box tube, detached from each other. Fig. 8 represents an axial section of such parts when joined.

SOUND REPRODUCING MACHINE.—John C. English, Camden, N. J,. assignor to the Victor Talking Machine Co., same place. Patent No. 1,188,374.

The main objects of this invention are, to provide a compact talking machine having actuating mechanism, and sound reproducing and sound amplifying mechanism inclosed within a casing; to provide a talking machine having sound reproducing mechanism and a sound amplifier inclosed in a casing having an improved adjustable cover arranged to receive the sound waves delivered from the sound amplifier and to deflect the same in any desired direction; to provide a talking machine having an amplifier provided with an upwardly opening delivery end and inclosed in a casing having an adjustable cover arranged to deflect the sound waves delivered by the amplifier and to throw the same forwardly in any desired direction; to provide a talking machine having an amplifier with a delivery end inclosed in a casing provided with an adjustable cover arranged to deflect the sound waves delivered by the amplifier, and having an adjustable damper or closure arranged adjacent the delivery end of the amplifier to vary the quantity of sound waves directed against the deflecting surface of the cover of the casing, and thus modify the intensity of the sound waves delivered by the talking machine; to provide a talking machine inclosed in a casing having a movable cover and improved means for holding the cover in position of adjustment; to



provide an improved sound amplifier; to provide sound modifying means for a sound amplifier.

In the drawings, Figure 1 is a fragmentary side elevation, partly in vertical section, of a talking machine constructed in accordance with this invention, and Fig. 2 is a fragmentary transverse vertical section partly in elevation on line 2—2 of Fig. 1 looking in the direction of the arrows.

M. T. Abernathy has purchased an interest in the business of Kors & Meinhardt, of Independence, Kans., Edison Diamond Disc dealers, the firm now being known as Abernathy, Kors & Meinhardt.

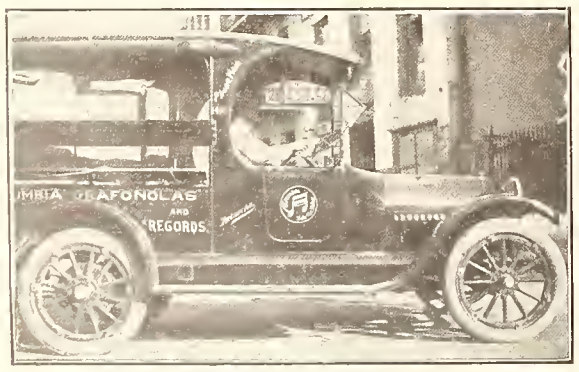
AUTO FOR GRUNEWALD SERVICE

This New Orleans Piano House Purchases Studebaker Truck for Delivery of Grafonolas

NEW ORLEANS, LA., July 29.—The L. Grunewald Co., of this city, is utilizing the most modern ideas in retail wareroom equipment in order that its patrons may receive efficient service and co-operation. In this connection the company recently purchased a Studebaker truck which is used exclusively for the distribution of Columbia Grafonolas and records to its customers in this city and the outlying suburbs. It is proving an invaluable aid to the store's general delivery system, and the service it is rendering has won considerable praise from the Grunewald Columbia clientele. The words "Columbia Grafonolas and Records" appear in bold lettering on the side of the truck, forming an effective advertisement for these products.



The Grunewald Delivery Truck

It may be mentioned, incidentally, that Columbia graphophones and records are well advertised in this city, a large painted bulletin board on St. Charles avenue featuring the famous Columbia "Note the Notes" trade-mark, with the names and addresses of some of the local Columbia dealers.

TALKING MACHINE EXPORTS

The Figures for May Presented—Exports Show Increase for the Month

WASHINGTON, D. C., July 29.—In the summary of the exports and imports of the commerce of the United States for the month of May, 1916 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures relating to talking machines and supplies are set forth:

Talking machines to the number of 4,162, valued at $117,517, were exported for May, 1916, as compared with $2,456 talking machines, valued at $79,987, sent abroad in the same month of 1915. The total exports of records and supplies for May were valued at $73,968, as compared with $75,432 in May, 1915. For the eleven months 36,819 talking machines were exported, valued at $1,081,815, and records and supplies valued at $867,795 were sent abroad for that period.

OPENING NEW STORE

John Lindemod is installing a music shop adjacent to the Campbell jewelry store, at Osawatomie, Kan., where a full line of Victor Victrolas and Edison Diamond Disc machines will be carried.

A GO-AHEAD MT. VERNON STORE

The accompanying photograph shows the handsome interior of the phonograph store of the Arcade Phonograph Corp., Mt. Vernon, N. Y., of which A. Stephenson is president and treasurer. This house is a representative of the Columbia, Sonora and Victor talking machines and in its territory is considered to be quite a live organization.

Salesrooms of Arcade Phonograph Corp.

FRANK SAMUEL VISITS COLUMBIA CO.

Frank Samuel, general manager of Barnett Samuel & Sons, Ltd., London, Eng., was a visitor last week at the offices of the Columbia Graphophone Co., New York, whose products his concern handles as a distributor. Mr. Samuel spoke enthusiastically of the Columbia business his house is closing, stating that their sales to date have exceeded all expectations. He visited the Columbia factory at Bridgeport, Conn., and was greatly impressed with the same.

What Would YOU *Rather Have?*

THE agency for a phonograph which is sold at every store, or the agency for the Sonora which is restricted to the best dealers in any locality—***which?***

THERE is a tremendous demand for Sonoras from all over the world. The excellence of ***each machine sold, sells others.*** The advertising of Sonora is steady and aggressive.

IF you handle the Sonora you offer for sale the instrument which won the ***highest score*** for ***tone quality*** at the recent San Francisco Exposition, in competition with every phonograph and talking machine worth mentioning.

WE suggest that if you feel that you are able to do justice to the sale of a product of such acknowledged and proved superiority as is Sonora—we suggest that you write us.

THE demands of our present dealers are making our production department exert itself to the last notch, but we are looking ahead to the future.

THE fact that each month breaks the preceding month's record for sales should make you think.

Sonora, the most perfect phonograph in existence, is what the *public wants to buy*

Do you want to sell it?

Ten magnificent models

Each, at its price, ***the world's finest phonograph***

The TALKING MACHINE WORLD

For the makers & sellers of talking machines

Published Each Month by Estate of Edward Lyman Bill at 373 Fourth Ave., New York, September 15, 1916

Victrola XVI, $200
Mahogany or oak

The instrument by which the value of all musical instruments is measured

Entered as second-clas[illegible]ter May 2, 1905, at the post office at New York, N. Y., under the act of Congress of March 2, 1879.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

WHEN you see this trade mark on a phonograph *you* know and the public knows that it is the name of the instrument that

Won the highest score for tone quality at the Panama Pacific Exposition.

Has a Swiss-made silent motor that runs nearly twice as long as do motors in similar priced machines.

Is characterized by extremely graceful lines due to the patented "bulge" cabinet construction.

Has a sound box which doesn't deteriorate with time.

Plays *all* makes of disc records, being *designed* (not *adapted*) to do this.

Controls tone volume at the sound *source*—the proper place—without the slightest blurring or marring of the accuracy of reproduction.

Is so marvelously beautiful, so sweet and expressive as to make each machine sold a wonderful salesman for other Sonoras.

THE Sonora is The Highest Class Talking Machine in the World. It is the instrument which you should sell. Write us *at once* if you are interested in the agency for your territory. Act quickly so as to get your shipment in time for the heavy, profitable, holiday trade.

SCIENCE OF SALESMANSHIP LARGELY JUST COMMON SENSE

Ordinary Intelligence and Use of Brains Should Serve to Solve Many of the Problems That Arise—Knowledge of Line Handled the Salesman's Greatest Asset

Salesmanship is a science, yet it is founded absolutely on common sense, and the talking machine salesman who uses common sense in his work will achieve lasting success.

Much has been said about the psychology of salesmanship, yet after all the closest psychological investigations show that the science of salesmanship is based squarely and absolutely on common sense. In the selling of talking machines, as in the selling of everything else, common-sense is the greatest help that the salesman can have.

We are told that perseverance is the thing that wins—common-sense tells us that if we are endeavoring to do a thing, it is much better to keep at the task until we have either accomplished it, or else demonstrated its absolute impossibility. The salesman is told that he should know his line thoroughly—common-sense tells us that no one can sell an article, or even talk on a subject convincingly, unless he knows something about it, and the more complete his knowledge is, the more convincingly he can talk, the easier and better he can sell.

The salesman should keep posted on the latest developments in his particular line, which is the veriest common-sense, for tallow candles went out of fashion when kerosene lamps were invented, the kerosene lamp went into the discard when illuminating gas came into general use, and to-day the man who has both gas and electricity in his home turns on the "juice" rather than hunt for a match.

The same theory can be applied to every maxim which has been laid down for the guidance of the salesman. There are a multitude of things which the salesman must know, and believe in, and put into practice, in order to achieve success, yet an investigation will prove that all of them are predicated on sound common-sense.

That some salesmen are more successful than others is because the successful ones have more common-sense than have those who are less fortunate, or, perhaps more strictly speaking, they use more common-sense in their work than do their mediocre brethren.

A good appearance, an easy address, a facile tongue, a pleasing personality, all are more or less natural gifts which some men possess to a greater degree than do others, yet every one of these qualities can be cultivated to the point of absolute possession if a sufficient amount of common-sense is applied to the problem.

Therefore, the greatest factor in successful salesmanship is common-sense, and the "talker" salesman who will cultivate it, and apply it diligently, is the one who will achieve a success that will make his competitors envy him and "wonder how he does it."

ADVISE DEALERS TO READ "WORLD"

Should Keep in Touch with Big Things Going on in the Trade, Say Frank E. Bolway & Son, Inc., in One of Their Letters to Dealers

In line with its progressive policy of advancement under the direction of Frank E. Bolway, the house of Frank E. Bolway & Son, Syracuse, N. Y., exclusive Edison distributors, has written to its many dealers the following letter:

Mr. Edison Disc Dealer:

Every night you read the newspaper to learn of the important happenings in the world in which you live.

You are a talking machine dealer. Are you reading the talking machine newspaper? Do you know of the big things that are going on in our game, and obtaining the valuable ideas that are waiting for you in the perusal of this newspaper?

We call it, rather incorrectly, a newspaper; it is The Talking Machine World, a publication that you should have and should read and should study.

Our only interest in this publication is an appreciation of its quality, and we would like to see you a subscriber to it. It costs only $1.00 a year, and comes once a month. You can obtain it through the estate of Edward Lyman Bill, 373 Fourth avenue, New York City.

The sending of your subscription in to-day may mean making ideas that will bring money to you in the coming season. Very truly yours,

Frank E. Bolway & Son, Inc.

As this letter was sent out voluntarily by Mr. Bolway, it not only shows the interest that he has in The World, but it should prove to dealers that it is the paper for them to read.

Frank E. Bolway & Son will soon be in their new home, which is a magnificent building, and a photograph of it will appear herein when completed.

NEW STORE IN TRENTON, N. J.

The Noah L. Walker Phonograph Co. has opened quarters at 322 East Eighth street, Trenton, N. J., and will feature the Carola talking machine in that section.

AUTO PROVES A TRADE DEVELOPER

Roy F. Ott, Huntsville, Ala., Uses Maxwell Car in Covering Wide Country Territory—Is Placing Victrolas in Many Schools

HUNTSVILLE, ALA., September 2.—Roy F. Ott, head of the Roy F. Ott Talking Machine Co., this city, believes in a modern method of getting business and as a result is constantly on the go through the country districts in his automobile for the purpose of developing and closing sales. The accompanying illustration shows Mr.

Roy F. Ott and His Victor Car

Ott on the road in his Maxwell car, which has traveled over 15,000 miles and built up so much business that a new auto truck is required to make deliveries. Just so the people may know whom he represents Mr. Ott has equipped his car with a big Victor dog fastened to the hood and a Victor sign on the wind shield.

Mr. Ott has been particularly active in developing school trade, and with the opening of the country schools he has made arrangements to canvass every school within seventy-five miles of Huntsville. Already eleven schools have been equipped with Victrolas through his efforts, with many more in line.

C. J. LeClair, who handles the Laffargue, Jacob Bros. and other makes of pianos, at Pompton Lakes, N. J., has opened a large talking machine department, in which he will handle the Columbia machines and records, as well as the Concertola Corp. line.

EXCELLENT PROSPECTS IN WINNIPEG

Harvest Promising and Money Plentiful in Western Canada—Columbia Distributors Hold Picnic—Recent Travelers From the East

WINNIPEG, MAN., September 1.—Favorable harvest prospects and a more free circulation of actual money is having a wholesome effect upon trade. The heads of the various music houses while eagerly anticipating fall business are not spending their time wishing for the passing of summer as last year, for example. Prospects in the country are splendid and with this season's crop safely harvested the West should be in a financial position to take care of its financial obligations to the East. Considerable interest attaches to the local agency movements and changes reported below.

Manager Fitch, of Babson Bros., Edison phonograph dealers, has returned to his duties after a delightful six weeks' vacation spent in Portland, Ore., and Seattle with his family.

The Western Fancy Goods Co., Columbia distributor, joined with the Western Hotel Supply and the Gowans Kent Western, Ltd., Association Companies, in its annual outing, the party consisting of about sixty all told. The management had chartered a car, proceeding to Selkirk, some thirty miles distant, on the Red River. There were the usual picnic festivities including the races for the kiddies and dancing in the pavilion to the music of a 65 Grafonola. The company then sat down to a splendid dinner provided by the management, and speeches were the order of the day.

Stanwood's, Ltd., reports a fair month's business in Edison and Columbia machines and records, with good prospects ahead.

"GRAFONOLA TWINS" IN BUFFALO

Clever Mechanical Dancers Prove Strong Attraction in Show Windows of Household Outfitting Co.—Columbia Records Furnish Music

BUFFALO, N. Y., September 5.—The Household Outfitting Co., the prominent furniture house, which has taken an active interest in the talking machine game since opening its new Grafonola department recently, is pushing the Columbia line of machines with unusual energy at the present time.

Sometime ago the Household Co. displayed in its show windows "The Grafonola Twins," marvels of mechanical grace and skill who gave an unusually interesting dancing performance to the music of Columbia records; the twins, one male and one female, gave an excellent demonstration of the late dances and were remarkably lifelike in appearance. "They are machines," said one little girl. "They are not, they're human beings," argued her companion. "Darned if I know," declared papa, and that was the common situation.

JOS. NOLAN WITH GATELY-HAIRE

Joseph Nolan, "Albany's premier comedian," has become associated with the Victrola headquarters of the Gately-Haire Co., Inc., 121 North Pearl street, as a member of the retail force.

Mr. Nolan is well known as an entertainer in private entertainments, having participated in various entertainments held at Wolferts Roost, the Adelphi Club, the Mohawk Golf Club, the Knights of Columbus and other prominent organizations. His many friends are strong in their congratulation of his connection with "Albany's Musical Center" and Mr. Nolan has invited all to visit him to hear their favorite selections on the Victrola. As a member of the Knights of Columbus he has the good wishes of the entire organization for his success in his new venture.

THE PROCESS OF MAKING TALKING MACHINE NEEDLES

How the Very Necessary Accessory to the Modern Talking Machine Is Produced in Billions for the Consumption of Americans—The Little Details That Count in Finishing

To compile any accurate figures regarding the number of talking machine needles used in the United States in the course of a year would probably require the earnest consideration of a professor in mathematics, inasmuch as every time a record is played the needle must be changed or should be changed. The ordinary family will use twenty to twenty-five needles in the course of an evening. Multiply this by the number of talking machines of all makes in constant use and we should have some needle figures that would surprise even those engaged in selling them.

In view of the general use of talking machine needles, some details regarding their manufacture, from the time the carbon steel rods three-sixteenths of an inch in diameter are received at the factory to the time the finished needle is ready for use should prove interesting, and especially so to those in the trade.

The operations are as follows: The rods are first heated in an annealing oven and then slowly cooled in order to soften them. In this heating and cooling process they become oxidized or coated with scales. To remove these they are tapped with hammers, after which they are "pickled" in a solution of acid and water, and again heated in another oven much cooler than the first to remove the effects of pickling. They are then taken to the wire-drawing machine, where the three-sixteenth-inch soft rod by being drawn through a die plate about one-eighth inch in diameter is reduced to No. 8 wire. Drawing compresses and hardens the metal, making it necessary to repeat the annealing process before another reduction in diameter is possible. Therefore, these operations must be repeated about five times before the requisite reduction to one-sixteenth inch or No. 16 wire is obtained.

The long coil of small wire is now passed to a forming machine, in appearance like a lathe, which in spinning around the wire as fed through it, straightens and cuts it into rods about eighteen inches in length. These rods are gathered up and taken to a grinding machine, an ingenious special mechanism, which points the ends of about 150 of them at a time. They are fed to it sideways and are held in exact position, fed through and turned as they grind against the stone by means of rubber tired wheels or rollers. One set of ends being pointed, the rods are reversed and again fed to the grinder to point the opposite ends. The now double-pointed rods pass to the cutting machine. Its operator seizes a handful (about 100) pushes the ends against a plate to even them, places them in the cutting machine against a gauge plate set five-eighths inch from the shear, and touching a lever cuts off 100 rough needles at a stroke. Turning the bunch of rods end for end 100 more needles drop into the hopper. The shortened rods pass to the next grinder and thence to the next cutter, and so on until the rod is about used up.

The now rough needles are spread evenly to the depth of an inch over the surface of a heavy iron plate or tray, and while on this tray are heated cherry red in a special furnace, on being removed from which they are at once thrown into large double cans containing whale oil to harden them. These cans are kept in a water tank for cooling purposes. The inner cans have strainers at the bottom, so that when removed with needles in them the oil drains back into the outer cans, which always remain in the water.

The needles, perfectly shaped and hardened, but still in the rough and gummy with oil, are placed in a huge pan or trough, which slides back and forth with jerking motion (somewhat like that of an ordinary ash sifter) on the top of what may be called a "washing machine." Here they are treated to a bath of soft soap, or soda and water, as they roll about in the bottom of the pan. After a thorough shaking up in this soapy mixture they are drained, and while still damp are placed in a tumbling barrel or, in other words, a slowly revolving barrel, pivoted at an angle of about forty-five degrees. About double their bulk in dry sawdust is mixed with them, and in a short time dries them thoroughly. They are then separated from their sawdust towel by a rather ingenious contrivance, which sucks off the dust and leaves the needles.

It is now necessary to prepare their surfaces for the final polish, and to do this they are scoured. A batch numbering several thousand is mixed with a pasty looking compound, and the mass is wrapped into a cylindrical canvas packet about five inches in diameter and two feet in length. Several "packets" tightly bound around with strong rope are placed in a machine called a "mangler," in which they are rolled back and forth between two slabs as one would make a roll of butter.

After this careful rolling or massage treatment is continued for some time, the needles, by rubbing against each other in the scouring compound, are thoroughly cleansed and smoothly surfaced, and are taken from the packets. They are then given a rinsing in clear water and another turn in the sawdust barrel, after which they are for the last time packed into sausage-like canvas casings and rolled this time with a fine polishing compound. From this last mauling they emerge as finished product, and are sent to the stockroom to be weighed (not counted) into packets of 100 or more.

There are about sixteen processes between the steel rod and the finished needle or, if we count the number of operations necessarily repeated, in the wire drawing, annealing process, pickling, hammering, etc., there are about forty-two handlings in all, and yet in no case is a needle handled singly as such.

LIVE FEATURES BRING RESULTS

A. R. Meyer, Havana, Ill., Finds Ways to Make Summer Business Active

HAVANA, ILL., September 4.—One of the most interesting of the several floats of the Fourth of July Parade held in this city was that entered by A. R. Meyer, the enterprising local Victor

A. R. Meyer's Victor Float

dealer, who, by inaugurating special features, has succeeded in doing a surprisingly large summer business. Mr. Meyer built the float over the body of his automobile and used the advertising matter of the Victor Co., including banners, to great advantage, in the decorations. A Victrola XVI had a prominent position on the float. Mr. Meyer drove the car himself throughout the line of march. Through special advertising stunts Mr. Meyer got some excellent business as a result of the Chautauqua season and also did a large business with the campers at Quiver Lake, Havana's summer resort.

LIPMAN KAISER SOME MOTORIST

Lipman Kaiser, the popular representative of the S. B. Davega Co., the Victor distributor, is quite some motorist during his leisure hours. Early this month Mr. Kaiser made a journey over the roads to Lake Sacondaga, N. Y., in the Adirondacks in order to bring Mrs. Kaiser home from her vacation, and made the trip of 217 miles in a single day, returning in the same time.

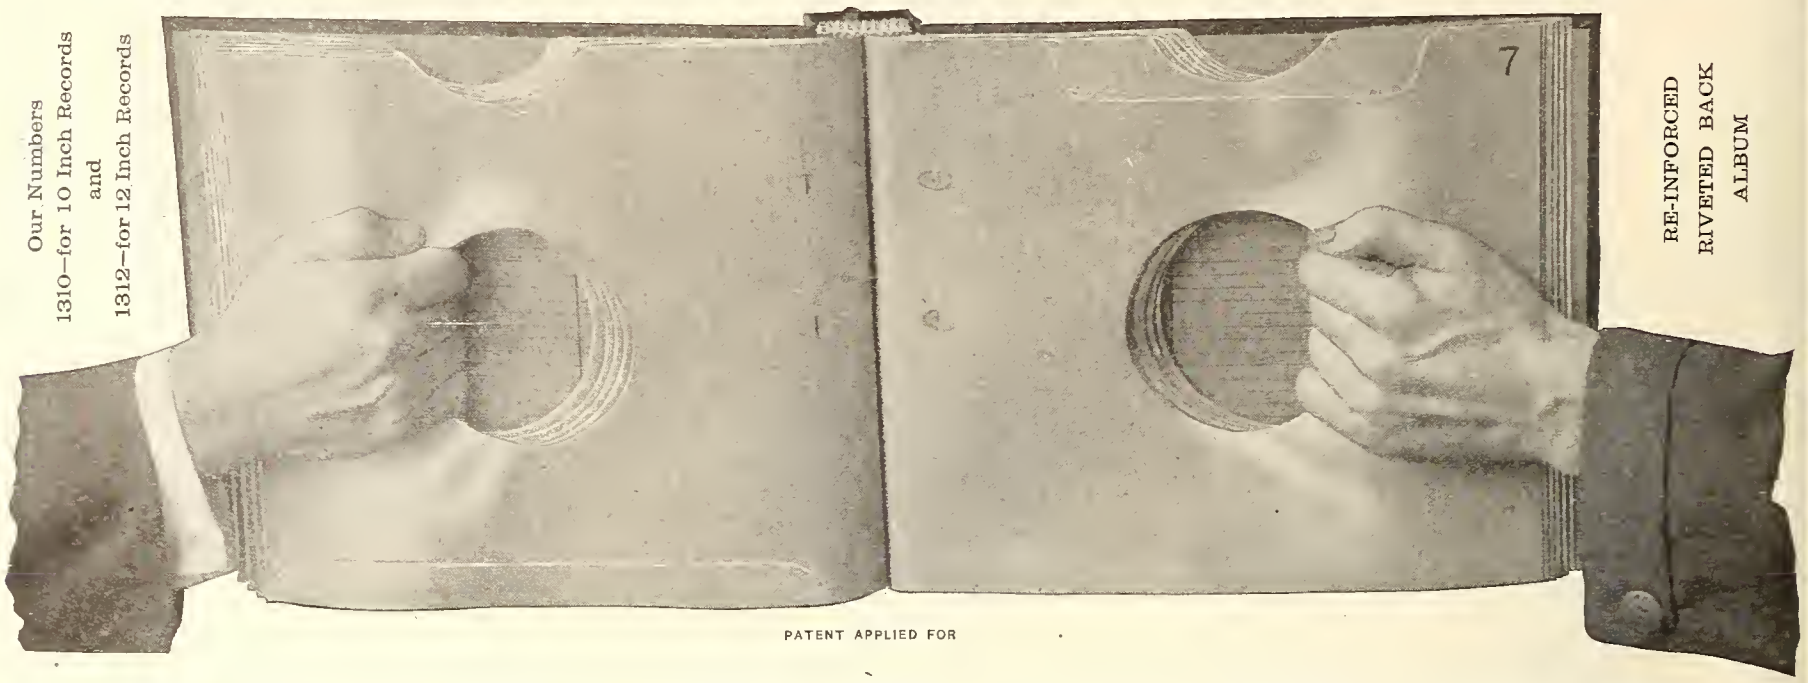
THE PULLING TEST—THE STRENGTH IS THERE

THE STRONGEST ALBUM MADE *AT ANYWHERE NEAR ITS LOW PRICE*



Strength at the Stress and Strain Point. Practically Unbreakable for Regular Usage.

THE WELL-KNOWN "NATIONAL" RECORD ALBUMS ARE ALWAYS THE LEADERS

THE ONLY CONVENIENT AND SAFE WAY TO PROTECT DISC RECORDS

These Albums will pay for themselves in a short time by preserving Records. When full the Albums are flat and even like books. They will fit in a library cabinet or book case, or they will lie flat on one another.

We manufacture disc Record Albums containing 12 pockets to fit the Victrola cabinets Nos. X and XI. We also make Albums containing 17 pockets. With the indexes they are a complete system for filing all disc Records.

For durability, finish and artistic design, our Albums have no equal. They are made in the most substantial manner by skilled workmen. We sell our superb Albums at big discounts to meet competition. Shall we quote prices?

THESE ALBUMS ARE THE BEST FOR VICTOR, COLUMBIA AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO., 239 S. AMERICAN ST., PHILADELPHIA, PA.

OPEN NEW SECTION IN SPOKANE

Enlarged Department in the Crescent Store Handsomely Decorated and Equipped—Department Meets With Great Success During Three Years of Operation

SPOKANE, WASH., September 5.—One of the most attractive talking machine departments in this section of the country is the new Victrola section recently opened in the Crescent store here, one of the retail dry goods stores conducted by the Spokane Dry Goods Co.

The new section contains three booths, each eight by twelve feet, and one booth twelve by fourteen feet, the latter to be used for display of machines as well as record demonstration. The architectural theme of the booths is the modification of the Italian renaissance. The woodwork is finished in flat ivory enamel and the front, sides and partitions are small panes of clear glass. The booths are handsomely furnished and the floors are covered with mauve colored carpets, the lighting is of the indirect sort. The record stock, which has been doubled in size with the opening of the new section, is carried in racks built in an aisle in back of the booths. The entire department occupies a large space on the third floor of the store.

The Victrola department of the Crescent store was opened in a small way in 1912 and consistent effort brought immediate results until the sales during a single month at present are frequently greater than those of the first year. The department is under the management of W. H. Duffe.

The management does not consider its work finished when a sale is closed or payments

Spokane Dry Goods Co. Department

completed. An accurate mailing list of all purchasers of machines is kept and the Victor supplement is mailed to them each month. A repair and adjustment service is also maintained in order that all Victrolas sold by the store may be kept in perfect condition. Every purchaser is invited to use this service; and, while established only about a year, is proving very popular. While it was established primarily for the store's own clientele many who have purchased machines elsewhere have patronized it, and, of course, are good prospects for record business.

The Crescent in its advertising sometimes suggests the purchase of records where they can be charged on one's monthly bill. This has also proved effective.

FRANK BURDICK ENJOYING LIFE

Manager of Finch & Hahn, Albany, N. Y., Has the Motoring Bee and Satisfies It

TROY, N. Y., September 6.—Frank Burdick, manager of the Finch & Hahn store in this city, has just completed one of the most enjoyable vacations of his life. He is a great lover of outdoor life, in fact a great lover of life in general, where there is motoring concerned, and now that he has a real chance after all his years of constant business activity to taste such he has decided to buy a real automobile so that he might not have his pastime interrupted with the repair shop calls. Mr. Burdick predicts a very large increase in his Victor business during the coming season and from all appearances of his establishment, for he now has one of the most beautiful emporiums in this section, he will receive his full quota of the business. Large sound-proof demonstrating rooms, four in number, have been added to his equipment.

DEATH OF ISAAC A. HARRISON

Isaac A. Harrison, for many years connected with Thos. A. Edison, Inc., died August 13 at the home of his sister in New York City. He was sixty-seven years of age and was the son of Capt. Geo. W. Harrison, who was killed in the last battle of the Civil War.

Erward Allington, Jr., has opened an attractive Pathé Pathephone Shop on Stevenson street, Freeport, Ill.

NEW YORK, SEPTEMBER 15, 1916

FROM all sections of the country come most optimistic reports regarding the conditions in the talking machine field and the prospect for fall and winter business—reports which in view of the actual situation are not in the least exaggerated. The best proof of the confidence that talking machine dealers feel in future business, however, is found in the manner in which a surprisingly large number of retailers are investing their money in new equipment and in the remodeling of their stores.

Hardly a day passes without a report of some dealer who has leased larger space, installed new booths, redecorated his store or otherwise made provision for a substantial increase in business, thus giving substantial assurance of his belief in what the future will bring forth. This expansion is not in any sense a gamble, for in the majority of cases the actual business in hand or in sight makes it absolutely necessary that the dealer prepare to handle it properly or otherwise to forfeit his share of the prosperity.

The dealers who have made these additions and improvements are to be congratulated not only upon their good business sense, and their confidence in the future, but upon the success that they have made of their chosen business that has enabled them to take the new step.

THE campaign for fall trade opens this month following the usual summer period of recuperation indulged in by members of the talking machine trade. At no time was the business outlook so satisfactory, and with this end in view jobbers and dealers have been preparing, during the summer, for a lively business this fall.

It now needs only united action on the part of all concerned to insure the year 1916 going on record as a better business year than its predecessor. When this is accomplished something will have been done, for it must be admitted that last year made a splendid showing in the talking machine trade.

Two very effective means of publicity indulged in by wide-awake talking machine men are recitals and local advertising. If indulged in sporadically the recital plan will not be any more profitable than newspaper advertising—to win success it will be necessary at all times to work continuously, and along original lines. What is worth doing at all is worth doing well, and an investment in publicity of any kind should be well considered to the end that it pays good dividends.

If a recital campaign is contemplated, it would be well to send out invitations attractively printed, so that they impress the recipients with the fact that the house issuing them is worth while. Merchants are judged by appearances, and when a thing is done sloppily or indifferently it creates a bad impression that is most harmful to a business.

The same thing applies to advertising in the newspapers. Advertisements should contain ideas; whatever is to be said should be presented in a manner to attract the eye and interest the reader.

Sometimes dealers say that this attention to details is hardly worth while—that they cannot estimate the results. This complaint may be well founded in some instances, but the history of every business shows that those who work along dignified, progressive lines win out.

It is not to be inferred from this that there should be any indifference to the trade of the humblest, for it is significant that the people in a modest station of life like to deal with a successful dealer. They feel that his success is due to his honesty and his upright principles, hence the importance of working along constructive, intensive lines in the development and expansion of a business.

It matters little whether it is window display, warerooms arrangement, exploitation through recitals, or newspapers, if everything is neatly and correctly handled results are bound to accrue that will well repay the merchant for his efforts.

"HOW much time should be given to the sale of a record?" was asked of an experienced and successful salesman in a retail talking machine department. "That's entirely a question of salesmanship," was the prompt reply. "To some record customers that buy a record I would give about five minutes, and with some others, if I spent an hour in demonstrating and selling a single record I would consider the time well spent. "You must either know your customer or size him up. It wouldn't pay to spend an hour selling one record to a person who was not a prospect for more records, or who would not be in a position to influence someone else to buy records. You must gauge your customer, and that is not always easy to do.

"Some business men can get through with an interview and dismiss the caller in ten minutes, where others would keep him half the afternoon. Perhaps it is a question of mental attitude. The person being interviewed knows the value of his time and has trained himself to consider the interview at an end when the business is transacted, and he can tactfully dismiss the visitor, making the latter feel that it is his time that is too valuable to waste.

"Similarly in selling a record. It is a question of the most profitable thing to do; which might be in getting the customer out in a minimum of time, or it might be in keeping him around for an hour. It depends upon a number of circumstances, and only the good salesman knows how to be governed by circumstances but he cannot put into words any explanation. All he can tell you is not to waste time, and to sell enough records to make your work profitable, regardless of how little or how much time is given to the customer."

THE Stephens Bill, which is now up before Congress for consideration, should continue to excite the liveliest interest of talking machine men, for the passage of this measure is one that will not only safeguard prices in the talking machine industry, but will likewise help every other industry inasmuch as the principles embodied in this bill are based on correct and honest merchandising.

As an eminent exponent of price maintenance recently said: "It certainly cannot be against public interest for a man who makes a talking machine, a plow, or produces a bushel of corn, to have something to say about what happens to the product when it reaches the market. To say that his interest has disappeared when he has passed the legal title to that product to the distributor, is far-fetched in the extreme. The producers of a product are vitally interested in the condition that the product reaches the consumer, and in the attitude the consumer holds towards it, because upon the attitude that the consumer holds towards that product depends his future patronage.

"It is a favorite argument to say that it is none of the producer's business what is done with his product after he has sold it and secured full payment therefor. The absurdity of such

claims is apparent to every producer, because when anything happens to his product in the course of its transfer to the consumer, and after it reaches him, which causes the consumer to complain about its condition, immediately the distributor transfers that complaint to the producer, and if the producer has any pride in his article or his reputation as a producer, he will satisfy the complainant in some manner so that his distributor will not lose the consumer's patronage.

"It cannot be said, either, that the producer has lost complete title to his product in its broadest sense, simply because he has accepted a fixed price from the distributor for it, as it is distinctly understood between the producer and the distributor that if the article is not up to contract the producer will make it good, and a successful producer does make it good. The title does not pass in full to the producer until the consumer is satisfied with the purchase."

IN the early days of the talking machine and the player-piano and until quite recently, in fact, items regarding those instruments were turned over to the humorists of the daily papers for endless cartoons and jokes regarding "canned" or machine made music. The general public and consequently those who conduct the newspapers have, however, taken a new viewpoint of machines that reproduce music of the masters, and have begun to realize that such machines and records have a value that cannot be estimated on a dollars and cents basis. Papers in several sections of the country, including New York, have inaugurated special departments occupying a page or more each day and devoted to "Music in the home," and the plan seems to be growing in favor.

The most impressive proof of this new attitude, however, was in the form of an editorial written by Arthur Brisbane which appeared in the New York Evening Journal of August 19, in the heading of which he said: "To-day the house without an instrument to reproduce the voices of artists, the genius of musicians, is like a house without a library," and later on he explains: "The self respecting man would scarcely admit that he lived in a house without books. Just as great a misfortune—greater even for young people and for children—is to live in a house without the modern miracle of art, the machine that talks and sings, and the piano that contains within itself or the machine that gives a voice to the millions of pianos that are dumb because none in the household can make them speak. In ancient days," he continues, "few men—only the rich—could own good books. Each book was written by hand, illustrated by hand. To-day the poorest man may own the greatest books. The intellectual genius of all ages is on the shelf asking only to be taken and made part of the owner.

"As it was with books and the thoughts of the greatest writers so it was, until recently, with music and the genius of the great musicians. Music was for the few. Year after year a painful study was necessary to enable the individual to reproduce even in a faulty manner the creations of genius.

"To-day, thanks to the invention of the machine that speaks, not only the greatest music, but the greatest musicians, singers and players of musical instruments, are at the command of every family, of every mother and father, of every child.

"Painful labor and unsatisfactory results of musical study are done away with. The genius of Beethoven, the dramatic power and voice of the greatest artists are at hand on your shelf like the poems of Shakespeare—and great personality added to the beauty of music." Toward the close of the editorial Mr. Brisbane gives the following advice: "If you haven't in your house a machine that makes all music and all artists your own, GET ONE."

The editorial, occupying almost the entire depth of the page, three columns wide, and going into the homes of over three-quarters of a million New Yorkers alone, should prove one of the greatest selling arguments that has yet been placed in the hands of the talking machine dealer by a great newspaper.

TOO often we come across advertisements in the daily papers —and talking machine merchants are not exempt—in which all available space is jammed full of closely set type, which the advertiser supposedly expects that the reader will peruse. Perhaps the reader will, but the odds are that he will skip it and read some other advertisement that looks easier—one in which fewer words are used and which is relieved in some form so as to interest the reader.

Advertising writers long ago learned that it is wiser to focus the reader's attention upon one simple and essential idea, rather than spread it out thinly over a mass of details, no one of which is emphasized with enough force to make a lasting impression, or a permanent dent in the mind of the reader.

Advertising space costs money, and the merchant who has money to spend in this way should see that the space is used in the most effective and result-producing way. Where he is doubtful of his own ability to convey his ideas to the public, it is much better to get the aid of an advertising man, or consult the advertising service bureaus, which are conducted by a number of leading manufacturers, and which have proven such a great aid to the dealers in small cities.

Writing advertisements and editing a paper are two things which the general public always imply they can do better than the men engaged in these occupations—until they try. Hence the wise merchant is he who is modest enough to realize his own limitations as an advertising man, or editorial writer, and getting down to brass tacks, seeks the aid of specialists, thus making his advertising more effective and dominating, while at the same time he is relieved of considerable worry.

DITSON
VICTOR SERVICE

For many years we have helped dealers to grow, not only dealers in Victor talking machines, records and supplies, but also dealers in Musical Merchandise and Sheet Music.

This experience is at your service and it is the kind that has been developed by actual service on the firing line.

So when you use Ditson Service, you secure the best. Let us talk over a "Fall Campaign" with you.

Caution

THE B & H Fibre Mfg. Co.

takes occasion to again call your attention to the persistent efforts made by various unscrupulous concerns, to place upon the American market, needles purporting to be similar in shape and material to the patented article manufactured by our company.

¶ We understand that most of these infringing needles are brought here from Japan and offered to the trade at a low price. We also understand that a few dealers, tempted by the low price, have been induced to lay in a supply.

¶ In justice to yourselves, let us caution you against investing in or offering for sale, an article which will only bring disrepute to your establishment and cause the loss of many valuable customers. A fibre needle made regardless of the purpose for which it is intended, is worthless—a pointed match—a toothpick would answer the purpose as well.

¶ After ten years of persistent study and scientific experimental work, we have produced a needle meeting all the essential requirements of a disc record. Perfect tonal reproduction, reliability and durability have been achieved.

¶ The Fibre Needle is protected by U. S. Letters Patent, issued to our Frederick D. Hall, November 12, 1907. **The B & H Fibre Co.** are sole owners and manufacturers of the fibre needle in this and other countries, protected by Hall's patent.

THE TALKING MACHINE AT THE COUNTY FAIR

A Story Illustrating the Fact That the County Fair Offers Great Opportunities for a Unique Advertising Campaign—All Talking Machine Dealers Who Are in the Market for Original Ideas, Please Note What Results a Really Original Idea Will Bring

The country surrounding Port Haines is noted for its exceptional agricultural products, and, therefore, when fair time rolls around there is a great deal of good natured rivalry among the farmers. This rivalry is not only keen but far reaching and hence the Port Haines fair is some fair.

You will remember reading in the April number of The Talking Machine World how John Jones, the successful and well known talker man of Blanktown, N. Y., invaded Port Haines and established there a Unique Talker Shop which was in every way a miniature edition of his famous Blanktown establishment. You will also remember how he made it a pronounced success by the incorporation of original ideas for which his social hostess and star salesman were responsible.

This story has to deal with the wonderful results gained through the medium of a novel publicity scheme worked out at the Port Haines fair by the Unique Talker Shop. Not only are the Port Haines cattle and pumpkins famous for their size and beauty, but the babies who are fortunate enough to be born within the confines of this ideal community and its surrounding suburbs are veritable little angels in appearance and 100 per cent. efficient as to mind and body.

Taking these things into consideration a few weeks before the opening of the celebrated agricultural exhibition, the social hostess approached the star salesman and spokc unto him as follows:

"S. S., I've a notion that a baby beauty contest would be a great stunt for us to pull off at the fair. What do you think?"

"You know by experience, my dear young lady, that I am always in the market for new ideas; please explain your scheme," replied the star salesman enthusiastically. This youth like most others who have made a success of life through the turning of gray matter into dollars, did not think for a minute that he knew it all, and, therefore, was only too eager to hear from his subordinate. In fact, he was not in the least like the man, who suffering from a serious affection of the eyes, called upon a celebrated specialist for treatment. The noted oculist examined him and shook his head. "You will be blind in a month," he said. "Oh, well," replied the afflicted one; "it does not matter, I have seen everything." As I said before, my friend, the star salesman, was not of this brand —but we digress.

"My idea is this," continued the social hostess earnestly "we shall have an extremely attractive booth at the fair—so attractive, in fact, that the folks will stop to look at the decorations as well as listen to the music, but this is just scratching the surface of my scheme, listen! Clear across the top of the booth will be spread a huge sign crying aloud to all who have eyes to see that a baby beauty contest is in progress, and that to the prettiest baby will be awarded a model De Luxe talking machine. We will also have an electrically operated instrument, with a repeating attachment installed, proclaiming the fact from out the grooves of a specially recorded disc.

"In order that every baby may have an equal chance, a photographer will be in attendance and as each chubby infant appears on the scene in the arms of parent or guardian, as the case may be, he will be photographed free of charge, and, on the last day of the fair when all the babies in Port Haines and surrounding country have made our booth a visit, and our supply of pictures resembles a veritable garden of pink and white roses, we will display the collection of photographs and have a voting contest, the baby receiving the most votes to get the machine."

"I not only congratulate you but give you carte blanche. May your scheme win the success it deserves." The star salesman offered his hand to the social hostess in a gust of ardent zeal.

The morning of the opening of the fair dawned clear and cool—an ideal day for cattle, pumpkins and babies. In the building set apart for the display of musical instruments, the booth of the Unique Talker Shop made the finest showing of all. The setting was that of a nursery, the color scheme being green and white with a frieze of animals and birds running blithely round the walls. Toys galore lay upon the brilliant rugs and a talking machine rendered nursery rhymes from a corner.

A trained nurse in her well starched uniform of snowy white assisted the social hostess in greeting each chubby youngster and inducing him to make friends with the camera man. When the mother was tired or the baby cross, he was entertained for an hour while the parent was told to see the sights unencumbered for awhile. It is needless to say that this little courtesy make a great hit.

Of course, as each child was photographed, the names and addresses of the parents were procured, and it was ascertained whether or not they owned a talking machine, and if they were at all interested in the most wonderful of all musical instruments. If they had friends who were talker enthusiasts, their names were obtained also, and considered possible prospects for records or better machines.

The babies came in droves and the nursery was soon full to overflowing. It soon was known throughout the fairgrounds that one could leave one's offspring at the Unique Talker Shop booth and not only get a chance to win a talking machine, but obtain an hour's respite from toting Willie as well. It became necessary eventually to enlist the services of two extra nurses and an additional photographer to relieve the congestion.

Upon the last day of the fair when the voting contest was held, there were three hundred and sixty-five cherubic juveniles to vote for, and over fifteen hundred votes were cast.

Fair time is with us, Mr. Dealer, and it is for you to say whether or not the baby beauty contest idea is worthy of your consideration.

HOWARD TAYLOR MIDDLETON.

JOSEPH ISAACS IN NEW QUARTERS

Now Located in Handsome and Commodious Store at 176 Sixth Avenue, New York

Joseph Isaacs, who formerly operated talking machine warerooms at 164 Sixth avenue, recently moved to larger quarters at 176 Sixth avenue, owing to the great increase in his business during the last year. The new quarters have been especially fitted for the display of machines and have eight demonstration rooms. Mr. Isaacs, who is an exclusive Victor dealer, carries a large stock of records, and is using efficient methods to capture sales.

Get acquainted with your employes. Talk with them sometimes on other matters than business. After you get on level ground with them, you may discover that some of them are just as capable, if not more so, of running your business as you are yourself.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., September 2.—Everywhere the trade is picking up. Which is not to say that August was such an awfully bad month. It is true that with some dealers it was almost dead, with others sleeping, yet there were several of the hustling dealers who found the month an extremely lively one. It is of interest, and this was touched on last month, that out-of-town dealers are finding it to their advantage to place their orders early, with the result that never before were there so many demands for talking machines on hand at this season of the year as at the present time.

Improvements at Columbia Headquarters

Manager Arthur Erisman got back to the Columbia Graphophone offices on September 5, and it was with delight and satisfaction that he viewed the improvements and changes which have taken place during his absence up at Lake Sunapee, N. H., where he and Mrs. Erisman and the baby have been spending their vacation. The ground floor of the Columbia quarters has undergone quite a change. A new line of demonstration booths down the length of the right side of the store has been put in and there now are eight. It will not be long before even that number will be unequal to the demand. The visitor now passes down the aisle to the offices at the rear between two tiers of booths, all of which are tastefully painted and comfortably furnished. Manager Erisman says the business went by leaps and bounds during his absence, and that August was by far the largest month in the history of the Boston headquarters.

Steinert Salesmen in Conference

The New England salesmen of the M. Steinert & Sons Co. held a two days' conference at Steinert Hall the latter part of August, and among those present was Manager H. S. Roger, of the Victor department of this large house, who had only a short time before returned from his vacation at Murray Bay, and other places along the St. Lawrence River. Mr. Roger's Victor business has grown considerably during the summer.

Vocalion Co. Quarters Rearranged

Considerable progress is being made in the changes and rearrangement of the Vocalion Co.'s Boylston street warerooms, and the elevator service now being installed at the right side of the main entrance is nearly completed. The record price sale of a Vocalion occurred the latter part of August, when a $2,000 machine was sold to a wealthy resident of Lynn. The machine was one that has had a conspicuous position in the warerooms, and has attracted much attention because of its beauty. Manager R. S. Hibshman has made several trips over to New York in the past few weeks to consult with the Aeolian officers regarding the improvements now under way. Leo Shatney, the hustling young salesman of the house, has returned from his fortnight's vacation, spent with friends along the Jersey coast.

Vacation Season Now Over

Vacations are over in the Victor department of the Henry F. Miller Co. over which Warren Batchelder presides. The August business has been exceptionally good for mid-summer. Mr. Batchelder has lost the services of Percy W. Baker, who has been attached to his department for several years. Mr. Baker has accepted the position of manager of the Columbia department of Davis Brothers at 683 Washington street.

Good business in both the Edison and Victor lines is reported by George Lincoln Parker, whose department is in charge of John Alsen. The latter has just returned to his duties after a pleasant and restful vacation spent at Southport, Me., and looks as brown as an Indian.

Good Report from Chickering & Sons

Ralph Longfellow, manager of the Edison and Victor departments of Chickering & Sons, is back from New York, where he spent his vacation. His brother, Wilbur Longfellow, formerly of the Chickering house, who has been at New Haven, Conn., for a number of months as one of the staff of the Pardee, Ellenberger Co., Inc., has been paying his old friends in Boston a visit. Andrew F. Lyons, of the Chickering staff, is home after his two weeks' rest. Leroy Christianson is at the present time at Alton Bay, N. H.

Reports Excellent Victor Business

Business at the Eastern Talking Machine Co.'s warerooms has made an excellent showing in the wholesale end during August, and within the last week of the month there was quite a spurt in the retail branch. Billy Fitzgerald, the wholesale manager for the Eastern, and Mark Reed have been away at Southport, Me., where, for a fortnight, they enjoyed the delights of "'Tis Ours," the camp where so much hospitality is doled out. Both returned after Labor Day. John Maguire, of the retail staff, is back from New York, where he spent a part of his vacation.

Harry Rosen a Benedict

On Sunday, September 3, Harry Rosen, the talking machine dealer of School street, was a happy bridegroom, for on that day at Temple Mishkan Tefila, in Roxbury, he was married to Miss Rosa Caplan, daughter of Mrs. Esther L. Caplan, in whose name the invitations were sent out. Mr. Rosen and his bride will make their home in one of the suburbs of the city.

Chickering Team Plays Winning Ball

The baseball team at Chickering & Sons, made up of the Edison and Victor salesmen, have been playing some winning games this summer. One of their last games was with the North Reading town team played on North Reading Park and the Chickering boys won out, five to three.

Nelson L. Furbush Improving

Nelson L. Furbush, head of the Furbush-Davis Co., who has been seriously ill at his father's farm at Freedom, N. H., is showing improvement according to latest accounts. At one time a fortnight ago Mr. Furbush was in a serious condition. The Edison outfits which the Furbush-Davis Co. features have found many sales in the past month.

Columbia Staff Enjoy Vacations

Roy Sylvester, of the retail staff of the Columbia Graphophone Co., has been away on his vacation. He was with his brother, Chester J. Sylvester, who is head of the talking machine department of the C. E. Osgood Co. They have been enjoying an automobile trip. John Shaughnessy, in charge of the bookkeeping department of the Columbia Co., is back from his vacation, spent largely in Portland, to which city he and a few friends motored. Miss Margaret Holland, Manager Arthur Erisman's private secretary, is home from the White Mountains, and James McDonald and John Burke also are home after their fortnight's vacation. McDonald was with some of the Eastern boys at their camp at Southport, Me.

Exploiting the Solophones

A new consignment of Solophones has been received by the Hallet & Davis Co., and these are being exploited in a business-like manner. The new models are now on exhibition in the "talker" department on Boylston street.

MUSIC'S RE-CREATION

What will you do, when we tell you that Edison Re-Creations of music, played on Edison's new invention, The New Edison, are indistinguishable from the original music?

If you say you don't believe this, you array yourself against two hundred thousand music lovers who have actually heard the comparison made and who unanimously confess their inability to detect the living voices from Edison's Re-Creation of them.

THE PARDEE-ELLENBERGER CO., Inc.
BOSTON, MASS. NEW HAVEN, CONN.

Working On New Ditson Building

The old building at the corner of Tremont street and Head place is entirely razed. The basement is cleared of debris, and forthwith the new building of the Oliver Ditson Co., in which the Victor department is to be so well housed, will begin to rise. Manager Henry Winkelman, back from his vacation, is full of enthusiasm for the fall and winter business, which for the Ditson Co. promises to be large. Otto A. Piesendel, manager Winkelman's right hand man, also is home after an absence from business cares.

Planning for Busy Season

Manager Francis T. White, of the Victor and Edison departments, of the C. C. Harvey Co., is planning for a busy fall and winter business. He is mapping out a campaign which should attract many persons to the attractive and restful graphophone department which he so ably manages.

Nat Peabody Enjoys Motor Trip

Nat Peabody, Victor manager at the Gloucester store of F. W. Peabody, was a caller on the Boston trade a few days ago, and had much to say of his recent interesting automobile trip through Maine and New Hampshire, during which he and his friends camped out wherever they happened to be. En route Peabody paid a visit to "'Tis Ours," the Southport, Me., camp, where he found much hospitality at the hands of the Eastern Talking Machine Co.'s boys, who happened to be there.

PREPARED FOR AN ACTIVE FALL

Burrows & Sanborn, Lynn, Mass., Have Good Stock and Fine Quarters

LYNN, MASS., September 4.—Burrows & Sanborn, talking machine dealers of this city, are well prepared to take care of an unusually active fall and winter business, both in the matter of stock and in the arrangement of their establishment. The house, which handles both Victor and Columbia machines and records, has several modern demonstration rooms in addition to a large recital hall for the convenience of customers and prospects.

CUPID GRABS TWO MORE VICTIMS

BOSTON, MASS., September 4.—Harry Rosen, proprietor of Rosen's Talking Machine Shop, 3 School street, this city, who handles the Victor, Columbia and Edison lines of records, was married yesterday to Miss Rosa Kaplan, at the Temple Mishkan Tefila, Roxbury.

ISSUE OF CHORDS AND DISCORDS

Latest Edition of Hallet & Davis Co. House Organ Devoted to General Policy of the Phonograph Division of the Business

BOSTON, MASS., September 5.—The current issue of Chords and Discords, published monthly by the Hallet & Davis Piano Co., is entirely devoted to arousing an interest in the Pathé Pathephones which are to be added to the phonograph division of this large Boston house. A foreword in the issue tells of the general policy of the phonograph division of the Hallet & Davis. Other articles pertain to the financial service, "The Possibilities of the Phonograph Business," and a fourth article tells of the management of this department of the company. "The Advantages of the Polished Sapphire Jewel Used in Playing Pathé Records" is of special interest to those handling this machine. Under the head of "The Linking of Two Famous Names," one reads the following:

The Pathé Frères has enjoyed the highest prestige in Europe for the past twenty years or more. The Hallet & Davis Piano Co. has enjoyed the prestige of seventy-seven years in this country, including intentional triumphs. Both are nationally advertised. It would be difficult for anyone to pick up any of the important national papers and not see one of the names, and this will be the impression which the public will receive. Pathé records are being advertised by prominent consumers all over the country, locally and nationally. This means that a Pathé dealer can cash in on all of this publicity. Pathé advertisements are furnished the dealers for newspaper work. A complete set of cuts, etc., is at the command of every dealer. Some of the best known of the biggest advertising men in New York collaborate with Pathé in preparing advertising helps for Pathé dealers.

FINE QUARTERS IN GARDNER, MASS.

GARDNER, MASS., September 5.—Among those occupying quarters in the new Robichaud & Mountain Block on Parker street, which was thrown open to the public on last Saturday amid great enthusiasm is the Gardner Phonograph Co., dealers in Edison phonographs. The Gardner Phonograph Co. has beautiful parlors on the second floor of the building, which have been elaborately decorated and furnished. Geo. A. Murray is in charge of the showroom. Upon the opening of the building the phonograph concern received floral tributes from Thos. A. Edison, Inc., Orange, N. J., and the Pardee-Ellenberger Co., of Boston.

STEINERT DEALERS IN CONVENTION

Retailers of Victor Line Gather at Boston Headquarters, Listen to Business Addresses by Department Heads and Discuss Trade Problems—Entertained by Company

BOSTON, MASS., September 6.—Nearly thirty of the Victor dealers whose stores constitute a chain operated by M. Steinert & Sons Co., met this morning for a conference at the Arch street Victor warerooms of the company. General Manager Herbert L. Royer, of the Steinert's Victor department, presided, and in his opening address he dwelt on the opportunities that were before the dealers this coming year and gave the men many valuable hints as to the proper conduct of their business. He was followed by F. M. Cunningham, floor salesman at the Arch street store, and Kenneth E. Reed, who has charge of the record stacks, the latter laying emphasis on the need of keeping a close watch on what is in stock and what is needed and of keeping everything in a methodical manner. Merton D. Williams, the advertising manager of the Steinert Co., gave some valuable pointers as to how best to arrest the attention of the public and attract prospective buyers.

In the afternoon there was an open discussion on various phases of the Victor business. The men were entertained at dinner at the Boston City Club and the women attending the conference were dined at Young's Hotel. In the evening the party all went to the Colonial Theatre to see "The Amber Empress."

Those attending the conference were Herbert L. Royer, the general manager, and the following from Boston: G. L. Foote, F. M. Cunningham, K. E. Reed, C. W. Royer, F. H. Robie, P. B. White, H. Fleischman, J. Wills and Miss Charlotte Brown; also G. M. Stuart of Bangor, L. Roake of Bridgeport, R. Welch of Brockton, A. S. Burns and W. Bailey of Fall River, L. M. French of Fitchburg, J. Buzzell and M. Brennan of Lowell, H. Nute of Manchester, L. M. Austin of New Bedford, M. E. O'Connell of New Haven, M. L. Patrick of Portland, A. T. Waite of Providence, C. A. Hutchins of Springfield, J. V. Riley of Waterbury, C. A. Whitcomb of Worcester, Miss Arline Brown of Manchester, Miss Alice Healy of New Bedford, and Miss L. M. Smith of Worcester.

TRADE NEWS FROM INDIANAPOLIS

Plans Completed for Big Meeting of Edison Dealers to Be Held in October—General Optimism Regarding Fall Outlook—Active Campaign in Favor of the Pathé Line

INDIANAPOLIS, IND., September 2.—Walter Kipp, president of the Kipp Phonograph Co., Edison distributor, is putting the finishing touches to the program for a meeting of the Edison dealers in this territory for October 2 and 3. While Mr. Kipp declined at this time to divulge the entire program, he declared that the meeting would "outdo anything like any jobber had ever attempted."

The German House will be the place where the meetings are to be held. A banquet and a tone test demonstration, with Edison artists and officials present, are some of the features of the program.

Mr. Kipp has been working on the program for several months. He is expecting every Edison dealer in his territory to be present and from present indications there will be few dealers who will be willing to miss the treat that is in store for them.

With the summer passed, talking machine jobbers and dealers here are settling down to real work with the belief that they are going to enjoy the biggest business this fall and winter that they ever have had. Even the threatened railroad strike did not tend to effect the spirit of optimism that prevails here.

A. W. Roos, local manager for the Columbia Co., is spending his vacation in St. Louis.

S. H. Nicholas, of Pittsburgh, district manager of the Columbia Co., visited the local branch last week.

W. S. Barringer, assistant general manager of the Stewart Talking Machine Co., distributors of the Victor line, has returned from his vacation, which he spent in Detroit with his brother-in-law, Max Strasburg, a Victor dealer.

E. B. Knight, advertising manager of the Stewart Co., has announced that the company will make special effort to encourage the establishment of educational departments in stores not only to feature machines for school use, but to instruct the public in the use of educational records.

M. P. Tobin, of the Pathé Phonograph Co., Inc., reports that the summer business has been fairly good and that prospects for this fall are exceptionally bright. Mr. Tobin is figuring on launching a vigorous advertising campaign within a few weeks. He began his work here after the holiday season last year and this year he expects to make the Pathé a leading contender for the holiday business.

Since Arthur Pfeiffer became manager of the local branch of the Starr Piano Co. he has been pushing the Starr phonograph by window and newspaper advertising, with the result he is building up a good demand for the Starr machine.

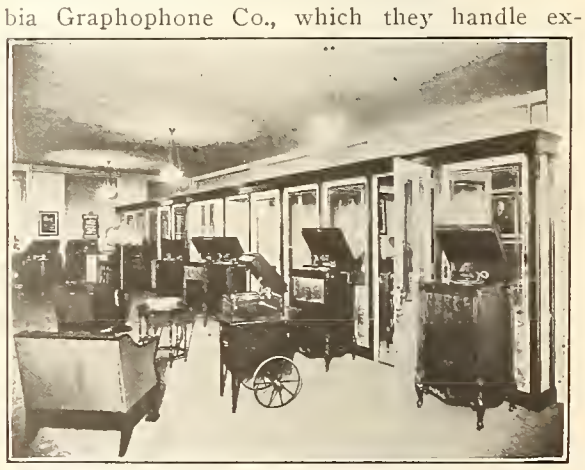
SPEAR & CO.'S NEW STORE

On Thirty-fourth Street, New York, Are Featuring Columbia Products Exclusively

Spear & Co., one of the best known furniture houses in this city, which recently opened a new store on Thirty-fourth street, are featuring to excellent advantage the products of the Columbia Graphophone Co., which they handle exclusively. Through the use of energetic sales methods and consistent publicity they have built up an extensive Columbia business which will doubtless be considerably augmented this coming fall.



Spear & Co.'s "Talker" Department

J. D. Friedman, manager of Spear & Co.'s Columbia department, is a well-known talking machine man who is thoroughly enthusiastic regarding the merits of Columbia products. He has succeeded in securing numerous window displays, and the show windows of the Spear Building are decorated with several decalcomanias of the well-known Columbia trade-mark "Note the Notes." This is the only lettering on the company's show windows. For the coming fall Spear & Co. have arranged to materially enlarge their Grafonola department, and enhance the efficiency of their machine and record divisions.

PREPARED FOR A BUSY FALL BUSINESS IN KANSAS CITY

Dealers and Distributors Are Stocking Up, Although it Is Difficult to Get Sufficient Machines—Edison Dealers in Convention—Large Columbia Sales During G. A. R. Encampment—A. A. Trostler Makes Cheery Report Regarding General Outlook—Other News

KANSAS CITY, Mo., September 5.—The immediate demand for talking machines is so large in Kansas City and territory, that the distributors and dealers have difficulty getting stocked up in preparation for the fall business. The Columbia Co. at Kansas City has been able, however, to get a fair stock on hand, and its dealers are also getting into good shape to handle the rush. The dealers are ordering ahead, for October, November and December delivery, and in many cases machines are being bought and stored by the Kansas City distributing office awaiting orders.

"The demand is as heavy as ever, and we are selling every dollar's worth of Victor goods we can lay our hands on," said A. A. Trostler, manager of the talking machine department of the Schmelzer Arms Co. In response to a question, he said that the entrance of so many new makes of talking machines into the market had apparently had little effect unless it was to stimulate the sales of Victors.

Ross Darrow, of the Darrow Music Co., Tulsa, Okla., was a recent visitor in Kansas City. The firm has had a good trade in Columbia machines; incidentally, Mr. Darrow called on John F. Ditzell, manager of the Victrola department of the Geo. B. Peck Dry Goods Co., who is an old friend.

The Geo. B. Peck Dry Goods Co., which has highly developed systems throughout its store, has also such a high development in its talking machine department. For instance, during the past few months, the approval record business has been reduced by 48 per cent., and at the same time, the total sales of records have increased 18 per cent. The approval business of this store had always been very successful, but it was considered wise to reduce it so far as possible. And it was done by the careful observance of plans laid down by Manager Ditzell. These plans were based on the attraction of customers to the store itself.

A convention of the Kansas City zone of the Edison dealers was held in Kansas City prior to the Des Moines convention, attended by about fifty dealers, and being supplemental to the annual convention of the zone held last spring. The sessions were held in the Muehlebach Hotel, with a banquet in the evening. The chief feature was the sales talk by M. M. Blackman, manager, who outlined the new sales method for clinching the prospects developed during the summer. C. W. Burgess, Edison zone supervisor; Geo. Silzer, manager of the Des Moines jobbing house, and Mark Silverstone, of St. Louis, also spoke. Mr. Blackman was a chief speaker at the Des Moines Interstate Convention, arriving back in Kansas City September 2.

E. S. Hall, manager of the Hall Music Co., has gone to Chicago to inspect the new instruments, and to get into close touch with the industry. Such trips, he says, are of great profit to a dealer. He has been doing a good business in Victrolas and records.

James T. Clenny, of the Architects' and Engineers' Supply Co., has postponed the opening of the separate store for Playerphones, because of the opening of the school season. Despite the handicap of restricted room in the supply company's place, he is doing well.

M. W. Bardwell, manager of the talking machine department of the Household Fair, reports an especially good trade in the higher priced instruments.

The Edison branch at Kansas City was forehanded with reference to the threatened railroad strike; and as a result, got out a volume of shipments to dealers for September that would constitute a fair month's business alone. When the strike was looming up, Mr. Nye, assistant manager, sent a few telegrams to dealers in the zone, suggesting that they wire Septembers orders, collect, so that shipments could be made at once. Mr. Blackman was informed by telephone of the immediate good results, and ordered similar wires sent to all dealers. The orders came pouring in, and the stock on hand was quickly depleted, the retail stock being also exhausted to meet the demand. One entire carload was shipped to the Latenser Music Co., Atchison, Kan., the car being decorated with banners, and leaving Kansas City Friday, September 1.

W. F. Standke, manager of the Columbia Co., at New Orleans, spent his vacation in this vicinity, visiting his family at Clinton, Mo., and his brother, who is manager of the retail department of the local Columbia house.

The Columbia Graphophone Co., which has had a large business all summer, hit the high point during the G. A. R. encampment, on the sale of records. But it was not due entirely to the old soldiers. The display window was decorated in honor of this event, with national colors. In the back part of the window, however, was a display of the several steps in the production of the Columbia records, from the blank to the finished product, which is said to have produced more interest than any exhibit for a long time. A third feature was added, a card bearing the title "My Mother's Rosary," ribbons leading to a graphophone, and Kewpies distributed here and there, in various positions, one lying on a cotton batting rug, another writing on a record, another in podiceman's uniform, and so forth. The bill at the Garden Theatre that week was "My Mother's Rosary," which gave timeliness to the offer of the record.

Columbia Records TRADE MARK Note the Notes

SUMMER TRADE EXCEEDS EXPECTATIONS IN CLEVELAND

Leading Concerns Well Satisfied With the General Outlook for the Fall and Winter—Eclipse Musical Co. Secures Large Stock to Meet Demands—Columbia Dealers Report Large Sales—Caldwell Co. Reports Increase of Twenty Per Cent.—News of Month

CLEVELAND, O., September 5.—The consensus of opinion of the various talking machine jobbers and dealers of this city is that the summer business was much better than was anticipated. The co-operation of the manufacturer, jobber and dealer has made this condition possible, and consequently the public is getting better service in purchasing talking machines and records. Preparations are now being made by all the jobbers and dealers in this city to efficiently handle the anticipated increases in the fall and winter business.

The Wm. Taylor & Son Co., dealers in both the Columbia Grafonola and the Victor Victrola lines, reports large gains in business. T. A. Davies is in charge of the department, which six years ago was started with three demonstration rooms, and at the present time contains sixteen demonstration rooms. They are so arranged as to take care of a big record business the same as the Lyon & Healy store in Chicago; in fact the latter is the place where Mr. Davies got his idea.

Geo. R. Madson, manager for the Columbia Graphophone Co., in this city, was very enthusiastic over business conditions. Mr. Madson is a staunch believer in educating the record purchasers to get the best music. A recent sample of record by the Chicago Symphony Orchestra has caused considerable attention among the various Columbia dealers. Although there has been a shortage in Grafonolas the business has been very gratifying.

The G. M. Ott Piano Co., dealers of the Columbia Graphophone Co., in this city, are elated over the prospects for fall business. G. E. Morton, manager of the department, said that he believes in "preparedness," and has stocked in heavily for the winter. Mr. Morton recently returned from a visit to the Columbia factory in Bridgeport, Conn. He also spent some time in New York city.

The J. T. Wamelink & Sons Piano Co., dealers in the Columbia Grafonola, have shown improvement in business. The company is one of the longest established houses in the city, but has just recently added the Columbia line. The success attained gives the hope of even larger rewards.

The Eclipse Musical Co., extensive Victor jobbers, reports everything very satisfactory. C. K. Bennett, manager of the company, was at the Victor factory in Camden, N. J., and stated that it was the most successful visit he ever made. He stated that the factory will ship ample goods to take care of the dealers unless something unforseen should intervene. The company has recently appointed Earle Poling, formerly of the Wade H. Poling Piano Co., of this city, as special traveling representative. The Eclipse Musical Co. recently had an unique window, depicting a scene that attracted considerable attention. Flags of the fifteen warring nations encircle a Victrola. To The World correspondent the idea conveyed was that the harmonious music from the Victrola was more important than the discord coming from the strife of the fifteen nations.

Geo. Silzer, vice-president of the Harger & Blish Co., Des Moines, Ia., spent two days with the Phonograph Co. here on his way to the Edison factory. L. N. Bloom, secretary of the Phonograph Co., reports a fine business.

The Diamond Disc Talking Machine Co., under E. A. Friedlander's managership, reports business fine during August. The demand is mainly for the highest grade machines, and Mr. Friedlander anticipates excellent results in the fall and winter months.

The Rex Talking Machine Co. announces that several new model phonographs will come out soon, and S. Nickman, president of the Cleveland company, says that with the increased equipment its many patrons will have even better service than was previously rendered.

The Caldwell Piano Co., dealers in the Victrola, reports an increase in business of 20 per cent. over the same month a year ago.

The Collister & Sayle Co., of this city, Victor jobbers, have had good business during the past month. Phil. H. Dorn, manager, went to Sandusky and Cedar Point for his vacation. The record business of the company has been good, and three new booths have been added.

Forest Cheney, of Chicago, was in Cleveland, and was welcomed by his many friends here.

VICTOR DOG GETS A LICKING

Paper Maché Model of Famous Trade Mark Proves Ideal Sparring Partner for Score of Pedigreed Bow-Wows in Front of the Store of I. Zion—Proves Good Advertising

Every dog has his day and dozens of aristocratic upper Broadway dogs had theirs recently, a day that should be marked with red letters in their careers, for every dog who so minded had an opportunity to lick the tar out of a canine of world-wide reputation—no less in fact than the famous Victor dog.

It all happened through the desire of the manager of the talking machine store of I. Zion, Inc., at Eighty-seventh street and Broadway, to stir up a little business on a dull day by placing a paper maché replica of the Victor dog out on the sidewalk at the entrance to the store. The little fox terrier looked very pretty with his head cocked to one side listening to His Master's Voice, but his unconcerned attitude with regard to worldly things was a direct insult to the highbred bow-wows out for their constitutionals.

The first to approach the inoffensive figure was a poodle. After offering a couple of distant yaps and finding his insults unrebuked, he advanced closer, and within three minutes had reduced the enemy to submission. Ten minutes later came a spaniel, who reduced the record of conquest to a minute and a half. Then came the terrier régime and Airedale and Irish, Scotch and bull had each their moment of unrestrained joy. As these went others came, and those departing told their friends. Soon there was a line waiting for a chance to whet their teeth and increase their fighting reputations. Even collies got in line and aroused themselves to a spirit of combat.

And through it all the manager sat inside the office and laughed. He was counting on his fingers the patrons he was making among the owners of those pets strutting away, proud that at last they had demonstrated the confidence they had long felt in their ability to whip anything in the block.

KEEPING SUMMER TRADE ACTIVE

Will A. Watkin Co. Indulges in Special Publicity and Gives Recitals and Adopts Approval Plan With Much Success

DALLAS, TEXAS, September 2.—The Will A. Watkin Co. reports that the business done in Columbia Grafonolas during the summer months was unusually satisfactory, due largely to the special efforts put forth by the company to interest prospective purchasers. Liberal advertising was the rule right through the summer and special and frequent recitals were given to acquaint the public with the new records.

As an extra inducement the company featured a special record approval plan for the hot weather, presented to a carefully picked list of customers, and applying only during the hot weather months. The arrangement provided that the records must not be kept over twenty-four hours and at least one-quarter of those taken out must be kept and paid for, and that not over twelve records should be delivered to any one person on the approval plan. The results were very satisfactory and a comparatively small proportion of the records taken on approval were returned.

WARNING AGAINST TALKER AGENTS

Reports come from Lowell, Mass., and vicinity, to the effect that agents representing a Boston concern are traveling through that territory and placing talking machines in the homes of working men on trial. The plan of the agents is to get some one to sign what is alleged to be a receipt for the instrument, but which really proves to be an assignment of wages. Warnings have been sent out against the canvassers.

JAMES FRAZEE, 30 CHURCH STREET, NEW YORK

NEWS OF THE TORONTO TRADE

Talking Machine Men Preparing for Fall—Pathé Frères Phonograph Co. of Canada Very Active—New Store in Berlin, Ont.

TORONTO, ONT., September 1.—The talking machine dealers in this city and vicinity while doing an unusually good business for this season of the year are also endeavoring to get some stock ahead in anticipation of a record breaking fall and winter.

The recently formed Pathé Frères Phonograph Co. of Canada, Ltd., is making rapid headway in an energetic campaign to make "The Red Rooster" a familiar trade mark in Canada. The rooster, which was adopted as a distinguishing brand for Pathé moving pictures, and sound reproducing products, is already familiar in every section of Canada, where people patronize the "movies." The particular business of the above named Canadian company will be in connection with the talking machine branch of the music trades. The Pathé Frères Phonograph Co. of Canada, Ltd., is already making shipments of Pathephones and records. As stated in a previous issue of The World, it is the purpose of this company, which has a strong personnel, to eventually manufacture the Pathé line in Canada.

The Brunswick-Balke-Collender Co. in this city will shortly have one of their new talking machines on display. The machines are now being manufactured by the Chicago factory.

Chas. R. Leake, of the Music Supply Co., this city, Columbia distributors, varied his vacation this year by taking a motor trip to New York.

The Magnola Talking Machine Co., Chicago, is making a bid for Canadian business.

The Columbia product is being featured extensively in a new store recently opened in Berlin, Ont., by Gerhard Heintzmann, Ltd.

The Karn-Morris store at Woodstock, Ont., has the Victrola agency and the management reports surprisingly good returns since adding this department.

Emil H. Van Golder, of I. Montagnes & Co., Toronto, the Canadian distributors of Sonora phonographs, passed through this city and spent several days visiting the trade here on his trip to the Coast.

The Western Gramophone Co., wholesaler of Victor products, reports business as being good especially in the record line, "The Nightingale Song" of Alma Gluck's proving a very great success.

The R. S. Williams & Sons Co., Ltd., Toronto, for the convenience of busy men and women who have a few minutes to spare at lunch hour, features a daily noon hour recital from 12 to 2 in their recital hall in the interests of the new Edison Diamond Disc. To date the innovation has proved a paying venture.

Brooks Manufacturing Company

Width, 21 ins. Depth, 22½ ins. Height, 48 ins., with top closed. Turntable, 12 ins. in diameter. Holds 360 records. Shipping weight, 160 lbs.

Columbia Records TRADE MARK Note the Notes

AN ENERGETIC COMBINATION

Three Active Members of the Staff of the Gately-Haire Co., Albany, N. Y., Who Are Spreading the Victor Message in the East

ALBANY, N. Y., September 4.—Fred J. Drake, formerly with the traveling department of the Victor Talking Machine Co., is now associated with the Gately-Haire Co., of this city. He was one of the most aggressive men traveling Eastern New York and northern Pennsylvania, and he has a host of friends among dealers, and now that he is connected with this prominent distributor he will no doubt give his assistance, knowledge and experience with marked returns.

Claude B. Haire

C. A. Phelan

C. A. Phelan is one of the youngest distributors' representatives on the road in the East. Young in years but old in experience, he has made a sufficient number of business friends to prove this point conclusively, for his sales have shown a steady increase monthly. Young men of this type, aggressive, pleasant and willing to assist the dealer at all times, are of the proper metal.

Claude B. Haire, another member of the wholesale department of the Gately-Haire Co., and representative in Eastern New York, Massachusetts and Vermont, reports conditions in his territory as indicative of splendid results for the holiday season. A trio of such representatives is directly responsible for the steady gain in wholesale business, under the supervision of President John L. Gately, one of the old time and well known Victor district traveling managers. Mr. Gately's vast experience with salesmen, both wholesale and retail, enables him to surround himself with men of the right calibre after a little schooling and the results are most gratifying.

F. J. Drake

NEW GRAFONOLA SHOP IN BROOKLYN

A handsome new Columbia Grafonola store has been opened at 1090 St. John's place, Brooklyn, N. Y., by Kane & Reisler, who have long conducted a hardware and house furnishing store on Kingston avenue, Brooklyn. The new store on St. John's place will be devoted exclusively to the sale of Grafonolas and records.

Much of the success of the Alumni lawn party, which was given recently under the auspices of the Poughkeepsie High School Alumni Association, Poughkeepsie, N. Y., may be attributed to the Columbia Grafonola, which was furnished for the occasion by The Music Shop, in that city.

INSURANCE FOR HERZOG EMPLOYES

Group Accident and Health Insurance Provided for Workmen by Herzog Art Furniture Co., of Saginaw, Mich.—A New Idea

SAGINAW, MICH., September 2.—The plan adopted by various prominent concerns for providing insurance for their employes has been followed out by the Herzog Art Furniture Co., of this city, which intsead of the usual life insurance policy has taken out group, accident and health insurance for its employes, based upon 50 per cent. of their wages. The advantage of the new form of policy is that an employe does not have to die before enjoying the advantage of the company's generosity but is protected in all cases of accidents or sickness.

INSTALLMENT CONTRACT PLEASING

Contract Provided for Victor Dealers Designed to Meet Provisions of Various State Laws—Provides for Interest Payment

The new deferred payment contract recently prepared by the Victor Talking Machine Co., for the use of the retailer, a sample of which is included in the Voice of the Victor for the current month, has apparently made an excellent impression upon the trade, and is being widely used. The new contract has been prepared with special regard to the statutes and laws of the several states and is believed to meet the situation fully. It is so worded that it constitutes a direct lease of the machine from the dealer until the full royalty is paid by the licensee customer and then the license from the Victor Talking Machine Co., to the customer, goes into effect. This wording enables the dealer to enforce a lease in his own name and for his own account.

Another particularly interesting and pleasing feature of the contract is that it provides for the payment of interest at 6 per cent. on all deferred payments, a contract provision that has been sought by the dealers for sometime past.

ONLY RELIABLE TRADE MEDIUM

Says the Arrow Motor Co., as a Result of Advertising in The Talking Machine World

The Arrow Motor Co., 207 Market street, Newark, N. J., of which H. M. Grosman is the head, writes to The World as follows, in regard to the advertising published in this paper:

"For your personal information I wish to advise you that The Talking Machine World is our only reliable trade medium. We have always found results extremely gratifying. Another paper, in which we were advertising for three weeks, did not bring us even one inquiry."

The Solotone Player Piano Co., Inc., was incorporated at Albany, N. Y., this week, to make and handle musical instruments, phonographs, electric works; $100,000; J. Ethinger, B. F. Dwyer, W. McDowell, Nyack, are the incorporators.

WONDER TALKING MACHINE CO.

113-119 Fourth Ave., (at 12th St.) New York

Telephone, Stuyvesant 1666, 1667, 1668

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., September 6.—That the month of August was most productive in its results in Philadelphia is the verdict of all the talking machine dealers, who credit it with being the best August they have ever experienced in their business. In fact the three summer months were most excellent, and the trade enters the fall with the most encouraging outlook. They see nothing before them but a bonanza season, and as the various manufacturers companies are promising much better shipments, there is apparently not much to fear from a shortage of stock, although it is not possible to predict how near the output is going to meet the demand.

H. A. Weymann & Son Moving

H. A. Weymann & Son expect to move into their new building by September 18, and they will give considerably more space to the talking machine end of their business than ever before. This department will have the first position on the first floor of 1110 Chestnut street. This floor has already been finished and half of the booths from the present Weymann store have already been removed and placed in the new store. The front of the new building is most attractive in appearance in its coat of white and blue.

Strong Demand for the Edison Line

Blake & Burkart, the biggest dealers here in Edison, report that their August business was fine, and that it was especially gratifying in view of the fact that it was very hard to obtain records from the Edison factory. Mr. Burkart says: "We are very well pleased with our business thus far this year. We are looking forward to a very big balance of the year business." The firm is planning to put on two more outside salesmen, and their idea is to advertise more than ever before. The first of October they will begin a series of weekly recitals in their concert hall which will be continued during the winter, except at the busy holiday season.

Louis Buehn Co.'s Good Report

Louis Buehn, of the Louis Buehn Co., reports that his business in August was very good, and showed a very substantial increase over last year. He says that the machine shipments during the last month were less than usual, but the Victor Co. promise better deliveries from now on, which is encouraging. The record stock, however, has been in very good shape all summer.

L. D. Callahan With Buehn

The Buehn Co. have just put on a new man, L. D. Callahan, who was with the Victor Co. for several years, and for the past year or more has been traveling on the Pacific Coast for them. He takes the place of J. Frank Smith.

Installing Many Dictating Machines

The Edison Dictating Machine has been doing some fine work in Philadelphia the past month. The management announces that the three summer months were the biggest that they ever had. They expect a very big fall business. During August they placed the Edison machines with the following firms: S. Bright Manufacturing Co., J. E. Rhodes & Sons, J. L. Schomacker, N. Snellenburg Co., Kahn & Greenburg, the Bernstein Manufacturing Co., Arthur Thomas, C. M. Plowman & Co., as well as many other firms. Archie Moore, of the Edison factory, was a Philadelphia visitor recently. The firm will put on the street two new salesmen in a few days to take care of their heavy anticipated fall business.

Activity With Penn Phonograph Co.

The Penn Phonograph Co. have been enjoying a most unusual summer. Mr. Barnhill, a member of the firm, states that their business was very good in August, in spite of the great machine shortage. He says: "We are doing as much business now as we do in December. We are simply stocked up with orders and doing the best we can for our regular trade. We are getting many orders from out of town, but we have been compelled to refuse them owing to our intention to care as completely as possible for our regular, nearby trade. We are not taking any orders except from dealers in our legitimate territory."

Many Dictaphone Sales

The Dictaphone business of the Pennsylvania Talking Machine Co. has been phenomenal in August. "In fact," Manager Westvelt states, "we had a remarkable business all through the summer months, and we have no kick coming at all, and we are in fine shape for our fall campaign which we think will be a record breaker. We are still beating our 1915 figures every month, and our splendid advertising campaign in The Ledger is continuing to pull good results, and everything is in good shape."

Among some of the big sales during the month of August were to the firms, the Buck Walter Stove Co., Royersford, Pa., who put in a complete installation; the Denny Tag Co., of Chester, Pa., the office of The Harrisburg Patriot; the T. Kentworthy Co., which firm put in a complete installation, and many other similar firms in town which are practically just starting.

Manager J. D. Westervelt has just returned from a most delightful vacation spent at Eagles Mere, Pa., at the Forest Inn, where several members of the Easton family have been summering for a number of years. Mr. Westervelt was recently elected the Dictaphone member of the famous Rotary Club, of Philadelphia

D. H. Rineard, of Harrisburg, Pa., who looks after the Dictaphone buisness in that section, spent a day recently at the local headquarters, and reports having made a number of good sales in that locality. He has sold upwards of sixty machines now in use in the State Capital.

The National Court Reporters recently held a convention in this city at the Hotel Adelphi, in which the Dictaphone was well represented.

Large Columbia Sales

Manager Walter Eckhardt, of the Pennsylvania Talking Machine Co., accompanied by W. C. Fuhri, the United States manager of the Columbia Co., are on a several days' tour of Baltimore and Washington, as well as other points in which the Pennsylvania firm is interested. The Pennsylvania Co. report that their business has been very good. All through August they were exceedingly busy shipping out goods on the fall orders, and in the point of volume of business it was the biggest month they have ever had. Manager Eckhardt brought his family back from the summer at Atlantic City on Labor Day and has opened his city home at Overbrook.

Some News Brieflets

F. L. Dieffenderfer has been appointed manager of the Metropolitan Phonograph Co., in Reading, to succeed William R. Keech, who recently resigned. They are extensive handlers of the Columbia.

I. S. Rice, of 919 Girard avenue, is making extensive alterations in his store, as is also the West Philadelphia Talking Machine Co., at 7 South Sixtieth street, both firms being large handlers of the Columbia.

One of the recent visitors in the local trade was A. W. Loser, of the Miller Music House, Lebanon, Pa. He reports splendid results in his territory.

Nathan Worth, the talking machine dealer of Riverside, N. J., was in town this week and states that he contemplates adding a number of new booths to take care of his rapidly growing business.

WILL CENSOR IMPORTED RECORDS

Russians Claim Germans Are Exporting Records Slandering Them

According to a dispatch sent last week from Petrograd, Russia, to the London Times, all imported phonograph records are hereafter to be censored, owing to the accidental discovery of large numbers of records of German origin, whose contents, instead of being the harmless musical reproductions indicated by the labels, were found to consist of scurrilous anti-Russian lampoons, preposterous reports in the Russian language, describing the military situation and the economic conditions prevailing there, and other matter tending to slander and debase the Russian cause.

DON'T COUNT YOUR RECORDS before they are delivered, unless YOU are SURE of your service

Buehn Service takes the "if"

out of deliveries; it shoves "doubt" over in a corner with last year's record lists; it keeps your record library dustless; your shipping department healthy and your salesmen in financial clover.

Now, what does October mean to you? Does it mean that your Victor record business will be increased?

Does it mean that IF you had the records, your October showing would be big?

October is a great month! It is the best time of the year for you to KNOW that Buehn Service is human.

Exclusive Wholesale VICTOR DISTRIBUTORS

DETROIT DEALERS READY FOR LARGE FALL BUSINESS

Busy Stocking Up the Past Summer—First Floor Department for Grinnell Bros.—Activity With Edison Shop—New Pathephone Dealers—Owen & Co. Take on Columbia Line —Big Demand for Talking Machine Dealers' Rights—Exhibitors at Michigan State Fair

DETROIT, MICH., September 5.—Now that the hot weather spell has gone and people are rushing back to the city from their summer homes, the retail talking machine and record business should boom once again. One thing is sure —dealers are ready for the increased business, having stocked up as never before, although there is some complaint because of the scarcity of certain machines and records. However, these are matters which usually adjust themselves. In other words, a customer who cannot get one kind of machine will take something else. It just requires the right kind of salesmanship ability on the part of the selling force to see that the prospective customer buys what the dealer has to sell.

Dealers themselves have done considerable vacationing this summer, and are now ready to pitch in. Most of the dealers own motor cars, and their vacations invariably consisted of touring through the East.

C. H. Grinnell, manager of the wholesale division of Grinnell Bros. Victrola department, had a very enjoyable Eastern tour, returning August 28. A. A. Grinnell, managing director of this end of the business, says that his company is in a position to furnish 100 per cent. of the record orders, but that some machine numbers are hard to secure.

Grinnell Bros., by the way, have decided to install a first-floor talking machine department at No. 243 Woodward avenue, adjoining the main store. This particular store, which is a part of the Grinnell Building, could have been rented for $12,000 annually, but Grinnell Bros. decided that it was just what they needed, so concluded to remodel it for a first-floor talking machine department. Alterations are now being made that will conform it into one of the finest departments of its kind in the country. The main floor will be for talking machines, and the mezzanine for records. The basement will continue as heretofore, although some extensive alterations will also be made there. New partitions will be installed—the folding kind—which will enable a great portion of the basement being thrown into a large recital hall. Grinnell Bros. plan to give a series of talking machine recitals during the coming fall and winter.

The Edison Shop, Detroit, has completed alterations, and is now ready for a big fall business. Changes have also been made to the quarters of the Phonograph Co., of Detroit, in the same building. R. B. Alling, general manager, says this fall is sure to be a very successful one, providing the factory keeps pace with orders sent in.

Wallace Brown, Edison dealer, at 31 Grand River avenue, this city, has started to use the words "The New Edison" in his very latest advertising. This new slogan or name for the Edison phonograph will be used almost exclusively by Mr. Brown hereafter.

Max Strasburg, 74 Library avenue, Detroit, says the entire summer has been satisfactory for business, but he expects to do big things from now on.

K. Mills, manager of the Columbia Grafonola wholesale branch in Detroit, attended the recent meeting at Cedar Point of Mid-West managers. He reports that the business at the Detroit branch is showing a phenomenal increase for the first eight months of 1916 as compared to 1915. Sam Lind, manager of sales, was never more enthusiastic about the columbia line and prospects for fall—and he has been with the company for nearly fifteen years.

J. R. Peckham, manager of The Pathephone Co., of Detroit, Pathé jobbers in Michigan, has appointed many new dealers within the past sixty days and says he is getting orders right along. He feels absolutely certain of a big fall trade.

Owen & Co., furniture dealers at Gratiot and Brush streets, Detroit, are installing a Columbia Grafonola department on the first floor, and have given an order to the Detroit branch for a complete assortment of records and machines, so as to have the complete Columbia line. This new department will be ready about the middle of September.

Two of the largest instalment furniture concerns in Detroit are the Peoples Outfitting Co., Michigan and Shelby streets, and also Summerfield & Hecht. The first named store sells the Victrola, and the last one sells the Columbia line.

A local drygoods house recently offered to place an order for $50,000 worth of Victrola machines and records, but was turned down as new franchises in the downtown section are "out of the question" at present. This same concern a few years ago was solicited by several salesmen of Victor talking machine companies to install a Victrola department. How things do change.

It is no uncommon thing to hear these days that orders amounting to anywhere from $25,000 to $50,000 for talking machines and Grafonolas have been refused. The policy of the Victor and Columbia companies is to protect—not to antagonize—those dealers who already have franchises.

The Michigan State Far, which opened Labor Day at Detroit, bids fair to exceed all previous events for the number of paid admissions. The fair will continue until September 14. During this important event, Detroit dealers are pushing talking machines by special displays and special advertising calling them "State Fair Specials." At the fair grounds, exhibits are being made by Grinnell Bros. (Victrolas), J. L. Hudson Co. (Victrolas), Detroit Music Co. (Columbia Grafonolas), and Detroit Piano Co. (Vitanola). The exhibits are attracting much attention.

Secretary E. P. Andrew, of the Detroit Talking Machine Dealers' Association, expects that regular monthly meetings will be resumed in October.

C. O. LeBaron, Columbia dealer, is back from the East, where he spent nearly a month touring.

Gentlemen:

Upon moving into our new offices, we wish to take the opportunity to express our appreciation not only of the quality of the merchandise, which you have delivered to us during the years we have done business with you, but also the excellent service and untiring efforts, which all the members of your company, who have anything to do with our parts, have given us during this time.

Our greatest desire is to build a phonograph which at all times stands for quality, and excellent workmanship, and we count upon your co-operation in the future as we know that, in your line that your product is unexcelled, and also to let you know that we appreciate your prompt deliveries, and unvarying quality during a period when other manufacturers are taking advantage of the difficulties due to the unsettled market conditions.

With very best regards, we remain,

Very truly yours,

THE TRADE IN NEW YORK CITY AND VICINITY

With the arrival of September the talking machine dealers in local territory are starting to make active preparations for a record breaking fall trade. Judging from all indications there is every reason to believe that the talking machine trade throughout the country will enjoy a remarkable era of prosperity during the next few months, and New York dealers are looking forward to securing a liberal share of this prosperity. Machine and record stocks are being replenished, store interiors are being redecorated, and in short, nothing is being left undone by the up-to-date dealer to give his customers every service and convenience in selecting their holiday purchases.

Splendid Summer Trade

When The World representative visited the trade this month he found many of the dealers discussing their summer business, and it was gratifying to find that with practically no exception the local dealers closed the best summer in their history. In fact, quite a few of the dealers stated that their sales during July and August compared very favorably with their figures of the early part of the year and with the sales totals of the fall months of only a few years back.

Installing New Record Systems

During the past few months many dealers took advantage of the opportunity offered them to make a careful study of their record departments, and more than one was surprised to find that this all-important division of his business was sadly inefficient in many ways. He found that prospect lists were not up to date, that the ordering system he was using was obsolete, and that he had no adequate way of finding just how many records a customer had purchased during a given period. In other words, the dealer learned that a woeful lack of system characterized his record department.

By making a careful study of his record business, the dealer found that by installing new systems he could not only enhance the efficiency of this department, but could also add materially to his machine sales, as it is an axiom that a dealer doing a large record business will also secure his share of the machine business in his territory. There is no doubt but that those dealers who have given serious thought to their record departments during the summer months will be amply repaid by increased sales this coming fall.

Probable Machine Shortage

From all indications there will not be such a tremendous shortage of product this fall as there was last year; not because the demand for machines and records will be less, but because the dealers realized the wisdom of placing their orders far in advance so that their distributors might adequately prepare for the holiday season. There is undoubtedly going to be a shortage of machines retailing at $75, $100 and $150, but there has been a shortage of these types for some time past, and this scarcity of product is becoming accentuated as the fall season approaches. The record situation, however, is far more encouraging than it was last year, and the majority of the dealers are giving their customers 100 per cent service on all record orders at the present time

Landay Home Near Completion

The new home of Landay Bros., Victor distributors at 23 West Forty-second street, is being rapidly completed, and will probably be ready for occupancy in the very near future. Max Landay, head of this concern, is giving his personal attention to the architectural and decorative work incidental to the new Landay Victor Temple of Music, and under his able direction this building will doubtless be one of the show places of the local trade, if not of the entire country. Mr. Landay is sparing no expense in this new Landay establishment, which will comprise five floors devoted exclusively to the sale of Victor merchandise.

Up-State Trade in Fine Shape

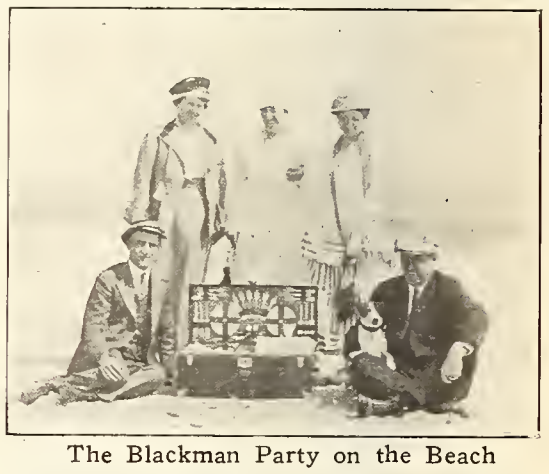
"We closed the biggest August in our history," said R. F. Bolton, district manager of the Columbia Graphophone Co., New York, in a chat with The World. "Our sales totals were 66 per cent. ahead of last August, and would have been greater if we had been able to receive more merchandise from our factories. We have more orders on hand at the present time than at any period in the history of this store, and we are making every effort to co-operate with our dealers and give them proper service."

Mr. Bolton recently returned from a visit to the Columbia wholesale establishments and a number of the Columbia dealers in New York State. He states that conditions in this territory are remarkable, and that the dealers have closed the best summer business they ever experienced. There has been a heavy demand for the new Columbia Electric Grafonolas, which are steadily increasing in popularity day by day.

Elected Mayor of the Town

J. N. Blackman, president of the Blackman Talking Machine Co., New York, has been elected president of the Brightwaters Association, Brightwaters, L. I., which is the governing body of that town. Mr. Blackman's position is equivalent to that of Mayor, as the Brightwaters Association is composed entirely of the property owners of that city.

During the past four months Mr. Blackman has been spending much of his time at his summer home in Brightwaters, and upon several



The Blackman Party on the Beach

occasions has had as his guests the officers of the company and their families. The accompanying photograph was taken during the course of an outing at Mr. Blackman's summer residence, and included in the picture are Mr. and Mrs. J. L. Spillane, Mr. and Mrs. George Thau and Mrs. Blackman. The Blackman party had just finished an automobile trip when Mr. Blackman demonstrated his skill as a photographer.

A Successful Downtown Shop

The Gotham Shops, 49 Nassau street, exclusive Columbia dealer, has been closing a very satisfactory summer business, and Irving Kurtz, owner of this store, is preparing to handle a banner fall trade. The Gotham Shops is located in the heart of the downtown business district and by giving its patrons service in the true meaning of the word, this establishment is increasing its sales week after week.

To Direct Activities of Recital Hall

The Edison Shop at 473 Fifth avenue, New York, owned by the Phonograph Corporation, of Manhattan, is preparing for a banner fall trade, and is making plans so that this store will be in a position to give its patrons maximum services in every way. Arrangements were recently closed whereby Miss Cora Strickland will be placed in charge of the recital hall at the Edison Shop. Miss Strickland is well known in musical circles, and will be given every opportunity to make the Edison Shop's recital auditorium a Mecca for music lovers. It is planned to give a number of "Recreation Concerts" this fall presenting famous artists who record for the Edison disc record library. An extensive advertising campaign is also being prepared embodying distinctive border designs and inviting the public to attend the Edison Shop recitals at their convenience. Raymond Duncan, of the Edison Shop, spent the month of August touring in his automobile through New York State.

TRADE IN NEW YORK AND VICINITY

(*Continued from page 28*)

ling the Pathé line with very pleasing success is Henry B. Pye & Co., a leading furniture house in the upper section of the city. Manager Gross, of the Pathé department in this store, has just placed a very large order for Pathephones and Pathé discs, and is enlarging his Pathé department to accommodate his fall and holiday trade. Mr. Pye, who has been spending some time with his regiment on the Texas border, was in New York last week and expressed his appreciation of the splendid Pathé business the store is closing.

Window Displays Pay Dividends

Jacob Doll & Sons, 116 West Forty-second street, handling the Pathé line exclusively, has placed a large order for Pathephones and Pathé discs. Frederick Doll, of this company, states that Pathé sales have been far ahead of expectations, and that the new Pathé discs are meeting with a most cordial reception. This store has been featuring the Pathé line exclusively in its window displays, many of which have produced actual machine and record sales.

A Service That Increases Record Sales

The window display service inaugurated several months ago by the New York Talking Machine Co., Victor distributor, New York, has proven so successful that the company has been in receipt of letters from Victor dealers in all parts of the country stating that this service has brought them increased record sales with amazing regularity. For the fall season the New York Talking Machine Co.'s efficiency department, which is in charge of this window display service, is planning to give the dealers a number of new thoughts and ideas which should aid in boosting their record sales.

DIAMOND RING FOR A. M. HIRD

The workmen in the disc manufacturing department of Thos. A. Edison, Inc., West Orange, N. J., presented a diamond ring to A. M. Hird, superintendent of the department, last week, as a token of their esteem.

HAS INVENTED NEW TYPE OF MOTOR

H. B. McNulty, president of the Wonder Talking Machine Co., New York, has invented a new type of phonograph motor which combines both electrical and spring operation. The company has negotiations pending with several prominent concerns who, in all probability, will use this motor exclusively, as the Wonder Talking Machine Co. desires to concentrate its activities on the sale of its present line, with the possible addition in the near future of an electric machine.

The Wonder Talking Machine Co. has been so successful in marketing its product the past year that it did not deem it advisable to merchandise this new type of motor, as its factory facilities are now taxed to the utmost.

The motor invented by Mr. McNulty runs on either d. c. or a. c. current, or with batteries. The motor can be changed instantly from one electrical operation to spring without interfering in any way with the motor's mechanism.

Service for the Southern Trade!

The AEOLIAN VOCALION

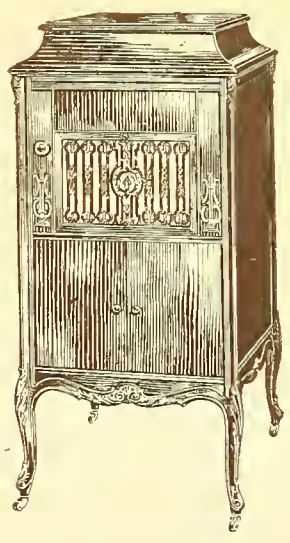
The new phonograph which has practically revolutionized the industry

IT is made by the greatest musical instrument concern in the world. A concern that long ago established its supremacy in the highest and most difficult fields of instrument making art.

A house of fine traditions, of notable achievements, of stability and power.

A house known and respected by a world-wide public.

These are vital facts to you, Mr. Dealer—you who realize the importance of the Phonograph, the significance of this instrument to the future of your business.



"The passive pleasure of listening to music is undeniably a great one—"

THE OLD AND THE NEW
A Story of Phonograph Progress

THE Aeolian-Vocalion is a *new* phonograph.

The phonograph of the old order was a sound-reproducing mechanism simply. In one respect only does the Vocalion resemble it—the Vocalion revoices from records the beautiful performances of the world's great musicians—plays these records automatically, if you wish. But in this, the *sole* capacity of the familiar phonograph, how far the new surpasses the old!

The Vocalion tone is rounder, deeper, fuller, richer—more interesting and satisfying. In it there is less of the phonograph, more of the natural beauty—more of the subtle character of each voice and instrument.

Yet, that the Vocalion is tonally superior to all other phonographs is not its chief distinction.

As no other phonograph has been, the Aeolian-Vocalion *is a true musical instrument*—an instrument to control, to *play*, an instrument which anyone may use to exercise the natural instinct for musical expression with which everyone is gifted in some degree.

As such the Aeolian-Vocalion occupies a field by itself; a field infinitely broader and more important than that of the older type of phonograph; infinitely richer in its possibilities for musical enjoyment of the keener, more fascinating and personal kind.

The illustrations on these pages indicate something of how the Aeolian-Vocalion—the *new* phonograph—differs from the old. On the left is pictured the passive enjoyment of merely listening—on the right, the active enjoyment of taking part.

It may not be easy for those who have never made music or helped to make it, to fully grasp the intense fascination attending it; or to realize that everyone has sufficient natural musical ability to make its exercise a pleasure. The extraordinary success of the Aeolian-Vocalion—the leading position it has already attained—shows, however, that personal experience brings quick appreciation of these things.

THE above advertisement, now appearing in national magazines, tells the graphic story of the Vocalion—and suggests the wonderful possibilities of this new instrument to the live dealer.

"But music's supreme pleasure is the creative pleasure of musical expression — of making music."

To take the Graduola—the Vocalion tone control—and with slight, instinctive pressures to shade each tone or phrase, to make the music live with your own feeling and thought, is the test decisive. It is the test which without exception gives a broad and instant vision of the inner and greater pleasures of music, brings home the gripping interest of the power of expression in music.

It is a highly significant fact that the new phonograph is the product of a house long known as the creator of wonderful musical instruments—The Aeolian Company of New York, London, Paris and Berlin, largest manufacturers of musical instruments in the world. The achievements of this concern in originating musical instruments and in developing musical instrument *tone* have made it internationally famous. The Aeolian Company is responsible for such superb productions as the Steinway Pianola, the Duo-Art Pianola, the modern Weber Piano and the Aeolian Pipe organ—the finest and costliest evolution of this most magnificent of instruments.

The scientific study and advancement of *tone* has been the special work of The Aeolian Company for many years. Seven Royal Appointments from the leading Rulers of Europe and a success that make it the dominating factor in the music-industry of both the Old World and the New are results in great measure due to its efforts and triumphs in this direction.

Such is the concern responsible for the Aeolian-Vocalion—the *new* phonograph. It is the *one* concern that could bring to bear the full power of both art and science necessary to achieve this final transformation of the phonograph.

SO it is that the Vocalion offers in physical beauty, in musical quality or in fascinating privilege, far more than you have ever thought possible of the phonograph.

Every phonograph owner, every dealer, everyone who cares for music, will be interested in this remarkable new instrument. We have ready for you a handsome descriptive Vocalion booklet. It will be mailed promptly upon request together with the address of your nearest Vocalion representative.

Address Dept. M 10.

Vocalion prices are—$35 to $350 for conventional models.
Art styles to $2000 ($35 to $75 styles without Graduola.)

BIG INTEREST IN SONORA "SUPREME"

Latest Model De Luxe of Sonora Phonographs Demonstrated Only by Appointment in San Francisco—E. R. Warner Buys First One on Pacific Coast

SAN FRANCISCO, CAL., September 4.—A great amount of interest has been shown around the Sonora Phonograph Co.'s retail parlors at 344-346 Geary street, in this city, during the past month owing to the introduction of the "Supreme" style Sonora, which retails at $1,000.

F. B. Travers, manager of this Western company, has made a ruling that the Supreme style shall be demonstrated only by special appointment until such time as their new store is completed, which will be equipped with a very elaborate concert hall that will be in keeping with this model.

The second demonstration made resulted in E. R. Warner, of San Francisco, being the proud purchaser of the first $1,000 machine ever sold on the Pacific Coast.

Mr. Warner selected the Sonora after very exhaustive tests and proved conclusively that the "Supreme" would play perfectly any disc made.

The wonderful mechanical and cabinet construction is vitally interesting and quite out of the ordinary, having walls nearly three inches thick, carving requiring great skill, a 45-minute motor and motor meter besides an automatic stop, which is self-controlled, requiring no setting or adjusting.

To Carl W. Caulkins, one of the enterprising salesmen, goes the credit of this sale, and Mr. Travers states that the pleasing part of it all is that Carl made it a cash sale.

HOUSEL & CO. ENLARGES STORE

Five New Booths and a Repair Department Installed in Exclusive Talking Machine Store —Victor and Edison Lines Carried

WILLIAMSPORT, PA., September 11.—M. H. Housel & Co., of 209 West Fourth street, has completed alterations costing $1,000 in its exclusive talking machine store here. Five modern, sound-proof demonstration booths have been installed, in addition to the two already in use, and a large electric fan, with a capacity of 4,000 feet of air per minute, supplies adequate ventilation in the booths. A new shelving system for records, and a new storage department in the basement of the building are also included in the alteration. The entire store is tastefully decorated in white enamel, and the main office of the concern has been enlarged and improved. A special repair department has also been installed, for the repairing of talking machines, which is in charge of an expert mechanician. Both the Victor and Columbia lines of machines and records are carried by the company, which gives daily public recitals of the latest records.

NEW MANAGERS FOR COMPTON-PRICE

COSHOCTON, O., September 11.—The Compton-Price Co., manufacturers of the Stradivara phonograph and the Compton-Price vertical grand piano, recently announced that C. W. McCombes has been made general manager of the concern. Elmon Armstrong, who has been prominent in the music industry in the Middle West for many years is in charge of the Chicago offices of the concern, and offices have also been recently opened in New York City at 505 Fifth avenue, with C. A. Reade in charge of the same.

The Kane Blind & Screen Co., of Kane, Pa., manufacturer of screens for household use for many years, is offering to the talking-machine trade a line of stands to fit all machines. These Kane stands are well-constructed, and have met with a ready sale throughout the country.

DOUBLE DOMESTIC PLANT CAPACITY

Heavy Demand for New Machines Overcomes Allowance Made by Manufacturers for a Normal Increase—What President Sheble Says of the Present Situation and the Outlook

PHILADELPHIA, PA., September 8.—Although it has been but a few months since the first announcement of the Domestic Talking Machine Corporation, it is now announced that the increasing demands for Domestic machines has made it necessary to double the capacity for production.

In view of the fact that the Domestic plant was planned to take care of a large volume of business, with a sufficient allowance for an unexpected increase, this would indicate that the keynote has been struck.

Horace Sheble, the president, says: "While the enlargement would indicate that we are progressing rapidly, in truth we are making haste slowly. The whole foundation of the Domestic organization is efficiency. Experiments are tried in the factory and not on the public. The result is that the entire Domestic line is coming through in perfect shape.

"Hundreds of letters are being received from dealers who say the Domestic is far beyond their anticipation, one machine selling another, until it looks like a natural endless chain.

"George W. Lyle, in New York, and Walter S. Gray, on the Pacific Coast, both report heavy contracts for the full Domestic line, and all in all, we feel that it will only be a short time before another enlargement of our facilities will be necessary. I am assured of this, because it has already been proved that we do not have to sell every machine separately, each machine bringing a demand for another.

"The trouble with low-priced machines in the past has been that each sale had to be made individually at a prohibitive selling cost for the dealer. If a machine in one house makes all the neighbors envious, it is easy to see how the cost of selling will be reduced, and how the sales will multiply for the dealer and consequently reduce his selling expense."

Small "Victors" converted into cabinet types instantly

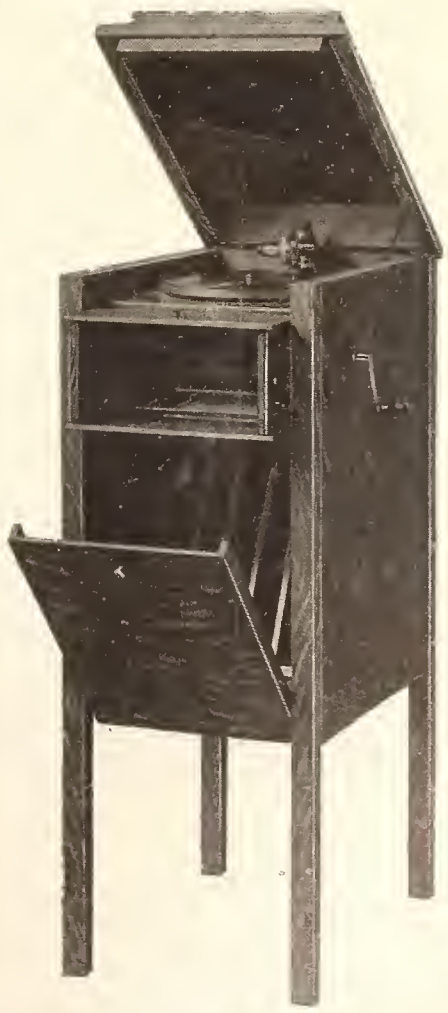
SOMETHING **new**—to sell to every present owner of $15 and $25 Victors and every new purchaser thereof—and to a lot of people who want only a cabinet type but can't afford the $75. Also an article with which you can beat competition by offering a combination that forms an enclosed cabinet type at **much less** than the cost of such machines.

By simply setting a "Victor IV" or "Victor VI" into a Lundstrom "Converto" Phonograph Cabinet, the machine is converted into a beautiful, larger, **enclosed type** that looks better and sounds better. The combination, from a practical utility standpoint, has even **more** advantages than the regular cabinet types, because **the machine remains portable.**

Lundstrom CONVERTO PATENT APPLIED FOR

Enclosed Type Phonograph Cabinet

Has top which when lowered completely encloses machine. Two doors in front, one hinged at top, the other at bottom. The tone regulating doors of the machine open out through this space. When all four doors are open, they form a square compartment and thus a continuation of the "horn" or sound amplifying chamber of the talking machine which increases the volume of sound. Lower part of cabinet contains record rack divided off to hold about 70 records of any size. The winding handle, with extension, which we provide free, passes through side of cabinet so that it can be wound from outside, the same as any cabinet machine.



MADE IN TWO SIZES

"Converto" Cabinet for "Victor IV," retail price..... **$15.00**

"Converto" Cabinet for "Victor VI," retail price..... **$20.00**

Made in Quartered Oak to match machine. Also in Mahogany Finish, where preferred, at same prices.

Owners of $15 Victors can convert their machines into CABINET TYPES at an additional cost of **only $15**—combined cost **only $30.** Owners of $25 machines have a large cabinet type at a **combined** cost of **only $45.** And you make a good profit on every one you sell.

Safe to say you will sell ten of these combinations to one of the big machines—besides selling cabinets to present owners of small machines. Furthermore, you will be able to offset the inroads being made by the many cheap machines being offered, because you can sell a genuine Victor in cabinet style, with a "Converto" Cabinet, at low enough cost to appeal to anyone.

The Lundstrom "Converto" will be advertised extensively. It is backed by a house with fifteen years' experience in making Lundstrom Sectional Bookcases and Filing Cabinets, one of the leaders in this line.

Write at once for wholesale prices and full particulars

Domestic
TALKING MACHINE

APPRECIATION We desire to express our appreciation of the wonderful reception which has been extended DOMESTIC TALKING MACHINES.

PROGRESS We are now arranging with representative dealers in every state and large city throughout the United States; in addition arrangements are being completed whereby the Domestic will be broadly represented throughout the Dominion of Canada and in several other foreign countries.

CAPACITY In laying out our present plant we provided what was considered ample room to care for expansion during the next few years, but the demand for Domestic Machines has increased at such a rapid rate that we now have under way increases as will double our facilities over what was originally contemplated. In addition, we are doubling our factory floor space so as to provide ample room for expansion.

As a further insurance to our trade of provisions made to care for their business we have secured delivery of sufficient raw materials to insure operation of our plant at full capacity during the Fall and Winter season.

PRODUCT Remember, Domestic Machines are broadly guaranteed, and all their various parts, such as Motors, Sound Boxes, Tone Arms, etc., are of our own exclusive designs and are being manufactured in our own plant under the direction and supervision of men who have spent the best portion of their lives designing and building Talking Machines.

We are receiving hosts of letters from satisfied dealers.

OPPORTUNITY A Domestic Dealer has opportunity to be an exclusive representative in the territory he can logically cover as we are opposed to making competition among our dealers.

If you are not already a Domestic Dealer do not delay; send in your application today. It is your opportunity to secure the best construction, largest value and easiest selling line of Moderate Priced Talking Machines ever placed on the market.

Some one in your locality is going to handle the Domestic; can you afford to lose the opportunity?

Model No. 1, Oak. Size, 15x17x8

One of nine styles ranging in price from $7.50 to $47.50

The Domestic sound box is as sensitive as the compass needle.

ROCHESTER ASSOCIATION MEETS

Members Announce Charging of Interest on Installments—Plan Early Action on Record Approval System and Misleading Advertising

ROCHESTER, N. Y., September 6.—The regular monthly meeting of the Talking Machine Dealers' Association of Rochester was held last evening and was marked by the evident purpose of those present to take definite action regarding various important trade questions.

One of the first matters considered was that of interest on time payments and the following resolution was adopted: "Be it hereby known that we, the undersigned dealers, charge interest at the rate of 6 per cent. per annum on all deferred payments on talking machines after thirty days." The next step that this organization will take will be to regulate or do away entirely with the approval system in connection with records and to curb misleading advertising.

The Rochester association has at the present time twenty-one members and the officers are Raymond C. Fagan, E. W. Edwards Music Co., president; Albert H. Warren, Balcom Music Co., vice-president; Audley S. Beisinger, Music Lovers' Shoppe, secretary, and William S. Levis, Levis Music Co., treasurer.

UNCLE SAM HELPS PUBLICITY WORK

Postal Clerks Arrange Geo. B. Peck Co.'s List of Victor Prospects to Facilitate Handling of Local Mails—Means Quicker Service

KANSAS CITY, MO., September 5.—The United States postoffice at Kansas City, Mo., took official cognizance recently of the large volume of mail distributed in behalf of the Victor goods by the talking machine department of the Geo. B. Peck Dry Goods Co. The postmaster sent two men, who spent nearly two days assisting in installing a system that would facilitate the handling of this mail both in the store and in the postoffice. These men went over the entire mailing list, arranging the cards by districts. The mail, now, is bunched according to these districts of the city, labeled, and sent to the various distributing points direct. The store saves about twelve hours in getting the mail to patrons. Instead of one alphabetical card index, the department has now six; five for the five city districts, and one for mail outside Kansas City. New names are filed in the district boxes, after reference to a blueprint map. The department of the Peck store has a very carefully edited mailing list, no names being retained unless the persons have made response to the mail. The list is revised every six months, and at the last revision 1,000 names were taken out—but their places have been more than filled. The company send the usual monthly supplement on the 28th, and at least one other piece of mail during the month, to the list.

M. SCHUELKE CO. HAS STRADIVARA

MILWAUKEE, WIS., September 7.—The Max Schuelke Organ Co., of this city, have secured a jobbers contract from the Compton-Price Co. for the sale of Stradivara phonographs in Milwaukee and wide additional territory. Arrangements have been completed by Elmon Armstrong, the Western representative in Chicago for the Compton-Price Co., for an extensive business in Milwaukee and through all the surrounding territory.

Mr. Schuelke plans going after the trade in Milwaukee on a vigorous scale, and is making arrangements at his offices and store at 522 East Sixteenth avenue, where he will display the entire line.

A certificate of incorporation was issued this week by the Secretary of State at Albany, N. Y., to the Consolidated Phono Parts Corp., manufacturers of tone arms and soundbox accessories. The capitalization is $10,000, the incorporators being H. Hoffman and S. and N. London, of New York City.

NOW THE TALKING MACHINE GHOST

Entire Neighborhood in Brooklyn, N. Y., Upset by Machine That Objected to Being Shut Up in a Trunk and Operated Too Easily

Mrs. Pauline Siegfried, her husband, her daughters, a throng of neighbors, a crowd of reserves from the Liberty Avenue Police Station, a squad of detectives from the Seventh Branch Detective Bureau, and a ring of wide-eyed small boys fringing the outskirts, stood around a heavy, grim-looking trunk at the Siegfried residence, 296 Snediker avenue, Brownsville, recently. More than one nervous hand mopped a damp brow as the crowd waited in anxious suspense.

A month ago a stranger had come to the Siegfried home and engaged quarters, for which he paid $3 for a month in advance. A trunk would soon arrive, he said. A few days later he disappeared, but a week ago the promised trunk reached the Siegfrieds, trundled on a handcart by an equally mysterious stranger, who also disappeared.

The heavy trunk was placed in the guest room, but not before one of the Misses Siegfried had heard a low moan from its depths. Her family scoffed, but the following night, as Mr. Siegfried stumbled upstairs to bed he was startled at the sound of a cough and groan from the guest room. Two days later Mrs. Siegfried passed by the unwelcome visitor and jumped at a low whistling sound. Then one night, after the whole family had been aroused at the supper table by a snatch of ribald song from above, they fled wildly to the police station.

A big policeman pried open the lid. The hush grew deeper as the crowd strained forward to get all the gruesome details. The officer reached in and uncovered a horn. It was a phonograph horn. At last reports the family was engaged in a neighborhood dance with phonograph music.—The New York Times.

Roy Brierly, a well known member of the retail department of the Gately-Haire Co., Albany, N. Y., is spending his summer vacation at Kinderhook.

SALTER

CABINETS

DISPLAYS AT MINNESOTA FAIR

Great Line of Talking Machines on Exhibition at Big Northwestern Event—Edisons, Victors, Pathephones, Columbias, Starrs, Shown

MINNEAPOLIS AND ST. PAUL, MINN., September 5.—Minnesota's greatest and finest talking machine display was shown the week of September 4-9 at the Minnesota State fair, where six complete lines were on exhibition during the week. In the opinion of the booth managers and attendants talking machines never obtained such wide and advantageous publicity in the Northwest as at this show. The Northwest still is quite rural, the bulk of the populations of the four Northwestern States being in the section generally referred to by city people, which up here means the residents of Minneapolis, St. Paul and Duluth, as "The country."

They know about talking machines, of course, but some have not been brought into intimate association with the machines, and when they see and hear one of the instruments for the first time, it is a novelty for them.

The largest exclusive phonograph booth at the fair was that of the Edison instruments shown by the Minnesota Phonograph Co., general Northwestern distributors. Laurence H. Lucker, head of the company, has general supervision over the booth, but the fair staff of a half score people was headed by M. J. Golden, from the Edison laboratories, Orange, N. J. On the opening day alone, more than a thousand likely customers registered and numerous other thousands took away literature pertaining to the Edison phonographs.

All the Victrola lines were displayed in the booth of the Cable Piano Co., which was neatly arranged, pianos and talking machines being effectively intermingled in a harmonious picture. A large part of the local staffs of the Cable Piano Co. in Minneapolis and St. Paul, were on hand during the week with occasional visits from General William S. Collins. A full line of Victor goods also was displayed by the New England Furniture and Carpet Co., which has a building of its own, possibly the most attractive one on the grounds. At any rate the Victor instruments were seen and heard to good advantage during the entire week.

The Pathephones were shown for the first time at the fair by G. Sommers & Co., St. Paul, general Northwestern distributors. Ten machines, ranging in price from $25 to $225, were exhibited by a corps of experienced salesmen under the direction of C. M. Ringwald. The Pathephone is handled by four retail dealers in St. Paul and two in Minneapolis, one of the latter, The Northwest Pathephone Co., 921 Nicollet avenue, also doing a jobbing trade. Mr. Ringwald is most enthusiastic over the advertising his exhibit obtained during the fair.

M. L. McGinnis had several samples of the Starr phonograph in a booth occupied jointly with George W. Raudenbush & Bro. with Starr and other pianos. This was the first appearance of the Starr in this class of company in the Northwest, and Mr. McGinnis declares that he does not fear the popular verdict.

Across the aisle from the Starr booth were a number of Tonolas, a talking machine, manufactured by L. A. Priess, in Minneapolis.

The Columbia Graphophone Co. had no separate display, but its products were adequately displayed in the handsome New England Furniture and Carpet Co.'s building.

This introduction might indicate that the talking machine trade in the Northwest is showing an upward trend. Lest there be any doubt hearken then to the words of those who know all about it.

"The Columbia trade in the Northwest in August was fully 100 per cent. greater than for August of last year, and even greater than for last December, which was regarded as the best ever in our trade in this part of the United States," was the report at Columbia headquarters. "Our road men are getting better business right along. Crop losses may have hurt business, but the Columbia will sell more instruments in this territory during the coming fall and winter than for the corresponding period of 1915. What more can one want.

"We can't supply the demand," moaned Laurence H. Lucker, of Minnesota Phonograph Co. "The Edison company makes instruments that are entirely too good; the people almost beg for them.

"The demand for talking machines in the Northwest is fully 100 per cent. greater than a year ago, and the supply probably is no larger," states the Beckwith-O'Neill Co. "That is the situation, and any one who has ever been in a similar fix knows just how it feels.

"Naturally we are unable to fill orders, and for that reason are not opening any new accounts, although there are excellent opportunities. The crop scare is over apparently, and there is a general impression that reports of damage were in some cases overdrawn.

"Many jewelers handle talking machines as side lines, and scores of the craft daily visited the Victor, Edison and Columbia headquarters during the annual convention of the American National Retail Jewelers' Association. Some new agencies were added, but only a few.

"Arthur Magoon, head of the Victrola department of Foster & Waldo, has retired from the talking machine trade, and is now on the road selling lighting plants for use in public buildings and home at places wherein service is obtainable from gas or electric light concerns."

VEECO

The Electric Drive of Supremacy for Talking Machines

The only electric motor or mechanism for talking machines which has been approved, and is endorsed by the highest electrical authorities in the United States.

NEW "SHOP" FOR SAN FRANCISCO

F. B. Travers to Open the "Phonograph Shop" at 109-111 Stockton Street in October

SAN FRANCISCO, CAL., September 4.—At 109-111 Stockton street, on October 1, will be opened an extensive and exclusive "Phonograph Shop" under the management of F. B. Travers, well known in talking machine circles on the Pacific Coast.

"The Phonograph Shop" will have daily concerts in an absolutely sound-proof recital hall, having a seating capacity of from thirty to fifty people. "The Phonograph Shop" will have four large demonstration and record sales rooms, a mezzanine floor and a large display room, all beautifully decorated and furnished.

This location is in the heart of the shopping and theatre district and will afford an opportunity for all to secure absolute quiet and rest, at the same time being entertained by the records of every artist of note.

Two new notes on the Columbia strings—W. H. Squire, England's greatest 'cellist, and Frank Gittelson, America's violin genius.

(Write for "Music Money" a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

APPOINTED PATHE DISTRIBUTORS

The Armstrong Furniture Co., of Memphis, Tenn., Meeting With Pleasing Success

MEMPHIS, TENN., September 7.—The Armstrong Furniture Co., of this city, which some time ago, was appointed wholesale distributor for the Pathé Frères Phonograph Co., New York, is meeting with very pleasing success in its new Pathé department, and is now making preparations for a banner fall trade.

Owen Armstrong, of this company, and C. E. Gore, traveling representative for the Pathé Frères Phonograph Co., recently left for a trip from Memphis to New Orleans, La., to introduce the Pathé products, and have established a number of very desirable accounts.

The Armstrong Furniture Co. is devoting an entire floor to the presentation of Pathé products, and has just finished several handsome booths for demonstration purposes. It is the company's intention to carry a complete stock of Pathephones and Pathé discs, and give its dealers every possible co-operation in handling the line.

BOOKING BIG CABINET ORDERS

John J. Cavanaugh, 452 Fulton street, Brooklyn, N. Y., manufacturer of the Cavanaugh-Cabinet for Victrolas, stated this week that these cabinets were achieving unusual success. Mr. Cavanaugh's first announcement in The World has brought him inquiries from all parts of this country, Canada and Cuba, and the samples he has shipped have met with hearty praise.

MAY FORM NEW CORPORATION

To Manufacture and Exploit the Knabe Crystola Talking Machine

CINCINNATI, O., September 1.—Developments are expected shortly in connection with the formation of a new corporation, the object of which will be the manufacture of the Knabe Crystola talking machine, now being made at The Knabe Bros. Co.'s factory in Norwood, O., near here.

The fact that there were some negotiations on for the Crystola was indicated in the last issue of The Talking Machine World. Since then the directors of The Knabe Bros. Co., according to talk in musical circles, have given an option for the sale of this section of their business. Those in close touch with the situation believe there should be material developments before the middle of this month. It is known to those back of the movement, that it would necessitate the formation of a corporation with a capitalization of over $1,000,000. The Crystola rights are at present held by the National Talking Machine Co., with a capitalization of $1,000,000.

NEW QUARTERS FOR TRITON CO.

The warerooms and offices of the Triton Phonograph Corporation have been removed from 41 Union square, to 137 Fifth avenue, corner of Twentieth street, New York, where larger quarters have been secured. J. A. Kraus, manager, has entirely recovered from his eight weeks' of illness, and is now feeling as well as ever.

MISTAKES SINGER FOR MACHINE

Victor Herbert Hears Amato Singing, and Offers to Buy Him at Advanced Price

Recently, Victor Herbert was giving a friend a speedy spin on Lake Placid in his motorboat, the "Natoma."

They passed near the cottage where Pasquale Amato, the Metropolitan Opera baritone, is summering. The thrilling music of the "Pagliacci" prologue rang out across the water.

Herbert stopped his engine and said to his companion: "The people in that house have the most remarkable phonograph I have ever heard. Listen to that!"

The visitor listened open-mouthed as well as open-eared. When the music came to an end, he exclaimed: "If they will sell me that instrument I will give them double what they paid!"

"Better come up and look at it first," said Herbert, "and see if you have enough money!"

Whereupon they landed and the visitor was introduced to the "phonograph," which turned out to be Amato himself.

VICTROLA FOR GRAND CHIEF RANGER

Upon the recent official visit paid to the Foresters of America in New York by C. P. Rendon, Supreme Chief Ranger, he was tentered a public reception by the Foresters Courts of Manhattan and Bronx counties at the Amsterdam Opera House, where he was presented with a handsome Victrola XVI. in mahogany. The Victrola was shipped to Mr. Rendon's home in Stockton, Cal.

TRADE-IN PROBLEMS IN ST. LOUIS

Local Talking Machine Dealers' Association Takes Action on That Matter at Its Monthly Meeting—Enjoy Country Club Dinner

St. Louis, Mo., September 7.—The Talking Machine Dealers' Association wanted something to meet for this month or they would have solved all of their problems last month. They all gathered downtown and divided up the automobile space so that there was room for each to ride to the Century Boat Club. After a splendid dinner in the roof garden, they got down to business and disposed of the always troublesome trade-in situation in such a few minutes that most of them concluded that it never had been much of a problem. At the next meeting they are going to revise the record approval rules. Here is the framework of the rules adopted, which became effective August 15:

No allowance for square pianos or old organs; old black uprights taken at not more than 15 per cent. of the price of the machine bought; cylinder or other old talking machines at not more than 10 per cent. of the original price and that must not be more than 10 per cent. of the price of the machine bought; maximum of $75 put on upright pianos was a suggestion that will be included in the rules by consent; these terms are not to conflict with previous resolution that purchasers of talking machines can within six months trade in an undamaged machine for a higher-priced one at the same store, after six months a reduction of 5 per cent. a month is to be made from the selling price with a maximum of $4 a month. All allowances must be reported to the secretary, to be card indexed for inquiry of members.

All of the allowances are to apply on record purchases, not on the purchase price of the machine.

There were present at the meeting representatives of eleven firms as follows: Messrs. Reis and Thompson, of the Smith-Reis Piano Co.; Barthel, Duesenberg and Buffe, of Barthel & Duesenberg; Silverstone and Wilson, of the Silverstone Music Co.; E. C. Rauth, of The Koerber-Brenner Music Co.; Staffelback, of Hellrung & Grimm Furniture Co.; Haenschen, of Vandervoort Music Salon; Mediary, of Stix, Baer & Fuller Drygoods Co.; Chas. Lippman, of the Field-Lippman Piano Stores; Bauer, of the Gravois Avenue Victor Shop; Lehman, of the Lehman Music Co., East St. Louis.

MAX STRASBURG PLAYS PRIZE GOLF

Talking Machine Man Captured Two First Prizes and Finished First in Another Tournament Played at Detroit Golf Club

Detroit, Mich., September 11.—Max Strasburg, the well-known talking machine dealer of this city, is a considerable golfer, as is proven by the fact that he captured two first prizes and finished fourth in another tournament on the Detroit links. Mr. Strasburg and F. L. Sattley were winners of the final round of the September specials and the fall tournament played over the links of the Detroit Golf Club. Strasburg beat H. N. Leonard by a score of five to four, the play being witnessed by a record crowd. Mr. Strasburg also won the eighteen-hole medal contest, having handicaps of thirteen or under and finished fourth in the sweepstakes with a net card of seventy-four—a record of which to be proud.

TO SUPPLY CABINETS FROM STOCK

Schloss Bros. Increase Output of Factory—Get Good Orders from the West

Schloss Bros., manufacturers of talking machine cabinets at 637 West Fifty-fifth street, New York, report that all sections of their factory are now in full operation; that the output has been materially increased, and that the company are now prepared to furnish cabinets to match all leading makes of machines from stock and without delay.

E. G. Schloss, general manager of the company, returned recently from a business trip through the West, where he found conditions thoroughly satisfactory and gathered up an excellent quantity of orders for immediate and future delivery.

DELPHEON CO. INTRODUCES ITS LINE

Bay City, Mich., September 7.—The Delpheon Co., of this city, has just placed on the market a line of machines, embodying a number of distinctive features. Chief among these is a tone control device which has been perfected after exhaustive tests and a new type of record filing system. The Delpheon machines, which play all makes of records, and are equipped with automatic stops, will be marketed through the dealers.

Jack Brennan, of the wholesale department of the Gately-Haire Co., Albany, N. Y., spent his vacation at Lake Placid.

OUTING OF BUFFALO ASSOCIATION

Talking Machine Dealers, With Their Families and Friends Spend Enjoyable Day at Ester Beach—Jobbers Provide Entertainment

BUFFALO, N. Y., September 5.—The second annual picnic of The Talking Machine Dealers' Association of Buffalo, which was held at Ester Beach, Canada, on August 30, attracted an unusual number of talking machine jobbers, dealers and their representatives, and in all ways proved one of the most successful affairs yet held. The spirit of the program, so carefully arranged and built of record titles, was carried out faithfully, and Walter J. Bruehl, of Neal, Clark & Neal, chairman of the outing committee, together with his assistants, T. A. Goold and Chas A. Heinike, were heartily congratulated for their part in planning the outing and seeing that the plans were carried out. It was a real family affair. The talking machine men brought their wives and families or their sweethearts and forgot for a day the question of approvals and other business worries.

B. E. Neal

C. N. Andrews

Bruehl and Goold
The Committee

The trip to Ester Beach was made by steamer and soon after landing at the resort an excellent luncheon was served with Neal, Clark & Neal as the hosts. The afternoon was given over to an exciting ball game, a series of plain and fancy races for ladies and gentlemen, a tug-of-war and other athletic events.

Following the field events those who cared for bathing took a plunge in the lake, while the remainder rested on the beach before sitting down to the dinner. The affair was considerably enlivened, during the dinner, through the courtesy of W. B. Andrews, who surprised the excursionists by having Mrs. Eva M. Schneider and her company, of Buffalo, entertain the diners. He also distributed booklets containing words of the latest popular songs. Dancing occupied the time after dinner and until the boat started on the return trip to Buffalo.

V. W. Moody

The "Gold Dust Twins"

The officers of the Buffalo Association are N. F. Gould, president; O. L. Neal, vice-president; W. T. Bruehl, secretary, and G. Towne, treasurer.

NAMM & SON IMPROVE STORE

New Demonstration Booths and More Floor Space Being Added to Talking Machine Department of Brooklyn Store

The talking machine department of the A. I. Namm & Son department store on Fulton street, Brooklyn, N. Y., is being extensively remodeled and improved. The department is located on a large balcony in the basement of the store, and the improvements will give it 2,500 additional feet of floor space. Eight new demonstration booths are being added to the department, making a total of eighteen in all. The department is conducted by J. J. Cavanaugh and C. J. Collins, who state that their business has increased remarkably during the past six months, and that the prospects for a fall and winter trade are even greater. J. J. Cavanaugh is the originator of the Cavanaugh cabinet, which is used in many makes of talking machines, including the Victor Victrola, and is well-known as a designer of talking machine cabinets. The Namm & Son department features a full line of Victor-Victrolas and records.

NEW GRAFONOLA IN BURL WALNUT

The Columbia Graphophone Co. has announced to its dealers that final manufacturing arrangements have been made to bring through the new burl walnut Grafonola in substantial quantities. A revised price list has been made for these new Grafonolas, and the formal list of prices, is now as follows: Style 75, in burl walnut, $80; Style 85, $90; Style 100, $110; Style 110, $120; Style 150, $175; Style 200, $225.

The Sound Reproduction Co., New York, reports an active demand for its "Maestrola" machine, which it introduced to the trade a few months ago. In addition to marketing this machine, which retails at $10, the company is also supplying the trade with a line of phonograph parts.

Single Spring Straight-Gear

IOWA EDISON DEALERS CONVENE

Entertained by Harger & Blish at a Two-Day Meeting in Des Moines—Listen to Excellent Addresses—Have General Good Time

DES MOINES, IA., September 5.—A most enthusiastic gathering of Edison dealers and their wives from all sections of Iowa was held in this city last week, where the visitors were entertained by Harger & Blish, the State distributors for the Edison phonographs and records. In addition to the dealers several Edison jobbers from other sections of the West, including L. H. Lucker, of Minneapolis; Mark Silverstone, of St. Louis, and M. M. Blackman, of Kansas City, were present.

The business sessions occupied two days with the address of welcome being made by Acting Mayor Thomas Fairweather. Following Mr. Fairweather's address the dealers listened to a personal message from Thomas A. Edison delivered by Edward C. Boykin, editor of Diamond Points. Among the addresses made during the sessions were the following: "Should the Dealer Advertise and How?" by George C. Silzer, of the Harger & Blish Co.; "Factory Conditions as I Found Them," by George S. Schultz, of Schultz Bros., Omaha; "How to Handle Competitive Sales," by L. H. Lucker, Minneapolis; "Edison Selling Experience," Mark Silverstone, St. Louis; "Dollars and Sense in Tone Tests," by B. M. Joy, of Fort Dodge; "A Million Dollar Hold on the Human Heart, or How We Increased Our Business 425 Per Cent. in July," by M. M. Blackman, Kansas City; "Our July Drive and How It Produced Sales," by M. C. Coburn, of Fort Dodge; "Putting Personality Into Salesmanship," by C. E. Goodwin, Chicago; "Edison Week and Its Importance," H. H. Blish, Des Moines, and "Outlook for the Future," by Edward C. Boykin.

The entertainment features provided for those who attended the convention were varied and included a visit to the Iowa State Fair, luncheon at the Chamber of Commerce, a banquet at the Grant Club on the final evening, a showing of the picture "The Voice of the Violin," and tone tests by Marie Kaiser and Harold Lyman.

The dealers who attended the sessions included: C. C. Ankeny, Corning, Ia.; G. U. Silzer, Sious City, Ia.; J. A. Mathews, Hedrick, Ia.; J. W. Swift, Sioux Falls, S. D.; Dr. Pringar, Bagley, Ia.; E. M. Van Tassell, Winthrop, Ia.; A. D. Smith, New Hampton, Ia.; H. W. Luegering, Fort Madison, Ia.; H. E. Beam, Anamosa, Ia.; W. I. Nelson, Cherokee, Ia.; Charles K. PACIFIC COAST TRADE IN EXCELLENT CONDITION

Flood of New Machines Has Little Permanent Effect on Market—Elaborate Recital Department for Wiley B. Allen Co.—New Reproducer to Be Marketed—The Pathephone in Sacramento—Some Items of Personal Interest—New Owner for Eilers' Department

San Francisco, Cal., August 28.—The summer talking machine business on the Pacific Coast has held up fairly well, but the business this year has been divided among almost twice as many dealers as last year and as a rule individual merchants have not been able to make spectacular showings, except those in the wholesale end of the game. The record sales have been exceptional and almost all the time the jobbers have been behind on deliveries, which condition is due to the inability of the factories to supply stock promptly. This month the talking machine and record business improved greatly, the improvement being most noticeable in the action on the higher priced machines. The small novelty talking machines had quite a run, and are still selling well, but there does not appear to be quite as much enthusiasm as early in the season. The new machines introduced on the Coast have been encouragingly received, yet with the exception of two or three of the better makes, no special success is evident. It is the opinion of leading San Francisco dealers that the new makes will speedily sift down to a few of the best and that the rest will gradually disappear from the market. Indeed, it would seem impossible that the market could absorb all that is being offered now. Talking machine departments in the department stores and furniture houses are meeting with considerable success in response to heavy advertising and progressive merchandising. These departments have had the salubrious effect of keeping all the dealers in fighting condition.

Wiley B. Allen Co. Adds Recital Department

The Wiley B. Allen Co. is the latest San Francisco concern to favor the recital method of stimulating business. Having decided to give recitals, the company has taken no half-way measures, but is preparing to inaugurate the first of September a series of high-class talking machine and player-piano concerts which will embody every feature proven to be of strong appeal. Mrs. G. Norris, formerly recital manager for the Edison Shop, and a well-known organizer of musical entertainments, has charge of the new departure of the Wiley B. Allen Co. and she has already engaged a harpist and violinist for accompanying vocalists. It is planned to have daily concerts during the noon hour and early afternoon. Special publicity will be given the enterprise and the large recital hall on the first floor of the building will be used.

Clark Wise Interested in New Reproducer

Clark Wise, the well-known piano merchant who has a live talking machine department in his Geary street store, is about to enlarge his scope of personal activity in connection with the talking machine industry. He has associated himself with a local inventor who has just had patented a new sound box for phonographs. This sound box, according to those who have heard it, eliminates almost completely every vestige of objectionable sound in playing a record. Mr. Wise will leave shortly for the East to interest manufacturers in the invention and arrange for its marketing.

A. W. White, manager of the talking machine department of the Emporium, says business picked up nicely in August and that the better class of machines are now selling more rapidly. Supplies of Tungs-Tone needles are coming in now and that helps Victor business quite a lot.

Miss Cramer, the engaging and energetic assistant manager of the Emporium talking machine department, has returned from a very pleasant vacation spent in the wilds of Lake County.

Recital Hall in Edison Shop Now Ready

The alterations in the pretty little recital hall of the Edison Shop have now been completed and experiments have shown that the acoustics have been wonderfully improved thereby. The weekly recitals were resumed last Saturday, and the opening recital attracted a very interested crowd. Mrs. Josephine Edwards now has charge of the recital arrangements.

New Use for Talking Machines

A new manufacturing company which will furnish moving picture theatres with musical programs has been opened at 585 Mission street, and this concern will do business under the name of the Magnavox Phono-Player Co. The instrument manufactured is phonographic with a sound-intensifying attachment.

Home from Bohemian Club "Jinks"

Andrew McCarthy, manager of the Sherman, Clay & Co. talking machine interests, has returned from the annual "jinks" of the Bohemian Club at Bohemian Grove. He was accompanied to the jinks this year by Philip T. Clay, Ernest Urchs, of Steinway & Sons, and C. Arthur Longwell, of the Aeolian Co.

F. B. Long Gets Pathephone in Sacramento

Frank B. Long, the inventor of the Melodigrand piano, and who has music stores in Sacramento and Los Angeles, has taken the exclusive agency for the Pathephone in Sacramento, and he will also sell the Pathephone machines in his Los Angeles store. The Pathephone Co. is to have an attractive exhibit at the California State Fair to be held in Sacramento the first week in September and Mr. Long will be in charge of the exhibit.

Some Personal Items

H. V. Burgee, sales manager for the Pathephone Co. in this territory, has returned from a trip over the Coast territory. He arranged for an exclusive Pathephone agency with the Peterson Music Co., of Stockton.

Miss Eleonora de Cisneros, the famous diva who is an exclusive Pathé artist, paid a visit to the local Pathephone Shop while here recently on a concert tour. The shop is now being adorned with framed portraits of all their leading artists.

F. A. Dennison, Pacific Coast manager for the Columbia Graphophone, has returned from

F. A. Dennison and Junior

a trip to the branches in the Northwest. He found business in Seattle especially brisk.

H. R. Biesen is a new salesman traveling from the Spokane office of the Columbia Co. He is taking the place temporarily vacated by D. A. Maurier, the soldier-boy Columbian who is now shedding vast quantities of perspiration for his country as a member of the National Guard on the Mexican border.

A Columbia record which has just been honored by being made a "special" is "You're a Dangerous Girl," sung by Al Jolson, of Oakland, a local celebrity, who has made a great hit as a singer in vaudeville recently.

C. A. Adou, representing the Emerson records, has opened an office in Room 655, Monadnock Building, on Market street, San Francisco. He will make this his headquarters for his Coast territory.

The Oakland Phonograph Co. has enjoyed a splendid Edison business since B. F. Goldsmith was taken in as partner last month. Mr. Goldsmith was formerly with the Wiley B. Allen Co. in Oakland.

O. N. Kruschke, of the Pacific Phonograph Co., has left on a trip over the Northwest.

Takes Over Eilers' Department

The Eilers talking machine department has been taken over by F. A. Levy, a partner in the business, and associated parties. The department will be run as a separate organization at the same quarters on the first floor of the Eilers Music House. Gus Eilers, the chief owner, has sold out his interest and bought out the Eilers talking machine department at Spokane, Wash., where he has gone to take charge. No material changes will be made in the conduct of the department taken over by Mr. Levy in San Francisco.

New Pathephone Publicity

The Pathephone has just adopted a novel method of publicity work which no doubt will attract lots of comment. The company is to put out Red Rooster road signs on individual posts at intervals on all the main highways of State.

FIT ANY CABINET, VERTICAL OR HORIZONTAL FILING.

VISITING TRADE IN THE EAST

Howard C. Hobbs Tells of Demand for Panel for Talking Machine Cabinets, and for the Cabinets Themselves at the Present Time

A recent visitor to the Eastern markets was Howard C. Hobbs, vice-president of the Indiana Veneer and Panel Co., and the Hoosier Panel Co., of New Albany, Ind., which concerns, at the present time are supplying completed cabinets and also veneered stock for a number of prominent talking machine manufacturers.

Mr. Hobbs reported an unusually strong demand for talking machine cabinets as well as for rough lumber and semi-finished dimension stock for building same which has kept the New Albany factories steadily employed. A new plant over six hundred feet long and thoroughly modern in construction and equipment, was opened in July, however, with the result that the facilities of the companies have been materially increased in connection with this particular field.

"We are very careful about the orders we take in," said Mr. Hobbs, "with a view to giving the customer what he requires. We don't fill straight mail orders, but must first have specifications furnished so that we may know that what is ordered is what is required for that particular work."

In addition to spending some time in New York Mr. Hobbs also visited Philadelphia and Boston, as well as some suburban points for the purpose of calling on manufacturers.

"EDISON MANIKINS" IN BUFFALO

John G. Schuler Makes Excellent Window Feature With Dancers as Attraction

BUFFALO, N. Y., September 5.—John G. Schuler, who handles the Edison line at 1394 Main street, got some excellent advertising recently out of the appearance of a pair of dancing automatons in the show window of his store. As a matter of fact, one of the figures was really alive, being a man named Edward Shannon, who makes a specialty of appearing as a wax figure. His partner was a dummy. Of course, the music was supplied by the Edison Diamond Disc phonograph, and the crowds divided interest between the music and speculation regarding whether or not the dancers were alive. The feature was well advertised as "The Edison Manikins."

NEW UNIVERSAL OUTFIT READY

Arrow Motor Co. Perfects Universal Tone-Arm and Sound Box Outfit—Result of Careful Experimenting—New Motor Also Announced

After some months of careful experimenting the Arrow Motor Co., of 207 Market street, Newark, N. J., have finally perfected their universal tone-arm and sound box outfit and are prepared to meet demands for that specialty.

In chatting about the new outfit, Henry M. Grosman, speaking for the Arrow Co., said: "This combination has no faults, but some unusually excellent qualities. It is well-plated, acoustically correct and built along scientific lines to such perfection that its great advantages will be appreciated by everyone in the trade. We realized that what the trade wanted was a tone-arm and sound box that would be built 'up to standard' and not 'down to a price,' and for that reason have gone ahead and constructed a product that will be widely appreciated and fill a long-felt want.

"Our facilities are such that we are enabled to make prompt shipment deliveries at the rate of 2,000 per week, but if present indications are any criterion we will be delivering up to capacity within a very short time. We are also pleased to announce a new single spring, worm-gear motor, but in view of present contracts cannot promise delivery before thirty days from date of order."

The Big Money Is In Phonograph Records

Everyone who buys a phonograph soon has many times the value of the machine in records.

So, if you sell records whether you keep phonographs or not—you have a field that is always calling for work.

The Biggest Money Is In MAJESTIC RECORDS

Entirely New Seven Inch Retail at

25¢

Vertical Cut Double Disc Sensational Value

RESULTS

MAJESTIC RECORDS sell with greater ease than any other record now on the market.

MAJESTIC QUALITY in records means that they stand comparison with the best in tone, sound and volume.

MAJESTIC RECORD material will out-play and out-wear any record.

MAJESTIC RECORDS strike the happy medium, *i. e.*, a popular price for quality music.

MAJESTIC RECORDS encourage record buying and multiply record profits for the retailer.

MAJESTIC RECORDS play as long as most 10-inch records.

Large Quantities Ready for Immediate Delivery
30 New Titles Each Month

The Majestic Catalogue embraces all that is best in the world's musical literature—Vocal and Instrumental—Classical, Secular and Sacred—and the popular hits of the day.

While other Manufacturers take MONTHS to release a new number—we take WEEKS.

Quick service—big sales—liberal profits and rapid turnovers are some of the Majestic features.

The Majestic Adaptor

is a universal attachment which, by a simple turn of the sound box, enables you to play *any style record.*

INTERESTING BUSINESS FORECAST

Otto Heineman Declares That Situation in America Is Same as That in Europe Some Years Ago—Heavy Output of Machines Being Absorbed—Future Demand for Better Grades—Remarkable Era of Prosperity

An interesting business forecast for 1917 was recently given to The World by Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York. Mr. Heineman has been associated with the talking machine for fifteen years, having been managing director of the Lindstrom companies of Europe, which had an annual output of 700,000 machines and 40,000,000 records. Mr. Heineman's views are, therefore, based on a careful observation of the talking machine field, and reflect his many years of training and experience.

"The talking machine industry in America at

Otto Heineman

the present moment bears a marked similarity to the conditions which existed in Europe a few years ago," said Mr. Heinemen. "At that time a number of important patents expired, and immediately thereafter a large number of concerns, some of them well known and other smaller companies, started manufacturing machines and records. This brought about renewed activity in the talking machine industry in Europe, and not only did the leading manufacturers fail to suffer from this influx of new companies, but on the contrary, they benefited considerably from this greatly increased demand.

"Conditions in America just now are almost analogous to those that existed in Europe. During the past year or so quite a number of concerns have entered the talking machine field in this country, but the leading manufacturers still continue to increase their sales totals month after month, and are closing a greater business than they have ever done in the past.

"The new companies are also doing a very large volume of business, and the buying power of the American public is so vast and tremendous that there is plenty of business for all the talking machine manufacturers who conduct their affairs along sound, profitable lines and give their dealers and the public quality and value for the money expended.

"In my opinion the great proportion of the talking machine business to be consummated in 1917 will consist of the better class of machines. I believe that quite a few concerns who are now catering to only the very cheap class of trade will find their production seriously curtailed during the coming year and eventually will either be obliged to make better machines or retire from the field altogether. The public is asking for a machine that is well finished and well equipped, and quality must be apparent before they will purchase an instrument for their homes.

"The talking machine has become an absolute necessity. Its incalculable value from an educational standpoint has been the subject of extensive comment in the leading newspapers and magazines, and as time goes on the true value of the talking machine is being recognized by every factor of our modern life.

"The demand for talking machines in 1917 is certain to be far and beyond that of any other previous year. The country is enjoying a remarkable era of prosperity, and there is no doubt but that the American public can and will absorb in 1917 a volume of machines that cannot be actually figured or even predicted at this writing."

CHANGES IN BRUNSWICK DEAL

Pathé Frères Phonograph Co. Will Make and Market All Pathephones—Brunswick-Balke-Collender Co. to Market Own Machines

E. A. Widmann, president of the Pathé Frères Phonograph Co., New York, announced last week that negotiations had been consummated by his company and the Brunswick-Balke-Collender Co., whereby the Pathé Frères Phonograph Co. will manufacture and market all Pathephones, and that the Brunswick-Balke-Collender Co. will neither make or sell these machines.

It is understood that the Brunswick-Balke-Collender Co. will manufacture and market its own machines under its own name.

SONORA CO. TAKES LEASE

The Sonora Phonograph Co. of New York city, has leased premises at 1311 Walnut street, Philadelphia, Pa., and will make extensive alterations and improvements there before occupying the same.

DISPLAY IN NEW YORK WAREROOMS

The Brunswick-Balke-Collender Co. has arranged to carry a complete line of Brunswick machines in its New York warerooms, 31 West Thirty-second street. A number of booths are now being constructed, and in addition to the Brunswick line, Pathé records will also be featured.

TWO NEW INCORPORATIONS

The Sonata Phonograph Co., of Cleveland, O., was recently granted a certificate of incorporation for the purpose of manufacturing and selling talking machines and accessories. The capitalization of the concern is $10,000, the principal incorporator being William H. Marlatt.

A certificate of incorporation was issued by the Secretary of State at Albany last week to the Brooklyn Vitaphone Co., which will deal in talking machines and records. The capitalization of the new concern is $50,000, the incorporators being A. F. Danilson, J. H. Weinborg and M. A. Sprague, of Brooklyn.

A Victor talking machine department has been installed in the department store of the McAlpin Co., Cincinnati, O. It will be conducted by the Musical Instrument Sales Co.

UNIVERSAL BALL-BEARING

TONE-ARM

(Tone-Arm of Refinement)

The only tone-arm on the market absolutely void of any tone obstruction.

F. C. KENT COMPANY

24 Scott St., NEWARK, N. J.

Have you been disappointed in the phonographs you have investigated? Most phonographs you hear—like most people you meet—are mediocre, in so far as they fail to impress one. For a brief time you are conscious of listening to the reproduction of sound more or less natural.

Then you hear a *real* phonograph—the compelling kind—that forces you, by its charming naturalness of tone and beautiful appearance, to sit up and take notice.

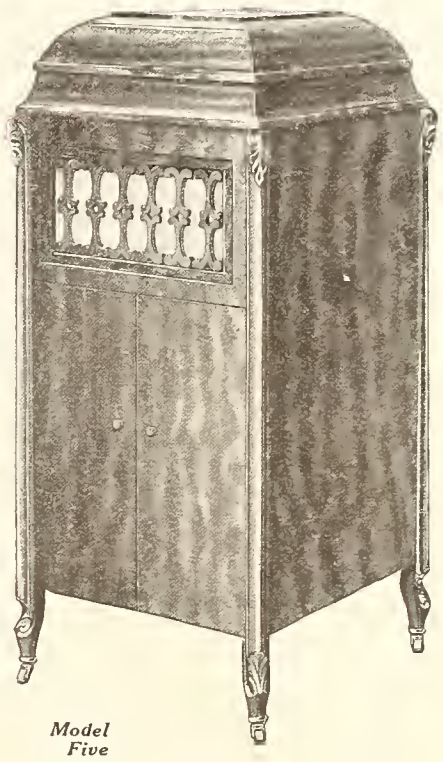
A phonograph that has

PERSONALITY

a something apart from the commonplace. You listen, you are curious, interested, then enthused. Such a phonograph is the

STRADIVARA

"KNOWN FOR TONE"



Model Five

You realize that to build up a permanently profitable phonograph business you must secure the agency for a *really artistic* instrument; one that is produced by tone scientists as well as master cabinet builders; one that sells quickly, stays sold, and helps sell others. THE STRADIVARA is *different* in a dozen different ways. The secret of its charmingly different and superior *TONE* lies in the fact that it is the only phonograph that contains a sound-board like those world-old instruments the piano and violin. Furthermore, the Stradivara is built in a factory that for years has been devoted to the production of high-grade pianofortes.

You cannot afford to decide on any phonograph agency without first investigating

IOWA VICTOR DEALERS ORGANIZE

Form State Association at Meeting Held in Des Moines—To Discuss and Act on Various Trade Problems—Officers Elected

DES MOINES, IA., September 11.—The Iowa Association of Victor Talking Machine Dealers was organized last week at a meeting attended by about eighty Victor dealers from all parts of the State, and held at the Chamberlain Hotel, this city. The meeting was brought about largely through the efforts of Geo. E. Mickel, president of the Mickel Bros. Co., Victor distributors of this city and an ex-president of The National Association of Talking Machine Jobbers. The business meeting was followed by a banquet at the Hotel Chamberlain in the evening.

Banquet of the Victor Dealers of Iowa Held at the Hotel Chamberlain, Des Moines

It is the intention of the association to discuss and regulate the various problems of the trade such as sending out of records on approval, allowance on trade-ins and other important matters.

The officers elected for the first year were: P. G. Spitz, Waterloo, president; H. Stokes, Grinnell, vice-president; D. C. Phillips, Indianola, treasurer, and B. Van Stagt, Des Moines, secretary.

FORSAKES MUSIC FOR LAW

LOS ANGELES, CAL., August 30.—Fred E. Peterson who has been with the Southern California Music Co. of this city for the past fifteen years, has resigned. Mr. Peterson was treasurer and general manager of the firm at the time of his resignation. He will practice law in this city, having been admitted to the bar of this State four years ago. His offices will be located in the Story Building.

Mr. Peterson was very partial to the talking machine and always claimed that there were unlimited possibilities in that field. His many friends, both colleagues and competitors, extend their best wishes to him in his new calling

The store of E. A. Schweiger at 1525 Broadlyn, has been entirely remodeled and redecorated in preparation for the heavy fall business which is in sight.

NEW STORE FOR COLUMBIA CO.

New Orleans Store Will Be Located in the Gumbel Building After October 1

NEW ORLEANS, LA., September 11.—The Columbia Graphophone Co., located at 933 Canal street, has given up its lease on the premises there, and after the first of October will occupy new headquarters in the Gumbel Building on Canal street. The store will discontinue its present retail business and will do a wholesale trade exclusively. The present store has been leased by the J. P. Simmons Piano Co., which is now occupying quarters at 126 Caronndelet street. After extensive alterations are made, the Simmons firm will occupy the same with a full line of pianos and talking machines.

CLOSE IMPORTANT DEALS

Booths Being Erected for Sonora Corporation and Brunswick-Balke-Collender Co. by Van Veen & Co.

A. L. Van Veen, president of A. L. Van Veen & Co., New York, manufacturers of demonstration booths, stated this week that the company had closed a number of important deals the past fortnight, including a large contract with the Sonora Phonograph Corporation, 57 Reade street, New York. This contract calls for the installation of a very handsome decorative store interior, including several large booths, which are being made to special order. They will be exceptionally artistic and attractive. This is the second installation which Van Veen & Co. have handled for the Sonora Phonograph Corporation.

Another recent deal closed by Van Veen & Co. was the contract given by the Brunswick-Balke-Collender Co. for the construction of new booths in their New York warerooms, 31 West Thirty-second street. These and numerous other orders received from different parts of the country are keeping their plant rushed.

—At Last!

A phonograph that competes with the best machines on the market.

THE DELPHEON

"The phonograph with an individuality"

It sells because it is better.

ANNUAL OUTING OF SCHLOSS BROS.

Employes of Cabinet Manufacturers Spend Thoroughly Enjoyable Day at Coney Island

The first annual outing of the officials and employes of Schloss Bros., manufacturers of talking machine cabinets and furniture novelties, of 635 West Fifty-fifth street, New York, was held on August 26, at Coney Island, and proved a great success. The department heads and the men left the factory at 11 o'clock in large sight-seeing automobiles and arrived at the Island just in time to partake of a large and well selected shore dinner, which occupied a good part of the afternoon, and during the course of which a number of speeches were made.

Edwin G. Schloss, general manager of the company, thanked the men for the loyalty they have shown during the past year, and spoke at some length on the value of co-operation. The latter part of the afternoon was spent on a trip through Steeplechase Park, where a chance was taken on everything in sight. The party returned to New York in the wee sma' hours, tired but happy. A great deal of the credit is due to John Seminara, superintendent of the factory, who so ably arranged and conducted the affair.

Schloss Bros. Employes Enjoying Dinner at Outing

JOINS CHAMBER OF COMMERCE

National Association of Talking Machine Jobbers Affiliates with United States Chamber—J. N. Blackman Appointed Representative

The National Association of Talking Machine Jobbers has become a member of the United States Chamber of Commerce. J. N. Blackman, president of the Blackman Talking Machine Co., New York, Victor distributor, has been appointed the association's official representative in this connection and will attend the various meetings and deliberations of the United States Chamber of Commerce.

CONSOLIDATION OF TWO FIRMS

The Talking Doll Co. and the Novelty Co., of New York City, have been consolidated, and a certificate of incorporation was issued last week by the Secretary of State at Albany, N. Y., to the consolidated concern, which will be known as the Talking Toys Corporation. The capitalization of the new firm is $1,500,000, the incorporators being S. Kauffman, R. C. Birkhahn and W. Rotter, of New York City. The firm will deal in talking dolls, toys and novelties.

INTRODUCE NEW SOUND BOX

The Waterbury Instrument Co., Waterbury, Conn., has just placed on the market a sound-box with a diamond point named the "Supersonus," for playing hill-and-dale records on lateral cut machines. This sound-box embodies a number of novel features, and is presented to talking-machine owners after having been carefully tested for quite some time.

Harold C. Tribble, in charge of the talking machine department of the C. C. Harvey Piano Co., of Brockton, Mass., was married last week to Miss Ethel M. MacPheters.

EXCLUSIVE AGENCY RULING

Canadian Court Upholds Contract Providing for Exclusive Handling of One Line

The Berliner Gram-o-phone Co., Ltd., Montreal, which is the Canadian connection of the Victor Talking Machine Co., recently secured an interesting decree from the Supreme Court of Regina, Sask., in a case against W. G. F. Scythes & Co., a retailer. The case involved a contract which provided that the dealer should not handle any competing line of talking machines. The retail store violated the agreement, and defended its action on the ground that the contract was in restraint of trade. The court held, however, that the restriction was proper, inasmuch as the Gram-o-phone Co. was advertising the store as a place where its goods might be had. In the words of Judge Lamont:

"The restriction imposed by it [i. e., the exclusive agency contract] is, to my mind, a very reasonable one, and one calculated to secure for the plaintiff benefits resulting from the advertising done by them."

McMENIMEN LEAVES FOR THE WEST

H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., New York, left Monday for a week's trip through the Middle West. He is planning to visit Pathé jobbers throughout this territory, and judging from the reports his company has received he will find plenty of optimism along his route.

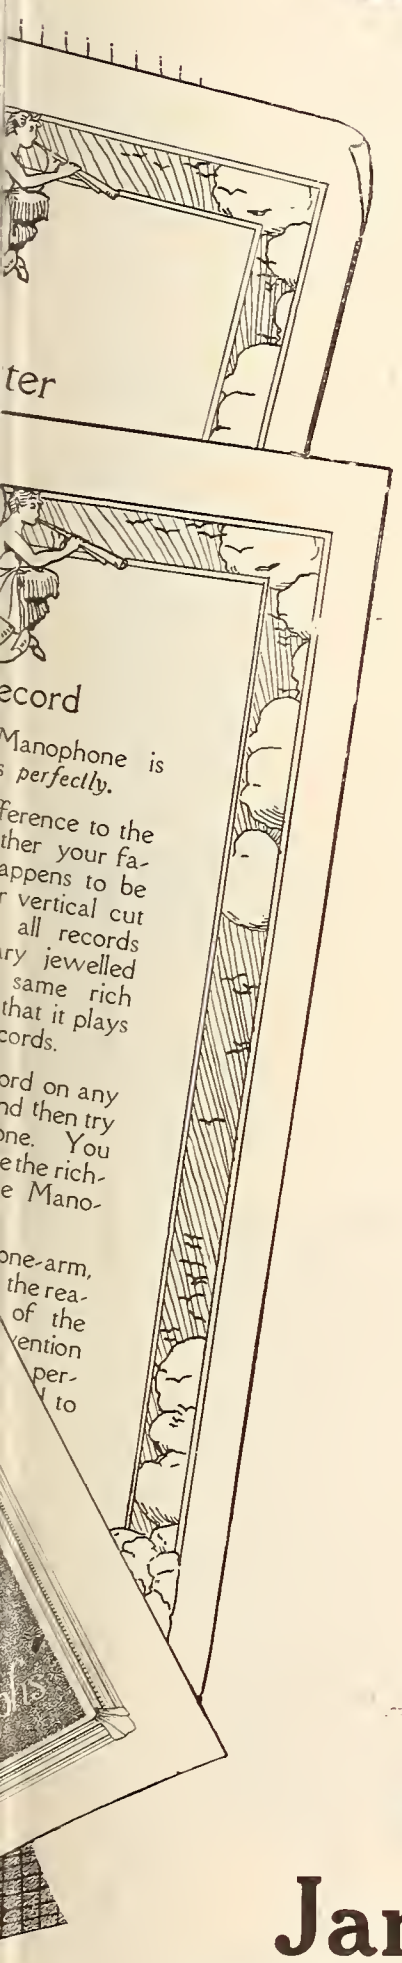
voice. And while
The Manophone
The Music

...nother phonograph" —a Better One!



The Manophone is a *better* phonograph—not simply because *we* say so, but because it possesses a silvery, mellow tone all its own.

And in a phonograph—*the tone's the thing!*

The Manophone

—at last completed, ready to play, represents the lifework of artists and scientists.

It took years to perfect the tone—but when you hear the Manophone play, *you* will say that the wait was worth while.

The Manophone is different because it's *better*; and better because it's *different.*

Miss Lucille Lawrence, the famous American Prima Donna, said of the Manophone: "*** it preserves the sweetness and quality of tone, reproducing it with a charm beyond expression."

Not Just the Ordinary Dealer Proposition —a Better Dealer Proposition!

The Manophone Book (a few pages and cover shown here in reduced form) tells the story of the Manophone clearly and concisely. Rip off and send in the Coupon for it—and for data concerning dealer rights, prices, discounts, publicity, dealer helps, etc.

Your store can be the salesroom for the Manophone, if you will act promptly. Territory is now to be had by quality dealers and distributors.

Made in five styles—"there's a Manophone for every home."

Mail the Coupon NOW for details of a BETTER dealer proposition—in YOUR interest.

EFFICIENCY IN THE ARRANGEMENT OF WAREROOMS

The talking-machine dealer with comparatively limited space at his disposal is often at a loss just how to arrange his warerooms in order to secure maximum efficiency without sacrificing attractiveness. The photograph shown herewith may assist some of these dealers in solving this important problem.

This illustration shows a corner of the Grafonola department of the Will A. Watkin Co., of Dallas, Tex. The diagram explains itself, although it is only fair to the company to state that this store efficiency is further enhanced by the energetic use of newspaper cuts, movie slides, car cards and hangers.

LOOKING FOR BIG FALL BUSINESS

K. Nicholson Furniture Co., Featuring Record Cabinets, Bookcases and Ladies' Desks

The K. Nicholson Furniture Co., manufacturer of sectional bookcases and other specialties, Chase City, Va., reports that the plant is running at full blast at the present time and is an indication of a very strong fall business. In addition to record cabinets the company also manufactures an attractive line of bookcases and ladies' desks, for all of which there is an excellent demand.

PLENTY OF MUSIC FOR THE TROOPS

The San Antonio Talking Machine Co., San Antonio, Tex., Victor dealer, tells us that while the United States troops may be short of food munitions, they certainly are well supplied with music, for practically every company now in Mexico has taken its Victrola with them. One of the most popular records on the border is the Victor record No. 17,599, "They're on Their Way to Mexico."

The Old Colony Piano Co., of 12 Main street, Brockton, Mass., will add a talking machine department, according to an announcement made by manager J. Frank Beal.

CABINET SUPREMACY

HEINEMAN EMPLOYES ENJOY FIRST ANNUAL OUTING

Automobile Trip to Brighton Beach and Dinner at the Shelburne Among the Features of the Day—"Heineman Daily News" Makes a Great Hit

The officers and employes of the Otto Heineman Phonograph Supply Co., Inc., New York, held their first annual outing and dinner last Friday at the Hotel Shelburne, Brighton Beach, New York. The Heineman party was conveyed by automobile to the hotel, and did ample justice to the efforts of the Shelburne chef.

Otto Heineman, president of the company, was one of the leading figures in the day's festivities and presided as toastmaster during the course of the dinner. After a brief speech of welcome, Mr. Heineman called upon a number of the guests for a few remarks, and was surprised to receive as a gift from his staff a diamond-studded gold watch.

After the dinner was over the "motor of quality" party adjourned to the hotel's ballroom, where the latest dancing steps formed the feature of the program until early Saturday morning.

One of the most interesting events of the Heineman outing was the distribution of a four-page newspaper entitled "The Heineman Daily News," and dated September 8, 1925. This paper, which was compiled by Paul L. Baerwald, Eastern sales manager of the company, and Miss Freida Aufrichtig, treasurer, was a very unique publication and contained a wealth of personal news, together with some timely business articles.

The leading article in this newspaper was headed "Great Celebration in Heinemanville," and the text of the article presented an account of the opening of a new twenty-story factory building which had been erected to take care of the enormous demand for Heineman motors that had reached the amazing output of $100,000 daily. The population of Heinemanville was placed at 20,000, and Mr. Heineman in dedicating the new building called attention to an article which appeared in The Talking Machine World in 1915, wherein he briefly mentioned the aims and purposes of the Otto Heineman Phonograph Supply Co., and made predictions which were fully verified a few years later.

Under the column "Heinemanville Society News" quite a number of personal items appeared, corresponding to similar columns in our suburban newspapers. The news section of the "Heineman Daily News" referred to the visit to New York of W. C. Strong, factory manager of Otto Heineman Phonograph Supply Co., and other recent happenings in the Heineman sales family.

Among those present at the outing were Otto Heineman, Adolph Heineman, Paul L. Baerwald, C. F. Rubsam, W. C. Strong, Mr. Schechter, Irving Ostrov, Walter Roll, H. Weinberg, and the Messrs. Brandt, Altman, Pott, Stange, Indig, Brenner and Haug; Mrs. Otto Heineman, Mrs. Adolph Heineman, Mrs. C. F. Rubsam, Mrs. Vogelhut, Mrs. W. C. Strong, Mrs. Schechter, Mrs. Ella Leow, Miss Freida Aufrichtig, Mrs. Mabel Hunte, Mrs. Florence Brenner and the Misses Schmidt, Rayer, Stange, Schumacher, Hoffberg, Levy and Sullivan.

THE GEO. A. LONG CABINET COMPANY

HANOVER, PA.

MAKES GOOD ADVERTISING TEXT

Chicago Agency Uses Section of L. F. Geissler's Speech to Emphasize Success of Victor Co. Policy in Keeping Demand Ahead of Supply—An Example for Other Concerns

So strongly was the Reincke-Ellis Co., advertising agents, Chicago impressed with the speech of L. F. Geissler, general manager of the Victor Talking Machine Co, at the Jobbers' Convention last July, and especially that section of Mr. Geissler's speech outlining the advertising policy of the Victor Co. as being intended to keep the demand far in advance of the supply, that they have prepared and sent out to their clients and prospects a special circular containing an extract from Mr. Geissler's speech and with the following comments: "No one questions the policy of the Victor Co. Everyone agrees this policy made it what it is to-day—one of the soundest institutions in the country. Should we not emulate a policy which has for years kept the demand far in advance of the supply?

"Therefore—now that business is good all of us making money—let us not be satisfied, but prepare for 1917 by spending some of our profits now to insure more for 1917."

OPEN MANY LARGE ACCOUNTS

"During the past few weeks, we have opened quite a number of large accounts in New York City and the metropolitan district," said P. M. Bouton, manager of the W. R. Anderson Co, New York, factory distributor for Domino records. "We refer to these local accounts as they indicate that Domino records are fast getting a foot-hold in all sections of the country. Our dealers tell us that their sales of Domino records are increasing steadily, and that the average purchaser of 35-cent records purchases from $2 to $5 worth at a time, seemingly appreciating the fact that these records represent desirable recordings at a reasonable price. Our sales staff is now organized and in smooth working order.

"We have now in course of preparation an elaborate series of dealer helps which will augment the service we have been giving our representatives the past few months. Window hangers, store-cards, advertising electros, etc., will be included in this publicity matter, all of which we feel sure can be used by the dealer to good advantage."

The Tru-Tone Phonograph Co., Inc., has been chartered under the laws of New York with a capital stock of $1,000,000 to manufacture and deal in phonographs and apparatus.

AN INTERESTING ISSUE

The Columbia Graphophone Co. is calling the attention of its dealers to the diversity and character of the selections featured in the October supplement. This supplement was prepared with special care, as the Columbia Co. realized that the dealers look forward to the October list as the actual commencement of the fall season in record production. This supplement contains baritone solos, colorature solos, violin solos, quartet selections, symphonic numbers, 'cello solos, popular hits, dance music, ballet music, trio selections, bass solos, contralto solos, comedy selections, chorus numbers, drum and piano duets, orchestral novelties and patriotic music. The artists featured in this supplement include Pablo Casals, Kathleen Parlow, Johannes Sembach, Margaret Keyes, Maggie Teyte, and many others.

"Maps" are included in Pearsall Service

REPORTS GOOD TRADE IN SOUTH

Head of Parker-Gardner Co., of Charlotte, N. C., Visits New York Talking Machine Co.

Among the visitors this week to the offices of the New York Talking Machine Co., New York, Victor distributor, was Mr. Parker, head of the Parker-Gardner Co., Charlotte, N. C., one of the leading furniture houses in the South which handles the Victor line exclusively. Mr. Parker spoke very optimistically of business conditions in his territory, stating that their 1916 sales were far in advance of expectations with every indication of this fall being a banner season.

JULIUS KELLER PLACED IN CHARGE

Jas. Frazee, New York, manufacturer of mica diaphragms, announced this week that Julius Keller had been placed in charge of the entire plant and had also been made head of the experimental laboratory. Mr. Keller is well known among mica experts in this country, and has made a study of the diaphragm, which has aided him considerably in his work.

Julius Keller

Under his direction the Frazee plant is being steadily enlarged so that it is now in a better position to take care of the needs of talking machine manufacturers than it has ever been in the past. "Crystal Edge" mica diaphragms, which are manufactured at the Frezee plant, are being used extensively by manufacturers throughout the country, who are well pleased with the service these diaphragms are rendering.

OLIVER HEADS PRESS COMMITTEE

Fred P. Oliver, vice-president of the Blackman Talking Machine Co., New York, has been appointed chairman of the press committee of the National Association of Talking Machine Jobbers. Mr. Oliver is well qualified to fill this important post, and has already started activities in the association's behalf. J. N. Blackman, president of the Blackman Talking Machine Co., has been reappointed a member of the legislative committee, and will continue his work to further the interests of the Stephens bill.

THE UNITED PHONOGRAPHS CORP.

SHEBOYGAN, WIS., September 8.—Arrangements are being completed for reorganizing the talking machine division of the Lakeside Craft Shop, of this city, into a new firm to be known as the United Phonographs Corporation. The new concern will be in the direct charge of J. G. Osborne.

NEW PLANT FOR J. B. OGDEN

Arranges to Manufacture Cabinets in Lynchburg, Va., to Avoid Delays

Owing to the frequent difficulty in securing prompt shipments from furniture factories making cabinets under contract, J. B. Ogden, manufacturer of the Ogden Sectional Record Cabinet and Dales System, Lynchburg, Va., has arranged for the establishment of a complete cabinet plant in that city, which is expected to be in operation at an early date. Mr. Ogden reports a heavy demand for his sectional filing system, and is at present shipping two new models that are proving very popular, owing to the improvements contained therein.

NUMERICAL COLUMBIA CATALOG

The Columbia Graphophone Co., New York, has just issued its regular numerical catalog of Columbia disc records, containing a list of all selections issued up to and including June, 1916. It is prepared for the use and convenience of Columbia dealers only, and will help Columbia representatives considerably in selling, stocking and ordering records. The records in this catalog are indexed in series, being arranged in consecutive numerical order.

Men who succeed are not magicians, but they have a capacity for hard work. If causes are created, effects must come.

KIPP CO. EMPLOYES ENJOY PICNIC

Edison Distributors in Indianapolis Hosts of Their Staff on Recent Outing

INDIANAPOLIS, IND., September 2.—When the weather reached the boiling point here, Walter E. Kipp, president of the Kipp Phonograph Co.,

Group of Kipp Co. Employes

declared Friday, August 25, a holiday and invited all the employes and their families to frolic in Germania Park. The employes included those in the wholesale department and those in the retail department in the Edison Shop.

Of course, there was music furnished by an Edison machine which came in handy for dancing. Then there were games and plenty of eats. The biggest surprise of the day came when a ball team of five men from the wholesale end defeated a team of seven retail men.

CANADIAN EDISON DEALERS MEET

First Convention of Edison Dealers in the Dominion Held in Toronto on September 5 and 6, Upon Invitation of the R. S. Williams' Sons Co.—Interesting Program Carried Out

TORONTO, ONT., September 7.—A tone test recital was a fitting climax to the opening day's proceedings of the "First Canadian Edison Dealers' Convention" held in Toronto on Tuesday and Wednesday, September 5 and 6. This was held in the Foresters' Hall on College street, a handsomely appointed auditorium, the seating capacity of which was filled by visiting dealers and their wives. Many of them had for the first time witnessed a tone-test and marvelled at the wonderful Edison re-creation that made it impossible to distinguish the voice of the living singer from the voice emanating from the Edison Diamond Disc. Miss Elizabeth Spencer, of the Edison list of vocalists, with Arthur L. Walsh, violinist, provided the program with, of course, one of the Edison Diamond Disc phonographs.

The convention, which was the idea of the R. S. Williams' Sons Co., Ltd., of this city, was arranged by them, and nothing was left undone to make it a thorough success. In the morning H. G. Stanton, vice-president and general manager of the firm, opened the proceedings with an address of welcome to the delegates who met in the firm's own recital hall. In a short, concise businesslike address he placed the convention at the disposal of the dealers and urged them to take every advantage of this, the first opportunity, ever afforded Edison dealers in Canada to get together and talk over their mutual interests.

Mr. Stanton introduced the chairman of the meeting, B. A. Trestrail, the firm's publicity director.

In the unavoidable absence of Wm. Maxwell, vice-president of the Edison Co., Mr. Leonard represented Mr. Edison.

The open discussion was led by Geo. C. Silzer, of Harger & Blish, Des Moines, Ia., which firm, originally a general music house, dropped all their lines, including pianos, a couple of years ago to give their entire time and energy to the distribution of Edison products.

At 6.30 the convention delegates were the guests of The R. S. Williams & Sons Co., Ltd., at a banquet in the beautiful dining hall of the Ontario Club. Between courses the song sheet, which had been placed at the plate of each guest was requestioned, and led by the inimitable Duncan Cowan, rousing choruses were rendered. A brief musical program was provided by Mr. Cameron, Miss Elizabeth Spencer, Miss Irene Symons and Mr. LeRoy. Charles Musgrave, the latter as accompanist.

The second day of the convention proceedings commenced with a visit to His Majesty's Theatre adjoining the Williams Building, where the film, "The Voice of the Violin," held the audience fascinated. The visitors were entertained to lunch by the R. S. Williams & Sons Co., Ltd., at the Cafe Royal, following which they were driven to the Ontario Legislative building and photographed on the steps of that edifice. After a drive about the city they were taken to the National Exhibition now in progress in Toronto, the greatest of its kind and the most largely attended on the continent. After a visit to the Edison marquee the various delegates scattered to see the sights, unanimously applauding the enterprise and effort of the official and departmental managers of the R. S. Williams & Sons Co., Ltd., that made possible so inspiring a gathering of Canadian Edison dealers.

NEW MANOPHONE SALES MANAGER

P. J. Lynch Appointed This Week by James Manoil Co.—Has Had Wide Experience

Announcement was made this week by the James Manoil Co., manufacturers of the Manophone, with executive offices at 60 Broadway, New York, and factory in Newburgh, of the appointment of P. J. Lynch as general sales manager. Mr. Lynch, has for many years, been connected with large manufacturing interests in an official capacity, and is thoroughly conversant with modern merchandising methods. He has not only had an extensive experience as sales manager, but has traveled for many years, and knows thoroughly the requirements of the trade. He will make his headquarters at the executive offices of the company.

TO SPECIALIZE ON VICTROLAS

With the taking over of the piano department of the Lord & Taylor store, New York, by Chickering & Sons, and other announced changes, the Musical Instrument Sales Co., operating departments in a large number of stores throughout the country, states that practically all the piano business controlled by the company will be liquidated. The company, however, states that it will continue to distribute the Victor product exclusively, specializing in the supervision and operation of talking machine departments in department stores, and will continue to control the talking machine departments in the subsidiary stores of the United Dry Goods Companies as heretofore, together with those in other stores with which the Musical Instrument Sales Co. has been affiliated.

TAKES OVER PIANO DEPARTMENT

Chas. E. Gorham, Inc., who for the past three years has conducted the Columbia Graphophone department in the F. G. Smith piano warerooms at 60 Flatbush avenue, Brooklyn, N. Y., on September 1 also took over the piano department of the store. Leslie H. West is manager of both departments.

SUCCESSFUL OUTING OF TALKING MACHINE MEN, INC.

Over 300 Members and Their Friends Travel to Rye Beach in Automobiles and Indulge in Variety of Amusements, Including Baseball Game, Races, Dancing and a Shore Dinner

The annual outing of the Talking Machine Men, Inc., was held Tuesday last, September 12, at Beach Hill Inn, Rye Beach, N. Y. Three large sightseeing cars filled with members of the association departed from Twenty-third street and Broadway at 1 p. m., traveling to the Beach over the Boston Post road. Three hundred members in all attended, many traveling to the Beach in their own cars.

The feature of the afternoon was a ball game between teams composed of employes of the American Talking Machine Co. and the Blackman Talking Machine Co. on one side and the employes of the New York Talking Machine Co. and the G. T. Williams Co. on the other. The game which was played for a silver cup donated by Secretary Sol Lazarus, ended with a score of 8 to 1 in favor of the New York Talking Machine Co. and G. T. Williams Co. team.

During the afternoon a varied assortment of races were run and the large number of entrants in these affairs denoted the interest of the members and their guests. In the race for members only, Lons W. Bishop, of the Blackman Talking Machine Co., outran all other contestants, and carried off a pearl-handled knife as first prize. In the race for employes only, M. W. Owens, of the New York Talking Machine Co., won a fountain pen as first prize in a close finish.

At 5 p. m. an elaborate dinner was served at the Beach Hill Inn. The dinner consisted of everything that goes to make a shore dinner a success, and as many had taken part in the preceding athletic activities they were prepared to and did do the dinner justice.

After dinner, John E. Hunt, president, announced that contrary to the usual custom they would have a short address from a member of their organization. J. T. Coughlin, vice-president, then addressed the diners, his remarks particularly referring to the need for co-operation among dealers. He reviewed the work of the organization and paid splendid compliments to the officials of the association for their indefatigable labor and for the beneficial results the association had obtained through their efforts.

After the dinner, the floor was quickly cleared and dancing was in order, with many taking advantage of the opportunity. The music furnished by the orchestra was excellent.

The large number of ladies who attended the outing was a source of much gratification to the officers of the association and as for the outing itself it was agreed by all that it was the most successful affair ever held by the association. As President Hunt said, "We had a splendid day, fine weather, large attendance and everyone seemed pleased and happy."

The return to the city was announced at 8 p. m. and the cars started for home shortly after that hour.

REPORT GOOD CABINET TRADE

"During the past few weeks, there has been a very large demand for disc record cabinets from our dealers in all parts of the country," said Miss Elizabeth R. Nanes, secretary and general manager of the Nanes Art Furniture Co., New York, in a chat with The World. "In fact, we have been working to capacity to fill the orders for our various types of record cabinets, and our "Esco wagon" in particular is meeting with great success.

"We have also enlarged our factory facilities to keep pace with the orders being received for phonograph cabinets. Within the last ten days we have signed contracts with several well-known talking-machine concerns who have placed large orders for phonograph cabinets in our standard models, and in accordance with their exclusive designs"

PHONOGRAPH IN THE FIELD OF ART

Public Now Recognizes the Artistic Standing of the Instrument, in Addition to its Musical and Mechanical Features, Declares H. Chamberlain—How the Aeolian-Vocalion Is Being Exploited Most Effectively

"For many years the phonograph has been considered purely as a mechanical product," said H. Chamberlain, of the Aeolian Co.'s advertising department in a recent interview with The World. "The public and the trade had learned to regard the phonograph as the combination of a series of mechanical and scientific inventions and experiments. They recognized its musical qualities, but the public thought of it and the dealers merchandised it from a wholly mechanical, and therefore commercial viewpoint.

"This condition has changed somewhat during the past year or so, and the phonograph is

High-Class Vocalion Advertising

rapidly assuming a prominent position in the field of art. The music loving public is paying closer attention to the artistic developments of the phonograph field, even though they are becoming more familiar with this instrument's scientific and mechanical qualities. The dealer is also following this trend of thought and aiming to place the phonograph he handles on a higher scale from an artistic viewpoint.

"We have encouraged Aeolian-Vocalion dealers to introduce our phonograph to the public as an instrument that is not only perfect mechanically and scientifically, but which embodies true art in every detail. We have followed out this idea in our own publicity and in the suggestions we have offered our dealers, and moreover have made every effort to merchandise the Aeolian-Vocalion in a manner wholly consistent with this idea.

"When the Aeolian-Vocalion was first conceived it was decided to make the mechanical division secondary to the artistic side of the phonograph. The mechanical or scientific perfection of the Aeolian-Vocalion was completed in our experimental laboratory, but the completed instrument was regarded by us from an artistic angle rather than a commercial one.

"In other words, we have endeavored to make the Aeolian-Vocalion a 'different' type of phonograph than that which, for many years, the public has looked upon as a mechanical instrument. Our entire efforts have been made with this object in view, and the results achieved the past year indicate that the Aeolian-Vocalion is being recognized as an instrument of art, musically and architecturally.

"With an instrument that is 'different' the Aeolian-Vocalion dealer is able to present his line to the most desirable class of trade in his territory. He can use different arguments in his sales and advertising talks, and is not held down to the stereotyped forms of talking machine publicity. His window displays can be distinctive and original, and need depend only upon the instruments displayed instead of requiring the use of foreign or artificial display material. The Aeolian-Vocalion dealer, as time goes on, will be in a position to build up a permanent, profitable demand for an instrument that makes an appeal to the very best thoughts in music and art."

The accompanying illustration will give an idea of the artistic character of the national publicity referred to in Mr. Chamberlain's discussion of the artistic possibilities of the Aeolian-Vocalion. This advertisement is appearing in the leading national magazines at the present time, and the unique ideas embodied in this design have served to attract considerable attention from magazine readers.

ERNEST JOHN TO MAKE ADDRESS

Editor of The Voice of the Victor to Speak Before Talking Machine Men, Inc.

The regular monthly meeting of the Talking Machine Men, Inc., will be held September 20, at Keen's Chop House, 70 West Thirty-sixth street. The usual luncheon will be served at 1 p. m., followed by the meeting, which will be opened shortly after 2 o'clock.

Announcements have been sent out by the association requesting as many members as possible to attend, also stating the organization will be addressed by Ernest John, editor of The Voice of the Victor.

ABSORBS STANDARD G. A. CO.

The Kirkman Engineering Corporation has absorbed the Standard Gramaphone Appliance Co., and is now occupying the latter company's plant at 237 Lafayette street, New York. The Kirkman Engineering Corporation will manufacture the many talking machine supplies which the Standard Gramaphone Co. has made for the past six years, and will also turn out a number of electrical products.

Thomas W. Kirkman, general manager of the Kirkman Engineering Corporation, was formerly general manager of the Standard Gramaphone Appliance Co. He has invented a number of important devices the past few years and is thoroughly versed in the mechanical and sales divisions of the phonograph industry.

The Kirkman Engineering Corporation is planning to increase its factory capacity in the near future, and will market several types of phonograph motors.

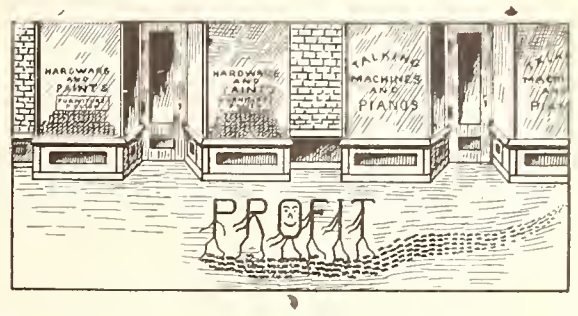
Don't Let Mr. Nice Profit Get By Your Door!



Polish for talking machines could be sold by hardware dealers.

Polish made especially for talking machines might better be sold by talking machine dealers.

It's a case of who wants the profits—a question of who is the quickest to investigate.

Piano cases and talking machine cases represent the finest art in veneer cabinet work.

GLORITE
PIANO AND FURNITURE CREAM

was made *especially* for pianos and *talking machines.* That is why it is *the best.* That's why, on a basis of merit, it eliminates competition and makes regular customers.

GLORITE CREAM is the original polish in PASTE form, packed in a collapsible tube. Comes out like shaving cream. Retails for 25c. and 50c. per tube.

It is "THE PRE-DIGESTED VARNISH FOOD"

Things that can injure a good finish, but things that Glorite Cream does *not* contain:

TURPENTINE	BUTTER OF ANTIMONY
LINSEED OIL	CHLORIDE OF LIME
COAL OIL	PARAFFINE
VINEGAR	SHELLAC
ACETIC ACID	WAX

GLORITE CREAM will not injure the most delicate finish; removes grease, dirt, finger marks, covers up scratches, removes that blue, smoky cast, and will remove white marks caused by a hot dish or water, provided varnish is not burned through. In fact, space will not permit us to fully explain the merits. We would rather you try the polish and decide.

It is "THE PRE-DIGESTED VARNISH FOOD"

MASTER MFG. & SPECIALTY CO.

Box 96, Camden, N. J.

(We solicit inquiries from jobbers)

Write at once. Fill out this coupon. Enclose ten cents in stamps for a 25c. tube of Glorite Cream (this amout we credit to you on first order). With the sample we send you details on our big—FALL—FREE GOODS DEALS, advertising matter, and literature to be included with monthly record supplements.

EXCELLENT VICTOR ADVERTISING

Double Page Spread in Last Week's Saturday Evening Post Attracted Much Attention

The Victor Talking Machine Co. carried in last week's Saturday Evening Post a striking two-page spread which is being used by Victor dealers to excellent advantage as a portion of their window displays. This advertisement was headed, "The greatest endorsement ever given any musical instrument," and the copy and illustrations featured some of the world famous artists who record exclusively for the Victor record library together with their opinions regarding the qualities of Victor records.

Among these artists were Caruso, Melba, Farrar, Sembrich, Gluck, Kreisler, Homer, Scotti, McCormack, and Schumann-Heinck.

"Columbia." A name that has meant more and more with every year that has gone by. And it has been some time since it began to stand for "most"—most in *tone,* most in *value,* most in *popularity.* And most in *profits,* too—don't forget!

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Records TRADE MARK Note the Notes

URGES PASSAGE OF THE WEBB BILL

Measure, Which Has Been Passed by the House, Designed to Help Export Trade

Talking machine men all over the country have been greatly interested in the Webb bill, which was passed by the House recently, and is now before the Senate. This bill provides that American manufacturers may enter into trade combinations for the purpose of standardizing prices and facilitating the opening up of export fields. It is, in reality, an abrogation of the spirit of the Sherman Act, in so far as export trade is concerned. It is a measure which will prove of vast benefit to American manufacturers who seek a wider expansion in foreign fields. Realizing the importance of this bill and the benefit which it will bring to those manufacturers in the talking machine industry who are seeking to enlarge their export business, The Talking Machine World sent the following telegram to President Wilson last week:

"Hon. Woodrow Wilson, Washington, D. C.

"Of over 62,000 laws passed in the various States, more than 50,000 are designed to regulate business in some particular. To this legal restraint must be added the vigorous activities of the Federal Government, under the commerce clause of the Constitution, and yet the business men are the real foundation of the nation, and big business is the backbone of all business. Truly, when the foreign governments and the foreign corporations are working strategically together in combine, as they naturally will be after the world war, the American business men need something more than regulating laws of restraint—they need governmental co-operation, because they must attack world commerce shoulder to shoulder, and arm in arm, if they are to succeed in keeping American commerce prominent in foreign fields. The Webb bill is a really constructive measure, designed to promote American export trade, and we, as a trade journal representing the music industries of the United States, urge you to support the Webb bill. THE TALKING MACHINE WORLD."

In response to the above telegram, Secretary Tumulty, on behalf of President Wilson, wrote: "The Talking Machine World, New York City.

"Gentlemen: The President directs me to acknowledge the receipt of your telegram of August 18, and to say to you that he not only has this matter very much at heart, but has taken an active part in attempting to find the right solution for it. He feels confident that legislation of this sort can be accomplished, if not at this session of Congress, at any rate in time to meet the necessities of the case. Sincerely yours,

"J. H. TUMULTY, Secretary to the President."

The President's response to the telegram sent by this publication is not only a cheering indication that the ultimate enactment of the Webb bill into the Federal statutes is practically assured, but is also practical evidence of the influence which progressive trade papers of the day have upon the larger national questions.

CHICAGO TALKING MEN ORGANIZE

Meet and Form Tentative Association—Will Try to Interest Entire Trade

CHICAGO, ILL., September 12.—At a meeting held to-day in the Kuntz-Remmler restaurant, this city, plans were formed for the organization of the Chicago Talking Machine Association, and the following temporary officers were selected: Oscar J. Kloer, chairman; Thomas R. Johnson, secretary, and Walter Schaaf, treasurer.

A committee of five was appointed to call on the trade generally and ask them to attend a meeting to be called later, at which it is hoped a permanent organization will be formed. Those present other than those mentioned were Adam Schneider, J. B. Ryde, W. B. Roche, O. C. Searles, H. D. Orwig, C. H. Bartholomee, C. L. Davidson, Frank Hood, D. W. McKenzie, F. A. Ruger and Al Bruckner.

Pathé

Explore This New, Rich Mine of Music

Pathé European Disc Records

HEAR these remarkable records! Learn why the foremost critics here and abroad acclaim Pathé as the creator of a NEW era in phonographic reproduction.

Pathé Discs are played with a round polished *Ball Shaped Jewel*. This glides over the record smoothly, without ripping, tearing or wearing it. There is no changing of needles with the Pathé method, for the ball shaped jewel wears for years. As it minimizes wear, you can play Pathé Discs a thousand times or more without affecting the music on them!

The Pathé way of *recording* is also different. The "sound grooves" on Pathé Discs are wider than on records of the ordinary kind. The Pathé *Ball Shaped Jewel* comes in closer contact with all the tone vibrations on the Pathé Disc than is possible with records played in any other way. Thus more volume and absolute fidelity to the original are attained.

Hear Europe's Celebrated Artists As Well as America's

Many of these have never been heard in America. La Scala, Milan, that famous "Cradle of Opera"; Covent Garden, London—the Opera Companies of Berlin, Vienna, Paris, Petrograd—know these artists well.

Hear Bardi—Bassi—Burzio—Chenal—Magliulo—Merentie—Montesanto—Noté—Parvis—Scampini—Vaguet—and hundreds of other great artists who can be heard on Pathé Discs only.

A Musical Treat Awaits You

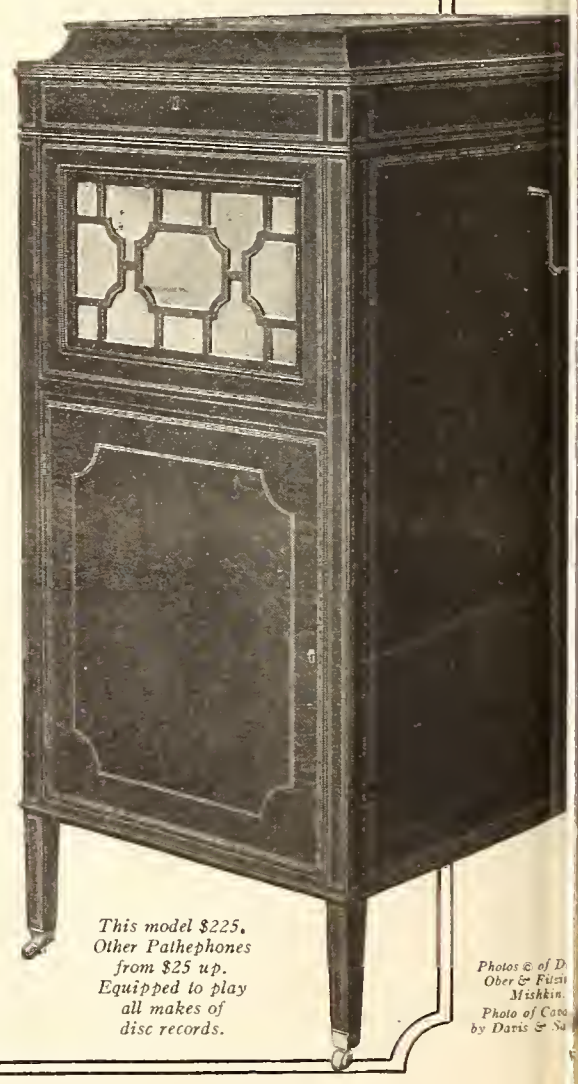
Muratore, acknowledged as the world's greatest lyric tenor; Giorgini, a wonderful voice; Anna Fitziu, the beautiful young American Prima Donna, who won such a sensational success at the Metropolitan Opera House; Didur, marvelous baritone, famous in the title rôle of Boris Godunoff; Thomas Eagan, singer of sweet Irish songs; Lina Cavalieri—Ancona—de Cisneros—Galvany—Journet—Ober—Titta Ruffo—Slezak—Urlus—Weil—are only a small part of the world's famous talent heard at its best from Pathé Discs.

Don't Buy "Half" a Phonograph

Get the Pathephone, which plays *ANY* make of disc record.

"Live" dealers are equipping different makes of phonographs to play Pathé Discs. But you must hear the Pathephone itself, the Pathé Discs played with the Pathé Jeweled Ball, and hear the sound issuing from the Pathé *All Wood "Violin"* Sound Chamber, for then you will become one of the thousands of Pathé enthusiasts.

Pathé Discs 65c to $4.00. Music on both sides, including records of the greatest operatic stars.



This model $225. Other Pathephones from $25 up. Equipped to play all makes of disc records.

O. P. KILBOURN ENTERS FIELD

Joins Traveling Staff of the New York Talking Machine Co.—Valuable Acquisition

O. P. Kilbourn, formerly assistant Pacific Coast manager of the Maxwell Motor Sales Co., with headquarters at San Francisco, has been appointed a member of the traveling staff of the New York Talking Machine Co., New York, exclusively wholesale Victor distributors. Mr.

O. P. Kilbourn

Kilbourn will give particular attention to the dealers in New York State and Pennsylvania, succeeding W. G. Porter, who is now a member of the sales department in New York.

Mr. Kilbourn was appointed to this position because of his sales ability, and the fact that he has worked in close harmony with the dealers in his previous post. In fact, a considerable portion of his activities with the Maxwell Motor Sales Co., consisted of missionary and co-operative work among the company' dealers.

Mr. Kilbourn was retained by the New York Talking Machine Co. a short while ago when he visited the Victor dealers in New York City and the metropolitan district, and offered them the company's assistance in forming definite plans whereby the dealers could secure interest payments on merchandise sold on the instalment plan. He liked this work so well and achieved such pleasing success that arrangements were made whereby he became a member of the company's sales staff.

Keen and aggressive, Mr. Kilbourn represents the ideal type of modern Victor wholesale man, who is willing at all times to co-operate in every way with the dealers in his territory.

WALTER THORPE, Manufacturer, 29 West 34th Street, NEW YORK CITY

TALKING MACHINE MEN, INC., MEET

Local Association, at Last Regular Meeting, Takes Up Many Interesting Questions—Endorse Music-in-the-Home Idea

The monthly meeting of The Talking Machine Men, Inc., was held on August 16 at Keen's Chop House, New York City, at which there were twenty members present and as guests of the association there were several representative of interests allied with the retail business.

President Hunt opened the meeting by introducing Ben Redler, representing the Electrical Phonograph Co., manufacturers of the Phonolamp, a handsome and elaborate electric lamp that has a talking machine in its base. The music from the records goes up the stem of the lamp and is spread about the room by the shade. The dealers discussed the Phonolamp at length and agreed that there should be a market for it.

Charles H. Townsend, representing the New York Evening Mail, was next introduced, and read a paper on "Reaching the Public," after which he introduced Henry W. Hart, editor of the musical page in the Mail.

Mr. Hart spoke of the absence of musical pages in daily papers in the past, but stated that he felt that the Mail's musical department, started not long ago, was already a success, and that they meant to do all in their power to inspire and encourage the general public to have good music in the home. He also said that the Mail intended to syndicate the music section to over a hundred papers throughout the country, thus stimulating interest in musical instruments.

The question of encouraging newspapers in carrying space devoted to music and musical instruments was then referred to the committee on advertising.

Letters addressed to Secretary Lazarus from the larger manufacturers of talking machines were then read showing how the manufacturers were doing all in their power to help the association in operations against the price cutter.

President Hunt, on addressing the meeting regarding making the association a national organization, said that dealers in several different localities were encouraging the association to continue their efforts in that direction.

A motion was made that all the members of the association be encouraged to write to the congressional candidates in their district asking them their views on the Stephens bill. A motion was also passed that the association have drafted a new set of by-laws, same to be presented at the next meeting for adoption.

After much discussion on the sending of records on approval, President Hunt said that while the association was against the practice of sending records on approval, it must be left to the individual dealers to decide on approvals and exchanges.

Advertising again came up for discussion and after much had been heard it was finally voted to refer several specified advertisements to the committee on advertisements to take whatever action was deemed necessary and to report at the next meeting the result of their work.

The meeting was brought to a close by informal talks among the members on general business conditions.

SELLING UNDER DIFFICULTIES

The accompanying photograph will give Columbia dealers in the East an accurate idea of some of the handicaps confronting their Western associates in their pursuit of their daily sales. This picture presents Mr. Johnson, head

How Johnson Supply Co. Sells

of the Johnson Supply Co., of Virginia, Minn., energetic and successful Columbia dealers. In the back of his automobile Mr. Johnson has hitched two wagons, and equipped this way he canvasses the country in the Iron Range, selling and making deliveries of machines on the spot. Mr. Johnson is doing a very successful business among the various nationalities working in the iron mines, many of whom do not speak English.

R. D. Wyckoff, treasurer and general manager of the Emerson Phonograph Co., in a chat with The World this week, stated that the company has a number of surprises in store for its trade this coming season. He stated that the company has signed up a number of good artists and is arranging to produce many novelties in the popular concert, vaudeville, musical comedy and operatic fields. New records in these various classes will be announced shortly.

The Widney Co., Chicago, manufacturers of and dealers in talking machine and piano supplies, have arranged to move to the large building at 320 South Jefferson street, that city.

A new corporation named Harry C. Grove, Inc., has taken over the retail business of the Columbia Graphophone Co., in Washington, D. C., the latter retiring from the retail field.

OUTING OF NEW YORK TALKING MACHINE CO. FORCES

More Than Sixty Employes of the House and Their Friends Spend Happy Day at Rye Beach—Married Men Display Their Superiority in Athletic Events

The superiority of the married man on the athletic field was conclusively demonstrated last Saturday at the annual outing of the New York Talking Machine Co., Victor distributor, which was held at Beach Hill Inn, Rye Beach, N. Y.

The Single Men's Team—The Winners

The total results of the afternoon games gave the victory to the married men by a score of fifty-two points to thirty-five, notwithstanding that the single men captured the ball game by a score of six to three.

This year's outing of the New York Talking Machine Co. was attended by more than sixty

Arthur D. Geissler and His Three Heirs

of the employes and their friends, and from the time that the two automobile buses left the company's offices until 11 o'clock in the evening when the return journey was made, every detail of the day's festivities was carried out to the entire satisfaction and enjoyment of all present. Credit for the outing's success should be given to W. L. Garber and H. Miller, who were in charge of the outing from its inception.

The party arrived at Beach Hill Inn about 1.30, and after lunch was served preparations were made for the annual baseball game between the company's benedicts and bachelors. This event has been keenly contested the past few years, and although the single men were victors last year, the members of the married men's nine promised to be amply revenged this year.

The teams lined up as follows: Married men: Davin, left field; A. D. Geissler, catcher; Damon, pitcher; Graham, shortstop; Craig, second base; Tolidino, center field; Morey, third base; Kelley and Burns, first base; John Connolly, right field. Single men's team: Miller, shortstop; Johnson, third base; Pyatt, center field; Moore, pitcher; Jerome Connolly, left field; Proceller, catcher; Owens, second base; Porter, first base; Taylor and Matthews, right field. The game was stubbornly contested from start to finish, but through timely batting the bachelors succeeded in putting over five runs in the first inning, and although the bene-

Four Star Athletes—Left to Right: Craig, Damon, Schoonmaker and Owens

dicts threatened to tie the score in many innings they fell short by three runs. Miller, Owens and Porter were the stars for the vic-

The Benedicts' Team

tors, while A. D. Geissler, Damon and Morey played brilliantly for the losing nine.

This year's series of athletic games produced an all-around star athlete in the person of S. B. Schoonmaker, who won four medals for his victories in the high jump, 100-yard dash, standing broad jump and hop, skip and jump. In fact, it was Mr. Schoonmaker's victories that gave the married men high score for the day's sports. Damon was the winner of the shotput, the ladies race was won by Miss Roskamp, and J. J. Davin repeated his last year's victory in the swimming contests. The relay race between two teams representing the married men, and the single men was won by the latter, whose team consisted of W. G. Porter, W. L. Garber, Morris Owens and John Connolly, A. D. Geissler, vice-president of the company, was active in all the afternoon's sports, finishing third in both the standing broad jump, and hop, skip and jump. Morris Owens, also accounted for himself very creditably, finishing second in the 100-yard dash, standing broad jump, and hop, skip and jump. Steve Matthews won the 50-yard dash with ease. Medals were awarded to all the winners.

After the close of the games the employes and their guests adjoined to the Inn, where dinner was served and dancing was the order of the day until 11 o'clock, when the two automobile buses conveyed the party to New York.

Among those present in addition to those mentioned above were: C. Bruno, of C. Bruno & Son, Inc.; M. M. Reinhard, L. L. Davis, E. H. Fontan, D. L. Silverman, O. P. Kilbourn, C. Boos, J. Tolendini, P. O'Brien, E. Flynn, T. Byrne, F. McGrath, I. Shadt, H. Godfrey, M. Gallo, Mrs. George Kelley, Mrs. Clifford, and the Misses Dunn, Haring, Hetherington, Bruns, Donovan, Menig, Eddinger, M. Platz, C. Platz and Weinbauer.

NEW BUILDING FOR EDISON RECORDS

West Orange, N. J., September 5.—Work was started last week on a new six-story fireproof building for Thomas A. Edison, Inc. The new structure will cost $50,000, and will be used for the purpose of storing talking machine records.

PHONOGRAPH LUBRICANT

Ilsley-Doubleday & Co., New York, well-known manufacturers of oils and lubricants, are now packing their phonograph lubricant in four-ounce cans for consumer use. This lubricant is being merchandised through the dealers under the name "Eureka Noiseless Talking Machine Lubricant," and from all indications will be a welcome addition to the dealer's stock of supplies. Ilsley-Doubleday & Co. have for a number of years manufactured phonograph lubricant which is being used by leading talking-machine manufacturers.

NEW AUTUMN RECORDS

The future of the Domino seven-inch, double disc, vertical cut record is assured. The public likes it. It is convenient to handle and carry, it is economical, it has great durability and fidelity of tone.

Are you keeping in step with this rapidly increasing demand for a thoroughly high-grade, popular priced record?

Actual comparison will quickly prove to you that the Domino, retailing at 35 cents or three for $1.00, is the leader in its field.

WHAT MACHINE DO YOU CARRY?

All phonographs having the universal tone-arm play Domino Records correctly. Domino Records can be played on the standard machines not having universal tone-arms with the aid of a simple adapter. This adapter can be instantly attached. After it is attached the Domino Record will give perfect results. A simple turn of the sound-box makes it possible to change from Domino to lateral-cut record or vice versa at once.

DEALER CO-OPERATION

The makers of Domino Records believe that the splendid growth of their business has been directly due to their liberal dealer policy. Novel Domino signs, placards, window material and local newspaper advertising copy have made a very definite and pleasing impression. We consider the merchants' problems as important as our own.

THE SITUATION

The immense number of new phonograph owners offers you a golden opportunity. But, arrangements for your Domino Record supply should be made at once. The Domino catalog, containing one hundred and twenty-six selections and including the new Fall records, is ready. It and the price-list will be sent you on application.

A few State agencies west of the Mississippi are still open and we invite correspondence from established distributors.

E. R. JOHNSON DISCUSSES STANDARDIZATION OF PRICES

A Remarkably Able Analysis of Business Needs, Wherein it Is Shown That the Standardization of Prices in Any One Line Bearing the Maker's Name Is a Sound, Worthy Business Policy —Public Confidence in Business Is Essential to the Industrial Development of the Nation

Eldridge Reeves Johnson, president of the Victor Talking Machine Co., ranks as one of the leading men in the industrial world to-day, and has given considerable attention to questions of current interest. A recent article of Mr. Johnson's bearing the caption, "A Bad Name," has been issued as a supplement by "The Voice of the Victor," and it is of such exceeding interest to business men in all lines of industry that we take pleasure in reproducing it herewith:

The ill-chosen title, "Price Maintenance," has done the cause of "Fair Trading" a little more harm to date than the total of all effort has accomplished in the matter of educating the public to the fact that the standardization of prices in any one line of articles hearing the same maker's name, is a sound, honest, worthy business policy and not an insidious method of raising and maintaining prices unduly high. A far better title would be "The Standardization of Fair Prices."

From the "Code of Hammurabbi" * to the Sherman law, legislators have been trying to produce laws for the satisfactory regulation of trade, hut it is a hit discouraging when we learn that while there are over 50,000 such laws in active operation in the United States, with many more to come, we are no nearer success than was this old Babylonian king with his wonderful code of over 4,000 years ago.

It is an interesting fact that the oldest trade agreement, which authentic history records, was made in the reign of Hammurabbi between the patriarch Abram and his kinsman Lot. They found that their enterprises were interfering and they divided certain pasture lands between them, thus establishing the following co-operative agreement:

"And Abram said unto Lot, 'Let there be no strife, I pray thee, between me and thee and between my herdmen and thy herdmen for we be brethren. Is not the whole land before thee? Separate thyself, I pray thee, from me; if thou will take the left hand, then I will go to the right, or if thou depart to the right hand, then I will go to the left." Gen. xiii, 8-9.

Could anything have been more fair, sensible or practical? Can we afford to abandon this old policy of fair play? It is not recorded that Hammurabbi ohjected or that the price of mutton was put up, but Abram and Lot could have been called to account under some interpretations of the Sherman law.

No lasting peace in any industry is possible when co-operation is frowned upon as a conspiracy and manufacturers are compelled to fight it out along destructive lines. The ultimate winner (generally the one with the greatest resources), who in the fight reduces or eliminates competition, may eventually find himself charged with maintaining a monopoly.

The Sherman law was put upon the statute hooks a quarter of a century ago, just about the time the United States of America emerged from a purely agricultural country and entered upon its boundless industrial career. Mr. Roosevelt used the law as a curb to the monopolistic enterprises of a certain class of business men with unsound business ideas. It is evident that Mr. Roosevelt never thought the law perfect and, no douht, intended to secure intelligent amendments, but misdirected puhlic opinion took the matter out of his hands and general business has suffered confusion never dreamed of by Roosevelt or the framers of the Sherman law.

Matters are on the mend, but very slowly. Opposition to intelligent interpretation of the Sherman law is very great. Something like consternation prevailed among that clamorous class of people, who believe that nothing is too unreasonable or severe in dealing with the ever-increasing problems of business regulation, when the Supreme Court read into the Sherman law the word "reasonable."

Since the Standard Oil decision, this same class of misinformed people, dangerous, and not to be ignored, because of their number, have raged like hungry wolves deprived of their prey for laws that would overcome everything reasonable in the Sherman law. Every business enterprise, no matter how worthy or how well conducted, must face this unreasonable persecution, once it seeks to improve its business methods, hy departing from the methods of destructive competition of a thousand years ago.

The future of the greatest industrial development that the world in its long history has ever been in a position to achieve is being delayed and threatened with destruction, so far as the United States of America is concerned (Europe, however, is making no such mistake), by selfish, narrow conceptions of trade which have come to us as an inheritance from the Oriental originators of trade. These old, half-civilized ideas still hold a large portion of the public mind in bondage and are still advocated hy misinformed legislators.

The theory they preach is that each purchase must be made a desperately selfish bargain, and the opportunity of indulging in such bargains is looked upon as a sacred, personal right. The right to buy at the lowest figure that the most cunning mind can conspire with circumstances to ring from a fettered industry is still thought good business. Starve, if you must! This is all I will give! Your losses are none of my business! I am not my brother's keeper! Business is business! No sentiment in business, etc.!

The reactionary character of such policies becomes apparent on the slightest thought, but laws and decisions that are so framed as to deprive trade of all the benefits of co-operation, to strengthen the grip of price cutters and sweating practices, that have the effect of increasing the cost of production and forcing down the compensation to both labor and capital, are still urged by a misguided but powerful class of legislators, both national and State. Of course, the real trouble is the lack of public understanding and support in fair trading, and this difficulty can only yield to constant effort in the matter of analyzing and explaining the truth to the public.

Every business man should study John Stuart Mill or Adam Smith and subscribe to several responsible publications which are devoted to Business and Finance, Social and Political Economy, in addition to the regular magazines and newspapers. Business men, as a rule, neglect all educational reading on the subjects of Business and Political Economy.

A membership in the United States Chamber of Commerce will also be useful in the matter of keeping well informed on what Congress is doing. The weekly bulletins furnished to members contain just the kind of condensed information a busy man needs, and it is reliable.

Industry and thrift are in grave danger in the United States of America. Write a short article for a trade paper once in a while on the benefits of the standardization of prices, fair trading, business regulation, taxes, etc. Every honest and intelligent article helps quite a little. The present social and industrial problems can all be worked out with fairness to all.

Scientific treatises can do little good; the general public is still in its A, B, C's. Of course, many understand the meaning of price maintenance, but many still believe that the policy of price maintenance or standardization of prices is a subtle conspiracy to force them to pay the highest possible price for articles sold under such a system. It would seem that the present prices of general commodities would prove the absurdity of such opinions and it would also seem that the present time is the time above all others to point out to the public that, while this is a period of the highest prices ever known, especially in the standard lines of necessities, the articles marketed under so-called price maintenance systems, which are seldom necessities, can still be largely obtained at the regular advertised prices of the last ten years.

It is also evident that in the few cases where prices have been raised on articles that are sold under a system of price maintenance, the increase has been forced by an increase in prices of raw materials that are not sold under the so-called price maintenance policies; in other words, in the lines of goods where the standardization of prices has been achieved, the prices have not risen, but in many other lines that are not regulated by this policy prices have risen to the highest point ever known. Lahor, lumber, iron, brass, copper, leather, shellac, have all increased tremendously, but talking machines, automobiles, watches cameras, etc., are marketed for the same or lower prices.

It did not seem possible two years ago that all these increasing costs could be absorbed in economies, and it has been accomplished largely by increasing turnovers and by improved machinery for manufacturing. This shows how hard concerns who advertise and maintain a standard retail price will fight the dreaded necessity of raising prices. Their regular price is a part of their good will and a change courts disaster unless the change is downward. The effort has been exhaustingly expensive, however, and the future, if it returns a reduced volume of trade, will present a new set of problems harder still to meet. This is proof that the standardization and consistent advertising of prices makes steady and reasonable prices, and that unregulated prices permit violent fluctuations, either too high or too low, with accompanying public inconvenience and industrial losses.

The proper retail prices should be ascertained and fixed at a certain proportion to the cost of production, and no one hut the manufacturer is in a position to ascertain these costs. When prices are too high, the public suffers, but the prosperous public do most of the complaining. When prices are too low, many more suffer, and the poor suffer most because of the curses of lack of employment; namely, hunger, cold, disease and crime.

Fair and remunerative prices must necessarily accompany any lasting prosperity. Prosperity based on high prices is always of short duration. The world will be much better off when some system of co-operative trade agreements becomes the universal practice, as certainly it must sooner or later. The farmer would need no special credit legislation if he were insured a paying price for his product.

Railroads rates are protected and standardized by law. Telegraph and telephone companies are protected in their charges by the circumstances of their organization, as are many other lines of business, such as systems for the distribution of product through sole agents or branches under a common control—mail-order houses, chain stores, leasing contracts, etc. But the greater portion of business has no protection against the worst form of price-cutting. This is unfair; all should have an equal chance to make a fair profit. A farm that does not pay is a public nuisance. A business that does not pay is a danger to public interests.

The automobile business is the best line in which to study modern business tendencies. Because of its unusual rapid development and its youthfulness, it is bound down by no customs or traditions; it has burst forth in less than half a generation from an atom to a giant in the full vigor of youth.

On account of the circumstances of trade, the automobile manufacturers can always control the retail prices of their individual product, but the prices of automobiles, which were very high indeed at first, have not been maintained high, although they have been maintained to a standard fixed by each maker independently.

No reasonable complaint can be made either in the price of automobiles, the wages paid or working conditions in automobile factories. The public gets the automobile that it is willing or able to pay for. Some are high priced and some are astonishingly low priced. Most of them are worth all that is charged and are astonishingly efficient.

The fact is that the general condition of the automobile business from the standpoint of public worthiness is decidedly better as a whole than any other line, and this fact would seem to be an unanswerable argument against the theory that a price which is maintained to a standard fixed by the manufacturer has the effect of maintaining prices unduly high.

The wonderful Ford enterprise pays the highest wages and sells its cars for the lowest prices, but this would he impossible were the company not able to maintain a standard price among its distributing agencies. If the Ford Company could not control its agents, there would soon be developed an internal price war that would most certainly destroy the efficiency of the organization and the economy of production.

The matter of trade regulation in general is a real problem; in its present form it is new in some particulars, and a satisfactory solution is a much more urgent necessity than ever before.

It would seem that we now have sufficient experience to enable us to devise an entirely new set of laws that would take the place of the more than 50,000 Federal and State laws which are causing so much confusion to the business world by their use as a hasis for intolerable persecution. Certainly such an undertaking is worthy of a special commission composed of the greatest thinkers and practical business minds of the world.

It is doubtful, however, if even such an organization could compile a perfectly practical code of laws. Absolute satisfaction can never be accomplished by any set of fixed laws because of the rapidly changing conditions, but certainly a 99 per cent. improvement could be accomplished, and, if such laws were enacted, the enforcement of the same could be intrusted to the Federal Trade Commission or some modification of that organization. The effect of

THE STANDARDIZATION OF PRICES

(*Continued from page 62a*)

such a policy would in a few years give fairly satisfactory results—a condition that business is now sorely in need of.

It has been charged that intensified advertising of fixed prices can fool the public into paying more for an article than it is worth; but a firm investing large sums in advertising soon finds that it is creating a demand for its competitors to supply if its prices are not fixed in a reasonable proportion to the cost of production. Very few business men try to fool the public nowadays. Misrepresentation in advertising is a weak, foolisb policy and always brings disaster. Every honest enterprise can be tremendously developed and economized by advertising which increases the turnover at less cost tban by any other method. Many worthy enterprises fail from lack of advertising.

It would seem that a Federal incorporation law for all corporations doing an interstate business, compelling a standard method of estimating costs, keeping accounts and making reports, would simplify the problem of business regulation and gradually establish public confidence in business.

With public confidence in business and business methods once restored, the future industrial development in the United States would be assured and many of the grievous burdens and miseries now eating into the vitality of the nation would be eliminated.

BOLTON BACK FROM UP-STATE TRIP

Reports Very Satisfactory Conditions in That Territory

R. F. Bolton, district manager of the Columbia Graphophone Co., New York, returned late last week from a trip through New York State upon which he visited the Company's wholesale managers in that section, and quite a number of Columbia dealers. He states that the business situation in this territory is unusually gratifying, and that he never found conditions in better shape on any previous trip. Columbia dealers closed a remarkably active summer trade, and are now preparing for a record breaking fall season.

Extensive improvements are being made at the Pasadena Music House, Pasadena, Cal. The interior and exterior are both being remodeled, one of the improvements being a new display room for Victor Victrolas.

NEW LINE OF FILING CABINETS

Globe-Wernicke Co. Places on the Market the "Brown Disc Record Library," Which Has Many Advantages—Protects the Records

CINCINNATI, O., September 8.—The Globe-Wernicke Co., the leading manufacturer of sectional bookcases, filing cabinets, etc., of this city, has just placed on the market a line of new cabinets which are designated as "Brown Disc Record Cabinets." These cabinets were invented by Henry C. Brown, and will be manufactured and marketed exclusively by the Globe-Wernicke Co.

Brown disc record cabinets were designed to harmonize with the various types of Victor table machines such as Victrolas Nos. 4, 6, 8 and 9. The cabinets embody a number of distinctive features which have been generally praised by these Victor jobbers and dealers who have received samples.

In the Brown disc record cabinet the records lie flat absolutely preventing any possibility of warping. They are placed in a vertical position so that they are easily accessible at all times. Each drawer in the Brown disc record cabinet has a capacity of twenty-five records, and is adjustable to either 10-inch or 12-inch record. When the drawer is closed every record lies flat, with pressure of spring on top of stack. When the drawer is extended every record is vertical. The drawers and sliding tracks are steel, and the fronts of the drawers and the outside of the cabinets are mahogany or oak.

TO MAKE ONLY HORNLESS MACHINES

Flemish-Lynn Phonograph Co. to Discontinue Horn Types—Three New Models Ready

The Flemish-Lynn Phonograph Co., Brooklyn, N. Y., announce that they will discontinue the manufacture of phonographs with horn attachments, and in future will concentrate exclusively on hornless machines, ranging in price from $5 to $50. Three styles of these new machines will be ready for delivery shortly.

The large Flemish-Lynn plant at 269 Thirty-seventh street, Brooklyn, has recently undergone a number of important changes and improvements, and a larger space has been acquired in the same building by the company. Every part of the Flemish-Lynn machines are manufactured on the premises with the exception of the cabinets, which are manufactured at the cabinet works controlled by the company at Mexico, N. Y. Negotiations for another cabinet plant are now being carried on. The Brooklyn factory has on hand at the present time enough raw material to make approximately 300,000 machines. This machine was acquired some time ago at a favorable price, before the cost of raw material advanced.

M. B. Baer, president, and H. S. Rochelle, treasurer, of the Flemish-Lynn Co., are now preparing an elaborate sales campaign with the object of introducing and marketing the three new styles of hornless machines.

LOUIS MANN NOW MAKING RECORDS

For the Emerson Co.—Mr. Mann Is a Well Known Theatrical Favorite

The Emerson Phonograph Co., New York, announced this week that arrangements had been consummated whereby Louis Mann, the

Louis Mann Making Records

well-known actor, will record exclusively for the Emerson disc record library. Mr. Mann visited the Emerson recording laboratories this week, and his first records will be issued in the very near future.

Louis Mann is one of the most popular actors of the present day, and enjoys a country-wide reputation that has placed him in the front ranks of theatrical favorites. He has been particularly successful in roles requiring the use of dialect, and his Emerson records will include a number of sketches and humorous stories written especially for Mr. Mann in dialect form.

ATTRACTIVE WINDOW HANGER

The Pathé Frères Phonograph Co., New York, has just sent out to its dealers a very attractive window hanger featuring the new Pathé disc record of the selection "Listen to This." This window hanger is very artistically colored and should attract considerable attention if properly displayed.

FEATURING HAWAIIAN RECORDS

Window Hangers and Catalog of Hawaiian Records Issued by the Victor Co.

A very handsome window hanger and special catalog of Hawaiian records has just been issued by the Victor Talking Machine Co. This literature reaches the trade at a time when it is most desirable for the fall season.

The window hanger presents a remarkably artistic design pertinent to the class of records listed, and the advance catalog of Victor Hawaiian records contains a comprehensive list of every class of Hawaiian music which has become popular during the past year. This Victor library of Hawaiian records has met with a phenomenal sale throughout the country, and there is no doubt but that this special advertising matter will act as a powerful stimulant to these record sales.

In a letter sent out with this literature the Victor Co. said in part: "More money is being made with Hawaiian records than was ever thought possible when this bewitching music was first introduced. Everybody likes this simple melodious music, and the more they hear of it the better they like it. This happens only when some form of music makes its own direct appeal—supplies a natural need that is felt by everybody.

"The demand already exists, it has been growing steadily ever since the first wistful ukulele brought the music of Hawaii to the United States."

APPOINTED GENERAL MANAGER

L. S. McCormick Promoted From Sales to General Manager of Growing Retail Business of Sonora Phonograph Corporation

L. S. McCormick, formerly sales manager of the Sonora Phonograph Corporation, New York, has been appointed general manager of the company's retail business. At the present time, this comprises three stores in New York and one which will open in Philadelphia in October. The last named is a very imposing building of four stories, situated at 1311 Walnut street, and will be devoted entirely to the retail Sonora business. In addition to the stores already mentioned the Sonora Phonograph Corporation has in contemplation the establishment of its own retail warerooms in other cities of like nature.

L. S. McCormick

Mr. McCormick is eminently fitted to occupy the important position he now assumes, as he has had a number of years experience in both the wholesale and retail talking machine business. He is thoroughly familiar with every phase of high grade phonograph merchandising, and will doubtless be very successful in the post of general manager of the Sonora retail business.

CHICAGO TALKING MACHINE COMPANY
WHOLESALE ONLY
12 NO. MICHIGAN AVENUE - - - CHICAGO

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., September 11.—August was a month of unusual strain so far as the jobbers were concerned. Added to the already insistent demand for goods in preparation for the fall trade in anticipation of a general shortage, the pressure was tremendously increased the latter part of the month on account of the fear of a railroad strike. The fact that this terror has been averted removes in the minds of the trade the last possible impediment for an enormous season's business, and the only cloud on the horizon is another scarcity of goods, which it is expected will be almost equal to that of last fall, notwithstanding the greatly increased output of the factories. Jobbers are almost wishing that there would be something of a let up in trade as no matter how great the increase in the shipping capacity of the factories the demand gains in a far greater ratio.

The jobbers are in an exceptionally good position so far as record stocks are concerned. It is fortunate that this is so, as the past summer has unquestionably witnessed the largest record business in the history of the West. The many new machines on the market have certainly made no appreciable impression on the regular established concerns. At least, the latter are as far from meeting the supply as in recent years. On the other hand, it has evidently proved an absolute advantage so far as the record business is concerned, as a sufficient number of the new machines have been sold to make their owners a very important factor in the record market.

Local retailers both in the loop and the outlying districts of the city report that August was a most satisfactory month, showing an increase ranging from 15 per cent. to 25 per cent. over the corresponding month of last year, and it will be greatly exceeded by September if the sales continue at the present pace.

Kimball Phonograph on the Market

The first of the new Kimball phonographs to be placed upon the market are now being shown in the retail department of the local store of the W. W. Kimball Co. While the Kimball factory is busily engaged in increasing the output of this new branch of the firm's industries it is quite probable that the company's own dealers will take the entire output of Kimball phonographs for some months to come.

The new machine contains some very distinctive features, the tone arm and amplifier being particularly novel in construction. The latter, to borrow an expression from the automobile trade, might be termed as "free-floating," and as far as operation goes are in one piece. The whole pivots or balances on a horizontal center that is equivalent to the center of the sound amplifying horn. A counterbalance is provided for also. The machine will play either the hill-and-dale or lateral cut records by changing the position of the soundbox and needle. The first models of the lines to be displayed on the floor measure forty-seven inches in height, twenty-two inches in width and twenty-five and one-half inches in depth. Nine albums provide space for 108 records. It is finished in some fine selections of mahogany and oak.

Some New Empire Literature

The Empire Talking Machine Co., 425 South Wabash avenue, this city, is issuing some fine new literature which tells the Empire story not only from the dealer's standpoint, but also for the benefit of the retail buyer. This includes, for the dealer, specially written copy, lay-outs and cuts for newspaper advertising. There is also a new booklet entitled "Dorothy Decides," which tells of a young girl who induces her family to buy an Empire talking machine and why her arguments won. There is also some new motion picture slides and colored window signs.

A. F. Simes a Visitor

A. F. Simes, sales manager of the Victor Electrical Equipment Co., of Boston, Mass., makers of the Veeco Electric Drive, for talking machines, was a visitor to Chicago the latter part of August. Mr. Simes stopped at a number of cities on his way West, and at every point found cordial reception for the Veeco electric motors. While in town the Boston "motor-man" had added several new accounts to his list—some of the orders being for large quantities of motors.

"We find the idea of electric drive is gathering converts every day, and there is no reason why this should not be the case," said Mr. Simes. "The development of modern electricity has carried the small motor far past the experimental stage and the old complaints of trouble now amount to almost nil. This is an electric age we live in, and there is no reason why the electric motor for talking machines should not be universally used within the next few years."

Meagher Enters Retail Buisness

Joseph E. Meagher, Wisconsin representative of the talking machine department of Lyon & Healy, is now a member of the Forbes-Meagher Music Co., which has just bought out the piano and talking machine store of W. H. Aton at Madison, Wis. Mr. Forbes has been manager of the store for Mr. Aton since its inception. They will handle Victor goods exclusively. Mr. Meagher will continue to cover Wisconsin as in the past, leaving the active management of the business at Madison in Mr. Forbes's hands, at least for the present.

W. H. Aton is still a very active factor in the trade, as he will continue his prosperous piano and talking machine business at Baraboo, Wis., which was in existence many years before he opened the branch at Madison a few years ago.

Enlarges Talking Machine Department

E. A. Sayre, a leading druggist of Elkin, Ill., who has handled talking machines on quite a large scale for some years past, has leased another store adjoining his present premises on Grove street. The new quarters will be devoted entirely to his Victor business, and will be attractively fitted up for the purpose.

Occupies New Store

The West Music Co., piano and talking machine dealers of Joliet, Ill., have just moved into their new store in that city. It gives them much larger space and is admirably fitted up. Their Victor business has made a most remarkable increase since the present management took hold.

New Records by the Imperial Quartet

The Imperial Quartet, of this city, leaves today for the Victor laboratory at Camden to make some more records. This will be hailed with joy by the Western dealers who have found the former efforts of this quartet to be unusually good sellers.

Augurs for Freight Concession

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, leaves today for the factory at Camden. He is accom-

EFFICIENCY
FOR YOUR STORE

We are pleased to announce a new idea in the talking machine business. It is the organization of an Efficiency Department for the benefit of the dealer.

Here you will find experts on every phase of the Victrola and Victor Record business. You may consult them and get the benefit of their advice, free.

The experience we have gained while building up the foremost Victrola and Victor Record business in the world will prove valuable to you.

Efficiency men, graduates of our organization, cover the greater part of the U. S. They study local conditions and suggest remedies. They keep track of developments and visit many localities every thirty days. We will be pleased to advise you if your section is covered.

Advertising suggestions and ideas will be given gladly on request, by authorities who have been associated with the talking machine business since its beginning.

If you want Efficiency methods and big business building ideas to promote your sales, write today

LYON & HEALY

Victrola Distributors

CHICAGO

panied by C. R. Fuller, the treasurer of the concern. From Camden they will go to New York, where, on Tuesday next, Mr. Wiswell, in his capacity as chairman of the traffic committee of the National Talking Machine Jobbers' Association, will appear before the official classification committee and present arguments for reduction of the minimum weights on carloads of talking machines, records, parts and accessories from 24,000 to 16,000 pounds. This is a very vital matter to the talking machine trade, as talking machines are so bulky that it is impossible to load them to the required weight in a single car. It is not always possible to supply the deficiency with records, parts and accessories, consequently the jobbers continually find themselves paying freight on from six to eight thousand pounds more than are actually shipped. The same minimum exists in Southern and Western classification territory, and there is little doubt that if the concession is made by the official classification committee, whose jurisdiction covers the territory east of the Mississippi and north of the Ohio, the new rule will ultimately become country wide. The reduced minimum will also make for quicker shipments as carload business is handled by the roads with greater dispatch than L. C. L. shipments.

A Remarkable August

H. A. Yerkes, division superintendent of the Columbia Graphophone Co., says that the reports from the different jobbing centers in the extensive territory under his jurisdiction were of the most encouraging nature. The Chicago office made a remarkably good showing, and Minnesota, Kansas City, Dallas and several of the extreme Western centers reported a 100 per cent. increase.

Mr. Yerkes was enthusiastic over the announcement just made by the Columbia Graphophone Co., that they had secured on an exclusive contract the tenor Lazarro, who is the possesser, he declares, of a voice unrivaled in the operatic world. He has already made four records which will appear in the November supplement, although they will be on sale early in October. A very extensive advertising campaign will be pursued by the Columbia Co. in familiarizing the American public with the phenomenal qualities of Lazarro's voice, which are thoroughly recognized in other countries, although he has yet to make his first appearance in America.

New T. M. Service Features

At the Chicago Talking Machine Co.'s offices all the vacationers have returned from their vacationings and have gotten down to energetic work on the fall campaign.

The talking machine dealers' service will more than maintain its traditional excellence this fall, and the new special service room referred to in last month's World will soon be ready for inspection. Then all the various devices and fixtures planned with the purpose of furthering the interest of the dealer will be on display.

The company is now sending out literature on two new features of their window display service. One is a series of artistically designed price cards, one for each Victor model. There is also a simple and inexpensive record display easel. It is finished in black enamel, folds compactly, when not in use and can be used for either twelve or ten-inch records.

A. D. Geissler spent several days in Chicago last week and expressed himself as highly pleased with business both in the West and East.

Make Record Records

Lyon & Healy are having the biggest Victor record business in the history of the house, and recent experiences show that they anticipated and fully prepared for it. They recently received from a far Western dealer an order for 1,738 records of 588 different numbers. It was filled with a shortage of only thirteen records of five numbers.

Department H is putting greater stress than ever on their efficiency department this fall and are prepared to send men to aid dealers in systematizing their stock and improving their service.

They have developed efficient forms for charging goods, keeping track of records on approval, etc., and are always prepared to furnish helpful suggestions on window displays and on advertising. They are just sending to their dealers a new sure record order book. Among other features it dispenses with the bother of envelopes. The dealer simply makes out his order, tears it out, folds it, stamps and mails it.

"Electric Victrola Month"

Lyon & Healy are featuring electric Victrolas by means of large space in the dailies announcing "Electric Victrola Month," and by some particularly forceful window displays. Their first announcement appeared in the Herald Tuesday of this week, and three motor driven Victrolas were sold as a result of that single ad.

Noon recitals were given in connection with the regular Victor concerts by Marconi Bros., the famous accordion trio, who are now producing records for the Victor Co. in conjunction with Pietro Deiro. This feature was announced in the dailies and the recital hall was not able to accommodate the crowds who responded.

Edison Exploitation

C. E. Goodwin, manager of the Phonograph Co., announces that Miss Marie Kaiser will give a series of tone tests in conjunction with the reproduction of her records in the Chicago Edison zone, beginning October 16, and ending November 5.

August proved the biggest month in the history of the company in point of shipments of Edison disc phonographs.

Increase Local Playerphone Plant

The local shipping warerooms of the Playerphone Talking Machine Co., at 21-23 South Wabash avenue, have been increased by the addition of another floor, making the total space available for local shipping facilities 16,000 square feet. The move was necessitated by the rapidly growing business of the concern and the big fall business that is now assured. The two big plants where the Playerphone talking machines are made are also working at top speed in anticipation of a busy autumn.

A unique record is being set by the Playerphone Co. in its distributing department, for it now has eight jobbers each of which is rated at from a half to a million dollars.

"The last word" in re-creation of music. Produced by the

Balance Cover Co. in New Plant

J. L. Abbott, of the Chicago Hinged Cover Support & Balance Co., has announced the opening of the company's new factory at 2242-2246 West Sixty-ninth street, where ample machinery has been installed which will considerably increase the output.

F. E. Levanseler, president, and A. E. Trexler, superintendent of the plant, are now making arrangements for the installation of a large nickel-plating plant. When that is accomplished every part of the hinged cover support and balance will be made in the company's own factory.

Six Best Sellers

The six best sellers in Victor records this month were, "Tales of Hoffmann-Barcarolle," McCormack-Kreisler; "Hallelujah Chorus" and "Funeral March"; "Pussyfoot March" and "Bull Frog Blues"; "Have a Heart" and "Welcome Honey to Your Old Plantation Home"; "You're a Dangerous Girl" and "I'm Going Way Back Home and Have a Wonderful Time"; and "Pretty Baby" and "When You Drop Off at Cairo, Illinois."

The Columbia best sellers included. "You're a Dangerous Girl," and "On the Old Dominion Line"; "Hill and Dale," and "Daly's Recl"; "If

Big Dealers Everywhere Have Swung Into Line

The Brunswick Phonograph is a big success right now. Big concerns all over the country have taken the agency for this great instrument. And the volume of advance orders is growing by the minute. Open territory is growing scarcer. But for those who act quickly, there is still some left. The

Brunswick Phonograph and Pathé Records

mean steady, permanent business for the far-sighted dealers who have secured their share of our first limited allotment. They are in a position to meet the selling opportunity that will be created by our fall and winter advertising campaign.

This campaign will be full of whalebone and ginger. It is being prepared now. When it breaks, there will be a big stir and brisk trading. You can cash in on it big—if you *will*. The time for preparation is *now*.

The Brunswick Phonograph means tremendous *value*. It means a wonderful saving for your customers. That's because we lead in the production of first-class cabinet work in the United States. We cut, mill and season *all* the wood we use. Think of that saving. Add to our manufacturing facilities, the wonderful Pathé achievement in the perfection of records and you have a combination that is truly unassailable. Write or wire for particulars *to-day*.

The Brunswick-Balke-Collender Co.

Dept. 204 623-633 S. Wabash Avenue CHICAGO

The Empire Proposition Is a Big Winner

Great interest and enthusiasm has been aroused among dealers everywhere regarding the EMPIRE Talking Machine. Not only are old dealers changing to the quicker-selling EMPIRE—but dealers who have never handled Talking Machines before are taking on the EMPIRE line and making it a profitable department. That is because the EMPIRE has opened up a newer, wider field for Talking Machine sales through its unusual and striking improvements.

HERE ARE SOME OF THE WINNING FEATURES

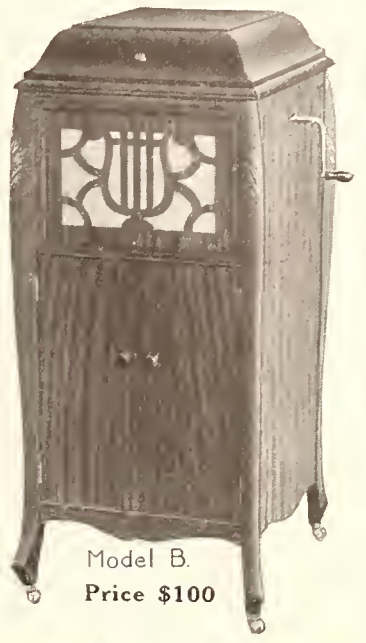
The Empire plays any record.
The Empire has a Perfect Automatic Stop.
The Empire designs are strikingly original.
The Empire has a wonderful Tone Modifier.
The Empire Tonal Quality is clearest, strongest, sweetest.
The Empire covers have "a support without a catch."
The Empire is unsurpassed in workmanship and finish.

Empire

—the Machine that Plays any Record

We have a splendid proposition for you, including a complete and original campaign of dealer helps—our new and beautiful catalog describing the complete Empire Line is ready—the catalog and full information will come to you by return mail without obligating you in any way if you say the word. **Our exclusive territory plan** makes it necessary for anyone interested to get in touch with us quickly.

EMPIRE TALKING MACHINE CO.
John H. Steinmetz, President
Some Valuable Jobbing Territory Still Open
429 S. Wabash Ave., Chicago



FROM OUR CHICAGO HEADQUARTERS—(Continued from page 67)

I Knock the 'L' Out of Kelly," and "The Greatest Battle Song of All"; "Down Where the Swanee River Flows," and "I Sent My Wife to the Thousand Isles"; "Missouri Waltz," and "The Waltz We Love"; and "Do You Remember?" and "A Perfect Day."

The six best sellers this month in the Edison library were: "Hilo March," Hawaiian Guitars, and "Medley of Hawaiian Airs"; "If I Knock the 'L' Out of Kelly," and "Since Mother Goes to Movie Shows"; "Oh, Promise Me," and "Sweetest Story Ever Told"; "American Fantasie," and "National Emblem March"; "I Want All the World to Know," and "Rackety Coo"; and "Monologo," and "Amour! Veins aider ma failblesse."

Turntable Felts

The Widney Co., of this city, are meeting with marked success in that department of their business devoted to furnishing talking machine manufacturers with felt turntable coverings, bumpers, etc. They have been fortunate in securing ample stocks of felts especially suitable for these purposes and have on hand a large stock of standard sizes in various colors, with which they are able to make prompt deliveries. Manufacturers of talking machines are invited to visit the company's modern plant in the Patton Building at 161 West Harrison street, and familiarize themselves with the superior facilities enjoyed by the company.

New Columbia Dealers

Eller & Kogan have just opened a talking machine store at 2702 West Division street. They will handle Columbia goods exclusively.

Kennedy Furniture Co. have established a Columbia department at their store on Twelfth street, near Fortieth. The success of the graphophone department in Kennedy's other stores has induced them to get their share of the business in this populous locality.

The Chicago office of the Columbia Graphophone Co. has also made arrangements with the Espenheim Co., an important Milwaukee concern, by which they will open a Columbia graphophone department. E. B. Fryer will give his personal attention to this branch of the business.

The Lincoln avenue store of the Fish Furniture Co. has also added a Columbia department. Several attractive booths are now being constructed.

Stradivara Making Progress

That the "Stradivara" phonograph is making rapid progress in the Middle West, is evidenced by the pile of orders to be seen on the desk of Elmon Armstrong, Western representative of the company, whose office is at room 1500, Republic Building, Chicago.

Mr. Armstrong is one of the veterans of the music trade, and it is not surprising that his experience and wide acquaintance, combined with the Stradivara machine, should result in big sales.

New Space for Vitanola Co.

Another entire floor has been taken over by the Vitanola Co., in the building located at 208 South Wabash avenue. This addition comprises almost 10,000 square feet of space, and will prove to be of great service during the fall rush that is already making its coming felt.

Both H. T. and S. S. Schiff are doing considerable night work already in connection with the work of new agency appointments, and dealers who are planning a big campaign during the coming months with the Vitanola lines.

New Location Proves Desirable

The new location of the McCauley & Nevers talking machine shop is proving to be a good one. The concern which was formerly located at 116 North Fifth avenue, is now at 157 West Madison street, where it exclusively enjoys the patronage of that busy section of the "Loop." The company moved into its new store a little over a month ago, and the August sales of machines and records are almost double the amount sold at the old address during August of last year.

Edward Nevers, Jr., has been enjoying a vacation in the East, and in his absence his partner, George W. McCauley, was in charge. Both of them look for a very busy fall, and are making plans to meet it. The concern handles both the Victor and Edison lines.

Abelowitz a Visitor

A visitor to Chicago recently, who is widely known in the talking machine trade, was Chester I. Abelowitz, manager of the talking machine department of A. Herz, Terre Haute, Ind.

Mr. Abelowitz had been in the East visiting his father, who is one of the oldest dealers in New York, and had also been spending much time at the Victor factories at Camden, N. J. In referring to his visit at the big Victor plant Mr. Abelowitz remarked, "It is simply a stupendous thing. Thousands upon thousands of men and women each doing his work in a most efficient fashion—wonderful machines that seem to be of almost human intelligence—all this makes one ask himself 'where do they all come from?' And yet when the holidays come on we will be wondering where they have all gone. Personally, I look to see the biggest talking machine business that the firm of A. Herz ever enjoyed, and I will be badly disappointed if we do not break all records both in machines and record sales. We are preparing for it by moving our entire department from the fourth to main floor, where we will have a lot of additional floor space and six more booths. Our sales force will also be considerably enlarged. I am planning some recitals for the purpose of quickening interest, and these will be held in our tea room on the fourth floor. Admission will be by ticket as in our previous concerts. All styles are selling well, but the X.'s, XI.'s and XIV.'s are particularly popular. We are also selling a lot of foreign records."

In this connection it is interesting to note that Mr. Abelowitz speaks five foreign languages, German, Bohemian, Russian, Polish and Slavic. Perhaps this is one reason why foreign records count for so much in Mr. Abelowitz's department.

Mozart Phonograph Co. Organized

The Mozart Phonograph Co., which is capitalized at $10,000, has been organized to manufacture talking machines in this city. The officers are Edmund L. Brunswick, president; T. Proulx, vice-president, and C. A. Golding, secretary and treasurer. The line will be distinguished by several features, including a 19½-inch throat or sound chamber. The sound chamber will be below the record compartments. The machines will be driven by both electric and spring motors, and they will play either lateral cut or the hill-and-dale types of records. Four styles, which are priced at $75, $100, $150 and $200, are now being placed upon the market. In all probability this will be added to before long.

"Our cabinets are so designed," said Mr. Brunswick. "As to make possible a throat which has a minimum amount of vibrating surface and the maximum amount of sound amplifying space. Our office for the present will

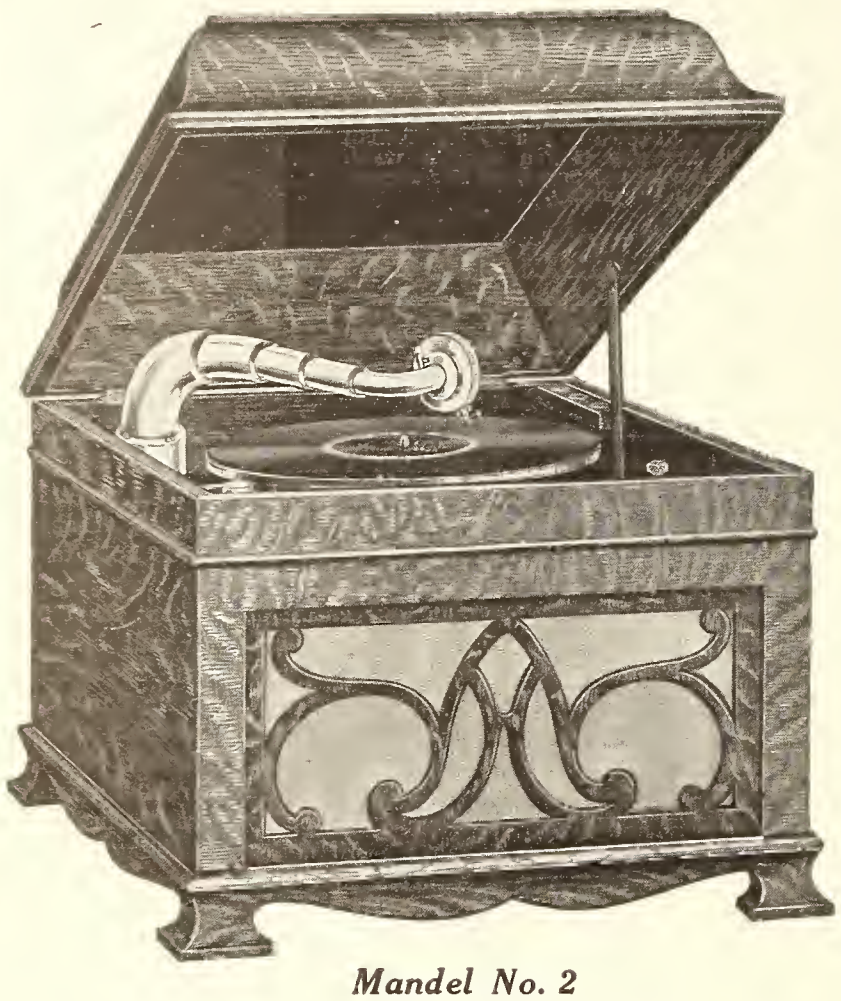
Easy Sales and 100% Profit



Mandel No. 2

on the

MANDEL Line

Dealers—here's your opportunity to connect up with the livest phonograph proposition on the market to-day. Get this straight.

1st—We've got competition beaten on quality.

2nd—Our goods sell for half the price of others.

3rd—You make 100% on each sale.

What does this mean to you?

It means (1) that with the Mandel Line you would get your share of phonograph business on sheer merit, on quality of the phonograph itself. No better-looking, better-playing phonograph has ever been built.

It means (2) that the Mandel retail price of $35 will certainly draw a lot of trade your way. People are now asked to pay $50 to $75 for Table Models not one bit better—they will come to you to save money.

It means (3) that the large margin of profit (100%) and the large number of sales will give you greater returns in actual CASH PROFITS than anything else you could tie up with.

Best Proposition Ever Put Up to the Dealer

Look this proposition squarely in the face. With these facts before you, you cannot afford to pass it by. We make it easy for you to accept. Just write us that you are interested and we'll immediately mail you full particulars of our free trial offer. We'll gladly send you either one or both of the models shown here for a free demonstration without obligation to you. Let the MANDEL Phonograph play and talk for itself. Compare it with any machine in design, general appearance and tone quality—even with phonographs costing double the money, and then decide whether or not you want to handle our line.

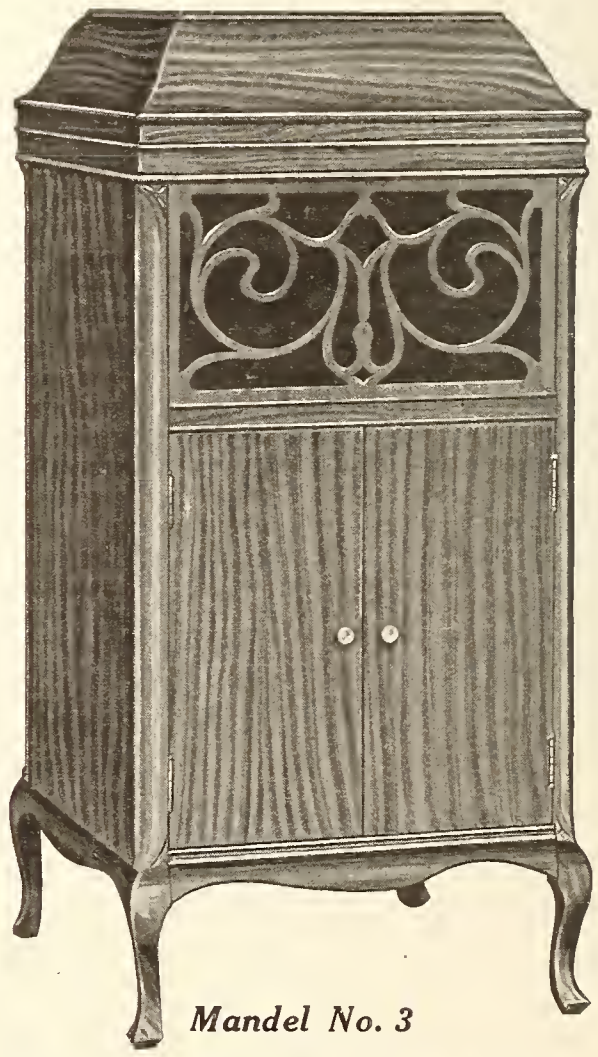
The Mandel Table Model, No. 2—regular retail value $50 to $75. The Mandel retail price only $35.

The Mandel Floor Model, No. 3—regular retail value $150 to $200. The Mandel retail price only $100.

Both these phonographs answer the demand for a high-grade phonograph at a low price. This is your chance to get in on the ground floor. It opens BIG SALES opportunities that you can't afford to pass up.

Write For Free Trial Offer Today—SURE

This offer comes direct from us, the manufacturer. We employ no salesman, no jobbers. Saving on selling costs enables us to quote you rock-bottom prices which net you 100% profit on our line. Write for full particulars at once. This is undoubtedly the Greatest Factory-to-Dealer phonograph proposition ever made and merits your instant consideration.



Mandel No. 3

be at 14 West Washington street, Chicago.

Automatic Brake Meets With Big Response

J. F. Green, manager of the Perfect Automatic Brake Co., of Chicago, reports big sales on the stop which his concern has placed upon the market. "Following our announcement in the August World we received responses from all over the country," said he, "which shows that the market is more than ready for an automatic brake that is as simple and inexpensive as we offer. We have been obliged in numerous cases to ask the patience of those interested, but we are making deliveries as fast as possible and increasing our output."

Remarkable Columbia Display

The initial window display of Columbia Grafonolas made by the great Chicago department store of Mandel Bros., who, as reported in last month's World, have inaugurated a Columbia department—their first venture in the

Mandel Bros.' Columbia Display

talking machine line—has attracted much attention and praise. From all reports the department is proving a remarkable success from the start, and the pulling power of the Columbia line is evidenced by this fact, although they have not as yet indulged in much space in the papers. The department is located on the ninth floor of the big store, and yet business is developing at a rate that has convinced Mandel Bros. that their decision was an excellent one, judging from the progress made under somewhat adverse conditions.

Flentye on Ohio Trip

H. L. Flentye, of Erb & Flentye, local representatives of the Klanke Furniture Co., of Piqua, O., leaves for a trip through Ohio the coming week. While at Piqua, Mr. Flentye will spend much time at the Klanke factory with J. C. Ullery, sales manager.

Messrs. Erb and Flentye have been quietly handling the Klanke Bros. line for some months from their offices in the People's Life Building in Chicago.

Brunswick Phonograph Shipments

The Brunswick-Balke-Collender Co. has made its initial shipments to dealers within the past two weeks and expects by October 1 to be in a position to supply initial stock orders from the various agents it has established and will establish. The past month the company has gotten in nice shape in its new ground floor warerooms at 611 Wabash avenue, which will be devoted exclusively to Brunswick phonographs and Pathé records. There are five handsome demonstration rooms and visiting dealers can now inspect the entire line of cabinet machines, ranging from $60 to $105 the retail price. W. A. Gardner is in charge.

New FlexiFile Warerooms

The FlexiFile Sales Co. has moved from the offices on the third floor of the Webster Building to fine ground floor warerooms in the same building at 327 South LaSalle street. Here it has an excellent showing of the FlexiFile record cabinets.

Victor Agency for New Cable Store

The Cable Piano Co., which represents the retail department of the Cable Company, is adding two stores to its piano warerooms at the corner of Jackson boulevard and Wabash avenue, and open a handsome talking machine department, handling the Victor line. The new space is adjoining the present quarters and is on the Jackson boulevard side. This will give the Victor representation on three of the four famous "music corners" of Chicago. Lyon & Healy is directly across Jackson boulevard and the Talking Machine Shops is on the northwest corner. Percy A. Kimberley, who is in charge of the present retail piano store, will also manage the talking machine department.

$1,000 Machine on Display

The $1,000 machine of the Sonora Phonograph Corporation has been received at the local offices of the Sonora Co. and Manager Thomas R. Johnson is proudly exhibiting it to numerous visitors. It is a very handsome piece of work and possesses a beautiful tone.

Mr. Johnson reports August as being "great and September greater," with prospects for the balance of the year as record breaking.

One of the visitors to the Sonora offices recently was Mr. Bull, in charge of the Sonora department of the Werve Furniture Co., of Kenosha, Wis.

W. W. Kimball Store Relinquishes Victor

The local retail department of the W. W. Kimball Co., which occupies the southwest corner of Jackson boulevard and Wabash avenue, has relinquished its Victor agency. The company will continue to handle the Columbia, Pathé and the new Kimball phonograph. Manager Cullen will continue in charge.

Brings Out Electric Motor

William R. Everett, Western representative of the Crescent Talking Machine Co., is at work on an electric motor for talking machines. Mr. Everett says that his new product will operate on either a direct or alternating current or storage battery. He also says that it cannot heat or burn out and that a 10 per cent. difference in line voltage makes less than 1 per cent. difference in the speed of the motor.

Mr. Everett is enjoying good sales with the Crescent line, but has been somewhat hampered in getting all the goods he requires. Deliveries, however, have been improving rapidly and he hopes to take care of all his customers very shortly.

Majestic in New Retail Store

C. A. Hartman, of the new Majestic Phono-

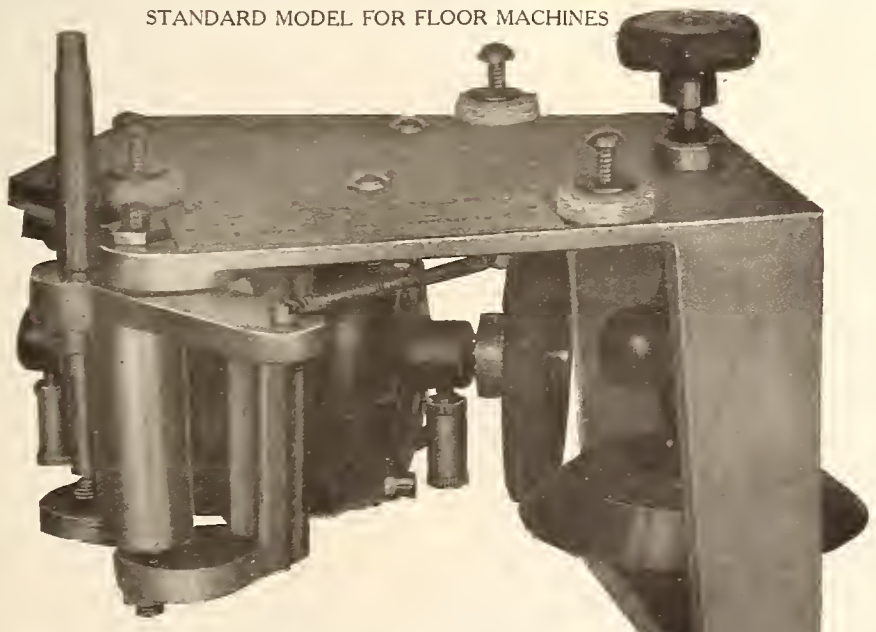
(Continued on page 72)

The Electrophone Motor

"No Phonograph Is Better Than Its Motor"

A New Electric Phonograph Motor Built on a New Principle

STANDARD MODEL FOR FLOOR MACHINES



ELECTROPHONE motors are furnished complete with 12 inch turn table, Universal Electric motor, operating on all currents, electrical switches, silk wire, speed regulator, felt and steel washers. Finished in black enamel. Nickel finish extra.

After months of experimenting, testing, and redesigning, we now offer a truly perfect Electric Phonograph Motor.

Realizing the demand for a high grade electric drive, we have aimed to produce a motor simple in design and operation, of sound mechanical construction and permanent reliability. The ELECTROPHONE motor is not a "make-shift" copied over night from the ordinary spring motor. A new principle has been brought into play—a principle that is a proven success, and certain to make for a BETTER motor.

You, Mr. Phonograph Manufacturer, appreciate only too well the importance of the motor used, and the difficulty in obtaining a really satisfactory motor. Study the illustration opposite.

Compare the ELECTROPHONE motor with others you have seen. Here's simplicity itself. No gears, no noise. No springs; self-adjusting drive wheels; ball bearing throughout. No fine adjustments, nothing to get out of order. In short, we have eliminated the "trouble makers."

You, who have had experience in buying phonograph motors (and keeping them running), investigate for yourself the advantages to be found only in the ELECTROPHONE motor.

graph Co., has made arrangements whereby the company is opening a handsome retail establishment at 15 East Adams street. These are the quarters formerly occupied by the Pathé-Pathephone Shop. The yearly rental is said to be $7,000. Oscar J. Kloer will be in charge.

The company is busily engaged in bringing out the new style machines which were designed for the company by M. Herbert. Mr. Herbert is noted as being the designer of the interior of the residence of Charles A. Schwab, the multimillionaire steel magnate.

Rothschild's Department Increased

The talking machine department of Rothschild & Co. has been enlarged recently by the addition of considerable floor space, and the installation of new booths. Manager Dvorak arranged for the additional facilities in anticipation of a greatly increased fall business.

What's the Remedy?

One of the most ambitious of Chicago talking machine dealers sold a large machine recently to a party he had been "chasing" for almost a year. The buyer was a choleric old gentleman of the sort that is quick to anger and quick to cancel orders. He selected thirty records to be delivered with the machine. To the consternation of the dealer it curiously enough happened that only four of the thirty records were in stock, while it was impossible to secure the missing twenty-six from the distributor. The dealer delivered the machine, however, and sent a salesman out with the four records. As was anticipated, the old gentleman "went up in the air," but the salesman put on the most soothing of the records that he had brought out and meanwhile calmed the irate purchaser as best he could. Whether it was the salesman's diplomatic arguments, or the mellow notes of a 'cello selection is not known, but at last the customer was mollified, and he decided to keep the machine.

The dealer wrote a hot letter to the manufacturer, and the manufacturer wrote back why it was that stocks were so low and gave an imposing array of facts and figures on increased production. Everybody blames everyone else when the real fault of the situation lies in the fact that the talking machine business is one of the most prosperous of the American industries.

Six Best Pathé Sellers

The six best Pathé sellers the past month were: "The Maja and the Nightingale" from "Goyescas," and "Ave Maria" (Gounod); La Juive, "Rachael, quand der Seigneur," and Mignon, "Air do Titania;" "My Own Iona" and "Waikiki Mermaid;" "Lo, Hear the Gentle Lark" and "The Fairy Flute;" "If I Find the Girl" and "My Grandfather's Girl;" "There's a Quaker Down in Quaker Town" and "Morning, Noon and Night."

Completing Sales Organization

The Brunswick-Balke-Collender Co. are rapidly getting their wholesale organization for the distributing of Brunswick phonographs and Pathé records in working order. Will Davenport, who has been in charge of the selling end of the phonograph department, states that the various branch houses are now receiving jobbing stocks of Pathé records and that it will not be long before samples, at least of the Brunswick phonographs, will be on exhibition at all the branches. Stock shipments to dealers will commence about October 1.

A. J. Kendrick, well known in the talking machine trade, and until recently covering the Pacific Coast territory for the Victor Co., has been made Central Western sales manager for the phonograph department of the Brunswick-Balke-Collender Co. He will travel from Chicago and will cover the territory from Canada south and from Pittsburgh to the Mississippi. He is now posting up on the line and will leave on his initial trip in about ten days.

R. J. Waters, who has been covering Western territory for the Pathé Frères, will be Western sales manager, making his headquarters at the Kansas City branch of the Brunswick-Balke-Collender Co.

J. F. Brophy, well known in the Eastern trade, will cover that territory for the Brunswick-Balke-Collender Co., making his headquarters at the New York office.

Personals and Visitors

E. B. Bartlett, vice-president of the W. W. Kimball Co., who was one of the prime movers in bringing out the Kimball phonograph, has returned from a vacation spent at Lockhyrst Beach, on Lake Winnebago, Wis.

H. H. Schwenker, traveling mechanic for the Victor Co., is in Chicago on one of his Western trips made with a view of instructing jobbers and dealers in regard to repair work and Victor goods.

T. B. Stone, of the retail machine sales department of Lyon & Healy, leaves on the 15th for a two weeks' vacation to be spent in the East and which will include a visit to the Victor factory.

W. F. Stanke, manager of the New Orleans branch of the Columbia Graphophone Co., paid a visit to the Chicago office this week on his return home from a vacation in the northern lake region.

Among the recent visiting dealers were Ray Bannon, Morris, Ill., and W. H. Aton, Baraboo, Wis.

G. P. Ellis, of the Chicago Talking Machine Co., has just returned from a vacation spent at Grand Beach, Mich.

Mr. Miller, recently appointed special Victor traveler for Wisconsin, visited the Chicago jobbers this week.

A. G. Kunde, well known Columbia jobber of Milwaukee, accompanied by his wife and

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 72)

family, spent Sunday with C. F. Baer, manager of the Chicago office of the Columbia Co., at the latter's attractive new summer home on Lake Catherine, near Antioch, Ill.

George W. Lyle, sales agent for the Domestic Talking Machine Corporation, of Philadelphia, was a visitor to Chicago in the course of a visit to some of the larger Western centers.

L. E. Noble, assistant manager of the wholesale talking machine department of the Rudolph Wurlitzer Co., has returned from a trip to the East, which included a trip to the Victor factory.

Local offices of the Piqua Cabinet Co., at Piqua, O., have been arranged for by Sales Manager R. E. Babylon at Room 1312, 130 North Fifth avenue.

Harry W. Carey, of the wholesale forces of the Vocalion division of the Aeolian Co., was a recent visitor to Chicago.

Herbert P. Gibbs, who travels for the talking machine department of the Chicago branch of the Rudolph Wurlitzer Co., is the proud father of a new boy who arrived at his home in Oak Park.

William R. Martin, district representative of the Sonora Phonograph Corporation, is on a trip through Wisconsin and Minnesota.

Concern Discontinues

The Franklin Sales Co., 28 South Fifth avenue, makers and distributors of talking machines, has discontinued.

Increase Magnola Manufacturing Facilities

An extensive addition is now being made to the big plant of the M. Schulz Co. to provide additional facilities for the Magnola Talking Machine Co., manufacturer of Magnola talking machines, which is officered by the same experienced men as the M. Schulz Co. Additional stories will be built on the main plant, furnishing 25,000 additional square feet of space. This will be used almost entirely for the finishing department for Magnola cabinets. President Otto Schulz has every reason to be gratified with the reception which the Magnola talking machines received in the trade. The new styles now ready for shipment have some additional features which have received the enthusiastic approval of those who have seen them, both as to architectural appearance and tonal qualities.

Pathé Happenings

"Things are picking up with a whoop," said Harry K. O'Neill, of the State street Pathephone Shops. "We sold more goods in the first three days after Labor Day than in the entire first half of the month of August, and sales are continuing to come faster all the time. We are preparing for a big fall trade and have just completed the installation of six additional demonstrating booths on our mezzanine floor."

The Chicago office of the Pathé distributing division of the Hallet & Davis Piano Co., at 17 North Wabash avenue, has now been thoroughly established by Frank J. Bowers and R. O. Ainslie. A large stock has been received and is much in evidence at the local office in the Shops Building. The latter is in addition to the principal stocks held in the local warehouse. Hugh McGreal and M. L. Barber are now actively traveling out of these offices, and Mr. Bowers has made numerous trips.

One of the recent visitors to the offices was Max Bigel, of J. Bigel & Sons, Pathé dealers of Manitowoc, Wis.

OPEN DEPARTMENT IN FT. WAYNE

Wolf & Desauer Give Extensive Space to Victrolas and Records—Edward F. Ginsberg in Charge as Manager—Well Experienced

FORT WAYNE, IND., September 9.—Wolf & Desauer, the large department store of this city, have just opened an exclusive Victrola department which will occupy extensive space on the main floor of the present building. They are

Edward F. Ginsberg

also working on plans for a new store in which the Victor department will have still larger main floor quarters with twelve private demonstration booths. The manager of the department is Edward F. Ginsberg, an energetic young talking machine man who came to Fort Wayne after a most successful career in the Eastern trade. He was last connected with Landay Bros.' Thirty-fourth street store in New York, where he made a remarkable sales record. His decision to come to Fort Wayne was the conclusion of a pretty romance which ended in his marriage to one of the city's fair daughters. He wished to ratify the young woman's natural desire to remain in her home town, and consequently set to work to make a position for himself here in the talking machine field. He succeeded in interesting Wolf & Desauer, and from the manner in which the business is starting off the concern will have no cause to regret their decision.

PATENTS COVER FIBRE NEEDLES

Have Been Successful in Keeping Market Free From Imitations to Date—Marketing Needles That Are Claimed to Come From Japan

CHICAGO, ILL., September 5.—It was inevitable that the wonderful success of the fibre needle should sooner or later cause imitations to appear. The United States patents issued to F. D. Hall and assigned to the B. & H. Fibre Manufacturing Co. are very comprehensive, and have hitherto kept the market free from competitive products. However, the temptation seems to have been too great to be resisted and some needles purporting to come from Japan have recently made their way on the American market. They have been offered in a quiet sort of way, however, and a large proportion of jobbers and dealers are not aware of their presence. They have not been sold in sufficient quantities to make them a menace to the B. & H. Co.'s business, but President Hall states that their quality is so inferior that he wished the trade generally to know that an effort to foist a spurious and totally unsatisfactory article on the market is being made in order that the reputation of the genuine fibre needle suffer no injury.

In one case where these goods were offered it is understood the direct statement was made that the goods were an infringement on the Hall patents, and that the purchaser would not be guaranteed against legal proceedings.

The factory of the B. & H. Fibre Manufacturing Co. is now undergoing a general cleaning and thorough overhauling preparatory to placing on the market under their own name the fibre needles so well known in the trade.

DELEGATES INSPECT VICTOR PLANT

CAMDEN, N. J., September 14.—The delegates to the Atlantic Deeper Waterways Association are due to arrive here to-morrow morning, and will spend the entire day in Camden and vicinity, inspecting the new waterworks at Morris station, and other points of interest. In the morning the delegates will make a tour of the Victor Talking Machine Co.'s plant, where the processes of making talking machines and records will be explained to them.

The Vista Phonograph Corporation, of Chicago, Ill., was recently incorporated for the purpose of manufacturing and dealing in talking machines and accessories. The capitalization of the new concern is $15,000, the incorporators being Emil Rheinhold, Nathan Jerlaw and Hamilton Moses.

This is Personal to YOU

If I could come into your store today and have a few minutes' talk with you, I feel certain you would soon be doing a great deal bigger business than you are now.

I am not talking from hearsay or on theory. I have been the means of increasing the net profits of many retailers in furniture and other lines several thousands of dollars a year,—and with no increase in overhead expenses or at any risk to them.

I am the president of the Playerphone Talking Machine Company.

The Playerphone is one of the highest quality cabinet talking machines made. No limit has been placed on money or human skill to make the Playerphone the *best* instrument of its kind in existence. And I sincerely believe it is. It plays *all* makes of disc records, without complicated change of parts.

And I am selling the Playerphone in a new way,—a way which will interest *you*,—because you can make from $1,000 to $5,000 extra net profit selling the Playerphone, between now and Christmas. And this new way allows *every* one of your customers to buy a Playerphone without financial strain, and doesn't involve any risk of investment on your part.

I *know* it,—I can cite you plenty of cases, personally, if you'll give me the chance.

Besides the profit, the Playerphone is a handsome addition and wonderful attraction to your store,—bringing in lots of extra trade besides your regular customers.

Write me today,—sure. You'll never regret it.

Better yet,—come to Chicago and pay me a visit. If you then decide to handle the Playerphone, I'll refund your traveling expenses. That's how sure I am of what the Playerphone will do for *you*.

Watching the Music Come Out

"Ooo! You can just SEE the music come out!"

The Little Girl Is Almost Right!!

You *can* "see the music come out"—Almost—from a MAGNIFICENT MAGNOLA!

Magnola Tone *reflecting* construction attends to that. No cramped, smothered sounds are emitted from the MAGNOLA tone-chamber

Yet this is only one of the many features that make the name

Magnola Talking Machine

one to be remembered. It is new: but watch it GROW!

Tone Reflecting System—makes *clear* reproduction.

Tone Graduator—controls *volume* of tone at will.

Universal Sound-Box—plays *every type* of disc record.

Cases designed in *pure period styles*—Real adaptations by an eminent designer of art furniture.

Highest quality piano finish and workmanship—Reflecting the practice of a house long celebrated as makers of good pianos.

Send for descriptive literature and get in touch with us TO-DAY

KIESELHORST PIANO CO. TAKE ON THE VICTOR LINE

Every Piano House in Saint Louis Now Handling Talking Machines Exeepting Conroy Co. —Outlook Could Hardly Be Better—Silverstone's Edison Publieity—Inereased Demand for Aeolian-Vocalion—August a Great Month With the Columbia Co.

St. Louis, Mo., September 8.—To say that the talking machine business is good in St. Louis is a commonplace. The writer has written this statement truthfully every month for eight or nine years—with the exception of one or two months in the fall of 1914. It is better to measure the prosperity of the business in St. Louis by the new stores, that is the big downtown stores that go into the business with the intention of making money and which take up the line because they see in it great possibilities.

So this month we announce the step forward by saying that the Kieselhorst Piano Co. has become an exclusive Victor shop. Of course, that does not mean that the piano line will be given up, but that in company with the Mason & Hamlin line, Apollo players, Kimballs, etc., will be sold only the Victor talking machines and records.

To those of the readers who know E. A. Kieselhorst, it is not necessary to explain that this is a triumph for the talking machine. Mr. Kieselhorst is above all a business man. He takes up only such lines as he is convinced are good from a business standpoint. Also he goes deeply into any mercantile situation before he takes it up. It can be taken for granted that he has canvassed the talking machine situation with the utmost thoroughness before he went into it. He has weighed everything and has convinced himself that the talking machine business is as worthy of his attention as $1,000 grand pianos or $1,500 players.

Also Mr. Kieselhorst announces as he is entering the business that he will sell records on a strictly business plan, and that he will not avail himself of the custom now authorized by the Talking Machine Dealers' Association of requiring a customer to make returns on records taken out in twenty-four hours and to retain 25 per cent. of them.

The Kieselhorst warerooms are now entertaining the workingmen who will erect five booths that will be in keeping with the Kieselhorst way of doing things. These booths will contain the very latest ideas and conveniences. They are being erected on plans that have been very carefully considered from all angles. Mr. Kieselhorst has had as his aid in making his plans E. C. Rauth, vice-president of The Koerber-Brenner Music Co., Victor jobbers, who sold the opening stock to Mr. Kieselhorst and has been lending him his best advice. If wide experience, study and observation will do it, the Kieselhorst preparations should be the best for Mr. Rauth, who is president of the National Association of Talking Machine Jobbers, has examined all kinds and is not a novice at arranging plants.

The Kieselhorst entry draws attention to several rather surprising things in connection with the talking machine trade. One is that on the Kieselhorst block there are two large establishments selling the Victor line, Kieselhorst and the Smith-Reis Piano Co. Across the street, facing this block, is Aeolian Hall, selling Vocalions, Columbias and Columbia records; next door is the Thiebes Piano Co., selling Victors, Edisons and Columbias and all three kinds of records, next door again is the Columbia retail and wholesale store, and two doors west is the Pathephone shop. So talking machines are bearing a large proportion of the rent in this downtown section.

Also it is noted that there is now but one important piano house that does not sell talking machines, The Conroy Piano Co. It is rather strange that this is the case, for P. E. Conroy, president of the Conroy Co., is often referred to as "the father of the talking machine in St. Louis." Years ago when Mr. Edison had a practical monopoly of the market with his cylinder machine, Mr. Conroy represented that company here. He in time sold out to Mark Silverstone, who now represents the Edison line. Mr. Conroy's energy made quite a hit with Mr. Edison, who never fails to ask St. Louisians when he meets them: "How is my friend Pat Conroy?" Other talking machine dealers are making books on how long it will be until The Conroy Co. announces that it has taken on a talking machine line.

R. H. Gordon, master of the Pathephone shop, reports some very good business since he has established himself in his street level store. He has received an adequate stock of machines and has set himself to the task of organizing a sales force. He has some of the men out and will add to as rapidly as he can get suitable applicants.

L. Z. Bond, recently credit manager of the Columbia Co., has joined the Pathé staff.

Chas. Staffleback, manager of the talking machine department of Hellrung & Grimm, the heaviest Pathé retail distributors, has joined the Talking Machine Dealers' Association, and also has his business running smoothly in his new demonstration rooms. He finds the record business is much more easily handled under the new arrangement, although his former arrangement was the best possible outside of the booth system.

Mark Silverstone, president of the Silverstone Music Co., Edison jobbers, is continuing his series of advertisements in which remarks are made about Edison machines in his penmanship reproduced under his picture. One of the recent remarks was: "Would you like your favorite artist to come into your home and sing like a talking machine, or would you like a talking machine to come into your home and sing like your favorite artist?"

Mr. Silverstone is busy preparing for his next tone test on Edison day, at which time he also will entertain his dealers. There will be a business consultation, a banquet and a general good time. Marie Rappold will be the attraction at the tone test, and already there are inquiries as to tickets. The test will be held at the Victoria Theatre.

Mr. Silverstone made two trips last month to visit meetings of dealers. He wanted to see how other jobbers conducted them. He first went to Kansas City, where The Phonograph Co. had a meeting of dealers of that vicinity. Then to Des Moines.

The Shapleigh Hardware Co., of this city, announce a new phonograph that will sell for about $5. The sponsors say that the machine is to be sold chiefly for premium buisness.

At Aeolian Hall Manager Chrisler expresses himself as being very well pleased with the Vocalion business reports made to him since he arrived from Indianapolis. E. W. Guttenberg, manager of the Vocalion department since P. L. Hallahan returned to the pianos, says that he is going to permit the stock of machines he is able to obtain his only limit in selling. The present demand, he says, is running to the higher priced machines, and despite liberal shipments, he always has stock problems.

Manager Irby Reid says that August was the best month's business ever put on the books in the Columbia warerooms here, holiday rushes not excepted. Retail sales manager Phillipps says that in both machines and records, the August business was exceptional. The late song hits, he says, are coming through rapidly and are meeting with an enthusiastic reception.

"We have written some excellent new accounts," said Mr. Reid. "These have been in the smaller cities where there is an excellent opportunity, and we have obtained excellent representatives. Types of these are the Hunt Bros. Furniture Co., at Dyersburg and Humbolt, Tenn., and The Goetz Piano Co., at Moberly, Mo. Our business has developed so heavily that we have found it necessary to add a traveler to our staff, and J. J. Bennett will handle the territory east of the Mississippi. The new man will handle Missouri and Arkansas.

Owing to the increased business being done in the talking machine department of the Stix, Baer & Fuller Dry Goods Co., where Victor and Edison machines are handled, they are building six more sound-proof rooms, which gives them a total of seventeen rooms. This department, which is located in conjunction with the piano section of the business, is one of the finest in the country.

INSTALL FIVE NEW BOOTHS

Roemmelle Bros., talking machine and sporting goods dealers, at 2616 Jamaica avenue, Brooklyn, N. Y., enjoyed such a heavy increase in their Victrola business that they have found it necessary to install five additional sound-proof booths to take care of their trade.

The ROWLAND Sound Regulator

INSTANTLY

You Find the Record You Want in

Brown's Disc Record Cabinet

Quick finding of a record is what the owner of a talking machine wants

Your Customer Also Wants

a cabinet in which the records can LIE FLAT—FREE FROM WARPING AND PROTECTED FROM SCRATCHING, all of which exclusive features Brown's Disc Record Cabinet affords.

The inventor of this cabinet, having thousands of records in his home, began years ago studying the question of properly housing disc records.

He has discovered two fundamental principles: First, that to be instantly accessible, a Disc Record must be in a vertical position; second, that to prevent warping, the records should lie flat. He concluded that a Globe-Wernicke filing index in a flat drawer which could be dropped to a vertical position was obviously the one proper method to make finding a disc record really enjoyable.

So in Brown's Disc Record Cabinet you have combined the results of many years' experimenting on the part of a talking machine expert and the thirty-five years' experience with filing devices and "Built to Endure" cabinet construction on the part of the Globe-Wernicke Company.

In Brown's Disc Record Cabinet you have the two fundamental principles combined which will not be found in any other cabinet.

Brown's Disc Record Cabinet makes all other types of music cabinets obsolete.

CONNECTICUT ASSOCIATION IS ALIVE

Organization Which Has Voted to Admit Talking Machine Men to Membership Stands High in Music Trade of That State—Some Details

As was announced in The Talking Machine World the Connecticut Piano Dealers' Association at their last annual meeting held in Hartford in April, voted to admit the talking machine dealers of the State as members of the association. The Connecticut Piano Dealers' Association is a live organization and has high standing in the music trade, and for the benefit of the talking machine men may desire to take advantage of the opportunity to join the association, the following bit of association history supplied by Rudolph Steinert, secretary, will prove of interest:

"We organized about ten years ago, celebrating our tenth anniversary at our recent meeting last April. It is customary for us to have an annual meeting and banquet each year, which has been largely attended both by the members of the Connecticut piano trade and by members of the trade in general whom we frequently have as guests and visitors. We have open discussion and frequently have passed votes and resolutions in a number of ways that have helped general trade conditions in our vicinity, and we find that our dealers have abided largely by the resolutions and votes that have been passed. We do not make our resolutions compulsory, as that has been one thing we have tried to avoid ever since we formed, and I personally believe it is a reason our association stands almost alone in the country. We have discussed allowances on 'trade-ins.' It is customary for all Connecticut dealers to charge interest on time. Local associations are now considering charging interest on talking machine trades. We did away with the gift of piano scarfs some years ago.

"When we formed we were largely made up of piano and music dealers, but since then the talking machine dealers are so many that we voted at our last meeting, to invite them to become members of our association.

"The present officers of the Connecticut Piano Dealers' Association are: President, Max B. Leichter, New Haven, Conn.; vice-president,

M. B. Leichter, the President

A. P. McCoy, Waterbury, Conn.; treasurer, Willian Beers, Hartford, Conn.: and secretary, Rudolph Steinert, New Haven, Conn.

"Executive committee: A. C. Andrews, Willimantic, Conn.; J. F. Gill, Meriden, Conn.; Lyman Payne, Middletown, Conn.; Alfred Fox, Bridgeport, Conn.; A. B. Clinton, New Haven, Conn.; and L. A. Wheeler, Hartford, Conn."

The Thompson Music Shop, of 198 Main street, Hackensack, N. J., is having splendid success with the Edison Diamond Disc phonograph.

GREAT BUSINESS EXPANSION

Reported by the Artophone Co., of St. Louis—Increase of 1,500 Per Cent.—Occupying its New Quarters—Using New Motor

St. Louis, Mo., September 6.—The Artophone Co., of this city, has announced that its business has increased 1,500 per cent., as compared with its sales totals a few months ago, a record which it has every reason to view with pride. The company has just moved into its new six-story building at 1113 Olive street, and has extended an invitation to all members of the talking-machine trade to make this building their headquarters when visiting the "Mound City."

The company has also announced the perfection of a new, powerful motor which is being included as part of the equipment of all Artophone models. Other new features include a new tone-arm and sound-box, a laminated sound-producing wood horn and a tone modifier.

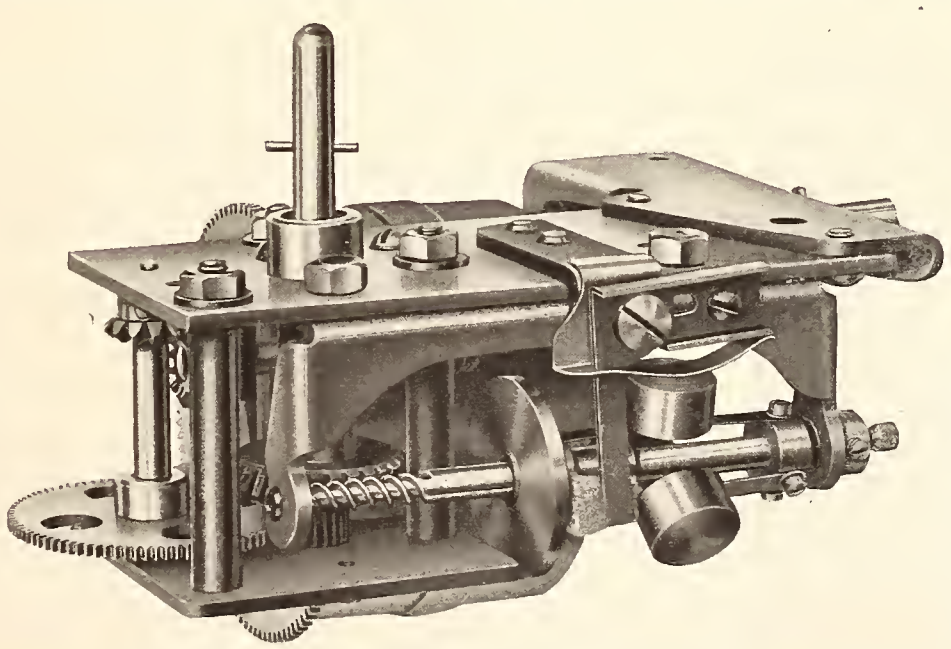
A considerable portion of the company's success may be attributed to the executive ability and untiring energy of Robt. H. Cone, Jr., president of the company, who has been associated with a number of prominent piano houses, and is thoroughly conversant with all phases of the talking-machine industry.

WILL BE AN AID TO DEALERS

The advertising department of the Columbia Co. has just announced that it has prepared cuts of the illustrations used in national Columbia publicity for one and two column newspaper use. These cuts will be furnished to the dealers free of charge, and their use will enable Columbia representatives to greatly enhance the value of the Columbia advertising campaign now carried on in over three hundred daily papers throughout the country.

The Pflughoeft Hartnup Co., of Hobart, Ind., has taken over the Victor Victrola agency formerly held by C. W. Spencer.

MEISSELBACH MOTORS



This is the No. 10 Meisselbach Motor—furnished with a speed indicator and dial and worm driven governor. Will play two 12" or three 10" lateral cut records. Silent winding.

No. 9 Meisselbach Motor is the same as the No. 10 except that it has no speed indicator and dial—furnished with a side regulating screw.

The name *Meisselbach* speaks for the highest quality in motor construction, embracing skill in workmanship and the best grade of materials. Machines built with Meisselbach motors are built to last.

In succeeding issues of this paper, illustrations and descriptions of all the models of Meisselbach motors will be shown. We also manufacture Tone Arms, Sound Boxes and other parts.

Immediate delivery. Prices on application.

A. F. Meisselbach & Bro., Newark, N. J.

REPAIRS

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World which was started with the April issue, is designed for the service of all classes of our readers, including those who make, and those who sell, talking machines. A talking machine out of order often reflects both upon the maker and dealer, and yet frequently the trouble is so slight that the simple knowledge of repairs will permit of the machine being put into proper running order, quickly and practically without expense. In the large cities talking machine repair shops are, of course, available, but this department should prove of particular value to the out-of-town talking machine men.

Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 25 East Fourteenth street, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

THE EXHIBITION SOUND BOX

I am going to take up in detail the assembling of the Victor Exhibition Sound Box, which is without doubt the best of all sound boxes now used by the Victor Co. We will imagine that we are sitting at a desk and have before us the parts and tools necessary to build a complete sound box. The part numbers which I use are from the Victor catalogs for tools and Exhibition sound box parts.

You will notice that we need very few tools for sound box work; in fact, only about nine are required:

1. A small screwdriver, which you can get at any hardware store.

2. A jeweler's screwdriver—supplied by the Victor Co.—Part No. 1486. Having it magnetized will save you the loss of many screws—and also many minutes of time—for, until you have tried, you have no idea how long it can take you to place the little diaphragm screw into position with a screwdriver that has not been magnetized.

3. A diaphragm piercer—supplied by the Victor Co.—Part No. 1487. This is made a size smaller in diameter than the diaphragm screw, so that after piercing hole in diaphragm, you can tap same with 00x112 tap, and be assured that when you place diaphragm screw in position you will have as tight a connection as possible.

4. A small lock nut wrench—supplied by the Victor Co.—Part No. 1846. There is nothing you can use to take the place of this little wrench, for if you try using a small pair of pliers you will surely smash the edges of the nuts and in some cases you will break the needle arm springs.

5. 00x112 tap—for threading hole in diaphragm and in needle arm—supplied by the Victor Co.

6. 1x56 tap—for threading hole for needle set screw—supplied by the Victor Co.

7. A small box of wax—Supplied by the Victor Co.—Part No. 804-A. I particularly request you to use this wax, which is a mixture of rosin and wax in just the proper proportion to run evenly and make an air-tight joint on needle arm screw.

8. A small machinist's hammer, which you can get at any hardware store.

9. A small alcohol lamp.

Also a small piece of wire for waxing, and a little white shellac.

Now to go ahead with our sound box. We will first take and examine closely each of the twenty-three parts of which it is made:

1. The front or cap ring—part No. 311-ANG—made of brass and plated. On the bottom you notice two little knife-edge points, called fulcrum points, on which the needle bar rocks. At right angles to the ring are two little tabs drilled for the needle arm spring screws—part No. 485-Blue. See that these tabs are straight and that fulcrum points are filed perfectly even.

2. The rubber insulators—part No. 304-PF—of which two are used. These should be of good rubber, with no cracks. They are 5¼ inches long and about ⅛ of an inch in diameter.

3. The mica or diaphragm—part No. 414—should be perfectly clear, without cracks or air spaces.

4. The metal back—part No. 761-BN—made of brass and enameled black for the nickel-plated boxes and plated for the gold sound boxes.

5. The needle arms and set screw—parts No. 312-D and No. 1228-Blue. Be sure that needle screw fits good and snug in the hole and be sure that hole in toe of arm for diaphragm screw is tapped free of any obstructions.

6. The arm springs—part No. 487-Blue—of which we use two. See that they are not cracked and that they are bent exactly alike.

7. The two screws for fastening springs to needle arm—part No. 496-Blue.

8. The two needle arm spring screws—part No. 485-Blue. Try them in the holes on tabs of cap ring and see that they screw in easily.

9. The two lock nuts—part No. 78-WN—for locking spring screws tight so that position of needle arm cannot be changed when it has been correctly set.

10. Diaphragm screw—part No. 471.

11. Diaphragm screw washer—part No. 1030—which prevents forcing the head of diaphragm screw through the mica.

12. The three screws for fastening metal back to cap ring—part No. 485-Blue.

13. The rubber back—part No. 719-A.

14. The two screws for fastening rubber back into position—part No. 594-WN.

Now that you have become familiar with each part and know that they are all in perfect condition, we will go ahead and assemble our box in the proper way.

First, place an insulator in the cap ring in such a position as to bring the joint directly under the bar of the needle arm. Put a little shellac around the top of the insulator to hold diaphragm in place—never use glue or mucilage. Put diaphragm in place—be sure that it is held firmly to the insulator by the shellac and be positive that its edge does not touch the cap at any spot.

If diaphragm touches cap ring at any place it will almost always cause a blast or false note,

Crescent Talking Machine Co.

89 CHAMBERS STREET NEW YORK CITY

so always be sure to shellac it in its proper position so that it does not touch. It is of great importance if you want the best results.

Now place the second insulator into position, the joint being placed on the opposite side of the cap ring to that of the other insulator. Put on metal back and set in the three screws which hold it in place—as tight as possible.

Take the needle arm and put on the springs at right angles to the arm, setting up the screws good and tight. Put the spring screws in springs and screw lock nuts into position. Now the needle arm is ready to set in place on the cap ring.

Put the two slots on the needle bar over the fulcrum points, screw in the two needle arm spring screws as evenly as possible, so that needle arm rests firmly on fulcrum points without any side motion.

The toe of the needle arm should clear the surface of the diaphragm about 1/1,000 of an inch. To get this distance with any degree of accuracy, hold box firmly in left hand and tap end of needle arm gently with finger nail of forefinger of right hand. If needle arm toe rests on diaphragm, result will be a heavy muffled sound (screw in on bottom tension screw); if needle arm toe is too far away from diaphragm, result will be no sound (screw in on top tension screw). When needle arm is in such position that the least move of the top tension screw to the right will, when tapped, result in a heavy muffled sound your adjustment will be correct and the toe of the arm will be found to clear the surface of the diaphragm about 1/1,000 of an inch.

The lock nuts on tension screws are now screwed up tight against the cap ring to prevent the position of the needle arm being changed.

Hold box in left hand with forefinger, pressing needle arm against diaphragm. Take piercing tool and pierce hole through diaphragm, letting point of piercer pass through tap hole in toe of needle arm. Then take 00x112 tap and run through diaphragm and needle arm toe holes to clear them of any obstructions.

Place diaphragm screw with its paper washer in position—which will pull needle arm toe down tight to surface of diaphragm.

Heating waxing wire, take a little wax and put a drop over the head of diaphragm screw and also over toe of needle arm.

Put on rubber back with its two screws, place needle set screw in needle arm and our sound box is complete and ready to be tested.

Causes for rattle and blast in sound boxes may be from any of the following defects in parts or in assembling: Old insulators—no life in the rubber; needle arm loose on fulcrum points; springs on needle arm loose; diaphragm not shellaced to insulators; needle arm not set at right tension; diaphragm screw loose or wax cracked and loose.

I am sure that you will agree with me that the assembling of an Exhibition sound box is very easy, and if each part is placed in its proper relation to the others (first being sure that each part is in itself absolutely right) no one should have any difficulty in repairing, adjusting or assembling them.

DISPLAYS AT ROCHESTER FAIR

Pianos and Talking Machines Well Represented at Annual Exposition Held in That City

ROCHESTER, N. Y., September 9.—There are quite a number of exhibits of talking machines and pianos at the Rochester Exposition and Horse Show held here this week.

Among the most attractive booths was that of Griffin & Bailey in which both pianos and talking machines were shown. A feature of the exhibit was the display of Columbia Grafonolas. The company's warerooms are at 98 North Clinton avenue. This concern also had an exhibit at the Rockport County Fair.

Another prominent booth was that of Ropelt & Pritchard, of 29 Elm street. This concern displayed the Ropelt & Sons pianos and players.

Gibbons & Stone, of 178 East Main street, had a corner booth which was arranged very artistically. In addition to pianos this concern displayed the entire line of Victor Victrolas.

The booth of Rankin Bros. was entirely enclosed in glass and there was shown therein several Decker & Sons pianos. A talking machine of local make was also shown.

RECORD LIST DISPLAY

Some New Ideas Embodied in the Products of Universal Fixture Corporation

The Universal Fixture Corporation, of New York City, is showing real vigor in its campaign to bring the dealer to a full realization of the possibilities in having record lists properly displayed. A new fixture has just been put out which holds the list of the month and which stands upright in the store window. The list itself stands on two short steel legs, set in a steel frame, and is kept in the upright position by a V-shaped metal leg which serves as a rear prop. The whole window stand display fixture is finished in baked-on black and matches the other bulletin display fixtures put out by this concern.

This company has also just issued a cleverly illustrated folder which brings out some rather convincing arguments relative to the company's swinging fixture that holds twelve monthly record lists. "Why hide last month's list when the new one appears?" is the catchy phrase used to bring out the "lies flat" feature of the Universal fixture.

NEW MANAGER FOR HENGERER CO.

BUFFALO, N. Y., September 9.—The William Hengerer Co., this city, recently made a change in its talking machine department and has installed Herbert A. Brennan as manager. Mr. Brennan has had considerable experience in the trade, having traveled for Thos. A. Edison, Inc., and having been connected at one time with Landay Bros., New York.

Makes any Phonograph Electric

This powerful little motor is the latest and best phonograph improvement ever brought out. It makes any phonograph electric, instantly with all the convenience and benefits of an electric machine. It does away with constant winding and rewinding and prevents the spoiling of a selection by the spring running down suddenly.

$12.50 List Price

Arnold PHONOMOTOR

Appeals to Every Phonograph Owner

This remarkable device is in big demand by phonograph lovers and meets a ready sale at a good, substantial profit. It is very simple to use and put in operation. Simply let the spring run down and take out the handle. Then set the Arnold Phonomotor so its soft rubber drive pulley touches the metal disc turn-table. Attach the plug to any electric light socket. Simply press the button and the record plays. When selection is finished, press the button again and the record stops—no cranking—no winding or rewinding.

ATTACHES OR DETACHES INSTANTLY

Does Not Harm or Deface Machine

There is absolutely no danger—no need to fear harming or defacing the phonograph, because there is nothing to alter or change. The Arnold Phonomotor operates without permanent attachment.

It is made by a firm who have made small motors for over 15 years and is the result of years of study to perfect a phonograph motor that would render the best possible reproduction of any selection of any kind. It is fully guaranteed.

We are specialists in the manufacture of small motors and invite responses from concerns who are in the market for small motors.

ARNOLD ELECTRIC CO.

1425 12th St. RACINE, WIS.

Nationally Advertised in *Saturday Evening Post* *Literary Digest*

The Arnold Phonomotor is advertised extensively in these two big advertising mediums, also in other periodicals. Phonograph owners have long wanted just such a device. The demand is there for a small motor like this. You can surely sell them to every one of your phonograph customers.

NEW EDISON DEALERS' ASSOCIATION FOR MILWAUKEE

Plans Now Under Way for Formation of Such an Organization—Edward Schuster & Co. Department Improved—Fire Wrecks Waltham Factory—New Stores Recently Opened —Various Lines That Are Popular—Flanner-Hafsoos Co. Celebrates Anniversary

MILWAUKEE, WIS., September 5.—August talking machine business in Milwaukee reached a considerably larger volume than that of a year ago for the same month, and due to the influences responsible for this increase, the trade at this time is looking forward to a brisk fall and winter season. Stocks have been reduced more rapidly than factories have been able to replenish them, and in some quarters apprehension is expressed over a possible shortage when the holiday trade gets into full swing. It is considered fortunate that records are coming through much more freely, which compensates in a measure for the dearth of machines. Nevertheless, the demand for records has been so great that there is no large surplus and the movement is none too large.

The Badger Talking Machine Co., Victor jobber for Wisconsin and Upper Michigan, has had one of the best summer seasons in its history. Officials of the company are anticipating a shortage of machines if the present demand is maintained, together with the seasonal acceleration.

The Edison Shop, State distributor of the Edison line, is fostering the new association of Edison dealers in Milwaukee, the principal object of which is to minimize the exchange evil in record business. H. W. Gausewitz, of the Edison Shop, is secretary of the association, and is meeting with much success in carrying out plans to improve the state of business.

Edward Schuster & Co. department stores have completed a general improvement scheme affecting all of the three big stores. Under the direction of Theodore G. Lehrner, manager of the talking machine department for all stores, the Victor shops in each store have been remodeled and enlarged. In the Third street store, the department has been moved from the third to the fourth floor, where considerable additional space has been released. The new equipment includes six large demonstrating booths. Five new booths have been installed in the Twelfth street store, in charge of J. H. Becker, and the department in the Mitchell street establishment has been augmented by the installation of seven booths.

The output of Imperial talking machines, the product of the Waltham and Netzow piano interests, has suffered a considerable reduction by reason of a conflagration in the big piano and talking machine plant at First and Becker streets on August 27. The building was damaged only $15,000, but the stock of raw and finished goods, fixtures, etc., were damaged from $100,000 to $125,000. The damage was mostly from water from the sprinkler system and the city fire streams. The company carried $186,500 of insurance. Adjustments are being made by the underwriters at this time, and it is hoped that by September 15, work can be undertaken on the rehabilitation of the plant.

A new talking machine store has been added to our already large list during the past month, when the Waldheim Co. took occupancy of its new ten-story building, 120 by 120 feet in size, at 206-212 West Water street. The company is the largest house furnisher in Wisconsin. Stanley V. Waldheim is manager of the talking machine department, which handles the Columbia exclusively.

The Kimball phonograph made its appearance at the local store of the W. W. Kimball Co. shortly after announcement was made that the Kimball Co. had made an important connection with the Pathé interests. The piano store has been rearranged to make room for a talking machine department of considerable size.

"August business was better than the average," said L. C. Parker, manager of the Victrola department at Gimbel Bros., to The World representative. "We have been sold out several times during July and August, and as we anticipate a large demand during the coming four months, we are praying that the factory will not be caught short-handed."

The Badger Talking Machine Shop is arranging for its fall and winter activities and will soon open its concert and recital hall, a feature made possible by the removal to the present location several months ago. Manager R. H. Zinke is introducing numerous innovations in Victor retailing, among them the promotion of piano accompaniments to Victor records. Competent instructors will be on hand at all times to teach customers the fine art of bringing the piano into perfect harmony with grand opera and other records. Mr. Zinke also is responsible for numerous attractive displays in the show windows. One of these included a setting of the accordion used by Peitro, who makes Victor records with Marconi Bros., who appeared at the Crystal a week or two ago. The Marconis gave daily concerts at the Badger shop each afternoon during their week's stay in Milwaukee.

The Musictrola, the product of Passow & Sons, Chicago, is getting a strong representation in the Wisconsin territory through the efforts of the Gether Piano Co., of this city.

T. W. Abell, the new manager of the Wisconsin and Upper Michigan territory of the Premier Talking Machine Co., with headquarters at 220 West Water street, is proving himself to be a fit successor to Park Adams, who was promoted to the position of manager of the new Detroit branch on August 1. Mr. Abell reports that wholesale as well as retail business is being well maintained.

Paul F. Seeger, manager of the talking machine department at Edmund Gram's, 414-416 Milwaukee street, which handles the Aeolian-Vocalion and Columbia, recently had the honor of being the guest of Arthur Shattuck, the famous pianist, on board his palatial steam yacht, "Mignon," while Mr. Shattuck was cruising in waters near Wisconsin, of which State he is a native.

Howard Shartle, of the Victor record department, spent a few days here last week as the guest of the Badger Talking Machine Co., Victor jobber.

The Flanner-Hafsoos Music House, which represents the Edison, is celebrating its twenty-fifth anniversary or silver jubilee at this time. The business was founded in September, 1891, by the late Joseph Flanner. The present organization is headed by Eric S. Hafsoos and Florian F. Flanner, the latter being manager of the Edison division.

A. G. Kunde, Wisconsin jobber for the Columbia line, is one of the most optimistic men in the trade, due to the advances Columbia business has made in recent months. Mr. Kunde's retailers also are in an enthusiastic frame of mind, he says, because of the large volume of transactions already made and in prospect.

D. G. Wilk, Victor dealer at Random Lake, Wis., was a caller at the Badger Talking Machine Co., Milwaukee, during last week and left a nice order for machines and records.

The Wisconsin Seating Co., New London, Wis., is now producing 100 cabinets for the Edison interest each working day. The production will be increased just as rapidly as additional help is available.

The Boston Furniture & Uundertaking Co., Stevens Point, Wis., has installed two new demonstrating booths of the large type. One

Louis Mann Goes on Record

Louis Mann is America's greatest character comedian and one of Broadway's leading stars. His clever dialect and remarkably humorous stories have brought ripples of laughter all along the Great White Way—the country's center of amusement.

We illustrate a scene in the office of the Emerson Phonograph Company, showing Louis Mann in the serious act of signing a contract to make Emerson Records exclusively. These records promise to become among the best sellers of our list of hits.

Cohen At The Telephone

is the title of Mr. Mann's first Emerson production. It will be released shortly.

Emerson 25c Double Discs

have become a firmly established standard in the Phonograph business, and have proved an instant source of profit to all dealers who carry them.

Emerson Double Disc Records play three-fourths the time of a standard 10-inch record. They can be played on all but one positive feed machine, without extra attachments.

The fall season is here—now is the time to place your first order. The investment is small, the turnover is quick, the profits are big.

Attach that coupon to your letterhead and mail it to us now! →

NEWS FROM MILWAUKEE TRADE

(*Continued from page 80*)

is constructed to represent a cottage of the early English period and is 18 by 7 feet in size, partitioned into two rooms, 79 by 9 feet. The booths are equipped with 16-inch electric fans, giving a change of air every two minutes.

The Hoeffler Piano Manufacturing Co., of this city, has concluded its initial campaign in behalf of the Starr phonograph throughout the Wisconsin territory and will institute a fall and winter drive within a few weeks' time.

John Schoonmaker, manager of the Victrola department at the Boston Store, has just returned from his vacation, spent at Cedar Lake, Wis., and supervising the finishing touches of the work of remodeling and enlarging the department in preparation for a brisk fall and holiday trade.

The Story & Clark Piano Co., which retails the Columbia, announces that it will discontinue its Milwaukee and Minneapolis branches, and maintain only the collection departments in these cities. George H. Eucker, manager of both stores, will leave Milwaukee shortly to assume the position of manager of the Story & Clark retail interests in New York.

Four new demonstrating booths have been installed in the Victrola department of the J. B. Bradford Piano Co., 411 Broadway.

Charles J. Orth, 274 West Water street, the Sonora representative, has undertaken an advertising campaign of large proportions to start in his fall business. July and August proved to be good business months in spite of the numerous hot spells.

G. H. Miller, the new Wisconsin traveling representative of the Victor Co., assumed his duties during the past week. Mr. Miller will make the Badger store, 135 Second street, his terminal headquarters.

The Kreiter Piano Co., 181 Third street, a Pathé retailer, says business has been eminently satisfactory during August, and is enlarging its stock to be adequately prepared for a heavy trade durig the coming four months.

TO REVISE OPERAPHONE CATALOG

All Operaphone Records to Bear Two Selections of the Same Type—Preparing for an Active Fall—Important Deal Closed

In completing preparations for its fall campaign, the Operaphone Manufacturing Corp. has arranged to revise its entire record catalog and supply all records in future with paper labels, the labels being black and printed in gold. The new labels are very attractive and cause the name of Operaphone to stand out prominently. In the earlier records the plan was followed of backing up vocal selections with instrumental numbers, and popular songs with semi-classic or vice versa. Under the new arrangement, selections will be backed up on the record with other numbers of the same type, thus each record will have two vocal selections or two instrumental selections as the case may be.

In announcing the revision of its record list, the Operaphone Corp. states that while the advertised price of Operaphone records will remain at 35 cents there will be no price restriction enforced but that the dealer may sell records at what price he sees fit, the margin of profit being large even should the record be sold for a quarter.

"We are looking forward to an unusually successful fall and winter," declared George Thoms, head of the company, and are well prepared to meet the demand. Our pressing plant has a capacity of over 200,000 records per month and improvements have also been made in our recording laboratory. We have also perfected very satisfactory distributing arrangements."

The Operaphone Corp. recently closed a deal with the Frank W. Williams Co., Chicago, the big mail order jobbing house, to feature Operaphone records in connection with the machines put out by that company. It is expected that the Williams Co. will take close to 50,000 records monthly.

MARKET NEW LINE OF PHONOGRAPHS

Rishell Phonograph Co. Enter Talking Machine Trade With Large Line of Machines—House Experienced in Cabinet Manufacture

The Rishell Phonograph Co., with executive offices and factories in Williamsport, Pa., have placed on the market a complete line of phonographs which are now being displayed at the company's show rooms in New York, Chicago, Philadelphia and Columbus. These phonographs have been in course of perfection for more than a year, as the company was desirous of offering their dealers a line which would be entirely satisfactory to themselves and their patrons.

Rishell phonographs are manufactured by the J. K. Rishell Furniture Co., of Williamsport, Pa, one of the country's leading manufacturers of dining and bed room suits and dining tables. J. K. Rishell, president of the Rishell Phonograph Co., and Ralph T. Smith, secretary, occupy the same position in the J. K. Rishell Furniture Co. This latter company had been in business forty-nine years, employing nearly 500 workmen, and occupying two large factories.

The company in the past manufactured cabinets for a number of the leading manufacturers, and the experience gleaned from this manufacturing has been an important factor in the production of Rishell phonographs, which embody several important patents.

A complete line of all the different styles of Rishell phonographs in all woods will be carried at the various show rooms, and representatives will cover the territory adjacent to each one of these show rooms. It is the company's intention to cater to the same class of trade with its phonographs as it has sold for many years in the furniture industry.

VISITING TRADE IN MIDDLE WEST

J. H. Roos, general manager of the National Talking Machine Co., New York, left Thursday for a two weeks' trip through the Middle West. Mr. Roos will introduce to the dealers in this territory the "National Bluebird" machines which the company placed on the market a few months ago.

These products are meeting with popular favor, and quite a number of desirable accounts have been opened by Mr. Roos and his sales staff during the past few weeks.

TALKING MACHINE EULOGIZED IN HEARST EDITORIAL

Particularly Strong Endorsement of the Standing of the Talking Machine in the Home—"To-day the Home Without an Instrument to Reproduce Voices of Artists Is Like a Home Without a Library"—New Inventions Place Music of Highest Quality Within Reach of All

That the educational campaigns being carried on by the talking machine companies are having the effect of increasing public appreciation of the higher musical value of the talking machine and of giving that instrument a more important standing in the eyes of those who write for and control the daily newspapers was strongly emphasized by an editorial published in the New York Evening Journal and other Hearst papers throughout the country recently. The editorial written by Arthur Brisbane was headed "The Machine That Talks and Sings Is the Voice of the Home," with the sub-head "To-day the House Without an Instrument to Reproduce the Voices of Artists, the Genius of Musicians, Is Like a House Without a Library." The text of the editorial was as follows:

"The machine that reproduces the human voice, musical instruments, all music, and dramatic power, is to the human race a discovery as great as the printing press, which gave us the printing of cheap books.

"The extraordinary inventions for artistic automatic piano playing are equally valuable and marvellous in their benefits to the race, in their spreading of education.

"The work of the greatest musicians, and the technical skill of the greatest artists can be reproduced at will, adding to the production the player's own temperament and feeling—without undergoing the long years of tedious, painful preparation and study, and without undergoing the torture of imperfect performance.

"The machine that reproduces the human voice and the machine that reproduces the piano recitals of the greatest artists of this age, are the greatest intellectual triumphs of this age. They mean more to the human race even than the flying machine or the wireless telegraph. For those are mechanical instruments, dealing only with the physical problems and the physical part of man. The marvellous inventions that put the musician's genius and the artistic talent of the professional performer within the reach of all are aids to the human intellect—and those are the most important of all aids.

"The self-respecting man would scarcely admit that he lives in a house without books.

"Just as great a misfortune—greater, even, for young people and for children—is to live in a house without the modern miracle of art, the machine that talks and sings, the piano that contains within itself, or the machine that gives a voice to the millions of pianos that are dumb because none in the household can make them speak.

"In ancient days few men—only the rich—could own good books.

"Each book was written by hand, illustrated by hand. Men traveled thousands of miles to visit the library, and the burning of a library was a misfortune for the whole of civilization.

"To-day the poorest man may own the greatest books. The intellectual genius of all ages is on the shelf, asking only to be taken and made part of the owner.

"As it was with books and the thoughts of the greatest writers, so it was, until recently, with music and the genius of the great musician.

"Music was for the few. Year after year of painful study was necessary to enable the individual to reproduce, even in a faulty manner, the creations of genius.

"Concerts and operas were few and expensive. The knowledge of the best music throughout this country was practically nil.

"To-day, thanks to the invention of the machine that speaks, not only the greatest music, but the greatest musicians, singers and players of musical instruments, are at the command of every family, of every mother and father, of every child.

"It is impossible to predict the wonderful results that will come to the human race in a few generations from this making of good music universal.

"Wherever the father and mother will it, the children may hear from their infancy the works of genius, the greatest composers, the most wonderful artists.

"Painful labor and the unsatisfactory results of musical study are done away with.

"The genius of Beethoven, the dramatic power and voice of the greatest artists, are at hand on your shelf, like the poems of Shakespeare—and great personality is added to the beauty of the music.

"There are many presents, useful and otherwise, that may be appropriately given.

"But for the home that lacks the singing and talking machine, with an equipment of good records, music gay and light, music serious and noble, there is but one gift to be thought of

"The greatest addition to the education of man since the days of Gutenberg is the machine that does for music what the printing press did for books and knowledge. If you haven't in your house a machine that makes all music and all artists your own, get one.

"If the friend to whom you mean to give a present lacks the modern machine of civilization, give him one, or give him a better one than he has.

"A man would feel himself disgraced if one, entering his house, should ask: 'Have you a book in this house?' The answer would be: 'Do you suppose that we are not civilized?'

"The house in which there is no machine to interpret musical genius and artistic genius is just as far from the latest civilization as the house in which there are no books."

INSTALL COLUMBIA DEPARTMENT

NIAGARA FALLS, N. Y., August 28.—The Arnson Furniture Co., of 1522 Main street, recently purchased a complete stock of Columbia Grafonolas and Columbia double disc records, and have installed a special department in their store for the extensive featuring of this line of talking machines.

UDELL
Cabinets

For Records

play a leading part in the sale of a talking machine outfit. This is true because a machine and a library of records *without* a Udell Record Cabinet are *not* complete.

Put it up to your customer and ask him where he is going to file his records. Of course, people buy what they see—so have several in your store. You not only get the profit on the cabinet but you are making a better record buyer. The importance of that cannot be overstated. A better record buyer because he takes some pride in the care and filing of his records. He knows just what he has because of the system used in filing.

The large capacity of a *Udell Record Cabinet* makes a consumer want to fill it up.

Yes, it's a mighty good proposition for *you* to push *Udell* cabinets.

You can get pictures and prices by writing to

1204 West 28th Street
Indianapolis, Ind.

READ THIS, YOU FISHERMEN

J. A. Erickson, Piano Man of Deland, Fla., Tells a Story About Some Real Fishing in His Part of the Country—Listens Good

DELAND, FLA., August 28.—J. A. Erickson, who handles the Starr pianos and player-pianos, as well as a line of talking machines in this city, has just returned from a trip to Daytona, Port Orange, Coronado and other nearby points, and did some excellent business. He has put in a large stock of instruments and declared that the fall prospects are excellent, particularly in view of a large orange crop that would bring good prices. A bumper crop of corn averaging from twenty-five to eighty bushels an acre will also mean that the farmers will have money to spend.

Mr. Erickson declares that the fish stories published in the trade papers about the catches of piano men in the North pale into insignificance when compared with Florida fishing. He states that F. M. Curry, one of his friends, while fishing in a small lake recently landed five fish in three casts, getting doubles twice and a single once, the five fish totalling twenty-six and one-half pounds; on the first strike, using the Dowagiac five-cluster minnow, a three and one-half pounder struck and an eight pounder was also hooked before the line could be reeled in. Two more fish, weighing five and one-half and six and one-half pounds respectively were landed in a similar manner in the second cast, while the third cast brought in a three pounder.

For the benefit of the unbelievers, Mr. Curry swore to the fact before a notary public and had his picture taken with the fish.

DEATH OF EMIL E. HERTER

Was Chief Mechanical Engineer for Thos. A. Edison for Over Thirty Years

Emil E. Herter, who for almost thirty years was Thomas A. Edison's chief mechanical engineer in the laboratory at West Orange, N. J., and who had worked on many of Mr. Edison's most important inventions, including the phonograph, died on Wednesday of last week at the Orange Memorial Hospital. He was fifty-nine years old.

TALKING MACHINE EXPORTS

The Figures for June Presented—Exports Show Increase for the Month

WASHINGTON, D. C., August 28.—In the summary of the exports and imports of the commerce of the United States for the month of June, 1916 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures relating to talking machines and supplies are set forth:

Talking machines to the number of 5,447, valued at $116,840, were exported for June, 1916, as compared with 3,889 talking machines, valued at $97,488, sent abroad in the same month of 1915. The total exports of records and supplies for June were valued at $71,987, as compared with $68,790 in June, 1915. For the twelve months 42,266 talking machines were exported, valued at $1,198,655 in 1916, and 36,880, valued at $794,011, in 1915, while records and supplies valued at $939,782 were sent abroad during 1916 as against $769,098 in 1915.

C. L. PRICE WITH ORMES CO.

Clarence L. Price, who has been connected with the Victor Talking Machine Co. for a number of years, has resigned his position to become general manager for the Ormes Co., of New York City, which does a jobbing business in talking machines, besides conducting several retail stores.

F. H. Connelly has been appointed manager of the Victor department of William Knabe & Co., 437 Fifth avenue, New York, one of the largest talking machine departments in the local trade. Mr. Connelly is achieving very pleasing results in his new post.

EXPANSION IN LOS ANGELES

Talking Machine Houses Open New Quarters and Add to Equipment in Anticipation of Heavy Trade to Come—Musical Record Co.'s Fine Window Display—Some Personal Items

Los Angeles, Cal., September 2.—The Los Angeles trade has found August to be a very profitable month. In one or two instances the August sales have equaled and possibly surpassed those of July. The trade here has no complaint to make on a month usually the slowest of the summer. It is already very evident that the dealers expect a boom in the fall as several of the firms are enlarging their machine and record departments in preparation. One feature of interest to local dealers is the success of the local musical comedy production, "Canary Cottage." There has been an insistent call for records from this delightful little skit, and it is very gratifying to note that the Victor Co. has issued two of the song hits, which threaten to eclipse the sale of the "So Long Letty" records. "So Long Letty," by the way, is another very successful Los Angeles production.

The Andrews Talking Machine Co., who recently moved into their new store on Broadway, between Third and Fourth streets, express themselves as being well pleased with the change. They will hold their formal opening sometime this month, when their many old friends will be glad to welcome them in their new home.

Barker Bros. intend to more than double their present capacity by adding to their present department all of the space which is now occupied by their china and crockery departments. This space will be divided into twenty-two new record rooms, with a record alley running back of all the rooms.

At the George Birkel Co. establishment arrangements are being made to accommodate more record customers. The space on the third floor, which has formerly been used for pianos and organs, will be utilized for Victor machines and record customers.

The Wiley B. Allen Co. reports a splendid August, surpassing even its July business. This company handles the Victor and Columbia lines.

Manager Bonell, of the local Pathé shops, is expecting a big fall rush as the new model Pathé machine goes on the market the first of September.

The Music Record Co. offers one of the most artistic and attractive windows seen in the city in some time. In one window is a display describing "Canary Cottage," with a background painted by Robinson, the famous illustrator of the Saturday Evening Post covers. The window is arranged with miniature canary birds, apparently in flight, and with small cats and frogs in marching array, with another background by Robinson, illustrating the "Bull Frog Blues" and the "Pussyfoot Rag," two September record hits.

Riccardo Martin, the great American tenor, with his family, have been guests in this city for the past three weeks. Mr. Martin is a great favorite here, not only through his records, but also from his appearances here during the past season with the Boston Grand Opera Co.

Sol. Bargman, for the past few months manager of the Riverside branch of the Southern California Music Co., of this city, has resigned and gone into the moving picture film business. Mr. Bargman is not new to the film business, having been engaged in this line before his connection with the Southern California Music Co.

PATHE SALES SHOW GREAT GAINS

In a chat with The Review this week, H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., New York, stated that the company's sales totals for the month of August were far beyond expectations, showing a tremendous gain over last year. The company's factories are working to capacity, and judging from the reports of Pathé distributors throughout the country the coming season will be a record breaking one.

VICTOR CO. ISSUES WARNING

The Victor Co. has issued the following letter to its dealers:

"Our attention has been called to the fact that manufacturers of other talking machines are endeavoring to purchase Victrola cases from Victor dealers for the purpose of reshipping their product therein. Our dealers will readily admit the impropriety of such an act and we beg that you will be careful not to dispose of Victrola boxes without first carefully removing the words 'Victor,' or 'Victrola' or 'His Master's Voice' trade-mark therefrom."

J. J. DAVIN A SURF RIDING EXPERT

Riding a surf board at Belmar, N. J., is excellent preparation for handling fall Victor business, according to the reports of J. J. Davin, traveling representative for the New York Talking Machine Co., New York, Victor distributor, who spent the greater portion of his fortnight's vacation in this manner.

J. J. Davin Wave Riding

Mr. Davin, who is an expert swimmer and diver, learned the art of surf board riding at Honolulu, and when he reached Belmar a few weeks ago succeeded in securing a board that defied the elements and was a huge success. As Mr. Davin's idea was not copyrighted the bathers of Belmar followed his example and more than seventy-five surf board riders voted this form of amusement the ideal aquatic sport.

PREPAREDNESS IN BALTIMORE

Talking Machine Houses Making Strenuous Efforts to Secure Sufficient Stocks of Machines and Records to Keep in Sight of Orders—The Hub to Handle Victors Exclusively

BALTIMORE, MD., September 5.—Baltimore talking machine distributors and dealers freely predict that this fall and winter will be the greatest in the history of the talking machine. They not only base this belief upon the fact that a large amount of business was done during the summer, but upon the way things are moving at the present time, and the only thing now causing the talking machine men any worry is that they fear they will not be able to get sufficient machines to meet the great demand.

Dealers realize that the demand for machines is going to be great and are making preparations to meet it. They are after the distributors but many of them are not getting what they want, for the simple reason that some of the distributors are short themselves and are unable to get as many machines as they could use. But they are getting a fairly good supply—much better than the beginning of last fall and many of them are much pleased because of this improvement. The record sales are picking up in the same proportion as the machines.

An announcement which came rather as a surprise was made on August 30 by C. B. Noon, of the Hub, which recently opened a large talking machine and piano department in the store formerly occupied by the Sanders & Stayman Co. This house now handles nothing but the Victor machines and records, having put the machines on sale the first of this month. Both the Edison and Columbia machines, which have been handled by the house for some time before it went into the present building, will not be handled in the future. Mr. Noon is very much pleased with the Victrola outlook and predicts a large business this fall and winter. He has put in an excellent record stock. Management of the Victrola department has been placed in the hands of H. C. MacGilpin.

It is feared that not enough machines will be available to meet the demand upon Cohen & Hughes. This house now has a large number of orders on file waiting to be filled and there are hundreds of orders to be filled before the Christmas rush, which is expected to be wonderful this year. It is predicted that this year's business with this firm will show an improvement of at least 50 per cent. over the business done last year.

One day last week Cohen & Hughes received a single shipment consisting of 300 Victrolas. Many of them were taken to the store but were sent right out again. Others were not removed from the station, but redirected and sent to the dealers.

Henry Eisenbrandt, of H. R. Eisenbrandt Sons, Inc., also Victor distributors, says the coming season will be a remarkable one. His only fear is that they will be short of machines. Mr. Eisenbrandt has paid several visits to the factory in Camden recently. He is now ready for the rush and looks for it to be a big one. A number of improvements are being made in the Victrola department. Two new booths have just been installed and it is understood that more may be added later. There are now six large booths and the store is a very attractive one. The retail business has kept up remarkably well during the summer.

W. C. Roberts, manager of E. F. Droop & Sons Co., also distributor of the Victor goods, is enthusiastic over the outlook and over the business being done now and what has been done during the summer. He is also much pleased over the fact that he is getting more machines than he did this time last year. He has no doubt, however, that he will have plenty of calls for each machine he gets in.

Manager Roberts, accompanied by Mrs. Roberts and his son, recently returned from an extended automobile tour through the North. The trip was made in Mr. Roberts' seven-passenger car and not a single mishap occurred during the entire trip. The party toured through New York State and up into Canada. Mr. Roberts says that the trip did him a world of good. While away Mr. Roberts paid some attention to trade conditions and he says that the outlook through the North is very good.

Holiday business in the sweltering summer months! This is what has been done by the Columbia Co.'s distributing department in this city. A. J. Heath, the local manager, is much pleased with the way things have been going and looks for a phenomenal amount of business this fall. In fact, the house is rushed almost to capacity. Mr. Heath states that he has never seen anything like it. S. C. Cooke, assistant to Mr. Heath, has just returned from his vacation.

Good business in the Aeolian-Vocalion is being done by the Sanders & Stayman Co. in this city, Aeolian representatives. W. B. Turlington, manager of the house, looks for a big amount of fall business as the Vocalion is proving itself to be a much-talked-of machine. With the new location the Sanders & Stayman Co. will be able to handle an immense business.

WORKING FOR STEPHENS BILL

Victor Talking Machine Co. Sends Letter to Victor Dealers Urging Them to Take an Active Part in Supporting Measure

CAMDEN, N. J., August 28.—The Victor Talking Machine Co. has just issued a circular letter to Victor dealers, enclosing four papers, containing the latest developments regarding the Stephens bill, together with a long list of prominent industrial firms which are in favor of the bill. The letter urges all dealers to do whatever they can to aid the passage of the price-maintenance measure, and points out the necessity for individual action in every community if the bill is to become a law.

THE TRADE IN THE SOUTH

PROGRESS OF CORLEY CO. ANNEX

Structure Now Building Will Give Company 25,000 Square Feet Additional Floor Space for Storage of Victor Goods

RICHMOND, VA., September 4.—Work is progressing rapidly on the construction of the new annex of the Corley Co., the energetic Victor distributors of this city, and it will be under roof before many weeks. When completed the new building will give the company 25,000 square feet additional floor space, which has been made necessary by the tremendous increase in its wholesale Victor business throughout the Southern territory. The accompanying photograph taken late last month gives some idea of the progress of the work.

Starting Work on Corley Building

There is no littleness, no sordidness, about business in these days. It is as picturesque as the most wonderful art; as romantic as the most fictional romance ever written; as imaginative as the greatest symphony in music.

NOTHING WRONG WITH THE SOUTH

Talking Machine Trade Below the Mason and Dixon Line—Keeping Up With Dealers in Other Sections in Preparing for Big Business That Is to Come—Good Financial Prospects

RICHMOND, VA., September 5.—The conditions that are said to prevail in the talking machine trade throughout the country generally also exist among the distributors and dealers throughout the South and Southeast, according to reports that come from these sections. So uniform are the reports of the various trade factors that they could sign a mimeographed statement reciting that the summer business has been unusually good, and that the prospects for fall were the best ever, and still find that it fitted their individual cases.

Of course, there is a shortage of machines, rather serious on certain styles, but this shortage is to be looked forward to just as regularly as death and taxes and simply means that though manufacturing and distributing facilities have increased enormously, the demand has increased even more rapidly.

General conditions are such as to back up consistently the prophesies regarding a record breaking fall for the talking machine trade in this section. Although the Government reports a shortage in the cotton crop, the rapid rise in cotton prices that followed the announcement would mean that there will be as much if not more money in circulation as in previous years, some of which money the talking machine men should get. Then, too, the farmers in the South have adopted the system of diversified crops and have not put all their eggs in the cotton basket, for instance. This also augurs well for the future.

GOOD REPORT FROM BIRMINGHAM

The Talking Machine Co., of That City, Stocking Up in Anticipation of Big Fall Demand

BIRMINGHAM, ALA., September 5.—The Talking Machine Co., of this city, handling both the Edison and Victor lines as jobber and distributor, makes a most satisfactory report regarding conditions. A. R. Boone, head of the company, is well known in the local trade, having been connected with the Williams Music House for a number of years. Mr. Boone states that although the dealers in any of the popular lines will probably be unable to get all the special records and special styles of machines they want for fall and holiday trade, this company is nevertheless stocking up to the limit with a view to reducing possible shortage to a minimum.

INCORPORATED IN ALABAMA

MONTGOMERY, ALA., September 5.—The Jesse French & Sons Piano Co., of Alabama, with headquarters here, has been incorporated with a capital stock of $5,000 by L. O. Parsons, Myron E. Milliken and Jesse French, Jr. The company will engage in selling musical instruments in Alabama and will include talking machines as well as pianos in their line.

NEW BUILDING FILLS THE BILL

BIRMINGHAM, ALA., September 7.—The Hood-Wheeler Furniture Co., which handles the Columbia line here finds that its new five-story building, which was occupied some time ago, just fills the bill for meeting demands of the growing business. The provisions made for the stocking and display of Columbia Grafonolas and records are particularly satisfactory.

"A Winner of Trade—Where-ever Displayed"

THE STORY OF THE TONE TESTS

Some Interesting Details Regarding the Origination and Carrying Out of the Idea for Giving the Public a New Conception of Possibilities of the Edison Diamond Disc Phonograph

Much interest has been manifested by the trade and musical world in the "tone tests" which have been such a successful feature in connection with the exploitation of the new

© Mishkin, N. Y.

Anna Case Reed Miller

Edison disc phonographs and records. In this connection the following illuminating facts supplied by Thos. A. Edison, Inc., make interesting and timely reading:

"In February, 1915, Anna Case, the prima donna of the Metropolitan Opera, stepped into the store of an Edison dealer in Des Moines, Ia., where she was engaged to give a recital in the evening. Miss Case is one of the most noted and popular of Edison artists and her interest in the New Edison and Edison Re-Creations often leads her into the stores of dealers in cities where she sings. As it happened, the Des Moines merchant just had received some new records of the voice of Miss Case—Re-Creations that even the singer had

Julia Heinrich Marie Rappold

not heard. One was placed on the instrument and the superb voice that has charmed the most critical audiences in America flooded the demonstration room with its silvery tones. Miss Case, delighted with the Re-Creation, commenced to hum in unison with it and then sang with it. So perfect was the blending of the two voices that the small audience was fairly astounded and Miss Case was urged to make the experiment with other Re-Creations of her voice. She did this several times, proving that her living voice and the Edison Re-Creation of her voice could not be distinguished one from the other.

"Such was the beginning of the now famous tone test for phonographs—a test that first was made on the New Edison and that promises to become the most potent of all forces in convincing the world that the absolute Re-Creation of the human voice can be secured through the medium of the phonograph. The origin and the development of the tone test, and the manner in which this work will be carried on during the coming winter, is of interest and importance to every dealer engaged in the merchandising of phonographs as well as to people who have only a general interest in music. It is interesting because it is one of the romances of big business—it is important because it is a radical departure from any sales or advertising method that ever was used in the exploitation of the phonograph. It eliminates the necessity for asserting and re-asserting the

Arthur Middleton Alice Verlet

merits of the New Edison and it gives those who are interested in the phonograph an opportunity to be convinced through the medium of their own senses that the phonograph will produce music that has all the qualities of the living voice.

Value Unrecognized at First

"It is seldom that a notable discovery of any kind is appraised at its true value when first made. Although comments on the experiments made by Miss Case in Des Moines reached the Edison offices at Orange, N. J., it was not at once appreciated that a tremendous value was inherent in the ability of the New Edison to match the voice of a living singer. In fact, the incident was almost forgotten and the tone test might never have been developed if, in June of the same year, Christine Miller had not discovered that her voice on a Re-Creation was identical with her living voice, and that she could gain the most entrancing effects by singing in company with it, following the melody of the Re-Creation or singing a duet in which she carried a harmonizing melody. An Eastern Edison jobber happened to learn of the work that Miss Miller was doing and he thought that perhaps a public recital of this kind might attract attention by reason of the prominence of Miss Miller and the novelty of the demonstration.

"So he tried it, without any attempt to organize it or gain as much benefit as possible from it, and the results were startling. Music critics, in commenting on the performance, asserted that they could not distinguish between the voice of the singer and the voice of the instrument. They heralded the New Edison as a marvelous new instrument and they lavished encomiums on it. So great was the success of the first recital of this kind that others were given with equally valuable results. The sponsor of these tests in which Christine Miller appeared was so optimistic regarding the possibilities of this form of demonstrating that he impressed it upon the Edison authorities and they arranged for some similar demonstrations in which Miss Miller participated. As a result, some active and vigorous work was done in

Christine Miller Hardy Williamson

the organization of a tone test department, headed by Verdi V. B. Fuller, and in the preparation for an organized campaign along this line.

Work Done Last Winter

"The organized work commenced in Septem-

FAVORITE TALKING MACHINE CO., 438 Broadway, New York

ber, 1915, and after a few tone tests had been given and the results of them made public, an insistent demand for the services of Edison artists at such demonstrations was felt. With only a small organization, approximately 250 tone tests were given through the winter, in various musical centers of the United States, and it is estimated that fully 200,000 people heard noted Edison artists match their living voices with the Re-Creations of their voices. The publicity that resulted was tremendous. Not since it was first announced from Menlo Park that Thomas A. Edison had invented a machine that talked, was so much attention turned toward the phonograph. Papers throughout the country gave liberally of their space in heralding the achievement of the Re-Creation of the human voice, all because of the fact that the tone tests actually were demonstrating the merits of the new instrument.

"In every city where tone tests were held, the music critics agreed that the New Edison actually could Re-Create the human voice and that it was impossible to distinguish between the instrument and the voice of the singer. It was not only critics in the smaller centers who were lavish in their praise of the New Edison. In New York, Boston and other noted musical centers, leading critics were frank and emphatic in their praise. All of this praise, all of the space that was freely givn by newspapers, was secured only as a result of the novel tone test method of demonstration. The limited organization made possible only a limited number of tone tests last winter, but, even with this handicap, they brought the New Edison to the attention of practically every music lover of the United States and Canada. The furore they created wherever they were held made the New Edison the dominant topic of conversation for the time being and thousands of people who were unable to attend the test recitals were impressed with the merits of the instrument by hearing their friends discuss it.

"In a few short months tone tests brought about a tremendous demand for the New Edison. So beneficial were they proving that many dealers wished to hold them during the summer. But many difficulties that the warm weather brought made it impracticable to continue them. The artists who were engaged in the work, for the most part, did not wish to sing during the summer months. Most artists demand a long and restful vacation. They require it in order to keep up with the strenuous work they must do during the winter. The tone test work, requiring constant and fatiguing travel, was not in accordance with their ideas of rest and, although efforts were made to make some arrangements by which the requests of dealers could be met, it finally was decided that it would be best for all concerned to suspend the work during the summer and renew activities in the fall.

Preparations During Summer

"Although no tests have been given since June, the work of booking them and arranging for the itineraries of the artists who will make them during the winter has continued without cessation and the renewal of activity along this line will commence in September. At a conservative estimate, between 750 and 1,000 tone tests will be given during the coming winter and, with the work now completely standardized, a high degree of efficiency will be attained in each of them. The list of artists who will engage in this work this season is an impressive one. It includes Marie Rappold, Anna Case, Julia Heinrich, Elizabeth Spencer, Marie Kaiser, Helen Clark, Ida Gardner, Carolina Lazzari, Adelaide Fischer, Thomas Chalmers, Arthur Middleton, Reed Miller, Glen Ellison and others. Under the plans that have been evolved during the summer the coming tone tests will be conducted on a high artistic plane, and everything possible will be done to surround the affairs with the atmosphere of dignity that they deserve.

Will Raise Musical Standard

"It is evident that the New Edison tone tests are going to be influential in raising the musical standard of America. They are going to take artists of renown into places where otherwise they would not go. Hundreds of thousands of people will have their interest in the best kind of music stimulated as a result of the opportunities presented them to hear and see famous operatic and concert singers. And, more than this, they are going to have the last trace of skepticism regarding the possibilities of the New Edison removed. They are going to be finally and thoroughly convinced that, through the medium of the phonograph, they can hear songs just as lovely, musical and expressive, as they could hear at the Metropolitan Opera. The results of the comparatively few tone tests that have been given in the past have given a hint of the tremendous value of the work that has been planned for the future."

A CASE OF JUDGMENT

Woolworth Building, New York

RECRUITING SALES FORCES FOR FALL IN CINCINNATI

Talking Machine Houses Preparing for Busy Season—New Line for Baldwin Co.—Columbia Business Surpasses All Expectations—News of the Vacationists—The Situation from the Victor Standpoint—Art Style Vocalions Well Received—General News of Interest

CINCINNATI, O., September 6.—Satisfactory conditions are reported all along the line in this territory. Buying of machines is normal for this time of the year, and the record sales are above the average. Most of the managers are giving their attention towards recruiting sales forces. Another year, it is believed, will find a crop of young men who are willing to make the talking machine field a life vocation. To-day, so far as Cincinnati is concerned, there is too much drifting.

R. J. Whelen, manager of the local Columbia store, says business surpasses all expectations. "Shipments are beginning to come in more promptly from the factory, and were it not for a freight congestion everywhere we would be in very good shape for stock, with the exception of the smallest types, but this is not a great drawback, as the greatest demand these days is for the larger type Grafonolas. We are greatly pleased with our record business, which continues to 'boom,' and altogether we have had a phenomenal year."

Mr. Whelen further stated that he spent a few days in Cedar Point the latter part of the month in attendance at a convention of the Columbia managers in this district for the purpose of getting acquainted and discussing ways and means for the betterment of the district.

S. H. Nichols, Columbia district manager, spent a few days in Cincinnati for the purpose of making certain changes in the Cincinnati store to handle the increased business.

Vocalion Manager Byars, of the Aeolian Co., has just returned from a two weeks' vacation. Between motoring through southern Ohio and a number of hours spent with his favorite authors he returns to his post thoroughly rested and fresh for the fall business. He says his forces are now organizing for a big offensive, and before September is past the Vocalion forces will be ready for a great campaign.

A Philadelphia-made machine is now being handled by The Baldwin Co.'s Fourth street wareroom. Two sizes have been listed, and it is believed that the company will gradually enter this new field. As stated some time ago the Middle West stores of Steinway & Sons will take on the Clayola. This is expected to make its appearance in Cincinnati this month.

Another of the handsome art styles has just been received. This one is the Style "M" Vocalion and is attracting considerable attention at the local Aeolian store.

Manager Dittrich, of the Rudolph Wurlitzer Co., gives the following impression of the situation from a Victor standpoint:

"The month of August was the banner month of the year at least as far as wholesale business was concerned. Never before in the history of our concern were the wholesale orders so far in excess of the average. We judge that our previous estimate of the coming fall business was far short of the mark, although we had allowed for a vast increase.

"Just what will happen when the real demand begins will form the basis of some interesting conjectures. All the dealers have not placed their fall orders, and the vast number of Victrolas on order now will be greatly augmented when the laggards begin to feel the demand. We will all do as much business as the factory output will make possible, and it is for the wise dealer to begin right now to push his record business so that he will be able to benefit thereby when he finds that the supply of Victrolas is inadequate to the demand.

"With the cool weather of the last few days record business was stimulated greatly. We are putting in new booths and the entire ground floor of the Wurlitzer Building will be devoted to record selling as even the desks of the salesmen are being removed to make room for more record selling space."

I. H. Dittrich, manager of the Victrola department, recently made a flying trip to the Victor factory to consult with the different department heads. The tremendous activity at that immense plant is in absolute accord with the feverish effort on the part of the dealers to cover their needs in advance of the rush season, and there is no doubt but that every thing physically possible is being done to meet the great crisis that will come with the holiday season.

"The Middle West is the place for business and opportunity" is the declaration of Vice-President A. O. Peterson, of the Phonograph Co., who has returned from a two months' vacation spent on the Pacific Coast. One of his early callers was H. S. Hutchinson, of Hutchinson-Wamser Co., Portsmouth, O., who spent a day picking out supplies for the fall season. The Phonograph Co. is again receiving increased supplies of records.

The Starr Co.'s troubles anent phonograph supplies are over, according to Manager Pauling. Part of the new factory is in full operation.

BUFFALO

RAILROAD — EXPRESS — STEAMSHIP

Look at the list of railroads running out of Buffalo: New York Central, West Shore, Lake Shore, Nickel Plate, Wabash, Erie, Pennsylvania, Lackawanna, Grand Trunk, Michigan Central, Lehigh, B. R. & P. and B. & S.

Four express companies will give you a complete service: American, National, Adams & Wells-Fargo.

Manson Killed in Action—Preparing for After the War—"His Master's Voice"—Records of New Production Music—The Present Copyright Situation—Musical Demands at the Front—Some Interesting Claims for Exemption.

LONDON, E. C., ENGLAND. September 5.—Since penning my previous report from this side there has been made public the terms and conditions of the official sanction for the importation under license of musical instrument parts and accessories. The whole ground has been pretty fully covered in these columns, and American, French, Italian, Swiss and other non-enemy manufacturers, will, therefore, have gleaned a pretty good idea of just how things stand. This renders unnecessary the publication in full of the official correspondence from the Board of Trade. It will, however, be interesting reading to all those affected or otherwise interested in the importation or exportation of musical instrument parts, etc., if I give a brief resumé of the exact conditions in force. The position then is:

(A) The licenses granted will be only temporary.

(B) To import motors and other indispensable accessories up to 50 per cent. of the orders placed with Swiss manufacturers before the 22d of March last.

(C) His Majesty's customs have been given a general license to admit all parcel post consignments (presumably from any neutral source), which makes it unnecessary to apply specially for individual licenses for particular consignments under this head.

(D) American trade is treated separately, and permits will be obtainable through the music trade defense committee (M. E. Ricketts, secretary), for the importation of accessories, etc., up to a total not exceding 124 tons per month.

(E) With regard to France, licenses are not obtainable from the above committee; application should be made to the Board of Trade, Import Restrictions Department, 10 Glace Edouard 7th, Paris.

Although minor questions may be expected to arise from time to time out of the foregoing, the trade now knows just where it stands, and can make its plans accordingly. Upon inqury, I find that the partial removal of the official ban against the gramophone trade, has given general satisfaction. Short of meeting the full demands of the committee, the Government has done the next best thing which, under all circumstances, must be accepted as final. Questions may, of course, crop up that will provide occasion for further small concession here and there, and in view of the official consideration with which our trade requirements have been met, it is to be anticipated that liberal treatment will be accorded any small representations which the trade committee may in the future find it necessary to suggest.

The question whether or not under these licenses sufficient goods will be obtainable for the satisfaction of this next season's demands, is one which I think must be answered in the negative—with reservation. It naturally depends upon conditions outside the influence or sphere of the gramophone trade conditions too numerous to mention in detail, but which, taken as a whole, present a somewhat formidable prospect. If, however, consideration is taken of the particular sources or channels of retail gramophone trade during war-time, we find that bulk sales emanate from the great industrial class which is left at home to provide the ammunition for our lads at the front. Among that class money is fairly plentiful, and after making reasonable allowance for investments in war loan stock, and expenditure upon other essential objects, there is left a percentage for much-needed recreation, which it may be fairly assumed mainly takes the form of musical entertainment of a gramophone nature. The removal of the official embargo will permit us to continue to provide mental refreshment for the shell-toilers, whose appreciation resulted in an exhaustion of machine supplies last season. If the same demand exists this year, and I am sure it will, judging by present indications, there is good reason to think that even under the amelioration of the imports prohibition, the available supply of machines will be insufficient to fully satisfy the demand.

It is also to be observed that the call for high-class instruments is quite good, circumstances considered. It will be a little more difficult to meet this class of trade than perhaps that of the cheaper category.

Pathé Frères London Plans

A recent interview with Messrs. Pathé Frères, this city, elicited the information that their plans for the opening up of a factory in London

FROM OUR LONDON HEADQUARTERS—(Continued from page 91)

had not sufficiently matured to make any further announcement, outside that previously reported. There are many difficulties in the way of starting adequately, a suitable and fully equipped factory at the present time, but I am assured that what the company have in contemplation will go into effect just as soon as opportunity favors. In the matter of machine supplies, Messrs. Pathé are not so badly off as some manufacturers, and it is hoped to meet a reasonable demand from the trade fairly promptly this next season. There may be some little difficulty with regard to sufficient supplies of records in view of the season's requirements, but the trade may rest content that its interests will be looked after as closely as circumstances will permit.

Some Well-Chosen Records Represented

No less than nineteen well-chosen records, thirty-eight titles, are itemized on the September Zonophone list. They include many of the current musical items and not a few of the songs composed and published during the Victorian era, and which by sheer good merit have earned a niche in our hearts for all time. As instance, one may mention: "Won't You Buy My Pretty Flowers?" "The Song That Reached My Heart," "Ho! Jolly Jenkins," "The Garden of Sleep," "'Till I Awake," etc. The complete list offers something for every time and sentiment, and therefore will make an exceptionally wide appeal.

Growth of Export Trade

Despite war times and the difficulties in the way of cultivating an increase of trade with our colonies, it is satisfactory to note that British manufacturers are really handling the record export trade with remarkable celerity. One prominent firm in this regard is the Sound Recording Co., Ltd., of Swallow street, Piccadilly, London, whose work in the direction indicated is particularly enterprising. Their policy is not so much to supply what they may want to sell, as it is to meet the exact requirements of individual buyers oversea. What you want is therefore the keynote of this company's success. Go right ahead then, and ask them for anything you may want in records and rest assured that it won't be the company's fault if you are not fully satisfied in regard to quality and price!

An Interesting "Guardsman" List

Of interest to Colonial and other oversea traders must be the extreme sales quality of the various records itemized on the latest "Guardsman" list. Current musical issues of topical popularity, old standard favorites, military marches, solo-instrumental numbers, good comics, etc., go to make up just such a program of "sellers" that delight the hearts and improve the bank balances of the company's large army of dealers. The Invicta officials have consistently set themselves to cater for the requirements of our friends abroad, and they in consequence are registering an increase of trade every month.

Death of Wm. B. Manson

This terrible war continues to take its toll of our best and bravest. News is just to hand of the death of William Braithwaite Manson, only son of William Manson, manager of the Zonophone Co., who was in the London Scottish, and was killed in action during the big British attack on July 1. He was a general favorite and had already taken great honors in his musical career. In his first year at the Academy he won three bronze medals and a special prize, consisting of the full orchestral scores of famous works, and in his second year he gained the Blue Ribbon of the Academy—the Charles Lucas prize—which is considered a magnificent achievement for a second term student. In common with the wide-spread regret felt in the trade at the early termination of such a promising career, The World begs respectfully to tender to Mr. Manson its heartfelt sympathy.

Prepare for "After the War"

The proposals embodied in general agreement at the Allies' Trade Conference in Paris, the full details of which have been published throughout the world, were framed after very serious and close analysis of the many problems likely to exist after the war. This conference was an intelligent endeavor to anticipate events, and its findings will go far to protect our industries against undue competition on the part of nations with which we are now at war, when they are once again free to exercise their full influence in world markets. In the House of Commons recently the reported purchase at Leipzig Fair of large quantities of goods for England, early after-war delivery being doubtless a condition of purchase, was mentioned by Sir John Lonsdale, who asked the president of the Board of Trade to take all necessary steps to prevent British firms from entering into any such contracts.

Are Inseparable Companions

London's newest musical productions and His Master's Voice continue to remain inseparable

FROM OUR LONDON HEADQUARTERS—(Continued from page 92)

companions. The Revue craze is still rising and one thing after another is published and staged with varying degrees of success. It requires the foresight and wisdom of a Genii to gauge in advance what prospect of success is likely to result. All the greater credit is therefore due to the "H. M. V." musical directorate for the remarkable way in which it steers clear of costly failures. Some productions are only tolerable successes, but most on the "H. M. V." list have well justified the huge expense involved in securing for recording purposes the services of the original artists. A further batch of new issues under the Revue category is announced, and these records will in due course come into the light of newspaper and other publicity sales-creating propaganda.

The "His Master's Voice" record supplement for this month bespeaks a close measurement of public requirements. It is full of a wide variety of vocal and musical numbers which will make a special appeal to the great record public.

Melville Gideon for Columbia

One of our leading lights among composers of popular music, Melville Gideon, was largely responsible for the recent ragtime craze, and has more successes to his name than it is possible to narrate. He makes his bow on records this month on Columbia in the dual role of composer and singer of two tuneful numbers, "The Loving To-to-lo" and "My Honolulu Girl." Here we have aural proof that if he can write a good song, he can also sing it well, and these are his two latest successes, given with that easy style that makes him such a favorite with his audiences.

Technical Instruction Undertaken

Since the war the science of the English piano industry has developed. The L. C. C. opened classes for apprentices, and as these have been successful and are attracting an increasing number of pupils, the classes are to be removed from the Camden School of Art to larger premises at the Northern Polytechnic.

Excellent Export Figures

Our export trade figures continue to be most satisfactory. The July returns issued by the Board of Trade, show that exports are £11,601,000 higher than the figure for the corresponding month of 1915 at £46,323,000, which is the third highest monthly total since the war, and considerably above the figures for some months prior to the outbreak. Turning to imports, we find an increase of only £1,048,000, as compared with July of last year, at £76,772,000, so that the balance of trade has gone still further in our favor.

A Columbia Bunch of Topical Hits

Many eyes will be focussed on one particular group of records in the Columbia September list as embodying vast potentialities. For the benefit of those on the lookout for these "very latest" we enumerate them for ready reference: "The Bing Boys," both waltz and two-step; "Underneath the Stars," as a fox-trot and also as an instrumental trio; "Down Home in Tennessee" as a one-step; "Mr. Manhattan," vocal numbers: "Piccadilly" and "'Twas in September." The first record of numbers from the new musical play, "Very Good Eddie," namely, "Some Sort of Somebody" and "On the Shore at Le-Lei-Wi."

Mme. Clara Butt's Oratorio Record

Madame Clara Butt, on the Columbia this month, takes us into the realm of oratorio, with a beautiful rendering of Mendelssohn's "O Rest in the Lord." It is a record in which every word—every note—tells!

The Copyright Situation

In view of discussion of the new Trading with the Enemy (copyright) Act, which became law a week ago, it may be noted that Lord Stanmore stated in the House of Lords that in the opinion of the Law Officers of the Crown works, published in Austria and Germany during the war, are not covered by the copyright conventions. In that case, therefore, the copyright outside those countries vested in nobody. The act vests the rights in the Public Trustee, and he added: "This arrangement will strengthen our powers of bargaining for proper treatment of British authors in Germany after the war." Any money received by the Public Trustee as the owner of the copyright is to be retained till the end of the war, when its disposal will be decided.

Gervase Elwes Joins Columbia

Gervase Elwes, the tenor who has made a reputation for high artistic achievements, has joined the Columbia ranks. He is a valuable addition to record-making artists.

Columbia "Roll of Honor"

We are informed of casualties to the following members of the Columbia Wandsworth factory staff among those serving with the colors: Sergt. Major D. G. C. Hawker is a wounded prisoner in the hands of the Germans. W. T. Dixon, a member of the office staff at Wandsworth, was bombed in the face and has lost an eye. Tom Woods, an office junior, got a bullet in the leg and a shrapnel wound in the chest. Both these latter have recovered and expect to join their regiments immediately. So far no casualties have been reported to members of the Clerkenwell road staff serving with the forces.

Music Needed at the Front

Speaking of the lack of music at the front (we thought there were plenty of gramophones and records there, by the way—Ed.), a Tommy at the front complains that "music is what I miss; there's too little variety in the noises. It's always a crash, a bang, a whistle, a wail or a hiss. Now my idea is that each shell should have attached to it a gramophone record and needle, and as the shell revolves hurtling through the air, the music would amuse and entertain vastly—to say nothing of holding the enemy so entranced that he would never seek to escape the thing. One can easily suggest appropriate songs. What of 'I'm Longing for My Air Folk,' 'You Made Me Love You.' You could have a salvo playing 'See them shuffling Along,' and a whiz-bang might give 'Hitchy-Koo' instead of its infernal bang-bang. On a clear night you could work off your spare 9.2's in couples on 'The Moon Has Raised Her Lamp Above.' And in a big bombardment I don't see why we shouldn't charm them with Wagner's 'Meistersingers.' There's not enough originality about the ordnance people."

Winner Co.'s Fine Program

A very fine program of record titles is issued by the Winner Co. this month, comprising picked selections from an extremely wide range of music. The famous "Happy Day" revue, which draws crowds daily to Daly's Theatre, is the "star" turn on the current list. It comprises four records, bearing eight of the best numbers from this happy work, all excellently recorded by the Daly's Theatre Orchestra. "Yours to the End" and "England" are rendered as cornet solos by W. Morrow, accompanied by the theatre orchestra, which combination of talent results in the production unique in recording quality and musical merit.

Special attention, too, may be centered upon the character sketches—"Spotty" and "'Erbert, A.B.," by F. C. Hennequin, whose very faithful presentments are recorded wonderfully well on Winner No. 3016. Another fine record is No. 3021 by the Band of H. M. Irish Guards, and two gems go to the credit of The Elliotts, comedians of true rollicking flavor. Billy Merson, too, is laid under contribution again this month. The songs chosen are "Chinese Tango Trot" and "Back to My Home in the Mountains," which only need to be heard to be appreciated and—sold. The records mentioned are obviously well calculated to attract an army of buyers, but there are many other equally good value items on the list under review, and over-sea traders should therefore write the company direct for full lists, terms of trading, etc.

Reports Good Trade Prospects

Information from W. H. Reynolds (1915), concerning trade and its prospects, makes good reading, especially to those dealers who may at any time have experienced a little difficulty in obtaining various goods. This firm still claims the reputation of being known as the leading house for quality lines at lowest prices, and some endorsement of this is found in the persistent influx of orders for spare parts and other gramophone accessories. A specialty is the Reyno Carbo Process mainspring, well made in all sizes and strengths. Each is packed in oil paper, separately in a strong carton, so that the risk of damage in transit is reduced to a minimum. In all other accessories a good stock is kept, prices in some, if not most instances, running very keen. Of machines, the company offers a wide selection. Special arrangements

Reveal Some Interesting Data

Among recent cases of interest which have come before the different Tribunals set up for the purpose of considering appeals by men who it is suggested would be of more use in trade employment than in the army are the following: M. E. Ricketts, British sales manager of The Gramophone Co., Ltd., and described as representative to the Board of Trade of the musical trades of the United Kingdom. This case presents a gratifying instance of the prospect of capturing German trade, and in consequence the Tribunal granted conditional exemption to Mr. Ricketts. Since the outbreak of war, Mr. Ricketts told the Tribunal, the British music trade had captured half of the German trade. It was simply a matter of organization. Immediately the metal factories were released from war work the trade would be able to go ahead still further and with great rapidity.

Another instance of a similar nature was that of the claim for exemption by Albert Barton, director of the Invicta Record Co., Ltd. Mr. Barton stated that since the war and the difficulty in getting goods from Germany the gramophone records export trade had increased enormously. In the sixteen months to April the company did £1,983 of business, but since then they had done £450 a month, and the trade was steadily increasing. Fifty per cent. of the trade went to the United States, Mr. Barton giving instances of particular consignments which go to prove that our American cousins fully appreciate the record production of this house. Exemption was granted until December 31.

"Some" Columbia Score With "Some"

The really successful revues of to-day can be counted on the fingers of one hand. Prominent among them is the phenomenally popular "Bing Boys" at the Alhambra, while the Hippodrome "Joy-Land" has had a run that speaks for itself. Now has come along another surprise in the shape of Harry Grattan's revue "Some" (More Samples) at the Vaudeville Theatre, which is one of the most conspicuous of successes.

"Some" is an irresponsible melange of melody and merriment and has all the advantages of a cast of sparkling artists, who exhibit a liveliness of movement and a vocal charm that keep their audience on the tip-toe of expectation. Credit is due the Columbia Co. for the first issue of five tuneful numbers.

A "Record" Offer

TEN thousand job records, all brand new and British made, 10" double-sided, 50% songs and 50% bands—and the price, $1.50 a dozen, f. o. b. Who'll be the wise man to snatch them up? Don't be too long thinking about it. Wire to-day!

¶ Write for our New Season's List, which contains some astounding offers.

W. H. Reynolds (1915) Ltd., 45, City Road, London, E.C.

CAN SUE ALIEN CORPORATIONS

The Court of Appeals has decided that a foreign corporation having office room in New York State for the transaction of business is subject to the service of summons and complaint in an action field here and that it must answer to such process. The question submitted to the court covered the ground mentioned and asked in addition whether such service was due process of law under the provisions of the 14th Amendment of the Constitution.

Two actions were begun against the Hocking Valley Railway Co. for the recovery on a contract guaranteeing the payment of principal and interest of certain coupons issued by the Kanawha & Hocking Coal & Coke Co. A motion was made by the defendants to set aside the service on the ground that it was a foreign corporation and therefore without the jurisdiction of the courts of this State and was in violation of the section of the Constitution referred to.

This motion was denied. During the investigation it was learned that the Chespeake & Ohio Railway Co. was the principal owner of the defendant's capital stock, that it maintained a suite of offices in this city, and that a part of the suite was used by the defendant for the transaction of its business. The defendant's stock, it was also learned, was transferred here, and the interest on bonds and various obligations not paid directly by the treasurer were paid through the fiscal agents, J. P. Morgan & Co. The opinion of the court, written by Judge Hiscock, said in part:

"No precise rules can be formulated by which to determine in each case whether a foreign corporation is doing business in a State. This question must largely be decided by the particular facts in each case. But, of course, there are certain undisputed general principles which may be applied to such a question. The fact that the corporation is conducting the principal part of its business in the State of its incorporation does not prevent it from so prosecuting its business in another State as to bring it within the character of a corporation doing business in the latter State."

EDISON FILM IN GREAT DEMAND

"The Voice of the Violin" Proves Very Popular Throughout the Middle West

CHICAGO, ILL., September 5.—"The Voice of the Violin," an advertising film featuring the new Edison, is having a big run in the Middle West, where it is being shown at some of the best houses in the territory. Even during the torrid spell that made the outdoors so attractive in the latter part of July, the picture drew crowds wherever it was shown. It is so successful in attracting audiences and the public is so well pleased with it that in many cases proprietors of theatres ask for a re-booking, and reports received at Thomas A. Edison, Inc., in Orange, N. J., show that the picture is proving very attractive in spreading the propaganda of music's re-creation.

A number of dealers in the Chicago zone have not only made arrangements to have the picture exhibited at their local theatres, but have had it advertised to good advantage. The picture herewith shows how the Starland Theatre of Michigan City, Ind., secured publicity for the offering. The photograph of the motor truck bearing the advertising banner was taken in front of the store of Fawley & Abbott, Edison dealers in Michigan City. A salesman accompanied the reel on its progress through the Chicago zone and some of the reports sent in by him indicate the favor with which the picture is viewed by both motion picture house proprietors and the people who see it.

Here are a few extracts from the records kept by the Edison representative who was on the ground wherever the picture recently has been shown:

"Wednesday, July 19—'The Voice of the Violin' making a big hit in spite of the sizzling weather. The biggest hit was in South Bend, Ind. The Auditorium, the exclusive theatre of the town, has tabooed advertising matter of all kinds, both films and slides. The proprietor, however, is such an Edison fan that he let us get by with five runs, including all the slides.

"Thursday, July 20—'The Voice of the Violin' at Crystal Theatre, Ligonier, Ind. House has exceptional facilities for high class pictures and music. Three runs. Much applause at appearance of Mr. Edison in film and after Anna Case Re-Creation. Want the picture again.

"Friday, July 21—'The Voice of the Violin' at Princess Theatre, Kendallville, Ind. Good response and big house. Boosting by people who saw afternoon show, telling their friends."

Featuring "The Voice of the Violin"

A WHISTLE THAT WINS NOTICE

BRIDGEPORT, CONN., September 5.—The American Graphophone Co. (Columbia Co.) has just installed a new whistle in its factory which measures six feet in height and one foot in diameter. Its voice is deep and hoarse, and the sound of its blast carries easily throughout all sections of Bridgeport. It is the type of warning signal carried by many of the huge trans-Atlantic liners. In that it can be heard so easily and because its tone is so different from the ordinary factory whistle, it has been suggested that it be used as a fire warning.

HANDSOME MANOPHONE CATALOG

Attractive Booklet Now Being Sent to Trade by the James Manoil Co.—Special Mention of Many Individual Constructive Features

A most comprehensive catalog has just been issued by the James Manoil Co., 60 Broadway, New York City, showing the various styles of the Manophone which are now being manufactured in the company's plant at Newburgh, N. Y. The color scheme of the cover is lavender and white, the name Manophone being embossed in white over an embossed reproduction of a cabinet of one of the new machines. The border decorations of each page are artistic and symbolic of music.

The two center pages of the booklet are devoted to a reproduction of the photograph of Miss Lucile Lawrence, prima donna soprano, and a letter in which she has enthusiastically endorsed the Manophone. One page is devoted to the tone arm of the Manophone, there being illustrations reproduced, showing its position when playing lateral cut records and also when playing vertical cut records. On another page the Manophone motor is illustrated. On the inside back cover is a reproduction of a certificate of guarantee which goes with every Manophone that is sold. The styles of cabinets shown are No. 1,000, No. 750, No. 500, No. 300, No. 15.

W. B. Martin is opening a new talking machine store at 1000 Main street, Richmond, Ind. He was formerly located at 1021 Main street, but his increasing business necessitated the change. He has one of the most complete exclusive Victrola stores in Indiana outside of Indianapolis.

Columbia Records TRADE MARK Note the Notes

Surface, tone, recording, reproduction—big names, new artists, quantity, variety—you have plenty of things to talk about in the October list of Columbia Records, the "Greatest List of Great Records Ever Issued."

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Co.
Woolworth Building, New York

NEW PATHE FACTORY READY SOON

Expected That New Brooklyn Plant Will Be Under Cover by October 1—Present Demand Very Heavy—Extra Space Badly Needed

H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., stated last week that work was progressing rapidly on the company's new factory at Grand and Flushing avenues, Brooklyn. Building operations are going on night and day and it is hoped to have the new structure under cover by October 1. The plant when completed will be used for the manufacture of motors and records. Meanwhile it is declared that the demand for the Pathé product, especially in view of the recent important deals put through with prominent concerns to feature those records, has almost swamped the company temporarily.

Mr. McMenimen was laid up for several days recently as the result of an attack of ptomaine poisoning, but managed to fight off the attack successfully.

C. E. Gore, one of the Pathé salesmen, is at present making a tour of the South from Memphis to New Orleans by automobile, and is interesting a number of new dealers in the Pathé goods.

C. W. Cosgrove, of the Innes store, Wichita, Kans., who recently opened a talking machine department, handling the Edison Diamond Disc phonograph, reports that he is doing a good business in Edison machines and records.

DOEHLER SERVICE PLEASES

A Letter Which Demonstrates Efficiency of This House in Domains of Die-Casting

Among the prominent houses in the industry stands the Doehler Die-Casting Co. with three modern factories at Brooklyn, N. Y.; Newark, N. J., and Toledo, O., with general offices at Brooklyn. The house has been established for a number of years, pioneers in the die-casting industry, and is doing a great deal towards greater efficiency in not only the production of its die-castings, but also by particular attention to the production problems of the manufacturers.

This is particularly true with its relation to the talking-machine field, in which die-castings are extensively used for tone arms and sound boxes. Being delivered ready for plating and assembling without any machining being required the economies affected by the utilization of die-casting in preference to certain other production methods are quite obvious.

Doehler service is being utilized by some of the most prominent manufacturers in the production of their tone arms and sound boxes. A recent letter from the Crescent Co. tells more perhaps about the value of Doehler service, because it is based on practical achievements.

Wm. E. Hoschke, president of the Crescent Talking Machine Co., wrote to the Doehler Co. as follows "Upon moving into our new offices, we wish to take the opportunity to express our appreciation not only of the quality of the merchandise which you have delivered to us during the years we have done business with you, but also the excellent service and untiring efforts which all the members of your company who have anything to do with our parts, have given us during this time. Our greatest desire is to build a phonograph which at all times stands for quality, and excellent workmanship, and we count upon your co-operation in the future, as we know that in your line, your product is unexcelled, and also let you know that we appreciate your prompt deliveries, and unvarying quality during a period when some other manufacturers are taking advantage of the difficulties due to the unsettled market conditions."

CONTEST TO GET PROSPECTS

Vernon Music Co., Los Angeles, Enlist Aid of Children, with Much Success

Los Angeles, Cal., September 1.—The Vernon Music Co., of 4409 Central avenue, this city, recently carried on a very successful contest among children in that section of the city for the purpose of securing Victrola prospects. Cards were issued to the children for distribution among their friends. Every card turned into the store by a visitor, no matter whether they made a purchase or not, counted as one vote for the child who had given it out. When the contest closed the child with the most votes was given a prize. The contest aroused much interest and brought in a number of prospects.

DEMAND KEEPS AHEAD OF SUPPLY

Over-Sold Condition of Columbia Co.'s Plant Chief Worry of Sales Staff

In discussing current conditions with the Columbia Graphophone Co., James T. Bradt, general sales manager, declared that the chief trouble with the sales department was the oversold condition in which the company finds itself, and which keeps the salesmen busy explaining to dealers why they can't get the goods they want. "There has been 100 per cent. increase in our output and it is still increasing, but yet cannot keep up with the demand," said Mr. Bradt, "which is due largely to a more general public appreciation of music reproducing machines of all kinds."

MONTREAL TRADE VERY ACTIVE

Summer Business Excellent, with Fine Prospects for Coming Months—Vacations for All Employes of Berliner Gramophone Co.—Higher Priced Machines Have the Call—How Cheaper Machines Help Build Business

MONTREAL, CANADA, September 2.—Trade conditions in the talking machine field locally during the summer months, which is generally looked upon as the dullest period of the year, have been unusually brisk and the dealers are now winding up in grand style. There are excellent indications at present that the fall trade is going to start in earlier than ever and that this season is going to be a hummer.

Every employe of the Berliner Gramophone Co., Ltd., is this year receiving holidays with full pay. Each employe who has been with the firm for a year receives a two weeks' vacation, while those with less than a year's service to their credit receive one day for each month of their employment. That appreciation of the firm's generosity will be reflected in the quality and quantity of their employes' work is the logical result of this consideration for them.

The annual outing of this firm was held on August 12, to Lavaltrie. The entire factory was closed down and also the retail stores, so that every employe and the families of the employes could join in one great family excursion. The steamer "Three Rivers" was chartered for the occasion.

The higher priced models of Victor product seem to predominate these days at the retail stores of the Berliner Gramophone Co., Ltd., which is a sure sign of better business, because a year ago Victors of lesser cost were the favorites. The company for the present is not taking on any more dealers, the reason being their inability to adequately fill the large orders of their present trade.

The Canadian Graphophone Co., wholesale Columbia distributor, in the Province of Quebec, has added five new soundproof demonstrating rooms in its main floor, making a total of seven in all, and has, in addition, installed four trial rooms in the basement for the demonstrating of foreign records, as the company finds they are somewhat of a noisy nature and for this reason are entirely separate from the English and French department. Here is carried an immense stock of records, as when it is taken into consideration that in Montreal there is a population of 100,000 foreigners and a large number of records must be carried in stock in order to cater to their wants.

Owing to the shortage of machines this firm had the past week to turn down an order for $600. The company states that it is not opening up any new accounts at present, preferring to satisfy and hold what they already have.

H. A. Brown, of the Berliner Gramophone Co., Ltd., was a recent visitor to Boston.

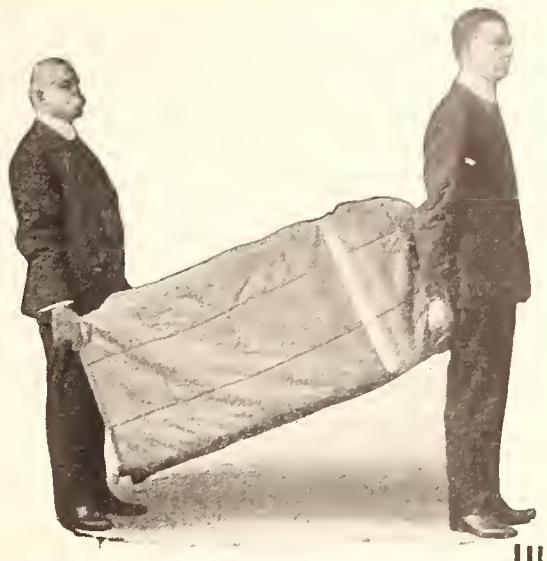
Philip E. Layton, of Layton Bros., and Henry Hamlet, wareroom and advertising manager of this firm, attended the convention of Canadian Edison dealers in Toronto this week.

Wm. Lee, Ltd., contends that the sale of the New Edison Diamond Disc is still forging ahead. The only complaint they have to make is that the supply does not keep up with the demand. They are making a leader of this machine. Columbia product, which is likewise given able representation, also measures up well in volume of sales. The entire catalog of both products is carried in stock.

Layton Bros., Edison and Columbia dealers, in order to show the progress made in connection with their new phonograph department, recently ran in all the local dailies an advertisement showing an illustration of the same in course of construction. When completed, which it is expected will be in the course of a couple of weeks, their de luxe soundproof demonstrating rooms, perfectly ventilated, will solve the problem of record selections.

"That numerous talking machine purchasers are taking with avidity to the fifty-seven varieties or more of the new machines now making their appearance on the Canadian market, is seemingly noticeable," said a leading dealer to your correspondent. "This all means 'grist to the mill,' inasmuch as the more cheap machines there are on the market of unknown quantity, the more machines we will sell of standard make and reputation, and the better for the makers that are spending their money in newspaper publicity. Again the makers of inferior machines create for us a good demand for records. To sum up the situation briefly it only means the educating of the public to acquiring a machine of national reputation and prestige. Now, continued the firm in question, do not for a minute take away the impression that I am knocking the cheap machines; by cheap, I mean types of talkers that come and go, here to-day and gone to-morrow, as at the price they seemingly answer the purpose for the time being, at any rate. A man you know when buying an automobile usually starts in to learn with a moderate priced car, and when he gets thoroughly conversant with the running of it, will not, naturally, be satisfied until he gets something better; so it is with the cheap talker," concluded the speaker.

LANSING



Khaki Moving Covers

will enable you to deliver your phonographs free of blemishes of all kinds.

No. 3 Carrying Strap Shown in Cut, $1.00

THESE covers are made of Government Khaki, interlined with heavy felt or cotton, fleece-lined, quilted and properly manufactured. Perfect protection in all weather.

POLITICAL RECORDS THE LATEST

Candidates for the Presidency Will Make Records for Talking Machines

WASHINGTON, D. C., September 4.—According to the latest plans of both the Democratic and Republican national committees, talking machine records will be used extensively during the coming campaign to reach persons who cannot attend political meetings where the Presidential candidates will speak. Mr. Hughes has already made a number of talking machine records, which are intended for reproduction at a popular price. President Wilson has not yet made any records, but he will be urged to do so and he is expected to accede to the request. By this plan the two candidates may be heard by thousands of people who may never get within one hundred miles of either one.

THE VICTOR IN PORTO RICO

Strongly Advertised by Two Live Dealers on That Island

In the August issue of "The Review," the journal of the West Indies, published in Porto Rico and devoted to general news, two of the four and a half pages of advertising was about Victor talking machines. One of the ads on the back cover was that of Henry W. Dooley & Co., 5 Tetuan street, San Juan, Porto Rico, and with stores in Arecibo, Mayaguez and Cuayama. Another page ad devoted to Victor goods is that of Sanchez Morales & Co., with stores in San Juan, Ponce and Mayaguez, a pretty good showing for one paper.

The Phonograph Finance Co., Cleveland, O., has been incorporated with a capital stock of $5,000 by John H. Price, Philip Crum, E. E. Maynard, B. L. Polcar and C. D. Sutton.

WOULDN'T BE WITHOUT THE WORLD

The William A. Conklin Piano Co. at 731 Greenfield avenue, Milwaukee, Wis., report an unusually good business for the Columbia line of Grafonolas and records which they handle in addition to pianos, player-pianos and sheet music. Mr. Conklin says: "I am a subscriber to The Talking Machine World, and let the world know it that I wouldn't be without The Talking Machine World for a minute."

The Columbia Graphophone Co. has leased an entire loft in the building at 739 South Broadway, Los Angeles, Cal., for a long term.

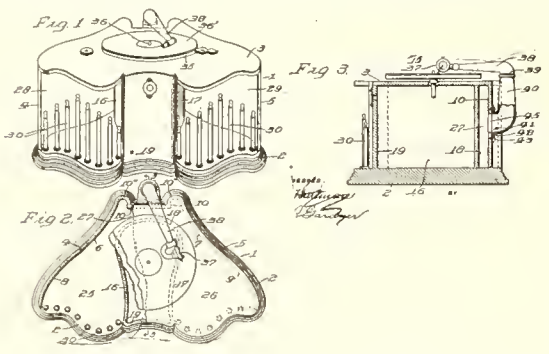
LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., September 6.—TALKING MACHINE.—Carl Schroeter, Berlin, Germany, assignor to the Victor Talking Machine Co., Camden, N. J. Patent No. 1,185,945.

The main objects of this invention are to provide an improved talking machine of simple, compact and efficient construction; to provide improved sound amplifying means.

In the accompanying drawings, Fig. 1 is a perspective view of a talking machine constructed in accordance with this invention; Fig.



2 a fragmentary top plan view partially in horizontal section of the same; and Fig. 3 a fragmentary side elevation, partly in vertical central longitudinal section on line 3—3 of Fig. 2.

TALKING MACHINE.—John C. English, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 1,185,988.

The main objects of this invention are to provide in a talking machine, an improved sound box arm and mounting therefor, and to provide improved sound amplifying means. In the accompanying drawings, Fig. 1 is a fragmentary vertical longitudinal section on line 1—1 of

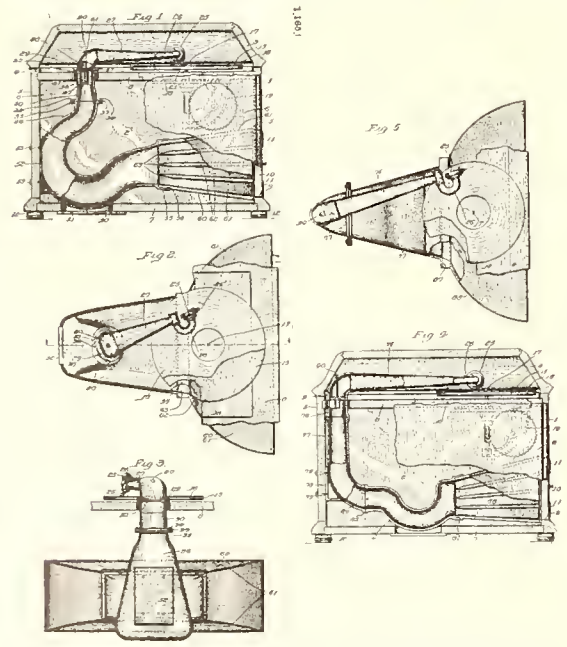


Fig. 2, of a talking machine constructed in accordance with this invention; Fig. 2 is a fragmentary top plan view of the same; Fig. 3 a fragmentary rear end elevation of the same; Fig. 4 a fragmentary vertical longitudinal section of a modified form of this invention, and Fig. 5 a fragmentary plan view partly in horizontal section of the same.

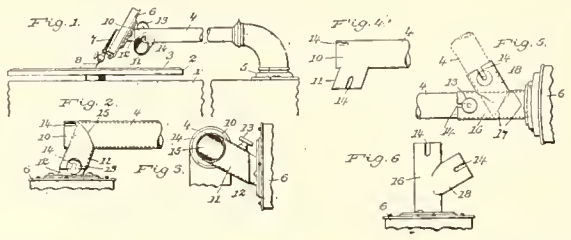
TALKING MACHINE.—C. L. Hibbard, Philadelphia, Pa., assignor of one-half to Frederic W. Hager, same place. Patent No. 1,186,190.

This invention relates generally to talking machines and has particular reference to a connection between the tone arm and sound box, by which the latter may be readily and conveniently set to co-operate with either the "zig-zag" or the "hill and dale" type of record. Its specific features are set forth in detail in the illustrations herewith.

In the drawings, Fig. 1 is a view in elevation showing the preferred form of connection in use, the sound box being arranged for reproducing from a "hill and dale" record. Fig. 2 is an enlarged detail plan view, showing the sound box shifted for use with a "zig-zag" type of record. Fig. 3 is a front view thereof, and Fig. 4 illustrates the shaped end of the tone arm with which the sound box is adapted to be coupled or connected. Fig. 5 is a plan view of a modification, in which the sound box is shown



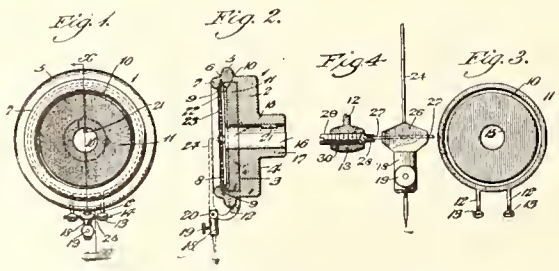
in position to co-operate with a "hill and dale" record, and Fig. 6, is a smaller plan view, showing the sound box as it would be arranged to reproduce from a "zig-zag" type of record.

SOUND BOX FOR TALKING MACHINE.—Alva D. Jones, Philadelphia, Pa. Patent No. 1,188,080.

In accordance with the present invention, the entire sound box body is constructed of a single piece of rubber or similar material, which is produced by casting or molding, the main body portion of the box being preferably thickened and hardened, and having attached thereto by an annular, resilient, integral hinge, a front annular bead which overhangs and encircles the diaphragm seat, said bead being softer or semi-cured with reference to the sound box body, which latter is harder or cured to a harder degree than said front annual bead containing the diaphragm seat, and there is also simultaneously cast within the hardened body portion of said box a metallic plate having a gasket receiving groove and projecting lugs for co-operation with the stylus bar and its adjuncts, whereby a device is cheaply produced having peculiar reasonant qualities, and wherein any surface sounds or metallic or scratchy noises are eliminated or absorbed in the sound box body, the resultant device having peculiar reasonant qualities which closely resemble the action of the human throat or palate in reproducing sounds.

To the above ends this invention consists of a novel construction of a sound box composed of rubber or similar material, wherein the body portion is thickened and cured to the requisite degree of hardness, said body portion having cast therein a plate, said body portion having also integral therewith or secured to the front portion thereof, an annual bead encircling and overhanging the diaphragm, the material of which said bead is composed being softer than said sound box body, whereby the requisite capacity for vibration of the diaphragm at its outer and intermediate portions is provided.

It further consists of a novel construction of sound box having a body of rubber or similar material which is fully cured so as to be in a hardened or resonant condition, and having a metallic plate cast therein to co-act with the diaphragm, while the outer front portion of the box which encircles and overhangs the diaphragm, as well as the rearwardly extending neck or attaching member, is softer than said sound box body. It further consists of a novel method of casting a sound box. For the purpose of illustrating the invention, there are



shown in the accompanying drawing certain forms which are at present preferred, since the same will give in practice satisfactory and reliable results.

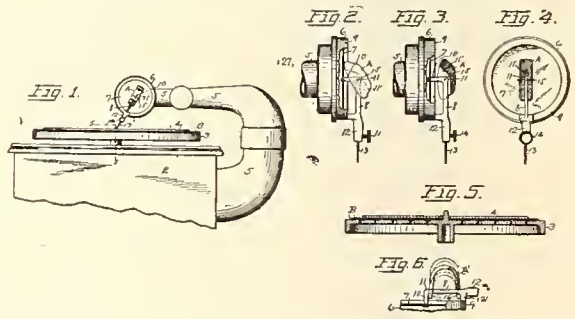
Figure 1 represents a front elevation of a sound box embodying this invention. Fig. 2 represents a section on line x—x Fig. 1. Fig. 3 represents a front elevation of the metallic plate and its lugs in detached position. Fig. 4 represents on an enlarged scale a front elevation, partly in section, of the jewel bearing for the stylus bar.

TONE PURIFIER.—Chas. P. Marshall, Watertown, N. Y. Patent No. 1,189,152.

This invention relates to tone purifiers, designed for use in connection with talking machines generally, and the invention relates particularly to a device of the class for attachment to the reproducers of talking machines, wherein the well known vibration bars or members are employed for conducting the sound vibrations from the needle to the reproducing diaphragms.

The object of the present invention is to provide novel and simple means for improving—rendering clear, pure and natural—the sounds of voices, music and the like, reproduced by talking machines, by eliminating practically all buzzing, yawling and reediness, which are caused chiefly by an excess of the high harmonic waves mingling with the predominant notes (original sound waves) and their proper harmonics as incorporated in the records.

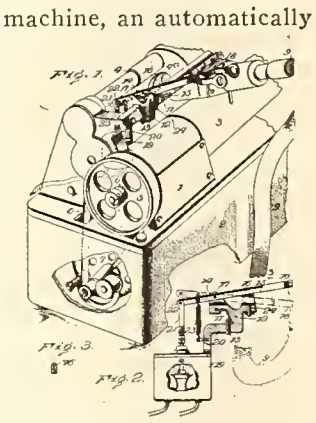
Fig. 1 is an elevation view of the reproducing part of a talking machine; showing tone purifier applied thereto. Fig. 2 is an enlarged side elevation of the transmitter showing one member of tone purifier pivotally applied to the vibration bar; the said member also engaging the diaphragm. Fig. 3 is a similar view; showing the said member disengaged from the diaphragm. Fig. 4 is a front face view of the transmitter. Fig. 5 is a central vertical section, taken on line 5—5 of Fig. 1; showing the second



member or part of the tone purifier interposed between the record and the revolving disk. Fig. 6 is a view; showing a modification of the purifier member applied to the vibration bar.

TALKING MACHINE AND ATTACHMENT THEREFOR.—Frank L. Capps, Bridgeport, Conn., assignor to the American Graphophone Co., same place. Patent No. 1,188,728.

The invention relates particularly to talking machines adapted for office use in the dictating of correspondence and the like. The object is to provide, in a machine of this class or as an attachment for such a machine, an automatically acting mechanism for starting and stopping the motor as the mouth piece of the speaking tube is moved into or out of operative position.



Of the drawing, Fig. 1 is a perspective view showing some of the principal parts of a talking machine embodying the invention; Fig. 2 is a fragmentary detail view partly in section and party in elevation showing the parts to which the invention especially relates; Fig. 3 is a retail sectional view taken along the line 3—3 of Fig. 2.

SOUND REPRODUCING MECHANISM.—William Rotter and Richard S. Arthur, Newark, N. J. Patent No. 1,188,682.

The objects of this invention are to provide an improved sound reproducing apparatus for use more particularly with dolls and other toys for making the doll appear to talk; to enable the sound reproducing apparatus to be conveniently operated and controlled, and records to be readily and easily changed; to provide means for positively moving the record return mechanism

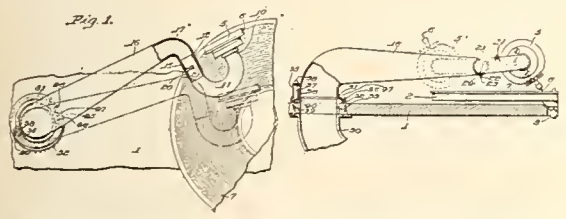
out of the way of the record for removing and replacing the same; to provide means for positively releasing the record return mechanism when starting the machine if it has already operated, and means for positively throwing in the record return mechanism upon starting the machine, if it has not already operated; to provide improved means for releasing the brake spring from its detent relation to the brake arm to stop the machine; to provide a simple and convenient repeat attachment; to provide a reproducer in which the sapphire holder is attached directly to the diaphragm; to provide means arranged centrally of the diaphragm for regulating its tension; to locate the slot and pin connection between the diaphragm holder and its casing in the neck of the reproducer, and to obtain other advantages and results as may be brought out in the above description.

TALKING MACHINE.—John C. English, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 1,188,744.

This invention relates to talking machines, and more particularly to an improved tone arm and mounting therefore, and to an improved connection between a tone arm and a sound box.

The main objects of this invention are to provide a compact, simple and inexpensive mounting for a tone arm; to provide an improved connection between a sound box and a tone arm whereby the sound box may be inverted into an inoperative position to rest close to a turn table.

In the accompanying drawings, Figure 1 is a fragmentary top plan view, partly in horizontal section, of a talking machine constructed

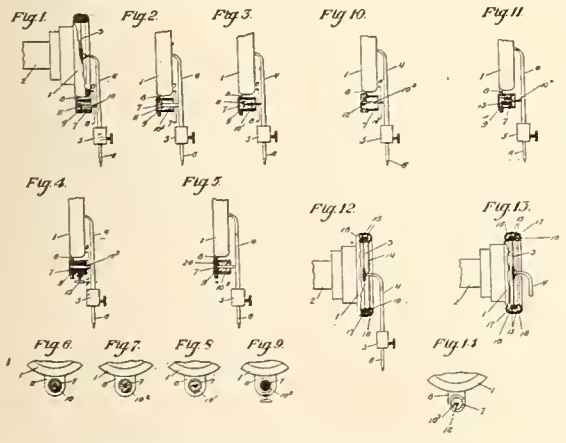


in accordance with this invention; and Fig. 2 a fragmentary side elevation partly in vertical section of the same.

SOUND REPRODUCING MACHINE.—Patrick B. Delany, South Orange, N. J. Patent No. 1,190,249.

This invention relates to phonographs or talking machines and to the production of records therefor. Its object is to improve the quality of the musical tones or vocal utterances and to improve the behavior of the apparatus in other respects.

In the accompanyiny drawings: Figures 1, 2, 3, 4 and 5 are respectively elevations partly in section, somewhat diagrammatic, illustrating a reproducer head and needle arm with improvements applied thereto; Fig. 6 is a section on the line 6—6 of Fig. 1; Fig. 7, a section on the line 7—7 of Fig. 2; Fig. 8, a section on the line 8—8, of Fig. 3; Fig. 9, a section on the line 9—9, of Fig. 4; Fig. 10, a view similar to Fig. 1 showing a modification; Fig. 11, a like view showing a further modification; Fig. 12, a like view show-

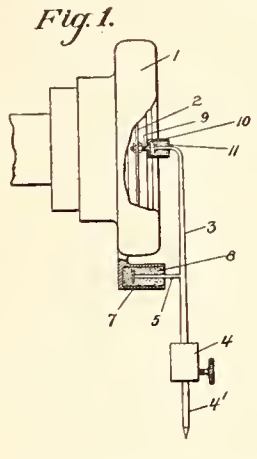


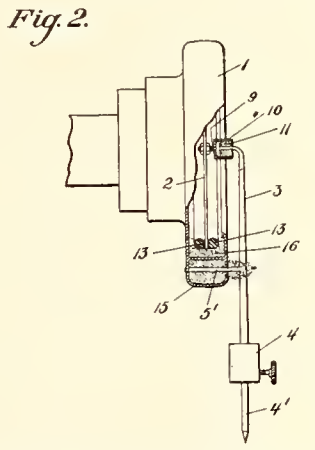
ing a modification in the reproducer head; Fig. 13, a transverse section through the reproducer head showing a manner of holding the reproducer disc; Fig. 14, a section of the line 14—14, of Fig. 10.

TALKING MACHINE RECORDER AND REPRODUCER.—Patrick B. Delany, South Orange, N. J. Patent No. 1,190,636.

This invention is designed to eliminate scratching or scraping noise from the record and to so improve the quality of recordations and reproductions. It is well known that even the smoothest surface revolving under the needle will produce quite a loud or observable noise emitted by the horn or amplifier. It has been found that this is largely due to the metallic vibrating arm connecting the record and the diaphragm of the sound box. Vibrating arms of wood, bone or any hard substance will produce this effect to a modified degree. It has been sought to remedy such defect by rubber and other vibration deadening materials interposed at the point of contact between the vibrating arm and the diaphragm, but on account of the elasticity of such materials, or for other reasons, the tone of reproduction has been greatly lowered and modified and, owing to the instability of such materials, particularly under pressure, the instruments soon become out of adjustment or order. A plan has been devised whereby metallic connection between the record and diaphragm is entirely severed without appreciable loss of force but with marked suppression of the objectionable scraping sound, the result being a pure and faithful reproduction.

The object of this invention is attained by dividing the vibrating arm, preferably between





the diaphragm and the bend in the upper part of the arm, and seating or embedding the adjacent ends in a mass of material of suitable density and stability to carry the major or sound producing vibrations, and yet of such character as to suppress or eliminate objectionable extraneous, incidental and minor vibrations that produce the extraneous or scraping sounds in the tones produced by the diaphragm. The material of such mass may be a single material or a compound material composed, for instance, of rubber, asphaltum, tar, waxes of various kinds, etc., or compounds of any two or more of such simple materials.

In the accompanying drawing, Fig. 1 is an elevation partly in section; and Fig. 2 a like view showing a modification.

TONE ARM FOR TALKING MACHINES AND THE LIKE.—Oscar J. Clair, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 1,190,728.

In the construction of talking machines, it is generally customary to provide the same with tone arms, frequently of the tapering type, to the outer or free end of which is suitably attached the sound box or other reproducing means, the inner end of the tone arm, which in the tapering variety of arm is also the large end, being adapted to communicate with the horn or other amplifying means employed.

To permit of the free movement of the tone arm across the surface of the sound record, it is not unusual to mount the elbow thereof at the end communicating with the horn, bracket or other sound amplifying means upon a vertical spindle extending from said fixed end longitudinally through the elbow and suitably mounted in a fixed relation with the casing or other stationary part of the talking machine.

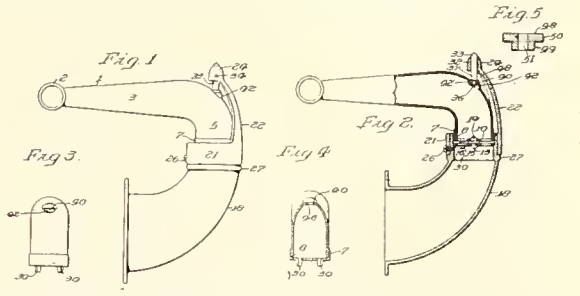
Tone arms are generally constructed with a substantially right angled bend or elbow adjacent that end thereof which communicates with the horn or other sound amplifying means, and a hole is usually provided through the outer surface of the elbow for the reception of such spindle. A suitable lug or similar projection is usually soldered or brazed on the exterior surface of the elbow at the point where the said hole is to be, in order to provide a thickness of metal at said point sufficient to form an adequate bearing for said spindle. As the spindle usually extends through this opening and throughout the length of the elbow from said opening to the end of the arm communicating with the sound reproducing means, unless most carefully constructed there is liable to be a slight play or looseness between the spindle bearings therefor, with the result that the tone arm is set into a state of vibration during the reproduction of sound thereby causing an undesirable rattle or buzzing. In such constructions as have been above referred to it is also difficult to properly position the lower end of the spindle into the opening therefore in the upper end of the bracket or support when once the spindle has been withdrawn or removed for any purpose.

The principal objects of the invention are to do away with the necessity for the employment of such a spindle and to so modify the shape of the tone arm itself as to provide a suitable substantially flat bearing surface or shoulder integral with the arm itself to co-operate with one of a pair of short pivotal studs which do not extend into or through the elbow when in position.

Other objects of this invention are to provide a construction in which the two separated or spaced studs may be readily adjusted toward and away from each other to provide for a snug engagement between the tone arm and the studs upon which it is mounted to swing with a view of preventing any jarring or rattling of the parts during the reproduction of sound.

Other objects of this invention are to provide a tone arm which shall be neat in appearance and inexpensive to construct, and which shall do away with the necessity of soldering or otherwise securing an unsightly external projection upon the outer curved surface of the elbow and which is liable to detract from the smooth, symmetrical appearance of the elbow. Further objects of the invention are to reduce the cost of manufacturing tone arms; to provide a tone arm in which the spindle is eliminated having a bearing which shall be substantially, and for all practical purposes, integral therewith, and which shall not be liable to separate therefrom through rough usage or careless handling.

Still further objects of this invention are to provide an improved mounting for the tone arm



which shall permit of the free movement of the tone arm in a horizontal plane, while preventing any movement of the tone arm in a vertical direction; which may be readily assembled or disassembled, and in which the tone arm may be easily and quickly removed or replaced without the use of special tools.

In the accompanying drawing, Figure 1 is a side elevation of a tone arm constructed in accordance with the invention and in operative position upon its hollow supporting bracket, the latter being removed from a talking machine, and Fig. 2 is a central vertical section of a tone arm and bracket similar to that shown in Fig. 1; Fig. 3 is an end elevation of the tone arm removed from the supporting bracket; Fig. 4 is a similar view thereof partially in central vertical section, the section being taken along the axial line of that portion of the tone arm communicating with the sound amplifying means, and Fig. 5 is an enlarged view of a detail of the device in central vertical section of the tone arm in question.

KEEPS THE DEALERS HUSTLING

M. M. Blackman Goes Right After the Edison Dealers in the Kansas City Territory and With Excellent Results in the Matter of Sales

KANSAS CITY, Mo., September 5.—M. M. Blackman, manager of the Edison Shop, this city, not only keeps on the jump himself but endeavors to keep the dealers in his territory full of energy. Besides personal visits Mr. Blackman keeps after his dealers through the medium of the mails, and sends out some snappy letters. In a letter sent to the dealers a month or so ago Mr. Blackman emphasized the possibilities of doing summer business in phonographs and said in part:

"It is easy to stand off and criticize. One never gets anywhere that way. Unless you have actually tried out and disproven the methods listed below which these dealers have found successful, it is useless and senseless to say: 'It can't be done in my town.' It makes me tired to go into a store of a dealer whose eyes are no more open to Edison possibilities than the eyes of a one day kitten and have him say to me: 'That's all right for the big town but I've got the hardest community to deal with in seventeen States. It can't be done.'

"Just think! One 250 sale per month would be $3,000 gross business per year. Then throw in a few 50's, 200's and 100's and see where you come out.

"Are you using any or all of the following publicity measures: Evening serenade plan, lawn concerts, church concerts, lodge concerts, interlocking advertising, Edison monthly circularizing.

"Are you using the following means of selling: Personal calls outside of the store, telephone calls asking people to come in and hear, calls upon owners to get new prospects, home demonstrations of the new Edison.

"If you are not doing these things you can know positively that your Edison business might be increased from 100 to 500 per cent. If others can get such results as listed above in their territories, you can do as well or better in yours."

ADDITION FOR EDISON PLANT

Large New Three Story Structure to be Used for Record Storage and Shipping Purposes—Necessitated by Blue Amberol Demand

The rapid increase in the demand for Edison phonographs and records that has developed in the past few months has made imperative an expansion of the manufacturing and storage facilities at the great Orange, N. J. plant and it recently was announced by the management that arrangements for the erection of an additional building have been completed. The proposed structure will be used for record storing and shipping purposes and it will relieve the congestion that has developed in other buildings because of the lack of adequate storage rooms. It will be of cement and steel construction, three stories in height, sixty-nine feet wide by 221 feet in length. The contract calls for completion of the work about October 15.

The new building will replace a one-story structure erected after the great fire of December, 1915, that nearly destroyed the Edison plant. It was adequate for the purpose it was designed for until several months ago when an extensive national advertising campaign on the New Edison was started, and the owners of Amberolas and other cylinder instruments commenced to appreciate the perfection of the Blue Amberol record. The increase in business that followed the advertising made the manufacturing and storage facilities at the Orange plant absolutely inadequate within a comparatively short time. It was necessary to use storage and shipping room space that was needed for manufacturing purposes and, in addition to this, temporary structures had to be constructed in the vicinity of the plant.

NEW COLUMBIA CATALOG

Full Line of Electric Models Described in Latest Booklet

The Columbia Graphophone Co. has just issued a very attractive booklet featuring the complete line of Columbia electric Grafonolas. This booklet is artistically illustrated, large-sized pictures of the various electric Grafonolas being shown. The first page of this booklet briefly calls attention to the fact that the Columbia electric Grafonola operates perfectly on any current, whether direct or alternating, is adaptable to any voltage; may be attached to any socket, and can be depended upon to give continuous, silent, effective service under any and all conditions. The complete lines of Columbia electric Grafonolas comprise five machines, retailing at $125, $135, $175, $225 and $350.

NEW QUARTERS IN SALISBURY, MD.

SALISBURY, MD., August 7.—The Salisbury Music & Specialty Co. has opened elaborate quarters in this city at 102 Dock street, corner of Main, for the exploitation of the Victor line of talking machines and records. The new store is equipped with two sound-proof demonstrating booths and other modern conveniences.

The New Jacjectic Phonograph Co. has been incorporated under the laws of Delaware to manufacture phonographs, discs, cylinders and sound records. The capital stock of the company is $500,000.

A store at 22 East 125th street, New York, has been leased to a phonograph company, who will install a large line of machines and records.

SHOWING THE WAY TO THE DEALER

Victor Co. Gives Some Good Advice on Local Advertising and the Wisdom of Following Out the Policy of Publicity as Laid Down

In a letter accompanying proofs of the Victor advertisements in the newspapers of the country for the current month, and sent to the Victor dealers, the company says regarding advertising:

"The successful officer is the man who, in leading his men into battle, doesn't order them to go where he won't go himself, and you may be very sure that you will be safe in following our lead by using big spaces of your own to tell your own local public how well you can supply them with Victrolas and Victor records.

"Read these advance proofs carefully. They are designed and built to reach everybody—the Victrola prospect, the enthusiastic record customer and the record customer who needs a special stimulation, but of course it's up to you to get your own share of the resulting business."

NEW AMBEROLA FOLDER ISSUED

A four-page folder that suggests very forcibly the pleasure that an Amberola will afford in the home has been issued by the advertising department of Thos. A. Edison, Inc., for the benefit of the dealers. The folder is printed in two colors, red and blue, and the numerous features of the Amberola are well set forth. The folder is 8½ x 5½ inches in size, and is specially adapted for mailing purposes.

Edward Allington, Jr., will open a new Pathé Pathephone Shop on Stephenson street, Freeport, Ill., early this month.

The big selling months—October, November, December—are HERE!

IF YOU are not already selling phonographs it will be well for you to consider the matter carefully *at once.* Phonographs are in great demand and are profitable for you to sell.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

"THE Highest Class Talking Machine in the World" is the machine for you to handle. It is the famous instrument which won the highest score for tone quality at the Panama Pacific Exposition.

SONORA'S many exclusive patented features are unique and important and account for its remarkable superiority. It is extensively, steadily, and aggressively advertised.

WRITE us today regarding the Sonora agency in your *territory.* And if you're in New York, or Chicago, or San Francisco, don't fail to call on us in person. The Sonora, because of demonstrated merit, really sells itself.

VOL. XII. NO. 10. PER YEAR, ONE DOLLAR

The TALKING MACHINE WORLD

For the makers & sellers of talking machines

Published Each Month by Estate of Edward Lyman Bill at 373 Fourth Ave., New York, October 15, 1916

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces"—*Collier's Weekly.*

Entered as second-class matter May 2, 1905, at the post office at New York, N. Y., under the act of Congress of March 2, 1879.

What do you know about a phonograph?

1—Will it play all types of disc records without makeshift additions? *Sonora will.*

2—Is its motor efficient? *Sonora's motor* made in Switzerland runs, per winding, about twice as long as any other.

3—Does the sound box contain materials that will deteriorate with age? *Sonora's doesn't.*

4—Does the sound amplifier form a clear unblurred tone? *Sonora's does, due to its unique patented construction.*

5—Is the tone control at the sound source—the correct place, and does it merely reduce the volume of sound and not the quality? *Sonora's is and does.*

6—Is the envelope filing system such as to make the locating of records a matter of an instant? *Sonora's is.*

7—Has the machine an effective, reliable automatic stop? *Sonora has.*

8—Is the cabinet work beautiful, finished perfectly on all sides with graceful bulge curved lines? The answer is *"yes"* for Sonora.

9—Is there a motor meter to tell how many more records the motor will play without rewinding? *There is on Sonora.*

10—What is the opinion of authorities regarding the instrument? At the Panama Pacific Exposition, Sonora won the highest score for tone quality.

Sonora is demonstratedly the Highest Class Talking Machine in the World. The public wants it. It is the best selling proposition you can find anywhere. If you're interested in selling Sonoras write us today regarding an agency in your vicinity.

Each machine guaranteed one year

SALESMANSHIP IS A SELLING OF ONE'S VIEWPOINT

Substantial Reasons Why Salesmen Should Be Encouraged to Know Their Line and Be Well Acquainted With the Various Processes of Manufacturing

Salesmanship in its broader sense is essentially the selling of one's viewpoint—the ability to start with the other man's point of view and lead his mind to the desired end. When an individual endeavors to influence another to adopt a certain mental attitude or to take the desired action, he is practicing salesmanship. In this broad sense, every one can profit by a knowledge of the principles of salesmanship and successful selling methods, and it is largely through such knowledge as this that so many of our most able business executives have risen from the selling ranks.

The advertising manager must sell his board of directors on the advocacy of an advertising campaign. The corporation treasurer must sell the bank on his proposition when he goes to borrow funds. The great lawyer, pleading before a jury, is simply trying to sell that jury his point of view. Every man, then, has a vital interest in that knowledge of the human mind and that practice of persuasion in which lies the essence of salesmanship.

The employer is often to blame for one defect in his salesmen. Employers need to take the salesmen more into their confidence, and see that they know the constructive features of their goods as thoroughly, if possible, as the employers themselves. Salesmen should have the opportunity of acquainting themselves freely with the processes of manufacture. They should not be strangers to the factory. Their interest should be stimulated, and their knowledge increased. They cannot approach the ideal until they know far more, practically, of the goods they are selling, and this they cannot learn unless their employers give them a chance.

A thorough knowledge of the line he is handling will do more than any one other thing to give the talking machine salesman the correct selling viewpoint. If his knowledge is merely superficial, and is confined to a few glittering generalities concerning handsome cases and excellence of tone, it is small wonder that the difficult prospect, the prospect who really must be "sold," slips away without leaving his name on the order blank.

When the salesman thoroughly understands the talking machine which he is endeavoring to sell, and knows its qualities sufficiently well to enable him not only to demonstrate its good points but to prove why they are good, he is well fortified against failure.

The talking machine salesman who knows his line, and who is enthusiastic concerning it, will be enabled to impart that same enthusiasm to his prospect, which in turn can be made a powerful lever for a speedy and satisfactory sale.

TALKING MACHINES IN SWITZERLAND

German and French Concerns Control Greater Part of Trade in That Country—Some American Machines and Records Sold There

WASHINGTON, D. C., October 3.—According to U. S. Consul Walter H. Schulz, of Berne, there are some very strong Swiss concerns producing phonographs, but German products have a very large sale. Phonograph parts are manufactured extensively in and near Geneva. The greatest concern is the Deutsche Gramophon Gesellschaft, at Berlin, represented in this district by Kaiser & Co., Marktgasse, Berne. No discs are manufactured in Switzerland. All come from France and Germany.

Current machine prices are: German (American) makes from $32 to $350; German, $8 to $120; Swiss, $7 to $100; French, $10 to $110. German, French and Belgian discs are on the market at 40 cents to $1.50. Since the war started prices have increased 15 per cent.

The German Gramophon Co., of Berlin, and Pathé, of Paris, have the largest share of the trade. The German imports, including German-made American machines, amounted, in 1914, to $47,828, and French imports to $15,488, while the direct American imports were valued at $1,752.

Phonographs without horns have the widest sale, but the demand has been reduced by the war. Orders are regularly executed by Germany, however. Twenty to 35 per cent. is granted to dealers on phonographs and discs. France is a keen competitor in the disc trade. The duty on phonographs, according to the Swiss customs tariff No. 955, is $3.86 per two hundred and twenty pounds.

CHALMERS CO. REARRANGE STORE

The Chalmers Co., 879 Broad street, Newark, N. J., exclusive Victor dealers, have recently completed the rearrangement of the entire store. In the rear four new demonstration booths have been added, and the whole interior has been redecorated. H. B. Merrit, manager of the warerooms, has added Wm. Dane and H. H. Jones to his sales staff. Mr. Dane was formerly connected with the L. Grunewald Co., New Orleans.

TO HANDLE COLUMBIA IN DENVER

American Furniture Co. Leases Additional Quarters for New Department

DENVER, COLO., October 4.—The American Furniture Co., 1542 Lawrence street, this city, has leased the second floor of the Colonial Trust Co. Building, at Sixteenth and Lawrence street, as an addition to its present quarters and will use the space for a department devoted to the display and sale of the Columbia Grafonola, for which the company has secured the agency.

EDITORIAL MAKES GOOD AD COPY

Adopted by Talking Machine Dealers in Many Sections—Albert Leon's Clever Advertising

When Arthur Brisbane, editor of the New York Evening Journal, wrote his recent editorial around the fact that "The Machine That Talks and Sings Is the Voice of the Home," he apparently did a great thing for the talking machine trade, and the live dealers were quick to take advantage of it. The editorial has been reproduced in full in a number of different forms, one of the most effective treatments being that of Albert Leon, Victrola and furniture dealer of Perth Amboy, N. J., who reproduced the editorial in full size in connection with his Victor advertisement running down the adjoining three columns. It was a piece of publicity which could not be overlooked.

NEW QUARTERS IN SALEM, O.

The W. G. Fawcett Co., Salem, O., is now located in new quarters on Main street, that city. The company handles a large line of talking machines and records.

KNOWN BY HIS ACTS

When you find a salesman who keeps his stock in nice shape, goods well displayed, everything in its proper place, and showcases nicely arranged, you make up your mind that that man is useful and will succeed.

The Donald Co., Newark, N. J., has arranged to install an exclusive Columbia Grafonola department.

JOINS U. S. CHAMBER OF COMMERCE

National Association of Talking Machine Jobbers Becomes Affiliated With That Prominent Organization—J. N. Blackman Appointed National Councillor—An Important Move

From now on the National Association of Talking Machine Jobbers will have a voice in the Chamber of Commerce of the United States, the most representative business organization in the country. According to a notification received by Secretary Wiswell from Elliot H. Goodwin, of Washington, D. C., general secretary of the National Chamber, the National Association of Talking Machine Jobbers has been formally elected to membership to the central body, which already numbers over seven hundred commercial organizations and represents upwards of 300,000 business men. Not only every State in the Union and our outlying possessions are represented, but the principal American Chambers of Commerce abroad.

Closely following its election to the National Chamber, the president of the National Association of Talking Machine Jobbers appointed J. Newcomb Blackman, of New York, national councillor. Mr. Blackman will serve as the connecting link between his organization and the National Chamber. This is an office of consequence inasmuch as the councillors, individually and as a body, act as advisors on the policies of the chamber and have other important functions to perform.

Hereafter when policies affecting our commerce are under discussion by the Federal authorities, the National Association of Talking Machine Jobbers will have a chance to express itself inasmuch as one of the main purposes of the Chamber of Commerce of the United States is to focus business sentiment. From time to time referenda are sent out by the National Chamber, for the purpose of ascertaining for the benefit of Congress and the President, business opinion prevailing throughout the country on questions of immediate and widespread importance.

In fact, the National Association of Talking Machine Jobbers expects to secure much assistance from the National Chamber in many ways. It will receive a weekly general bulletin, which probably contains the freshest and most reliable news of its kind to be secured from any source. The information is along the line of commercial opportunities and of development in different Federal bureaus and departments.

In addition to this there will be a legislative bulletin which follows the progress of all legislation introduced in Congress affecting business and commerce.

All members receive regularly the official publication of the National Chamber, The Nation's Business, which from month to month contains a fund of information on business and economic subjects.

In addition to the privilege of membership included in the direct service as outlined above, members also have the right of utilizing the information bureau of the chamber maintained at the national headquarters to obtain information on matters which may happen to be of direct interest to them.

This amounts virtually to the National Association of Talking Machine jobbers having a special Washington representative.

The Chamber of Commerce of the United States aims to make more available and more useful to all business men the work of the various Federal bureaus at Washington. The activities of the consular service, the bureau of foreign and domestic commerce, the bureau of standards, the census bureau, the bureau of chemistry and many others are thus made to aid materially the projects of business interests of the country.

REGULATING THE RECORD APPROVAL EVIL

Some Interesting Hints and Suggestions on that Important Matter Offered at the Recent Edison Dealers' Convention Which Was Held in Toronto

TORONTO, ONT., October 4.—At the recent convention of Canadian Edison dealers held in this city last month a subject which was most cleverly handled was that of the record approval problems and their solution.

"The greatest evil in this business is the approval plan on records," was the conviction of J. D. Ford, manager of the R. S. Williams & Sons Co., Ltd., phonograph department. "You must positively have a regulation by which to work your approval system. Don't allow your clerks or yourself to say to a customer, 'You can take some records for a few days, return them when you feel like it.' Never give a customer the idea that you are going to give him that service.

"Acquaint him with the fact, as we do in our retail department, that we have an approval system, and if his credit is good, allow him to take some records on approval for forty-eight hours. We have to know and have a pretty good reason before we will take those records back after the forty-eight hours are up, and another thing—there are only two rules—one is that the records be returned within forty-eight hours, and another is that the records must not all be brought back. We stipulate that the customer must keep not less than one-third of the records taken on approval. With these two stipulations you can always be positive that your approval system and your stock will always be right.

"In sending records out on approval, it is wise to keep a list of the number of the records, not merely the class or price of them, and check them off when returned. If you don't check them off you will find yourself wondering where the old records in your stock came from.

"Make a blacklist of the persons who will not live up to your rules, and if there are any other dealers in your town to whom you think they might go telephone them. We have had people go the rounds of seven or eight dealers and finally come back to us.

"One of the solutions of the approval evil is to have a salesman call at the customer's house with a bundle of new records. Have him play them over and sell the records right in the home. We are doing this in Toronto.

"With approbation done away with, as we are trying to do in Toronto, you can become more efficient salesmen in the way of selling records, you will become better acquainted with your catalog, with the artists and with the tastes of the customers. Instead of a customer taking home one-third of the records and returning two-thirds he will come to your store and hear the records played and you will double your sales."

TO HANDLE VICTROLAS EXCLUSIVELY

A. E. Schweiger, Inc., to Devote Entire Four-Story Building to That Line

A. E. Schweiger, Inc., talking machine dealers of 1525 Broadway, Brooklyn, N. Y., announce that beginning October 1 they will handle Victrolas exclusively in their entire building comprising four floors and fourteen demonstration booths. The booths are of strictly up-to-date construction, and handsomely decorated and furnished. The house carries a complete assortment of Victrolas in large quantities, together with 15,000 Victor records.

ENLARGE HAHNE & CO. DEPARTMENT

Plans have been completed for enlarging the Victor department of Hahne & Co., Newark, N. J. When completed a total of thirty demonstration rooms will be at the service of prospective purchasers. The large auditorium is also being prepared to be used for public demonstrations, Joseph A. O'Donnell, manager of the department, planning for the biggest season in years.

"MUSICAL ANESTHESIA" THE LATEST

Talking Machine Music Occupies Minds of Indianapolis School Children While Physicians Inoculate Them Against Typhoid

INDIANAPOLIS, IND., October 5.—The talking machine in the schools has a new meaning for the pupils in the public schools of this city, for they have had a new experience with "Musical Anesthesia." Before the school term opened physicians began the work of inoculating the pupils against typhoid fever, and at one school two hundred and sixty pupils were lined up in the auditorium for treatment. A talking machine was brought into use, and while the room resounded with stirring music the physicians worked rapidly. The children were so interested in the music that not one shrank from the treatment.

John Owens, head of the well-known retail Victor firm of Owens & Beers, 81 Chambers street, New York, is receiving the congratulations of his many friends in the trade upon the arrival at his home recently of an eight and a half-pound baby girl, the first Owens heir.

"THE MOST VALUABLE MEDIUM"

THE MANOPHONE
JAMES MANOIL COMPANY
INCORPORATED
EXECUTIVE OFFICE: 60 BROADWAY

NEW YORK, September 21, 1916.

Editor, The Talking Machine World.

Dear Sir: We are appreciative of the splendid results accruing to us from our various advertisements in The Talking Machine World, which is beyond question of doubt the most valuable medium among the journals devoted to the phonographic trade.

We cannot endorse your paper or its policy too strongly. The conduct and management of it are typical of the finest in trade journalism, and it has our hearty endorsement.. Very truly yours,

JAMES MANOIL CO., INC.,
(Signed) P. J. LYNCH, General Sales Manager.

ANOTHER "WORLD" ENTHUSIAST

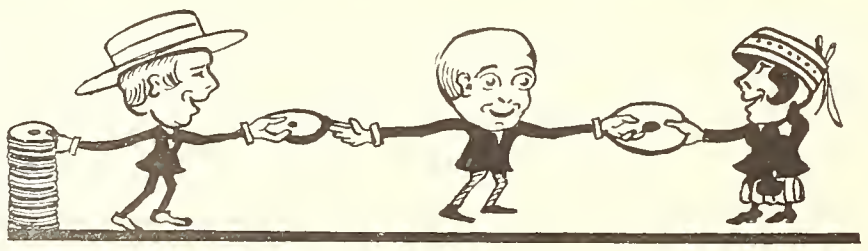
Frank L. Diefenderfer, of the Metropolitan Phonograph Co., Reading, Pa., writing to The Talking Machine World under date of September 20, says in part, "I find this paper so important that I absorb every bit of information immediately upon receipt and insist upon all my people doing likewise. I really can't express in value what your publication is worth to me. Under these circumstances the only thing I can do is to renew our subscription when the present one runs out."

OPENS BRANCH IN BROOKLYN

Leon Brick, of 1808 Pitkin avenue, Brooklyn, one of the oldest Columbia dealers of that city, has opened a branch store at 1542 Pitkin avenue, where the Edison Diamond Disc and the Pathé phonographs are featured. The store is elaborately decorated and is equipped with two sound-proof demonstrating rooms. The business is conducted under the name of The East New York Edison Phonograph Shop. M. B. Brick, who has been with his father for the past twelve years, is manager, and Wm. S. Hutz, assistant manager.

THE CHANCE TO MAKE CASH SALES

R. H. Morris, general manager of the American Talking Machine Co., Brooklyn, N. Y., says the outlook for fall business was never better, both with the distributors and dealers. Mr. Morris says the shortage in machines this fall would be felt everywhere, but if the dealer will insist upon large cash payments he will be able to dispose of all his machines advantageously.



JOBBER —— to —— DEALER —— to —— PUBLIC

EASTERN VICTOR SERVICE

The wide-awake dealer knows the public won't come in to buy simply because he has got the goods at a PARTICULAR time. The wise dealer knows he MUST HAVE the goods WHENEVER customers come in.

The dealer making a MAXIMUM of sales has got to have a jobber behind him who delivers COMPLETE orders and ON TIME. You want attention of this sort the next few months. Why not make us prove you can get it from

"Will there be a Victrola in your home this Christmas?"

We do the questioning—in our advertising which reaches every part of the country.

People do the answering—by going to the stores of Victor dealers everywhere.

You do the business—demonstrate the Victrola and turn the prospect into a customer.

This is going to be a big Victrola Christmas. Be sure to get *your* share.

Victor Talking Machine Co., Camden, N. J., U. S. A.

Berliner Gramophone Co., Montreal, Canadian Distributors.

Important warning. Victor Records can be safely and satisfactorily played only with *Victor Needles or Tungs-tone Stylus* on Victors or Victrolas. Victor Records cannot be safely played on machines with jeweled or other reproducing points.

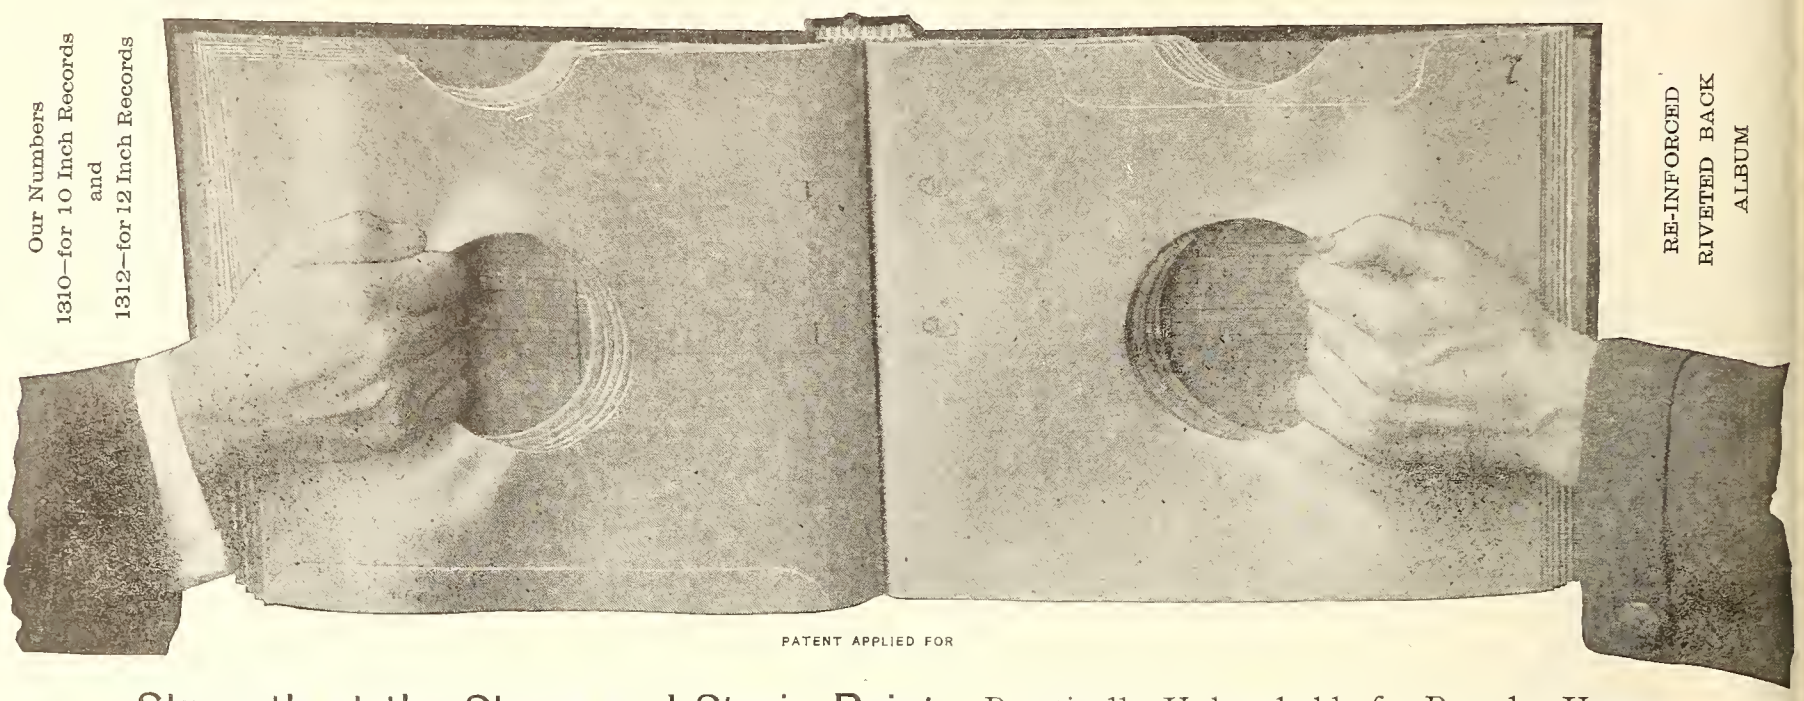
THE PULLING TEST—THE STRENGTH IS THERE

THE STRONGEST ALBUM MADE *AT ANYWHERE NEAR ITS LOW PRICE*



Strength at the Stress and Strain Point. Practically Unbreakable for Regular Usage.

THE WELL-KNOWN "NATIONAL" RECORD ALBUMS ARE ALWAYS THE LEADERS

THE ONLY CONVENIENT AND SAFE WAY TO PROTECT DISC RECORDS

These Albums will pay for themselves in a short time by preserving Records. When full the Albums are flat and even like books. They will fit in a library cabinet or book case, or they will lie flat on one another.

We manufacture disc Record Albums containing 12 pockets to fit the Victrola cabinets Nos. X and XI. We also make Albums containing 17 pockets. With the indexes they are a complete system for filing all disc Records.

For durability, finish and artistic design, our Albums have no equal. They are made in the most substantial manner by skilled workmen. We sell our superb Albums at big discounts to meet competition. Shall we quote prices?

THESE ALBUMS ARE THE BEST FOR VICTOR, COLUMBIA AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO., 239 S. AMERICAN ST., PHILADELPHIA, PA.

SHARTLE NEW VICTOR CREDIT MAN

Promoted to New and Important Post Upon Retirement of F. K. Dolbeer to Enter New Field—The Official Announcement

The members of the talking machine trade will learn with surprise, mingled with regret, of the retirement of Frank K. Dolbeer, as credit manager for the Victor Talking Machine Co., which post he has held for several years, and before which he was for many years sales manager for the phonograph division of Thomas A. Edison, Inc.

Mr. Dolbeer, who will become connected with a Western concern not identified with the talking machine business, will be succeeded as credit manager of the Victor Co., by Howard J. Shartle, of the record department, who needs no introduction to Victor distributors.

The formal announcement of Mr. Dolbeer's retirement was sent out last week by the Victor Talking Machine Co. to its distributors in a letter bearing the signature of Louis F. Geissler, general manager of the company, and in which he said:

"We announce with regret the retirement on the first proximo of F. K. Dolbeer, from the position of credit manager of this company for the purpose of assuming a responsible position with another manufacturing concern located in the West, but which is not identified with the talking machine industry, and, in this connection, we know that our distributors will feel pleased that the opportunity for advancement is given to an old employe, although a young man, Howard J. Shartle, whom you have all met in connection with his duties in the record department.

"Mr. Shartle will not relinquish entirely his interest in your record department, and, in his dual capacity, we are sure that he will continue to do his utmost to serve your best interests."

TO HANDLE STARR PHONOGRAPHS

The Starr Phonograph Sales Co., 62 West Forty-fifth street, New York, the local wholesale representatives of the Starr phonograph, made a number of satisfying connections recently, and the agency for the Starr phonograph has been placed with the following concerns, among others: H. Bersin, 21 Second avenue, New York; Sturz Bros., 142 Lincoln avenue, New York; Morris Sandler, 1805 Pitkin avenue, Brooklyn, N. Y.; F. L. Matthews, 446 Nostrand avenue, Brooklyn, and the Albert Music Co., White Plains, N. Y., all of them piano houses.

Kirk, Geary & Co., wholesale druggists, of Sacramento, Cal., announce that they have discontinued the sale of talking machines.

ATTRACTIVE JAMAICA STORE

Is That Conducted by Mrs. M. B. Kaplan, in the Progressive Long Island Town

One of the many successful Victor establishments in the metropolitan district is the Victor store conducted by Mrs. M. B. Kaplan, at 310

The Wareroom of M. B. Kaplan

Fulton street, Jamaica, L. I. Through her efforts, Mrs. Kaplan has been successful in building up a large Victor trade all over Long Island. She has made it a point to carry a complete stock of Victor records, and caters to the many automobilists who pass through Long Island and stop at this store to buy records. Mrs. Kaplan's warerooms are attractively arranged and furnished and every convenience is offered to patrons to assist them in purchasing records or selecting machines.

THE VOCALION IN RACINE, WIS.

RACINE, WIS., September 23.—The Aeolian-Vocalion has made its formal bow to the Racine public with the opening of the new music store of Edward Matausek at 610-612 South Main street, in the Badger Building. Mr. Matausek represents all of the pianos and other instruments represented by the Edmund Gram Piano House, Milwaukee, distributor for the greater part of Wisconsin for the Steinway, Steck, Weber, Everett and Aeolian Pianola.

NEW YORK, OCTOBER 15, 1916

THE shortage of machines and records in the talking machine trade has become an old story, and it is expected every year just as regularly as the holiday season. Now, however, there comes the cry of a shortage in salesmen, experienced purveyors of talking machines and records who actually sell goods instead of simply filling orders. As one Western manager puts it: "We can get plenty of men for that matter, who can sell enough $15 and $25 machines and 75-cent records to pay their expenses, but we do not consider that they are making good. What we are looking for are the men who can sell machines priced at $100 up and the records by noted artists. That's what we call salesmanship."

The theory of the managers is that the general public does not hesitate about paying several hundred dollars for a piano or player-piano, and, therefore, should not be encouraged to select only the cheapest in talking machines. Those who see the advertisements of the leading talking machine companies learn to look for accurate reproduction, tone values, and in fact the very best of music from the talking machine. It stands to reason that the better the machine, the more value has been put into its construction, and the more likely it is that the reproduction will measure up to expectations.

The talking machine trade has grown by leaps and bounds. It has spread out so fast that there has been no time to develop a surplus of trained men or even a sufficient supply to meet normal requirements, and it has been, therefore, necessary to pad out sales staffs with young men or girls whose chief qualifications are their ability to remember record numbers and titles, so that they could supply them without delay. What is wanted now are men who can convince the prospective purchaser that there is such a thing as variation in talking machine quality, and that there are legitimate reasons for buying $100, $150 or $200 instruments rather than the $15 or $25 machines of the same make first contemplated.

The talking machine salesman to-day cannot assume the take-it-or-leave-it attitude. He has to understand the features of the different makes and be able to offer logical arguments why his particular machine is well worth the money asked for. In other words, he must have the ability to back up and profit by the millions of dollars worth of advertising that has been instrumental in bringing the business within his grasp. Giving the customer what he asks for isn't salesmanship, but selling him something better than he first intended to buy does mark the salesman.

WITH the possible exception of the automobile trade, there is no line of business in the country wherein dealers have the advantage of such a vast amount of advertising as is the case in the talking machine trade.

In 1916 alone the advertising appropriations of three of the big companies were in excess of $4,000,000, and one concern displayed its unbounded faith in the value of enormous advertising expenditures by adding a mere matter of $650,000 to the appropriation of 1915 to keep things moving smoothly.

Four million dollars may not be much when you say it quickly, but it is that $4,000,000 and the millions that have gone before it which have in a score of years brought the talking machine from obscurity to the point where it is one of the best known products in the world to-day.

Millions of dollars have not alone served to introduce the talking machine, but have enabled it, under intelligent direction, to overcome antagonism of the strongest sort.

Advertising has placed the talking machine in the homes of the most discerning—has made it almost a necessity for even the most noted artists and educators. All this has been done by advertising. But this would amount to nothing if the product had not been improved. New ways have been devised for using the talking machine and accompanying records, but it was advertising which told those who should be most interested of its wonderful development.

It interested them to a point where they were not only willing to see and be convinced, but remained to buy and endorse. All this has been done by the men who have produced and developed the talking machine and records, and for the most part it has been done for the benefit of those who have chosen to sell them.

In the final analysis it seems beyond belief that the talking machine dealer should be so indifferent to what the manufacturers have done for the trade and the public, that he fails to profit by that advertising to the utmost.

Undoubtedly a great majority of the dealers believe in advertising and its local application, but there are some who believe that the manufacturers should do all the work, and that all the retailer need do is to hand out the goods. That sort of dealer is a hindrance rather than a help to the trade at large.

What are you doing, Mr. Dealer, to hook up your store with the advertising of the product you handle? Are you making use of every bit of advertising literature that reaches you? Are you hanging up the signs and the placards? Are you arranging the window displays as suggested?

Are you forcing the public to realize that the machines and records they see advertised in every magazine of prominence are to be found in your store?

If you are not doing this, you are simply acting the clerk, not the dealer.

There are so many ways of advertising talking machines that it seems almost a waste of space to reiterate. There are recitals; there is the following up of prospects personally and with literature, and there is also that much neglected avenue of publicity, the local newspaper. Its efficacy may be illustrated in this wise: the merchant or manufacturer with little freight to handle, takes care of that freight through the regular railroad shed, but when the volume of freight increases he finds it pays to run a sidetrack to his establishment. The local advertising of the dealer is that side track. Naturally advertising carries the demand to every city, town and hamlet in the country, and its effect remains in the main depot, the magazine, or daily newspaper, unless the dealer takes some steps to transfer that effect to his own benefit. His own advertising hooked up with that of the manufacturer accomplishes this end. It is the side track that brings the demand from the main line right into his store.

Instead of the manufacturer using little quarter column cards and requiring the dealer to use half or full pages to market the product successfully, the position is exactly reversed, the manufacturer uses the half pages and the little card of the dealer puts on the finishing touch.

Think this over for the holidays. Don't let the local prospects wonder where they can buy talking machines and records, but have your store so impressed upon their minds that the advertisement of the particular line you handle, in the maga-

zine, or even mention of the name, brings a picture of your store to the mind's eye of the prospect.

ONE of the many interesting features in The Talking Machine World last month was the article by Eldridge R. Johnson, president of the Victor Talking Machine Co., on the standardization of fair prices, which we trust received the most careful reading and consideration by every man in the trade who has any interest in those things which are a constructive force in business to-day.

The standardization of prices and the maintenance of those prices, once standardized, have been discussed frequently and at length in these columns, yet the subject is by no means exhausted.

This is an age of standardization. The great automobile industry could not have reached the high state of expansion which it enjoys were it not for the fact that every automobile which is being made in this country to-day, no matter what the type or the price, is built along certain fundamental, standardized lines. Each car differs from every other in minor details, yet the engine, the magneto, the gears, the transmission, the real essentials of the car, are all constructed on the same general principle—all based on certain standard and standardized models which have been proven the best, and which, once proven, have been maintained. In the leading industries of the country at the present day, the campaign for standardization is under way. Business men realize its importance and value.

Now, if standardization is a good thing, as it would seem reasonably certain from the experience of men in leading industries, why should the same principle not be applied to prices? Why should the manufacturer making a brand of goods of uniform quality, backed with advertising, national or otherwise, which has created a constantly growing demand for the same, not be allowed to set a fair retail value on those goods and insist that they be purveyed to the public at that price—no more, no less?

It can be stated, without successful contradiction, that sentiment in this country is overwhelmingly in favor of price standardization and maintenance, yet it has required a tremendous effort on the part of those public-spirited men who are fostering the cause of price maintenance to bring it to the point where it has been crystalized in the form of the Stephens bill, which will come up again before Congress at its next session. This effort has been necessary because of the lack of interest shown by the average business man in those things which are removed ever so little out of his immediate ken.

It is because of this laxity of interest shown by the average man in the vitally important economic questions of the day that the efforts of men like Eldridge R. Johnson become all the more conspicuous. Long before the Stephens bill was introduced into Congress, Mr. Johnson was doing his utmost to create an active interest in the theory now represented by this bill. And his efforts were not actuated by a motive of selfishness. The Victor Co. has standardized its prices, and has maintained those prices successfully ever since the inception of its business. Its thorough organization, and efficient methods, will enable it to continue such standardization and maintenance. The Stephens bill will not enable the Victor Co. to do anything it is not doing to-day, nor will the concern gain a single new customer, or dispose of one additional record, merely because the Stephens bill is enacted into law.

Why, then, should men like those at the head of the Victor organization interest themselves in something which will bring them no direct benefit?

Simply because they are sufficiently far-sighted, sufficiently broad-minded, to realize that the principle of price standardization, if once generally applied, will make for greater efficiency in business, better methods of production, distribution, and retailing, with a consequent benefit to producer and consumer alike. They have sufficient interest in the nation at large, and in those who, like themselves, compose that nation, to do whatever lies within their power to make economic conditions better, more stable, more genuinely and lastingly prosperous. Therefore, men of the type of Eldridge R. Johnson are interesting themselves in the bigger questions which are entering into our present-day commercial life, and are seeking through their efforts to solve the problems and overcome the difficulties which stand between us and the ultimate goal of prosperity.

Every business man has not the power which comes to one at the head of a world-wide organization, yet every man, no matter how humble his station in life, or how small the scale on which his business may be conducted, has a certain power which he can use towards helping solve the economic problems confronting us to-day. And if each business man worthy of the name will but follow the splendid example set by those men who are taking the lead in attempting to solve these problems, there will speedily come into being an era of business life and conditions which will result in greater prosperity and larger achievements than this day and generation has ever known.

WE are in receipt of many commendatory letters from talking machine dealers and salesmen throughout the country regarding the various articles which have appeared in The World recently bearing upon the constructive features of talking machines, as evidenced in the department devoted to repairs and the articles elucidating certain problems, which while simple and readily solved by the man who has been in the trade for some time, cause some trouble to the newcomer. The aim, of course, is to enable the salesman and the dealer to possess a broader understanding of the business, to the end that they may have more than a cursory knowledge of the various types of machines and records on the market.

RECORDS!

¶ Is your record stock complete?

¶ Victor dealers have an opportunity to "clean up" on their record business this fall, provided their stocks are in good shape.

Pearsall Record Service

Will enable you to show substantial gains in your record sales. Our record stock is complete in every department; we are shipping orders the same day they are received, and, in short, we can help you boom record sales.

SILAS E. PEARSALL CO., VICTOR DISTRIBUTORS, **18 W. 46th St., NEW YORK**

NOTICE

¶ Commencing with January, 1917, the retail price of **"B. & H."** fibre needles will be $4.00 per thousand, or 40 cents per package of 100.

¶ Commencing on the 20th of this month (October), we will allow, on above price, usual discounts on all orders received from jobbers and, through them, to dealers.

¶ In justice to all concerned, we deem it only fair to postpone, for three months, a reduction in the present retail price of 50 cents per 100.

¶ **The B. & H. Fibre Company** have manufactured fibre needles since 1907. During the past six years the **Victor Talking Machine Company** have been sole distributors of our needles, which are known as "VICTOR" fibre needles.

¶ "COLUMBIA" fibre needles are also protected by our patents.

¶ Improved machinery and better facilities for manufacturing the fibre needle enables us to reduce the cost and at the same time turn out a better article than was ever offered in this line before.

WINDOW DISPLAYS IN AUSTRALIA

Allen & Co. Prove That Talking Machine Dealers in That Country Are Not Far Behind Their Yankee Contemporaries

That talking machine dealers in Australia are not in any way behind the times in the matter of window displays of their products is indicated by the accompanying picture, which

Allen & Co's Attractive Window

shows the special display of "His Master's Voice" records, made by Allen & Co., Proprietary Ltd., Melbourne, Australia.

Allen & Co. handle "His Master's Voice," Columbia and other makes of records with considerable success, devoting an entire section of their store to that line of the business. The company were pioneers in the talking machine business in Australia, being among the first to order the original small Columbia graphophone, which they sold in large quantities.

PLANNING AGGRESSIVE CAMPAIGNS

Shelton Electric Co. Planning to Feature Shelton Motor Very Energetically

With the advent of the fall season, the Shelton Electric Co., New York, manufacturer of the Shelton electric motor, is planning an aggressive campaign on behalf of its motor. Since the first of the year this motor has been placed in the hands of dealers in practically every city of any importance, and thousands of talking-machine owners have expressed their satisfaction with its many merits. The Shelton electric motor operates on either D. C. or A. C. current, and interferes in no way whatever with the spring motor mechanism of the talking-machine, as either mode of operation may be used as desired.

FAKE VICTROLAS IN NEW SWINDLE

Victim of Itinerant Dealer Discovers Fraud and District Attorney Takes Action—Seller Now Held Under Bail for Trial

Some weeks ago Frank R. Stone, a United States immigration inspector, decided to buy a talking machine. At that time Charles E. Ackron, of 254 Stuyvesant street, Brooklyn, was advertising in The Brooklyn Chat and The New York Telegram his willingness to "sacrifice" a $200 Victrola for $60, states the New York Tribune. Stone saw the advertisement and communicated with Ackron.

"It's a shame," said the latter, "but I've got to let the machine go. It belongs to my daughter. She bought it a couple of months ago, and it's as good as new. Now she's come to live with me, and there's a talking machine in the house already. So what can I do?"

Stone bought the machine. This week he had Ackron in the magistrates' court in Brooklyn before Judge McGuire. He had found long since that the machine was not a Victrola, and in conjunction with the Kings County District Attorney's office was prepared to prosecute Ackron under Section 423 of the Penal Code. This section prescribes a punishment for false and misleading advertising.

It is alleged by Stone that the instrument is the product of a New York concern, and, it is asserted, does not appear to be made for a legitimate market, for Ackron is a dealer, and the daughter with the extra phonograph a myth. Many other persons, Tribune investigators have learned, are selling the same machine by similar methods.

There were several persons in court who, like Stone, had paid $60 to Ackron for his "daughter's Victrola." One of them, John Magnus, joined in the prosecution. The others held themselves in readiness to testify against Ackron, from whom they had vainly sought a refund when his deceptions were discovered. Among the prospective witnesses were Mrs. A. J. Booth, of 723 McDonald street, Brooklyn, who said the $60 she gave Ackron represented the entire savings of her daughter, a stenographer, and W. A. Black, a claim agent for the B. R. T.

Judge McGuire continued the case for a week, holding Ackron in $3,500 bail. He was unable to get a bondsman, and was therefore kept in custody.

TO MAKE AND MARKET THE VICSONIA

The Vicsonia Manufacturing Co., Inc., 313 East 134th street, has filed articles of incorporation with the Secretary of State of New York, the capital stock of the new concern being $5,000 and the directors Thomas P. Carolan, William J. Sess, Walter M. Seymour and Harriet G. Carolan. The new corporation will take over the manufacture and sale of the Vicsonia reproducer and really represents the reorganization of the Vicsonia Manufacturing Co. Officers of the new corporation will be elected shortly.

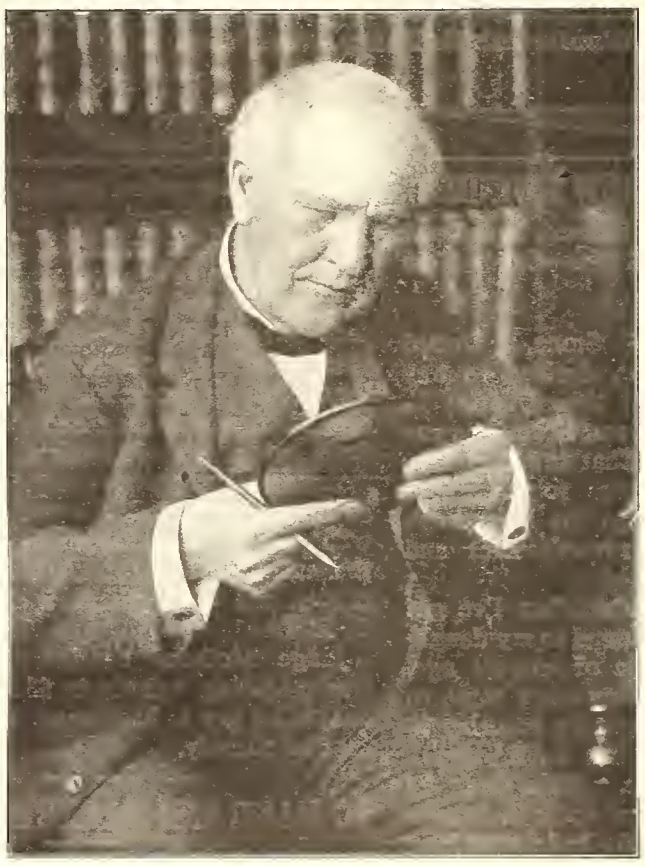
EDISON WEEK



Mr. Edison Examining an Edison Re-Creation

October 16th to 21st

was set apart for special observance by Edison dealers as an acknowledgment of one of Thomas A. Edison's greatest contributions toward human progress, his favorite invention,

The NEW EDISON

The musical perfection of the New Edison is conceded. The Edison merchandising policy, from the standpoint of manufacture, jobber and dealer is as near perfection as we know how to make it.

EDISON DEALER POLICY

THE Edison Probationary Zone Policy is a healthy stimulant—a constant encouragement to the Edison dealer. The conditions of this policy are broad—profits are ample.

Prestige-building and sales-promoting co-operation among dealer, jobber and manufacturer is the basis of the Edison Probationary Zone Policy. Under this policy the dealer is made responsible for a given zone of operations, the extent of this zone depending on the number of prospects the dealer can give a sufficient amount of individual attention.

Considered from every standpoint, an Edison dealership carries a most desirable franchise.

THOMAS A. EDISON, Inc.

ANNA CASE
of the Metropolitan Opera, proving that Edison has perfectly re-created her glorious voice

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., October 5.—The fall business in all the talking machine establishments here has made a great start, and it is universally conceded that the conditions from now up to the holidays will exceed anything by far that the trade ever has known. Fortunate indeed is the dealer who was wise enough to place his order early, for the time is not far distant when no machines can be had. There appears to be a tendency toward higher-priced machines, which shows a more careful discrimination on the part of buyers.

Death of Wm. H. Beck Regretted

There was general regret in the local trade over the death of William H. Beck, the president of the Eastern Talking Machine Co., for not a few in the Boston trade had meet him at some time or other and found him a man of ability and courtesy. Elton F. Taft, the Boston manager of the company, was one of those who went to Lewisburg, Pa., for the funeral.

A. M. Hume Co. to Handle Victor Line

Considerable local interest centers in the announcement that a new concern, to be known as the A. M. Hume Music Co., is about to begin business here, and will carry a line of Victor goods. The incorporators are A. M. Hume, formerly with M. Steinert & Sons Co.; Herman N. Baker, who was in charge of the Steinert advertising up to a few months ago, and Richard B. Coolidge, a Boston lawyer. The capital of the new company is $200,000. It is understood that a location has been selected in Boylston street not far from Park square, and that a man well known in Victor local circles has been secured to take care of the talking machine department. It has been stated that the new warerooms will be opened about the first of November.

F. H. Silliman Enjoyed Automobile Ride

Vice-President and Manager Frederick H. Silliman, of the Boston offices of the Pardee, Ellenberger Co., Inc., is back at his desk after a delightful automobile trip taken with his family. Mr. Silliman went first to Albany, N. Y., then took in Saratoga, Lake George and St. Lawrence River, and the Thousand Islands, winding up in Montreal, where the party stopped for several days. Mr. Silliman's Mitchell car made a good showing everywhere, and no accident whatever happened en route. Mr. Silliman is keen for the new business, which the company is coralling in fine shape.

Wallace L. Currier Married

Wallace LeCount Currier, son of Mason P. Currier, manager of the retail warerooms of Chickering & Sons, was married on the evening of September 12 to Miss Leila Verity Smith, daughter of Mr. and Mrs. John W. Smith, of West Roxbury. The ceremony took place in the Church of Our Saviour, Roslindale, and Mr. Currier had for his best man, his brother, Mason P. Currier, Jr., who is connected with the Chickering warerooms. Mr. Currier, the bridegroom, is widely known in talking machine circles, and for some time was manager of the Victor and Edison departments in the Chickering warerooms. A few months ago he went to Portland and opened warerooms for the exclusive handling of the Edison line. Mr. and Mrs. Currier will accordingly make their home in that Maine city.

Edison Tone Test at Thomas Co. Store

The Edison department of the F. H. Thomas Co.'s establishment, at 691 Boylston street, held a large company of invited guests this afternoon, when Miss Helen Clark, the eminent contralto, gave one of her interesting and entertaining tone tests. Miss Clark gave a program that varied only slightly from those which she has been giving in other places lately, namely, at New Bedford, October 2; Fall River, October 3, and Taunton, October 4. Manager W. E. Birdsall, who made unusual preparations for this test, was heartily congratulated at the close on the admirable manner in which all the details were carried out. Harland R. Skelton, of Thomas A. Edison, Inc., who keeps close oversight of these tone tests at the various places, was present to assist Manager Birdsall.

Eastern Co.'s Staff Enjoys Visit to Gloucester

The staff of the Eastern Talking Machine Co. were the guests one Sunday lately of Nate Peabody, the enterprising talking machine dealer of Gloucester at his home in that city. The staff went down early in the day, and considerable time was spent on an enjoyable fishing trip, during which the boys got a barrel of the finny tribe. A fish dinner was served at the Peabody home, and when the boys came back to Boston they voted the day one long to be remembered, as Host Peabody was untiring in all his hospitality.

To Exhibit at the Food Fair

George Lincoln Parker is planning for a big display of Victor and Edison machines at the Food Fair, which opens next week in Mechanics Building. Mr. Parker was an exhibitor two years ago, but at that time he only had Victor outfits together with his play of pianos, but this year with the Edison added his display promises to be a large one. He is having a special cottage built so that the goods will be shown under the pleasantest and most artistic conditions possible.

Columbia Force Dines

All the boys of the Boston store of the Columbia Graphophone Co. dined at the Quincy House on the evening of October 2, and a royal evening it was, too. There were more than thirty present, and Jack Shaughnessy, head of the bookkeeping department of the company, presided with dignity and good humor. Jack made an after-dinner speech, but for some reason or other failed to make any mention of the war. The talks of several of the boys pertained to business matters. It is planned to have a series of dinners throughout the winter as one means of keeping up the fine family spirit that prevails among Manager Arthur Erisman's Columbia staff.

A Visitor from New York

John Cromwell, the general manager of the Columbia Graphophone Co., was over here from New York a few days ago, and was entertained by Manager Arthur Erisman. Another Columbia visitor here from New York was Frederick Goodwin, the company's educational department manager.

"Talker" Department Gets the Silver Cup

At the large department store of W. & A. Bacon Co. a silver cup has been offered for the past year to the department showing the largest amount of sales month by month. It is of special interest, that for two months out of three the talking machine department, which is so ably conducted by George Krumschid, has carried off the coveted prize, which, in addition, means a bonus to those of the department holding the cup for the longest number of months successfully. This indicates that Manager Krumschid and his staff were able to dispose of a large number of Victor and Columbia outfits, while the prospects for the remaining three months of the year are most encouraging.

Victrola for Boston City Club

Alexander Steinert, head of the M. Steinert

BOSTON "Exclusively" EDISON NEW HAVEN

PARDEE-ELLENBERGER

MORE than ever does the dealer realize that an "exclusive" representation works to his advantage. The Edison Diamond Disc Phonograph is the ideal of the progressive dealer.

THE TRADE IN BOSTON AND NEW ENGLAND—(Continued from page 14)

& Sons Co., has presented the Boston City Club with a handsome Victrola, which occupies a conspicuous place in the archway leading from the second floor corridor into the lounge. The machine is a very popular diversion for the members.

Additions to Columbia Co. Staff

The local staff of the Columbia Graphophone Co. has had several additions lately. William Parks, formerly of the Birmingham, Ala., store of the company, is here as an outside wholesale salesman. M. Madison, who formerly traveled for Thomas A. Edison, Inc., also is a Columbia outside man. Miss Marion Cahill, who has been away all summer, is back on the floor as a saleswoman.

Victor Dealers in Steinert Territory

In The World last month there was reported the successful convention at the wareroom of the M. Steinert & Sons Co., Boston, of about thirty Victor dealers in that company's territory. The effects of the conference, at which General Manager Herbert L. Royer, of the Steinert Victor department, presided, has since been strikingly apparent, and should have a marked influence on business during the coming months.

Victor Dealers Who Attended the Convention at the Steinert Warerooms Last Month

Before leaving for their homes after the business meetings and an elaborate entertainment, the visiting dealers were photographed, and the picture is presented herewith, with the Victor dog prominently in the foreground. Manager Royer is seen in the "first line" of the fence, with his right hand in his coat pocket ready to pull out an order book. He is the third gentleman to the left of the dog. Those who attended the conference included Herbert L. Royer, general manager, and the following from Boston: G. L. Foote, F. M. Cunningham, K. E. Reed, C. W. Royer, F. H. Robie, P. B. White, H. Fleischman, J. Wills and Miss Charlotte Brown; also G. M. Stuart, of Bangor; L. Roake, of Bridgeport; R. Welch, of Brockton; A. S. Burns and W. Bailey, of Fall River; L. M. French, of Fitchburg; J. Buzzell and M. Brennan, of Lowell; H. Nute, of Manchester; L. M. Austin, of New Bedford; M. E. O'Connell, of New Haven; M. L. Patrick, of Portland; A. T. Waite, of Providence; C. A. Hutchins, of Springfield; J. V. Riley, of Waterbury; C. A. Whitcomb, of Worcester; Miss Arline Brown, of Manchester; Miss Alice Healy, of New Bedford, and Miss L. M. Smith, of Worcester.

Visited the Trade in Portland

Manager Arthur Erisman spent yesterday in Portland, Me., where he went to look over the Columbia business in that city. In a few days he is going over to New York on one of his periodic business trips.

Enjoyed Vacation Spent in Auto

Chester J. Sylvester, manager of the Columbia and Edison departments of the C. E. Osgood Co.'s furniture store, is back from his vacation, which was taken in his trim little roadster. He had as his companion, his brother, Roy Sylvester, one of the hustling local salesmen of the Columbia Co. Their trip was through Massachusetts over into New York State and as far as Buffalo, and it was one of constant delight.

Business Has Been Liquidated

Owing to the long-continued illness of Nelson Furbush, of the Furbush-Davis Co., the firm has closed out its business, which means that the Edison department at his house no longer exists. The Furbush-Davis Co. had fine quarters in Boylston street, up one flight, and Mr. Furbush had built up quite a good business, especially in Edison machines.

Start Work on Edison Building

The ground has been entirely cleared on the site of the new structure for the Oliver Ditson Co., and a large placard informs passersby that building operations will begin right away. As already stated, Manager Henry A. Winkleman will have unusually fine quarters for his Victor department. The company expects to get into the new building early next summer.

Vocalion Co. Changes and Improvements

The changes and improvements are about completed at the Boylston street quarters of the Vocalion Co., of which R. S. Hibshman is manager. The new elevator, which has been installed near the front of the building, promises to be a marvel of elegance. The main entrance has been moved from the center to one side, thereby providing one large show window instead of two smaller ones. This will afford opportunity for more attractive displays than had been possible hitherto.

Busy Times at Chickerings

Business at the Edison and Victor departments of the Chickering & Sons is showing up well these days, and Manager Longfellow's staff is busy early and late demonstrating and selling goods. The baseball season for the Chickering nine is over, and some good victories stand to the credit of the players, the team having won ten games and lost three. Andrew F. Lyons, the manager, is to be congratulated on the showing of the boys.

A sale of a Victor outfit lately made by the Chickering warerooms was to some of the staff at the Danvers Insane Hospital, who made a presentation of it to the superintendent of the hospital who was about retiring.

Calling on the New England Trade

A. P. Petit, one of the old-timers in the talking machine business,—although a live young man at that—is presenting the merits of the Emerson records to the New England trade from the office of the Emerson Phonograph Co., Inc., 453 Washington street.

MAKING GREAT BUSINESS RECORD

SPRINGFIELD, MASS., October 5.—The diamond Edison Disc Shop, of B. L. Conchar, at 204 Worthington street, this city, is making a great record for business, and it is pushing out in a way that is highly commendable. The shop is constantly filled with people anxious to hear the Edison re-creations, as they are called, and the fact that the house has lately placed an order for $15,000 worth of machines, gives some indication of the growth of this business. Mr Conchar has four men on the outside who are constantly hustling for business.

Bankruptcy referee Porter declared a first dividend last week of 7 per cent. to the creditors of Charles A. Laureigh, a talking machine dealer, of 227 Main street, Orange, N. J.

A supreme voice in a supreme aria—Lazaro singing "O Paradiso" on Columbia Record 48747.

You have never realized the wonders of the aria "Celeste Aida" until you have heard it sung by Lazaro (Columbia Record 48762).

"The greatest tenor since Rubini, a greater than Gayarre!"

Here, indeed is the biggest news of the year. Biggest to dealers. Biggest to every lover of music.

Already whole countries have been thrilled with the marvel-voice of Lazaro. Already the sales of Lazaro's Columbia Records in the United States have more than justified our enthusiasm in this remarkable tenor voice.

LAZ

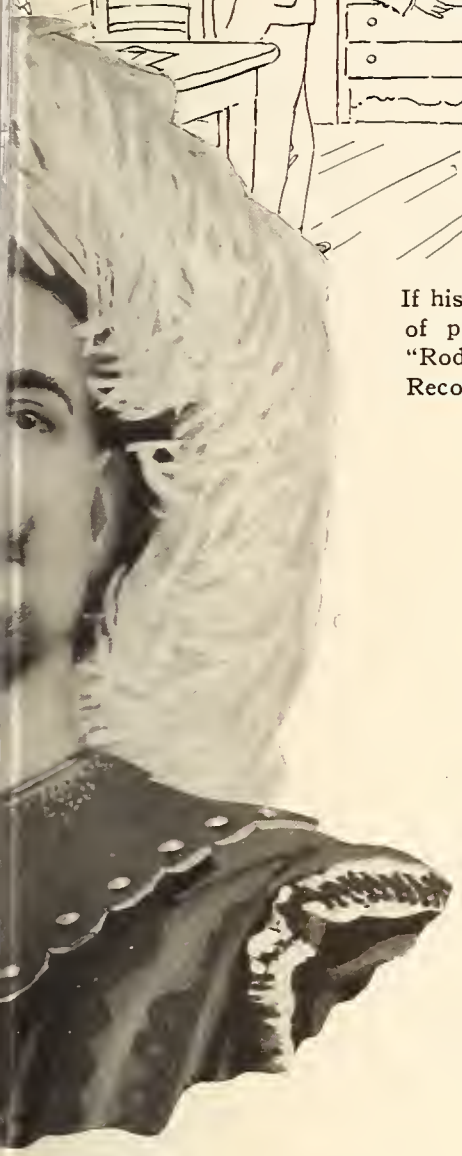
Columbia Records TRADE MARK Note the Notes

Columbia Grap

Woolworth

If his "Celeste Aida" is a marvel of power, Lazaro's singing of "Rodolfo's Narrative" (Columbia Record 48741) is just as great a triumph of art.

"A te o Cara" from I Puritani (Columbia Record 48783) is a triumphant test of Lazaro's greatness.



First recordings now on sale on Columbia Records!

ARO

The power, the beauty, the very genius of this tenor are embodied in his Columbia Records —records so wonderful that we cannot undertake to describe them in type. The only adequate description is to hear them.

These magic tenor records are among the biggest selling opportunities today in the entire industry. Any record by Lazaro will *sell* as soon as heard.

PERSONALITY IN SALESMANSHIP AND WHAT IT MEANS

Personality Is Not Confined to the Ability to Make a Pleasant Approach—Means the Cultivation of Distinctiveness, of Qualities That Impress Customers

Personality in salesmanship is not confined to the ability to make a pleasant and successful approach and to carry on an interesting conversation. It means, rather, the ability so to impress the customer that he will remember the salesman for an indefinite time to come. It means in the salesman the faculty for making himself appear out of the ordinary and distinctive, so that he will be more easily remembered.

It means a great deal to a salesman if the customers, after several years, can come into a talking machine store and ask particularly for that one man and, moreover, describe him accurately if the name has been forgotten. Such an incident proves that the salesman has developed something about him that has marked him from his fellows. It is an asset that means money.

There are too many salesmen who build for the present and not the future, who are satisfied to make a sale to-day, forget the customer and let the customer forget them. They sell goods and make a fair living, but exist simply as parts of an institution. In other words none of them is the salesman that one can remember readily; they are just salesman collectively.

Perhaps the best real definition of personality versus the lack of it appeared recently as the introduction to a slangy story in one of the big magazines, the writer summing it up as follows:

"I'd rather be champion egg beater of the world than one of these average guys—good job, good pay, good citizens—and that lets 'em out! What? That's enough? Sure! For them kind of birds that's not only enough, that's all there is! That's all they want, that's as far up as they look—get me? They ain't got no more of this here personality thing than a tooth-pick or a lead pencil—they're just one of a million! They come and go—and nobody even looks up from the newspaper as they pass, because they'll be lots more of 'em along in a minute, the world's full of 'em—no, cluttered up with 'em!

"Average guys, y'know. Ever see one of them books that some simp cheated his parents and disappointed his wife by wastin' the time to get together? They're full of stuff like this: 'The average man drinks eight thousand five hundred and sixty-four and three-quarters quarts of water a year and there are forty and one-quarter pounds of salt in the average man's body' or 'The average man walks twice around the world and three times past the church durin' a lifetime.'

"There's about four hundred pages of that spicy readin', showin' what the average guy does. His act is so full of old stuff that they got a book showin' every move he makes from the nursery to the undertaker. You can always tell what he eats, smokes, drinks and owes. He's like the ball bearin's on a sewin' machine—you don't see him or hear him and you never know he was there if he didn't bust now and then.

"I been in one of these small burgs, and a guy would roll by in an auto who looked like Rockefeller's landlord, to the naked eye. 'Who's that bird?' I'd ask an onlooker.

"'Heh?' he'd answer, takin' a flash. 'Search me! One of them rich guys from uptown, I guess—town's full of 'em!'

"Then another fellow would breeze by—on foot. Might have on an old shiny suit, a wrong hat and little or no shoes—and I'd see everybody wavin' their hands and greetin' him like he was a prosperous season.

"'Who have we here?' I'd say to the native.

"'Him,' he'd shoot back. 'Him? I guess you don't belong round here, stranger; that's Joe Hawkins, champion quoit pitcher of this here county!'

"And you'd think he was introducin' the President of the United States."

Personality lies in method of conversation, habits and clothes. We are acquainted with a young man who sells advertising. It is his business to persuade manufacturers that the proper kind of advertising will make their products stick out from the rest and will give them individuality. This young man backs up his statements with his own personality. He wears clothes that fairly scream, silk shirts with thirty-seven distinct colors in them, orange cravats that shame the sun for brightness, trick hats that are in a class by themselves. His line of conversation is as original as his clothes, and his entire bearing is unusual and most distinct.

He does it all to attract attention and the logic of his course is set forth in his own words: "I spend my time persuading other men to advertise. Why not take a little of my own medicine and advertise myself?" This incident is extreme, we will admit, but everybody in the trade knows him and likes him. He has developed personality both in conversation and raiment and the system pays.

In studying all that goes to make up the ideal salesman don't forget personality. Do something or be something that sticks out from the rest. One doesn't have to be a comedian, but originality is an essential.

A. H. Eaton, who conducts an optical and Victrola business in Collinsville, Conn., has opened a branch store in Unionvilletown.

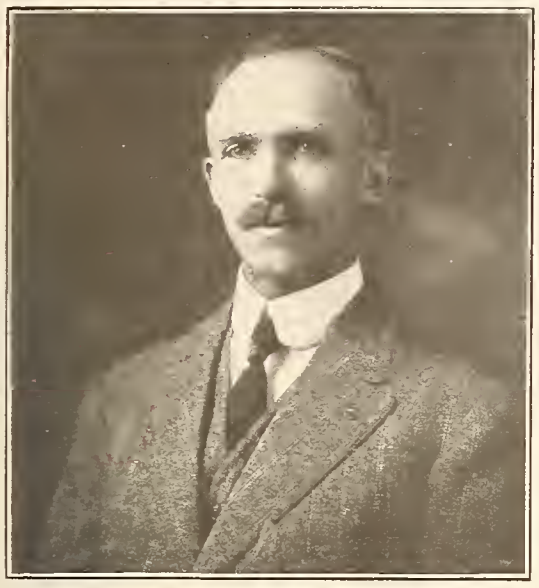
IMPORTANT CHANGE IN WASHINGTON

Harry C. Grove Corporation Takes Over Retail Interests of Columbia Graphophone Co. in That City—H. C. Grove Tendered Dinner

WASHINGTON, D. C., October 7.—H. C. Grove, head of the newly formed Harry C. Grove Corporation, which recently purchased the retail interests of the Columbia Graphophone Co.



H. C. Grove

in this city was the guest of honor last week at a dinner tendered him by his associates. W. L. Eckhardt, district manager of the Columbia Graphophone Co.; A. J. Heath, manager of the Baltimore headquarters, and several invited guests made a number of impromptu addresses, which greatly pleased the diners.

Mr. Grove has a number of extensive plans under way whereby his patrons will receive service representative of the most advanced thoughts in the retail talking-machine field. "Just a little bit better" will be the maxim of the new corporation, a motto which cannot fail to produce success.

Mr. Grove is ideally equipped to direct the destinies of the retail talking-machine institution, as he has been associated with the industry for twenty years, all of which has been spent in the promotion of Columbia products.

During his two decades of Columbia activities Mr. Grove has held only three positions, traveling salesman, assistant manager of the Columbia Co.'s Buffalo store and manager of the Washington store. The latter post he held seventeen years, resigning to form the new corporation, which purchased the Columbia Co.'s retail interests.

Mr. Grove is popular throughout Washington, belonging to several Masonic orders, a member of the Washington Board of Trade, and taking a personal interest in all civic affairs.

MORE ROOM FOR S. B. DAVEGA CO.

Negotiating for Occupancy of Entire Building at 831 Broadway

The S. B. Davega Co., Victor distributors, 831 Broadway, New York City, are negotiating for the entire building at their present address, which will enlarge their wholesale department 500 per cent., making it one of the largest distributing houses in New York City. The basement, second, third and fourth floors will be devoted to wholesale jobbing.

GREATEST YEAR IN TRADE HISTORY

Present Demand Surpasses All Previous Records, Declares A. A. Trostler, of the Schmelzer Arms Co., Kansas City

KANSAS CITY, Mo., October 4.—The volume of talking machine business in this section of the country surpasses all previous records, according to A. A. Trostler, manager of the talking machine department of the Schmelzer Arms Co., Victor distributor, and the peak of the demand is not yet in sight.

"Never in the history of our business," declared Mr. Trostler, "have the demands made upon us by the trade been so great as they are to-day. The manufacturers are doing everything in their power to take care of their jobbers but simply cannot cope with the situation. I do not know when the demand for Victor-Victrolas was ever as great as it is at this time.

"We, of course, are enjoying a very healthy

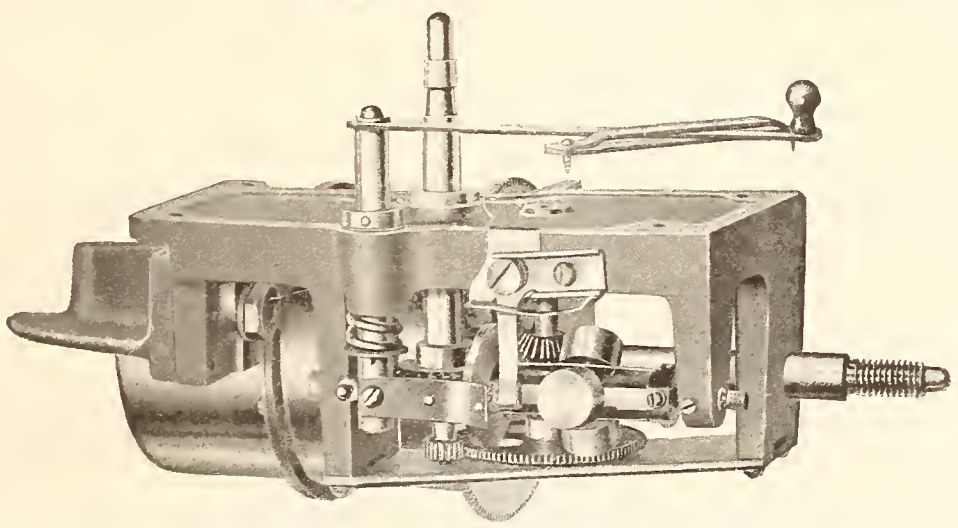
Arthur A. Trostler

business. Every month this year has been much greater than that of last year and we will close the greatest year in the history of the talking machine business. This does not necessarily mean that 1917 will not be just as strong, for I think next year will be much more in proportion than this year."

The Union Phonograph Supply Co., Cleveland, O., has increased its capital stock from $20,000 to $100,000.

Meisselbach HIGH-GRADE Motors

This is our No. 18 Motor, which will play five 12-in. or seven 10-in. lateral cut records with one winding.



Double springs, made from the highest quality material. Worm driven governor. Cast iron frame. One-piece forged crank handle.

The lever shown on top of motor is the underneath turntable governor brake stop. A Speed Indicator and dial is furnished with this motor. Exceptionally silent winding mechanism and silent running.

By the turning of one screw, the spring cup can be readily removed, without taking apart the entire motor.

At a small additional charge, we can furnish an Automatic Stop for this motor, which is built into the motor, that is, the stop is operated by applying a brake on the governor flange. It cannot be furnished on any other make motor, as it is part of our motor.

We guarantee the material and workmanship to be of the highest quality.

We also manufacture TONE ARMS, SOUND BOXES and other parts. Prices on application.

In succeeding issues of this paper, illustrations and descriptions of other models of "MEISSELBACH" Motors will be shown.

Columbia Records TRADE MARK Note the Notes

CLEVELAND DEALERS MAKE ENTHUSIASTIC REPORTS

Regarding Trade These Days—Eclipse Co.s Business for September 80 Per Cent. Over Same Month Last Year—Enormous Columbia Business—Buescher's Educational Campaign—Expansion and Improvement Order of the Day

CLEVELAND, O., October 4.—The Eclipse Musical Co., Euclid avenue, reports a record Victor business for September, stating that the increase over August business was 125 per cent. in advance of sales in August, and this despite unfavorable weather conditions. It is also estimated by this concern that the September, 1916, business, increased 80 per cent. over the September, 1915, business. These statements are from E. B. Lyons, sales manager. From him also comes the information that dealers are pushing their sales of records with more vigor. Many down-State dealers, he asserts, are adding to the size of their departments and are adopting more effectual follow-up systems.

"Our own retail business without advertising has taken a decided jump," said Mr. Lyons. "We cannot get stock fast enough. C. K. Bennett, our general manager, has been on a trip to the factory and has succeeded in arranging for increased shipments of machines."

Of all the window displays that accompanied the appearance in Cleveland the week of September 25 of Montgomery & Stone in "Chin Chin" none received more generous commendation and attention than that at the Buescher's Euclid avenue Victor salesrooms. Members of the "Chin Chin" company, Brown Bros. and officials from the Victor factory complimented the store on its display. The east window was decorated with Chinese lanterns, flags and screens. A Victrola was the centerpiece. Records were placed here and there among the maze of Oriental color. A saxophone and a picture of the "Chin Chin" saxophone sextet occupied the west window.

Work is being rushed to completion for the occupancy of L. Meier & Sons, Victor agency in the new Meier Building, Clark avenue S. W. and West Forty-fourth strect. The opening will take place about October 15. A first floor space of sixty by sixty-four feet will be given over to Victor business. Twelve sound-proof demonstration rooms are about finished. A twenty-four feet high electric sign will extend out over the sidewalk. Mr. Meier was the first West Side dealer to sell Victor products. He began his trade sixteen years ago in connection with his bicycle factory.

To meet the increasing demands of its Victor business the May Co. has just completed in its music department three more large soundproof demonstration rooms. Done in mahogany and white, the rooms are the most centrally located in the entire department, being near the elevator station, and at the front end of the department.

George A. Madson, manager of the Columbia Graphophone Co., wholesale department, says: "The only thing that puts any limit to the increase of our business is the amount of stock the factory will send us. We have more than twenty-five applications for new accounts, but we can't be expected to open them when we can't get enough to take care of our older customers. Our record business is the same."

Wm. Buescher & Sons are taking up educational work on a vigorous basis. L. L. Drenneman, formerly of the Victor factory, is at the head of the new educational department, and is already initiating some active campaign work to make the schools conscious not only of the desirability of using talking machine music, but also to keep them aware of the various new possibilities for making talking machine music a live factor in the schools where machines are already installed.

The M. R. Slocum Piano Co., The Arcade, will, in the future, handle the Columbia exclusively. "We found we did not have enough floor space to do justice to two lines," said Department Manager T. L. McCandless by way of explanation.

The Phonograph Co., Huron road, Edison jobbers, are seeking larger shipments in the hopes that its stock floor will not go empty as quickly as it did last holiday season. Down-State merchants flooded this house with late orders last year, and the management was working eighteen hours a day near the end of the season to try to gather a machine here and there to fill the last minute orders.

C. K. Bennett, of the Eclipse Musical Co., this city, left the latter part of last month for a week's vacation in the East with his family. While East he visited the Victor factory.

Roy Marsh, of the advertising department of the Victor Co., and Bruce Kirkpatrick, Ohio representatives of the Victor Co., were recent visitors to Cleveland.

SAN FRANCISCO DEALERS EXPECT BIG HOLIDAY TRADE

High Priced Machines in Demand—"Records on Approval" Question Acute—Fine Sonora Quarters—Manager Haydock's Edison Plans—Wiley B. Allen Recitals—Kohler & Chase Control "Talker" Department—New Agencies and Other Changes—News of Month

San Francisco, Cal., October 3.—Fall business on talking machines and records on the Pacific Coast has opened up splendidly, and all the San Francisco dealers are looking for a specially heavy holiday trade. The demand for the higher-priced machines is exceptionally good, and the best records are also in good demand. Some dealers still have difficulty in getting enough records to meet their running requirements, and a few are short on machines, but on the whole shipments from the factories have improved a little. A matter which is being seriously considered at the present time is that of letting customers take records on approval. The dealers have come to the conclusion, apparently, that this phase of the business has become acute and needs immediate attention. Too many people take records on approval, and then make purchases on so limited scale that the wear and tear on the records returned takes away all the profit on the transaction. It is difficult, of course, to discontinue abruptly a custom such as this, but a few concerns are now taking a determined stand in the matter and others no doubt will follow suit. At the next meeting of the local talking machine dealers' association the subject will be brought up and probably some definite concerted action will be agreed upon.

Sonora Phonograph Shop's Handsome Quarters

The Sonora Phonograph Shop at 344-346 Geary street is moving to handsomely-equipped new quarters at 109-111 Stockton street, a more central location in the downtown district. The name of the shop has been changed to "The Phonograph Shop" in view of a change in the business policy of F. B. Travers, manager of the company. Hereafter other standard makes of talking machines and records will be carried for sale, arrangements having already been made for selling the complete Columbia line of instruments and records, and also Pathé records. The full Sonora line will, of course, be handled as heretofore. The new shop is a model of beauty and efficiency. On the main floor is a fine recital hall furnished in the living-room effect and having a seating capacity of fifty or more. There are six sound-proof demonstrating rooms on this floor also, with special lighting and ventilating system. The store is so arranged that seven additional record and sales rooms may be added at any time. A spacious mezzanine floor will accommodate the finishing and repair shop and afford space for display. The office is on the main floor. The color scheme adopted for this new shop is cream and French grey enamel. All the partition walls are modeled after the French window style, and the different room partitions are of plate glass. The architectural design was originated and carried out by F. M. Steers, president of the Sonora Phonograph Co. The wholesale department of the company will still remain under the management of Mr. Travers, and the stock will continue to be carried for this department at 616 Mission street.

New Sonora Agencies

New agencies established for the Sonora phonograph are: The John Breuner Furniture Co., of Oakland; the McNeil Piano Co., of Stockton; the Bartholomew Drug Co., of Hanford, and O. C. Raudebaugh, of Flagstaff, Ariz.

R. P. Haydock Manager of Edison Shop

C. W. Davis, who for the past few months has been manager of the Edison Shop in San Francisco, has severed his connection with the firm and returned to his old love, the piano business. He is now with the local branch of the Baldwin Piano Co. R. P. Haydock, for some time associated with the conduct of the Edison Shop, is now the manager succeeding Mr. Davis. Of late the Edison Shop has been putting into effect a policy of not allowing any instruments out for demonstration and also of having no outside solicitors. The shop is not directly in competition with other local Edison dealers, and accordingly is used chiefly as a special demonstrating center for the benefit of dealers and the retail trade. Mr. Haydock has just adopted a new feature in regard to the record department. Patrons desiring records on approval must sign a form which binds them to abide by the following conditions: the records will not be kept longer than twenty-four hours; they will not be loaned to any other than the applicant; they will all be covered except the one being played; they will not be removed from the envelopes and spread on a table while playing; they will not be played with any attachment or on any other machine than the Edison Diamond Disc phonograph; in case of damage to the record from careless manipulation of the diamond reproducer the record will be purchased, the dealer to be the judge in the matter of damage; also, it is agreed to keep not less than one-fourth of the records, and that failure to return any rejected records within twenty-four hours shall constitute a sale.

Mr. and Mrs. Robbins, traveling specialists for the Pacific Phonograph Co., will be with the Edison Shop during Edison Week, October 16 to 21, co-operating with the regular force in making the celebration one of the most successful ever held on the Coast.

Kohler & Chase Buy Talker Department

Kohler & Chase have bought out the talking machine department, which has hitherto been a concession in their store, and measures are being taken for developing the department in a thoroughly up-to-date and efficient manner. P. H. Beck and his partner, R. Coddingham, the former owners, have retired from the local field, and John Gercovich, for some years associated with the talking machine department of Sherman, Clay & Co., has accepted the post of manager. Victors and Columbias are carried, and all standard records. Mr. Gercovich is planning to make numerous improvements for the better display of stock.

First Wiley B. Allen Co. Recital

Mrs. G. Norris, who is now in charge of the recitals inaugurated by the Wiley B. Allen Co., held her first recital this month, and over two hundred people attended. The program was exquisitely arranged, the main features being soprano solos, accompanied by the harp or talking machine records. The company is so well pleased with the opening concert that a larger recital hall is being fitted up on the second floor.

A. R. Pommer, manager of the Pacific Phonograph Co., has been taking a two weeks' vacation at Del Monte, where the tournament of the Pacific Coast Golf Association was held.

O. N. Kruschke, sales manager for the Pacific Phonograph Co., has been to New York on a business trip this month.

Byron Mauzy Store Bars Approvals

Charles Mauzy, manager of the talking machine departments of the Byron Mauzy store, has adopted a rule that hereafter no records will be allowed out on approval, or be exchanged. He has enlarged the department on the fourth floor, adding a large new demonstrating room and two new record rooms. The department now carries constantly in stock every record in the Victor and Columbia catalog. Charles Mauzy says thus far the patrons of the store have been well disposed toward the new policy, and he is gratified that business has been appreciably facilitated in other respects, also by reason of the change.

SECURE LARGER QUARTERS

German-American Talking Machine Co. Lease 325 Lafayette Street for Assembling and Storage—Business Growth Compels this Move

Rudolph Kanarek, president of the Independent German-American Talking Machine Co., Inc., 56 Bleecker street, New York City, reports an unusual demand for the products which are manufactured by his house. He states his firm has just leased the premises at 325 Lafayette street, covering an area of 5,000 square feet, which will be devoted to assembling and storage. The showrooms, office and shipping department are located at 56 Bleecker street, covering an area of 6,000 square feet.

The Majestic Record Corporation, New York, has been chartered with capital stock of $10,000 to manufacture and deal in phonographs, records and commodities. The incorporators are J. C. Reis, R. V. Schoenfeld and D. Green.

INDIANAPOLIS TRADE PREPARING

Stewart Talking Machine Co. Practically Doubles Facilities for Handling Records—Numerous New Pathé Representatives—140 Per Cent. Increase in Columbia Trade—Starr Phonograph Being Well Advertised

INDIANAPOLIS, IND., October 3.—Following his return from the Victor factory, George Stewart, of the Stewart Talking Machine Co., jobbers of the Victor line, began laying plans for the handling of the increase in business which present indications have forecasted.

The facilities for handling the record business have been improved by an addition to the record shelves, which will enable the company to carry thousands of additional records in stock. The shelves were practically doubled in number. The company is concentrating its efforts on the record business.

Mr. Stewart, who spent much time with the factory officials in discussing various phases of the Victor business, reports that his company has been promised by the factory to get just twice as much goods as were shipped the company last year. The factory thus far has been keeping up with the orders fairly well, although the complaint is still on the failure to get orders fast enough.

Emerson Knight, advertising manager of the company, is planning a demonstration of the Victor machine to the school teachers, who will be in an institute session here in the next few days. Mr. Knight succeeded in getting much favorable publicity for the Victor line by this method last year. Visitors to the State centennial pageant here this week will also be looked after, Mr. Knight said.

At the Pathé Phonograph Co., Inc., M. A. Tobin reports that the $150 machine is proving the best seller, showing that the people are taking advantage of the present prosperity by buying the best. In the rural districts through the State, the $75 and $100 machines are the leading sellers, Mr. Tobin said.

In signing up the Trumbo, Schupp & Schmidt furniture store of Louisville, Ky., the Tobin brothers, who run the company, are congratulating themselves on securing what will probably be the biggest phonograph dealer in Kentucky before long. The store is one of the largest in Louisville, and is well-known throughout the State. A complete talking machine department will be installed, a full line of Pathés being carried exclusively.

The People's Outfitting Co., of Indianapolis, is installing two new booths in its talking machine department, where the Pathé is being featured. Oilar Bros. and Sweetman Bros., the other Pathé dealers in Indianapolis, are getting a good start on their fall business.

A. W. Roos, manager of the Columbia store, continues to report big monthly increases in business of this year over corresponding months of last year. An increase of 140 per cent. was registered last month, Mr. Roos said, and nearly three times as much cash was collected. Mr. Roos's complaint is only that he can not get orders filled fast enough from the factory.

Mr. Roos closed a contract with the Great Western Co. here, which he considers one of the largest and most desirable contracts he has among his retail dealers. A large display room and several record booths have been installed by the Great Western Co., who promise to go after business in an aggressive style. D. Sommers Co., a large furniture store, which recently installed a talking machine department for the Columbia line, has proved beyond a doubt the success of the department, and Mr. Roos is highly pleased at the business being done there.

J. V. Riesbeck, a druggist at 1068 Virginia avenue, has put in a line of Columbia machines and records.

The Starr Piano Co. has been doing some effective newspaper advertising on its phonograph, and the Starr phonograph is fast taking its place among the leaders in the local sales.

Arthur C. Ruark, manager of the Vocalion department of the Aeolian Co., reports that prospects for the fall business appear bright. J. L. Peter, of the Fuller-Wagner Music Co., reports that business in the Victor records and machines continues good.

The Pearson Piano Co. is re-arranging its talking machine department in order to make more room for record shelves. E. W. Stockdale, manager of the compay, reports that business in the Edison and Victor lines continues to be a leading factor in the company's sales.

Frank and Will Carlin, of the Carlin Music Co., dealers in the Victor, Edison, Columbia and Sonora lines, report that the talking machine business, which they regarded as unusual during the summer months, is keeping up well, with prospects for a record business this fall. A similar report is made at the E. L. Lennox & Co. store, where the Victor and Edison machines are sold.

The Pathé Pathephone Shop, of Freeport, Ill., was opened recently at 148 Stephenson street, that city.

DITSON
VICTOR SERVICE

For many years we have helped dealers to grow, not only dealers in Victor talking machines, records and supplies, but also dealers in Musical Merchandise and Sheet Music.

All our experience is put into the kind of service we render to Victor dealers. This "EXPERIENCED SERVICE" is yours to command.

The Big months are now "on deck." Why not talk over your "Campaign" with us?

Oliver Ditson Company

Chas. H. Ditson & Co.
NEW YORK

Consider Your Victor Records

Today is the day to take accounting of your Victor Record stock.

Today we are shipping 99% of all orders received.

Today you can get 99% of all the Records you want, in the quantities you want.

This is the situation—NOW.

How long this will last, we cannot say. We all know from past experience that each Fall, Winter and Spring sees an acute shortage of Victor Records. The Victor Company never has been able to cope with the tremendous demand during these seasons.

We have no assurances that they will this year!

It is the part of wisdom to settle at once on a dealer who can best fill your wants We would be happy to serve you. We only ask that you—

Order Now!

You know what Records sell with each outfit, what are the standard numbers, the class of Records your customers buy. Get ready to make your Talking Machine business this season a "Record" one.

Prepare!

Send in Your Order At Once

Victor Distributors

KANSAS CITY, MO.

LIVE TALKER DEPARTMENT STAFF

The Men Who Built Up the Victrola Business for Barker Bros., Los Angeles

LOS ANGELES, CAL., October 2.—No one gazing at the accompanying photograph of the staff of one of the departments in the store of Barker Bros., Inc., well-known house furnishing dealers of this city, can fail to guess what particular department the men represent, for the two dogs listening faithfully to their master's voice and prominently placed in the foreground tell the story.

Barker Bros. Talking Machine Department Staff

The talking machine department of the Barker Bros. Co. has proven most successful, and the volume of business is continually on the increase. Every member of the staff is a Victor enthusiast which in itself tells a story.

The staff of the talking machine department joined with the other thousand employes of the store in the recent outing held at Hermosa Beach, Cal., and just to display their loyalty took their Victor dogs along with them. In the matter of attracting attention the big dog proved the feature of the day.

E. ARMSTRONG GETS MANOPHONE

Will Distribute This Machine in Four Middle Western States

James Manoil, president of the James Manoil Co., 60 Broadway, New York City, and Newburgh, N. Y., recently made a trip to Chicago and arranged for the representation of the Manophone in the Middle West with Elmon Armstrong, who will have his headquarters in the Republic Building, Chicago. Mr. Armstrong will represent the company in Indiana, Illinois, Wisconsin and Michigan, and will display a complete line of machines at his Chicago headquarters.

FINCH & HAHN'S LARGER QUARTERS

New Addition Being Erected in Rear of Store of Victor Distributors in Schenectady

SCHENECTADY, N. Y., October 4.—Ground has been broken for the one-story addition, sixty by twenty-one feet, to be erected in the rear of the present store of Finch & Hahn, Victor distributors, of 540 State street, this city. The extra space is badly needed by the company to take care of their steadily growing business, and when the addition is completed it will be equipped with a half dozen sound-proof demonstrating booths, with the balance of the space used as a Victrola display room. The addition will be constructed of concrete, will be handsomely decorated, and it is estimated will cost in the neighborhood of $2,000.

Finch & Hahn report that business is of unusual proportions, and despite the fact that shipments from the factory of both machines and records are larger than ever, they do not begin to fill the demand, especially for machines.

NEW DEPARTMENT IN LEXINGTON

LEXINGTON, KY., October 4.—The Candioto Piano Co., which is now located in new quarters at 155 South Limestone street, this city, has just added a large talking machine department to their piano business, and are featuring the Columbia Grafonola and Starr phonograph very strongly. Miss Berdie Poole is in charge of the department. The company reports an excellent business. The farmers are getting top prices for tobacco and other crops. They have money and appear to be willing to spend it.

BIG SALE OF EDISON PHONOGRAPHS

LOWELL, MASS., October 5.—The Bon Marche, which operates a large talking machine department that has been rapidly finding favor for some time among music lovers, has just disposed of twelve Edison Diamond Disc phonographs, averaging more than $200 each or a total of $2,500. Charles G. Martin, the manager of the department, is hot after business, and he is doing business at present by leaps and bounds.

PROSPECTS EXCELLENT IN WINNIPEG

Partial Failure of Wheat Crop Does Not Discourage Business Men—Changes Among Managers and Sales Staffs—Recent Visitors

WINNIPEG, MAN., September 30.—Crop estimates indicate a much lower yield than last year and, of course, the acreage is less. In spite of these facts the returns from the harvest in Western Canada will be enormous and probably equal to if not in excess of an average year. Conservative observers are looking for a good season's retail business with collections being well taken care of.

A. G. Farquharson, manager of the Western Gramophone Co., Western distributor of His Majesty's Voice products, has resigned from that position. Mr. Farquharson went to Winnipeg from Toronto during the latter part of last year.

The Winnipeg Piano Co. had a surprise visit from Geo. W. Lyle, former general manager of the Columbia Graphophone Co., New York, who is now with the Domestic Talking Machine Co., Philadelphia. Mr. Lyle is looking well after his year's sojourn on his son's farm where scientific agriculturalism holds supreme sway.

Mr. Paisson, manager of the Canadian Phonograph & Sapphire Disc Co., recently visited New York on a business trip.

Stanwood's, Ltd., have been enlarging their phonograph parlors and report a fair business in Edison and Columbia phonographs and records. Miss Sloane, who has had charge of this department, has severed her connection with the firm. Her position has been filled by Miss Sparfel.

The quarterly record exchange for Victor dealers has received the hearty approval of the Western Gramophone Co.'s customers. They appreciate the opportunity to dispose of titles which they have overstocked and thus keep their stocks clean and up to date.

Babson Bros., dealers in Edison phonographs, report an improvement in Edison sales, owing no doubt to the return of campers and customers who have been away on vacations.

MORE ROOM FOR ARROW MOTOR CO.

Well-Known Motor Manufacturers of Newark Move to Larger Quarters

The business of the Arrow Motor Co., manufacturers and distributors of various types of talking machine motors, tone arms and sound boxes, Newark, N. J., has increased to such an extent that the company has been compelled to move their offices from 207 Market street to much larger quarters at 20 Clinton street, Newark, one block from the old location. The officers of the company are particularly pleased with the demand at the present time, which is taxing the company's facilities, and an interesting feature is the volume of repeat orders coming from manufacturers who are using the company's products.

FIT ANY CABINET, VERTICAL OR HORIZONTAL.

"THE INDEXO"
Trade Mark Registered

PHONO RECORD HOLDERS

U. S. Patent Aug. 17th, 1915

The illustration shows the "INDEXO" record holders arranged in cabinet. The titles of the records can be plainly seen—thus avoiding vexation and hunting for the record wanted. That feature appeals to people who take pride in their record collection.

On receipt of eighty cents in stamps a sample carton containing one doz. of the ten inch size will be mailed to any dealer in U. S.

10 and 12 inch sizes in stock—order them now—they are a fine Christmas article to start.

PLENTY OF MONEY IN BUFFALO

Industrial Activity Brings Prosperity Wave and Talking Machine Men Are Enjoying the Fruits Thereof—W. D. Andrews Issues Catalog of Accessories—Charles H. Heinike a Benedict—Christian Kurtzmann, Inc., Organized—Other Trade News of the Month

BUFFALO, N. Y., October 7.—An unprecedented demand for talking machines is reported in Buffalo. The local industrial plants are working overtime, the department and other stores are busy and those who want work are receiving fair compensation for their labors. It is therefore logical that Buffalonians have more money to spend on talking machines than they ever had before. That they are spending this money for this purpose is best indicated by the favorable reports of the local talking machine jobbers and dealers.

W. D. Andrews, who sells talking machines at wholesale, has issued an attractive catalog of talking machine accessories. The cuts are clear, the text is concise and paper of the best quality is used. Mr. Andrews says the object of the catalog is "to assist the talking machine dealers to increase sales of accessories and thereby increase the yearly net profit." He has also mailed out his new price list to many dealers. He has a good stock of records and accessories but reports a shortage of Victor machines. Mr. Andrews also handles the Edison Amberola. His salesmen are Fred C. Kraft, covering the city, and Douglas Langford and Charles M. Logan, who cover out-of-town territory.

Charles H. Heinike, manager of the Victrola department of Denton, Cottier & Daniels, was recently married to Miss Mary McGowan, of this city. Mr. Heinike recently returned from the Mexican border where he is a member of Troop I, National Guard. The members of the troop are receiving much enjoyment from a Victrola presented them by Mr. Andrews.

"In the past six months our talking machine business has shown a tremendous increase, really out of all proportion to the factory's increased output," said V. W. Moody, manager of Neal, Clark & Neal Co." We couldn't increase our business in machines because of factory limitations, so that logically our increase must have been in records. There is hardly a Victor dealer in our territory who, regardless of size, is not making extensive preparations or alterations to enable him to do an increased record business. The trade letter we sent out October 3 closed with the statement: Every Victor dealer should have record-demonstrating rooms. We know this to be absolutely true. A dealer may do a large record business without rooms, but he is not enjoying the volume of business that the installation of record demonstrating rooms would give him."

Christian Kurtzmann, Inc., recently organized, with temporary headquarters at 236 Delaware avenue, are exclusive jobbers of the Clayola phonograph for Western New York and Pennsylvania. The firm later will have a store in the large business block at Delaware avenue and Chippewa street. George H. Verbeck, who recently retired from the film business, is associated with Mr. Kurtzmann.

Among the new Grafonola dealers in the Buffalo territory are the Arnson Furniture Co., Niagara Falls, and S. D. MacDowell, of Addison, N. Y. W. L. Sprague, manager, and C. M. Wall, assistant manager, of the Buffalo store of the Columbia Graphophone Co., are busy with the distribution of Grafonolas in Western New York. A report of their trade follows: "Our business has shown an increase of more than 100 per cent in the past six months. The factory at the present time is filling our orders promptly. The record situation is improving steadily.

Seeber & Hofheins are opening a new store at Main street and Fillmore avenue and are handling the Columbia line exclusively.

H. G. Towne, manager of Robert L. Loud's Victrola department, recently returned from a motor trip through New England. He was accompanied by his mother who, despite the fact that she has passed four score years, made the journey with the health and spirit of a school girl. Mr. Towne is placing the Victrola in some of the best homes of Buffalo and vicinity. E. O. Hock and E. W. Heintz are members of his sales force.

Bach Utley, who managed the Edison department at the piano store of his father, C. H. Utley, is experiencing strenuous life at the Mexican border. He is a member of Troop I, National Guard, of this city. The Edison department at Utley's is now in charge of Albert Stettenbenz, manager of the store.

John Schuler, who has a new piano store at Main and Utica streets, is featuring the Edison Diamond Disc in special newspaper advertising. His spacious show windows are also used for attractive Edison displays, arranged by Manager Cole of this department. Mr. Schuler's large Edison sign at the Buffalo baseball park has aroused favorable comment.

Bing & Nathan, furniture dealers, handle the Sonora phonograph here. S. H. Brooks is in charge of this department. The Sonora always has a prominent window display at this store. Live advertising matter furnished by the Sonora Phonograph Corporation is used to good advantage by Mr. Brooks.

"The Voice of the Violin," the Edison film, was recently featured at the Olympic Theatre, Buffalo. William H. Reilley, sales manager of the Albert Schuler Piano Co., Inc., arranged for the production at the Olympic. At the end of the picture there was an announcement that the Albert Schuler Co. was licensed to handle the New Edison in Buffalo.

The Hoffman Piano Co., of this city, is handling the Mandel phonograph, and is doing some live advertising on this machine.

Crowds visited the fifteenth anniversary celebration of the Victor Co., Buffalo furniture dealers. Several of the visitors placed orders for the Pathephone, handled by this concern.

PURCHASING DEPARTMENT

Doehler Die Casting Co.,
Court & 9th Sts.,
Brooklyn, N.Y.

ATTENTION OF MR. H.H. DOEHLER, PRES.

Gentlemen:

Answering your recent inquiry, we have now been buying die castings from you for about 12 years, during which time, the quality of your product and deliveries have been very satisfactory.

We have always found your Engineering Department ready at all times to co-operate with us toward improving our product and it has also been a great help to us to receive our deliveries strictly in accordance with promises made.

We are content to continue buying our die castings from you and the writer takes pleasure in recommending your good company to anyone desiring this class of material.

Yours very truly,

T. H. Williams

NEW ASSOCIATION IN JAMESTOWN

Talking Machine Dealers in That City Organize and Elect Officers

JAMESTOWN, N. Y., October 3.—This city is now ranked among the live communities of the State to boast of an organization of retail talking machine men, a local Talking Machine Dealers' Association having been formed here last night. C. Fred Danielson was elected president of the new association, and D. C. Russell, secretary and treasurer.

Among those present at the meeting and who assisted in the organization were Mr. Logan, of W. D. Andrews; Mr. Clark, of Neal, Clark & Neal; and W. J. Bruehl, all of Buffalo, and actively interested in the association of that city, Mr. Bruehl being secretary. Those who joined the association included C. Fred Danielson, D. C. Russell and the Stranburg Music House, Victor dealers, and the Gage Furniture Co., who handle the Edison line, who were represented by A. I. Lawson. Several Pathé and Columbia dealers were out of town at the time the association was formed, but it is believed that their names will be added to the list at the next meeting.

GOLD MEDAL FOR STARR CO.

Second Award in Year Made to that Line at Panama-California Exposition

LOS ANGELES, CAL., October 5.—The Starr Piano Co. here has just been notified that the Starr phonographs and records have been awarded the Gold Medal for quality at the Panama-California Exposition now being held at San Diego. This is the second honor accorded the Starr products at the same exposition, the first being the Grand Prize and Gold Medal awarded in 1915 for tone quality. There is no Grand Prize this year and therefore the Gold Medal represents the highest award. It offers further recognition of the quality of the Starr phonographs and records.

NESTOR WITH COHEN & HUGHES

Well-Known Talking Machine Man Takes Charge of Washington Store

BALTIMORE, MD., October 5.—The announcement has just been made by I. Son Cohen, of Cohen & Hughes, that French Nestor, formerly with the W. F. Frederick Piano Co., Altoona, Pa., has been appointed manager of the Washington branch of Cohen & Hughes. The Washington store was recently acquired by the firm from the Pfeiffer Piano Co., and will take care of a great deal of the Southern shipments of Victor records. Mr. Nestor will have charge of both the wholesale and retail business. Mr. Nestor was for a number of years connected with the W. F. Frederick Piano Co. as head of the wholesale Victor department of that concern, and is well known throughout the trade.

PETITION IN BANKRUPTCY FILED

Creditors of Talking Toys Corporation Take Action—Liabilities Estimated at $60,000.

A petition in bankruptcy has just been filed against the Talking Toys Corporation, manufacturer of phonographs and mechanical toys, at 243 West Seventeenth street, by these creditors: The Kent Audit Co., Gerry & Murray, and William Rotter. Judge Mayer appointed Alfred C. Coxe, Jr., receiver, bond $5,000, on application of Rosenberg, Levis & Ball, who estimated the liabilities at $60,000; nominal assets in excess of that amount, and actual assets, $50,000. The company, it was stated, has $11,000 orders on hand, which would require an issue of receiver's certificates of $7,500 to complete. The company was incorporated on December 28, 1915, with capital stock $550,000, to act as selling agent of the Talking Doll & Novelty Co., against which concern a petition in bankruptcy has also been filed.

FORGET all about the big claims and then ask yourself one question: "What has each of the phonograph builders done which prepared them for entrance into this field?"

The history of the Starr Piano Company is inseparably linked with the development and manufacture of musical instruments in America.

They are skilled cabinet makers it is true; they are recognized experts in the finish of beautiful woods; they have proven themselves proficient in the solution of mechanical problems, but, only as these factors contributed to the greater value of the musical instrument, were they employed.

If you will keep in mind that principles of tone-building do not vary as applied to different musical instruments you will understand why the

Starr Phonograph

had to be different from the talking machine.

The experience and exacting knowledge acquired in a half century of piano building has resulted in a phonograph of highest quality. Complete facilities and ample resources have enabled the greatest saving in production costs while a most complete distributing and sales organization insures an efficiency in marketing that is a prominent factor in low selling costs.

The Starr Phonograph is the instrument you can sell. Send for our booklet, "The Difference is in the Tone, and Why." It is free.

CINCINNATI DEALERS SET NEW ADVERTISING RECORD

Space Carried in Local Papers Exceeds Even That Ordinarily Used During Holiday Season—Mabley & Carew Enter Field—Leading Jobbers Most Optimistic—Excellent Business Prevails

CINCINNATI, O., October 4.—During September the talkiug machine people caused the local newspaper world to wake up because of the amount of advertising space consumed in thirty days. Even taking into consideration previous holiday seasons it is believed the amount of space used by the several talking machines in September set a new high record.

The Mabley & Carew Co., one of the old established department stores of the Middle West, manned with some new blood, sort of capped the climax with a full page advertisement devoted to the Columbia Grafonola. Then, too, the Victor Co. is doing some general advertising direct from headquarters.

The advent of the Mabley & Carew Co. in the talking machine field in itself attracted some attention, but what caused the dealers to sit up and take notice was the announcement that machines would be delivered without an initial payment and left on trial thirty days. The department is in charge of Ernest F. Liechti, who came here from Chicago. Another department store to take on a machine line is the Fair, Sixth and Race streets, dealing in the Perfectrola.

So many machines are appearing on the market that even those who have been trying to keep a line on the situation are inclined to be confused. W. E. Shurtleff, representing the Keystone Distributing Co., is here to place the Carola. Oscar Onken, a West End specialty manufacturer, is putting one on the market known as the Schubert. Word comes from Newark, O., that the Cabinet & Specialty Co. has some kind of an instrument about ready for the market.

The Brunswick interests, of Chicago, contemplated opening a retail house here last month. A store on Fourth, near Walnut street, was under consideration. At the last moment the deal was called off. It is known that the owner stood ready to make desired changes and have the place ready for business on Monday of this week. And those negotiating wanted the place because of its nearness to the Rudolph Wurlitzer Co. and Edison Shop, both in the same block, who are constantly pulling off some advertising stunts.

Manager Pauling, of the Starr Piano Co., wants some capable man to take charge of the retail and wholesale part of the Starr's talking machine business. One man was lined up recently and at the last moment decided to go into the advertising field.

W. O. Black, selling representative of the Knabe Crystola, is in New York City, his mission there being in connection with the deal for the sale of the talking machine department of the Knabe Bros. Co. The deal has been on a little over a month.

The Baldwin Co. is now handling the Monarch, manufactured in Philadelphia, being the last piano house to surrender to the talking machine industry. The house, it is understood, entered the field in no willing mood and has not definitely decided how far it will go into the sale end of the machine.

Divisional Manager Wells, Steinway & Sons, will make the Clayola machine a regular feature of the business before the end of October. So far he has been working towards securing case finishes which are calculated to satisfy visitors to Steinway stores.

Local Manager Whelen, of the Columbia Graphophone Co., stated that business was phenomenal and figures are soaring higher each day. He further stated: "Our business this month will triple September of 1915 and we are very much elated over the prospects for the holiday trade. Dealers are realizing the situation and stocking up heavily for the final rush and we do not anticipate as great a shortage of machines this year as in previous years. Even so, the demand will exceed the supply although increased facilities have been arranged for at the factory and everything possible done to supply the demand."

Manager Whelen, of the Columbia Co., spoke very enthusiastically about the records by the new tenor who is creating such a sensation in this country, Hipolito Lazaro, who has just signed up an exclusive contract with the Columbia Co.

Manager Dittrich, of the Victor department of the Rudolph Wurlitzer Co., is concerned over the holiday situation as is evident from the following statement:

"Business in September was excellent. The beautiful mild weather was unfavorable to record business, but the demand was very lively and our store was thronged every afternoon. The half-page record advertisement we ran on September 28 brought the buyers to our store in droves and the two record hits of the month had a big call. Before the end of the month our new record system will be installed on our main floor and we will be able to handle three to four times the record business that our present facilities will permit. We will need this improvement as the afternoon crowds are already taxing our present facilities. Machine business is phenomenal and the beautiful Italian salesrooms now being fitted up will increase the prestige of the already supreme Victrola in Cincinnati."

THE PATHE LINE IN MUNCIE, IND.

MUNCIE, IND., October 5.—The W. A. McNaughton Co., the big department store of this city, has opened a large talking machine department under the management of Harry E. Paris, and has arranged to handle the Pathé Pathephone and the Pathé discs exclusively.

The Caloric Sales Co., of Wilmington, Del., has been incorporated with a capitalization of $150,000 for the purpose of manufacturing talking machine cabinets. Incorporators: F. D. Buck, Geo. W. Dillman and M. L. Horty, of Wilmington.

FINE QUARTERS IN HARRISBURG

Remodeled Store of J. H. Troup Music House Provides Additional and Excellent Facilities for Handling Talking Machines

HARRISBURG, PA., October 5.—Extensive improvements and additions have been completed at the J. H. Troup Music House, 15 South Market square, to accommodate the increasing sale of records for talking machines. Four new record booths, each sound proof, have been erected and furnished for the convenience and comfort of the patrons of the large store. Each of these is equipped with two large instruments of different manufacturing companies. There are now thirteen record booths in the store.

The entire first floor of the store has been redecorated in mahogany and white enameled wood and is lighted with shaded hanging lamps. Although various makes of pianos are on display on this floor, the second floor has been devoted largely to this department, and also to the player-piano roll library.

The record library on the first floor has been enlarged, and the management of the music house announces that a complete line of catalog numbers of the Edison, Victor and Columbia records are always carried in stock. The large display window at the front has been changed so that passersby have a view of the complete length of the first floor of the store.

INSTALLING SERIES OF UNICO BOOTHS

FOND DU LAC, WIS., October 4.—The work of remodeling and redecorating the store of B. H. Anderson, this city, has now been completed, and the quarters present a most attractive and inviting appearance. The improvements include the installation of a series of Unico booths for the demonstration of Victrolas and records.

CATCHING THEM YOUNG

Courtesy to the Children Means Building Up Future Business

Even the store that sells nothing the children want to buy, can afford to take pains to make the children like to come there, says a veteran business operator. This will result in its being easier for their parents to stop there when they have to have the children with them, and if you are going to stay in business ten years, that is long enough for the children to become buyers themselves. Call the children by their names; at all events don't call them "sonny" and "sis" and other such nicknames. When they come alone you can inquire their names, and when they come again can use them.

The New Idea In Records—

The idea of a good **quality** record is not new.

The idea of a **low price** record is not new.

BUT—the idea of combining absolute quality with a low price is a field that belongs to **OPERAPHONE** and **OPERAPHONE** alone.

Here, indeed, is a record that has the utmost respect of phonograph owners, because **OPERAPHONE RECORDS** are biggest money's worth artistically. They are made in our own plant and sold exclusively under our own name. The list of subjects and artists **proves** that the word "Quality" is more than a word in the Operaphone policy.

And Furthermore—

Operaphone Records play as long as the high price 10-inch Record.

That means **quantity** as well as **quality**—
That's why they are fast sellers—
That's why they are popular, everywhere—
That's partly why **OPERAPHONE** Dealers are enthusiastic and prosperous.

From the Vatican
Pope Benedict XV

ROYAL RECOGNITION OF AEOLIAN-VOCALION SUPREMACY

THE AEOLIAN-VOCALION was heard by His Holiness, Pope Benedict XV, at a special audience granted the official representative of the Aeolian Company upon the sixth of last July. In consequence of the high pleasure afforded by the instrument, Vocalions have been installed for the personal use of His Holiness, the Pope, and the Cardinal Prefect, Pietro Cardinal Gasparri. And in recognition of the contribution to musical art, which the Aeolian-Vocalion represents, the title of "Providers to His Holiness, Pope Benedict XV and to the Apostolic Palaces," has been conferred upon the Aeolian Company.

THE TONES OF THE VOCALION IN THE HALLS OF THE VATICAN RESOUND THROUGH THE CHRISTIAN WORLD

THE presentation of the Vocalion at the Vatican is one of the most significant events in the history of the phonograph.

It is not merely another honor for the Vocalion—another proof of supremacy for this wonderful new instrument—it is an indication that the phonograph has at last attained an artistic perfection entitling it to recognition in the highest places and by the most exalted dignitaries!

That the Aeolian Company, by the application of broad musical experience and the finest instrument making skill, have developed the phonograph to such a plane of excellence, is a work and achievement only in keeping

with the many others which have established this Company's leadership in the world of music.

His Holiness, Pope Benedict, upon the occasion of the audience, was most cordial to the Aeolian representative, M. Dubois. To the formal announcement of M. Dubois' mission he replied something to this effect:—

"I see, Monsieur Dubois, by your decoration, that you are a Chevalier of the Order of St. Sylvestre, and that would prove to me, did I not know it already, how much your previous respect, as well as that of your Company, has been appreciated. I am curious to hear the instrument, and to see you manipulate it. Where do you wish me to sit to hear it in the best way?"

The Vocalion was then played, and after each record the Pope asked for explanations and expressed the thought that the Graduola is "a most precious improvement." At the close of the audience His Holiness said:—

"It is a wonderful instrument, and most surprising in its musical effects. Say to the Aeolian Company that I congratulate them highly and accept with great pleasure their homage . . . . . we shall write you some lines testifying to our satisfaction, as the Vocalion has really interested us."

M. Dubois was with the Pope more than thirty-five minutes, an indication of the high interest aroused by the Vocalion, as Pope Benedict is generally very brief and concise.

Within a few days The Aeolian Company received instructions for the installation of Aeolian-Vocalions at the Vatican for the personal use of the Pope and the Papal Secretary of State. And upon the 3rd of August came the official document conferring the appointment of "Provider to His Holiness."

The personal notes of approval of the Vocalion received from Pope Benedict and from His Eminence, Cardinal Gasparri, Papal Secretary of State, are interesting documents which will appear in an early issue of this publication.

A REMINDER

ALREADY MUCH VOCALION TERRITORY HAS BEEN ASSIGNED—VOCALION REPRESENTATION IS RECOGNIZED AS THE MOST PROFITABLE ANY DEALER CAN SECURE

THE Aeolian-Vocalion offers a most valuable opportunity. The number of firms manufacturing phonographs is already increasing. Competition is growing, and popular demand is depending less and less on the glamour of association with individuals and artists, and more and more on intrinsic merit and demonstrable superiority.

The Aeolian-Vocalion is not only far in the lead today, but the whole history of its manufacturers is a certainty of its remaining so. Moreover, this leadership is obvious at a glance even to the least musically cultured. It is apparent in the most moderate-priced "stock" model—overwhelmingly evident in the Art Styles.

When in addition it is realized that the Aeolian-Vocalion line is the largest in the industry, ranging from instruments at $35 to magnificent art models at $2000, and that Aeolian representation is *exclusive*, insuring the dealer the advantage of all the business in his territory, the tremendous value of this representation becomes apparent.

Territory is now being assigned for the representation of the Aeolian-Vocalion. Address the Aeolian-Vocalion Department

THE AEOLIAN COMPANY

AEOLIAN HALL, NEW YORK CITY

CHICAGO OFFICE: FINE ARTS BUILDING, MICHIGAN AVENUE

A complete display of all models of the Aeolian-Vocalion may be seen at this office

Vocalion Style H. Retail price $150. The simple dignity of this case is an indication of the high standard of the entire Vocalian line

If his "Celeste Aida" is a marvel of power, LAZARO'S singing of "Rodolfo's Narrative" *(Columbia Record 48741)* is just as great a triumph of art. The supreme beauty of Lazaro's voice thrills the very soul in this glorious record.

EDISON DEALERS' PARTY IN INDIANAPOLIS A SUCCESS

Gathering Attended by Over One Hundred Dealers—Details Arranged by Walter E. Kipp—William Maxwell Discusses Trade Topics—Two-Day Session Ends with Enjoyable Banquet

INDIANAPOLIS, IND., October 4.—The Edison Dealers' Party, which was held here October 2 and 3, proved that the Kipp Phonograph Co. was capable of "putting it over right," to use the words of Walter E. Kipp, president of the company. Mr. Kipp, who worked hard for eight weeks in preparing for the event, won the commendation of not only the many dealers present, but also of the Edison officials who frankly admitted that in all their experience they had never attended a "party" which surpassed this one.

The word "party," it was explained by Mr. Kipp, was used in place of convention as it was the desire to get away from the stiffness and formalities generally attached to conventions.

The total result of the party was most agreeable to everybody concerned. The dealers went back to their business with a higher confidence in their goods and with a stronger determination to get the sales they believe they are entitled to; the Edison officials went back to the factory with but one thing worrying them, namely, the question of turning out their product fast enough, and the Kipp Phonograph Co. booked so many orders that even the hustling Mr. Kipp admitted he was doubtful if his company could get enough machines from the factory to fill the orders within a year.

The party began Monday morning when 125 dealers, many accompanied by their women folk, met at the German House for a general "get-acquainted" meeting. Then a reception was held for the Edison officials. These included William Maxwell, vice-president of Thos. A. Edison, Inc.; V. E. B. Fuller, in charge of the company's tone tests; E. H. Phillips, credit manager of the Edison Co.; K. R. Moses, sales manager in charge of the Amberola line, and James Findlayson, mechanical expert from the Edison laboratories.

After a luncheon, Mr. Maxwell opened the session with an address, in which he warmly praised the idea of holding such an affair. He discussed conditions at the factory and gave the dealers an idea of what they could expect.

Mr. Fuller, who conducted the tone tests, found that he soon had his hands full trying to make arrangements for the dealers who desire to have tone tests made in their cities. Mr. Phillips spoke of the importance of the dealers in watching their credits. He took occasion to voice the position of the Edison jobber, pointing out that the dealers should bear in mind that Edison jobbers have the same cares and obligations that any other merchant has; that they are human and have other things to worry about besides filling orders.

Mr. Moses won many new friends for himself and also for the Amberola line. "Something new, yet old. Guess," was the way Mr. Moses' headline feature was referred to on the printed programs. This was a comparison of the $50 Amberola with a $150 machine of another make. The two machines were placed behind a curtain and the same selections played on both. The dealers were then asked to vote on which machine they believed to have made the best showing without, of course, knowing which make of machine they were judging. The Amberola proved to be the winner, receiving almost an unanimous vote.

The afternoon session concluded with questions and remarks by the dealers, several visiting jobbers from other zones participating in the discussion.

A visit to the Edison Shop was included in the program. Those in charge of the Edison Shop received many compliments, while the visiting dealers got many good pointers as to how they might improve on their service to the retail trade. It was the anniversary of the opening of the Edison Shop a year ago and in honor of this, a tone recital test was given Monday evening at the Murat Theatre to which all the dealers were invited.

Madame Marie Rappold, of the Metropolitan Grand Opera Co., was the artist who demonstrated the quality of the Edison and the theatre was crowded to that extent that the police were necessary to handle the crowd.

The newspapers gave much favorable publicity to the concert and the day following the Kipp Phonograph Co., owners of the Edison Shop, inserted full-page advertisements calling attention to how once again the Edison machine had proved its merit and expressing regret to the many who were turned away from the theatre.

The second and closing day session of the dealers' party was opened by another address by Mr. Maxwell. Mr. Fuller continued his tone test demonstration and then Mr. Findlayson, the mechanical expert, took up a discussion of the technical problems which confront the dealers. A live session, in which all joined in discussing the advantages and disadvantages of various phases of the business, ended the session.

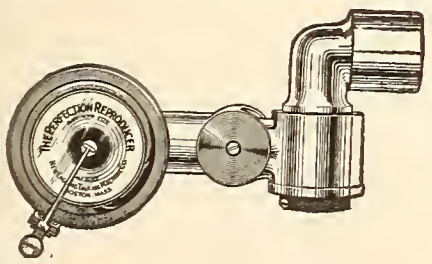
A banquet concluded the party. The banquet was a stag affair, the women folk being entertained in another part of the German House. There were cabaret features in which George Kadel, of the Edison Shop, starred in a burlesque as "Madame Frufru," the greatest singer of all times.

The moving picture entitled "The Voice of the Violin," was also shown at the banquet.

STARR DISTRIBUTOR IN CHICAGO

Melville Clark Piano Co. Secures Jobbing Interests for Starr Phonographs and Records

CHICAGO, ILL., October 4.—The Melville Clark Piano Co., the prominent piano manufacturer and dealer of this city, has secured the jobbing interests of the Starr Piano Co. in the phonograph and record lines for the entire territory in and about this city.



The Perfection Ball-Bearing Tone Arm and Reproducer

The PERFECTION

Ball-Bearing Tone Arm

is manufactured exclusively by this company and the ball bearing idea is our exclusive patent. This accessory helps the Edison dealer to sell machines and will increase record sales for Victor and Columbia dealers when shown to owners of Edison machines.

The PERFECTION

Ball-Bearing Tone Arm

and reproducer is a STANDARD accessory for playing Victor and Columbia records on all types of Edison disc machines.

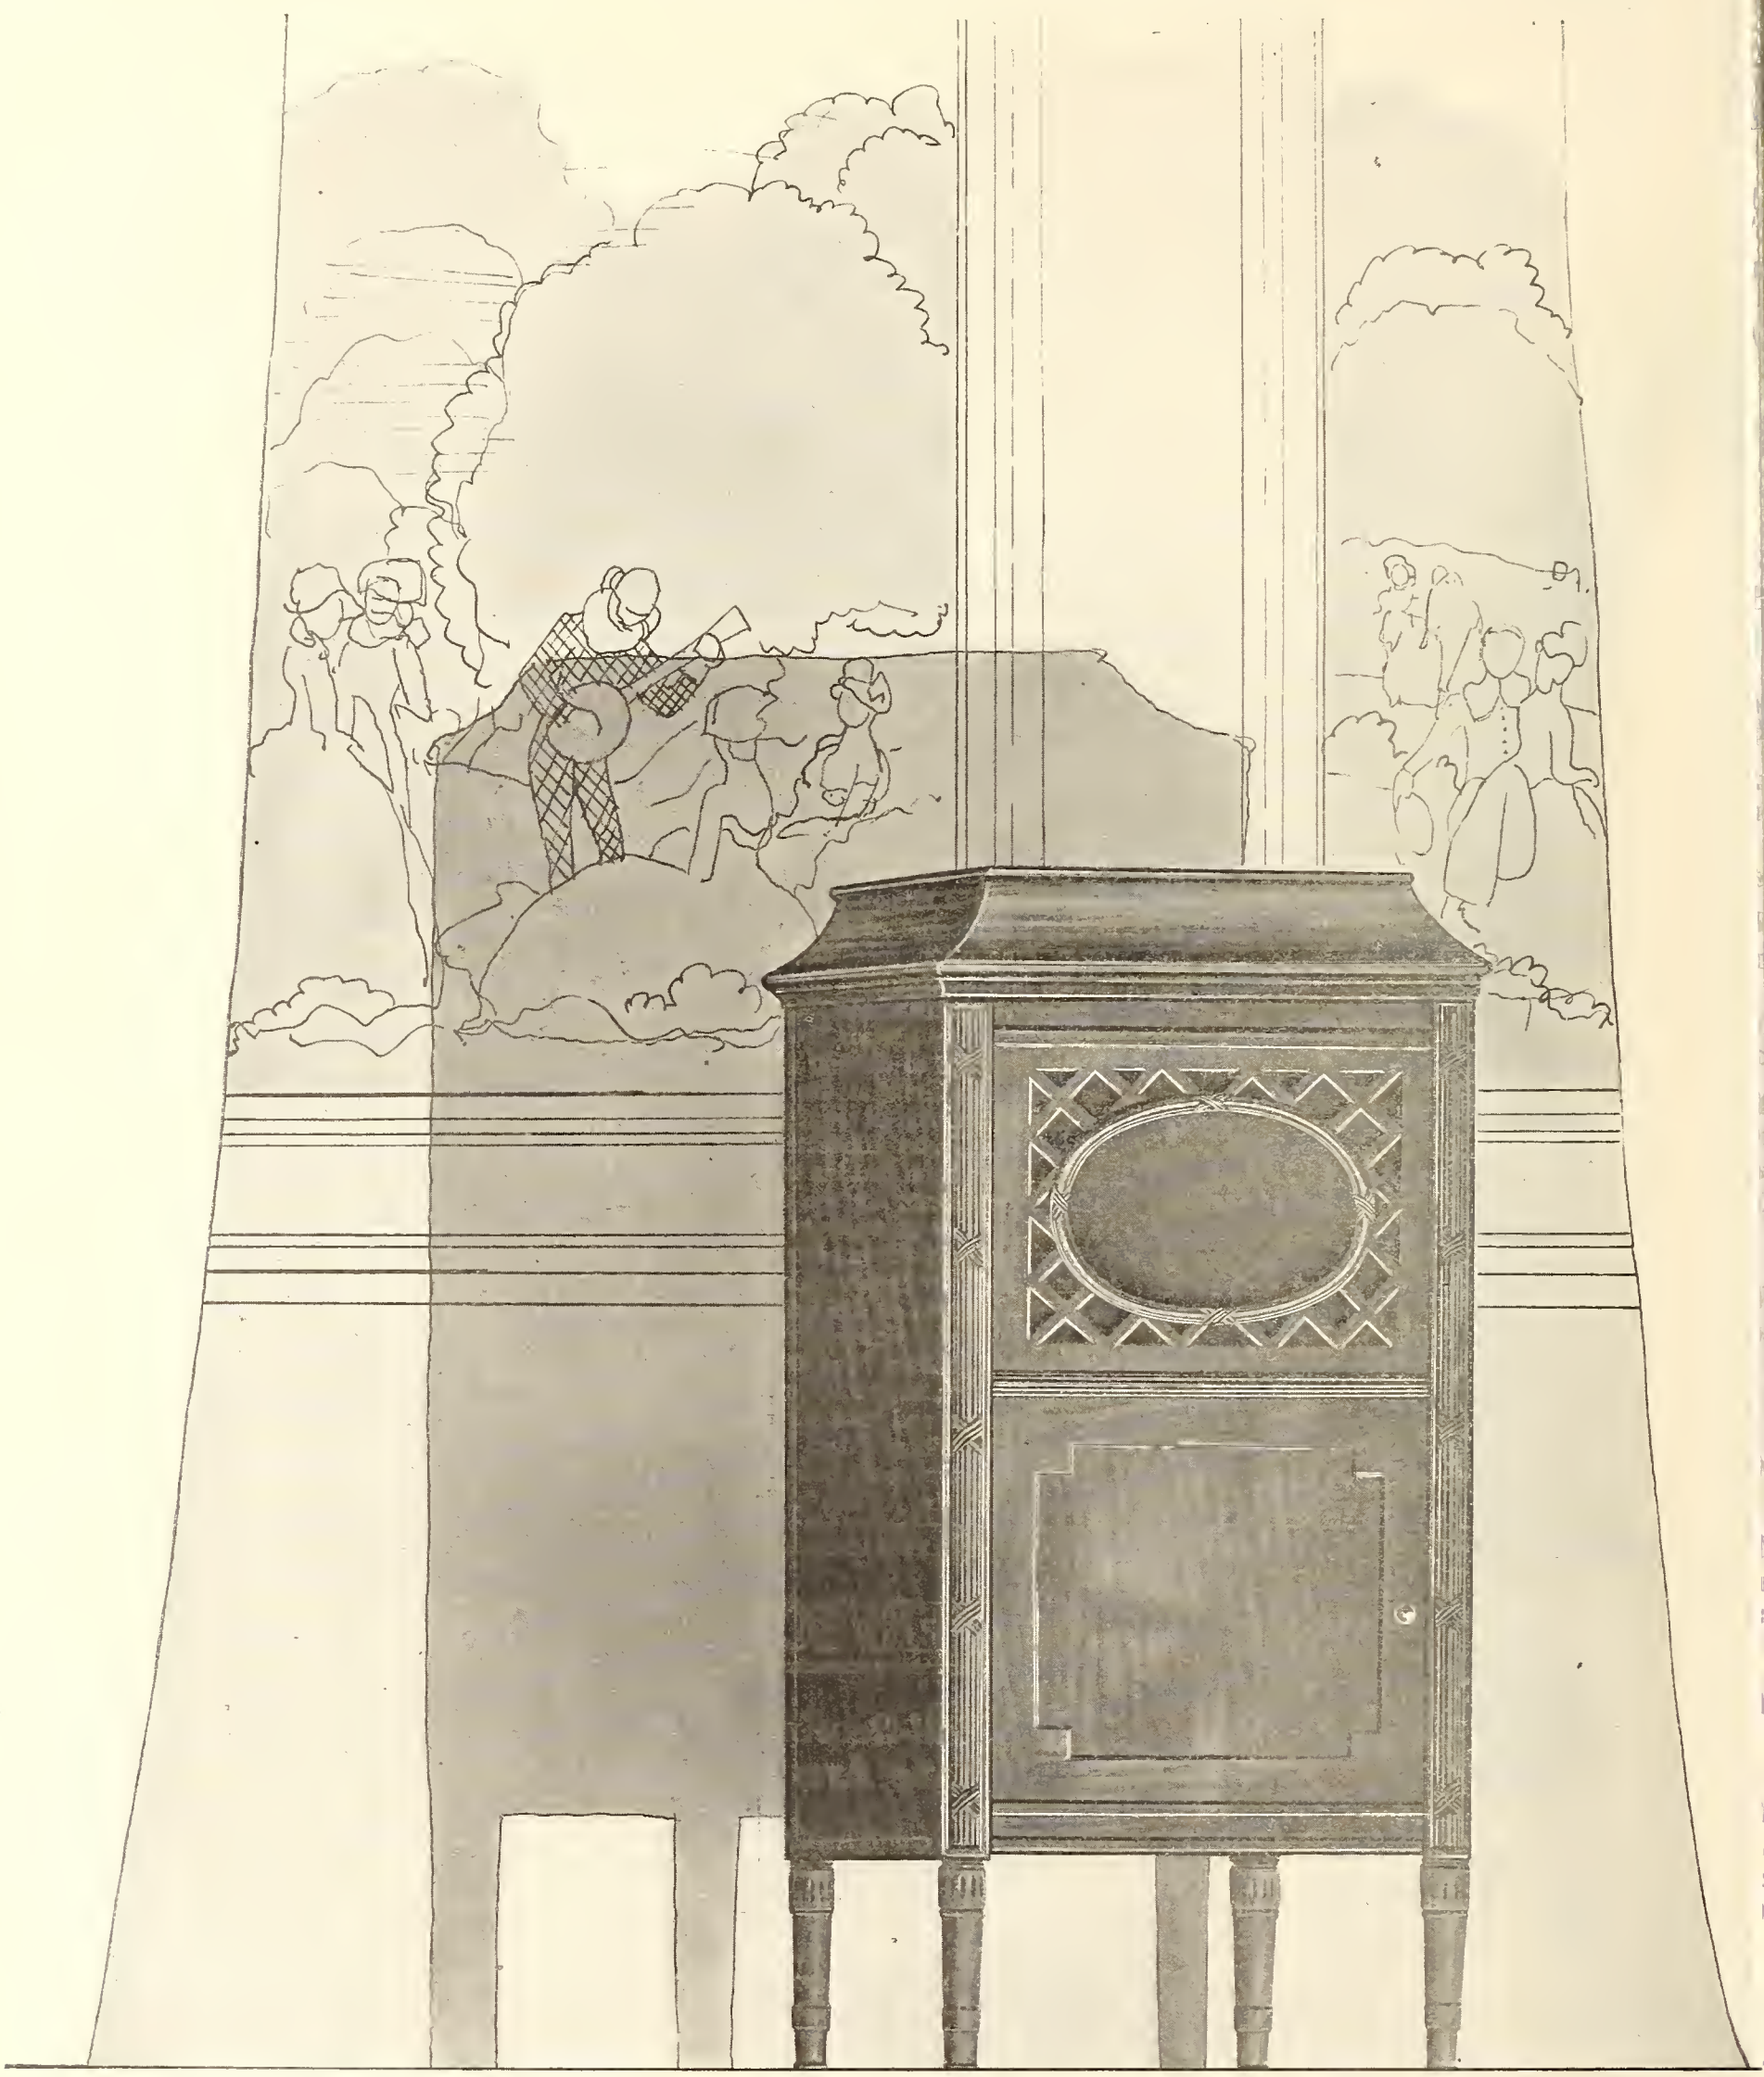
OVER 10,000 are now in use. Why? Because it is the highest grade mechanism manufactured for the machine and one that HOLDS its adjustment.

Our quantity prices are more than consistent —they are unbeatable, considering the quality, workmanship and finish of our product.

The dealer is wise who avoids buying cheap accessories. Future machine sales will be seriously impaired by selling cheap accessories

THE NEW ENGLAND TALKING MACHINE CO.

16 BEACH STREET **BOSTON, MASS.**



Model "175" Solophone

The SOLOPHONE

Main Offices
306 Sussex Street, Harrison, N. J.

ntroducing the New OLOPHONE

The Master Phonograph

HE Solophone is the newest talking machine. As the Master Phonograph, it unites master furniture building with master music repro- ction. It is a musical instrument *De Luxe,* signed for homes of taste.

Into the Solophone has been poured experience phonograph acoustics, motor construction, cabi- t designing, musical instrument making, that als many, many years.

With the Solophone Company are the men who gineered America's quality phonographs, the men o designed America's most famous phonograph binet lines, the men who are America's fore- ost phonograph manufacturing and selling experts.

And at the head of the Company stands a group men who have spent their whole lifetime in the usical instrument industry, men who make and arket one of the oldest quality pianos.

* * *

The Solophone is first of all a musical instru- ent of *superb tone*—capable, at the discretion of e user, of exquisite modulations. The reprodu- r, the tone arm, the amplifier, the tone modifier e all of new design, *exclusive with the Solo- hone.* The motor is the most expensive used in y phonograph made today.

The case designs are chaste and beautiful. The abinet work artistic. On all models the exposed etal parts are *heavily gold plated.*

HE SOLOPHONE PLAYS EVERY MAKE OF DISC RECORD

It requires no extra attachments to do so. And we laim it plays any record *more beautifully than the honograph for which the record was originally ade. To prove this, we have* originated—

THE SOLOPHONE CURTAIN TEST

BEHIND a concealing curtain, place a Solophone and any other standard phonograph. On each in turn have someone play any record of the same make as the other machine. Without knowing which instrument is which, you will invariably say the music of the Solophone is more beautiful.

This test has been made hundreds of times with all makes of machines—five and six at a time—before audiences of experts and laymen. The Solophone has ***invariably*** won out.

Make this Curtain Test yourself. Get the facts about the Solophone. Get the mechanical specifications. Get our Merchandising Plan. Write us without delay, and we'll show you—without delay—how to build a fine phonograph business.

MAKERS OF SOSS PRODUCTS

BRIGHT OUTLOOK IN THE SOUTH

Excellent Prospects for Exceptional Fall Trade in Talking Machines and Records—Cotton Crop Somewhat Impaired by Boll Weevil, But Higher Prices Help—Machines for School Use

The prosperous conditions which have existed throughout the South generally during the present year show no signs of abatement as the fall season sets in. Despite the diversified farming which is being done more extensively all the time throughout the South, cotton continues to be the principal crop, and although the cotton crop this year will not be as large as that of two years ago, the planters are receiving much higher prices for their output, which means in the end more profits than a large crop at lower prices. The Federal Bureau of Crop Estimates forecasts a total production of about 11,637,000 bales, against 11,191,820 bales in 1915 and 16,134,930 in 1914. The prevalence of the boll weevil in Texas, Arkansas, Alabama, Louisiana and Florida has caused a 4.9 per cent. decrease in the condition of cotton since August 25. The present cotton prices, however, will more than offset the decrease in production, December cotton selling around 16.75 cents a pound, while January is quoted at 16.80.

The talking machine dealers throughout the entire South are planning extensive fall campaigns, and aside from the shortage of machines, which has now become an old story, eminently satisfactory conditions are reported in all sections. In Kentucky 90 per cent. of the tobacco crop is cut and in the barns, the grade will be above the average and the yield per acre larger than usual. The corn crop will also be heavier than in the past two years.

The corn crop in Tennessee is above normal, showers having improved pastures and late corn. The tobacco is mostly all cut and housed and the live stock conditions are excellent.

The planters in Georgia are in the midst of cotton picking and the prices are very attractive. The farmers are making money and the presence of the boll weevil is making them invest in more live stock. In Virginia cattle and sheep are in fine condition and prices are very attractive. The largest crop of corn in years will be harvested and a large wheat crop will be sown. A full crop of the finest quality tobacco in West Virginia is one of the pleasing reports from this section of the country. The corn and fruit crops are not quite as large as usual, however.

Tobacco prices are excellent in North Carolina and cotton prospects are very fair.

From the foregoing summary it will be seen that prosperity in the South is practically assured, which augurs very favorably for an excellent trade in talking machines. The jobbers in the larger centers report that their dealers are ordering in increased quantities in anticipation of a phenomenal holiday trade.

Higher priced machines are generally in demand, and the opening of the concert season has resulted in an active trade in the better class of records. The people throughout this section of the country are realizing more and more the advantage and necessity of the talking machine as a means of entertainment and as an aid to musical education, and the use of talking machines in the public schools, which is becoming very prevalent, is rapidly instilling a desire for machines for the home in the minds of the children, which is a powerful factor for increased business.

PROGRESS OF THE DOMESTIC

Demand for the New Machine Necessitates Large Increase in Manufacturing Facilities—President Sheble Explains Choice of Name

PHILADELPHIA, PA., October 4.—At the headquarters of the Domestic Talking Machine Corporation, this city, it was reported that there has been no falling off in the demand for the Domestic machines that has been growing constanly since that product was first introduced to the trade. The chief concern of the officers, it is declared, is to keep the output within sight of orders, and re-orders that are being received. The corporation has already planned various increases to its productive facilities, but is going ahead with the question of efficiency always in the foreground.

"When we started business," said the president, Horace Sheble, "we realized that to produce a machine of the quality of the Domestic at the price we were to sell it for, would require the adoption of modern efficiency efforts in every department. We first secured a thoroughly modern factory building and equipped it with up-to-date machinery of all kinds. The result is that we produce every part of the Domestic machine in our own plant with the exception of the cabinets, know just what is going into it, and can constantly keep up the high standard.

"We have found that the name Domestic was a happy choice. Not only did it fit the machine we were to produce, but has actually made a very favorable impression upon the public. Domestic implies the home—the home where there is laughter and the happiness of childhood—the home where mother smiles, and where father can take off his coat and be comfortable. We have produced a machine that we believe meets the need of music in such a home. It has tonal qualities, original cabinet designs, and is constructed to play all standard records. Is it any wonder that within six months it has been necessary to double the size of the Domestic plant or that our dealers everywhere are so enthusiastic?"

THE PATHÉ LINE IN THE SOUTH!

This company is equipped to give dealers in the South *Real* service in handling the Pathé Line.

We do not take the dealer's order and let him shift for himself, but assist him in selecting his merchandise, selling it and keeping it sold.

Let us send you our proposition

ARMSTRONG FURNITURE COMPANY, Pathé Distributors
59 NORTH MAIN STREET MEMPHIS, TENNESSEE

Actually, no tenor alive today has sung "Celeste Aida" as LAZARO sings it on Columbia Record 48762. Lazaro's tenor is a *super-voice,* a vocal miracle, a wonder of strength. Any record by Lazaro will *sell* as soon as heard.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Records TRADE MARK Note the Notes

PHENOMENAL TALKING MACHINE TRADE IN TWIN CITIES

Unique Venture of Mr. Somers That Brought Victor Sales—Eight Carloads of Edisons Received by L. H. Lucker—How Souders and the Columbia Got There—News of the Trade

St. Paul and Minneapolis, Minn., October 6.—Determined to place in his stock every Victrola that was obtainable Morley Somers, manager of Hennessey Bros., Butte, Mont., conceived and carried out one of the most unique ventures in talking machine annals. He set out in the middle of September for a big swing around the Western circle for a personal visit to all the Victor jobbing houses on his itinerary and there picked up all the machines he could get his hands on. Also his trip was to take in some of the large retail houses in the hope that he could coax away some machines. On this quest he visited Minneapolis, St. Paul, Milwaukee, Chicago, Omaha, Denver and Salt Lake City—a tour of more than 3,500 miles. Of course, he did not get all he wanted and possibly not enough to make his venture profitable, but many people who otherwise would have been deprived of their Victrola pleasures will now on account of Mr. Somers' thoughtfulness not be disappointed.

The Victrola trade is something "colossal" and "stupendous"—the former characterization being supplied by Robert O. Foster, of Foster & Waldo, and the latter by David M. Dyer, of W. J. Dyer & Bro., and they should be safe words for your correspondent. The supply is inadequate say both men, The Beckwith-O'Neill Co. long since have abandoned all hope of trying to fill orders. They fill what orders they are able, and let the others go with all the resignation they have left. It is hard lines for them in every way.

St. Paul will have two days with the Victor grand opera stars, October 20-21. On the former date Geraldine Farrar will appear in "Carmen" with Rita Fornia and Clarence Whitehill, and on the latter day Emmy Destinn will appear in "Il Trovatore," with Louise Homer.

"We have just unloaded eight solid carloads of Edison Disc phonographs," said Laurence H. Lucker, president of the Minneapolis Phonograph Co., "and during the month of September, which was the largest month we have had in the history of this business outside of last December, we shipped solid carloads of Edison Disc phonographs to: Gomer H. Jones, Mankato, Minn.; Bergh Piano Co., La Crosse, Wis.; L. Palm, Ortonville, Minn.; R. J. Becker, Calmar, Ia.; A. W. Strumpel, Waukon, Ia., and C. Zamboni & Son, Owatonna, Minn.

"Miss Elizabeth Spencer, the popular New York soprano and Edison artist, is now in this territory, and will be for the entire month of October, giving tone tests for Edison dealers. J. R. DeSaxe is conducting the Spencer tone test tour.

"Miss Anna Case, the exclusive Edison artist, appears in concert at Fargo on October 19.

"We are making great preparations for Edison week, which is October 16-21 inclusive, and all the Edison dealers in this territory are enthusiastic over the window contest, and the $200 prizes.

"The Minnesota Phonograph Co's retail department is doing an immense business. It is bigger than ever before. Particularly on the C-250 instruments. It seems that particular instrument is enjoying a very popular run at the present time."

Robert Souders, Northwestern manager for the Columbia Co., missed his train for the great Wisconsin and Michigan trade tour out of Minneapolis, in the latter part of September. But he was a resourceful phonograph man, you may be sure, and with the other belated trade tourists charted a special train and overhauled the main one.

Jury duty is claiming some of the men in the business. Laurence H. Lucker is on the Hennepin County grand jury for two months, but this body meets only semi-occasionally. Robert O. Foster was on two weeks' petit jury duty and had to report daily.

J. L. Pofahl, talking machine manager for the Golden Rule, is installed in his new home in fashionable Maplewood.

Five of the Minnesota Phonograph Co.'s staff went out duck hunting, the last week in September and in one day brought down forty birds, near Buffalo, Minn.

MEETING ALBUM DEMAND

"We have recently placed large orders for raw materials," said Philip A. Ravis, vice-president of the New York Album & Card Co., New York. "We believe that there will be a larger demand for albums this fall than ever before, and are suggesting to our dealers that they place their orders in advance of their needs so that their supply of Nyacco albums will be in good shape for fall trade."

SPECIALIZATION!

¶ The successful Victor dealer is the one who has specialized; he has given the machine and record service required and concentrated his energies in the right direction.

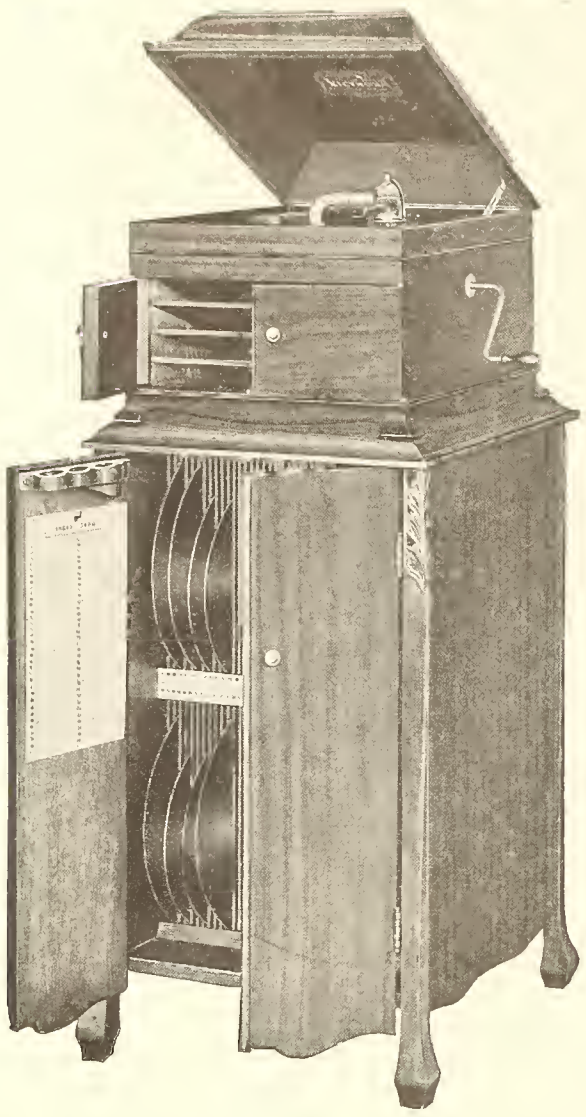
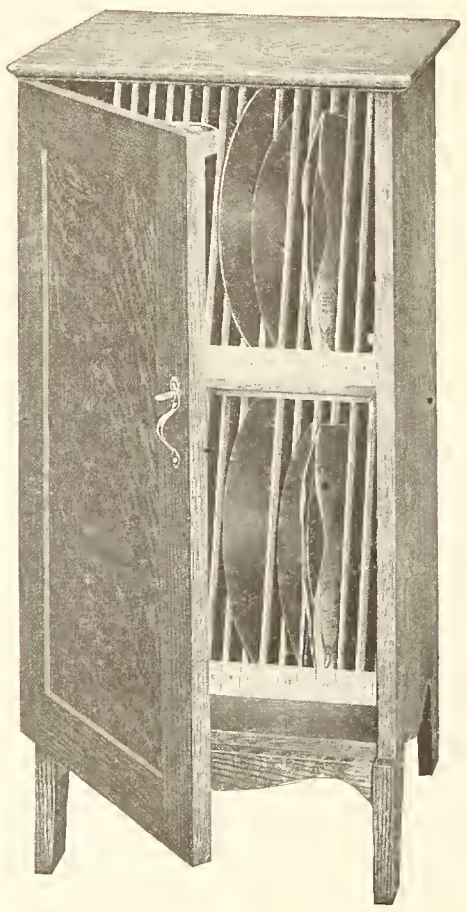
PHILADELPHIA, U. S. A.

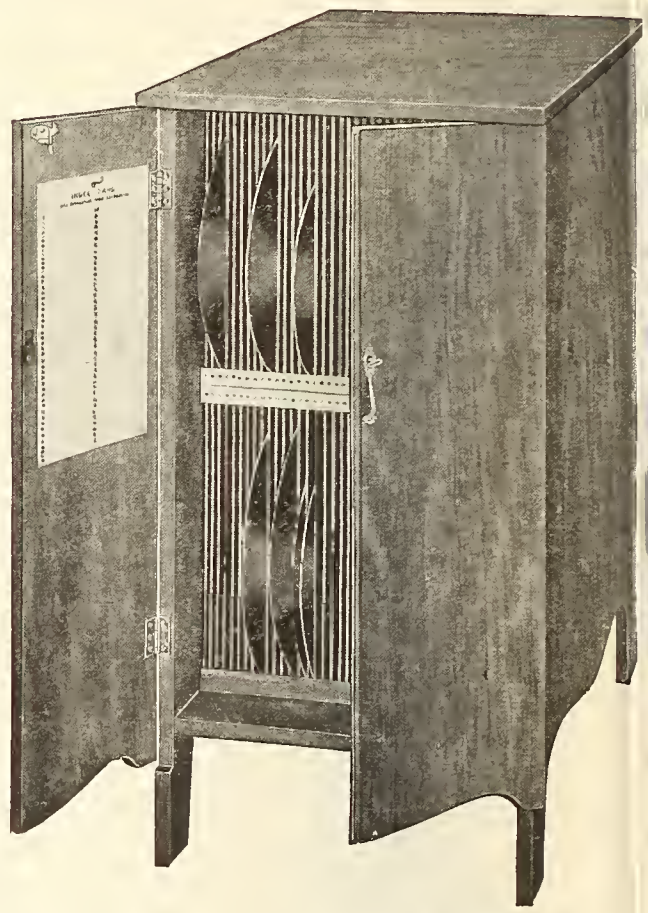
QUICK DELIVERY O



No. 19 with Victor IX. Built to harmonize with machine. Of selected mahogany or oak in any color. Nickel-plated fittings, index system, etc. Felt-lined shelves to prevent injury to 96 records. Wood rack holds 156.



No. 790. Cabinet with Wood Rack Interior. Height 31½ ins.; top, 15¾x15¾ ins. Will hold 112 ten or twelve-inch records. Made in oak or mahogany. Index system, needle holder, etc. Used for small machines generally.



No. 787. Size, 35 ins. high; top, 21¾x18½ ins. Holds 90 records in felt-lined shelves, or 152 in wood rack. Finished in any color. Popular with Sonora and other dealers.

AN additional new building and new machinery that together will increase the output of Salter Cabinets by 100% has just been completed by this company.

It means that for the first time in many years we will be able to keep pace with our orders.

It means that you can secure almost immediate delivery on any one of the many different styles that we make.

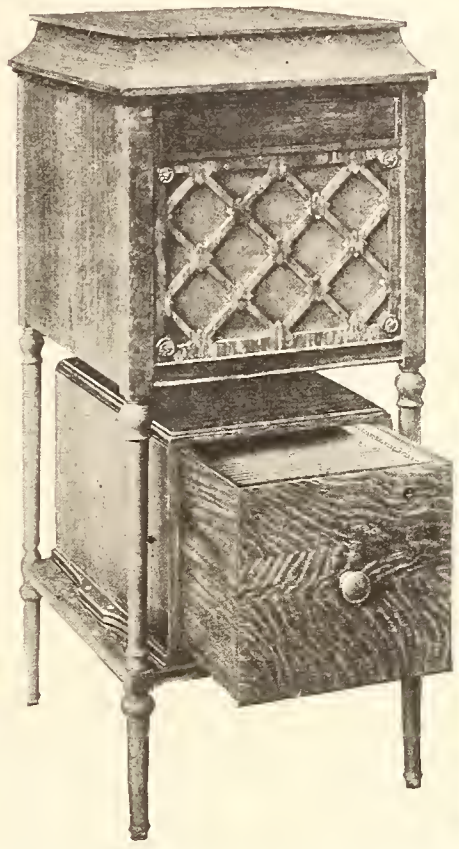
From now on, in addition to Salter Quality, Salter Practicality and the moderate Salter Price, you can get *delivery!*

THE SALTE

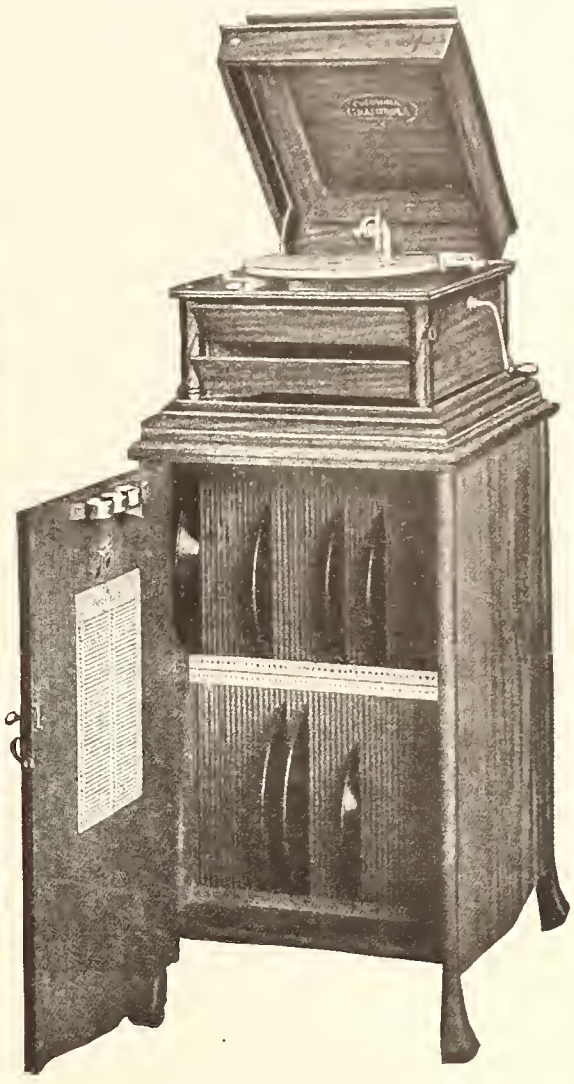
Originators of Felt-Lined Cabinets

ALTER CABINETS

No. 166. Height, 30 ins.; top, 25x20 ins. Records can be laid on front when open. Felt-lined compartments hold 52 records. Wood rack holds 96. Any color in mahogany or oak. Much used by Pathé and other dealers.



Cabinet No. 100, with Edison 100-A machine. Designed especially to fit on machine shelf, and finished to match. It is quickly and easily fastened by means of four screws. Felt-lined compartments and index afford ideal protection and filing facilities. Made in any color.



No. 111, with Columbia "Favorite." Has appearance of one article. Height, 33½ ins.; top, 23x19½ ins. Finished in any color. Felt-lined interior will hold and protect 96 records. Handsomely trimmed and equipped. Any color of select mahogany or oak.

THESE standard Salter Styles are bringing us a tremendous Fall and holiday business, and we hope to take care of it with our new facilities.

To be on the safe side, however, give some thought to the cabinet situation *now*. Go over your lists and then go over our catalog.

You will find the present an opportune time to do this. You will have a rush on machines before long that will leave but little time except for machine sales. Spend some time on this cabinet subject now and make your profits later.

Now is the time! Send for catalogs.

THE NEW EDISON FACTORY NOW NEARING COMPLETION

Work on the new six-story addition to the plant of Thos. A. Edison, Inc., Orange, N. J., which, as was announced in The World, was started sometime ago, is progressing rapidly, and the company will soon be able to enjoy the extra facilities thus provided. The new building is of the most modern construction throughout, and is to be used entirely for record storage and shipping departments. An excellent idea of how the building will look when completed is provided in the accompanying illustration.

TRADE EXPERIENCE PROVES GOOD

A. R. Boone, Head of the Talking Machine Co., Birmingham, Ala., One of the Veterans of the Industry—Chief Concern at the Present Time Is the Shortage of Goods

BIRMINGHAM, ALA., October 3.—A. R. Boone, head of The Talking Machine Co., exclusive Victor distributors of this city, ranks as one of the veterans of the talking machine trade, and his wide experience has been instrumental in building up the business of his company in this territory.

Mr. Boone entered the field with the Columbia Phonograph Co. when they had their offices in Washington, D. C., and their principal business was supplying machines for nickel-in-the-slot parlors, and he has seen the trade grow to its present proportions. Mr. Boone has been connected with The Talking Machine Co. here as half owner since it was started, fifteen years ago.

His chief worry, declares Mr. Boone, is his inability to accumulate stock, the tremendous business during the year being limited only to the insufficient quantity of goods his concern, as well as other jobbers, have been able to secure from the factory. With the steady increase in the demand this stock shortage has developed into a real worry.

ATTRACTIVE NEW STARR SIGNS

Parrot and Record Signs to Be Placed in Front of all Starr Stores—Electric Light Attachment Provided for Night Service

It will not be long until every store selling Starr phonographs and records will have a brand new sign announcing that fact. The Starr Piano Co. has adopted the sign of a parrot standing upon the top of a Starr record which is to be put up in front of all the stores as a trade-mark method of designating that this store handles the Starr products.

The idea of the parrot is based upon the fact that the record reproduces only, and with the idea of the record reproducing from the original without thought on the part of the disc, much the same as the parrot has the reputation of doing.

The parrot on the sign is in brilliant colors of red and green. Set in its eyes is a lens which reflects the light of an electric light bulb operated by an automatic flasher concealed within the sign. This gives the eye an appearance of winking and is attention compelling. The record is painted in black, red and white with the words "Starr Records" across its surface. The sign stands twenty-seven inches high and extends twenty inches from the front of the store when in place. It reads from either side.

INFORMATION OF VALUE TO THE NEW MAN IN THE FIELD

Some Interesting Facts Regarding the Making of Disc Records—How the Motor Tends to Affect the Quality of the Reproduction—Facts that Help Sales

A man going into the talking machine business as a dealer must remember that in entering any new line of business success depends largely upon an understanding of that business. Talking machines do not sell themselves automatically, although the tremendous advertising campaigns carried on in the field almost accomplish that effect. The retailer must know not only how to tell the customer about his machines and records intelligently and authoritatively, but must know enough about the line he handles, or contemplates handling, to select stock to the greatest advantage. A little study of the various types of machines and records and the gleaning of some knowledge about the records themselves, should serve to prevent him from investing more or less capital in a line of machines or records that are decidedly foreign to one another, so far as playing qualities are concerned.

With any make of talking machines and records there crop up certain problems that, while simple and readily solved by the man who has been in the trade for some time, cause some trouble to the newcomer. In this section of The World information will be given on such problems that do not of necessity concern the technical construction or mechanical features of the instruments which are handled in the department of "Repairs" by A. H. Dodin.

The Making of Disc Records

For the most part talking machine dealers are satisfied to sell plenty of records without worrying to any great extent regarding the material that goes into the making of the record or the processes under which it is produced. Once in a while there is a man who wants to know a little more about the physical qualities of the records themselves, as is evidenced by the following letter to The World:

"NASHVILLE, TENN., September 29, 1916.

"Editor, The Talking Machine World.

"Dear Sir—I would appreciate it very much if you could give me some facts regarding the production of the ordinary style of disc record, the ingredients of the composition of which they are made, and how they are pressed. I believe that some other members of the trade would be glad to have the same information.

"J. F. F."

Answer: Only by actually making a tour of inspection through a modern record-making plant can the layman secure a comprehensive idea of the many details that enter into the making of the finished product. There are few dealers in the East who cannot at one time or another find the opportunity to visit one of the factories for this purpose, and they will find that they will receive every courtesy, for the broader the knowledge of the record in all its phases, the greater the selling ability of the dealer.

Pending a visit to the factory itself, however, the various processes connected with the production of disc records may be explained briefly somewhat as follows:

To make a disc record of the ordinary type a person sings before the mouth of a horn, the object of which is to concentrate the energy of the sound waves upon the recording diaphragm. At the narrow end of the horn is the recording sound-box, and the machine with its attendant expert. There is a screen between singer and operator to guard the secrets of the sound box. On the further side of the screen is a horizontal table carrying a wax tablet, rotated beneath the recording sound box at a uniform speed, usually about seventy-six revolutions per minute. As the table rotates it travels laterally at a uniform speed, and the wax tablet is thus caused to travel slowly under the stationary recording box. The sapphire cutting point is lowered so as to enter the wax three and one-half to four one-thousandths of an inch, and as the machine runs it cuts a fine spiral groove, running from the edge to the center. The construction of the sound box is secret, as is the composition of the wax tablet.

The next step in the process is the reproduction of the record as a negative in copper. The wax is dusted with graphite, worked into the grooves with a badger brush to make it electro-conductive; then it is lowered into an electrolytic bath of copper salt solution. The wax is kept in continuous motion in the bath until the copper shell is nine-tenths of a millimeter in thickness.

This negative is a master, and from this a few commercial samples can be pressed to test the quality of the record. The manufacturers, however, wish to make thousands of copies without hurting their master, therefore they make duplicates of their master by taking impressions in wax composition, from which working matrices are made. Then copper shells are obtained from these in the same way. The copper shell is then backed by a brass plate one-half an inch in thickness by soldering under pressure.

Then the matrix is nickel-plated on the recorded side in order to wear better, and after polishing is ready for the pressing machine. The commercial record is pressed into some substance hard at normal temperature and plastic under heat, and very hard and smooth. Various compounds are employed by different makers, but shellac is the principal ingredient.

INFORMATION OF VALUE

(*Continued from page 43*)

Shellac, wood charcoal, heavy spar and earthy coloring matter in certain proportions are used.

This compound, after careful mixing, is rolled into thin sheets and divided into sections, one for each record. The section is then pressed by a hydraulic press. The matrix is heated and placed face up in a mold, the label is placed face down on the matrix, and on this is placed, in a warm, plastic state, enough material for one record. Both halves of the press are furnished with cooling plates, through which streams of water can be passed, and the surfaces are cooled quickly. The record is then removed, the edges trimmed with emery wheels, and it is then ready for sale.

How the Motor Helps the Music

With the big motors, small motors, single spring, double spring, worm-drive and sprocket-drive motors, among the great variety of talking machine motors that are now offered separately or installed in machines, there often comes the question as to the relative merits of these important factors of the talking machine.

Where the selling price of the talking machine warrants it, the double spring and long running motor naturally has the preference, the arguments in its favor being that it will play several records with one winding, thus obviating the necessity of re-winding the machine each time the record is played, and that it is more likely to be practically noiseless in operation. The average dealer, however, does not realize that spring strength has other uses beyond that of simply keeping the machine going for a longer period; that it makes for a more perfect reproduction, for instance.

There are certain classes of music, the high sustained notes of the soprano voice, for instance, that as registered on the record, serve to act as a drag on the reproducer and retard the movement of the record unless the spring has enough reserve power to overcome the drag. When the record is retarded through spring weakness, as everyone will appreciate, what is intended to be a beautifully sustained high note starts well enough, but finally becomes a long drawn out wail, becoming flatter and flatter as the speed is reduced.

As a trade expert said in discussing this matter, "There is ordinarily too great a tendency in the selection of the motor to use any one that will revolve the turn-table. It happens, however, that a considerable reserve of power is required, not only to overcome the resistance occasioned by wide amplification in the record track, as often occurs to a pronounced degree in some records of the soprano voice particularly, but for the best reproduction possible with the average type of record. Not only more volume, but greater clarity of tone, is to be ensured by the apparently incidental circumstance of a strong motor, governed accurately. The governing mechanism is an important factor for volume and tone, and both will suffer when a motor is not governing well.

"It seems to be the aim of most manufacturers of spring motors to construct them more with an eye to their having a long run with a single wind than to the far more important consideration of playing fewer records at a wind with much greater perfection. I have always insisted upon this latter choice, but the average person prefers a lot for his money. A really good motor to run, say, two records at a wind, might be constructed very cheaply, if the fashion for long-run motors were got rid of. The turn-table spindle could be worked by a pinion engaging the toothed wheel usually attached to the spring box, and the ordinary helical screw governor spindle would complete the gear train. The governor springs and weights would require, of course, to be heavier than ordinarily, and it would prove better to have the wheel and pinion cut diagonally for easy running, and the power thus gained by working from the second, instead of the usual third, and sometimes fourth, gear would be very great indeed, proving equal to any emergency."

A. E. DONOVAN TAKES CHARGE

Of the Columbia Co.'s Professional and Personal Record Departments

The Columbia Graphophone Co., New York, announced last week the appointment of A. E. Donovan as manager of the company's professional and personal record departments. Mr. Donovan has been manager of the latter department for the past year, and has also been doing considerable work in the Columbia Co.'s professional department.

A. E. Donovan

Although a young man in point of years, Mr. Donovan is well equipped to handle the important duties of his new post, as prior to joining the Columbia Co.'s staff, he was connected with several large industrial companies, where his training was concentrated along lines which ideally fit him for his present position.

The success and the growth of the Columbia Co.'s personal record and professional departments has been far beyond expectations, and at the present time plans are being made whereby the scope and magnitude of these two departments will be broadened considerably.

FRANZ BRUCKNER MFG. CO. MOVES

The Franz Bruckner Manufacturing Co., manufacturer of the Metro-Phone machine, has just moved its executive offices and showrooms from 115 East Twenty-ninth street to 405 Broadway, New York. The company made this move so that its warerooms could be convenient for visiting jobbers, buyers and dealers. The Metro-Phone machines are now being manufactured in the company's new factory in New York, and new dealers are being added in different parts of the country.

PREPAREDNESS

We are hearing a great deal these days about preparedness. The Press and the Pulpit are paying much tribute just now to this one deity. There is no business today in which preparedness is more essential than in the Talking Machine industry.

In the next few months the demand for Victrolas will be greater than was ever known.

The volume of business will be limited only by the number of Machines the dealers can obtain. But Mr. Dealer how about Records? Now, there in no limit to this branch. You should do as much record business in dollars and cents as you do in Machines.

Not only are the Thousands of Victrola owners, in your vicinity, record customers but also every other Talking Machine owner.

The question is "Are you Prepared to reap the harvest?" Unless you have a good stock you are not. Just one each of the full catalog is not sufficient. You know many selections that are heavy sellers and can use 25 to 50 per month. See that your stock is **Prepared** now for a big business. Customers will not wait for you to order. If you do not have the goods, you lose.

We are prepared to give you complete shipments and best of Service. We handle nothing but Talking Machine Merchandise, consequently our entire efforts are directed towards the interest of our customers.

Victor — His Master's Voice

is learning to investigate and discriminate in choosing phonograph values and the wise dealer will do likewise before taking on a line of instruments with which he will link his name. The name of the Starr Piano Company as manufacturers of STARR PHONOGRAPHS and STARR RECORDS is of itself a guarantee of quality and satisfaction and you can sell Starr Phonographs and Starr Records, for they possess the qualities for which the public has long been clamoring. The Starr Phonograph is different from the talking machines you know of and if you will remember that principles of tone-building do not vary as applied to different musical instruments you will understand why the Starr had to be different.

Here Are Some Starr Features:

A Sounding Board Horn and Throat of Silver Grain Spruce insuring perfect tone-quality
A changeable tone-arm for playing all disc records
A scientific tone-modifier — **Ample filing space for records**
Beautiful designs — **An exquisite piano finish**
And many other features and refinements which enhance its value

Remember that the Starr is the only one of the newer phonographs offering the advantage accruing from selling its own records with the instruments themselves. Starr Records are as superior as Starr Phonographs and new records are released the 15th of each month.

STARR SERVICE to DEALERS is systematic, thorough and complete. Our facilities and methods of distribution are such that immediate attention can be given to every order and satisfaction is assured.

JAMES FRAZEE, 30 CHURCH STREET, NEW YORK

VICTOR POLICY BASIS OF EDITORIAL

Printers' Ink Takes the Example of the Big Talking Machine Co. to Prove That While Advertising May Develop Competition it Also Pays Large Dividends to Those Who Use it Energetically and Consistently

The following pertinent editorial upon advertising as the means of developing competition, with The Victor Talking Machine Co.'s policy, cited as proving that advertising, even if it does make competition, also pays dividends, appeared in a recent issue of Printers' Ink. The arguments are well worth the attention of members of the talking machine trade. The editorial reads as follows:

A manufacturer of varnish once upon a time called in his advertising manager and said: "See, I told you that if we enlarged our campaign we would egg on our competitors to do more advertising, and here they are in this one publication—six of them with increased space. The more we advertise, the more competition we have."

While the advertising manager pointed out that the increase in business had been satisfactory, perhaps he would have been glad if he had had at hand the figures which the Victor Talking Machine Co. can now supply. It has just declared a regular quarterly dividend of 5 per cent., and an extra dividend of 25 per cent. on the common stock, making 80 per cent., which has been declared on this stock so far this year, as compared with a total of only 50 per cent. last year.

If the varnish manufacturer mentioned above was alarmed by competition which he believed his advertising brought upon him, surely the Victor people have had reason for alarm the past two or three years.

Printers' Ink has recorded the news of company after company coming into the field with new campaigns, or enlarged campaigns, on phonographs. The more the Victor Co. advertised, the more the new and old competition swarmed after it. It was a sad case; that is, sad, if you have an inverted mind.

What the Victor figures seem to indicate is this: Competition has only served to emphasize the strength of the companies first in the field. Moreover, large an advertiser as Victor is, it has never yet been large enough to keep abreast of the rapidly expanding market which all the phonograph advertising has helped to produce. If the volume of business were a fixed inexpansible quantity, then there would be a reason for alarm. But the beauty about good advertising is that it is educational—that the more there is of it the more the market expands, and the greater the demand.

The varnish manufacturer forgot the very vital point that advertising is creative—that the more varnish manufacturers who advertise, the more people there will be who will come to feel the need of varnish.

There has been nothing more interesting in business development than the growth of this idea that your competitor is your helper; that he is your strong supporter in the attack upon the inertia which characterizes the national market. The association-campaigns which are multiplying themselves over night is a demonstration of the great change in viewpoint among American business men.

No, advertising doesn't create competition. It broadens the market for everybody.

CREDIT MEN TO HOLD DINNER

Arrangements Completed for Annual Gathering of New York Credit Men at the Hotel Astor

Plans have been completed for the annual fall meeting and dinner of the New York Credit Men's Association. It is to be held at the Hotel Astor on October 26, at 7 p. m., being preceded by a reception that will start an hour earlier. These are the speakers: Joseph W. Folk, general counsel for the Interstate Commerce Commission; Charles D. Joyce, president of the National Association of Credit Men, and Thomas M. Osborne. The executive committee has unanimously approved a recommendation of the educational committee that once a month "educational" meetings of the members of the association be held during the fall, winter and spring.

THE PERSONALITY OF THE STORE

A Feature That Should Be Expressed in the Store's Advertising

"Every store has a personality," said Sherley Hunter, advertising manager of F. B. Silverwood, Los Angeles, in the recent convention of Advertising Clubs. He decried wild, looming headlines, and urged a vibrating personality in copy. His advice to the retail men was:

"Every store has a personality, and the advertising man must labor diligently to express it. The retail business world needs more stores with appealing personalities. Almost every store that has the right to existence has such a personality dormant or in some stage of development. Its future success depends upon the strength of appeal of its personality.

"Copy can never vibrate a more attractive personality than is inherent in the store behind it—seldom as much. Nor can a store have a greater personality than the pilot of its business. It is the first duty of the advertising man to find this personality and, having found it, to express it. Braying headlines, chaotic layouts and lushy wordage beneath crochety illustrations will never shift the responsibility of finding and expressing personality.

"Men have just as much romance as women. If your wives are frank they will tell you so. If you sell rubber hose there is a story about rubber, just as there is about the hand-woven rug from the Orient."

Europe's and America's Latest Song And Dance Hits

In the Hands of Pathé Dealers Months in Advance

If a bright and catchy air or a new selection is heard in the music halls of London, Berlin, Paris, or Vienna, a master Pathé record is at once made and sent to America.

Months before the public itself realizes the popularity of the new comic operas produced in New York and Chicago, dance and vocal selections from them are recorded by Pathé.

Every Pathé record from dance music to grand opera is a *double disc,* offering two selections at a single price.

There is practically no wear to Pathé records! Tests have been repeatedly made, playing records a thousand or more times, without affecting their remarkable tone quality and volume.

The Pathé Sapphire Ball does not have to be replaced. This does away with the bother of constantly changing the sharp, destructive needles used on the regulation type of record.

The Pathephone, with its violin sound chamber of resonant wood, is a musical instrument which has absolutely eliminated the last suggestion of the mechanical.

BIG RECORD TRADE IN BALTIMORE

Heavy Demand for Records Makes Up in Part for Shortage of Machines—Dealers Prepared to Handle Increase—General News

BALTIMORE, MD., October 7.—September proved to be a record-breaking month with the talking machine men of Baltimore, and several reported that the business done last month was the biggest in their history for a single month. Machines are coming in fairly well to some of the companies, but there is still an absence of enough machines to equal the ever increasing demand. Big record business is being done by all of the firms, and this is helping to swell the sales.

A. J. Heath, manager of the Columbia Graphophone Co., declared that September was a most wonderful month. It surpassed the tremendous business done in December of last year, and it now stands as the real record for the month. Mr. Heath has just been given jurisdiction over the Columbia business in Washington, and announces that Lansberg Brothers will carry the Columbia line. Frank J. Murphy & Co., a large local furniture house, has also signed to handle the full Columbia line.

W. B. Turlington, manager for Sanders & Stayman Co., who handle the Vocalion, is more than pleased with the way business is going. Mr. Turlington said that it has been easier selling the Vocalions to the leaders of the musical world than he ever thought possible.

Cohen & Hughes report a big business, but like all Victor distributors, are unable to get sufficient machines to meet their ever increasing demand. The firm has just taken over the business of the Pfeiffer Piano Co. and French Nestor, formerly of Pittsburgh, has been placed in charge. Mr. Cohen stated that $50,000 worth of records represented the initial order. The Washington branch will ship direct to a great deal of the Southern trade handled by the Cohen & Hughes firm.

William C. Roberts, manager for E. F. Droop & Sons Co., distributors of the Victor line, is enthusiastic over the outlook for Victor business. He is still bemoaning the fact that there is a shortage of some machines, however. This is true of the 10's, 11's, 9's and 4's.

More business was done by this house in the month just closed than during December of last year. Mr. Roberts thought that it was next to impossible to do any greater business than that done last December, but he has been surprised. He reports that the record business has improved at least 40 per cent., and he is much pleased because of this.

H. R. Eisenbrandt Sons, Inc., also Victor distributors, are doing a rushing business in all machines, but at this house also the only complaint is that they are unable to get enough machines of certain types. The record business also is improving at a rapid rate, and indications are that the fall and winter will be far ahead of any previous year.

A number of improvements have been made at the Eisenbrandt establishment. Several new booths have been installed for the convenience of the customers, and the record department has been greatly enlarged.

Jesse Rosenstein, of the National Piano Co., distributors of the Pathé line, reports that he has a large number of orders on file, which he cannot fill because of the shortage of machines of all sizes. Mr. Rosenstein is much pleased with the way the Pathé is going. In this section the machine is becoming far more popular every day, and it is heard talked of a great deal more than ever before.

A few days ago burglars entered the establishment of the National Piano Co. They evidently gained entrance by the use of a duplicate key. It is believed that the thieves belong to a band of yeggmen, who have been blowing a number of safes in this city of late, they evidently were frightened off before they could get at the safe in the establishment. The only thing missing was some money which had been left in the cash drawer.

C. B. Noon, manager of the piano and talking machine department of the Hub, reports that September was a good month for Victor goods. The house handles the Victor exclusively now.

Big improvement in the Victor sales are reported by H. T. Kennedy, manager of the talking machine department of William Knabe & Co. This house is getting rid of a large number of machines and records.

Charles Strand, manager of the talking machine department for the Mann Piano Co., Victor dealers, reports a big business for the department, which is a little over two months old.

Roy S. Hibshman, president of the Aeolian-Vocalion Co., Boston, Mass., was a visitor to New York last week, spending some time at the headquarters of the Aeolian Co. Mr. Hibshman was enthusiastic in his predictions for fall business, stating that the Aeolian-Vocalion is achieving great success in his territory.

PITTSBURGH DEALERS DINE

Talking Machine Jobbers Give Dinner to Members of Pittsburgh Talking Machine Dealers' Association—Officers Installed

PITTSBURGH, PA., October 11.—One of the most pleasing events in the history of the local trade took place Monday evening, October 9, when a dinner was tendered the Pittsburgh Talking Machine Dealers' Association by the five Pittsburgh jobbing houses. The affair was especially notable from both the social and business standpoint. With it was combined the first fall meeting of the organization and the installation of the newly elected officials. Practically the entire membership was in attendance.

The scene of the festivities was "The Pines," on the Perrysville road, about fifteen miles from the city. Previous affairs of this kind have been held at one of the downtown hotels, but to provide a pleasant diversion "The Pines" was selected by the committee. The trip was made in automobiles and proved a delightful feature of the evening. The party left in fourteen big cars, provided by the jobbers, at 6 o'clock. Upon their arrival at "The Pines" dinner was served, covers being laid for seventy-five. The dining hall was handsomely decorated with flowers and foliage.

The dinner was interspersed with impromptu talks, no formal program of addresses being carried out. Music and songs added zest to the evening's entertainment, which was marked by much enthusiasm and fellowship.

At 8 o'clock the business meeting was called to order, President C. L. Hamilton occupying the chair. The installation of the officers chosen at the preceding meeting was first in order. They are G. L. Hamilton, president; W. A. Kulp, vice-president; Jacob Schoenberger, treasurer, and A. K. Meyers, secretary. Brief but very appropriate remarks were made by each in turn, voicing their confidence in the association and its work.

The following topics were then taken up for general discussion: The proposed establishment of an information bureau to regulate credit affairs. Plans for pushing the record business. The accomplishments of the association in the matter of charging interest on installments, the elimination of evils in the sending of records on approval and regulation of the advertising of cabinet outfits. The last three topics named were mainly in the nature of a review of what has already been successfully achieved through the splendid co-operation of the members. The session was concluded with the adoption of an amendment to the by-laws, fixing the amount of the membership due.

A rousing vote of thanks was tendered the five jobbers for the magnificent time that had been provided. The hosts were: the Standard Talking Machine Co., the C. C. Mellor Co., and the W. F. Frederick Piano Co., Victor jobbers; the Buehn Phonograph Co., Edison jobbers, and the Columbia Graphophone Co. The arrangements were in charge of J. C. Roush, of the Standard Talking Machine Co.

The following firms were represented at the dinner by one member or more: the Schroeder Piano Co., J. F. Young, J. H. Phillips, Reuben Furniture Co., of McKeesport; Kelley & Morgan, of Crafton; S. D. Myers, of Sharpsburg, W. C. Meyer & Son, of Sharpsburg; W. F. McLay, of Carnegie; the Steel Furniture Co., Stephens Furniture Co., of Braddock; H. E. Walters' Pharmacy, Buehn Phonograph Co., Frederick Piano Co., Lechner & Schoenberger, Pittsburgh Talking Machine Shop, W. J. Mullan, of Sewickley, W. A. Kulp, of Braddock; C. L. Sipe, of Bellevue; George S. Swoger, of Wilkinsburg; F. C. Wampler & Son, of McKeesport; Pelubet & Son, Beachview Pharmacy; Boggs & Buhl, Kaufmann Bros., S. Hamilton Co., Joseph Horne, Standard Talking Machine Co., John A. Scott, Rosenbaum Co., John Riebling Co., McCreery & Co., C. C. Mellor Co., Columbia Graphophone Co., Happ Bros., of Homestead, Joseph Bumbera, of Swissvale.

You Talking Machine Dealers

who are looking for a profitable selling plan, read this letter and act.

Woodlawn Talking Machine Shop

VICTOR VICTROLAS AND RECORDS

1131 East Sixty-Third Street

Telephone Blackstone 1920

Chicago, Ill. Sept. 25th. 1916.

Edward C Plume Co.,
417 S. Dearborn St.,
City.

Gentlemen:

I saw your Ad. in the Talking Machine World of New York, and ordered 12000 of your Postal Cards showing pictures of our Battle Ships and Submarines with some pointers on the reverse side of same, regarding "Victor" Machines and records. I have only sent out by mail about 1000 of them. The returns from same in two months has been the means of selling two Victor $100.00 Machines and a large number of Records. If the balance of these Cards (11000) bring nearly as good results you certainly have a "Winner". This letter is absolutely unsolicited by your Co.,

Yours very truly,
I. A. Eacutt

A return of practically 300% over the cost of this campaign is convincing proof of the real "dollars and cents" effectiveness of our new

Talking Machine Sales Plan

TALKING MACHINE dealers have wanted something different from the makeshift stock cuts and forms passed out to them, sometimes rather reluctantly, by the manufacturers. They have wanted a sales campaign and advertising that are marked by their *own individuality,* yet strong enough to supplement the national advertising of the numerous manufacturers and bring in the business.

That we have such a campaign is shown by the results the Woodlawn Shop has secured in a city that is a veritable hot-bed of competition in talking machines, and by the fact some of the largest houses in the musical instrument business, like Knabe, Stieff, Pease and Steinert, are using our systems in their main stores and branches.

You are in business for profit—then use the methods that make profits

Your biggest season is just around the corner. Better get in touch with us now on this talking machine campaign, and learn the particulars of this Sales and Profit "winner." Write today.

EDWARD C. PLUME COMPANY

"Advertising that produces results"

TO MANUFACTURERS AND JOBBERS—Our system of direct mailing campaigns for talking machines and pianos is ideal for use in helping your dealers sell your lines. Ask for particulars on our special manufacturers and jobbers "get-together-campaign."

THE TRADE IN NEW YORK CITY AND VICINITY

The local talking machine trade is now in the midst of its fall activities, and the majority of the dealers are too busy making sales of machines and records to discuss the business situation. There is an unanimous opinion, however, in the local trade that this fall will be the most prosperous season in the history of the talking machine industry. This optimism is well substantiated by September sales totals and October business to date, as these two months are far ahead of any preceding year.

There is, of course, quite a shortage of machines, but this was expected long ago, and the dealers prepared themselves for a scarcity of products in the early part of the year. The shortage of machines is most acute in the $75 and $100 types, although with the advent of real fall buying there is also apparent a scarcity in the $50 and $150 types.

Record Situation Excellent

The record situation is a source of much gratification to the jobbers and dealers, as record shipments this year have been far more regular than last year, and practically 100 per cent. complete. There will be, of course, a scarcity of some of the standard selections, although even this shortage will be very slight when compared with previous years. The present condition of the record market may be attributed to the foresight and progressiveness of the leading manufacturers who have left no stone unturned to co-operate with the dealers and give them efficient service in every way. New buildings have been erected, costing large sums of money, and these buildings have been equipped with the most up-to-date machinery. As a consequence, the factories are in a position to materially increase their record outputs, and as a matter of fact additional buildings are now being planned for erection the coming year.

Approval and Exchange Problems

The local dealers are giving considerable thought and attention to the "approval" problem and it is quite likely that after the first of the year the Talking Machine Men, Inc., the local organization, will take definite steps to lay before the dealers practical plans of eliminating the present evils which are requiring more and more consideration. There is also a tendency on the part of local talking machine record buyers to exchange their records after they have tried them in their homes for a day or so. This condition was not prevalent to any extent up to a short while ago, but many of the dealers have been obliged to hang large signs in their demonstration booths advising their customers that under no conditions will records be exchanged.

Issue Standard Record Lists

C. Bruno & Son, Inc., 353 Fourth avenue, Victor distributors, have just issued a set of lists of standard Victor records, which were carefully chosen as embodying ready sellers in the different classes of Victor music. These lists will doubtless aid the company's dealers in increasing their record business, as they contain many suggestions which should stimulate record sales. In a chat with The World C. F. Bruno stated that September business was very satisfactory, showing a substantial gain in both Victrolas and Victor records. Mr. Bruno recently made a short trip to Philadelphia, Pittsburgh, Chicago and Minneapolis, and while in these cities spent a few hours as the guest of his brother Victor distributors. He was gratified to learn that conditions in all of the large cities are very pleasing, record sales being exceptionally active.

Biggest Month in History

"September was the biggest single month in our history," said R. F. Bolton, district manager of the Columbia Graphophone Co., New York. "In fact our sales totals were 50 per cent. ahead of any previous month, which indicates the prosperity of the local Columbia dealers and their confidence in the business situation. The demand for the better class of machines is steadily increasing, and our electric Grafonolas are meeting with a more active sale week after week. The advance orders we have received for the new Lazaro records have been far ahead of our anticipation, and there is no doubt but that the recordings of this world-famous tenor will achieve country-wide success." The sales staff of the Columbia wholesale division held an informal dinner at Moquin's last Tuesday to celebrate the consummation of the biggest month in their history, and predictions were freely made that October sales would even surpass September.

Closing Big Pathé Business

One of the most successful Pathé dealers in local territory is the Winterroth Piano Co., which conducts a number of stores in different parts of Greater New York. This company has made a careful study of the talking machine situation in the various localities where its stores are located and by giving real service to its patrons has built up an excellent Pathephone

TRADE IN NEW YORK AND VICINITY

(*Continued from page 52*)

and Pathé disc clientele. The managers of these stores report a healthy demand for the new Pathé discs, particularly the Muratore and Fitziu records.

Popularity of Expensive Models

George L. Babson, general manager of the Phonograph Corporation of Manhattan, 473 Fifth avenue, Edison Diamond Disc distributor, referring to general business conditions, said: "Our September sales were far ahead of last year in both records and phonographs. The demand at the present time seems to be heaviest for the $250 Chippendale model and the $150 type, although our whole line is meeting with a very pleasing success. Our dealers tell us that their sales of Edison Diamond Disc records the past summer were well in advance of expectations, and this fall has started equally as well."

Aggressive Columbia Dealer

The Block Furniture & Carpet Co., 423 Tremont avenue, New York, which recently succeeded the Morris-Block Furniture & Carpet Co., has installed a very attractive talking machine department in which the Columbia line will be handled exclusively. This concern is very popular in the neighborhood of this store and preparations are now being made for an aggressive campaign to feature the Columbia products.

An Optimistic Forecast

"Our business showed a big gain over last September," said J. N. Blackman, president of the Blackman Talking Machine Co., Victor distributor. "This gain might have been greater, however, if home-coming conditions had been normal throughout this State and the nearby territory. The epidemic delayed fall buying somewhat and this will probably mean that October sales will include a certain proportion of the business that usually reaches the dealers in September. General business conditions speak for nothing but bigger promises than ever before, and I can see nothing on the industrial horizon to cause a set-back. I do not think that the result of the election one way or the other will have any deterring effect on business for the reason that the general business situation is such that it will forestall any possible reaction. We are still short of goods, but the factory is shipping a larger amount than before and everybody is turning them over more rapidly. Consequently there is a healthy growth and the promised increase in the shipment of goods will doubtless result in a corresponding gain in sales."

Starting Wholesale Campaign

The Stilwell Co., 115 Worth street, Pathé distributor, is making plans to start an agressive campaign in the local territory as it believes that Pathé dealers will have an opportunity this fall to close a fine business with the Pathé line.

Improving Victor Show Rooms

Seaver Bros., Fifty-third street and Third avenue, Brooklyn, a popular neighborhood department store, has made extensive improvements in its talking machine department which handles the Victor line exclusively. Chas. F. Dunn, manager of the department, is enthusiastic regarding the outlook for fall business and with the addtional facilities now at his command expects to give his customers real service and co-operation.

Attractive Newspaper Publicity

The Edison Shop, 473 Fifth avenue, has instituted a newspaper advertising campaign which is attracting the attention of the local trade. This advertising has been exceptionally artistic in its design, and has featured the auditorium at the Edison Shop, inviting the public to attend the different recitals which are given daily.

Efficiency Helps Successful

The efficiency department of the New York Talking Machine Co., Victor distributor, has received very gratifying responses to its fall campaign and a large number of Victor dealers have expressed a desire to receive the many helps which the company is preparing for the use of Victor representatives. The window card service, which was inaugurated six months ago, has proven so successful that it will be continued another six months, and new ideas will be introduced to add to the value of this service. The new price cards for Victrolas, which the company's efficiency department recently placed before the trade, have also been very successful and are being ordered in large quantities by Victor dealers.

CRESCENT IN SOUTH AMERICA

Crescent Talking Machine Co. Secures Representatives to Distribute the Company's Products in Latin-American Countries

The Crescent Talking Machine Co., of New York, has just completed negotiations with Joseph Bayan to represent and to distribute the complete Crescent line throughout Argentine and Uruguay. Mr. Bayan will make his headquarters in Buneos Ayres.

The Crescent Talking Machine Co. has also established J. C. Von Jenny as a Crescent distributor who will cover all of South America except Argentine and Uruguay. Mr. Von Jenny will make his headquarters in Rio de Janeiro.

Already the Crescent Talking Machine Co. has received many sample orders for the "Silver Tone" line, which promises a bright future for the Crescent machines in Latin-America.

HOW SERVICE DEPARTMENT HELPS

P. M. Bouton, manager of the W. R. Anderson Co., New York, distributor of Domino records, stated this week that the company had just installed a special service department, whose duties would be to help the dealer in merchandising Domino records. The company does not feel that it has completed its functions as record distributors when the dealer's order is received, but believes that the dealer should be given practical help in selling the goods.

E. B. Brown & Co., Camden, N. J., has been incorporated with a capital stock of $25,000 for the purpose of manufacturing talking machines and other musical instruments.

Columbia Records TRADE MARK Note the Notes

SOUTHERN CALIFORNIA NEWS ITEMS

Dealers Already Preparing for Holiday Demands—Pipe Organ for Southern California Music Co.—Andrews Co. in New Quarters—Remodeling Store of George Birkel Co.

Los Angeles, Cal., October 4.—The trade of Los Angeles and vicinity for the month of September has been encouragingly brisk. The dealers are already showing their belief in "preparedness" for the coming Christmas campaign by ordering heavy shipments of machines and records. It is expected that the Christmas season of 1916-17 will eclipse all preceding ones. Los Angeles has just enjoyed one of the best summers in the history of the trade here.

The Southern California Music Co., agent for the Edison, Victor and Columbia lines, is at the present time having a $10,000 pipe organ installed on the fourth floor of their place of business. Managers Richardson and Fish, of the Edison and Victor departments respectively, have prepared for their usually heavy fall trade by adding several new members to the force.

The Andrews Talking Machine Co. is much pleased with its new quarters and Manager Pease expresses himself as being more than satisfied with the increased volume of business brought about by the change.

C. B. Booth, manager of the talking machine department of Barker Bros., has just returned from a flying business trip to Chicago. The enlargement of their talking machine department has been postponed until after the holidays.

The George Birkel Co. has already started the proposed alterations, which will almost double their present talking machine room capacity.

Manager Lindsey, of the Wiley B. Allen Co.'s department, reports an exceptionally good September.

Mrs. Katherine W. Urquhart has succeeded Mr. Bonell as manager of the local Pathé stores. Mrs. Urquhart is well qualified for this position, having formerly been manager of the Columbine Music Co., of Pueblo, Colo., and also manager of the piano department at Barker Bros., of this city, at various times.

EDISON DEALERS MEET IN DETROIT

Retailers From all Sections of Michigan Gather in Convention as Guests of the Phonograph Co.—Visitors Elaborately Entertained

Detroit, Mich., October 7.—Dealers of the New Edison from all sections of Michigan came to Detroit on Thursday, October 5, to attend the second convention under the auspices of the Michigan jobbers, the Phonograph Co., of Detroit, of which R. B. Alling is general manager. The morning was given over to registration and receiving badges; at noon there was a complimentary luncheon to dealers, ladies and visitors at the Hotel Pontchartrain. A business session took place in the afternoon, at which all phases of the phonograph industry were discussed—selling, advertising, credit, instalments, etc. At 6 o'clock the dealers and their wives adjourned to the Edison Shop, 254 Woodward avenue, where a private tone test was given by Miss Marie Kaiser, Rudolph Polk and Arthur Walsh. A banquet took place at 7 o'clock at the Hotel Pontchartrain, devoid of business talks and discussions. Following the dinner there was a number of entertainment features furnished by employes of Detroit Edison stores, including Miss Isabelle Hunt and Miss Helen Kennedy, of the Edison Shop; Larry Doyle, of Wallace Brown's store, and Frank Shaull, of Frank Bayley's store. Dancing concluded the evening's entertainment.

Among the out-of-town jobbers who attended the convention were L. N. Bloom, secretary of the Phonograph Co., of Cleveland; C. E. Goodwin, Chicago; Harry Stanton, Toronto, and William A. Schmidt, Milwaukee.

AN ATHLETIC "TALKER" DEALER

Thor Norberg, of Noline, a Swimmer of Olympic Game Calibre

Moline, Ill., October 6.—When Thor Norberg, proprietor of the Norberg Music House, of this city, is not busy selling talking machines and records he is sure to be spending his time in the water or in the air on his way to the water. Mr. Norberg is a "water dog" of much ability and was one of the swimmers who represented the United States in the Olympic games that were held at Stockholm, Sweden, this year. Norberg's ability as a diver is clearly shown in the accompanying picture as his "form" from the standpoint of a diver is very good. During the warm weather Mr. Norberg spends much time in the waters of the Mississippi, which flow by Moline. In this way he keeps himself in excellent trim and after the past good summer of exercise he is ready to tackle the biggest business that his company has perhaps ever met with.

Thor Norberg Making a High Dive

Veeco Electric Motors

VEECO MEANS:

1. Efficiency.
2. Durability.
3. Elimination of Motor Troubles.
4. Perfection in Every Respect.

Guaranteed for Two Years

1. The above results were obtained by years of experimenting.
2. The only electric motor for phonographs that has been approved and endorsed by the highest electrical authorities in the United States.
3. Adopted exclusively by some of the largest manufacturers.
4. Our Composition Turntable is in itself a great improvement to any talking machine.

Our large contracts and rapid growth are the proofs of the superiority of Veeco Motors.

We also supply for dealers our Veeco Motors mounted on suitable boards for installation in machines already in use.

We can make prompt deliveries, render excellent service and invite comparison.

REPAIRS

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World is designed for the service of all classes of our readers, including those who make, and those who sell, talking machines.

Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 25 East Fourteenth street, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

TRACING THE BLAST OR RATTLE

It too frequently happens that when there is a blast or rattle noticeable during the playing of a record the dealer is inclined to blame the reproducer, and either tries to adjust it himself or send it back to the factory in exchange for a new one. When the new reproducer is adjusted it is found that the blast or rattle still persists. In such cases it is well to make a close inspection of the tone arm. There are many different tone arms, particularly those of the jointed or "universal" type, which are not fitted together as carefully as might be, with the result that certain sections are loose and shaky.

Where there is a swivel movement controlled by a set screw it might be well to tighten the screw so that there will be no movement of the joint, except when same is made purposely to change the position of the sound box. Some tone arms come in sections which fit into sleeves, and when such joints are loose, a little shellac placed within the sleeve before putting in the second joint and allowed to harden will generally prove a satisfactory remedy. Then, too, the reproducer may not fit the tone arm securely. Metal vibrating against metal will always set up a jangling whether the vibrations are caused by sound waves or other means. Inspect the tone-arm for that rattle before blaming the reproducer.

THORPE ELECTRIC MOTORS
FOR TALKING MACHINES (Operates on all currents)
WALTER THORPE, Manufacturer, 29 West 34th Street, NEW YORK CITY

The Question of Spring Lengths

"BROOKLYN, N. Y.

"EDITOR, The Talking Machine World, New York.

"Gentlemen: I would appreciate your requesting Mr. Dodin to give the following information in the Repair Column of The World.

"If the length of the spring solely determines the length of time the motor runs.

"I think this would be information of interest to any salesman. Very truly yours,

"KOCH & DROGE PIANO CO., INC.,
"Per FRANK G. RETTINGER."

The above letter is in my opinion worthy of more than a passing answer for it touches on a subject which has been given too little attention particularly by repairmen.

Times without number in past years I have received motors for repair with the complaint that "it won't play a twelve-inch record," and as a rule, when examined the fault was found to be a main spring either too long or too short.

In a single spring motor it is the general rule of manufacturers to use a main spring of such a length that the motor will run just a little more than a twelve-inch record. In a majority of motors this calculation is easily upset when too much graphite mixture is placed in the cage —the graphite will become packed between the side of cage and outer leaf of spring and prevent spring from unwinding and consequently motor will not play a full twelve-inch record.

The same result will follow if too long a spring is used. Most of the space of the cage is taken up by the coil of the spring and there is not enough space left for the spring to uncoil in. The length of time a motor will run depends more upon the arrangement of gears, that is the number of gears and number of teeth in each gear, than it does upon the length of the main spring. I can give as illustrations the Victor II. motor with the single spring cage and a main spring seventeen feet long by one and one-quater inches wide. This motor plays a little more than a twelve-inch record with one winding while a certain motor made in Europe with a main spring only eight feet long and three-quarters of an inch wide, can by its arrangement of gears and number of gear teeth, run just as long. The Victor II. motor is what is known as a spiral drive motor, the spring cage gear acting direct on the turntable spindle, causing it to revolve as the result of the gear teeth following the spiral cuts on the spindle. The foreign product is a gear motor having an intermediate gear acted upon by the spring cage gear and in turn acting upon the turntable spindle. The seventeen-foot spring placed in a larger spring cage and fitted to this gear motor would possibly run it five times longer than the eight-foot spring.

Slot Machine for Disc Records

"NEWBURGH, N. Y.

"EDITOR, The Talking Machine World, New York.

"Dear Sir: I am addressing this to you, seeing your repair department in The Talking Machine World. I want to know if there is a machine on the market that plays a disc record and is operated by placing a nickel in a slot? If there is one can you give me the address of the concern? Thanking you in advance, I remain,

"RALPH BURGER, Proprietor,
"Columbia Music House."

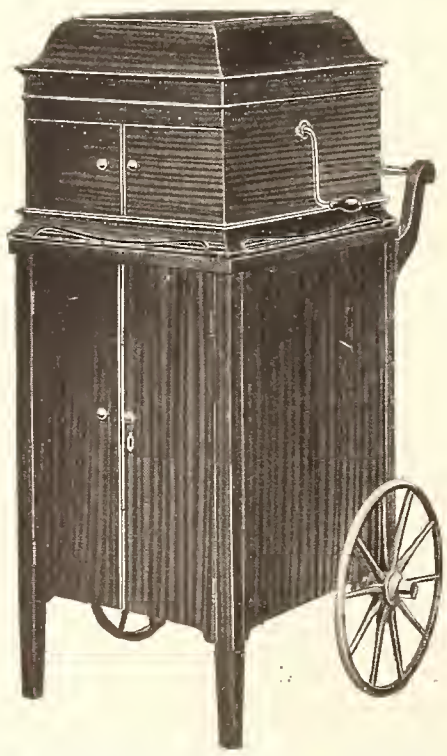
Answer. Automatic Machine & Tool Co., 210 Ann street, Chicago, Ill., manufacturer of Gabel's Automatic Entertainer, can probably meet your requirements.

IMMEDIATE DELIVERIES

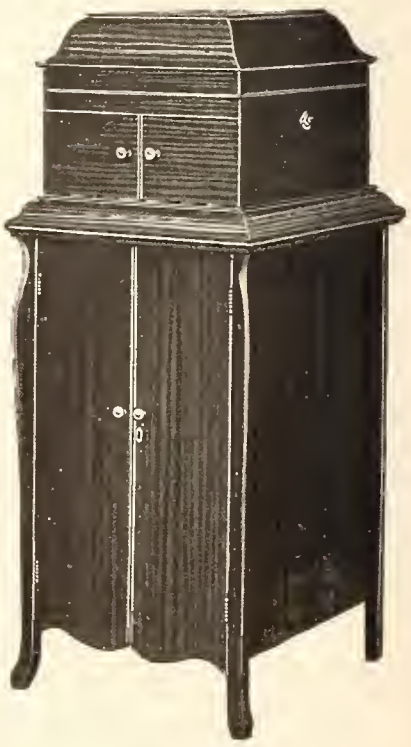
No matter what make of Talking Machine you handle, whether Victor, Columbia, Edison, Sonora, Pathé, Vocalion, etc., our Cabinets will FIT and MATCH them perfectly, giving them that "Cabinetmatch" appearance.

Quality, Price and Service are the most important factors when purchasing cabinets. You will find the best material, construction and finish in our merchandise, at prices unequalled for cabinets of their kind.

503—Golden Oak, Mahogany. For Victrola IV, VI, Columbia, Meteor, Eclipse and Jewel. 500 for all Victrolas and Columbia machines.



702—Mahogany, Golden, Fumed or Weathered Oak.—For Victrola IX. No. 701 for Old Victrola IX. 703 for Columbia Favorite. 704 for Edison A-80.



809—Mahogany, Golden, Fumed or Weathered Oak. For Victrola IX.

We also make many other styles of cabinets and will be glad to send our catalog for the asking

A Record Record Business

Only six months on the market and a tripled capacity still finds the demand for Emerson Discs far beyond the supply.

That is the record of Emerson growth—a remarkable tribute to the quality and salability of the Emerson record.

The increasing demand for Emerson Records has necessitated the rapid expansion of this business.

We are meeting the requirements as quickly as it is physically possible.

Last month we added 15,000 more square feet to our capacity. Even with this additional space we are already feeling the necessity for more room.

This truly is a *Record* record business.

Emerson 25c Double Discs

play on all but one positive feed machine without extra attachments.

Full 7 inches in diameter—each side plays three-fourths the time of a standard 10-inch record.

The Emerson list is a list of popular hits, sung and played by well known artists.

Emerson 25c Double Discs meet an existing demand—fill it—put in a stock today.

The investment is small—the profits are liberal—the turnover quick. It has no equal in the field—don't delay—place your first order and profit thereby.

The Mozart Talking Machine Company

J. P. FITZGERALD, President

1432 TO 1442 NORTH TWENTIETH STREET ST. LOUIS, MISSOURI

IMPRESSIVE PROOFS OF HERZOG CABINET POPULARITY

SAGINAW, MICH., October 12.—As the sign on the car indicates, the view shows a big shipment of Herzog cabinets—a solid carload of one type, No. 897S—about to leave the big Herzog factory in Saginaw, Mich., for Chase & West, Victor dealers in Des Moines, Ia. It is said that this enterprising Victor house sells more No. 897S Herzog cabinets than any jobber or dealer in the United States.

How One Victor Dealer Buys Herzog Record Cabinets

The Herzog Art Furniture Co. is experiencing an unusually busy season, and while they have increased their output by fully 50 per cent., orders have shown a similar increase. The big plant is operated twenty-two hours out of twenty-four, over six hundred men being employed. Their product consists principally of record cabinets and special talking machine cases, although some regular furniture is made. A copy of the new De Luxe Herzog record cabinet catalog which has been received by live jobbers and dealers has won praise. Ask for a copy.

The Wonder Talking Machine Co., 113 Fourth avenue, New York City, has just added to its line several attractive cabinets which were designed to match perfectly the various machines in the Wonder line. These cabinets will be furnished in either mahogany or oak finish, and will also match other types of table machines.

HEARING ON PASSOW SOLVENCY

Creditors Question Value of Assets of Chicago Concern at Meeting

CHICAGO, ILL., October 10.—A hearing was held to-day before Referee in Bankruptcy Eastman, in which arguments were heard in regard to the solvency of Passow & Sons.

An involuntary petition had been filed against the concern September 24, the petitioners being F. G. Hartwell & Co., the Presto Publishing Co., and Chas. A. Stevens & Co. The claims listed in the petition amounted to $925.88. The liabilities are roughly estimated at from $125,000 to $135,000. It is said that assets are claimed by the concern of almost one-quarter of a million dollars but that the value of the assets is questioned by the creditors. Maddock & Jaffe, attorneys of Chicago, represent the principal petitioners in the action.

BRINGS OUT NEW SOUND BOX

CHICAGO, ILL., October 10.—Weigand & Co. are placing upon the market a new type of sound box which has been named the "Three in One." The principal feature of the new device is that it plays with an ordinary jointless tone arm in an unchanged needle position, any type of disc record. The Weigand Co. is also dealing in jeweled points. The offices of the concern are located at room 1727 Republic Building.

VICTOR-MACY CASE ON CALENDAR

The famous case of the Victor Talking Machine Co. vs. Jesse Straus et al., proprietors of R. H. Macy & Co., New York, is now on the calendar of the Supreme Court, No. 374, and though motion was made to advance the trial of the suit, it will be some time before a decision is rendered. The case is looked upon as of prime importance in fixing a precedent in the matter of price-standardization.

GREAT ACTIVITY IN MONTREAL

New Pathé Dealers—Demand for Victor Records—Layton Bros. Opening—Big Winter Trade Expected During the Holidays

MONTREAL, CANADA, October 4.—These are fair times throughout Canada, and wherever the fall fairs have been held, or are being held, the various talking machine companies, including the Victor, Columbia, Edison, Sonora, Pathé, etc., are well represented with complete exhibits, with results reflecting the prosperity of the country.

There have been a number of new dealers added to the Pathé list recently, among them being the Ontario Furniture Co., 357 Bleury street; G. A. Holland & Son Co., 519 St. Catherine street, this city, and S. A. Luke, of Ottawa, Ont.

C. A. Lindsay, Ltd., recently donated a Victrola to the British Sailors' Relief Fund, during the fair held in Dominion Park recently for the benefit of that corps.

L. C. McChesney, advertising manager of Thos .A. Edison, Inc., Orange, N. J., is expected in Montreal shortly.

There is quite a demand for Victor records at the present time, among the selections being the Harry Lauder numbers and Hawaiian selections. "You're a Dangerous Girl" and "If I Knock the L Out of Kelly" are favorites in the popular list.

Layton Bros. expect to hold a formal opening of the new de luxe phonograph parlors during "Edison Week" celebration, October 16-21.

Henry Hamlet, manager of the Layton Bros. department, recently visited the Edison factory in Orange, and the Edison Shop in New York, and came back much impressed with his observation in both places. During the winter Layton Bros. plan to give an ambitious series of Edison and Columbia recitals.

Talking machine houses generally in this section are laying plans to handle a fall trade of unusual proportions, and there is already some talk of both machine and record shortage.

The William Hengerer Co. recently celebrated its eightieth anniversary. Extra crowds were attracted to the store and Herbert A. Brennan, manager of the Victrola department, reported extra business as a result of the event.

NEWS BRIEFLETS FROM BUFFALO

W. R. Gardner, manager of the Victrola department of J. N. Adam & Co., recently conducted a "Victrola week" with excellent results. Twice a year he holds such a celebration, which is marked by extra advertising, window displays and special selling campaigns on the Victrola. He has received a heavy fall stock.

E. W. Staley, formerly assistant manager of Hengerer's Victrola department, is now manager of a similar department for C. Kurtzmann & Co. A show window, twenty feet long and ten feet deep, at that company's store is used exclusively for Victrola displays, which have brought a good share of extra business.

Kuhn Bros. recently had a formal opening of their new music store at 503 Elmwood avenue. They carry a full line of Columbia Grafonolas and records.

Houch & Emens have opened a store at 1478 Genesee street, where they carry the Victor line. Mr. Emens was formerly in charge of the Columbia store in Buffalo and Rochester.

MECHANICAL DEVELOPMENT CO., 106 and 108 Reade St., New York

Manufacturer and Patentee of Novelties

Have you been disappointed in the phonographs you have investigated? Most phonographs you hear—like most people you meet—are mediocre, in so far as they fail to impress one. For a brief time you are conscious of listening to the reproduction of sound more or less natural.

Then you hear a *real* phonograph—the compelling kind—that forces you, by its charming naturalness of tone and beautiful appearance, to sit up and take notice.

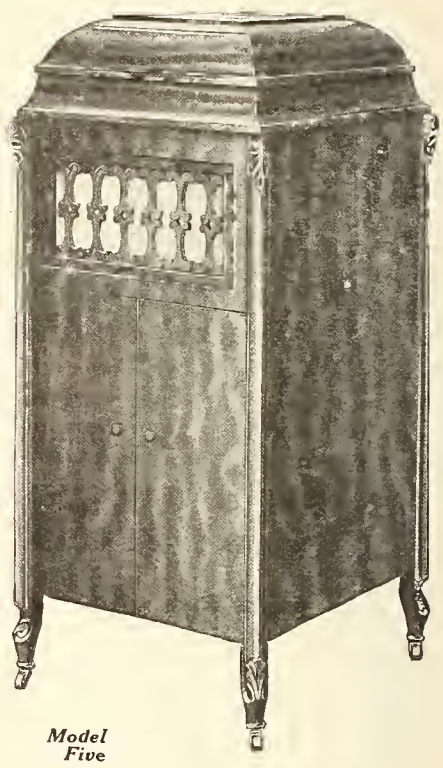
A phonograph that has

PERSONALITY

a something apart from the commonplace. You listen, you are curious, interested, then enthused. Such a phonograph is the

STRADIVARA

"KNOWN FOR TONE"



Model Five

You realize that to build up a permanently profitable phonograph business you must secure the agency for a *really artistic* instrument; one that is produced by tone scientists as well as master cabinet builders; one that sells quickly, stays sold, and helps sell others. THE STRADIVARA is *different* in a dozen different ways. The secret of its charmingly different and superior *TONE* lies in the fact that it is the only phonograph that contains a sound-board like those world-old instruments the piano and violin. Furthermore, the Stradivara is built in a factory that for years has been devoted to the production of high-grade pianofortes.

You cannot afford to decide on any phonograph agency without first investigating

THE STRADIVARA

One of the Five Really Great Phonographs.

Your territory may be open.

NEW YORK ALBUM & CARD CO., 23 Lispenard St., New York

AEOLIAN-VOCALION PUBLICITY

Aeolian Co. Carrying Some Striking Advertisements in the Newspapers Bearing Upon the Various Features of Aeolian-Vocalion

The Aeolian Co., New York, manufacturer of the popular Aeolian-Vocalion line of phonographs, has been featuring in its newspaper publicity a personal and distinctive type of advertising, which it has used with pronounced success in behalf of the Pianola, its player-piano, which is famous the world over.

One of these recent advertisements, couched in the intimate terms of a personal interview, and appearing in New York papers, read in part as follows:

"Some talk I had heard of the Aeolian Vocalion interested me. And one day I stopped at Aeolian Hall to see what the new instrument was like.

"I tell you I was sold from the start. First of all the Vocalion is the only phonograph I have ever seen that is a fine example of cabinet making. In case wood and finish it is like a handsome piano.

"Then tone. . . . .

"I am not musical or literary enough to be able to describe the Vocalion tone. It is simply the tones of voices and instruments—unchanged. And it is full of personality—the very first record on the Vocalion brought me up tensely, listening to every phrase.

"I was lost in the music—I thrilled to it as if an artist were actually playing to me.

"No phonograph ever impressed me that way before. The tone was natural and vibrant with the personality of the artist! That was it!

"Then I tried the Graduola.

"All my life I have been musically dumb and here in a second the musical gifts of the world were mine.

"I was filled with the glow of achievement.

"Cautiously I pressed the simple little device together—the tone swelled to the full Vocalion volume. I drew it apart—the music faded to the daintiest pianissimo.

"I put into the Vocalion a fine tenor record of 'Somewhere a Voice Is Calling,' and played it!

"That big, wonderful voice was my own! I simply controlled it by the pressure of my fingers upon the Graduola instead of by the stretching of the vocal cords in my throat.

"I spread the tone color in rude, rich daubs. Perhaps the result was execrable. But I can't believe music which sounded so good to me would not appeal to others.

"That song came from the Vocalion with my heart and soul behind it and in it. Good or bad it was my own—and the most interesting music in the world to me.

"The Vocalion has shown me that music holds a pleasure for me that I have never known before.

TO HOLD FORMAL OPENING

DECATUR, ILL., October 10.—The Emerson Piano House, of this city, will hold the formal opening of their handsome new quarters at 143-145 North Main street, this city, on Saturday of this week, October 14. The company features the Victrola very strongly, and the Imperial Quartet of Chicago, Victor artists, will have a prominent place on the musical program.

SEES PROSPERITY EVERYWHERE

H. N. McMenimen, Managing Director of Pathé Frères Phonograph Co., Returns from Trip and Enthuses Over Industrial Conditions

"Business conditions in the Middle West are remarkable," said H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., New York, who returned recently from a visit to the company's distributors in the Central West. "As a matter of fact I have never found the industrial situation so satisfactory and encouraging during all my years of traveling.

"Aside from the activity in the talking machine industry I was glad to find that the bankers, manufacturers and farmers are unanimous in predicting that this country is entering upon an unprecedented era of prosperity, which should continue for at least the next five years. They do not feel that the result of the coming presidential election will have any effect on the business situation.

"One banker in a large city told me that his bank's assets and resources had increased more than $11,000,000 in one year. This bank is a savings institution, which caters to the employes of manufacturing houses in that city.

"Our own business is going ahead by leaps and bounds, and we are increasing our factory capacity to cope with this demand. We are installing machinery in our new record plant in Brooklyn, and expect to have this factory in complete working order in the near future."

Think of the Millions Who Want the Most for Their Dollars

A phonograph is somewhat like an automobile. The initial cost is only the beginning. How many thousands on thousands would buy phonographs if they could afford the *up-keep?*

Everyone knows that the biggest thrill of the phonograph is the "new record."

Do you realize that most of the families in your town can *afford* Domino records that give six new selections for a one dollar bill? That most of these families are not now your customers? That here is a huge profitable field that you can cultivate with a little effort?

Learn to Sell Domino Records

The Domino has the double appeal of *quality* and *popular price*. The quality comes first and the price is set as low as that quality can be sold for. It is a seven-inch, double-disc, vertical cut record playing on all machines equipped with a universal tone arm and on other machines with the use of a simple adaptor. It plays as long as the average ten-inch record of other makes, namely, from two and one-half to three minutes. It is convenient to handle, easy to ship and deliver, very durable. It opens a wealth of new business possibilities.

Special Introductory Offer

For $10.00 we will send to *new customers only*, express prepaid, a varied selection of 48 of our best selling records, hangers, price cards, twenty-five catalogs and six Domino display easels.

Secure your Domino agency now and be ready for the big holiday business

THE W. R. ANDERSON COMPANY

220 Fifth Avenue NEW YORK

HARMONOLA T. M. CO. ORGANIZED

In Philadelphia for the Purpose of Manufacturing the "Harmonola" Talking Machines

The Harmonola Co., Philadelphia, Pa., has formally introduced to the talking machine trade a new machine known as the "Harmonola," which is manufactured by the Harmonola Talking Machine Co., as a separate corporation. The manufacturing company is controlled by F. L. Tompkins, a well-known manufacturer and jobber of rubber goods, and his son, Ernest E. Tompkins, who is the inventor of the Harmonola sound box, motor and other distinctive features of the Harmonola. The manufacturing plant occupies a five-story building containing 30,000 square feet at 328 North Randolph street.

The Harmonola Co., the selling organization, is organized with Philadelphia and Chicago capital, having authorized capital stock of $1,000,000. The general offices and salesrooms are at 1611 Chestnut street, Philadelphia, with general Western offices at 206 South Wabash avenue, Chicago, Ill. John D. Morris, a well-known publisher, is president and general manager of the Harmonola Co. The other officers are C. C. Niss, vice-president; E. W. de Bower, secretary, and A. M. Scott, treasurer.

AGAIN IN ACTIVE HARNESS

The many friends in the trade of A. Heineman, of the Otto Heineman Phonograph Supply Co., New York, will be glad to learn that this popular talking-machine man is again back at his desk after an absence of several months. Mr. Heineman is in good health and spirits, and expects to again take active hold of the departments under his supervision.

According to newspaper announcements Mme. Olga Petrova, the famous moving picture star, has signed a contract to make a series of records for the Columbia Graphophone Co. It is understood that Mme. Petrova will sing and read a number of poems of her own.

ATTRACTIVE HALLOWE'EN WINDOW

BOSTON, MASS., October 10.—An attractive Hallowe'en window is what greets the eye of those passing the warerooms of the C. C. Harvey Co., in Boylston street, where Manager White, of the Victor and Edison departments, has worked out quite a clever scheme. The general decorations are black and yellow with an effective cob-web background. Hanging from the ceiling are as many red rosy apples as there are letters in the words Edisons and Victrolas, and on each is a tag bearing a stated price. Over each apple is a large letter, the whole spelling out these two words. There are pumpkins and other suggestive devices in the window and several handsome machines of both makes tell the rest of the story, the whole making a most effective and timely display.

A SEASONABLE WINDOW DISPLAY

BELLEFONTAINE, O., October 7.—Leonard, Eichholtz & Co., of this city, have been using a series of very attractive window displays to feature the Columbia line. These displays have been timely and artistic, representing distinctive ideas, which have served to attract the attention of passers-by.

Two recent displays were featured during the week of the Chautauqua and the homecoming week, and both windows form valuable publicity for the Columbia product. Aside from their attractiveness, and the fact that they added to the prestige of the Columbia line these windows produced actual sales. T. W. Detwiler supervised the making of both of these attractive displays.

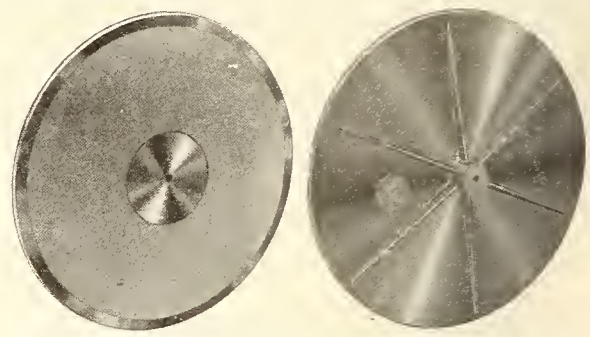
A VISITOR FROM LONDON

Louis Sterling, general manager of the European interests of the Columbia Graphophone Co., arrived in New York Monday for an extended visit to the executive offices to discuss the general situation in connection with Columbia business abroad.

MARKETING NEW TURN TABLE

Davis Vitraloid Turn Table Made of Composition and Has Interesting Features

One of the most interesting developments in the line of turn tables is the new Davis Vitraloid turn table marketed by the Victor Electrical Equipment Co., Boston, Mass. The turn table is made of a composition that is handsome in appearance as well as durable, and will not rust or tarnish. As will be seen in the accompanying illustration the under side is brased to prevent warping, and to maintain an absolutely level surface. Instead of the usual



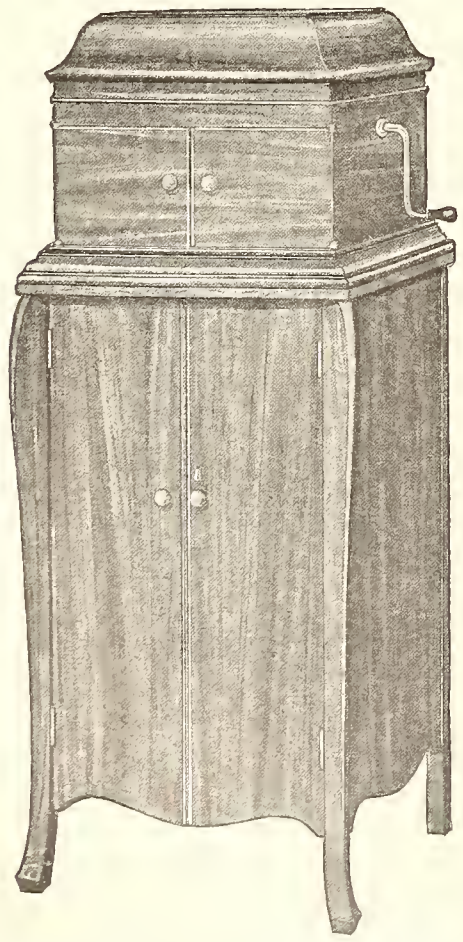
Davis Vitraloid Turn Table, Top and Underside

felt covering the entire surface, the Vitraloid turn table is supplied with plush set into the turn table itself. It is being featured as a desirable adjunct for the more elaborate styles of machines; for the turn table may be supplied in black, mahogany or other finish, with plush to match to harmonize with the cabinet.

Miss Angela Hackett has purchased the talking machine and sheet music business of Cluett & Sons on Park avenue, Glenns Falls, N. Y., and will continue to handle the Aeolian-Vocalion and Columbia Grafonola line in addition to sheet music.

A dividend of 1¾ per cent., the regular quarterly dividend, has been declared upon the regular common stock of the American Graphophone Co.

HERZOG SUPERIORITY



No. 70 Victrola IX Record Cabinet
The novel top arrangement proclaims this new cabinet a great seller. Ask for quotations.

Can there be any question of the superior design, construction, workmanship and finish of HERZOG talking cabinet when fully seventy-five per cent of the trade handle only HERZOG cabinets? These four cabinet essentials are unquestionably best exemplified in HERZOG record cabinets—Quality cabinets thru and thru for all makes of talking machines.

Our new De Luxe catalog—the finest record cabinet catalog published—is just off the press and your copy is now awaiting your request. Ask for it to-day—NOW—you can't afford to be without it. HERZOG ART FURNITURE CO.
SAGINAW, W. S. MICHIGAN

COLUMBIA MANAGERS HOLD MEETING

Pacific Coast Contingent Assemble in San Francisco to Hold Business Conference

SAN FRANCISCO, CAL., October 6.—There was a rally of the Columbia clan here last month, when the chiefs from the South and North assembled in San Francisco for their semi-annual conference. George H. Williams, manager of the Columbia stronghold at Spokane; Charles V. H. Jones, of the Seattle highlands; L. D. Heater, from the Portland heath, and William F. Stidham, from the Los Angeles lowlands, met together with Big Chief Denison and W. E. Henry, the San Francisco manager. Mr. Dawson, of the executive office of the company in New York, also stopped in San Francisco in the course of his general trip over the Coast territory. The visitors arrived in San Francisco Sunday evening, September 17, and remained until Thursday. While here they held a continuous session, making reports from their respective territories, suggesting new plans and methods for the improvement of business generally, the regulation business meetings being relieved by lunches, dinners, automobile rides, etc. Much enthusiasm was in evidence, and Mr. Denison is confident of good reports from all the branches under his supervision during the remainder of the year.

Seated: Wm. F. Stidham, F. A. Denison and W. E. Henry. Standing: C. V. H. Jones, Geo. H. Williams, F. F. Dawson and L. D. Heater.

FIGURES ON COLUMBIA EXPANSION

Double Floor Space in Less Than Six Months —Manufacturing Facilities Increased

The wonderful expansion which the Columbia Graphophone Co.'s manufacturing facilities have undergone the past year is conclusively indicated in the figures recently compiled by John Cromelin, general manager of the company. According to these figures the Columbia Co. will be using more than twice as much floor space on November 1 as it used the early part of this year. New buildings have been erected and are now in process of construction, which have enabled the Columbia Co. to increase its machine and record output tremendously. Only a few months ago a modern factory building was purchased in its entirety, but notwithstanding all these factory additions, the company has been obliged to work day and night to keep pace with its orders.

SEES PROSPERITY EVERYWHERE

Paul L. Baerwald, Eastern sales manager of the Otto Heineman Phonograph Supply Co., New York, returned Monday from a visit to the company's trade in this territory. "Simply wonderful" is the way he expresses his opinion of conditions, which speaks volumes for the prosperity of the talking-machine industry and the Heineman institution.

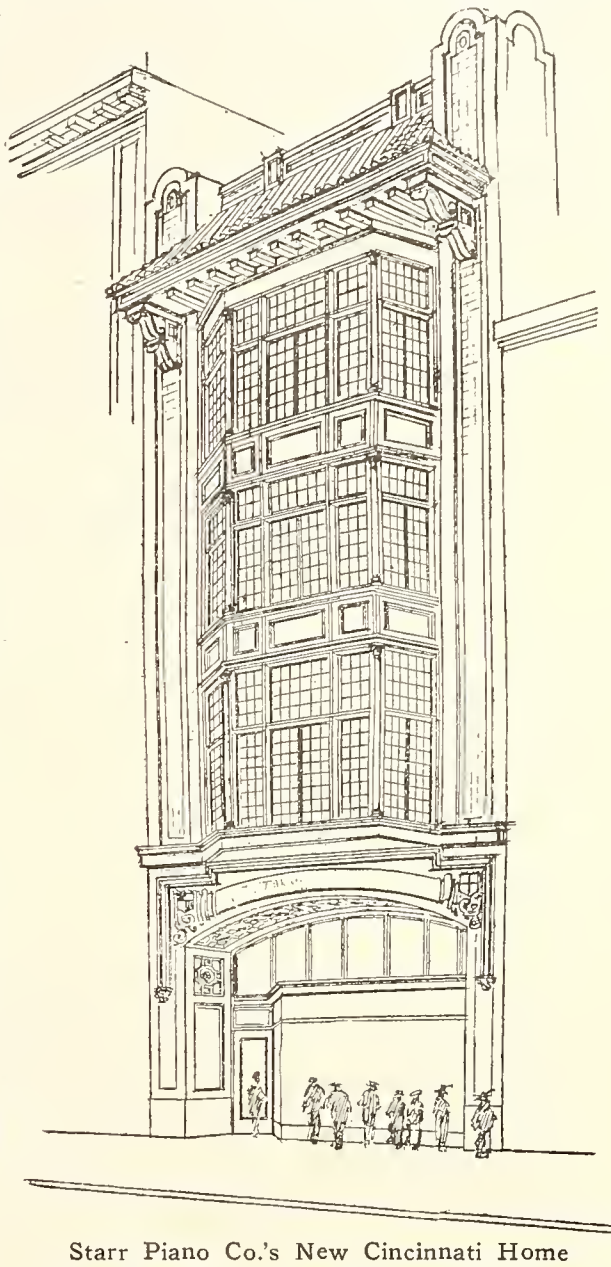
NEW DEPARTMENT IN OSWEGO, N. Y.

R. S. Cunningham, piano dealer of 102 E. First street, Oswego, N. Y., is now handling the Pathé and Sonora lines of phonographs in that city. Geo. Styz, a talking machine man of wide experience, is in charge of the department.

NEW STARR HOME ALMOST FINISHED

New Quarters at 27 Fourth Avenue West, in Cincinnati, Attractively Arranged

CINCINNATI, O., October 7.—Work is rapidly going ahead on the quarters of the Starr Piano Co. in this city. The new building was begun some time ago to meet the company's increased business in that territory and when finished will be thoroughly up to date and modern in every respect. It has a frontage of twenty-six feet, a depth of 150 feet and is four stories in height.



Starr Piano Co.'s New Cincinnati Home

The first floor is being arranged as a phonograph demonstration room and recital hall and the second, third and fourth floors will be used as the display and salesrooms for the pianos and player-pianos. The office is on a mezzanine floor between the first and second stories. Workmen began to pour the roof slab October 8 and are expected to finish by January 1.

The new quarters will be beautifully decorated and handsomely finished. The full Starr line of pianos and phonographs will be shown.

DEALERS!

Patent "Collapsible" Construction Cuts Shipping and Storage Costs Amazingly

THE extraordinary success of the Cabinet Grand from a manufacturing and selling standpoint is due to the unique collapsible or folding construction, which is covered by basic patents. This patent protection means that the Cabinet Grand will absolutely dominate in the low price field. It has no competition. Every low price phonograph sale *increases* the market for the Cabinet Grand. These cabinets are shipped knocked-down; taking a second class furniture rate and are packed three in a case. Set up in 60 seconds. Total weight of three cabinets and case less than 120 pounds. Consider the saving in freight bills and the great economy in floor space as 5 cabinets can be stored in collapsible form in the space of one cabinet of any other make, of equal size.

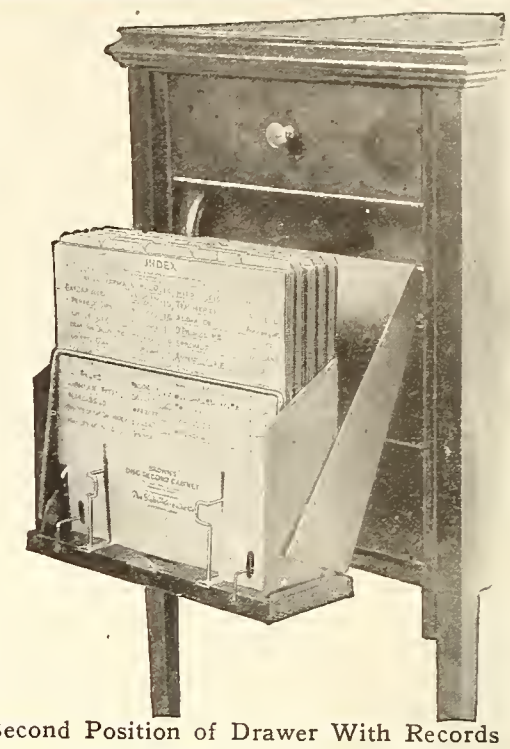
NEW CABINETS WELL RECEIVED

Brown Disc Record Cabinet, Made by Globe-Wernicke Co., Pleases Victor Dealers

CINCINNATI, O., October 6.—The Globe-Wernicke Co., of this city, well-known manufacturer of sectional bookcases, filing cabinets, etc., which recently placed on the market the Brown disc record cabinet, reports a most gratifying demand for these cabinets. The company states that it is only necessary for one of its salesmen to demonstrate a cabinet to make a sale, as the distinctive features of the Brown cabinet are immediately apparent.

The company reports that it has received letters from many Victor dealers throughout the country stating that the Brown disc record cabinet is increasing record business, as these cabinets make it a pleasure for Victor record owners to file and find their records. Some of these dealers have stated that their patrons had formerly complained regarding their inability to file their records adequately and properly but that the Brown disc record cabinet seemed to eliminate all these annoyances. As a matter of fact the dealers' records show that these cabinets have produced increased record sales.

The Brown disc record cabinet is designed to accommodate Victrolas only, and the records are filed in a vertical position and lie flat,



Second Position of Drawer With Records Vertical Under Pressure of Spring

thereby removing any possible chance of warping. The filing system consists of a Globe-Wernicke filing index in a flat drawer which can be dropped to a vertical position.

TRADE CHART FOR VICTOR DEALERS

In The Voice of the Victor for September, there is included a business chart for the use of both jobbers and dealers, and which will enable them to compare the gross business done each month for a period of two years or more. The chart is conveniently designed, and its use should give the talking machine man some direct information that will probably surprise him.

ISSUE AN ATTRACTIVE FOLDER

The National Talking Machine Co., 118 East Twenty-eighth street, New York, has just issued an attractive folder featuring the "National Bluebird" machines, which this company manufactures. Illustrations of the various machines in this line are presented, together with a brief description of the distinctive qualities of the "National Bluebird" product.

CATALOG FEATURES MODELS

The Delpheon Co., Bay City, Mich., manufacturer of Delpheon phonographs, has just issued an artistic catalog featuring the various models in its line. This catalog presents full page illustrations of each model, and the text calls attention to some of the distinctive features of the Delpheon product, such as its tone-control device, automatic stop, automatic cover support, and perfected filing cabinet.

SHOWS RECORD MAKING PROCESSES

Interesting and Unusual Window Display Made by Manager A. T. Boland, of the Grafonola Shop, Chicago—Much Attention to Details

CHICAGO, ILL., October 7.—The manufacture of talking machine records has always been very much of a mystery to the general public and there is perhaps no one who has ever listened to a talking machine who has not wondered just how sound reproduction is attained.

Realizing this, A. T. Boland, manager of the Grafonola Shop on Michigan avenue decided he could make an excellent window display on that subject. He, therefore, arranged to receive some "properties" from Bridgeport and with the addition of a few posters and illustrations succeeded in making one of the most successful and attractive displays that the shop has shown since its establishment.

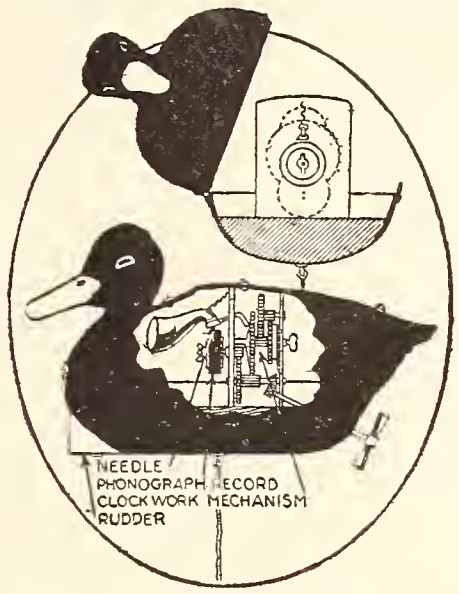
The illustrations and matrices were all numbered and labeled so that it was easy to follow the course of manufacture. Number one was a large photograph of the Columbia recording room, showing how the artists and musicians go through the work of recording. Display No. 2 showed the blank record, while display No. 3 showed the record after the recording had been taken upon its surface. No. 4 showed the record after the graphite had been applied. No. 5 showed the matrix after the copper had been electroed upon it and No. 6, the shell that is taken from No. 5. The next picture showed the shell after it had been backed and made into a plate. No. 8 showed a record as taken from the press and ready for the finishing, while No. 9 showed the finished record as it is ready for the home.

Large posters of Emmy Destinn and Alice Nielsen were used with good effect, flanking on either side a colored poster of Mary Garden as she will appear as Tosca during the coming season of the Chicago Grand Opera Association. Several other small illustrations showed a number of the Columbia artists at work in the recording room. Among them were Morgan Kingston, Maggie Teyte, Oscar Seagle, Al. Jolson, Florence Macbeth and Weber and Fields.

DECOY DUCKS THAT REALLY QUACK

Oklahoma Nimrod Gives Voice to His Mechanical Ducks by Phonographic Means, Resulting in Grave Casualties to the Live Birds

When Amos C. Vaughan, of Anadarko, Okla., goes duck shooting he takes with him a set of



his mechanical decoys and places them in the water in front of his blind, says the Popular Science Monthly. Before doing so, however, he winds them up. When a flock of wild ducks appears his decoys begin to swim about and quack as if they were alive. The result is that the inventor goes home with a full bag, for no wild duck can resist the mechanical wiles of his decoy.

His duck is provided with a phonographic means for automatically giving at predetermined intervals a call or cry. It swims about in the water with the aid of the propeller and an adjustable rudder, either in circles or in any direction the hunter wishes.

The decoy is composed of two parts, bottom and top, which can be opened for cleaning and repairing. A clock-work mechanism drives the propeller and also the sound-record of the phonograph. As the mechanism is set in action the stylus, or needle, as well as the propeller, is operated. A cylinder or disc is used for the record. A controlling cam renders the needle inoperative at certain intervals, so that the calls or cries are sounded intermittently. Who makes the phonographic record of the quack that leads a duck to its doom? We are baffled.

ENTHUSIASM PRESERVES YOUTH

Hermann Ernst Gives Secret Which He Has Used for Twenty-eight Years

Hermann Ernst, head of Krakauer Bros. talking machine department, says he has discovered the secret of eternal youth. Here he has been with this one concern for twenty-eight years, yet in appearance he is the exact counterpart of a college lad of twenty-one. Hermann attributes his adolescent countenance to his enthusiasm for the goods he sells. "Enthusiasm, unbounded enthusiasm, for your product keeps a man young," insists Mr. Ernst. "Show me the man who has lost his enthusiasm and isn't overflowing with the joy of service for his customers and I will show you a man who is growing prematurely old and gray."

The New York Globe has been conducting the past few months a shopping contest, in which it has featured letters from its readers who have made purchases from advertisers in the Globe. One of these recent letters referred to the purchase of several Columbia records from the Gotham Shops, 49 Nassau street, exclusive Columbia dealers. The writer of this letter commented upon the spirit of friendliness and convenience which characterized her dealings with this concern, and also spoke very highly of the Columbia records she purchased.

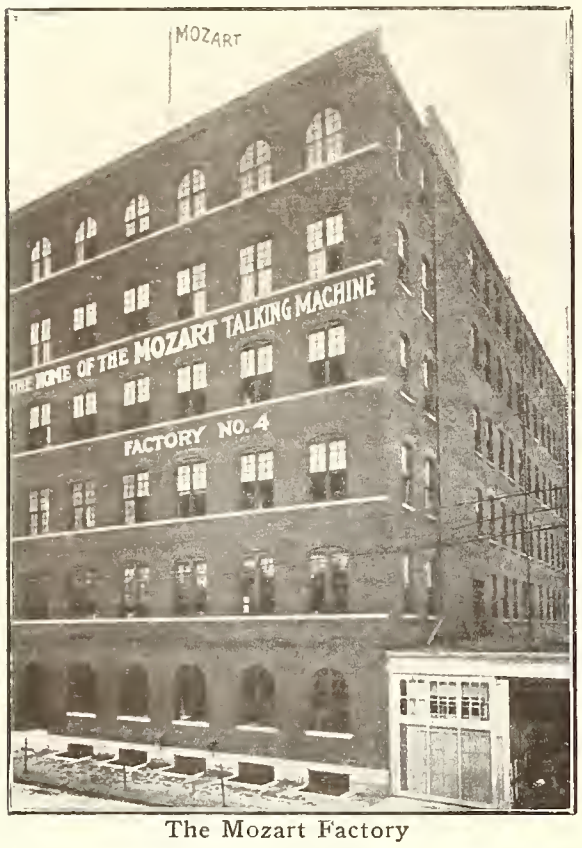
MAKING VERY RAPID PROGRESS

Factories of the Mozart Talking Machine Co., Pushed to Take Care of Demands of Trade

ST. LOUIS, MO., October 7.—The Mozart Talking Machine Co., of this city, has been making very rapid progress the past few months, and their out of town jobbers and dealers who have visited the company's general offices at factory

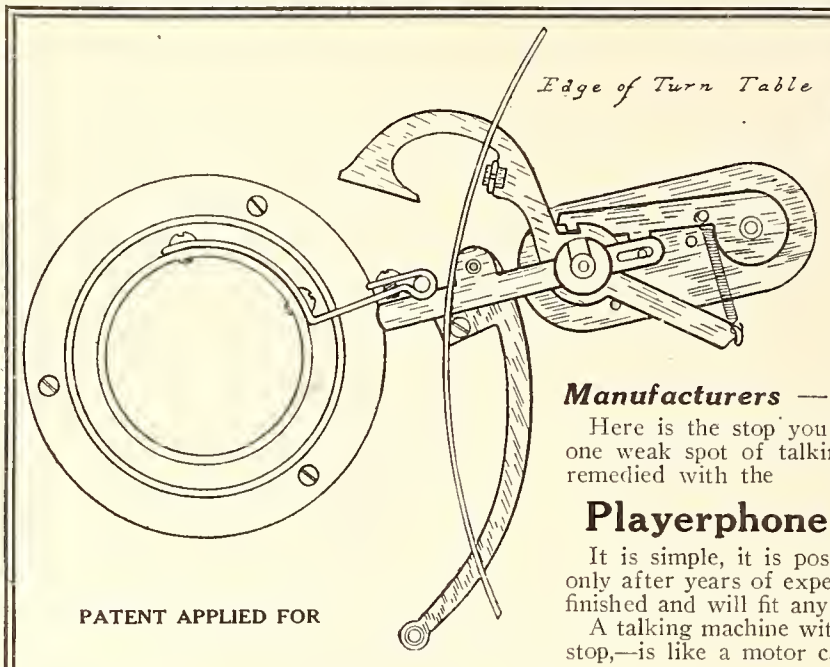


The Mozart Factory

No. 4, 1432 to 1442 North Twentieth street, have been pleased to find that this seven-story factory, covering over one city block, is working to capacity. This same condition also holds good with the other Mozart factories.

The company's plants are equipped and designed to promote manufacturing efficiency to a high point.

In a recent chat with The World, J. P. Fitzgerald, president of the company, said: "During the past few months we have closed a number of large contracts, and our business has increased so rapidly that we have been forced to work day and night to take care of our orders promptly. We had been manufacturing cabinets for other talking machine manufacturers, but was obliged to give this up so that we could concentrate our activities on the production of Mozart machines."



PATENT APPLIED FOR

AT LAST!

A Real Automatic Stop

Manufacturers — Jobbers — Retailers

Here is the stop you have long looked for. The one weak spot of talking machines has at last been remedied with the

Playerphone Automatic Stop

It is simple, it is positive. It has been developed only after years of experimentation. It is beautifully finished and will fit any of the higher class machines.

A talking machine without a stop—a real, automatic stop,—is like a motor car without a brake.

I want to show you that the Playerphone Automatic Stop is the best one invented—the only one which is entirely satisfactory in every way.

In use now on the Playerphone and other high grade talking machines.

I want to get in touch with high class manufacturers, jobbers and dealers at once. Write or wire to-day for quantity, prices and send $1.50 for sample.

D. W. McKENZIE

23 So. Wabash Ave. Chicago, Ill.

Address .....

The advertising department of the Columbia Co. has suggested to Columbia dealers that they try and make their store windows distinctive, and with this idea in mind has prepared a number of ideas for store windows which should act as a powerful stimulus to machine and record sales. These consist of window transparencies in various colors.

The Mulvihill Furniture Co., of St. Louis, have taken on the Columbia line.

ANNOUNCEMENT

We beg to announce to those interested in the purchase of

Talking Machine and Record Cabinets

that we are installing on the premises 82-98 Willow Avenue, New York, a plant fully equipped with the most modern machinery for the making of talking machine and record cabinets. This plant will cover a floor space of 17,000 square feet devoted exclusively to this industry. Our business will be conducted according to the general practices of the trade plus such innovations as we believe will meet the approval of our patrons. In view of the fact that the demand for cabinets is exceedingly great at the present time and all manufacturers are overcrowded with contracts we are confident that more satisfactory arrangements as to delivery and price can be obtained from our plant.

Get in touch with us now. Don't wait until we are taxed to capacity.

MELROSE FURNITURE & CABINET MFG. CORPORATION

THE HARMONOLA

Harmonola No. 28—$115.00

Mabogany Cabinet with compartments for 200 records. Size, 48 inches bigb; 23 inches wide; 25 incbes deep. Tompkins improved reproducer. Tompkins exclusive tone arm. New combination horn, sound cbamber and amplifier. Speed regulator. Double spring, spiral drive motor (plays eigbt records and can be wound wbile playing). All metal parts nickel plated.

Close Comparison Invited

In the procession of new phonographs with their clang of extravagant advertising, how can the dealer form an intelligent judgment of merit except by close comparison.

The mystery and monopoly that once attended the making of Talking Machines no longer obtains. Out of the confusion caused by all manner of new, and mostly amateurish, claimants must stand eventually the time-honored principles, (a) *Understanding;* (b) *Skill;* (c) *Quality.*

Cautious Development

The HARMONOLA is not an assembled machine. For three years it has been slowly and patiently evolving in its own Philadelphia factory under the painstaking genius of an expert Phonograph Engineer, assisted by men experienced in the building of Talking Machines. Its builders do not claim any radical discoveries in acoustics or physics, but rather the perfected application of well-tried principles. No feature of the Harmonola is absolutely original, but every important feature is distinctive and superior.

The Tompkins reproducer used in the Harmonola is a marvel of mechanical triumph. It has a Japanese fiber disc to which a Tungsten steel stylus arm is cleverly adjusted with polished conical bearings equal in their non-frictional resisting features to the jewel bearings of the finest timepiece. The sensitive diaphragm picks up every particle of tone and gives a natural reproduction, free from harshness or metallic rasping. The volume, purity and quality of tone, as well as the overtones and color tones, are unequaled by any other reproducer.

Harmonola No. 21—$85.00

Mahogany Cabinet with compartments for 200 records. Size, 44 inches high; 20½ inches wide; 22 inches deep. Tompkins improved reproducer, Tompkins exclusive tone arm. New combination horn, sound chamber and amplifier. Speed regulator. Double spring, spiral drive motor (plays five records and can be wound wbile playing). All metal parts nickel plated.

This announcement had been held in leash until after the instrument could be tested in the homes of several hundred purchasers. Now we are able to assert with confidence that the Harmonola, in our opinion, is *unequaled in tone value and unexcelled in other points.* But some Talking Machine manufacturers have made similar claims that have not been confirmed by investigation.

Here is the Fairest Proof

Any dealer or would-be dealer of good business standing may order a sample line of Harmonolas at our regular and invariable wholesale price, and these first four machines will be forwarded, prepaid, subject to being returned within ten days, at our expense, if it should not prove that the HARMONOLA has the purest and best tone of any phonograph that you have heard and affords the greatest value for the money of any machine that you have seen.

Pertinent Points About THE HARMONOLA

(1) It gives the clearest and most natural reproduction of any Talking Machine that we have heard.

(2) There is complete absence of metallic noise.

(3) It plays any make of record perfectly without change of equipment.

(4) It uses any standard needle.

(5) It has an exceptionally good and strong motor.

(6) The cabinet work is of the highest character in design, construction and finish.

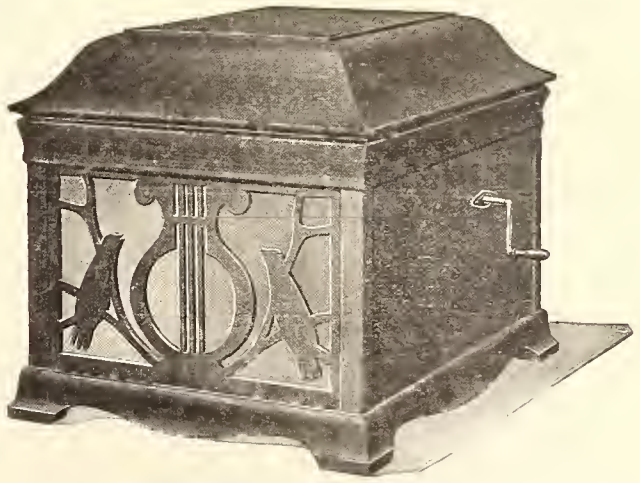
(7) The price is only about two-thirds the price of other high-grade Talking Machines of similar, but not equal standard.

Harmonola No. 7—$27.50

Cabinet is furnisbed regularly in mahogany. Size, 12½ incbes high; 16½ incbes wide; 19 incbes deep. Tompkins improved reproducer. Tompkins exclusive tone arm. New combination born, sound chamber and amplifier. Speed regulator. Double spring, spiral drive motor (plays three records and can be wound while playing). All metal parts nickel plated.

Substitutes the Harmonola

We are endeavoring to accumulate a surplus of Harmonolas for December delivery. Dealers in old line machines who are unable to obtain enough stock for Christmas deliveries can turn to the HARMONOLA with the confidence that it will not only fill the gap, but will give at least as good satisfaction as the best machine that you are handling.



Harmonola No. 14—$45.00

Mahogany Cabinet furnished regularly. Size, 15½ inches bigh; 16½ inches wide; 20½ inches deep. Tompkins improved reproducer. Tompkins exclusive tone arm. New combination horn, sound cbamber and amplifier. Speed regulator. Double spring, spiral drive motor (plays three records and can be wound while playing). All metal parts nickel plated.

TALKING MACHINE EXPORTS

The Figures for July Presented—Exports Show Increase for the Month

WASHINGTON, D. C., October 9.—In the summary of the exports and imports of the commerce of the United States for the month of July, 1916 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures relating to talking machines and supplies are set forth:

Talking machines to the number of 4,934, valued at $13,077, were exported for July, 1916, as compared with 2,346 talking machines, valued at $69,011, sent abroad in the same month of 1915. The total exports of records and supplies for July were valued at $91,594, as compared with $68,780 in July, 1915. For the seven months 31,182 talking machines were exported, valued at $791,101 in 1916, and 15,322, valued at $433,686, in 1915, while records and supplies valued at $604,940 were sent abroad during 1916 as against $406,870 in 1915.

Columbia Records TRADE MARK Note the Notes

Bellini's "I Puritani" is seldom heard today. And it has seldom been heard at *any* time as LAZARO can sing it. "A Te O Cara" from "I Puritani" *(Columbia Record 48783)* is a triumphant test of Lazaro's greatness.

FINDS PATHE JOBBERS HAPPY

C. E. Gore Returns from Trip Among Southern Jobbers With an Excellent Report

C. E. Gore, traveling representative for the Pathé Frères Phonograph Co., New York, returned Monday from a visit to the company's jobbers in the South. He also called upon a number of Pathé dealers in this territory, and was gratified to learn that the Pathé line is becoming more popular with music lovers in the South than he had anticipated.

The Pathé jobbers, who Mr. Gore visited, stated that they had closed a great many dealer contracts during the past few months with well-known and successful houses who had been attracted by the sales possibilities of the Pathé product. All of these dealers were preparing for a big fall trade, and had placed their orders well in advance of their immediate requirements so that they could supply their customers with Pathephones and Pathé discs as they were ordered.

NEW OPERAPHONE RECORD CATALOG

New Volume Contains List of All Operaphone Records to Date—Well Classified

The Operaphone Manufacturing Corporation, manufacturers of the Operaphone records, have just completed and issued to the trade a complete catalog of Operaphone records to date, which makes a very imposing list. The records are classified under various headings such as standard songs, selections from grand operas, instrumental, popular songs, dance music, etc., and include very desirable selections. The first page of the catalog is given over to a description of the Operaphonc records, and an explanation of how thcy may be placed on the various machines now on the market. There are also some good hints on how to play records generally, that should prevent record damage.

The ncw edition of Operaphone records with paper labels pressed into both sides are making quite a hit with the dcalers. The new labels with their gold lettering on black add to the attractive appearance of thc records, and also make it easier to identify the different sclections.

INCREASES FLOOR SPACE

The Emerson Phonograph Co., 3 West Thirty-fifth street, Ncw York, has materially increased the floor space it is occupying at this address in order to handle its growing business. The company now occupies three entire floors, one of which is devoted exclusively to sales and executive offices and the other two to the recording department with its diffcrent manufacturing divisions. R. D. Wyckoff, treasurer of thc company, states that September sales wcre far ahead of expectations and that the company is working to capacity to fill the orders it is receiving from energetic Emerson dealers throughout thc country.

The Williams Music Co. who handle the Victrola and the Edison phonographs, in addition to a fine line of pianos, has movcd to new quarters on South Main avenue, Sioux Falls, S. D.

BOOKLET OF REAL INFORMATION

Victor Co. Publishes Papers, Prepared by Department Heads for Jobbers' Convention, in One Convenient Volume for Dealers' Use

One of the features of the recent convention of the National Association of Talking Machine Jobbers at Atlantic City was the reading of a number of papcrs prcpared by department heads of the Victor Talking Machine Co., and which gave authoritative information regarding the inside workings of the grcat industry that were not only intercsting but were distinctly valuable to those engaged in the selling of Victor goods. The jobbers were so much impressed with the various papers that they requested that the information should be passed along to every dcaler. The Victor Talking Machine Co. has, therefore, issucd a convcnient sixty-page booklet containing the papers in full, with marginal guides at each paragraph to facilitate the efforts of the dealer in quest of information of certain kinds.

The department heads who prepared the papers included Belford G. Royal, general superintendent; C. G. Child, director of the Victor rccording laboratory; H. H. Murray, superintendent of the engineering department; I. F. Eurton, superintendent of the manufacturing dcpartment; E. T. Kieffcr, superintendent of the cabinet factory; C. S. Wickes, superintendent of the rcord prcssing factory; E. K. Smith, superintendent of the shipping department; Ernest John, assistant manager of the advertising department, and Mrs. Frances E. Clark, director of the educational department, and all treated their subjects cxhaustively.

THE METRO-PHONE

DEVELOPING THE DEMAND FOR RECORDS IN ST. LOUIS

Growth of Trade Laid to Practice of Advertising the New Lists and Keeping Good Stocks—Dealers Remodeling and Enlarging Stores—Convention of Edison Dealers

ST. LOUIS, Mo., October 5.—All dealers in St. Louis are a unit in declaring that the talking machine business in this vicinity is very good, and that the sale of standard machines is going to be limited this fall only by the supply. Already the jobbers are beginning to figure on proportional distribution on late orders.

The jobbers say that while trade is good everywhere, it is especially good in the South. Except in isolated communities where floods or other local reasons have destroyed or limited the crops, the dealers order heavily early in the season, and now are sending in repeat orders for their holiday goods. The machines that they planned for their holiday trade are already sold. The retail trade in the city and vicinity has picked up very strong in the last few weeks, and the record business is exceeding former proportions with all dealers.

Speaking of records: The question often has been raised here recently as to the proportion of record business drawn to the downtown stores by the liberal advertising that is placed when the new lists come out. Several inquiries have been made along this line recently by The World correspondent, and he is told by those who should know that the small dealers outside the shopping district are holding about the same proportion of the trade that they did previous to the energetic advertising campaign. H. M. Reynolds, of the Victor factory, who has been visiting with the local trade for a month, says that the trade with the small dealers depends largely upon the stock of records carried; that if they have the new records month after month they hold their community trade. Also that if the dealers study their community tastes and keep a fair stock of records that are in demand there, their record trade will run in proportion to the machine trade that they are able to command, and in some cases they can work up a record trade that appears to be out of proportion. C. R. Salmon, of the Columbia Co., who handles the local wholesale business for that company, takes the same view. He says that the small dealer who gives proper service in the way of stock and demonstrations has little to fear from the downtown store.

Evidence that the stores away from the shopping district are not suffering, is that two such stores recently have greatly enlarged their business capacity. Mengle & Tubbesing, on West Olive street, are building three additional booths and placing them on the first floor, which has been devoted to pianos. The booths on the second floor will be retained, giving this firm seven booths. It will remain an exclusive Victor store. William J. Bauer, at 2619 Gravois avenue, has disposed of his sewing machine and stationery business, and will devote his two store rooms exclusively to the Victor line and records.

President Koerber, of the Koerber-Brenner Music Co., Victor jobbers, says that the prospects for the fall are exceedingly brilliant, despite the heavy advance orders that have been filled. The South, he says, is placing orders proportionately much in excess over those from Northern dealers as a whole. With the general business conditions so favorable, he does not anticipate any letup.

The Kieselhorst Piano Co. Victor department will be opened October 16. It was expected that it would be going before this time, but unavoidable delays came up. Mr. Kieselhorst has selected Arthur M. Magoon, who comes from Foster & Waldo, Minneapolis, as his Victor

manager. He has had several years experience as a department manager. In providing for the talking machine department, Mr. Kieselhorst has been forced to rent a wareroom apart from his present store, and he will make a number of changes in his piano selling departments in order to give up the first floor and a part of the second to talking machines.

Mark Silverstone, of the Silverstone Music Co., Edison jobber, addressed the Ad Club late last month, and the invitations said that he would give "to the ad men the view that salesmanship took toward advertising, as he was an expert salesman as well as a good ad man." The talk was very well received by the ad men, and brought a number of complimentary comments from the local newspapers.

As soon as he had disposed of this question, Mr. Silverstone plunged into final preparations for his tone test to be given October 21 at the Victoria Theatre, when Marie Rappold will be the artist to compare her voice with the machine. At this writing, the cards on which tickets could be requested were being mailed to the long lists of prospective Edison owners. At the time of the tone test, Mr. Silverstone is planning to hold a Dealers' Convention. His zone includes parts of Illinois, Missouri, Arkansas, Tennessee, Kentucky and Indiana. He expects that one hundred and fifty dealers will be here.

William Maxwell, second vice-president of the Edison Co., will be a guest at the convention, and will speak. Some of the dealers will prepare papers, and all discussions will be for the dealers. The program includes a luncheon at the Majestic Hotel, and a banquet at the Elks' Club. Young Marks Edison Silverstone is to be a guest at the banquet, because he already is well known to the dealers by reputation.

Material changes at the Edison store are some new booths on the second floor to make additional space for the Amberola department.

Aeolian Hall, with the coming of cooler weather, has renewed the advertising on behalf of the Aeolian-Vocalion. The displays are all attractive and very high-class, and according to the sales department are bringing results at once. The Aeolian-Vocalion was the only talking machine demonstrated at the recent Agricultural Fair on the outskirts of the city. It shared an attractive booth with the Duo-Art Pianola and attracted much attention from the large crowds present. The demonstrators are reported to have been rather free with their music, and to always have had a crowd around the booth. Like other standard machines, the limits of the Vocalion trade is reported to be the supply of machines.

Manager I. B. Reid, of the Columbia, expresses great satisfaction with the present state of trade. He is increasing his traveling force, the latest addition being E. G. Neighbor, of Mountain Grove, Mo., who was in business there as the Mitchell-Neighbor Music Co., and is familiar with the merits of the Columbia line as his success as a retailer shows. Mr. Neighbor will travel west of the river, while Ambassador Bennett will remain on the east side of the Mississippi.

Just now the Columbia Co. is receiving congratulations upon prompt and efficient service in filling the numerous orders.

Ben S. Phillipps, retail manager at the Columbia warerooms, says he has a sure indication that business is good for the established lines by the kinds of machines he is taking in as "trade-ins" at prices well within the value established by the Talking Machine Dealers' Association.

"Within a week," said Mr. Phillipps, "I took in six machines of kinds that I never before heard of, although I thought I was pretty well posted on the kinds of machines now being put out. I am free to admit that there are too many brands of machines for me to keep posted on, especially when it comes to values.

"The other day a man came in and wanted a trade for a machine that played all kinds of records that he had paid $15 for. I thought that he was seeing things, but he brought in his machine, and sure enough it played every record that I could produce."

Local dealers who have been caught short previous holiday seasons on large cabinet machines are being coached to examine the cabinet proposition closely with a view of selecting a cabinet that can be sold with one of the small box machines to give a good appearance. The suggestion is that some of the cabinet companies are making cabinets that match very closely the small machines and, in fact, they can be so combined that they will have all the appearance of a large cabinet machine. This tip is being given by the jobbers with the idea that a combination sale will never be as popular as the one-piece large cabinet machine, and yet when the dealer is pushed for stock and his prospect lists keep on growing, he probably can save some of the sales by offering this combination.

C. E. MARUSAK WITH L. E. SMITH

Chas. A. Marusak, formerly connected with the Globe Talking Machine Co., New York, is now connected with L. E. Smith, Victor dealer of 141 Seventh avenue, Brooklyn, N. Y., and is giving special attention to an elaborate series of window displays, at which work he is quite expert. Mr. Smith predicts a big fall trade, and is advertising in several of the local papers, as well as the bulletins of various churches.

Mrs. E. Paster has taken over the Victrola store of Willett R. Wills, in Colorado Springs, Colo. Mrs. Paster is injecting new ideas into the business successfully, and has arranged to give a series of afternoon recitals each week.

The Columbia Shop, Wheeling, W. Va., has been incorporated with the secretary of that State to handle talking machines and records. Capital, $25,000.

CHICAGO TALKING MACHINE COMPANY

WHOLESALE ONLY

12 NO. MICHIGAN AVE. - - - CHICAGO, ILL.

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., October 10.—The outstanding feature of trade conditions, as developed through a careful inquiry of the local trade, is a shortage of machines that is more acute than has ever yet been experienced at this time of the year.

Manufacturers of the Middle West are working their plants to capacity, while the big Eastern factories are not only working night and day, but their representatives have been in the West in search of additional facilities for the manufacture of cabinets. Many makers of machines have absolutely refused to appoint any more new agents, feeling that under the present stringent delivery conditions, it is only justice to the older established of their dealers to provide their requirements first.

One prominent wholesaler, in discussing the situation said that, although there would be a radical increase in the sales during the fall and holiday months, the reason for such a remarkable stringency so early in the year was because of the fact that dealers are placing their orders earlier than ever before, due to the campaign that has been carried on in this direction, and to the fact that last year many of them lost much business by their failure to send in their orders sufficiently early to obtain delivery.

The record situation is in much more favorable shape than machines, one of the largest companies filling 95 per cent. of the orders received. How long this will keep up, however, is questionable, as the supply is decreasing as rapidly as the demand swells. All classes of records seem to be selling well, although some dealers report that with the recrudescence of operatic activities the call for that class of records is increasing.

Report Numerous New Pathé Agencies

The phonograph division of the Hallet & Davis Piano Co., which maintains offices in the Shops Building at 17 North Wabash avenue, has been firmly established there, and for the past thirty days has done a phenomenal business. Numerous new Pathé agencies have been opened, and District Representative Frank J. Bowers has been kept busy traveling through the territory aiding the new dealers in the work of establishing their departments. Mr. Bowers reports the establishment of some very large accounts among the agencies he has appointed, and Office Manager R. O. Ainslie has been kept busy providing the goods for new dealers who are to operate under the Pathé banner. One hustling piano dealer in Wisconsin opened a Pathé department, and hardly had Mr. Bowers returned to Chicago before he received a supplementary order for goods that indicated that the dealer had wasted no time in getting right after his community.

Widney Co. in New Home

The Widney Co., of Chicago, which has specialized for some years in the felt cutting business, has removed from its old quarters at 161 West Harrison street to its fine new building at 318-322 South Jefferson street. The building is thoroughly up-to-date, and is well adapted for the manufacture of all felt cuttings and processes. The Widney Co. has installed considerable new machinery, and is in a position to supply any quantity of felt parts for talking machines.

Spiegel Co. Takes on Columbia

The Spiegel House Furnishing Co. has taken on the Columbia line of talking machines and records, and will retail it through its four Chicago stores, which are located at 127 South Wabash avenue; 4756 South Ashland avenue; 2023 Milwaukee avenue, and 9133 Commercial avenue. D. Folger is in charge of the talking machine department in all the stores. In addition to the Columbia line the firm carries the Brunswick and the Vista phonographs.

Argue for Lower Freight Rates

A representative meeting of talking machine men was held in Chicago during the past month for the purpose of obtaining lower rates and other concessions from the railroads. An appearance was made before the Southern classification committee and a carload rating asked for in Southern territory. Carload rates in this section have hitherto been unattainable. The decision of the committee will not be given for some time. The talking machine men in attendance were: Messrs. Fulghum and Reid, of the Victor Co.; Mr. French, of the Columbia Co.; John Rogers, of the Edison Co.; E. C. Rauth, president of the National Association of the Talking Machine Jobbers, and L. C. Wiswell, who is secretary of the association and chairman of its traffic committee.

The same gentlemen will meet in Chicago again on October 24, for the purpose of going before the Western classification committee and asking for a reduction in the carload minimum from its present requirement of 24,000 pounds to a 16,000 pounds minimum. They will also ask for a third-class rate, including both machines and records.

Talking Machine Shop in New Home

The Talking Machine Shop, which for several years has been located on the fourth floor of the Steger Building, and which has been noted as one of the model exclusive Victor stores in this part of the country, is now established in its new four-story home at 236 South Wabash avenue. The work of remodeling, decorating and painting has been completed, and the selection and installation of furniture is now being carried on. Both of the "Davidson boys," as they are known to the trade, are very busily engaged in the work of arranging the various departments, and making preparations for what they expect to be a tremendous fall and holiday business.

Brunswick Making Complete Shipments

The Brunswick-Balke-Collender Co. are now prepared to fill all orders promptly for the new line of Brunswick phonographs, and for Pathé records, for which they are distributors.

Martin Nystrom, manager of the phonograph manufacturing department, returned from Dubuque to-day, and said that the big plant in that city is shipping nearly a hundred Brunswick phonographs a day, in addition to the fact that the Muskegon plant is also getting shipments under way.

All of the branch houses of the company throughout the country now have samples of the complete line of Brunswick phonographs for the inspection of visiting dealers, and most of them have complete wholesale stocks of Pathé records.

The company is now equipped for prompt shipment to their dealers who are being rapidly established and include many houses of exceptional strength and standing.

The company will soon launch an advertising campaign of national importance. A double page spread announcing the Brunswick in the most convincing way will appear in the Saturday Evening Post of October 26. This will be followed up by liberal space in succeeding issues. The greater part of the liberal advertising appropriation on the Brunswick will, however, be spent in co-operation with the dealers in the use of generous space in the leading

CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 75)

papers in the towns in which the agencies are located. This remarkably intensive campaign is being handled by Lord & Thomas, a fact which speaks much for the artistic and forceful character of the campaign.

E. S. Bristol, formerly connected with the Pathé Pathephone Co., of Illinois, has been put in charge of the wholesale business of the Brunswick phonographs in Chicago and Cook County, and the business of establishing local dealers is rapidly progressing.

Brunswick Phonograph Shop Opens

The Brunswick Phonograph Shop was incorporated the past month, and has taken over the premises formerly occupied by the Sonora Stores Co., at 19 East Jackson boulevard. J. B. Brooks, who was connected with the former organization, is the general manager of the new company, which will handle Brunswick phonographs and Pathé records exclusively. Extensive improvements are being made, and a number of additional demonstration booths are being erected. There is a beautiful reception room on the first floor with two imposing display windows. A private elevator carries the customers to the second floor, which is about seventy-five feet square, and is being handsomely equipped for handling the trade under the most favorable circumstances. E. W. Schwietert, who was formerly with the Sonora Stores, and a man of long experience in the talking machine trade, is Mr. Brooks' chief assistant.

Unique Edison Exploitation

Tally and Mayo, the well-known vaudeville team, whose records have delighted thousands of Edison disc owners, are at the Palace Music Hall this week. At the end of their act a drop curtain rises, showing an Edison disc phonograph, and to the surprise of the audience, the team sings "At the Ball That's All" in unison with their own record. Last night, by concerted arrangement, a number of Edison dealers and salesmen attended, adorned with badges, and helped in the reception given to the unique stunt.

Marie Rappold will probably be heard at Orchestra Hall in a recital and tone test in conjunction with her own Edison disc records the latter part of October or early in November. Negotiations are now pending between the artist and the Phonograph Co., the Edison jobbers, for this zone.

Marie Kaiser will give sixty-three tone tests with dealers throughout the Chicago zone zetween now and the first of the year.

Edison dealers throughout Chicago are making great preparations for Edison week, October 16 to 21. The entries in the window display contest promise to be far more numerous than last year, and the dealers are preparing to co-operate with the company in furnishing Edison discs to prospects who will compete in the liberal prize offers for the best articles on the Edison product.

H. R. Moses, manager of the Edison Amberola department, was in Chicago last week on a general Western trip.

C. E. Goodwin, general manager of the Phonograph Co., returned Friday from Detroit, where he attended a convention of the Edison dealers of that zone.

Improvements of Wurlitzers

F. A. Siemon, assistant manager of the Chicago office of Rudolph Wurlitzer Co., is just completing various improvements to the retail talking machine department on the first floor, which will greatly facilitate the handling of the fall and holiday business. The record and auxiliary sales counter has been extended by a third, and Mr. Siemon now has a new private office from which he gains quick access to both the record booths and the front of the store. Both sales and office forces have been enlarged, and everything is lined up for a record-breaking business; in fact, this is already in sight, as September was an unusual month, both in the wholesale and retail.

The general offices on the third floor have been greatly enlarged, and all the department heads now have commodious private offices. F. E. Noble, assistant to Mr. Siemon, in charge of the wholesale talking machines, is one of those so honored.

Reduction in Fibre Needle Prices

F. D. Hall, president of the B. & H. Fibre Manufacturing Co., announced to-day that a reduction of 20 per cent. on the wholesale price of the firm's fibre needles is to take effect immediately, and that a similar price reduction will be made the retail buyer after the first of January.

In discussing the reduction Mr. Hall said, "I have felt for some time that the prices charged in the past for fibre needles has been too high, with the result that their sales have been restricted, and I feel that the most sensible way to stimulate the demand is to make the price some where within the reach of the mass of talking machine owners. At the present a large proportion of talking machine owners feel that they cannot quite afford to pay the prices asked despite the fact that the fibre needle can be repointed many times.

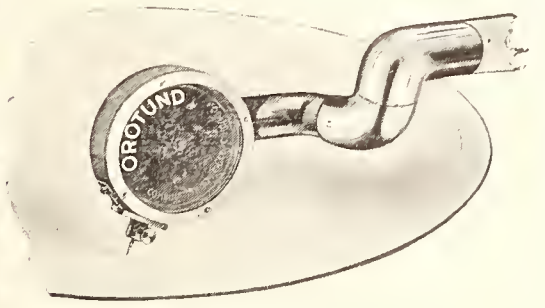
"Another development that should be of interest to the trade generally is the fact that we are bringing out within the very near future three different sizes of fibre needles, so that the trade can have anything in the shape of a fibre needle that it wants."

New Phonograph in Chicago Field

The Kellogg Phonograph & Supply Co., fourth floor, Cable Building, Chicago, have secured the selling rights throughout the Middle West to the talking machine made by the Pooley Furniture Co., of Philadelphia, which is called the U-Fon-Ola. Mr. Jarrett, of the Pooley factories, has been in Chicago for several weeks developing and training the organization, and has gathered together a group of high-grade phonograph men, all of whom are well known throughout this territory.

"The last word" in re-creation of music. Produced by the

"Orotund" Sound-Box



Dealers should handle the "Orotund" outfits to make their machines universal in playing all records.

COMBINATION ATTACHMENT CO.
524 Republic Bldg. CHICAGO, ILL.

Record-Breaking Columbia Business

Charles F. Baer, local manager of the Columbia Graphophone Co., reported that all records have been broken by the wonderful business that has been enjoyed in the last thirty days.

"In both the machine and record departments business has been something tremendous," said Mr. Baer, "and although there have been many applications for agencies we have not been accepting any recently because of the fact that it is all we can do to supply our dealers now. The Columbia Co. is making every effort to fill orders, but as we are being pushed to the limit now I very much fear a severe shortage as the holidays approach. While we have regretted to reject so many fine agency opportunities we feel it is only our duty and justice to our older agents to stick by them and see that they get all the deliveries that we can possibly make."

Mr. Baer left the first of the week for New York, where he will be busily engaged in aiding in the work of facilitating deliveries to Middle Western dealers.

Additional Space for Vocalion

The local office of the Vocalion division of the Aeolian Co., on the sixth floor of the Fine Arts Building, are to be enlarged by the addition of three more rooms, thus doubling the space used for the display of these goods. Additional office room has also been leased for the wholesale department, which in this district, is under the direction of H. B. Levy.

The retail department has enjoyed such a rapid increase in its business that Manager O. C. Searles found it necessary that additional space be rented.

Local Association in Formation

Two meetings have been held by those interested in the proposed Chicago Talking Machine Association since the initial meeting that was held September 12, and plans are in

THE CHICAGO HINGED COVER SUPPORT & BALANCE CO., 144 S. Wabash Ave., CHICAGO

The Brunswick
under Contract with Pathé presents this
Phonograph Sensation

12% Lower Prices

This concern enters the Phonograph field with $15,000,000 assets. With fifty distributing houses already established. And with years of experience in building the cabinets for other famous makers.

We are offering in eight styles of what we believe to be the finest phonographs produced. With handsomer cabinets than we ever built for others. With the latest mechanism from the hands of some of the greatest experts in this line. With a sound chamber—all our own—which, in our opinion, gives us tone supremacy.

We equip these machines with two sound boxes. With a Sapphire-Ball Needle. With a Jewel Point Needle. With facilities for playing any record in existence.

And we quote to the users—type for type—prices which average 12 per cent. below others.

Pathé European Records

We are doing this under contract with the Pathé Freres Phonograph Co. They control the Pathé records for America.

We supply these records.

The object of this alliance is to bring to American homes the facilities for playing these famous records. And all other records as well.

Pathé records, among artists, hold the first place in the world. Hundreds of singers and musicians can be heard on them alone. Hundreds of others are heard at their best there.

But Pathé records must be played with a special sound box. And with a needle tipped with a jewel ball. Not one phonograph in a thousand is equipped to play them. We are going to correct that condition.

The Artistic Limit

We attain in the Brunswick the very summit in quality and art. We have built tens of thousands of the finest cabinets ever sold by others. We are building better for the Brunswick.

The mechanism is of the latest type. Our sound chamber excels. We have numerous exclusive features, on some of which we have patents pending.

Such machines—equipped to play all records—at 12 per cent. below standard prices, will be the sensation of the Phonograph world.

Brunswick No. 70
Price $70

More Dealers Wanted

We are starting an enormous advertising campaign. The facts about the Brunswick will be known immediately, in practically every home in America.

The Brunswick Phonograph and the Pathé records will be advertised together. We want in every locality a dealer to handle both.

And we offer those dealers the greatest opportunity now open in the Phonograph field. Write or telegraph us for our proposition.

process of formation for the adoption at the next meeting of a constitution and by-laws and permanent officers.

Plume Advertising Service

The Edward C. Plume Co., of this city, the head of which was for many years prominently connected with the Western talking machine trade, have devised a new special service for talking machine dealers, which is winning them many high tributes from the trade because of its dignity and result producing efficiency. The Plume Co. were led to produce the present service because of the interest excited by the talking machine advertising matter included in their piano trade service, and because of this were lead to produce an exclusive talking machine service. It covers both newspaper copy and direct folders of a specially high character. The Plume service is distinctive in many ways, and it dwells fundamentally on the educational and entertaining function of the talking machine, and can be used in advertising any make of machine. Its superior pulling power has been amply demonstrated as shown by many letters received from dealers, of which the following from I. A. Eacutt, of the Woodlawn Talking Machine Shop, of Chicago, is a sample:

"I saw your ad in The Talking Machine World, ot New York, and ordered 12,000 of your postal cards showing pictures of our battle ships and submarines with some pointers on the reverse side of same, regarding 'Victor' machines and records. I have only sent out by mail about 1,000 of them. The returns from same in two months has been the means of selling two Victor $100 machines and a large number of records. If the balance of these cards (11,000) bring nearly as good results you certainly have a 'winner.' This letter is absolutely unsolicited by your company."

New Phonoparts Co. Motor

The American Phonoparts Co., of this city, has brought out a new spring motor that should prove of interest to talking machine manufacturers everywhere. It is modeled after the Swiss type, and was built to supply the big demand for an inexpensive motor that is capable of playing a satisfactory number of records.

The "PlayRite" electric motor, which is also made by the Phonoparts Co., is continuing to meet with a big demand, and many repeat orders have been received.

The Phonoparts Co. is also bringing out a new tone arm of the universal type, which has won much commendation.

West Music Co. Celebrates

The third anniversary of the West Music Co., of Joliet, was celebrated in a rousing fashion on the evening of Saturday, October 7. Numerous friends of the firm came long distances to congratulate the house on its successful career in the trade. The Imperial Quartet was present from Chicago. This is the quartet that has made some very fine Victor records.

Note the Columbia Notes

Considerable progress in extending the Columbia representation was attained in the thirty days prior to October 1 by the local Columbia organization. Among the new dealers are: the Devon Music Store, 1620 Devon avenue, Chicago; J. J. Fleckenstein, manager; L. Junysz, 8820 Commercial avenue, Chicago; S. Olkenitzky, 8453 Burley avenue, Chicago; E. S. Pitzer, 4781 Milwaukee avenue, Chicago; The North Shore Music Co., 5004 Kenmore avenue, Chicago; K. M. Schofield, manager; the Van Dusen Pharmacy, Seventy-fifth street and Coles avenue, Chicago; Van Weingarten & Son, 10828 Michigan avenue, Chicago; Frank Lehman, Hersher, Ill.; House of Muscat, Gary, Ind.; Harry Yaseen, Chicago Heights.

M. E. Lyle, of the executive offices of the Columbia Graphophone Co., was in Chicago for a considerable stay in the early part of the month.

Professor Goodwin, in charge of the educational department of the Columbia Graphophone Co., was also a prominent visitor from New York.

A Columbia man in town from the great Northwest was R. R. Souders, who is manager of the Minneapolis Columbia branch. Mr. Souders spent a few days here in conference with District Manager Yerkes.

Pronger Bros., Columbia dealers in Blue Island, have remodeled and much improved their shop, and are preparing in other ways for a vastly increased fall business. Among the improvements are three large additional demonstration booths.

Mr. Behling, in charge of the talking machine department of the Hartman Furniture Co., of Milwaukee, was in town for a few days getting some information and Columbia stocks and planning his fall business.

F. A. Tatner, of the Columbia forces, entertained a few of his friends at a little party held at Channel Lake, Ill. It is said that "a nice time was had by all."

Phonograph Cheers Explorer's Troubles

When John Borden, Chicago's millionaire whale hunter and arctic explorer, lost his ship, the "Great Bear," on Pinnacle Rock, near the barren St. Matthew's Island, one of the first things that his crew loaded into the life boats was a talking machine. They did not know when help would come to take them off that barren mass of granite that rises nine hundred feet above the surface of the sea far up in the frozen North, and they realized the value of the "talker." After establishing the camp the scientists and crew spent their time during the day fishing and hunting, and the evenings in singing groups around the talking machine. They were rescued after two weeks by a U. S. revenue cutter.

Par-O-Ket Record Agency Opened

The Brown Specialty Machinery Co. has opened offices in the North American Building, at 36 South State street, and will act as Western distributor of Par-O-Ket records, made by the Paroquette Manufacturing Co., of New York. L. J. O'Brien, who is in charge, has interested himself in the record manufacturing business for some time past, and has perfected plans for distributing the Par-O-Ket goods in a way that is most advantageous to both dealer and talking machine manufacturer. He announces that he has already made arrangement for supplying some large interests in this section, and is making preparations to have ample stocks on hand.

Flentye With Kimball Co.

Harry E. Flentye, who is well known to the local talking machine trade, has made connections with the W. W. Kimball Co., and in the future will be identified with the work of promoting the new Kimball phonograph, which the Kimball Co. placed upon the market last

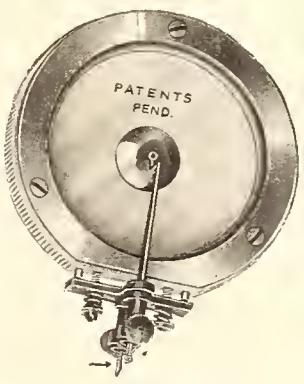
Without Rival

The "3 in 1" Reproducer
(PATS. PDG.)



plays with ordiuary, jointless tone-arm in **unchanged** ueedle position, **any** disc record.

The "3 in 1" Reproducer (concert) is high grade, durable, warranted.

The rendition of souud of either kind of record is distinct, soft and restfully pleasing. With our "3 in 1" Reproducer the ordinary one style talking machine becomes an instrument that plays perfectly each and every record, thus greatly enhancing its salability aud "3 in 1" Reproducer and the changing of one style reproducers.

We quote cash bargains in talking machines, with or without our "3 in 1" Reproducer. Send us your reproducer with $1.50 and we will change it into a "3 in 1" Reproducer.

We supply dealers with a "3 in 1" Reproducer for $2.50.

Sapphire points for Edison or Pathé, 50c each.
Diamond point for Edison, $3.00.
Special discount in lots.
A "3 in 1" Reproducer will convince you.

Send for it now. We are open to propositions.

Terms: Cash with order.

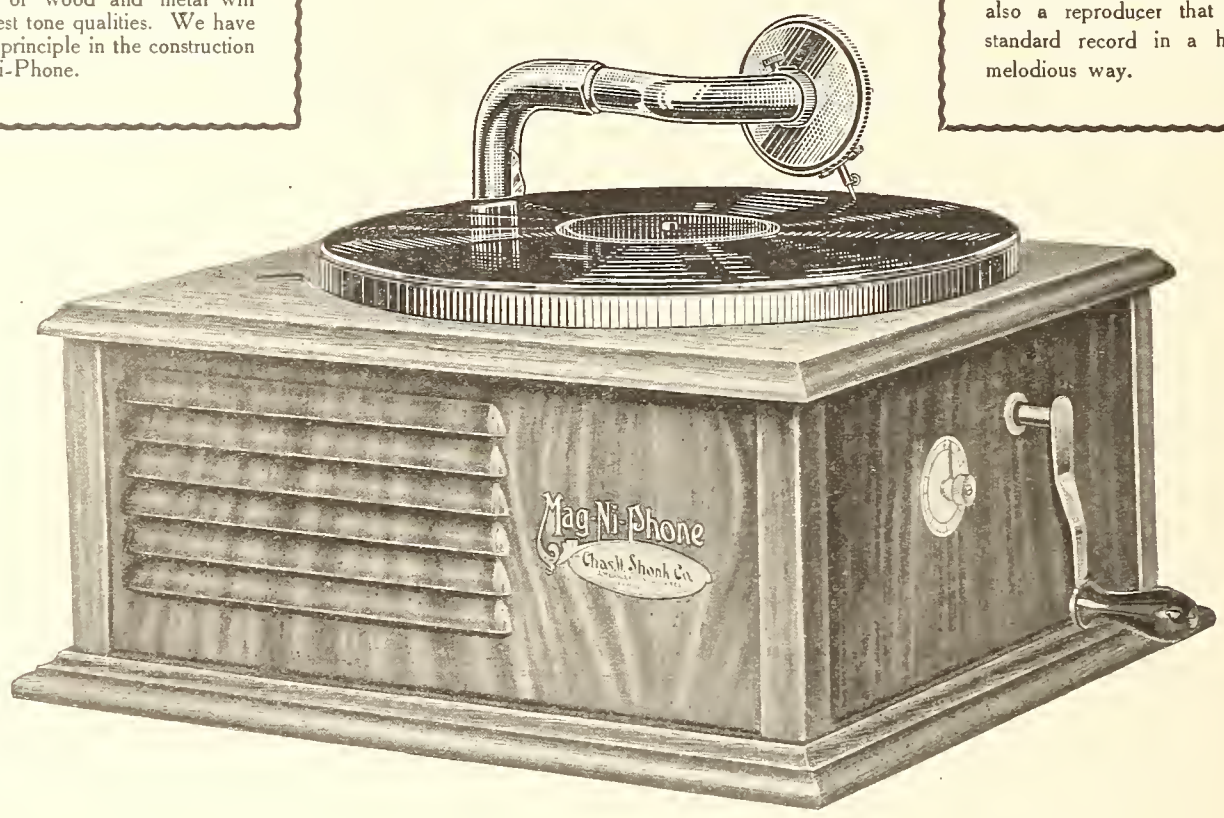
Weigand & Co., 1727 Republic Bldg., Chicago, Ill.

Mag-Ni-Phone

The Talking Machine that

Manufacturers of Pianos and other high-grade musical instruments have found that a combination of wood and metal will produce the best tone qualities. We have embodied this principle in the construction of the Mag-Ni-Phone.

A Big Talking Machine with a silent, dependable motor, free from vibration, also a reproducer that will play any standard record in a harmonious and melodious way.



"Speaks for Itself"

$15.00 Retail

LIBERAL DISCOUNTS TO DEALERS AND JOBBERS

The desire for music in the homes of people of moderate means is just as strong as it is in the homes of the wealthy. Therefore, a talking machine that will reproduce high-class music, at a low price, will meet with a ready sale.

In designing the Mag-Ni-Phone we have felt the importance of constructing it in such a way that it would not only properly play records ranging in price from $1.00 to $7.00 each, but also the cheaper records that sell from 10c to 75c each.

We can now offer you a talking machine that will play any standard record and compare most favorably with talking machines that retail for many times the price of the Mag-Ni-Phone.

The Mag-Ni-Phone is 16 inches long, 14 inches wide and 11 inches high—equipped with a 12-inch turntable—metal parts nickel-plated. Sides and ends mahogany lithographed on metal—top and bottom genuine mahogany.

We have a very interesting proposition to submit to merchants who will handle the Mag-Ni-Phone in an enthusiastic way, and we can also offer an exceptional opportunity to those who are not handling talking machines, and who can sell the Mag-Ni-Phone in connection with a record service which we can get for them.

The SELLING AGENCY for the Mag-Ni-Phone will be a valuable asset for any business and it will be to your interest to write us about it TO-DAY.

CHARLES W. SHONK COMPANY

AMERICAN CAN COMPANY, Owner

707 St. Charles Street — Maywood, Illinois

month. Mr. Flentye will also aid in the work of distributing Pathé machines and records, the distribution of which has also become a part of the Kimball Co.'s activities.

The Tonegraph Corporation Organized

The Tonegraph Corporation, of Chicago, has been organized with a capital stock of $10,000 by Ivan P. Florsheim and others. The company will manufacture and do a general business in talking machines.

Vita-Nola Co. to Open New York Office

Commodious offices are to be opened in New York City by the Vita-Nola Talking Machine Co. in the near future. Plans are now being perfected to make the company's representation in that city entirely adequate to the rapidly growing business that concern has built up in the Eastern States. The need for such offices has been felt for some time past, and the move is not unexpected.

"We are all prepared to do a great big business this fall," claims H. T. Schiff, president of the company, "and are feeling very good over the fact that we did not underestimate the demands that would be placed upon us. We have prepared all our sources of supply so that we can in turn make deliveries to our dealers as rapidly as the goods can be shipped. Our capacity has been enlarged until at the present time we are shipping a carload of goods a day.

"Our number 75 style has made a special 'hit' lately, and we have been getting orders for it in lots as large as five hundred. It is very attractive in design, and is made in mahogany, golden and fumed oak. It is equipped with a universal tone arm, tone modifier, and all of the other features that are to be found on high-priced machines."

The Vita-Nola Co. is now working upon many new case designs that are said to be strikingly original.

Wade Cutter Progress

The demand for the two models of the Wade fibre needle cutter, made by Wade & Wade, 3807 Lake Park avenue, this city, is heavier than ever this fall, and demonstrates anew, not only the popularity of the firm's product, but the steadily enlarging demand for fibre needles. The factory is rushed to the utmost to take care of the business from jobbers in all parts of the country.

Six Best Sellers

The six best sellers in Victor records were: "Pretty Baby," and "When You Drop Off at Cairo, Illinois"; "On Lake Champlain," and "Dear Old Dreamy Honolulu Town"; "If I Knock the 'L' Out of Kelly," and "By the Sad Luana Shore"; "Pagliacci Besti la Giubba," and "Cavalleria Rusticanna"; "Have a Heart," and "Welcome, Honey, to Your Old Plantation Home"; and "Tales of Hoffman" (Barcarolle).

The Columbia six best sellers were "Thais-Meditation," and "Andante from Concerto in E Minor"; "I Didn't Know That Lovin' Was So Good," and "Honky Tonky"; "When the Sun Goes Down in Romany," and "My Own Iona"; "You're a Dog-Gone Dangerous Girl," and "On the Old Dominion Line"; "There's Someone More Lonesome Than You," and "Don't Leave me, Daddy"; and "America, Prepare!" and "Medley of American Patriotic Airs."

The Pathé best sellers included: "That Hula Hula," and "I want to Go Back to Honolulu"; "When the Sun Goes Down in Romany," and "Love Me at Twilight"; "Manon, 'Ah, Fuyez, Douce Image,'" and "Magali, 'Chanson Provencal'"; "Babes in the Wood," and "Walkin' the Dog"; "Pretty Baby," and "We've Been Married Just One Year"; and "Rooster Fox Trot" and "Uncle Tom."

The Edison six best sellers were: "You're a Dangerous Girl," and "Dublin Mary Brown"; "Chasse aux Papillons—Serenade"; and "Lullaby-Jocelyn"; "By the Sad Luana Shore," and "I Left Her on the Beach at Honolulu"; "Sybil Fox Trot"; and "Sybil Waltz"; "Oh, Promise Me," and "Sweetest Story Ever Told"; and "Home to Our Mountains—Il Trovatore," and "Praise Ye."

Chicago Edison Dealers Organize

On Friday evening, September 29, the Edison Diamond Disc dealers of Chicago, and of towns located so close by that the dealers are in frequent personal touch with the Chicago office, met in the fraternity room of the Great Northern Hotel.

Dinner was served at 6.30, and after considerable informal discussion of various matters pertaining to the merchandizing of "re-created music," those present unanimously voted to form a permanent organization of Edison dealers and salesmen with the idea of getting together for dinner and business discussions once a month. C. E. Goodwin, general manager of The Phonograph Co. and The Edison Shop, was elected president, and Wm. H. Guild, also of The Phonograph Co., secretary. Regular meetings will be held on the second Thursday evening of each month.

If the first meeting in point of harmony, "pep," and enthusiasm is any indication of those to follow, great things may be expected.

Personals and Visitors

Recent visitors to this city were Messrs. Eberhardt and Hayes, of Wichita, Kan.; W. H. Ounsworth, secretary and sales manager of Woodford & Bill Piano Co., Menominee, Mich.; E. D. Allington, of Freeport, Ill.; E. T. Andrews, Jr., of the J. L. Hudson Co., of Detroit; E. T. Munson, Mendota, Ill.; John W. Boothe, manager of the piano and talking machine departments of Barker Bros., Los Angeles, Cal.; Henry Eilers, music magnet of the Pacific Coast; John Feuerstein, of Sturgeon Bay, Wis.; James O'Shea, of Waukegan, Ill.; E. A. Vaughn, of Princton, Ill.; Emil O. Schmidt, of Milwaukee; S. George Graves, general manager, and Willis R. Montgomery, advertising manager, of the Young & Chaffee Furniture Co., of Grand Rapids, Mich.; F. B. Hook, Madison,

And the Tone DOES Come Right Out

Watching the Music Come Out

"Ooo! You can just SEE the music come out!" Says Little Maggie, the Magnola Girl.

That's what you will say, too, when you first hear *Magnola Tone.*

THE marvellous *clearness* and *cleanness* of its reproduction lead many others besides little girls to make the same remark about the Magnificent

MAGNOLA TALKING MACHINE

Cramped, smothered sounds eliminated.

Plays *all* makes of records without extra attachments.

Volume of tone controllable at will.

Best designed, best looking, best finished cases.

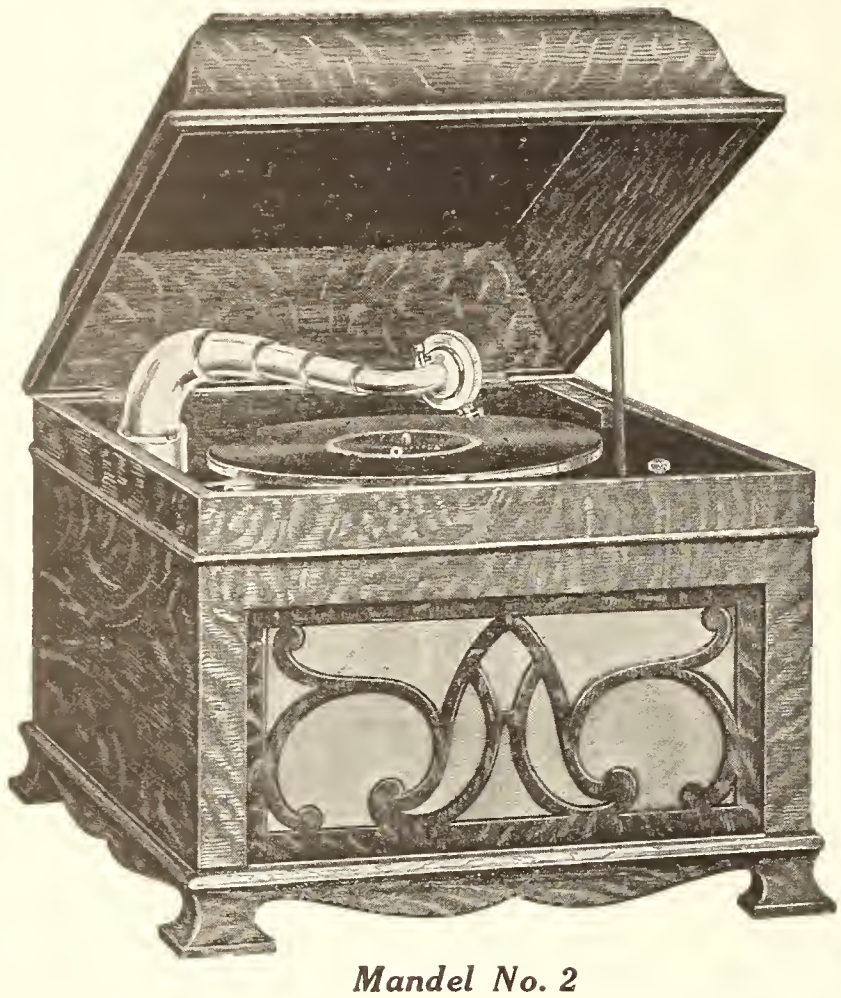
LET US TELL YOU ALL ABOUT OUR DEALER PROPOSITION

Magnola Talking Machine Company

OTTO SCHULZ, President

711 MILWAUKEE AVENUE, CHIGACO

Easy Sales and 100% Profit



Mandel No. 2

on the MANDEL Line

Dealers—here's your opportunity to connect up with the livest phonograph proposition on the market to-day. Get this straight.

WE CONTEND

1st—We've got competition beaten on quality.

2nd—Our goods sell for half the price of others.

3rd—You make 100% on each sale.

What does this mean to you?

It means (1) that with the Mandel Line you would get your share of phonograph business on sheer merit, on quality of the phonograph itself. We believe that no better-looking, better-playing phonograph has ever been built.

It means (2) that the Mandel retail price of $35 will certainly draw a lot of trade your way. People are now asked to pay $50 to $75 for Table Models not one bit better—they will come to you to save money.

It means (3) that the large margin of profit (100%) and the large number of sales will give you greater returns in actual CASH PROFITS than other lines you could tie up with.

ISN'T THIS THE Best Proposition Ever Put Up to the Dealer?

Look this proposition squarely in the face. With these facts before you, you cannot afford to pass it by. We make it easy for you to accept. Just write us that you are interested and we'll immediately mail you full particulars of our free trial offer. We'll gladly send you either one or both of the models shown here for a free demonstration without obligation to you. Let the MANDEL Phonograph play and talk for itself. Compare it with any machine in design, general appearance and tone quality—even with phonographs costing double the money, and then decide whether or not you want to handle our line.

The Mandel Table Model, No. 2—regular retail value $50 to $75. The Mandel retail price only $35.

The Mandel Floor Model, No. 3—regular retail value $150 to $200. The Mandel retail price only $100.

Both these phonographs answer the demand for a high-grade phonograph at a low price. This is your chance to get in on the ground floor. It opens BIG SALES opportunities that you can't afford to pass up.

Write For Free Trial Offer Today—SURE

This offer comes direct from us, the manufacturer. We employ no salesman, no jobbers. Saving on selling costs enables us to quote you rock-bottom prices which net you 100% profit on our line. Write for full particulars at once. This is undoubtedly the Greatest Factory-to-Dealer phonograph proposition ever made and merits your instant consideration.

NEW YORK DISPLAY ROOMS, 41 UNION SQUARE

Wis.; Harry Wunderlich, Kansas City, Mo.; William Schmoeller, Omaha, Neb.; W. F. Frederick, Uniontown, Pa.; C. Barber, Joliet, Ill.; N. C. Jacobs, Stevens Point, Wis.; Eli Crotteau, Marshfield, Wis.; Perry B. Whitsit, of the Perry B. Whitsit Co., Victor distributors of Columbus, O.

J. G. Pearce, of the firm of McLogan & Pearce, Calumet, Mich., was in Chicago this month planning the work for the continuation of the firm's business. Most of the trade will remember that his partner, Mr. McLogan, died some weeks ago.

Friends of H. C. Woodward, of the Chicago Talking Machine Co., are sympathizing with him in the loss of his father, who died recently at his home in New York. Mr. Woodward went East to attend the funeral, which was at the old home of the deceased at Haddonfield, N. Y.

Benjamin L. Bush, who opened a new talking machine store recently at 9216 Cottage Grove avenue, is already doing a very satisfactory business.

Ben Redler, sales director of the Electric Phonograph Co., of New York, makers of the Phonolamp, spent considerable time in Chicago during the past month. While here Mr. Redler made some distinctly advantageous agency arrangements as well as taking some large orders.

Emmett Thompson, Kimball dealer of Grundy, Va., was in town recently. While here, Mr. Thompson spent some time looking at the new Kimball phonograph and the Pathé line of machines and records which the Kimball Co. now distributes.

Robert B. Gregory, president of Lyon & Healy, who has been motoring through the Catskills, the Adirondacks and other points of interest in the East, returned to his desk recently.

T. E. Chadwick, formerly with the talking machine department of the Smith Piano Co., is now with the Victrola department of Lyon & Healy.

Mrs. L. C. Wiswell, wife of the head of the talking machine department of Lyon & Healy, is bereaved of her father, Jacob Vande Roovaart.

Mr. McLeod, Jr., of the Emporium of St. Paul, Minn., spent some time in the Columbia offices last week.

H. A. Yerkes, district manager of the Columbia Graphophone Co., was on a trip last week to Kansas City. Mr. Yerkes reports that the season is by far the biggest the company ever had.

F. A. Coyle, dealer in pianos and talking machines, of Sparta, Ill., was in Chicago last week. Mr. Coyle is doing an excellent business in his section of the country and prophesies a big holiday trade.

M. H. Allen, who is connected with the phonograph division of the Hallet & Davis Piano Co., in the distribution of Pathé machines, was married recently to Miss Olive Allan.

Wedding Bells at Lyon & Healy Store

There have been wedding bells in the talking machine department of Lyon & Healy during the past couple of weeks, when two of the young men of the department took their marriage vows. The first was Thomas Ben Stone, of the retail machine section, who took for his helpmate Miss Elizabeth Wise.

C. T. Landherr followed a few days after, when he took unto himself Miss Ethel M. Carlson.

A Slogan

"I want a slogan," said the manufacturer of phonograph records. "Something that will convey the idea that our records never wear out."

The advertising man lit a fresh cigarette and thought deeply for exactly eight seconds by the clock.

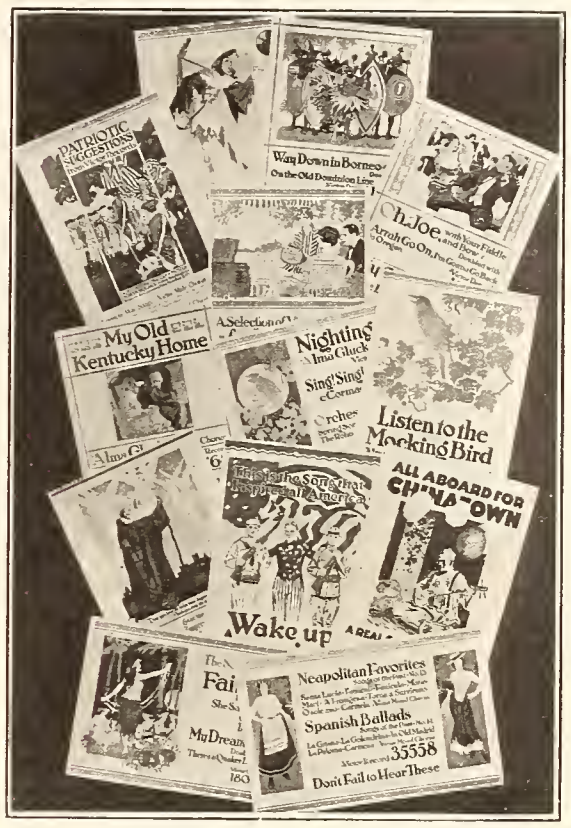
"How will this do?" he asked, "'One of our dance records will outlast the best hardwood dancing floor ever built.'"—New York World.

HELPING DEALERS TO ADVERTISE

Features of the Excellent Record Display Card Service Supplied to Their Victor Dealers by Lyon & Healy, Chicago

Lyon & Healy, Chicago, in the talking machine department believe that service to the dealer means somewhat more than simply supplying machines and records and the usual run of printed matter as prepared and issued by the Victor Co. itself.

Lyon & Healy have, therefore, been publishing for some time in the interests of the dealers special decorative window display cards featuring the most prominent numbers in the various monthly lists. In issuing the display cards, it is believed that the power of suggestion is one of the most potent factors in salesmanship, and that many people have but to see a certain record featured to realize and immediately desire that particular record. The Lyon & Healy display card service covers four cards monthly throughout the year, or forty-eight cards in all, for which the dealer is charged only the nominal sum of $15.



Some Lyon & Healy Cards

The accompanying illustration shows a few of the cards that have proven so successful.

ARTHUR J. O'NEILL PASSES AWAY

Veteran Talking Machine Man Succumbs to Pneumonia—One of the First Pathé Dealers

CHICAGO, ILL., October 7.—Arthur J. O'Neill, one of the veterans of the talking machine trade in the West, died on Wednesday night, October 4, at the age of forty-eight years. He had been attacked with pneumonia about four days previously, and as he had been a sufferer from asthma for many years he fell an easy victim.

The deceased was born at Patch Grove, Wis., in 1868. He was from the start identified with things of a musical nature, and while a young man became the manager of his sister, Jennie O'Neill Potter, and James Whitcomb Riley in concert and lecture work. His sister is said to have been the originator of the monologue.

In 1903 he originated the premium idea in connection with talking machines and worked up the business until at one time the output was nine hundred machines a day. As the record business worked a large part in the business the output of them was tremendous.

When the Pathé line of machines and records was first introduced to this country Mr. O'Neill became one of the first enthusiasts and secured representation of the product in the Middle West. Together with two of his sons, Arthur D. and Harry K. O'Neill, he distributed both in a wholesale and retail way large quantities of Pathé goods. At the time of his death he was operating the Arthur J. O'Neill Co., and was indirectly interested in the State Street Pathephone Shop, which is managed by his two sons. Surviving him are his widow, Lillian M. O'Neill, three sons, Arthur D., Harry K., Robert J., and two daughters, Nina and Lillian.

His passing will be sad news to legions of friends in all parts of the country, who appreciated his sincere and genial personality. The funeral was held on Saturday, October 7, from his residence, 4334 Drexel avenue.

E. E. Medcalf, of Bloomfield, Mo., has opened a talking machine department in his jewelry store, and will handle a full line of Columbia Grafonolas and records.

THE
PAR-O-KET

Record offers both the Dealer and the Manufacturer an unrivalled value and business getter in a

REALLY HIGH QUALITY

25-Cent Double Disc Record

This Type Can be Played With Steel Needle or Sapphire Point

Our talent includes such stars as Henry Burr, Collins and Harlan, Peerless Quartette, and Louise and Ferara. The Par-o-ket is 7 inches in diameter and plays from 2½ to 3 minutes. We furnish a large list of new records each month, with catalogs, supplements, display cards, dealers' helps, etc. Send for our full proposition in time for the big holiday business.

BROWN SPECIALTY MACHINERY COMPANY

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 83)

OFFERING A NEW COMBINATION

Attractive Combination Phonograph Cabinet, Record Holder and Book Case Put on the Market by Caloric Sales Co.

JANESVILLE, WIS., October 8.—A distinct innovation is to be presented to the national talking machine trade this week, when the Caloric Sales Co., of this city and Chicago, announces a unique line of cabinets and phonographs. Prominent in the line is the "cabinet grand," a combination of phonograph cabinet, record holder and bookcase. It stands forty-three inches high and retails at $13.25.

In discussing the product of the Caloric Co, one of its officials said: "This unique and beautiful 'cabinet grand' transforms any 'table style' phonograph or talking machine into a magnificent phonograph outfit, just by placing the instrument inside or on top of the cabinet. The attractiveness and fine workmanship of the 'cabinet grand' its combination uses, and popular retail selling price should have a strong appeal to owners of 'homeless' phonographs. It is also furnished as the 'cabinet grand Phonola' complete with phonograph, to retail at $19.75.

"The music trade has given the 'cabinet grand' a royal welcome. It is recognized as a quick and profitable seller, and has a practically unlimited field. There's nothing else like it on the market, to my knowledge. The cabinet is made by the Caloric factories at Janesville, Wis. The collapsible or 'folding' feature of the 'cabinet grand' is covered by basic patents. The cabinets are shipped knocked-down, and can be set up in sixty seconds. Unusual economies in manufacturing, shipping and storing are possible because of the collapsible construction.

"Among the many Chicago concerns now handling the 'cabinet grand' are Story & Clark Piano Co., Marshall Field & Co., Mandel Bros., The Fair, and the Boston Store. The factories are operating at full capacity, as dealers are ordering heavily for big Christmas business."

AMERICAN CAN CO.'S NEW PRODUCT

The "Mag-Ni-Phone" Just Placed on the Market by that Company—Represents Interesting Combination of Metal and Wood Construction

CHICAGO, ILL., October 10.—After considerable preparation and experimentation the Charles W. Shonk Co., which is a subsidiary of the American Can Co, has placed upon the market the first style of a line of machines which, it is forecasted, will become a large part of the company's varied business. The instrument has been perfected under the direction of Allen L. Eaton, who has been engaged in the work of experimentation and testing for months past.

In construction it is partly metal and partly wood. It measures sixteen inches in length by fourteen inches in width and stands eleven inches high from the base to the top of the tone arm. The top and base are both of wood—genuine mahogany. The sides and front are in metal of real mahogany finish.

The principal claims made for this instrument are the quality and volume of its tone from which has been selected, as a result, the name "Mag-Ni-Phone" and the slogan "it speaks for itself."

It is claimed by the machine's sponsors that an ideal tone is secured from a combination of both wood and metal in the Mag-Ni-Phone. It is equipped with a worm driven motor, which is made in every detail by the American Can Co. The tone arm is made of sufficient length to accommodate records as large as fourteen inches in diameter, while the turntable is of full twelve-inch measurement. The tone arm is simple in construction and can be so adjusted as to play any standard make of the hill and dale type or lateral cut records. A jewel point is provided with each machine for use with the hill and dale style.

"We feel that we are offering a really unusual value," said Mr. Eaton last week. "We have been working on this for a long time and our idea was not to go upon the market until we had perfected our product. We are busily engaged now in working upon our cabinet styles and we are sure that they will get a reception that will be equally as cordial as that which our first received."

P. M. Brown, of the Columbia export department, is "buying the cigars" because of the arrival at his home of a ten-pound baby boy.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 84)

ADDITIONS TO SALTER FACTORIES NOW IN OPERATION

CHICAGO, ILL., October 9.—The last of the additional machinery has been installed in the new section of the Salter factories and is now busily humming away on the production of Salter cabinets. The addition almost doubles the output of the plant and comes at a very opportune time for never was the Salter factory in a busier condition than it is at the present time. In fact the present large volume of business, which the concern is enjoying, forecasts even further additions to the plant.

General Manager John F. Mortensen intimated to-day that there was every prospect for additional new buildings within a very short time.

"We thought that we could take care of them with the new facilities," said he, "but I doubt very much if we are even going to hold our own with the orders that are coming in. The demand is for almost every class of cabinets and particularly of those to be used in conjunction with smaller machines. The idea of felt-lined compartments, which was original with us, continues to be very popular, as it is so apparent to the prospective buyer that the felt protects the delicate surface of the record. We are looking for a fall business that will break all records."

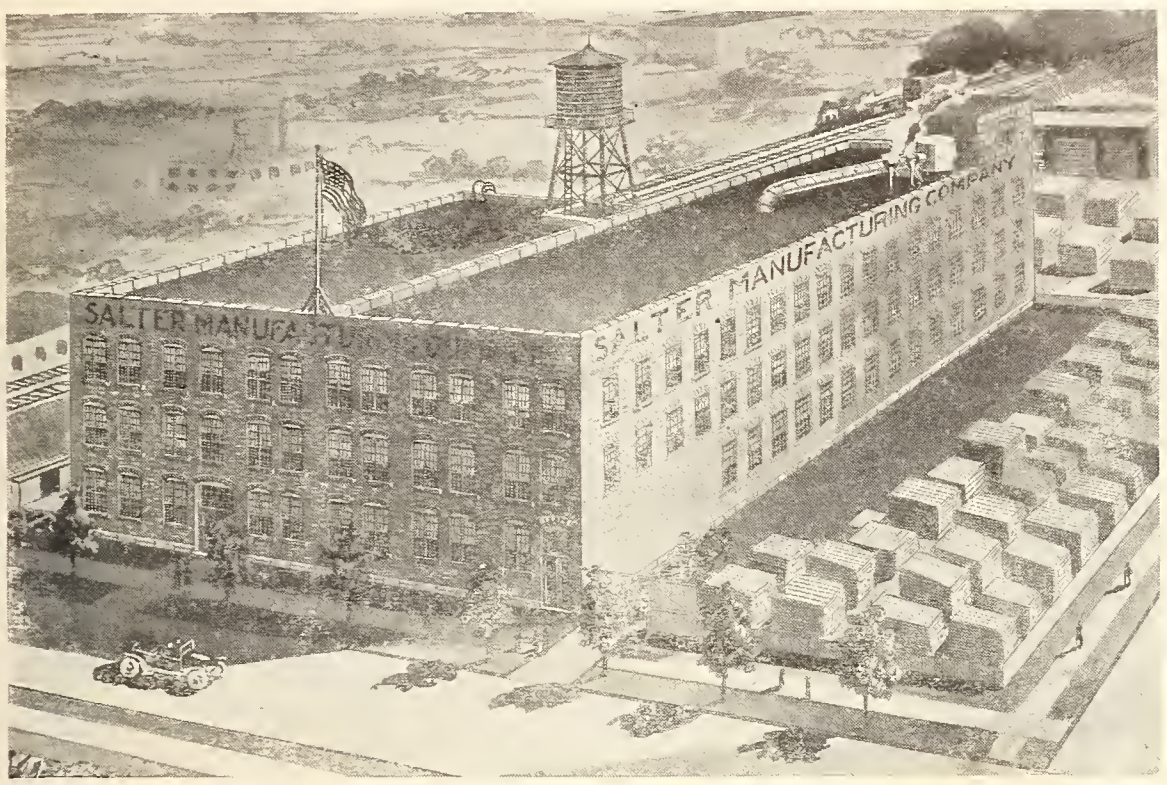

Illustration Shows Growth of Salter Factories in Chicago

REPORTS AN EXCELLENT DEMAND

Addition to Plant of M. Schulz Co., in Chicago, Will Permit of Large Output of the Magnola —Some of the Special Features

CHICAGO, ILL., October 7.—Otto Schulz, president of the Magnola Talking Machine Co. and of the M. Schulz Co., the large piano manufacturing business with which it is affiliated, is more than pleased with the excellent demand for the new Magnola talking machines which, by the way, is amply demonstarted by the fact that a two-story addition to the main Schulz plant which will give an addition of 25,000 feet to the finishing department is near completion.

The significance of the phrase "built by tone specialists" used in the Magnola literature is justified by the many tributes received by the company from dealers testifying to their delight with the tonal results secured through the Magnola tone chamber, comprising a tone reflecting system, the patents on which are pending. One of the most popular of the M. Schulz styles is the $150 model in the Louis XVI. style, which is here illustrated. This somewhat unique design is furnished in mahogany, oak and walnut. The walnut cases which are now being shipped are especially admired because of the high quality and beauty of the selected veneers. Other features of the instrument are the special tone graduator, the universal sound box playing all makes of records, a twelve-inch turntable, two spring worm gear motor, playing about seven ten-inch records on one winding, and a balance spring support for the top cover. The dimensions are as follows: Height, 49 inches; depth, 26 inches; width, 24 inches. The other styles of Magnolas, on which the company is now prepared to make shipments, are the Sheraton style, retailing at $75; the Queen Anne, at $100, and the Adams style, at $200. All of the cases are beautiful adaptations of the period styles they represent.

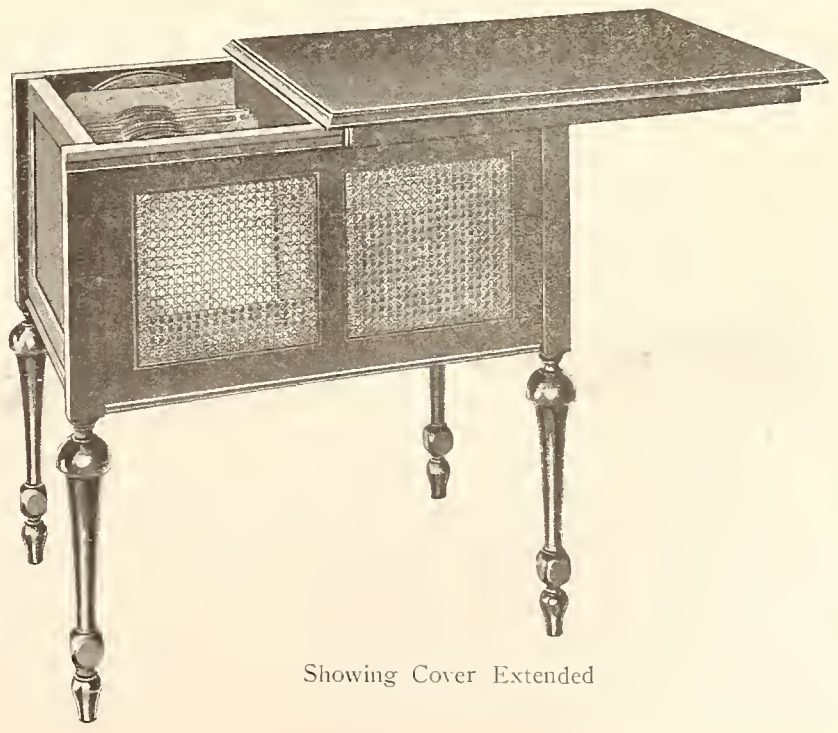
2 Compartment Cabinet.
200 Record Capacity.

FlexiFile Disc Record Cabinets

are not only adapted for carrying all portable machines, including the $50.00 type, but also are an excellent medium for owners of machines with a limited storage capacity. The FlexiFile System used in the FlexiFile Disc Record Cabinets is covered by Letters Patent which places it in an exclusive class. It is different from all other known methods of filing disc records.

A greater number of records can be filed in a given space—albums and partitions not necessary. Each record is properly indexed numerically with a guide card for each record, and is listed on the index card alphabetically.

Only one record need be removed to obtain the particular one desired and the place from which it has been taken in the FlexiFile pocket remains open until returned again. There is no danger of chipping or cracking the record as it drops into the canvas pocket.



Showing Cover Extended

The FlexiFile Disc Record Cabinets are made in three sizes:

1 compartment cabinet—75 record capacity—top 18 x 18 inches—wood panels—price $15.00.

2 compartment cabinet—200 record capacity—cane panels—top 22 x 28 inches—price $35.00.

3 compartment cabinet—300 record capacity—cane panels—top 22 x 38 inches—price $45.00.

Mahogany or Golden Oak finish.

Manufactured Exclusively by

FlexiFile Sales Company

335 S. LaSalle Street CHICAGO, ILL.

HERE'S the most valuable money making chance that you have received in many a day—the selling agency for the incomparable

ARTOFOLA

"The Sweetest Tone Machine"

THE SUPREME MODEL
50 inches high, 25 inches deep, 25 inches wide. Entirely gold plated, electrically equipped if desired — retailing at only $150.

Compare it with any $250 Machine on the Market

and you make 100% on every machine.

The Artofola is a transcendentally beautiful instrument—a cabinet of the highest class design. People are fascinated with its grace, its splendid tone quality, and its many exclusive features. It is the utmost in talking machines at a price that is irresistible.

We are selling *The Artofola* in a new way—a way which will interest you—because you can make from $1,000 to $3,000 profit before the holiday trade. And this new way allows every one of your customers to own one of these magnificent instruments without financial strain, with no investment on your part, *for we will carry your accounts, or sell it under long terms that will make it pay for itself.*

REMEMBER

—The Artofola is one of the most attractive machines sold.

—It sells for half the price of others.

—It gives you 100% profit on each sale.

—Dealers are furnished with the strongest, most aggressive, sales-pulling advertising campaigns ever built—a whirlwind campaign prepared by the ablest advertising experts in existence, and it will sell amazing numbers of Artofolas for you as it has for hundreds of others.

The Artofola Record means as much profit to you as does the sale of the Artofola. Why not make this additional profit? By all means, sell a machine that will enable you to build up a big paying record business.

While the Artofola plays all disc records perfectly without change of attachment, the ideal combination is *The Artofola and Artofola Record. The Golden-Tone Ball—not a sharp point*—cannot wear the record and an *Artofola Record* played thousands of times will be just as sweet and clear and noiseless as it was at the start.

Write us today – sure. You will never regret it.

ANNOUNCEMENT OF THE SOLOPHONE

Company with Modern Plant in Harrison, N. J., Producing Machine of Distinct Merits—Cabinet Models Most Artistically Designed

Announcement is made this month of the Solophone, a talking machine manufactured by the Solophone Co., of Harrison, N. J. The Solophone Co.'s executives are men well known and actively engaged in one of the largest piano enterprises in the country and have erected a modern plant, having made arrangements to produce a high-grade talking machine. The lowest priced model of the machine will be $90.

A feature of the machine will be that all metal parts will be gold plated and the machine will play all records without the removal of the sound box, it simply meaning a turning of the reproducer where it is desired to change from one style of record to another.

The machines will be furnished in mahogany, walnut, fumed and golden oak. The company also claims that they are using the most expensive motor for these talking machines.

The cabinet designs have been especially perfected and are of high, artistic excellence. A unique feature of one of the models is the use of small tungsten lamps placed on the motor board and in the record compartment to facilitate changing records.

BUSH & LANE PIANO CO. ENTER FIELD

HOLLAND, MICH., October 10.—The Bush & Lane Piano Co., of this city, are among the latest established piano manufacturers to embark in the talking machine business. The line is not quite ready for showing the trade as yet, but promises to be one of unusual interest. The new talking machine is the special hobby of Walter Lane, president of the company and the general superintendent of the factory, and known as one of the most expert acousticians in the country. In speaking of the line, Mr. Lane said that there will be a tone chamber of unique construction and various special features on which patents have been applied for.

TO MARKET NEW TYPE OF MOTOR

F. B. Gaurnier, general manager of the Mellophone Talking Machine Co., recently announced they will shortly be ready to deliver an entirely new motor of unique construction, which will have features never before used. His announcement also states that the motor will be guaranteed to be free from spring troubles.

During the last month the orders from foreign ports have showed a marked increase. Recently Henry Sobel, secretary of the Mellophone Co., received an inquiry from Gibraltar, the writer stating he had read the Mellophone advertisement in The Talking Machine World. Mr. Sobel said while the demand this fall will be heavy, he thought by anticipating it and laying in large supplies they had placed themselves in a position where they would be able to fill the majority of orders.

FILE APPRAISAL OF ASSETS

Property of Albany Edison Diamond Disc Studio Valued at $10,651

UTICA, N. Y., October 9.—The appraisal of the assets of the Albany Edison Diamond Disc Studio was filed in the Federal Court here last week and showed a total of $10,651 worth of property in the Albany and Troy stores. The appraisal was made by Peter Halwey of Binghamton and James Watson of Albany. The property consists of machines, records, accounts and cash.

WALTER L. ECKERT WITH PATHE CO.

Becomes Office Manager and General Auditor of Pathé Frères Phonograph Co.—Has Had Years of Experience in Financial Field

The Pathé Frères Phonograph Co., New York, announced last week the appointment of Walter L. Eckert as office manager and general

Walter L. Eckert

auditor of the company, with headquarters at the executive offices, 29 West Thirty-eighth street, New York. Mr. Eckert assumed his new duties on Monday.

Mr. Eckert is thoroughly versed in all phases of the financial end of the talking machine industry, having been associated with Mr. Thomas A. Edison as general auditor in all of his various interests throughout the world, and as head of the financial department of Thomas A. Edison, Inc. He has traveled throughout this country and Europe, and he has made a study of the financial conditions and commercial requirements of the various countries in Europe and America, where Edison interests have had branch offices and factories, introducing the system of these branches so as to conform with the requirements of the home office.

In his new capacity, Mr. Eckert will have unlimited opportunities to develop and introduce new systems, which will materially enhance the efficiency of the various departments under his supervision. As the Pathé business is increasing and offers a wide field for Mr. Eckert's activities, the Pathé Co. is to be congratulated on securing the services of such a valuable man.

Mr. Eckert was the guest of honor at a dinner which was given in the evening of October 7, by the officers and heads of the various departments of Thomas A. Edison interests.

SECURE THE SILVER CUP

The baseball nine representing the New York Talking Machine Co., Victor distributor, won possession of the silver cup offered by Sol Lazarus, secretary of the Talking Machine Men, by defeating the team representing the G. T. Williams Co., in a well-played game last Sunday. The New York Talking Machine Co.'s nine has been very successful this season, and Sunday's game demonstrated its right to the title of "Champion of the Victor Distributors League" in the local territory.

CELEBRATING ANNIVERSARY

The Griswold, Richmond and Glock Co. is celebrating the first anniversary of the opening of its Victrola department at its store in Meriden, Conn. Concerts are being given every afternoon at 4 o'clock, and on Friday and Saturday evenings concerts will be given after 8 o'clock. Several local artists are participating in the concerts, which have attracted large crowds.

DON'T GET IN A RUT

The ablest and best minds get into a sort of rut. It is well for all workers to remember this, and endeavor to obtain a different perspective of their work. We must get out of ourselves, and then look in, if we would perfect the particular branch of business in which we happen to be engaged.

The C. F. Bath Music store is now located in new quarters on Spruce street, Abilene, Kan. The company handles the Edison Diamond Disc phonograph, among other lines.

EDISON DEALERS MEET IN WICHITA

Retailers of Southwest Kansas the Guests of the Innes Co. at Business Meeting and Dinner—M. M. Blackman Makes Address

WICHITA, KAN., October 2.—A number of Edison phonograph dealers in the southwest Kansas territory were entertained last week at the Wichita Club, this city, by Walter P. Innes, vice-president of the Innes Co., and C. W. Cosgrove, manager of the phonograph department of that concern. A business meeting was held in the afternoon with a banquet in the evening, the principal speakers being M. M. Blackman, manager of The Phonograph Co., Kansas City, and C. T. Cunningham, of the same concern.

Dealers attending the meeting were: A. K. Snyder, Winfield; John Knafp, Mullenville; Mr. Hoag, Newton; L. Selig, Eldorado; M. M. Blackman and C. T. Cunningham, Kansas City; C. A. Ammermon, Kingman; Mr. Cameron, Pratt; A. H. Fitch, Arkansas City; Mr. Williamson, Attica; H. S. Bryant, C. W. Cosgrove, Wichita.

BRISTOL & BARBER LEASE BUILDING

Will Occupy Entire Building on East Fourteenth Street, New York City, in Near Future

Bristol & Barber recently leased the entire building at 111 East Fourteenth street, New York City, the ground floor of which is now occupied by the Pathephone Sales Co., which is controlled by the Bristol & Barber firm. The firm will occupy its new quarters, which are located next to Steinway Hall, as soon as the present tenants vacate the building. The offices of the Bristol & Barber firm and the Pathephone Sales Co. will be combined on the second floor of the building, while the line of stools, cabinets, benches, scarfs, etc., carried by the firm, will be displayed and stored on other floors in the structure.

MANOPHONE APPOINTMENT

J. Kornfels, District Manager in New York—Manophones in National Art Club

The James Manoil Co., whose executive offices and factory is situated at Newburgh, N. Y., has announced the appointment of J. Kornfels as manager of five districts in New York City. Mr. Kornfels was formerly with the Victor Talking Machine Co.

The sales organization of the company is gradually being developed, and the demand at the factory has been very pleasing. The company has already launched an extensive advertising campaign using thirty magazines for the publishing of their copy. A recent sale was that of a Manophone for use in the National Art Club, New York.

RANAH STUDIO IMPROVEMENTS

Victor Dealers in Brooklyn Install Five New Booths and New Bookkeeping System

The Ranah Studio, Atlantic avenue, Brooklyn, N. Y., exclusive Victor dealer, has been forced by growing business to remodel its quarters and provide additional equiment. Five new demonstration rooms have been installed, each decorated and furnished in an individual style. Additional booths, finished in gold and French gray, have been provided for the office. A special ventilating system has been installed at considerable expense to keep the air in the soundproof booths always fresh and sweet. To facilitate the handling of its growing business the company has also installed a new and improved bookkeeping system, which permits of Manager D. W. Moore having a perfect report of the stock of 18,000 records each day. The name of the studio, Ranah, is an adaption of the Biblical term meaning beautiful.

EDISON RECITALS IN ALBANY

ALBANY, N. Y., October 5.—H. & J. Pommer of South Pearl street, whose large furniture store is one of the important shops of the city, has a talking machine department that is a popular rendezvous of the music lovers of the city. Manager Chubb has been running most successfully a series of Edison recitals in the handsome recital hall, which has lately been all done over at an expenditure of several thousands of dollars. This recital hall is located on the second floor, and is conveniently reached from the street.

PROOFS OF VICTOR PUBLICITY

The Victor Talking Machine Co. sent to the trade this week proofs of newspaper advertising, which it will use in the leading papers throughout the country during the next four weeks. These advertisements are well worth the close attention of Victor dealers, as their designs and context are calculated to produce direct sales of Victor records in addition to adding to Victrola prestige. One of these advertisements will be devoted entirely to featuring Caruso's new record, "Santa Lucia," which makes its appearance in the October supplement of new Victor records.

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., October 7.—It is the same old story in the talking machine world of Philadelphia—business that has been limited only to the supply, with the demand unprecedented as before. Conditions in September were somewhat better than during previous months of the year, but there was still a considerable shortage of machines, although in records the trade have been able to nearly fill all orders.

Penn Phonograph Co. Reorganized

The Penn Phonograph Co. has been reorganized recently with the following officers of the company: T. W. Barnhill, president; J. H. Dewey, vice-president, and H. F. Miller, secretary and treasurer. The same policy will be continued as before, and the new firm, with all their past years of experience in the business, are assured success from the start. They will make a number of changes in their warerooms, especially in a new arrangement of their salesrooms.

H. F. Miller, with a party of friends, is at present on a motor tour, which includes Baltimore, Frederick, Winchester, Luray, Hagerstown, Gettysburg and York.

President Barnhill reports that machines are coming in much more satisfactorily the past week, and their record stock is in most excellent shape, and they are able to fill all orders from 95 to 100 per cent. He says business in September was only restricted on account of the machine shortage. They had an increase, but not such an increase as might have been possible or desired.

H. A. Weymann & Sons in New Home

H. A. Weymann & Sons have finished the moving of the talking machine department to their new home, 1106 Chestnut street. They will shortly have an opening of a most elaborate character, in which the talking machines will figure prominently. To the right of the store as you enter they have a number of attractively arranged booths, all of them absolutely soundproof, and beyond this are the racks for retail stock which are built along the very latest and best method for ease in handling. They have placed several new men in this department of their business, and they are looking for a very heavy fall and winter trade, as every one of the many visitors they have been having are optimistic as to the future of the business. They have found a great drawback in the shortage of machines, rather than records, and they have been sending out notices to their trade to get in their orders early to assist them in being able to make prompt delivery. The new Weymann store is one of the show places of the city, and they are featuring the talking machine end more than ever.

Blake & Burkart Activity

Blake & Burkart, the big Edison dealers here, report that they have been very busy, and that their business for the month of September was exceptionally good, even more than they had anticipated, as so much of the exclusive trade to which they sell have been late in getting back to the city, that they were agreeably surprised to find their fall business starting in with such briskness so soon.

In July last the firm took on the general agency of one of the largest piano houses in the country, and beginning October 1 last they were able to secure, as head of this department, the able services of C. E. Lucore. They are first of all phonograph dealers, but will do everything to make their piano department a success, but it will be run as an entirely separate part of their business.

They report that the Edison stock is coming in 100 per cent. better than it did thirty days ago. There is still, however, a greater demand for records than they are able to secure.

Give Up Talking Machine Soon

Story & Clark have discontinued the handling of talking machines in this city, as in other cities in which they have stores.

A Business of Wonderful Volume

Manager Eckhardt reports that the Pennsylvania Talking Machine Co.'s business has been wonderfully good. It is a repetition of the old story, however, that they are still horribly in arrears. But it looks as though there was good prospects ahead for improvement. Mr. Eckhardt was at the factory a few weeks ago, and he was astonished at the progress that was being made there. "It would look," he says, "as though the plant would be able to build all the product necessary to flood the world." He says: "If business continues to increase in the next two years, as it has in the past two, the expansion already made will be insignficant to what will be required.

Retail Trade Very Active

Hal Dorian, of Washington, has connected himself with the retail organization of the Pennsylvania Talking Machine Co., 1109 Chestnut street. The Lauter Piano Co., of Trenton, have taken on the Columbia, and will start a large campaign. Manager Eckhardt is expecting great things from the Lazaro records about to be placed on sale by the Columbia. In this he is not likely to be disappointed, for they are among the most interesting records ever placed on sale by this company.

Dictaphone in Demand

The Philadelphia Dictaphone office has been able to make the office quoto in September, and three of their salesmen were able also to make the quoto. Among some of the prominent sales of the month were: Rishel Furniture Co., Williamsport, Pa.; William Witmer & Sons, Sunbury, Pa.; National Glass Bottle Co., of this city, and additional machines have been purchased by the firms of William Lloyd & Co., lumber; American Express Co., the Lower Meriod Realty Co., Pennsylvania State College, the West Electric Co., and the offices of the City Solicitor of Philadelphia. They have placed an agency for the dictating machine with the Stoll Book & Stationery Co., of Trenton, N. J.

Manager J. D. Westervelt, of the Dictaphone Co., was in New York several days the past week. Recently he gave a very interesting talk before the Rotary Club, of which he is a member, as a special luncheon speaker, which incidentally was the promoter for considerable business to the firm. They have had very good results from their Dictaphone School, and they have placed on their roll several new salesmen.

Conditions look very good for the fall business of the company. C. A. Malliet has been making a campaign through the State for some time with very gratifying results, and they are expecting a very good business all over their State section.

Lively Times With Buehn

Louis Buehn, of the Louis Buehn Co., report that business is just as good as ever. The machine situation is still unsatisfactory, but the record situation is excellent. He is quite optimistic over the splendid outlook.

Death of J. Frank Smith

J. Frank Smith, a salesman, who had been with the Buehn firm for the past nine years, died on October 4, being one of the oldest employes of the firm. He was not considered seriously ill until about six weeks ago, although he had not been well for the past year. He was compelled to undergo an internal operation. He was forty-two years of age, and leaves a wife and two children. He represented the firm on the road.

Some News Brieflets

Christine Brothers, of Bangor, Pa., report that they have considerably enlarged their talking machine department, and have added a number of new booths.

F. Hayes Harmon, of Chambersburg, Pa., has just had installed in his store a number of additional booths from the Unit Construction Co., of this city.

Joe Goodman, of Manayunk, Pa., recently visited the Pennsylvania Phonograph Co., of Philadelphia. He is a successful Victor dealer, who has secured a lot of excellent business by getting after prospects instead of waiting for them to come to his store.

The hen that lays the golden egg is the Victor Jobber who keeps you supplied with machines and RECORDS during the "rush season."

Eighteen years of service have developed what we offer you—a Victor Service with that quiet easy action of a roller bearing.

KEENER COMPETITION HELPS TRADE IN MILWAUKEE

Talking Machine Sales Are Rapidly Increasing Despite the Number of New Machines on the Market—Edison Shop Being Enlarged—Kunde Increases Floor Space—News of the Month

MILWAUKEE, WIS., October 5.—The activity that is apparent in the talking machine world at this time has never been equalled, and with the best kind of prospects for a huge volume of business between now and Christmas time.

The truth of the adage that competition is the life of trade seems to be proven every day. In spite of the enormous number of machines now being marketed, sales are mounting into surprising totals. Those who feared that the influx of many new types would have a bad effect on the old-established trade and would make deep inroads into the volume of business transacted by the few standard concerns of several years ago, admit they were mistaken. On the contrary, they have profited a great deal more than under former conditions.

During the last thirty days, several new makes of machines have been introduced to the Milwaukee and Wisconsin trade, and any number of new distributing agencies have been established. Chief among the new makes are the Brunswick and the Stradivara. The Brunswick-Balke-Collender Co. has maintained a large branch house at 275-279 West Water street for many years, and is at this time establishing sales and demonstration rooms for the new talking machine. Thomas I. Kidd, local manager, is busily engaged in mapping out his campaign, which will be prosecuted vigorously throughout the Wisconsin and Upper Michigan territory in time to get the cream of holiday trade. Several models are on exhibition and stocks are on the way to Milwaukee.

Max Schuelke, proprietor of the Max Schuelke Organ Co., 522-532 Sixteenth avenue, has taken the district distribution of the new Stradivara, made by the Compton-Price Co., and will be wholesale and jobbing agents for Wisconsin and Upper Michigan.

Harry A. Goldsmith, secretary of the Badger Talking Machine Co., Victor jobber, is one of the enthusiastic distributors whose only plaint seems to be that there are not enough Victrolas to go around.

The Edison Shop, 213-215 Second street, Edison jobber, has been forced to undertake an enlargement scheme to bring its facilities up to the requirements of the trade. The firm has leased the store building adjoining the present house, giving it exclusive possession of the quarters from 213 to 217 Second street. A fine concert and demonstration hall is being fitted up in the new store, and it will be known as "Diamond Disc Hall," an appropriate title originated by Manager William Schmidt. The new hall will be used for daily concerts, special recitals and tone test demonstrations. It will be in charge of Miss Pearl Corbeau. Retail business is just as brisk as wholesale trade, according to Herbert W. Gausewitz, retail manager, and Edisons are selling as fast as stocks come in, making it almost impossible to accumulate stocks for the greater rush in late November and December. Miss Flora Kellner, in charge of the record department, is one of the "live wires" of the Milwaukee Edison organization and has introduced some original ideas which are responsible for much of the increase in record sales in recent months. Edison week will be celebrated throughout the territory, October 16 to 21.

A. G. Kunde, 516 Grand avenue, Columbia jobber, has been obliged to add 1,800 square feet to his warehouse facilities to properly handle the immense volume of Grafonola business. The country trade is absorbing Columbias on an unprecedented scale, and especially the smaller styles are moving fast. In the city, retail business leans toward the costlier styles. W. E. Yerkes, district manager, and Charles F. Baer, Chicago manager, of the Columbia Co., called on Mr. Kunde a few days ago.

The Starr phonograph is making great headway in Milwaukee and the Wisconsin territory, according to A. Hoeffler, manager of the Hoeffler Manufacturing Co., 304 West Water street. Sales are in large volume, both wholesale and retail. Mr. Hoeffler also reports a brisk demand for the Domestic machine.

T. W. Abell, manager of the local branch of the Premier Talking Machine Co., 220 West Water street, has been obliged to get out on the road to help his traveling force line up holiday business without running into complications which the shortage of stocks might bring.

T. P. Ratcliff, of the Victor educational department, has completed a month's campaign in Milwaukee and surrounding territory and is now working in Iowa. The educational work will be continued by the Badger Talking Machine Shop, which has provided a separate hall in its new building at 425 Grand avenue for demonstrating educational features. The work will be supervised by Manager R. H. Zinke, with Miss Brewster in direct charge.

The Pathephone Co. of Wisconsin reports the appointment of the following-named new dealers: H. A. Hooper, Seymour, Wis.; H. W. Ihlenfeld, Iola, Wis.; J. B. Lowe, Neillsville, Wis.; E. H. Mayer, South Kaukauna, Wis.; C. A. Moe, Crandon, Wis.; A. F. Mohn, Coon Valley, Wis.; Roems & Blahnik, Kewaunee, Wis.; Marx Bros. & Barth, Cashton, Wis.; C. F. Dahl, Viroqua, Wis.; Ed. F. Dunzey, Elroy, Wis.; E. L. Fisher, Reeseville, Wis.; E. B. Gauthier, Gillett, Wis.; C. A. Spencer, Waupaca, Wis.; Manall & Co., Norwalk, Wis. Manager Lawrence McGreal also reports an important new appointment in Milwaukee, where the C. W. Fischer Furniture Co. has taken on the Pathé line.

John H. Becker, manager of the Victrola department of the Twelfth street store of Edward Schuster & Co., Milwaukee, has resigned. W. H. Eucker, formerly of the local branch of the Story & Clark Piano Co., has been appointed to fill the vacancy.

One of the most important newcomers in the Milwaukee retail trade is Espenhain's department store, which has opened a Columbia division, in charge of Miss Helen Gunnis, until now in charge of the same department at the local branch of the Story & Clark Piano Co. The piano company closed its Milwaukee and Minneapolis branches on October 1. George A. Taylor, of the salesforce, will open a talking machine store at Genoa Junction, Wis. Miss Edith Shafstoll has joined the Victrola department of the Boston Store.

The J. B. Bradford Piano Co. has doubled the size of its Victrola department. Two additional salesrooms have been turned over to talking machine demonstrations and sales and the stock and record rooms have been enlarged.

One of the prize sales made by the Edison department of the Flanner-Hafsoos Music House was that of a $200 style to E. J. Kastenholz, secretary of the Milwaukee Council of the Knights of Columbus.

A big "drive" on the Columbia is being made by Stanley V. Waldheim, manager of the new department established by Waldheim's house-furnishing store a month ago, when the firm moved into its mammoth new ten-story building at 210-218 West Water street. One of the vast and expansive show windows is devoted to Columbia exhibits continually.

Leslie C. Parker, manager of the Victrola department at Gimbel Bros., has been elected president of the Salesmanship Club of Milwaukee.

The Steussy-Schulz Piano Co. has succeeded the Emil O. Schmidt Piano Co., 525 Grand avenue. The new firm will continue to retail the Pathé and also will handle the Magnola.

H. Luebtow & Co., 936 Teutonia avenue, Milwaukee, have moved to larger quarters at 923 Third street. The concern specializes in the Columbia and Premier.

Inside Facts

The talking machine business is at last getting down to a basis where facts are beginning to make themselves heard above the din of extravagant, unsupported claims.

From its inception this company has dealt with facts, not fiction, and to say that we are more than pleased with the position we now find ourselves in is putting it altogether too mildly.

Domestic
TALKING MACHINES

have never been in the experimental stage, at least not since they were offered to dealers. They were planned and perfected from the first on the most approved basic principles.

Every detail was worked out by experts of known achievement in talking machine production. Old faults were eliminated, new advances were incorporated, tested and proved.

We were creating a machine to supply an urgent need, not a toy or a novelty; a real commodity for the home—low enough in price for the workman's home, beautiful enough in design and construction for *any* home.

We have produced an instrument so correct in tone and beautiful in finish, that comparison with other machines invariably sells the *Domestic*.

The result of such a comparison—in thousands of cases—has made it necessary for us in five months to double the size of our plant.

The result of such a comparison has convinced Domestic dealers everywhere that they have picked a live proposition and one that has an almost unlimited field.

The Domestic distribution is to be country-wide. Your own town will have its Domestic dealer no matter where you are located. It's a valuable franchise to have. Why not ask for it?

WINS SUCCESS IN CHOSEN FIELD

Leonard Markels Has Built Up a Large Business in Talking Machine Motors, Tone Arms and Supplies Through Improved Methods

The wisdom and value of the old axiom, "Keeping everlastingly at it," is well exemplified in the success achieved by Leonard Markels' motor, sound-box and tone-arm manufacturer. In the short period of five years Mr. Markels has steadily advanced in the talking-machine industry, until to-day his establishment occupies two entire floors at the building, 165 William street, New York, and his products have been adopted by many of the leading talking-machine manufacturers.

Leonard Markels

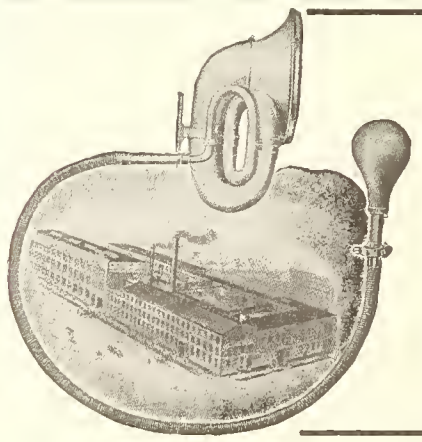
Mr. Markels' life history reads like one of the old-time Alger stories, for he worked his way upwards from practically nothing. He was obliged to leave school when very young, and finding his education neglected, decided to study in the evenings. Having a natural bent for mechanics he gradually concentrated his energies in this direction, and at the end of a few years he was recognized as one of the finest machinists in the city.

Mr. Markels made a hobby at this time of improving machinery and perfecting labor-saving devices which added immeasurably to the efficiency of the plants with which he was associated. He held a number of important positions in the machinery world, and in his spare time studied the talking-machine field with the idea in mind of perfecting a motor which would represent the distinctive ideas he had in mind.

From the very start, his efforts were rewarded with success, and with the installation of special machinery, designed under his personal supervision, Mr. Markels was soon able to turn out motors, tone-arms and sound-boxes with maximum efficiency and service. Every article turned out by the Markels factory is produced under the owner's personal supervision, and embodies patented improvements worked out by Mr. Markels in his laboratory.

Although he still continues to experiment and develop with the idea of further perfecting his talking-machine product, Mr. Markels finds time to be actively connected with numerous civic and musical organizations, being a life member of the Musical Art Society and the Metropolitan Museum of Art.

W. R. Carleton, of Pasadena, has arranged to open a talking machine store in Blythe, Cal.



TONE ARMS
TURNTABLES

For many years we have been the only manufacturers of good metal phonograph horns, and recently we have added equipment for making Tone Arms and Turntables of highest quality.

TO-LEAD-OHIO

First of all—RELIABILITY
Second—DELIVERY-BILITY

Of course we are going to lead Ohio in Victor Service, but we also want to let dealers in Indiana and Michigan realize what Toledo's helm seat on 23 railroad lines, 8 interurban lines and three steamship lines means.

Obviously it can only mean that Toledo is ready for work and that Whitney & Currier Toledo Service is LIVE. A "test" convinces. See if it doesn't.

THE SITUATION IN KANSAS CITY

Jobbers Hard Put to Keep in Sight of Dealers' Demands—An Aggressive Pathé Campaign—Christmas Orders for Columbia Goods Being Filed—M. M. Blackman Calls on Edison Dealers—An Outlook for Old Records

Kansas City, Mo., October 7.—A. A. Trostler, manager of the talking machine department of the Schmelzer Arms Co., voices the sentiment of dealers apparently, when he says that Victrolas are scarcer than the demand. Mr. Trostler spends many hours a day figuring out how to help out the dealers in their meeting of the calls of customers for Victrolas—and his methods towards them are apparently very useful for imitation by the dealers towards the purchasers, for it holds the trade, and keeps the demand ever increasing. He reports a fine record trade and a splendid outlook for his trade in his territory.

The E. E. Trower Music Co. is entering aggressively upon the introduction of the Pathé to Kansas City and territory. It has been using considerable newspaper space; one of its most effective lines being, "Explore this new rich mine of music," and exploiting European records. The W. W. Kimball Piano Co. is selling the Pathé machines now, as their beautiful window on Grand avenue has an attractive display of the new machines.

The Columbia Graphophone Co. has been doing some large business during the past week or so. Some orders for Christmas goods have already come in, which shows that the dealers are afraid it will be difficult to get the machines when they will want them later on. E. A. McMurtry, manager, has just returned from a three days' trip to Oklahoma City, where he visited the dealers of that section. It seems that almost every dealer throughout the northeastern section of that State has secured contracts for the installation of Columbia machines in the schools throughout their counties. With the teaching of music growing as it has during the past five years, at leaps and bounds, it will not be long before the schools of Kansas City will install talking machines. Some of the high schools, and a few of the ward schools already have their talking machines.

J. H. Best, manager of the dictaphone department of the Columbia Graphophone Co., is attending the annual trade show and convention of dictaphone managers in Chicago. This department has been very busy for some time past, and has to its credit the supplying of dictaphones for use at the headquarters of the American Bankers' Association at the Baltimore Hotel for the registering.

C. W. Smith, one of the "old" talking machine men in this section of the country, was recently selected to manage the Grafonola department of the Rorabaugh Dry Goods Co., Wichita, Kan.

C. S. Davis is the new salesman added to the force of the talking machine department of the Peck Dry Goods Co. The business of this department has been increased by the recent siege of cold weather.

The Garver Bros. Book Store, Winfield, Kan., has opened a talking machine department, handling only Columbia Grafonolas.

Martin Bros., Topeka, Kan., recently made a special effort in the window decorating for the purpose of celebrating the coming "Edison Week," October 16 to 21.

The Starr Piano Co.'s local branch has been getting out some very educational advertising of Starr phonographs. "Silver grain spruce from the pine-clad hills of the Adirondack Mountain region is used for the sounding board throat and horn of the Starr phonograph." That is the way the ad. started, and the same theme was carried throughout. W. E. Rupe, manager of the local branch, has been getting good results from this advertising.

M. M. Blackman, manager of the Edison Shop, is now on a three weeks' trip through Kansas, Oklahoma, Arkansas and Missouri, calling on the dealers in that zone. Mr. Blackman has been rushed during the past month to take care of the business. This shop was even forced to order all goods ahead of time so that they could receive them on time. In connection with the recent Fashion Show, a yearly event in this city, the Edison Shop did not decorate its window, but placed a card in it saying that the concert room had been decorated for the Fashion Show. As a result many new prospects have been added to an already long list and some sales are "on the way." This store went one step farther than other stores and brought the spectators into its house, thereby making concrete the business gained. "We made the people curious," said one connected with the firm, "and we got a lot of business as a result."

One of the most touching human-interest stories of months in Kansas City was that of a little cripple boy, who could not read, nor play—whose only solace was music. He had received a small Victrola from some kind friend, and a few records. A short story in the Star, telling of his condition and making an appeal for records, brought a considerable number to him. And his delight, the real good they did him, was touchingly told.

Incidentally, it suggested a proper outlet for old records, a way by which people could clean out their shelves of records of which they may have tired, without feeling that they had made serious sacrifice. Most people seem to hate to trade their records, feeling that they are sure to want most the ones they have had; and the same sentiment often prevents their selling records or disposing of them otherwise. But this new method of giving where they will put joy into lives that can get brightness in practically no other way, solves the problem.

ERNEST JOHN ADDRESSES THE TALKING MACHINE MEN

Well-Known Victor Advertising Man Offers Hints of Great Value to Retailers—Clearing House of Information for Dealers Suggested—Condemns Cheap Record Advertising

The monthly meeting of The Talking Machine Men, Inc., which was held at Keen's Chop House on September 20, was a most interesting and important one, not only for the action taken on various matters, but from the fact that the principal address was delivered by Ernest John, of the advertising department of the Victor Talking Machine Co., and editor of The Voice of the Victor. The usual luncheon preceded the meeting, and the attractions offered served to draw an unusually large number of members.

During the regular course of the meeting it was suggested that a clearing house be organized by the association for the purpose of compiling information available to all members regarding those from whom machines are repossessed, and those who have decamped before completing payments. The Talking Machine Men have suffered considerable loss through the practices, and it is believed that concerted effort should serve to discourage them. Definite action regarding the formation of the proposed Information Bureau will be taken at the next meeting of the association.

The Talking Machine Men discussed and also condemned strongly the practice of certain dealers in advertising records of prominent makes at considerably less than the established prices.

The big feature of the meeting, however, was the address by Mr. John, who gave the dealers many valuable thoughts to carry away with them. Those present were so impressed with the address that Mr. John was extended a rising vote of thanks at its conclusion. Mr. John's address, which is well worth reading, follows:

Mr. John's Interesting Address

I have been asked to talk more particularly about the problems of the retailer. I imagine it would be quite correct to say the smaller retailer, because whenever a business has arrived at any considerable size and achieved any considerable reputation, it has done so only by virtue of the fact that it has successfully overcome most of the problems to which I shall refer.

To begin at the beginning—It is, of course, very necessary that in planning a new store, or in remodeling one, to have every improvement and every convenience within your means. By improvement, of course, I mean fixtures, equipment, etc. When you, yourself, walk into a store, not a Victor store, but some other store, and find it ill-kept and cheaply organized, what impression do you get? Do you get the impression that it is a store which is perfectly capable of taking care of all your

Ernest John

needs, and doing it intelligently? No, certainly you do not. You get just the other kind of an impression. It is not what you say verbally or in your advertising matter. It is a question of what impression the customer himself gets when he comes into your store.

That's why money spent for fixtures or equipment represents an actual investment. It is just as real an investment as the money you put into your stock of records. Your stock of records returns you dividends on your investments in the shape of cash. The money you spend for fixtures returns you dividends in the form of prestige, and if that is not another word for cash, then all the big retail establishments of the country are "barking up the wrong tree."

Look at some of the stores here in New York. Is there any need of such enormous expenditures as these stores represent? Business could be transacted in a much plainer establishment, but as a matter of fact it wouldn't be, simply because of the value of interior decoration. The value of the impression created by interior decoration has been so clearly established that every first rate firm indulges in that sort of thing. The store which did not indulge in it to-day would be considered lacking in taste and progressiveness, and there would be an immediate falling off in that firm's business.

The Necessity of Booths

I don't want to merely generalize about this thing. Take, for instance, the case of booths—record booths. I strongly advise that you build as many of them as your floor space will permit and your volume of business justify. You must remember always that you are dealing with the most elusive commodity that the world has ever known. Music never stands still. It is like the brook, and runs on and on. You can look at a picture for hours at a time if you wish, because there it is permanently fixed before you, but music is like running water. The impression has to be caught on the fly. How are you going to do that, if while you are interested in some delicate violin solo you are interrupted by the playing of other records, street sounds, or an ordinary conversation going on around you?

Personal taste in music is a very personal thing, and the man who would willingly spend $5 or $10 on ragtime records hesitates to do that if he is surrounded on every side by high-brows. On the other hand, a customer who has a real fondness for good music is irritated by the distraction of ragtime.

These things are not theories—they are facts. Facts that you have all discovered for yourselves. That feature alone would be enough to warrant the use of separate booths, but there is the too old and well-known advantage of getting the prospect off in a corner alone with a salesman. That is the condition best suited to produce results, and so let me urge you again to have all the booths you can possibly use, or expect to use within a reasonable time.

In dealing with this matter of booths, let me say, too, that there should be booths used for demonstrating the records only. There should be other booths, or a quiet section of the floor, devoted to the display of Victrolas. It would be absurd, for instance, to keep a Victrola customer waiting the convenience of a record customer.

The playing of records to the Victrola customer is an actual distraction until that customer reaches a certain point, for at the moment when he is thinking about a Victrola and how nice it would be to have one, he is doing a lot of mental calculation as to the money he can spend—is calculating on what he gets for what he gives—wondering whether it is better to get a $200 Vic-

trola or a Victrola XI or XIV. Keep the music away from him at such time, unless you wish to play a few measures of some one record in order to show just what effect is produced by any one of the types.

How to Demonstrate Victrolas

I have said, "play a few measures." I mean that. Keep right after him on the purchase proposition until you have got him. If you feel that you must show what the instrument will do, put some good record on and play it not more than a quarter of the way through.

A point which occurs to me on that, is this: Whenever you are demonstrating in that way, let the music come naturally to the end of a phrase before stopping. Do not lift the sound-box off at the moment when a singer is in the middle of a long note.

I do not know what your practice is, but I do know that I, myself, have frequently received an unpleasant impression while sitting in a demonstrating booth, because the salesman used a full tone needle on a rather loud record. I consider that a mistake. Use half tone needles by all means, unless for a moment or two you wish to show the great volume which can be developed. Then, of course, use the full tone. But in a confined space, such as you have in the average demonstrating booth, the sound waves are reflected from the walls to a considerable extent, and the combined effect is apt to be both overpowering and unpleasant.

As to having booths for the two purposes, that is of showing the line of Victrolas and demonstrating records for customers, I think that if I, myself, were in business and had four booths, I should have two of them intended for the one purpose and two for the other.

To the Victor dealer who feels that he cannot afford demonstrating booths, I want to say that no Victor dealer can afford not to have them.

The Economy of Convenience

Now we come to the matter of convenience. You can walk a half mile in half the time you can walk a mile. And just as surely you can do a given amount of work with half the numher of clerks, provided your store arrangement is sufficiently convenient. It takes time to walk from the front door of the store to the rear. If your store is so arranged tbat your clerks have to do that frequently, the amount of time it takes each clerk will represent a very considerable item. It will quite possibly amount to so mucb that you will need three clerks—that is to say, you will have to pay three clerks salaries where you might very reasonable get along with paying two.

In any store the one most important thing is the stock carried. That is rather a sweeping assertion—nevertheless, it is positively so. If I can get what I want at some particular store, and get it when I want it, I shall go to that store, no matter whether it is convenient or inconvenient, no matter whether that store is attractive or unattractive. So I repeat that the stock offered by any store is the most important element. I do not like to go into a store where I may be cajoled into buying something "just as good." In fact, I dislike it so much that I will steer clear of any store in which I think that may happen to me, and you will find that everybody else feels much the same way about it.

Selecting the Record Stock

If you asked me what stock a dealer should carry, I should say that a complete stock of ten and twelve-inch single-faced records, ten and twelve-inch double-faced, ten and twelve-inch purple label and the best of the ten and twelve-inch Red Seal records.

I have some times been reminded that it costs money to carry a stock of that sort. I know that it does, but since a greater stock means greater opportunities for profit —why should anybody care? Moreover, with the Victor line, you know that sooner or later you will be able to exchange records on which you may have overstock.

I am not urging that the Victor dealer should carry a large stock of the same record, but in season and out of season I do urge that he carry a sufficient variety of stock. It doesn't seem to me that it can be necessary for the dealer to carry very many records of the same number when he is so near good distributing houses, as you gentlemen all are.

Stock, Advertising and Sales Force

That brings me to the question of ordering. Let me recommend that above all things you get into the habit of sending a record order to your distributor with the same regularity with which you open your store. Personally, I should feel disposed, if I were a Victor dealer, to send in an order, say every Friday, for that, it seems to me, would be the best way of keeping my stock up to par.

Next to stock, I should consider advertising and sales force as the most important elements, and remember that the most brilliant effort of the advertising man can be absolutely frustrated by the sales force.

No longer ago than last Sunday I was talking to a lady who told me she had been instrumental the previous week in getting an order placed for a Victrola. She asked me what difference—what structural difference—there was between different types of Victrola. In other words, she wanted to know why she should pay $200 rather than $100 or $150. Your sales people must have that—they must have knowledge of human nature, they must be able to anticipate personal taste, they should by all means know something of music, and they should possess a sort of unobtrusive courtesy in marked degree.

You, gentlemen, have learned the wisdom and the value of getting together. Your presence here this afternoon demonstrates that beyond a doubt. Let me tell you that it is just as important to get your sales force together. If I were a Victor dealer, I should make every one of my clerks sell me a Victrola once a month, and I would argue against just as strongly as he argued for. After he had done that occasionally, I think he would be able to meet and overcome any sort of prospect.

The Atmosphere of the Store

Another very important element in successful merchandising is the atmosphere of the store. You recognize and notice this in other stores. The probability is that you do not know just what the atmosphere of your own store is, because it is your own, because you are the boss, and do not see things from the same angle as your customers. If I had time I could take you out to half a dozen stores in this city where you would get half a dozen different impressions on entering the door. One may be dignified and frosty, another may be hustling and over-anxious—still another may be indifferent, and another one just right. The customer is attracted or repelled by this atmosphere long before you or your sales force get to him. It either makes him more eager to open up his purse strings, or less eager to do so, and the result of his visit is justified accordingly. When people coming into your store get the right sort of impression and the right sort of treatment, they become ardent boosters. When they do not get the right sort of impression and treatment they knock.

There are people who tell you that a knock is a boost. That is not so in the case of the retail store.

In building up a reputation for a store, remember that you have to deal with two classes of people. One class comprising the people who come into your store, and the other those who do not. You have two avenues of approach to the people who do not come into your store. The one your advertising—the other your window. Let me take windows first. I remember once when I was discussing window displays with our Mr. Brown, he made the statement that if he, himself, were a Victor dealer, he would change his window every day. That, of course, is not quite feasible for the smaller establishments, but let me tell you that the appearance of your window is of more importance than your personal appearance, to which you give much care and time every day of your life. Why is it that a man, who would never think of appearing in public with soiled linen or frayed coat sleeves, will permit his windows to be unkempt and dirty?

People who come into your store may have known you for years. They may know that they absolutely get a square deal every time they have any sort of a transaction with you. They may know that your word is as good as your bond, and such people will and do make allowances for the fact that your windows are untidy and your store unkempt. The people who have no business acquaintance with you do not know these things, and if all they ever see of your store is an unattractive exterior, why, gentlemen, you will never get these people to come inside.

The Two Kinds of Window Display

Generally speaking, there are two kinds of window display. One which is intended to create interest by appealing to the widespread appreciation of quality. The other kind of window is the one which is intended to produce an effect by an appeal to the even wider-spread appreciation of value.

I remember a window display which was designed by us and published in the Voice of the Victor some time ago. It was very simple. We selected a Victrola XVI, and around it we build a light frame work of wood, covering this outside and inside with black cloth having a dull surface. Green plush curtains were draped across the top and hung down on each side in front. Behind this drapery was a large incandescent lamp fitted with a reflector. There was a small palm on either side of this cabinet and some inconspicuous drapery covering the floor of the window. Very simple, but the effect was superb. The Victrola stood in the brilliant spot light, the rich color of it in contract with the rich green of the plush. It is the same thing that a jeweler does with a handsome ring, necklace, or other such piece of jewelry. He puts it in a case by itself and sees that it is well illuminated. Such a window display says as plainly as it could be said in words, "Look, here is a beautiful musical instrument containing the most wonderful possibilities. It is so beautiful—so perfect—that we give it special prominence.

When it comes to the other kind of display, that is the one based on value—take some one instrument and use big show cards, setting forth just exactly how much people get for the money involved, remembering always in making such displays that people get vastly more than a beautiful piece of cabinet work and a successful mechanism. They get music. They get the music of all the world, all of it they wish, for whatever may be the amount of money involved in the Victrola you choose to feature.

Featuring One Thing at a Time

In window displays or in advertising, the thing to remember always is that you cannot develop the highest possible interest in more than one thing at a time. That is the way the human brain works. Give people a choice of either one out of two things, and you are adding to your own difficulties in just the same ratio that you are adding to their uncertainty. If I go into a store to get a hat, and the salesman, after sizing me up, brings me one hat with an intimation that that is the best thing he has for me, I shall, in all probability, take it. In any case, if he comes to me with two hats, and so admits an uncertainty in his own mind as to which kind of hat I should have, then he will immediately communicate that uncertainty to me.

Take the case, for instance, of a circular letter sent out to your record customers for the purpose of interesting them in certain records. If you use one example, or at the most two, you will, in the great majority of cases, produce results. If you try to feature ten or a dozen records in that way, you are much less like to. One of the best things I have ever seen along this line was sent out by a dealer on the Pacific Coast. His letter read:

"Dear Mrs. So and So—You enjoyed record No. 87107, 'Whispering Hope,' with which we had the pleasure of supplying you on November 11, 1912. Here is another one that you will enjoy fully as much."

Then came a brief description of some other one record by the same combination of artists, Gluck and Homer.

Isn't it reasonable to suppose that I, as a dealer, may come across some record which makes a tremendous impression upon me? It makes so strong an impression that I feel impelled to come running to you, and to my other friends, on fire with enthusiasm, saying. "Here is one of the most beautiful things I have ever heard. I want you to listen to it. Isn't it a beauty?" Now, would you believe, or would anyone believe that I can be stirred to the same pitch of enthusiasm over a half dozen or a dozen records in that same way? No. And your customers feel that. Do not misunderstand me. I don't mean to say that I want you to confine your energies exclusively to any one record in any one month. I don't mean anything of the kind, but I do mean that when you want to send out a circular letter to your customers, you will have a vastly better chance to interest them if you put all your enthusiasm into one record than you will if you scatter it over a dozen. Now, then, when that enthusiasm conveyed through that letter has resulted in bringing that customer into your store, then by all means go ahead with every other record in which you think that customer may be interested.

Do you get my point? Black bass bites at a single attractive bait. If you tied a whole hardware store on to the end of your line, even the black bass would become suspicious.

Keeping Up the Mailing

Talking of sending out circular letters,—what is the condition of your mailing list? Do you actually use your machine register to keep track of your customers? Do you weed out names which have no value, and do you add to your mailing list new names which have value? When a mailing list is really alive, it is an exceedingly valuable adjunct to any business. When it is dead, it represents only an unprofitable expense.

Just think, in this country there are several huge concerns which have been built up on mail order business alone, and in view of that fact the value of a live mailing list must be apparent to everyone.

You will notice that the Western dealer, whose letter I have already quoted, evidently keeps track of the records he furnishes to bis customers, as well as the Victrolas themselves. You will see from his letter he knows that Mrs. So and So got record No. 87107 on a certain particular day of the year. There's money in that, too. Just figure it out for yourself, or get some friend of yours to make the experiment for you. You will find that when the average individual walks into a Victor dealer's store in search of some new records, not knowing exactly what it is that he or she wants, one of two things will occur. The clerk will either happen right away to play some records of the kind in which this customer is interested, in which case he will get a generous order,—or else he will play six or eight records selected at random, and none of them will make a hit with the customer. I am willing to make a modest little bet with any of you, that in that case there will be no order forthcoming.

I have had experience in just that particular thing. Some of you may remember that a year or so ago we were running in the Voice of the Victor, a series of short write-ups of Victor records. I used to sit around of an evening and play over a number of records in search of some particular musical effect that I wanted to illustrate. If, in the first five or six records I succeeded in finding such an effect, well and good. I went ahead. If, on the other hand, I played over six or eight records without finding out what I wanted at the end of that time, I became indifferent, and more than likely I would give up right then and there,—simply because I was too distracted, too confused to pay any further critical attention.

Getting After the Customer

You may say that it is not precisely the same thing as the customer who comes in looking for records that he may want to get. In that case, I shall not be able to agree with you, and what is more, I have demonstrated the fact still further by going into dealers' stores where I am not known, and I have found that the condition I have outlined does actually prevail. If you do not get your customer interested in the first half dozen records you play, the chances are a thousand to one you will not get him interested at all. At that time, of course.

And that is where the particular value of keeping track of your record business comes in. If, for instance, a salesman can turn to a record book, which shows just what records you have supplied me with in the past, he will be able to tell about what sort of thing I shall be interested in now. Every time a customer comes into your store and you do succeed in interesting him right off the reel in one or two records, there is a chance that you may be able to get him lined up for a dozen or more. That, of course, is the salesman's business.

No consideration of the retailer's problems would be complete without some thought being given to the matter of advertising. I have very little more to tell you concerning advertising than was embodied in the address I made to the Jobbers' Convention in Atlantic City. This, together with other papers given at that time, has been reprinted for distribution among Victor dealers, so I think that for the present I can safely omit the consideration of advertising methods.

I would, however, call your attention to the fact that New York State, together with a number of other States, now has a law against misleading advertisements. I don't mean to insinuate that any of you would deliberately permit misleading statements to be made in your advertising. I only wish to caution you against publishing misleading statements unintentionally.

In the space of a few years, the Victor record catalog has developed into the most complete, most comprehensive catalog of music that the world has ever known. I consider it a monumental production.

They are telling us that the finest piece of symphony recording ever issued is the Chicago Symphony Orchestra's rendition of Grieg's "Spring" —Columbia Record A5844 in the October list. New recordings by the Chicago Symphony Orchestra in the November list.

(Write for "Music Money" a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

DETROIT ASSOCIATION TAKES UP INTEREST QUESTION

Stand of Furniture Houses Causes Complications—Committee Handling Matter—Stock Shortage Problem Still to the Fore—Dealers Preparing—Michigan Edison Dealers to Meet

DETROIT, MICH., October 5.—The retail business in Detroit and throughout all of Michigan is showing improvement right along, and those engaged in the talking machine business are not worried half as much as to whether they will be able to sell goods this fall, as they are not being able to get them. Even jobbers who solicit Michigan business have expressed a doubt as to whether the factories will be in a position to fill orders 100 per cent. It's the old story at this time of the year of the manufacturers of being "oversold," and when we say manufacturers we refer, of course, to the standard manufacturers. It seems strange, and yet it is true that every fall there is a shortage of the popular numbers. The big call seems to be on $100, $150 and $200 machines, while the high-class trade is perfectly willing to pay from $250 to $450 for talking machines. The unusual prosperity of Detroit and other Michigan towns is bound to create a lot of business for talking machines. It stands to reason that men who are making in wages from $5 per day and up are going to install talking machines in their homes for the entertainment it provides for the entire family. Dealers will be acting wisely by taking greater precaution this fall than ever in the matter of extending credit. It will pay them to turn down an occasional buyer who is doubtful on credit rather than sell everybody who comes along, and then find themselves short at holiday time, when they have opportunity to sell to reliable customers, and many for spot cash. Every year dealers find that the last minute people come in who have the cash in their jeans to pay for talking machines. It's not nice to lose such business, and some of it can be avoided by a little discrimination on the part of the dealer.

So once more we advise precautionary methods on the part of the dealer as to whom they sell their talking machines this fall.

The Detroit Talking Machine Association started its series of fall meetings on September 18 with a splendid attendance at the Hotel Charlevoix. Most of the leading firms were represented, and many of them even had their entire sales force on hand. It was a successful meeting, and good results are sure to come. There was considerable discussion as to the policy of charging interest. There were many good arguments pro and con. The installment furniture houses claim it would be almost impossible for them to charge interest because they do not do so on furniture, and the same customers would strenuously object to paying it on talking machines. However, the fact was brought out that they would be helping the situation along if they at least did not advertise the fact that they charge no interest. On the other hand, it was the contention that dealers who confine their business exclusively to talking machines should certainly charge interest, otherwise they were making competition unfair, and one particular downtown dealer said that unless those exclusive firms did inaugurate a policy of interest-charging they would discontinue their present method and join the band-wagon by advertising the fact that "hereafter we charge no interest." This particular dealer said it was certainly better for all concerned if every dealer did charge interest in preference to no one charging interest, and concluded his address by remarking, "Now, we are all in the business to make money; why not look at this matter from the most sensible standpoint, and let's all charge interest. If we do that the public will pay interest without kicking and we will all benefit; if we don't charge interest, we certainly will not sell any more machines, and our profit at the end of the year will be considerably less. Why throw away profit?" A committee of seven is now handling this proposition, endeavoring to work out some sort of an agreement between the firms who are exclusively talking machine dealers.

At the time of writing this article, we understand from R. B. Alling, manager of the Phonograph Co., that there is to be a general meeting of Michigan Edison dealers in Detroit, sometime during the month of October. It will be the first meeting of its kind in Michigan. Mr. Alling, by the way, recently made a trip through the West, accompanied by Mr. Bloom, of Cleveland, for the purpose of seeing what other jobbers were doing.

Wallace Brown, of 31 East Grand River avenue, has started a big advertising campaign on the New Edison. The copy being used in Mr. Brown's advertising is of an entire different nature than usually seen in this class of advertising. It has "punch," and is certain to cause people to read it. We must take our hats off to Mr. Brown for his ability to inject originality in his advertising.

We are looking forward anxiously to the new ground floor Victrola parlors of Grinnell Bros., at 243 Woodward avenue, which, from information handed out, will be one of the finest first-floor institutions of its kind in the country. Heretofore all of the Victrola business of Grinnell Bros. has been transacted in the basement.

K. Mills, manager of the local Columbia branch, says there is very little news to report; that the demand for machines and records was never greater, and that his only hope is that he will be able to keep his warerooms well filled in order to take good care of his dealers.

H. N. McMenimen, managing director of the Pathé Frères Co., recently spent considerable time here conferring with J. R. Peckham, of the Pathephone Co., regarding business.

John M. Dean Corporation
Putnam, Conn.

Manufacturers of

Talking Machine NEEDLES

Dean Service covers every essential need in talking machine needles. Needles furnished in bulk or in special packages. Quality needles only.

The Brunswick-Balke-Collender Co. branch in this city will soon start activity to solicit orders for the new Brunswick phonograph.

Albert R. Saunders, in charge of the phonograph department of The Michigan Drug Co., in this city, recently took on the Michigan agency for the Carola machine.

In the hope that he could get the factory to increase shipments on machines, A. A. Grinnell, treasurer of Grinnell Bros., Michigan Victor jobbers, made a trip several weeks ago to Camden. He was assured that everything would be done to take better care of Michigan dealers. Of course, we all know that never in the history of the Victor Co. were they so flooded with orders.

During the "opening" of the J. L. Hudson Co. the week of September 25, the whole store was in autumn colors. The windows of the piano store were in keeping with the rest of the store. The floors were draped in grey panne velvet, and the walls hung in the same material. Three Victrolas were on exhibition in the center of the window with a half dozen records.

The Phonograph Co., of Detroit, has enlarged its floor space by taking the entire fourth floor of the building at 184 Jefferson avenue, in addition to its four-story building at Woodward avenue. The reorganization of floor space means that the 256 Woodward avenue location will hereafter be for retail exclusively, while the Jefferson avenue place will take care of wholesale.

On September 18 Max Strasburg, Victor and Columbia dealer at 74 Library avenue, celebrated the fifth year of his existence in the retail business. Previously to starting for himself, Mr. Strasburg was for many years in charge of the Victrola department of Grinnell Bros.

F. S. Binger, who audits for the Columbia Graphophone Co., recently spent a few days at the Detroit branch. He was astounded at the big figures as compared to the last time he was in town, which shows how the company's business in the Wolverine State is growing.

ROBSON & ADEE SECURE THE AGENCY

SARATOGA SPRINGS, N. Y., October 5.—Robson & Adee have just been given the exclusive agency for the Edison Diamond Disc, and the firm has a large number of styles of these machines on hand. There has been little difficulty in interesting the patrons of this large store in the merits of the Edison proposition when it is presented properly.

BOLWAY & SONS NEW BUILDING

In Syracuse, N. Y., Is Rapidly Approaching Completion—Opening Will Occur on November 15—Big Demand for the Edison

SYRACUSE, N. Y., October 5.—One of the finest talking machine shops in the city, rapidly nearing completion, is that of F. E. Bolway & Sons, Inc., which is located at 224 Salina street. The building is four stories high of the Gothic style, and terra cotta trimmings on the front add to the general architectural effect. It will be exclusively an Edison shop. The first and second floors will be devoted to retail purposes, while the upper floors will be used for wholesale purposes. On the ground floor there are to be seven booths, together with a handsome recital hall and showrooms. F. E. Bolway & Sons are Edison distributors for the Syracuse zone, and the official opening of this handsome establishment will take place on November 15.

BOOM TIMES IN PITTSBURGH

Payrolls in That Section the Largest in History, Declares J. C. Roush

PITTSBURGH, PA., October 4.—These are boom times in this section of the country, and talking machine dealers are getting their share of the good business. "Pittsburgh and vicinity, on account of its immense steel, coal, oil and coke industries, is having the largest payrolls in its history," declared J. C. Roush, president of the Standard Talking Machine Co., Victor distributors, "and the talking machine business is booming to such an extent that it is almost impossible to even approximately supply our dealers with goods, though we are all confining our shipments to the immediate vicinity and permitting nothing to go to any point beyond half way to the nearest jobber."

FEATURES THE HEINEMAN MOTOR

May Co. Cleveland Department Store Advertises Fact That Music Master Machines it Handles Contains That Motor

CLEVELAND, O., October 6.—An unusual tribute was paid recently to the Heineman motor, when the May Co., one of this city's leading department stores, in advertising the fact that it had secured the agency for the "Music Master" phonograph, mentioned specifically in its advertisement that the machine is equipped with the Heineman motor. This is one of the first (if not the first), advertisements which has appeared in a Western newspaper referring by name to a talking-machine motor, and the Otto Heineman Phonograph Supply Co., manufacturer of the Heineman motor, has been complimented by the local trade on the prestige its motor has achieved. The paragraph referring to the Heineman motor read as follows:

> The Music Master has a Heineman double spring motor, fully guaranteed in every way. Will play four records with one winding.

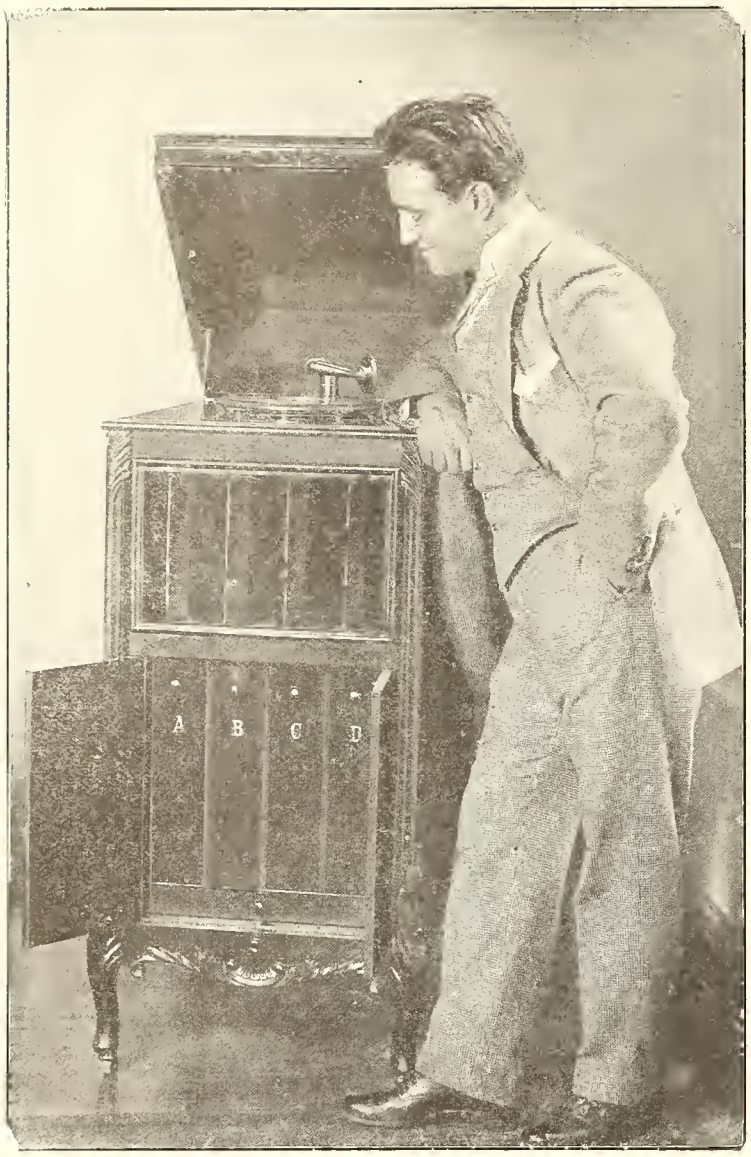
LAZARO TO RECORD FOR COLUMBIA

Famous Spanish Tenor to Sing Exclusively for the Columbia Co.—A Gifted Artist

The Columbia Graphophone Co., New York, announced this week that arrangements had been concluded, whereby Hipolito Lazaro will record exclusively for the Columbia record library. His first records will go on sale October 10 and include four arias, which are among the most popular selections in this famous tenor's repertoire.



Lazaro Listening to His Columbia Records

Although Lazaro has never appeared in this country, he has achieved renown and fame in different parts of the world, having appeared on the operatic and concert stages in Spain, Italy, Buenos Aires, London and Havana. In all of these cities he won the enthusiastic applause and commendation of critics, music lovers and fellow artists.

Born in Barcelona, in 1890, Lazaro, at the age of twenty-six, possesses a voice which is recognized by the musical world as one of the few marvelous voices of the present generation. His voice is remarkably powerful with exceptional range and control.

It is understood that Lazaro will probably visit this country in the near future to appear at several special performances, and it is further reported that he may become a member of the Metropolitan Opera Co. within the very near future.

The Columbia Co. is planning to spend a very large sum of money in national and newspaper publicity to feature Lazaro's records. In fact, this tenor's recordings will be more extensively advertised than those of any one prominent Columbia artist in recent years.

GOOD WINDOW DISPLAYS

While visiting in large cities you have observed the care and art that is displayed in the show windows, and the crowds that are attracted thereby. You have said to yourself, "That is all fine for big cities, but not essential to my welfare in a small place." A blundersome mistake. Human nature, in city or village, is the same old thing. A village merchant who keeps his windows as an index finger pointing inside, sets the pace for weal or woe. If he realizes the value of displays then he is on the right track.

ORIGINATE CLEVER STUNT

The Musical Record Co., of Los Angeles, have originated a clever stunt in printing on small cards a verse and chorus of some of the popular hits, accompanied by the Victor record number. In this way interest is stimulated in this latest issues of the Victor records.

ACTIVITY AT THE UDELL WORKS

Noted Cabinet Manufacturing Concern in Indianapolis Reports Exceptional Demand for Its Products From Talking Machine Trade—Comprehensive New Catalog Issued

INDIANAPOLIS, IND., October 4.—There are few busier spots in the music trade industry to-day than the plant of the Udell Works in this city. There is evident a steadily growing appreciation of the company's cabinets, both in talking machine and the player-piano fields. This is undoubtedly due to the very attractive designs gotten out, and the reliable construction and careful finish of their products.

An idea of the wonderful line now produced is to be found in their new cabinet catalog, which has just been issued. As the index page shows, this company is making an extensive line of cabinets for Victrolas, Grafonolas, Pathephones, Aeolian-Vocalions, Sonora and Empire talking machines. This volume is very handsomely produced, and dealers and manufacturers will find it to their advantage to have one of them on hand for reference purposes.

In a chat this week with Tom. Griffith, sales manager of the Udell Works, in regard to the business growth of the company, he remarked: "We are in close touch with the dealers throughout the country, and know exactly what they require and what they can sell. We, therefore, are able to supply those designs that they are apt to duplicate on and which show a good profit. Our construction and finish is recognized as being second to none. We realize, however, that we must make the price which we are able to do because we get the volume of business. In the line of talking machine cabinets, we have built them so that the portable types of machines and the cabinet would match and make an attractive unit, and we have unquestionably succeeded wonderfully well.

"As far as our plant is concerned, we were never busier, and, in fact, our production department is working on top speed all the time. Our suggestion to dealers would be that if they consistently can place their orders early that they do it. We are not entirely selfish in making this suggestion, as we want to give them the right kind of service, and this year, of all years, the matter of deliveries is proving to be a big problem."

NEW CONCERNS IN CANADIAN FIELD

There Will Be More Competition in Handling Great Demand that Is Expected to Materialize this Fall and Winter—Advertising by Use of Talking Machine Records—Some Strong Publicity by Established Concerns

TORONTO, CANADA, October 4.—The talking machine trade in the Dominion is keeping up in excellent shape, according to reports from all sections and there is every reason to believe that the coming season will break all previous records in the matter of demand.

A number of new concerns have entered the field, with the result that there will be plenty of competition in handling the increased trade.

Among the new dealers is W. McPhilips, of 189 Dundas street, London, Ont., who is handling the new Edison Diamond Disc phonograph.

The Carola Co., of Canada, with headquarters at 59 Yonge street, Toronto, also gives much attention to the field.

During the recent visit of the Aborn Opera Co. to this city several firms handling the Victor line made a special drive which included opera records, and have also featured the Victor book of opera with success.

During the recent Toronto Fair, the Columbia Graphophone Co. ran full pages in the leading local newspapers, calling attention to their product in general, and giving a list of all local dealers handling their line.

A man in Victoria, B. C., is credited with having installed an old-style horn talking machine in one end of his buffet. The machine was placed in one drawer, the horn discarded and the drawer above the machine used in place of the horn. A sliding panel was built at the end of the buffet to permit of the changing of needles and records.

A progressive Canadian publication recently called the attention of 2,500 prospective advertisers to the value of its columns by sending each a small record on which was recorded some of the chief arguments used by the publication. It is declared that the scheme proved very fruitful.

Several types of the Brunswick phonograph are now on display at the Toronto showrooms of the Brunswick-Balke-Collender Co., having been constructed at the local factory.

The Brantford Piano Case Co. factory at Brantford, Ont., is now marketing a new talking machine called the Brant-ola.

Gourley, Winter & Leeming are featuring daily recitals in their music rooms from 12.30 to 1.30 P. M., and again later in the afternoon, featuring the Edison Diamond Disc phonograph.

The R. S. Williams Sons Co., Ltd., Canadian jobbers of the Edison line, have been running some strong advertising under the caption of "A Word About Music." The name of the company and that of the product which it handles does not appear.

NEWFOUNDLAND WANTS TALKERS

WASHINGTON, D. C., October 9.—An American Consular officer in Newfoundland reports a possible market in that country for inexpensive talking machines costing from $3.50 to $5. Manufacturers interested in receiving further information may secure the same by addressing the Bureau of Foreign & Domestic Commerce, Washington, D. C., or at the Custom House, New York City, and referring to foreign trade opportunity No. 22,542.

NEW EDISON DIAMOND DISC SHOP

LITTLE FALLS, N. Y., October 5.—A new Edison Diamond Disc Shop has just been opened in this place by M. J. Coates, who is familiar with the Edison business, and is destined to make a good success. The official opening of the new shop was on September 30, and there was a large crowd of interested persons present.

NEW CRESCENT REPRESENTATIVES

Important Retail Connections Recently Made in New York and Vicinity

During the last month the Crescent Talking Machine Co., of New York, added some new retail representatives to their rapidly growing chain. The "Little Music Shop" at White Plains, N. Y., and the "Little Music Shop" at Tarrytown, N. Y., both handle the Crescent line under the direction of H. R. Stanton. In New York City, Bauman & Co., of 152d street and Third avenue, have established themselves as exclusive Crescent dealers and three handsome soundproof demonstration booths are now in the process of construction. These booths are of a style which is properly termed "Crescent Style"—in other words, Crescent dealers are adopting a uniform type of booth consisting of sash work of a cream color with an interior of compo-board which is patterned to represent large yellow tiles. The continuation of this policy means, of course, that wherever Crescent dealers are found this same unique style of high-class booth will also be found.

Columbia Graphophone Co.
Woolworth Building, New York

BECOMES FACTORY MANAGER

Chas. W. Neumeister Takes Charge of the Heineman Plant at Elryia, O.

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, announced this week the appointment of Charles W. Neumeister, as factory manager. Mr. Neumeister is spending a few weeks at the company's executive offices in New York, and will then proceed to the Heineman factory at Elryia, O. Mr. Neumeister is well known in industrial and commercial circles in London, having for many years successfully conducted some very important concerns in the British domestic and foreign trade. His lengthy executive experience, coupled with his technical knowledge, ideally equips him for his new position.

Chas. W. Neumeister

Mr. Neumeister succeeds W. C. Pilgrim, who has joined the Western sales offices of the Otto Heineman Phonograph Supply Co. as assistant to S. A. Ribolla, sales manager of the Western division.

PORTFOLIO OF OUTING PICTURES

Pleasing Souvenir of Talking Machine Men's Picnic Prepared by Philip Marcus

Philip Marcus, manager of the wholesale department of the S. B. Davega Co., prominent Victor distributors, surprised a number of his friends in the retail trade recently by presenting them with attractive portfolios containing ten photographs of groups and happenings at the outing held at Rye Beach last month.

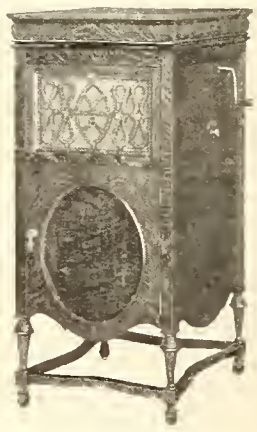
The pictures were snapped by Mr. Marcus, who ranks high as an amateur photographer, and the portfolio made an excellent souvenir of the pleasant occasion.

The Stewart Phonograph Co., Chicago, has increased its capital stock from $50,000 to $100,000.

STARR CO. ANNOUNCE NEW MODELS

Art Styles Have Been Added to the Starr Line of Phonographs—Output Almost Doubled

RICHMOND, IND., October 5.—Four new models have been added to the line of phonographs



Style VI
"William and Mary"

Style VII
"Jacobean"

manufactured by the Starr Piano Co. These are of classic design following the styles of the old English masters and are beautiful exponents of the school to which each belongs. Style VI. is of "William and Mary" design; Style VII., of the "Jacobean;" Style VIII., of the "Adam," and Style IX., of the "Sheraton." They are priced from $250 to $300.

Style VIII
"Adam"

Style IX
"Sheraton"

The output of phonographs at the Starr plant has almost doubled since the completion of the new six-story building and new agencies are being made daily to facilitate the distribution of these instruments.

DEMAND FOR EDISON LINE

BENNINGTON, VT., October 5.—P. R. Burt has been able to build up a very satisfactory business in Edison disc machines since he took the agency. The same story is true of Mr. Burt's Greenfield, Mass., store, where a large line of Edison styles is constantly kept on hand.

Bernard Titler, who recently opened a talking machine shop at Lenox avenue and 116th street, New York City, reports a very pleasing demand for Jewish talking machine records during the recent holiday season.

Not An Experiment

The VICSONIA is favorably known to the trade as the reproducer that plays the Edison Records *perfectly*.

It is *NOT* a "cheap" instrument.

It does *NOT* damage the record.

It does *NOT* require a mechanic to attach it.

By its pure, sweet tones and remarkable absence of blast and rattle

The VICSONIA
Has Demonstrated Its Superiority

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W LIONEL STURDY, MANAGER.

Despite War-Time Handicaps the Talking Machine Trade of England Shows Activity Far Beyond Expectations — Factories Working Night Shifts—Increased Cost of Production Believed to Seal Doom of Cheaper Records—D. Denville Simons, Noted Expert, to Make Headquarters in New York—Something Regarding the Newest Record Lists—Military Exemption for Employes of Gramophone Parts Factory—A New Portable Machine Introduced—Form Russo-British Chamber of Commerce—New Record Exchange Plan—Growth in Export Trade—News of Month

LONDON, E. C., ENGLAND, October 3.—With the season now well ahead of us, gramophone and record sales, as may be expected, are steadily rising week by week, the indication being one which leads to the belief that bulk trade will reach proportions quite beyond the most sanguine anticipations. Already we hear of night shifts for the larger factories, that is, so far as labor conditions permit. It is the latter feature perhaps that appears to be causing more anxiety than anything else, for all the time there is an insistent call for men, and yet more men by the army authorities on the one hand, and commerce on the other. As the supply for the army increases, so of course, the labor position in trade circles becomes more acute, and manufacturers must perforce make the best of it by substitution in the shape of girls and such unskilled men of the older class as may be available. Another reservoir is that of discharged soldiers who, if not physically disabled, quickly become efficient record pressers after a few weeks' tuition. With it all, however, there is a shortage of men. It is not confined to one particular trade more than another, but perhaps our industry must expect to suffer the most.

The demand for records is already sufficient to justify the inauguration of a night shift in nearly all gramophone record factories. It is obvious, therefore, that the supply this season will not outrun the demand; rather the contrary, I should say.

Assured of the demand, we may leave it to the manufacturers to meet it somehow or other, though the job is not an easy one.

Is the 18-Penny Record Doomed?

The natural result of the foregoing conditions in the labor market has been a general all-around increase of wages. The voice of the working man grows stronger and stronger; it is impossible to withstand; and in consequence we are in the throes of an insidious competition among the manufacturers themselves. This competition for labor is not openly recognized, but it none the less rests upon a strong foundation. The system in force is a flat rate for each dozen records pressed and passed. It should be noted, however, that the rate varies somewhat, according to locality—London or provincial, with the inevitable result that labor is naturally attracted by the best price. Among some of the manufacturers there is an unwritten law which recognizes the principle of discouraging a man who goes from one firm to another — the always-on-the-move-never-satisfied-sort, bartering his services to the highest bidder. But there is no general acceptance of this principle. A is only too glad if he can get a good man from B, and B perhaps feels justified in playing the same game on C. The consequence is productive of a good deal of restlessness among the workmen in the plants.

Partly on the foregoing grounds, and more particularly to the increased cost of living, wages are very much up. This preliminary aspect of the situation leads me to perhaps a more important reason why I think that manufacturers of 18-penny discs will eventually be forced to seriously consider the prospect of having to raise the retail price. The margin of profit on a double-sided disc carrying two good selections by reputable and often expensive artists, is of a continually diminishing quantity. We have seen that this is partly on account of the natural increase in the value of labor, and on top of this are two further considerations—the enormous increase in the price of record material, etc., and higher taxation charges in every department of commercial and social life. Dealing particularly with the cost of materials, we find that shellac, one of the chief ingredients of records, has gone up so enormously in price—largely, it is said, in consequence of speculation, that the government is now considering what steps should be taken to put a stop to this inflation of the price of a commodity which, be it noted, is used a good deal for military purposes. However, the latter may be, the increased cost means a big slice out of the profits of record manufacturers, and though I am deeply sensible of the government's right to first claim, it only emphasizes one of the many and increasing difficulties in which the gramophone trade finds itself to-day. In the manufacture of records, it would not be wide of the mark to put the total productive cost at 33⅓ per cent. higher to-day than formerly. What of to-morrow?

FROM OUR LONDON HEADQUARTERS—(Continued from page 103)

W. Denville Simons Leaves for America

Owing to present trade circumstances and restrictions over which there can be little or no control during the war period, the British gramophone trade, it must be admitted, offers but a limited field for enterprising men, to whom active mental and physical work is the very salt of life. It is on this ground that W. Denville Simons has been moved to seek a new field for his almost insatiable craving for higher achievement in the industrial sphere of talking machine trade development. He sailed on the steamship "Alaunia" September 16, for New York, where he expects to settle more or less permanently. A few days before sailing Mr. Simons visited the London office of this trade newspaper, and in the course of a chat with the writer, spoke of his regret that circumstances compelled a severance from social and business friends of so many years close association. Up and down the country wherever one may go, his friends are many, and not least among the Provincial factors and dealers. Mr. Simons' early commercial life experience in American trade circles, over a number of years, were diplomatically modified to suit what is sometimes termed British insular prejudice, and in no field was his great knowledge of men and the world applied more successfully than when he joined the Edison concern as sales manager soon after they started in London. He it was who did most of the missionary work in establishing the principle of price maintenance among our dealers. To those acquainted with conditions prevalent during the early talking machine propaganda work in England, it will be obvious that Mr. Simons undertook a task of some magnitude which called for the exercise of tactful persuasion and argument. A long chapter could easily be devoted to the many difficulties which beset his path, but sufficient for the day, and the restricted space at my disposal, is that he succeeded in gaining the signatures of quite 90 per cent. of Edison dealers to the famous price-maintenance agreement, which set the seal of a fine principle to what has since proved "a boon and a blessing" to the British gramophone trade as a whole.

Over ten years with the Edison Co., Mr. Denville Simons finally left to take his place in the development of disc record manufacture. He pinned his faith to the phono-cut, and in 1914 started the Diamond Disc Record Co., Ltd., in association with an old trade friend—S. P. Turner, one time manager of Messrs. Pathé Frères. It says sufficient for Mr. Simons' trade standing, and the merits of his product that the first month's supply of Diamond records was sold four times over in the first few days! Due, partly to difficulties in manufacture consequent upon the war, the Diamond Co. was early this year absorbed by the Pathé people, Mr. Simons becoming sales manager of the whole Pathé output.

And now to the new world he wends his steps, fully assured of a right hearty welcome from more than one big corporation. At the moment I am precluded from divulging his future plans, but this much may be expected—that within a short time we shall have news of him more probably than not, connected with one of America's foremost talking machine companies. By his intense activity, organizing ability, and unbounded faith in the future of the gramophone, Mr. Simons has left a mark of no mean character and strength. The Talking Machine Society movement, which happily continues to gain strength in this country, evoked his interest almost from its commencement some six years ago. He was president of no less than five phonograph and gramophone societies, whose growth was, to a large extent, due to his encouragement and influence.

It need only be said that our friend will be very much missed, and in his new sphere of action we shall all follow with interest his future movements towards the goal which he has set out to attain. To that end—confident in his ability to "get there"—our sincere good wishes.

If Dealers Got the V. C.!

If a V. C. were awarded to the dealer with the biggest sales of the year, and he were asked, like the newly-elected M. G., why he succeeded, his answer would be brief and to the point—"Zonos"!

So runs the opening paragraph of this month's bulletin to Zonophone dealers directing their attention to as fine an array of new records as could be issued for the opening-of-the-season month. A new baritone, George Parker, makes his debut on twelve-inch record A214. In company with Sidney Coltham, the Zonophone tenor, Mr. Parker takes his part in "The Crucifix" and "Solo Profugo"—from Martha—with exceptional brilliance. We are to hear him in some solo numbers next time. Paul Astor's pianoforte technique, in two well-known items,

FROM OUR LONDON HEADQUARTERS—(Continued from page 104)

bespeaks at once the master, and sufficient unto the day is the fact that his records command very large sales. The evergreen "Raymond Overture," parts one and two, is down to the credit of the Black Diamond Band, who also contribute two attractive selections of a semi-patriotic nature on ten-inch disc 1668. A record that will attract more than ordinary attention in 1677 bearing Schubert's "Serenade" (arranged by Charlton), on the reverse being the "Evensong," both to the credit of Miss Louise Brooks (soprano), and Harold Wilde (tenor), with orchestra. The combination is excellent—reaching a degree which we are inclined to think will make the public thirst for more. There is, of course, many other prominent names on the list, which, as usual, well emphasizes the Zonophone quality throughout.

A Good Advertising Start

No one firm can afford to neglect the political and material results arising from a well-planned advertising offensive. That is more obvious than ever in these troublous days. Though, at the same time, it must be admitted that gramophone firms could find plenty of excuse did they so desire. But no excuse is needed; every firm is out to maintain its position and general standing, apart from the sales-stimulating aspect, no matter how good its products, or its system of trading. But particularly do we admire the big outlook which the "His Master's Voice" company consistently display in good as in difficult times, like the present. Their broad policy, which has for its direct aim, a whole-hearted support for their large army of retailers, has never relaxed, and to-day we see it as strong as ever. A good start for the season has been made by the acquisition of front pages in expensive daily newspapers, etc. One of the most attractive advertisements was that in the Daily Mail last month, which heralds, we believe, a special advertising campaign for the season. When it is considered in conjunction with the enormous amount this company annually spends on folders, lists, window and shop display hangers, and other publicity ideas, it may reasonably be accepted as a pretty good index of the increasing homage of the public to the pre-eminent claims of the gramophone as an instrument comparable to the highest form of musical art. Which again is fully endorsed by the greatest artists of the day, who confide their reputations to His Master's Voice Co. New and glorious musical programs are out, and that is sufficient for the wise dealer!

Present Claims for Exemption

Under the Military Service Acts there is a clause which leaves to the Tribunals the power to grant exemptions to men who can prove their indispensability in their particular business. It may be mentioned that in the majority of cases the Tribunals take the view that no man is indispensable, and in consequence the employers find they are only allowed a month or so's grace in which to replace managers and others in responsible positions. A case in point is that of Messrs. Brown Bros., Ltd., of 22-34 Great Eastern street, E. C., gramophone and gramophone part factors, who appealed on behalf of sixty-two of their employes, on the ground that it would be a business hardship to them if they went. Two members of the Tribunal, together with the military representative, had spent a day at the firm, as a visiting committee, to investigate the appeals, and they had now brought forward their recommendations as to the exemptions and dismissals. Mr. Harwood said the firm had a splendid record, as they had lost two hundred and seventy-two men out of the original staff of five hundred and twenty-six. He had to frankly admit that he felt the gravity of the situation as to adjudicating on such an immense business, and to be candid he would say that, although they spent something like four hours on the firm, it was impossible to grasp even in a minor degree the immensity of the business. They had fifty-four departments, and a man was absolutely essential for each. To give an idea of the huge business he had only to say that the annual turnover was a million and a quarter sterling. Mr. Porter said it seemed strange to him that such a number of married men had been recommended as having to go, while so many single men remained behind. Mr. Harwood, who was one of those to visit the firm, said the real honest fact about the matter was that the single man had shown that he had got the brains, and had pushed himself forward, while the married man had lagged behind. There was a good deal of argument between the representative of the firm and certain members of the Tribunal, which finally resulted in the majority of the men being given until the end of the year.

Smallest Portable Gramophone

What may truly be described as the smallest portable gramophone on the market is aptly named The Compactophone, the invention of D. Sternburg, the Sterno Manufacturing Co., 19 City road, London. It is put up in a finely polished oak cabinet, with mechanism, fitments, etc., of reliable quality. When closed the total outside measurements are fourteen by eleven and one-half by seven inches, and this, be it remembered, includes carrying space in the lid of the instrument for no less than twelve discs! The scientific adjustment and arrangement of the tone-arm position allows for a sound-resonating chamber of a size sufficient to produce a tone volume equal to the average exterior-horn machine. The Compactophone is really a wonderful little gramophone. To say that it has caught on would be something beside the mark in view of the fact that notwithstanding special efforts, the company has until recently been quite unable to satisfy the demand. In the latter respect, the position shows signs of improvement, and oversea traders are, therefore, invited to put in stock what is one of the finest trading lines extant.

It should be mentioned that this firm is the sole agents for the well-known gramophone motors made by Messrs. Mermod Frères, Switzerland.

London Musical Successes Presented

Much of the cream of London's musical successes are impressed on the well-known Grammavox records, the latest list of which shows that the company are fully alive to the necessity of maintaining a standard of quality comparable with any similar-priced record on the market. A specialty of the Sound Recording Co., Swallow street, Piccadilly, W., is the cultivation of stronger commercial relations with oversea traders. The company is in a position to offer most attractive prices, and equally as important, complete and prompt delivery. All interested may obtain lists, catalogs, trading terms, etc., upon application.

Trade Is Satisfactory

A recent interview with Hirst & Co., of Grove road, Willesden Green, elicited the pleasing information that trade was never so satisfactory as during the last few weeks. This firm caters for a number of wants in the musical industry, its specialties being sound boxes, springs, needles, screws, electric batteries, and a number of lines notably in pianoforte iron mongery.

Form Russo-British Chamber of Commerce

In view of the prevalent desire to establish more intimate commercial relations between the Russian and British Empires it was decided at a large gathering of British and Russian firms interested to form a Russo-British Chamber of Commerce in London. Official recognition is secured by the promise of the Imperial Russian Ambassador to become honorary president. The objects of the Chamber is both political and commercial, with, of course, special attention to the promotion, study, and development of trade between the two countries. Composed of British and Russian business men, M. P.'s, etc., and apparently free from the atmosphere of lawyers, one may hope that some good will result. It is assured if only the hard-headed business man has a free hand.

New Record Exchange Scheme

The Winner Record Co., Ltd., has just completed a very good record exchange scheme with their dealers, which made provision on liberal terms for the release of retail junk stock, broken and otherwise slow selling records. It has proved altogether successful. With the opening of the season sales are looking up, and no more appropriate time, therefore, could have been chosen. Shelves filled with new stocks offer the best possible encouragement for increased activity, and realizing this, it is no wonder that Winner dealers have seized a golden opportunity to start on the right side for a quick turnover. The huge Winner manufacturing facilities are already closely taxed to keep pace with the demand; indeed I am told that given their ability to get the necessary labor, night shifts are to be started as soon as may be possible.

The foregoing makes good reading as a prelude to a brief examination of the company's new record offerings. Figuratively speaking, any firm can make a record, but the Winner people certainly know how to make good ones. To its indorsements refer to the latest program. Here we have the best crystallized genius in shape of—The Two Bobs, Olga and Eli Hudson, Sergt. Leggett, Robert Carr, The Schumann Quartet, Jack Mills, Stanley Kirkby, etc., all of whom contribute just those selections as are best calculated to achieve the dis-

tinction of enjoying big sales. I can but strongly advise all oversea trades to get samples of these Winner's, and let them, as they will, speak for themselves.

Interesting Trade Returns

Pleasant reading is that relating to our trade returns for last month. For that period the total export figures amount to just under £48,000,000, the highest since the outbreak of war, and over £15,000,000 greater than last August. Notwithstanding the difficulties of trading as a result of men being called up for the army, our total exports for the first eight months of this year amount to the huge figure of £335,851,000, which, be it noted, is nearly £12,000,000 higher than during the same period in 1914, before war broke out. The foregoing amounts refer only to exports. On the import side the figures are, of course, equally large, but it is satisfactory to observe that a decline is now registered almost each month. Other—not so pleasing news to some of us perhaps—is that the United Kingdom revenue during 1915-1916 totalled over £337,000,000! The new Customs duties amounted to very little altogether—only some £74,000 in the case of musical instruments!

A "Record" Offer

TEN thousand job records, all brand new and British made, 10" double-sided, 50% songs and 50% bands—and the price, $1.50 a dozen, f. o. b. Who'll be the wise man to snatch them up? Don't be too long thinking about it. Wire to-day!

¶ Write for our New Season's List, which contains some astounding offers.

W.H. Reynolds (1915) Ltd., 45, City Road, London, E.C.

Big Call for Guardsman Records

By the figures quoted last month, it is apparent that the call for "Guardsman" records from oversea traders is very much on the increase. The Invicta Record Co., whose product it is, informs me that they are doing their best under difficult circumstances to satisfy all requirements, and so far have been able to keep the supply fairly level with the demand. Now that the latter is reaching larger proportions each month, arrangements are in hand, whereby it is hoped to leave no loophole for complaint on the ground of deferred deliveries, etc., but customers abroad are asked to make every allowance for the exigencies of the times. No delay in executing orders has occurred so far, and it is hoped none will in the future. The Invicta Co. is certainly very much alive to the splendid opportunities for trade openings abroad, and they may, I have little doubt, be relied upon to keep their oversea customers fully supplied with Guardsman records.

Great Italian Tenor for Columbia

A sensational record by a great Italian tenor, who has taken America by storm, is provided in the announcement of the first recording by Hipolito Lazaro on Columbia this month. In this, his first record, he sings the air of Rhadames, "Celeste Aida," from "Aida," with a flawless beauty that is simply amazing.

The Columbia October supplement surely constitutes a landmark in the history of records, for never before has such a gathering of great artists been presented in one month's issue of records. To all earnest students of recorded music, this list will prove of absorbing interest and value.

The greatest of all British contraltos, Clara Butt, is represented by a notable trio of records in the Columbia October supplement, leading off with a superb exposition of the Handelian oratorio air "Rend 'il Sereno," from "The Redemption," in which Madame Clara Butt gives of her very richest powers. In the second record, "Time's Garden," this lovely voice with the 'cello obligato is delightful in the extreme. In the last of these three great records, the great contralto's rendering of "O Divine Redeemer" is a perfectly individual one, and the full round quality of the voice in the principal melody and the pure ringing upper notes, are striking features of this reproduction.

Godowsky, the famous Polish pianist, is represented by Chopin's waltz, and Henselt's "Gondoliera," and "If I were a bird."

Sergeant Dwyer's Regal Historic Record

When, in February last, we announced that Sergeant Dwyer, V. C., had made a unique record for Regal, we described it as "a human document." To-day, it is more so than ever—a priceless souvenir of one of the war's heroic figures. The record (it is No. G7228) is divided into two parts. One-half tells of incidents on the march, and carries us with dates and places from Mons to the Marne, concluding with a lively touch by the "V. C.," who sings one or two of the choruses used by the boys to cheer them on their way.

Henry Wood's Great Triumph

"Till's Merry Pranks," announced on this month's Columbia list, is regarded both by Sir Henry J. Wood and the Columbia Co. as the greatest orchestral record yet produced. Sir Henry J. Wood himself was delighted with the achievement.

EDUCATIONAL STAFF CONVENES

Fifteen Representatives of Victor Co. Educational Department Hold Week's Convention at Camden and Atlantic City—Rapid Progress Made in This Important Work

Preparedness is a byword, even in education, and the Victor educational department is preparing for a banner year in school work. The enormous gain in the number of Victors

Staff of Educational Department of the Victor Co.

and Victor records now used in schools, and the present activity of Victor jobbers and dealers in establishing educational departments, more than fulfill the highest expectations of the Victor Co. in establishing this department of work. Mrs. Frances E. Clark, the director, has recently found it necessary to increase the number of her staff to fifteen members in order to adequately carry on the field work among dealers and schools. The reception accorded this work and its representatives by educational people everywhere, and the increase in music appreciation among school children through the use of the Victor in teaching, at once identifies this movement as one of the most constructive educational projects ever undertaken by a manufacturing firm.

The summer meeting of the department was held last month at the general offices in Camden, and at the Hotel Traymore, Atlantic City. An entire week was spent in equipping each representative with a thorough knowledge of the Victor work in the schools. Work in the English classroom was analyzed and demonstrated. The teaching of folk dances, including some of the most interesting and attractive of the Old English country dances, received special attention. The newly revised Victor book, "What We Hear in Music," by Anne Shaw Faulkner, formed the basis of the discussion of music history and appreciation work in high and normal schools. Model demonstrations in primary, intermediate, grammar and high school grades were given by members of the department, while addresses were given by the heads of the various departments of the Victor Co. A feature of the meeting was an address on the Classical, Romantic and Modern Schools of Music by James Francis Cook, editor of The Etude.

The itinerary of the traveling educational representatives will take them into every State in the Union, and to every town where Victors are being used in the schools. They will co-operate with Victor dealers in the organization of their school work, and will assist teachers and music supervisors in systematizing Victor work in the schools. The educational department now issues five educational booklets, and two more are in course of preparation. The present members of the Victor educational department, under the direction of Mrs. F. E. Clark, are: Assistants, James E. Corneal and Harold D. Smith; traveling representatives, Misses Grace Barr, Henrietta Heaton, Elizabeth O'Connor, Emily Rice, Blanche Sorenson, Messrs. Branson M. DeCou, Franklin G. Dunham, Norman P. Foster, Thomas P. Ratcliff, G. Fred Rieman, Jerome A. Swineford, Robert H. Wilkinson and Irving O. Wyckoff.

ORDERING MOTORS FOR FUTURE

Otto Heineman Phonograph Supply Co. Closes $500,000 Deal for Next Year

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, announced this week that the company has closed a deal totalling $500,000 worth of Heineman motors to be delivered during the coming year. This is one of the largest talking-machine motor orders ever received, and indicates the esteem and prestige which the Heineman motor has attained in the comparatively short while it has been on the American market.

Mr. Heineman returned recently from a visit to the company's factory at Elyria, O., where he was delighted to find all the new departments in complete working order, and the motor output steadily increasing. Mr. Heineman is giving his personal attention to the development of extensive plans whereby Heineman patrons will receive top-notch efficiency in their motor service this coming year.

MANOPHONE OFFICES MOVED

Now Located at Factory in Newburgh, N. Y.—P. J. Lynch Elected Vice-President and Treasurer—Arthur Figner Appointed Assistant Factory Manager—Is Thoroughly Experienced

At a recent meeting of the directors of the James Manoil Co., 60 Broadway, P. J. Lynch was elected vice-president and treasurer, and becomes one of the directors. As announced in The World last month, Mr. Lynch will also act as sales manager for the company, having had much experience in merchandising and developing sales organizations.

The executive offices of the company were removed from 60 Broadway on the first of October and are now located at the factory in Newburgh, N. Y. The removal of the offices to the factory will bring the manufacturing of the Manophone more directly under the supervision of the executive.

The plant is in full operation at the present time and representatives of the Manophone are being appointed throughout the country. Arthur Figner, who for seven years was connected with the Columbia Graphophone Co. and is a thorough practical man, has been appointed assistant factory manager at the Manoil plant. He assumed his new duties the first of October.

ACCORDING TO THE NEWSPAPERS

From all sources, including his records, which yield a fabulous return, Caruso's income must be near the $300,000 mark. Another popular vocalist, whose phonographic records alone yield him an income beyond that of a Steel Trust president, is John McCormack, who is said to have netted $125,000 last year from this source.

Columbia Graphophone Co.
Woolworth Building, New York

PLANS FOR ANNUAL EDISON WEEK, OCTOBER 16 TO 21

Interesting Program Arranged for This Event—The Principal Feature a Contest for Opinions of Laymen Regarding the New Edison and Window Displays

Edison week this year will be observed October 16 to 21 inclusive, and the dealers and jobbers of Thomas A. Edison, Inc., will recognize the occasion by the inauguration of an opinion contest that will be open to owners of the New Edison or those who have heard it either on trial in their home or at the shop of an Edison dealer, and who will submit an opinion regarding its merits. Cash prizes aggregating $1,000 will be distributed among the successful contestants. The contest will be for the express purpose of securing the opinions of people who are representative of the average class of phonograph owners.

Thos. A. Edison, Inc., has received thousands of testimonials from musicians of standing, but the contest is designed to secure the opinions of the laymen. Any person may enter the contest who has been in a position to judge the New Edison, which includes those who own machines, and those who take advantage of a three-day free trial proposition, which will be in force during Edison week under which they can secure a machine for testing purposes. Should any of those who desire to participate be unable to secure a machine under the trial offer, owing to the demands made upon the dealers, they may qualify by hearing the New Edison at the dealer's store. Opinions must be confined to two hundred words or less, and those not winning prizes, but considered good enough to publish will be paid for at the rate of 10 cents per word.

There are three prizes in both the primary and the consolation divisions. In the primary division, the first prize is $500, and the second and third prizes are $200 and $100. In the other class, in the same order, the prizes are $125, $50 and $25.

Very ample time will be allowed for the preparation and entry of the opinions, and the manuscripts will be examined with all possible dispatch, and the awards announced as early as possible. The public announcement of the contest will be made through full-page ads. in a selected list of national periodicals.

Edison week also will be marked by a window display contest in which a large number of Edison dealers will enter. It has been arranged, and will be conducted by the Edison jobbers, each distributor offering prizes for the most attractive windows in his zone. Each jobber will offer four prizes as follows: $100; second, $50; third, $30; fourth, $20. Some jobbers whose zones are small may combine, but every Edison dealer will have an opportunity to compete and a chance to win a prize. The first and second prize winners in each zone will be eligible to the sweepstakes contest in which Thomas A. Edison, Inc., offer three prizes. The first is $200, and the others are $150 and $100. The full details of the window display contest have not been arranged as yet, but it is announced that this year the conditions that govern it will be specially phrased with a view to putting the small dealer upon an equal footing with the large dealer.

NEW WAREHOUSE FOR SONORA CORP.

The Sonora Phonograph Corporation leased recently the entire building at 30 Reade street, New York City, for a warehouse. This is the fourth building in this vicinity which has been secured by the Sonora Corporation for warehouse purposes.

W. PILGRIM ASSUMES NEW POSITION

Appointed by Otto Heineman Assistant Sales Manager for Central West Division

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, announced recently the appointment of W. Pilgrim as assistant sales manager of the company's Central West division, with headquarters in Chicago. Mr. Pilgrim will be associated with S. A. Ribolla, manager of the Heineman Central West division.

W. Pilgrim

Mr. Pilgrim is well qualified to co-operate with the Heineman clientele in the Middle West, as he spent six months at the factory in Elyria, O., gaining an intimate knowledge of Heineman motor, tone-arm and sound-box production.

During the past few months Mr. Heineman completed arrangements whereby the office and sales facilities of the Heineman Central West headquarters have been materially increased. Additional floor space was taken some time ago, and these extra facilities may be inadequate in the near future, as the Heineman business throughout the West is steadily growing.

BLANCHE RING AT SONORA SALON

Musical Comedy Star Presides at Tea and Takes Part in Interesting Musical Program—Audience a Large and Fashionable One

One of the particularly interesting and attractive features of the local publicity of the Sonora Phonograph Corporation, has been the series of impromptu recitals and receptions held at the salons of the corporation, 668 Fifth avenue, the latest of these events being the informal tea given by Miss Blanche Ring, the noted comedienne on Thursday, September 21.

L. S. McCormack, manager of the salon, stage-managed the affair and sent out invitations to a selected list. As each guest arrived he or she was conducted to the concert hall and presented to Miss Ring. The first number on the program was the playing by John Britz, musical director of the musical comedy, "Broadway and Buttermilk," of several selections from that production. The next feature was the demonstration of the Supreme Sonora, the new $1,000 phonograph, which apparently made a decided impression upon the guests, many of whom were enthusiastic over the tonal qualities of the instrument.

Later in the afternoon Miss Ring invited the guests to the lower showrooms, where a dainty luncheon was served, with Miss Ring and Mr. McCormack in the role of hosts. Following the luncheon the guests returned to the concert hall, where Miss Ring sang in her inimitable way several numbers from "Broadway and Buttermilk," in which she is the star, and also other songs which she has made famous. The program ended with the playing of several other selections on the Supreme Sonora.

DECISION IN FLOWER HORN SUIT

California Court of Appeals Affirms Finding of District Court in Patent Litigation

The United States Court of Appeals in California has recently affirmed the decision of the District Court, sustaining the Nielsen "flower horn" patent against the Columbia Graphophone Co. Similar decrees by the same District Court against Victor and Edison dealers in California had already been affirmed by the same Court of Appeals.

If the Columbia Co. does not continue the fight, the next step will be the accounting, in which the patent-owners will attempt to show the damages and profits (if any) to which they are entitled.

Some newspaper accounts give the erroneous impression that the Court has already awarded the patent-owners a large sum of money. The Court does not award any sum, but merely leaves the matter for future proofs.

TO MAKE CABINETS FOR MACHINES

LEOMINSTER, MASS., October 4.—Bernard P. Steele and Oscar Munroe, formerly connected with the F. G. Smith Piano Case factory, have formed a partnership and will manufacture cabinets for talking machines. They have leased a floor in the factory formerly occupied by the J. H. Lockey Piano Case Co., in this city.

The Singer Phonograph Co., of Davenport, Ia., has opened headquarters at 107 East Second street, and will handle the Singerola phonograph.

Truetone Combination Sets

MADE IN U. S. A.

Five different tones, each tone packed separately. 200 in a metal box, 5 boxes in a convenient container holding 1000 needles, retailing at 75c.

Five of these containers packed in a carton and sent prepaid to dealers anywhere in U. S. for $1.50, and postage on 2½ lbs.

OUTING OF TALKING MACHINE MEN, INC., OF NEW YORK

On September 12 and Referred to in The World Last Month, a Great Success—Snapshot of Some of Those Who Were Present at This Enjoyable Event

Some of Those at Outing of Talking Machine Men, Inc.

From Left to Right: Meyer Goransky, Chairman Executive Committee; H. Jaffee, Vice-President for New Jersey; John E. Hunt, President; J. T. Coughlin, Vice-President for New York; Sol Lazarus, Secretary; A. Galuchie, Treasurer; J. Y. Shepard, Chairman Entertainment Committee; M. W. Gibbons, of Brooklyn; Joseph Newstead, E. A. Scheiger Co.; Adam Tisch, Tisch Music House, Elmhurst; J. Bieling, Silas Pearsall Co.; P. Kaufmann, Manager, Talking Machine Departments, Otto Wissner Stores, and J. J. Cavanaugh, Cabinet Manufacturer.

TALKING MACHINE TIMES EGGS

Cleveland Man Makes Public Receipt for Insuring Perfectly Boiled Hen Fruit—A Suggestion Containing Tremendous Possibilities

CLEVELAND, O., October 4.—Owners of disc talking machines in this city are seriously considering the general use of their machines for culinary purposes, as a result of the suggestion offered in the local papers by R. A. Alpers, manager of the Alpers' Phonograph Service Co. Mr. Alpers declared to a local reporter recently: "My wife and I boil our eggs by the talking machine. We have discovered that when we play one side of the record the eggs boil soft perfectly. When we play both sides of the record they are hard boiled. If one hasn't an egg timer in the house here's the way to keep a 'record' of it."

If the local restaurants take up the idea we may expect to see such signs as "eggs boiled a la Caruso, 20 cents, Al Jolson omelet, 35 cents," and so forth. Then there is the chance for the very particular man to carry his own record about with him so that he will be sure that his eggs will be right.

The American Graphophone Social Club, consisting of employes of the American Graphophone Co., Bridgeport, Conn., held their annual clambake a few Sundays ago.

HEAVY DEMANDS FOR CABINETS

Edward B. Jordan & Co., Inc., States Season's Business Is Best Ever

Edward B. Jordan, pioneer talking machine cabinet manufacturer, and head of Edward B. Jordan & Co., Inc., in speaking to a representative of The World regarding the heavy demand for cabinets said, "All our plants are working full capacity, and even so we will not be able to fill all orders now on hand before the first of the year." Mr. Jordan also said this has been one of the best seasons in all the twenty-five years in which he has made talking machine cabinets in Brooklyn, N. Y., with no prospects of an early let up.

WEBER-KNAPP COMPANY

JAMESTOWN, NEW YORK

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., October 7.—VOICE AND SOUND RECORDING MACHINE.—Frank Ebenezer Miller, New York. Patent No. 1,190,787.

This invention relates to improved sound mechanism having features applicable both to the recording of sound and to the reproduction of sound from a record or other known means.

The object of the invention is to provide functioning parts for overtones and the many peculiar refinements of sound as well as for fundamental tones.

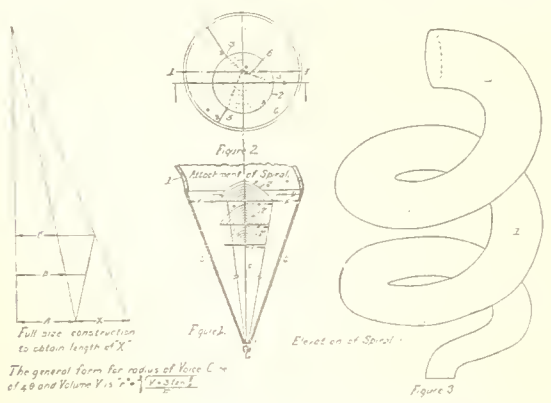
A further object of the invention is to provide a sound mechanism as nearly omnifunctioning as possible relatively to the variations in tone and quality without the excluding or limiting effect of a mechanical medium having itself a definite pitch period or pitch periods of too limited variation.

More concretely expressed, the object of this invention is to improve upon the employment of a flat disc of vibratory material for the reproduction of or the recording of sounds. That is, to improve such a disc, for example, as is commonly employed in a telephone receiver or phonograph sound box.

Experiments have revealed that a flat disc is greatly limited in its range of pitch periods in that its vibration is dependent upon nodal arrangements wholly in the same plane, while special study and practice in connection with the human anatomy of the auditory and vocal organs has shown that nature never limits its sound mechanism to a nodal arrangement in a unitary plane. For example, the outer ear of the human anatomy comprises approximately two and one-half turns of what may be termed a sound spiral and then terminates inwardly against the tympanum which itself is a cup-shaped diaphragm having the umbo peculiarly eccentric relatively to the tympanic ring to which the margin of the tympanum is attached. It is against this eccentric projection of the cup called the umbo with which the engaging end of the malleus or hammer bone co-operates in the sound-functioning of the bones of the ear. It has been discovered that the umbo is located relatively to three equi-distant points on the margin of the tympanum at distances 3, 4 and 5. It has likewise come under observation that the three main cavities of the human voice anatomy likewise have the volumetric proportion of 3, 4, 5. They are respectively the laryngeal cavity, the nasal cavities and the mouth cavity.

In carrying out the objects of this invention the purpose is to stimulate in a large degree the peculiar anatomical features as to proportion, shape and arrangement to be found in the human ear.

Referring to the drawings, Figure 1 is a vertical section through line I—I of Fig. 2; Fig. 2

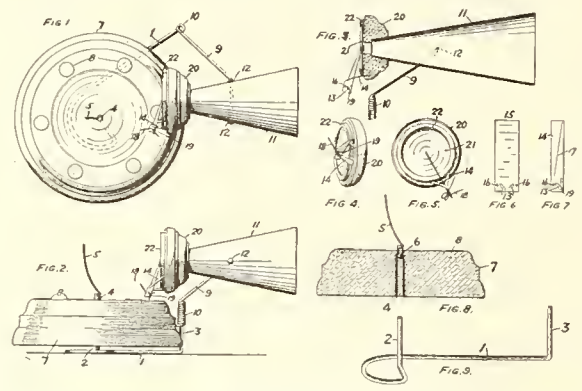


is a plan view of the parts shown in Fig. 1; and Fig. 3 is a perspective elevation drawn to a reduced scale of a spiral horn.

TOY PHONOGRAPH.—Thomas J. Little, Jr., Woodbury, N. J., assignor to the Taux-Wel Talking Machine Co., same place. Patent No. 1,191,202.

The principal object of the present invention is to provide a phonograph so cheap in respect to labor and material that it can be sold and used as a toy.

Figure 1 is a top or plan view of a toy phonograph embodying features of the invention. Fig. 2 is a side elevational view of the same. Fig. 3 is a sectional view of the sound box and its accessories. Fig. 4 is a perspective view of the sound box showing the stylus arm. Fig. 5 is a front view of the sound box. Figs. 6 and 7 are views showing the blank, in different stages of

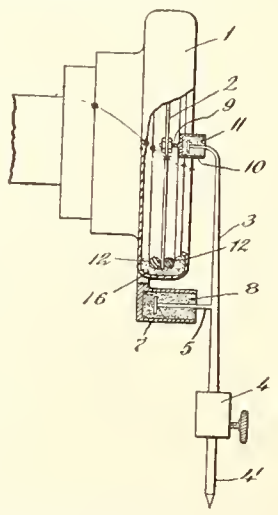


manufacture, from which the stylus arm is made. Fig. 8 is a transverse sectional view through the turn table, and Fig. 9 is a perspective view of the base wire.

METHOD OF CONSTRUCTION OF TALKING MACHINES.—Patrick B. Delany, South Orange, N. J. Patent No. 1,191,674.

This invention relates to improved methods of phonograph construction and forms a divisional application from co-pending application Serial No. 779,947 filed July 19, 1913, and also in part a continuation of prior application No. 739,939, filed January 3, 1913.

The invention is designed to eliminate scratching or scraping noise from the record and to improve the quality of recordations and reproductions. It is well known that even the smoothest surface revolving under the needle will produce quite a loud or observable noise emitted by the horn or amplifier. It has been found that this is largely due to the method of construction in which a metallic vibrating arm connects the record and the diaphragm of the sound box. Other methods employing vibrating arms of wood, bone or other hard substance also produce the same effect to a modified degree. It has been sought to remedy such defect by rubber or other vibration deadening material interposed at the point of contact between the vibrating arm and the diaphragm; but on account of the elasticity of such materials, or for other reasons, the tone of reproduction has been greatly lowered and modified and, owing to the instability of such materials, particularly under pressure, the instruments soon become out of order.



There has been devised a method of mounting the arm whereby metallic connection between the record and diaphragm is entirely severed without appreciable loss of force but with marked suppression of the objectionable scraping sound, the result being a pure and faithful reproduction.

The object of this invention is attained by a method of mounting the arm in cells, one cell being interposed between the arm and its support and another cell interposed between the arm and the diaphragm, the cells being then filled with a mass of material of suitable density and stability to carry the major or sound producing vibrations, and yet of such character as to suppress or eliminate objectionable extraneous incidental and minor vibrations that produce the extraneous or scraping sounds in the tones produced by the diaphragm. The material of such mass may be a single material or a compound material composed, for instance, of rubber, asphaltum, tar, waxes of various kinds, etc., or compounds of any two or more of such simple materials.

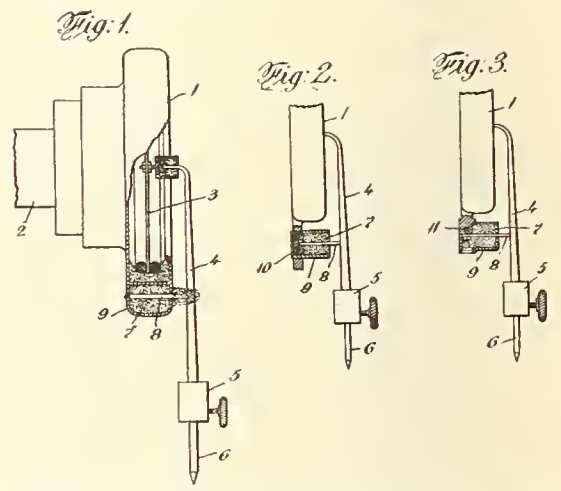
The drawing is an elevation partly in section of a device constructed in accordance with the improved method.

1 indicates the sound box, 2 the diaphragm, 3 the vibrating arm, 4 the needle holder, and 4¹ the needle.

PHONOGRAPH OR TALKING MACHINE.—Patrick B. Delany, South Orange, N. J. Patent No. 1,191,675.

This invention relates to phonographs or talking machines and to the production of records therefor. Its object is to improve the quality of the musical tones or vocal utterances and to improve the behavior of the apparatus in other respects.

This application is in part a continuation of former application No. 700,394, filed May 29, 1912, the features of the invention shown in Figs. 2 and 3 of the present application having been originally shown in said prior application, while the features of invention shown



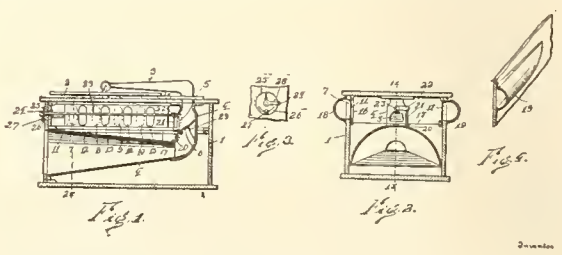
in Fig. 1 of the present application are also shown in prior application No. 779,947, filed July 19, 1913.

In the accompanying drawings, Fig. 1 is an elevation partly in section of an improved construction of a reproducer head and needle arm; and Figs. 2 and 3 are similar views showing modifications of the construction.

SOUND REGULATOR.—Alexander G. Marquis, Rochester, N. Y., assignor of one-fourth to George W. Rogers, and one-fourth to Anita B. Rogers, same place. Patent No. 1,191,808.

The object of this invention is to provide a new and improved device for varying the volume of sound produced more especially by a talking machine or for reducing and suppressing a part of the sound so as to prevent confusion and interference of the sound waves. This and other objects of the invention will be fully illustrated in the drawings.

In the drawings, Fig. 1 is a vertical section through a talking machine of the disc record type showing the improvement embodied therein, the section being taken on the line 1ˣ—1ˣ of Fig. 2. Fig. 2 is a section on the line



2ˣ—2ˣ of Fig. 1. Fig. 3 is an elevation of a handle for operating the valve. Fig. 4 is a perspective view of one of the auxiliary silencing chambers on the side of the cabinet.

MUSICAL INSTRUMENT.—Victor H. Emerson, New York, assignor to the American Graphophone Co., Bridgeport, Conn. Patent No. 1,192,402.

This invention relates to talking machines of the type intended primarily for giving audible reproductions from "sound records."

One object of the invention is to provide an apparatus of this kind which shall give im-

proved acoustical results, characterized by richness and fullness of tones, and with elimination of most of the disagreeable noises frequently attending such reproductions, but without sacrifice of clearness of definition.

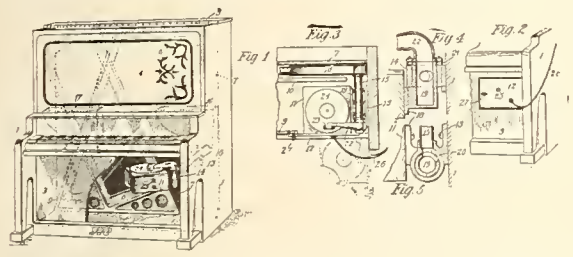
Another object of the invention is to provide the mechanism of the talking machine with a suitable cabinet or casing, of attractive appearance, which dispenses with the ordinary protruding horn or sound conveyor, and protects the mechanism from injury.

The invention comprises the providing a suitable inclosed sound chamber, located in the passage between the diaphragm and the exit, and so constructed and arranged that it will be responsive to and will reinforce the entire range of tones, as distinguished from a "resonance-chamber" (technically speaking) that responds to only one note of definite pitch (or to only a few notes), while remaining inert as to other tones.

The invention comprises the manner of mounting the mechanical parts of the talking machine proper, in connection with the sound chamber, within a suitable casing.

The invention will be best understood in connection with the annexed drawings, which represent one preferred embodiment thereof, showing, among other things, a so-called disc graphophone mounted within an ordinary upright piano. But the invention is not limited to this particular form of talking machine, nor is it limited to the use of a piano of the upright (or of any other) form. However, for the sake of clearness, the invention will be shown and described in connection with a disc graphophone and an upright piano.

In the drawings, Fig. 1 is a perspective of an upright piano, equipped with a disc graphophone swung part way out, part of the piano

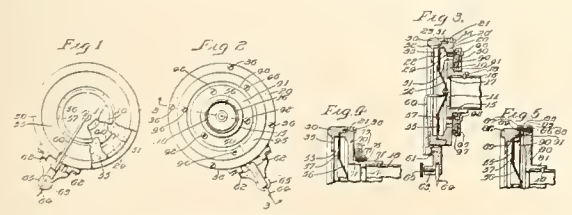


casing being broken away; Fig. 2 is a similar view of one end of Fig. 1, indicating the graphophone as inclosed in the inner position; Fig. 3 is a horizontal section through the piano casing, taken above the level of the talking machine; and Figs. 4 and 5 are vertical and horizontal sections respectively, through the joint or mounting, shown on a larger scale.

Sound Box.—John C. English, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 1,192,289.

The main objects of this invention are to provide in a sound box for talking machines, adjustable means for supporting the major portion of the same; to provide in a sound box, an improved diaphragm and mounting therefor; and to provide other improvements as will appear hereinafter, the purpose as a whole being to provide a sound box that will be extremely efficient in operation.

In the accompanying drawings, Fig. 1 is a fragmentary front elevation of a sound box con-



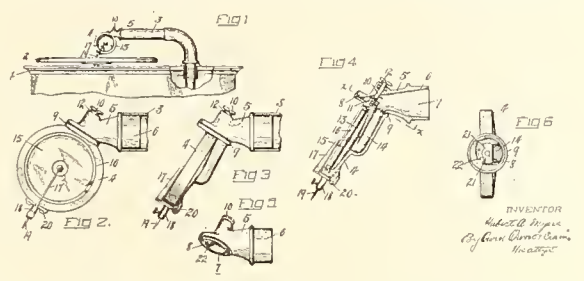
structed in accordance with this invention; Fig. 2 a rear elevation of the same; Fig. 3 a longitudinal section on line 3—3 of Fig. 2; and Figs. 4 and 5 are fragmentary longitudinal sections of two modified forms respectively of the same.

Sound Box for Phonographs.—Hubert A. Myers, Toledo, O. Patent No. 1,192,337.

This invention relates to sound reproducing instruments of the phonograph type, and particularly to improvements in the sound box of such instruments. In some instruments of this character the vibrations produced on the stylus by the record are of a lateral character, as in the case of records used on Victor and Edison machines, while in the case of records used on some other machines the vibrations produced on the stylus are of a vertical character. In other words, the records used on some makes of phonographs or similar machines have the sound wave undulations formed depth-wise of the groove therein in which the reproducing stylus travels, while with records used on other makes of machines the sound wave undulations are formed crosswise of the grove.

The object of this invention is the provision of a sound box of the character described which is simple and efficient in its construction and capable of universal use in connection with different types of machines of the class described, and of being easily and quickly adjusted to suit the character of the grove in the record which it is desired to use.

Figure 1 is a side elevation of a portion of the phonograph embodying the invention. Figs. 2 and 3 are enlarged side elevations of the sound



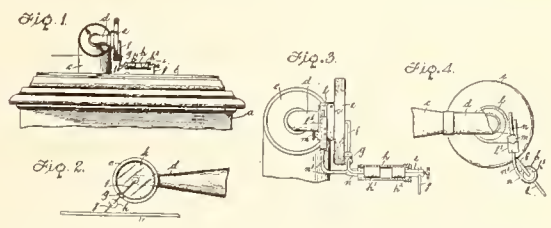
box embodying the invention in operative position for records having grooves of different styles. Fig. 4 is a central vertical section of Fig. 3. Fig. 5 is a perspective view of the sound box carrying head, and Fig. 6 is a section on the line x—x in Fig. 4.

Device for Reproducing Sound.—Wm. H. Crawford, Providence, R. I., assignor of one-half to Oliver Fletcher Best, same place. Patent No. 1,192,828.

This invention has reference to improvements in a device for reproducing sound, especially in talking machines and the like.

When music, articulate speech and other sounds are reproduced, in a phonograph for instance, thin shrieking sounds and secondary noises are audible which distract the attention of the listeners, impair the quality of the tone and thereby lessen the impression intended to be created.

To eliminate the disagreeable sounds and secondary noises and reproduce the sound in unimpaired quality of tone a novel means has been devised for reproducing sound. These novel means receive and transmit the original vibrations, produced when the stylus passes

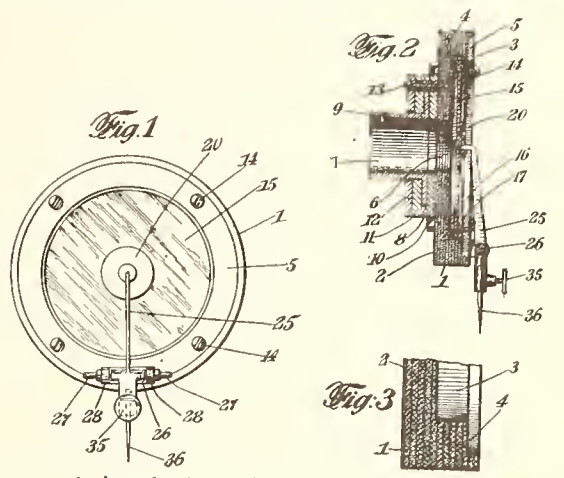


through the record grooves, to the rod fulcrumed to the sound box which in turn acts on the diaphragm and thereby the original vibrations are repeated. The novel improvements have been attained by providing means capable of confining an elastic medium, between the stylus and the rod which is fulcrumed to the sound box. In this way the original vibrations are imparted to an elastic medium, such as air, before being further transmitted. This results in the elimination of the disagreeable sounds and secondary noises. It is known that a confined body of an elastic medium or fluid, such as air is capable of transmitting sympathetic vibrations and the interposition of a confined body of an elastic medium eliminates disagreeable sounds and secondary noises. The reproduced sound resulting from the repeated vibrations of the diaphragm is further conveyed from the reproducer or sound box into the amplifier in the usual manner except that no disagreeable sounds or secondary noises are conveyed and amplified but merely pure tones.

Figure 1 represents in side elevation a phonograph embodying in desirable form the present improvements. Fig. 2 illustrates part of the device shown in Fig. 1 in front elevation. Fig. 3 is an enlarged view of the upper mechanism shown in Fig. 1, certain parts being in section. Fig. 4 is a rear view of Fig. 3, partly broken.

Sound Reproducing Box.—John A. Steurer, New York. Patent No. 1,192,834.

This invention consists in novel features, ref-

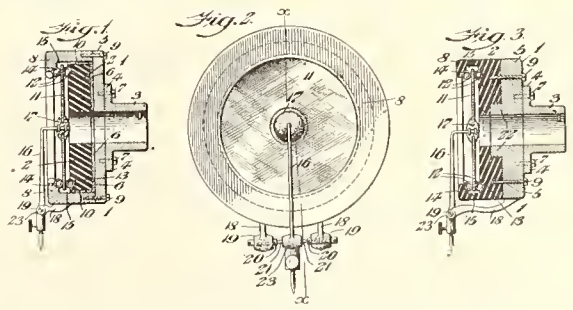


erence being had to the accompanying drawing in which is shown one embodiment of the invention selected for purposes of illustration.

Referring to the accompanying drawing, Figure 1 represents a front elevation of a sound box or sound reproducing device suitable for use in connection with a talking machine and having the invention embodied therein. Fig. 2 is a vertical sectional view of the same, the stratification of the box body being illustrated in somewhat exaggerated manner for greater clearness. Fig. 3 is an enlarged detail view of a portion of the box body, which supports the diaphragm in which the stratification is still further exaggerated.

Sound Box for Talking Machines.—Alva D. Jones, Philadelphia, Pa. Patent No. 1,192,836.

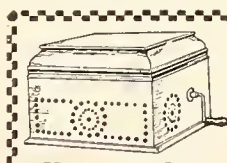
This invention in its broad aspects comprises in a sound box, the combination of a hardened rubber disc, back or body, having an opening through the center thereof, said body carrying at its rear portion a flanged rearwardly extended sleeve or coupling member adapted to engage the tone arm of a talking machine of the desired type, while said same hardened rubber body also serves as a carrier for a metallic annular member having a pair of integral lugs for pivotally supporting the stylus bar and said annular member



also having an inwardly projecting annular ring portion provided with a gasket retaining lip, said lip holding in position between it and said rubber back, a pair of annular gaskets between which a diaphragm is held, the stylus bar being secured at its inner end to said diaphragm and pivotally supported between said lugs.

Figure 1 represents a vertical section on line x—x Fig. 2 of a sound box embodying the invention. Fig. 2 represents, on an enlarged scale, a front elevation of Fig. 1. Fig. 3 represents a view similar to that of Fig. 1, of a modified form of construction.

Eugene F. Haines, of Mt. Holly, N. J., and Miss Anna Lee Tovey, of Camden, N. J., were married last week. Mr. Haines is connected with the Victor Talking Machine Co.



Greatest value on the market. Distributors inquire for special prices.

THE COLUMBIA AT THE BORDER

REDWOOD FALLS, MINN., October 5.—Lauterbach Bros. of this city, Columbia dealers, recently sold a Columbia Grafonola, which is being used to excellent advantage by Company L, of the Second Minnesota Infantry. This company is composed of the residents of this

How the Columbia Interests Soldiers

city, and when they left for the Texas border they selected a Grafonola to help them pass the time when they were off duty.

The members of the company state that this Columbia Grafonola has been an invaluable source of entertainment and enjoyment. The boys own a large library of Columbia records, which is most comprehensive in its scope, including all types of music from grand opera to the latest dance selections, and the machine and records are receiving continual use.

PATHEPHONE GETS FIRST PRIZE

CHICAGO, ILL., October 5.—The Hallet & Davis Piano Co. has just received an interesting letter from J. A. Hart, La Porte, Ind., stating that the Pathephone model No. 150 won first prize at the La Porte County Fair. Mr. Hart's letter reads as follows:

"It gives me great pleasure to inform you that your model No. 150 Pathé Pathephone brought down first prize at the La Porte County Fair, held at La Porte, Ind., August 28-29-31-Sept. 1. The model was entered as a special, there being two other leading makes of talking machines entered. It was very encouraging to me, as I had recently taken the agency for your machine. I expect great results in the city and county of La Porte. With best regards to you and great sales for Pathé, I remain, yours truly, J. A. Hart."

NEW BUILDING FOR VICTOR CO.

The United Electric Construction Co., of Philadelphia, Pa., was awarded a contract last month for the construction of a new building for the Victor Talking Machine Co., of Camden, N. J., which will cost $25,000. The architects are Ballinger & Perrot.

W. M. SHLAES IN WINNIPEG

W. M. Shlaes formerly of Hancock, Minn., is now located in Winnipeg, where he is secretary and treasurer of the Melotone Talking Machine Co., which recently started business there.

The Metronola Phonograph Co., New York, has increased its capital stock from $100,000 to $1,000,000.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

The Highest Class Talking Machine in the World

Not merely a claim, but a fact!

IT'S easy enough to say "This is the best!" It's something else to *prove* it. Sonora not merely substantiates its claim of being *the peerless phonograph* by pointing to its winning of the highest score for tone quality at the Panama-Pacific Exposition, but it invites the most critical comparison *point* by *point*.

When you consider the purchase of a mechanical product (which a phonograph assuredly is) you investigate its details—its construction. In an automobile you want to know the kind of tires, the make of bearings, the type of motor, the style of transmission, etc.

READ again the second cover of this issue. **Check, feature against feature, the Sonora with every phonograph and talking machine and you'll be *convinced* that Sonora stands in a class alone.**

Sonora is popular. Its sales increase by tremendous leaps each year. *It is the instrument you should sell.* Write today regarding an agency.

Guaranteed!

AGAIN Sonora leads the way. Every Sonora phonograph is guaranteed absolutely as to materials, workmanship, finish, construction and perfection of operation for one year from the date of purchase. ("Supreme" model is guaranteed for five years.) And that there may be no doubt whatsoever, a *written* guarantee is given with each machine.

How High Are Your Merchandising Standards?

The higher your merchandising standards the more eligible you would be for an Edison dealership.

Successful Edison dealership requires merchandising standards of a high order —standards in keeping with the distinctive and superior qualities of

The NEW EDISON

Edison sales methods are as distinctive as the New Edison itself. They are sales *creative*. The dealer who succeeds in obtaining an Edison Probationary Zone license not only secures the benefit of this sales creative work, but has the opportunity to demonstrate that no additional dealers are required to produce the maximum Edison business from his zone.

An Edison dealership is a worth while dealership.

The TALKING MACHINE WORLD

For the makers & sellers of talking machines

Published Each Month by Estate of Edward Lyman Bill at 373 Fourth Ave., New York, November 15, 1916

Victrola XVI, $200
Mahogany or oak

The instrument by which the value of all musical instruments is measured

Victor
"HIS MASTER'S VOICE"
REG. U.S. PAT. OFF.

Entered as second-class matter May 2 1905, at the post office at New York, N. Y., under the act of Congress of March 2, 1879.

Sold before the invoice arrived!

A dealer who was handling the . . . . phonograph decided that his stock was not moving fast enough. After careful consideration he decided to store his line and to take over the Sonora agency.

He sent in an initial order that he thought would care for his business till just prior to Christmas, if not till New Year's.

In 3 days *before the invoice reached him, he had sold the greater part* of his order and had telephoned in an additional order for double the number of machines. He will sell about *five times* the number of Sonoras that he had estimated.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

is admittedly

The Highest Class Talking Machine in the World

and the public never forgets (Sonora's steady, keen advertising sees to this) that

"The only jury which heard and tested all of the phonographs at the Panama-Pacific Exposition recommended that Sonora be given a marking for tone quality higher than that given to any other phonograph or talking machine."

No dealer can afford *not* to consider the remarkable advantages which a Sonora agency offers. Write today and learn whether *your* territory is still open.

THE DIFFICULTY OF TURNING FIGURES INTO DOLLARS

Can't Be Done Without a Makeup in These Days of Big Business—Something of the Fellow Who Follows the Janitor's Example and Tries to Clean Up—Interesting Disquisition

"Figures don't lie. Of course not, they stand up. That's about as far as the old proverb works. Figures—just plain little numerals—have started up more trouble for these get-rich-quick boys than anything that has ever come over the river. Figures about the other fellow's business have caused more would-be captains of industry to hit the skids than any other one factor," said the Old Timer. "Many a young and trusting heart who has read the reports of a machine shortage and seen the figures showing the millions in profits made by the big talking machine concerns staring him in the face in the next column, immediately goes over to Riverside drive or the Lake Front and picks out where he is going to build his mansion; does a little Weston through Benzine Buggy Row, and picks out the twelve-cylinder locomotive that is going to haul him around; and counts up his cash and finds that he has got $147.14, but with no place to go. The next morning sees him launched as a talking machine manufacturer. He buys a dozen tone arms, a dozen reproducers, and as many motors and turn-tables, then a few boxes to put them in and hangs out a sign.

"Then comes the big slam. The three special cops hired to keep the crowd away from the door haven't a thing to do. He wears out several records playing for himself, and decides that instead of making two millions the first year, he will be satisfied with a million and a half. Later on the prospects are reduced to a million profit, but still few buyers. The young man then remembers the story of the man who declared that if he had $1.85 he would spend the 85 cents in stock and the dollar for advertising. Then he advertises, and he gets results. That's the trouble. He fills the orders. His capital is tied up for thirty days or more. He gets more orders that he cannot fill. He wiggles around and gets an 'angel.' The 'angel' sticks some change in the pot, but 'taint enough. The millions of profits are getting smaller every minute, and bye and bye the one drops off and there is nothing but a row of goose eggs.

"They talk about poker being a hard way to make an easy living, but it is like finding money compared to going into the talking machine business, or any other business without preparation or capital. These annual profits of hundreds of thousands or millions of dollars are not earned on a shoe string investment. They come out of businesses that have tremendous plants and tremendous outputs, that have distributing facilities and are in every way prepared. When the new concerns in the field start on the proper basis they get the glad hand.

"In several cases recently large companies have entered the talking machine field with a great splurge only to finally discover that their preparations were nowhere equal to the demand. No man would start a peanut stand with a quart of peanuts and an alcohol lamp. Why should he expect to turn things upside down in the talking machine field with a dozen assembled machines. It can't be done. These men who want to realize on the opportunities offered in this new field should learn first that it is not a one-horse proposition; that a business establishment built on a shoestring basis is going to bring shoestring results, if anything; that to enter a field properly with any idea of permanence, the manufacturer must be able to supply goods that are satisfactory, and in suitable quantities before he can hope to reap the benefits of advertising.

"The talking machine field is no stock market proposition. There are no 'war babies' in it. The fortunes that are being made, and will be made, will be the result of hard work and persistent effort. A quick realization of that fact will save somebody money."

"TALKER" AIDS OPERA ARTISTS

Owing to War Dangers, Singers in America Record Voices so That London Managers May Make Decisions—Plan Works Out Well

Talking machine records made by grand opera singers in America for the purpose of securing engagements to sing in European centers are being used to great advantage by both singers and managers. There have been several engagements secured by grand opera artists by this means, among them being Freda Gallick Baker, American soprano, whose singing through the medium of the record has secured her an engagement to sing "Carmen" at Covent Garden during the coming winter. Another singer who has made a wonderful record is a Miss Martin, of San Francisco, who has a remarkable coloratura voice. Her record of the Caro Nome from "Rigoletto" may be the means of getting her an engagement to sing at La Scala, which every American artist so covets.

In these days of perilous ocean voyages, submarining, etc., incident to the great war, the convenience of sending a voice record and a phonograph across the seas is one that cannot be denied. However, the records should be very carefully made under direction of a competent conductor, and should include not only arias from operas in the repertoire of the singer, but scales, roulades, trills, and every vocal exercise calculated to show the range, flexibility and quality of the voice, as well as the singer's qualifications in phrasing and general vocalization. But few of the records sent over are complete in all these respects. Merely to have a record of an aria or two is not enough to permit the impresario to form a judgment upon the artist's abilities. The more complete the repertoire in record form the better it will please those who have to pass upon the capabilities of the singer.

DETROIT SCALE OF ALLOWANCES

Local Association Fixes Figures at Which Used Machines Are to Be Taken in Exchange

DETROIT, MICH., November 6.—The scale of allowances on traded-in machines recently adopted by the Detroit Talking Machine Association is being adhered to strictly by members of that organization with most satisfactory results. The schedule was approved only after the most careful consideration, and has been printed up on convenient cards so that it may be presented to a customer in understandable form. The text is as follows:

"Scale of allowances adopted by the Detroit Talking Machine Association:

"On all old horn or cylinder machines not over 5 per cent. of the machine purchased.

"On all other instruments full value may be allowed in exchange for a higher priced instrument within three (3) months from date of purchase, providing, however, old machine is in perfect condition.

"Machine not over six (6) months old, 80 per cent. of the original cost.

"Machine not over one (1) year old 60 per cent. of the original cost.

"Machine not over two (2) years old 50 per cent. of the original cost.

"Machine not over three (3) years old 40 per cent. of the original cost.

"Machine not over four (4) years old 30 per cent. of the original cost.

"Machine not over five (5) years old 25 per cent. of the original cost."

NEW BUILDING FOR STARR CO.

RICHMOND, IND., November 8.—Work has begun on the new building to be used as sales and display rooms of the Starr Piano Co. in this city. The store, which has been at 931-935 Main street, for a number of years, will be moved to 10-12 North Eighth street, to meet the requirements of more room. The company's property on Eighth street will be remodeled at a cost of over $6,000. There will be a new front of stone, the ceiling will be raised, as well as rearranging the interior for greater display space. Since the Starr phonograph has been placed on the market the need of more room in this territory has been felt.

NEBRASKA DEALERS ORGANIZE VICTOR ASSOCIATION

Have Get-Together Meeting in Omaha and Form Permanent Organization—Elect Officers—Nebraska Cycle Co. Entertains Visitors of a Banquet at the Rome Hotel

OMAHA, NEB., November 2.—There is considerable general interest manifested in the recent organization of the Victor talking machine dealers in this city by the Nebraska Victor Dealers' Association, and it is probable that every Victor man in the city will become a member of that body.

Heading the new organization is Edwin Walt, manager of the Walt Music Co., of Lincoln, president; Chas. Gaston, of the Gaston Music House, Hastings, vice-president; H. S. Thorp, of Norfolk, treasurer; W. E. Mickel, of the Nebraska Cycle Co., this city, secretary. J. E. Gaston, of Nebraska City, and C. Robertson, of Omaha, were chosen members of the executive committee.

Dealers and Their Friends Who Attended Recent Gathering in Nebraska

During the course of the meeting here there were numerous business discussions, and the dealers and their wives were the guests of the Nebraska Cycle Co. at a banquet at the Rome Hotel, with Geo. E. Mickel, president of that company, as toastmaster.

RUNNING DOWN "GYP" DEALERS IN MINNEAPOLIS

Vigilance Bureau of Advertising Forum in That City Takes Action Against Parties Who Made Misleading Statements Regarding Talking Machines—A Step Worth Emulating

MINNEAPOLIS, MINN., November 2.—The Vigilance Bureau of the Minneapolis Advertising Forum, which has been quite active at various times in investigating practices in the piano and other trades, has also taken action against "gyp" dealers in talking machines, and recently disposed of a case of this nature.

On October 1 there was advertised in the classified columns of both the Journal and the Tribune a "new $200 Victrola size mahogany cabinet, $48." Complaint was made that persons who responded to the advertisement were under the impression that the instrument offered was a genuine Victrola. A representative of the Vigilance Bureau called at the address and asked, "Are you advertising a $200 Victrola for $48?" An affirmative answer was given, but a representative declared that the advertiser was making the cabinet himself and that the instrument shown was fitted with a Columbia motor. The advertiser was warned of the misleading character of the copy and promised to be more careful in the future.

On October 15 there appeared in the classified columns of the Journal the announcement, "For Sale—Victor Phonograph in mahogany cabinet, fifty inches high for $55 delivered." The advertisement was accepted by the paper only after the advertiser had given assurance that the complete instrument had been made by the Victor Talking Machine Co.

Investigators were sent to the address given and were assured that it was a Victor machine. When they stated that the cabinet shown differed from other Victor machines, they were assured that the man made the cabinets himself and could, therefore, sell them cheap. Further inquiries elicited the information that the cabinet was the same size as that of the $150 Victrola and that it contained the motor of the $15 Victor machine, which motor, it was alleged, was the same as that used in the $150 Victrola. Victor records were also used in demonstrating the machine.

Subsequently another investigator was sent to the advertiser and purchased the machine, getting a receipt reading: "Paid in full for Victrola, $55." The representative of the Vigilance Bureau, accompanied by an attorney, immediately called on the advertiser and explained the provisions of the misleading advertising law, and came back with a signed promise from the advertiser not to offend again. In consideration of the signed agreement the Bureau withheld prosecution. In view of the similar cases that have resulted in other sections of the country, the action of the local Vigilance Bureau should receive the hearty endorsement of the trade.

WITH THE TRADE IN TORONTO

Business Reports Generally Good—Montagnes & Co. Issue Sonora Catalog—Ralph Cabanas Visits Columbia Headquarters and Factories—F. R. Hoffman's New Post—"Edison Week" Generally Observed—Other News of Month

TORONTO, ONT., November 3.—General talking machine business throughout this section of Canada has been most satisfactory in all lines, according to the reports made by the various concerns. The demand is keeping up in wonderful shape, and the great problem is to get sufficient machines and records to meet it.

The Canadian distributors of Sonora phonographs, I. Montagnes & Co., this city, have issued a new catalog, illustrative and descriptive of the Sonora line. The catalog is an elaborate one and shows various Sonora models pictured in the home surroundings in which they would naturally be placed. Montagnes & Co. have already received a number of complimentary letters from dealers concerning their new selling help.

Ralph Cabanas, manager of the Canadian business of the Columbia Graphophone Co., recently returned from a visit to the headquarters of the company in New York and also to the factories in Bridgeport. He states that the company is still thousands of machines behind in deliveries in spite of the great additions to factory facilities. Columbia sales during September were the largest of any single month in their history.

F. R. Hoffman has become assistant manager of the Columbia Co.'s organization in Canada, succeeding Otis Dorian who recently resigned to become manager of the Pathé Frères Phonograph Co., in Canada. Mr. Hoffman is a native of Connecticut, and for the past thirteen years has held an important position in the Columbia factories in Bridgeport.

John A. Sabine, of the Music Supply Co., of this city, has returned from a short visit to the offices and factories of the Columbia Graphophone Co. in an effort to stimulate shipments of machines.

Edison Week was celebrated throughout Canada in royal style and all dealers held daily recitals with special artists in conjunction with their demonstrations. In the city of Toronto twelve moving picture theatres demonstrated the New Edison Diamond Disc in addition to other features on their regular program.

The Nordheimer Piano & Music Co., Ltd., are introducing in Canada the Aeolian-Vocalion, for which they are the Canadian distributors.

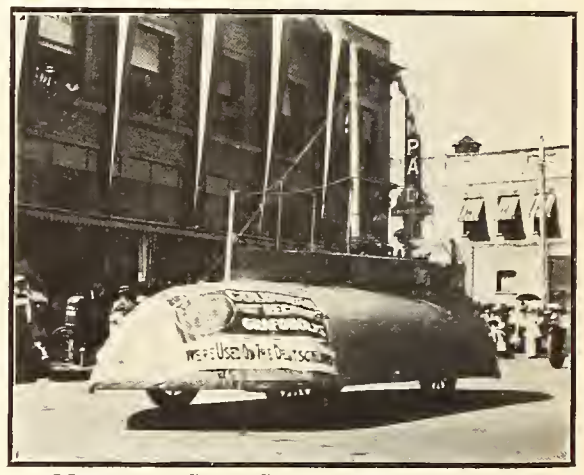
Rev. Geo. A. House, who comes direct from the Edison laboratory, recently spent three weeks in Kingston, Ont., demonstrating the Edison Diamond Disc. The T. F. Harrison Co., Ltd., who handle this line, reports increased sales as a result of Mr. House's visit to Kingston.

The Home Outfitters' Co., Ltd., 170-78 King street, East Hamilton, Ont., is featuring the Pathephone line of machines and records.

Al Jolson recently appeared in Toronto featuring "Robinson Crusoe, Jr." The Toronto dealers as a result sold a large number of Columbia records of this artist. A full-page announcement appeared in some of the dailies, drawing attention to his various songs and where they could be procured.

UNIQUE FLOAT WINS MUCH PRAISE

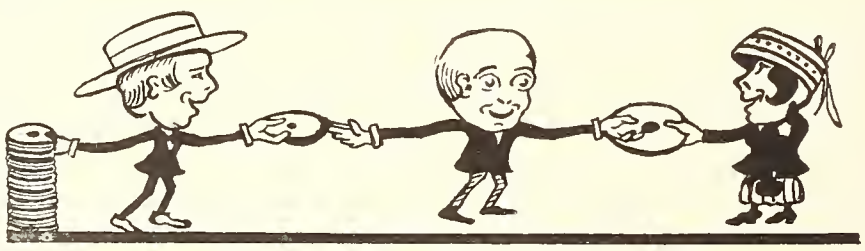
NAMPA, IDAHO, November 6.—H. L. Mickels & Co., of this city, sponsored a float in the Nampa Harvest Festival, which was one of the most unique displays prepared by any concern in local territory. A complete line of Columbia



Mickel & Co.'s Clever Publicity Stunt

Grafonolas and records is handled by this house, and as soon as it learned that the "Deutschland," the mammoth German submarine, had included a Columbia Grafonola in its equipment, it decided to utilize this fact as the subject of the fantastic float shown herewith. The Columbia trade-mark formed a prominent part of the display, which was greatly admired.

Henry C. Brown, advertising manager of The Victor Talking Machine Co., is at present on his annual hunting trip in the big game country of Canada. Mr. Brown, as usual, will come back with the legal limit of game.



JOBBER —— to —— DEALER —— to —— PUBLIC

EASTERN VICTOR SERVICE

The wide-awake dealer knows the public won't come in to buy simply because he has got the goods at a PARTICULAR time. The wise dealer knows he MUST HAVE the goods WHENEVER customers come in.

The dealer making a MAXIMUM of sales has got to have a jobber behind him who delivers COMPLETE orders and ON TIME. You want attention of this sort the next few months. Why not make us prove you can get it from

"Will there be a Victrola in your home this Christmas?"

This important question is confronting the people of the whole country.

It is the key-note of our nation-wide holiday advertising campaign, and its force is sending thousands of customers into the stores of Victor dealers everywhere.

It will help to make this the biggest holiday season you ever had—even ahead of the phenomenal business of last Christmas.

Victor Talking Machine Co., Camden, N. J., U. S. A.

Berliner Gramophone Co., Montreal, Canadian Distrihutors.

Important warning. Victor Records can be safely and satisfactorily played only with *Victor Needles or Tungs-tone Stylus* on Victors or Victrolas. Victor Records cannot be safely played on machines with jeweled or other reproducing points.

EDISON RECITAL AND DEALERS MEETING IN ST. LOUIS

One of the Great Events of Closing of Edison Week—Interesting Addresses Made at Gathering and Luncheon at Majestic Hotel—Some Interesting Addresses—Dealers Who Were Present

St. Louis, Mo., November 5.—The Anna Case tone test recital and dealers' meeting held by The Silverstone Music Co., as a final of the Edison Week observance proved to be a most enjoyable and profitable affair. The day began with an address of welcome by Mark Silverstone, and next came a personal message from Mr. Edison, delivered through E. C. Boykin. V. E. B. Fuller, also from the laboratory, delivered a talk on tone tests, which included some extremely practical advice for dealers who are contemplating this feature. This was followed by a general discussion, in which Mr. Silverstone got most of those present to participate. A luncheon was served at the Majestic Hotel, and it was arranged that no time was lost from business there.

At 2 p. m. the session again convened, and Mr. Silverstone talked on "Salesmanship." J. E. Marks, of Marks, Weber & Co., Edwardsville, Ill., talked on "My Experience with the Edison." The discussion was cut off just in time for the dealers to go to the Columbia, a high-class vaudeville house, where Mayo & Tally were including a tone test in their act. Then the dealers were given a rest until 6.10, when they met at the Elks' Club for a banquet. This lasted until they all went to The Victoria Theatre, where the tone test recital was held.

As has been the case with the other tone tests, the fire department finally closed the doors because the 2,500 permitted in the house were already there, and scores were turned away.

Mr. Silverstone was master of ceremonies at the tone test and opened the program with a graceful tribute to Mr. Edison, which was several times interrupted with applause. The tone test with Miss Case was perhaps the most successful of any held here. She was in good voice and entered into the spirit of the occasion. She alternated with the machine as the occasion offered, and in "The Song of India" the lights were turned out and were turned on to show that she had left and none knew when she had stopped singing. The test was successful, too, in interesting the newspaper critics, and fine comment was obtained from each of the five leading dailies, some of them signed by the critics. That by Homer Moore, of the Republic, who is widely known as a critic, says in part:

"Mr. Silverstone is, by these concerts, contributing very largely to the advancement of musical taste and interest in this city. Doubtless many went to the performance last night out of curiosity, but that element soon gave place to genuine enjoyment of the program. The problem of music in the home is solved when the singing of the greatest artists is made possible by an instrument that does not betray itself in the very presence of the artist herself."

The following dealers were present: E. C. Boykin, Edison Laboratory, Orange, N. J.; V. E. B. Fuller, Edison Laboratory, Orange, N. J.; Arthur Walsh, Edison Laboratory, Orange, N. J.; Miss McDougall, Sedalia, Mo.; Thos. McHarg, Columbia, Mo.; J. O. Robnett, Columbia, Mo.; Chas. Duesenberg, Concordia Music Co., city; J. W. Medairy, Stix, Baer & Fuller, city; Fred P. Watson, Mt. Vernon, Ill.; C. A. Hueter, Greenville, Ill.; Geo. Hoots, Greenville, Ill.; J. E. Marks, Marks, Weber & Co., Edwardsville, Ill.; R. Davis, John Bressmer Co., Springfield, Ill.; C. Kimber, John Bressmer Co., Springfield, Ill.; C. W. Slaybaugh, Taylorville, Ill.; H. L. Coffey, H. L. Coffey Music Co., Centralia, Ill.; C. Durham, Southern Illinois Music Co., DuQuoin, Ill.; W. H. Taylor, Anna, Ill.; W. J. Krug, Krug Jewelry Co., Staunton, Ill.; E. L. Jacoby, C. J. Jacoby & Co., Alton, Ill.; J. A. Berns, C. J. Jacoby & Co., Alton, Ill.; E. E. Lutes, Poplar Bluff, Mo.; R. B. Keyes, Keyes Bros., Blytheville, Ark.; Franklin Meyer, Meyer's Music House, Carlinville, Ill.; E. M. Webb, Schubert Mercantile Co., Russellville, Mo.; F. A. Leatherman, Nashville, Tenn.; M. A. Skalowski, Nashville, Tenn.; L. S. Demint, Waterloo, Ill.; J. E. Caldwell, Quincy Phonograph Co., Quincy, Ill.; W. C. Brewer, Lair Furniture Co., Charleston, Mo.; H. A. Tunehorst, Jerseyville, Ill.; E. Tunehorst, Jerseyville, Ill.; G. Tunehorst, Jerseyville, Ill.; L. N. Rost, L. N. Rost & Son, Macomb, Ill.; Miss Conreaux, B. Nugent & Bro., city; D. W. Hulen, Centralia, Mo.

NEW STARR CO. AGENTS APPOINTED

Richmond, Ind., November 6.—Jobbing centers for Starr phonographs and records have been active the last few days, and the Starr Piano Co. report the appointment of the following agencies: Chas. C. Hammond, Nantucket, Mass.; Henry Armstrong, Dorchester, Mass.; S. R. Richardson, Woonsocket, R. I.; The Recotone Co., Inc., New York City; D. J. Sill, Franklinville, N. Y.; Phono Cycle Co., Newark, N. J.; Faller Bros., Donora, Pa.; E. D. Newell & Co., Hampton, Va.; Threlkeld Piano Co., Flemingsburg, Ky.; R. H. Harp, Mt. Sterling, Ky.; Shrout, Piper & Shrout, Owingsville, Ky.; J. G. James, Carlisle, Ky.; M. A. Barker, Poplar Bluff, Mo.; Conner Music Co., Hillsdale, Mich.; Lou D. Smith, Ironton, O.; H. F. Murray, Lansing, Mich.; W. Muir, Bisbee, Ariz.; Marvin Moore, El Centro, Cal.; Batte Furniture Co., Jackson, Miss.; R. Rogers & Sons, Frankfort, Ky.; Geo. H. Cox Co., Owensboro, Ky.; Frank E. Charipar, West End Music Co., Detroit, Mich.; L. J. Ronan, Uhrichsville, O.; Mann Bros., Henderson, Ky.; M. Koplan, Scranton, Pa.; The Colvin Piano School, Omaha, Neb.; William Stradtman, Lansing, Mich.; Frank Hartman, Monterey, Ind.

GIVE BANQUET IN PORTLAND, ORE.

James L. Loder, Manager of Victor Department of the Wiley B. Allen Co., Entertains Staff—Victor Co. Traveler a Guest

Portland, Ore., October 30.—Upon the recent visit of Herbert Shoemaker, traveling representative of the Victor Talking Machine Co.,

Who the Wiley B. Allen Manager Entertained

to this city, he was the guest of honor of a banquet given by James L. Loder, manager of the Victrola department of the Wiley B. Allen Co. During the course of the dinner Mr. Shoemaker gave a very interesting talk regarding the making of Victor talking machines and records and the various systems in force at the Victor factory, and after the dinner proper the rest of the evening was spent in dancing. The accompanying photograph shows the guests at the dinner who were from left to right: Mrs. Paul Norris, Chas. McNeill, Otto Pankopf, Mrs. Olga Binder, James L. Loder, Herbert Shoemaker, Paul B. Morris, Mrs. James Loder, Robert Callahan and Clyde Wilcox.

"Will there be a Victrola in your home this Christmas?"

There's a lot in the power of suggestion, and we're using this phrase extensively in our advertising to suggest the Victrola for Christmas.

We get the people thinking "Victrola," and then it is easy for you to get action.

And there's going to be plenty of action this coming holiday season.

With every Victor dealer doing his part, the volume of Christmas business will be unprecedented even for the Victor.

NEW YORK, NOVEMBER 15, 1916

WE are now in the midst of one of the most active musical seasons in the history of New York, or the nation, for that matter. The war in Europe has driven to our shores the most eminent artists, the majority of whom are presenting themselves for public consideration, not merely in person, but through their records, which are listed in the catalogs of the leading talking machine manufacturers. The public is interested in music to-day as never before, thanks to the educational work of the talking machine, and this accounts for the increased interest in musical affairs, which is now so evident all over the country.

The concert season affords a great opportunity for talking machine dealers everywhere to feature their products in such a way that they can take advantage of the publicity which the great artists are receiving.

The managerial plans of the leading artists call for visits to the principal cities from the Atlantic to the Pacific, and preceding the visits of these artists much can be done by dealers in featuring through window displays and other ways, the fact that they are handling the records of the visiting artists, and in a broader way still, affording an idea of the importance of the talking machine and its wonderful value as a musical educator.

A beautifully decorated window is one of the best talking points for a live dealer, and it is a matter of congratulation that such a large number have taken advantage of this medium for bringing their products to the attention of the public.

The talking machine, and the publicity connected with it, enables the introduction of many novel features in a window display, giving the imagination an opportunity for play, which is resultful in creating some decidedly attractive shows.

It is evident that the advertising advantages of the show window will be utilized this winter more effectively than ever before, but dealers should aim to take advantage of the visits of distinguished artists whose records they handle to as great an extent as possible, and thus give a news interest to their display, which is certain to bring them a good return for the time and labor given to preparing such special features.

THE question of price maintenance is one of the most vital confronting this, or any other industry to-day; hence the importance of displaying a keen, active, personal interest in the Stephens Bill, which will come up again for consideration at the next session of Congress.

There is no industry that is more benefited by price maintenance than the industry which we represent.

Price maintenance means business stability, and the up-holding of those principles which are of real interest to the public, and which are recognized as an incentive in the promotion of business efficiency among merchants. Price maintenance means protection for the merchant all the way through, and price cutting means the destruction of those conditions which stabilize and develop business.

The special committee appointed by the National Association of Talking Machine Jobbers is doing excellent work, but every dealer should be alert and interested in the passage of this bill. He should keep in touch with his congressman, and keep him fully aware of the desires of the talking machine industry regarding the enactment of such a law as is outlined in the Stephens Bill.

EACH month, as dealers learn to appreciate the benefits that come through organization, there come reports of the formation of associations of talking machine men in various cities. The great value of these associations for the most part lies in the fact that they include dealers in the varied makes of machines, the sole requirements for membership being that a man must be engaged in retailing talking machines to join. By thus bringing together dealers in competing lines, the association tends to eliminate much of the harshness of competition.

Competition is a fine thing. It helps to stimulate the efforts of the retailer, but competition that is clean, that is carried on with regard to the rights of other men, is far more profitable than competition of the cut-throat sort, which digs into the profits both of the dealer himself and the competitor he is working against.

If the record approval system is an evil it affects those handling one make of records just as much as those handling another. If the charging of interest on instalments is desirable, it should apply just as well to dealers of one line of machines as another.

If machines, cabinets and records should be advertised separately to avoid misconception and alienate the public from the fixed price idea, that move would apply just as well to dealers in every line, and it is a trade organization that can bring about this standardization of method.

There is considerable talk of a National Association of Talking Machine Dealers, and each new local association that is organized brings the dealers of the country just that much closer to a national body.

The problems of the talking machine dealer differ very little according to locality and for the most part have the same basis, and as the trade grows and new phases develop a national body will probably become very desirable as a protective measure.

WHILE advertising results may be immediate, the full effect of advertising cannot be felt at once, for the value of advertising lies in the fact that its power is cumulative. Therefore, advertising must be systematic, in order to obtain a maximum of result with a minimum of effort and expense. Persistent advertising will always carry its message home, spasmodic advertising is of doubtful value, and far less benefit. The wise advertiser is the one who believes in keeping everlastingly at it, and who carries out that belief in actual practice.

NOW is coming the day of the talking machine de luxe—talking machines of special design whose cost will run into thousands of dollars. Some years ago the Victor Co. introduced the Auxetophone, but it was the individual mechanical features of this instrument rather than the design that necessitated charging a substantial price for it. Then came the Columbia Co., with the Columbia grand, designed somewhat on the lines of a grand piano. Since that time the Sonora Phonograph Corp. have introduced the Sonora Supreme, selling at $1,000, and the Aeolian Co. have put on the market the Aeolian-Vocalion in period designs, priced at several thousand dollars.

During the coming year it is reported that two prominent companies will introduce elaborate period designs for the exclusive trade, the price of the machines to run as high as $6,000. That there is a demand for machines selling at $1,000 and more is the best proof possible of the present standing and stability of

the industry. People do not pay thousands of dollars for "toys." The call for exclusive types of talking machines goes to prove that the period of doubt is passed. People have tried talking machines, have been convinced, and are willing to spend money for something that they know represents a permanent and rational investment. It is a condition worth thinking about.

THE members of the talking machine trade have upon more than one occasion recently had the fact brought home to them that the fraudulent advertiser is still abroad in the land, and has entered their own particular field. A man was recently up for trial and held under heavy bail in Brooklyn because he carelessly advertised and sold as a Victrola an instrument that had never been within one hundred miles of Camden, had in fact been assembled in New York City.

Some of the advertisers qualify their statements by describing the machines as "the Victrola style." Others have been less particular and have described machines of uncertain make as just "Victrolas." There are laws against misleading advertising in many of the cities and states that are broad enough to cover this feature and make it unhealthy for the fraudulent advertiser of talking machines.

Then there is the "gyp" dealer, a character well known in the piano trade, who does his business from a private residence and offers sad excuses for selling instruments of doubtful quality at less than usual prices. It is such men that offer talking machines of questionable origin under names of instruments of established value.

Another factor that causes a good deal of trouble for both talking machine dealers and retail purchasers is the fellow who buys a machine for $100 or more on instalments and after making three or four payments sells it to some unsuspecting man at about one-half its list price. Everything is fine until the dealer traces the machine and seeks to, and generally does, recover the unpaid balance from the innocent third party. Numerous instances of this character have come to light. There are many cases where the dealers do not succeed in recovering the machines at all.

The Information Bureau suggested by The Talking Machine Men, Inc., of this city should go far to eliminate some of these troubles locally.

FROM all reports the South generally should be pretty good stamping ground for talking machine people this fall. Concentration of influences which have been at work for some time should produce conditions distinctly favorable to the sale of musical instruments on a larger scale than ever. Travelers all speak of the fact that a number of piano and talking machine stores of the better grade are increasing. A good deal of new blood is coming into the business and dealers who have been content to go along with poorly equipped stores are remodeling, moving into new quarters, and paying attention to window and interior displays as they have not heretofore. General business conditions are good. The European situation has increased the demand for cotton goods enormously and the Southern mills are unprecedentedly prosperous. Exportation to South America of Southern-made goods is also becoming an increasing factor in Southern commerce. In addition to all this is the fact that the South has learned the secret of diversified crops and buys her meats, hay and corn elsewhere. The people of the South are now enthusing over talking machines just as they are in the North, and the proportion of talking machine sales in the South this fall promises to be the greatest in her history.

THE reasons offered by advertising men and salesmen for placing talking machines in the home have been many and varied and all good. There has been brought forth the question of entertaining, developing musical taste, improving the child mind, all based upon fact.

That the talking machine may be used for the suppression of evil, however, is not always impressed upon the prospect. Magistrate Groehl, in a talk before a meeting of New York piano men recently, declared that music in the home proved a powerful factor in cutting down crime by improving the sensibilities and making for culture and an appreciation of the higher things of life.

A statement coming from a man who is not trying to sell a musical instrument, but who is acquainted with the criminal and his habits through long experience, should prove a strong selling argument.

THE same hammer that breaks a piece of iron in two can be used to weld two pieces of iron into one. The circumstance that spells disaster for the man without a fixed purpose becomes a stepping-stone to progress for the determined man. The man with a definite aim has these powerful aids to success. He works intelligently to qualify himself for a certain position. He wastes no time, money, thought or energy that could be applied to the attainment of his purpose. His abilities grow to fit his mental vision of the position he wants to fill. His superiors are so anxious to develop executives that, once they perceive his earnest purpose, they will lend all possible aid toward its accomplishment. His anxiety to win teaches him how to make chance or circumstance serve his ends.

WITH the National election out of the way, and the majority of our citizens satisfied that the right man has won, it is time to shelve politics and talk business. Prosperity is in evidence on all sides, and it is up to the talking machine men to get their share of it.

Records—Their Significance!

The Victor Dealer who supplies his customers with the records they want when they want them is not only closing profitable sales, but is building up a friendship with his trade that is founded on service and satisfaction.

Pearsall Record Service

Enables Victor Dealers to make many friends among their customers. We prepared ourselves months in advance for the 1916 holiday record trade, and as a result of this foresight we are shipping record orders complete the same day they are received.

Let us give you a sample of this service

SILAS E. PEARSALL CO., VICTOR DISTRIBUTORS, 18 W. 46th St., NEW YORK

Six-story home of Stewart Talking Machine Company, at Indianapolis

Victor Records are just as profitable as Victrolas. Many Victor Dealers are awaking to that realization. They are boosting record sales systematically. They like the cash-down feature of record selling.

Our record stock has been built up to a high point of completeness. Under our thorough purchasing plan, the slogan, "All the Records," becomes less a motto and more a statement of facts. We have accomplished a thorough filling of our shelves with both the foreign and domestic class of records, and have heavy supplies of the more desirable numbers. Now you can order records from us with the assurance of most prompt and complete service.

Your record shelves should be bolstered up for the Christmas shock, and you should begin bolstering now. Christmas music as made by Victor artists is as standard an institution as the Christmas turkey. There are a number of records in the Victor catalog that bloom in the light of demand just as appealingly now as they have in the past. Order them before there is danger of shortage. Grapes should be picked before frost.

Note the Notes

BRING SUITS OVER ROYALTIES

Music Publisher Takes Action Against Talking Machine Record and Music Roll Manufacturers to Test Provisions of Copyright Law—Record Makers Should Observe Care

Claiming that the music publishers are not treated fairly by some of the talking machine manufacturers, and music roll manufacturers, Leo Feist, Inc., one of the leading publishers of popular music, has started several suits to enforce the payment of royalties on the mechanical reproduction of the company's music as is provided by the copyright law.

One of the provisions of the statute is that the manufacturer of mechanical musical instruments, which is taken to mean the manufacturer of records and music rolls, must furnish a sworn statement to the owner of the copyright on the 20th day of each month regarding the copyrighted selections reproduced mechanically, and the payment of royalties accruing thereby must be made on the 20th of the next succeeding month.

The statute also provides that in case of failure of the manufacturer to pay to the copyright proprietor within thirty days after demand the full sum of royalties due pursuant to the provisions of said act, the court may award taxable costs to the plaintiff and a reasonable counsel fee besides, in its discretion, awarding further damages not exceeding three times the amount of royalties actually due.

Leo Feist, Inc., claimed that they have experienced great difficulty in getting some manufacturers of mechanical parts to remit royalties, with the result that the suits have been brought.

A decision has been rendered in one suit against a record manufacturer, confessing judgment, and paying in addition to the royalties actually due, a sum of $50 counsel fees and $12.90 taxable costs and disbursements.

It would be well for manufacturers of records to give attention to this matter. The law is very explicit regarding submission of settlements and the payment of royalties, and good intentions do not make up for any lapses in the strict observation of the statute.

With the Feist concern in the lead it is intimated that other publishers will bring suits. It is much better to pay the 2-cent royalty when due than to be forced possibly to pay 6 cents, together with the other expenses of a legal action after suit is brought.

The music publishers declare that cases against other manufacturers are to be instituted, the first case being regarded somewhat in the light of a test case.

NEW EDISON STORE IN VANCOUVER

Kent Piano Co. Opens Handsome Quarters in that City With James Callaghan as Manager

VICTORIA, B. C., November 1.—The Kent Piano Co., Ltd., of Vancouver, has opened an exclusive Edison phonograph store in this city. The building in which the new store is located has been remodeled throughout and handsomely equipped, several sound-proof parlors being among the features. W. J. Carson, formerly with Thos. A. Edison, Inc., has been engaged as manager.

James Callaghan, at one time a member of Pike, Evans & Callaghan, has joined the staff of the Kent Piano Co., in Vancouver.

BARTON CO. OPEN DEPARTMENT

The Barton Co., of Manchester, N. H., holding the honor of being the largest and most magnificent department store north of Boston, have recently installed a very extensive Victor department under the management of Robert Matheson. In connection with the general Victor equipment, they have an auditorium as large as an ordinary theatre for the purpose of giving Victrola recitals to their patrons. Their qualifying order was placed through Cressey & Allen, the enterprising Victor distributors of Portland, Me.

OUTDOOR ADVERTISING RESULTS

Lorn L. Haight, McGregor, Ia., Using Billboards Extensively in Featuring the Victor and Columbia Lines in his Section

MCGREGOR, IA., November 2.—Lorn L. Haight, who handles Columbia and Victor machines and records in this city, is a firm believer in outdoor advertising, and has used that form of publicity with gratifying success.

Mr. Haight's signs, featuring the Victor and

Advertising Victor and Columbia Products

Columbia names in large letters, are to be found painted on many of the most conspicuous barns in the vicinity, and form permanent advertisements of his business. One particularly interesting sign is that featuring the Victrola, which was recently put in place in the public square of this city. The sign is painted in oil on galvanized iron, and shaded electric lights illumine its surface at night. The sign is right in the center of things, attractive in design, and proves a result producing bit of publicity.

INCORPORATED TO MAKE CABINETS

The Melrose Furniture & Cabinet Manufacturing Corporation has been chartered under the laws of New York with a capital stock of $25,000, to manufacture wood and steel cabinets, furniture, phonographs, etc. The incorporators are L. H. Axman, E. M. Souza and S. Schwartzman.

AMERICAN TALKING MACHINE COMPANY
368 LIVINGSTON ST. *Victor Distributors* BROOKLYN, N. Y.

Albert Spalding, America's greatest violinist, proving that the New Edison perfectly Re-Creates his masterly art

The New Edison

HAVE you ever heard great artists testing the fidelity of phonographic records of their singing or the music of the instruments they play, before audiences of thousands of music lovers and critics—have you ever seen pictures of such tests, like the illustrations on this and the opposite page—have you ever even heard of such tests taking place with any other sound reproducing device but the New Edison?

No, you have not, because no other sound reproducing device could sustain such a test. Why? Because no other invention reproduces music so perfectly that the reproduction cannot be distinguished from the original when compared side by side. No other sound reproducing device actually RE-CREATES music.

Christine Miller, America's favorite concert contralto, making a personal comparison to prove that the New Edison perfectly Re-Creates her beautiful voice.

Above Comparison

BECAUSE of the accomplishment of Music's Re-Creation by the New Edison, Edison dealers are equipped with a line of musical merchandise above comparison. They are equipped to render music lovers a service of the highest order by bringing Music's Re-Creation to their attention.

The New Edison is classed with the finest musical instruments of all time. Quality overshadows price to such an extent that an unusually high average sale price is realized. Each sale carries a worth while profit, in most cases requiring less effort to secure than with merchandise on which a much smaller profit per sale is realized.

The Edison Probationary Zone Policy keeps the dealer keyed up to his best pitch and offers a most generous reward for good dealership.

THOMAS A. EDISON, Inc.
279 Lakeside Avenue ORANGE, N. J.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., November 7.—One could write a volume on window displays, what they mean as advertising mediums, and the amount of artistic effort needed to make the exhibits both effective and valuable. With large department stores in particular a window dresser is an important factor in the business, he is usually a high-priced man. There are certain stores in Boston, which are famed for their artistic windows before which one can always find a crowd of people. Some of the Boston talking machine shops make good displays, and when the passerby sees something that is really striking it does not take more than a moment for him to come to a sense of due appreciation. Our talking machine shops should put more thought into their displays; originality should be sought for and once something is produced that is different there will be an eager public quick to appreciate. And that means publicity; the window will be talked about and a knowledge of its beauties will tempt persons even to go out of their way to view it.

A window that comes to mind at this point is that of the C. C. Harvey Co. in Boylston street, which house carries the Victor and the Edison lines. It was about a year ago that this window was in line for the big Edison prize, and the conspicuous attention given it was well worth all the time and thought given to its arrangement. The present window is a typical autumn exhibit. Large jars filled with autumn foliage are placed at intervals, and the central object is a unique vase filled with the fruits of the season. Across the pedestal is draped fabrics carrying the season's colors, and conspicuously placed yet not obtrusively are handsome Edison and Victor machines. The window was arranged by Vesper L. George, a well-known Boston artist, who was responsible for the interior mural decoration of this store. Another window that deservedly attracts attention is that of the M. Steinert & Sons Co., farther out on Boylston street. The present adornment is the third in a series of beautiful interiors, which are not over furnished, and wherein the color scheme is immediately attractive. Just now the Columbia Graphophone Co. is featuring the "Ladder of Roses" in one of its windows, this being a feature of "Hip-Hip-Hooray," which is soon coming to the Boston Opera House, and whose music is thus featured by the Columbia Co. It is true that not all windows adapt themselves to good displays; some are small and cramped, and little effective work can be done; but take the proposition as a whole, there is not that originality and individuality displayed that there should be.

Business Continues to Loom Up

Business at the Columbia Graphophone Co. is looming up very large these days, and the prospects are good for a simply gigantic business if one recalls what has been done under Arthur Erisman's management in the past few years, especially approaching the holiday season. Manager Erisman has been making several trips among the New England local managers the past few weeks, and following a conference at Providence Mr. Erisman went down to Hartford, where he gave expression to some of his constructive views regarding the furtherance of sound business.

Hume's New Victrola Warerooms

One of the interesting events in the local trade is the opening of the new Victrola warerooms at the A. M. Hume Music Co.'s store, 194-196 Boylston street, a few doors west from Park square. A. M. Hume is the president, and H. N. Baker is the treasurer. Both of these gentlemen will be remembered for their connection with the M. Steinert & Sons Co. The warerooms were opened to-day, and many friends of these and the other gentlemen associated with the business, called to offer congratulations. The warerooms run through to Park square. The house has been fortunate in securing the services of Warren Batchelder, who formerly was manager of the Victor department of the Henry F. Miller Co. farther out on Boylston street. Mr. Batchelder's department is mid-way down the length of the store with a series of demonstration booths at the right, and the record racks opposite on the left. Mr. Batchelder has a wide following. The large consignment of machines and records was secured from the Eastern Talking Machine Co.

Ditson & Co.'s New Building

Manager Henry A. Winkelman is keenly interested in the new Victor warerooms that he is to have in the new Oliver Ditson Co. building farther up Boylston street, and which is now to be ready by June 15 of next year. Charles H. Ditson, of Charles H. Ditson & Co., was over here from New York a while ago, and at that time the contracts were awarded for the construction work. Manager Winkelman's department will be on the second floor, and his private offices will look out on Head place. The demonstration booths, which promise to be something quite unusual among the Boston stores, will look across the Common, and in arrangement and furnishings will be quite up-to-date.

Visits Victor Co.'s Factory

Manager Herbert L. Royer, of the Arch street department of the M. Steinert & Sons Co., was over at the Victor factory at Camden for a short visit lately, and a few days ago he was over in New York in conference concerning trade conditions. Manager Royer reports business as unusually active, especially in the wholesale department.

Vocalion Co. Opens in Providence

The Vocalion Co., of which R. S. Hibshman is manager, is branching out, this time in another city, Providence, R. I., having been selected as the particularly desirable place in which to exploit the virtues of the Vocalion. The location chosen is Westminster street, close to where the new Keith's Theatre is to be erected. The manager of the new store, which will occupy the entire first floor of the building, will be Leo Shatney, whom Manager Hibshman is sending over from the Boston warerooms. Mr. Shatney is an alert, progressive young man who, during his Boston residence, has been able to make some excellent sales for the company.

Brings Many Columbia Visitors

"Hip-Hip-Hooray," the big New York Hippodrome production, which will soon be opened for a long engagement at the Boston Opera House, has opened a downtown office in the Columbia warerooms. This corner of the store, therefore, is an unusually popular one just now Percy Heath, who is ahead of "Hip-Hip-Hooray," is frequently found there at his desk. Percy is one of the most popular advance men in the theatrical business.

Andrew F. Lyons Married

Andrew F. Lyons, of the talking machine department of Chickering & Sons, was married October 25 to Miss Helen F. Callahan, of Roxbury, and a honeymoon to New York and other places followed. Mr. Lyons and his bride were the recipients of many beautiful presents, Mr. Lyons' friends in the Chickering warerooms are taking advantage of the occasion to show their regard for him.

BOSTON "Exclusively" EDISON NEW HAVEN

PARDEE-ELLENBERGER

MORE than ever does the dealer realize that an "exclusive" representation works to his advantage. The Edison Diamond Disc Phonograph is the ideal of the progressive dealer, because it is the art-creation of Edison's master genius, and you know and everybody knows that Edison's endorsement spells BUYERS' CONFIDENCE.

Joins Sales Force of Chickering & Sons

A new member of the sales force of Chickering & Sons is William H. McCann, who has lately joined the talking machine staff after having had experience in other departments of the Chickering business.

Pardee, Ellenberger Co.'s Great Business

Manager Frederick H. Silliman, of the Pardee, Ellenberger Co., Inc., reports business as rushing to the limit, and it would be wellnigh impossible to take care of any more. Mr. Pardee was up here from New Haven a couple of days ago and expressed himself as well pleased at the volume of business being done in the Edison Diamond Disc line.

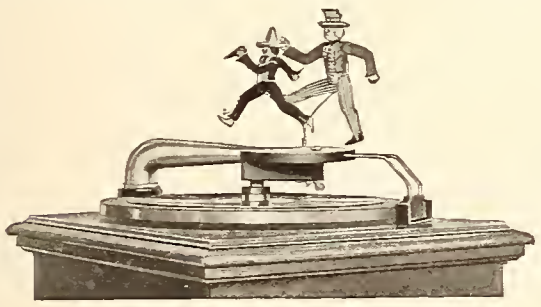
Makes Excellent Trade Report

George Lincoln Parker's Victor and Edison departments, of which John Alsen is manager, is making rapid strides these days. The exhibit at the Food Fair at Mechanics Building has been productive of a great many prospects.

"UNCLE SAM AND THE MEXICAN"

Clever, New Novelty for Talking Machine Owners Offered by National Toy Co.

The latest addition to the novelties for use for the talking machine manufactured by the National Toy Co., Boston, Mass., who long ago gained a reputation in the trade for their "Ragtime Rastus" and "The Boxers," is based on the subject of timely interest, and is marketed under the name of "Uncle Sam and the Mexican." The figures represent Uncle Sam gripping the collar of a typical Mexican and applying his feet to the rear of said Mexican in the most effective manner, as the talking machine provides the accompaniment of lively music.



"Uncle Sam and the Mexican"

With the holiday season approaching the trade is naturally interested in accessories that have a particularly ready sale during that season, and Uncle Sam and the Mexican should share in this interest, especially so in view of the shortage of imported toys. An illustration of the new novelty is presented herewith.

The National Toy Co. is now located at 273-279 Congress street in much larger quarters than formerly occupied. Even now the house is cramped for room, so great has been the growth of business during the past twelve months. The toys of the company have been most favorably received by the talking machine trade everywhere and they are easily adjusted to almost every make of machine.

ANTICIPATING THE FUTURE IN BUILDING BUSINESS

Meeting the Problem of Stock and Distribution Before They Materialize in the Modern System—Preparing for the January Demand for Records That Follows Holiday Machine Sales

Every month comes and brings with it a thousand little problems of its own. Ordinarily one would think that success consisted in meeting these problems as they come up with a profitable result. Modern business, however, has stepped far beyond the scope of present time—the live dealer in the talking machine trade is forced to anticipate what is going to transpire months ahead. For instance, it is now November and yet the really live dealer has to be thinking well beyond the holiday season if he is going to meet conditions after the holidays in a satisfactory way. The Christmas holidays are the greatest time in the year for machine sales, while record sales also take a wonderful jump in popular music and operatic selections.

The significant thing, of course, is the tremendous sale of machines within a comparatively short period. The boost in record sales need not be considered in the light of its results, because there is nothing very definite left as a result. But machine sales at Christmas time do leave a wake of the most important kind. They leave a gigantic wake which is labelled "Big Record Business for January." All the new machine owners are bound to start shopping for "music for the home" and as a result records of all sorts are in great demand.

Having recognized the January demand for records which is bound to follow December machine sales, it remains to prepare to take a maximum advantage in actual record sales. Along the line of preparedness, there are perhaps three important measures. First, the dealer must stock in heavy on records of all varieties. Customers will not wait. They want particular selections "on demand," and dealers cannot meet this call if the records are not in stock.

Second, there is the matter of preparing the proper kind of reception for the throng of record buyers. In this case, demonstrating booths have proved of great advantage because in a given space the greatest number of buyers can be listening to selections at once without interfering with each other. In fact the soundproof booth has proved a salvation for the dealer whose quarters are limited and yet who desires to accord each prospect the distinction of an individual reception. The booth system in part eliminates the work of salesmen, as a customer can be placed in a booth to sell records to himself. When the salesman is present, on the other hand, he can cater to the individual tastes of a particular person.

Another point of considerable importance is the systematizing of the record department. Various types of record filing cabinets have been designed to help the dealer, but it remains for the dealer to determine what style is best adapted for his own establishment. The main thing to bear in mind is, of course, to make all varieties of records easily accessible to all the salesmen and in such a way as not to interfere with or interupt each other's customers.

Finally, a lot of preparation must be done to the end of getting the buyers into a particular store. Advertising must be done in the local papers and the advertising copy prepared well in advance. Posters, window decorations, interior attractions—all these things must be planned out before the busy season arrives.

It behooves every dealer to start thinking along the lines suggested—to stock in heavy with records, to get his booths ready, to get his advertising copy ready, to get his windows planned, to get his record filing cabinets established and do the hundred and one other things to meet the big record business that will come in January.

DEMAND FOR VEECO MOTORS GROWS

Many Manufacturers Arrange to Install That Motor in Their Machines Exclusively

Boston, Mass., November 3.—Chas. F. Simes and J. A. Davis, of the Victor Electrical Equipment Co., has during the past two months been sometime calling upon manufacturers of talking machines with the result that many manufacturers have adopted the Veeco electric motors exclusively for their product, and consequently the output has been materially increased.

The manufacturers who have tried the Veeco motors are not only impressed with their simplicity, and ease of operation, but have appreciated the fact that the consumer is glad to eliminate the winding when possible.

The new composition turntable marketed by the company is also being well received, especially by those manufacturers who desire turntables that will match their machines in color.

Common Knowledge

Music stays on the record just as long as a needle is not running in the record grooves.

Therefore, it makes a big difference what kind of a needle is used to "lift" from the record, music of a thousand different kinds.

Use BAGSHAW NEEDLES to do the work and you get "the best in music" because BAGSHAW NEEDLES are THE needles of artistic merit.

"BEST BECAUSE THEY ARE BAGSHAW"

W. H. BAGSHAW Lowell, Mass.

ESTABLISHED 1870

In view of the pending conditions in labor and material markets, the trade is advised to anticipate needle requirements for 1917

THE "HERE TOO" MAN IN THE TALKING MACHINE TRADE

Too Many Dealers Satisfied to Take What Business Comes to Them, Instead of Going After it Energetically—The Silent Salesman Idea Not a Practical Success

Some years ago there were two hot corn merchants doing business at the same crossing on Sixth avenue, New York.. Both were negroes. One fellow, a little energetic cuss, with a voice entirely out of proportion to his size, walked up and down the pavement with short, quick steps, bellowing at the top of his voice, "Heah's you' hot cone. Bes' what is, right heah, five cents a ear." The other negro, a great big, overgrown darkey, would walk slowly up and down his side of the street just barely mumbling, "Heah, too, heah, too." The first darkey did a land office business—the second got just about enough to live on.

That system of competition applies to every line of business, including the talking machine business. Even to-day, after years of education, years of coaching, of protesting, there are still dealers who operate their stores in the "here, too" plan. They have talking machines and records to sell. That lets them out. Their competitors have the same goods to sell, but with this distinction—they sell them.

The only really successful silent salesman is the casket in the undertaker's window, and nobody wants to buy that if they can help it. But, every other product must be sold. If the dealer can make a living by sitting down and waiting for the trade to discover that he is selling talking machines and come in and insist on buying, a fortune is in his grasp if he will simply raise up his voice, either personally or through printers' ink, and tell the people that his store is not just a private den, but is a business house.

In every newspaper one picks up to-day, there is to be seen talking machine advertising of one sort or another, and it is the dealer who gives that advertising a personal application, that brings before the prospects the fact that he sells talking machines and records advertised so liberally, who is getting the most out of his business.

There are too many of the "here, too" variety who are satisfied with the business that comes to them without effort, and with the crumbs that fall from the live dealer's table, as it were.

VICTOR ADVERTISING FOR NOVEMBER

Post-Holiday Campaign Calls for Five 800-Line Advertisements in One Month—Company Urges Dealers to Be Prepared

Proofs of five advertisements, each of 800 lines, and all to be run by the Victor Talking Machine Co. during November, have been sent out to the trade and serve properly to emphasize what this company is doing to advertise as their product, which is already oversold.

The first of the five advertisements appeared in the daily papers on Saturday, October 28, and the other four will appear on the four following Wednesdays, urging dealers to take advantage of this great publicity which is country-wide in its scope. The Victor Co. says in a letter accompanying the proofs:

"If an advertising solicitor had induced you to increase your advertising space this month by an additional 4,000 lines, you would make a very considerable effort to cash in on that expenditure. You would see to it that in the matter of stock and service you were in position to back it up. Everybody in your entire organization would be 'on edge' to make the special campaign a success, and it would be a success largely because of the extra enthusiasm and extra 'vim' which every one in your establishment would put into his work. Enthusiasm is contagious. We admit that these five big advertisements are not published for your benefit exclusively. All Victor advertising is done for the benefit of all Victor dealers, but we know positively that those dealers who join hands with us most heartily are those whom this Victor advertising results most profitably."

RECORDING SONGS OF THE ESKIMO

Some Important Work Done by the Stefansson Canadian Arctic Expedition

TORONTO, ONT., November 3.—Writing in a British daily Dr. Anderson, leader of the Stefansson Canadian Arctic Expedition, relates, after describing much of the valuable scientific researches and experiences, the fact that about 100 talking machine records were taken of Eskimo songs and chants, with careful transcription and translations. To most of us in this civilized part of the world they will no doubt be a revelation. People will no doubt be looking forward to the pleasure of a demonstration of these unique and wonderful records from the land of snow and ice. This is just another evidence of the variety of high class entertainment available for talking machine owners.

GETTING THE GREATEST RESULTS FROM ADVERTISING

Reaching Several Million Circulation Through General Magazines Does Not Pay Unless Distributing Organization Is First Perfected—What Trade Paper Publicity Does

The business man of to-day who does not believe in advertising is on a par with the farmer who, after a serious study of the elephant at the circus, declared there was no such animal. In other words, he refuses to believe what his own common sense and his own judgment tells him is right. The great trouble, however, is that a great many men even in the talking machine trade believe in advertising, but have a false conception of its scope and purpose.

There is a great fascination in figures. One magazine has 500,000 circulation, another a million and still another two million. It costs money to advertise in these publications, but the new talking machine manufacturer, for instance, believes that by placing his advertisements before these three million and a half or four million people, he is on the right road to success. Probably he is if he has the goods to back up the advertising.

Two nationally famous concerns recently advertised talking machines on a mail order basis in the general magazines. The result simply swamped their producing facilities. They could not begin to fill the orders the advertising created. In one instance the concern was put to great expense to return money that was sent in for machines that could not be delivered for several months to come.

While such instances are proof of the producing powers of advertising, they furnish still greater proof of the fact that advertising should be in proportion to the ability of the advertiser to meet demands. It is generally realized that it is much better not to have received an order than to have disappointed the prospective purchaser. In the first place, when the goods are ready, the order can be gone after and secured. In the second place the disappointed customer must first be placated before the order can be secured, which means extra work and extra expense.

Where the product is distributed through local representatives, the trade paper offers the only logical first field for advertising. Its purpose is solely to interest prospective dealers. When a sufficient number of dealers are obtained to give the manufacturer a direct representation in most sections of the country, then it is time to start a national campaign.

One manufacturer recently remarked that he had difficulty in inducing dealers to handle his line until he did national advertising. It was pointed out to him that the dealer would be just as well satisfied if, pending the lining up of more dealers, the manufacturer spent a certain amount of money in that dealer's own locality, and the plan worked out well. In other words, instead of scattering his advertisements broadcast in places where the demand could not be by any means filled, he concentrated that demand into sections where it could be filled for the benefit of the local dealer.

Firemen do not flood the entire building to put out a small blaze in the basement. Neither should a manufacturer flood the entire country with advertising when his distributing facilities are confined to one or several sections. It's a point worth thinking about.

"THE MUSIC MASTER'S CONVERSION"

Interesting Little Story on Effect of Voice Recreation Issued by Thos. A. Edison, Inc.

The advertising department of Thos. A. Edison, Inc., has just issued a most interesting little twelve-page booklet containing a well written story in dialogue centering around the re-creation of artists' voices as accomplished by the Edison Co.

The story tells of the conversion of an old music master who was antagonistic to all talking machines until the Edison was smuggled into the house, and he heard the voice of a protegé as re-created by Edison issuing from the phonograph. The story is entitled "The Music Master's Conversion," and is well told.

GRAFONOLA FOR THE "MANNING"

Crew of U. S. Revenue Cutter Buys $75 Grafonola From the Eilers Talking Machine Co.

PORTLAND, ORE., November 6.—The accompanying photograph shows the crew of the U. S. revenue cutter "Manning" with a $75 Grafonola sold by M. Dunphy (the gentleman with overcoat at extreme right), for the Eilers Talking Machine Co., of this city. This boat is at present stationed at the mouth of the Columbia River, but spends about six months of each year in the Alaskan territory, during its regular duty of chasing seal poachers. The crew is very enthusiastic over the Grafonola, which will prove a most entertaining factor during their long cruise to the North.

HANDSOME SHAVERT WINDOW

Live 'Possum Feature of Schmidt Music Co.'s Display in Davenport, Ia.

DAVENPORT, IA., November 1.—One of the effective window displays of the harvest season made in this city was that of the Schmidt Music Co., who featured the Aeolian-Vocalion most artistically. The window of the store on West Third street, was trimmed throughout in autumnal colors with gold predominating, corn stalks and other harvest products were arranged artistically about the window and lighted by globes designed to give a sunburst effect. The feature of the display that attracted the most attention, however, was a live 'possum captured near Muscatine, and which enjoyed the gaze of the multitude in a little cage all its own. Above the cage was the inscription, "Quit Your Playin' 'Possum. Yo' Know Yo' Want a Vocalion."

The Smith Music Co.'s Attractive Aeolian-Vocalion Window

EDISON WEEK A GREAT SUCCESS

Jobbers and Dealers in All Sections of the Country Participate in Special Event Through Medium of Tone Tests, Concerts and General Advertising—Interest Grows Each Year

The effectiveness of the national campaign, carried on by Thos. A. Edison, Inc., is reflected in the success that attended the celebration of Edison Week from October 16 to 21. Numerous tone tests of an elaborate character were given in the larger cities under the auspices for the most part of Edison Disc jobbers. In other sections ordinary but thoroughly interesting recitals were given by the dealers, either in their own stores or in quarters specially hired for the occasion. Moreover, the offer of prizes for special window displays made a strong play to those who handle the Edison in every section.

During Edison Week it was almost impossible to pick up a newspaper without finding some reference to some particular dealer who was in some way impressing upon the minds of the people in his locality that it was Edison Week, and it was time for them to become interested in the Edison phonographs. As Edison Week is held each year so does the interest grow, with the result that the celebration of last month was the most successful in the history of the company, not only in the amount of interest aroused, but in actual results obtained.

SCHMELZER ARMS EXPANDING

Lease Building Adjoining Present Quarters in Kansas City for Victor Department

KANSAS CITY, MO., November 3.—The Schmelzer Arms Co., Victor distributors, have enjoyed a volume of business this year in Victrolas and records that has passed all previous records, and as a result have been forced to make a substantial increase to their plant to take care of the holiday trade.

Five years ago the company occupied its present quarters with an abundance of excess space to provide for a normal growth, but they have now been compelled to lease an additional building with a fifty-foot frontage, which will be devoted exclusively to talking machine business. With the addition the company now occupies a total frontage of 125 feet.

Arthur A. Trostler, general manager of the Victor department of the Schmelzer Arms Co., recently returned from a trip to the Victor factory, and reports that the factory is snowed under with orders, but is leaving no stone unturned to take care of the jobbers and the dealers. "All the jobbers seem to be in the same boat as we are," declared Mr. Trostler. "We can't keep a nickel's worth of stock on hand.

"Just as fast as we get the goods just so fast are they shipped out again. The Victor Talking Machine Co. is entitled to a world of credit for making this demand possible. It is said that as the holiday season approaches the jobbers will be more busy, but I can't say that they can be any busier than they have been for the past ten months. It has been Christmas at my desk for the past fifteen months with long distant calls and telegrams for stock, and with every visitor that enters my office asking the question, 'When can I get some Victrolas?'"

NEW HERZOG CABINET CATALOG

We are in receipt of a copy of an elaborate new catalog of talking machine record cabinets issued by the Herzog Art Furniture Co., Saginaw, Mich. The cabinets for various types of machines are classified in seven sections, for Victrolas, Edison, Columbia, Sonora, Pathé, Aeolian-Vocalion and Rex machines. There is also a section devoted to auxiliary record cabinets and another to newspaper cuts of the cabinets for the dealer's use. Every style cabinet is beautifully illustrated, the cuts being printed in sepia. The volume is one that should be in every dealer's hands.

Two Unico demonstrating rooms have been installed in the warerooms of C. E. Downing, in Augusta, Me.

NEW RETAIL WAREROOMS OF SONORA PHONOGRAPH CORP.

Just Opened at 279 Broadway, New York, One of the Most Attractive Establishments in City—Display Rooms Most Artistically Conceived and Arranged—Right in Heart of Business Section

The new retail warerooms opened late last month by the Sonora Phonograph Corporation, at 279 Broadway, New York, corner of Reade street, give every indication of soon rivaling in point of sales totals the other Sonora establishment at 665 Fifth avenue, which is one of the most popular retail phonograph stores in that section.

These new Sonora warerooms are furnished in a manner fully commensurate with the standing of the Sonora phonograph in the musical and phonograph worlds. Decorations and furnishings are symbolic of quality in every detail and gaudiness and over display are missing in this new home of the Sonora.

The accompanying photographs will give some idea of the dignified character of the salons. The demonstration booths are tastefully furnished, each booth containing two or three of the different Sonora models. The booths are sound-proof, and the white ivory gives an atmosphere of refinement which is characteristic of the entire establishment.

There is one room in the new Sonora warerooms termed the "Supreme" room, which is probably one of the finest single phonograph rooms that has ever been constructed. This room is devoted exclusively to the presentation of the Sonora "Supreme" model, which retails at $1,000. This instrument is displayed amidst surroundings which are in complete harmony with its artistic beauty, and in fact the decorations were conceived with the one idea of giving a fitting home to this $1,000 phonograph. The "Supreme" room is shown herewith, but the beauty of the color scheme in the rear, and on the sides can hardly be appreciated in a photograph. The scene depicts the view from an Italian villa, and the lattice view carries out this thought unusually well. A special constructed dome ceiling with exceptional acoustical properties is another feature of the "Supreme" room.

General Retail Manager McCormick's Office

A Section of the New Sonora Warerooms

A Partial View of the "Supreme" Room

The new warerooms at 279 Broadway, which are located in the heart of the downtown business district make a particular appeal to the business men of the section, many of whom have been acquainted with the prestige of the Sonora phonograph for some time past, but have delayed hearing it until they could visit the Sonora headquarters at 665 Fifth avenue, or the store in the Standard Arcade at 50 Broadway. As the new showrooms are located but a few steps from Chambers street, every convenience is afforded prospective purchasers who have occasion to spend a few minutes in the hub of the downtown business world.

It is planned to make the new Sonora warerooms at 279 Broadway the home of many important musical events similar to those which have been held at the uptown Sonora salon during the past year. Prominent musical and theatrical celebrities will visit the warerooms in the near future, and give informal recitals in conjunction with the Sonora phonograph.

Thomas F. Delaney, Jr., who has been associated with the Sonora Phonograph Corporation for a number of years, is manager of the new Sonora warerooms. L. S. McCormick, general retail manager of the company, is also making his executive offices at the new warerooms, and is personally in charge of a number of important plans which will doubtless result in developing a most profitable retail clientele at the new Sonora salons. Every phase of this campaign will be directed towards presenting the Sonora phonograph as a quality instrument to music lovers strictly on its tonal and musical qualities.

J. G. Heidner & Son, piano and talking machine dealers of Holyoke, Mass., are arranging to consolidate their two stores in that city, and with that end in view have leased large quarters in the new La France Building on Maple street, that city.

E. H. LANSING

611 Washington St. BOSTON

Madrid, le 26 Avril 1916.

Monsieur,

J'ai le plaisir de vous renouveler que Leurs Majestés le Roi et la Reine, mes Augustes Souverains, ont été véritablement enchantés de l'audition du nouveau phonographe "VOCALION" de l'Aeolian Company, que vous avez présenté au Palais.

Leurs Majestés, agréablement surprises de la perfection de cet instrument, ont daigné me charger de vous le faire savoir et, en même temps, de vous exprimer Leurs remerciments pour le magnifique modèle que l'Aeolian Company Leur a dedié.

C'est avec une véritable satisfaction que j accomplis cet ordre, profitant de cette occasion pour vous renouveler, Monsieur, l'expression de ma considération distinguée.

Marquis de Torrecilla

Monsieur H. Dubois,

Représentant de l'Aeolian Company

THE AEOLIAN-VOCALION IS PRESENTED BEFORE THEIR MAJESTIES *THE KING & QUEEN OF SPAIN*

Madrid, April 26, 1916.

Sir:

It gives me pleasure to announce to you that Their Majesties, the King and Queen, my August Sovereigns, have been really enchanted by the audition of The Aeolian Company's new phonograph, the VOCALION, which you presented at the Palace.

Their Majesties have been so agreeably surprised with the perfection of this instrument, that they have commissioned me to acquaint you with this fact, and at the same time to express their appreciation for the magnificent model which the Aeolian Company prepared for them.

It is with genuine satisfaction that I carry out these instructions, taking advantage to renew to you, Monsieur, the expression of my most distinguished consideration.

(*Signed*) MARQUES DE TORRECILLA.

Monsieur H. Dubois,
Representative of The Aeolian Company.

[TRANSLATION OF THE ROYAL LETTER]

AT the PALACE of SPAIN the Aeolian-Vocalion was granted an audience by Their Majesties, the King, Queen and the Queen Mother.

The high respect paid the Vocalion by the most exalted personages everywhere — the almost immediate recognition accorded it in Europe where musical standards are notably severe — substantiates that this wonderful phonograph is truly a great, new musical instrument.

The Vocalion triumph at the Palace of Spain is one of utmost significance. And the quotations given below from the modestly phrased report by M. Dubois, the Aeolian representative, relate the details of this occasion in a simple, straightforward style. Mr. Dubois' paragraphs constitute, in themselves, a brief human interest document, establishing a new and greater musical importance for the phonograph:

"I am very glad to be able to inform you that I was admitted on Saturday last to present the Vocalion before Their Majesties, the King and Queen of Spain. The Queen Mother was also present.

"The impression made by our instrument was most flattering. The King, especially, who was standing with me near the instrument, was most interested, asking for the smallest details of each operation, and

expressing his admiration with enthusiastic words and gestures. He tried the effects of the Graduola and understood immediately how interesting this device is, which gives — as he said to himself — an increased interest to the phonograph; which, until now, always played the same piece in the same way.

"After the King, the Queen Mother wished to play a record. Whilst manipulating the Graduola she accompanied the record by voice — this shows how keen was her appreciation of the Vocalion.

"When the Queen and Queen Mother had gone, I remained alone with the King, when I had with His Majesty the most charming talk. After I had given him all the details about the Vocalion, he was kind enough to speak to me of my family, which remained in Belgium, and he gave to me the most comforting words.

"Then shaking hands with me he said the following, which I reproduce quite truthfully —

> "'I thank you very much for having shown me the Vocalion, which is a splendid instrument. Please give my best thanks to The Aeolian Company for their kind attention. The Vocalion is a wonderful instrument that really interests me much. Please say so to The Aeolian Company.'"

Aeolian prestige, Aeolian ideals, and above all, the Aeolian faculty for harmonizing true artistic endeavor with modern organized production methods, are writing a greater phonograph history — have already created a permanent niche for the Vocalion in the artistic world of music.

The Aeolian-Vocalion is made in many Art and Period models. Prices to $2000. Special case designs to comply with architects' or decorators' specifications.

ABOUT VOCALION REPRESENTATION

LREADY much Vocalion territory has been assigned—Vocalion representation is recognized as the most profitable any dealer can secure. The number of firms manufacturing phonographs is already increasing. Competition is growing, and popular demand is depending less and less on the glamour of association with individuals and artists, and more and more on intrinsic merit and demonstrable superiority.

The Aeolian-Vocalion is not only far in the lead today, but the whole history of its manufacturers is a certainty of its remaining so. Moreover, this leadership is obvious at a glance, even to the least musically cultured. It is apparent in the most moderate-priced "stock" model—overwhelmingly evident in the Art Styles.

When in addition it is realized that the Aeolian-Vocalion line is the broadest in the industry, ranging from instruments at $35 to magnificent art models at $2000, and that Aeolian representation is *exclusive*, insuring the dealer the advantage of all the business in his territory, the tremendous value of this representation becomes apparent.

Columbia Records TRADE MARK Note the Notes

GRAFONOLA CO. OPENS IN CLEVELAND

Spacious Quarters Formally Opened at 1115 Euclid Avenue—Those at the Head of the Company—Union Phonograph Supply Flooded With Orders—General Reports Excellent

CLEVELAND, O., November 6.—A new Grafonola store here, is the November message to The Talking Machine World. Visitors from the east, as well as from Chicago, say it ranks well with the best stores of its kind anywhere in the United States.

The spacious headquarters of the Grafonola Co., at 1115 Euclid avenue, were opened for public inspection October 21. But it was not until the first of this month that everything in the store found its proper place. The store adjoins the new Stillman theatre in the building recently added to the Hotel Statler, and is in the bon-ton district of Cleveland.

About the personnel of the company. No changes were made in the management, as the store is merely new quarters for the company which temporarily occupied the store at 913 Euclid avenue. The company was organized a little over two years ago with S. A. Jaeger as president and W. M. Wright as secretary and treasurer. The sales force is composed of twelve inside salesmen and ten men working on the outside.

Of course the largest part of the business is dealing in Columbia Grafanolas and the Cheney talking machine. However, the firm has added a line of pianos.

The store occupies the basement and a second floor, has fifteen separate demonstration rooms, as well as special quarters for records and piano rolls and is by far the largest store of the kind in the city.

L. L. Brenneman, in charge of the educational department of the W. H. Buescher & Sons Co., dealers in Victrolas, announces the arrival of a seven-and-one-half pound baby girl in his family on November 2.

F. G. Marbach, of the Union Phonograph Supply Co., the first of this month, stated that his factory can not supply all the demands made for newly patented tone arms and reproducers. He said they can not fill one half their orders. The first week of this month the company added a night force at their factory.

The Eclipse Musical Co., distributors of the Victor products, report one of the largest months of business in the history of their firm. Figures show that October business of 1916 increased 100 per cent. over business of the corresponding month a year ago.

C. K. Bennett, manager of the Eclipse Musical Co., has just returned from a visit at Camden, N. J., and from a trip through Ohio. He reports a tremendous leap in business in all territories.

Mr. Bennett, Earl Poling and Miss Florence Boutell, the latter two also being members of the Eclipse Co. staff, attended the opening of a Victrola department in the store of Drake-Monninger Co., Alliance, O., October 1. Miss Boutell gave several vocal solos with Victrola accompaniment.

The Decorah Music Shop, Decorah, Ia., opened its establishment in the new Hutchinson Building on Main Street, last month. The Edison Diamond Disc line is handled.

HEALTHY SALESMEN GET RESULTS

O. K. Houck Piano Co. Encourages Athletics Among Members of Staff With that End in View—Selling High Grade Goods

MEMPHIS, TENN., November 4.—J. F. Houck, vice-president of the O. K. Houck Piano Co., this city, believes that the healthy salesman is the man who gets the best results, and as a result the members of the staff of the Victor department of that company, which is a Victor distributor, are encouraged to take an active interest in athletics to keep themselves physically fit. The employes enjoy various contests during the year. All of them are enthusiastic baseball fans and have already organized a team to go after some records next year.

The Houck Co. was recently visited by P. P. Ratcliff, representing the Victor Talking Machine Co.'s educational department, and did some effective work among the Memphis schools, and the company's sales staff is concentrating on the higher grade of instruments, and the effect is found in the fact that the first eighteen Victrola sales closed during October averaged over $200 apiece—a record which is worth studying. Fall business with the Houck Co. is most excellent. General conditions are good and the company expects that the holiday business will break all records.

The Wilson-Laird Phonograph Co., New York, has been incorporated with a capital stock of $10,000 to manufacture reproducers for phonographs. The incorporators are F. M. Applegate, C. L. Stephenson and H. W. Baker.

Distributors for The Victor Talking Machine Co.

GRAND OPERA SEASON HELPS KANSAS CITY BUSINESS

Serves to Bring Strong Record Demand to Various Stores—Koerber-Brenner Co.'s New Publications—New Manager for Trower Music Co.—Expansion of Starr Co. Business

KANSAS CITY, Mo., November 6.—The grand opera session held in Convention Hall the past week was a very helpful stimulant to the local talking machine business and particularly to the record trade, said J. F. Ditzell, who reports that his department did a great deal of co-operative advertising with the management of the grand opera, and the result was a large sale of Homer, Farrar and Whitehill records, beside a large increase in the sale of machines.

J. F. Ditzell, manager of the talking machine department of Peck's Dry Goods Co., reports that he has just received a copy of the first issue of a paper called "Kay Bee," which is published by the Koerber-Brenner Co., distributor of the Victor at St. Louis. This sheet, which will be sent to all retail dealers in the West who deal with the Koerber-Brenner house free of charge, contains much clear, helpful and interesting news for the dealer.

The E. E. Trower Music Co., of Kansas City, Mo., has a new manager, W. C. Junkins, who has been in the music business for a number of years in the Southwest. E. E. Trower, owner and formerly manager of the company, has accepted the general managership of the talking machine department which is now being installed in the Boston Store, Wichita, Kan. This department will occupy the fifth and sixth floors of the building. Mr. Trower has moved to Wichita and taken his family with him. The Pathé talking machine which is carried by the E. E. Trower Music Co. at Kansas City, will also be carried in the new department of the Boston Store at Wichita.

C. V. Bissell, the new manager of the Starr Piano Co., of Kansas City, dealer in talking machines, reports that the Kansas City house has taken over the entire territory of the Southwest in talking machines, where it formerly had only the Kansas City territory. Mr. Bissell was formerly wholesale talking machine salesman in the Southwest territory and expects to do a good business, as he is well acquainted with the territory.

L. V. Smith, formerly floor salesman for the talking machine department of the Peck Dry Goods Co., is now selling from a Ford car in the suburban district. He visits prospective customers and brings them to the store in the car, thus covering a much larger territory.

O. D. Standke, a new salesman added to the floor staff of the Peck Dry Goods Co. talking machine department, is well acquainted with the talking machine business, having had a number of years' experience as retail manager of the Columbia talking machine branch at New Orleans and also at Chicago.

May, Stern & Co., of Kansas City, dealers in Victrolas, report a splendid business. The higher priced machines are in greatest demand and people seem to have plenty of money. This general air of prosperity is expected to make the fall and holiday business the best in several seasons.

The Altman Piano Co., which recently had its opening in Kansas City, has added the Columbia Grafonolas to its line, and reports that it is impossible to get as large a stock as is desired.

E. S. Hall, of the Hall Music Co., of Kansas City, reports that he has been embarrassed by the shortage of steel needles of various kinds. Mr. Hall says that fall business with him has been very good, and he is expecting a nice holiday trade.

F. M. Weiss, traveling representative of the Artophone Co., of St. Louis, was in Kansas City recently.

L. E. Wood, formerly in the talking machine business in St. Joseph, Mo., recently joined the Victrola department of the Jones Store Co., and a new repair man has also been engaged especially for that department.

B. A. Beard, traveler for the Columbia Graphophone Co., operating out of the Chicago office, is now visiting the agents in the Southern States.

James T. Clenny, of the Architects' & Engineers' Supply Co., announces that he will soon open a store in the downtown district. This company handles the Brooks, the Mandel and the Playerphone and has already had a good success. In the few months that Mr. Clenny has handled the machines over fifty have been sold. W. G. Nourse has been traveling through Kansas and Missouri for the company. Mr. Clenny is having the troubles of the average talking machine agent—he cannot get machines delivered.

E. A. McMurtry, manager of the Kansas City branch of the Columbia Graphophone Co., will soon leave for a trip to the executive office at New York. While in the East he will also visit the factory at Bridgeport, Conn. Mr. McMurtry says he makes these trips to the East every year to get brushed up on the latest "dope." This will be a business trip entirely.

N. R. Fuller, of the Edwards-Ludwig-Fuller Jewelry Co., says that firm has taken on the agency for the Steinola, a Kansas City manufactured machine. W. G. Nourse is handling the territory through the Southwest and a good showing has already been made. The machine is made in three sizes: one which sells for $75, another for $105 and another for $160.

The local office of the Columbia Graphophone Co. has a special window display showing the evolution of a record from the beginning to the end, which it is sending to all of the larger agents in this territory. The display stays a week at each house. As there is only one display the bidding which goes on for it among the dealers is lively.

M. W. Bardwell, manager of the talking machine department of the Household Fair, reports business to be fairly lively in spite of the fact that there is no one traveling for that department at present.

W. C. Fuhri, the United States manager of the Columbia Graphophone Co., and Mr. Sterling, the European manager of that company, recently paid a visit to the branch at Kansas City, Mo., of which E. A. McMurtry is the head. Several days were spent over the city. The two men are making a trip through the East visiting the branches and Kansas City was their farthest point West.

"NATURE MAN" EXTOLS "TALKER"

Southern California Recluse Tells of the Enjoyment Derived From the Talking Machine

LOS ANGELES, CAL., November 3.—William Pester, known throughout Southern California as the "Nature Man," has some very unique and interesting statements to make regarding the usefulness and desirability of the talking machine. Mr. Pester endeavors to live (as nearly as it is possible in this modern era of speed and progress) the life of our Saviour. He resides in a hut of his own manufacture, made entirely without the help of modern implements of any kind. Here in the foothills of the mountains, away from the noise and confusion of the city, he lives the life of a hermit, with the exception of three tried and true companions, his dog, his violin, and last, but not least, his Victor. The records which Mr. Pester buys from time to time are the only connecting link between his secluded little hermitage and the great world outside, and they are all of the better class of music.

Enjoying the Victor Close to Nature

Interesting, indeed, are some of Mr. Pester's views on the good that can be accomplished by means of the talking machine. We quote from a recent article written by him: "There are but few people who are not susceptible to the charms of sweet music. Even were a person bereft of speech, he could appeal to the people of all nations if he were the master of some instrument. One may like to hear a comical song, but after hearing it several times it becomes stale and even obnoxious. The talking machine has become a universal instrument, and it is both the duty and privilege of the record producers to put before the public music that is charming and uplifting, thus contributing to the betterment and progress of all mankind. Give us the grand and beautiful exclusively and the vulgar will die."

98% IS HEALTHY

When the Doc sees 98% on his thermometer, he knows that his job is gone.

When the VICTOR DEALER sees 98% of his RECORD orders filled—and promptly—he knows that his Holiday business will not suffer from malnutrition.

We Are the Health Producers

We keep that 98% average in record order filling as the main objective.
When the percentage drops—WE'RE BOTH SICK.

℞ Try Standard Treatment for that Victor Business

P. S.—Order by name—there's nothing "Just as Good"

We deal in Victor Products exclusively, and have no interest in any retail talking machine business. We have no branch stores, so that we have no local interests but yours, and this insures you our best service and co-operation.

SALES PROMOTION DEPARTMENT

Organized by the Columbia Graphophone Co. as Division of the New York Organization Devoted Entirely to the Interest of Dealers—H. Tuers in Charge of Department

R. F. Bolton, district manager of the Columbia Graphophone Co., announces the inauguration of a sales promotion department, a division of the New York organization devoted entirely to the interests of Columbia dealers. H. Tuers is in charge of this department and has as associates a competent corp of assistants who thoroughly understand the requirements of the retailer and are prepared to extend assistance and co-operation on all of the details of marketing Columbia Grafonolas and records, from store location and equipment to stock and selling suggestions. Preceding this formal announcement, the department has been collecting valuable data on numerous subjects, and dealers are welcomed to seek assistance in their problems through this department.

"A surprising and underestimated response from retailers has resulted from the department's initial attempts," said Mr. Tuers, "proving conclusively that a long felt exigency has been successfully met. Particularly encouraging results have come from efforts with the new dealers. In several instances the period of organization that the new man must necessarily go through while he solves the many new problems has been eliminated and Mr. Retailer steps into the talking machine field on his opening day educated to the 'needs of the trade,' well advised and doing the business that ordinarily might be expected in his third or fourth month.

"In the case of established dealers this department has started several schemes to assist the dealer in increasing his sale of Columbia product and while our experience in this work is limited, returns indicate that the dealer is not only very much interested, but that the schemes are entirely efficient; other selling suggestions will be made from time to time so our dealers may be supplied with a carefully planned and worked out selling campaign, good for twelve months in the year.

"The services of this department are without charge to the dealer except where extra supplies are furnished and these at cost prices. The department has one object only, to assist Columbia dealers and while the acceptance of this service rests entirely with the dealer, it is our thought that to specialized work in this department, we will have suggestions which will be valuable, even to the large dealer with a well-equipped organization.

"The field of work covered by this department is almost limitless and will be expanded from time to time as our dealers encourage us by their support. The department is already a success and gives promise of big things for the future."

WHAT'S IN A NAME

A Hibernian had wandered into a talking machine establishment.

"I want to hear some o' thim sweet songs by the great Irish tenor, John McCormack."

When he had listened with great satisfaction to "Mother Machree," "I Hear You Calling Me" and some others, he said:

"And now leave me hear some songs by this other Irishman I've heerd tell of—Al—Al—what's his name now? Oh, yes, Al McGluck!"—New York American.

EQUIPMENT FOR ELMIRA ARMS CO.

Well-Known Victor Distributor Remodels Quarters and Installs Additional Booths to Take Care of Expanding Business

Elmira, N. Y., November 3.—The Elmira Arms Co., the well-known Victor distributor of 117 Main street, this city, has added two more sound-proof booths to the equipment on the second floor to take care of the growing trade in machines and records. The remodeling operations were under way for several weeks, for the old parlors were completely torn out and the entire space redecorated. The main showroom on the second floor has also been divided into two sections, thus giving the company practically three additional demonstrating rooms. All are finished in white and handsomely furnished. Together with the rooms on the ground floor, the company now has all the sound-proof parlors available.

J. W. Butts, secretary-treasurer of the Elmira Arms Co., reports a Victor business which is increasing at a pace which at times defies the efforts of the company to provide sufficient stock to meet the demands.

The company is advertising very extensively in local territory and reports that both the wholesale and retail business is more than satisfactory, necessitating an increase in the sales staff.

NO RISE IN DECALCOMANIA PRICES

George A. Smith-Schifflin Co. Able to Maintain Prices at Normal

Contrary to prevalent opinion the price of Decalcomania transfers for name plates remains the same as before the European war. P. Schifflin, of the Geo. A. Smith-Schifflin Co., New York, manufacturer of "Magnet" decalcomania name plates, stated recently that while it was true there are certain European products used in the manufacture of the Decalcomania, that are now harder to procure, they have been able during the past two years to keep prices normal and have succeeded in placing themselves in a position where they will be able to continue to quote prices at as low a figure as for some years past.

The Spring Bros. Co. and the Eikenbery-McFall Co., Edison dealers of Eaton, O., made special window displays of the Edison Diamond Disc phonograph during the recently observed "Edison Week."

BANQUET OF HEINEMAN STAFF

Department Heads and Assistants Hold Enjoyable Reunion in Cleveland on the Evening of October 28—New Production Mark Set

CLEVELAND, O., November 8.—A most enjoyable banquet was held at the Dover Inn on Saturday evening, October 28, when the department heads and their assistants at the factory of the Otto Heineman Phonograph Supply Co, Elyria, O., gathered for their first get-together dinner.

Otto Heineman, president of the company, was the honorary host of the occasion, Mr. Heineman giving the dinner as a mark of his appreciation of the efforts of his factory staff and the remarkable production figures they had reached last month.

Forty-two foremen and assistants traveled to the Dover Inn by automobiles from Elyria, the trip forming one of the enjoyable features of the evening. Invited guests included Herbert Dennis, of the Pathé Frères Phonograph Co., New York, and A. G. Bean, of the Garford Manufacturing Co.

L. E. Bonsieur, factory superintendent, presided as toastmaster with appropriate witticisms and good humor, and informal addresses were made by Messrs. Dennis, Bean, Neumeister and Strong. A specially arranged musical program was pleasingly rendered by the "Motor of Quality" quartet.

Mr. Heineman had made all plans to be present at the dinner, but owing to unprecedented pressure of business was obliged to change his plans at the last moment, W. C. Strong, factory manager presiding at the festive board, and acquitting himself well.

A new figure for daily production has been set at the Heineman factory, and judging from the enthusiasm of the factory forces, another set of record-breaking figures will soon be established, necessitating, of course, a repetition of the Dover Inn banquet.

MISS MAUDE H. SCHUYLER DIES

WATERTOWN, N. Y., October 30.—Miss Maude H. Schuyler, for four years manager of the Columbia department in the Hardman-Woolworth store in this city, died last Tuesday after an illness of several months. Miss Schuyler was very popular in local business and social circles, and had been unusually successful in developing a Columbia clientele.

DEATH OF MISS CLARA SHERMAN

SAN FRANCISCO, CAL., October 28.—Miss Clara Sherman, sister of Leander S. Sherman, of Sherman, Clay & Co., and a veteran teacher in the California public schools, succumbed on Thursday to injuries received when she fell through a skylight at her home, striking the floor fifteen feet below. Miss Sherman was seventy-four years old, and had retired from school work many years ago.

COLUMBIA USED TO DEMONSTRATE WIRELESS TELEPHONE

First Public Exhibition of the Power of the Wireless Telephone to Carry Music Held at Hotel Astor Recently—Dr. Lee De Forest Conducts Demonstration Before Interested Audience

The first public demonstration of the conveying of musical tones by wireless, under the auspices of the De Forest System of Telephony and the Columbia Graphophone Co., was held

Dr. Lee De Forest at Receiving Apparatus

at the Hotel Astor on Thursday evening, October 26, before a number of specially invited and distinguished guests. For the purpose of the demonstration a number of Columbia records were played on a Favorite Grafonola at the laboratory of the Columbia Co., 102 West Thirty-eighth street, transmitted by the De Forest Radio Telephone, and received at the wireless station at the Hotel Astor, a special receiving station having been installed in parlors A and B on the eighth floor of the hotel for the demonstration.

In order to prove the success of the system there were practically all types of music included in the thirty-three numbers making up the program, such tenor solos by Sembach and Lazaro, soprano solos by Alice Neilson and Lucy Gates, and instrumental numbers by Leopold Godowsky, pianist; Kathleen Parlow, violinist, the Blue and White Marimba Band, Prince's Orchestra and others, and without exception the tones came from the receiver with wonderful naturalness, even the human quality of the voice being sharply defined.

Where the Guests Listened to the Demonstration

A dozen or more individual ear sets were placed around a large table, and the guests took turns listening to sections of the long program. Only on very few occasions was there any interference from general wireless stations, and this was quickly overcome by the operator.

The demonstration, which was conducted by the inventor, Dr. Lee De Forest, in person, in co-operation with the Columbia Co., was the result of over two years of private experiment to convey music tones by wireless, and the success of the experiment was proven not only to those who listened to the demonstration, but also was emphasized by the fact that it was made possible for every wireless operator within one hundred and fifty miles to hear the concert with ordinary wireless equipment. Beginning November 1, professional and amateur wireless operators in and around New York are invited to "listen in" on the wireless transmission of the latest Columbia instrumental and operatic records sent by the De Forest Radio Telephone. Even ships at sea will be able to hear distinctly the nightly concerts in New York.

A more powerful sending apparatus will soon be installed in the tower of the Woolworth Building, where the Columbia Co.'s offices are located, by Mr. De Forest, and will serve to carry the music to ships a thousand miles out at sea. The same principle involved in the demonstration makes it feasible for passengers on ships to hear the operas at the Metropolitan Opera House, New York; to distinguish the voices of the great artists, and even to hear the applause of the audience. This is simpler than carrying music over land, as there is less "interference" at sea.

As in the recent epoch-making demonstration of trans-continental wireless telephone communication, the audion bulb, invented by Dr. De Forest, is the chief feature in the highly-improved apparatus used in the present tests.

The audion is a wonderfully sensitive incandescent lamp, containing, besides the ordinary filament, two metal plates and a metal grid of fine wire, which translates the inaudible, high-frequency electric currents that come through the ether into telephonic currents which can be heard by the human ear.

Dr. De Forest declares that by means of his newly-developed receiving apparatus more perfect music can be heard by wireless transmission than can be conveyed by telephone wires.

In addition to Dr. De Forest there was present at the demonstration Ed. M. Baker, advertising manager of the Columbia Graphophone Co.; G. C. Jell, superintendent of the recording department of that company, together with other Columbia officials and a large number of invited guests.

During the course of the demonstration an elaborate buffet supper was served to the guests in the college room of the Astor, immediately adjoining the parlors where the demonstration was held.

MANOPHONE CANADIAN AGENTS

The Music Supply Co., With 150 Distributing Points in the Dominion, Secure This Line—Official of Company Visits Manoil Factory

One of the recent visitors at the factory of the James Manoil Co., Inc., Newburgh, N. Y., was John Sabine, of the Music Supply Co., 36 Wellington street, East, Toronto, Canada, who has secured the Manophone line of machines and will represent the Manoil Co. as Canadian distributors. The Music Supply Co. maintains one hundred and fifty distributing agencies throughout the Dominion, and the executives of the James Manoil Co. have expressed great confidence and pleasure in having been able to place the Manophone at the disposal of this progressive house.

"The House of Service"

W. D. ANDREWS, Buffalo, N. Y.

"GOOD OLD-FASHIONED PROSPERITY" RULES IN BUFFALO

All Classes Now Employed and Have Money to Spend for Talking Machines and Records—Andrews Gets Many Orders for Accessories—General Activities of the Trade

BUFFALO, N. Y., November 6:—"Good old-fashioned prosperity" is the way one dealer described the condition which he expects will mark the coming holiday trade in talking machines and records in Buffalo. The palatial homes of the rich will not offer the only opportunities for sales on the part of the live talking machine salesmen during the Christmas season. The humble workingmen of Buffalo are now receiving wages that formerly they never dreamed would come their way, and they and their families also are reaching out for enjoyments such as the talking machine affords. The perspective of the local dealers has widened and their enthusiasm has increased.

From all parts of the United States W. D. Andrews has received orders as a result of the wide distribution of his "catalog of talking machine accessories," which he recently sent out. Mr. Andrews has a complete stock of records with which to supply dealers for the holiday trade which he predicts will be heavy in view of the present industrial prosperity. He is one of the pioneers in the talking machine field and has always been an ardent campaigner in favor of a strong organization of dealers in this territory.

I. Melzer, a Victrola dealer at 1046 Broadway, recently returned from a visit to New York City.

Albert F. Schwegler, a Victrola dealer at 219 East Genesee street, is receiving congratulations on the recent birth of a nine-pound daughter.

Winegar, Lindsay & Seales, who handle Grafonolas, have new sound-proof booths, which are proving satisfactory. A new background, which this firm has installed in its show windows, is changed every month.

H. G. Towne, manager of the Victrola department of Robert L. Loud's piano store, reports that the holiday outlook is unusually bright and trade will be limited only by the supply of goods received.

Manager Stettenbenz, of C. H. Utley's piano store, recently gave daily recitals on the New Edison in honor of Edison Week. His patrons were offered a three days' trial of this instrument.

The Poppenberg Piano House has offered a free auto trip to and from its store to those who want to look at or buy a talking machine.

Vigorous advertising has always been a feature of the Erion Piano Co., an East Side firm which handles Victrolas. Arthur Erion is in charge of the company.

The Victrola is featured by Martin and Carl Kaeppel, piano dealers at Jefferson and Riley streets. The business was established by their father fifteen years ago and is in a prosperous condition.

Charles J. Hereth, an Edison dealer at 397 East Genesee street, is celebrating his tenth year in the piano business. Among his best customers are many music lovers of Buffalo's great East Side. He is a practical handler of musical instruments, having learned his trade at C. Kurtzmann & Co.'s piano factory.

In view of the unsettled conditions in Mexico, C. H. Heinike, manager of Denton, Cottier & Daniels' Victrola department, may not return to his position for some time. Mr. Heinike is a member of Troop I of Buffalo, now stationed at the Mexican border. Mr. Farrar, in charge of the department in Mr. Heinike's absence, reports good results from the November supplement which this firm issued in connection with the complete catalog of Victor records for this month. The cover of the supplement contains a cut and history of Denton, Cottier & Daniels' store and the pianos carried. This establishment is advertised as "the store your forefathers patronized."

W. L. Sprague, manager of the Buffalo store of the Columbia Graphophone Co., and C. M. Wall, assistant manager, are jubilant over the advance sale for the holidays and in fact their business in general. Mr. Wall said that the sales are double the volume of business done last year.

The Dictaphone department of this store is being revised and enlarged under the direction of D. C. Cloud, formerly of the Edison Co., of New York.

Among the new Grafonola dealers in the Buffalo territory are the Lang's Hardware Co., of Olean; the Reliable Furniture Co., of Rochester, and B. L. Thomas, of 1278 Jefferson street, this city.

A. H. Dankman, Columbia road salesman, has just closed the largest month in his career as a talking machine man.

The records of Hipolito Lazaro, the famous tenor who recently joined the ranks of the Columbia artists, have met with great success in this section of New York State.

Manager L. M. Cole, of the John Schuler Music Co., will attend the convention of the Edison dealers to be held in Syracuse in the near future.

H. R. Skelton, zone supervisor for the Edison Co., visited Buffalo last week.

Brick & Enos Co. entered the window display contest for the best window during Edison week.

Mr. Wilgus, who has charge of the talking machine end of the business as well as being the publicity man, has several good ideas for creating a demand for the Edison instrument. One is called children's hour. Every Saturday between 2 and 3 o'clock a recital for children is given. At the last one sixty youngsters were present and each received a colored picture book free of any advertising. They now look forward for that hour.

Kuhn Bros., who recently opened a music store at 503 Elmwood avenue, are handling Columbia Grafonolas.

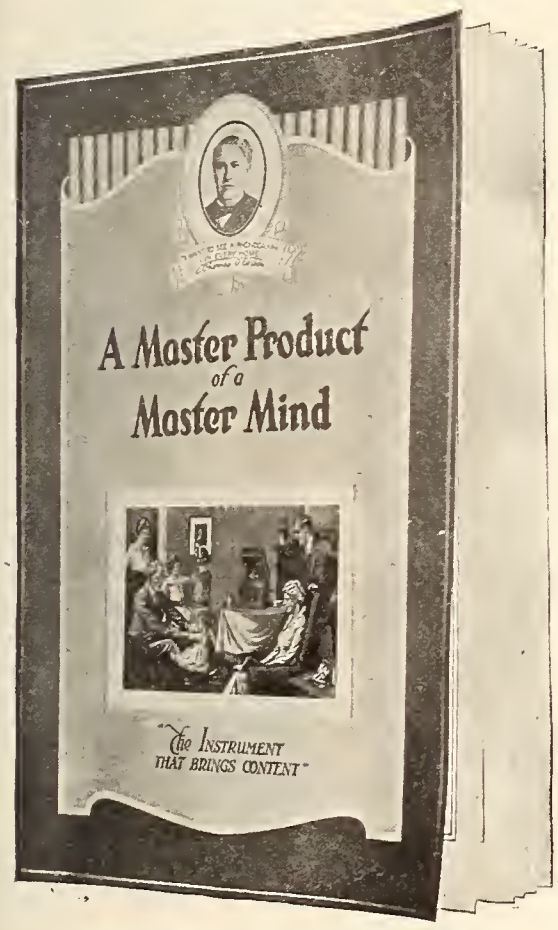
NEW AMBEROLA CATALOG

Very Complete and Interesting Publication Just Issued by Thos. A. Edison, Inc., that Will Be Found Worthy of Perusal by the Trade

The Thomas A. Edison Co., Inc., has recently issued a very superb Amberola catalog, the



Cover of New Amberola Catalog

handsome cover of which is illustrated in this article.

The Amberola business of the Edison organization has grown so extensively during the last year that few people, even in the trade, have any conception of its actual proportions. The handsome new catalog and continued monthly reports to The World by K. R. Moses, sales manager of the Amberola division, are simply sign posts. Steady enlargement of the Amberola record list is another significant indication of the steady increase in the Amberola business. Mr. Moses always reports "a considerable increase over business for the preceding month and over the same period of last year."

The new catalog itself is characterized by exquisite treatment. The cover is a striking color affair with an embossed gold headline enhanced by a cream and blue background. The forepart of the catalog contains a superb picture of Mr. Edison and a panoramic view of the Edison factories at Orange. The introduction deals with the influence of music in the home and the colored illustrations which follow further this music in the home effect. The regular catalog matter follows, but it is handled in a very superior manner.

GREAT ACTIVITY IN LOS ANGELES

Big Sales of Talking Machines and Records Reported on All Sides—Look for Tremendous Christmas Trade—The News of the Month

Los Angeles, Cal., November 5.—The month of October in this vicinity has shown that the talking machine industry here is decidedly "on the jump." "Big sales and plenty of them" seems to have been the slogan of the local dealers during the past month. At the rate that business has been increasing this fall, the sales made before Christmas should be tremendous. Presidential year seems to have no evil effects on the trade here, indeed, quite the contrary.

The Andrews Talking Machine Co. continues to thrive in its new quarters on Broadway. The place is most attractively furnished, and draws many new friends. Manager Pease has just returned from an outing to Santa Barbara with the Los Angeles Lodge of Elks, one of the largest in the world, having nearly 3,000 members.

The Wiley B. Allen Co., who handles the Victor and Columbia lines, is doing a rushing fall business. Manager Lindsey expects his best Christmas season this year. The sales force loses one of its best representatives when Miss Cruise, who has been with the firm for some time, will be married. Miss Cruise has made many friends here and all extend their best wishes to her.

At the George J. Birkel Co. the work of making new machine sales rooms is progressing at a rapid rate. At least three new rooms of large dimensions will be finished, it is hoped, in time for the Christmas trade. Manager Beck has made many new friends here since he took charge of the department at Birkel's and the increase in sales is self-explanatory.

Manager Booth, of Barker Bros., is preparing for a strenuous Christmas season by having several new demonstration rooms opened on the second floor. These rooms are large, well lighted and ventilated, and the salesmen have easy access to records, as a dumb-waiter runs from each of the rooms to the stock room beneath. The alterations on the first floor have been postponed until after the holidays.

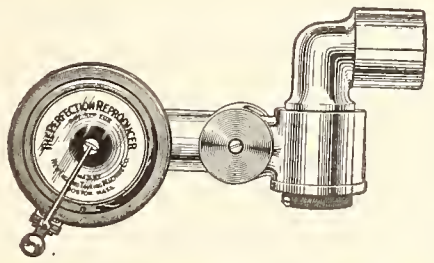
Mrs. Urquhart, in charge of the Pathé Shop, has made good from the start, making many new friends, and increasing the sales of her department to a marked degree.

The Platt Music Co., of this city has entered the talking machine "game," handling the Columbia line exclusively.

NEW CONCERN IN COLUMBUS, O.

The Columbus Talking Machine Co., Columbus, O., has been incorporated with a capital stock of $10,000 by Arthur Weldon, Frances Weldon, Albert H. Harwick and A. L. Harwick.

The Echophone Sales Co., of Elizabeth, N. J., has been incorporated to deal in all kinds of talking machines. The capitalization is $100,000, the incorporators being Ambrose and Harry McManus and Joseph J. Farrell, of Elizabeth.



The Perfection Ball-Bearing Tone Arm and Reproducer

The PERFECTION

Ball-Bearing Tone Arm

is manufactured exclusively by this company and the ball bearing idea is our exclusive patent. This accessory helps the Edison dealer to sell machines and will increase record sales for Victor and Columbia dealers when shown to owners of Edison machines.

The PERFECTION

Ball-Bearing Tone Arm

and reproducer is a STANDARD accessory for playing Victor and Columbia records on all types of Edison disc machines.

OVER 10,000 are now in use. Why? Because it is the highest grade mechanism manufactured for the machine and one that HOLDS its adjustment.

Our quantity prices are more than consistent —they are unbeatable, considering the quality, workmanship and finish of our product.

The "PERFECTION" arm is a *high class* tone arm for a high class machine — it produces *high class* results

HOLIDAY CAMPAIGNS IN INDIANAPOLIS

Talking Machine Dealers Already Preparing to Take Care of Business of Record Volume—Victor Books for Use in the Schools—Visiting Dealers Are Enthusiastic Over Situation

INDIANAPOLIS, IND., November 8.—Both retail and wholesale talking machine dealers continue to report business good and with the election out of the way they are expecting to get a good start on the holiday trade. Several of the retail dealers have already been featuring talking machines in advertisements as the ideal Christmas gift and are pushing the Christmas club plan.

The Stewart Talking Machine Co., jobber of the Victor line, is well pleased with the interest aroused by B. M. DeCou, of the Victor educational department, who addressed several meetings at the Indiana State Teachers' Association here last week. At one of the meetings held in the Masonic Temple more than 1,000 teachers from all parts of the State attended the demonstration of the Victor educational records given by Mr. DeCou.

Already there has been a quickening of demand for school machines all over the State. It is apparent that the teachers have been urging their school boards to get the machines and the Stewart Talking Machine Co. has been forced to fill a number of rush orders for schools.

A Victor dealer at Evansville has succeeded in getting the Evansville schools to adopt the Victor book on "What We Hear in Music" as a text book in the schools. The Stewart Co. distributed about 2,000 copies of the Victor book, "A New Correlation," to the teachers.

A decided increase in the record business shows that the Victor dealers are realizing that there is as much profit to be made in record sales as in machine sales and they are all working on the basis of getting each machine owner up to the $300 mark in records.

Among the out-of-town dealers who visited the Stewart Co.'s offices in the last week were: Frank Bacon, of North Vernon, Ind.; A. C. Reese, of Cambridge City, Ind.; Will B. Hill, of Bowling Green, Ky.; Clyde Williams, of Bloomington, Ind.; E. C. Sheets, of Auburn, Ind.; E. Parkhurst, of Palestine, Ind.; O. L. Foster, of Lafayette, Ind.; Mr. Reynolds, of Reynolds & Brooks, Loogootee, Ind.; Henry Levy, of Henderson, Ky., and B. Goodman, of Montecello, Ind.

At the Pathé Pathephone Store, M. Tobin reports business as good and he anticipates a live holiday trade all over the State. The out-of-town dealers have been lined up well and Mr. Tobin expects them to make a big record.

A. W. Roos, manager of the Columbia Graphophone Co.'s store, visited the Columbia factory and executive offices recently. He reports that business continues exceptionally good. He is arranging to assist the local branch of Steinway & Sons, 309 North Pennsylvania street, to put in the complete line of Columbia machines and records.

The Reliable Furniture store and the Home Furniture store, two of the leading furniture stores in Indianapolis, have installed talking machine departments and are pushing the Vitanola talking machines. The demand for talking machines has resulted in nearly every furniture store in the city installing complete talking machine departments.

Arthur C. Ruark, manager of the Vocalion department of the Aeolian Co.'s store, is expecting a big holiday trade. The Vocalion is being featured in some striking newspaper advertisements.

Walter E. Kipp, of the Kipp Phonograph Co., distributor of the Edison machine, is well pleased with the showing his dealers made during Edison Week. Twenty-six of his dealers entered the show window contest. All of them reported a large number of their patrons as entering the Edison contest for laymen.

At the Edison Shop a big feature was made of Edison Day. A public reception was held all day and in the evening, during which special recitals were given on the Edison machine. Roses were given to the ladies.

At the Starr Piano Co. the Starr phonograph and Starr records have been featured in window advertising. Arthur E. Pfeiffer, manager, is expecting the Starr machine to prove a big seller in Indianapolis during the holiday trade.

WITH THE TRADE IN WINNIPEG

Western Gramophone Co. Opens Branch in Calgary to Expand Service—A. G. Farquharson Goes Back to Los Angeles—Other News

WINNIPEG, MAN., November 2.—The Western Gramophone Co., of this city, is opening up a branch distributing house at Calgary, Alta., with the idea in view of giving and maintaining a better service to dealers in Alberta and Saskatchewan handling Victor lines. T. Nash, of His Master's Voice Gramophone Co., Toronto, personally arranged for the new Middle West distributing house. Premises have been secured in the Northern Electric Building.

The Regina Phonograph Co., Ltd., has been incorporated at Regina, Sas.

A. G. Farquharson, who recently resigned the management of the Western Gramophone Co., has returned with his family to Los Angeles, from where he came in 1912 to take the Canadian managementship for the Columbia Phonograph Co., which position he resigned last year before coming to Winnipeg.

In a recent issue of the Winnipeg, Man., Telegram, a new department was created entitled "New Records for Your Talking Machine," in which a resumé of several popular Columbia records of a late date were commented upon.

Mr. Poisson, manager of the Canadian Phonograph & Sapphire Disc Co., has returned from a month's business trip to Toronto, Montreal and New York. Mr. Poisson states prospects are very bright for securing Pathé goods.

G. L. Stanwood, of Stanwood's, Ltd., has just returned from a business trip to Chicago. He has enlarged his phonographic parlors and is also securing more able assistants.

The Columbia Graphophone Co. still feels the shortage of machines, the supply not being equal to the demand, according to the Western management who reports sales materially ahead of last year.

D. K. McCrae, Columbia representative for Manitoba, and D. H. Elliott, representative for Saskatchewan and Alberta, both report splendid business from these points.

Babson Bros. report Edison phonograph business as being very fair, although the wet weather throughout the West which delayed threshing has also delayed the mail order business.

John De Angeli, former resident of this city, and well known in the music trade, is now with the Columbia Co. in Detroit.

INTERESTING VOLUME ON FREEPORT

FREEPORT, ILL., November 6.—There was recently published in this city an attractive book entitled "Greater Freeport—Illustrated," which gave the history of some of the leading manufacturing and retail establishments in Freeport. One of the concerns featured in this book was the Pathé Pathephone Shop at 148 Stephenson street. This business was established on September 1, and is owned by Edward Allington, Jr., who has sold a large number of Pathephones to well-known people of this city.

The Pathé Pathephone Shop is attractively furnished and decorated, a large concert room being maintained on the lower floor. A complete stock of Pathephones and is on hand at all times.

The Sonora Shops, Inc., Yonkers, N. Y., has been incorporated with capital stock of $25,000 for the purpose of dealing in phonographs and other mechanical musical instruments, by M. Moos, M. Jones and A. M. Nascher.

HOLIDAY BUYING SEASON STARTED IN MILWAUKEE

Steadily Increasing Volume of Sales Leading to Record-Breaking Season—Talking Machine Strongly Featured at Teachers' Convention—Big Orders for Handles—Other News

MILWAUKEE, WIS., November 6.—The first week of November has marked the beginning of the holiday buying season in the Milwaukee talking machine and phonograph trade. October business was better than normal, but of no particular note, and the trade occupied itself mainly with preparations for the biggest season of the year—the two months just preceding Christmas. The shortage of machines continues, and added difficulties are noted in the matter of getting stocks of needles and specialties. Records are coming through in a satisfactory volume, but there are signs of a probable shortage as the season advances. Every month this year thus far has shown improvement over the business volume of last year, and every dealer has become accustomed to figuring in larger totals than ever before in the history of the talking machine.

There never has been a time when the trade, from manufacturer to the smallest retailer, has spent so much money for advertising and publicity as now. Using the heavy advertising drive of the factories as a basis, the jobbing and retail trade is buying much newspaper space and doing a vast amount of other publicity work.

The value of the talking machine as an aid to education is not a new topic, but it played a large part in the proceedings of the annual convention of the Wisconsin Teachers' Association, held in Milwaukee during the first week of the month. More than 7,000 teachers from every part of the State attended the gatherings. The factories were represented with large forces of demonstrators and specialists in educational promotion work.

The Edison Shop, 213-217 Second street, Edison jobber and retailer, has completed the work of increasing its floor space one-third by adding the adjoining store, and now operates one of the largest and most elaborate wholesale and retail establishments in the Middle West. The addition contains the new Diamond Disc hall, which Manager William A. Schmidt intends to make a popular community auditorium.

Victor business in Milwaukee and throughout Wisconsin continues to establish new high records week after week, according to Harry A. Goldsmith, secretary of the Badger Talking Machine Co., Victor jobber. Business is growing so rapidly that it is next to impossible to get delivery of sufficient stocks to fill all of the requirements of the trade, although factory outputs are increasing all of the time.

The Brunswick-Balke-Collender Co., 275-279 West Water street, has opened its new talking machine department, but the branch house is meeting with so large a demand that difficulty is experienced in maintaining stocks. Thomas I. Kidd, manager of the Milwaukee branch, reports that the reception accorded the new Brunswick is most satisfactory.

Something brand new in talking machine accessories is about to be marketed from Milwaukee by the Record-Lite Co., 135 Second street, which has developed a small, portable electric illuminating device attached to the tone-arm, which throws a light upon the record at the needle point during the setting of the automatic stop and starting of the record. It is the invention of George E. Bernecker, until recently sales manager of the Commonwealth Power Co., Milwaukee. The Record-Lite will be sold only through Victor jobbers and dealers, and retail prices are $3.50 in the nickel finish and $4 in the gold finish. The device is a neat, ornamental attachment. The installation is simple, as the light is slipped over the end of the taper tube or tone arm until it snaps into position and permanently fastens itself. The small battery box is set in the left hand, rear corner of the machine, or may be concealed within the machine. The control of the illumination is self-contained and the light burns only when the operator is adjusting the stop. It is figured that the battery and 3.8 volt flash light bulb will last a year or more without renewal.

Pathé record sales during the middle of October broke all records, due to the effective advertising campaign carried on by Manager Lawrence McGreal, of the Pathephone Co., of Wisconsin, 185 Fourth street, in connection with the recent short grand opera season. Lucian Muratore and his wife, Lina Cavalieri, spent several days in Milwaukee and created supreme interest in their exclusive Pathé records. The names of all Pathé dealers in Milwaukee, Wisconsin and Upper Michigan were given in the advertisements.

Frederick D. D. Holmes, secretary and manager of the Smith Piano Co., Columbia dealer, has been devoting considerable of his newspaper space contracts to the promotion of Columbia sales. Mr. Holmes is making a point of "service." The copy is prepared by Hr. Holmes' own advertising department and is original in every respect.

Bortin's Music Shop, 312 Grand avenue, is handling the Perfectrola baby grand exclusively and is doing so much business that orders are being accepted only for future delivery.

T. B. Schreiter, a well-known phonograph man, has joined the C. Niss & Sons Co., furniture dealers, 697-709 Third street, as manager of the New Edison Diamond Disc department.

Espenhain's new Columbia department, Grand avenue and Fourth street, is now in smooth working order and doing a large business. Miss Belle Gunnis, manager of the department, is well versed in Grafonola lore, having been manager of the Columbia department at the Milwaukee branch of the Story & Clark Piano Co., now closed.

C. G. Howell has taken the position of manager of the phonograph department of the Lake Side Crafts Shop, Sheboygan, Wis., a large manufacturer of talking machines.

A. H. Bulmer, Marshfield, Wis., who operates a Pathé department in his optical offices and shop, has doubled the size of both departments. J. E. Buoy, jeweler, who occupied half of the space in the Bulmer store, has retired from business, and Mr. Bulmer will occupy all of it.

H. L. Pendleton, Victor dealer at Prairie du Chien, Wis., has purchased the jewelry business of L. F. Wiltgen and enlarged his piano, talking machine and music store business to include jewelry.

R. H. Zinke, manager of the Badger Talking Machine Shop, 425 Grand avenue, took his first vacation in more than two years by hiding himself in the northern Wisconsin woods for two weeks late in October. He brought back plenty of evidence of his ability as a hunter and fisherman.

An order for 500,000 enameled handles for Stewart talking machines has been given to the Wood Products Co., Ladysmith, Wis. The company is installing seven large lathes and building a four-oven enameling shop.

T. W. Abell, manager of the Premier Talking Machine Co., 220 West Water street, is enthusiastic over the condition of business throughout his territory, which comprises Wisconsin and Upper Michigan.

The Sonora baby grand at $150 is at this time the most popular seller in this line, according to Charles J. Orth, local Sonora jobber and retailer.

George F. Ruez, president of the Badger Talking Machine Co., Victor jobber, 135 Second street, Milwaukee, has been making an extended vacation trip during which he spent some time in Arizona, New Mexico and Texas.

R. H. Zinke, manager of the Badger Talking Machine Shop, 425 Grand avenue, Victrola dealer, has been appointed chairman of the entertainment committee of the Kiwanis Club of Milwaukee.

BADGER TALKING MACHINE CO. 135 Second Street MILWAUKEE, WIS.
VICTOR DISTRIBUTORS

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., November 5.—There is only the most glowing report to be made of the talking machine business in Philadelphia during the month of October. The business was exceptional, as has been the condition during all of the preceding months of the year, and most gratifying of all is that the condition so far as stock is concerned, has been much more than satisfactory.

Most of the firms during October have been able to fill their record orders almost to the extent of 100 per cent., while the machine scarcity has not been nearly so marked as during some of the months of the year.

A great deal of competition is developing in Philadelphia and many new machines have come into the market. One of the new machines to be introduced here and apparently in a way that they will cut quite a figure is the Sonora, made by the Sonora Phonograph Corp., who are just now preparing very elaborate quarters at 1311 Walnut street. They have taken the entire building and are having it completely remodeled for their purposes. It is an excellent location, and properly managed the machine will no doubt be a big factor in the trade here.

Another machine that has just come into this market is the Cheney talking machine. A company has been organized here to look after the local interests of the Cheney, and the Henry F. Miller house is the first to take the selling of it.

Big Business With Penn Co.

The Penn Phonograph Co. states that October was very big in comparison with previous months. The machine shipments received during the last few days of the month made up for the deficiency of the early part of the month and helped materially to the big October increase. The firm is arranging for extensive improvements in their warerooms, but on account of delay they will not institute them much before spring, not wishing to disturb their business at this busy season.

Domestic Co.'s New Sound Box

The Domestic Talking Machine Corp. announces a new sound box arranged to play both vertical and lateral cut records, and all Domestic machines are now being shipped equipped with this new sound box. The new features connected with this new sound box, which have been broadly covered through patent applications, consist in locking the box in two positions, one appropriate for playing vertical cut records such as the Domestic, and the other appropriate for playing lateral cut records. As it is only possible to play the sound box in these two positions, there is no danger, such as is frequently found with swinging sound boxes, to have the box assume other than its correct angle.

To Install New Booths

H. B. Herr, of Lancaster, Pa., has arranged to install a number of booths in his store, and D. S. Andrus & Co., of Sunbury, Pa., are also going to put in a number of booths. Their representative, Mr. Walters, came to the city the past week and made the arrangements.

Conditions With Buehn Co.

The Louis Buehn Co. states that it had the biggest October in the history of the business. Mr. Buehn says they are in very excellent shape on records, filling orders practically at the rate of 100 per cent. Their record business has been exceptionally good. He says that they still find a shortage of machines, and particularly in the IX., X. and XI. types.

Among the visitors to the Buehn warerooms were W. D. Andrews, a jobber of Syracuse, N. Y., who was accompanied by his brother, C. N. Andrews, of Buffalo, N. Y. Jack Fisher, manager of C. C. Meller, of Pittsburgh, was also a Buehn visitor. The firm has arranged with the Unit Construction Co. to place booths in the warerooms of the following firms: John Thomas & Sons Co., of Johnstown, Pa.; Christine Bros., of Bangor, Pa.; George Arnold, of Glassboro, N. J., and H. M. Eby, of Huntingdon, Pa.

The Hendricks Co. at Seventeenth and Venango streets, has added additional hearing rooms and are remodeling their entire second floor, which is now devoted exclusively to the handling of the Victor, and is very attractive.

Theodore Connelly, 2633 Girard avenue, is adding another hearing room to facilitate his selling.

Weymann Building Completed

H. A. Weymann & Sons have their new building entirely completed and visitors to Philadelphia should pay this firm a visit. They have a very simple yet a very effective arrangement, which is as attractive as it is convenient. The Weymanns' business has been large, and they were able to move their immense stock with so little detention that their business was in no way handicapped.

Blake & Burkart's Big Edison Month

Blake & Burkart report that they finished up a glorious month on the Edison; they also are very well satisfied with the piano end of their business, which is entirely separated from their talking machines, and in an adjoining building, C. E. Lucore being in charge of the sales force, and they have on the floor a full line of the Frederick pianos. The firm has added several new men during the month, including H. C. Trader, who has been connected with Thos. Edison, Inc., for three years as demonstrator.

Blake & Burkart report that the November list of records are selling very well, and exceptionally so "You're a Dangerous Girl," the Creatore band records; the double violin and 'cello record by Kathleen Parlow and Paul Gruppe, and the operatic record by Ferrari-Fontana, "E lucevan le stelle" from "Tosca."

The Ludwig Piano Co. has also done very well with the Edison, and during the past month it has doubled its number of booths, and Mr. Ryan says they are going to make a drive on the machine, for he believes a big business on the Edison is possible.

Activity With Pennsylvania T. M. Co.

Walter L. Eckhardt, head of the Pennsylvania Talking Machine Co., the distributor of the Columbia in this section, says that the sale of Lazaro records has surpassed all his expectations, although he was sure in advance that they would create a sensation. He says the sale has stimulated business in a way that is little less than phenomenal, and especially as to the coming announcements relative to high-class artists, particularly the new records by Mme. Barrientos, and the trade has been prompted to stock up for this class of trade stronger than ever before.

Mr. Eckhardt says that his firm has received several substantial shipments during the last month that assisted it very materially in making the big quota of business that October showed. The result was that the firm have been able to render a much better service to their dealers than otherwise would have been possible.

C. S. Keyes in Washington

Lansburg & Brothers talking machine department in Washington, D. C., has been opened within a fortnight under the most promising auspices, having been started with considerable red fire in the handling of the Columbia, and to the tune of extraordinary success under the direction of C. S. Keyes, a special representative, formerly connected with the Pennsylvania Talking Machine Co. in this city, and who formerly aided Mr. Eckhardt in the inauguration of many important departments in his territory.

Going After Talking Machine Trade

James Bellek's Sons are going in the talking machine business more seriously than ever before, and have moved their offices to the rear of their present store, and are about to have built a dozen very attractive talking machine booths.

"Service! Service!! Service!!!

Is the element in a man's makeup which makes him stand out pre-eminently from among his co-workers."—*From a speech by Samuel Crothers, at the Aronomink Country Club, Sept., 1916*

This quotation appropriately applies to the VICTOR JOBBER who is giving you the best service.

After 18 years of conscientious effort and service we feel justified in claiming a position in the front rank with the Victor jobbers who have likewise qualified.

PENN PHONOGRAPH CO.
17 So. Ninth St., PHILADELPHIA
ESTABLISHED 1898

HEPPE PIANO CO.'S ANNUAL MEETING

PHILADELPHIA, PA., November 4.—The Heppe Piano Co. at the annual meeting in Camden recently declared a dividend of 6 per cent. on the common stock. The following officers were elected: F. J. Heppe, president and treasurer; R. E. Lehman, vice-president; George W. Witney, secretary and assistant treasurer. Directors chosen were: F. J. Heppe, R. F. Lehman, M. F. McDowell Heppe, W. C. Harper and L. A. Heppe Shewell. The C. J. Heppe & Son Corporation also held its annual meeting. Officers and directors were re-elected.

In Line For Promotion

The salesman who knows record selling—the man who can develop the "one record" account into a large and continuous buying unit.

He is the man who is building business on a concrete foundation.

For records perpetuate profits.

Help your salesman SELL Victor records. Keep tabs on the live records, and never miss a sale because you are OUT. Excuses don't go, for you can always get the co-operation of

BUEHN
Victor Service

which is exclusively wholesale and was the first to specialize on records. Victor records constitute the "world of music" and our stock embraces all numbers. It delivers fast and for repetition of performance, Buehn Service works on a 23-jewel adjustment.

You cannot give us too large an order. And the smallest order receives the same attention as a big one.

THE LOUIS BUEHN COMPANY

EXCLUSIVELY WHOLESALE PHILADELPHIA

STARTS BUSINESS CAMPAIGN

The New McConnell Music Co., of Canton, O., Featuring the Victor Line

CANTON, O., November 7.—The new McConnell Music Co., which has been incorporated for $50,000 and which succeeds the Miller-McConnell Co., which was dissolved recently, has begun its campaign for business. The new company is capitalized at $50,000 and under the management of L. S. McConnell will doubtless extend its business to all parts of the company's territory. Mr. McConnell has been identified with the music trade of this city for the past four years and has a wide acquaintance. The company is handling the Victor line of machines and records and is offering its customers some excellent facilities.

TALKING MACHINES FOR TRENCHES

Donations of Machines and Records Accomplish Real Good in Bringing Cheer to the Soldiers and Others in the War Zone

Miss May Moulton has been collecting phonographs and records for the soldiers in the armies of the Allies for the past year, and has already been the means of sending many machines and records to Europe. She is now selling the Allies ribbon to raise money for this purpose, and is in addition still collecting old records and phonographs.

Miss Anne T. Morgan while in France cabled to Miss Moulton as follows: "Phonographs longed for everywhere. Particularly anxious for record varieties of songs, including 'Tipperary.'" Since her return from Europe Miss Morgan has urged Miss Moulton to continue her work of collecting records.

She has sent eight to Mrs. Griggs, of the American Girls Aid in Paris, and has just received a cablegram from Mrs. Griggs asking for more records and machines. Nine were sent by Miss Moulton to Miss Morgan in Paris.

Miss Moulton has sent phonographs complete with records and needles to France, Belgium, Corfu, Malta, Egypt, Salonica and England. Over eighty-five phonographs and 4,300 records, besides several dozen musical instruments and puzzles have already been donated.

Contributions of money, phonographs and records, etc., may be sent to Miss May T. Moulton at either of the following addresses: 4 East Sixty-first street, or in care of the Vacation War Relief Committee, 7 East Thirty-eighth street, New York.

STEPHENS BILL COMMITTEE MEETS

Committee of the National Association of Talking Machine Jobbers Plan to Further Interest of the Measure—Those in Attendance

The members of the Stephens bill committee of the National Association of Talking Machine Jobbers for local territory held an informal meeting recently at the office of J. N. Blackman, to discuss ways and means for furthering the interests of this measure. Mr. Blackman for the past year has been very active in behalf of the Stephens bill, and as a member of the association's legislative committee has far reaching plans in mind, which will doubtless be productive of excellent results.

Among the Victor jobbers who attended this meeting, and who will visit the various Congressmen in behalf of this measure were the following: R. W. Morey, New York Talking Machine Co.; Thomas F. Green, Silas E. Pearsall Co.; Lipman Kaiser, S. Davega; R. H. Morris, American Talking Machine Co.; B. R. Forster, I. Davega; Maurice Landay, Landay Bros.

Reflexophone, Inc., manufacturers of phonographs, of 114 Fifth avenue, New York, and with offices in Wilmington, Del., made an assignment to Lawrence K. Brown recently. The concern was incorporated in Delaware in October, 1915, with a capital stock of $40,000. John Reynolds is president.

FINE DEPARTMENT IN WACO, TEX.

Goldstein-Miguel Co. Open Elaborate and Exclusive Columbia Department in That City

WACO, TEXAS, November 2.—What is considered one of the most attractive talking machine departments in Texas is that recently opened

Goldstein-Miguel Co.'s Handsome Quarters

in the department store of the Goldstein-Miguel Co. in this city. The formal opening of the new department was held on October 16 and 17 with a series of special recitals and concerts, and attracted a large crowd. The Goldstein-Miguel Co. operate one of the largest department stores in the Southwest, and Edward B. Shiddell, manager for the Columbia Graphophone Co., in Dallas, is particularly pleased over placing the exclusive agency for the Columbia line with that concern in Dallas. The accompanying photograph shows a particularly fine view of the new department with the various types of Columbia machines much in evidence.

The third floor of the factory building of the Klerner Furniture Co., Albany, Ky., has been leased by a new company, of which J. J. Quinn, of Chicago, is the head, and which will manufacture talking machine cabinets.

Crescent TRADE Silver tone MARK Products

EXTENSIVE IMPROVEMENTS IN PITTSBURGH STORES

W. F. Frederick Piano Co. Installing Sixteen Additional Demonstration Booths—Reorganizing Wholesale Staff—Buehn Phonograph Co. Enlarging Retail Department—Other Changes

PITTSBURG, PA., November 6.—The retail Victor talking machine section of the W. F. Frederick Piano Co. has undergone an extensive improvement, with the addition of sixteen record demonstration parlors on the second floor, making it one of the finest and most up-to-date in the city. The newly arranged department was opened November 4. Unico booths are used and are very conveniently arranged. The lights are reflected through the frosted glass tops of the booths, thus giving a soft glow. The decorations are in cream and white, lending a rich appearance to the department throughout. Manager George Hards states that he has made the record and the machine departments distinct, using different salespeople for each. The staff has been increased by four experienced members. The five original parlors and two new parlors now being installed on the first floor of the store are to be devoted to machines exclusively. Manager Hards' office will be removed to the mezzanine floor when completed.

One of the most important changes of the past month was the resignation of French Nestor from the wholesale talking machine department of the W. F. Frederick Piano Co. and the naming of Geo. H. Rewbridge as his successor. Mr. Nestor has become general manager of the Victor department of the new store of Cohen & Hughes, at Washington, D. C. Mr. Rewbridge was formerly traveling representative for the W. F. Frederick Piano Co., wholesale Victor department, and at one time manager of the store, having been connected with the house for the past twelve years. He is recognized as one of the most experienced and capable men in the talking machine field and his appointment met with much approval.

A reorganization process of the forces of the Frederick wholesale department has been effected by Manager Rewbridge and excellent results are being secured. C. E. Willis, formerly with the C. C. Mellor Co. for seven years past, has been made assistant manager. Albert Ingold, formerly with the same firm for two years, is now in charge of the Frederick wholesale record and stock rooms.

The Buehn Phonograph Co., Inc., 514 Wood street, is enlarging its retail department and adding a concert hall to the many unique features of its beautiful store. This concern is the jobber for the Edison line in the Pittsburgh district and also does a fine retail business. Since moving to the present quarters about ten months ago, a rapid growth has been experienced. Four new parlors are being added on the second floor and will be completed within the next few weeks. Part of this floor will be given over to a concert hall, which will be the first of its kind in the city. It is planned to give Edison recitals regularly.

The wholesale department of the Buehn Phonograph Co. is showing a big gain over last year. A number of new dealers are reported in the surrounding territory for both the disc and Amberola machines and records. Negotiations are under way for another important connection in Pittsburgh, Mr. Buehn states.

The Victor talking machine department of the Joseph Horne Co. is doing a phenomenal business in both machines and records. Manager A. R. Meyer, formerly head of the Henry Co., which was taken over by the Joseph Horne Co. about two months ago, states that the outlook is very gratifying. The location on the mezzanine floor has proven an ideal one. The popularity of the handsome concert room of the department is increasing daily.

L. Baskin, furniture dealer, 812 Federal street, has just installed a new talking machine department, and is featuring the Columbia line. This house is expected to build up an excellent trade as it occupies one of the best locations on the North Side.

Manager Henry Wood, of the Boggs & Buhl Victrola section, reports a nice increase in sales of both machines and records during the past month. The only drawback, Mr. Wood states, is the inability to secure enough machines of certain styles that are in big demand. Several additions have been made to the selling staff.

Harry Rewbridge, manager of Rewbridge Bros., leading Victor dealers of Beaver Falls, Pa., was married on November 5 to Miss Alice Kalbrack, of Pittsburgh. A honeymoon trip covering over 1,700 miles was made by automobile, and included stops at Philadelphia, New York and Boston. Mr. Rewbridge is a brother of Geo. H. Rewbridge, manager of the local W. F. Frederick wholesale Victor department.

Manager M. Max, of the Kaufmann Bros. Victrola section, reports great activity in machines and records and that sales show a marked gain over those of the same period a year ago. The addition of twenty-one new record demonstration booths the latter part of last month has made this department one of the largest and finest in the entire country.

The Schroeder Piano Co. recently completed three new demonstration parlors and reports business increasing by leaps and bounds. The Edison line of machines and records has been taken on and is now featured in addition to the Columbia line which was handled originally.

P. W. Blocher, Lawrence avenue, Ellwood City, Pa., recently installed a handsome Victrola section in his jewelry store. While Mr. Blocher has had the agency for some time in Ellwood City, he is now giving more attention to this end of the business and reports a big demand for both machines and records.

The Mather Bros. Co., 213 East Washington street, New Castle, Pa., recently made a number of improvements in its Victrola department, and Manager Price reports a splendid business.

The S. Hamilton Co. talking machine department effectively featured the Victor machine and records in connection with the appearance here of Charles Kellogg, nature singer, at the New Davis Theatre. Mr. Kellogg's famous bird-song records were demonstrated daily at the store, while several Victrolas were installed on the stage of the theatre.

Small "Victors" converted into cabinet types instantly

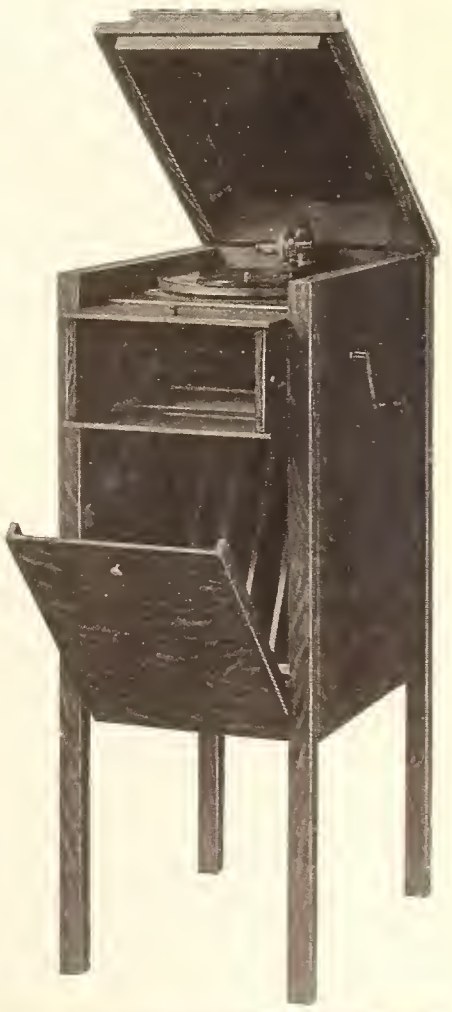
SOMETHING **new**—to sell to every present owner of $15 and $25 Victors **and every** new purchaser thereof—and to a lot of people who want only a cabinet type but can't afford the $75. Also an article with which you can beat competition by offering a combination that forms an enclosed cabinet type at **much less** than the cost of such machines.

By simply setting a "Victor IV" or "Victor VI" into a Lundstrom "Converto" Phonograph Cabinet, the machine is converted into a beautiful, larger, **enclosed type** that looks better and sounds better. The combination, from a practical utility standpoint, has even **more** advantages than the regular cabinet types, because **the machine remains portable.**

Lundstrom CONVERTO
PATENT APPLIED FOR

Enclosed Type Phonograph Cabinet

Has top which when lowered completely encloses machine. Two doors in front, one hinged at top, the other at bottom. The tone regulating doors of the machine open out through this space. When all four doors are open, they form a square compartment and thus a continuation of the "horn" or sound amplifying chamber of the talking machine which increases the volume of sound. Lower part of cabinet contains record rack divided off to hold about 70 records of any size. The winding handle, with extension, which we provide free, passes through side of cabinet so that it can be wound from outside, the same as any cabinet machine.



MADE IN TWO SIZES

"Converto" Cabinet for "Victor IV," retail price..... **$15.00**

"Converto" Cabinet for "Victor VI," retail price..... **$20.00**

Made in Quartered Oak to match machine. Also in Mahogany Finish, where preferred, at same prices.

Owners of $15 Victors can convert their machines into CABINET TYPES at an additional cost of **only $15**—combined cost **only $30.** Owners of $25 machines have a large cabinet type at a **combined** cost of **only $45.** And you make a good profit on every one you sell.

Safe to say you will sell ten of these combinations to one of the big machines—besides selling cabinets to present owners of small machines. Furthermore, you will be able to offset the inroads being made by the many cheap machines being offered, because you can sell a genuine Victor in cabinet style, with a "Converto" Cabinet, at low enough cost to appeal to anyone.

The Lundstrom "Converto" will be advertised extensively. It is backed by a house with fifteen years' experience in making Lundstrom Sectional Bookcases and Filing Cabinets, one of the leaders in this line.

Write at once for wholesale prices and full particulars

Join Pathé for Pr

"The Wor

IN every European country and dependency the name "Pathé" has been a synonym of "Quality" for over twenty years. The remote corners of the world knew the Pathé Disc long before they became acquainted with any other phonograph record.

To every land where the Pathé Instrument and Pathé Records have gone, success for these remarkable products has followed and endured.

The greatest artists of Europe and America contribute to Pathé greatness.

Masterpieces of Music are recorded in the lands of their origin. The musical centers of the world—Milan—Vienna—Paris—Berlin—London—New York—all have Pathé recording laboratories.

In America Pathé is making Phonograph History! Pat Campaign, started only a short time since, has been so succes that within the last few months the two largest concerns in country manufacturing and selling pianos, The W. W. Kim Co. and Hallet & Davis Piano Co., have become distributors Pathephones and Pathé Records.

The largest cabinet makers in the world, The Brunsw Balke-Collender Co., have chosen Pathé Records in prefer to others.

The first jobbing concern in the great Northwest, G. S mers & Co. of St. Paul, are pushing Pathé products *because wanted the best.*

W. H. Marshman, of Victrola Department of McClure & Cowles, Even Gets Newspaper Space When Mongrel Attacks His Victor Dog

ALBANY, N. Y., November 2.—Willard H. Marshman, of the Victrola department of McClure & Cowles, this city, never consciously lets an opportunity go by to get his store or the Victor product mentioned in the daily papers.

For some time past Mr. Marshman has kept one of the well-known Victor dogs on guard at the entrance to the store. One day recently a combative pup decided to test the powers of the Victor canine and literally chewed him up. The manner in which Mr. Marshman took advantage of the incident is indicated by the following item in one of the local papers:

"Midget, the large Victor dog that adorns the front entrance of McClure & Cowles' piano store on North Pearl street, was savagely attacked by a small fox terrier of the living type yesterday and badly torn about the mouth. W. H. Marshman, of the Victor department, says he will go the limit to learn who is the guilty one that urged the smaller pup to bite Midget, and as he is very fond of animals, says it is an outrage. The affair was witnessed by many and the daily passers by who had admired Midget will be disappointed to hear of his misfortune, but Midget says he will be out in a few days to greet them. The assault was ferocious and was thoroughly unprovoked. The police were not called, for 'Midget' is the huge plaster dog standing more than three feet tall, representing the trade-mark of the Victor Talking Machine Co., in the doorway of the popular Victrola and piano store. The little terrier was not afraid of big things, and although he was urged on by calls of 'sic him' from several boys he was not afraid of the huge model and attacked him most vigorously."

EXTENSIVE PLANTS FOR MAKING RISHELL PHONOGRAPHS

The accompanying illustration, showing the home of the Rishell Phonograph Co. and the J. K. Rishell Furniture Co., will give a fair idea of the facilities which are at the command of this company for the manufacture of "Rishell" phonographs. The factories shown are located at Williamsport, Pa., and Hughesville, Pa., and have a combined floor space of 315,932 square feet.

The small building in the upper left hand corner portrays the first home of the company, which it occupied in 1867. In forty-nine years the company has acquired a country-wide reputation as manufacturers of the finest grade of furniture, and by supplying its dealers with quality product and efficient service its business has steadily increased.

A number of years ago the J. K. Rishell Furniture Co. secured important contracts from several leading talking machine manufacturers calling for their most expensive models of cabinets, and so satisfying were these products that their business showed rapid growth.

A short while ago the J. K. Rishell Furniture Co decided to enter the talking-machine field on its own initiative, and the Rishell Phonograph Co. was formed to market the Rishell phonographs. Since the first announcement of this line a few months ago the Rishell phonographs have been placed with representative dealers throughout the country, and the company has every means at its hand to increase its facilities as its business warrants. This company manufactures a complete line of period design phonographs ranging in price from $50 to $300. Permanent exhibits of the line are on display at the company's showrooms in New York, Philadelphia and Columbus.

TEACHERS HELP TWIN CITY TRADE

Educators in Convention Display Much Interest in the Talking Machine and Its Possibilities—Shortage of Machines Still Serious—Columbia Territory Is Expanded—Other News

MINNEAPOLIS and ST. PAUL, MINN., November 7.—Several thousand school teachers, coming from every corner of Minnesota, gave the talking machine trade of the Twin Cities an added impetus during the first three days of November. The traffic did not need any accelerators, what really was needed was a brake somewhere so that the supply and demand would balance, but the teachers are not brakes in the talking machine world. All school houses have them, not only for entertainment, but as auxiliaries in the classes and they prove highly efficient assistant teachers. A class of Victor experts, including Miss Sorenson and Mr. Foster, demonstrated the capabilities of the talking machine as an adjunct to educational arrangements, and drew great houses in the W. J. Dyer & Bro. concert hall. Several hundreds also visited the rooms of the Minnesota Phonograph Co., where Laurence H. Lucker and staff demonstrated the Edison machines and records.

Times are just as hard on the dealers now as they were a month ago and they do not know in what direction to turn to find relief. "We are about 2,000 machines short of the number of machines required for filling orders," complained David M. Dyer, of the house of Dyer. Our receipts from the Victor factories are about 40 per cent. larger than they were last year, but we are unable to catch up to the orders. It is almost as bad to have business so good that you can't take care of it as to be overstocked. Trade is excellent in our territory. We sell everything in the jobbing end, of course, but there is a steady demand for the high-priced Victrolas."

"Our warerooms are but a transfer station for the Victor Co.," explained Mr. O'Neill, of the Beckwith-O'Neill Co. "We are receiving large qauntities of goods, but most of the instruments disappear as fast as they appear, and we have no stock at all—absolutely none. One feature of the trade that is particularly encouraging is the great increase in the sale of records. Fortunately we can get a goodly supply of them and as they produce about as much revenue as the instruments we are a little gratified over this favor of the fates. A decided increase in the demand for grand opera records developed after the grand opera season in which Farrar, Destinn, Homer and others appeared and the recital concerts of Alma Gluck."

The northwestern part of Wisconsin has been added to the Minneapolis district of the Columbia Graphophone Co. in charge of Manager Robert Souders. The new territory includes the thriving cities of Ashland, Washburn and Beyfield and some smaller burgs and will produce considerable Columbia business.

W. C. Hubbard has been placed in charge of the Columbia's dictaphone department. He formerly was Twin City manager for a famous typewriter and knows all the big offices like a book. He succeeds H. B. McAlpine, who regretfully accepted a $12,000-a-year job with an investment concern.

Donaldson's Department Store reports a great demand for the high-priced machines, and records numerous sales for styles selling at $200 and better.

Robert Souders and F. A. McLeod, manager of the Grafonola department of the Emporium, St. Paul, are back from Chicago, where they had a meeting with some of the big Columbia people on business matters.

Politics have interfered as little with business this year as at any time in the history of the State. Time was when trade went all to pieces a week or ten days before the presidential election, but the event has not affected commerce a particle. The calmness was not due to indifference or apathy by any means as the registrations pointed to the largest vote ever cast in this State.

Novelties and Attractions

FOR YOUR

Christmas Trade

BRIGHTEN UP YOUR WINDOWS AND STORE. SOMETHING FOR THE CHILDREN

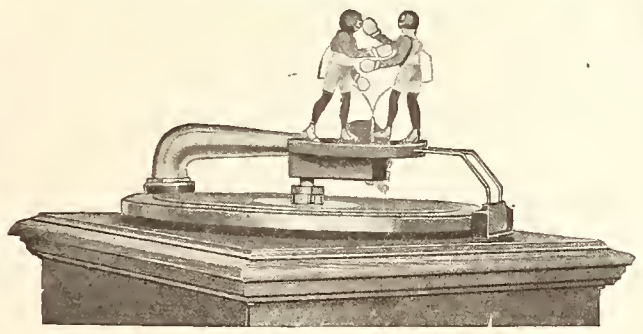
RAGTIME RASTUS
PATENTED MARCH 16, 1915.

Especially Good Sellers this Year on Account of the Scarcity of Toys.

RAGTIME RASTUS is an Automatic Dancing Darky Doll that does One Hundred Different Steps to Music and dances well with any jig or lively record. Rastus delights children with his funny Shuffles, Dances and Clogs.

Hand painted in four colors—a high-grade and unusual mechanical toy.

Ragtime Rastus retails at $1.00
(Item No. 100A)



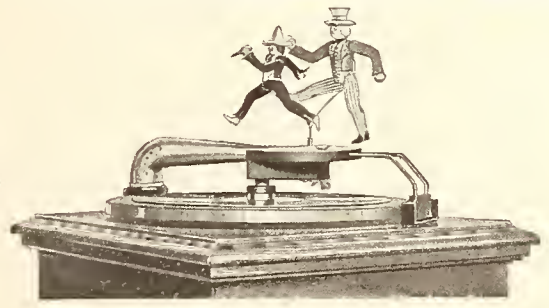
THE BOXERS
PATENTED MARCH 16, 1915.

THE BOXING DARKIES. These little black boxers execute all the blows, swings, shifts, counters and side steps known—and then some new ones. Put on a lively record and these little men box away in good earnest and with wonderful speed and accuracy. The figures are turned of wood, hand painted in bright colors and will amuse the whole family.

The Boxing Darkies retail at $1.25
(Item No. 100B)

THE COMBINATION RASTUS AND BOXERS is the combination of one mechanism and the two sets of figures—the Dancer and the Boxers, making two toys in one. This is very popular.

The Combination Rastus and Boxers retails at $1.50. *(Item No. 100AB)*



UNCLE SAM AND THE MEXICAN
PATENT NO. 1131895

UNCLE SAM AND THE MEXICAN. In this Novelty Uncle Sam Boots the Bandit in Vigorous Yankee Fashion and Boxes his Ears. The Mexican is running away as fast as he can go. Uncle Sam is attractively painted in Red, White and Blue and the Mexican typical of his country. This novelty goes well with "They're on their Way to Mexico," "National Emblem March," or other lively records.

Uncle Sam and the Mexican retails at $1.25
(Item No. 100C)

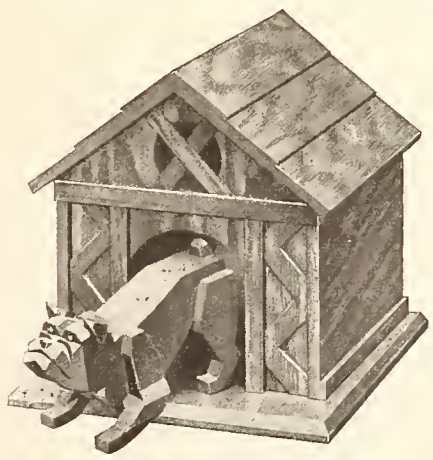
NOTE—These Talking Machine Toys fit on any standard machine (except Edison) and can be put on or taken off in 5 seconds. They do not injure the record or mar the machine.

We receive many letters like this from dealers: Please forward enclosed order for Rastus, Boxers and Combinations. I have had more people looking in my windows at the Dancer and Boxers than at any time I can remember. They seem to amuse old and young.

A Talking Machine Department in Boston sold over 4 gross of these Talking Machine Toys at retail during last December. Ordered again this year. One Victrola store in New York City sold an average of 6 dozen a day at retail during last December. Ordered again this year.

All Live Talking Machine Stores and Departments will find these attractions for their stores as well as good sellers.

Packed for shipment in 1 doz., 3 doz. and 6 doz. cartons of one kind, or assorted—each toy packed in an individual box. HANDLED BY VICTOR DISTRIBUTORS, COLUMBIA GRAPHOPHONE BRANCHES, or Direct From Us at Fair Dealers' Discounts. PROMPT SHIPMENTS.



The Wireless Pup

The Most Marvelous and Mystifying Toy and Novelty

THE WIRELESS PUP is operated at a distance by sound waves. Blow the whistle or call or clap your hands and on "hearing" the noise the dog will come out of his kennel. There are no wires or other mechanical contrivance attached to the dog.

A great attraction for every store that has Well-to-do, Educated Trade. Sold as a Toy and as a Novelty for Private Offices, Smoking Rooms, Dens, Clubs, etc.

Sells well to the Well-to-Do trade.

Kennel of Hard Wood Mission Finish, about 7 inches square.

NOTE—This is the article that was editorially shown and described in the April, 1915, Talking Machine World. It is a wonderful attraction and several talking machine stores have sold a quantity of them.

Scientific American in Nov. 4, 1916, issue says this is the Most Unique Toy of Recent Years.

In connection with the shipment of our Talking Machine Toys we sell these to our trade at $3.25 each, which is our dealer's price in large quantities to the High Grade, Large Toy Stores and Departments.

DE CAMP AND SLOAN INC.
CONTRACT MANUFACTURERS
MECHANICAL ENGINEERS
NEWARK, N.J.

This chart shows our equipment. Since this was made we have added a Gould and Eberhardt 12"x10" High Duty Automatic gear hobbing machine for spur, helical and worm gears, also an Oxygraph equipment for cutting dies. This equipment is for your use.

THAT'S what this organization is—*a first aid to the manufacturer*—when he finds that certain tools and dies are needed badly and delay means a money loss; when he wants wood patterns made accurately and quickly and his pattern shop is behind on work; or when he wants a special machine built that would help increase his production, yet his draughting room is too busy on regular work—then he needs this First Aid organization. Tool makers, pattern makers, draughtsmen, equipment—these cannot be added in a day. And if they could, next month the rush would be over and the equipment put in to take care of the rush would remain idle—capital tied up until the next rush, possibly one month, possibly six.

This organization is an auxiliary factory to yours. Working for you on your specifications, so long as you wish. You can use the whole organization, Mr. De Camp and associate engineers to design the special machine, the die and tool department, the pattern shop, the nickel plating department—all of these or any one to suit your requirements.

And accurate precision work is assured because all is done under Mr. De Camp's personal supervision.

Write today for the Engineering Data Chart which shows our equipment. By glancing at it you can quickly ascertain if we can do that work you have in mind.

And accuracy, precision, the work of the craftsman—that is the DeCamp and Sloan standard.

Our Bulletin "Factory Cost Plus Proportionate Profit" explains our method of working. Shall we send you a copy?

DETROIT DEALERS TENDING TOWARD CONSERVATISM

Not Inclined to Plunge on Possible Holiday Business—Bigger Business Means More Capital Invested—Edison Dealers Have Enjoyable Convention—Grinnell Bros. Move Wholesale Business

DETROIT, MICH., November 8.—The writer has talked personally and straight-from-the shoulder with many talking machine dealers both in the outskirts and downtown during the month of October, and really business was nothing to boast about. There were many complaints of dullness, and others who said it was just normal. Only here and there did a dealer report big business. Now, it may be that business was just as good as it ought to be for the capital invested, and the time of the year, but it is certain that dealers could create more business if they went after it with a stronger determination. One dealer went so far as to say that he did not want to do a larger business because he did not have the capital to carry it—and we all know that the more business that is done in the talking machine trade the more capital it takes.

Somehow or other there is a sort of uncertainty feeling existing in the minds of many of our dealers as to the amount of holiday business they are going to get. Detroit is certainly prosperous—and it is certainly growing—and wages are high here—at the same time the cost of living has advanced close to 40 per cent., rents have gone up 40 per cent., and there are still thousands of people who are up to their neck in realty investments having bought lots that they must either pay for on time as agreed or lose them entirely.

It must be admitted that there is to-day keen competition in the talking machine business. There is hardly a line manufactured that is not sold in Detroit and throughout the State. While they don't cut in heavily on the standard lines of machines, they do take some business away. It's an ill wind that does not blow some good, so that even if the new makes of machines on the market somewhat retard the sale of standard makes they help to stimulate the sale of standard records. A complete line of records is something that only a few of the companies can offer, and these companies are naturally reaping the benefit.

During October R. Babson Alling, manager of the Phonograph Co. of Detroit, Mich., sales agent for New Edisons, called in all of his dealers. Most of them gladly responded and a most enjoyable get-together convention was the result. During the morning and afternoon the dealers discussed the trade's problems and took up matters pertaining to every angle of the business. At 6 o'clock Miss Marie Kaiser gave a tone test for the dealers and the employes of the Edison shops in Detroit at the Edison Shop, 256 Woodward avenue. Then at 8 o'clock there was a banquet at the Hotel Pontchartrain which was a most successful function. There was little speech making, practically the whole evening being for entertainment. Since the convention, Mr. Alling reports, Michigan New Edison dealers have shown an unusual amount of enthusiasm and interest in the line and that has resulted in considerable extra business.

Another few weeks and the first floor Victrola shop of Grinnell Bros., 243 Woodward avenue, will be ready for use. This new shop is going to be an elaborate affair, with a mezzanine over most of the floor. Downstairs will be for records and the mezzanine for machines.

During Edison Week there was plenty doing at the shops of local New Edison dealers. Every day big advertisements appeared in the daily papers announcing the special recitals at the Edison Shop; there was also a special window display at the Edison Shop, a latest New Edison being at the top of stairs with captions on each step to show the advance of the Edison phonograph. Over at Wallace Brown's there was a recital every evening by Rudolph Polk, the Edison violinist, which proved a great attraction.

E. K. Andrews, Jr., of the J. L. Hudson store, recently made a trip to Chicago and Cleveland, searching for merchandise, including machines, records and needles; also to jog up some of the jobbers with whom he placed orders and ask that they make immediate shipments.

Joseph F. Adcock, of the W. E. Metzger Co., 501 Woodward avenue, is having a splendid year. He reports that record business is particularly prosperous.

Grinnell Bros. have moved their wholesale Victrola business from 231 Cass avenue to the corner of State and First streets, having bought the building at that address. It is a magnificent business and the ideal thing for their particular business. As soon as the necessary alterations are made and completed a formal announcement will be sent to all dealers of the change. The new place will have many advantages over the Cass street location; it will be much larger in size and will have every facility for making quick shipments, giving the best of service, carrying larger stocks and demonstrating the records and machines to dealers. A. A. Grinnell is general manager of the Victrola business, while C. H. Grinnell has charge of the sales end.

The W. W. Kimball Co. has moved from Bates and Farmer streets to 80 Broadway, and a feature of the new store will be a good-sized department on the first floor for phonographs and records. Pathé and Kimball machines will be carried. C. W. Belcher is manager of the store.

Frank Shaull is now manager of the talking machine department at the Bayley Music Store, 114 Broadway, while Larry Dow is once more with Wallace Brown in the selling end.

"The same old story—big business," said S. E. Lind, of the Columbia Phonograph Co. wholesale department, when seen by The World correspondent. "Our dealers are having a good business on machines and records and are buying heavy for fall."

Owen & Co., furniture dealers, have installed a large Columbia phonograph department on the first floor.

W. H. Huttie, manager of the Starr Piano Co. store, is exceedingly pleased over the way the new Starr phonographs and records are going. He reports that the number of dealers is increasing every week.

EXPECT EXCELLENT SEASON

The Whitney & Currier Co., Victor Distributor, Reports Optimistically Concerning Conditions in Its Territory—Machines Scarce

TOLEDO, O., November 6.—The Whitney & Currier Co., Victor distributor, has been enjoying an excellent trade in the Victor line. The reports from this and the adjacent territory indicate that the local dealers are extremely anxious to get a fair amount of stock in hand for the holiday trade, and R. D. Jarvis, treasurer of the Whitney & Currier concern, is of the opinion that the only limit to the business by the firm this fall will be that placed upon it by the number of machines it is able to secure. Trade conditions generally in Ohio are excellent, both the agricultural and the manufacturing sections of the State having experienced unusual prosperity during the year, all of which portends a record breaking trade in talking machines during the coming season.

VICTOR LINE FOR OTTO WISSNER

The New York warerooms of Otto Wissner, Inc., 53 East Thirty-fourth street, have added the Victor talking machine to their talking machine department. They will in the future feature both the Victor and Sonora lines.

FRAAD T. M. CO. IN NEW QUARTERS

Occupies Entire Third Foor at 224-232 West Twenty-sixth Street as Factory and Display Rooms—Executive Offices Not Moved

The Fraad Talking Machine Co., Inc., recently moved into new and larger quarters, this owing to the large increase in business during the last six months. The new factory and showrooms are located at 224-232 West Twenty-sixth street, New York, where the entire third floor, containing over 8,000 square feet of floor space, is devoted to producing the Fraad line of talking machines.

Prior to entering the new quarters extensive alterations were made so as to enable talking machines to be manufactured from the raw materials to the finished product under a most efficient system. Daniel Fraad, president of the Fraad Talking Machine Co., Inc., stated the executive offices will remain at 225 Lexington avenue, and that F. C. Cozens, secretary and general manager of the company will continue as heretofore in direct charge of the factory and showrooms, where the machines in quantities to meet all demands are now well in evidence.

The J. B. Goulette Novelty Store, Hayward, Wis., is a new Pathé dealer.

Another Big *Domestic* Achievement

Domestic

Double Disk Records

35c (Retail Price)

FOLLOWING up the wonderful success of the Domestic line of high-grade, low-priced talking machines, we take great pleasure in announcing a line of

Strictly High Grade Records

Domestic Records are as much of an innovation as Domestic Talking Machines. The tone is pure, bell-like, brilliant, with a piece of music on both sides.

Although but 7 inches in diameter, Domestic Records are of the vertical-cut variety and play as long as ordinary 10-inch records.

Their velvety surface accomplishes the very important function of eliminating all surface noises (comparison with highest priced records of other makes will confirm this).

The present repertoire consists mainly of popular airs of the day, vocal and instrumental, among them the selections of

Well-Known Artists

in great variety. It is our intention to increase the Domestic Repertoire as rapidly as possible in both operatic and popular music, until it is complete.

Doubles the Domestic Dealer's Opportunity

Domestic Agencies have proven gold mines, and there has heretofore been nothing to sell but the machines (one sale only to a customer). Now, with a stock of Domestic Records, the sale of a machine is but the forerunner of a very profitable sale every little while.

If you are not already a Domestic Dealer, write or wire for this very valuable franchise.

All Domestic Talking Machines are now equipped with our new Combination Sound Box which plays both vertical and lateral-cut records.

TALKING MACHINE

IMPORTANT SUITS SETTLED

Sonora Phonograph Corp., After Several Years of Legal Contention, Abandons Contest With Victor Co. on Its Victor Patents and Acknowledges Their Validity and Infringement

As is well known in the trade, the Victor Talking Machine Co. brought several suits against the Sonora Phonograph Corp., based on infringement of patents, several of which were directed to the enclosed horn type of talking machine.

This litigation has been long pending, and by special assignment the cases were to be tried in October, and there has been widespread interest in the trade over the outcome of these suits, owing to the effect they would have on the talking machine industry.

The Sonora Phonograph Corp. had made most careful and exhaustive preparation for the defense of these cases, retaining very able counsel and the best experts available, but, according to Mr. Brightson, the president of the Sonora Corp., when the trials became imminent, he became exceedingly apprehensive of the outcome, because if defeated the Sonora Corp. would be practically forced out of business, or at least so seriously handicapped as to make the future of the company too uncertain to warrant its continuance.

Under these circumstances, Mr. Brightson thought it to the interest of his company to make overtures for a settlement of the litigation, and although the Victor Co. was insistent on the cases going to trial, Mr. Brightson's persistence finally had its reward; resulting in consent decrees being entered for the Victor Talking Machine Co., with the approval of the court, sustaining their patents as valid and infringed.

Mr. Brightson stated that while, of course, he would not make public the minor details of the settlement, he would say that the Sonora Corp., with the advice of its counsel, was willing to recognize the validity of the patents in suit, and that a license had been obtained from the Victor Co., which, while limited in its scope, would nevertheless permit the Sonora Corp. to continue to market its present product, and though the royalty to be paid to the Victor Co. under the license was very substantial and would undoubtedly be burdensome to the Sonora Corp., yet, as a matter of good business and to a certain extent guarantee the future of his company, he acquiesced in the advice of his counsel and recommended the agreement to his board of directors, which unanimously approved it.

Mr. Brightson believes that he could not possibly have brought about this altogether desirable arrangement with the Victor Co. unless the Sonora Corp. had uniformly been putting out high-grade machines, and that the Sonora Corp. will continue its policy in that regard.

THOS. A. EDISON GETS LL.D. BY PHONE

President of University of State of New York Confers Degree While the Inventor Was Busy in His Laboratory at Orange

The honorary degree of Doctor of Laws was conferred over the telephone the night of September 20, on Thos. A. Edison by the University of the State of New York. It was the twentieth honorary degree given by the University since 1792 and the second one of Doctor of Laws since 1850, the other recipient being Elihu Root who received the degree a year ago. The ceremony concluded the fifty-second convocation of the university. The session which led up to it took for its general subject "The Spoken Word," and was in recognition of the great invention of the transmission of electric current by Professor Joseph Henry, and of the achievement of Thomas A. Edison.

Every seat in the auditorium of the State Education Building had been fitted with an individual receiver, and five-minute remarks from Chancellor Sexton, at Palmyra; Governor Whitman, at Troy; President Benjamin I. Wheeler, at Berkeley, Cal., and Theodore N. Vail, at New York City, were listened to. Then Dr. John H. Finley, president of the university, called up Mr. Edison, who was in his laboratory in Orange, N. J., and conferred the degree in the following language:

"On behalf of the University of the State of New York, which is itself endowed with power by the State to express its educational purposes within its own boundaries, I, sitting in a hall nearly 200 miles from you, a hall lighted by the glowing filaments which you invented, employ an instrument which you had a part in perfecting, to express to you the congratulations and gratitude of this State for what you have done in making it possible to remember, to reproduce, and to transmit the spoken word, not only between neighbors but between peoples separated by mountains or seas, to turn darkness into light, and to make vibrations reproduce their moving images in places as far from each other as the antipodes.

"On behalf of the university representing this State I have the honor to notify you that the regents have unanimously voted to bestow upon you its highest degree, a degree conferred by universities since mediaeval times, a degree which the greatest universities of to-day have desired to bestow upon you, a degree of this university which was conferred upon Joseph Henry, but is held by only one living man, a degree which, for the first time in the history of universities is conferred by means of that instrument whose worldwide use you have yourself made possible, the degree of doctor of laws, conferred upon you, not in absentia, but merely in loco remote."

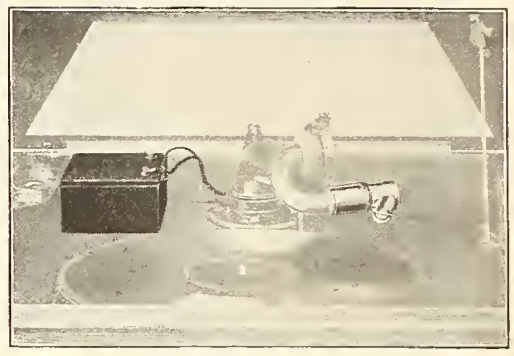
Announcing the
RECORD-LITE



The RECORD-LITE Will
—Direct light on needle point.
—Eliminate possibility of scratching records.
—Enable user to operate Victrola in darkest corner.
—Make possible the correct setting of the automatic stop.

A practical invention that will be in great demand

A high class easy-selling speciality that opens a fresh field of profits for Victor dealers

THE RECORD-LITE

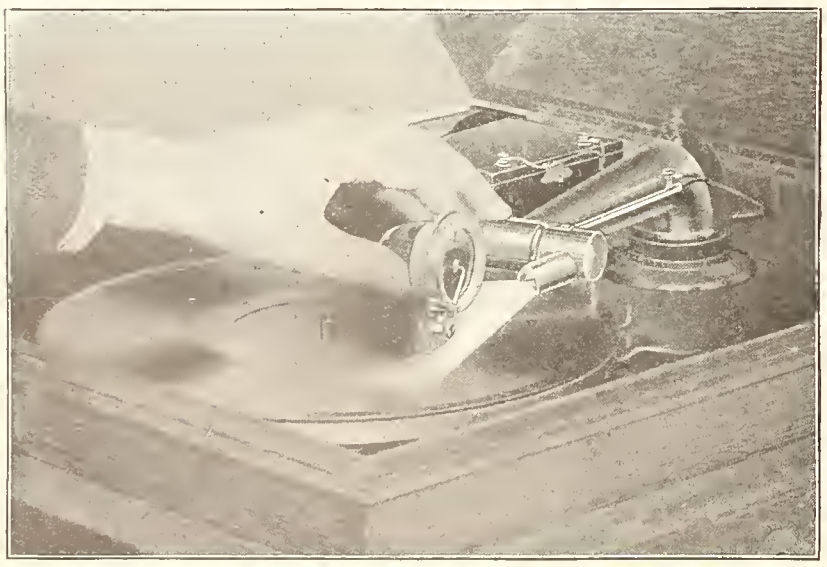
is a neat, ornamental attachment, that comes complete and ready for use. The installation is simplicity itself—the light is slipped over the end of the Taper Tube or Tone Arm of the Victrola until it snaps into position, and is then ruggedly and permanently fastened. The battery box is set in left hand rear corner of the machine, or may be concealed inside the machine.

The operation of the light is just as simple. The second finger of the left hand rests naturally on the contact spring when operating the machine and the light illuminates the record, where the needle rests. As soon as the hand is removed, the light automatically goes out.

No need to dwell on the sales possibilities of the Record-Lite

Every dealer knows the difficulties in operating a Victrola by the light of a shaded lamp and in a dark corner. This invention eliminates all such inconveniences. It is simple to operate, neat in appearance. It appeals to every Victor owner and sells rapidly.

The Record-Lite is distributed only through Victor Jobbers and Victor Dealers. The retail sale price is: nickel finish, $3.50; gold finish, $4.00. If your jobber cannot supply you, send us $5.00, together with the name of your jobber, and we will send you a sample of both nickel and gold finish.



Write for further particulars at once.

Don't neglect this opportunity to add this new, fast-selling specialty to your line.

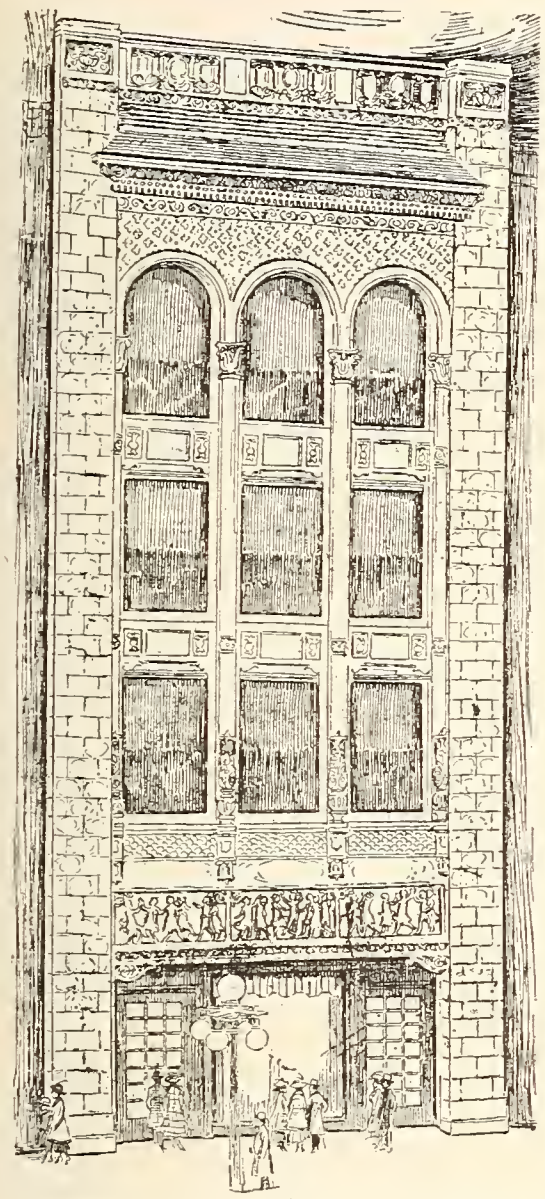
NEW EDISON SHOP IN SYRACUSE, N. Y.

Establishment of Frank E. Bolway & Son, Inc., in that City, One of Handsomest in Central New York—Elaborate Formal Opening

SYRACUSE, N. Y., November 6.—A feature of particular interest in musical circles in this city was the reception and formal opening of the Edison Shop, at 220-222 South Salina street, this city, of which Frank E. Bolway & Son, Inc., are the proprietors, held on October 26, and which served to attract a crowd of surprising proportions.

The new Edison Shop is one of the finest in-



Artistic Sketch of New Bolway Building

stitutions in Central New York devoted to the sale of musical instruments, and in the treatment of the building both inside and out individuality and distinction have been sought. The style adopted is founded upon Italian architecture of the period of the early Renaissance. The material used is a new substitute for terra cotta. Axed granite is also used extensively. The interior arrangement is most impressive, the reception room, music room and private booths offering themselves to a wide range of treatment. In each instance the last detail of fixtures, lamps and drapery have been worked out with the sole idea of unity.

An interesting feature of the new quarters is the beautiful music room, where frequent demonstrations of the Edison disc phonograph and records will be given. Half-hour recitals for shoppers are among the things planned, and arrangements are being made for the personal appearance of Edison artists in tone tests.

"VOICE OF VICTOR" FOR OCTOBER

Latest View of Huge Plant Shown in Wide Cover Spread—Portraits of Victor Artists on Concert Tours and Their Schedules

The cover of "The Voice of the Victor" for October forms an impressive introduction to the interesting contents of the publication, for it presents in colors a bird's eye view of the wonderful Victor Co. plant in Camden. The view is so extensive that it runs over the edge of the cover proper and requires several inches of extra space on each side, which is folded in when the issue is bound. A view of the plant makes one wonder how it can be possible for such a shortage of Victor machines to exist when such a large output is possible and, moreover, real.

The center pages or "backbone" of the "Voice of the Victor" run over as does the cover to permit of spreading before the admiring gaze the full array of portraits of twenty-four famous Victor artists who are making concert tours this season. The dealers are urged to take full advantage of the appearance of any of the artists in their respective cities, to advertise and feature the records by that artist. In connection with the pictures of the artists there is presented a schedule of their various concert tours for the information of the trade.

NOVEL PHONOGRAPH CABINET

New Product Transforms Small "Table" Machines into Attractive Cabinet Models—Some of the Details of the Lundstrom Product

One of the latest entrants upon the stage of the phonograph business, and one which is seemingly attracting widespread attention among dealers, is a unique cabinet for use in converting small sizes of machines into enclosed cabinet types, by simply setting the machines into compartments prepared for the purpose.

The operation is extremely simple: a small machine is set into the top compartment, the winding handle inserted from the side of the cabinet into the machine, and the tone-regulating doors of the machine itself are opened outward through a space in the front that contains a door hinged at the top, and another hinged at the bottom. When all these four doors are open, it forms an oblong compartment, and thus a continuation of the "horn" or sound chamber of the phonograph, and increases the volume of sound. The lower part of the cabinet is divided off as a record rack.

The machine itself remains portable, and can be removed at will, but when placed in the cabinet is converted into a cabinet type. It is for this reason that the cabinet has been called "Converto" enclosed-type phonograph cabinet.

It proves of considerable attraction to dealers as with this they can increase the sale of their smaller machines among many people who prefer the cabinet type, but whose purses prohibit higher prices.

Furthermore, it has for it a market already established among present owners of these smaller machines who, because of the low prices at which the two cabinets are sold, are easily persuaded to purchase a cabinet for use in connection with their machines.

The "Converto" is made by the C. J. Lundstrom Manufacturing Co., of Little Falls, N. Y., who have for years manufactured sectional book cases, filing cabinets, etc.

The Santa Rosa Furniture Co., Santa Rosa, Cal., has installed two large new music rooms in its store on Fourth street, one for the display of pianos and the other for Edison phonographs.

WHOLESALE TRADE REACHES NEW MARK IN ST. LOUIS

Retailers Report Business Slightly Below Expectations With Future Prospects Excellent—Comparing Record and Sheet Music Prices—Large Shipments of Vocalions—Other News

St. Louis, Mo., November 6.—October appears to have been a little below expectations of talking machine retailers but was a wonderful month in the wholesale departments. The sales totals for October will by no means be low for the month, they probably will show the usual gains but the men of the trade are setting their standards very high these days.

Already the question of sufficient machines for the holiday trade is becoming a leading topic and it seems that few of the dealers expect that the orders they have placed now will see them through. They are ordering freely of the lower-priced machines which they have been assured will certainly be obtainable in large quantities with a view of planting these for exchange.

The record trade has been up to expectations, with the popular numbers still in the lead. Recently several record and music dealers have been doing effective window display work by showing the talking machine record, the sheet of music and the music roll of certain popular songs or instrumental pieces. These usually carry in plain figures the prices of each and the fact that often the record is not much higher priced than the sheet music has considerable weight with the purchaser, who might have been inclined to think that his "music" was costing him too much. There appears to be an inclination for the consumer to think that he is "not being beat so bad" if the user of the old standard sheet music has to pay nearly as much as he and then supply his own rendition.

Manager Gordon of the Pathephone Co., has been busy checking in new shipments of machines and he says that he is being supplied with both machines and records very liberally. He is signing new customers for the out-of-town trade but says that for the present he is not going to urge additional local dealers to take up his line. The record business, especially, he says, has taken a good hold. The French opera numbers and the foreign band numbers are taking well.

Manager E. W. Guttenberger at Aeolian Hall, reports excellent business for the month just closed and he says that the outside sales staff, which he spent the summer in building up to a standard that almost suits him, is putting in excellent licks. His present idea is that his business will be limited solely by the supply of machines. Also he is making an excellent impression inside Aeolian Hall, from all appearances. The entire second floor has been turned over to the Aeolian-Vocalion department and four extra sized machine demonstration rooms are being remodeled there out of player-piano rooms.

The first of the month at Aeolian Hall was made the occasion of a celebration over the arrival of a series of expensive new machines. One of the $600 machines was sold as soon as it was unpacked. The $1,250 model has found many admirers here. These machines will be demonstrated in the long, wide corridor of the second floor of Aeolian Hall and Mr. Guttenberger hopes soon to announce some informal recitals there.

Manager Irby W. Reid of the Columbia warerooms left as soon as he had voted for the east, expecting to be gone two weeks on a trip to the executive offices in New York and to the factory. He planned to stop in Washington for a few days, the attraction there being the home of his parents. His trip was so timed that he was to be present at their golden wedding anniversary.

Mr. Reid says that the wholesale business is taxing the entire facilities of that department of his organization and is growing wonderfully in all of the industrial districts and in many agricultural communities. The mining districts especially are clamoring for machines, while the southern territory of the local branch, where cotton has reached the price of twenty cents a pound, is breaking all previous records.

Manager Magoon of the new Kieselhorst Piano Co., reports a very surprising business for the last half of October, which is the entire term for which this department has been open to the public.

TALKING MACHINE EXPORTS

The Figures for August Presented—Exports Show Increase for the Month

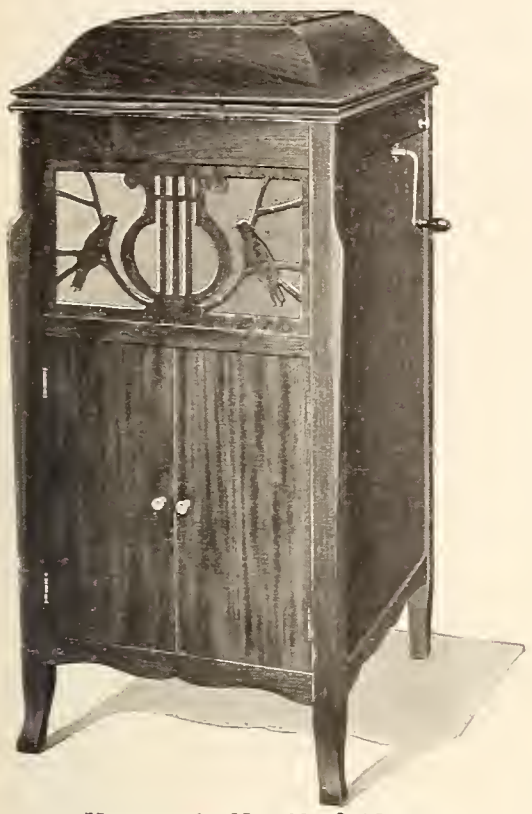
Washington, D. C., November 6.—In the summary of the exports and imports of the commerce of the United States for the month of August, 1916 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures regarding talking machines and supplies appear:

Talking machines to the number of 6,078, valued at $155,662, were exported for August, 1916, as compared with 2,002 talking machines, valued at $62,423, sent abroad in the same month of 1915. The total exports of records and supplies for August were valued at $112,856, as compared with $89,419 in August, 1915. For the eight months 37,255 talking machines were exported, valued at $946,755 in 1916, and 17,324, valued at $496,109, in 1915, while records and supplies valued at $717,804 were sent abroad during 1916, as against $496,289 in 1915.

DEMANDS GROW IN VOLUME

"The double spring motor which we recently placed in our No. 5 machine has been the subject of considerable praise from our dealers," said Hugo S. Radt, vice-president of the Wonder Talking Machine Co., New York. "In fact our general trade for the holiday season has been considerably ahead of what we had anticipated, and we have been adding to our equipment and facilities in every department. We feel that 1917 will be a prosperous era for all factors of the talking machine industry, and we are now making plans to give our dealers more efficient service than ever before."

THE HARMONOLA



Harmonola No. 28—$115.00

Mahogany Cahinet with compartments for 200 records. Size, 48 inches high; 23 inches wide; 25 inches deep. Tompkins improved reproducer. Tompkins exclusive tone arm. New combination horn, sound chamher and amplifier. Speed regulator. Douhle spring, spiral drive motor (plays eight records and can he wound while playing). All metal parts nickel plated.

Close Comparison Invited

In the procession of new phonographs with their clang of extravagant advertising, how can the dealer form an intelligent judgment of merit except by close comparison.

The mystery and monopoly that once attended the making of Talking Machines no longer obtains. Out of the confusion caused by all manner of new, and mostly amateurish, claimants must stand eventually the time-honored principles, (a) *Understanding;* (b) *Skill;* (c) *Quality.*

Cautious Development

The HARMONOLA is not an assembled machine. For three years it has been slowly and patiently evolving in its own Philadelphia factory under the painstaking genius of an expert Phonograph Engineer, assisted by men experienced in the building of Talking Machines. Its builders do not claim any radical discoveries in acoustics or physics, but rather the perfected application of well-tried principles. No feature of the Harmonola is absolutely original, but every important feature is distinctive and superior.

The Tompkins reproducer used in the Harmonola is a marvel of mechanical triumph. It has a Japanese fiber disc to which a Tungsten steel stylus arm is cleverly adjusted with polished conical bearings equal in their non-frictional resisting features to the jewel bearings of the finest timepiece. The sensitive diaphragm picks up every particle of tone and gives a natural reproduction, free from harshness or metallic rasping. The volume, purity and quality of tone, as well as the overtones and color tones, are unequaled by any other reproducer.

Harmonola No. 21—$85.00

Mahogany Cabinet with compartments for 200 records. Size, 44 inches high; 20½ inches wide; 22 inches deep. Tompkins improved reproducer, Tompkins exclusive tone arm. New comhination horn, sound chamber and amplifier. Speed regulator. Douhle spring, spiral drive motor (plays five records and can be wound while playing). All metal parts nickel plated.

This announcement had been held in leash until after the instrument could be tested in the homes of several hundred purchasers. Now we are able to assert with confidence that the Harmonola, in our opinion, is *unequaled in tone value and unexcelled in other points.* But some Talking Machine manufacturers have made similar claims that have not been confirmed by investigation.

Here is the Fairest Proof

Any dealer or would-be dealer of good business standing may order a sample line of Harmonolas at our regular and invariable wholesale price, and these first four machines will be forwarded, prepaid, subject to being returned within ten days, at our expense, if it should not prove that the HARMONOLA has the purest and best tone of any phonograph that you have heard and affords the greatest value for the money of any machine that you have seen.

Pertinent Points About THE HARMONOLA

(1) It gives the clearest and most natural reproduction of any Talking Machine that we have heard.

(2) There is complete absence of metallic noise.

(3) It plays any make of record perfectly without change of equipment.

(4) It uses any standard needle.

(5) It has an exceptionally good and strong motor.

(6) The cabinet work is of the highest character in design, construction and finish.

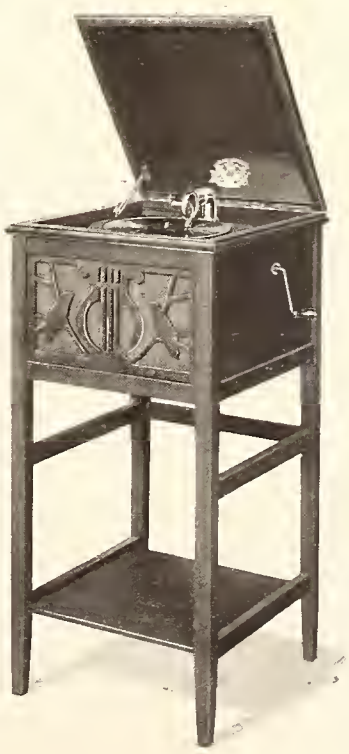
(7) The price is only about two-thirds the price of other high-grade Talking Machines of similar, but not equal standard.

Harmonola No. 7—$27.50

Cahinet is furnished regularly in mahogany. Size, 12½ inches high; 16½ inches wide; 19 inches deep. Tompkins improved reproducer. Tompkins exclusive tone arm. New combination horn, sound chamher and amplifier. Speed regulator. Double spring, spiral drive motor (plays three records and can he wound while playing). All metal parts nickel plated.

Substitute the Harmonola

We are endeavoring to accumulate a surplus of Harmonolas for December delivery. Dealers in old line machines who are unable to obtain enough stock for Christmas deliveries can turn to the HARMONOLA with the confidence that it will not only fill the gap, but will give at least as good satisfaction as the best machine that you are handling.



Harmonola No. 14—$55.00

Mahogany Cabinet furnished regularly. Size, 40½ inches high, 18½ inches wide, 20½ inches deep. Tompkins improved reproducer. Tompkins exclusive tone arm. New combination horn, sound chamher and amplifier. Speed regulator. Douhle spring, spiral drive motor (plays three records and can be wound while playing). All metal parts nickel plated.

THE HARMONOLA COMPANY

1611 CHESTNUT STREET PHILADELPHIA, PA.

THE TRADE IN NEW YORK CITY AND VICINITY

"Best month we ever experienced," is the consensus of opinion in the local talking machine trade when referring to October business. As a matter of fact, October sales were ahead of expectations, in view of the general shortage of machines, which it had been feared would exercise a detrimental effect on sales totals. Such was not the case, however, and the dealers concentrated their efforts on selling the styles of machines which they had in stock. As a result October business was very satisfactory to all factors of the industry.

Banner Record Business

A most gratifying feature of last month's business was the increased proportion of record sales. For several months past the manufacturers and jobbers have pointed out to their representatives that record business should be given very careful consideration this fall, especially as the shortage of machines would continue throughout the year. The great majority of dealers have heeded these suggestions, and have found that their record sales are increasing day by day. There is no doubt but that record business next year will be the subject of extended thought and study on the part of all dealers who are desirous of making their business profitable in every department.

A shortage of machines is general, including practically all styles and finishes. The record situation is excellent, the manufacturers and jobbers filling their orders complete as soon as they are received.

Interesting Discussion of Record Possibilities

"October business showed a very fine increase over the previous year," said J. N. Blackman, president of the Blackman Talking Machine Co., New York, Victor distributor. "This has been true of every month since the start of our new fiscal year in May, and this result is due very largely to our efforts to increase our record business through educating the dealer to the importance of that part of his business. The tendency has been without doubt to take the easiest course, and confine business to machines, which have practically marketed themselves, whereas, the foundation on which any successful Victor dealer can hope to permanently and successfully stand is a record business built on an adequate stock and efficient knowledge of the catalog. I cannot impress the importance of developing record business too strongly, nor am I in sympathy with the dealer who, in spite of what his competitors show an ability to do, says 'my case is different.' Probably it is different, only his interpretation of the difference is not the correct one. Otherwise, he would see the difference and apply the remedy."

Remarkable Cash Business

Referring to our October business, R. F. Bolton, district manager of the Columbia Graphophone Co., New York, said, "Our cash receipts during October were the largest in the history of our store. We collected more than one-half of our September business on a discount basis, which indicates the very prosperous condition of our dealers. The Lazaro records are going very well. In fact their sales to date have been ahead of expectations, and there is no doubt but that the sales of these records will increase rapidly when our advertising campaign is in full swing."

Featuring Recitals in Auditorium

The Edison Shop, at 473 Fifth avenue, New York (the Phonograph Corp. of Manhattan, proprietors), has been conducting an extensive advertising campaign in the newspapers featuring its auditorium. During an entire week Rudolph Polk, first violinist of Walter Damrosch's New York Symphony Orchestra, appeared at the Edison Shop and gave two concerts each afternoon. In connection with Mr. Polk's playing, several famous violin selections recorded on Edison Diamond Disc records were played, and the audiences were enthusiastic in their praise of these records.

A Sales Productive Campaign

Winterroth & Co., one of the leading local piano houses with several stores in Greater New York and nearby territory, has been conducting a very successful campaign in behalf of the Pathé line. Major E. J. Winterroth, head of the company, has been devoting a considerable part of his time to developing Pathé business, and under his able direction the Pathé departments in his stores have shown very gratifying sales increases.

Display Posters Producing Sales

The New York Talking Machine Co., Victor distributor, reports the closing of a splendid record business this season, with increases all along the line. This has been particularly noticeable since the company started to issue its series of four display cards each month with their attractive wooden frames for window and demonstration booths display. Many of the dealers have acknowledged that a considerable portion of their increased record business could be attributed to the use of these display cards. The display posters for the December Victor records will be unusually artistic, one poster being given over to Red Seal records as a class; another being a comic poster with a drawing by Herb Roth, the famous cartoonist, who conceived the very popular poster for the Victor records, "I Can Dance With Everybody but My Wife."

using special Lazaro window displays to feature the new Columbia records made by this distinguished tenor. Spear & Co., 18 West Thirty-fourth street, New York, and Hardman, Peck & Co., Brooklyn, N. Y., are two of the Columbia representatives who have used this window with excellent results.

Using Full Page Advertising

The Sonora Phonograph Corp. has been using full page advertisements in the rotogravure sections of the leading Sunday newspapers. These full pages have featured the new Sonora warerooms at 279 Broadway, and also presented a general discussion of Sonora merits and qualities. The advertising has been exceptionally artistic and the subject of general commendation.

Record Lists Proving Popular

The specially selected lists of Victor records, which were recently issued by C. Bruno & Son, Inc., New York, Victor distributors, are meeting with a very gratifying reception from Victor dealers, and C. F. Bruno states that the first edition is already exhausted. Many of the company's dealers have expressed their appreciation of the practical assistance represented in these lists.

BLACKMAN OFFICERS DINE GILES

James H. Giles, a member of the traveling staff of the Blackman Talking Machine Co., New York, Victor distributor, returned to New York last week after a stay of several months on the Texas border, as a lieutenant in the First Field Artillery in the New York National Guard.

Mr. Giles was the guest of honor at an informal dinner given him on Monday by the officers of the Blackman Talking Machine Co., and the members of the sales staff. J. N. Blackman, president of the company, presided at this dinner, and a number of impromptu addresses contributed to the dinner's success.

STRIKING WINDOW DISPLAY

Made by the Butler Music Co., of Marion, O., During Edison Week

MARION, IND., November 6.—Edwin Butler, of the Butler Music Co., created a sensation in local business circles by the way he featured Edison Week. Butler struck an idea for his window display that was not only novel but was exceedingly effective as a business getter and in driving home the selling points of the Edison machine.

He placed a big Edison machine in the window which was surrounded by nine telephones in charge of two telephone operators. A violinist was also there to accompany some of the records which were played.

Butler then proceeded to send the joy of Edison music into 15,000 homes by telephone. His patrons and prospects were surprised when they were first called to the phone and heard the music but they were immensely pleased at the idea. It got them to talking about Butler's store and the Edison machine until the whole city began to take a personal interest in the demonstration.

Butler sent some of the music by telephone to Mr. Edison and Mr. Maxwell at Orange, N. J. He also called Walter E. Kipp, the Edison distributor in Indianapolis, and Mr. Kipp became enthusiastic over Butler's idea.

INTRODUCE MONTHLY AD SHEET

The advertising department of the Columbia Graphophone Co. has perfected a new idea which should be of practical assistance to Columbia dealers. Instead of issuing every-once-in-so-often a cut book with suggested ads, it has been decided to issue a monthly ad and cut sheet, which will give dealers the newest advertising ideas and illustrations every thirty days. These advertisements will be prepared to link up with the national Columbia campaign in magazines and newspapers.

Cuts are furnished Columbia dealers free of charge of any size advertisements they may desire to use, and the new idea will enhance considerably the value of Columbia advertising co-operation.

OPEN MANY NEW ACCOUNTS

Excellent Reports Made by National Talking Machine Co. Regarding Progress

The National Talking Machine Co., 118 East Twenty-eighth street, New York, manufacturer of "National Bluebird" machines, reports the closing of a very satisfactory business since the first of September, a number of important accounts in New York and in other large cities having been established during the past few weeks.

"We have not endeavored to place our line before the trade on a price basis," said Albert Epstein, secretary of the company, in a recent chat with The World, "but have tried to point out to the dealers that our machines are offered them on the basis of quality and value. The dealers are beginning to appreciate the sales possibilities of our products, and the repeat orders we are receiving augur well for our future business.

"Last week we shipped twelve machines to one of the leading stores in a large Western city, and the following day received an order for fifty more, with a letter telling us of their entire satisfaction with the merits of our machines already received."

SPECIAL VICTOR FOREIGN RECORDS

The Victor Talking Machine Co. has just issued a new special series of foreign records, including two in German, one in Hungarian and five in Italian. The selections are of the timely sort, as is indicated by the inclusion of the "Hindenburg-Marsch" in the German list, and a series of scenes of the Italo-Austrian war. With one exception all the records are ten-inch.

The Edison Diamond Disc Studio, of Ediston, N. Y., was opened last week.

SONORA PHONOGRAPH CORP. ISSUES "SALES HELPS"

Some Valuable Suggestions for Dealers in Handling the Sonora Line, All Based on Actual Experience, Included in New Volume—Other Interesting Features of the Book

"Sales Helps" is the title of one of the most artistic and valuable publications that has yet made its appearance in the talking machine trade. This book was sent out last week by the Sonora Phonograph Corp., New York, to every dealer handling the Sonora phonograph line. The purpose of this publication is well summed

George E. Brightson

up in the paragraph appearing on the first page which reads, "Sales helps, being suggestions and recommendations based upon the methods and experience of many successful Sonora phonograph dealers."

Briefly summarized, this new book contains new advertisements for use locally, notes as to better methods of conducting business, ideas worked out successfully by Sonora dealers, plans that have brought in new customers, practical effective sales-making literature, forceful result-getting form letters and many other valuable helps for Sonora representatives.

The frontispiece of this new Sonora publication presents the latest portrait of Geo. E. Brightson, president of the Sonora Phonograph Corp., accompanied by the following inscription: "The man who in less than ten years has obtained definite and undisputed recognition for the Sonora as 'the highest class' talking machine in the world."

Two pages in this book are devoted to a concise description of some of the many features of the Sonora phonograph. A full page illustration is used to convey a visual idea of these talking points which include universal playing, tone quality, cabinet work and design, tone control, sound box, automatic stop, motor, sound amplifier or horn and envelope filing system. These various features are briefly described, arrows from each paragraph pointing to the different parts of the Sonora phonograph on the facing page.

One of the most interesting full pages in the Sonora book is the reproduction of the guaranty which is given to every purchaser of a Sonora phonograph. By the terms of this guaranty every Sonora phonograph is guaranteed for one year (the "Supreme" for five years). A white guaranty is filled out by the dealer and given to each purchaser; a blue duplicate is retained

Sonora Phonograph Corporation
NEW YORK CITY

The Sonora Guarantee

by the dealer and a yellow triplicate is filled out by the dealer and forwarded to the Sonora Phonograph Corp. for future references.

An unusual photograph which is shown herewith is a reproduction of an artistic oil painting that is being used extensively in various ways by the advertising division of the Sonora Phonograph Corp. The original of this painting is by an artist whose work is well known both here and abroad, and reproductions are being sent to Sonora dealers who are planning to display it prominently. The size of the picture is 18¾x13 inches.

The Sonora Picture Done in Oil

Other pages in this dealer book illustrate hanging signs, window cards, brass door signs, price cards, etc., which can be used to excellent advantage by Sonora dealers in attracting the attention of passers-by, and in stimulating real interest on the part of the casual visitor.

Under the heading "Getting Business," there are presented two interesting pages of letters and sales literature which have been carefully prepared for mailing to dealers' lists. One page gives a series of six letters to possible purchasers which have proved to be business getters for Sonora dealers. One of these letters is intended for mailing to the purchasing agent of a school; another to the purchasing agent of any public institution; a third letter suitable for names taken from an automobile directory, and the remaining three letters for use on general mailing lists.

The center spread of the Sonora book is devoted to photographic reproductions of all the machines in the Sonora line, consisting of the following models with their respective retail prices: "Supreme," $1,000; "Invincible," $350; "Grand," $225; "Laureate," $190; "Elite," $175; "Baby Grand," $150; "Imperial," $100; "Troubadour," $75; "Barcarolle," $60, and "Melodie," $45.

Following the illustrations of the Sonora phonographs are several pages reproducing postals which have been prepared for the use of Sonora dealers, catalogs and folders, street car and display cards, dealers' newspaper advertising and reproductions of some of the advertising used by the Sonora Phonograph Corp. in the leading national magazines.

The concluding pages of this book are entitled "A Heart to Heart Talk With Dealers" over the signature of Geo. E. Brightson, president of the Sonora Phonograph Corp. This talk is filled with helpful ideas.

Typographically this new Sonora book is well worth the close attention of the advertising world, as it represents the highest type of perfection in the production of dealer publications. The general color scheme is blue and cream, the shade of blue used being that distinctive color which is now recognized as "Sonora Blue" and which is being used in all Sonora publicity. The size of the book is most impressive, as it measures 17 by 12½ inches.

From cover to cover this publication reflects the quality and standing of the Sonora phonograph, and the Sonora Phonograph Corp. is well deserving of hearty congratulations upon the issuance of a book which is a credit to itself and the talking machine industry.

THE UNION PHONOGRAPH SUPPLY CO.

Successors to THE UNION SPECIALTY & PLATING CO.

1100 to 1108 WEST NINTH ST. CLEVELAND, OHIO

"Gentlemen, You Are About to Play to the Greatest Audience in the World"

So said Hugo Riesenfeld, Director of the celebrated Rialto Theatre Orchestra at the beginning of their work at the Emerson Recording Laboratory.

"No orchestra renditions have ever reached by other mediums as many hearers as yours have through Emerson 25c. double discs, whose votaries will far outnumber those who bear any other kind of record."

"Gentlemen, you are playing to America!"

MR. RIESENFELD is a great Orchestra Director. He knows how to effect spiritual communion with the great lay audiences. At the Rialto Theatre, New York, he has gained an enormous following, because he gives the people what they want and is raising the standard of music.

Mr. Riesenfeld has been engaged to direct the Rialto Orchestra for the Emerson Phonograph Co. His new Emerson 25c double discs are remarkable for their quality.

To reproduce in their very subtlest effects, the ensemble, the new Emerson reproducing room has been built. When you put on Emerson orchestral records you won't have the slightest difficulty in recognizing the strings, the brasses, or the woodwinds.

If you want to reach the millions rather than the few, give them Emerson 25c double discs. It is the now old story of Ford automobiles against Packards and Rolls-Royces.

EMERSON DOUBLE DISCS 25c

Play on all but one positive feed machine without extra attachments. Full 7 inches in diameter, each side plays three-quarters of the time of the standard 10-inch record.

Investments are small, the profits liberal, the turnover quick. There is no equal to Emerson in the entire industry. Mail your request for complete details of our proposition and list of new hits, today.

PROFITABLE INSTALMENT ACCOUNTS

Certain Rules Should Be Followed in the Matter of Credits and Collections—The Latter Factor One of the Most Important

"We've got a Grafonola at our house."
"So've we. We got ours on the insolvent plan."
—Childhood's Artlessness.

And alas! this is not always a joke! There have been cases where many a dealer on looking over his instalment accounts has sadly admitted they much more resembled "insolvent" accounts than good, healthy, money paying, profitable instalment deals.

To the dealer who has had some such sad experience we write these words: Your Instalment Accounts should be a big profitable part of your business. They can be and will be if you follow a few clear rules. These rules we will give you in this article, compiled from the knowledge and experience of Marion Dorian, treasurer of the Columbia Graphophone Co., and some of the most successful district managers.

There are two major factors—and only two—in handling instalment accounts. One is "Establishing Credit," the other "Collecting the Account." We will now go over the first factor:

"Establishing Credit."

(a) Investigate the customer in advance of delivery of goods.

(b) Sell him no more than he can pay for comfortably.

(a) Investigate the customer in advance of delivery of goods. Here lies the crux of the success of your instalment accounts. When you go to work establishing credit establish it. Don't be backward in asking questions. A man comes and asks you to trust him; it is only business to give you all the information you need to protect yourself. The first great law in "Establishing Credit" is to make all investigations before making delivery of goods. In the majority of cases this is easy. Occasionally a man will come in with money, offer a cash first payment on, say, a $110 machine when investigation would develop he is really only in position to pay for a $75 instrument. In a case of this kind explain very clearly you accept his money "on account," subject to further confirmation before delivery of goods. If he wishes a lease signed, insert some clause in the lease giving you liberty to return the money or arrange for different payments or machine. Form 905—Reference Blank—should be carefully and completely filled in. In investigating the references ask any questions that will develop financial responsibility, tell approximate income, refer to other instalment records, certify the probable length of his present address.

Get all this information before delivery of goods.

(b) Sell him no more than he can pay for comfortably. After credit is substantially established you have a good basis to decide the best lease to draw up. Limit all final payments on instalment accounts to one year. The longer an instalment account is drawn out, the more likely it is the customer will become weary of payment which indirectly will cause him to become weary of his machine. Suppose a prospect receives a salary of $30 per week and has a family of four. If he has been receiving this salary for some time and his reputation is good, you are justified in assuming he can safely pay $2 or $3 per week. More than that is dangerous, because allowances must be made for possible sickness in some of his family. Allowing for a $2 a week payment over a period of eight months the customer could in that time pay for an outfit costing $64. This would be the limit which the wise dealer would sell him. In proportion to weekly payments it is safe to negotiate more expensive outfits. The larger a purchase, the larger should be the initial payment. By paying careful attention to the original arrangement of your instalment account you will secure satisfied customers and run far less risk of future unpleasantness.

With carefully established credit and satisfactorily arranged payment, the success of your instalment account business depends on only one other factor—"the collection of the account."

HAS 200,000 RECORDS IN STOCK

Neal, Clark & Neal Well Equipped at Present—Buffalo Association to Elect Officers—Dealers Carry on Special Campaigns

BUFFALO, N. Y., November 6.—"We have about 200,000 records in stock," said W. J. Bruehl, manager of the retail department of Neal, Clark & Neal. This firm is well equipped in its jobbing and retail sections to take care of a fine holiday trade in Victrolas. Mr. Bruehl reports that the dealers in Buffalo and vicinity are all busy. He says the Talking Machine Dealers' Association of Buffalo, of which he is secretary, will hold an election of officers November 25.

Herbert A. Brennan, manager of the Victrola department of the William Hengerer Co., recently conducted a "Victrola Week" at that store.

Four of the latest official models of the Edison were shown in the display window of the Albert Schuler Piano Co. during Edison Week. A picture of Mr. Edison was draped with American flags. William H. Reilly, sales manager of the company, arranged an artistic setting for the display.

Russell C. Downes, formerly with the New York Talking Machine Co., is now with Neal, Clark & Neal, Buffalo, N. Y.

Music Teacher: "Our son is improving, but when he gets to the scales I have to watch him very closely."

Mamma: "That's just like his father. He made his money in the grocery business."

ISSUE NEW FOLDER ON CABINETS

Globe-Wernicke Co. Offer Some Information Regarding the Brown Disc Record Cabinet

CINCINNATI, O., November 6.—A very attractive four-page folder has just been issued by the Globe-Wernicke Co., of this city, featuring the Brown disc record cabinet, which it manufactures. This folder is being mailed in large quantities to Victor dealers throughout the country, who can doubtless use it to excellent advantage.

The first page of this folder shows a view of the Brown cabinet with the drawer in its third position, having the spring pressure released and allowing the owner of the cabinet to have every record in front of him and instantly accessible. The second and third pages illustrate the cabinets with the Victrola IV, and Victrola IX, the photographs indicating clearly that the cabinets match these Victrolas perfectly. The fourth page presents the Brown disc record cabinet with the drawers in the first and second position.

Brown disc record cabinets are furnished in mahogany and oak to match Victrolas IV, VI, VIII and IX, and the wide demand for these cabinets would indicate that they have filled a long-felt want. The cabinets are made with flat or table tops to suit the requirements of Victor dealers.

INAUGURATE A SERVICE DEPARTMENT

ELYRIA, O., November 9.—The latest departure at the plant of the Otto Heineman Phonograph Supply Co. is the inauguration of a service department for the benefit of talking-machine manufacturers. This department is under the management of Paul Wood, for some time past master mechanic at the Heineman factory, and generally recognized as one of the leading motor experts in the country.

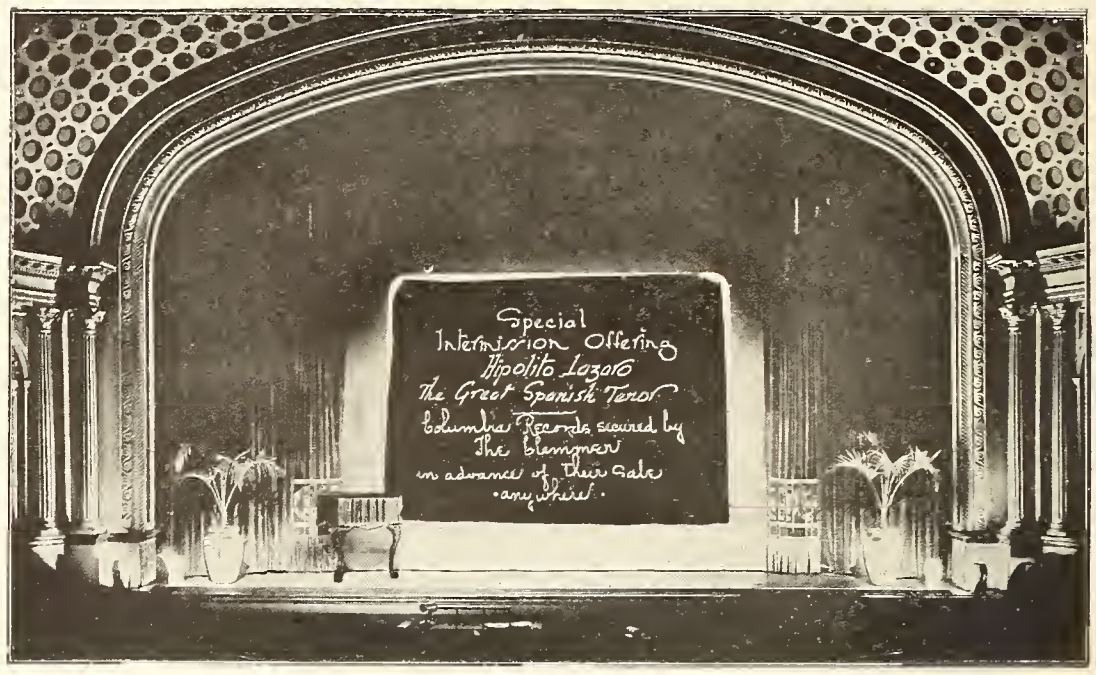
The plan of installing a service department has been under consideration for some time past, and all details were completed upon the recent visit of President Otto Heineman. Mr. Wood will tour the country extensively, visiting all the manufacturers using Heineman motors and other products, and giving them practical service and assistance in every direction.

INTERMISSION CONCERT TO INTRODUCE LAZARO RECORDS

One of the most unique and startlingly successful methods of introducing the Columbia records of Hipolito Lazaro was staged recently in Spokane, Wash.

Arrangements were made with the manager of the Clemmer Theatre of that city, one of the largest and most popular moving picture houses on the Pacific Coast, to give "intermission concerts" on a Columbia grand. This idea was successfully planned and announcement made on the screen of the theatre, as shown.

The novelty of this introduction of the great tenor's voice made a sensation in this city and received considerable press notice. It can doubtless be adopted by Columbia dealers throughout the country with equally as pleasing results.



"Intermission Concert" at the Clemmer Theatre, Spokane

A VISITOR FROM GUATEMALA

C. Becker, owner of El Centro de Sport, exclusive Victor jobber in Guatemala, C. A., was a visitor to New York this week, making arrangements for large shipments of Victrolas and Victor records, and also taking care of a number of important business matters. Mr. Becker spoke encouragingly of the business situation in Guatemala, stating that conditions in that country had improved considerably the past few months.

The Victor Talking Machine Co. will have a kiln-building erected at its plant in Camden, N. J., which will be 80 by 670 feet.

The Delpheon

Columbia Records TRADE MARK Note the Notes

CINCINNATI DEALERS BUILDING UP RESERVE STOCKS

Wurlitzer Co. Increasing Size of Record Department—Vocalion Department of Aeolian Co. Has Strong Line-up of Salesmen—Many New Dealers Being Listed—Recent Trade Visitors

CINCINNATI, O., November 4.—Language of the day is used by Charles Byars, manager of the Vocalion department of the Aeolian Co., in describing the results of the past month and the holiday prospects. After reporting that there was a remarkable increase in the sales of October as compared with the same month last year, Mr. Byars said: "A sales force of eleven live, enthusiastic men are now in the Vocalion line-up, and the game is waxing hot and furious. Every indication points to a landslide in favor of the Vocalion in the next sixty days. In fact, the problem we are facing now is how we can best take care of the Christmas rush in the limited accommodation of our Vocalion parlors."

The Rudolph Wurlitzer Co. just now is making the necessary changes towards securing the largest record shelf department in the Middle West. The time-honored violin department, which graced the west side of the main lobby of the big Fourth street house, was torn out Saturday and when the changes are completed the Wurlitzer house will have facilities for storing 40,000 records. The firm has decided that the principle of selling a record is not so much of having a machine handy as to get the buyer interested in picking out a list of the discs. The try-out is regarded as a secondary consideration.

The Edison folks are doing big things in the way of having tone tests in the Ohio district through the greater part of November. These are being held in all the principal cities and where they have occurred the Phonograph Co. is receiving favorable news from its dealers. Miss Helen Clark, assisted by Herman Sevely, 'cellist, will give an Edison demonstration at the Alms & Doepke Co. next Wednesday. The other artists are Elizabeth Spencer and Miss Kaiser.

John C. Weber's band, of this city, is in healthy demand by the Remington factory of the Starr Piano Co. for recording purposes. The entire organization was at Richmond early last week. The Starr folks are now getting out quite a catalog. It is reported in the same connection that the Aeolian Co. will likewise enter the record field on a large scale.

R. J. Whelen, manager of the local Columbia store, stated: "Never in the history of the Columbia Co. has there been such a demand for its products. The biggest question is the ability of the factory to supply this demand. However we are keeping our heads above water and we will have the biggest year the Cincinnati store has ever had."

John Cromelin, general manager; W. C. Fuhri, United States manager; Mr. Sterling, European manager; S. H. Nichols, district manager, and Mr. Parker, Australian manager of the Columbia Graphophone Co., visited the local Columbia store in a body this past month, en tour of the country, taking in the principal stores.

One of the big features of the past two months was the decided increase in the outlet for Columbia machines and records. Numerous new dealers have been landed right in the Cincinnati district. Their combined publicity campaigns are giving the Columbia people much prominence.

A. Hughes, formerly with the Pathé people, now has charge of the wholesale department of the Starr Piano Co.'s talking machine business. He will take up the question of putting on Starr agencies. One of his talking points will be the fact that the Starr manufactures every part of its machine.

Divisional Manager Wells, of Steinway & Sons, is just getting ready to push the Clayola, an electric talking machine.

Manager Dittrich, of the Victor department of the Rudolph Wurlitzer Co., as enthusiastic as usual, to-day made the following statement of interest to Victor dealers.

"The ideal weather enjoyed at the Cincinnati end during the month of October had its effect on the talking machine business, in the way of curtailing the demand for both Victrolas and records. In spite of conditions, however, the demand is now very active.

"The record situation is very good indeed, both the supply and the demand being very heavy. On machines, however, the shortage is growing more acute daily, because with increased shipments from the factory, there has also developed a vastly increased demand from dealers everywhere. The talking machine people of the Middle West, however, are pushing the record business, being assured of big returns for energy and money invested. The coming season will be a rare money-making opportunity to every wide awake dealer."

DITSON
VICTOR SERVICE

For many years we have helped dealers to grow, not only dealers in Victor talking machines, records and supplies, but also dealers in Musical Merchandise and Sheet Music.

All our experience is put into the kind of service we render to Victor dealers. This "EXPERIENCED SERVICE" is yours to command.

The Big months are now "on deck." Why not talk over your "Campaign" with us?

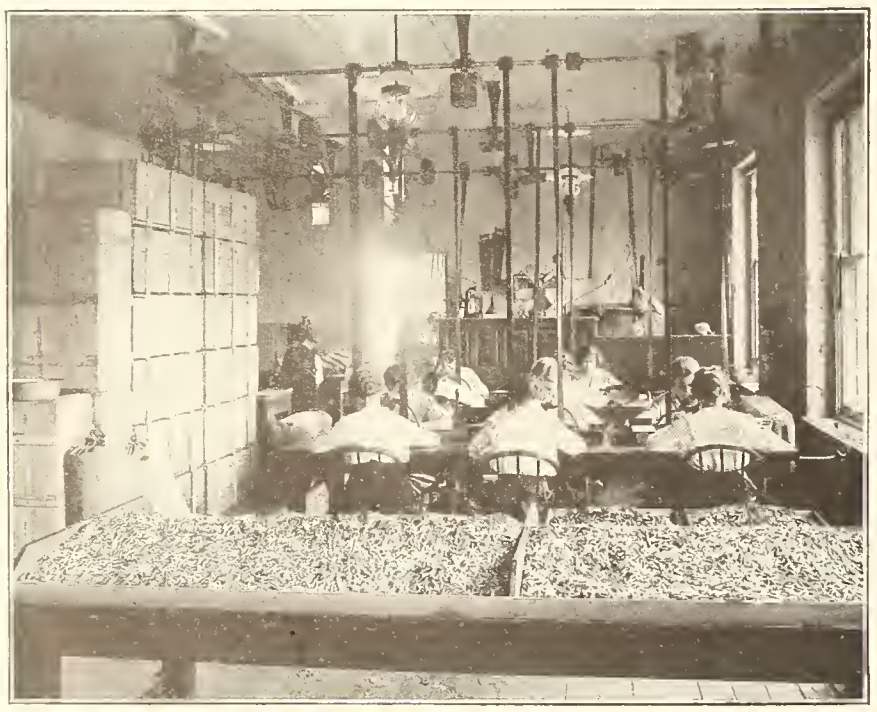
GLIMPSES OF THE B. & H. FIBR

5,000 poles—20 feet long and 3 inches in diameter—are here stacked until thoroughly dried, then sawed between joints.

Blocks, sawed from joints, are here shown being fed into specially devised splitting machines. Capacity of each machine—162 needles per minute.



Section of pointing department.

Showing details of pointing machine into which one needle, at a time, is fed.

THE pictures shown above illustrate, in a small way, some of the many steps in the process of making fibre needles—by no means a simple one. The recognized charm of the fibre needle is its refinement of tone. The round, mellow transference of the delicate tonal shadings from the record to the tone chamber is the best testimonial to the inherent qualities peculiar to the fibre needle only—add to this the fact, that the fibre needle cannot wear or injure

33 & 35 W. Kinzie St. **B. & H. FIBRE**

E NEEDLES IN THE MAKING

100,000 needles in each dripper are being immersed in chemically prepared bath at 380 degrees of heat.

BUSINESS BRISK IN MONTREAL

Shortage of Stock Only Cloud on Horizon—New Dealers Enter the Field—Records That Are Selling Well—Some General News

MONTREAL, CAN., November 3.—Business at present writing is very active and gives promise from now on until the end of the year of being especially brisk, the only cloud on the horizon being the scarcity of machines.

C. W. Lindsay, Ltd., Ottawa branch, recently featured a "Victrola Week." Their show windows and store were devoted to a large display of Victrolas more especially for the children, and their advertising that week was along the lines of developing the tastes of the children, drawing the inference that the Victrola keeps the children at home and happy.

Wilders, Ltd., 292 St. Catherine street West, have taken on the representation of the Pathé as has also N. G. Valiquette, Ltd., 477 St. Catherine street East.

J. W. Shaw & Co., in a recent advertisement, featured the Columbia machine, and Al Jolson's record, in conjunction with that artist's appearance in Montreal this week.

Victor Tungs-tone needles are now being introduced in Montreal, and are to be had at the stores of the Berliner Gram-O-Phone Co., Ltd.

Charles Culross has opened up Sonora and Columbia parlors at 610 St. Catherine street West, where he has fitted up-to-date showrooms with the machines most attractively displayed. Business in both lines is reported as exceptionally good.

Henry Hamlet, advertising manager of Layton Bros., has been placed in entire charge of the firm's Edison and Columbia talking machine department, and has already made good. Business with them is now in full swing with the tendency in buying of Edison and Columbia machines leaning towards the higher priced models.

Almys, Ltd., report through the manager of their talking machine department, Miss Havard, that Columbia Rena records are enjoying considerable popularity.

The Berliner Gram-O-Phone Co., Ltd., are working with full forces in order to fill the orders they have on hand Additional orders promise operations at full capacity for some time to come.

DELIVERING EDISONS BY AUTO

Irving H. Klein Uses Up-to-Date Methods in Supplying a Constantly Growing Clientele

FAIRBAULT, MINN., October 30.—The R. H. Bach Piano Co. reports a constantly growing demand for the Edison Diamond Disc phonographs and

Irving H. Klein and His Auto

records. Irving H. Klein, the manager of the concern, believes in up-to-date methods of merchandising, as is demonstrated by the six-cylinder automobile which he uses for delivering Edison phonographs and records to purchasers. The accompanying photograph shows Mr. Klein standing beside his machine, the picture being taken while he was on his way to deliver a high-priced Edison machine to a suburban customer. A special box has been constructed on the rear of the auto, in which the instruments and records are carried.

MEETING OF TALKING MACHINE MEN

Monthly Session of Local Organization Addressed by Albert Leon on Interesting Subject—New By-Laws Are Adopted

The monthly meeting of The Talking Machine Men, Inc., was held Wednesday, October 18, at Keen's Chop House, 70 West Thirty-sixth street, New York, and was attended by over twenty members of the organization. In the absence of President Hunt, J. T. Coughlin, vice-president, presided.

As a guest of the association Albert Leon, president of the National Home Furnishers' Association, attended a luncheon prior to the meeting, after which he addressed the gathering, speaking on the value of organization, his remarks showing to a great extent the history of the early period and the later accomplishments of the body of which he is head. In a few supplementary statements in answer to questions, which were in order at the close of his talk, Mr. Leon showed the need for all organizations co-operating in their efforts to have the Stephens bill passed by Congress. An especially interesting statement was given Mr. Leon's hearers when he told them that there were now pending ordinances in New York, Newark, Philadelphia, and other cities compelling storage and moving men to register the names and addresses of every one whom they moved. After finishing his address Mr. Leon was given a rising vote of thanks.

The executive committee then presented the new by-laws for adoption, which had been prepared pursuant to resolutions which were presented at the last meeting.

After a full discussion of their merits, the by-laws were then adopted.

EDISON DEALERS DINE

DALLAS, TEX., November 5.—The Texas-Oklahoma Phonograph Co., wholesale representative for the Edison Diamond Disc phonograph, gave a banquet to seventy of its dealers at the Oriental Hotel recently. It marked the close of the Edison week celebration, and was a most enjoyable and successful affair.

TO CHARGE INTEREST IN DETROIT

Local Association Reaches Definite Agreement on That Matter—Other Accomplishments

DETROIT, MICH., November 6.—Detroit talking machine dealers have been devoting much time lately to their local organization, known as the Detroit Talking Machine Association. And their time has surely been well spent. First of all they got together and agreed upon a uniform schedule of allowances, which is printed elsewhere in this issue. This is bound to work out to the advantage of the dealer and will cut down the exaggerated allowances, thus giving the dealer a greater profit on sales. This was followed up by an agreement regarding interest. Not all of the dealers have come in under the agreement, but most of them can see the great advantage to be gained and have assured the association of their hearty support. Some of the downtown installment furniture houses are throwing their support to the agreement to the extent that while they will not charge interest they do not intend to advertise it or use it in any way to get business away from some dealer who does charge interest. A few of the smaller dealers throughout the city are willing to cooperate, but they want to wait a while. Irrespective of what others may do, such firms as J. L. Hudson, Grinnell Bros., Max Strasburg, Wallace Brown, Henry S. Doran, Frank Bayley and The Edison Shop, intend to get full 6 per cent. interest; they would rather lose an occasional sale than fail to charge interest.

NEW ADVERTISING ILLUSTRATIONS

Victrolas Featured Effectively in Sketches Prepared by Richardson Co.

A new series of eight clever and lifelike advertising illustrations just issued by the Richardson Illustrating Co., New York, for the use of piano and talking machine dealers, includes two illustrations featuring the Victrola very effectively in home scenes. There are also illustrations regarding pianos and player-pianos in the series. Electros and mats of the illustrations are supplied in various sizes, all of which, together with prices plainly marked, are shown on a special sheet issued by the Richardson Co.

DOMESTIC RECORDS ANNOUNCED

Domestic Talking Machine Corp. Enters Field With Seven-Inch Vertical Cut Record—First List Made Up of Popular Numbers

The Domestic Talking Machine Corporation have entered the record as well as the machine end of the talking machine business, and their first offering to the trade is announced in this month's issue of The World.

Their records are vertical cut, seven inches in size, and are recorded with a fine grove whereby they secure practically the same running time as with an ordinary ten-inch record.

In manufacturing this record, particular attention has been paid to two features, namely, that the quality of recording should be clear, brilliant and musical, and that surface noises be eliminated so far as possible, as the object of the Domestic Corporation has been to produce a record that will measure up to the requirements of high grade purchasers.

The original offering of Domestic records largely consists of popular selections of the day, and the company proposes to make frequent additions to their repertoire so as to fill the popular demand for high-grade records at a popular price.

Many well-known record artists will be found among the talent appearing on Domestic records.

WANT TO FIND SALESMAN

Information regarding the whereabouts of Willard N. Crissy, a talking machine salesman formerly employed in Buffalo, is very much desired by the Brunswick Phonograph Shop, 19 East Jackson boulevard, Chicago, Ill., according to advices sent to The World.

TAKE OVER THE KNABE-CRYSTOLA

The National Talking Machine Co., Holder of Patent Rights, Secures Release from Knabe Bros. and Organizes a New Company With Capital Stock of $100,000 to Handle Line

CINCINNATI, O., November 6.—Negotiations, whereby the Knabe Bros. Co. give a release on their rights to the manufacture and sale of the Knabe-Crystola, were consummated to-day, according to an announcement by A. J. Swing, inventor and president of the National Talking Machine Co., holder of the patent rights.

Steps are now being taken for the formation of a new corporation, the Crystola Talking Machine Co., which will absorb the National Talking Machine Co. This has a capitalization of $100,000 and that sum is to be increased.

The factory is to be retained in Cincinnati and from the start particular attention is to be paid towards landing local business. A retail store is to be opened for the holiday business. W. O. Black, now in Chicago, is to have charge of the selling department.

DEALERS PRAISE WINDOW SERVICE

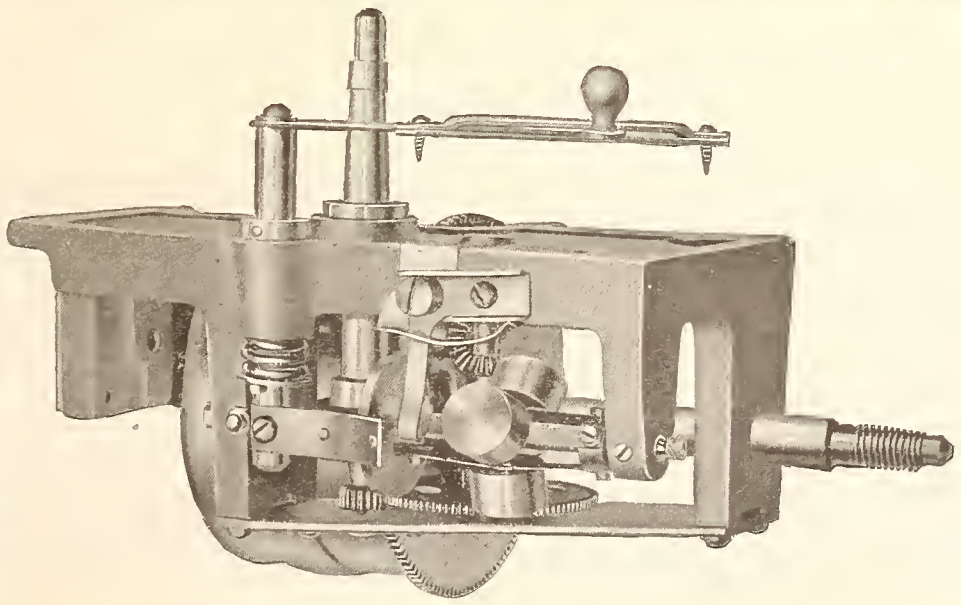
Get Excellent Results With Display Material Furnished by S. B. Davega Co.

The manner in which the window service offered to the dealers by the S. B. Davega Co., is appreciated by those who take advantage of it, is indicated by a recent letter to that company from Joseph Isaacs, 164 Sixth avenue, who said: "In filling my order for the November records, will you be sure to include the window display signs issued by you? I might state that this service has increased my record sales 300 per cent. on the new records, and believe it to be the best record poster yet."

We may say that the S. B. Davega Co. has also received many other unsolicited testimonials regarding the value of its service from the various dealers.

MEISSELBACH

TONE ARMS MOTORS SOUND BOXES



This is our No. 16 Motor, which will play five 10-inch or three 12-inch lateral cut records with one winding.

Double springs, made from the highest quality material. Worm driven governor. Cast iron frame. One-piece forged crank handle.

The lever shown on top of motor is the underneath turntable governor brake stop. A Speed Indicator and dial is furnished with this motor. Exceptionally silent winding mechanism and silent running.
By the turning of one screw, the spring cup can be readily removed, without taking apart the entire motor.
When you see this motor in any machine, it represents the highest quality motor that can be made, barring none. It has been made by a concern that has thirty years' experience in this line.
We guarantee the material and workmanship to be of the highest quality.
We also manufacture TONE ARMS, SOUND BOXES and other parts. Prices on application.

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World is designed for the service of all classes of our readers, including those who make, and those who sell, talking machines.
Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 25 East Fourteenth street, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

UNPACKING MACHINES IN THE WINTER

A condition which the dealers will have to meet within the next few weeks is the delivering and unpacking of machines, the motors of which have become very cold or chilled from exposure on trains or express wagons.

Take for example a few days before Christmas—the dealer sells a machine—the customer wants it delivered that day—the dealer takes a machine from the store floor, puts a canvas cover over it and pushes it out on the sidewalk to await the express or delivery wagon. From the even temperature of the store where it has probably been standing for a week or so it is put out into a temperature somewhere near the freezing point. The motor is instantly chilled, and the grease on the gears or spirals becomes congealed. When the machine arrives at its destination, the demonstrator will take off the canvas cover—immediately takes the winding key and starts to wind up the springs. He is generally in a hurry—both to get the machine running and then to get back to the store. In many cases the first few turns of the winding key will result in a broken mainspring, or if the springs stand the test it sometimes happens that the grease has congealed so that gears cannot turn. He never gives a thought to the fact that the motor has been subjected to the cold air, and is astonished to think that anything could become wrong with a machine which worked perfectly an hour or so before in the store.

It is good policy and a great saver of time and sometimes money to keep in mind during the coming cold months this little point: "Never wind up motor when it has just been subjected to intense cold." Always make it a point to have motor warm—place it near the heat, and allow it to become acclimated, as it were, before attempting to demonstrate it.

When the Motor Becomes Suddenly Weak

"Editor, The Talking Machine World.

"Dear Sir—While operating a machine with a strong double spring motor recently there was a load report from some section of the motor which I have been unable to trace. The machine still runs but requires considerable more winding than formerly. In other words, it does not run so long with one winding. The gears seem to be all right. Could you suggest where I can find the trouble?"—Chas. Frank, New York.

Answer.—There is no doubt but that you have broken the second spring, for in that case motor will wind up to about half strength and you would be able to use same for playing one record before rewinding. I would suggest that you look for the break in the spring near the cage rivet or second cage.—A. H. Dodin.

Repairing a Broken Spring

"Editor, The Talking Machine World.

"Dear Sir—On several occasions I have had springs break very close to the center pinion, as close as one-half inch in fact which, of course, has necessitated the insertion of a complete new spring at considerable expense. Would it be possible to remove the spring from the cage, cut off the broken end and redrill the hole to fit the pinion?"—W. B. D., Newark, N. J.

Answer.—If spring breaks near the outside end it is possible to drill a new hole providing you first heat end of spring and draw out temper. It would be very difficult to do this when, as you state, the spring has broken near the center shaft, for after drawing temper and drilling hole it would be necessary to reshape the spring to fit the shaft, and this cannot be successfully done unless you have a shaping tool. Without the proper tools for doing the work it would be a greater saving of time and expense to put in a new spring.—A. H. Dodin.

Wax in Center of Reproducer Diaphragm

"Editor, The Talking Machine World.

"Dear Sir—I have noticed in various sound boxes I have received where the needle arm is brought through the center of the diaphragm, the connection is covered with some form of wax and in some cases the wax does not add in the least to the appearance of the reproducer. Could you advise me if this wax could be removed or if it is really necessary?"—A. M. G. W., Youngstown, O.

Answer.—Wax is placed at the point of contact of needle box and diaphragm in order to make the connection positively air tight. For maximum results would advise you to continue to use wax in all cases and with a little practice there is no reason why you cannot place same so that it will not detract from the appearance of the sound box.—A. H. Dodin.

PHONOGRAPH CO. IN NASHVILLE

New Concern Takes Over Edison Phonograph and Piano Department of F. A. Leatherman

Nashville, Tenn., November 8.—M. H. Skalowski, who has been in business in Nashville for several years, has become principal owner of the Phonograph Co., a new concern that has taken over the Edison phonograph and piano department of F. A. Leatherman. The Phonograph Co. will be located in handsome quarters at 305 Fifth avenue, North.

Scott Bros., who handle an excellent line of pianos, players and talking machines in Ashland, Ky., are utilizing the local publicity to good effect in calling attention to their line.

EVERY VICTOR DEALER **First of All—RELIABILITY**

IN Ohio, Indiana and Michigan has a BIG field to do a BIG business in FOREIGN records. We are ESPECIALLY prepared to help dealers take PROFITABLE advantage of this demand, because we've stocked in heavy on the following records:

ARABIAN	HUNGARIAN	ROUMANIAN	AMOY
BOHEMIAN	ITALIAN	RUTHENIAN	SHANGHAI
CROATIAN-SERBIAN	LITHUANIAN	SERBIAN	CHANGCHAO
GERMAN	NEAPOLITAN	SLOVAK	CANTONESE
HEBREW	POLISH	TURKISH	MANDARIN
GREEK	RUSSIAN	CHINESE	AND OTHERS

If it's a foreign record you want, we've SURELY got it, and in quantities.

EMERSON PIANO HOUSE HOLDS ITS FORMAL OPENING

Victrola and Piano Dealers of Decatur, Ill., Go Into Handsome New Home With Great Celebration —Elaborate Concert Program a Feature—Some Distinguished Guests

DECATUR, ILL., November 1.—The formal opening of the new store of the Emerson Piano House, of this city, on Saturday, October 14, was a gala occasion, and a number of members of the talking machine trade, among whom jobbers' representatives predominated, were invited by Manager Harry I. Spayd and Guy W. Deetz, manager of the Victor department, to spend a day with them, inspect the store and participate at a dinner in the evening, where a general interchange of ideas was indulged in.

Two Victrola Rooms in Emerson Piano House

The visitors found a beautiful store, ideally equipped for the sale of pianos and talking machines. The decoration of the store is of the Adam period, ivory and rose being the dominating colors. The frieze and pillars and even the artistic indirect lighting fixtures, telephone and typewriter are in ivory, the draperies in old rose, the ceilings a clear white. The fixtures and furniture are in white enamel and mahogany. The delicate green tinting of the wall contrasts admirably with the color scheme. The reception room, the office and the piano and player rooms are on the right as you enter. The Victrola department extends along the entire left side of the store.

First comes the record sales department. As will be seen in the illustration there is a remarkable record cabinet containing 10,000 Victor records. It is of mahogany, and is divided into six sections, each five shelves high. The numerical indexing system makes it extremely easy to locate the records at once. A drop cover closes each section of the cabinet when not in use. There are bottom drawers under each section for supplies and accessories. An ingenious strip in the back of the shelving permits the use of either twelve or ten-inch records as desired. The cabinet is the work of the Decatur Fountain Co., and is their first installation. Adjoining the record sales department are two beautiful record demonstration booths followed by three commodious machine sales rooms, which contain every device for the convenience of the customer. The machine rooms each have a small cabinet containing a special set of records for demonstrations. In the rear is a recital hall seating eighty people, where concerts will be given every afternoon and Saturday afternoon and evening.

Back of the store is a garage for the housing of a White motor truck and a Ford with truck body used for delivering pianos and talking machines and for going after the country trade within a radious of fifty miles around Decatur. Goods are loaded direct on the trucks from the shipping platform or from an electric elevator, which brings the goods from the basement.

Manager Deetz, of the talking machine department, is cultivating the field in a very intensive manner. The staff consists of Donald J. Starr, salesman; Wilhelmina C. Requarth, who is devoting herself to educational work; Celeste B. Abel, in charge of the record sales, and John R. Myers, repair man, who has a completely fitted up shop at his disposal.

View of the Record Department

Among the rules in force in the talking machine department is that records sent out on approval can be retained only twenty-four hours, and that at least one-fourth must be retained. The fibre needles must be used.

One of the notable features of the opening day was the singing of the Imperial Quartet, of Chicago, who are Victor recorders.

A dinner to the visiting members of the trade was given in the evening at the Orlando Hotel.

Guy W. Deetz, manager of the Victrola department of the Emerson Piano House, presided. The speakers of the evening were: L. C. Wiswell, of Lyon & Healy, who spoke on the conduct of a retail talking machine store, and Roy J. Keith, of the Chicago Talking Machine Co., who discussed the feature of the Victor business. F. E. Noble, of the Chicago branch of the Rudolph Wurlitzer Co.; George Stewart, of the Stewart Talking Machine Co., of Indianapolis; H. Reynolds, Victor traveler; Roy Page, for the Victor Talking Machine Co.; Roy Page, of Putnam-Page Co., Peoria, Ill., and V. B. Taylor, of the Koerber-Brenner Co., St. Louis, were called on and made brief talks. Among the others present were H. R. Smith, Lyon & Healy, Chicago; H. Woodward, Chicago Talking Machine Co.; H. H. Prescott, Stewart Talking Machine Co., Indianapolis; H. Elthorn, Rudolph Wurlitzer Co., Chicago; A. E. Severe, Putnam-Page Co., Peoria; C. S. Main, manager of the Victrola department of Block & Kube, Peoria; J. F. Goberdiehl, and A. E. Binckley, of the Scovill Co., and Fulton De Forest, of Linn & Scruggs, both Victor dealers of Decatur; D. G. Starr, Emerson Piano House, and Ben Tufts, Oliver Johnson, G. Robert Wood, and Wallace Moody, members of the Imperial and Wallace Moody, of the Imperial Quartet.

LINE OF STANDS ARE POPULAR

The Kane Blind & Screen Co., Kane, Pa., has been very successful with its line of stands which it introduced to the trade a short while ago. These stands are designed to fit all of the types of table machines, manufactured by the leading manufacturers, and their moderate price has enabled dealers to offer them to practically every customer on their books.

The stands are equipped with a slide under the top, which acts as a convenient rest for changing records, and the long experience which the company has had in the manufacture of other household equipment is reflected in the attractive finish of these stands, which are made to match mahogany, golden, weathered and fumed oak machines.

REGULATE APPROVALS IN ST. LOUIS

Local Association Agrees on Plan to Mitigate Trade Evil—50 Per Cent. Limit Set

St. Louis, Mo., November 8.—After much discussion the members of the Talking Machine Dealers' Association have got together on a record approval plan. The following letter, drafted by Sidney Baer, of the Stix, Baer & Fuller Drygoods Co.; Mark Silverstone, of the Silverstone Music Co., and Charles Lippman, of the Field-Lippman Piano Stores Co., is being sent to all record customers by members of the association:

"In a spirit of fairness and protection to you, and in justice to the merchant, The Talking Machine Dealers of the Associated Retailers of St. Louis are obliged to make the following just and reasonable request concerning sending records on approval—a privilege granted the purchasers of records which has been considerably abused in many instances in the past.

"(1) All records sent on approval should be returned within twenty-four hours, and then only returnable if in perfect condition. They will be considered sold and not returnable if kept in the customer's possession longer than two days.

"(2) Not less than 50 per cent. of the amount of records sent out on approval should be kept by the customer. (This refers to the cost of the records—not to the number of them.)

"We ask your co-operation in complying with the above request, which is fair to the customer, and just to the stores and salespeople, who suffer a hardship for the loss of time (which means money to them), in selling goods which are returned.

"The Associated Retailers of St. Louis."

The signature of "The Associated Retailers of St. Louis" is that of the larger organization, of which the Talking Machine Dealers' Association is a bureau. The larger association includes the department stores and practically all large retail stores.

CONDITIONS IN ARKANSAS

Plenty of Money in That Section Declares E. C. Rauth, of the Koerber-Brenner Co., After Trip—Looks Good for Victrola Business

St. Louis, Mo., November 6.—E. C. Rauth of the Koerber-Brenner Music Co., Victor distributors, returned Monday from a Southern trip, which included Arkansas and neighboring territory. He said that he saw more evidences of money in Arkansas this year than ever before, and that business, if anything, was too good in the Victor line. This territory, Mr. Rauth says, is beginning to take a large number of records, this feature of the trade is developing strongly. The favorite records in that section are the "Blues." There is also a strong demand for the dances and popular airs.

Local business, Mr. Rauth finds, is gaining at an unusual rate this year.

SALES MANAGER FOR MANOIL CO.

E. P. H. Allen Appointed Head of New York Offices of Manufacturers of the Manophone

Announcement was made this week of the appointment of E. P. H. Allen, as sales manager for the New York office of the James Manoil Co., Inc., makers of the Manophone, whose executive offices and factory are at Newburgh, N. Y. Mr. Allen was at one time connected with Thos. A. Edison, Inc., and later with the Keen-O-Phone Co. Mr. Allen has had wide experience as a sales organizer, especially in the talking machine industry. He is at present developing a most effective selling force.

NEW VICTOR STREET CAR CARDS

Five Handsome New Designs Now Ready for Use of Dealers—One for Holiday Trade

The Victor Talking Machine Co. has issued to its dealers a sheet showing five new street car cards printed in brilliant colors, and which are furnished free of charge imprinted with the dealer's name and address, provided, his contract with the street car company calls for twenty-five or more cards. When a less number are required they are furnished without imprint. The cards are handsomely designed, well diversified, and one is particularly designed for the holidays, bearing the well-known slogan: "Will There Be a Victrola in Your Home This Christmas?"

UDELL Cabinets

Our Piece of News

We can't begin to "show" the Udell line of cabinets in this space.

BUT

We've just issued a GIGANTIC new catalogue with over seventy illustrations.

It will "show" you the host of different models we make for Victor Victrolas, Columbia Grafonolas, Pathé Pathephones, Aeolian Vocalions, Sonora, Empire, and other machines.

This Catalogue is written for YOU. Of course you want it and of course we'll send it, but what is your address?

The Udell Works
1204 West 28th Street
Indianapolis, Ind.

Stewart Phonograph

Dealers—There's an Unlimited Market for This Wonderful Instrument

Millions of people want the new and perfected Stewart Phonograph.

Beyond any question of a doubt it offers dealers the greatest money-making opportunity of the kind in the world.

It is just what everyone has been wishing for—a beautiful, practical phonograph that they could buy for a popular price. Everyone can afford to buy the Stewart Phonograph.

The retail price of $6.50 places it easily within reach of every customer that comes into your store. Your market is as large as the population of your vicinity.

A big, comprehensive, national advertising campaign which started last month will bring you immediate sales.

The demand was already there. The market was ready and waiting. Our smashing two-page announcement in the Saturday Evening Post, October 14th, brought it to life with a jump.

Are you getting your share? If not, you had better hurry.

The Stewart Phonograph is new—but not a novelty in the cheap sense of the word. It is a handsome, finished phonograph that will play—and play beautifully—any record on the market. Read the description on the opposite page.

Put the Stewart Phonograph on sale in your store. And do it now! Do it in time to get full benefit of our first big announcements. Do it before your nearest competitor takes the cream off your own legitimate market.

Write or wire us today for the extremely liberal proposition we are making to dealers. You will find it attractive and interesting.

Equipped with the Stewart Universal Reproducer

Plays records of any type, any make, any size, any price

Automatic Needle Stop, (prevents gouging records)

Stewart Instantaneous Time Control

Tone Arm and Sound Chamber Improvements greatly increase volume and tone quality of music

Improved Stewart Silent Motor

Stewart Phonograph

$6.50

A Marvel at the Price

Both in tone and appearance the Stewart Phonograph is one of the most finished and beautiful machines ever offered to the American public.

It is handsomely finished in that verde green so often used in high grade clocks, vases and other works of art. It will harmonize with the decorations of any room in any home.

The improvements on this new and greater Stewart Phonograph are numerous and important.

First, there is the universal reproducer, by means of which the Stewart instrument can play records of any type, make, size or price. This is a very important improvement and a big selling point. There are two types of phonograph records, known as the lateral cut record and the hill and dale record. The hill and dale record cannot be played on a phonograph designed for the lateral record, and vice versa. But with the Stewart universal reproducer you can play both kinds of records.

To play the lateral cut, the Stewart universal reproducer is turned to the right angle position, as shown in the illustration. To play the hill and dale record the reproducer is turned lateral or crossways with the tone arm.

The quality and tone of the music is unsurpassed. The tone volume—as well as the quality—has been greatly improved by means of the newly designed tone arm. An improvement in the sound chamber adds to the quality, tone and volume.

Another big improvement is the new motor, acknowledged to be the best designed motor in any popular priced phonograph. Its quietness and smoothness are astonishing. With a single winding you can play one twelve-inch or two ten-inch records.

A new stop, which works on the tone arm, stops the arm automatically when the piece is finished. This Stewart improvement prevents the needle from swinging across and gouging or ruining the records.

The new time control is an exclusive feature of the Stewart Phonograph. It is instantaneous. No fussing. The desired time is obtained immediately.

For beautiful appearance; for beautiful, accurate and life-like reproduction; for up-to-dateness and durability, this new Stewart Phonograph is superior to any other popular priced phonograph ever offered.

Do not overlook the wonderful business opportunity offered by this instrument. You will find it a fast seller—a money-maker in every sense of the word.

Communicate with us at once. Use the coupon below.

Unlimited Production

The Stewart Phonograph is backed by the same men, the same brains, the same facilities that have developed and built up the Stewart-Warner Speedometer Corporation—the largest automobile accessory business in the world.

The production of Stewart Phonographs is now unlimited.

Our mechanical facilities and our manufacturing organization are unexcelled. Our daily production right now runs into the thousands.

That, and that alone, enables us to build such a phonograph to sell for so remarkable a price—and yet offer dealers an unusually generous profit.

We have the material, equipment and money to increase production to any amount. You know what that means to dealers.

In a very short time we expect to have over one million Stewart Phonographs in use in America alone.

Dealers, get busy!

BUSINESS GROWING IN BALTIMORE

Same Old Story Regarding Sales Volume and Possible Shortage Causes Worry—Sales Staffs Being Increased—Good Reports—Other News

BALTIMORE, MD., November 10.—October proved to be a banner month with the talking machine dealers in Baltimore and had they been able to obtain all of the machines and records they required the business would have been so great that it would have probably set a mark for a long time to come.

Distributors of every line of talking machines are all in the same class as to the lack of machines to supply their trade. The Victor people are the hardest hit in this direction and the failure of some of the dealers to obtain more machines than they did in October of last year prevented business from showing increases that they would have made.

Besides the large regular monthly advertising by the Victor and Columbia and Edison companies various dealers throughout the city advertised their lines and there was also liberal advertising featuring the Aeolian-Vocalion.

The record situation improved somewhat toward the end of the month and the tremendous increase in the sale of records is what prevented many of the firms from showing a decrease in their sales. Another feature of the local business is the increased demand for the better grade of machines. Cash business is also one of the bright spots in the trading.

As the holiday season draws near the dealers no longer worry about the amount of business they will do, but just how they will be able to get sufficient machines to accommodate their customers. This despite the fact that many dealers have been able to get in a stock ahead to care as far as possible for the rush, which is sure to come.

W. C. Roberts, manager of E. F. Droop & Sons Co., distributor of the Victor goods, is more than pleased with the way business is coming in. As usual his only complaint is that he is short on a number of styles. This is particularly true of the $75 and $100 machines although there are several other styles he is having a great deal of difficulty in securing. Mr. Roberts recently visited the Victor factory and was successful in getting additional stock.

The business at the Droop house is growing in such leaps and bounds that the manager has found it necessary to put on additional men. This makes five more employes put on during the last two months. Mr. Roberts reports quite a demand for Victrolas in fancy woods and believes this has been brought about mainly because of the shortage in mahogany.

A. J. Heath, manager of the Columbia Graphophone Co., reports a phenomenal month's business in October. It was by far the greatest month's business Columbia ever did since its entrance into the field. Mr. Heath was very much gratified to receive a telegram from District Manager Eckart which stated: "Congratulations to you and yours on the wonderful showing last month."

Mr. Heath stated that business just goes ahead by leaps and bounds. The machines are coming in right along and while not as many arrive as they can use still they are able to keep their customers in high spirits. The record shipments improved during the month and there was a fine sale on the new records that have just appeared.

I. Son Cohen, of Cohen & Hughes, Victor distributors, says business manages to keep rushing ahead desipte the shortage of goods. "If ever we are able to get all the machines we need," said Mr. Cohen, "our volume of business will be so great that the results would be hard to realize." During the month Mr. Cohen went weekly to New York and to Camden, N. J., visiting the Victor headquarters for the sole purpose of trying to get more machines. Before the end of the month Mr. Cohen expects their new establishment to be ready for occupancy.

Jesse Rosenstein, of the National Piano Co., Pathé distributors, reports a big business in his line, but has the usual cry of not being able to obtain machines as fast as he could put them out. There has also been a shortage on records. Three new accounts are announced to handle the Pathé—P. Coyne & Sons, Baltimore; Salvoy Collieries, Kingston, Va., and the Newport News Furniture Co., Newport News, Va. A big shortage in $25 and $75 machines is one of Mr. Rosenstein's troubles.

H. R. Eisenbrandt Sons, Inc., Victor distributors, report their biggest shortage on $75 and $100 machines, which are having the biggest run. Business is good, but would be better if they could but get the machines.

The Sanders & Stayman Co., Inc., is having an exceptionally fine business in Vocalions. The heaviest demand is for machines of $200 and over. The firm also handles the Columbia line.

The talking machine department of the Mann Piano Co. is showing to wonderful advantage. While the department is but a few months old, the volume of Victor business has exceeded all expectations. Charles Stran, manager of the department announces that Miss Rose Armstrong and E. Ogilvie, formerly in the talking machine department of Stewart & Co., have joined their salesforce.

H. T. Kennedy, manager of the Victrola department of William Knabe & Co., reports a great increase in all lines of the business and says that most of the machines being purchased are of the higher price.

ALL DEPARTMENTS UNDER ONE ROOF

Operaphone Manufacturing Corp. Move Recording and Electroplating Departments to Main Factory in Long Island City

The Operaphone Manufacturing Corp., manufacturers of Operaphone records, have moved their recording and electroplating laboratories to the commodious factory building occupied by the company in Long Island City. Having all the departments under one roof serves to facilitate production greatly, and makes for convenience generally. The company is steadily increasing its output of records to meet the growing demand, and is constantly improving its distributing facilities, in various sections of the country, through the addition of new wholesale and retail representatives. Several prominent concerns who have specialized on lower priced machines, particularly on a mail order basis, are featuring the Operaphone records in connection with those machines, which has had the effect of substantially increasing the demand.

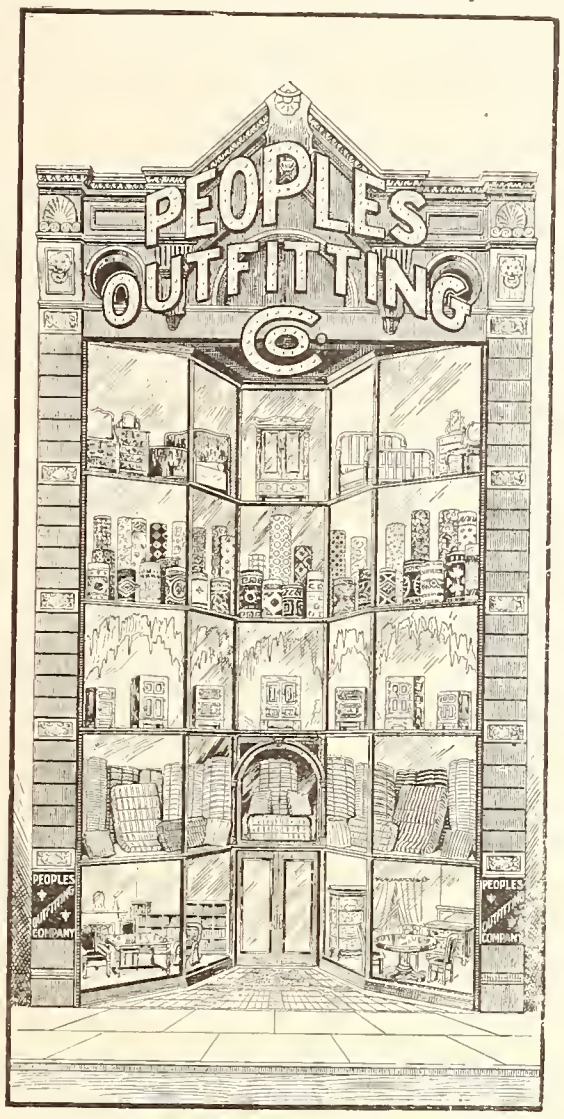
DEVELOPING CHRISTMAS BUSINESS

How the Talking Machine Department of the People's Outfitting Co., of Wilkes-Barre, Are Featuring the Pathé Phonograph Line

M. A. Oppenheim, manager of the People's Outfitting Co., Wilkes-Barre, Pa., was a caller this week at the executive offices of the Pathé Frères Phonograph Co., New York, spending some time in consultation with the officers of the company relative to his plans for a holiday campaign. Mr. Oppenheim outlined his ideas for developing Christmas business to Advertising Manager Bernat, of the Pathé Frères Co., who will give him every assistance in achieving his purposes.

The People's Outfitting Co. is one of the most successful retail institutions in Wilkes-Barre, and owes a great deal of its success to its energetic and progressive methods and policies. It is planning to move into a new building in the near future, which will give it ample room for expansion.

The Pathé line is handled exclusively in the



Home of Pathé Agents in Wilkes-Barre

company's talking machine department and an extensive advertising campaign has been instituted in behalf of these products. This campaign has been productive of splendid results, and Mr. Oppenheim is exceedingly enthusiastic regarding the future of the Pathé line in his territory.

BIG HEINEMAN MOTOR SHIPMENTS

November 9 was a red-letter date for the Otto Heineman Phonograph Supply Co., for on this day, the actual shipments of Heineman motors from the company's plant at Elyria, O., reached the remarkable figure of 3,200, a record-breaking one-day total.

When it is considered that the Otto Heineman Phonograph Supply Co. has only been in the American market for the past two years, this figure is doubly impressive, as it indicates conclusively that the "Motor of Quality" has gained in this short space of time a premier position with talking machine manufacturers.

PUTNAM-PAGE CO.'S NEW QUARTERS

PEORIA, ILL., November 9.—The Putnam-Page Co., Victor distributors of this city, have just moved from 211 South Adams street, to 329 South Adams street, where they have much larger quarters, both for their wholesale and retail business. The retail department on the main floor has an attractive reception room, and a number of demonstration and machine booths. The booths are white enamel finished in light brown inside. One of the booths is entirely for the educational department. The wholesale stock occupies a floor by itself, and the new quarters are most attractive and splendidly arranged in every way.

SONORA AGENCY FOR McLEAN BROS.

DANBURY, CONN., November 6.—The McLean Bros. store has become a retail distributing agency for the Sonora phonograph, and a full shipment of machines has been received. The concern expects to push the Sonora line energetically in its territory.

Here's the culmination of the efforts of an organization—devoted exclusively to Wholesaling Victor Products.

You'll find here samples, specimens and forms of all the latest ideas used by the Best Victor Dealers in Sales, Systems, Advertising, Accounting and Collecting.

You'll find it profitable to use many of these ideas in your business—come in—discuss the problems of your store with our Service and Efficiency Department. You'll be interested, too, in learning how other dealers handle the proposition of records on approval, the interest question, the matter of terms on deferred payments, and other questions of policy.

Come in—we'll be glad to see you.

Chicago Talking Machine Company

Victor Distributors *Wholesale Only*

12 North Michigan Avenue Chicago

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., November 9.—The situation does not greatly differ from that of preceding months. October was a record-breaker with local jobbers in point of shipments, and November bids fair to follow suit, and yet the shortage, relatively speaking, is as great as ever. The demand for records has been immense, and dealers generally are evidently pushing this branch of the business as never before.

Locally, the retail departments as well as stores report sales both of machines and records steadily increasing as the season advances. October was a good month and ahead of last year, but the volume of business in November, from present indications, will exceed it.

Lyon & Healy's Big November

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, is again in the East in the interests of the National Talking Machine Jobbers' Association, of which he is secretary, together with representatives of the leading talking machine manufacturers, at a meeting of the official classification committee. The talking machine men are opposing a new proposition by the roads to raise the classification on talking machines from third to second class. They are also arguing in favor of a reduction in the minimum weight of carloads from 24,000 to 16,000 pounds.

J. B. Ryder, assistant to Mr. Wiswell, said that November was an exceptional month in point of shipments in spite of the shortage on some models of machines.

"Our record sales are simply enormous," said he, "the dealers responding to the arguments we have been making continually through letters, and our salesmen as to the advantage of making a special effort on the record proposition."

Lyon & Healy are having a remarkable demand for their latest poster on the Victrola for Christmas, one of the most attractive of the remarkable Victor posters they have issued from time to time. It is a twenty-four-sheet poster, nine feet in height, twenty feet in length, printed in four colors, and is a most artistic production in every respect.

Lyon & Healy are now ready to furnish their trade with a set of attractive highly polished mahogany frames for special decorative window display cards on Victor goods, four of which are issued each month. There are two single frames and one containing two cards. These cards have proven efficient business builders for the dealers, and they will welcome the opportunity to show them in a still more attractive manner than heretofore.

Columbia Business Soaring

C. F. Baer, local manager of the Columbia Graphophone Co., is one of the busiest men in the entire Columbia institution, judging from appearances as witnessed this week. Clattering typewriters and continuous 'phone ringing joined with hustling clerks and worrying visiting dealers in taking care of the big orders and the question of securing sufficient goods to fill them.

"October was the biggest month this office ever had," said Mr. Baer. "It beat October of last year by 97 per cent., and also beat September of this year—a busy month—by 20 per cent. Every class of machines and records is enjoying a big call, and as for the electric machines, we simply cannot get enough of them. My principal trouble is keeping the dealers satisfied, and this is quite a job when you realize the amount of goods that they are demanding.

Some of the new dealers who are realizing how busy the talking machine industry can be at this season of the year, and the Columbia business in particular, are the Austin Talking Machine Shop, 238 Chicago avenue, Chicago; Geo. E. Taylor, Genoa Junction, Wis., and Geo. Brand & Sons, Bloomington, Ill.

Six Best Sellers

The six best sellers in the Victor list the past month were, "Cradle Song, 1915," sung by John McCormack; "There's a Little Bit of Bad in Every Good Little Girl," "Saxaphone Sobs," "On the Beach at Waikiki," "Sweet Genevieve" and "Sing Me to Sleep."

The Columbia Co.'s six best sellers included: "Aida-Celeste Aida," "La Boheme-Che Gelida Manina," "L'Africana—O Paradiso!" "I Puritani—A to O Cara," all sung by Lazaro; "Parla Waltz," and "Lo, Here the Gentle Lark," and "Carmen—Two Spanish Dances" and "Sleeping Beauty Waltz," played by the Chicago Symphony Orchestra.

The six best Edison sellers for the month as reported by the Edison Shop are: "San San Soo-Hip, Hip, Hooray," "Little Cotton Dolly," "Vissi D'Arte," "Monologo," by Verdi; "Home to Our Mountains—Il Trovatore."

H. K. O'Neil, manager of the State Street Pathephone Shop, gives as his best sellers for the past month: "I Pagliacci," "Out of the Cradle Into My Heart," "Aloha Oe," "I Ain't Got Nobody," "Serenade" and "On the South Sea Isle."

Wurlitzer Inereases Sales Force

Fred. A. Sieman, manager of the talking machine department of the Wurlitzer Co., states that, owing to the increased volume of business being done by the retail department, they have materially added to the sales force. He reports a special demand for the $150 and $200 styles of Victrolas. Because of the recitals given here by McCormack and Gluck, there has been a large call for records by these artists. Mr. McCormack's "Cradle Song" has proven one of the best sellers of the month. Other best sellers at the Wurlitzer rooms are, "On the Beach at Waikiki," "There's a Little Bit of Bad in Every Good Little Girl," "Walking the Dog," a saxophone record, and Pietro Diero's "Poet and Peasant."

L. F. Noble, assistant manager of the wholesale talking machine department of Wurlitzer's, is equally optimistic in his reports concerning shipments made to dealers, and emphasizes the fact that the $350 styles of electric Victrolas are selling as never before.

New Brunswiek Dealers

The Brunswick-Balke-Collender Co. are getting rapidly lined up through the country with a most desirable class of dealers who are pushing vigorously the Brunswick phonographs in connection with the Pathé records, for which the company is a distributor.

The national advertising campaign which was started with an imposing double page spread in the Saturday Evening Post of October 28, will be followed up with frequent pages in that medium, and other periodicals will be used extensively after the first of the year. Through various sources the company have already received a large number of inquiries, which are being turned over to their dealers.

The company has also established a dealers' advertising service department in charge of H. E. Nelson. An especially desirable class of newspaper advertising copy will be furnished the dealers through this department, together with dealers' helps of various kinds, including attractive booklets, direct mailing literature of

VICTROLA DISTRIBUTORS

Wabash Ave. *and Jackson Blvd.,* CHICAGO

various kinds, form letters, etc. The department is already prepared to furnish Brunswick dealers with motion picture films for use in their local theatres. This film has already been shown in a number of theatres in Chicago, and has proven very effective. It shows a young woman demonstrating the Brunswick phonograph and shows her changing the sound boxes for playing the different kinds of records.

Will H. Davenport, sales manager for the Brunswick phonograph department, reports that among the important Middle Western dealers just established are the following: Hayden Bros., Omaha, Neb.; Boutell Bros., Minneapolis, Minn.; Field-Lippman Piano Stores Co., and the May-Stein Co., of St. Louis, Mo.; C. E. Armstrong & Sons, Clinton, Ia.; Davison Bros. Hardware Co., Centerville, Ia.; Renier Music House, Dubuque, Ia.; L. Ginsberg's Furniture Co., Des Moines, Ia.; George B. Deyen, Bellevue, Ia.; Jacobs Novelty Co., Stevens Point, Wis.; C. S. Daniels, Wichita, Kan.; Lethin Bros., Moline, Ill.; Herman Hamm, Cleveland, O.; Mayer-Marks Co., Cleveland, O.; Olof Olson, Muskegon, Mich., and J. W. Olds, Winfield, Kan.

In Chicago the Brunswick Phonograph Shop at 19 East Jackson boulevard, is doing an excellent business, and is advertising vigorously in the dailies.

The Spiegel's House Furnishing Co. is handling the Brunswick line at its main store at 127 South Wabash avenue, and at the company's four branch stores.

Albert N. Bensinger has opened a Brunswick Phonograph Shop at 113 East Fifty-fifth street. It is exquisitely furnished, has two demonstration booths in white enamel, and the wall decorations and tapestries are in light blue. The store is already doing a good business in that locality.

C. C. Briggs, formerly Iowa representative for the Edison Co., has been added to the Brunswick traveling staff, and will cover Iowa and Nebraska, making his headquarters in Des Moines.

Heinemann Co. Enlarges Quarters

The Otto Heinemann Phonograph Supply Co. have added to their local offices at 19 West Jackson boulevard and have increased their force. Mr. Ribolla, manager of the Chicago office, states that the business has increased enormously within the past few weeks and months. A large stockroom has been added adjoining the office rooms, and now a large stock is being carried. Mr. Ribolla says that the great increase in business has necessitated more than doubling the former force of employes. W. C. Pilgrim, recently appointed assistant sales manager of the Central West division, expresses his satisfaction with the new work.

Three Talking Machine Dealers Move

Another result of the excellent business conditions in the talking machine trade is to be seen in the recent removal of three local dealers to larger quarters. All three of the companies are located outside of the loop and unite in affirming the business of the present year to be the best in the history of the talking machine trade.

The Boller Piano Co., formerly located at 2164 Milwaukee avenue and now at 2385 Milwaukee avenue, has an increased number of booths at its new store and finds the talking machine department of its business steadily developing. Its only complaint is the shortage of machines. At present its warehouse is empty. The Boller Piano Co. handles the Victor line.

The Central Piano Co., of which Ray Healy is president, has removed to 204 South Wabash avenue and is doing a large volume of business This concern has also opened up a small branch store on Adams street in a part of the old Lyon & Healy Building. It handles the Columbia.

The A. G. Dundore Piano Co. is removing from 1914 Irving Park boulevard to 3940-42 Lincoln avenue. The new quarters are located upon a busy corner at the intersection of Irving Park boulevard and Lincoln avenue. Mr. Dundore states that the month of October was the greatest in the history of the company. The A. G. Dundore Piano Co. handles the Sonora and Magnola talking machines.

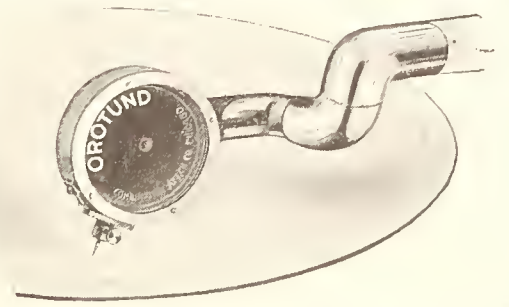
George B. Dow, who is moving from 352 West Sixty-third street to a new double store at 336-338 West Sixty-third street, will in the future handle talking machines. No announcement has been made yet regarding the line of machines that he will carry.

McCormack Adds Old Violin to His Collection

John McCormack, the famous tenor, was recently in Chicago and while here purchased a rare old violin, a Joseph Guarnerius Del Gesu dated 1724. The instrument is one of the finest specimens of this great maker's work in existence, and was bought from Lyon & Healy for $18,000. Mr. McCormack gave a recital while in the city at the Auditorium Theatre. Seats for the entertainment were sold a week in advance. There was also a noticeable increase in the sale of McCormack records caused by the tenor's visit.

"The last word" in re-creation of music. Produced by the

"Orotund" Sound-Box



Dealers should handle the "Orotund" outfits to make their machines universal in playing all records.
Sample price to dealers $3.50, cash with order.
Please mention make of machine when ordering.

Grafonola Shop Has Attractive Display

In the window of the Grafonola Shop on Michigan boulevard appears this month an attractive display of Columbia records. Surrounding one of the larger styles of Columbia Grafonolas

Attractive Columbia Window

are pictures of operatic stars contributing to the Columbia library. From each of these a white ribbon extends to the records of the artists that are displayed beneath. At the left of the window Lazaro, the famous Spanish tenor, is specially featured in a separate display, four of his principal records being shown. Among the twenty other artists featured in the window are Mary Garden, Lillian Nordica, Emmy Destinn, Olive Fremstad, Slezak, Zenatello and Ysaye. Manager A. T. Boland, in preparing the display, used colored prints from the Columbia Co.'s publicity department. The border draping at the top of the window is especially worthy of note, giving as it does, a luxurious atmosphere to the entire display.

Empire's New Advertising Matter

The Empire Talking Machine Co. has just issued a new catalog for dealers, together with a folder containing six full-sized advertisements for use in dealers' local newspaper campaigns, and a small booklet entitled "Dorothy Decides," for distribution amongst prospective Empire customers. The catalog contains twenty pages of interesting reading matter and illustrations colored in mahogany of the various Empire styles. A brief introduction at the front of the book is signed by John Steinmetz, president of the concern, which effectively puts before the dealer the policy of the Empire organization. "Dorothy Decides" is an interesting short story featuring the tribulations of a family who have long done without a phonograph and who, after a period of doubt and hesitation finally decide upon the purchase of an Empire. The six advertisements for use in local newspaper campaigns have been prepared by advertising experts and emphasize the advantages of the talking machine in the home.

This double spread appeared in the Saturday Evening Post Oct. 28th

A PHONOGRAPH SENSATION—
SUCH IS THE BRUNSWICK

The two-page announcement above appeared in the Saturday Evening Post October 28. It heralded a new day in the talking machine world. The trade read it with surprise and interest—then responded!

To thousands of American homes it opened a new and broader field of music. To music lovers everywhere it announced new artistic standards. The day after the publication of this announcement advertisement the House of Brunswick felt its effect. We knew that this super-phonograph would create a sensation, yet we hardly dared to hope for such an immediate and extensive response.

Eager Interest

This came from two sources. First, from music lovers themselves, the actual purchasers of machines. They wanted to know more about this master phonograph and where it might be heard and obtained locally. Second, from people and concerns wishing to handle the Brunswick phonograph.

From both we realized that our work of years was appreciated and that the Brunswick was destined to become a leader.

The House of Brunswick is not new in the phonograph world. Its executives and craftsmen are not unfamiliar with phonograph requirements.

For years this organization has been manufacturing the finer cabinets for the leading concerns. But the credit for Brunswick cabinets has gone to others.

Now we give our master production our own name, having spent much time and money in perfecting the mechanism.

New Day Perfections

A great European genius designed and is now building our extra-capacity motors.

Acoustic experts were engaged to study the sound chambers and give the Brunswick a perfect one, built like a Cremona.

Other inventors gave the Brunswick its remarkable tone modifier, its accurately timed automatic stop, and other improvements and extras.

Brunswick officials specified that this new phonograph must be a combination of all the better machines.

The Brunswick plays all records. In other words, it is not limited to one make of records, as is the usual practice.

An International Alliance

Then we went still further. Through an arrangement with Pathé, every Brunswick dealer may now distribute Pathé records, Europe's favorites.

This opens up to all American homes the largest musical library the world has ever known.

With the Brunswick we furnish a special Pathé sound box and sapphire ball. Also the needles required for other records, such as the jewel point, steel, etc.

We believe sincerely that the Brunswick offers to dealers an unbeatable proposition, on which larger-than-usual profits may be made.

We have been very particular in arranging our dealer policy. We feel sure that as fast as it is known, men will say that it is most liberal

Under the Rightful Name

We save thousands of dollars in manufacturing and selling costs. Workmen already trained in making phonograph cabinets save us money. Few concerns make their own cabinets. Our distribution system and sales force is already organized throughout the United States, handling our complete line.

So in these and other ways our economies mean more money for you—and less cost for the purchaser, an attraction.

Throughout the United States and Canada there are opportunities for progressive dealers to become local representatives of the House of Brunswick.

We Predict A Stampede

Our national advertising campaign in magazines and newspapers is just starting. We mean to make the Brunswick phonograph a tremendous success.

If you are interested in joining us, we have a tempting proposition. Write today for particulars. First come, first served.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 75)

Kennedy Furniture Co.'s New Store

The Kennedy Furniture Co., of which E. W. Richards is manager of the talking machine department, has recently opened a branch store at 1968 Milwaukee avenue. In its new store the Kennedy Co. has placed strong emphasis on the talking machine department of the business. The accompanying photograph shows a window display, arranged by James Keevil, manager of the branch store, which has been productive of results. The scattering of a few autumn leaves about the floor adds to the color scheme of the window and indicates a thorough knowledge of harmony in window display. The Kennedy Furniture Co. handles the Columbia phonographs and records. A large proportion of the customers are foreigners or of foreign extraction, and a good business in foreign records and in the more expensive types of machines is reported.

Kennedy Co.'s Window Display

Emerson Records Finding Ready Sale

The present prosperity that is resulting in the increased sale of very high-priced talking machines and records is likewise helping the cheaper articles. F. W. Clement, manager of the Chicago office of the Emerson Phonograph Co., reports a greatly increased demand for their 25-cent double disc records. The present difficulty, says Mr. Clement, is not in getting sales, but in obtaining materials and records to supply the orders that are flowing in.

Crescent Sales Co. Establish New Agencies

William R. Everett, Chicago manager of the Crescent Sales Co., states that ten new Crescent talking machine agencies have been established in and about Chicago. Six of these are located inside of the city and four outside. Mr. Everett is contemplating a change of quarters, as the present ones are too small to effectively handle the business that is being done. Especially is the talking machine parts business booming. Mr. Everett complains of a growing scarcity of suitable mica for diaphragms, and predicts that before long prices on this item will go sky-high.

New Straube Store at Hammond

The Straube Piano Co. will, a fortnight hence, move into their new retail store at Hammond, Ind., where their factory is located. The new warerooms will be located in a fine new structure to be known as the Straube Building. On the first floor there will be a reception room and the talking machine department, with five booths devoted to Victor and Edison goods. An electric elevator will carry customers to the second floor, which is devoted entirely to the piano department. There are four private piano and player demonstration rooms and a large recital hall, which can be converted into a general sales room when not in use for concert purposes. President E. R. Jacobson, of the company, is very enthusiastic regarding the beauty and perfect equipment of the new store, which he is quite certain is one of the most beautiful establishments for a town the size of Hammond in the West.

How Credit Makes a Difference in Delivery

"A common fallacy which has played the dickens with many talking machine dealers," says Jeffery B. Schiff, secretary of the Vitanola Talking Machine Co., "is the policy of the dealer who is slow and shiftless in his credit obligations."

The demand for talking machines has been so great in the past year that hardly a talking machine manufacturer has been able to keep up with the vast amount of orders that have been pouring in upon him. They have built addition after addition to their already large plants, and added 50 to 100 per cent. more help and still have been unable to achieve the necessary output. Therefore, there has been but one path to follow, whch leads to best results. This has put the manufacturers in closer touch with their accounts. They have gone over their books, showing partiality to their customers that have met their obligations on or before maturity.

At this time the dealers who have been "on the square" with the manufacturers, and have met their obligations properly, should be given preference in shipments. The slow, indifferent dealer that says, in reference to meeting an obligation, "Oh, they can wait!" should wait for his goods.

Increases Magnola Capacity

The Magnola Talking Machine Co., which is a subsidiary of the M. Schulz Co., will soon be in a position to greatly increase their output, an imperative necessity in view of the favorable reception given the Magnola talking machine. The additional two stories being built on to the main Schulz plant, which will be devoted exclusively to the finishing departments of the Magnola talking machines, will be equipped and in operation in the course of a few days. Not only is the Magnola distinctive because of its original tone chamber and artistic case designs, but in a short time, President Otto Schulz announces, they will be equipped with a special record filing system, which will render them especially desirable from this viewpoint.

Miller's Withdraws From Business

Miller's, which has been one of the principal talking machine shops of the South Side for the past several years, has been withdrawn. Mr. Miller has joined the sales force of the Mandel Manufacturing Co. The business, which was located at 1223 East Sixty-third street, was discontinued about November 1, and part of the assets of the concern were bought by the Woodlawn Phonograph Co., located at 1314 East Sixty-third street. The latter concern was established by R. R. Rundell and his associates about two months ago.

New Mandel Bros. Department Busy

Mandel Bros. department store, which recently opened a new department on the ninth floor for handling phonographs and records, is at present enjoying an exceptionally good busi-

in a real good automatic stop that works every shot on every kind of machine and on every kind of record?

I am not going to sell this stop to every Tom, Dick and Harry. I want people that are able to buy in quantities. I know a good thing when I see it and I have the exclusive sale for the best and only good automatic stop that was ever put on the market, bar none.

If you want a cracker-jack talking point and one that makes good, drop me a line.

You won't have to make excuses when you use this stop. I have had experience with others, I know.

The price is *small*. The value is big.

If you are not rated, please do not write me, as I have no time for pikers. Are you going to get this good thing or are you going to let your competitors beat you to it? It is known as the "Sure-Stop" Automatic Brake.

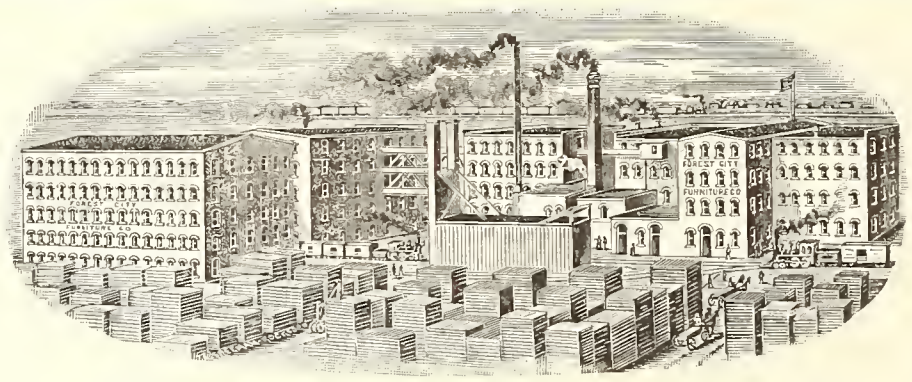
In writing state how many you can use a year.

Better write today before the output is all sold.

United Phonograph Parts Company

HENRY T. SCHIFF, President

ROCKFORD ILLINOIS



ANNOUNCEMENT

H. T. SCHIFF, formerly president of the Vitanola Talking Machine Co., has accepted the management of the Forest City Furniture Company, of Rockford, Illinois.

It is the intention of the Forest City Furniture Company to manufacture a complete line of the very highest grade phonographs. Also record and player roll cabinets—novelties in the phonograph line, etc.

Watch this space in the near future. I have some wonderful propositions in the phonograph line. Entirely different from anything ever shown.

We are in the market for motors, tone arms, sound boxes and phonograph hardware and everything pertaining to the phonograph business. Anyone interested in the above kindly send samples and lowest prices in first letter. We buy quantities.

Address all correspondence to the

FOREST CITY FURNITURE CO.

HENRY T. SCHIFF, President

ROCKFORD, ILLINOIS Chicago Office: 3248 W. 16th St.

ness. Miss Peters, manager of the phonograph department, who has had considerable experience in the talking machine business, and who's last connection was with Hillman's department store, states that, although in existence but a few months, the phonograph department is already commencing to feel the general shortage of machines. She reports a lively demand for the new Mandel phonograph. Mandel Bros. handle the complete Columbia line of machines and records, and in addition carry the Mandel and Stewart talking machines.

Melophone Office Reports Good Business

Louis M. Heymann, who a short time ago, opened a Chicago office for the Melophone Co., at 1216 Heyworth Building, reports an excellent business, and predicts that the remaining months of 1916 will be record-breakers. Mr. Heymann is satisfied that Chicago will prove a fertile field for the handlers of the Melophone line.

Early Orders Get the Goods

Wade & Wade, manufacturers of Wade fibre needle cutters, in a letter to their trade urged the placing of orders immediately to meet the holiday demands. The firm state that they are doing all they possibly can to give the customers the promptest deliveries that conditions will permit, and urge that their friends cooperate with them to the extent of anticipating their requirements, and thus avoid delay and possible disappointment.

A $200,000 Incorporation

The Fort Dearborn Music Co., of Chicago, has been organized with a capital stock of $200,000. The organizers are Ephraim J. Garrett, Clarence T. Edwards and Thomas Makiernan, according to the papers filed with the Secretary of State of Illinois. No information seems to be available as to whether this company will engage in the manufacture of talking machines or not.

Cable-Nelson Store Enjoys Good Business

The retail store of the Cable-Nelson Piano Co., located at 959 Milwaukee avenue, is doing a very good business according to T. M. Harris, the newly appointed manager, who comes from St. Louis, and has had considerable experience in the talking machine field. The Pathé line is being handled. Five large demonstration booths have been built for that department.

Open New "Talking Machine Shop"

The Talking Machine Shop, which has been conducted by G. W. and C. L. Davidson for the past several years on the fourth floor of the Steger Building, is now established at 234 South Wabash avenue, in the heart of Piano Row, where it occupies an entire four-story building. The first and second rooms are used for showrooms, demonstration booths and record libraries; the third floor is devoted to stock and office rooms, and the fourth contains stock rooms and repair shops. The basement, also, is used for storage purposes. In the front

Reception Room, First Floor, Showing Demonstration Booths

of the building upon the first and second floors are spacious reception rooms, where customers can make themselves at ease and examine the various styles of Victrolas that are placed about the rooms. Directly off the two reception rooms are the demonstration booths. There are fourteen of the latter, stretching back towards the rear of the store, all well-sized, well finished compartments. The reception rooms and the demonstration booths are decorated with panelwork in ivory and a delicate pink. A special ventilating system has been installed in the building which provides fresh air at all times for the occupants. A large shaft leads

Second Floor of New "Talking Machine Shop"

the air from the roof, through heating devices that warm it and distribute it about the building. The show window of the Talking Machine Shop is commodious and very well arranged. A number of late Victor records are displayed to good advantage, together with two of the more expensive Victrolas. The exterior of the building is now being repainted. The passerby upon the street is greeted by a large colored electric sign stretching far out above the sidewalk and bearing the legend "Victrolas" in large letters. The Talking Machine Shop has an efficient sales force of young men and women, experienced in the business. There are thirty employes in the building. The Davidsons, it will be remembered, were among the first to introduce the personal service idea into the selling of talking machines.

Open Talking Machine Department

The new retail Victor talking machine department, of the Cable Piano Co., was opened

And the Tone DOES Come Right Out

Watching the Music Come Out

"Ooo! You can just SEE the music come out!" Says Little Maggie, the Magnola Girl.

That's what you will say, too, when you first hear *Magnola Tone*.

THE marvellous *clearness* and *cleanness* of its reproduction lead many others besides little girls to make the same remark about the Magnificent

MAGNOLA TALKING MACHINE

Cramped, smothered sounds eliminated.

Plays *all* makes of records without extra attachments.

Volume of tone controllable at will.

Best designed, best looking, best finished cases.

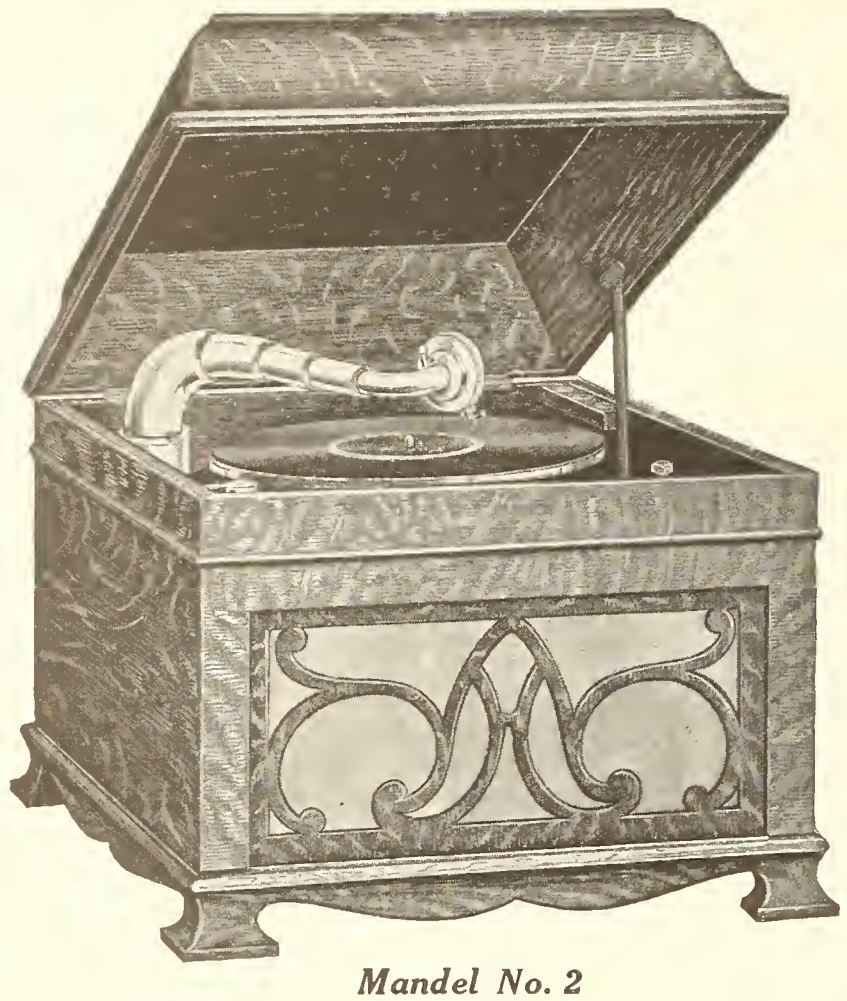
LET US TELL YOU ALL ABOUT OUR DEALER PROPOSITION

Magnola Talking Machine Company

OTTO SCHULZ, President

711 MILWAUKEE AVENUE, CHIGACO

Easy Sales and 100% Profit



Mandel No. 2

on the MANDEL Line

Dealers—here's your opportunity to connect up with the livest phonograph proposition on the market to-day. Get this straight.

WE CONTEND

1st—We've got competition beaten on quality.

2nd—Our goods sell for half the price of others.

3rd—You make 100% on each sale.

What does this mean to you?

It means (1) that with the Mandel Line you would get your share of phonograph business on sheer merit, on quality of the phonograph itself. We believe that no better-looking, better-playing phonograph has ever been built.

It means (2) that the Mandel retail price of $35 will certainly draw a lot of trade your way. People are now asked to pay $50 to $75 for Table Models not one bit better—they will come to you to save money.

It means (3) that the large margin of profit (100%) and the large number of sales will give you greater returns in actual CASH PROFITS than other lines you could tie up with.

ISN'T THIS THE Best Proposition Ever Put Up to the Dealer?

Look this proposition squarely in the face. With these facts before you, you cannot afford to pass it by. We make it easy for you to accept. Just write us that you are interested and we'll immediately mail you full particulars of our free trial offer. We'll gladly send you either one or both of the models shown here for a free demonstration without obligation to you. Let the MANDEL Phonograph play and talk for itself. Compare it with any machine in design, general appearance and tone quality—even with phonographs costing double the money, and then decide whether or not you want to handle our line.

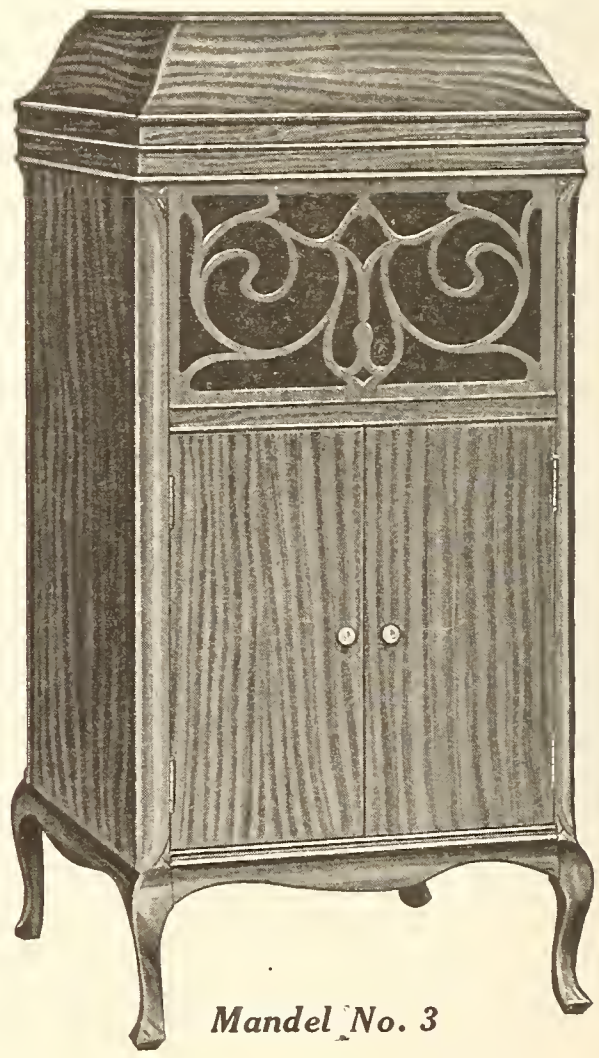
The Mandel Table Model, No. 2—regular retail value $50 to $75. The Mandel retail price only $35.

The Mandel Floor Model, No. 3—regular retail value $150 to $200. The Mandel retail price only $100.

Both these phonographs answer the demand for a high-grade phonograph at a low price. This is your chance to get in on the ground floor. It opens BIG SALES opportunities that you can't afford to pass up.

Write For Free Trial Offer Today—SURE

This offer comes direct from us, the manufacturer. We employ no salesman, no jobbers. Saving on selling costs enables us to quote you rock-bottom prices which net you 100% profit on our line. Write for full particulars at once. This is undoubtedly the Greatest Factory-to-Dealer phonograph proposition ever made and merits your instant consideration.



Mandel No. 3

The Mandel Manufacturing Co.

501-511 S. Laflin Street **Dept. H.** **CHICAGO, ILL.**

NEW YORK DISPLAY ROOMS, 41 UNION SQUARE

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 79)

this week. The department occupies quarters with a frontage of forty feet on the main floor of the Cable Building on Jackson boulevard. They have been fitted up beautifully for the purpose. The woodwork and the demonstration booths are all in white enamel trimmed in mahogany. There are nine commodious record demonstration booths and two large machine salesrooms, while the balcony is devoted entirely to machine display and sales. The record stock and sales counter is located in the center of the room, and is admirably arranged for quick sales. The manager of the department is P. S. Ridgway, who for eleven years was with Sherman, Clay & Co., and for the last eight years in charge of the wholesale and retail store at Seattle.

Department Stores Planning for Holiday Trade

Prosperous conditions in the talking machine business are nowhere so well reflected as in the phonograph departments of the large department stores. The pulse of the shopping public, the men or women who do the buying for the home, is constantly flowing through them. On a tour through the city's largest stores it was discovered that in almost every talking machine department preparations are being made for the handling of a greater volume of business than has ever been anticipated in years past. Over half of the stores visited are taking on more salespeople in anticipation of the late fall and holiday business.

Rothschild's department store is at present remodeling its talking machine quarters and promises to have an excellent environment in which to receive customers. The Rothschild talking machine department occupies an unusually large floor space to accommodate its large stock of instruments. Manager Dvorak has recently added a number of new salespeople, among whom is Miss Helen Wiley, formerly in the talking machine business in Marion, Ill.

R. A. Hicks, manager of the talking machine department of Hillman's department store, states that they intend taking on new salespeople in the immediate future. Hillman's has had marked success with the Christmas Club method of marketing holiday goods. Fifty cents a week is collected from the purchaser over a period of time during the fall and holidays, then a week before Christmas the machine is delivered. The phonograph department of Hillman's is one of the best arranged of those in Chicago department stores. They handle the Victor and Columbia lines.

The Boston Store's talking machine department is already doing a lively business, especially in the smaller sized models. A considerable business is also reported in foreign records.

The Fair's talking machine department, of which Harry D. Schoenwald is manager, has also had a business that indicates a wonderful record for the entire year and for the coming holiday season in particular.

Mr. Eaton, manager of the talking machine department of Siegel & Cooper's Department Store, is at present placing strong emphasis on the record department of the business. A very large number of late records have been placed on display with a few small talking machines placed handy for the use of record buyers.

New Quarters of Adam Schaaf Co.

Adam Schaaf is now located in the company's new building at 311 South Wabash avenue. The new talking machine department on the third floor of the building is a model one in that it is commodious and completely equipped with everything that provides for the comfort of the purchaser and salespeople. There is a large hall in the front part of the building where a number

(*Continued on page* 82)

CHICAGO TALKING MACHINE CO.'S NEW SERVICE IDEA

New Dealers' Service Room an Outcome of Years of Effort of This Company to Help Victor Dealers Better Conditions of Their Business and Increase Profits

CHICAGO, ILL., November 7.—"Our dealers' service room is just the natural outcome of our many years of effort to help Victor dealers better the conditions of their business and increase their profits," said Griffith P. Ellis, assistant sales manager of the Chicago Talking Machine Co., in this city, and who is in charge of the service and efficiency department of that company.

"A good many years ago," continued Mr. Ellis, "we realized the necessity of maintaining relations with our dealers in such a way that they would have confidence in our judgment and accept our advice in matters pertaining to the general policy and conduct of their Victor business. We could only grow in proportion to the ability of our dealers to expand and elevate the tone of the talking machine industry.

"It meant that our interests were inseparable—we had to look far beyond the few dollars involved in their orders at that time. We had to work together and help each other. Our interests did not conflict in any way—in fact, they were identical. It was simply up to us to devise ways and means to give our dealers the help which they had a right to expect from us.

"First of all, then, we had to think of ways to get the records off a dealer's shelves that we'd tried so hard to put there. We knew we couldn't be giving a dealer that full measure of service which we were determined he was entitled to from us, unless we went a step further and helped him merchandise his goods. We knew, too, that these plans had to be practical, and must bring returns with the lowest possible expense to the dealer. As we look back on our efforts now, we find we didn't quite come up to our own expectations in every respect.

"But some of our suggestions were good. They made money for our dealers, and we felt we were on the right track. So we kept plugging away, giving the dealers the benefit of our rapidly growing experience, and many of our dealers loyally trailed along with us—trying some of our suggestions—passing up others—but on the whole, very well satisfied with the sincere effort we were making to be of a real help to them.

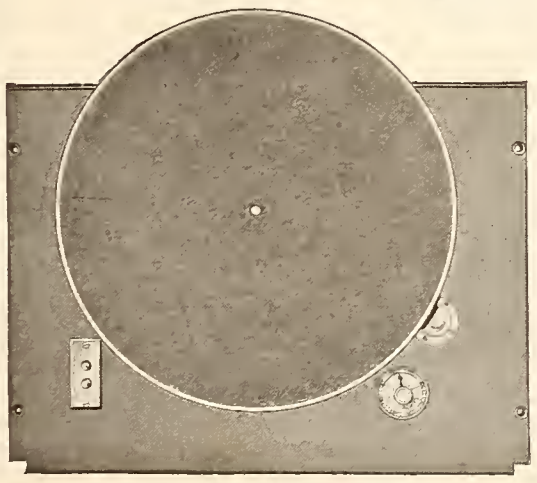
"As the years went on, we found our dealers were depending more and more on our sales suggestions. So we started in to give them pamphlets on how to get business, how to develop what they already had and, in short, how to make $2 grow where they were getting only $1. We put out special lists, circulars, pamphlets, advertising schemes, plans for systematizing their business, and dealers' helps of all kinds. This end of our business became so large and so important that we had to enlarge our organization and detail this work to those especially trained for it. That was the start of our service and efficiency department. From that time on, this department grew steadily in size and importance. Dealers began coming in to consult us about their business—to discuss the policy of their merchandising methods.

"Our wide knowledge of retail conditions throughout the country, and especially in Chicago, where the Victrola business is gone after probably more intensively and aggressively than any spot in the country, was also a tremendously big factor in enabling us to work out successful plans for increasing Victor business.

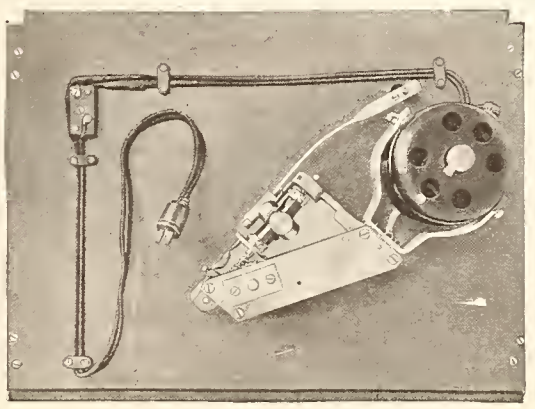
"As our sales schemes and campaigns for enlarging a dealer's record business increased, and our dealers' interest grew correspondingly, we found it necessary to go a step further and provide a special room where we could show specimens and samples of our numerous sales and efficiency items. That's how we evolved our dealers' service room. We're ready for our dealers now. We have this beautiful, well equipped room where our dealers can come in and talk over all their individual problems with us, and get the benefit of our wide experience in the Victor business—an experience extending over the entire period of the Victor's history.

"So far as I can learn, we are the first and only distributors in the country to devote a room exclusively to supplying service and efficiency helps for Victor dealers. We hope dealers will flock in—they can't come too strong for us. It makes no difference whether they buy $100 worth or $100,000 worth of goods a year from us, they'll all be equally welcome, and we'll give them something to think about anyhow in connection with their business, whether they approve of all of our suggestions or not. And if we can do that—stimulate a man's mind and make him think out his own problems—we'll be perfectly satisfied with the investment this dealers' room represents."

The "PLAY-RITE" Electric Motor



View From the Top



View From Bottom

earned its name by its performance. It plays right. It never fails. It's built for durability.

It is inexpensive to operate—less than a cent a week. What more can you ask?

The price is only

$12.50

State whether for use with alternating or direct current.

American Phonoparts Co.
212 S. Wabash Ave. CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 81)

of expensive machines are placed for inspection of visitors. In this hall there is also placed a long glass-covered counter where records can be displayed, wrapped and sold, and which connects directly with record shelves that extend back to the rear of the store. Eight large booths extend back from the salesrooms, four on either side with a smaller hallway running between. The booths are finished in ivory and constructed largely of glass. Each booth contains two or three comfortable chairs and at the side there is a bell button that enables the customer to summon a salesperson from the front of the store when he or she has finished playing a record. The interior decoration of the new quarters is in ivory and light yellow. The appearance of the inside of the entire building is best described as modest and artistic.

Besides the large hall and demonstration booths upon the third floor, there is considerable space at the rear devoted to a repair room for both the talking machines and pianos of the company. Also on the main floor in the rear there has been set apart a recital hall which will be used principally for talking machine recitals. The basement of the building and a part of the fourth floor are devoted to store rooms. The efficient and modern methods throughout the establishment are especially worthy of note.

Hyde Park Shop Changes Hands

W. William Winberg, formerly proprietor of the Hyde Park Music Store, located first at 5101 Lake Park avenue, and now at 1401 East Sixty-third street, has sold the business to Arthur Byre, of this city. Mr. Byre will continue the business at the same location and under the same name.

Reports Increased Business

Manager Aylesworth, of the Julius Bauer & Sons Co.'s talking machine department, reports a greatly increased business in the Sonora line. Mr. Aylesworth has placed two new men on his staff of outside salesmen, and intends taking on another one in the very near future. He secures his prospects himself, largely through the aid of customers who have purchased Sonora talking machines and who are enthusiastic about them. Mr. Aylesworth, unlike many of the Chicago dealers who have been doing a great business the past few weeks, has now a fully adequate supply of machines for his future trade.

Pathé Sales Increasing

Harry K. O'Neil, manager of the State Street Pathephone Shop, states that the demand for Pathé machines and records has gone far in advance of the supply obtainable. He states further that his concern is doing only one-third of the business possible could more machines and records be obtained.

Personals and Visitors

C. F. Tinker, who has succeeded Mr. Ginsburg as manager of the new Victor talking machine department of Wolf & Dessauer, Fort Wayne, Ind., was a recent visitor. Mr. Tinker was formerly for four years with the Eclipse Musical Co., of Cleveland, O., and afterwards with the Pathé agency in that city.

Among the visitors the past month were the

THE VITANOLA

Floyd Walter Adams, manager of the Victrola department of the Cable Piano Co., Flint, Mich., who visited the city last month, reported a "spectacular" business in Flint.

R. J. Von Fossen, of the Von Fossen Music Co., Beardstown, Ill., and Mr. Simon, of the Simon Bros. Co., Gary, Ind., were visiting dealers in town recently.

L. C. Schrader, of Schrader's, Music House, Escanaba and Ishpeming, and C. L. Fisher, of the Fisher Music Shop, Kalamazoo, were Michigan dealers who visited the Chicago trade last month.

Fred Gennett, secretary of the Starr Piano Co., was a recent visitor from Richmond, Ind.

Hartman Out of Phonograph Co.

C. A. Hartman, who some time ago took over the general management of the new Majestic Phonograph Co., resigned the first of the month. His successor has not yet been appointed. B. B. Blood, who continues as president, announced that the company is planning considerable expansion and activities in the near future.

The Widney Co. Busy

The Widney Co. are now nicely settled in their extensive new factory at 318-322 South Jefferson street, and are in a better position than ever to take care of the demands of the talking machine trade for turntable felts, bumpers, etc. The company has a fine stock of felts, especially adapted for turntable purposes, and their facilities for producing goods of superior quality is being clearly appreciated by the trade as shown by the liberal orders from talking machine manufacturers from all over the country.

New Talking Machine Shop

H. Wechter has opened warerooms at room 430 Republic Building under the name of the Music Master Talking Machine Shop.

New Columbia Assembling Plant

The Columbia Graphophone Co. has leased the five-story building at 16-22 South Peoria street, and will establish a large assembling and distributing plant in it. H. A. Budlong, assistant manager of the works department, arrived from the East the first of the month, and in company with H. A. Yerkes, district manager, closed negotiations for the new building. The building is well adapted to the purpose for which it is to be used, and under Messrs. Budlong and Yerkes' direction will be equipped and fitted in such a fashion as to attain the maximum result from the 45,000 square feet of floor space. Mr. Budlong is equipping it with all the necessary machinery, and as a result Columbia dealers are expected to enjoy a vast improvement in deliveries.

This is one of the first steps taken in a movement upon the part of Eastern manufacturers to establish factory facilities in the Middle West, and Chicago was chosen because of its unequaled transportation facilities and its central position.

Some Good Edison Promotional Work

Madam Marie Kaiser and Philip Scheib, who have been appearing regularly in the work of tone re-creation recitals, have added Edison dealers in all parts of the territory contiguous to Chicago. Some of the many cities in which they have spread the fame of the Edison Diamond Disc are Kalamazoo, Savannah, Clinton, Monmouth, Pontiac, Tegtmeier, Kankakee, Paxton, Freeport, Flint, Loyola, Michigan City, Elgin, Aurora and Blue Island.

C. E. Goodwin, manager of the Phonograph Co., local Edison jobbers, is in the East. He will spend some time visiting his mother at Ithaca, N. Y., and will also visit the Edison factories at East Orange, N. J.

John Rogers, manager of the traffic department of Thos. A. Edison, Inc., was in Chicago the early part of the month.

One of the visiting Edison dealers was Mr. Rahn, of Schoenberg & Rahn, St. Joe, Mich.

R. P. Kiep, of Joliet; George H. Fleer, of Elgin, and Mr. Seaton, of the Seaton Piano Co., Aurora, were Edison dealers in from nearby cities.

A. H. Heller, of the Heller Furniture Co., of South Bend, was an Edison Hoosier in town a short while ago.

Three of the new Edison dealers are A. Burman, 5749 West Chicago avenue, Chicago; C. W. Huckleberry, of Albion, Ind., and Towle & Meyer. The latter partnership operates a large department store at Clinton, Ia. Howard Wigell, who was formerly with the Phonograph Co., of this city, is in charge.

Record Manufacturing Co. Projected

F. W. Matthews, who has been connected with the talking machine trade for a number of years, and who has had experience, particularly in record manufacture, is said to have made connections with a new record manufacturing company that is to be organized by Middle Western interests in the near future. Recording laboratories will probably be established in the East, but the pressing plant and general headquarters of the concern will be located, it is said, in Chicago.

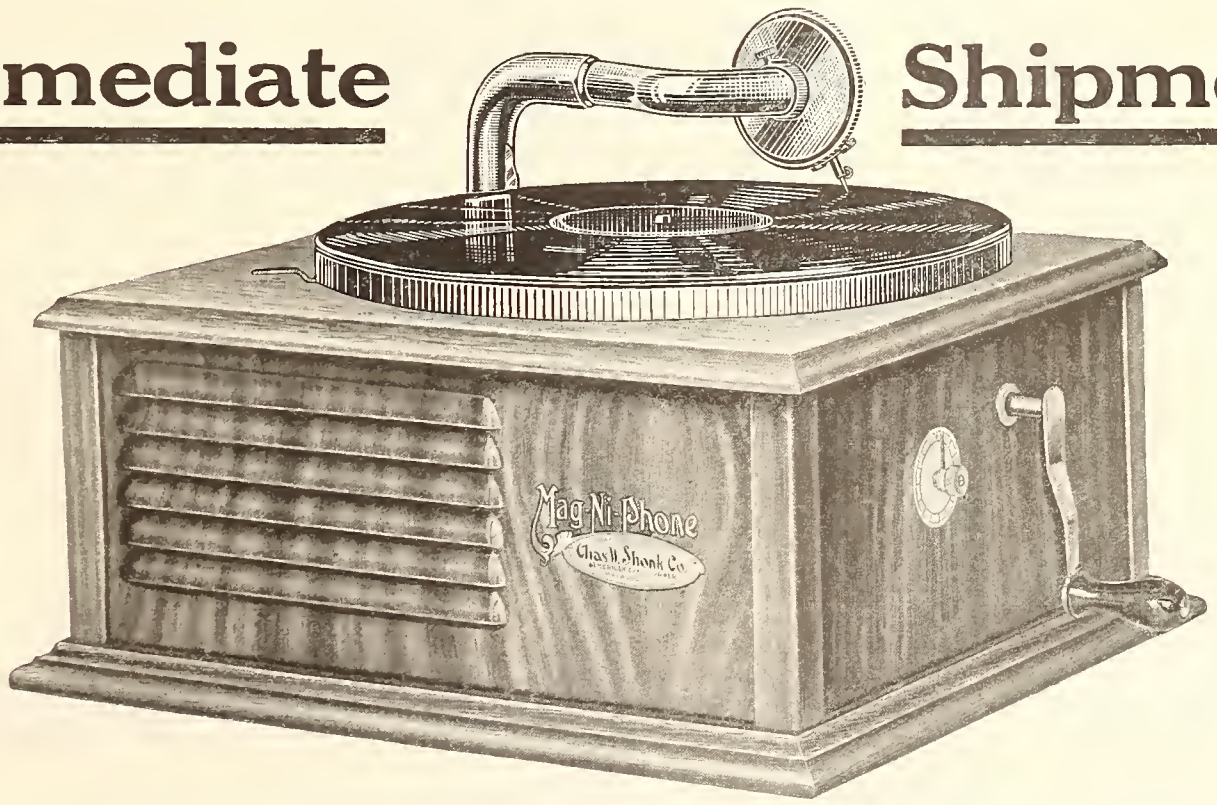
Columbia Heads in Chicago

John A. B. Cromelin, general manager of the Columbia Graphophone Co., was a distinguished visitor in Chicago recently. Mr. Cromelin arrived the latter part of October for the purpose of making a general inspection of conditions in the Middle West, and conferring upon the subject of the Chicago assembling plant of

(Continued on page 84)

Immediate Shipments

Mag-Ni-Phone



The Talking Machine that "Speaks for Itself"

Several months ago we realized that commencing with the Holiday Season there would be an enormous demand for Talking Machines: therefore we purchased large quantities of material. Send in your **RUSH** orders **NOW:** They will be filled the day received. **Retail Price, $15.00**

Price to Dealers:

1 to 4 Machines, $10 each 5 to 9 Machines, $9.50 each
10 or more, $9 each

F. O. B. Factory Terms 30 days less 2% for cash in 10 days.

We have a very interesting proposition to submit to merchants who will handle the Mag-Ni-Phone in an enthusiastic way, and can also offer an exceptional opportunity to those not handling Talking Machines and who can sell the Mag-Ni-Phone in connection with a record service which we can get for them.

The Selling Agency for the Mag-Ni-Phone will be a valuable asset for any business to have and it will be to your interest to write us about it **TO-DAY.**

CHAS. W. SHONK COMPANY

American Can Co., Owner

707 St. Charles Street **Maywood, Ill.**

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 83)

the Columbia Co. Accompanying him was W. C. Fuhri, manager of sales in the United States. Mr. Fuhri was pleased to once more visit the quarters that he had so long made his home, and was pleased to see that every thing was going so well.

Louis Sterling, manager of the European interests of the Columbia Co., was also in the city, and reported that despite the war business in his territory was active.

S. H. Nichols, manager of Columbia wholesale sales in the Pittsburgh district, was also a visitor.

To Represent Acme Co.

The R. E. Ellis Engineering Co., 549 Washington boulevard, Chicago, has made arrangements whereby it will represent the Acme Die Casting Corp., of Brooklyn, N. Y., in the West. F. A. Ruger, who has represented the Acme Co. in the past, will continue in charge of the work, working out of the office of the Ellis Co. Mr. Ruger will have access to additional facilities, and promises his patrons better service than before.

Opens New Store

E. A. Sayer, who has conducted a Victor department in his drug store on Grove avenue, Elgin, Ill., recently leased a large adjoining storeroom, and opened it up as an exclusive Victrola music and small goods store. The formal opening was Wednesday, November 1. An excellent program was given by local talent, and the store was crowded during the entire afternoon and evening. There are eight record rooms and a large machine display room. The new store will be conducted under the name of the Elgin Music Co.

Predicts Big Future for Electric

J. G. Roberts, of the Chicago Metal Products Co., is one of the most enthusiastic of the supporters of the electrically-driven talking machine. "There is absolutely no doubt in my mind," said he, "of the future of the electric. It is going to be the big development of the trade within the next few years. I say this not only from my own knowledge of conditions, but also because of the big interest that almost every manufacturer displays when the subject of a really good electric motor is broached. We are getting orders for our 'Electrophone' motor from all over the country, and our trouble lies not in a lack of sales opportunities, but in a lack of manufacturing facilities. Of course, we are improving this phase of our business as rapidly as possible, and hope to be able soon to fill at least a portion of the orders on hand. If anyone doubts the future of the electric motor let him put one on the market, that is, a good one, and he will soon be cured of the idea. We are now considering contracts to supply manufacturers in 1917, and our business next year will be limited only to our output."

E. C. PLUME RESIGNS

As President of the E. C. Plume Co.—Succeeded by Edward Andrew

CHICAGO, ILL., November 5.—E. C. Plume, president of the E. C. Plume Co., creators of newspaper advertising copy and direct mailing literature for the piano, talking machine and other trades has resigned. He retains his stock and will act chairman of the board of directors. He is succeeded as president by Edward Andrew, president of the Nash-Wright Grain Co. B. L. Kelly, who has been secretary of the company since its inception, has been elected secretary and general manager.

There will be no change in the policy of the company. Mr. Plume, who has been in ill health for some time, will leave next week for Atlantic City for a much needed rest, after which he will consider the matter of his future field of operations. His long connection with the wholesale talking machine business prior to engaging in the advertising business may be taken as an indication of his possible decision.

GEO. P. BENT CO. TO MAKE TALKERS

Bent Piano, Music and Phonograph Co., Incorporated in Chicago This Week With That End in View—Mr. Bent's Statement

CHICAGO, ILL., November 8.—Notice of incorporation of Bent Piano, Music and Phonograph Co., of Chicago, with capital stock of $5,000, appeared in daily papers to-day, the incorporators being given as George P. Bent, Alfred Beck and Isadore Becker. George P. Bent, president of Geo. P. Bent Co., in speaking of the matter, would make no statement other than that the organization was formed to take over the manufacturing end of George P. Bent Co.'s business. "I cannot go into details now," said he, "but will have further information to give later on. All I can say is that we may ultimately make phonographs in addition to pianos and player-pianos, and also probably produce our own player actions. Of course, the capital stock is only nominal, and it is needless to say that the company will have plenty of money."

CONCERTS HELP PATHE SALES

MUNCIE, IND., November 6.—The W. A. McNaughton Co., of this city, one of the leading mercantile institutions in eastern Indiana, has been achieving very pleasing success with its recently opened Pathé department, which is under the management of Harry E. Paris. The company is featuring the Pathephone and Pathé discs in a high-class, energetic manner.

Last week a Pathé Pathephone concert was given by the W. A. McNaughton Co. under the auspices of the St. Vincent De Paul Aid Society. Mr. Paris personally supervised all details incidental to the concert, which attracted a capacity audience. It is planned to give similar concerts in the near future, and it is safe to predict that Mr. Paris' efforts to popularize the Pathé line will be well rewarded, as he is not only an enthusiastic admirer of Pathé products, but is also a musician of considerable renown.

IT SELLS ITSELF AT $35.00

A big cabinet machine, rich mahogany finish.
Stands 35 inches high, 17½ inches deep and 15½ inches wide.
Storage room for three albums of records.

JOHNSON MOTOR CO. FORMED

Wm. G. Schaff, E. C. Johnson, H. D. Griffith, and Others Interested in Company to Market Electric Motors for Talking Machines

The Johnson Motor Co. has been formed with offices and factory at 3233 West Lake street, Chicago, and New York offices at 767 East 133rd street, for the purpose of manufacturing the drive and assembling it with an electric motor which will be manufactured by the General Electric Co., and available for use in talking machines. The company has been formed by Wm. G. Schaff, who is also head of John A. Schaff, well-known piano string house, with factories in New York and Chicago, E. C. Johnson, head of the Chicago factory of John A. Schaff, and H. D. Griffith, sales manager of the Simplex Player Action Co., Worcester, Mass. Associated with the manufacturing department of the company are Philip B. Woodworth, dean of the Lewis Institute, Chicago, and Walter G. Gardner, formerly prominent in the railway supply business.

The inventor of the motor is J. M. Johnson, who among other achievements perfected the fare box for street cars, and the Johnson coin counting machine, which is used by the United States Treasury Department in Washington and at sub-treasuries in various cities. P. B. Woodworth, who has charge of the engineering department of the Lewis Institute, was recently Commissioner on phonographs at the Panama-Pacific Exposition, and is engineer for the United States Gypsum Co., also an expert on sound transmission and elimination of noise in motor driven mechanisms. Walter G. Gardner was for ten years president of the Gardner Wire Co., and also associated with the American Brake Shoe & Foundry Co., New York City.

The association of Messrs. Schaff, Griffith and E. C. Johnson as directors of the sales of the Johnson motor will in no manner change or affect their activities in the lines with which they have been identified for so many years. They are simply investing capital and lending their experience as directors of sales.

On January 1, Mr. Griffith will move to Chicago to represent the Simplex Player Action Co., in the West, and will devote his entire time to the marketing of the Simplex player action, and the Johnson Motor Co., in the territory west of New York State.

GREAT COLUMBIA BUSINESS

October Biggest Month in History of Company —W. C. Fuhri Pleased With Conditions in Western Territory Which He Recently Visited

October was the biggest month in the history of the Columbia Co., exceeding by a large margin the sales totals of September, which had been the previous banner month. This applies to both Grafonolas and records, and the record situation is particularly gratifying in view of the fact that every one of the new record plants is working to capacity to keep pace with orders. There is a shortage of Columbia Grafonolas in practically every style and finish.

W. C. Fuhri, United States manager of the Columbia Graphophone Co., New York, accompanied by Louis Sterling, general manager of the company's European interests, returned Monday from a Western trip, which included a visit to all the Columbia wholesale divisions as far as Kansas City, Mo. John A. Cromelin, general manager of the company, accompanied Messrs. Fuhri and Sterling as far as Chicago, when other matters necessitated his attention. Mr. Fuhri also called upon a number of Columbia dealers in the Middle West, and his reports of conditions in this territory indicate the closing of a record-breaking Columbia business that is only limited by the amount of product available.

LATEST VAN VEEN INSTALLATIONS

Arthur L. Van Veen & Co., New York, manufacturers of Van Veen demonstration booths, have just completed installing a battery of booths for the new Columbia department opened by George B. Clark & Co., Bridgeport, Conn. This department is one of the most attractive in its locality.

Another installation of Van Veen booths was recently completed for the Sonora Phonograph Corp. in its new warerooms at 279 Broadway, New York. This makes the third contract finished by Van Veen & Co. for the Sonora Phonograph Corp., indicating the satisfaction the Van Veen booths are giving.

J. P. BRADT BACK FROM A REST

James P. Bradt, general sales manager of the Columbia Co., returned to his desk last week after a three weeks' stay at Atlantic City. Mr. Bradt is in good health and spirits, but may leave shortly for the West to recuperate fully from the effects of his recent over-exertions.

SECOND ANNIVERSARY OF VOCALION

Introduction of the Aeolian-Vocalion Two Years Ago Featured in Advertisement

The Aeolian Co., New York, carried an interesting and attractive advertisement in last Sunday's newspapers featuring the Aeolian-Vocalion. This advertisement was headed "November," and called attention to the fact that this month marks the second anniversary of the introduction of the Vocalion.

The copy included illustrations of some of the popular types of standard Vocalion designs, and also a reproduction of an art style Vocalion. An invitation was extended to the public to visit Aeolian Hall at any time for informal demonstrations of the Vocalion.

RICCA & SON EXPAND

Ricca & Son, Pathé distributors, have leased a one-story building on East 134th street, directly opposite their piano factory at 115 Southern boulevard, which will be used as an assembling and finishing plant for their talking machine business.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912,

Of The Talking Machine World, published monthly at New York, N. Y., for October 1, 1916.

STATE OF NEW YORK,
COUNTY OF NEW YORK, ss.

Before me, a Notary Public, in and for the State and county aforesaid, personally appeared August J. Timpe, who, having been duly sworn according to law, deposes and says that he is the Business Manager of the Talking Machine World, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:
Publisher—Estate of Edward Lyman Bill, Caroline L. Bill, Executrix, Rochelle Park, New Rochelle, N. Y.
Editor—J. B. Spillane, 373 Fourth avenue, New York City.
Managing Editor—J. B. Spillane, 373 Fourth avenue, New York City.
Associate Editor—J. Raymond Bill, 373 Fourth avenue, New York City.
Business Manager—August J. Timpe, 373 Fourth avenue, New York City.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent or more of the total amount of stock.) Caroline L. Bill, Rochelle Park, New Rochelle, N. Y.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholders or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is.....(This information is required from daily publications only.)

AUGUST J. TIMPE,
Business Manager.

Sworn to and subscribed before me this 14th day of September, 1916.

(Seal.) EUGENE R. FALCK,
Notary Public, 1053.
(My commission expires March 30, 1918.)

Columbia Records TRADE MARK Note the Notes

HENRY T. SCHIFF MAKES A CHANGE

Former President of Vitanola Co., Becomes Head of Forest City Furniture Co., Rockford, Ill., and Other Important Concerns

CHICAGO, ILL., November 9.—Henry T. Schiff, one of the organizers of the Vitanola Talking Machine Co., of Chicago, and its president, resigned his position November 1 to take the presidency and general management of the Forest City Furniture Co., of Rockford, Ill., a

Henry T. Schiff

$200,000 corporation of that busy manufacturing city in northern Illinois, and in which he will be the principal stockholder. He also becomes head of the Rockford Phonograph Co., and the United Phonograph Parts Co., of Chicago and Rockford. Although he will devote all his time to his new activities Mr. Schiff will retain his interests and certain activities in the Vitanola Co., and the American Phonoparts Co.

The Forest City Furniture Co. plant is one of the largest factories in Rockford, with over two million square feet of floor space.

Henry T. Schiff has been engaged in the talking machine business practically all his life. He says he was destined for it inasmuch as he was born in 1876 on the very same day that Thomas A. Edison was granted some of his principal patents on the cylinder phonograph. Since that time he has been closely identified with the trade, and has achieved much, not only from an inventive standpoint, but in the direction of commercial attainments. During the past two years he aided in building up the Vitanola and American Phonoparts interests from a comparatively small beginning to the position of two of the leading concerns in the industry. He has acquired interests in numerous other companies. He now stands at the threshold of what should be a new and important step in his career, and he now has at his command vastly increased facilities. At the big plant in Rockford his three companies will not only turn out high-grade talking machines of many designs and sizes, but will also manufacture phonograph parts and record cabinets as well as cabinets for the general music trade. One of the principal accessories which he has already placed upon the market is the "Sure Stop" automatic brake, a new and very simple little device, which he claims completely solves the more or less troublesome problem which has confronted the trade in this direction in the past. It is very small and very simple, and those who have seen it say that it never fails to effect an immediate stop of the turntable, so with a minimum of trouble and preparation.

Mr. Schiff will make his headquarters at Rockford, but will also have offices in Chicago as well as the East. For the present he is making his Chicago stopping place at 3248 West Sixteenth street, where he may be reached. Backing Mr. Schiff and his new enterprises are some of the most prominent bankers and financiers of the State.

Mr. Schiff starts off with the intention of conducting his business on the most liberal policies. He announces that he will be glad to entertain new inventions of every kind, as he plans to incorporate into the products of his factories every worthy improvement.

"I have had considerable experience myself with inventions," said he, "some of them turned out fortunately for me and others bitterly, and I realize the difficulties that are thrown in the way of the man who sincerely believes he has an improvement, but whose difficulty lies in getting a hearing. To this class of people in the industry I am not going to turn a deaf ear, as I am out to equip our goods with every additional feature that is of proven value. I do not mean by that they will be fitted up with every bit of clap-trap that is conceived, but with new features—and there are going to be many of them—that go to constitute genuine improvement. I am in the market for materials of the best grade both in metals and woods and finishes. Any new ideas of construction that supply men can furnish me with I would be very glad to receive. Supply men form a factor that is to be reckoned with. It is possible for them to aid a manufacturer greatly, for they are specialists in their business, and I am going to endeavor to give all the time possible to them and their ideas."

The Echophone Sales Co., of Elizabeth, N. J., has been incorporated for the purpose of manufacturing talking machines with a capitalization of $100,000.

The Manophone

The Music Master of Phonographs

"There's a Manophone for Every Home" from $15 to prices that provide for the most luxurious cabinets. The prices of the models shown above are $15, $30, $50, $75 and $100. Other unusually distinctive designs are now being completed to sell from $150 and up.

If a person wants a phonograph there's a Manophone at the price he can afford to pay.

Dealers who handle the Manophone line will know no limitation.

In the Manophone, *the tone's the thing.*

Because of its scientifically constructed sound chamber—known as the "Music Hall" of the Manophone, it possesses a tone that is truer, clearer and sweeter than any other phonograph on the market. This exclusive innovation represents the life-work of inventors whose aim it was to create the *all melody* phonograph. While others were *talking* tone, we have been *perfecting* it.

In addition to its magic melody, the Manophone possesses many other features that make it the last word in phonographs. Briefly, some of these are:

The Silent Motor—that runs easier and longer.

The Tone Control—that enables one to regulate the tone to meet their mood, to really play the Manophone.

The Universal Tone Arm—that plays all makes of disc records. This means complete pleasure for the customer—and sells more records for you.

The Manophone Guarantee—accompanies every sale and assures permanent pleasure and good-will.

A National Advertising Campaign

The merits of this new phonograph are now being advertised in *nineteen* of the leading magazines reaching a total of *several millions of readers.* These advertisements are directing the reader to the Manophone *Dealer*—where they can hear the Manophone play.

You can represent the Manophone in your locality if you will act promptly.

Territories are now being closed with dealers everywhere. Write us at once for our Agency proposition. *Your store* should be the showroom for this *better* phonograph.

Sign your name to the coupon, and attach it to your letterhead. By return mail we will give you full details, without obligation. Address Dep't. R-11.

FINE EXHIBIT AT STATE FAIR

Wassermann-Gattman Co., Sacramento, Make Elaborate Columbia Display

SACRAMENTO, CAL., November 1.—One of the attention compelling exhibits at the recent State Fair in this city was that of the Wasserman-Gattman Co., local Columbia representatives. The display which is illustrated herewith was under the direction of W. Z. Pay, manager of

Wassermann-Gattman Co.'s Exhibit

the Wasserman-Gattman Co., department, and in addition to being pleasing to the eye also produced practical results in the way of sales, four grands alone being sold during the week. The general business of the company at its showrooms is of a most satisfactory volume. The only cloud on the horizon at present is the likelihood of a severe shortage of both machines and records during the holiday season.

PRICES OF SUPPLIES GOING UP

"The situation in the raw material market is rapidly assuming serious proportions," said Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, who returned recently from a Western trip. "Steel, copper, zinc and coal are becoming scarcer day by day, and we would urge talking-machine manufacturers to anticipate their 1917 requirements as much as possible, and place their motor contracts now in order to be sure of deliveries during the coming year."

STEGER & SONS IN NEW VENTURE

New Factory of Company to Be Devoted Solely to Making of Talking Machines

Steger & Son Mfg. Co., Chicago, have invaded the talking machine field. An announcement made this week by C. G. Steger, president of the company and son of the founder, says the new factory of the company in Steger, Ill., will be devoted to the manufacture exclusively of the Steger talking machine.

The company is at present putting out 30,000 pianos a year and intends to avail itself of its vast manufacturing facilities and national channels of distribution in putting the new product on the market. The machine will be given to the public within a few weeks.

FRANK K. DOLBEER'S NEW POST

Frank K. Dolbeer, formerly credit manager of the Victor Talking Machine Co., and one of the best-known members of the talking-machine industry, has been elected treasurer of the Willys-Overland Co., one of the country's leading automobile manufacturers.

Mr. Dolbeer numbers among his personal friends talking-machine jobbers and dealers throughout the country, for prior to joining the Victor Talking Machine Co., he was associated with Thomas A. Edison, Inc., for many years. He is generally recognized as an executive of rare acumen, and in his new position will have many opportunities to exercise his unusual business knowledge and ability.

J. H. Maloney, of South Barrington, Mass., has taken the agency for the Columbia Grafonola, and will install a complete stock of machines and records.

WORLD BRINGS FOREIGN ORDERS

Worldwide Circulation of Talking Machine World Has Results That Surprise Advertisers—What J. B. Ogden Has to Say

A fact that has served to impress advertisers in The Talking Machine World for years has been the large widespread foreign circulation of this publication which goes to practically every part of the civilized world, and which is proven by the inquiries from foreign parts received by advertisers. In this connection J. B. Ogden, head of the Ogden Sectional Cabinet Co., Lynchburg, Va., makes the following interesting comment in a recent letter: "I feel proud of The Talking Machine World because it brings us foreign inquiries, which can be turned into sales, in spite of poor transportation and high freight rates. No doubt this is an old story to you, as the whole world seems to be putting its good dollars against your space evidently believing it a good investment."

CELEBRATE FOURTH ANNIVERSARY

Allen & Thede Hold Special Fall Opening at Their Store in Tulsa, Okla., to Mark Event

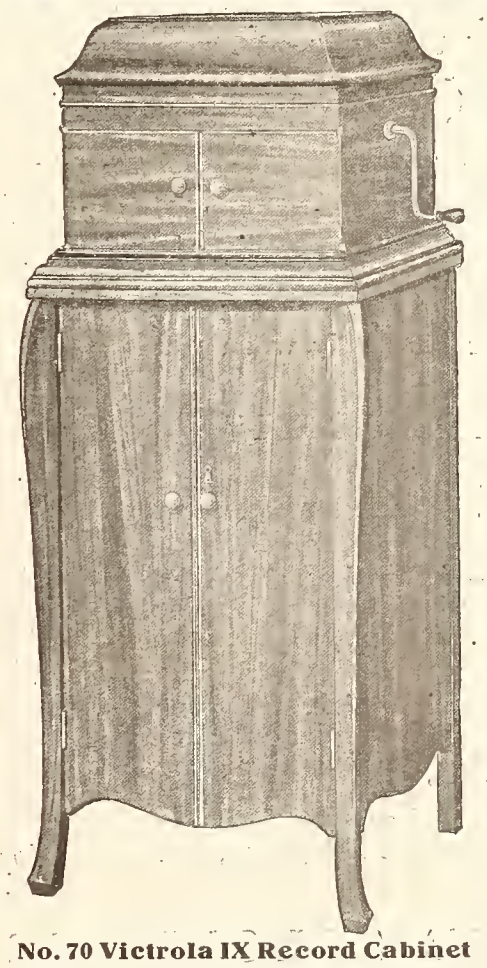
TULSA, OKLA., November 6.—Allen & Thede, who for the past four years have handled Victrolas and records exclusively at 110 South Main street, this city, recently held a special fall opening celebration to mark their fourth business anniversary. The store was handsomely decorated with chrysanthemums and ferns, and special Victrola concerts were given both afternoons and evenings for two days. Each lady visiting the store was presented with a carnation, and gentlemen were given cigars.

Allen & Thede recently received fifteen of the higher-priced Victrolas in one shipment, and got some excellent advertising out of the fact by having the front of each case removed so that each instrument could be seen and lining them all up along the sidewalk in front of the store.

The Herzog Catalog De Luxe

Admittedly the finest record cabinet catalog published is now available for dealers, and the possession of a copy only awaits your request. It should be in your hands at once—you can't afford to be without it.

A great shortage of cabinets is an almost certain possibility this season, and we urge you to anticipate requirements and order your cabinets early. We'll take care of you if you order NOW.



No. 70 Victrola IX Record Cabinet
The novel top arrangement proclaims this new cabinet a great seller. Ask for quotations.

Convincing evidence of the superior design, construction, workmanship and finish of HERZOG talking cabinet is apparent from the fact that fully seventy-five per cent of the trade handle only HERZOG cabinets. These four cabinet essentials are unquestionably best exemplified in HERZOG record cabinets—Quality cabinets thru and thru for all makes of talking machines.

Herzog Art Furniture Co., Saginaw, W. S. Mich.

The New Solophone

The MASTER PHONOGRAPH

Model 90
Solophone

"Why Do You Think We Ought to Buy It?"

WITH the coming of a new phonograph, your prospects are naturally going to ask, "Why do you think we ought to buy it? What makes it different?" We want the public to ask these questions. Because the Solophone gives its dealers a *better chance to answer them conclusively, convincingly*, than dealers in any other phonograph ever had.

The new Solophone *is* the master phonograph because it plays any make of record in a way that makes the prospect *prefer the Solophone* to the machine for which the record was made. And because it plays all makes of records equally well—without cumbersome attachments.

It makes good on these claims absolutely when you apply the

SOLOPHONE "CURTAIN TEST"

This test is the most daring ever devised to demonstrate the superiority of a phonograph. It will soon be known to all America. Here it is:

Choose your favorite records—of all makes. Behind a concealing curtain play those records on the machines for which they were originally made. And play them on the new Solophone.

Without telling which machine is which, ask your audience to choose the best. On this verdict, whether rendered by a group of metropolitan music critics, or by one of your prospects and his family, we are willing to stake the success of the Solophone. We made thousands of such tests before we announced the Solophone, and we are confident.

The Solophone has other strong selling features. For example, it is the product of a group of experts systematically chosen for supremacy from the greatest phonograph plants in America. The cases were designed by Mr. Walter C. Pitts, one of America's most famous designers of artistic furniture. All exposed metal parts are heavily gold-plated. The amplifier, the tone-arm and the reproducer are made according to *exclusive* Solophone design.

And finally, the Solophone is the Master Phonograph, because part for part *it costs more to make than any other phonograph.*

In a nutshell, we have built into the Solophone the supreme advantages of every American and European phonograph. And we have devised a test that *proves* every claim we make.

Does this kind of selling appeal to you? Then write for more *facts*—mechanical specifications, prices—and details of our *new kind of advertising service* for dealers.

WHAT IS THE FUTURE FOR THE VICTOR BUSINESS

Paper Read by Roy J. Keith, of the Chicago Talking Machine Co., at the Opening of the Emerson Piano House, Decatur, Ill., Offers Some Interesting Information

The subject assigned to me reminds me of the small boy who had been sent to the drug store by his mother to buy 5 cents worth of salts. While the clerk was weighing it out the boy said, "Say, boss, dont' give full weight—it's me that has to take it."

Although Mr. Spayd has received many compliments on his beautiful new store to-day he does not need to hope that somebody will save something nice to say for another day, like the soldier whom I saw at Platttsburg this summer, who one evening after mess found a Salvation Army on hand. The soldier went up to the leader and said, "Say, mister, do you save women?"

"Certainly we do," was the reply.

"Well, mister," the soldier blurted out, "save me a blonde for Saturday night."

We who are in the talking machine business should congratulate ourselves that we have the good fortune to be in the Victor business, for in the talking machine business Victor supremacy is established.

There are no half way measures with the Victor Co.—they have been leaders right from the beginning. They introduced the first hornless machine, the first electric machine, the first lateral cut record.

They have contracted and held right from the beginning the greatest singers, the best bands and the leading orchestras.

They have kept the quality of their goods in the front rank.

They have advertised, even in the face of oversold markets, to an extent that has made their trade-mark now generally conceded to be the best known one before the public. They stand for the one-price principle—the only right and fair way of merchandising standard, nationally advertised goods.

And they have played fair equally with we distributors—you dealers—and your customers.

It's like a beautiful fairy tale—far more wonderful than the tale of Aladdin's lamp—the evolution of the Victrola—the romance of your own business.

Mr. Spayd's new store speaks for what this business, in part, has come to mean in our commercial life—for the Victrola and the piano go hand in hand—a store and a business that Decatur may well be proud of.

For the music business is more than just a business. It's one of the largest and strongest influences in the country to-day to make our lives more worth while—bringing to us all probably more happiness than any other one thing in the world.

And see what the Victor Co. are doing to enlarge and foster this influence—looking always well into the future in the conduct of their business.

I mean the idea of the Victor in the schools—the idea to make a really musical America.

In a short three years Victors have been installed in the schools of over 4,500 cities—the Victor is being played before 12,000,000 school children every day.

There have been no half measures in this undertaking either—the leading authorities in school work, music history and appreciation, folk and country dances have been engaged for this field. No expense has been spared to

reach the children—who will be our future customers—to make the children love good music—to cultivate their musical taste just as the schools have developed a love for good literature.

With the evolution of the Victrola has this been made possible—for only on the Victrola can all the best in music be brought to the children.

To make a musical America—is this not an undertaking of which any concern may well be proud? Are you not fortunate to be engaged in a business that besides making you handsome profits brings the greatest happiness to all the people?

Victor success is attracting many imitators—I cannot say competitors—for so far there are only three other concerns which manufacture both machines and records.

And I suppose you wonder sometimes what it's all coming to— you don't have any chance to worry because you can never get enough Victor goods to fill your orders.

Our problem is to keep up with them—the Victor Co.—to make the most for ourselves as distributors and dealers of the opportunity they are making for us.

And one of the largest problems in our business is the development of our record business.

Show me any merchant who is making a signal success of Victors and I'll show you there a highly specialized record sales department—conveniently located, efficiently arranged and elaborately equipped. I'll show you there sales people who are instructed most carefully in the art of suggesting from a complete knowledge of the Victor record catalog.

You are indeed fortunate to-night in having had an opportunity of hearing so ably from a man who is in charge of the Victor department of the largest music house not only in the country, but in the world, something of how record business may be secured.

Some people in the talking machine business think the record business follows the machine business, but it's just the other way round—the machine business follows the record business. It's the house that's equipped to give the best record service—that gets the machine business, too. What a wonderful opportunity this is—equipped with all the best in music—we may help make a musical America.

HOLD FIRST ANNUAL BANQUET

Members of Electrical Department of the American Graphophone Co. Dine

BRIDGEPORT, CONN., November 5.—Sixty-five members of the electrical department of the American Graphophone Co. held their first annual banquet at the Hotel Lorraine last Saturday evening. Music, speech making and vaudeville formed part of the evening's program, which was thoroughly enjoyed by all present. The committee in charge of the banquet consisted of A. B. Bedford, chairman; L. F. Goergen, F. T. Jackson, L. S. Brown, F. G. Porter and E. T. Traynor.

MME. BARRIENTOS WITH COLUMBIA

Noted Coloratura Soprano Signs Exclusive Contract to Record for Columbia Graphophone Co.

The Columbia Graphophone Co., New York, announced this week that arrangements had been consummated, whereby Mme. Maria Barrientos, one of the world's leading coloratura sopranos, is added to the company's library of artists, Mme. Barrientos having signed an exclusive Columbia contract.

Mme. Barrientos is famous throughout the world, her operatic successes having been achieved in Milan, Paris, London, Petrograd, Buenos Aires and Barcelona. Her premiere in "Lucia" at the New York Metropolitan Opera House last January was one of the sensations of the year.

Mme. Barrientos' first Columbia record, which goes on sale December 10, includes selections from her first New York success, and her wonderful voice shows to excellent advantage in "Silence O'er All," and the waltz song from

Mme. Maria Barrientos

Gounod's "Mireille," while the coloratura perfections in the "Mad Scene" aria from "Lucia" are well calculated to please the most discriminating musician or music-lover.

Like Lazaro, the famous tenor, who became a Columbia artist a few weeks ago, Mme. Barrientos is a product of Spain. Gifted with a voice of sensational range, and unusual powers of modulation, Mme. Barrientos is a most valuable addition to the Columbia Co's fast-growing library of world-famous artists.

SOME FINE SONORA ADVERTISING

Sonora Phonograph Corp. Uses Full Page in Rotogravure Section of New York Times

The Sonora Phonograph Corporation, New York, carried in last Sunday's Rotogravure section of the New York Times, one of the most artistic full-page advertisements which has been used by a talking machine company in the local newspapers for some time. This advertisement featured the three local retail showrooms of the Sonora Phonograph Corporation, and formally introduced the new Sonora warerooms at 279 Broadway, corner of Reade street, which were opened on Monday of this week, under the management of Thos. F. Delaney, Jr. The other Sonora warerooms in New York are located at 668 Fifth avenue and 50 Broadway. The Sonora retail business is under the general management of L. S. McCormick, well-known in the local trade.

The text of the page called attention to the distinctive tonal qualities of the Sonora phonograph, and the illustrations included reproductions of the following types of Sonoro phonographs: "Supreme," retailing at $1,000; "Invincible," at $350; "Grand," at $225; "Baby Grand," at $150, and "Imperial," at $100.

TO PUBLISH WEEKLY PAPER

Bridgeport, Conn., November 8.—It has been announced at the plant of the American Graphophone Co. (Columbia Graphophone Co.) that a weekly paper will be published by the company and edited by the employes. This innovation is made with the endorsement of General Manager Hansom, who is enthusiastic over the idea. It is hoped to have the first edition out in the very near future.

The night shift in the company's pressing department is working twelve and one-half hours at a stretch, starting at 6 o'clock each evening except Saturdays and Sundays and continuing until 7 o'clock the next morning with half an hour for lunch at midnight. The night foreman is Joseph Peck. The day foreman is James Cherry.

TEXAS EDISON DEALERS ORGANIZE

Form Permanent Association at Recent Convention in Dallas and Elect Officers—Enjoy Business Talks and Banquet

DALLAS, TEX., November 5.—The Edison dealers in the Texas-Oklahoma zone held their first convention in this city recently at the invitation of the Texas-Oklahoma Phonograph Co., Edison distributor, and in addition to indulging in some helpful business discussions also enjoyed some royal entertainment.

There are about fifty dealers and their wives who registered at the Phonograph Shop October 17, and after a visit to the Texas State Fair returned to the shop for the purpose of enjoying a demonstration of the Edison product.

On October 18 the dealers met in the Chamber of Commerce and Manufacturers' Auditorium and organized a permanent association to be known as the T. O. E. D. (Texas-Oklahoma Edison Dealers). The association started off with a membership of thirty-five and the following officers: L. H. Walter, Hillsboro, Tex., president; L. C. Curlin, Waxahachie, Tex., vice-president; J. R. Harrison, Durant, Okla., second vice-president; H. R. Hancock, Dallas, Tex., secretary-treasurer, and E. F. Carroll, Waco, Tex.; L. F. Mallow, Ladonia, Tex., and B. Heyer, Fort Worth, Tex., auditors.

On the evening of the second day the visiting dealers were the guests of the Texas-Oklahoma Phonograph Co. at an elaborate banquet at the Oriental Hotel, where the dealers were welcomed by Louis Lipsitz, president of the Chamber of Commerce, and were addressed by A. P. Burns, territorial supervisor of Thos. A. Edison, Inc. A. H. Curry, president and general manager of the Texas-Oklahoma Phonograph Co., and other executives of that concern, as well as by a number of their own members.

'NOSET' AUTOMATIC START AND STOP

Placed on the Market After Five Years' Experiments—Embodies Many Unique Principles—Nothing to Get Out of Order

After five years of experimentation in its laboratories, the Condon Autostop Co., 47 West Forty-second street, New York, has announced as ready for the trade its "Noset" automatic start and stop, which may be used on all types of talking-machines. Edward T. Condon, Jr., the inventor of this unique device has been busily engaged the past few years in making the "Noset" thoroughly dependable in every respect, and the acme of simplicity.

The "Noset" is complete in its entirety, with no extras, and can be attached to a talking machine without any inconvenience, requiring merely the removal of the turntable and present brake and then being fastened to the motor board. It is sightless when attached, as it is located under the turntable of the machine. Mr. Condon states that absolutely no attention need be given the "Noset" after it is attached, as it automatically releases the turntable when the needle is swung into position, and in turn when the needle is in the last groove of the record "Noset" automatically stops the motor. No alteration of the tone arm or any other part of the machine is necessary.

Mr. Condon is well-known throughout the talking-machine trade, and in perfecting the "Noset" automatic start and stop, he is furnishing the dealers with a device which is the only one of its kind in the market, and which will be retailed at a nominal price in order to permit dealers an opportunity to sell it to every customer on their books. He has paid particular attention to the materials used in the construction of the "Noset," securing the best quality obtainable, and as there are only two working parts, friction has been minimized, and there is nothing to get out of order or to be repaired.

INCORPORATED

The Columbus Talking Machine Co., Columbus, O., has been incorporated with capital stock of $10,000 by Arthur Weldon, Lewis M. Smith, Frences Weldon, Albert H. Harwick and A. L. Harwick.

Individual Service!

We endeavor to give our dealers personal service that is based on their individual requirements. Victor dealers have different problems to solve which require different solutions, and it is our aim to help them along practical lines.

Backed by Experience

The suggestions we offer our dealers are backed by experience, for every member of this organization is a practical Victor man. We have made a careful study of the Victor record situation, and are equipped to give our dealers 100% service and personal assistance in developing their record business.

May we not serve *you*?

G. T. Williams Co., Inc. *VICTOR WHOLESALE EXCLUSIVELY* **217 Duffield St., Brooklyn, N. Y.**

MOTOR DELIVERY SERVICE

Recently Started by the New York Talking Machine Co. Now in Active Use

In order to give its dealers maximum service in the delivery of Victor records, the New York Talking Machine Co., New York, Victor distributor, has recently added a motor delivery service, one unit of which is shown herewith. This motor truck is now in active use, and a number of Victor dealers have commented very favorably upon the company's initiative in providing for maximum efficiency in record deliveries.

New York Talking Machine Co.'s New Motor Car

For some time past the city salesmen associated with the New York Talking Machine Co. have been equipped with automobiles, and only recently two Dodge Bros. roadsters were added to this equipment. This progressiveness has added materially to the salesmen's efficiency, as it enables them to cover their territories more adequately and thoroughly, and give Victor merchants 100 per cent. service.

The success of the new record motor delivery seems assured, and it is planned to cover not only city territory with this tiuck, but the adjacent territory as well, so that all Victor merchants in this section may be served by this speedy method of record delivery service.

ORDERS FROM ALL PARTS OF WORLD

"Repeat orders for our products are being received from members of the talking-machine trade from far off Australia, India, Japan, and in fact, from all points of the globe," said B. D. Mulligan, manager of the Rene Manufacturing Co., Hillsdale, N. J., who returned recently from a Western trip. "The Talking Machine World has produced remarkable results for our company, and seems to be read with great interest by every member of the talking-machine trade.

"In my opinion, there is going to be a tremendous dearth of raw materials in the very near future, but we foresaw this crisis some time ago, and prepared ourselves accordingly. We have increased the capacity of our steel spring department, and have recently added a sound-box department, which promises to be very successful."

BUSH & LANE MAKE "TALKERS"

HOLLAND, MICH., November 8.—Visitors to the factory of the Bush & Lane Piano Co., of this city, are very enthusiastic regarding the new Bush & Lane talking machines. There will be four models ranging from $75 to $200 in price. They show striking originality in case design. The $100 and $150 models will be ready for shipment very shortly. The $200 model is somewhat on the Empire order of architecture with a curved surface, dome-like top, harmonizing with the rounded pilasters of the case. President Walter Lane's long experience as a acoustician is shown in the tone chamber construction, which is along original lines. Mr. Lane has also invented two different models of automatic stops.

NEW SCHLOSS BROS. CABINET

Latest Addition to Popular Line Matches New Columbia Grafonola 15

Schloss Bros., well-known manufacturers of talking machine cabinets at 637-645 West Fifty-fifth street, New York, have added many styles to their line, as they were warranted by the demands of the trade, and all of them have been most successful. The latest model, No. 502, is designed particularly for the new Columbia Grafonola 15, and has already been ordered in quantities by the dealers who have seen it. The new cabinet is shown herewith with the machine in place. The cabinet is finished in either golden oak or mahogany to match the machines. The new cabinet is ready for immediate delivery in quantities as desired.

Schloss Bros. Style 502

Paul Rudert, a jeweler of Tarentum, Pa., is credited with the invention of a new system of reproduction for talking machines.

MAJESTIC

PRAISE NEW LABORATORY

Quarters of the Emerson Phonograph Co. in New York Admired for Acoustic Properties

The Emerson Phonograph Co., which recently moved its recording laboratories from the tenth floor of the building at 3 West Thirty-fifth street to the fifth floor, has heard many expressions of approval from visitors who have been greatly impressed with the unusual acoustic properties of the laboratory.

Victor H. Emerson, president of the Emerson Phonograph Co., and an acknowledged acoustical authority, was responsible for the choice of this laboratory, and his many years of recording experience stood him in good stead in selecting this location. Mr. Emerson spent several weeks touring every available building in the city, when the Emerson Phonograph Co. decided to open a New York laboratory, and finally selected the tenth floor of the building at 3 West Thirty-fifth street as ideally suited to his needs. A short while later he chanced to pass through the fifth floor of the building, and was surprised to find that this floor responded even more satisfactorily than the upper one to his acoustic tests. He accordingly moved the laboratory to the fifth floor, and the results of this move are evidenced in the success being achieved by the latest Emerson records.

ATTRACTIVE AEOLIAN AD

The Aeolian Co., New York, carried an interesting and attractive advertisement in the Sunday newspapers featuring the Aeolian-Vocalion. This advertisement was headed "November," and called attention to the fact that this month marks the second anniversary of the introduction of the Vocalion.

The copy included illustrations of some of the popular types of standard Vocalion designs, and also a reproduction of an art style Vocalion. An invitation was extended to the public to visit Aeolian Hall at any time.

Mrs. Mabel Stabel will shortly open a store for the sale of talking machines and records on Rover road, Edgewater, N. J.

ENLARGING VICTOR DEPARTMENT

Lord & Taylor Store to Have Seven Additional Demonstration Rooms, Making Twenty-three Now in Use—Gratifying Holiday Outlook

The Victrola department at the Lord & Taylor store, New York, is now in the hands of carpenters and masons, and when alterations are completed, the department will have seven additional demonstration rooms, making a total of twenty-three rooms devoted to the display and sale of Victrolas and Victor records. This department is probably one of the largest in the country, and additional facilities for expansion are at hand to be used as the occasion may require.

H. E. Speare, manager of the Lord & Taylor Victor department, speaks enthusiastically of the holiday outlook, stating that sales the past few days have been unusually pleasing, particularly during election week. Among recent Victrola sales at the warerooms was that of a Victrola XIV, with a representative library of Victor records to the U. S. S. "Arizona," the largest steamship afloat.

FACILITIES GREATLY INCREASED

"During the past few weeks, we have sold our regulators to some of the most successful talking machine dealers in the country," said Dr. R. E. Faldl, of the Rowland Sound Regulator Co., New York, and inventor of this device. "The most gratifying feature of our sales has been the large number of repeat orders, which to our mind, is the surest indication of the satisfaction which our regulator is rendering. We have increased our factory facilities materially, and expect a large holiday trade."

HOW TO CONDUCT A RETAIL TALKING MACHINE BUSINESS

The Subject of a Paper Read by L. C. Wiswell, of Lyon & Healy, Chicago, at Opening Recently of the New Emerson Piano House in Decatur, Ill.

Mark Twain was right when he stated that it is the difference in opinion which makes horse racing. A difference in opinion exists everywhere, especially so in the talking machine business.

"How to Conduct a Retail Victor Business." There are many different opinions as to the proper way to conduct a talking machine business, but if one's opinions are sound and well thought out along the right lines, the chances of failure are remote.

In conducting a talking machine business there should be, the same as in every line of business, plans, well defined and well thought out. We are told by historians that in the building of King Solomon's Temple there were well defined plans; for instance, there were hewers of stone, bearers of burdens and overseers of the work, or managers of the several departments of the Temple. We would not go amiss in patterning after this wise patriarch of old, for if we will do as he did, first plan our business, dividing it into several departments, placing in charge of these departments competent persons and afterwards plan systematically, wisely and carefully a business building campaign, we will be on the right road to success.

Suffice for the discussion this evening I will divide the Victor retail business into three departments—executive, machine and records.

The executive department should be carefully considered. Proper sets of books should be opened, for it has been well said that simple, correct, well kept books are as necessary to the conduct of a business as the compass is to the mariner: without a compass the mariner is liable to drift upon the rocks of the sea, and without a proper set of books the business of any organization, whether it be talking machine or what-not, is liable to drift upon the rocks of our commercial sea.

For the sake of time I am going to treat the layout of the machine and record departments as one. These two departments should be planned with a number of thoughts in mind. First, and most important, you should have, according to the size of your store, a number of sound-proof demonstrating rooms, say fourteen by fourteen feet in size, for the demonstration of machines, and smaller rooms, nine by nine or nine by twelve, being the proper size, for the record rooms. The rooms should be laid out in keeping with the construction of the store, so as to give the best possible appearance; also the rooms should be set back a distance from the entrance so as to leave sufficient space for a reception room where a number of Victrolas can be displayed. It has been well said that the first impression the customer receives upon entering a store is generally the lasting impression, therefore, it is necessary that the store be so planned and decorated as to make a favorable impression upon the customers as they enter.

Having planned the layout of the store our next step is that of engaging help. To my mind the help question is very important, if not the most important point in the conducting of a retail talking machine business, for in no other business that I know of is there more need of courteous, agreeable and well trained salespeople. Have you ever entered a store to make a purchase and be received by a slovenly dressed salesperson who had a grouchy, pessimistic expression on his face; one who acted as though he did not care whether he made a sale or not, and who greeted you with the statement, "What do you want?" What were your feelings? Did you not feel as though you would like to right about face and seek to make your purchase elsewhere? It is this kind of a salesperson, and the woods are full of them, that are not wanted in the talking machine business. In no other line do you depend so much upon the continued come-back of your customer as you do in the talking machine business, for when you have sold a machine you have just begun to do business with the purchaser of the machine. They should all come back to you to purchase records from time to time, hence the necessity of the first impression being the favorable and lasting impression. I will not try to define the character of the salesperson that should be employed in the retail talking machine business other than to say that they should be of good personality, good address, have a good command of the English language, musically inclined and have at least some business ability. No doubt it is hard to find salespersons with all these talents, still if you can select people who have pleasing personality, good address, and with some business ability you can easily train him or her into the kind of salesperson you want them to be. Many employers make the mistake when engaging help to engage the first person to apply. You should engage help with the same discretion, same care, sifting, so to speak, the chaff from the wheat, as you do in considering some great undertaking.

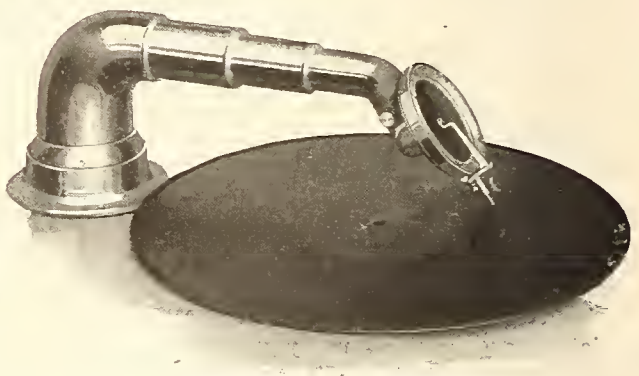
Our next point is that of how to get the business. Much can be said upon this point, as there are many ways of getting business. There is the newspaper, circularizing and billboard advertising summed up into the words "printers' ink"; also there is the telephone. By the way, the telephone is being used as a business getter more and more each day, and last but not least, and in many respects very important, the concert—the giving of daily, weekly or semi-monthly Victrola recitals—is one of the most important features in the proper conduct of the retail Victor business. I have had considerable experience with concerts, and am positive in my statement that they pay and pay big.

The next step in conducting a retail talking machine business is that of service and co-operation. One might have a well planned, well

In Position for Lateral-Cut

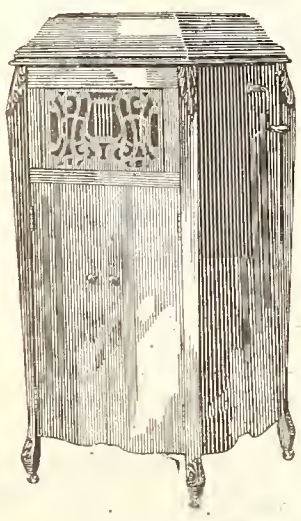
Here Is a Universal Tone-Arm That Is a *Tone*-Arm!

Here is a tone-arm and Reproducer combination that is not merely adjustable to either position but which does it without sacrificing *tone* or the principles upon which the different records are made.



In Position for Hill and Dale

Playerphone — The Quality Talking Machine



We supply this combination to responsible manufacturers who are looking for something in this line of real merit. In supplying these goods we will protect the purchasers in every respect. This company is in a position to fulfill every guarantee.

appointed store, excellent location, spend lots of money in advertising, etc., but if the employes fail to give courteous service to the customer and fail to co-operate with the management in conducting the business, then all of the efforts put forth, all of the money spent is gone for naught. Without courteous service and co-operation, a business, no matter how well planned, how solidly financed, will surely fail.

There are many features which contribute to business success. Everyone who is connected with a business enterprise, whether it be porter, office boy or salesman, is either contributing to the upbuilding of that particular concern or is helping to its defeat through contributory acts in some way or other. How is he or she doing it? Either by courtesy or discourtesy. I believe that this truth is but little understood, and less appreciated by the heads of many important business organizations. Take the delivery man, for instance, if he is surly or discourteous he is creating a force which operates distinctly antagonistic to the firm for which he works, and no one can tell just how far that influence will reach. Some delivery men are courteous and tactful and aid in the good will of the firm, while others who are surly and rude help to break down the patronage.

Have you ever considered the power of the telephone as a business building foree, and that the telephone operator of an establishment gives a good or bad impression of the house by her conversation over the wires? People naturally reason that the telephone operator's tone represents, in a sense, the treatment of the establishment towards a customer, and the attitude of the operator reflects the attitude of the employers. There is where the telephone, like the delivery man, may be made a very large business building force. Extreme courtesy can be earried to the minutest point, and as a tactful and intelligent business building force the powers of the telephone are tremendous if worked properly. Right here let me say that the using of the telephone in the building up of your record business is of wonderful value. If your salespeople would call up their customers on the 'phone and say, "Why, Mrs. Jones, you haven't been in for such a long time, so I thought I would call up and inquire if you would like to have me send out some of the records that are new since you were last in the store." I know of concerns who are pursuing this method and are building up quite a profitable record business.

Competition is said to be the life of modern business, but co-operation is said to be its backbone. Five men working together can lift with ease a steel girder, where ten giants tugging individually cannot budge it. A team, which pulls systematically and together will always win the game against the team whose members, although exerting all their strength, are not working together. The most encouraging sign which points to the upper progress of business conditions is the increased growth of the spirit of co-operation. The greatest faetor in fostering the spirit of eo-operation in modern business industry is the get-together idea. Employers are realizing the value of an organization, animated of the same common impulse, working to the same eommon end, and in many businesses there are held regular meetings of the entire force at which the progress, ideas, aims and designs of the organization are entered into by everyone in attendance. The employer who can obtain co-operation not only from his sales force, but from all connected with the business is surely on the road to success. Co-operation and a sympathy of ideas and purposes between the members of an organization is the lubricant which enables the machine to speed easily and smoothly along the road of modern business to the goal of success. The great progress made by many concerns in the talking machine business in the past few years has been due, in a great measure, to the proper use of that same lubricant, which is best created through the putting into effect of the get-together idea.

THE PHONOGRAPH APPLIANCE CO.

Has taken over the business of JAMES FRAZEE

and will continue the manufacture of "CRYSTAL EDGE" MICA DIAPHRAGMS with Mr. Frazee in charge of the factory at New Brighton, N. Y. Arrangements have been made to fill all orders at the old quotations, but the scarcity of mica of suitable quality for these high-class Diaphragms makes it imperative for us to ask our patrons to limit their orders for a time. Prices will have to be advanced in less than thirty days unless there is a radical change in conditions.

THE PHONOGRAPH APPLIANCE COMPANY

Office and Factory, NEW BRIGHTON, N. Y.

May I not mention here a point which seems to be a bugaboo to the dealer—that of charging interest on deferred sales. It is my opinion that the dealer who does not charge interest on installment or deferred sales is overlooking one of the strongest points of the game. Interest is a legitimate charge, it helps to pay the freight, also helps in defraying the running expenses of the business. Naturally, the amount of interest made is gauged by the amount of installment business done, still no matter how large or small the business, the dealer should always obtain interest on deferred payments. Some dealers say that they can get interest, others say they cannot. It is the opinion of the dealer experienced in getting the interest that it helps to obtain more cash sales, also it has a tendenscy to strengthen the character of installment paper.

Having planned a Victor retail store and outlined in a measure how to conduct it, my remarks would not be complete if I did not make mention of an important point, and one which the person in charge of a talking machine department should be on the lookout for. I refer to leaks. A new point in the philosophy of leaks was gained by the Arkansas traveler, when it was pointed out to him that the leaky roof could not be fixed while it was raining, and did not need to be fixed when the sun shone. That idea might be all right as pertaining to leaky roofs in Arkansas, but it does not apply to the leaks which are bound to exist in a business. One of the curious things about a leak in business is that it continues to leak regardless of the weather, and one of the most profitable occupations to which a dealer can devote himself is hunting for leaks and permanently stopping them. I believe that the evilest of all leaks in the talking machine business is in the record end, when a customer leaves the store without having been supplied to the capacity. I don't mean to load the customer up with records which he does not want, but mean the getting of an order for two or more records when the customer planned to get only one and do it legitimately. Consider the dance records, if you will. If in your record department there is some one person who familiarizes himself with the new dances, he will be able to sell more dance records to a party coming in and asking for dance records than he could if he knew nothing about the art of dancing. You will find in dance records the same as in Red Seal that people ask for those records which they have heard at the home of some friend. Now if a salesperson can out of his own knowledge point out and demonstrate some particular rhythm in other records, in most cases he will succeed in selling more records than the customer originally intended to purchase. If this is done, then there is no leak.

FEATURING COLUMBIA ARTISTS

Commencing with the current issue of the Columbia Record, the newsy house organ, issued by the Columbia Graphophone Co., there will appear a series of photographic reproductions of popular Columbia artists, suitable for display in windows, booths and stores. These special inserts are prepared in such a way that they can be cut apart and framed.

Columbia dealers for some time past have informed the Columbia advertising department that they are receiving numerous requests for the photographs for the popular Columbia artists who are usually represented in each monthly supplement, and it was this demand that prompted the inauguration of this new series. The first photographs to be presented are those of the Taylor Trio and Stellar Quartet.

CARE NECESSARY IN PRODUCTION OF FIBRE NEEDLES

Some of the Details Connected With the Making of That Form of Talking Machine Needle and the Materials That Enter Into it—Only the Best Grade of Bamboo Suitable

CHICAGO, ILL., November 8.—Some idea of the infinite care and detail involved in the production of fibre needles in the perfected form in which they are now supplied to the trade is shown in the reproductions of photographs

F. D. Hall in His Private Office

taken in the factory of the B. & H. Fibre Manufacturing Co., this city, presented elsewhere in this issue.

The ten years spent in the development of the fibre needle and of the mechanical and chem-

Bamboo Used for Fibre Needles
(Compared With Fishing Rod)

ical processes involved in its production by F. D. Hall, the inventor, would make a most interesting story.

It's a record, too, of continual search to get just the right quality of bamboo. When, after much experimenting Mr. Hall, years ago, found that bamboo furnished the ideal material for a needle, eliminating surface sounds and producing no injury to the record, he was only at the beginning of his task. Even after the bamboo of the right character was procured, chemical treatment in order to give it durability was necessary. Process after process was tried and constant improvement was made. Only in the last eighteen months has the present method of treatment been in use. All the ceaseless experimenting before indulged in and the knowledge of the inherent qualities of the bamboo fibre thus gained was, of course, a necessary preparation for the discovery of what has proved the most efficient as well as the most natural method of treatment.

The various treatments that the needles undergo are mainly for the purpose of extracting the "honey" from the cells and replacing it with mineral waxes imparting resilience and preventing the absorption of moisture. Coherence is thus given to the fibre so that it will not fray and splinter. Furthermore, instead of the point wearing away it is simply compressed by the weight of the sound box that it conforms itself to the shape of the groove. If the natural bamboo were used fraying and splintering would be inevitable. The effect of this process on the fibre of the bamboo may be likened to that of the shoemaker's wax on his thread.

Mr. Hall, in speaking of the present process of treatment and its results, said that its efficiency is shown by the fact that the needles being shipped to-day are far superior and vastly different to anything they have ever turned out in the past, the new needles generally playing from four to six ordinary records without repointing.

One of the most interesting of the views referred to shows the assorting department. The system of inspection is very thorough, and is carried on by young women who have been in the employ of the company for years. Mr. Hall states that by actual test less than 1 per cent. of defective points remain after the assorting has been done.

In speaking of the fibre needles, Mr. Hall says, "The fibre needle stands alone in its peculiar class, and is unique in that it conflicts with and comes into competition with no other needle. To the collector of records it is an absolute necessity, as there is absolutely no wear to the records when fibre needles are used."

The two illustrations shown in this connection are very interesting and supplement those presented elsewhere. In the first Mr. Hall is seen in his private office, and through the window in the rear which opens immediately on the laboratory, the factory is seen in perspective.

The other cut shows the bamboo used in the manufacture of fibre needles compared with the ordinary fishing rod. The "fibre needle" poles constitute the very finest bamboo imported into this country. The poles vary in length from eighteen to twenty feet, and from two and one-half to three and one-half inches in diameter. This special bamboo, which is found only in a particular district in Japan, is especially adapted for the fibre needles because the proportion of Silica in the cortex or outer shell is from 20 to 30 per cent. greater than that contained in bamboo of ordinary grades. Ten to twenty thousand of these high-grade and selected poles are imported by the B. & H. Fibre Manufacturing Co. at a time.

The character of the bamboo used by the company has attracted the attention of the U. S. Government, and samples of bamboo raised near the Culebra cut in Panama, in Porto Rico, and even in some of the Southern States have been sent to the company by the Horticultural Bureau. Some of these bamboos are of a very high character, but the output is as yet very limited.

Mr. Hall, by the way, will be most pleased to have any jobber or dealer interested in knowing just how fibre needles are made to call at the factory at the southeast corner of Dearborn and Kinzie streets, and "see for themselves."

The Webber-Knapp factory on Chandler street, Jamestown, N. Y., has built a new addition to its present plant.

M. H. Shalowski is the principal owner of The Phonograph Co., recently organized in Nashville, Tenn., and which has taken over the Edison phonograph and piano department of F. A. Leatherman, that city.

AEOLIAN-VOCALION TWO YEARS OLD

Fact Impressed Upon the Public Through Special Series of Advertisements in the Newspapers and Magazines—Instrument Has Met With Tremendous Success

This month marks the second anniversary of the Aeolian-Vocalion, and in order to bring this fact before the attention of music lovers in this territory and throughout the country, the Aeolian Co. has been using large advertisements in the daily newspapers and national magazines.

In the two years that the Aeolian-Vocalion has been on the market it has won signal success both from an artistic and musical standpoint. In fact, this phonograph has obtained a larger measure of renown than even the Aeolian Co. had anticipated two years ago.

In this issue of The World the Aeolian Co. calls attention to the fact that the Aeolian-Vocalion has been presented at the Court of King Alfonso XIII, ruler of Spain, while in last month's World the trade was informed of the fact that the Aeolian-Vocalion had been presented at the Vatican and commended heartily by His Holiness Pope Benedict XV. The Aeolian Co. was further honored by receiving an official appointment as "Provider to His Holiness."

This royal recognition is the strongest possible tribute to the musical and artistic standing of the Aeolian-Vocalion, and indicates the prestige which this instrument has obtained in the short space of two years.

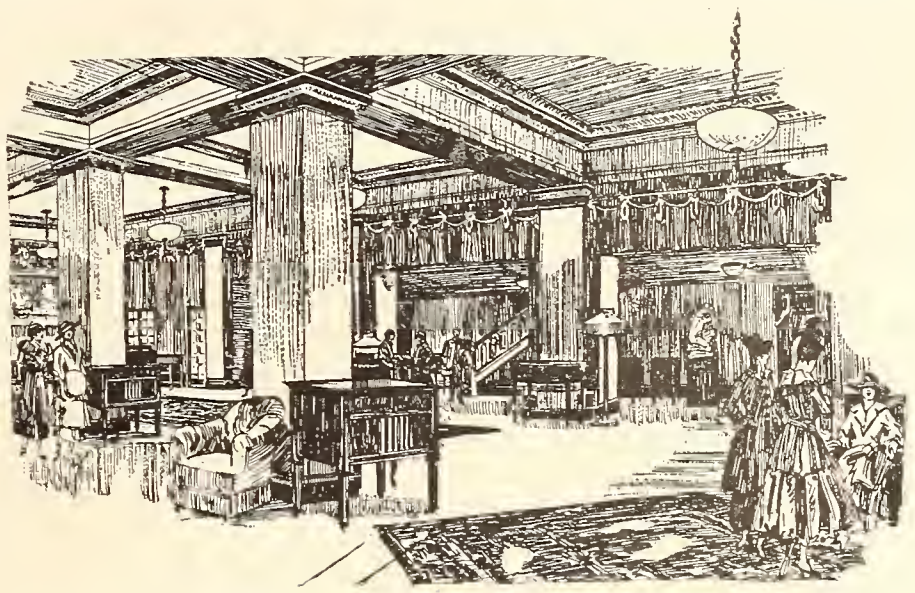
It usually takes about two years for a new product to achieve success in its home community, but the Aeolian-Vocalion has not only been successful in this country, but has won for itself an enviable position in all parts of the world.

From the time that the Aeolian-Vocalion was introduced to the trade two years ago, the Aeolian Co. has carried on a campaign which has placed this instrument before the public as an artistic product rather than a commercial one. Every piece of advertising copy, and every link in the Vocalion merchandising plan has been directed toward impressing the public and the trade with the fact that the Aeolian-Vocalion represents certain ideals in phonograph construction which are distinctive in many respects.

Aeolian-Vocalion dealers throughout the country have been well satisfied with the results of this campaign, and particularly with the splendid returns received from the national advertising that has been sponsored by the Aeolian Co. since the Aeolian-Vocalion was placed on the market. This campaign will be continued along the same lines that has characterized Vocalion publicity for the past two years, and there is no doubt but that this advertising will influence many sales for Aeolian-Vocalion representatives.

A few months ago the Aeolian-Vocalion salons on the third floor of Aeolian Holl were entirely redecorated and renovated for the holiday season, and these warerooms now constitute one of the most attractive talking machine establishments in the trade. These salons are visited by many out-of-town people, who are frequently so impressed with the artistic and musical attributes of the Vocalion in these ideal surroundings that they become valuable prospects for the Vocalion representatives in their home city.

For the coming year the Aeolian Co. has a number of important ideas in mind whereby the Aeolian-Vocalion representatives throughout the country will receive an even greater degree of co-operation than they have during the past year. Sales helps, display matter, etc., backed up by the international prestige of the Aeolian Co., and a far reaching advertising campaign, are included in this 1917 dealer co-operation.



Aeolian-Vocalion Salons at Aeolian Hall

ARTIST'S CONCEPTION OF RECORDS

Carry the Message of Music Throughout the World, Declares Alma Gluck—Represent Great Power for Good Among the Masses

Proof that famous artists who sing for talking machine records have a new conception of the real importance of this work beyond its mechanical features and that they fully appreciate the wonderful possibilities of the talking machine from a purely musical sense was indicated in a recent interview with Alma Gluck appearing in the Home Page of the Evening Mail. In speaking of her talking machine records, which have been wonderfully successful, Mme. Gluck said: and her remarks are well worth more than casual attention:

"Probably few 'city folks' appreciate the boon that the talking machine has been and is to those people who live in small towns all over the world," says Alma Gluck. "Until I joined the forces of the singers who make records I had but a faint idea of the tremendous influence for good that was being done through this mechanical musical instrument. Hundreds of thousands of homes are now familiar with the best of music and with the greatest artists.

"Have you ever noticed how the taste for good things just grows and grows? Not long ago while I was buying some records in a Broadway store where I frequently purchase them, the salesman called my attention to a man who was leaving the shop. He told me that six months before this man bought nothing but 'popular' records, but that now he came in every Saturday and selected one or two really good things and rarely bought any 'rag time.'

"It is a wonderful privilege to be among those who are carrying pleasure and gladness into distant homes. A realization of the responsibility as well as the gratification is brought home to me frequently. Hardly a week passes that I do not receive letters from some far places across the seas thanking me for one song or another that I have recorded.

"Often there is a touch of pathos in the message, and more than once I have wondered to myself, 'how many people in the world are listening to my voice this minute?' It is most bewildering to feel that one is singing all over the world at the same time.

"The public has no idea how difficult it is to make a perfect record. Artists depend so much upon their audiences for inspiration, that at first they are aghast at the seemingly crude mechanism that stares them in the face in the recording laboratory. And the knowledge that one tiny slip will ruin the record does not increase one's comfort of mind.

"You stand facing a rectangular funnel, about a foot from it. Summoning every bit of imagination you possess, you sing into this uninspiring affair, wondering whether or not your voice will be muffled, if the words will be as distinct as you are really making them, hoping that no mistake or accident will occur to mar the record, and fearing every moment that some one may shuffle a foot on the floor or a chair may scrape, or some other stray sound will ruin what you are trying so hard to render perfectly.

"On the concert platform one can call upon so many little gestures, facial expressions and poses to create the atmosphere that makes a song successful, but not so when singing for the relentless talking machine. On the other hand, that is why I consider making records the essence of the perfect art of singing.

"I actually feel closer to my unseen audiences than to those I face in the concert halls; that is, at least in what I might call my detached moments, because so many, many unknown friends write to me about my records, and there is something so very personal in a letter."

Veeco Electric Motors

VEECO MEANS:

1. Efficiency.
2. Durability.
3. Elimination of Motor Troubles.
4. Perfection in Every Respect.

Guaranteed for Two Years

1. The above results were obtained by years of experimenting.
2. The only electric motor for phonographs that has been approved and endorsed by the highest electrical authorities in the United States.
3. Adopted exclusively by some of the largest manufacturers.
4. Our Composition Turntable is in itself a great improvement to any talking machine.

Our large contracts and rapid growth are the proofs of the superiority of Veeco Motors.

We also supply for dealers our Veeco Motors mounted on suitable boards for installation in machines already in use.

We can make prompt deliveries, render excellent service and invite comparison.

WHAT THE ASSOCIATION OF BUFFALO DEALERS HAS DONE

By WALTER J. BRUEHL, Secretary of the Talking Machine Dealers' Association of Buffalo

Like all live wire business organizations the Talking Machine Dealers' Association of Buffalo was organized to maintain the high standard which our respective lines enjoy—to meet and enjoy the good fellowship and friendly competition of our competitors—to adjust and regulate any grievances to the mutual satisfaction and benefit of all concerned—to support all subjects which appear to be for the betterment and improvement of the talking machine business, and to co-operate with the manufacturers and the National Association of Talk-Machine Jobbers.

When the first seeds of organization were scattered around about some fell upon pessimistic ground and were lost, but the majority fell upon rich soil, well fertilized with optimism—took root—grew and are now bearing the fruits of success.

The first and probably the most important business transacted after organizing was the unanimous agreement of all members to charge interest on time sales at the rate of 6 per cent. per annum, and to handle the problem of sending records on approval in a manner that would eliminate such evils as you all no doubt are familiar with. The following are the rules and regulations adopted by our association:

RULES AND REGULATIONS ADOPTED BY THE TALKING MACHINE DEALERS' ASSOCIATION OF BUFFALO, SEPTEMBER 23, 1914

I.

That on and after October 15, 1914, no talking machine be sold on deferred payments extending beyond sixty days, except on contracts bearing interest at six per cent. per annum from date of sale.

II.

Records sent on approval are not returnable if kept in customer's possession longer than three days.

At least one-third of the records sent on approval must be kept by customer.

Records purchased at the store are not returnable for credit or exchange after three days from date of sale. It is further agreed that a slip reading as follows be furnished to dealers at cost, to be inserted with each package of records sent on approval:

Records in any reasonable quantity will be given for home trial, on provision that you agree to assume responsibility for any damage which may occur while in your possession.

It is understood that at least one-third of the records requested on approval be retained and paid for. Customers are requested to make their own selections by catalog number.

TALKING MACHINE DEALERS' ASSOCIATION OF BUFFALO.

The above rules and regulations were printed on a sheet 9½x23 and signed by all members of the association. Then the rules and regulations and dealers' signatures were photographed and each dealer furnished with a framed copy. The value of such an agreement framed and hanging in the dealer's store is obvious. The perfectly legitimate additional revenue realized by charging 6 per cent. on time sales more than defrays the expenses in handling deferred payment accounts.

Wherever machines and records are sent out on approval there is bound to be an element which will abuse the privilege by going from one dealer to another requesting machines and records to be sent to their home on approval without any intention whatever of purchasing same.

In order to curtail these machine and record "Joy Riders," and also to show those who are slow pay and those who have had machines pulled, we arranged a key, or code, and supplied each dealer with one—with the thought in mind that as soon as they discovered machine and record joy riders, machines pulled and slow pay accounts, they furnish the secretary with the information, which in turn would be furnished to all dealers. This arrangement has prevented many joy riders.

The next order of business which was of very serious nature was to regulate objectional methods in advertising and after discussing in open meeting the pros and cons of certain kinds of advertising it was unanimously agreed to adopt the following rules for advertising:

RULES FOR ADVERTISING ADOPTED BY THE TALKING MACHINE DEALERS' ASSOCIATION OF BUFFALO, NOVEMBER 4, 1914

I.

That no talking machines are to be advertised on "NO PAYMENTS DOWN"—but are to be left to the discretion of the dealer.

II.

That no printed matter of "COMBINATION OUTFITS" shall be used.

III.

That no advertising of "FREE CLEANING OR REPAIRING" be permitted. At the same time each dealer will be allowed his discretion regarding cleaning and repairing.

IV.

That no advertising of misleading nature, such as a club or similar plans, be resorted to.

TALKING MACHINE DEALERS' ASSOCIATION OF BUFFALO.

Copies of both sets of Rules and Regulations were printed and furnished to the dealers. The trouble in advertising that we were experiencing came about as follows. A dealer knowing he could not advertise machines at a reduced price would as a matter of inducement to the prospective customer advertise as follows:

Machine	$50.00
$25 cabinet	20.00
12 selections	4.50
Total	$74.50

Of course, this "ad" on the face of it is misleading to the customers because they are laboring under the impression they will receive twelve records instead of six records. Another advertisement along the same lines would appear the next day by a competitor advertising the same $25 cabinet at $18.50 with twelve selections at $4.50, this cutting the price of the outfit $1.50, and so on and so on.

Making allowances on trade-ins is governed so largely by the shrewdness of both the buyer and seller, the make and style machine to be traded in and the price of the machine to be purchased that up to the present time we have not felt the necessity of taking any action on this question.

In regards to arranging minimum terms on machine sales, the good common sense of the dealer has so far prevented him from being penny wise and pound foolish.

The Talking Machine Dealers' Association of Buffalo has been in full swing now for two years. Its members are a bunch of live wires and broad minded enough to realize and appre-

THE "EDMONDSON"

EDMONDSON PHONOGRAPH COMPANY

16-18 Washington Avenue IRVINGTON, N. J.

ciate the amount of good to be derived by working together.

We hold our meetings once a month and throughout the winter, pull off a banquet or two in the good old summer time we have an outing or picnic and we sure do have some fun. We are looking forward to next year's picnic already. There are a number of talking machine dealers who believe in associations, but say that it can't be did in "My Home Town." I say, "Forget it." Some were laboring under that impression in Buffalo for a long time, but time works wonders and so do talking machine dealers' associations.

It is with a great deal of sincere pleasure that the officers and members of the Talking Machine Dealers' Association of Buffalo extend to all officers and members of other associations and to all dealers an invitation to be with us at any of our business meetings which take place the first Wednesday of each month during the winter months.

COLUMBIA TRADE IN THE EAST

Reaching Record-Breaking Proportions, Declares Edmund F. Sause—New Supplements Well Received—Book of Best Selling Records

"A record-breaking record business is the statement of the great majority of Columbia dealers," said Edmund F. Sause, of the United States sales manager's office of the Columbia Graphophone Co., referring to a recent visit he had made to the Columbia clientele in the East. "The recent Columbia supplements have met with great favor everywhere, and what is particularly gratifying is the fact that it is the better class of records which are showing the greatest gains in sales over any preceding year. The Lazaro records are achieving remarkable success, and Columbia representatives are enthusiastic in their praises of the advertising campaign, which we have instituted in behalf of these records."

W. A. Willson, business manager of the educational division of the Columbia Graphophone Co., sent out to Columbia dealers this week a valuable booklet containing a classified list of the thirty most popular and best selling Columbia school records. In a letter to the trade Mr. Willson referred to the fact that the Columbia educational department advertising starts in the October issues of all the leading educational journals, and that the new edition of "School Room Music" will be off the press very shortly.

ASHLAND MFG. CO. IN TALKER FIELD

CHICAGO, ILL., November 13.—The Ashland Manufacturing Co., which is a subsidiary of Wilson & Co., a large packing corporation of Chicago and successors to Sulzberger & Sons, has placed upon the market a cabinet machine standing thirty-five inches high, which plays all disc records, and which has a number of individual features. The machine was designed to retail at $35, and this price will be maintained, according to E. C. Seaton, who is in charge. From the middle of October, however, until the middle of November they have been on sale at the Ashland branch store, 14 South Wabash avenue, at the introductory price of $25.

The Davis Phonograph Co. has been incorporated to manufacture talking machines and accessories. Capital is $2,500.

PLEASED WITH THE OUTLOOK

C. F. Bruno Returns From Visit to New York State and Reports Splendid Conditions

C. F. Bruno, of C. Bruno & Son, Inc., New York, Victor distributors, returned recently from a visit to the Victor dealers in New York State, and his reports of conditions in this territory indicate that in both Victrolas and Victor records, Victor representatives are closing a banner business. Record sales, in particular have been unusually gratifying, and Victor dealers have apparently found it beneficial to concentrate a considerable portion of their activities on their record departments. A shortage of Victrolas is generally reported, particularly in the $75 and $100 types, for which there is a tremendous demand.

THE BISHOP WAS SATISFIED

In "The Talking Machine Tells Its Own Story" in a current issue of The Nation's Business is told of the early days of the phonograph. The newspapers printed columns of yarns so fabulous that most readers thought it a hoax. Bishop Vincent, of Chautauqua fame, asked the privilege of seeing the marvel, which Mr. Edison readily granted. The good Bishop had planned to put the wonderful machine to a test. He squared himself in front of the recorder and shouted as fast as he could articulate a string of Biblical names to outchronicle Chronicles—Zaccur, Izri, Nethanian, Bukkiah, Jesharelah, Jeshaiah, Shimei, Azareel, Hashabiah, Shubael, Jeremoth, Joshbekashah, Mallothi, Hothir, Giddalti, Romamtiezer, and so on. When the machine slammed the words back at him the good Bishop threw up his hands and exclaimed, "I'm satisfied! There isn't a man in the United States who could recite those names with the same rapidity."

VICTOR CO. GAINS IN AD. CONTEST

Advertising and Selling, one of the leading magazines in the advertising field, is conducting an interesting contest under the heading, "Who Is the Ablest Advertiser in the Country?" The latest issue of this magazine gives a tabulated list of the standing of the contestants, and the Victor Talking Machine Co. is listed fifth.

It is quite likely that the Victor Co. will finish among the first three in this contest, as it is gaining steadily month after month. All readers of the magazine are eligible to enter the contest, each individual opinion counting as a vote.

WORKING FOR THE STEPHENS BILL

Fred P. Oliver, vice-president of the Blackman Talking Machine Co., New York, Victor distributor, returned Monday from a trip through the northern part of New York State, Connecticut and Rhode Island. Mr. Oliver made this trip in behalf of the interests of the Stephens bill, representing the National Association of Talking Machine Jobbers.

Mr. Oliver conferred with more than a dozen Congressmen in the States he visited, and also succeeded in interviewing two United States Senators. He was gratified to learn that there is a general sentiment favoring the Stephens bill, which seems to be gaining strength daily, and those members of Congress who consented to commit themselves declared their advocacy of the Stephens bill and its principles.

A TALKING MACHINE NOTEBOOK

Popular Composer Uses Talking Machine to Preserve His Improvizations

Rudolph Friml, who wrote the music for "Katinka" and "The Firefly," has hit upon an original method of composition. Notes and note books are treacherous. Friml has adopted the phonograph in the note book's place. In the stretches of time between his productions nowadays, he sits at the piano, plays the airs that are drifting through his mind—and all the time there is a little instrument at his side which is recording them for future reference. Then, perhaps, there comes a day when the composer is tired. Perhaps he wants something new in a hurry. Everything is a jumble and he would have a difficult time recalling something good, exactly as it occurred to him one summer's day when he was out in the country at a little cottage beside the lake. Presto! He puts the "record" on the machine and prompts his memory. And the result is eminently satisfactory.

Immediate Delivery

The
POOLEY
EUFONOLA

Most Luxurious $100 Cabinet Phonograph Made

A superbly designed cabinet of exquisite workmanship—45 inches high x 21 inches x 21 inches.

The EUFONOLA is made complete—except the motor—in the EUFONOLA factory. Tone and sound box of special construction; interior is all of wood joined to double amplifier of finest riff spruce.

This assures a perfection of tone that is marvelous—clear, full and brilliant.

HOW A BRIDGEPORT FIRM HAS DEVELOPED ITS BUSINESS

BRIDGEPORT, CONN., November 6.—The value of "home cooking" is well exemplified in the accompanying photograph showing two years' growth of the business of the West End Grafonola Co., of Bridgeport, Conn., the home of the Columbia Graphophone Co.

West End Grafonola Co., Bridgeport, Before and After Two Years of Business With Columbia Line

This company handles the Columbia line exclusively in its establishment, and the progress it has made in two years may be attributed both to the sales value of the Columbia product and the aggressive methods of Mr. Koszeghy, owner of the establishment.

In the illustration herewith the artistic display of Columbia photogravures along the walls is well worth noticing. The vertical strip may be removed at any time and new pictures inserted. The "twin note" trade mark of the Columbia Co. is also well displayed on the twenty-foot awning outside the store and at other points of vantage.

A New Diaphragm

¶ Paddock Diaphragm, Inc. is now ready to offer the trade a new diaphragm which has given perfect satisfaction to a limited number of users the past six months.

¶ The Paddock Diaphragm is made of a specially patented composition that we believe is far superior to mica.

PRAISE FOR THE NEW EDISON

Booklet Issued Containing Tributes from Music Critics Is Proving Popular

A compilation of the comments that the leading music critics of America have made in reference to the New Edison has been issued in booklet form by Thomas A. Edison, Inc., and is being distributed among Edison dealers. "What the Critics Say," as the new booklet is designated, contains thirty-two pages and can be slipped into the inside pocket or into a standard envelope for mailing. It is a compendium of the criticisms that the New Edison tone tests brought forth and it reflects the approbation that the musical world gave the achievement of Music's Re-Creation. Excerpts from many leading journals of the United States are quoted to the effect that the New Edison is capable of actually re-creating the human voice and other musical sounds.

In addition to quoting the tributes that the foremost musical authorities of this country have paid the New Edison and Edison Re-Creations, the booklet contains a brief statement relating to the significance of Music's Re-Creation. An extensive list of the names of newspapers in which critics have admitted the accomplishment of Re-Creation also is given. The booklet is illustrated with pictures of the Edison artists who have appeared in the tone tests which have and are creating such a furore in the musical world. Among the artists who are pictured in the booklet are Marie Rappold, soprano of the Metropolitan Opera; Alice Verlet, Europe's favorite colorature soprano; Thomas Chalmers, baritone of the Boston-National Grand Opera Company, and Christine Miller, the celebrated concert contralto.

That "What the Critics Say" is proving very popular is indicated by the demand that dealers are making for supplies of the booklet.

BIG GOVERNOR WIRE PURCHASE

The Lucky 13 Phonograph Co., New York, recently purchased 3,600 pounds of flat tempered steel governor spring wire, constituting one of the largest single shipments of this product. Cut into springs this wire will make 9,000,000 governor springs—enough for 3,000,000 motors. David B. Bartelstone, owner of the company, has made a careful study of the raw material situation, and in addition to purchasing this governor spring wire has also bought a large amount of main springs to fit various sizes of standard motors.

LIVELY TRADE IN ALBANY, N. Y.

ALBANY, N. Y., November 11.—The Gately-Haire Co., Inc., this city, report a tremendous business in Victor talking machines, for which they are distributors. The demand for machines is beyond the supply, while the record trade is steadily expanding. Under the present capable management the business is showing a steady advancement.

PLANNING SOME BIG THINGS

PITTSBURGH, PA., November 11.—The Standard Talking Machine Co., Inc., of which J. C. Roush is manager, will make some important moves the first of the year, which will be well worth watching. In the meantime their business in Victor talking machines and records, for which they are distributors, has assumed enormous proportions, and it is now certain that they will close the greatest year on record in 1916.

AN INTERESTING CAMPAIGN

An interesting campaign is now being mapped out in the advertising department of the Columbia Graphophone Co., whereby Columbia dealers will receive a most practical brand of co-operation and assistance this coming fall. This campaign consists of a series of newspaper advertisements which will be used in the various papers throughout the country at the time when famous artists recording for the Columbia library are appearing in concerts in these respective cities. In order that Columbia dealers may get the full benefit of this publicity the Columbia advertising department has prepared a series of electrotypes which will be furnished to the dealers free of charge.

FEATURING HAWAIIAN RECORDS

DALLAS, TEX., November 6.—The Will A. Watkin Co., who handle the Columbia line successfully in this section of the country, is featuring more of the popular Hawaiian records in their advertising with excellent effect. The advertisements are specially illustrated and command attention.

The Broadway Phonograph Shop, Inc., has been incorporated with a capital stock of $6,000 to deal in phonographs and other mechanical musical instruments. The incorporators are M. R. Morrison, L. E. Greenberg, etc.

The Edison line of phonographs and records will be handled by Paul G. Mehlin & Sons in their new warerooms, which will soon be opened at 4 East Forty-third street, New York.

The Menzer Talking Machine Shop, of Pittsburgh, Pa., was recently incorporated with a capitalization of $5,000.

USING CHRISTMAS STATIONERY

The Corley Co. Keeps Fact That Christmas Is Coming Before Their Dealers

The Corley Co., well-known Victor distributors of Richmond, Va., are letting no opportunity slip to impress their dealers with the fact that Christmas is coming, and the company is already using a handsomely designed Christmas letterhead for its business correspondence. The letterhead has a holly border in colors with the Corley slogan: "The House That Made Richmond Musical" at the top, with pictures of Santa Claus at each corner.

TONE MODULATOR WELL RECEIVED

BAY CITY, MICH., November 6.—R. W. Gresser, sales manager of the Delpheon Co., of this city, manufacturer of the "Delpheon" line of machines, is making a trip through the State in company with a member of the company's traveling staff, and the orders he has received to date indicate a healthy demand for the "Delpheon" products.

Mr. Gresser is well pleased with the reception accorded the distinctive features of the "Delpheon" machine, such as its tone modulator, patented record filing system and automatic stop. The tone modulator in particular has met with gratifying success, and dealers handling the "Delpheon" line are using this as an important sales argument, demonstrating it to prospective purchasers with very pleasing results.

The Des Moines Phonograph Co., recently organized to market the Stewart phonograph, has opened a salesroom at 621 Locust street, Des Moines, Ia., with C. A. Hoover in charge.

Geo. L. Hirtzel, Jr., of 211 Broad street, Elizabeth, N. J., recently had a very attractive booth at the Automobile Exhibition in the armory there, featuring the Victor line of machines and records.

DISPLAY DURING ELECTRICAL WEEK

Columbia Electric Grafonolas to Be Featured During First Week of December

The Columbia Graphophone Co.'s line of electric Grafonolas will be prominently featured throughout the country during the first week of December, which will be known as "Electrical Week." The Columbia Electric Grafonolas have attained remarkable success during the past year, and the electric motor used in these machines has given such excellent service that it has been commended by Columbia dealers everywhere.

T. A. Laurie, for many years a member of the Columbia Co.'s auditing department, has joined the staff of W. C. Fuhri, United States manager of the company, with headquarters at the executive offices.

EDISON JOBBERS CONVENE

Successful Three-Day Convention Held at Syracuse, N. Y.—Bolway & Sons Open New Edison Shop—Officials in Attendance

SYRACUSE, N. Y., October 30.—A three-day convention was held by Edison dealers from Central and Western New York at the Hotel Onondaga last week, seventy-five Edison dealers being present. Miss Julia Heinrich gave a tone test demonstration at the Regent Theatre on the first day of the convention, the convention closing with a very successful banquet. Incidental to the Convention was the opening of the New Edison Shop on South Salina street by Frank E. Bolway & Sons. In addition to the dealers who attended the convention, practically all of the officials of Thos. A. Edison, Inc., with the exception of Mr. Edison himself, were present.

RISHELL CO. LEASES SALESROOM

The J. K. Rishell Furniture Co., manufacturers of talking machines, have leased the third floor in the building at the southwest corner of Madison avenue and Thirty-eighth street, to be used as a sales and demonstration room.

HUNT'S MUSIC HOUSE MOVES

Prominent White Plains, N. Y., Concern Forced to Occupy Larger Quarters

WHITE PLAINS, N. Y., November 13.—Hunt's Leading Music House, Inc., of this city, has moved from 52-54 Martine avenue, where it has been located since 1911, to 114 Main street, in the heart of the business district. The company has taken a long lease on a handsome store.

The front section of the store has been fitted up elaborately as a Victrola department, with a number of modern booths, finished in ivory white and attractively furnished. The rear of the store is to be used as piano warerooms, and the basement will be given over to the display of pianos, to the music roll department and to additional booths for record demonstration. The formal opening of the new quarters will be held on Saturday, November 18, and an elaborate program has been arranged for the occasion.

In speaking of the removal John E. Hunt, head of the company, said: "It is very gratifying to announce a very satisfactory business, and the steady growth that has compelled us to make this move, giving us a larger store. It is also pleasing to note that we have given to our city an up-to-date music house which has specialized in exclusive Victor Talking Machine service."

MAKING SATISFACTORY PROGRESS

The Mutual Talking Machine Co., New York, has been making very satisfactory progress with the production of its tone-arms, and increased factory facilities have enabled the company to make large shipments. Since sending out the first lots of the Mutual No. 1 tone-arm, several improvements have been perfected which add materially to this tone-arm's practicability A new ball-bearing tone-arm, known as the Mutual No. 2 tone-arm, will be ready for the trade in a few days.

"TALKING MACHINE WORLD" TRADE DIRECTORY

In response to the many requests of our subscribers we herewith issue a classified directory of the talking machine trade. In order to make this directory as accurate and up-to-date as possible, we have listed alphabetically only those concerns whose advertisements have appeared in the TALKING MACHINE WORLD during the past six months.

This directory will appear in THE WORLD from time to time, each new appearance canceling the preceding list. It aims to answer in a nutshell the prevailing questions of "Where can I get it?" and "Who makes it"—which questions we are emphatically interested in answering for our readers. No attempt has been made to differentiate between the merits of the various types of machines, records, etc.

MACHINES

AEOLIAN CO. Executive offices, 29 West Forty-second street, New York City. Manufactures the "Aeolian-Vocalion" line of phonographs, eight models, retail prices $35 to $300. Also manufactures electric machines and special art designs.

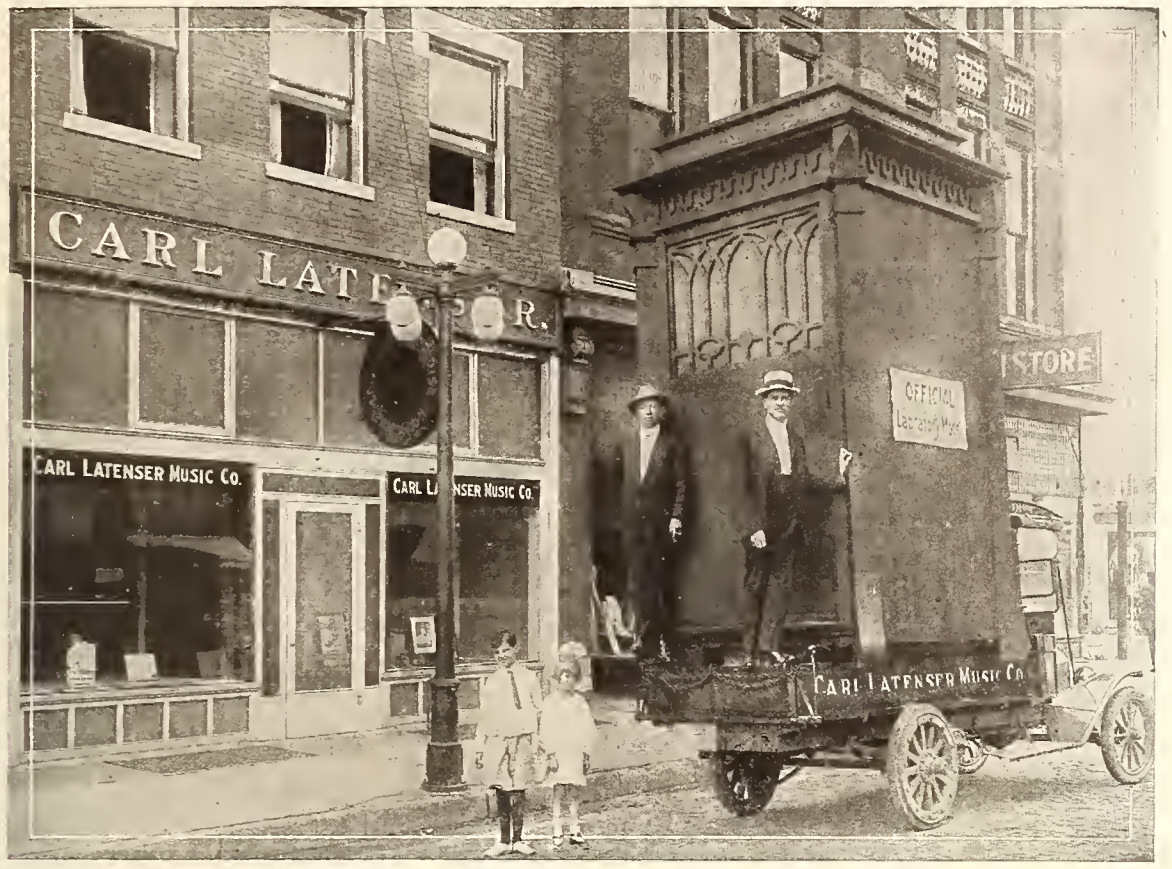
TALKING MACHINE WORLD TRADE DIRECTORY

ADVERTISING BIG EDISON SHIPMENT

Carl Latenser, of Atchison, Kan., Attracts Public Attention to the Fact that He Receives and Sells Many Edison Phonographs

ATCHISON, KAN., November 4.—An ingenious scheme to attract attention to the arrival of a carload of fifty-six New Edisons was devised by Carl Latenser, Edison dealer in this city, upon the arrival of the instruments on a recent date. He had a twelve-foot model, shown in the picture herewith, constructed so that there was sufficient space within to accommodate a piano and a man to play it, thus providing the effect of phonograph music. The instruments that comprised the shipment then were loaded upon a number of trucks and a procession, led by the giant model, passed from the freight house to the Latenser store.

Mr. Latenser is going to have the big model waterproofed and placed on the top of his building where it will become a veritable landmark and will keep the New Edison constantly in the public eye of Atchison.



Huge Model of the Edison Diamond Disc Phonograph Used to Feature Large Shipment

The Weaver Piano Co., of 210 North Akard street, Dallas, Tex., is selling out its line of pianos preparatory to turning its headquarters into an exclusive talking machine store.

RECEIVERS FOR REX CO.

Talking Machine Manufacturers in Financial Trouble, but It Is Announced That Operations Will Continue and Machines Be Made

WILMINGTON, DEL., November 4.—Upon application of David J. Reinhardt, counsel for Gustave Mayer, of New York, before Judge Woolley in United States District Court October 22 a receivership was granted for the Rex Talking Machine Corporation. Mr. Mayer averred that the corporation owed him $15,300. James B. Stevens, of Newark, N. J., and Paul E. Haessler, of this city, were appointed receivers. They gave bond in the sum of $10,000.

Bankruptcy petitions were filed against the Rex Talking Machine Corporation a few days later by the creditors. The company, which operates a plant on Vandever avenue, will continue to manufacture machines, the receivers to operate the plant until further orders are given by the court.

A VISITOR FROM PORTLAND

C. B. Snow, head of the Victor department of Cresssy & Allen, Portland, Me., was a visitor to New York the closing days of last month, and during a visit to The World sanctum spoke enthusiastically of business conditions in his territory. "The only difficulty as far as business expansion is concerned," he remarked, "is a matter of getting sufficient goods to fill the demand." Before his return home Mr. Snow paid a visit to the Victor factory at Camden.

REPORTS DEMAND FOR GRAFONOLAS

The W. F. Minck Co., 1131 North High street, Columbus, O., reports a very active demand for the Columbia Grafonolas, which they are featuring with great success these days. Mr. Minck has been identified with the piano business in Columbus for thirty-three years, and has built up quite a following.

$ $ PROFITS $ $

If we told you that by answering this advertisement you would receive by return mail a check for $1,000.00, you would lose no time in answering it. What we have to offer amounts to the same thing. Over two hundred dealers all over the country are handling

Columbia Graphophone Co.
Woolworth Building, New York

STEINWAY & SONS TO HANDLE COLUMBIA IN THE WEST

Columbia Grafonolas and Records Will Be Handled in Five Branch Stores of Steinway & Sons Located in the Middle West—R. E. Wells Assists in Consummation of Arrangements

The Columbia Graphophone Co. announced recently the consummation of an important deal, whereby the complete line of Columbia Grafonolas and Columbia disc records will be handled by Steinway & Sons in their Western branch stores, located in Cincinnati, Indianapolis, Columbus, Louisville and Dayton. This deal had been pending for some time past, and the arrangements closed this week mark a most important step in the progress of the Columbia product.

The Steinway stores in the Middle West are directly connected with the executive offices of Steinway & Sons in New York, and are under the general management of R. E. Wells. On his recent visit to New York Mr. Wells thoroughly investigated the merits of the Columbia line, and when he left for the West heartily recommended the installation of these products in the Steinway stores. The Columbia line will be handled in the Steinway establishments exclusively with the exception of the Clayola electric machine, which will continue to be handled in these stores.

The recognition by Steinway & Sons of the musical and sales qualities of the Columbia line is a distinct tribute to the achievements of the Columbia Graphophone Co., as Steinway & Sons are recognized the world over as the foremost house in the piano industry. The Steinway piano has won fame throughout the civilized world as representative of the highest ideals of pianoforte construction.

The merchandising and sales policies of the house of Steinway have won praise and commendation in all industrial circles, and Steinway & Sons' choice of the Columbia line for their Middle West stores can well be considered by the Columbia Co. as a signal appreciation of its products by a famous institution.

INTRODUCE NEW TYPE OF MOTOR

Details of Latest Creation of Leonard Markels of New York—To Patent New Constructural Feature in Triple Spring Motor

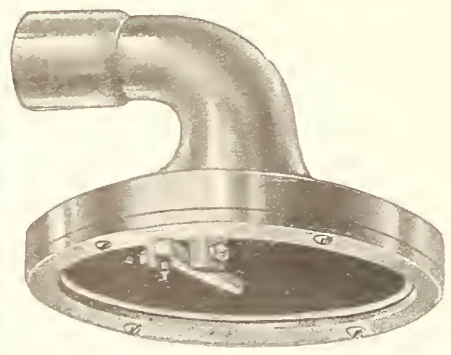
Leonard Markels, 165 William street, New York, manufacturer of the Markels motor, tone arms and sound boxes has just placed on the market a new type of Markels motor, which is designated as his number "M4 motor." This motor is a triple spring motor, which plays with one winding four twelve-inch records or six ten-inch records.

This new Markels motor differs from the average triple spring motor in that it is the same length and width as the ordinary double spring motor, only the depth being greater. Mr. Markels experimented on the production of a triple spring motor for quite some time, and finally succeeded in producing a motor which is unique in many respects, and which is something decidedly new in talking machine motor construction.

Mr. Markels took his "M2" motor as the basis for his new triple spring motor, and by extending the center shaft and attaching a third spring controlled by clutches he succeeded in perfecting a motor which weighs very little more than his "M2" motor, and which can be inserted in any cabinet designed to accommodate the smaller motor, as the "M4" requires no different borings than the "M2."

The Markels "M4" motor has been carefully investigated and approved by a number of prominent talking machine manufacturers. Mr. Markels has applied for a patent on his new triple spring motor, covering the important constructional features it embodies.

Not An Experiment



The VICSONIA is favorably known to the trade as the reproducer that plays the Edison Records *perfectly*.

It is *NOT* a "cheap" instrument.

It does *NOT* damage the record.

It does *NOT* require a mechanic to attach it.

By its pure, sweet tones and remarkable absence of blast and rattle

The VICSONIA

Has Demonstrated Its Superiority

SPECIAL OFFER—We will send one N. P. VICSONIA to any dealer in the U. S. or Canada on receipt of $3.50. Mention this advertisement and state make of machine.

313 East 134th Street New York City

JAMES MANOIL VISITS CANADA

Head of James Manoil Co., Makers of the Manophone, Visits Canadian Agents—Secures Good Business in the Dominion

James Manoil, president of the James Manoil Co., Inc., Newburgh, N. Y., recently made an extensive trip to Canada, and when in Toronto visited the Music Supply Co., the Canadian representatives of the Manophone. He also secured a large volume of business.

The demand for the Manophone is steadily on the increase, and the factory at the present time is the scene of great activity, owing to the rush of orders which have been received for the holiday trade. Most favorable comments on the progress of the company have been published recently in the editorial columns of the daily newspapers in Newburgh and nearby cities.

FACTORY WORKING TO CAPACITY

"Notwithstanding that the demand for raw material is far beyond the supply, we have succeeded in securing enough material for our requirements," said Philip A. Ravis, vice-president of the New York Album & Card Co., New York, manufacturer of "Nyacco" record albums. Our factory was working to capacity for some time past, and as we realized that the demand for albums this year would be far in excess of any previous year we scoured the markets for raw material many months ago. Needless to say our foresight has been well rewarded, as we are now in a position to fill the demand of our dealers with promptness and despatch.

ATTRACTIVE DECALCOMANIA

The Sonora Phonograph Corporation has sent out to its dealers an attractive window decalcomania in blue and white, which can be used to excellent advantage. The blue in this decalcomania is a special shade which is becoming generally known as Sonora Blue.

The Lavin Record Exchange, Lynn, Mass., has secured the agency for the Music Master and Artofola talking machines.

Autumn Trade Opens With Tremendously Active Swing—Without Parallel Since the Outbreak of the War—Great Demand for Supplies for Talking Machines—Scarcity of Labor Still Prevails—Columbia Co. Takes Over the Compactophone—T. E. Osborne's Activity—Making Study of Trade Promotion—Big Demand for "Winner" Records—Portable Gramophones Popular—New Record Lists by Leading Companies—Interesting Catalog of World Music Issued by the Gramophone Co.—Make Records of "In a Persian Garden"—News of Month in Detail

LONDON, E. C., ENGLAND, November 1.—The season's trade is now in full swing. It opened up under conditions without parallel, even since the outbreak of war. Naturally in August, 1914, when the country began to realize the enormously costly and lengthy conflict ahead, there were signs of panic in commercial circles, especially among traders of luxury articles. Many were the gloomy forebodings based largely upon the actions of those to whom one looked for an example and lead. Whole factory staffs were retired, and in other cases placed on half pay. In those days things looked as black commercially as they did militarily. People held their breath, and on every face one saw an expression which focussed the question—what next? Yet withal, the suppression of real activity lasted but a week or so, and true to the traditions of the British race, there was soon everywhere displayed that pertinacity to make the best of things. By the exercise of this spirit which is to us an asset of as great an importance as men and munitions, we are carried along on a wave of increasing optimism.

Hand in hand with our military efforts, may be counted the fight for the maintenance of commerce. It progresses exceedingly well, notwithstanding a hundred-and-one difficulties in the shape of submarine activity, labor shortage, high insurance and freight rates, official prohibitions restricting imports and exports, lack of material, parts, etc., to say nothing of increased prices! In no one field of commerce is all this more detrimental to progress than in the gramophone industry. The wonder is that it exists at all. But it does, simply by reason of the tremendous efforts made by the whole trade to nourish and fortify it by every legitimate means at hand. In after years when we look back upon this time, we shall undoubtedly stand and marvel at what must then, if not now, seem a miracle. Fortunately there is plenty of money in circulation. When that fails the position may well nigh look hopeless. But there is no prospect of it failing, and orders are as abundant as ever. The supply this season is considerably less than last, and that is the main trouble. Though small, there is some prospect of a gradual increment in home manufactures of different parts. Springs, sound boxes, tone-arms, trumpets, wheels, and other accessories are coming along in ever increasing quantities—but slowly. Practically all machines are utilized for munitions and other war material. A slight surplus is, however, gradually making itself felt, or we should not get the few gramophone parts that we do. These conditions bid fair to improve in the course of time, and maybe the chief item of necessity—complete motors—will be the next consideration of British manufacturers. Mechanism of a kind there is to-day, but one cannot praise any effort in this direction which takes the form of an assembly of more or less ill-fitting parts obtained from different shops located far apart. Experience shows that unless a motor is assembled from accurately gauged parts all made to scale in the same factory, it is practically useless as mechanism for gramophones. I do not wish to discourage any effort, rather the contrary, which will make us independent of foreign imports, but the fundamental principle of motor construction laid down by experts cannot be ignored. Indifferently built motors will damage the prestige which Great Britain holds throughout the world for goods of quality, and I am quite sure the trade would rather be without them than that future or after-war trade should be jeopardized by such goods.

In the record domain, matters are progressing very satisfactorily, times considered. Here too, there is felt a lack of sufficient men to ensure an adequate supply. Men are still being called to the colors in ever-increasing numbers, and sometimes the loss of one expert will disorganize a whole department. Naturally all this takes time to adjust. Discharged soldiers and women are in great demand, though few of either are really capable of standing the prolonged exertions called forth in the operation of record pressing. However, things are progressing in all ways well.

Columbia Co. Takes Over "The Compactophone"

Considerable interest has been aroused by the Columbia Co.'s recent announcement that they have taken over the popular portable machine styled "The Compactophone." It has now been rechristened "The Regal Compactophone"—a prefix which in itself is significant of the Colum-

bia Co.'s opinion of this splendid portable instrument. It is understood that the Columbia's selling rights are confined to the United Kingdom. Any oversea traders interested in the sale of the Compactophone will continue as heretofore to address their orders and communications to the Sterno Manufacturing Co., 19 City Road, London, E. C. This ingeniously constructed instrument, of small and compact measurements, and its beautifully polished solid oak case, fitted with strong leather handle, endorsed by the name of Columbia, can safely be predicted an unchallengeable future for the Regal Compactophone, which, it may be mentioned is, in point of tone quality and volume, on a par with the table or other hornless type of machine. An unique feature of this instrument is the provision of space in its interior for the carrying of no less than twelve double-sided records!

Thos. Edens Osborne Still at It

Thomas Edens Osborne, of Belfast, continues to set an excellent example to dealers. His attractive editorial advertisements are as prominent as ever in the chief Belfast papers. The many phases of current events which he takes advantage of for a little chat to prospective buyers, is certainly worthy of a wider publicity. One of the many interesting announcements is devoted to the removal of "erroneous impressions" held by would-be gramophone owners as to the cost of an outfit. Mr. Osborne makes good play on this text and develops his arguments in a most practical way by itemizing the actual cost of the various gramophones which he stocks.

"His Master's Voice" Publicity

Its always "now," that's a good time to advertise, whether it be spring, summer, autumn. or winter. Certainly no more appropriate time than the present could be found. Expenditure upon publicity is not so great as in pre-war days, naturally, but a considerable amount is being allocated for this purpose by the chief talking machine companies. Some good press ads have lately appeared devoted to special Columbia issues. This company always seeks the limelight of publicity to make more widely known its many fine records listed each month. Which is as it should be.

Then, too, there is "His Master's Voice" Co. as active as ever in distributing its good news. A recent attractive newspaper triple column advertisement advised the public of the issue of ten records bearing the catchiest songs and music of the great musical comedy "High Jinks." These numbers were recorded by the original artists who are exclusive to the "H. M. C." Co.

In addition, other striking announcements continually appear from time to time. And apart from this direct publicity, a series of ads have been produced for the use of dealers locally. These are in the form of complete cuts, with piercing for the dealer's name and address. They are supplied free, the only stipulation being that the blocks will be used to the best advantage. Excellent!

Action Against More Enemy Firms

There has been considerable public protest against the manner in which the Government is proceeding against concerns capitalized in whole or in part by enemy subjects, the claim being made that the treatment accorded is too lenient. In the foregoing connection, the following firms have been held up as specific examples and their names mentioned in Parliament: Bechstein's (piano manufacturers), Augener L. (music publishers), Carl Lindstrom L. (gramophone and record manufacturers), Kastner & Co., L. (players), etc. As a result of pressure the government is moving in the matter and already the business of Bechstein's has been ordered to be sold, including the famous Bechstein Hall in Wigmore street, lock, stock and barrel. In view of the German action in regard to British business in that country, it is generally felt that we should take equally strong action here.

"Winner" Record Activity

A striking feature of the "Winner" record publicity this last few months has been the issue of window bills and shop hangers. Usually dealers are not overkeen in making use of such sheets owing to their size, but it is conclusively proved by the display throughout the country of Winner window bills announcing new artistes or new titles that objections can be overcome by studying the dealers' ideas. This is just what the company advertising director has done. It is interesting to note that the result is a smaller bill, well designed and of attractive appearance, printed in colors, the style and lay-out being changed each month. Under this plan it is found that the display by dealers has increased quite twenty-five per cent. The Winner issues, too, are in accordance with this new attractive manner of their publicity presentation, and include items by such well known contributors as: The Band of H. M. Irish Guards, The Bohemian Band, Albert Whelan, Jay Laurier, Robert Carr, the Two Bobs, Sergt. Leggett, Betty Barclay and a baritone, Stanley Kirkby, Will Evans, and others. So great is the call for Winners that a night shift has been put on with the result that it may be possible to catch up on orders for the Christmas trade.

Board to Study Trade Promotion

The Board of Trade Advisory Committee on Commercial Intelligence met recently and considered proposals for the despatch of a special commercial mission to investigate the conditions and prospects of trade in Spain and Portugal, and questions relating to the promotion of British trade with Russia and Italy, and the employment of foreigners as commercial travellers.

Singer Has Exciting Experience

M. Chaliapine, the wonderful basso, had an exciting experience recently in the Caucasus.

THE INVICTA RECORD CO., LTD., 1 New Inn Yard, London, E. C., England *Cables*

FROM OUR LONDON HEADQUARTERS—(Continued from page 106)

Attacked by an armed Circassian in his bedroom during the night, the assailant evidently being intent on robbery, the famous singer was forced to resort to his revolver. A shot was fired with fatal results to the intruder. His many admirers will remember M. Chaliapine's instant success in the Russian opera season at Drury Lane Theatre before the war, and the many beautiful records made of his finest pieces by the H. M. V. Co.

To Prohibit Iron and Steel Importations

During the period of de-mobilization and reconstruction after the war, it has been thought advisable to prohibit the import of iron and steel. This is the recommendation of a special committee appointed to consider the matter. It evidently applies to raw material only, and will therefore not affect the importation of manufactures, such as gramophone motors and other parts of musical instruments.

British Zonophone Has Strong List

The strongest list issued by the British Zonophone Co. for some time is that for the current month. A splendid aggregation of records is therein announced, comprising, as usual, up-to-date and standard numbers, many by artistes exclusive to the company; all by artistes of eminence in the musical world. Titles are not chosen haphazard, the Zonophone policy being to closely watch the trend of the public taste, and cater accordingly. Hence from this concern, we usually get records which make an exceptionally wide appeal. A few of the items this month are as follows: "Angels Guard Thee" and "Eily Mavoureen," contributed by that prince of light tenors, Mr. Sidney Coltham, with piano and violin obligato; "Capricente" and "Love's Waltz," piano solos by Paul Astor; part I. and II. "Raymond Overture," by the Black Diamond Band; four attractive and popular Morceaux by the Royal Cremona Orchestra; "In the Valley of the Moon" and "You'll Always Be the Same Sweet Baby" by Herbert Gayne; "Serenade" (Schubert's) and "Evensong" by Miss Louie Brooks (soprano), and Harold Wilde (tenor), with orchestra, etc. Other good numbers are down to the credit of Tom Foy, Florrie Ford, Billy Williams, Nat D. Ayer, and Harold Montague, at the piano. And there are several other equally attractive names, whose records sell well.

A Splendid Guardsman Record Program

When the tendency for the last few months has been to considerably curtail the length of new record lists owing to the difficulties connected with manufacture and supply, it is a significant and welcome sign to note the gradually increasing number of issues now that the season is in full swing. Foremost among the firms whose policy is closely aligned to the barometer of these changing times, is the Invicta Record Co. L., of this city. No less than eighteen records (thirty-six titles), figure on this month's (November) program. Almost without exception they are records of special value, comprising picked selections known to be of good-selling quality. In the main they are vocal numbers such, for instance, as "There's a Long, Long Trail," a popular "hit" given as a duet by Messrs. Barrett and Sullivan, with which is coupled "Loading Up the Mandy Lee," another excellent duet by Messrs. Fanning and Fortune. A couple of good comics by Ted Barrett: "Shall Us? Lets" and "I Can't Do My Bally Bottom Button Up." "Heroes of the Dardanelles" and "Comrades Side by Side," baritone numbers by Donald Stewart. "Blightly," by Barrett and Sullivan and "The Home Bells are Ringing," by Lester Baker. A good baritone artist is Francis Sullivan, who contributes "Some Night, Some Girl, Some Waltz' 'and "Underneath the Stars." Two items which somewhat savor of Uncle Sam are "Welcome Honey to Your Old Plantation Home" and "She Is the Sunshine of Virginia," both by Messrs. Fanning and Fortune.

Among the instrumental numbers are two fine cornet solos by A. M. Thomas, "When You're a Long, Long Way From Home" and "I Try to Forget You, But I Only Love You the More," while Fred White is responsible for "Sambo's Guide," Xylophone solo, and "The Coon's Jubilee," as a bell solo. "Life on the Ocean Wave," "The Zouave," etc., and "Pine Tree State March," etc., are two exceedingly pleasing renditions by the Third Scots Guards Drums, Fifes, Bugles and Bagpipe. Altogether the list is one of which the "Guardsman" record people may well feel proud.

The New "Citizen" Record List

Another list of the special-quality "Citizen" record has been issued. A few of the titles given thereon are: "Miserere" and "Barcarolle," by violin, flute and harp trio; "Where My Caravan Has Rested" and "Little Grey Home in the West" by Swilyn Richards, the well known Welsh tenor; "Until" and "Somewhere a Voice Is Calling" by Miss Ethel Toms (contralto); "M-o-t-h-e-r," by Mr. Ian Colquhoun, an old American favorite, coupled with which is "Forget Me Not," by Chas. Leonard. There are other equally fine contributions to this list and all interested are advised to communicate with The Invicta Record Co., L., New Inn Yard, London, E. C.

The Music of the World Cataloged

A guide to the music of the world in book form, right up-to-date, is now available to all "His Master's Voice" agents and the public. This new catalog is an encyclopedia index of every record issued and retained by the Gramophone Co. since the beginning of things, and is one which every lover of things musical would gladly possess. It tells the story almost of the history and growth of the talking machine trade in more eloquent language than any set prose; a study of its pages in comparison with previous issues, disclosing the triumphant and increasing homage over succeeding years of the greatest of the world's artistic talent in the sphere of music. Herein is focussed the successful work of "His Master's Voice" Co. since its inception. One need scarcely point out the value of this catalog. As usual, beautiful and expensive in get-up and general arrangement, it is certainly of almost indispensable service to the trade and the great "H. M. V." public. There is the easiest possible yet effective, system of indexing, which permits of immediate reference to the full particulars concerning the different and innumerable titles. This A. B. C. catalogue has now been issued in company with a numerically arranged list of records, the latter for trade use only.

Day of the Portable Gramophone

From the days of table grand machines, a steady progress in the construction of interior-horn models has been made, until to-day the real portable gramophone stands supreme in popularity. This period of evolution over a number of years seems to have been brought more or less to a climax since the outbreak of war. Owing to the immediate shortage of practically all gramophone mechanism and parts which in the main reached us from Germany, British inventors found plenty of encouragement where previously they were treated often with scant consideration. Within the last two years or so quite a number of new ideas—especially in connection with the production of portable gramophones—have seen the light of day. It is the purpose of this necessarily brief report to make known some particulars of a new portable model which has been placed on the market by Messrs. W. H. Reynolds (1915) Ltd., 45 City Road, London, E. C. In construction it is quite different to anything of its kind on the market. By its small over-all measurements, 11x8x8 inches, when closed, one can appreciate that it is as conveniently portable as may be possible consistent with a satisfactory tonal volume. The case is of polished oak, with leather carrying handle. It is equipped with a strong, single-spring motor to play 10-inch records only, and in all other respects the fitments are quite satisfactory. There is no metal tone-arm; instead we have a wooden sound-arm amplifying chamber—a tapered box-like arrangement to which is fitted the sound-box. From the mouth of this the sound is transmitted direct into the lid of the instrument which acts as a sound board—radiating the music in all directions. Truly a most ingenious arrangement, too, is the wooden turntable which when not in use can be folded up to permit of closing the lid of the machine. As to the tone-volume, it is not, of course, quite equal to an exterior trumpet model, but not far short. This is more than counterbalanced by the purity and richness of its reproducing qualities. I am told that big orders have already been placed by the trade, and altogether, it would seem, that Messrs. Reynolds' new line will create quite a furore this season.

A Smart Salesman

As joint editor at one time of the Talking Machine News, Stuart Griffin had ample opportunity in his frequent perigrinations around the trade to absorb a complete appreciation of the

points which to some extent account for science in salesmanship. This was reflected in his many able chats to gramophone dealers. From what might be termed the theoretical side, our old friend has now gone over to the practical sphere and may be seen in his element at the Cranbourne street showrooms of Messrs. J. E. Hough, Ltd. With this firm Mr. Griffin is acting as advertising manager.

Scientists and Practical Men to Combine

Great Britain is waking up! There now is a talk of a closer co-operation between the scientist and the practical man. One result, it is suggested, would be the introduction of a cheap process by means of which apple-wood at 5s. per cubic foot, could be converted into imitation ebony, worth anything from 10s. to 25s. per foot, and capable of being adapted for use in the manufacture of musical instruments.

Issue Entire Song Cycle

The Gramophone Co. have just issued the entire song cycle "In a Persian Gardian." This favorite composition of Mme. Liza Lehmann's is recorded under the personal and active supervision of the gifted composer herself, the vocalists being chosen for their renown and special suitability. The result is a revelation of artistic singing and reproduction.

With a complete set of the numbers is given an album embellished with beautifully colored pictures of the Rubaiyat. The set (with gratis album) sells at £2 2s 0 retail. Big sales for this grand work may be safely predicted.

Since writing the above the Gramophone Co. have received from Mme. Liza Lehmann the following splendid testimonial: "It is with great pleasure that I express my appreciation of and admiration for the splendid records made by 'His Master's Voice' Gramophone Co., of an extensive selection from my song cycle 'In a Persian Garden.' I cannot imagine better reproduction." This fine issue is being extensively advertised.

MANUFACTURERS—ATTENTION!

What are you going to do when the Boom is over and real competition begins if your Phonographs have no special feature or improvements to offer the buying public? Unless you get some real Novelty Improvement, it is certain your ultimate end will be bankruptcy.

This is your opportunity to fortify and intrench your position that no trade war can harm you. LISTEN!

Six Important Patented Phonograph Inventions for Sale, including one for a Sound-box that plays both Lateral and Vertical Cut Records without any additions or changes of position, employing a straight Tone-arm and discarding all twists, cranks and freaks.

Embody these radical scientific improvements to your machines, and it will create a Furore and place you in an impregnable position. Owners of present style machines will scrap them. Those music-lovers who have been prevented from owning a phonograph, owing to the well-known faults of existing machines, will not be eager to get yours, for it will be a Real Musical Instrument of the very highest class. Each Patent is linked up with the others, and can only be sold en bloc. Correspondence invited only from responsible people giving Banker's Reference.

NEU-VITA CO., 43 Grays Inn Road, London, W. C.

TO RECORD FOR THE STARR CO.

Miss Josephine Forsythe, Distinguished coloratura Soprano and Concert Singer, to Make Records for Starr Piano Co.

RICHMOND, IND., October 9.—Announcement has been made by the Starr Piano Co. from its executive offices here, that Miss Josephine Forsythe, of Cleveland and New York, noted coloratura soprano and concert singer, has been engaged to record for the Starr phonograph. In

Miss Josephine Forsythe

Miss Forsythe, the Starr Piano Co. has added another distinguished artist to its repertoire. She has been doing concert and oratorio work, and has recorded for two other leading companies. She has had offers from opera companies to take up an operatic career, but has refused. She is now in New York in preparation for her work of the coming season.

Miss Forsythe, who is a pupil of Rita Elande, of Cleveland, and Marcelli Sembrich, of New York, possesses a coloratura soprano voice of exquisite sweetness, richness and brilliancy, extraordinary for the clarity, sympathy and warmth of tone. Her voice is well adapted for recording, the high and low notes reproducing equally as well as the middle register. She is the youngest singer now recording for any company, and critics have prophesied a wonderful career for her.

In commenting on the Starr phonograph, Miss Forsythe said: "The propriety of using silver grain spruce for the sounding board throat and horn is forcefully proven. Every vibration and quality of the voice or instrument is brought out with the utmost integrity. It is especially smooth and grateful to the high tones of the light soprano, and the Starr is an instrument whose merit heralds its signal success in phonographic reproduction because of the human quality it puts into the reproduction."

RECORD HOLDERS IN DEMAND

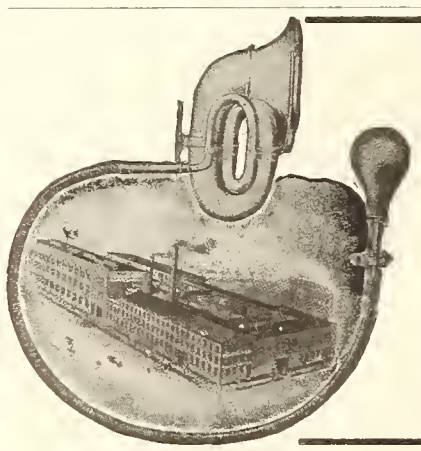
Henry Rosenberg, 14 Wooster street, New York, manufacturer of "Indexo" record holders, states that these holders are being ordered in large quantities by the dealers for their holiday trade. These record holders are attractively boxed, and are ideal for presentation as Christmas gifts. The "Indexo" holder is a decided convenience for talking machine owners, as it is well constructed and enables one to locate a record with maximum ease.

NEW STORE IN WEST NEW YORK, N. J.

Veith & Dorn are new dealers in Edison phonographs at 630 Bergenline avenue, West New York, N. J., where they have opened handsome quarters. In addition to a full line of Edison machines and records the new concern also handles the Bruno line of small goods and Perfection and Artempo music rolls, as a feature of their extensive piano and player-piano business.

GOOD CALL FOR KO-HI-OLA PRODUCTS

ST. PAUL, MINN., November 4.—P. A. Wolfe, head of the Ko-Hi-Ola sales department of the Koehler & Hinrichs Mercantile Co., states that the demand for the Ko-Hi-Ola combination phonograph, grandfather's clock, record-cabinet and bookcase has exceeded all expectations. Mr. Wolfe has assigned territory for this instrument to dealers in all parts of the country who are planning to feature it extensively during the holiday season.



TONE ARMS TURNTABLES

For many years we have been the only manufacturers of good metal phonograph horns, and recently we have added equipment for making Tone Arms and Turntables of highest quality.

These products are made to your specifications only. Ask for estimates.

INFORMATION OF VALUE TO THE NEW MAN IN THE FIELD

Some Valuable Suggestions Regarding the Proper Keeping of the Record Stock—The Importance of Fitting the Needle to the Record—The Necessity of Proper Demonstration

A man going into the talking machine business as a dealer must remember that in entering any new line of business success depends largely upon an understanding of that business. A little study of the various types of machines and records and the gleaning of some knowledge about the records themselves, should serve to prevent him from investing more or less capital in a line of machines or records that are decidedly foreign to one another, so far as playing qualities are concerned.

In this section of The World information will be given on such problems that do not of necessity concern the technical construction or mechanical features of instruments which are handled in the department of "Repairs" by A. H. Dodin.

Keeping the Record Stock

Keeping the record stock properly is a matter of supreme importance not only from the viewpoint of business efficiency for the dealer himself, but with a view to the convenience of the customer.

The record buyers demand that the desired record be furnished promptly, and that it shall be in good condition when it is furnished. They do not care to wait while the salesman is compelled to wander through several sections of the record stock before finding what is desired. From the dealer's viewpoint a well kept record stock means that he knows just where he stands in the matter of record supplies, and can place his orders accordingly without fear of finding a shortage just at the time when a customer demands that particular selection.

In connection with the handling of retail record stock a prominent talking machine man remarked that keeping a retail stock of records in a state of real efficiency is a comparatively easy task when one goes about it in the right way, and added:

"It may be unreasonable, but it is nevertheless a fact, that the customer quite frequently feels annoyed when the dealer is 'out' of some particular record. You see, the customer may have come into the store for the definite purpose of hearing that particular record.

"With the assistance of parcel post and an efficient method for keeping track of 'shorts,' there is less excuse for being out of records than there ever was. The present limit of parcel post weight is fifty pounds. That means that a number of records can be sent through the mail, and the dealer who supplements his monthly or weekly order for records with an occasional order by parcel post will have few disappointed customers to contend with.

"'Contend with,' by the way, is just the right way to express the case, for a customer who has been repeatedly disappointed is quite apt to develop a streak of passive antagonism for the source of his disappointment. The streak isn't always passive—on occasion it becomes acutely active.

"As we have said, parcel post takes care of emergency shipments quickly, and at a very moderate expense. The most vital thing is to know at a glance just what records you are short of and know exactly which records you are entirely out of. It can be done with practically no effort.

"Keep your entire retail stock of records in heavy manila envelopes. Stamp the number of the record in good bold figures in the upper right-hand corner of the envelope. Just underneath the number make a pencil memorandum showing how many of each particular record you have in stock.

"This is how it works: We will suppose that all your retail stock of records is in the special stock envelope, and that the factory envelopes in which the records were supplied to you, and in which you, in turn, must supply them to your customers, have been put into a special drawer.

"A certain number of records are sent out to-day. Each record is taken out of the 'stock' envelope, put back into the factory envelope and delivered to the customer. The empty stock envelope is then put into a special drawer.

"Next morning the boy who sweeps out the store fills all the empty 'stock' envelopes from your reserve stock and makes a pencil memorandum on the envelope showing how many more records of that number are in reserve. If there are no more of any particular record, the empty retail stock envelopes cannot be filled. Such envelopes are brought to your desk.

"For retail purposes it is best to keep your records 'on edge'—simply because records so kept can be taken out of or put back into each compartment with the least possible effort.

"Let the envelopes project a little from the rack. They should all face the same way, and when so arranged it takes only an instant to run the thumb along a whole row of the projecting corners. As this is done each number flashes into view. It is easy to find the record you want, and with the pencil memoranda of reserve stock to guide you, 'stock-taking' is an operation requiring only a very few minutes at any time.

"With such a system and with parcel post for emergency orders, disappointed customers should be few and far between so far as your store is concerned. With such a system the dealer will be able to show a much greater profit at the end of the year.

Fitting the Needle to the Record

Those who have used, or are using, some of the newer records of smaller diameter such as the six, seven, or eight-inch types, have at times been disappointed with the volume of tone quality. It is suggested by the manufacturer that the thin, or soft tone, needle be used for the best effects. Owing to the small size of the records and the quantity of music they carry the record grooves are of necessity set close together, and are narrower than the grooves in the large records. The points of thick, loud tone needles, therefore, do not reach to the bottom of the grooves, where in the hill and dale records the sound waves are recorded. The narrow needle going to the bottom of the groove, however, brings out all the music there is in the record. It is a suggestion that may prevent dissatisfaction and prevent the dealer from blaming the manufacturer for a condition for which he is not responsible.

The Art of Demonstrating

One of the first things a new dealer in the field should learn is the art of demonstrating. Just putting a record on a machine and starting the motor does not constitute a demonstration. If it is a new record that has never been tried the dealer is not sure that it will show off the instrument to the best advantage. There are no two records alike, and out of, say a dozen, there will only be two or three that will sound better than the others. It is up to the dealer to pick out two or three and use them for showing off the machine. The difference between a good record and a poor record carelessly selected may be the difference between a sale and a customer lost.

Club Idea Has Not Developed

One of our readers who has spent some time in England comments upon the fact that there are no associations or clubs of talking machine owners here whose members gather together at stated intervals to discuss new records, and ways and means for improving upon reproducing devices and other matters connected with the talking machine.

So far as The World has been able to learn there is no such club or association at present in existence in the United States, although an organization of that character was started some years ago in Dallas, Tex. Whatever experimenting is done here is done by individuals on their own initiative, and the great body of the public is inclined to accept the talking machine and records as they find them, relying upon the expert knowledge of the manufacturer.

PROSPERITY ABOUNDS THROUGHOUT THE PACIFIC COAST

Demand for Machines and Records—Association to Celebrate Anniversary—Byron Mauzy's Attractive Department—Recitals at Wiley B. Allen's—Edison Shop Activity—Other News

SAN FRANCISCO, CAL., October 28.—California talking machine dealers all speak most optimistically of the autumn situation. The demand for $75 and $100 machines exceeds the supply, and it is not always possible to get enough records. General business conditions on the Pacific Coast are better than a month ago, and there is every reason to expect one of the heaviest holiday seasons in years, not only in talking machines, but other musical instruments. The sale of cheap machines is pretty heavy, and the record business is very satisfactory, and on a better basis than ever before by reason of the policy of restricting the taking out of records on approval.

It is noteworthy the number of splendid improvements made in the Coast talking machine departments this fall. Almost all of the large dealers have increased the facilities of their departments, and made numerous decorative improvements. Also some very handsome exclusive talking machine shops have been opened of late.

First Anniversary of Association

The San Francisco Talking Machine Dealers' Association held a meeting on October 18, which was well attended. Plans were discussed for the next meeting, to be held on November 15, which will be the first anniversary of the association. The election of officers will take place at this meeting, and there will also be an informal banquet.

A. W. White, manager of the talking machine department of the Emporium, says the month of October has been very brisk in his department, and he is gratified that so large a proportion of the sales are in the higher-priced machines. Owing to building delays due to the difficulty in getting structural steel, the Emporium department has not yet been enlarged.

Edison Music for Motion Picture Theatre

The Maio Theatre on Market street has for some time been using an Edison phonograph to accompany reel features, and the manager states that the people seem to prefer good talking machine records to poor orchestral music. He is anxiously awaiting the promised larger-sized records, as they will be even more suitable for moving picture work.

O. N. Kruschke Makes a Change

O. N. Kruschke is no longer with the Pacific Phonograph Co., and it is unofficially announced that he will shortly accept the Pacific Coast agency for the Pathephone. Mr. Kruschke also has a talking machine business in Berkeley, Cal. He has just returned from a prolonged Eastern trip.

W. G. Garland, factory man for the Victor Talking Machine Co., now makes his headquarters in San Francisco.

Educational Work Gets Results

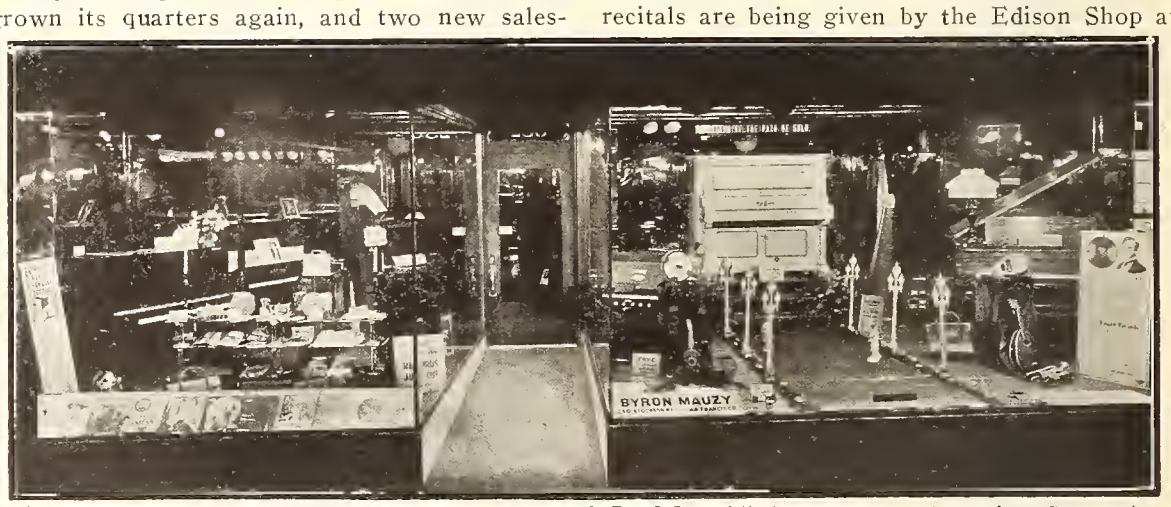
The Pacific Phonograph Co. is enjoying fine success with its educational recital work over the Coast territory. Glenn Ellison, the well-known Scotch vaudeville comedian, has been engaged to give tone tests with the Edison machines, and his work has been enthusiastically received wherever he has sung. He will be in San Francisco on November 2, and will give a tone test recital at Scottish Rite Hall. These recitals are all free to the public.

The Pacific Phonograph Co. is getting records a little more promptly from the factory, but there is still a shortage on some numbers, and also on certain medium-priced machines.

Paul Levy, a cousin to A. F. Levy, proprietor of the talking machine department of the Eilers Music House, and for whom he has been working, is now associated with the Edison Shop on the sales force.

Mauzy Department Growing Rapidly

The talking machine department of the Byron Mauzy music house has developed so successfully in the last few years that now Charles Mauzy has had to delegate some of the managing to H. A. Rayner, a talking machine man well known on the Coast who has just joined the Mauzy forces. Mr. Rayner was formerly with the Wiley B. Allen Co., and the Eilers Music House in Portland, and manager of the Eilers talking machine department in Tacoma for some time. He expects to find the opportunity with the Mauzy Co. to develop trade along progressive lines. The Mauzy talking machine department has outgrown its quarters again, and two new sales-



Byron Mauzy's Show Window During "Path of Gold Week" (Shows New Lighting System)

rooms have just been added on the third floor. These are large rooms, and are handsomely furnished and decorated with rugs, furniture and draperies. They will be devoted chiefly to the high-priced machines for the more exclusive trade.

A new feature of the Mauzy talking machine record department is the sealing of every record envelope so that the customer is assured of getting an absolutely new record. No records are exchanged or sent out on approval, and all demonstrations are made from a separate set of sample records. The record sold is simply tested once to see if it is perfect, and then is sealed until sold.

Occasional Recitals Prove Best

Mr. Haydock, manager of the Edison Shop, says business was exceptionally good during Edison Week, and that the new sales and demonstrating rooms, were used to the limit. No recitals are being given by the Edison Shop at present, it having been demonstrated that continued recital giving is not productive of the best results on account of the large number of "deadheads." Occasional recitals are judged to be more useful in promoting sales of machines, though regular recitals stimulated the sale of records.

Edison Department Making Good

Grove & Boggs, who conduct the talking machine department at Capwell's department store in Oakland, handle Edison goods only. Mr. Grove says that in the year that they have had the department business has grown stead-

MAKERS OF SOSS PRODUCTS

ily and surely and now the volume of sales can compare favorably with any talking machine department in Oakland. The firm has been having some exceptionally attractive show window exhibits of late.

The Columbia Graphophone Co. is still unable to get enough talking machines. Very favorable business is reported from the various Coast agencies. Record sales are very heavy, and high-class records show a big increase in demand.

To Agree on Scale of Allowances

James J. Black, manager of the Wiley B. Allen Co. talking machine department in San Francisco, says the third recital given by the company was fully as successful as the other two, and that the Victor talking machine was featured with vocal singing. Mr. Black states that the members of the Talking Machine Dealers' Association are expected to agree on a maximum price to allow on all second-hand talking machine merchandise at the next meeting of the association. There are not a great number of used machines on the market, but still the interests of the trade demand that this matter be established on a uniform basis.

Interesting Personals

W. E. Henry, San Francisco manager of the Columbia Graphophone Co., has been laid up with illness for the past week or so, but now is able to attend to business again.

Fred A. Dennison, Pacific Coast manager of the Columbia Graphophone Co., has gone to Los Angeles for a week's business trip. He will make his headquarters in the South with William F. Stidham, manager of the Los Angeles branch.

F. F. Dawson, formerly of the executive office of the Columbia Co. in New York, is now traveling for the Pacific Coast branch in the northern California territory.

Paul West, manager of the Dictaphone department of the Columbia Co., made his sales quota in October by the 10th of the month. The Dictaphone business is looking up considerably in this territory.

Mr. Munjar, manager of the talking machine department of the Wiley B. Allen store in San Jose, was a recent visitor to headquarters in San Francisco. He says the holiday outlook is very favorable in the Santa Clara Valley.

E. V. Ridgeway, representing Lyon & Healy, of Chicago, has just been calling on the local trade. At present he is in the Northwest.

The Buffham book store at Idaho Falls, Idaho, is to handle the Columbia Grafonola as a special feature in the future. The store is being rearranged so that attractive displays of the machine may be made.

The Phonograph Shop at 109-111 Stockton street, is having a most encouraging month in the handsome new location. Besides the Sonora phonograph, the Columbias are handled, and other makes will be sold later. The shop was ready for business the first of the month.

JOINS STANDARD T. M. CO.'S STAFF

A. B. Kinch, Formerly With W. F. Frederick Co., Becomes Assistant Manager of That Concern—To Specialize on Service

PITTSBURGH, PA., November 2.—A. B. Kinch, who has been resident manager of the wholesale Victor business for the W. F. Frederick Co. in this city since French Nestor's removal to Washington, D. C., has joined the staff of the Standard Talking Machine Co., as assistant manager. He will give his special attention to the service department and will give his personal attention to plans for featuring the sales of dealers in this territory. In announcing the appointment, the Standard Co. emphasizes the fact that all their efforts in developing the retail business reverts directly to the benefit of the dealer, for the company itself is interested exclusively in the wholesale business.

ATTRACTIVE FLOAT IN PARADE

Ackerman & Co., Victor dealers at 537 Linden street, Scranton, Pa., recently had an attractive float showing a Victor talking machine with the famous dog in a recent parade held to boost Scranton's industries.

AN ENTERPRISING PATHE DEALER

W. E. Drey Uses Novel Methods for Swelling Sale of Records

The accompanying photograph shows the establishment of Walter E. Drey & Co., 1358 St. Nicholas avenue, New York. Mr. Drey is one of the most active Pathé dealers in this section, and states that the demand for Pathé records and Pathephones is almost phenomenal,

Show Window of W. E. Drey & Co.

considering the short time he has been doing business in his locality.

Mr. Drey ascribes his success in part to the intensive effort he has personally put behind his business. He does not wait for sales to come to him, but goes after them!

One of his plans is to have his salesmen call upon his principal customer at frequent intervals to "inspect" their instruments. Sometimes the "inspector" finds a condition which needs attention, and he always carries a few of the latest records for "testing" purposes.

The customer is, of course, pleased with the service being rendered, and it is not surprising, therefore, that the inspector-salesman very often gets an order for the new records he has with him. Mr. Drey figures that in this way he is paid several times over for the salesman's absence from the store.

TO BUILD NEW SOSS FACTORY

Soss Mfg. Co. to Have Modern Five-Story Plant for Making Soss Invisible Hinges and Die Castings—Now Making Many Castings

The Soss Manufacturing Co., 435 Atlantic avenue, Brooklyn, N. Y., has recently purchased a large plot of ground located at the corner of Bergen and Grand avenues, Brooklyn, and according to an announcement just made, will shortly erect a new five-story, fireproof factory at this location. The new factory will comprise 40,000 square feet of floor space, and will be equipped with every modern appliance for not only manufacturing the Soss invisible hinges, which are being universally used in many industries, including the piano and talking machine trade, but also for making aluminum and other metal die-castings of various descriptions.

The factory will be so arranged that there will be one department devoted exclusively to the manufacture of hinges for the piano and cabinet industries, and others devoted to the manufacture of hinges for the automobile industry, in fact, a department for the manufacture of these invisible hinges for whatever lines of business they are used in. There will also be separate departments for the manufacture of die-castings.

For many years the Soss Manufacturing Co. have made die-castings for their own use, but have not manufactured them for outsiders. Finding recently, however, that they can handle a great deal of this business, they have enlarged their present factory to the extent that a fully equipped die-casting plant has been installed. The factory has been so planned that the work is done in the most progressive manner, and as they are well supplied with material are in a position to insure quick deliveries.

Although finished in various ways, the Soss invisible hinge has always been a cast product, so that the process is nothing new in this business, and the entire organization is amply capable of handling any business of this kind which may come to them.

C. J. Soss stated to a representative of The World recently that so far they had made a large number of die-castings for the automobile industry, and are now doing some work for some of the leading talking machine and player-piano manufacturers.

Samuel Soss has recently been traveling through the Middle West. The factory has been exceedingly busy ever since the first of the year.

NOW SHIPPING ORDERS COMPLETE

"During the past month we have established a number of important agencies for the Metro-Phone line of machines," said Franz Brückner, head of the Franz Brückner Manufacturing Co., New York, to The World. "We have increased our facilities so that our dealers may receive their machines in plenty of time for the holiday trade, and are now shipping machine orders complete as soon as they are received. We are particularly pleased with the demand for our No. 110 Metro-Phone.

"The cabinet end of our business is growing steadily, and manufacturers have placed large orders with us during the past few weeks. Our disc record cabinet department is also adding new accounts to its list day by day."

HEADS A. M. SWEYD CO.

Charles D. Isaacson, well known in the local music trade and previously associated with the Aeolian Co., and the Musical Instrument Sales Co., has become president of the A. M. Sweyd Co., New York advertising agents. Until recently Mr. Isaacson was president of the Joseph Ellner Co., New York, also advertising agents. He will continue to edit the "Music in the Home" page of the New York Globe—an interesting feature of that newspaper.

AWARDED FIRST PRIZE FOR DISPLAY

FREMONT, O., November 6.—Welker & Stierwalt, of this city, who arranged some time ago to handle the products of the Pathé Frères Phonograph Co., New York, prepared an exhibit for the Sandusky County Fair, reproduced here-

Welker & Stierwalt's Display at Sandusky Fair

with, which was awarded first prize. The judges were enthusiastic in their praises of the artistic conception of the booth's decorations, of which the Pathephone formed the basis. As there were forty-two booths at the fair, the honor accorded this exhibit was the subject of considerable newspaper comment. Welker & Stierwalt report a phenomenal increase in sales within the last few weeks and ascribe it not alone to the fact that the Pathé line has exceptional sales possibilities, but to the effective publicity they are putting behind it.

CRAIG APPOINTED MANAGER

S. B. Craig has been appointed manager of the branch of the Brunswick-Balke-Collender Co., at 61 East Long street, Columbus, O. He is particularly interested in furthering the interests of the Brunswick phonograph.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

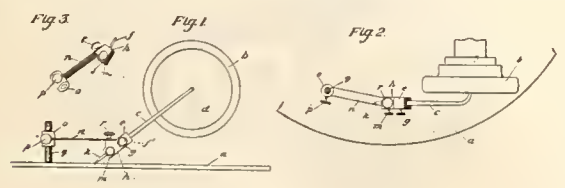
WASHINGTON, D. C., November 4.—PHONOGRAPH. Patrick B. Delany, Nantucket, Mass. Patent No. 1,193,242.

This invention relates to treatment of the surface of records for their protection and improvement when new and their improvement when old and worn. For this purpose the record is coated with graphite.

The records, whether disc, cylindrical or of other formation may be coated with graphite in any appropriate way. The best results may be obtained with pure graphite. When graphite, in the form of a stick or block is used to coat the record, it is preferable that the stick be composed of pure graphite plus the feasible minimum of binding material. The block or stick of graphite, held in a suitable support so that it will bear upon the surface of the record that is revolving with the table or support of an ordinary reproducing machine, acts to coat the surface, and the reproducing needle running in the channels or grooves of the record acts as a distributor of the graphite that brings it into intimate relation with the surfaces of said grooves. It is well known that graphite is an efficient lubricant and that its lubricating qualities depend upon its capability of attenuated distribution and filling the pores of surfaces to which it is applied. These characteristics afford very markedly improved results in the reproduction of musical tones and spoken words from a graphite coated record. Even the needle, whether it be of steel or other composition, becomes surface coated and filled with the graphite. The general result is that there is a reduction of friction, and a characteristic smoothness of contact between the surfaces of the needle and record that causes objectionable sounds ordinarily present to be eliminated. Experience has demonstrated that in addition to the advantages above suggested static electrical effects due to frictional contact of the needle and record are eliminated or dissipated where the record is coated with graphite which is a fair conductor of electricity. Furthermore, there is less likelihood of dust or floating particles of any kind adhering to the graphite coated record than there is in the case of the ordinary uncoated record. The surface of the record being covered with graphite is divested of its electro-static capacity for the reason that the graphite instead of being an insulator is a conductor and therefore does not attract floating particles or hold them when lodged by gravitation. Rubber, sealing wax or glass when rubbed with dry fabric will hold a static charge, but if any of them be coated with a conducting material their static capacity is dissipated.

The graphite may be applied to new or old records by placing the record in a reproducing machine and revolving the disc in contact with a stick or block of graphite held in the hand or mounted upon an arm carried by the needle head, which arm may be resilient so as to press the block yieldingly against the record.

The accompanying drawing shows a practical and highly efficient way of applying graphite



to a disc record. Figure 1 is a diagrammatic side elevation; Fig. 2 a similar plan view; and Fig. 3 a perspective view of the graphite applying attachment separated from reproducer arm.

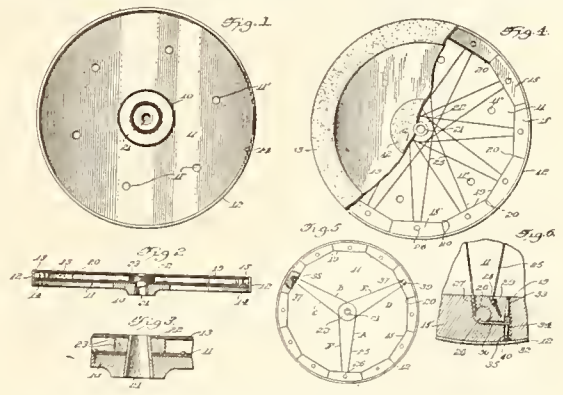
RESONANT BODY.—James H. Collins, Harrisburg, Pa. Patent No. 1,193,995.

The object of this invention is to provide a hollow, resonant body for use particularly in conjunction with sound reproducing machines, said body being provided with members independently capable of being placed under varying degrees of tension.

More particularly the object is to provide a removable, hollow record support, adapted to universally fit any type of machine for reproducing sound from disc records, though the principle involved is equally adapted to record supports of other types.

In this art there is often experienced a condition in which a given note, chord or other sound, is incorrectly recorded, in which case it is desirable to reproduce the particular sound with its intended pitch, tone and other characteristics; also, there is frequently a condition in which a correctly recorded sound is not reproduced with its intended individual qualities, because of the peculiarities of the particular reproducing machine employed, or because of the objects within the room or other inclosure surrounding or in the neighborhood of the said machine. Such conditions as these, the present invention is designed to counteract to the end that the actual sound recorded is the sound actually heard, it being understood that to impair the results obtained in reproducing a record it is not necessarily true that the pitch, or other quality, should be extremely incorrect. This briefly is accomplished by reinforcing, or augmenting, the respective sounds reproduced by the usual sound box, and before they leave the machine, by a series of vibrant, tensioned members supported in conjunction therewith.

It has been found that in the ordinary sound reproducing machine, a considerable vibration is imparted to the record support by reason of the irregular, vibratory co-operation existing between the usual disc and the reproducing stylus: in the case of a "hill and dale" record this vibration, caused by the stylus riding over the vertical irregularities of the groove, is substantially perpendicular to the plane of the record support, while with a lateral cut record, the vibration is substantially parallel with the



plane of the said support, and is to a great extent impressed upon the upper portion of the spindle passing through the record disc. In this invention it is the object to utilize this vibration to transmit to perfectly tuned strings, or other members, the characteristic vibrations of a record, it being a well known fact that when a given period of vibration, as that of a sound conveyed through substantially any known medium, comes into contact with, or by mechanical means is impressed upon, a vibrant body possessing substantially the same natural period of vibration, said body responds and tends to modify, augment or reinforce the original sound. Furthermore, if there is but a relatively slight difference in the two characteristic periods of vibration, the string responds, though less energetically, and if sufficiently strong tends to correct the audible sound emitting from the machine.

In the perferred embodiment of the invention there is provided a plurality of correctly tuned strings, which by reason of their peculiar characteristics are adapted to respond to a greater or less degree to practically any period of vibration impressed upon them through the medium of the walls of the hollow record support, and in thus responding they have a positive tendency to clarify and enrich the sound reproduced. Furthermore, while there are certain recorded sounds characteristic of particular instruments to which they respond more freely, their effect upon the reproduction of all sounds is marked, these including even that of the human voice.

In the drawings Figure 1 is a bottom plan view of the preferred form of the device; Fig. 2 is a vertical diametrical section of the same with the strings removed; Fig. 3 is an enlarged detail section of the central portion of the same, including the combined hub, and bridge; Fig. 4 is a plan view of the device showing the annular record supporting members, and partly in section with the top wall removed; Fig. 5 is a plan view of the same, showing the course of one of the vibratory elements; and Fig. 6 is an enlarged section of one of the string tensioning means.

SOUND REPRODUCING MACHINE FOR ADVERTISING PURPOSES.—Edward L. Christensen, Ann Arbor, Mich., assignor of one-half to Wm. J. Ross, Detroit, Mich. Patent No. 1,193,762.

This invention relates to sound reproducing machines, and its object is to provide such a machine so constructed as to emit words, phrases or sentences constituting advertising or other matter on the occasion of certain acts performed by various persons.

In accordance with the present invention a sound reproducing or talking machine is provided with a sound record which may contain numerous repetitions of the same words, phrases or sentences for successive reproduction thereof, or may contain any desired recorded sounds either for advertising or for announcement purposes. The talking machine is so constructed and arranged that it may be made fast to a door casing above the door in such manner that on opening the door the talking machine is set into motion and reproduces a suitable portion of the record, after which the machine is automatically stopped. The opening of the door also winds up the propelling spring of the talking machine to an extent compensating for the active movement of the talking machine caused by a previous opening of the door. The talking machine is primarily wound up to a desired extent and is kept wound up to the extent it unwinds on each active movement of the talking machine by the opening movements of the door.

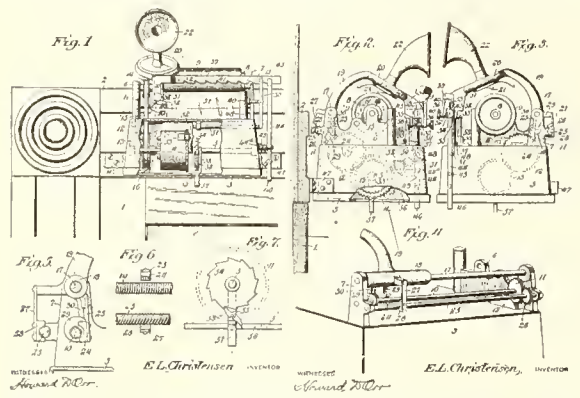
It is the purpose of the present invention to install the talking machine over the store doors or other doors leading into rooms entered by customers or others to whom the announcements made by the talking machine may be of interest. The customer on opening the door sets the talking machine in motion, though this may be an unconscious act on the part of the customer, and the machine continues in operation for a time for which it may be prearranged, and then automatically stops. Successive openings of the door cause the talking machine to be set in motion each time the door is opened, until finally the sound reproducing element has reached the limit of its travel, whereupon such sound reprdoucing element, customarily called the sound box, is returned to the initial position by the automatic operation of suitable mechanism. Since the spring usually employed in such machines is wound up before each operation to the extent which it runs down during such operation, the spring remains wound to the original condition, and if the spring be wound up initially to the proper tension, the only thing which will cause the spring to run below its initial tension will be the power consumed in returning the sound box from the position representing the end of its travel to the beginning point of such travel. Even this may be provided for by so adjusting the intermittent winding actions that each winding action is slightly in excess of the amount required to restore the used energy on each operation of the talking machine for reproduction of sound. The machines capable of such adjustment with respect to the winding as to run indefinitely, the power needed to maintain the motor spring under proper tension being supplied by the persons traversing the door passage. The arrangement is also made in such a way that the talking ma-

(*Continued on page* 114)

chine may respond to, say, the opening movement of the door and be unresponsive to the closing movement thereof.

The invention will be best understood from a consideration of the following detailed description, taken in connection with the accompanying drawings forming a part of this specification, with the further understanding that while the drawings show a practical form of the invention, the latter is not confined to any strict conformity with the showing of the drawings, but may be changed and modified so long as such changes and modifications mark no material departure from the salient features.

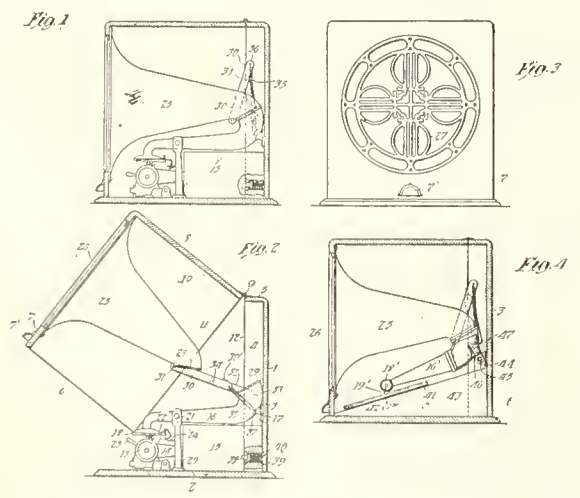
In the drawings, Figure 1 is a front elevation with some parts broken away and showing the invention applied to a door frame. Fig. 2 is an end elevation of the structure of Fig. 1 with some parts broken away to disclose more distant parts and the door frame shown in cross section. Fig. 3 is an elevation of the end of the talking machine structure remote from that



seen in Fig. 2, some of the parts being in a different position from that shown in Fig. 2. Fig. 4 is a perspective view of a portion of the mechanism embodied in the present invention. Fig. 5 is a fragmentary cross section through the feed screws and adjacent parts. Fig. 6 is a fragmentary section through the feed nuts and also showing small sections of the feed screws in their relative positions with respect to the feed nuts. Fig. 7 is a fragmentary section showing a portion of the rewinding structure.

Phonograph or Talking Machine.—Frank L. Dyer, Montclair, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 1,194,488.

This invention relates to phonographs or talking machines of the type in which the horn or sound amplifying means is inclosed within a cabinet which conceals or partially conceals the same, and the object is to provide a simple and compact device of this character in which a horn or sound conveying means of a length sufficient to give the sound reproduced the desired amplification, is inclosed within a small and compact cabinet. In pursuance of this object a



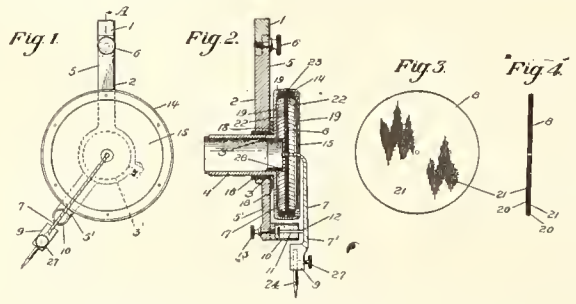
sound amplifying horn or conveyer is mounted within a cover which preferably is hinged to the cabinet containing the phonograph or talking machine, the amplifying horn when the cover is closed making joint with the tone arm or other connection from the sound box, so that a continuous sound passageway is provided from the reproducer to the exit end of the sound conveyer. By this means the horn may be forwardly directed above the talking machine when the cover is closed, the horn and connections being coiled or bent in such a manner as to give the desired length thereto, while at the same time the record and reproducer are rendered readily accessible for changing records, etc., by merely opening the cover. This invention is equally applicable to phonographs and talking machines of the cylinder and of the disc type.

Figure 1 represents a vertical cross section through a cabinet having a cover pivoted thereto in closed position, a phonograph of the cylinder type, together with the tone arm, amplifying horn, etc., being shown in elevation contained therein. Fig. 2 is a similar view showing the cover in open or raised position. Fig. 3 represents an end elevation looking from the left in Fig. 1 or Fig. 4; and Fig. 4 is a view corresponding to Fig. 1, showing the invention applied to a talking machine of the disc type.

Talking Machine.—Patrick B. Delany, South Orange, N. J. Patent No. 1,190,635.

This invention is more particularly applicable to reproducing machines and its objects are to improve the behavior of such machines.

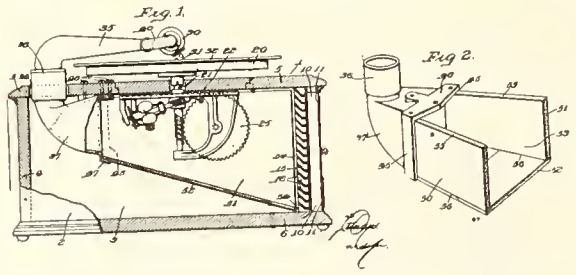
In the accompanying drawing: Figure 1 is a side elevation; Fig. 2, a section on the line



A, B, of Fig. 1; Fig. 3, a face view of a reproducer diaphragm; Fig. 4, a transverse section thereof.

Washington, D. C., November 6.—Talking Machine.—John C. English, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 1,196,448.

This invention relates to certain new and useful improvements in talking machines. In the accompanying drawings Fig. 1 is a side elevation partly in vertical central section of a



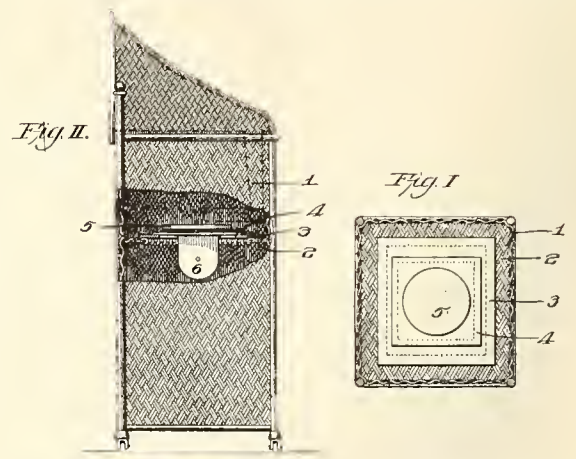
talking machine constructed in accordance with this invention, and Fig. 2 a fragmentary perspective of a portion of the same.

Non-Resonant Music Cabinet.—Alva D. Jones, Philadelphia, Pa., Patent No. 1,196,366.

This invention relates to a novel construction of a talking machine cabinet, being formed of a non-resonant substance and preferably made from ratan, willow, or other reed substances.

It is a well-known fact that the musical vibrations occurring in the talking machine as well as piano arc greatly marred by sympathizing and exciting to vibratory movement the supporting frame and body portion of these instruments. This is particularly undesirable in the case of the talking machine as this instrument has to deal with the reproduction of the human voice, the tonal quality of which is greatly varied in accordance with the various board parts of this instrument as it has been constructed in the past. After exhaustive tests it has been found that on reproducing records of various tonal qualities and pitch, that on placing the hand on the wood parts of this instrument, the wood vibrates to a very considerable degree, and that the various sounds coming from the record sympathize with various boards going to make up this cabinet. For example, a very high pitch will sympathize with a certain board—a very low pitch with a different tonal quality will sympathize with a separate panel of the wood work depending upon whether this particular panel or board is to a greater degree in sympathetic vibratory accordance with a respective sound coming from the record. In the new construction of this talking machine cabinet, a non-resonant but yet vibratory substance is used, which is not capable of changing the speed of vibrations coming from the record or in any way adulterating them. In accomplishing this function in a talking machine cabinet, it is found that reed is more durable than wood.

Fig. 1 is a plan view of the new construction of a talking machine cabinet taken through



the central portion of said cabinet, showing the motor and turn table mounted on a plaited non-resonant ledge. Fig. 2 shows a side elevation of the new talking machine cabinet, partly in section, showing a motor and turn table mounted thereon.

Stylus for Talking Machines and Process for Making Same.—Leander J. Whiteman, Jr., Newark, N. J. Patent No. 1,197,165.

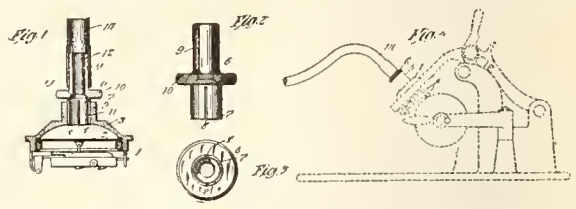
This invention relates to talking machines and comprises a novel stylus or reproducer point for use in such apparatus, and a novel process for making same. One of the claims follows:

"The process of making a sound reproducing stylus which comprises the following steps, first, subjecting properly shaped pieces of compressed bone to a hardening treatment; second, treating the pointed end of the stylus so formed to an acid bath which dissolves out the earthy salts contained in the compressed bone, and third, saturating the porous structure left after the second step with a lubricating fluid."

Sound Modifier.—Nelson C. Durand, Newark, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 1,197,722.

This invention relates to sound modifiers, and more particularly to an improved sound modifier for use in connection with the reproducers of phonographs.

Fig. 1 is a central sectional view of a phonograph reproducer and one form of invention



applied thereto; Fig. 2 is a side elevation of the sound modifier of Fig. 1; Fig. 3 is a bottom plan view thereof; Fig. 4 is a side elevation showing in dotted lines a phonograph of the Edison commercial type with the device of Fig. 1 applied thereto and provided with a flexible ear tube.

STURZ BROS. HANDLING STARR

Sturz Bros., at 142 Lincoln avenue, Bronx, manufacturers of the Sturz upright and player-pianos have taken the agency for the Starr phonograph in their section. Several styles of Starr machines, which were received last week, are now on exhibition at their headquarters in the Bronx.

DISPLAY THE SONORA PHONOGRAPH

The Herbert & Huesgen Co., one of the leading optical and photographic establishments in New York is devoting a considerable portion of its warerooms at 18 East Forty-second street, to a display of Sonora phonographs. This company caters to a high-class clientele.

To Sonora Dealers—

We are doing over 6 times the business this year that we did last —and 1915 was no small year!

So that you can get your shipments in time for the holiday business it is absolutely essential that you send in your orders at once. In ordering, remember that sales this year will be exceptionally big because of the wonderful popularity of Sonora, the extensive Sonora Christmas advertising which is being done, and the great prosperity of the country.

Reread the second cover.

We shall have to adhere to the rule, first come first served.

Yours very truly,

Sonora Phonograph Corporation

GEORGE E. BRIGHTSON, President

Executive Offices, 57 Reade Street, NEW YORK CITY

320 South Wabash Avenue, CHICAGO

109 Stockton Street, SAN FRANCISCO

DEALERS PROTECT YOURSELVES!

The Sonora Phonograph is manufactured and sold under an agreement which permits it to operate under the GREAT BASIC PATENTS of the phonograph industry. Therefore dealers selling the Sonora are safe from troublesome litigation.

The TALKING MACHINE WORLD

For the makers & sellers of talking machines

Published Each Month by Estate of Edward Lyman Bill at 373 Fourth Ave., New York, December 15, 1916

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces"—*Collier's Weekly.*

Entered as second-class matter May 2, 1905, at the post office at New York, N. Y., under the act of Congress of March 2, 1879.

PAST THE QUARTER MILLION MARK!

THAT over a quarter of a million Sonoras have been sold in a few years is significant.

SONORA'S appeal has never been on price—it has been exceptional quality and extraordinary merit *always*.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

is to-day the leader

THE HIGHEST CLASS TALKING MACHINE IN THE WORLD

THE public is buying *Sonoras* so fast that our manufacturing capacity is taxed to the uttermost. Sonora dealers are enjoying a phenomenal business right now. No time to think of anything at present but demonstrating, taking orders and making deliveries.

You, too, will be able to do this splendid business *if you sell Sonoras!*

The instrument, the sales help, the guarantees which we make, and the reputation of this company should have your careful consideration if you wish to have a remarkably prosperous trade in 1917.

Possibly your territory is still open and you can secure a Sonora Agency. *Write to-day for information.*

THE QUALITY IDEA VERSUS CHEAPNESS IN BUSINESS

A Machine That Will Stand Up Well Should Be First Consideration of the New Manufacturer —The Study of Past Performances Will Protect Against Pitfalls

"The trouble with a number of the newer talking machine manufacturers, and dealers for that matter, is that they still persist in believing that 'system' belongs to the race track and does not fit in business," said the Old-Timer. "In my younger days I have run across the fellow who believed he could read the horse's mind by looking in his eyes, and who fraternized with the man who slept with the horse in order to get a line on just what that animal would do in the next race. Getting this information and studying the atmosphere and the quality of the soil underneath the race track, the tout developed what he called his system and generally lost money.

"Once in a while there comes a man who believes that even the race track system can succeed in business, and peculiar to relate it does. By studying the character of the machine offered, the disposition of the public and the condition of the trade, and in compiling a list of past performances of those in the trade and those who have been in and who have gone out, the new manufacturer can probably dope out a system that will enable him to place his best bets right.

"When a man wants to buy a race horse he fights shy of the bad performer; the horse that cannot be depended upon. This is a good tip for the talking machine man. The first essential in business is a product that will stand up. If a manufacturer can send it out with the feeling that it is going to live up to the claims made for it, that the motor is not going to squeak, or give out quickly; that the tone-arm is not going to rattle, or the reproducer prove faulty, and give an imitation of a man singing in a coal mine, then he has a machine upon which a solid business may be built.

"Then you have the disposition of the public to think about. Cheapness is not the best argument in the world. There must be quality with cheapness. The shortage of machines very seldom affects the low-priced models. It is the better grade of goods that sell fast and are hardest to get.

"Then we have the trade track. When it's 'muddy' the manufacturer should prove himself a good mud horse and should be able to take the heavy going without weakness. Proper financial preparation is the best assurance of this ability, and it must be remembered that the good mud horse is not the one that likes the moist earth so well that he lets the other horses kick it on him. He is the fellow that gets out in front. If the new talking machine manufacturer is satisfied with the business that the manufacturers in front kick back at him simply because he has not the ability to get in the front rank and get some of his own, there is something the matter with his business. Any old plug stands a chance on a fast track. It is the one that can overcome unfavorable conditions that is worth while.

"And, while we are talking about cheapness we might say that cheapness often leads to suspicion. If a fellow stops you on the street and offers you a karat diamond ring for twenty-five dollars, either there is something the matter with the ring or he doesn't want the police to know that he's got it. In the talking machine field the companies that have been successful and are being successful are the ones that have gone after the quality trade; that have given the public a good machine at a price that will enable them to manufacture good machines profitably. 'Almost as good for less money,' is not half as convincing as 'Just as good, or better, for the same money.'"

CAUTION AGAINST MISLEADING ADS

New York Evening Telegram Prints Warning and Copy of Law at Head of Classified Columns—Result of Recent Campaigns

These are troublous days for the person who endeavors to advertise and sell, as a prominent standard make, some obscure talking machine with little or no standing of its own. In several cities of the country advertising clubs and newspapers have gone on the trail of this class of dealer and made it mighty uncomfortable for him.

In New York one of the tribe was fined $25 for selling a machine of local origin as a Victrola. One of the results of the campaign has been the insertion of the following notice at the top of the column devoted to pianos and musical instruments (dealers) in the classified advertising section of the New York Evening Telegram. It is significant:

CAUTION

When buying a phonograph insist that the manufacturer's name or trade mark is on the machine purchased. This is your protection against misrepresentation.

FRAUDULENT ADVERTISING

"If any person, firm, corporation or association, or agent or employe thereof, with intent to sell or in any wise dispose of merchandise....knowingly....publishes....or causes, directly or indirectly, to be published....in this State, in a newspaper....an advertisement, announcement or statement of any sort regarding merchandise....which contains any assertion, representation or statement of fact that is untrue, deceptive or misleading, such person, corporation or association, or the members of such firm, or the agent of such person, corporation or association or firm, shall be guilty of a misdemeanor, punishable by a fine of not less than $25 nor more than $1,000, or by imprisonment for not more than one year, or both such fine and imprisonment."—From the Laws of the State of New York.

Readers of the Evening Telegram are requested to notify in writing any violation of the above law.

This is a step in the right direction and it is hoped that other newspapers will take the same stand whether or not they publish a similar warning.

FEATURING COLUMBIA ARTISTS

McMahon Piano Co. Finds It Is an Excellent Way to Develop Record Sales

YOUNGSTOWN, O., December 8.—One of the the most successful retail stores in this city, is the McMahon Piano Co., which in addition to handling a high-class piano line, carries the product of the Columbia Graphophone Co. The company is a firm believer in utilizing all available publicity methods, and attributes a considerable measure of its success to the co-operation which it has received from the Columbia Co.'s advertising and sales divisions.

Store of McMahon Piano Co., Youngstown, O.

A competent sales staff leaves no stone unturned to interest local music lovers in the qualities of Columbia products, and particular attention has been paid to the famous artists who have recently been signed up by the Columbia Co. For example, the recent announcement that Lazaro had signed a Columbia contract, was utilized by the McMahon Piano Co. to produce many record sales.

THIS MAN WAS FROM MISSOURI

Had Nine Talking Machines in His Home, in Order to Make Decision as to Which He Would Purehase—How Philipps Won Out

ST. LOUIS, MO., December 5.—Ben Philipps, retail manager of the Columbia warerooms, tells the best selling story of the season. Of course he made the sale, or he would not tell the story.

"A few days ago," he says, "a man came in and asked if we were willing to show our machines in competition. Of course I accepted the challenge. Then I began to ask questions, and he told me he had 'several machines out home, but he was not entirely satisfied.' Finally I offered to take a machine out that night if he would make his decision before I left. He promised, but I still was suspicious. 'You know we are not in the business of amusing families or entertaining parties,' I said, 'and you must promise to buy a machine.' He promised.

"After dinner I put a $75 model in my auto and went out. That man's living rooms looked like a talking maehine salesroom. There were eight machines there when I earried mine in. Three of them I knew, but five I have never seen before, and some of them I did not know were made. I was the only demonstrator present. In two hours I had the money. The next morning another sales manager called me up to warn me, saying that he was suspicious that this man was imposing on some one. I told him I got in last and out first."

VICTOR ADVERTISING "VISUALIZED"

Reproduction of Over Fifty Title Pages of Magazines Carrying Victor Advertisements Makes Most Impressive Showing

Everyone in the talking machine trade or out of it appreeiates in some measure the tremendous amount of advertising done by the Victor Talking Machine Co. in national magazines of all classes. The extent of this advertising is brought home in some measure to the Victor dealer in "The Voice of the Victor" for November, the eenter, or backbone, of which consists of a four-page spread showing miniatures in actual colors of the cover pages of some of the magazines in which Victor advertising appears. Although over fifty magazines are shown in the layout all those which carry Victor advertising are not included, among the absentees being the Saturday Evening Post and other important Victor mediums.

It means much to the dealer to feel that as he passes a well stocked newsstand that practically every purchaser of a magazine from that stand is going to find Victor goods advertised therein, and thereby be influenced to become the owner of a talking machine.

HEARS VOICE CROSS THE COUNTRY

Thomas Egan Enjoys Interesting Experiment in Conneetion With the Pathephone

The Sixty-ninth Regiment Armory in New York City, was a scene of an unusual gathering recently when Thomas Egan, the famous Irish tenor, stood beside a Pathephone and listened to his new production of an old Gaelic folk song, being sent from New York to San Francisco.

In this gathering stood Governor Whitman and his staff, Mayor Mitchel, various city officials and other well-known men who heard with interest Egan's voice singing in a language that up to a comparatively recent date had been considered dead, and which is known to very few Irishmen.

Thomas Egan is under exclusive contract with the Pathé Fréres Phonograph Co., and his popularity insures the success of his records.

SENTIMENT—ITS FORCE IN SELLING TALKING MACHINES

E. Richards, Manager of the Talking Machine Department of the Kennedy Furniture Co., Chicago, Points Out the Value of the Sentimental Interest a Good Salesman Can Arouse

First impressions are of the utmost importance in the sale of talking machines. For this reason it is important that the salesman should secure the attention and good will of his prospect at the start, so that attention may be held while a demonstration is given and other arguments offered as to why the prospect should buy.

In selling a talking machine, it must be borne in mind that this is a luxury, and that, unlike a piece of household furniture, it is not absolutely essential for the family's welfare. Sentiment plays a large part in the purchase of the "talker," and it is in his appeal to the sentiment of his prospect that the salesman must be able to reach his buyer.

Somewhere in the catalog of any of our present day record manufacturers will be found the exact record which will, whether it be orchestra selection, song, band, concert or humorous dialogue, break the crust, get under the skin and reach the pocket book of the prospective purchaser. The man who can judge quickly the prospect's temperament, nationality and general tastes, possesses the open sesame to success in the sale of talking machines.

There's a certain amount of psychology in the demonstration that well deserves the attention of salesmen in this line. One could almost make a comparison between the salesman of talking machines and the dramatist, who in order to keep the attention of his hearers, must not continually harp on one string, but must inject some variety into his theme. Just as in every play, no matter how sad or pathetic, there must be some humor injected in order to please the auditors who want variety or humor besides tragedy, so the talking machine salesman must learn to understand the sentiments of his prospective customers.

In order to make a sale it is not necessary to play a large number of records or to give a concert for the benefit of the listener. Three records well selected will, as a rule, draw forth some expression from the prospect, and once the responsive chord has been found and struck the salesman has his cue as to how to proceed further in making that sale.

A lively band record followed by a clear tenor solo and a humorous record will usually break down the prospect's reserve, and once his sentiment and sense of humor is aroused and resistance to sales arguments lessened the responsive chord has been found, and the sale is either made or lost.

Playing too many records may have exactly the contrary effect hoped for, and may tire the patience of the listener before the demonstration is over.

There are many little points of salesmanship to be observed by the clerk which often are important in the final outcome of a demonstration. He should be certain in the first place that the mechanism of the machine is in perfect working order so that there are no unnecessary halts, delays or strange noises while the demonstration is on. Needles should be carefully inspected and he should be sure that the needle he is using is exactly the one to give the best rendition of the selection he wishes to have his prospect hear. While demonstrating a record the motor should not be wound; this should be attended to before the motor is started and a good start made before settling the reproducer on the record. The result of this will be that your record starts on the original pitch at which it was recorded and there is no unpleasant discord.

The difference between making a sale of an $80 or $100 machine and one at $15 is largely one of good salesmanship, and the clerk who has charge of the department should know his prospect. In the purchase of a talking machine the musical feature is not by any means the only one that appeals to the customer, especially if it be a woman. Nowadays the cabinet plays a most important part in the sale of a machine, and to be in harmony with the other furnishings of the house the music cabinet must harmonize somewhat with the room furnishings in color, nature of wood and design. Some of the handsomest music cabinets of to-day are built to match period suites in furniture, and the woman buyer is just as particular that the style be appropriate and the color in harmony with that of the room in which she wishes to install the instrument as she is about the instrument itself. This point must not be lost sight of in making a sale, and a sufficient variety of cabinets must be carried in stock to meet all tastes. Nearly every music cabinet manufacturer has some special feature about his cabinet that well deserves consideration; some new system of filing records, a patented sliding compartment arrangement by which records can be reached without difficulty, a unique filing system for records, or some other advantage which it is well worth bringing to the attention of customers.

Furthermore, the motive of the buyer in purchasing an instrument must be kept in sight. Some persons would not be interested in the slightest in a comic dialogue or coon song, while, on the other hand, it would be just the record to demonstrate to the man or woman who appreciates humor and doesn't care much for the classic. Sentimental pieces appeal, of course, much to young women of nearly all types, and ragtime goes well with boys and young men. Often a hit can be made by playing some of the old-fashioned melodies and Southern songs.

Te get the best results from selling phonographs or talking machines a booth or demonstration room should be arranged where patrons may listen without being disturbed by other records being played, and where they may hear special selections for which they may ask. Especially is this necessary in the sale of records, as much of the delicate tone shading and finer points of orchestral selections are lost when the demonstration is given in the open store, and where the music detracts from the attention which other salesmen must give to their prospects. A loud band concert piece played while a clerk is trying to make a sale of some other article is distracting, and for this reason as well as the privacy afforded to record and instrument buyers the talking machine booth should be installed wherever practicable.

All instruments as well as music cabinets should be kept in first class working order at all times; the mechanism of all machines in stock needs a little inspection, and cabinets should be kept clear of dust and dirt. Popular selections, pieces that are being played at the local theatres and songs that are being sung in vaudeville are always among the best sellers. The salesman must be up to date in these matters if he means to keep his stock moving.

SHOWING THE SINGER HOW BAD HE IS

A New Application of the Talking Machine in the Teaching of Singing

For sometime past talking machines have been employed in the teaching of singing, and their use in that connection is no longer a novelty. In Western schools, however, the practice is given added interest, because instead of just letting the pupil hear the artist's singing of a particular number, the student himself sings for the record. He does his best, and when the record is reproduced learns how bad his singing really is. It is said that the system has been most effective in showing students just wherein their errors lie—it has enabled them to hear themselves as others hear them.

The Universal Phonograph Co. has leased the premises at 70 Cortlandt street, New York City, and will use the same as a retail store.

MACHINE SHORTAGE ONLY WORRY OF ST. LOUIS DEALERS

Freight Tieups Serve to Add to Complication—Silverstone Music Co. Plans Gala Day—Victrola Educational Department at Vandevoort's—Heavy Advertising Campaign—Other News

St. Louis, Mo., December 5.—The talking machine dealers of St. Louis are about ready to throw up their hands in despair. Most of them have not the slightest idea how they are going to handle their Christmas trade. The retailers all assert that their stocks will not begin to see them through and the jobbers do not see how they are going to meet the demands being made upon them for large machines.

Mark Silverstone of the Silverstone Music Co. says that he probably will be able to make fair distributions up to Christmas. Manager Gordon of the Pathephone Co. says he "hopes to have enough but that he cannot stock several prospective retailers who would like to place orders now." Wholesale Manager Salmon of the Columbia is diplomatic, he says that he still is making fair distributions of all but small machines. Robert Cone, Jr., manager of the Artophone Co., says that he is hopelessly behind and that he is going to do the best he can for Christmas and three months after. President Koerber of the Koerber-Brenner Music Co. threw up his hands when asked as to the prospect of Christmas deliveries.

That is the condition. Some retailers already are predicting that they will be out of the standard sizes of machines by December 15. Manager Gutenberg of the Aeolian Co. says that on December 1 his company had something like 40 machines set aside for Christmas delivery, a record that he was unable to find anything near its equal in Aeolian Hall records. His department is fortunate, at least, in having a good stock of the smaller Aeolian-Vocalions and he is in hopes that he can place some of these to hold places for deliveries of larger machines. He has sold a number of the new, large box machines for Christmas delivery. These machines are proving very interesting to the Aeolian Hall trade.

The Silverstone Music Co. is planning for three gala days December 18, 19 and 20, when Miss Elizabeth Spencer of this city, an Edison artist, comes to her home here for the holidays for she has promised to sing at the Silverstone auditorium for those three days. Mr. Silverstone is a very firm believer in the tone tests and the interest shown by Edison owners in bringing their friends in to hear, appears to be argument in favor of this sort of advertising.

The Vandervoort Salon has established, the first of the month, a Victrola Educational Department with Vernon S. Behymer in charge. Mr. Behymer is new to the talking machine game but he is well versed in the new theories of educational work and is entering on this work with enthusiasm. B. M. De Cou of the Victor Educational Department, was here to assist him in opening the department and after the first of the year, Mr. Behymer will again have aid from headquarters. In the meantime he will be getting the local field mapped out and interesting the School Patrons' Association, through which most of the sales have to be made. Lately there has been much complaint that in schools where talking machines have been bought the teachers have not been getting the most out of them. In some schools, the patrons have complained the machines were not used, so it would seem that there is room for work among the teachers, with a view of developing a trade in records where the machines sold years ago are practically useless as trade factors and as educational means at present.

The Brunswick machines were introduced to the public last month. Miss Rose Rosenblatt is in charge of the department under General Manager Jackson, who also has charge of the wholesale distribution. The Brunswick-Balke-Collender Co. have been awaiting this event for some time and removed their billiard supply store to Olive street last July in anticipation of entering the talking machine market. The machines already have been placed with several local dealers, including the Field-Lippman Piano Stores.

The shortage of machines here is in part due to the miserable freight conditions, car shortages, embargoes, etc. President Koerber of the Koerber-Brenner Co. said that the normal time at present for shipments from New York was ten days by special transit lines. The ability to make shipments from the east at all depended upon the watchfulness of the shipper in making his shipments when an embargo was not in force. Manager Gordon of the Pathephone Co. said on December 1 that he still was waiting for a shipment of machines that had been on the road for fifteen days and that he had received a telegram that day that an additional shipment had been started. He said that without both of these shipments, he would be helpless at Christmas.

When the Columbia new record ad failed to appear at the proper time inquiry was made at the Columbia warerooms here as to the reason. The answer was that the records had been caught in the freight tangle and that tracers out for several days had failed to locate them. The advertisements had been received, and were in type in all of the newspapers in the various cities that published them waiting for release as soon as the records could be received and dispatched. The advertisements appeared about ten days late.

Despite the condition of the supply of machines, the advertising continues very heavy. The Victor Co. has been using the full page Caruso ad in this territory and Aeolian Hall is using about twice the former space. Aeolian Hall also has gone into the street cars and on the bill boards with artistic advertising. The Columbia also is using space heavily for machines as well as records. The Silverstone Music Co. has been going into the newspapers with increasing space for machine publicity. But all of these advertisements are of the sort that go to make sentiment rather than immediate sales. The latter sort of advertising is left to the dealers and they are not enthusiastic over it at present, because they do not see where they are going to meet any demand they might create.

Robert Cone, Jr., of the Artophone Co., in talking of his difficulties with deliveries said that he has practically taken over three woodworking factories here to make his cabinets and that a third furniture company is devoting its surplus capacity to his work, but that he has been unable to meet the demands. The cabinets that he ordered in August are coming through and that, while he thought then that he was plunging, he finds now that he was a piker. Mr. Cone is using four rolls of films in the moving picture shows, his only advertising at present.

E. C. Rauth, secretary of the Koerber-Brenner Music Co., returned the first of the month from a trip East, which was principally to visit the Victor factory with a view of getting more machines. He was not enthusiastic over his accomplishments when he returned, but he said that he was convinced that St. Louis was getting an equitable division on orders placed.

Mr. Rauth is taking up with the members of the Executive Board the questions of the Mid-Winter meeting, which will be held in St. Louis or Philadelphia, the members to decide.

NEW YORK, DECEMBER 15, 1916

BY the time this issue of the The World reaches subscribers, the Christmas business will be in the home stretch, and members of the trade who are not already working according to definite plans made long ago, have little chance to change their system now.

From all sections of the country has come the annual cry of machine shortage, and there is no question but that certain popular types of machines are sometimes impossible to get. Under such conditions the average dealer can afford to pick his trade.

Under normal conditions it is right and proper to emphasize the fact that a talking machine can be acquired very easily by any one who is not absolutely poverty stricken. The easy payments of 50 cents a week and up make that possible. It is also well to emphasize the advantages of the higher priced machines, and how easily they may be acquired on time.

During the holiday period, however, the business that depends on such persuasion is not the best business for the dealer to establish. He will frequently find that there are two prospective customers for a single machine, and it is only in justice to himself that he deliver that machine to the one willing to pay cash, or to make the best credit arrangements. One hundred dollars in the hand is much better than $5 or $10 a month running over a year or more, even if interest is paid, for it gives the dealer working capital to discount his own bills. Not that the instalment purchaser should be neglected, but his business should not be sought to the exclusion of that of the man who is ready and willing to pay promptly for his machine.

Under present conditions the majority of talking machines are "bought" and not "sold." The customer is convinced that he wants a talking machine before he enters the store, and the chief work of the dealer is to convince him that he wants a little better talking machine than he first planned to buy. It will probably be said that if the cash customer is given the machine, to the exclusion of the instalment customer, the business of the latter will be lost. If the dealer is tactful this may not necessarily be so. It is easily possible to let the instalment buyer have a machine of lower valuation with the understanding that when the plentiful supply of the desired models comes in after the holidays, he may return his temporary purchase and get the larger model. In the interim the man who has been prevailed upon to take the cheaper model is a new record purchaser which for the most part is the main thing in selling machines.

Just one last word while the Christmas rush is at its height: Pick your trade while you have the opportunity. You owe it to your business to do so.

DESPITE the talk about higher business ethics, and a new realization by merchants of the obligations they owe one another, the practice of knocking still flourishes to a considerable extent, although not looked upon with favor by most members of the trade, who appreciate that it is not the best way of convincing a customer of the value of a product.

There is a certain type of salesman, and a certain type of those in authority for that matter, who find it much easier to knock the other fellow's product than to conceive logical and convincing arguments regarding their own goods. In other words, they are devoted to a negative system. It is not how good are their machines, but how bad the other fellow's are.

Recent developments, particularly in the courts, lead to the warning, "If you must knock be careful." In other words, if you feel that it is necessary to criticize a competing product to sell your own, why, stick to facts for safety's sake.

Some manufacturers and merchants who have suffered an excess of knocking have emulated the example of the worm and turned. The result in most cases has been distinctly distressing to the knocker when he has been haled to court and made to prove his statements. The courts hearing such cases, while not necessarily partisan, have shown a distinct inclination to side with the victim of the knocking whenever possible. Within the past few months more than one man has been forced to pay damages, because he made statements about his competitor, or his product, without giving much thought to their accuracy.

There is an old quotation to the effect that "There is so much bad in the best of us and so much good in the worst of us that it hardly behooves any of us to talk about the rest of us." This saying can apply just as well to the manufacturer of products as it does to individuals.

Meanwhile, it is much better to observe care in discussing competing products than to be compelled some fine day to say "Good morning, Judge." The man who is compelled publicly to take water on account of some of his statements will probably find it pretty hard to convince future customers that the claims he makes for his own products have any basis of truth.

There is such a thing as honesty in comparing the good or bad points of competing talking machines, for instance, but the man who wants to do business cleanly will draw the line between fair criticism and plain knocking.

THE campaign carried on in New York against the fraudulent advertiser of talking machines has had several good effects, one of the most important of which is the changed attitude on the part of newspapers regarding the character of talking machine advertising they accept for their classified columns. The best proof of this is the "caution" at the top of the advertising columns devoted to musical instruments in the New York Evening Telegram, and which says: "When buying a talking machine insist that the manufacturer's name or trade mark is on the machine purchased. This is your protection against misrepresentation." The "caution" is followed by a reproduction of the State law against misleading advertising.

A SICK man cannot equal the healthy man either in the quantity or character of his work, regardless of his actual ability. Ill-health saps energy, produces fatigue and in other ways acts as a handicap. This important fact is offered by the O. K. Houck Piano Co. as the reason for the interest taken by that concern in the athletic ambitions of its employes.

The employes of many houses in the trade have organized baseball teams, football elevens, bowling associations or general athletic associations for track and field work, and in many cases have been given the support of employers purely on the ground that such organizations tend towards a better understanding between the employes of the house and make for co-operative effort.

The Houck idea gives a new importance to athletics in business. In the first place, the man who is really interested in athletics must of necessity be interested in clean living. He must keep regular hours, eat properly and drink sparingly, if at all. Whatever his standing as an athlete may be his habits are

distinctly calculated to develop and better preserve his good health.

Prospective customers like to meet the healthy man—the man who feels good and shows it, who has a little "zip" to all his movements, who enjoys living and shows it. Such a man can work hard without feeling fatigue and working harder gets results that are worth while to the house which hires him. It is a phase of business that might profitably be considered by other concerns in the trade.

WHETHER the present prosperity in the United States is of the mushroom variety and will cease to exist after the close of the war or whether the American exporters will have won a permanent foothold in foreign markets remains to be seen. Every government official and every private business man who travels in the belligerent or neutral countries comes back with his own opinion regarding the standing of American manufacturers and American products in different localities, and pictures the difficulties we must fight against in establishing foreign trade. According to one consular officer who came home a fortnight ago this country is in for an export boom regardless of the attitude of the European nations, for the foreigners will buy American goods, not because they actually want to buy them, but because they must have them.

The chief drawback to the development of this trade, declares the consul, is the inclination of American manufacturers to be somewhat close on credit terms, many of them demanding the deposit of cash in an American bank to cover the goods before making deliveries. It is the credit side of the export question that must receive most attention from Americans. Even in the peaceful years before 1914 much Latin American trade went to Europe, for instance, simply because European manufacturers are willing to gamble on long credit while the American wanted to do business as he did it at home. At the present time, in certain lines of commodities, short credit terms can be enforced but when Europe is again at peace American exporters will find a credit situation developed that will make twelve-month notes look like cash payments. The situation will have to be faced by those who intend to stay in the trade, and the proper time to prepare to face it is right now when competition is at low ebb.

DID you ever steer a sailboat through a "choppy" sea with a stiff breeze? If you haven't, you have probably seen it done. The boat sticks her nose into a big roller. The helmsman braces himself. The boat quivers and slackens speed. The man at the wheel "eases" her a bit—looks at his sails—watches every trick of the water and swings her bow back to meet the crest of the wave. A second's hesitation—and the craft slides forward gallantly! She is ready for the next big fellow.

Every prospect is a wave to be met, studied and conquered! A good salesman is ever at the tiller. He must know his craft—the talking machines he is selling—as the sailor knows his boat. Yes, even better than that. He must sink his very individuality in his goods.

The start of each sale is hard. Stick to the rudder! Be on the job—not near it. Watch every twist of the transaction. Each sale must be handled differently. "Baby" some of them—then push them hard. Push others hard all the time.

And finally—whether you are selling talking machines, pianos, players or transcontinental railroads—there is bound to be that one BIG moment when the whole thing seesaws between success and failure. Steady it with all the tact, finesse and diplomacy that is in you! It's make or break now! Make—and tally one more good sale to your quota.

DEALERS moving into larger stores, making additions to their present quarters, or remodeling the latter to allow more space available for the display and sale of talking machines; jobbers and distributors leasing entirely new buildings for storage purposes that they may better meet the steadily increasing demands of these successful dealers, all go to prove that prosperity is not only here, but that talking machine men are getting their share.

Several years ago there were pessimists in the trade who viewed increased business each year as marking the floodtide in trade, and predicted that the talking machine business would hit the down grade immediately afterwards. These pessimists persisted for several years, and each year there was more business to be handled, with the result that the croakings of the "prophets" lost value, and instead of waiting for something to happen the far-sighted members of the trade prepared for the bigger things to come. These big things have come and are coming—1914, 1915 and 1916 all set new records in trade volume, and the prospects for 1917 are so good that even those in the best position to judge cannot safely suggest any probable percentage of decrease.

This growth of the talking machine business has not been accidental. It has been due to good, clean, persistent advertising, educational work on a par never before attempted, aggressiveness in production and sales methods and a firm belief in the future of the business. With the continuance of such a policy insured, the peak of trade development is still far in the future.

The year just closing has also been one of uninterrupted development for the Talking Machine World. Its sphere of influence continues to broaden, thanks to the support vouchsafed it by advertisers and by subscribers who are now spread practically throughout the civilized globe. Its policy in the future, as in the past, will be one devoted to the upbuilding of the industry along honorable lines. For the New Year we wish our friends the largest measure of prosperity and happiness.

Yuletide Greetings!

To all Victor dealers we take pleasure in extending our best wishes for a

Merry Christmas and Happy New Year

May the coming year be the most prosperous and successful they ever experienced.

Pearsall Victor Service

During 1917 will be directed towards giving Victor dealers a brand of service and co-operation that will insure their continued prosperity and success.

CLEVELAND CONCERNS GOING AFTER HOLIDAY STOCK

Local Houses Send Representatives to Factory in Effort to Hurry Shipments—Some New Stores Enter the Field—Better Grade of Machines Have the Call—Fine Window Displays

CLEVELAND, O., December 4.—Analysis of the talking machine trade in Cleveland at the outset of the holiday season brings forward at least one big outstanding characteristic: Confronted with the prospect of the most stupendous volume of business in the trade's history, jobbers supplying the retailers have been brought to the realization that they will be unable to supply the market. There have been more or less frantic trips on the part of local managers to the Eastern bases of supply with the hope that oral persuasion would bring better shipments than urgent pleas by mail or wire. In the chorus pleading for the jobbers "to have a heart" are not only the retailers who have carried talking machine lines in the past, but from scores of others who are anxious for a bite of prosperity pie. Save for a few exceptions the newcomers, or would-be newcomers, have been refused.

One of the exceptions is the University Music Store, due to open at the time this issue appears, at Euclid avenue, near East 105th street, the most fashionable of the uptown business centers. This new store will handle Columbia records and Grafonolas. H. E. Gott is the principal stockholder. It will have to compete with the University Book Store, also handling the Columbia line, and the Euclid Music Co., handling Victor products. All are within a stone's throw of one another.

The Phonograph Store, 9721 Lorain avenue, is one of the latest additions to the number of establishments handling Columbia products. J. L. Brown is the manager. The Starr line has found another new home at Dobb & Hughes, Payne avenue and East Fifty-fifth street. The Royal Furniture Co., an old handler of Columbia products, in moving to its new location at East Ninth street and Prospect avenue, gives the Columbia one more fine downtown store.

L. N. Blum, of the Phonograph Co., was among the Clevelanders who have been in the East in an effort to get better shipments to the local Edison headquarters. He reports inability to fill December 1 orders and that all hope of supplying new dealers until after January 1 has been abandoned.

T. H. Towell, president of the Eclipse Musical Co., has just returned from Camden, on a crusade for heavier shipments. This house's November business has been 125 per cent. greater than that for November, 1915.

George Madson, head of the Columbia headquarters here, reported on November 29 that he had no machine under $100 in the house. He said the visits here of the Boston National and Inter-State grand opera companies were responsible for a vast increase in the sale of the better class of Columbia records. Zenatello, Baklanoff, Marr, Maria Gay, Maggie Teyte, John and Henry Scott were members of these companies. All are Columbia artists.

Sales Manager Brett, of the local Starr store, is exuberent over the success of the Starr phonograph. "We are getting the benefit of the increased output of the new factory, but at that we will not be able to supply the demand," he said.

To better care for its increased holiday patronage the May Co.'s Victrola department, in charge of Miss Ethel Volk, has employed seven extra sales people until after December 23.

No single month in 1916 has been so productive of beautifully dressed Cleveland windows as has November. On all sides were evidences of the dealers' realization of the value of doing something more than the mere planting of records and machines in their respective windows. The Eclipse Musical Co., the Euclid Music Co. and Bueschers were among the most noteworthy. The Eclipse played on the old familiar railroad crossing sign, "Stop, Look and Listen," made to read "Stop, Look, Come In and Listen." The Euclid Co. set up a chopping block with an ax nearby. The Victor dog was placed on the block, suggestive of a Thanksgiving turkey. Rich, red autumn foliage was blended with the woodwork of a Victrola by Bueschers' window dresser.

To all outward appearances the Grafonola Co., which moved to its new location in the Stillman Building about October 15, was out of business for two weeks in November. The entire front of the store was boarded up to permit a change in window architecture which when finished will give the store a window on each side of the entrance instead of the previous single window. There was no let-up in sales, however.

One Victor dealer, the Cleveland Piano Co., 1612 Euclid avenue, is preparing to move to some other site, not yet decided upon.

Bing's furniture store, Prospect avenue S. E., opposite the Colonial Arcade, and the four Conrad, Baisch & Kroehle furniture stores are among the list of new retailers of the Vita-Nola talking machine here.

Our Best Wishes For A Merry Christmas

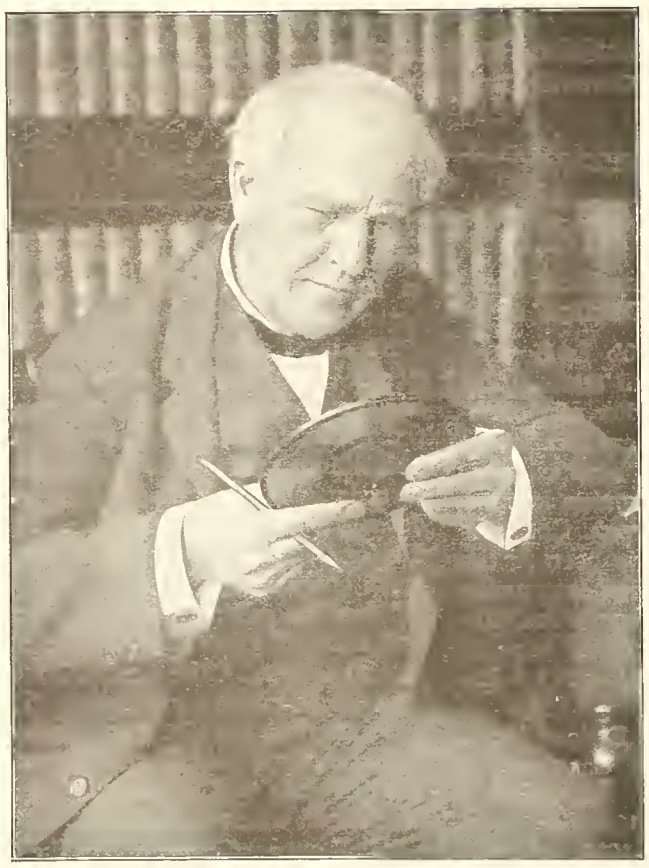
And Continuous Prosperity Throughout the New Year

ECLIPSE

ECLIPSE MUSICAL CO., VICTOR Distributors
CLEVELAND

"The Phonograph with a Soul"

NEW YORK GLOBE



Mr. Edison Examining an Edison Re-Creation

The critics who stamped these tributes upon the NEW EDISON realize that here, at last, is a mechanical musical device possessing the human element which no similar device had ever before incorporated—that here is an instrument which absolutely and flawlessly Re-Creates the human voice and the music of human-played instruments, even to the very magnetism of the artist's personality. They realize that the gulf between the human and the purely mechanical has been bridged—that the NEW EDISON is the musical marvel of all ages.

Because "Edison Snares the Soul of Music" and gives it to the public through "The Phonograph with a Soul" the Edison dealer possesses an advantage no other dealer can have. In addition to all those who have no special musical training, he has for prospects every real music lover who will not respond to a mechanical mimicry of the original, but who requires

"Edison Snares the Soul of Music"

NEW YORK TRIBUNE

nothing less than the original itself or a Re-Creation which cannot be distinguished from the original.

The New Edison satisfies the true music lover's every requirement. More than 300,000 music lovers and the representatives of nearly 300 of the leading newspapers of America have testified to this fact after hearing Edison artists sing, or play, in direct comparison with the Re-Creation of their voices or the music of their instruments, by the NEW EDISON.

"The Phonograph with a Soul" and the Edison Probationary Zone Policy are a combination that spells "SUCCESS" for the live dealer. Correspondence with live dealers is welcomed.

Orange, N. J.

The New Edison Chippendale—Official Laboratory Model

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., December 6.—The old story, a scarcity of machines, is what one hears everywhere in the trade. The business for December has made a good start and November is being looked back upon as a banner month so far as trade is concerned. In the record output the business has been simply phenomenal and a great impetus has been lent by the presence in this city of Billy Sunday, the evangelist, whose records, that is the Rodeheaver hymns, are being advertised widely by the talking machine shops and are having a very large sale.

Columbia Officials Pay a Visit to the Hub

Manager Erisman, of the Columbia Graphophone Co., was honored with a visit from a group of the leading Columbia officials recently. The visitors included John Cromelin, the company's general manager; Edward Burns, the vice president; W. C. Fuhri, United States manager; C. A. Hanson, factory manager; Lewis Sterling European manager from London, and F. Parker, manager of the Columbia's business in Australia. The guests were in Boston for two days and in the evening of the first day they were the guests of Al Jolson, star of "Robinson Crusoe, Jr.," who tendered them a box at the Shubert Theatre. A luncheon party at the Touraine the following day was a feature also. Their purpose in coming to Boston was to get in close touch with dealers, many of whom in the city proper they visited to get their point of view of the important question of the selling proposition. They found out the kind of machines for which there was the greatest call, sought for all kinds of criticism, either on the part of dealer or customer, got a line on their likes and dislikes, studied the type of salespeople the dealers employed, made suggestions and in short carried away a fund of valuable information. Late in the afternoon the party left Boston by train, with the exception of Vice President Burns, who with his wife motored to Springfield, Mr. and Mrs. Burns having been touring around in their car.

The following day there was a further conference of the party at Bridgeport, which was attended by Manager Erisman. This conference was between the factory officials and the selling organization and it was held at the Hotel Stratford. After a careful study of all the business situation, all done with the object of promoting a more sympathetic co-operation between executive officers, factory officials and the distributing force, the conference adjourned to New York where a subsequent session was held at the Hotel Knickerbocker, where the business problems were gone over still further. The necessity for a better understanding had arisen in part through the present scarcity of materials and the scarcity of help. Manager Erisman says that a vast amount of good will result from these conferences and will eventually be felt in the smallest and humblest corner of the business.

Osgood Co.'s Big Business

The Victor and Columbia departments of the C. E. Osgood Co., one of the leading Boston furniture houses, is doing a very large business these days under the management of Chester J. Sylvester. With the addition of several new demonstration booths done in white and furnished comfortably the house is better able than ever to meet the needs of its growing business. A recent addition to Manager Sylvester's staff is Clifford di Fraytas, a former Boston newspaper man, who is making good in his new undertaking.

New Hume Department Active

From the day the Victor department was opened in the new Hume Piano Co.'s warerooms, in Boylston street, Manager Warren Batchelder has had a busy time of it. Mr. Batchelder's many friends have rallied well to him in his new atmosphere and in addition he has been greeting many new patrons.

Columbia Men Discuss Holiday Problems

Manager Arthur Erisman met the leading members of his Columbia staff around the festive board at Lombardy Inn a week or more ago to discuss the holiday business and the best way to meet the constant calls for machines. A determined effort is being made by Manager Erisman to interest not only his own men at the Columbia headquarters but the dealers as well in the higher priced machines. It was pointed out that between now and January 1 it will be a physical impossibility to get certain types of Columbias, and it was pressed home upon the salesmen that they must sell the other types which can be had more easily. Manager Erisman pointed out that there was a good opportunity of putting into practical application their ability as clever salesmen; it offered a rare opportunity of displaying a new type of salesmanship. He illustrated his point by telling of certain dealers who had been persuaded into purchasing machines fifty and even seventy-five per cent. higher in price than what they first had intended buying. As it is, he said, the company will not be able to fill more than fifty per cent. of the orders before the advent of the new year.

Artists Call at Eastern Co. Headquarters

Business at the Eastern Talking Machine Co. has been making rapid advances of late and in the wholesale department Billy Fitzgerald has been having great difficulty in procuring enough Victor machines to meet the demand. An interested caller at the Tremont street warerooms of the Eastern a week ago was Kellogg, the famous bird imitator, who was filling an engagement at Keith's, a block away. Another who is a frequent caller at the Eastern warerooms is Emilio De Gogorza, the baritone.

New Solophone Models Exhibited

Some of the latest models of the Solophones are being shown in the window of the Hallet & Davis Co., Boylston street, but these are a small part of the handsome assortment which are on exhibition in the newly opened warerooms on the third floor of the building, which have been redecorated and furnished in the most attractive manner. There have been quite a number of enquiries about this machine lately.

Interesting Schools in the Victor

The Eastern Talking Machine Co. is following with much interest the labors of Miss Grace Barr and J. A. Swineford, who are visiting many of the public schools in the city in an effort to interest them in the use of the Victors as an accompaniment to singing, writing and the use of the typewriter. It is contended by these demonstrators that better work can be done to the rythmic accompaniment of good music and that in harmony with the human voice it is a great aid to children. Thus far Miss Barr and Mr. Swineford have met with most pronounced success.

Harvey Co.'s Artistic Show Windows

By far one of the most artistic show windows seen in Boston in some time was that exhibited for ten days by the C. C. Harvey Co., in Boylston street, dealers in Victor and Edison machines. The window, which is a large one, was done altogether in Japanese with handsome rugs, fabrics and teak wood and other furnishings. At one side was a Victrola with the case in Japanese design. For a part of the time a young woman in Oriental garb was in the window demonstrating the Victrola. The window

BOSTON "Exclusively" EDISON NEW HAVEN

PARDEE-ELLENBERGER

MORE than ever does the dealer realize that an "exclusive" representation works to his advantage. The Edison Diamond Disc Phonograph is the ideal of the progressive dealer, because it is the art-creation of Edison's master genius, and you know and everybody knows that Edison's endorsement spells BUYERS' CONFIDENCE.

was arranged by Vesper L. George, a well-known artist, who is quite accomplished at window dressing. The window was highly commented on everywhere.

Victrola for Billy Sunday's Use

A stroke of enterprise that reflects great credit on the house of M. Steinert & Sons Co. was the installation of a handsome Victrola in the home of Billy Sunday, the evangelist, who is here on a ten weeks' campaign. The Victrola is for the use of the family while they are in town at 324 Commonwealth avenue, and with it was sent a large collection of choice records, including all of the revival hymns used at the Tabernacle.

Vocalion Co.'s Enlarged Quarters

Now that the Vocalion Co. has enlarged quarters through having a lease of the entire building at 190 Boylston street, it has better facilities for the display of its handsome assortment of Aeolian-Vocalions. In addition to the first ground floor the one above is used with several handsome apartments for purposes of demonstration where prospective purchasers desire privacy. In the show window are several unusually ornate machines, the central one being done in Japanese lacquer finish. A new salesman added to the selling staff is Albert Feldman. Just now the interior is in holiday garb, Manager Roy Hibshman having installed many potted palms in the balcony and on the ground floor, just the right touch of color is lent by potted poinsettias, in their gorgeous red.

Had Liberal Tastes in Records

George Lincoln Parker, the Victor and Edison dealer, had a curious call for records a few days ago. In response to Mr. Parker's advertising of the Billy Sunday hymns his warerooms were visited by a young man who asked for such familiar numbers as "Brighten the Corner," "If Your Heart Keeps Right," "Mother's Prayers Have Followed Me" and "Sweeter as the Years Go By." Then when these were being put up for him he suddenly asked Mr. Parker if he had "There's a Little Bit of Bad in Every Good Little Girl." Getting an affirmative reply he asked that it be included in the package.

Veeco Motors in Growing Demand

Business with the Veeco Co., whose place of business is at 248 Boylston street, is meeting with marked success, and the Veeco motors are being well disposed of; in fact, the output of 1917 is already pretty well contracted for, this being due to the diligence of John A Davis and C F. Simes, who have been putting in some hard work to make this motor a success, and those who are familiar with it say it is the success it is because of the merit that lies behind it. Both Mr. Davis and Mr. Simes were over in New York a fortnight ago where they came in close touch with many of the leading talking machine dealers.

Business Good in Brockton

J. Frank Beal, a Columbia dealer at Brockton, was in town the other day and he told The World correspondent that his present business is unusually good and that for the entire year it is going to make a splendid showing. Mr. Beal's place, located at 12 Main street, is known as the Old Colony Piano Co. and is widely known to the residents of Brockton.

Brown and Baker at Advertisers' Meet

H. C. Brown, advertising manager of the Victor Co., and Edward M. Baker, head of the publicity department of the Columbia Graphophone Co., were in town early this month in attendance upon the annual meeting of the Association of National Advertisers.

Vocalion Illustrates Talk on Hawaii

An Aeolian-Vocalion was put to good use a few days ago at a meeting of the Old State House Chapter, Daughters of the American Revolution, held at the residence of one of the members in Melrose. Miss Mary Brooks, of Gloucester, gave a picturesque talk on "Hawaii and the Ancient Women of the Hawaiian Islands," and the Hawaiian melodies were played on this Aeolian-Vocalion.

Dick Constantino, son of the celebrated tenor, Constantino, is now head of the language record department at the Boston warerooms of the Columbia Co.

New Sign for Steinerts

A large, handsome electric sign advertising Victors and Victrolas has been placed at one side of the main entrance to the store of M. Steinert & Sons Co. in Boylston street. It is planned to place another one on the opposite side of the entrance.

Vice President McNabb, of the Eastern Talking Machine Co., was a visitor at the Boston warerooms of the company for several days recently.

PRIZE WINNERS IN EDISON CONTEST

New England Winners in Edison Week Contest Headed by A. D. Elster, of Meriden, Conn., Who Gets First Prize

BOSTON, MASS., December 9.—Information has just been received by Manager Frederick H. Silliman, of the Boston warerooms of the Pardee-Ellenberger Co., Inc., from the Edison headquarters telling of the New England prize winners in the recent Edison week contest. The first prize of $100 was won by A. D. Elster, of Meriden, Conn.; the second prize, $50, went to the James Hislop Co., of New London, Conn.; the third of $30, to the Shepard Co., of Providence, and the fourth, of $20, to the Portous & Mitchell Co., of Norwich, Conn.

The judges were Charles D. Whitredge, the superintendent of decorations at William Filene & Sons Co., of Boston; William Nisbet, designer and manufacturer of wax figures in Boston; William A. Gillies, superintendent of the decorating department for the Shepard Norwell Co., of Boston.

The Boston stores that entered into the competition were the Iver Johnson Sporting Goods Co., at the corner of Washington street and Cornhill, and the F. H. Thomas Co., on Boylston street. The Iver Johnson window exhibited a beautiful wax figure representing a prima donna making a record or a re-creation, as the Edison Co. now calls it. Near by was a handsome $250 Edison Diamond Disc machine and other symbols of the Edison line. A profusion of asparagus vine was used in the decoration with good effect.

ARRANGED ATTRACTIVE WINDOW

How the Pardee-Ellenberger Co., of New Haven, Dressed Up for Football Game—New Edison Dealer in Middleboro, Mass.

BOSTON, MASS., December 8.—Manager Silliman, of the Pardee-Ellenberger Co., Inc., who was one of those who went to New Haven, Conn., for the big Harvard-Yale football game a fortnight or so ago, speaks enthusiastically of the handsome window that the Pardee-Ellenberger Co. arranged for that special occasion. The interior was made to resemble a ball field with the usual life and activity properly pictured. Some golden posts added a bright touch to the scene, which was the object of considerable attention all that day. The window of this new establishment is fifteen feet wide and lends itself to large displays admirably.

A new addition to the Edison dealers, Mr. Silliman announces, is the Cushman-Gardner Furniture Co., of Middleboro, which store is a branch of the Cushman Furniture Co., of Attleboro. The Middleboro shop, which is operated by Mr. Cushman in person, is artistically fitted up with several demonstration booths.

ATTRACTIVE WINDOW DISPLAY

LYNN, MASS., December 4.—The G. W. Lord Co., dealers in Victor-Victrolas and records at 111 Munroe street, has a most interesting exhibition of souvenirs from the Mexican border on display in its window recently. The exhibit was collected by five members of Company D, Eighth Massachusetts Regiment.

W. H. BAGSHAW Lowell, Mass.

The finest point in reproducing music on a talking machine is the needle. It takes real art to make a needle that will bring out the best music the records contain and yet not impair the record itself.

Bagshaw needles have won their international reputation for quality, because they bring out the artists at their best without injuring the record surface.

The firm of Bagshaw was established in 1870. The needles made by this company have therefore stood the test of time. To-day everybody knows Bagshaw needles are

ADVERTISING AND SELLING RELATED

Mark Silverstone, Head of the Silverstone Music Co., Expresses Some Interesting Views on the Closeness of That Relation

Mark Silverstone, head of the Silverstone Music Co., St. Louis, Mo., has a wide reputation both as an advertiser and a salesman and therefore his views on these two subjects have the standing of authority. In a paper read recently before the Advertising Club of St. Louis, Mr. Silverstone made the following excellent points:

"Any industry that has a remarkable growth must attribute its success to its merchandising plan, the fundamental basis of which is advertising. Any merchandising plan that does not include advertising will not be successful. You cannot meet competition without it. Advertising creates demand which enables the retailer to come into his own in the way of increased profit and brings him in closer communion with the public. As an illustration: The name of a firm is mentioned and the reply is, 'Oh, yes, I know them.' The party may never have had any dealings with this concern and still he knows them through their progressive advertising.

"Salesmanship is a science that should be founded on common sense. Much has been said about the psychology of salesmanship, yet after all the closest psychological investigation shows the science is based absolutely upon common sense.

"The salesman must know his line thoroughly. I remember asking a newspaper advertising solicitor how half tones were made, and he answered, 'Oh, they have some sort of process, but I've never gone into the matter.' I would have had a greater amount of confidence if he could have shown his familiarity with the workings of his newspaper. The more complete his knowledge, the more convincingly he could talk and the easier and better he could have sold me. The salesman should know and put into practice any new ideas that may develop and not think that he knows it all, which reminds me of the man who went to an oculist and was told that he would lose his eyesight. He answered, 'Oh, well, it matters not, I've seen everything.'

"Tact is a most essential requisite in salesmanship. I will give you an illustration of tact. A friend of mine named George Silzer, in Des Moines, is a very busy man, very good natured and popular. Many of his friends call on him during his busy moments. He has a card printed in German, 'Ferdant ein ander stunde geschose, Nach, geschwint.' The caller sees the card and with natural curiosity inquires what does it mean. George says with a smile, 'Do you really want to know what that means?' The answer is 'Yes.' Well, here it is: 'Damn it, another hour shot to pieces, make haste.' The visitor promptly takes the hint, and George has won out through his tact. It is necessary to use different arguments on the value of your advertising when repeating visits to prospective advertisers. I can say as an advertiser that I have heard the same old story told seven times by the same salesman."

NEW VOCALION HALL OPENED

Headquarters of the Aeolian Co. in Providence, R. I., Are Most Attractively Decorated

PROVIDENCE, R. I., December 3.—The new store of the Vocalion Co., known as Vocalion Hall, which was opened last week, is one of the most distinctive and attractive stores in this city. It is located on Westminster street, in the heart of the business district, and will be headquarters for the Aeolian lines in this territory. Leo. E. G. Shatney is the retail manager of the new store. The general color scheme of the warerooms is blue and gray, and the Vocalion department is equipped with six demonstrating rooms, which are attractive and most comfortable. After the first of the year the Weber-Steck, Wheelock and Stroud instruments will be carried.

INCORPORATED

A certificate of incorporation has been issued to the Telautophone Co., of Wilmington, Del., which has been organized for the purpose of manufacturing talking machines and records. The capitalization of the concern is $500,000.

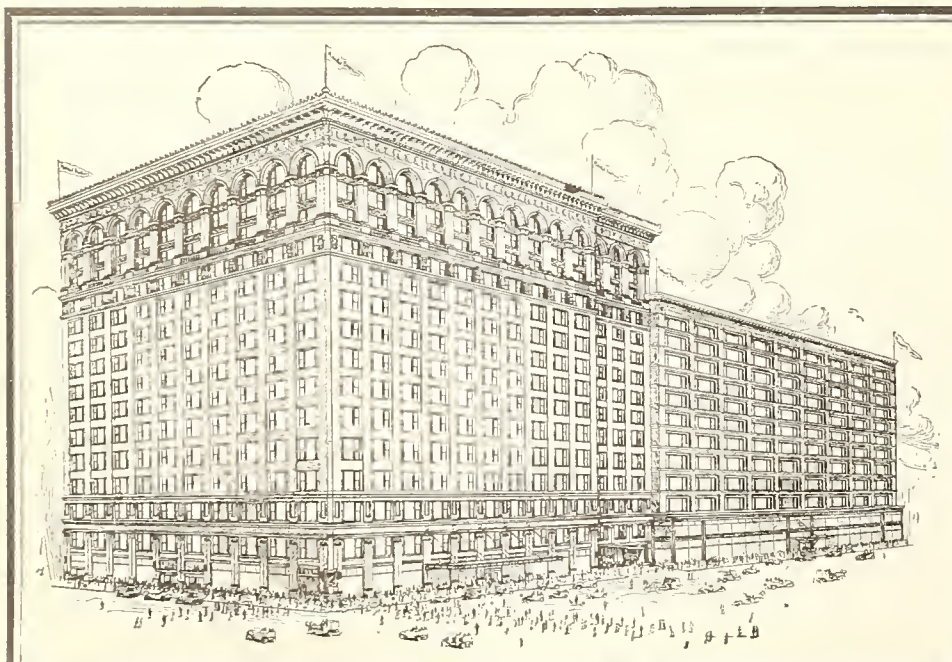
NEW FLAT TABLE TOP CABINET

Introduced by Globe-Wernicke Co.—Added to Brown Disc Cabinet Line—Adaptable for Various Styles and Makes of Machines

CINCINNATI, O., December 8.—The Globe-Wernicke Co., of this city, manufacturer of Brown's disc record cabinets, has just added to its line a flat table top cabinet which promises to be one of the most successful types of cabinets that has ever been introduced to the trade. This new cabinet is designated as Brown's disc record cabinet No. 4 T, and is the same as the regular Brown cabinet No. 4, but with a table top.

The prospectus sent out to the dealers featuring this new cabinet calls attention to the fact that it is adaptable for use with Aeolian-Vocalions, sizes D and E; Columbia Grafonolas, sizes 15, 25, 35 and 50; Victrolas 8 and 9. The top of this new cabinet measures 18¾ inches wide by 22¼ inches deep, and it is manufactured in mahogany and quartered oak. It holds 100 ten or twelve inch records.

The Globe-Wernicke Co. has been achieving phenomenal success with the Brown disc record cabinet line, and has sold these cabinets to the leading Victor dealers throughout the country. The new flat table top cabinet will enable the company to broaden its field materially, and generally interest dealers in all makes of talking machines.



THE HOME OF THE

Cortinaphone

IN CHICAGO

Messrs. Mandel Bros., one of the largest Department Stores in the world, has now established a school of languages conducted with the aid of the "Cortinaphone."

The "Cortinaphone" method consists of fifteen double face twelve-inch records of each language, giving the exact pronunciation of the language studied in conjunction with the text books furnished.

You are losing money every day that you are without this line. You owe it to yourself to investigate it.

We furnish all advertising matter free of charge.

WAR HAS NO EFFECT ON CANADIAN TRADE INCREASE

Holiday Talking Machine Business Breaking All Previous Records—New Machines on the Market—New Vocalion Wholesale Distribution—The Toronto Market Reviewed

TORONTO, ONT., December 4.—In Toronto as in other cities of the Dominion, the talking machine trade is now up to its ears in taking care of holiday business, which promises to exceed by many per cent. all previous records, and to be held within bounds only by the scarcity of certain types of machines. Whatever the effect of the war on the country generally, it certainly is not felt by talking machine dealers.

The Pathé Frères Phonograph Co. has placed its wholesale representation in Ontario with Geo. H. Honsberger, of this city, who became connected with the firm in October.

T. C. Wright, lately manager of the Hamilton branch of the Nordheimer Piano & Music Co., Ltd., and who was promoted to be wholesale manager of the company's Aeolian-Vocalion department here, was presented with a handsome case of pipes and a cane suitably engraved, by the staff of the Hamilton branch, as a mark of their esteem. Mr. Wright has been connected with the Nordheimer house for twenty-eight years.

The Regal Phonograph Co., 43 Queen street, East, are handling the Ideal talking machine in addition to motors and accessories.

A. R. MacDougall & Co., Ltd., 266 King street, West, are the Canadian representatives for the Alura talking machine and Operaphone records.

The Columbia Graphophone Co., Ltd., this city, has recently added fourteen new French-Canadian ten-inch records by six prominent Montreal French vocalists.

A number of ladies interested in Red Cross work in Clinton, Ont., agreed to open their homes on a certain evening for a Victrola concert—each home being open on the same evening. Tickets were sold in advance. On the evening arranged for five concerts were being conducted simultaneously in different homes.

The Music Supply Co., 36 Wellington street, East, this city, have been appointed agents for the Province of Ontario, for the Manophone manufactured by James Manoil Co., Inc., Newburgh, N. Y.

The Nordheimer Piano and Music Co., Ltd., have announced to the public the addition of Columbia Grafonolas and records to their phonographic department.

On a visit to New York recently Mr. Montagnes, of I. Montagnes & Co., Canadian distributors of Sonora phonographs, in Toronto, arranged for still larger shipments for immediate delivery. The members of this firm are immensely pleased with the results of fall trade to date. While in New York Mr. Montagnes arranged for distribtion to their dealers of a very expensive and handsomely gotten-up publication, entitled "Sales Helps for Dealers." This is not sold nor given to the dealer, but lent to him, remaining the property of the Sonora Co.

Homer D. Kresge, advertising manager of the R. S. Williams & Sons Co., Ltd., for the past six months, has been appointed sales manager of the wholesale phonograph division of this company, from which position he will keep in close touch with the Edison dealers throughout the country, and endeavor to promote their sales and efficiency by an active program.

The offices of Pathé Frères Phonograph Co. have been removed from Victoria street to the factory purchased by this firm at 4 and 6 Clifford street.

"September business was 80 per cent. over September of last year," announced John A. Sabine of the Music Supply Co., referirng to their sales of Columbia lines, "and the October increase was still greater."

Six Canadian towns, Belleville, Napanee, St. Mary's Brockville, London and Ingersoll were recently visited by Hardy Williamson, who sang in direct comparison with his own voice as recreated by the New Edison Diamond Disc machine. The music critic of the London Advertiser says of the concert in that town: "Mechanical voice and human cannot be distinguished apart."

The Carola Co., of Canada, Ltd., has been incorporated with a capital stock of $40,000 by Warren K. Cook, Herman R. Peterson and Frank J. Foley, all of Toronto, Ont., to manufacture phonographs, etc.

A number of the Brunswick phonographs are now on display at the showrooms of the Brunswick-Balke-Collender Co., in this city. These are the production of their own factory at Toronto, the cabinets being in mahogany.

The Brant-Ola phonograph is the newest product of the Brantford Piano Case Co.'s factory. Since commencing the manufacture of cabinets this firm have been impressed with the possibilities of the phonographic field hence the new one.

Musical Instruments, Ltd., have been incorporated in Toronto, Ont.

A special department has been organized for the wholesale distribution of the Vocalion in Canada. This department has been placed in charge of T. C. Wright until recently manager of the Nordheimer Piano & Music Co., Ltd., branch in Hamilton, Ont., and a life-long member of the Nordheimer organization. Already the Nordheimer Co. has received applications for agencies from some of the most successful and representative dealers in Canada. They are spending a large appropriation in newspaper advertising which is bringing splendid results to date.

The Dominion Phonograph Co., of this city, has recently registered.

The Robert Simpson Co., Ltd., have opened up a phonograph department on the sixth floor of their store featuring Pathé and Edison lines.

The Diamond Disc Shop, of Peoria, Ill., has been incorporated with a capital stock of $12,000 by James P. Lacey, Geo. H. Buser and Myrtle Buser.

Now and After Christmas

Most Victor Dealers know from experience that the demand for Records does NOT let down after Christmas.

The newly sold machines call for just so many new Records, and the owners of the older machines take the usual interest in new numbers.

Your Record business, both now and after Christmas, is frankly solicited by this Victor Distributing House.

We are able to fill your orders for Records in practically any amount.

You realize that the future of your talking machine business lies in Records, not the machines.

Much of the success you achieve depends on the character of your distributer's service.

We are most anxious to co-operate with you.

HOLIDAY TRADE BRINGS PROBLEMS IN INDIANAPOLIS

High Cost of Living and Influx of Many New Machines Expected to Have Some Effect on Trade Generally—Most Concerns Report Increases—After Fraudulent Advertising

INDIANAPOLIS, IND., December 5.—Indianapolis talking machine dealers are wondering how much effect the high cost of living will have on their holiday sales. While most of the dealers are taking an optimistic outlook, there are some who confidentially admit they do not expect as big business this year as last year.

Another factor which all the dealers admit will cut into the individual dealers' sales record is the fact that Indianapolis has been practically flooded with different kinds of new talking machines within the last six months. Every large furniture store and department store is now selling some kind of talking machine. The advertising columns of the newspapers contain many display ads of the various machines. The secretary of the Indianapolis Better Business Bureau, which is fighting fraudulent advertising, in addressing a meeting of the Indianapolis Credit Men's Association last week called attention to the way in which the talking machines were being advertised.

"There have been many new machines placed on the market recently, and some claims are being made that some of these cheaper machines are in every respect equal to the standard and higher-priced machines," he said. "Although we have not had any complaints as yet, we are expecting to get some."

It was made clear that the bureau was concerned only in any misleading statements that might be made in the advertisements, and no attack was made on the cheaper machines themselves. Most of the merchants who are handling the low-priced machines have been very fair in their advertisements.

The wholesale houses are struggling to fill their out-of-town orders. All of them declare they have more orders than they can readily handle.

Walter E. Kipp, of the Kipp Phonograph Co., said that business was being guided solely by the amount of goods obtained from the factory.

"I have never seen business so prosperous throughout the entire zone," declared Mr. Kipp. Helen Clarke and Herman Sevely, two Edison artists, have been making tone tests for a number of Mr. Kipp's dealers, and Mr. Kipp reports that the dealers are enthusiastic over the results.

M. Tobin, of the Pathé Pathephone Shop, says that his dealers everywhere report prosperous conditions. Mr. Tobin is expecting a big holiday sales record, especially in the wholesale field.

The Stewart Talking Machine Co., distributors of the Victrola line, is going at top speed to keep up with its business. The advertising the Victor Co. is doing before the holidays is tending to stimulate Victrola business more than ever both in the wholesale and retail fields.

A. W. Roos, manager of the Columbia store, reports that the wholesale orders are running more than 100 per cent. ahead of those of last year. Mr. Roos accounts for part of this increase as the result of additions made to his territory. The total sales for November were the largest in the history of the local branch.

Steinway & Sons have completed the installing of the Columbia line, and Edgar Daab, local manager, is expecting to get his share of the Columbia business.

F. J. Clark, manager of the Dictaphone department of the Columbia store, is working hard to win one of the trips to the January meeting of the Dictaphone salesmen in New York.

Paul Furnas, manager of the Aeolian branch, is commenting on the marked increase in business in the Vocalion department. The Aeolian Co. has been doing some effective billboard advertising of the Vocalions along with the newspaper advertising.

At the Starr Piano Co. store, the Starr phonograph is being displayed to good advantage, and it should prove to be among the leaders in the holiday sales.

The Pearson Piano Co. continues to feature the "Hear Them Both" policy in their sale of the Edison and Victor machines. The E. L. Lennox Piano Co. is likewise pushing both the machines.

At the Fuller-Wagner Music Co. the Victrola and the Victor records continue in strong demand.

With the Columbia, Edison, Victrola and Sonora lines, the Carlin Music Co. is going after the holiday business strongly in its newspaper advertising.

The latest addition to the growing talking machine family in Indianapolis is the Windsor talking machine, handled by Sanders & Recker, a large furniture house.

The Indianapolis "American Electrical Week" is being held this week, and a large display is being given in Tomlinson Hall. A number of the talking machine dealers have exhibits at the show.

The Stewart Talking Machine Co. announces that Conrad Schellschmidt has been made head of their repair department. In Prof. Schellschmidt the Stewart Co. has a man in whom all the employes are interested.

With him the adjustment of a Victor motor or the erasing of a scar from a mahogany cabinet is a profound bit of science. His duties now are to instruct the other repair men.

The professor has been with the company since it started out in a single room to the present time, when it has a six-story building.

Murray E. Ness has sold his interest in the York Phonograph Co., of 216 West Market street, York, Pa., to Alfred T. Scarborough and N. S. Wisman, the two other members of the firm.

NEWS OF THE MILWAUKEE TRADE

Several New Lines of Machines Well Received —Shortage of Leading Makes—Dealers Carrying on Active Holiday Campaigns

MILWAUKEE, WIS., December 5.—The situation in the Milwaukee talking machine trade is the most remarkable that has ever been known. While almost every jobber and retailer is certain to run short of stocks before the holidays, the entire trade is engaged at this time in the sharpest drive for business in the history of the trade. Talking machine advertising never has been so heavy and so forceful and is creating a tremendous demand. It was possible only in a few instances to get deliveries from factories in sufficient volume to tide dealers over the holiday season before the acute car shortage, together with congestion in the factories, reduced production and shipments to a degree all out of line with the anticipated requirements. Under these conditions it would, at first glance, appear a waste of money to continue to advertise, when it is reasonably certain that not nearly all of the orders can be filled, but Milwaukee dealers are building for the future, and regardless of the situation that will be created before Christmas eve, the "punch" of the campaign will live a long time afterward and bring its returns.

"We are straining every nerve to adjust our supply to meet the demand, and while we cannot expect to fill all orders, we will at least show our patrons that we showed no discrimination," said Harry A. Goldsmith, secretary of the Badger Talking Machine Co., Victor jobbers. "In some ways the situation is a very good one, for it removes the temptation of dealers to overload. Nevertheless, it is a merry fight and in spite of its unfavorable features, keeps us in splendid humor." Mr. Goldsmith has been carrying the brunt of the work, his brother, S. W. Goldsmith, being at the Mayor Hospital in Rochester, Minn., for treatment. George F. Ruez, president, has been spending a week to ten days in Ishpeming, Mich., to attend the wedding of his sister-in-law.

The Brunswick, distributed through the regular Milwaukee branch of the Brunswick-Balke-Collender Co., 275-279 West Water street, has received an enthusiastic reception in this territory, according to Manager Thomas I. Kidd. The Milwaukee county exclusive agency has been placed with Emil O. Schmidt, who has just re-engaged in the piano and music business and formally opened his new quarters at 218-224 Plankinton Arcade on December 1.

The Phonograph Co. of Milwaukee, Edison jobber for Wisconsin and Upper Michigan, is another large distributing house which fears a serious shortage of goods before the end of the year. William A. Schmidt, manager, reports an overwhelming demand from all parts of the territory. Retail business in Milwaukee and vicinity, handled by the Edison Shop, a part of the Schmidt organization, is beyond anything ever experienced. The formal opening of the enlarged quarters was held November 22. "Diamond Disc" hall, the new recital and concert auditorium which occupies most of the large store building added to the Shop, was dedicated at this time.

The C. W. Fischer Furniture Co., 217-223 Second street, which has been retailing the Pathé and Fraad with much success, has taken an exclusive agency for the Windsor in Milwaukee. Edward Meyer is manager of the Windsor department.

The demand for the Sonora Phonograph is simply enormous, according to Charles J. Orth. "This probably is due to the extensive newspaper advertising done in the local papers," said Mr. Orth. "The prime favorite is the Elite at $175, followed by the Baby Grand at $150. The Grand at $225 also is a good seller. We expect to receive a Supreme at $1,000 before Christmas and already have one order booked from a wealthy Sonora admirer in Milwaukee."

Mr. Orth purchased his Christmas stock in August and has been adding to it constantly. However, appearances indicate that there will not be one left by January 1. W. H. Heise and W. Roelke, two well-known phonograph men of Milwaukee, have joined Mr. Orth's sales force.

A. G. Kunde, 516 Grand avenue, Columbia distributor and retailer, is celebrating his eighth anniversary in that capacity. Mr. Kunde started business in a modest way at 413 Grand avenue, and after one year moved to the present commodious quarters at 516 Grand avenue. A warehouse is maintained on Fond du Lac avenue. Mr. Kunde carries a stock of more than 50,000 records, and aims to carry 1,000 machines of the sixteen Columbia styles, although the demand is so brisk that he is considerably behind at this time.

George M. Winslow, who has been in the music business at Waukesha, Wis., for some time, has sold an interest to Bert White, and incorporated as the Winslow Music Co., with $5,000 capital. The company is featuring the Sonora phonograph.

Gustave Spankus, of the Boston Store Victrola department, has resigned to become associated with the Hoeffler Mfg. Co., distributor of the Starr.

Every statement and invoice mailed by Gimbel Bros.' department store at Milwaukee on December 1 contained a "cut-out" of the famous Victor pup, on the reverse side of which was printed: "Every indication points to an embarrassing shortage before Christmas time in Victrolas and records. Protect yourself by placing your order early at Gimbel's. Just now we are splendidly equipped to take care of your wants." Leslie C. Parker, Victrola manager at Gimbel's, reports that the "stunt" already resulted in hundreds of inquiries and actual sales.

The Aeolian-Vocalion is distinguishing itself as one of the most popular phonographs that is being marketed in Milwaukee and Wisconsin. Paul A. Seeger, manager of the phonograph department of the Edmund Gram Music House, unloaded two full carloads this week, and of these, more than one-half went direct to homes.

H. M. Hahn is manager of the Edison department of the C. Niss & Sons Furniture Co., instead of T. B. Schreiter, who was noted in the last issue as joining the Niss store in that capacity. Mr. Schreiter has become a member of Mr. Hahn's sales force.

Miss Margaret Schumacher, for some time head of the Pathe department at Jung Bros. Co., Sheboygan, Wis., on December 1 joined the Victrola department of the Milwaukee Boston Store, of which J. P. Schoonmaker is manager. Miss Blanche Brewster, until now with Schuster's, Milwaukee, is another new member of Mr. Schoonmaker's staff.

The Flanner-Hafsoos Music House has increased the force in its Edison department. B. H. Buelow is a new salesman and Miss Esther Bauman has taken charge of the record department.

Thomas A. McGrath, who has been head of the service departments of several large talking machine shops in Milwaukee, has joined the Pathephone Co. of Wisconsin as service man for the Wisconsin and Upper Michigan territory.

Otto F. Leidel is a new member of the sales force of the Edison Shop, 211-215 Third street, under Herbert W. Gausewitz, retail sales manager.

Richard A. Zinke, manager of the Badger Talking Machine Shop, reports that November business was by far the largest of any month since the house was established two and one-half years ago, and December will doubtless break even this remarkable record.

The Frank E. Shultz Music House, 124 Third street, Baraboo, Wis., takes the Victrola agency by the purchase of the business of the W. H. Aton Piano Co., of that city. Miss M. Desmond is manager of the Victor department.

TO OUR PATRONS

We take this opportunity of thanking the phonograph trade for their patronage during the past year which has made possible the gratifying success of the "Motor of Quality."

We sincerely appreciate this patronage, and in order to give our clients maximum service and co-operation we have considerably enlarged every department in our factory; thereby enabling us to adequately handle our business the coming year.

The illustrations on the following pages will give a fair idea of the magnitude of our plant, the growth of which we attribute to the continued courtesies extended us by our patrons.

FACTORY, ELYRIA, OHIO

CHICAGO ATLANTA SEATTLE

A VISIT to the Home of the "Heineman Motor of Quality" at Elyria, Ohio, quickly reveals the secret of the success with which the Heineman Motor, within the short time of two years, has met in the Talking Machine Industry of America and far beyond. For the watchwords "Quality and Efficiency" seem to be writ largely across the very threshold of every department.

1. Factory Office

The Heineman concern takes a particular—and we think justified—pride in the fact that its "Motor of Quality" is the product of co-operative quality in the truest sense of the word: Quality of material, quality of equipment, quality of workmanship.

The following illustrations, interesting and instructive as they are, can only inadequately convey an idea of the vastness, intricacy and yet completeness of an organization whose efforts are all concentrated upon one object and one only—namely—the continued and uninterrupted success of the Heineman Motor.

When it is borne in mind that, for instance, the standard Heineman Motor No. 3—to take one of the most popular types of the various designs turned out at the Heineman factory—is composed of not less than 139 individual parts and that each and every one of these 139 parts is manufactured within the walls of the Elyria Works, it will be readily seen that, if anywhere at all, it is at the Heineman factory where accuracy, reliability and perfection can be counted upon, because, except for raw material, the production of the Heineman Motor is not dependent upon any outside help or sources of supply for any of its parts, from the smallest screw to the largest gear wheel or motor frame itself.

2. Factory Office

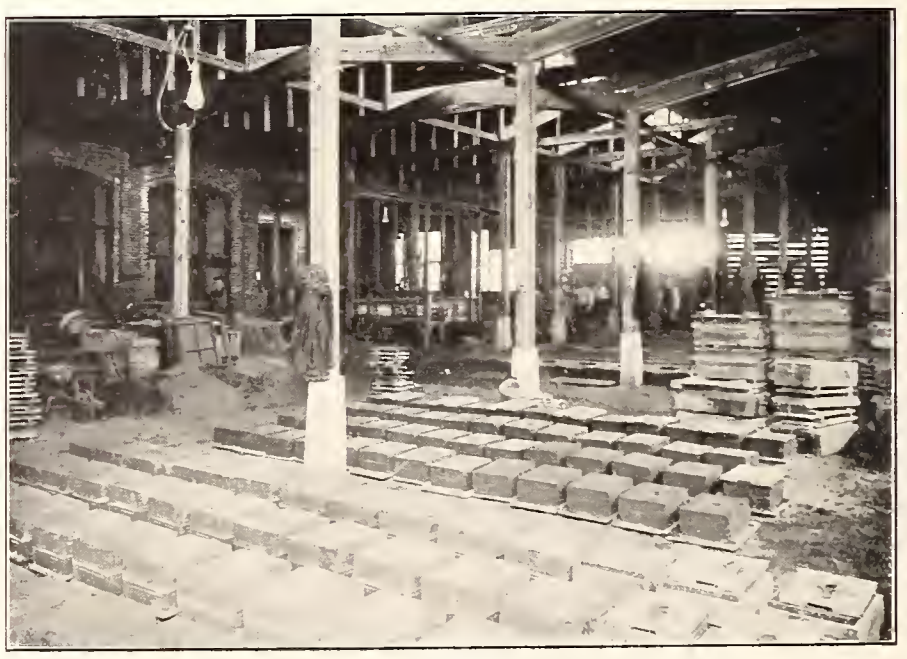
Even such—to the ordinary mind remote seeming—little details as, for instance, the oil which is used for the various bearings of the motor, or the wax used for the soundboxes, are "home products," being the outcome of innumerable experiments, tests and trials.

All of which shows that no effort is spared, no problem too difficult, no process, part or operation considered too small or too insignificant to be left to take care of itself.

The spirit of thoroughness and efficiency greets the visitor as soon as he enters the precincts of the Heineman factory.

Our first two illustrations (Figs. 1 and 2) show part of the

3. Grinding and Polishing Rough Castings



4. Foundry

factory office, which, like the "shop" itself, is equipped with every modern time and labor-saving device imaginable. Here "system" reigns supreme.

We hurriedly pass the Long Distance Telephone Room (with direct line to New York Head Office), the Record, Filing, Typists' and Mailing Rooms, to enter the Grinding and Polishing Department (Fig. 3), where the rough castings coming from the adjacent Foundry (Figs. 4 and 5) undergo their first roughing operations.

5. Foundry (Another View)

From here they are passed on to the Drilling and Tapping Departments (Figs. 6 and 7), where automatic machinery provides each casting, at one single operation, with all the many holes of various sizes and depths required in the Assembling process.

The next operation we see is in the Spring Winding Department (Fig. 9), where the motor springs are wound and greased and placed in the spring barrels. These are made in the Punch Press Department (Figs. 10 and 10a) and stored in the Stock Room, a corner of which is shown in Fig. 11, giving an idea of the quantity of barrels it is necessary always to carry, in order to satisfy the requirements of the Spring Winding Room.

6. Drill Presses

Figure 12 shows one of the most important departments. It is the Automatic Machine section. Here on a floor space of 12,000 sq. ft. 51 machines, every one a masterpiece of human genius, turn iron, steel and brass raw stock into screws, handles, nuts, governor weights, turntable spindles, bushings of all kinds, spacers, etc., with mathematical precision, every one like the other

7. Drilling and Tapping

down to the thousandth part of an inch, at so many per minute day and night. Watching one of these machines compels your admiration for the patience, ingenuity and untiring energy with which human brains have succeeded in overcoming almost insurmountable problems in turning out these marvels of engineering. We observe how a steel rod will enter from one end in rapid rotation, how powerful clutches get hold of it and place it in position. A cutting wheel or two, or even more, advance and eat their way into and down along the rod, stop and return. Another tool automatically takes their place, cuts off the part at a pre-arranged position and an arm comes forward, almost looking as if it were

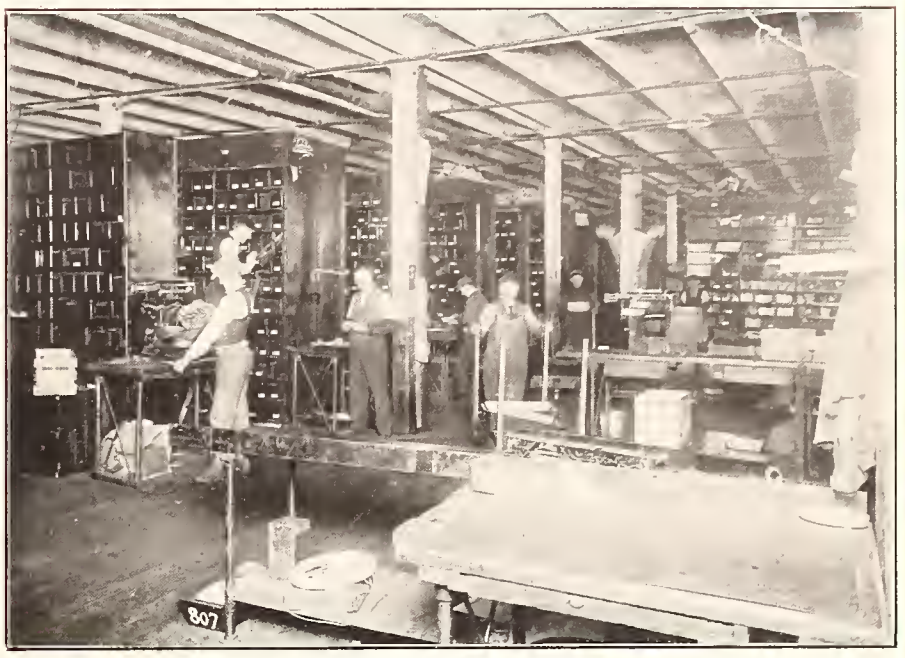
15. Bench Lathes



17. Piece Part Stock Room

equipped with a human hand, grips the part, places it into another position, a few revolutions, a pressure, a click and down into the tray drops the finished part, the whole work having taken only a few seconds. In fact, before we have had time to examine in wonder and surprise, the beautiful finish, the faultless exactitude, the mathematical correctness of the article which is still warm from the strenuous operations it has just gone through with lightning rapidity, the machine has gone on doing its ceaseless work and another piece identical with the one we are just examining drops into the tray, and still another, and still another. As already mentioned, there are no less than 51 of these machines set up in rank and file, as you see from the illustration, and if you bear in mind that the man standing at the end of the aisle is a powerful six-footer, it will give you an idea of the length and expanse of this department alone.

Figures 13, 14 and 15 show the automatic gear-cutting, milling and bench lathes.

All the multitude of special tools required for these hundreds of machines of all types, sizes and designs are cut, made and supplied by the Tool-Making Department (Fig. 16), where an expert corps of engineers is constantly at work designing, evolving and making new tools and new time- and labor-saving devices for insuring an uninterrupted and sufficient supply of every part that goes to build "Motors of Quality."

All piece parts as they come from the various departments and have passed inspection, congregate in the Piece Part Stock Room (Fig. 17), whence they are issued upon requisition from the Assembling Department. Before proceeding to the latter, let us pass through the Enameling, Plating and Polishing Departments (Fig. 18, 19 and 20), where Diamond-Black, Nickel and, for the highest class motors, even Gold, with the aid of heat, electrical current and chemical science, are contributing their share towards the success of Heineman Motors.

We now enter the Assembling Department (Figs. 21, 22 and 22a), the center to which all other departments merge and supply their output, and where the building proper of the motor takes place. It is here where we see the actual birth of the motor, so to speak. On 14 large and wide benches, hundreds of skillful hands assem-

ble, set, put together and adjust frames, spring barrels, gears, bearings, governors, brakes, and all the numerous other pieces and parts that go to make up a complete motor.

The next two illustrations (Figs. 23 and 24) show us how the turntables are made, balanced, covered with felt and tested, while Figs. 25 and 26 take us to the Soundbox Department and Armature Winding.

Fig. 27 shows a corner of the Packing Room and Fig. 28 the Shipping Department.

A glance in the power house (Fig. 29) reveals to us two 300 H. P. Compound Ball Engines direct connected to two Crocker-Wheeler 200 K. W. Generators, providing power and light throughout the factory. Also a twin Hot Blower System for heating the entire establishment. A 1,000 H. P. Feed-Water Heater and Feed-Pump insures a constant supply to the boilers.

This completes our visit, during which we have traversed an area of 203,000 sq. ft.

We are, therefore, glad to take a little rest in the Conference Room (Fig. 30), where we are just in time to attend a meeting of all the Department Heads and Foremen. These meetings are held once every week and all points of interest and new suggestions for improvements are brought up and thoroughly gone into, so that no opportunity or chance should be missed, of however small importance it might appear, to obtain the highest efficiency possible. In connection with this subject, it is interesting to note that personal initiative and individual ambition are encouraged throughout the factory in every way. Thus special prizes are offered for improvements in apparatus used in the various departments, monthly premiums are paid to those departments which have been adjudicated the cleanest and tidiest in

VICTROLA FOR NOTED MUSICAL CLUB

Kansas City Musical Club to Use Instrument in Studying Various Forms of Instrumental Music—An Exclusive Organization

KANSAS CITY, Mo., December 4.—One of the finest compliments to the Victrola that has ever been paid in Kansas City was the purchase of a machine by the Kansas City Musical Club, and the adoption of the Victrola as the educational feature with respect to various instruments and classes of music. This selection is of particular interest to Kansas Citians, who know, and have known for years, of the high standards of the Musical Club. It is composed of amateur musicians, ladies only, and limited to fifty. Admission is after stringent examination by committees—the applicant performing behind a screen, so that only the performance is considered, the committee not even knowing who the prospective member is. Applicants who fail but show talent or promise, are admitted to a students' department, where they are coached by the members, and later perhaps may be admitted to full membership. This club holds regular sessions, at which instruments or various phases of music are studied; usually a professional of high attainments is employed to demonstrate the instrument, or to sing. At a recent meeting, for instance, the club studied the clarinet, oboe, flute and harp, separately and in their relations to each other. Many of the members own Victrolas, and the club finally decided that it could accomplish its purpose better by means of the talking machine and its wide resource of records, than by seeking persons who could demonstrate high standards for their particular subjects. The record catalog of the Victor Co. was therefore a very important factor in the selection of the Victrola.

Another very important feature of the selection, was that the club went to the Victrola department of the Geo. B. Peck Dry Goods Co. to buy its machine, and arrange for assistance in the selection of records for its meetings and its library. Manager Ditzell, of this department, has been particularly zealous in his co-operation with musical educational enterprises in Kansas City; and no musical event is allowed to pass without some reference in the advertising, some calling of attention to records relating to the event, or some personal assistance from Mr. Ditzell in support of the project. Thus, it seems that the Musical Club turned without much discussion to the Peck Victrola department when it decided on a talking machine. The department is co-operating fully, a considerable task being the selection of records to meet the exact needs of the club for its very technical purposes.

WORLD AD GETS ORDER FROM CHINA

The Geo. A. Smith-Schifflin Co., 136 Liberty street, New York, decalcomanie manufacturers, recently received a letter from James Lau & Co., music dealers, Hong Kong, China, requesting them to forward samples and price lists of decalcomanie name plates, and stating they read the above company's advertisement in The Talking Machine World, which of course is just another instance of the results foreign territory advertisers receive by using the columns of The World.

THE UNUSUAL ATTRACTS ATTENTION

Figure of Howling Canine Helps to Advertise New Book to Victrola Owners

As has been said before it is the unusual that attracts attention.

The passive, attentive Victor dog is familiar to practically every one in the land not afflicted with eye trouble, and its appearance denotes that the store is handling Victor goods. The

Advertising a Victor Opera Book

figure of a howling canine, however, is not often seen, therefore attracts attention.

The accompanying cut shows the manner in which Finch & Hahn, of Schenectady, N. Y., featured the new book, "Grand Opera With a Victrola" in their window display, the howling dog indicating the degree of vocal effort usually associated with grand opera, and with both the cover and the inside pages of the book open to view, the passerby had no trouble in finding out just what the display was about. The actual results proved its success.

DITSON RECORD SERVICE

Christmas Greetings

Nineteen seventeen is coming, and with it the opportunity to do a bigger record business than ever. The best way we know to make the New Year PROSPEROUS is to work with a jobber who will generously supply your Victor needs.

The House of Ditson won its national reputation in the music trade by helping dealers to *grow*.

NEW YORK

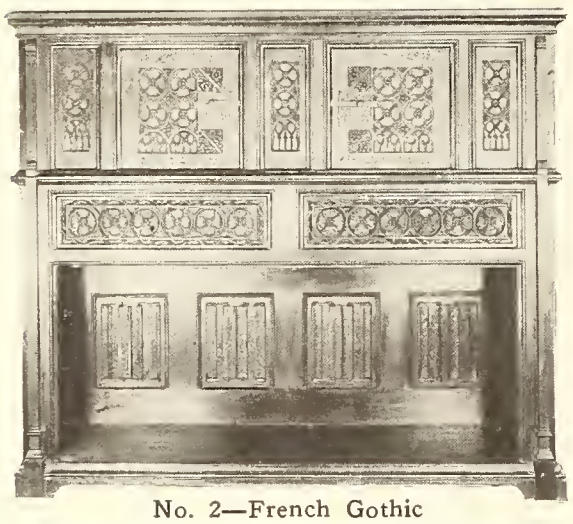
MAGNIFICENT SHOWING OF NEW EDISON PERIOD CABINETS

Eight Models, Designed by Leading Furniture Experts and Valued at From $800 to $6,000, Displayed to Select Gathering at Ritz-Carlton Hotel—The New Cabinets Described

An event of unusual interest in the phonograph world was the private display of period cabinets for the new Edison, staged by Thos. A. Edison, Inc., in the ballroom of the Ritz-Carlton Hotel, New York, on November 24 when over five hundred people responded to the invitations that had been sent out.

There had been many rumors in trade circles regarding the magnificence of the new period cabinets, but even under such conditions those who attended had no proper previous conception of their elaborate character. The exhibition was held both afternoon and evening, and a feature was the informal reception and tea by Mme. Rappold, Mlle. Verlet and Miss Miller, the three noted Edison artists in the afternoon and attended by over three hundred guests.

After inspecting the various cabinets, the first question asked by the majority of the visitors was, "What are they going to charge for them?" William Maxwell, vice-president of Thos. A. Edison, Inc., was authority for the statement that although the prices have not yet been determined, it is fairly certain that they would range from $800 to $6,000.



No. 2—French Gothic

Eight period cabinets, all hand made, were exhibited at the Ritz-Carlton. An electric motor and an ingenious lighting system were installed in each of the cabinets. When the idea for these cabinets was first conceived the Edison Laboratories inaugurated a competition among designers, and, after considering the work of a number of the best furniture architects in this country, commissioned Messrs. French & Co. and H. D. Newson, of New York, to create for them, with

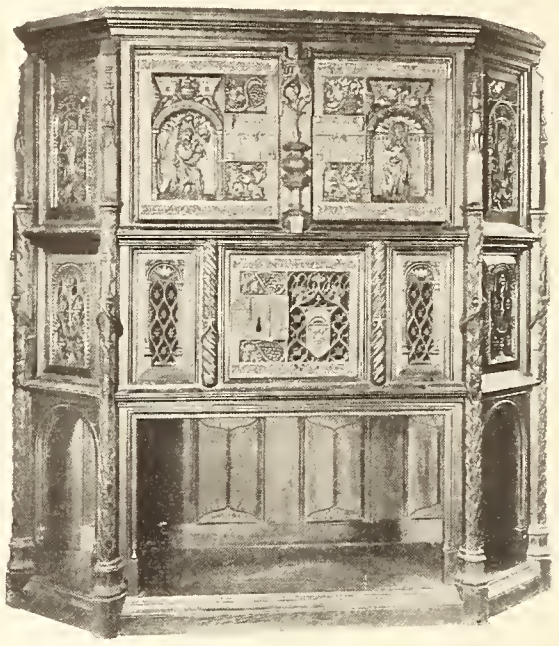
No. 8—XVIII Century English

absolute authenticity, eight hand-made period cabinets.

One would hardly associate phonographs with these cabinets. There is nothing phonograph-y about them.

The first of these cabinets—the $6,000—stood in Gothic state on the stage at the south end of the ballroom against a background of dark velvet draperies, surmounted by a very valuable Gothic stained glass window. This cabinet was designed and executed by H. D. Newson and was reproduced from a cabinet which stands in the central room on the ground floor of the Hotel de Cluny, in Paris. The original is a relic of the reign of Louis XII of France and is probably the most famous-piece of cabinet work in the world.

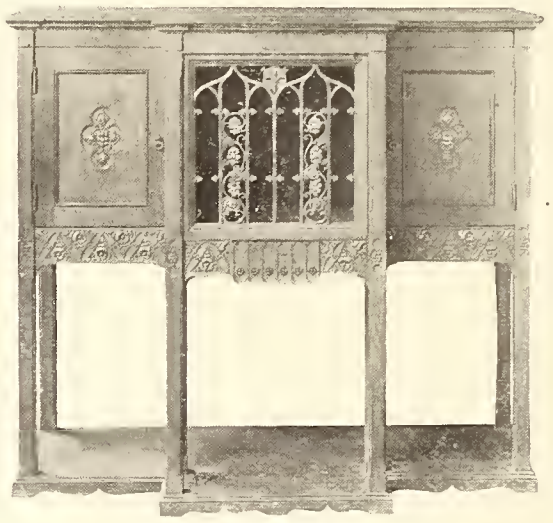
This replica, executed in oak, is beautifully carved in the style that prevailed at the height of Flamboyant Gothic conception and bears the arms of France and Savoy. The two principal



No. 1—French Gothic

panels are decorated with figures representing the Annunciation. On others occur the crown cross, blossoming from a chalice, probably intended to represent the Holy Grail. Elsewhere appear the fleur-de-lis and architectural motifs. It is a massive piece of work, stately and impressive, standing about nine feet high.

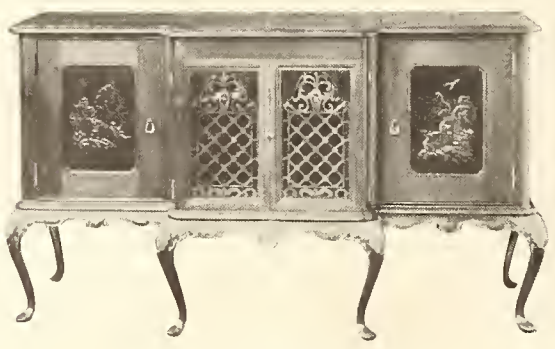
During the exhibition Miss Christine Miller



No. 3—French Gothic

gave an Edison tone test, standing beside the $6,000 model. The distinguished contralto proved on this occasion, to some three hundred and fifty guests, as she has on numerous other occasions before larger audiences, that there is no distinguishable difference between her living voice and Mr. Edison's re-creation of it. From the Gothic depths of the cabinet came a voice—a re-created voice—that matched perfectly the voice that poured from Miss Miller's own throat.

Another French Gothic cabinet (No. 2), but slightly smaller than the $6,000 model, ran second in popularity to the one just described. This cabinet, also in oak, shows the parchment panel in its best form. It is a replica of an old French



No. 6—Queen Anne

Gothic dressoir. The hinges are well executed, extending across the entire width of the door and being backed with red velvet. It is very early Sixteenth Century.

There was also a Fifteenth Century Gothic cabinet (No. 3). The finely carved grille suggests the Flamboyant tracery found in so many of the old French windows. A vine motif, so prevalent in Gothic styles, is worked in with this tracery and in the door panels on the side. This cabinet was designed by French & Co.

The Italian cabinet is done in walnut (No. 4). It contains three finely carved Italian Renaissance panels consisting of dolphins, vases, flowers and fruits, all typical of Italian ornament. These carvings are beautifully executed and are further decorated in Polychrome colors, a treatment much favored by the Italian furniture maker. The cabinet is set on well-turned legs which are connected by a shaped stretcher.

The Elizabethan cabinet (No. 5), designed by Messrs. French & Co., is a reproduction of an old English court cupboard of the Sixteenth Century. The cabinet is richly carved and has a beautifully fretted grille of the English Renaissance formation, while the panels in the cupboard doors on either side are richly carved with

No. 5—Elizabethan

an old vine motif often found in the design of those times, though it really originated in the Gothic period. Above the grille is a design worked out in marquetry of stained wood, a frequent characteristic of Elizabethan pieces.

The Queen Anne, in walnut (No. 6), is typical of the early XVIII Century. It suggests the commode. The six Cabriole legs, so often associated with the Queen Anne period, are richly carved, and the panels of the cupboard are beautifully decorated with Chinese motifs in gold and color, an art much practiced in that era.

The Sheraton Cabinet is done in Cuban mahogany. It is reproduced from an old Sheraton sideboard and has the simple lines and char-

No. 4—Italian Renaissance

acteristics of Thomas Sheraton's best work.

The XVIII Century English cabinet (No. 8) is executed in mahogany. It is difficult to give an exact style name to this cabinet. All through the latter half of the XVIII Century there was a considerable amount of finely hand-painted decorations done on furniture. This painted work was done for the most part on satinwood or enamel but there are instances of it being done on mahogany with exquisite effect. This special XVIII Century Cabinet shows an example of the latter type of furniture. The grills are cut out, and on the wood formations thus left are finely executed motifs of fruits, flowers, etc. The door panels are painted with Italian decorations usual with this class of work.

These cabinets represent a new era in phono-

graph cabinets. Thomas A. Edison, Inc., believes that there is a demand for Period Cabinets as described herewith. It is safe to say that nothing approaching these Cabinets either in design or workmanship has yet been seen in the phonograph world.

These cabinets are now on exhibition at the Edison Shop, 473 Fifth avenue, New York, and will shortly be seen in the New York Galleries.

FRED GENNETT IN THE SOUTH

Secretary of Starr Piano Co. Finds Conditions Excellent in That Section

RICHMOND, IND., December 6.—Fred Gennett, secretary of The Starr Piano Co., has just returned from a trip through the South in the interest of the company, and reports excellent prospects for a big Christmas business, both in the piano and phonograph lines.

"The crops in the South have never been better, the manufacturing industry is booming and the people have money. They are willing to spend it, too, and we look for a big year."

Among the places visited were Birmingham and Montgomery, Ala.; Atlanta, Ga.; Pensacola and Tampa, Fla., stores. He also stopped with a good many of the representatives.

TALKING MACHINE SAVES LIFE

Helps to Support Overturned Auto While Passenger Crawls to Safety—Driver Is Killed

Again the talking machine comes to the front in the role of life saver. Henry J. Vreeland, sales manager for the Ludwig Piano Co., Orange, N. J., and Wm. J. Ryan were delivering a talking machine by auto recently when the auto overturned on the Belleville Turnpike. The talking machine fell out of the car and supported one side so that Ryan could crawl out uninjured. The other side of the car, however, rested on Vreeland's neck. He was suffocated by the pressure on his neck before help could be summoned to lift the automobile.

TALKER NEWS FROM TWIN CITIES

"In Again—Out Again" Is the Story With Jobbers' Victrola Stocks—Big Shipments of Edisons—New Concerns Enter the Field

ST. PAUL and MINNEAPOLIS, MINN., December 4.—When a Victrola reaches the business place of the Beckwith-O'Neill Co. any of these days in December the shipping clerk is right there with his marking pot to set the instrument on its travels again. The instrument is not even unpacked and inspected—simply shot out without any more ado. There is no such thing as a stock in the place, although the house insists that it is doing a jobbing business. It is true that there are quite a number of people about and every one is busy, but the ranks and files of boxes and other things that are supposed to characterize a jobbing house are absent—very much to the regret of both Mr. Beckwith and Mr. O'Neill.

It has been suggested that the company establish branch shipping departments at the various freight depots and thereby save the time and expense in carting Victrolas through town to their warerooms, where they only remain a few moments at the best.

According to all accounts the Victrola sales in Minneapolis and St. Paul are unusually large. Foster & Waldo are said to be doing an "enormous" business, and all the dealers are highly satisfied with their sales.

Five carloads of Edison goods reached the Minnesota Phonograph Co. this week, and the shipment is being distributed rapidly to Twin City and rural dealers.

President Laurence H. Lucker reports that the volume of business is twice as large as a year ago this time.

"We are sending out 100 per cent. more instruments this fall than we did in the fall of 1915," he said. "The demand for Edison goods is general in this territory. The retail stores in Minneapolis and St. Paul handling the Edison phonographs are doing as well as the most exacting dealer could demand.

Christine Miller, one of the Edison stars, is booked for a series of tone tests in St. Paul and Minneapolis this month. Anna Case was in Fargo this week, and will appear at other points.

A new entrant in the talking machine field in the Twin Cities is the Brunswick phonograph, which is handled in Minncapolis by Boutell Bros., one of the largest furniture houses in the Northwest. The Brunswick is advertised extensively in the Twin City papers together with the Pathé records.

Nearly all the large furniture houses and department stores in Minneapolis and St. Paul now conduct talking machine departments. They also feature the department conspicuously in their newspaper advertising. Some of the stores carry more than one line, the New England Furniture & Carpet Co., at Minneapolis, as an illustration, handles the Victor, Edison and Columbia goods.

AFTER DEAD BEATS IN DES MOINES

Chamber of Commerce Bureau After Those Who Cause Trouble to Talking Machine and Piano Merchants of That City

DES MOINES, IA., December 5.—The talking machine and piano dealers of this city are highly pleased with the efforts being made by the Retail Merchants' Bureau of the Des Moines Chamber of Commerce toward eliminating the "dead beat" from the trade. In other words, the person who secures machines on trial from various houses without any intention of buying, and by working various concerns keep instruments in the house almost constantly, or who purchase instruments on installments, and after making the first payment keep the talking machine or piano for several months until it is repossessed.

The bureau is compiling a card index of such people, with the assistance of the retailers, and the list will be open to all members of the trade who desire to avail themselves of the protection thus afforded.

BUILT-UP STOCK

in all woods

For Talking Machine Cabinets

Through the Courtesy of the
Empire Talking Machine Co., Chicago, Ill.

All materials carefully selected and tested, well glued and every detail of manufacture given closest expert attention to positively insure high quality necessary. Prompt shipments.

VICTOR-MACY CASE BEFORE THE SUPREME COURT SOON

January 8 the Date Set for Argument—Some Interesting Contentions to Be Offered By Both Sides—Macy Representatives File Interesting Brief With Court

WASHINGTON, D. C., December 8.—The general trade will probably know by the late spring or early summer whether or not the "license" of the Victor Talking Machine Co. will stand. The question is up for decision in the Supreme Court of the United States, and this august body recognizing the importance of the question at issue has made an unusual concession and "advanced" the case, that is agreed to hear it ahead of its usual order.

January 8 is the date set for the argument before the court, and on that date the license agreement or license restriction covering Victor talking machines and records will be assailed by attorneys for the Messrs. Straus (operating the New York department store of R. H. Macy & Co.), and as vigorously defended by the counsel for the Victor Co., including probably the legal expert who drew up the Victor's license. After the case is argued the Supreme Court will ponder over the matter for several weeks or maybe months, but a decision is looked for during the first half of 1917, which is a year or possibly two years earlier than the case would have been decided if left to take its natural course.

Not only manufacturers, jobbers and retailers of talking machines, but all makers and marketers of players or other patented musical instruments will be vitally interested in the outcome of this case, because when the nation's highest court has spoken it will be known whether or not price-cutters can be baffled and fair resale or retail prices maintained by means of a license extending in its operation through all the steps of distribution to the ultimate consumer. The Victor Co., it will be remembered, devised its present "license" after the U. S. Supreme Court, two or three years ago, handed down a decision in what is commonly known as the Sanatogen case that rendered ineffective the means formerly employed for the standardization of prices. And this is the first acid test of the new form of license.

To the trade one of the significant features of the Macy attack upon the Victor system is that in this attack the price-cutting New York department store management is, in effect, deftly "sidestepping" that portion of the issue whereby the Victor has the right under its license to restrict the use of instruments to records and needles of its own manufacture. The Macy representatives contend in a brief just filed in the Supreme Court that "the right to compel the use of the machine with the records and needles is a question of no importance in this case." Again they attempt to make capital out of the assertion "that there is no charge of any infringement of the use of the instruments with other than the records and needles stipulated in the license."

To any interested auditor who is in the Supreme Court room on January 8 it will probably sound as though the Macy spokesmen are much more worried about the welfare of the Victor's 7,000 dealers and jobbers over the country than they are regarding their own inability to secure Victor instruments and records to sell at cut prices. They have fixed up a fearful and wonderful bugaboo regarding a Victor "white list," and are wont to refer pityingly to dealers whom they designate "outlaws" because they have failed to be recommended by the Victor Co. to its distributors.

In submitting its case to the Supreme Court the firm of Jesse Isidor Straus, Percy S. Straus and Herbert N. Straus, trading as R. H. Macy & Co. will make its main plea on the score of the restrictions which the Victor marketing system makes upon distributors and licensed dealers, but it is to be also intimated that there is a further menace in the background should the Victor Co. decide to exercise its supposed control over the sale or transfer of used instruments in the hands of ultimate purchasers.

Even beyond the limits of the "talker" trade will run the argument to be submitted next month in an effort to induce the U. S. Supreme Court to undo the work of the U. S. Circuit Court of Appeals, which gave a notable victory to the Victor. It will be urged, for instance, that if the Victor is upheld the foundations of commercial dealing will be shaken by reason of a theory that such action would "practically annul" certain State laws against imposition and fraud. Macy would even have us believe that a judicial endorsement of the Victor license would upset the working of such laws as the New York statute designed to prevent fraudulent dealers in any line from securing unwarranted credit through the apparent possession of large stocks of goods, title to which really remains with the vendors.

BOOKLET REGARDING THE "NOSET"

New Volume Sets Forth Features of Condon Autostop Co.'s Newest Product

The Condon Autostop Co., New York, manufacturer of the "Noset" start and stop, has just prepared for the use of the dealers a very attractive four-page booklet, which briefly presents the various distinctive merits of this latest device.

Under the headings "Efficient," "Convenient" and "Automatic," there are listed some of the mechanical features of the "Noset," with emphasis upon the fact that the "Noset" requires no adjustment and attention, and that it starts the motor when the tone-arm is swung into position by playing, and stops the motor when the record is finished.

Charles M. Christensen, former chief of detectives at Racine, Wis., and Joseph Newman have organized the Mercantile Credit Co., of Racine, and opened a phonograph and jewelry business at 419 Sixth street. The capital stock is $5,000.

THE WOOD WORK OF TALKING MACHINE CABINETS

Various Forms of Cabinet Construction Described by J. Crow Taylor for The World—Several Styles and Qualities of Veneer Work Compared—Mahogany the Favorite Wood

The cases or cabinets for talking machines constitute an interesting item in the woodworking world that has been coming rapidly into prominence the last few years. Incidentally too the wood and the work involved in the making of these cases constitute an interesting feature of the talking machine business.

The modern talking machine case differs from other cabinet wood work in that it did not come into being until after the general change in cabinet wood work from the old solid wood in panels to the modern ply work. Therefore it does not involve any matter of comparison or changes in design resulting from the shift to ply wood which is found in some lines of furniture. Generally speaking the talking machine case is one of ply wood throughout and always has been, and from all indications will never be anything else.

It should be interesting, however, in this connection to point out some of the advantages in the use of ply wood, things that had been developed before the talking machine was popularized and consequently were found useful in its design and construction.

The ply wood or built-up panels used in cases have the advantage as compared to solid wood that they are obtainable in wide units just as readily as in narrow units, which would be difficult in this day to supply in solid boards. Moreover, the wide panels of built-up stock have greater strength and maintain their shape with less inclination to warp and twist than if they were solid wood.

Advantages of Flat Panel Work

These are the essential advantages in the flat panel work. There are other advantages, however, that are even more important. Among these are the making of various shapes and forms. Take the swelled or curved panels used in some of the higher priced cases, for example, while these cost more to make even in built-up work and flat panels, they are easily practical to make with proper forms and when made they retain their curved shape just as rigidly as a built-up flat panel will retain its shape.

Moreover, the shaped tops of the better class of cases while they involve some intricacy of design even in built-up work would be almost impossible to make from solid straight lumber. There must be certain curves in the built-up stock itself to make when mitred together the curves and shaped lines of the finished top. These can be made of built-up work to the shapes desired and at the same time are made to carry all the beauty and figure of the face wood because they are finished on the outside with a thin sheet of veneer which conforms to the various shapes with an unbroken surface.

There are various structural differences in the built-up work too, that merit some attention. There is to be found, among the different offerings in talking machine cases three-ply work, five-ply work and seven-ply work.

The three-ply work is less expensive and usually is found in the thinner stock and in the making of the smaller cabinets, those which are calculated to set on top of a table. Usually these are from ⅜ to ⅝ inch in thickness. The thickness, however, is not essentially dependent upon the number of piles used. It just so happens that the common practice in the less expensive work is to make thinner stock and to make it three-ply instead of five-ply because this requires fewer glue joints and is less expensive.

The five-ply work is called into play for the larger cabinets where the panel thickness usually ranges from ⅝ to ¾ of an inch.

The five-ply work, while it costs more, makes it possible to do some things in the way of construction and finish that are not practical with three-ply. The three-ply body or core is built up first of any common wood that will hold glue well with, of course, one play crosswise of the others to give strength. Then this three-ply core can be carefully sanded or scraped on each face to reduce it to an exact smooth plane taking out all the lumps or high places and low places after which the thin fine face veneer is applied, and the core body having been carefully straightened and finished off before its application, the fine face can be finished off easily and will present a much better appearance when highly polished because there will be no waves or high and low places in the surface.

There are some technical points of difference about the construction of the core which may be given consideration at another time but would make the present discourse too lengthy and tedious. The main point it is desired to bring out now is that with more plies in the structural work of the panel body there is not only structural improvement but it gives the opportunity to finish off the core body carefully before applying the thin face veneer. And the result is a more artistic appearance.

What Constitutes Five-Ply Work

Carrying this idea still further we find in some of the very high priced cases what is known as seven-ply work. This is comparable with fine piano case work and consists essentially of a three-ply core body, then a thin cross banding, usually about 1/20 of an inch, of poplar or some suitable wood that works nicely and will hold glue well, and this thin cross banding forms a sort of protecting cushion or underbody for the fine face veneer so that when it is carefully sanded or scraped and then the fine face veneer is applied there is in the cross banding an additional safeguard against the coming of checks or cracks in the fine face veneer as a result of expansion or contraction on the part of the core body after it is put up.

The ROWLAND Sound Regulator

The simplest yet most efficient device of Sound Control for Talking Machines. No mechanical skill or knowledge required for attaching or operating.

The Rowland Sound Regulator Co.

261 Broadway **New York**

Another feature about seven-ply is that it seems to work better in making shapes. curved forms and things of that kind because naturally the more plies that are in a given thickness the thinner will be each sheet of veneer used and the easier it will be to press it into the shape desired with the forms under pressure while it is being glued.

There are some modifications practical in ply work construction from the outlines given here. For example, where only one face is desired one can get the same cross banding effect in five-ply work that is obtained in seven-ply with two faces, and so on.

However, the foregoing brief outline gives a general idea of the structural points and qualities of ply work. And now we can turn for a moment to the matter of face wood.

It is a peculiar fact that, so far, the talking machine trade has not followed closely either the piano folks or the furniture manufacturers in the matter of face wood except in that they use mahogany extensively.

Mahogany the Favorite Wood

Mahogany is a favorite everywhere in the cabinet work of this country. It may be remarked in passing too that we use in the United States more mahogany than is used in all the rest of the world. It finds favor not only in the finishing of pianos but also in furniture and in millwork, in interior trim, and while other woods come and go in popular favor mahogany always has a good standing. Naturally it is easily the leading wood in the face work of talking machine cases.

After we pass mahogany, however, the next wood in favor seems to be oak, of which there can be no criticism because oak is a wonderful cabinet wood, and not only does the quartered oak present a beautiful figure but the wood itself is susceptible to quite a wide range of stains and finishes including the popular browns of to-day and the greys and the fumed effects that find favor. It is here, however, that there is a noticeable difference between the tendency in talking machine cases and the tendency in the furniture world. The furniture people, that is, the makers of the finest offerings, have been neglecting oak for some years now and popularizing our native walnut and figured gum. Also using the fantastically figured Circassian walnut. Incidently they have been featuring birch and maple some but there has been very little featuring of oak in the most artistic furniture offerings. And it has even been losing favor steadily in the medium priced furniture world.

Talking Machines and Furniture in Harmony

There is not much question but what in time furniture and talking machine cases will get into harmony in the matter of face woods because the talking machine case becomes really a part of the furniture of the home. Already there is a noticeable manifestation of more interest in gum and walnut on the part of talking machine folks and there is not much doubt at present but what these woods will gain in favor during the coming year. Meantime, however, there has been an organizing of the oak interest for the purpose of exploiting oak, consequently another year or two may see some changes, so that while the talking machine people are taking on gum, walnut and other woods which find favor in the furniture world for the sake of harmony, it is possible that the furniture world itself may have a change of heart and turn more to oak than formerly so that in the final round it will be furniture coming into harmony with the talking machine finishes.

Just what is to happen or may happen time alone will tell. It may be that the talking machine people will set a pace of their own in the matter of face woods and leave the furniture trade to follow or not just as it chooses. This is pretty much what the piano folks have done in the past. They have sought for the finest face veneer in whatever woods appeared to their fancy and they have left it to the furniture people to either follow suit or do something else. In a way too the talking machine business; while it is taking the place of some piano business may also follow the lead of the piano manufacturers in the matter of seeking for the finest and most attractive offerings in figured veneer for face work.

ORIGINAL IDEAS GET RESULTS

Watkin's Art Store Builds Up Pathephone Demand by Unusual Methods

BRIDGEPORT, CONN., December 9.—A splendid example of the success that can be attained by a phonograph store in a short period of time

An Attractive Show Window

is found in the Watkin's Art Store, at 1091 Broad street, which handles the products of the Pathé Frères Phonograph Co., New York. This store is owned and personally conducted by Mrs. Watkin, who has made a detail study of the sales possibilities of the Pathephone and Pathé discs.

Realizing the fact that her store was located off the main business artery of the city, Mrs. Watkin decided that it was necessary to introduce some original ideas in order to stimulate business, and with this thought in view worked out a number of publicity and sales plans which have resulted very succesesfully. Watkin's Art Store is closing a very fine Pathé business, the demand for the more expensive Pathephone models being particularly active.

DEATH OF MAURICE M. BAER

President of Flemish-Lynn Phonograph Co. Succumbs to Pneumonia

Maurice M. Baer, president of the Flemish-Lynn Phonograph Co., Brooklyn, N. Y., died at his apartment at the Hotel Bossert, that city, November 27 of pneumonia. Mr. Baer was born in New York forty-eight years ago, and before entering the talking machine field had made a fortune as a manufacturer of materials used in pyrography. He was a member of the Unity Club, the Keap Street Temple, and a liberal patron of many charities. He is survived by a widow. The funeral services were held at his late home on Wednesday morning, the interment being in Mt. Carmel Cemetery.

HOLIDAY PAY FOR VICTOR EMPLOYES

CAMDEN, N. J., December 4.—Owing to the inability of the Victor Talking Machine Co. to procure sufficient turkeys of the desired quality as a Christmas present to their employes, as has been the rule for several years, the company has announced that this year the employes will receive pay for Christmas day instead of the birds and cranberries. The company also announces that employes will be paid for all holidays in future.

Edison

The Manophone

A Letter To Every Phonograph Dealer

JAMES MANOIL CO., INC.
Cable Address—"Jamanoil"
Executive Offices and Factory
NEWBURGH, NEW YORK

The Manophone
The Music Master of Phonographs

December 15, 1916

Dear Mr. Dealer:

We have been saying that the Manophone agency is "not just another Dealer proposition--but a better one!"

And that, Mr. Dealer, is what we want to emphasize again to you.

The Manophone Dealer proposition is big, broad and liberal. Manophone Dealers everywhere are finding this to be true. And they are finding also that the Manophone itself is a Better Phonograph.

We want to write you personally about the Manophone. We want to tell you about the Manophone Dealers, and the wonderful success they are having with this new phonograph.

We want to tell you that Manophones are made in many beautiful designs and finishes from $15.00 up to prices that provide for the most luxurious cabinets. The one shown on this page is the $150 model.

We want to show you how the Manophone will increase your sales and profits; how it will add prestige to your store--how it will open up a new and greater market for you.

May we put these facts before you without the slightest obligation on your part?

If so, fill out the coupon and mail to us. We will then give you the dealer details, and send you literature that describes the Manophone line and explains its many unusual and exclusive features.

Yours very truly,
JAMES MANOIL COMPANY, Inc.

BUFFALONIANS DISPLAY WILLINGNESS TO SPEND MONEY

Which Means That Talking Machine Men Are Getting Their Full Share—Artistic Holiday Window Displays—Music Teachers Hear Victrola—Happenings of the Month

BUFFALO, N. Y., December 4.—Buffalo talking machine dealers are leaving nothing undone to get a full measure of holiday business. Liberal advertising space in the local newspapers and an emphasis of the Christmas spirit in the window displays are bringing good results. The tendency of customers to spend their money freely stimulates the employers and sales people alike in piling up a record-breaking volume of trade this month. On account of a shortage of machines, the dealers are all pushing the sale of records. The possibilities of the record business are being developed by intelligent merchandising and salesmanship.

Arthur Snelgrove, a local violinist, recently gave a recital in the Edison department of Bricka & Enos' store. His playing in unison with Edison Re-Creations was much appreciated. Laurens Wilgus, advertising manager of the store as well as head of the Edison section, sent out 150 invitations to the recital and the response was satisfactory. Miss Edith L. Stearns, a talented pianist, is associated with Mr. Wilgus in this department.

The following recently became Grafonola dealers in this territory: H. P. Smith & Son, Woodhull, N. Y.; the Swanson Piano Co., Jamestown, N. Y., and S. E. Bishop, Clyde, N. Y. Sales at the Buffalo branch of the Columbia Graphophone Co. have been favoring the larger type of Grafonolas, which means increased business and a further demand for higher-priced records. "Trade is better than ever," said W. L. Sprague, Buffalo manager. His assistant is C. M. Wall.

The Victrola displays in the windows of Denton, Cottier & Daniels are noted for their artistic arrangement and elaborate setting. This company advertises its store as "Buffalo's great Victrola Center." The concern is having a heavy sale of the Victor records for December.

F. E. Drake has taken a position with Burley & Biesinger, Victrola dealers, at 278 West Ferry street. He formerly traveled for the Victor Co., and later for the Gately-Haire Co., Victor jobber, of Albany.

W. D. Andrews, jobber, is receiving various telegrams from distant points for Victrolas. Mr. Andrews said: "There is a tremendous demand for Victrolas and it is difficult to fill orders complete. We are able to fill our record orders nearly complete."

Mr. Andrews furnished Victrolas at recent meetings of the New York State Teachers' Association at Elmwood Music Hall and Calvary Presbyterian Church. He sent out postal cards inviting patrons to hear the Victrola records of Mischa Elman, violinist, who recently played in Buffalo.

The King Furniture Co. announces that it will close its talking machine department about March 1.

B. M. DeCou and R. H. Wilkinson, of the educational department of the Victor Co., addressed the Buffalo meeting of the New York State Teachers' Association. The use of the Victrola in the teaching of penmanship and English literature was among the subjects covered.

George J. Veach, a Victrola dealer of Oil City, Pa., recently called on Mr. Andrews. Another visitor was George Winter, of the Winter Piano Co. While in Buffalo Mr. Winter bought furniture for his new Victor booths.

"A small deposit now will hold your Victrola here until Christmas" was a recent offer made by Manager Gardner, of J. N. Adam & Co.'s Victrola department.

The Singer phonograph is being featured by the C. F. Adams Co., 577 Main street.

Grafonolas have a fine setting in the show window of Winegar, Lindsay & Seales. A background of reversible panels gives the window a parlor appearance. The walls are tinted with a terra cotta effect and the woodwork is in light blue. The panels are offset with fine stencil and the general combination is decidedly pleasing. The window is supplied with rich antique furniture.

W. H. Reilley, sales manager of the Albert Schuler Piano Co., had a novel Edison window for Thanksgiving. He used a wishbone eight feet high and four feet wide, outlined with vari-colored electric bulbs. Inside the wishbone was a laboratory model of the New Edison. J. M. Sawers, representing this firm, recently gave an Edison recital at the Plymouth M. E. Church. He also addressed the audience on the charms of the instrument and the records.

Herbert A. Brennan, manager of the Victrola department of the William Hengerer Co., recently conducted a successful "Victrola Week." The event was widely advertised and marked by elaborate window displays.

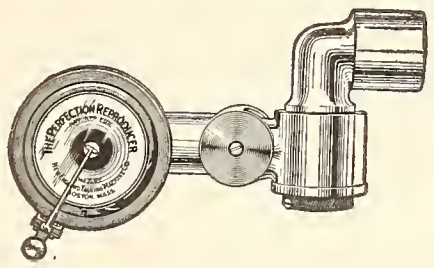
John G. Schuler, dealer in pianos and Edison machines, is living up to his fame as having the "busy corner store" at Main and Utica streets. L. F. Ellison, of Mr. Schuler's sales staff, was recently married to Miss Violet Smith, of this city. Manager Cole, of Mr. Schuler's Edison department, says he is delighted with his Christmas trade.

E. W. Staley, manager of the Victrola department of the Kurtzmann Co., has special signs and other features for his Christmas window display.

P. J. LYNCH RESIGNS

Announcement was made this month of the resignation of P. J. Lynch as treasurer and general manager of the James Manoil Co., Newburgh, N. Y. Mr. Lynch's future plans have not as yet been announced.

Write to your Congressman at once strongly urging the passage of the Stephens-Ashurst Bill, H. R. 13,568, providing for maintenance of retail prices on trade-marked articles. There is no time to lose.



The Perfection Ball-Bearing Tone Arm and Reproducer

The PERFECTION

Ball-Bearing Tone Arm

is manufactured exclusively by this company and the ball bearing idea is our exclusive patent. This accessory helps the Edison dealer to sell machines and will increase record sales for Victor and Columbia dealers when shown to owners of Edison machines.

The PERFECTION

Ball-Bearing Tone Arm

and reproducer is a STANDARD accessory for playing Victor and Columbia records on all types of Edison disc machines.

OVER 10,000 are now in use. Why? Because it is the highest grade mechanism manufactured for the machine and one that HOLDS its adjustment.

Our quantity prices are more than consistent—they are unbeatable, considering the quality, workmanship and finish of our product.

The "PERFECTION" arm is a *high class* tone arm for a high class machine—it produces *high class* results

THE NEW ENGLAND TALKING MACHINE CO.

16 BEACH STREET **BOSTON, MASS.**

TRADE SITUATION IN CINCINNATI

Shortage of Goods for Holiday Trade Likely —Hutchinson-Wamser Co., of Portsmouth, in Trouble—National Talking Machine Co. to Reorganize—Leading Concerns Pleased With General Outlook—News of the Month

CINCINNATI, O., December 5.—Although the climax of the holiday business is twenty days off the trade is already anticipating a shortage of goods. Factories are notifying local connections of an immense volume of business, much of which cannot be filled, and on top of this comes a congestion in traffic which will prevent a free shipment of material from the factories. So uncertain is the latter phase that the Phonograph Co. is receiving shipments of records by express in order to supply the holiday wants.

It is possible that the Cable Company will be the only house having a satisfactory stock of Victrola goods, and this was made possible through Manager Gruelich being satisfied to carry instruments from as long back as last February. He commenced to order at that time in anticipation of the usual Christmas shortage and his belief in this respect has been justified. The move, however, is not within the means of the average retailer.

The local situation was inclined to be normal last month. Most of the business was in records. All the houses are using much space in the newspapers.

About the one drawback of the last month was the throwing of the firm of Hutchinson-Wamser Co., Portsmouth, O., into involuntary bankruptcy. This step was caused by the disappearance of H. S. Hutchinson, a member of the firm, and the departure of the coin of the concern. The petitioners are the Phonograph Co. and the Rudolph Wurlitzer Co., Cincinnati, and Lyon & Healy, Chicago.

The Columbia Grafonola is being featured by Steinway & Sons in connection with the Clayola.

The Victor Co. yesterday morning had a full page advertisement in The Enquirer dedicated to the $15 Victrola. It is believed to be the largest individual advertisement appearing in this market.

R. J. Whelen, local manager of the Columbia Graphophone Co., when interviewed, stated that "he was too busy to talk," but did say "business is so far beyond our expectations, although our anticipations had been great, that this year's figures will soar far beyond any that the company has ever known."

Reports from the local Dictaphone headquarters at the Columbia Graphophone Co. on West Fourth street are to the effect that Dictaphone sales are increasing every day and Mr. Krumenauer, the local man, is on the jump.

The long expected reorganization of the National Talking Machine Co., owner of the Crystola, apparently will take place this week. The manufacturing rights held by the Knabe Bros. Co. were released only recently and it was hoped to secure quarters and produce enough machines to make an impression in the local market at least for the holiday season.

The Starr Piano Co. is elated over the November showing. The factory is now making excellent shipments and is gradually enlarging its record catalog, this being an unusually happy combination.

The Vocalion department of the Aeolian Co. is now fully organized and results are being produced. New blood has been injected into Manager Byar's department.

This "Atlas" 3-ply veneer packing case saves freight charges and gives better protection to your cabinet machines.

Write for details.

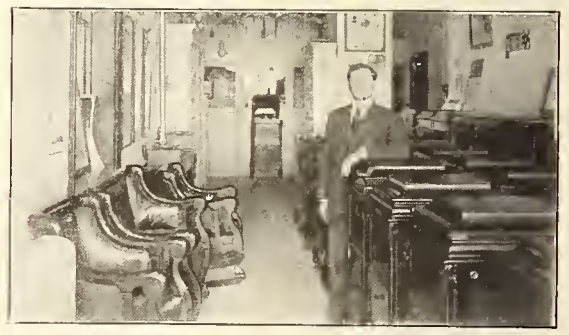
READY FOR THIRD ENLARGEMENT

Leibowitz Grafonola Shop Meets With Quick Success in Lively Bronx Trade Center

Although the Leibowitz Grafonola Shop, 894 East 163rd street, New York, has only been in business since the first of the year, it is now occupying its second store, and according to the



Partial View of Leibowitz Warerooms

plans of Louis I. Leibowitz, the proprietor, a third and larger store will soon be occupied.

Mr. Leibowitz is familiar with all details of the retail talking machine business, having been associated with the industry for over seven years. When he decided to open his own store he picked out a district that is growing rapidly, and the success he has achieved is a tribute to his foresight and progressiveness.

Mr. Leibowitz handles the Columbia line exclusively, and makes a feature of the foreign record catalog. He carries in stock every Hungarian, German and Hebrew record issued by the Columbia Co., and has built up a splendid clientele for these records.

REPORTS RECORD WEEK'S BUSINESS

Fraad Talking Machine Co. Sets New Mark in Machine Shipments

Frank C. Cozens, of the Fraad Talking Machine Co., stated early last week, his company had shipped out more instruments during one week in early December than in any other two months of the present year. Mr. Cozens also stated: "At the rate the orders are now arriving we are very much afraid the demand will exceed our factory capacity, particularly is this true of our Fraad, Jr., and our No. 3 and No. 4 machines, and although during the year we have made large additions to our factory space it is being proved daily that we did not over estimate the popularity of the Fraad line.

VICTOR RECORD SERVICE

"Very sorry, we haven't that record in stock" is not good business and isn't popular with the public. Order now and order completely!

We invite a test with any size of order. CRESSEY & ALLEN service means co-operation in the fullest sense of that word.

The word "Service" means with us that the needs of every dealer will be looked after expeditiously and in a manner to meet their approval.

FINE NEW QUARTERS FOR STANDARD TALKING MACHINE CO.

Active Victor Distributors in Pittsburgh to Occupy New Home on Ninth Street, With Four Times Present Floor—Elaborate Special Service Features Planned—Pittsburgh News

PITTSBURGH, PA., December 5.—One of the important expansions which The World takes pleasure in chronicling this issue is that of the Standard Talking Machine Co., of Pittsburgh, leading wholesalers of Victrolas and Victor records exclusively. For the past five years this company has occupied the entire eighth floor of 800-802 Penn avenue, but now moves to its spacious building on Ninth street.

President J. C. Roush, who, by the way, is the energizing genius of the Standard, believes that he has to sell more than Victrolas and more than Victor records, even. He holds that his "one way out" is to go the entire distance with his Victor goods until it is finally placed in the consumer's hands, and the cash tinkles in the dealer's till. His line includes selling schemes, inside tips on the hits to be, retailing helps and hints, and the like. He calls his office the "Consulting Sales Department" for his dealers—and gets away with it to mutual advantage.

The handsome new home of the Standard Talking Machine Co. is a four-story and basement, brick and steel building at 119-121 Ninth street. It is excellently located and contains all the facilities that make it well adapted to the needs of the firm. The five stories represent over 16,000 square feet of floor space, or about four times that of the present quarters, and are going to hold a great stock of Victrolas and Victor records. Mr. Roush says that this space is none too large, however, for the requirements of the business. And then he has fenced off quite a corner for that service idea, for which he has coined the title "Standard Service." In this department he contemplates an efficient little force whose big job will be intensive co-operation with the Victor retailers.

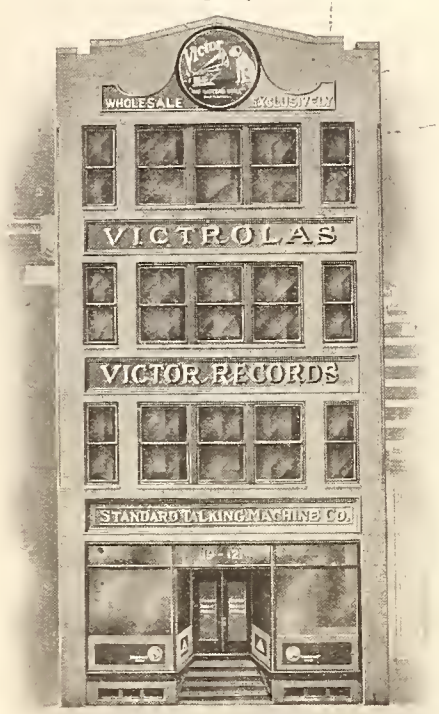
An idea of what co-operation means in Mr. Roush's service plans may be gained from his unique auditorium scheme. A good sized section of one floor is to be set apart as a monthly meeting place for Victor dealers, and will be equipped with comfortable chairs, a miniature stage, dressing room and like accessories. Here will be given talks on Victor salesmanship by authorities, occasional recitals by Victor artists and frequent informal round table discussions on selling problems common to the Victor dealers.

In a nut shell, the underlying motif of this service talk is, as Mr. Roush aptly puts it, "to make two 'Red Seals' sell where but one sold before." No one will deny that the Standard Co. is entitled to ever increasing Victor business on this ground, at least.

In speaking of the new service department, J. C. Roush, said: "Our service department will include every feature that will help the dealer secure business, as we see no benefit in selling the dealer a large number of records if he cannot in turn sell them to the public. This service department will include special monthly window display cards, monthly form letters to go out with the dealers' mailing list, imprinting monthly supplements, monthly envelopes advising the dealers of various artists when they appear in the territory, supplying them with proper literature to send out at the time of said appearance of artist and many other features.

"It is also our intention to work only the territory adjacent to Pittsburgh and that rightly belongs to us, and it is our intention to go no more than half way between Pittsburgh and the next nearest jobber, as we feel that the dealer within the territory is entitled to all the goods we receive from the factory, and we will permit none of it to go into foreign territory."

The Standard Co. announces that A. B. Kinch, formerly assistant manager of the wholesale Victor-Victrola business of the W. F. Frederick Piano Co., and Geo. C. Baish, formerly head traveling representative for that concern, are now affiliated with the Standard Co. These, together with L. C. Mountcastle, J. C. McGinity and J. C. O'Melia, will constitute the sales force of the company.



Standard Talking Machine Co.'s New Home

The new Standard Building is being made ready for occupancy about the first of the year.

Association Executives Meet

The executive of the Pittsburgh Talking Machine Dealers' Association held a meeting at the Hotel Henry on December 5. President C. L. Hamilton occupied the chair. The following were present: A. R. Meyers, Lambert Freidl, Albert Buehn, G. B. Bennett, W. J. Mullan, Jacob Scheonberger, Leo Half, William Wampler and J. C. Roush. A number of important business matters were taken up and prepared for further consideration at the regular monthly meeting, December 11, also to be held at the Hotel Henry.

Buehn Phonograph Co.'s Activities

The Buehn Phonograph Co., of Pittsburgh, prominent Edison jobbing house, has announced an elaborate tone test of the Edison to be given in Carnegie Music Hall, East End, on December 12. Miss Christine Miller will render a repertoire of songs, bringing out the marvelous and authentic reproduction of her voice by the Edison record on the Edison phonograph. Invitations have been issued to the various dealers in the Pittsburgh territory, and it is expected that a large audience will be present.

The Buehn Phonograph Co. has completed the improvements on the second floor of its beautiful establishment, and this week threw open to the public three new parlors and a spacious recital hall. This floor is used mainly for record demonstration, in addition to the retail quarters on the first floor. The rapid growth in this department during the past year has made the expansion necessary, both machines and records demanding greater space and more attention. Albert Buehn, president and manager of the firm, states that recently the business has passed former marks, and shows a steady increase as the holidays approach.

Lively Columbia Business

The Pittsburgh branch of the Columbia Graphophone Co., Sixth street and Duquesne way, reports a highly gratifying volume of business throughout this territory. Manager Lambert Fredl states that all of the local dealers are selling more records and machines than ever before in their history. Effective holiday advertising and aggressive sales methods, along with the Columbia co-operation, has brought their business to a "full capacity" mark.

E. L. GINSBERG WITH PATHE FRERES

E. L. Ginsberg, formerly connected with Landay Bros., and with Wm. Knabe & Co., has joined the sales staff of Pathé Frères Phonograph Co., and will work out several plans of dealer co-operation, which the company has prepared for the coming year.

The Massey Piano Co., of Des Moines, Ia., has taken over the stock and business of the Des Moines Pathephone Co., in that city.

HIGH GRADE TALKING MACHINES DEMANDED IN DETROIT

Jobbers and Dealers, However, Find it Difficult to Get Sufficient Stock—Association Discusses Advertising—Recent Removals—Leading Concerns Report Enormous Business and Good Outlook

DETROIT, MICH., December 7.—If we are to believe all that the talking machine dealers tell us we haven't the least doubt that hundreds of people in Michigan are going to be disappointed for the holidays, and that they will either be forced to go without the standard machines or be satisfied with some of the inferior makes now on the market. With all due respect to the new makes of machines—and some of them are mighty handsome—comparison with the standard makes shows distinctly that the manufacturers of the Victrola, Columbia Grafonola, New Edison, Sonora and other well-known machines are experts in their line, and the disappointing feature about so many of the newer makes is that they seem to lack the artistic and the splendid finish which is so emphatically brought out in the standard machines.

Many New Machines Appear

It is really surprising to note the number of new machines that have made their appearance in Detroit since the last issue of The Talking Machine World. For instance, Crowley, Milner Co. have added the Fraad phonograph; Heyns Bazaar have added the Vista phonograph; the Ernst Kern Dry Goods store added the "Eufonola" phonograph and announce that this new department can be found on the fourth floor; Weil & Co., who were willing to place a tremendous order for one of the standard makes of machines, finally added the Vitanola. In fact, on every avenue of business, we have noted furniture stores, drug stores and others who have within the past thirty days installed a department for phonographs, most of whom have first endeavored to get one of the standard makes of machines, and then decided on the newer lines when refused. Comparatively few new accounts on Victrolas, Columbia Grafonolas and New Edisons have been opened this season, and indications are that not many new ones will be added during the coming year. Several managers have told me that they preferred to help those dealers already holding franchises rather than taking trade away from them by granting new franchises. The one argument that is in favor of fewer dealers on standard brands is that no dealer can offer any better price inducements than the competitor. So often have talking machine dealers said to me: "It is not fair to let a furniture store, for instance, sell the same merchandise I do when I have every dollar invested in the talking machine business and am paying an enormous rent downtown, whereas the furniture dealers simply put in the department as a side line, and thus gets the benefit of whatever advertising I give the line." Considering this phase of the situation from a serious standpoint, the downtown dealer is absolutely correct.

Grinnell Bros. New Victor Quarters

C. H. Grinnell, of Grinnell Bros., Victor jobbers, is exceedingly well pleased at his new quarters, First and State streets, where he has three solid floors for machines and records. The new wholesale building ranks with any jobbing house in the Middle West, and it has every convenience that could be desired. There is a private salesroom, a large room for demonstrating records, a repair shop, an entire floor for machines and an entire floor for records so that Grinnell Bros. can and will carry nearly 100 per cent. more merchandise than they did at the old location.

Columbia Officials Visit Detroit

K. Mills, general manager of the local office of the Columbia, and Sam Lind, sales manager, report that December will close the greatest year the Columbia has ever had in Michigan. There is a tremendous increase in the volume of bsuiness on both American and foreign records, and the same applies to machine business. Dozens of new dealers have been started since the first of the year in new territory, while at all times protection has been given to those already holding Columbia franchises. A few weeks ago a number of high officials of the Columbia Graphophone Co. visited Detroit on a trip of inspection, being their first visit since the office was moved to 403 Woodward avenue.

Starr Co. Picking Out Dealers

W. H. Huttie, of the Detroit branch of the Starr Piano Co., reports increasing sales and business, and dealers on Starr phonographs. "We are not attempting to set the world afire, but are going along easy, taking our time as to the selection of dealers," he said to The World correspondent. "We have had to turn down many dealers because we did not believe them to be just what we wanted. We are in no particular hurry to get our line placed with every Tom, Dick and Harry, as our instructions from headquarters have been to get "quality" dealers and not "quantity."

Protecting New Edison Dealers

R. B. Alling, manager of the Phonograph Co. of Detroit, New Edison distributors, has very little to report other than the twelve months ending December 31, will show a handsome business and dozens of new dealers in all sections of the State. As for Detroit, Mr. Alling has not reached out for new dealers preferring to give those now holding franchises ample opportunity and ample protection. As a result, the only Detroit firms selling the New Edison are The Edison Shop, 256 Woodward avenue; Wallace Brown, 31 East Grand River avenue; D. K. Smith, Highland Park, and the East Side Diamond Disc Shop, Gratiot avenue. On Monday, December 4, a two-page advertisement appeared in the morning newspapers relative to the New Edison, giving the names of the four local distributors. We have seen many full-page newspaper phonograph advertisements, but this is the first time in our recollection that we have noted two full pages as a singe insertion.

Brunswick Phonographs in Town

The Brunswick-Balke-Collender Co. at its Jefferson avenue store, announces the arrival of a shipment of Brunswick phonographs, and already has salesmen in the territory signing up dealers. The Detroit office will handle the entire State of Michigan. The Brunswick plays all standard makes of records.

Stores in New Locations

Clough & Warren Co. will open shortly a new store at 84 Broadway, where they will sell their own make of pianos as well as their own make of phonographs.

The W. W. Kimball Co. recently moved from Bates and Farmer streets to 80 Broadway, and at this particular time are building a special department for the sale of the Kimball phonograph. J. E. Belcher hopes to have the new department in operation by holiday time.

Association Discusses Advertising

The Detroit Talking Machine Dealers Association at its last meeting took up the subject of "Talking Machine Advertising," and there were many excellent discussions and suggestions. The point that dealers tried to reach was the best advertising for the sale of phonographs and records. It was reported that the new plans adopted for the charging of interest and the trade-in schedule were working out fine, and to the satisfaction of everybody concerned. Wallace Brown, New Edison dealer, announces that starting the first of December he was adopting a new policy of not taking any outside machines as trade-ins, thus cutting down his supply of second-hand machines. Edison phonographs taken in as trade he could have refinished and sold for almost new instruments. So far the plan is working out very satisfactorily, he reports.

A six-story new toy shop having opened a stone's throw from his location is proving very good as a trade stimulant for Max Strasburg, 74 Library avenue, Victor and Columbia dealer.

Ed K. Andrew, manager of the J. L. Hudson talking machine department, made several trips during the past thirty days endeavoring to purchase $100 and $150 Victrolas in almost any finish. Although he had what he believed to be a big supply the first of November, the sale has been so active that he now finds he will be caught short for holiday trade. "And promises don't go with people when they come in to purchase for the holidays," said Mr. Andrew. "We can't promise to have them right after the holidays because we don't know that we could keep such promises, the factories being so far behind in orders."

Geo. Bolster, a furniture dealer of Plentywood, Mont., has taken the agency for the Aeolian-Vocalion, and will feature it permanently in his store.

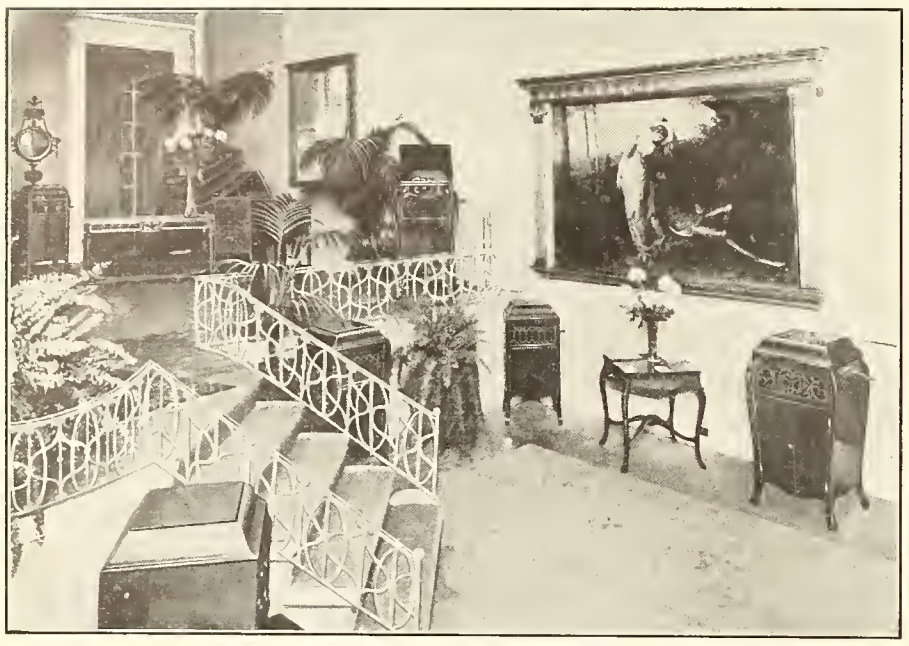
THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., December 7.—One of the most interesting incidents of the month has been the opening, within a few days, of the new Sonora warerooms in this city at 1311 Walnut street. The Sonora Phonograph Corp. have taken the entire building and have remodeled it for their purposes, and it is a model of taste and refinement, and in thorough keeping with the instrument to be handled there.



View of Sonora Main Reception Room, Philadelphia

Stairway Leading to Ladies' Reception Room

First, let me describe the Philadelphia Sonora home. It is one of the best locations in the city for the handling of an artistic product. It is just off of Broad street and on the most fashionable thoroughfare. Formerly there were two entrances to the building, one of which has been closed and is used as a show window. On entering the building, the front of which is in stucco, a most artistic interior is at once discovered, with half of the main wareroom in the form of a raised balcony, with large stairs at its approach, which contain brass railings. The furniture of the room is quaint and exquisite in taste, and one large and handsome oil painting adorns the wall from the east. The drapings, lighting and everything about this room is in keeping with its general artistic effect.

At the back of this main large room are the repair rooms, and an elevator which carries patrons to other portions of the building. On the second floor are two large demonstrating rooms and a recital hall which comfortably seats seventy-five people. This floor is also furnished with very good taste. On the third floor are two more demonstrating rooms, and the fourth floor is used for the storing of stock.

The Sonora store is under the superintendence of L. S. McCormick, who is general manager of retail stores, with headquarters in New York. The man in direct charge is Joseph Lynch, who was brought here from New York to take charge. He has as his assistants David Lent, Edward Keech and Miss Helen Doyle. It is very apparent from the business that has already been done that this staff will have to be increased very rapidly.

Mr. McCormick told me last Wednesday when I visited the new store that he was particularly impressed by the way the project has been received in Philadelphia, and that quite a number of instruments were sold before ever the furniture was in place and the decorating finished. The general call has been for instruments at from $150 up, and quite a lot of enthusiasm has been shown for the Sonora's $1,000 artistic style, which is known as the "Supreme."

Before long the Sonora Corp. expect to open branch stores in different sections of the city. They have established no agencies here, but have held Philadelphia absolutely for themselves. Mr. McCormick said: "We knew just as soon as we could spare the product that we could open a home here in keeping with the general fine class of business to which the Sonora appeals." The firm have in contemplation the opening of similar stores in Boston and other large cities.

Exterior of New Sonora Building

George E. Brightson, the president of the Sonora Corp., and Frank Coupe, the advertising manager, have been in Philadelphia, the latter for the purpose of arranging for an advertising campaign here.

"We are all salesmen every day of our lives. We are selling our *ideas*, our *plans*, our *energies*, our *enthusiasms* to those with whom we come in contact."

—*Chas. M. Schwab, American Magazine, Nov. 1916.*

What Mr. Schwab says, applies to us. We have been selling our ideas, plans, energies and enthusiasm along with Victor product for 18 years and if you Mr. Dealer have not had this service you are the loser.

Place a "stop loss order" and secure pioneer service right up-to-date.

Philadelphia

THE TRADE IN PHILADELPHIA AND LOCALITY—(Continued from page 36)

ening all the time, and the big factories are not able to keep up with the demand. At some of the stores they have hardly enough machines on hand to supply one good day's sale of Victors, and they are on their hands and knees begging for goods. This is not due to any carelessness, but such firms tell me that they have unfilled orders from the factory that have been standing for more than a year. Nor is it the condition alone of some dealers, but of many of them, and among the very largest.

The New Harmonola Warerooms

The Harmonola, at 1611 Chestnut street, have finally gotten their warerooms in fine shape, and are already well pleased with the business they have done, and report that their prospects are most encouraging.

Big Increase in Edison Business

Blake & Burkart, the biggest handlers here of the Edison, report that their business in November was far in advance of last year. They have found it difficult to get stock, not only in talking machines, but also sufficient pianos to meet the big demand for them. Mr. Gardiner, district superintendent of the Edison, was in Philadelphia the past week. Both members of the firm were in New York last week to see the new Edison cabinets which were exhibited at the Ritz-Carlton. They were highly pleased with them, and believe they will appeal strongly to the public. They state they have been pronounced by furniture experts as being the finest thing ever brought out as to the finish.

The Ludwig Piano Store in Philadelphia have placed a number of new booths for the selling of Edison machines, and they will advertise extensively.

Good Report From Buehn & Co.

Louis Buehn & Co. report that their business in November was very good. They did not receive as many machines as the previous month, but they believe that the Victor Co. will make up for the shortage this month. Their record business was considerably better than they expected, and they are constantly aiding materially the dealers to further their record business by printing for them lists of the best sellers, not only in domestic records, but also in records of all nations. Recently they sent out to the trade, as a help to dealers, a list of the best sellers from the foreign record catolg.

New Building for W. S. Gibson

Will S. Gibson, the Victor dealer at 4626 Frankford avenue, has contracted for the building of two additional hearing rooms to those already installed.

Worth's Re-opening

Nathan Worth, of Riverside, N. J., a Victor dealer in that city, had a grand reopening on December 2. It was a great success in the number of visitors and the amount of prospects secured.

Edison Dictating Machines Popular

The Edison Dictating Machines had a very successful November, and it was the second biggest month the firm has ever had. Nelson C. Durand was over from the factory last week. They have placed two new men on their sales force, and have added a brother of the present manager, R. L. Austin, to the office force. Among the big firms who secured Edison Dictating Machines during the month were Smith, Kline & French, the Concrete Steel Co., the Goodrich Tire Co. and David Lupton & Co. Besides these big firms which got a full equipment, they sold a large number on smaller orders.

To Remodel Penn Phonograph Co. Store

The Penn Phonograph Co. have made complete arrangements for the entire remodeling of their store. They will move their offices to the front and all the working end of the business will be in the rear of the store. They had a very large November, and quite a number of out-of-town dealers called on them pleading for machines. They state that the factory holds out promises of better deliveries this month.

Better Deliveries of Columbia Machines

The Pennsylvania Talking Machine Co. report that their business was excellent in November, and they found conditions as to delivery of machines better than last month. The Lazaro records have been having an enormous sale, and they have helped to increase their record sales very materially. The only machines upon which they had a shortage were those over $35. Their shortage on $25 and $35 machines continues with little hope of catching up on them before the first of the year. Manager Walter Eckhardt was at the executive offices and at the factory a few days last week.

The Dictaphone business of the Pennsylvania Co. was most satisfactory in November. Not only the office, but all of the sales force won their quota, which was most gratifying and which called out the following telegram to Manager Westervelt:

"Congratulations to self and every one of the salesmen connected with the organization.

"M. F. MILNOR, General Manager."

Manager Westervelt was down in the Baltimore territory last week looking over the condition, which he found most satisfactory. Everywhere the men are trying to put over enough business to win the desired offer of the factory of a free trip to New York to the Dictaphone convention to be held later.

NOT CONFINED TO LARGE CITIES

While visiting in large cities you have observed the care and art that is displayed in the show windows, and the crowds that are attracted thereby. You have said to yourself, "That is all fine for big cities, but not essential to my welfare in a small place." A blundersome mistake. Human nature, in city or village, is the same old thing. A village merchant who keeps his windows as an index finger pointing inside, sets the pace for weal or woe.

COMPLETING TWO YEARS OF NOTABLE TRIUMPHS FOR THE WONDERFUL

AEOLIAN-VOCALION

THIS achievement of the Aeolian-Vocalion—an unqualified supremacy in the world markets within two years of its introduction to the public, is almost without parallel in the annals of commerce.

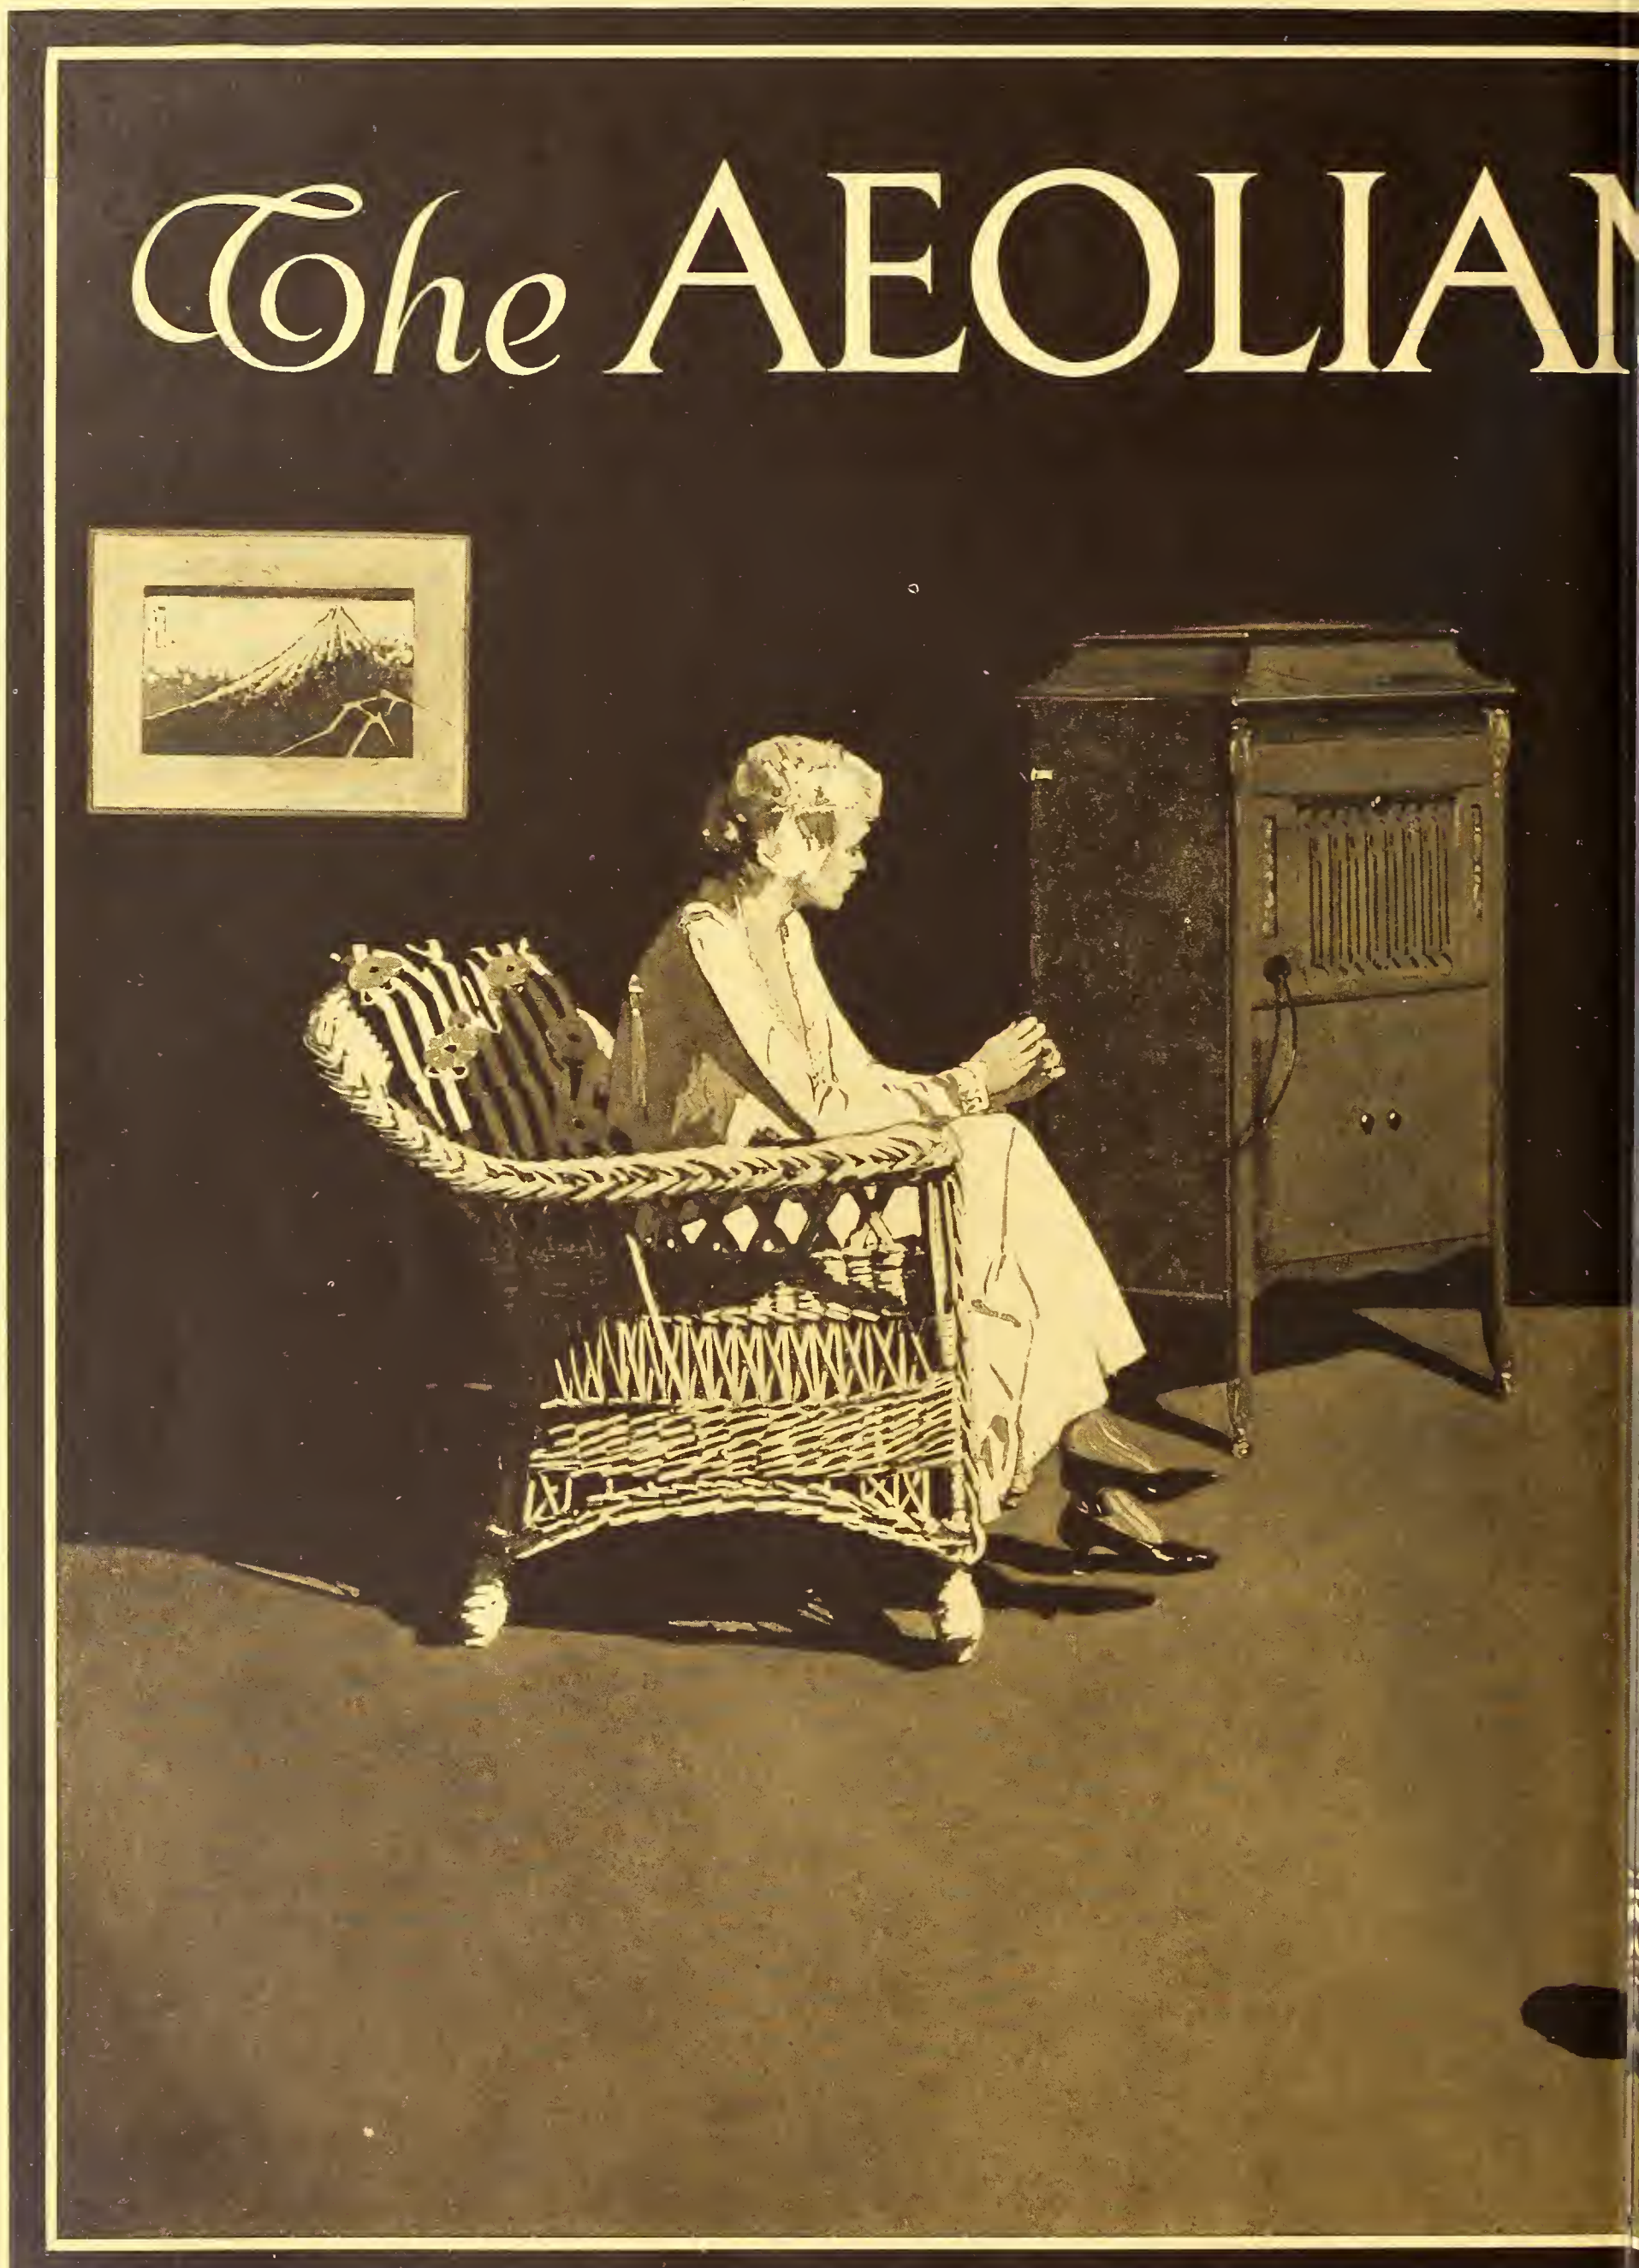
In November, 1914, this wonderful, new phonograph was placed on display in the salons of Aeolian Hall. From the very first it created widespread interest—made a veritable sensation in musical circles.

The Vocalion was an epoch-making step in the evolution of the phonograph. It evidenced the first material interest in instruments of the sound reproducing type on the part of any great musical instrument house. And that The Aeolian Company, maker of the Vocalion, was the world's leading musical concern—a highly progressive organization, but withal one of the most exclusive and conservative in the music field was further significant.

Much of the Vocalion popularity has been won, of course, through the novel opportunity it affords for musical expression. The Graduola expression device, as everyone now knows, permits complete control of tone—enables each record to be played with a wide latitude of effects. This has given phonograph music a vital quality, a variety never before possible, and has added infinitely to the charm and artistic possibilities of the sound-reproducing instrument.

But it is beauty and unequalled fidelity of tone that has held public approval; that has elicited the immediate endorsement of the musical world; that has brought the Vocalion within the space of two years to an unassailable leadership of a great and strongly intrenched industry!

THE AEOLIAN COMPANY



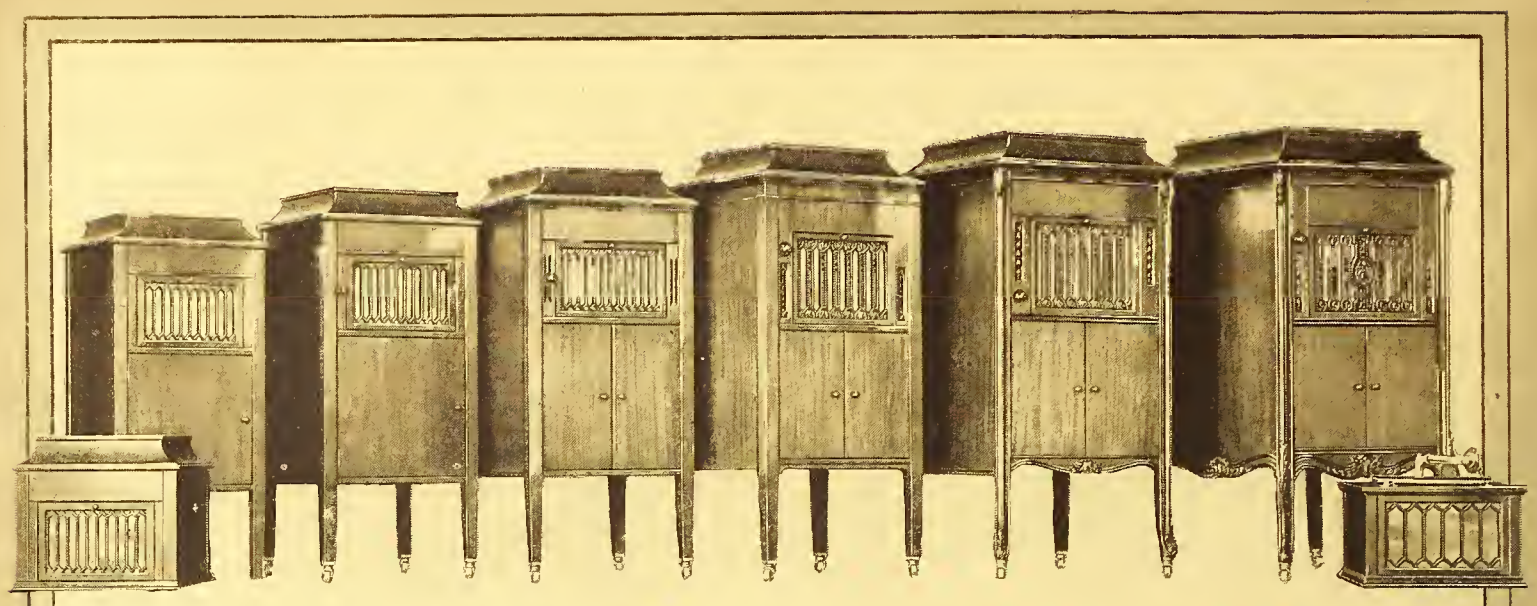
The AEOLIAN

-VOCALION

THE colorful tones of the human voice, all the varied notes of every instrument of the full orchestra are reflected faithfully—made to live anew by this supreme phonograph. Such clarity, sweetness and perfect purity of tone never have been possible before with any instrument of the phonograph type. And this wonderful, *natural* tone, you may vary and shade, make to express your own music feeling through the revolutionary Vocalion expression control—the Graduola.

Your slightest pressure upon the Graduola finds instant answer in the music. The melody ebbs and flows as you will. Its delicate shadings are the picture of your thoughts.

There is but one way to know and fully realize the supremacy of the Vocalion—you must *hear* it—hear the remarkable perfection of its tone. Then you must take the Graduola and discover the fascination of *making music*—of building new and refreshing tonal beauty with the skill of the greatest musicians as your guide. Scores of people every day are making this personal test of the Vocalion. Certainly every dealer—everyone connected with the music trades—should know the intensified music pleasures this great new instrument affords.



ABOUT VOCALION REPRESENTATION

MUCH Vocalion territory has already been assigned — Vocalion representation is recognized as the most profitable any dealer can secure. The number of firms manufacturing phonographs is already increasing. Competition is growing, and popular demand is depending less and less on the glamour of association with individuals and artists, and more and more on intrinsic merit and demonstrable superiority.

The Aeolian-Vocalion is not only far in the lead today, but the whole history of its manufacturers is a certainty of its remaining so. Moreover, this leadership is obvious at a glance, even to the least musically cultured. It is apparent in the most moderate-priced "stock" model—overwhelmingly evident in the Art Styles.

When in addition it is realized that the Aeolian-Vocalion line is the broadest in the industry, ranging from instruments at $35 to magnificent art models at $2000, and that Aeolian representation is *exclusive*, insuring the dealer the advantage of all the business in his territory, the tremendous value of this representation becomes apparent.

We invite you to write for details of the Vocalion proposition. Address the Aeolian-Vocalion Department

THE AEOLIAN COMPANY

AEOLIAN HALL, NEW YORK CITY

Chicago Office: Fine Arts Building, Michigan Avenue
A complete display of all models of the Aeolian-Vocalion may be seen at this office

THIBAUD RECORDING FOR PATHE

Pathé Frères Will Shortly Announce Records by Famous French Violinist

A recent visitor to the recording laboratories and executive offices of the Pathè Fréres Phonograph Co., New York, was Jacques Thibaud,

Jacques Thibaud

the famous French violinist. Mr. Thibaud is under exclusive contract with Pathé Frères, and in the very near future a number of his Pathé records will be announced. Mr. Thibaud is starting on a tour of this country, which calls for his appearance on the concert stage in the leading American cities.

Jacques Thibaud is well-known in musical circles both here and abroad, having won international recognition as one of the leading violinists of the present day. His fame was first achieved in Paris, and in 1903 he made his initial American tour, which was a signal success. His second visit to this country was made during the season 1913-1914, when he made a deeper and even more favorable impression than on his previous visit. A third tour, booked for the following season was prevented by the outbreak of the war, and Mr. Thibaud is now here on a year's leave of absence from the French army, to recover from injuries received in battle.

As a representative of the French school of violinists, Mr. Thibaud is one of the foremost artists now before the public, and his playing has won enthusiastic praise and admiration from critics here and abroad.

NEW QUARTERS FOR JONES-MOTROLA

Large Loft Leased on West Thirty-fifth Street, New York, to House Various Departments—to Be Occupied on or About February 1

Jones-Motrola, Inc., manufacturers and distributors on the Motrola, the electric device for winding talking machines automatically, reports the stock is coming along fast enough to enable the company to take care of the greater part of the current orders, both for attachments for direct or alternating current.

The increased demand has forced the Jones-Motrola, Inc., to lease an entire new loft at 29-33 West Thirty-fifth street, New York, which will be occupied on or about February 1, 1917. The loft, with over 7,500 feet of floor space will house the stock and shipping departments as well as the general offices of the concern now located at 171 Madison avenue.

That the Motrola has lived up to the claims made for it is indicated by the numerous letters from dealers and distributors commending the device and the regularity with which reorders are placed. Moreover, since it was placed on the market about a year ago the Motrola has been materially improved, especially in the direction of making it as noiseless as possible when in operation.

URGE ACTION ON STEPHENS BILL

Jobbers Impress Dealers With Importance of Making Strong Appeal to Congressmen if Measure Is To Be Passed This Season

The National Association of Talking Machine Jobbers is putting fresh energy into its campaign to bring about the passage of the Stephens-Ashurst Bill H. R. 13,568, providing for the maintenance of retail prices on trademarked articles. The members of the Jobbers' Association have already done some excellent work in the interests of the measure and the officers and members of the organization have taken occasion to make personal appeals to various Congressmen whose support is particularly desired.

The jobbers are urging the dealers to write to their Congressmen immediately urging favorable action on the measure, and it is pointed out that strong and concerted effort is required on the part of those favoring the bill if it is to be passed during the present session of Congress.

With the large number of political bills and various government measures to be considered, there will not be much time given to the consideration of the general run of business legislation.

WILL MANUFACTURE CABINETS

KANE, PA., December 8.—The Kane Blind & Screen Co., manufacturer of Kane instrument stands, reports a gratifying increase in the orders for these stands which have been received from nearly every state in the union. The company has confined itself to the production of stands for only two years, but announces that a line of cabinets is being developed for introduction during the coming year, which will, no doubt, be well received by the general trade.

Beginning with the new year, the corporate name of the firm will be "Kane Manufacturing Co."

COLLEGE COURSE FOR "TALKER" MEN

Special Department for Talking Machine Trade to be Feature of Merchants' Short Course at Kansas State University This Winter—Those Back of the New Project

KANSAS CITY, Mo., December 4.—F. R. Hamilton, head of the extension department of the Kansas State University, was in Kansas City December 2, making arrangements for a talking machine section during the merchants' short course at Lawrence next February.

Heretofore there has been no section for music dealers of any kind at these short courses. The suggestion for one came from M. M. Blackman, manager of the Edison Shop at Kansas City, who felt sure that his dealers would like to get the benefits that dealers in hardware, jewelry, groceries, and clothing receive from the State University. He took the matter up with Mr. Hamilton, who immediately saw the many advantages in the plan. Mr. Hamilton came to Kansas City, and conferences were arranged with A. A. Trostler, manager of the Victrola department of the Schmelzer Arms Co.; E. A. McMurtry, manager of the Columbia branch; C. V. Bissell, manager of the Starr Piano Co. branch, and others. All were enthusiastic; and Mr. Hamilton is going ahead with the plans.

There will be at least one afternoon in which the general program is devoted to phonograph dealers, with a speaker of national prominence. Following this program, there will be a round table, during which the dealers of the various lines will discuss their common problems. Then there will be round tables each day of the week, for the dealers in particular makes of phonographs.

Mr. Hamilton was particularly glad to make these arrangements, because so many of the talking machine establishments in Kansas started as adjuncts of some other line of business. And the dealers may come to Lawrence to enter the courses for these other lines, as well as to enter the talking machine classes. The new feature is expected to stimulate markedly the attendance at the short course.

"This is an important project," said Mr. Trostler to Mr. Hamilton. "We appreciate it, because we see that the talking machine is becoming the subject of real business in itself, instead of being merely a side line, as it had been considered by many merchants."

This course at "K. U." has grown in attendance from 100 to 500 in three years; next February will see the fourth of these events. They have been remarkably helpful to the Kansas merchants, in showing them the advantages of cost-finding systems and modern business methods. The manager of an adding machine company remarked recently that his sales in Kansas among the merchants who attended had been more than tripled.

Missouri merchants also have the benefit of these courses, and the phonograph dealers of that and other States in the Kansas City distributing territory will be invited. Last year, there were merchants from five States besides Kansas at the various sessions. There is no fee for the courses.

MARKET NEW REPRODUCER

The Wilson-Laird Phonograph Co., New York, has just placed on the market the "Bliss" reproducer, which is presented to the trade as a reproducer that embodies several distinctive features. The diaphragm is constructed of a special patented composition that the manufacturer claims is superior to mica. The Bliss reproducer has been advertised extensively in the local newspapers, and the company has made arrangements whereby the trade can be supplied with immediate deliveries of all quantities.

Talking Machine Dealers should write at once to their Congressmen urging strongly the passage of the Stephens-Ashurst Bill, H. R. 13,568, providing for maintenance of retail prices on trade-marked articles. There is no time to be lost.

SOPRANO MAKES VICTOR RECORDS

Mme. Galli-Curci, Latest Opera Sensation, Under Exclusive Contract With Victor Co.—What the Critics Had to Say

Musical circles in the United States were treated to two distinct sensations recently, the first being the successful American debut in Chicago of Mme. Galli-Curci as "Gilda" in "Rigoletto," and second the announcement by the Victor Talking Machine Co. of the first two records by this noted artist, and the fact that

Mme. Galli-Curci

she has been placed under exclusive contract with the Victor Co.

It is a matter of particular interest that Mme. Galli-Curci's first Victor record was the "Caro Nome" (Dearest Name) from "Rigoletto," the number that aroused her audience at her debut. The other record is "La Partida" (The Departure), by Alvarez.

In a story of the soprano's first American appearance the critic on the Chicago Tribune said in part: "When the curtain fell on the second act (of 'Rigoletto') the calm, suave, sophisticated gathering rose in its seats and cheered, and shouted and screamed its delight with Mme. Galli-Curci, the 'Gilda' of the afternoon. Nothing like her had been heard, the audience individually and as a body asseverated, in the six years which Chicago has had an opera company named for it."

Speaking of her voice another critic said: "She cannot trill. The famous trill which Tetrazzini carries up the stairs with her is absent, but the high E is there. It is the purest note I have ever heard. It is purer than a harmonica or the violin."

Still another critic sadi: "The first impression of Mme. Galli-Curci was that her voice is one of the most beautiful that has ever been heard on the auditorium stage, and this is said with full recollection of the list of famous names which will come to everybody's mind."

In view of these enthusiastic criticisms by writers who are by nature inclined to be distinctly conservative would indicate that the Victor Co. has in Mme. Galli-Curci a most valuable addition to the company's list of exclusive artists.

COLUMBIA HOLIDAY ADVERTISING

Window Hangers, Booklets, Motion Picture Slides, and Many Other Forms of Publicity Are Included in Christmas Campaign

The advertising department of the Columbia Graphophone Co., New York, has just prepared one of the most extensive advertising campaigns on behalf of Christmas business, which has yet been introduced to the talking machine trade. Every conceivable form of advertising is included in this campaign, which is certain to act as a marked stimulus to Columbia Grafonola and record sales from now until Christmas.

For several years past the Columbia Co.'s advertising division has paid particular attention to the preparation of Christmas season advertising, and each year's publicity has been more attractive and effective than its predecessor. It was thought that last year's series of advertisements and literature reached the acme of perfection in this field, but the 1916 publicity outdistances the 1915 material by a considerable margin.

Artistic window hangers, booklets featuring Grafonolas, circulars suggesting timely record outfits as Christmas gifts, hangers devoted to records especially adaptable for the Christmas season, moving picture slides, car cards, and newspaper advertisements, are all included in this mammoth campaign which is offered to the dealers as another link in Columbia co-operation and service. The entire set of Columbia Christmas advertising embodies the attractive set of colors, green and red, which have always been associated with the Christmas spirit.

THE LANGUAGE-PHONE

AND ROSENTHAL'S PRACTICAL LINGUISTRY

DISC LANGUAGE RECORDS

Every live dealer knows the great demand there is for knowledge of **Spanish** and other foreign languages. The trade of the United States is rapidly extending to other countries, especially South America. People everywhere are studying foreign languages—in fact, it has become the most popular study of today.

Up-to-date dealers are taking advantage of this opportunity and are making good profits selling the Disc Records of

THE LANGUAGE PHONE METHOD

AND ROSENTHAL'S PRACTICAL LINGUISTRY

This system has been truly called **The Dealer's Method,** for it is so simple to handle and easy to sell. Special training for salesmen is not necessary. It is sold like the music records.

Our national advertising has popularized the trade-mark "Man at Phone" (see cut) which brings customers of the better class to your store.

WITH THE TRADE IN MONTREAL

Talking Machine Men Prepared for Unusual Business—Berliner Gramophone Co. Makes Second Wage Advance in Year—New Concerns Enter the Field—Edison Diamond Disc Phonograph for Government House

MONTREAL, QUE., December 4.—The members of the talking machine trade in this section have about completed preparations to take care of the enormous holiday business, which is already well under way. There is still the cry of a machine shortage, but even with this handicap, the trade is inclined to be unusually optimistic.

As an indication of the prosperous conditions existing and of the generosity of some talking machine manufacturers, it is announced that the Berliner Gramophone Co., Ltd., has given their employes their second voluntary increase in wages this year. The latest advance is accompanied by a reduction in working hours in the pressing plant, and the men in the future will work eight and one-half hours instead of nine hours per day, and get more wages for the shorter time.

Recent recordings by the Berliner Gramophone Co. include two double-sided records by the band of the First Regiment Grenadier Guards of Canada, four selections being "Laurentin March," "When Your Boy Comes Back to You," "Land of the Maple," and "Here's to Tommy." There are also two selections by Jos. Saucier, popular Montreal baritone, "Calm as the Night" and "Until."

Eight new luxuriously fuunished sound-proof demonstration rooms have been installed in the phonograph department of Layton Bros.

The Canadian Graphophone Co., Columbia distributors for the Province of Quebec, report a good call for Lazaro records. There is also a strong demand for records by Elzear Hamel, the favorite French-Canadian comedian. The latter records have been featured by large advertisements in the Montreal French Daily.

Layton Bros. recently made a particularly striking window display with the famous dancing ragtime Rastus as the center of attraction. The complicated steps of the little dancer kept the sidewalk in front of the store crowded throughout the day.

The Canadian Graphophone Co. are doing a nice trade in Columbia electric machines and in foreign records.

The Government House, Ottawa, now has a new Edison Diamond Disc phonograph. The sale was made by R. S. Williams & Sons Co., Ltd., Toronto, which received the following letter from the Comptroller:

"I am commanded by Field Marshal His Royal Highness the Duke of Connaught to inform you that he is very pleased with the Edison Diamond Disc phonograph which you supplied to Government House. You are entitled to use the word, 'Patronized by H. R. H. the Duke of Connaught,' if you wish to do so."

The D. H. Hogg Co., 496 St. Catherine street, East, has taken on the complete Columbia line with a large stock of records, and will feature the same extensively.

The Berlin Phonograph Co., Ltd., has been incorporated with a capital stock of $20,000, to manufacture, buy, sell, import and export the Art-O-Phone talking machine. They will open a store at 153 St. Catherine street, East.

J. A. Hurteau, Ltd., report a fair business in Pathé and Sonora machines. They make a specialty of Pathé records imported direct from Paris.

NEW METHOD OF LISTING RECORDS

The Emerson Phonograph Co., New York, presents a new style of listing records on their December bulletin. Instead of the stereotyped manner of listing, the company arranges its December records by units so that a customer when reading the bulletin will feel inclined to order half a dozen records instead of single selections, as they all combine to make up a pleasing program.

TELLING PEOPLE HE SELLS VICTORS

Wm. J. MacFarlane, of Canandaigua, N. Y., Loses No Opportunity to Call Attention to the Line He Handles—A Recent Instance

Wm. J. MacFarlane sells Victor Victrolas and records in Canandaigua, N. Y., and anybody in the city who docsn't know it must be suffering either from blindness or deafness.

An idea of the method Mr. MacFarlane uses

Wm. J. MacFarlane's Auto Display

to attract attention is afforded by the accompanying illustration which shows his automobile suitably decorated, and which took part in the business boosting "auto run," and in which 125 other local business men were entered.

In talking of the parade Mr. MacFarlane said: "Besides the general advertising and glad hand given me at every stop, I distributed over 1,000 sets of Victrola advertising." This sort of energy turns the dealer into a merchant.

EXHIBITS EDISON FILM

R. C. Bollinger Music Co. Secures Some Good Publicity Through Use of Motion Picture Film in Local Theatre

MCALESTER, OKLA., December 5.—The R. C. Bollinger Music Co. recently secured some very profitable advertising through exhibiting the motion picture film, "The Voice of the Violin" at the Busby Theatre here. The film deals with the Edison laboratories at Orange, N. J., and in addition to the interesting story it tells, detailed scenes of the Edison plant are shown. During the showing of the film, S. B. Mosher, manager of the Bollinger store, entertained the audience with a number of high-class musical selections on the Edison Diamond Disc phonograph, demonstrating its various good qualities.

ATTRACTING WIDE ATTENTION

"Noset" Start and Stop Being Adopted for Use by Manufacturers — Energetic Advertising Campaign Being Prepared for Dealers

"We have received splendid results from our advertisement in The Talking Machine World," said an officer of the Condon Autostop Co., New York, manufacturer of the "Noset" automatic start and stop. "Members of the trade, more especially manufacturers, have all agreed that 'Noset' is an accessory which meets all the requirements of the public. In fact one manufacturer compares it to the self starter of the automobile. So essential and so great was the demand by the automobile owner for the device which would start his automobile automatically and conveniently that it was supplied by various independent manufacturers as an accessory to those who had purchased machines, making it in a measure a modern equipment of their automobile. The automobile manufacturers, anxious to offer refinements to the public, soon included the starting device as part of their regular equipment; and it has been predicted that the 'Noset' will be similarly recognized.

"One point that has not been made clear to the dealers is the fact that some laboratory models of various inventors have been shown to the trade but only demonstrated in the inventor's presence. One reason is that they have not created a versatile device to perform regardless of back tracking. If perchance the operator of the instrument accidently swings the sound box to and fro before placing the needles on the record, 'Noset' only performs its duty when the record is finished. 'Noset' starts and stops without attention all standard makes of records, including the ten cent varieties."

Mr. Condon states that the energies of the company's advertising department will be at the services of the trade, and already considerable printed matter is under way and in the mail. Every co-operation will be offered the dealer to develop a profitable market for the "Noset."

Write to your Congressman at once strongly urging the passage of the Stephens-Ashurst Bill, H. R., 13,568.

NEW "TEMPLE OF VICTROLA MUSIC"

Landay Bros. Formally Open Elaborate New Establishment on West Forty-second Street—Something of the Interior Equipment

Landay Bros., Victor distributors, held the formal opening of their new "Temple of Victrola Music" last Monday. This building, which is located at 23 West Forty-second street, is considered by many as the finest retail establishment in the local talking machine trade.

Landay Bros. New "Temple of Victrola Music"

The new "Landay Temple of Victrola Music" has been in course of completion for the past two years, and Landay Bros. left no stone unturned to make this building a monument to the remarkable achievements of the Victor products, and a permanent reminder of the progress and prestige of the House of Landay.

This new building is the "brain child" of Max Landay, president of Landay Bros., who has personally supervised every detail incidental to its construction and equipment. As Mr. Landay is one of the veterans of the Victor industry it is hardly necessary to state that there is absolutely nothing omitted in the new Landay building which can possibly add to the comfort and convenience of the Landay patrons.

Architecturally the new Landay building is of the fifteenth century Italian period, effective and appropriate to a degree when one considers its purpose and association. Landay Bros. occupy the entire five stories in this "Temple of Victrola Music," and the "home" idea is carried out on all of the floors.

On the fifth floor is a small recital hall, and in this room, Landay Bros. are planning to have the head of their educational department conduct Victrola recitals and assist public school teachers in selecting appropriate records for their pupils.

Every floor is furnished artistically, the main thought having been to provide an atmosphere or refinement in keeping with the musical standing of the Victrola. Each floor is complete in itself, the patrons being able to select their Victrolas and Victor records with maximum convenience and comfort.

It has been the ambition of Landay Bros. to establish a "Temple of Victrola Music" ever since they became distributors for the Victor Co. sixteen years ago, and they feel that they now have a home of music which well fulfills this ambition.

Landay Bros. now have four Victrola establishments in New York City, all of which are located in the best retail districts and are thoroughly commensurate with the worldwide fame of the Victor products. These stores are located at 23 West Forty-second street, 563 Fifth avenue, 427 Fifth avenue and 27 West Thirty-fourth street.

MANOPHONE MICHIGAN DISTRIBUTOR

Clough & Warren Co. Appointed by James Manoil Co.—James Manoil Makes Western Trip—Factory Rushed to Capacity

James Manoil president of the James Manoil Co., Newburgh, N. Y., recently made an extensive business trip through the West, where he visited many of the larger cities and found the popularity of the Manophone steadily increasing.

One of the most recent moves of the company has been the appointment of the Clough & Warren Co., of Adrian and Detroit, Mich., as sole distributors and selling agents of the Manophone for the State of Michigan.

Reports from the factory in Newburgh show that the national advertising campaign, now being carried on by the company is bringing forth such results that an increase in the facilities of the plant is contemplated in the near future.

IMPORTANCE OF SERVICE IN SELLING

Service to the Customer, Beyond Simply Taking His Money, One of the Fundamentals of Successful Salesmanship—Keeping Promises

The great majority of salesmen believe that service is one of the fundamentals of the profession. There are others, however, who believe by selling the customer something they are giving him all the service to which he is entitled. In other words, they don't appreciate the purchasing aspect of the word service, but divide the word into its component parts such as "serve," meaning to give something, and "ice," meaning the manner in which it is given.

Service is the backbone of every business and covers a good deal of ground. If you promise delivery of goods for 10 o'clock and don't get them there till 12 o'clock, that is not service. Yet how frequently it is the case that this takes place. Delivery should not be promised unless there is a fair certainty of the promise being kept, and if some circumstance arises to prevent it being kept, the customer should be notified. If this policy is not followed, one cannot hope to make permanent customers.

There are many little services, such as opening the door for a customer who is coming in or going out—giving them a chair while waiting—selling stamps willingly—and so on, that don't cost you a cent, but get you dollars.

Display is also a part of service. For instance, if a customer comes in for records, if that line is well displayed it helps her to do her purchasing. People come into the store with a definite purpose, and that is to buy goods. Make it easy and convenient for them to do so.

Answer the telephone quickly and efficiently. When the bell rings, bear in mind that there is a customer waiting at the other end, and answer as soon as possible. Don't waste time saying "Hello!" Give the name of the firm at once.

Talking Machine Dealers should write at once to their Congressmen urging strongly the passage of the Stephens-Ashurst Bill, H. R. 13,568, providing for maintenance of retail prices on trade-marked articles. There is no time to lose.

Small export orders are easy to secure; they come unsolicited. An ever increasing volume of foreign orders can only be had by a man who knows foreign trade conditions, banking, shipping, national customs, credits and how to sell and hold the business. He must be an expert talking machine man, who knows every part, can repair and teach the use and sale of his lines.

Ten years a manufacturers' export agent and five years in the laboratory, factory and sales end of the talking machine business. That is my experience and that is why I shall represent for export a limited number of non-competing manufacturers of machines, records, parts and accessories. If you are a manufacturer seeking export trade, write me for details. *Now* is the time to start and start right; opportunities abroad were never better.

REVISION OF EDISON TERRITORY

Changes Announced by Thomas A. Edison, Inc., Increase the Efficiency of the Service Rendered Dealers by Technical Men

A revision of the territory, to which the field supervisors and mechanical instructors of Thomas A. Edison, Inc., are assigned, has been announced at the offices of the company at Orange, N. J. The changes have been made in order to increase the efficiency of the large staff of sales and technical experts who are employed to assist Edison dealers in solving any merchandising or mechanical problems that may arise in their business. Every zone in the United States now is afforded the services of these thoroughly trained and highly competent experts, and the work has been extended into Canada by the appointment of both a supervisor and a mechanical instructor who will make a preliminary survey of this vast territory before the final appointment of additional men.

The supervisors are equipped with the best and latest Edison information along various lines. They are kept in close touch with the Edison laboratory and are aware of every development that may be interesting or valuable to Edison dealers. The mechanical instructors all are graduates of the special laboratory course in mechanics, and there is no problem relating to the mechanism of the New Edison that they are not capable of solving. The new territorial assignments of these field workers are as follows:

Supervisor, H. R. Skelton; mechanical instructor, E. Trautwein. Zones: Boston, New Haven, Albany, Syracuse.

Supervisor, C. S. Gardner; mechanical instructor, J. C. Knipper. Zones: New York, Pittsburgh, Williamsport, Philadelphia.

Supervisor, J. J. Callahan; mechanical instructor, J. Finlayson. Zones: Cleveland, Detroit, Chicago, Indianapolis.

Supervisor, L. A. Zollner; mechanical instructor, A. E. Schiller. Zones: Des Moines, Sioux City, Milwaukee, Minneapolis.

Supervisor, C. R. Lee; mechanical instructor, E. E. Bedford. Zones: Atlanta, Richmond, Cincinnati.

Supervisor, A. P. Burns; mechanical instructor, J. McCluskey. Zones: New Orleans, Dallas, El Paso.

Supervisor, C. W. Burgess; mechanical instructor, D. Lawson. Zones: St. Louis, Kansas City, Omaha, Denver, Ogden, Helena.

Supervisor, H. L. Marshall; mechanical instructor, G. A. Cummings. Zones: Los Angeles, San Francisco, Portland, Seattle, Spokane and the territory which the Kent Piano Co., Vancouver, B. C., is working.

Supervisor, Newman Johnston; mechanical instructor, J. B. D. Gambee. Mr. Johnston, recently appointed, is the first supervisor to go into Canada. His present territory is the entire Dominion outside of British Columbia (which Supervisor Marshall is handling), and it is his intention to apply himself at first at Eastern Canada, beginning with the Toronto jobbing point, and successively covering Montreal and St. Johns. After that he will take up Winnipeg and Calgary.

MISS VIVIAN DODIN ARRIVES

A. H. Dodin, Well Known Repair Man, Gets Fine Thanksgiving Present

Andrew H. Dodin, president of the Talking Machine Repair & Sales Co., got a brand new present on Thanksgiving Day despite the high price of turkey. The present was made by Mrs. Dodin in the form of a lusty little daughter. Her name is Vivian. As this is Mr. Dodin's first child he finds it difficult to keep the full allotment of buttons on his coat and vest owing to chest expansion.

Write to your Congressman at once strongly urging the passage of the Stephens-Ashurst Bill, H. R., 13,568.

SERVICE DEPARTMENT PLEASES

New Feature Inaugurated by Otto Heineman Phonograph Supply Co. Warmly Commended

ELYRIA, O., December 8.—The new service department recently inaugurated by the Otto Heineman Phonograph Supply Co., has already proven its practical value, and the company has received numerous letters from its patrons, warmly commending this move and stating that they will be glad to avail themselves of the services offered by this department when the occasion requires.

Paul Wood

Paul Wood, who is at the head of this special service department, is a man of wide experience in the phonograph field, having been master-mechanic at the Heineman factory for sometime past. He is thoroughly conversant with every phase of motor, tone arm and sound box manufacture, and is therefore in a position to render valuable co-operation to the phonograph manufacturers using the Heineman product. Mr. Wood will visit different sections of the country calling upon the manufacturers and assisting them in any possible way that will add to the efficiency of their manufacturing activities.

THE COLUMBIA LINE IN SYDNEY

"Paling's" to Handle This Line in Sydney—Very Prominent in the Music Trade Field

H. A. Parker & Co., of Sydney, Australia, distributor for the Columbia Graphophone Co., New York, closed an important deal recently, whereby the well-known music house of "Paling's," Sydney, will handle the complete Columbia line, and feature it extensively.

Paling's is recognized throughout the piano industry as the highest grade piano house in Australia, and their acknowledgment of the musical qualities, and sales possibilities of the Columbia line is a valuable tribute to these products. H. A. Parker & Co. states that the Columbia line is now represented throughout Australia and New Zealand in every high-grade piano house without exception.

Messrs. Parker & Hunt, comprising the heads of H. A. Parker & Co., are now in New York, conferring with the executive departments of the Columbia Co. anent the coming year's activities.

ENTERS EXPORT FIELD

I. L. Cochrane, well known in the talking machine trade, has entered the export business, and is planning to concentrate his activities on developing export trade for non-competing manufacturers of machines, motors, cabinets, accessories, etc.

Mr. Cochrane was for years a manufacturers' export agent prior to entering the talking machine business and he is therefore conversant with the possibilities of this field. He is planning to visit several of the South American countries in the near future, and his wide export acquaintanceship will doubtless enable him to establish valuable connections.

"Standard" Service Pays

Solophone

You Getting *Deliveries?*

OR ARE you getting promises? Or perhaps not even promises. The holiday season finds dealers everywhere unable to meet the demand for phonographs of the quality kind. Even promised deliveries are not made on time. And everywhere the merchant's business is hampered.

Realizing this situation fully, the Solophone Company has made full preparation to meet it. We are ready to ship Solophones in any number—at any time. We positively guarantee prompt shipments.

When you add this advantage to the many advantages which are built into the Solophone, do you not realize that the Solophone agency is something you have got to consider seriously if you want to be doing things in the phonograph game.

For the Solophone is not "just another phonograph."

You need to know all about the Solophone "Curtain Test" which places the Solophone in the highest class, and which sells the Solophone—without argument.

You need to know about our special co-operative dealers' advertising arrangements.

It is not too late by any means to speed up your holiday business now. Write or wire us today for full information about the Solophone.

CORLEY CO. HOLDS FORMAL OPENING

Vast Crowds Inspect Enlarged Quarters of That Company in Richmond—Elaborate Program of Entertainment Provided

RICHMOND, VA., December 4.—One of the most noteworthy and successful affairs in musical circles in this city was the formal opening November 25 of the recently enlarged quarters of the Corley Co., "The House That Made Richmond Musical." The quarters of the company on Broad street, between Second and Third, runs clear through to Race street, and the size of the premises indicates the success that has attended the company's efforts.

Elaborate preparations had been made for the opening, and they all worked out successfully. There were a great number of successful Victrola recitals each featuring a prominent artist and held in a separate sound-proof booth. The auditorium on the second floor was set aside for dancing, and concerts, featuring both vocal and instrumental music, were given on the main floor and in the basement. Victrolas provided music for the dancing, and the concerts were given by Kaufman's Orchestra and later by Kessnich's Orchestra.

The store was artistically decorated throughout with palms, chrysanthemums and American beauties. The floral dressing set off the whole interior scheme in a manner most pleasing to the eyes and the senses of the visitors, and many lingered feasting on the beauty of the scene.

The first public appearance of the woman's quartet, Richmond's newest musical organization, last night scored an immediate success. The quartet, composed of Mrs. Camelida Wilkes, Miss Lucy Gwathmey, Mrs. Hamilton Smith and Mrs. George W. Bethel, sang several popular numbers.

Over all presided John G. Corley, the man who built the first music house on Broad street, in 1888, and who little more than a quarter of a century later was the first man to extend his place of business through the block, giving a Grace street entrance.

As Mr. Corley then foresaw Broad street as Richmond's greatest shopping avenue, he now sees in Grace street the future "Fifth avenue" shopping district of Richmond. Mr. Corley was assisted by his large staff of sales people.

Among men prominent in the piano trade here from a distance to attend were George J. Dowling, of Chicago, president of the Cable Company, and A. M. Wright, of Boston, vice-president of the Mason & Hamlin Co. Both congratulated Mr. Corley on the splendid success he has achieved and on the handsomely appointed house he now possesses.

In addition to handling the Mason & Hamlin and Cable Company's lines of pianos and players the Corley Co. also stands as one of the leading distributors of Victor talking machines and records having under the direction of Frank Corley built up a tremendous business.

CONCERTS HELP PATHE SALES

W. A. McNaughton Co. Using That Form of Publicity Very Effectively in Muncie, Ind.

MUNCIE, IND., December 9.—The value of a concert hall to stimulate the sale of phonographs and records has long been recognized by successful phonograph dealers, and there is no doubt but that many phonograph merchants owe their success to the publicity secured by that means.

Stage of W. A. McNaughton Co.'s Recital Hall

The W. A. McNaughton Co., of this city, and one of the best-known retail establishments in this section of the State, has been utilizing their concert hall to excellent advantage in behalf of its Pathé department. Recitals are given at frequent intervals in their auditorium, and ofttimes concerts are given under the auspices of local societies. Harry E. Paris, manager of the Pathè department, is a talented musician, and his knowledge and experience has been an invaluable factor in the success of the different Pathephone concerts.

The W. A. McNaughton Co. has been using extensive advertising in the local newspapers to feature the Pathé line, and this publicity has been prepared along definite lines, whereby the musical qualities of the Pathephone and Pathé disc are presented effectively and consistently. This advertising campaign coupled with the activities in its concert hall has enabled the McNaughton Co. to build up splendid Pathé business, which is steadily increasing.

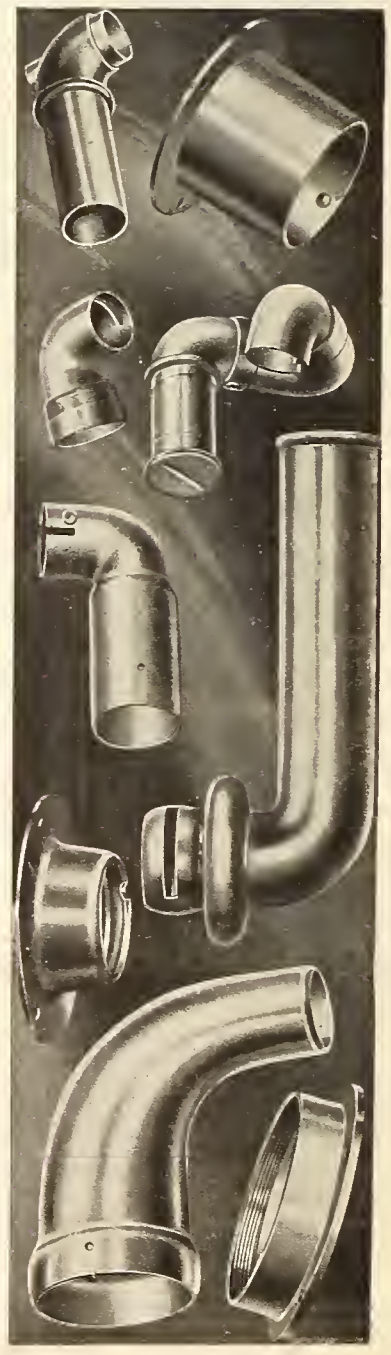
TRADE MARK



A PARTICULARLY EFFECTIVE CHRISTMAS WINDOW DISPLAY USED BY VICTOR DEALERS

A large part of the interest that has been aroused in the products of the Victor Talking Machine Co., has been due in no small measure to the effectiveness of the special window displays, prepared by the advertising department of that company for the use of its dealers. The displays for the most part have been of the sort that could be arranged with a minimum of expense and a maximum of effectiveness. By receiving suggestions and a layout from the factory, the dealer has been able not only to save time and thought necessary to arrange his own displays, but has had at his command the work of experts in that line.

A particularly effective display that is at present seen in the show windows of Victor dealers throughout the country is that illustrated herewith, and designed for the present Christmas time. The display not only emphasizes the spirit of Christmas, with evergreen and holly in profusion, but also presents the featuring of various popular models of Victrolas, so that the display and its object are linked closely together.

The Victor Christmas Display in Position

The letters "Merry Christmas" at the top are of Japanese frieze fastened to Victor records with ropes also of Japanese frieze leading from each letter, into the sound chamber of the Victrola XVI. The arch made of holly and evergreen lends the finishing seasonable touch.

The most interesting feature of the display is the ease with which it was assembled, according to a diagram furnished by the company. The frame work for the arch, and to hold the two rows of letters at the top, was of light batten firmly braced at the bottom, and which could be built up very easily by anyone capable of handling a hammer and nails.

COLUMBIA MANAGERS CONFER

Met Last Week at Headquarters and Later Visit Company's Factories at Bridgeport

All of the district managers of the Columbia Graphophone Co., assembled last week at the company's executive offices in the Woolworth Building, New York, for one of their regular conferences with the officers and manufacturing heads. A number of the store managers were also on hand, including R. J. Whelan, Cincinnati; Ben L. Brown, Louisville; Irby W. Reid, St. Louis, and others.

After spending some time at the executive offices, the district managers and the department heads visited the company's factories at Bridgeport, Conn., where discussions were held and plans outlined for 1917. The officers of the company, department heads, visiting managers and factory heads gathered for an informal dinner at which a number of impromptu though timely addresses added to the zest of the occasion.

ANNOUNCE NEW DIAPHRAGM

A new diaphragm, named the Paddack diaphragm, has just been placed on the market by Paddack Diaphragm, Inc., New York. This diaphragm, which is the invention of S. D. Paddack, is made of a special patented composition that was subject to severe tests before being offered to the trade. Quite a number of manufacturers have been using this diaphragm the past six months and are well pleased with the results they have secured. The company has made arrangements whereby it can manufacture the Paddack diaphragm in large quantities, and attractive literature has been prepared featuring the diaphragm's distinctive features.

A permit has been granted for the erection of a new steel frame, testing booth building as an addition to the plant of the American Graphophone Co.

Write to your Congressman at once strongly urging the passage of the Stephens-Ashurst Bill, H. R., 13,568.

NEW FACTORY APPOINTMENTS

H. A. Budlong and R. R. Mead Both Promoted at American Graphophone Co. Plant

BRIDGEPORT, CONN., December 8.—C. A. Hanson, general manager of the American Graphophone Co.'s plant, made this week two important appointments. Herbert A. Budlong, who has been assistant general factory manager for sometime past, has been promoted to the post of manager of cabinet manufacture.

R. R. Mead, who has been general superintendent at the factory, has been appointed assistant general factory manager, succeeding Mr. Budlong. Mr. Mead has been in line for promotion, and is one of the most popular members of the factory force.

R. F. Crudginton has been appointed general superintendent of machine manufacture at the American Graphophone Co.'s factory. Mr. Crudgington is well qualified for his new position, having held similar important positions in other large factories.

"PROFESSIONAL" PATHEPHONE

Retailing at $125, Announced by Pathé Frères Co. in Newspapers This Week—Advertising Lists Pathé Dealers

The Pathé Frères Phonograph Co., New York, carried in the newspapers this week an attractive full page advertisement that announced the new "Professional" model Pathephone, retailing at $125. This advertisement also presented the photographs of Lucien Muratore, the world famous tenor and Jacques Thibaud, the eminent violinist, who are both under exclusive contract with the Pathé Frères Co.

The text of the advertisement called attention to some of the Pathé records made by these famous Pathé artists, and also briefly described some of the exclusive features of the Pathéphone which have been such important factors in the splendid success of this line.

Another section of the advertisement called attention to a few other great Pathé artists, including Anna Fitziu, Didur, Ober, Cavalieri, Giorgini, de Cisneros, Urlus, Slezak and Thomas Egan.

At the bottom of this advertisement were listed the names of Pathé dealers in local territories, and this list furnished conclusive evidence of the wonderful progress which the Pathé line has made the past year. In every section of the city there are now located dealers who are carrying a complete line of Pathéphones and a representative library of Pathé records.

A NEW OPENING FOR THE DEALER

Language Phone Method of Teaching Languages Through the Medium of the Talking Machine Presents Opportunity to the Dealer

The Language Phone Method, specializing in language courses through the medium of the talking machine, reports that there is a growing interest on the part of retailers in the opportunities for additional profits offered by these courses, and especially the stimulated demand for instruction in languages used in South American countries, particularly Spanish.

The Language Phone Method utilizes Dr. Richard Rosenthal's Practical Linguistry for its courses, this method having proven most satisfactory in actual practice. The dealer soon finds that the language students are quick to appreciate the desirability of studying by means of the talking machine, inasmuch as doubtful words and phrases may be repeated as frequently as desired without trying the patience of the instructor. The course includes eighteen double page records, or 36 lessons, a set of 10 text books, a conversational speaking and pronouncing manual and other helps.

The Language Phone Method assists the dealer in the selling end by advertising his language courses in the various magazines of national circulation and also provides him with suitable advertising matter for his store, thereby linking up his business with the national campaign.

DEATH OF EUGENE WIDMANN

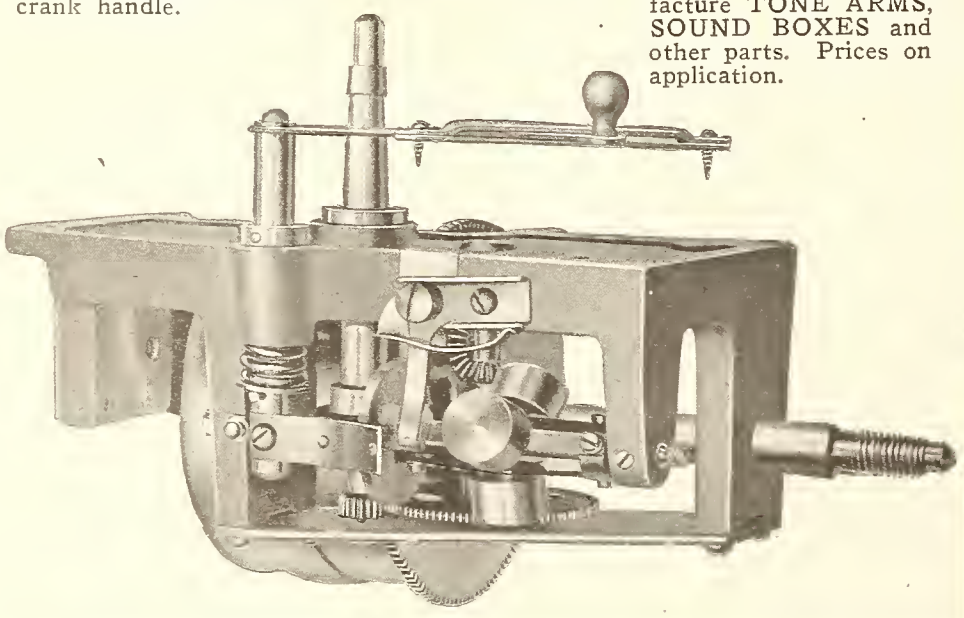
E. A. Widmann, president of the Pathé Frères Phonograph Co., New York, is receiving the sympathy of his friends upon the death of his father, Eugene Widmann, which occurred recently. Mr. Widmann was seventy-four years of age at the time of his death, and had retired from business a number of years ago. The funeral services were held from his late home, 866 Park place, Brooklyn, N. Y.

Write to your Congressman at once strongly urging the passage of the Stephens-Ashurst Bill, H. R., 13,568.

This is our No. 16 Motor, which will play five 10-inch or three 12-inch lateral cut records with one winding. Double springs, made from the highest quality material. Worm driven governor. Cast Iron frame. One-piece forged crank handle.

The lever shown on top of motor is the underneath turntable governor brake stop. A Speed Indicator and Dial is furnished with this motor. Exceptionally silent winding mechanism and silent running.

By the turning of one screw, the spring cup can be removed.
When you see this motor, it represents the highest quality, for it has been made by a concern that has thirty years' experience in this line. We also manufacture TONE ARMS, SOUND BOXES and other parts. Prices on application.



Meisselbach Motor Construction

Originality of design is a paramount feature of Meisselbach Motors. There has been no copying from others. There has been no lowering of quality standards.

To know about the Meisselbach gives you a new idea of motor construction; of noiselessness; of smoothness in operation, and of absolute tempo maintenance.

If your motor bears the name "Meisselbach" your motor troubles are over. Your dealers will be delighted.

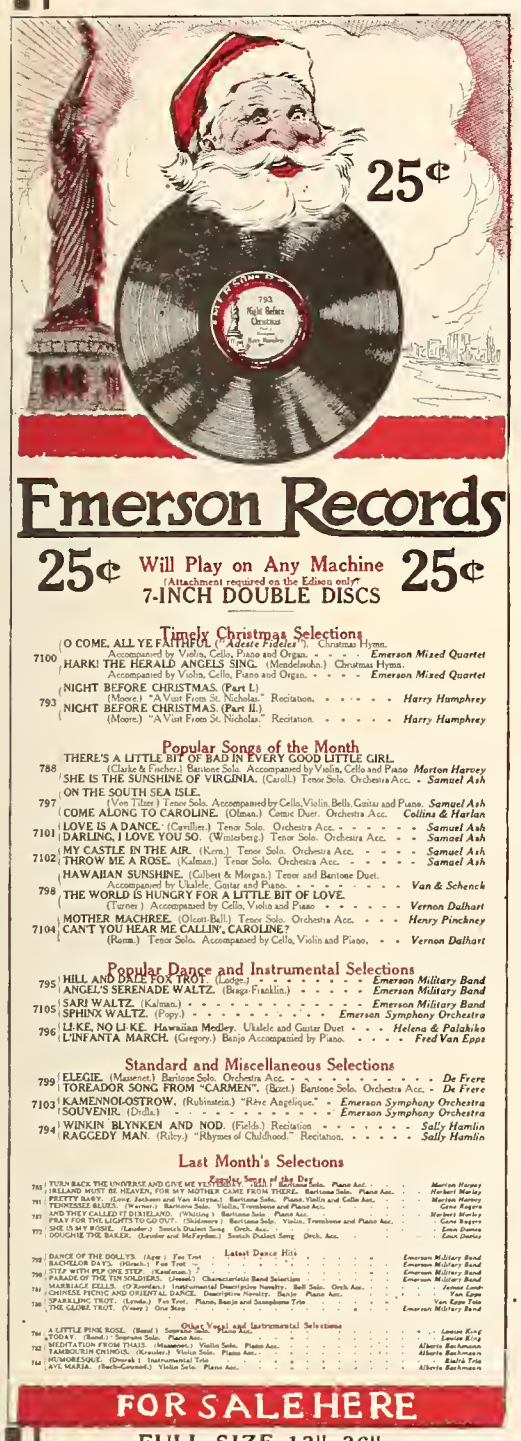
Mighty Good Store Advertising For Emerson Dealers



FOR SALE HERE

FULL SIZE 13"x36"

Movie Clock Slide

Here is an excellent device for advertising your Emerson Records and your store through the medium of your movie theatres. Your exhibitors will be delighted to use this slide, because flashed on a screen at any moment, it gives the time and advertises your goods.

When you realize how anxious the exhibitors are to empty their theatres as often as possible, you will appreciate the reasons for the popularity of this slide among dealers and exhibitors. The slide is sent to all exhibitors at cost to us—50c. postpaid.

It is one thing to make products so completely good that manufacturer, dealer and ultimate consumer are perfectly satisfied.

But modern merchandising calls for a more intimate linking of those factors that go into the selling of goods. The Emerson Phonograph Company makes the records and you sell them, Mr. Dealer. The Emerson Phonograph Company is anxious to do everything which will make it easier for you to sell Emerson Records when they are in your store.

You will find, therefore, a steadily increasing and ever more appealing kind of literature offered for your use in reaching your public on

Emerson Records

25c 7-inch Double Discs 25c

The Emerson Publicity Department is composed of men trained, first of all, in selling musical products and secondly in working with retail stores of all sizes and descriptions, in every part of the country. This Emerson Publicity Department we want you to call on. Not only do we want you to take the Bulletins, Hangers and other publicity material which we give you, but when you strike a proposition where you feel expert advice would be useful, write to us and we shall be mighty glad to co-operate with you. For instance, if some local event is about to take place, an event which you would like to tie up to your store in some way, send us the details and we will give you a series of individual suggestions made just to fit your own case. This is but another form of Emerson Service which is making the handling of Emerson Records so much more delightful and profitable.

Emerson Double Disc Records play three-fourths the time of a standard 10-inch record. They can be played on all but one positive feed machine, without extra attachments.

RECORD ARTISTS IN VAUDEVILLE

Burr, Campbell, Collins, Harlan, Murray and Others Well-Known to Talking Machine Owners to Make Stage Tour—Should Have Good Results in Increasing Record Sales

An interesting announcement is made that a number of prominent artists who have been engaged in the making of talking machine records for the leading companies, have arranged to make a tour in vaudeville under the direction of Ira Hards.

The featured artist will be Harry McLaskey, known to talking machine owners as Henry Burr. Others who will tour are: Albert Campbell, Arthur Collins, Byron G. Harlan, Billy Murray, John H. Meyers, Vess L. Ossman (banjoist), and Theodore Morse (pianist).

For the making of records the above work singly and also, with The Victor Talking Machine Co., in the following combinations: Meyer, Burr and Campbell as the Sterling Trio and Meyer, Collins, Burr and Campbell as the Peerless Quartet. A well-known monologist will also be included in the program. The character of the act has not yet been decided upon.

Judging from the demand for records that follows the appearance of the famous opera stars in various sections of the country, the tour of these makers of the more popular records should prove of particular interest to talking machine dealers, and they should take full advantage of the opportunity to make advertising capital out of the appearance of the record makers in their respective cities.

SUCCESSFUL YEAR FOR COLUMBIA CO., NORFOLK, VA.

NORFOLK, VA., October 4.—The Columbia Co., Inc., 311 Granby street, this city, local representative for the Columbia Grafonolas and records, recently celebrated the first anniversary of the establishment of its business.

Where the Columbia Co., Inc., Holds Forth in Norfolk, Va.

The officers of the Columbia Co., T. J. Carey and D. W. Causey, took over the business a year ago, when it was anything but promising, but the injection of new ideas and plenty of energy had the effect of turning the tide. The company carries a large stock of machines and records in addition to building up a large general trade and has installed Grafonolas in a number of schools in this vicinity. The company also handles a line of sheet music. The occasion of the company's anniversary was marked by laudatory articles in the local newspapers.

"DIAMOND POINTS" ONE YEAR OLD

House Organ Issued by Thos. A. Edison, Inc., in Interests of New Edison Diamond Disc Phonographs and Re-Creations a Big Success

"Diamond Points," the house organ issued by Thos. A. Edison, Inc., in the interest of new Edison dealers, which made its first appearance last December, has now rounded out a most successful first year with the November issue that shows real progress. Much of the success of the little magazine has been due to the fact that dealers were quick to realize that it wasn't only interesting and entertaining, but that it was a valuable adjunct to the sales promotion work of the Edison organization. "Diamond Points" also played a most important part in spreading the propaganda of the Edison Re-creation of music, and the now famous tone test, in connection with the new Edison.

It has consistently emphasized to the dealers the advantage of keeping before the public the fact that the new Edison actually recreates music, and has kept the dealers in close touch with the latest merchandising principles originated in connection with the new Edison line.

One of the features of "Diamond Points" and its special appeal is the section devoted each month to the Edison artists, and in which is found an abundance of information regarding the artists and their work, which serves to aid the dealer materially in talking intelligently about the Edison Re-creations.

To Edward C. Boykin, who has been the editor of "Diamond Points" since its inception, is due much of the credit for the success of the periodical.

FACTORY STAFF CELEBRATES

Otto Heineman Phonograph Supply Co., Recognize by Banquet Big Shipment of Motors

ELYRIA, O., December 4.—To properly celebrate its record-breaking day, November 9, when 3,429 motors were shipped from the Heineman factory, the members of the factory staff of the Otto Heineman Phonograph Supply Co. gathered for an informal banquet last week at the Hotel Andwur.

Otto Heineman Phonograph Supply Co. Factory Staff Celebrate

Among those present at the dinner were all the factory executives, department heads and foremen, every one of whom had been an individual factor in the remarkable shipping total which was achieved on November 9. Good-fellowship and good-cheer were the predominating notes at this banquet, and judging from the enthusiastic addresses of the factory heads, 3,429 will not remain as the record figure for any material length of time.

There is a spirit of co-operation at the Heineman factory, which has contributed in an important measure to the success of the company, and the amazing totals of the monthly outputs. Every member of the Heineman manufacturing staff take a keen interest in the company's activities, and under the able guidance of W. C. Strong, one of the foremost factory heads in the industry, the Heineman factory has progressed with astonishing rapidity the past six months.

SHIPMENTS WANTED IN BALTIMORE

Talking Machine Dealers in That City Look to the Factories With Longing Eyes as Christmas Approaches—The Record Situation

BALTIMORE, MD., December 5.—As the last month of the year 1916 opens for business, the talking machine dealers and distributors are in anything but a pleasant frame of mind due to the fear that they will not be able to get machines to supply the demands of their customers. Unless the manufacturers ship in large consignments of machines after the tenth of the month some of the distributors will surely suffer a loss. Records have come in large shipments and this is what has helped to prevent many of the firms from falling behind in their sales. Large quantities of newspaper advertising have been done by all of the companies and by individual firms throughout the city. The ads have been attractive and business done has proven there is still a big opportunity in this ever widening field.

Cohen & Hughes are now in position, according to Howard Weber, in charge of their office department, to improve shipments over their past for in their new building they have increased facilities for handling the record business especially. Shipments of machines have come to the firm almost daily, but they are not sufficient to take care of the business. Mr. Weber will shortly make a trip through various parts of Pennsylvania and hopes to be able to pacify some of his customers. Frank Lawrence, assistant manager, returned from New York after making a study of the record system at the Victor plants and general offices. The firm will be handling records and machine distributing in their new building within a few days.

W. C. Roberts, manager of E. F. Droop & Sons Co., Victor distributors, is not at all pleased with the situation in which his firm finds itself at this time. He says that they have not been able to get machines and that his firm will be out of pocket thousands of dollars as a result. The record situation Mr. Roberts said is much better now than it was at this same time last year.

A. J. Heath, manager of the Columbia Graphophone Co., said the business done during the past month is beyond description. "There appears to be no stopping to business," said Mr. Heath, "we have a force at work day and night looking after shipments and they don't appear able to catch up. Business in Washington is fine and continues to show satisfactory improvements. The Lazaro records are having a big run and conditions generally could not be much better."

P. W. Peck is sending in some fine orders from his territory in the South. W. L. Eckardt, district manager, called at local headquarters during the week. Fred Dennison, Pacific coast manager, and formerly in charge here, spent several days in Baltimore during the week visiting old friends.

The National Piano Co., Pathé distributors, is doing a big business but Jesse Rosenstein says that he is unable to get enough machines by a big margin. The lower-priced machines, he says, are impossible to get.

H. R. Eisenbrandt Sons, Inc., Victor distributors, are having a heavy demand for machines and the house is fairly well supplied.

NEW CABINET PLANT FOR EDISON

Thos. A. Edison, Inc., Secure Control of Wisconsin Seating Co., New London, Wis., and Will Increase Output of Cabinets

NEW LONDON, WIS., December 4.—The ownership and control of the Wisconsin Seating Co., this city, has been taken over by Thos. A. Edison, Inc., arrangements to that end having been made by Chas. Edison of this city recently.

Following the fire at the Edison plant in December, 1914, which destroyed the cabinet plants it was found necessary for the company to have their cabinets manufactured by outside concerns, among these being the Wisconsin Seating Co., which is particularly located and equipped for the manufacture of cabinets. In view of this fact, arrangements were completed whereby the Edison interests take over the local plant on January 1, 1917.

This change in ownership will not result in any change of the factory personnel of the New London plant, and the present organization will devote its energies to the manufacture of an increasing output in order to supply more and more phonograph cabinets to the Edison Co. The new company will in all probability be known as the Wisconsin Cabinet & Panel Co., and among its officers will be included: Thomas A. Edison, president; his son, Chas. Edison, chairman of the board of directors; Frank L. Zaug, vice-president and general manager, and Stephen B. Mambert, vice-president and financial executive.

The increase in output referred to above will result in increasing the present force of 350 to the extent of 100 employes during the next two months. In this connection it is quite probable that instead of shipping the phonograph cabinets of certain types from New London to Orange for the installation of phonograph mechanisms, that it will be found advisable to ship the mechanisms from Orange to New London, for assembling here. If this plan is put into effect, it will mean still further increase in the force over and above the foregoing estimate.

TO DETERMINE TURNTABLE SPEED

Phantom-Meter Designed to Determine Exactly by Scientific Means When Machines Are Operating at Proper Speeds for Reproduction

One of the essentials of perfect talking machine reproduction is that the records be played at correct speed, not necessarily correct speed as indicated by the regulating dial, which is sometimes inaccurate, but the correct speed ascertained by some definite system.

An interesting device for enabling anyone who uses electric light in their homes to determine exactly just when a Victrola or Edison phonograph is running at the proper speed, has been placed on the market by the Phantom-Meter Co., Needham, Mass. The device consists of discs three and one-half inches in diameter, with two rows of spokes near the outer edge. The disc is placed over the turntable spindle, and on top of the record, under the electric lamp, preferably a Mazda, supplied with alternating current of sixty cycles. The speed of the machine is altered until one of the spoke designs appears to be a continuous shadow-like line. When the outer circle assumes its appearance, it indicates that the turntable is running at seventy-eight revolutions a minute.

When the inner circle appears to be a continuous shadow line, the turntable is running at a speed of eighty revolutions a minute. The device is based upon interesting scientific principles.

"AMERICAN-COLUMBIA TONE ARM"

Title of New Publication Containing News of All Departments of American Graphophone Co. and Columbia Graphophone Co.

BRIDGEPORT, CONN., December 8.—The first issue of the American-Columbia Tone-Arm, the new organ of the factory, and all departments of the company, is now making its appearance. The first issue will be dated January and will be in booklet form. A greeting announcement as follows will occupy a conspicuous place on an opening page: "Greeting: The Tone-Arm—Literally a bit of drawn brass which conveys harmony, without which a Grafonola would be but a mute article of furniture; a disc record on an exaggerated suspender button. In this little magazine, its literary namesake, this hyphenated American-Columbia organ, the object will be to raise the quality, strengthen the tone, and reach out to every branch of the service, a helpful hand in an endeavor to establish a tie which will aid in binding all departments of the business into a consistent harmonious progressive whole."

The employes are awaiting expectantly the distribution of the magazine, and it is believed that the undertaking will be a success. It is expected that this magazine will keep the employes in touch with each other, and aid otherwise in stimulating interest among the workers whether at the Bridgeport producing plant, at the executive offices in New York, or at the various agencies scattered through the country as well as in Europe.

NEW DEPARTMENT IN FITCHBURG

A talking machine department has been installed in the Iver-Johnson Sporting Goods Store at Main and Putnam streets, Fitchburg, Mass., where a complete line of Edison Diamond Disc phonographs and records will be carried, under the supervision of Manager I. C. Farwell.

ANNOUNCE GOLD PLATED DIAPHRAGM

A. F. Meisselbach & Bro. to Include New Diaphragm in the Majority of Their Reproducers in the Future—Virtues Claimed for it—Heavy Demand for Motors During Year

A. F. Meisselbach & Bro., Newark, N. J., well-known manufacturers of motors, tone arms and sound boxes will shortly announce a new gold plated mica diaphragm which will probably be used in their sound boxes, where ordered in the near future. Meisselbach & Bro., although having built up a most satisfactory reputation for their product are constantly looking for new ideas which will tend towards improvement, and the gold plated diaphragm is the latest of these. It is declared to have a surprisingly pleasing effect on the quality of the reproduction.

Meisselbach & Bro. had an exceptional year in their motor department, and during the past few months have been hard pushed to supply the heavy demand in time for manufacturers to use the motors in machines designed for holiday trade. Numerous orders have been of necessity held over to next year for filling, and in view of this fact 1917 business will start off with a rush.

The company attributes the success of their motor to its simplicity, the leading feature being the fact that repairs may be made by loosening one screw take out the old spring box and insert a new one without disturbing any part of the mechanism. Another feature is that the turntable spring does not touch metal, but is provided with a felt collar or bushing saturated with lubricant thereby preventing friction.

PHONOGRAPHS, INC., IN ATLANTA

Handsome New Quarters for Edison Phonographs Located in Southern City

ATLANTA, GA., December 5.—A permanent home for the New Edison phonograph in this city has been provided by the establishment of The Phonographs, Inc., in a handsome two-story building at 182 Peachtree street. The new store has been handsomely decorated and furnished and conveniently arranged for the purpose of handling the phonograph business. One of the features is the large recital hall, where concerts will be given twice a week. W. L. F. Rosenblatt is president of The Phonographs, Inc., O. Simmons is vice-president, and C. Boggs, treasurer.

SUIT OVER FIRE INSURANCE

Gately-Haire Co. Wins in Lower Court, and Case Is Now Before Appellate Division

The Appellate Division, Third Department, is expected to hand down a decision shortly in the suit brought by the Gately-Haire Co., Victor distributors of Albany, New York, against the Niagara & Pennsylvania State Fire Insurance Co. The lower court decided in favor of the Gately-Haire Co.

A fire in an adjacent building last January spread to the store of the Gately-Haire Co., and caused considerable damage. Insurance companies refused to pay, contending that the policies had been cancelled, but the Gately-Haire Co. maintained that as they had not surrendered their policies, they were still to be considered in force.

NEW VICTROLA XVII.

Just Introduced to the Trade, Is an Instrument of Exceptional Attractiveness

The Victor Talking Machine Co. this week sent out illustrations and descriptions of their new Victrola XVII, a very limited quantity of which will be shipped from the factory before Christmas. This instrument sells in mahogany or oak at $250 and American walnut at $300. These styles with electric motor cost $50 more.

In this connection Louis F. Geissler, general manager of the company, says: "It was not our intention to announce this new type until we had accumulated sufficient stock to make substantial shipments to all distributors, but in face of the immense demand and consequent shortage, particularly of the Victrola XVI, we feel that this beautiful instrument with its graceful lines will be welcomed by our distributors and dealers and quickly sent out as fast as they are shown to the public."

The new Victrola XVII has swell front and sides, and is 46¾ inches high, 22½ inches wide and 24½ inches deep. It contains sixteen Victor record albums for 160 records; has twelve-inch gold plated turntable, gold plated exhibition sound-box, Victor tapering tone arm and tapering "goose neck," sound-box tube, automatic brake, speed regulator and automatic indicator, nickel-plated extra heavy quadruple spring, spiral drive motor, which can be wound while playing.

RECORDS LANGUAGE OF MONKEYS

Prof. R. L. Garner Uses Talking Machine in Prosecution of His Work

In a speech made before the Rotary Club of New York last week, Prof. R. L. Garner announced that he had classified the language of the monkeys in seven groups of sound as against 120 groups of human speech, and spoke at length regarding his invention in obtaining talking machine records of the monkey language. Mr. Garner will shortly go to West Africa on an expedition for the Smithsonian Institute, and will use the talking machine extensively in his work.

The Artophone Record Co. will incorporate under the laws of Delaware with a capital stock of $500,000 to manufacture talking machines and all other sound producing instruments. The incorporators are Herbert E. Latter, Norman P. Coffin and Clement M. Egner.

FACTORY SITE IN NEW YORK

GREAT EDUCATIONAL FACTOR

Is the "Cortinaphone"—Installed in Prominent Universities and Schools—Mandel Bros. Good Work—Dealers Interested

Mandel Bros., who operate one of the leading department stores of Chicago, are conducting successfully a school of languages aided by the "Cortinaphone." This is but another important link in the chain of dealers throughout the land that have appreciated the opportunities offered by carrying the "Cortinaphone."

Ralph Bradbury, of the Cortina Academy of Languages, 12 East Forty-sixth street, has recently returned from an extensive trip through the Eastern States, where besides calling on the dealers in the territory covered, a number of educational demonstrations were made in high schools and other institutions of learning. The "Cortinaphone" is now installed in Brown University, Hartford Theological Seminary and adopted by the committee of education in the city of Boston for use in the public schools throughout that city. In Providence fifty school teachers are using the "Cortinaphone" to study the language spoken in the homes of their foreign pupils. The educational advantages of the "Cortinaphone" are being appreciated more and more. The advantages of hearing the studied language spoken with the proper emphasis and inflections needs only a demonstration to convince.

The list of "Cortinaphone" dealers now numbers 200, distributed throughout the entire country from ocean to ocean, and from the Great Lakes to the Gulf.

Write to your Congressman at once strongly urging the passage of the Stephens-Ashurst Bill, H. R., 13,568. Now is the time to get busy on this subject.

Columbia Records TRADE MARK Note the Notes

SUPPLY OF DOMESTIC ROTTEN STONE

O'Brien Trading Co. Appointed Selling Agents of the Penn-Keystone Co., Manufacturers of Rotten Stone, Who Are Working Large Deposit in Pennsylvania—Used for Records

The Keystone Minerals Co., 35 East Twenty-first street, are appointed the selling agents for the Penn-Keystone Co., manufacturers of high-grade rotten stone.

Up to the present year the manufacturers of records have been dependent upon imported rotten stone at high prices. Since January 1 of this year the Penn-Keystone Co. have been working a deposit in Lyoming County, Pa. This deposit, G. M. O'Brien, sales manager of the Keystone Minerals Co., stated, was the only deposit worked in the United States. Since the start the product has been adopted by some of the leading record manufacturers. Rotten stone is also used in the manufacture of hard rubber goods, and in the polishing of woods used in talking machine cabinets and pianos.

An espeeially fine grade is manufactured for the making of phonograph records. This grade is ground very fine, and runs what is technieally known as 200 mesh. It is very soft and smooth, and must be floated on the air twice before it is finally placed on the market.

The Penn-Keystone Co. have found it necessary to double the capacity of their plant within the year, and they are now installing machinery that when eompleted will double the present capacity.

Manufacturers are saved the trouble of excessive delivery delays for this domestic concern is able to deliver quantities at very short notice. The price of the domestic rotten stone is now far below the price of the imported stone.

CAROLA CO. BRINGS LAW SUIT

CLEVELAND, O., December 9.—The Carola Co., talking machine makers, have brought suit against the Van Dorn Iron Works Co., for $67,750 in Common Pleas court here. It is alleged that the defendant failed to provide 10,000 metal cabinets as per contract. The petition requests $30,000 for lost profits and the balance for advertising and other expenses. To complicate the matter, H. A. Rock, vice-president of the Van Dorn Co., has stated that his company was on the point of suing the Carola concern for not providing parts also as per contracts.

MANY ORDERS FOR NEW SPRING

Trade Mueh Interested in New Triple Spring Marketed by Leonard Markels

"The orders we have already received for our new No. M-4 triple spring motor have been far ahead of expectations," said Leonard Markels, 165 William street, New York, motor tone arm and sound box manufacturer, whose recent announcement of a new triple spring motor attracted the attention of the trade. We have closed orders for our new motor with some of the leading manufactures in the country, and at the present time negotiations are pending for unusually large contracts. In fact, we are suggesting to our patrons that they place their orders for 1917 well in advance of their actual requirements, so that they will not be disappointed in the receipt of their shipments.

"When the idea for our triple spring motor was first conceived I spent many hours in my experimental laboratory working out every possible detail which could add to the efficiency of this motor, and taking into consideration every possible contingency that might arise when it was in use. I feel certain, therefore, that our M-4 motor can be offered by the manufacturers to their dealers with full assurance that it will give perfect satisfaction under all conditions.

"One of the problems that we solved was the production of a three-spring motor which could be used with the same borings as those made for our No. M-2 double spring motor. This was finally accomplished, and our triple spring motor occupies no more room in length and width than the No. 2 motor, the only difference being the depth.

"Many of the manufacturers have told us that the use of the No. M-4 motor in their machines furnishes their dealers with a valuable selling argument, as a machine that plays four twelve-inch or ten-inch records meets with a ready sale. I expect to soon receive my patents covering the distinctive points of my No. M-4 motor, and I also have a number of other new features in process of completion which will greatly interest the members of the talking machine industry."

BECOMES AEOLIAN-VOCALION AGENT

The Heraco Exchange, West Hoboken, N. J., announced in the newspapers this week that it had been appointed representative for the Aeolian-Vocalion in North Hudson County. The company is using large size space to make this announcement, and is planning an energetic campaign in behalf of this line.

A Merry Christmas

and a

Happy New Year

We esteem it a privilege to wish every member of the Victor trade a full measure of happiness and prosperity in 1917.

Every member of the G. T. Williams Co. organization is prepared to offer practical assistance to Victor dealers in making the next twelve months their banner year.

Let us show you what our service means.

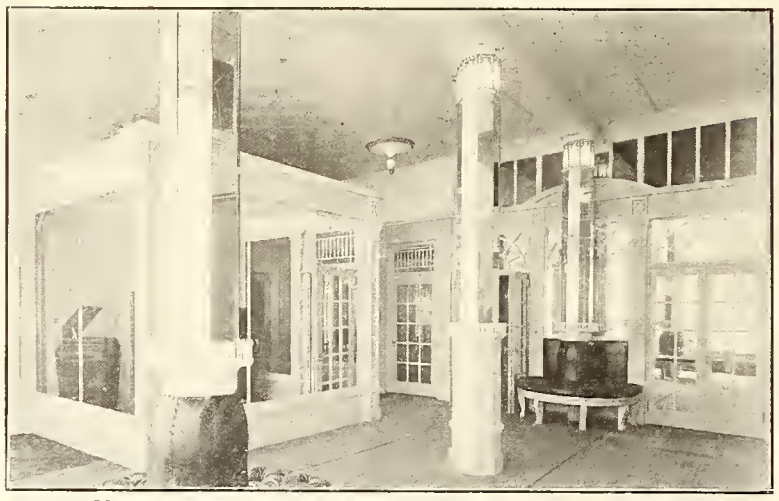
PUBLISHER ADVERTISES RECORDS

Leo Feist, Inc., in National Advertising Calls Attention to the Fact That the Featured Numbers May Be Obtained Both on Talking Machine Records and Music Rolls

Advertising the other fellow's product is not a general practice, but Leo Feist, Inc., prominent music publisher, has marked a new departure in this connection by announcing in a new campaign of advertising in national magazines, that the five song hits of as many successful musical comedies may be obtained on talking machine records or player-piano music rolls, if the reader secures his music by those means. The featuring of the songs on rolls and records is worth considering, because it not only gives the average music store proprietor three opportunities for profiting by the advertising, but in aiding in the sale of records and rolls, it aids the popularity of the song, for the more often a song is heard the more likely it is to be purchased.

Van Veen Booths Satisfied SONORA



Van Veen Booths in New Sonora Warerooms, 279 Broadway, New York

We Know They Will Satisfy You

Van Veen Bed-Set Sectional Booths can be erected as easily as a hed (no skilled lahor required). Booths shipped on short notice *anywhere*. Room sizes any multiple of 3 feet. DOUBLE MANUFACTURING FACILITIES

Delpheon Co. Prepares to Take Prompt Care of Growing Demands of Dealers

BAY CITY, MICH., December 8.—"We are now making plans to double our manufacturing facilities in order to take care of our dealers," said R. W. Gresser, sales manager of the Delpheon Co. "We are not trying to take everything by storm, but are going about building up our business in a conservative way, making sure of every step we take. We feel that this is the best way, as we are able to fill all orders promptly, and give our dealers the right kind of service. We think that we are building on the right kind of a foundation—are building soundly for the benefit of our dealers as well as ourselves.

"The features that we have in our machines are making the 'Delpheon' very popular, and the holiday season is causing a big demand. Our record filing system, tone control, automatic stop, universal tone arm and balanced cover support are all proving excellent talking points. We are now working out a cabinet that will retail at $75, and which will make our line pretty near complete, when it is considered that we make each model in mahogany, walnut, fumed and golden oak."

INCORPORATED

The Humantone Talking Machine Co., Brooklyn, N. Y., has been incorporated with capital stock of $10,000, for the purpose of manufacturing and dealing in talking machines, phonographs, furniture novelties, etc. The incorporators are: I. Well, L. M. Joseph and J. Levinson.

The Bates Piano Co., Worcester, Mass., has taken the agency for the Starr phonograph in that city, and is carrying on a live advertising campaign.

FEATURING BARRIENTOS RECORDS

The advertising department of the Columbia Graphophone Co,. New York, has just prepared an extensive campaign in behalf of the new Columbia records made by Marie Barrientos, the celebrated coloratura soprano, which promises to be one of the most interesting and far-reaching publicity campaigns which has ever been instituted for an individual artist. Practically every phase of advertising will be given attention in the Barrientos publicity, with the one idea of stimulating the sale of the Barrientos records throughout the country, and furnishing the Columbia dealers with practical, and valuable co-operation. Full-pages will be used in all of the leading national magazines, newspaper advertising, featuring Barrientos will be used in practically every city of any appreciable size, window-hangers, envelope enclosures, etc., are all included in this mammoth publicity plan.

DECISION AGAINST PRICE-CUTTING

Columbia Graphophone Co. Wins Action Brought Against Tosi Music Co., Boston, for Violation of Contract—Defendant Settles

BOSTON, MASS., December 4.—One of the most important decisions affecting price-cutting was handed down recently in the U. S. District Court, District of Massachusetts, in the case of the Columbia Graphophone Co. vs. Tosi.

The defendant in this case, Harry Z. Tosi, doing business under the name of the Tosi Music Co. at 263 Hanover street, Boston, Mass., started in to slash prices on Columbia Italian records, advertising them both in the newspapers and in his windows at cut prices. He stated in effect that he had 15,000 records on hand which, when sold, could be replaced by 15,000 more at a reduced price in New York; that the goods he was selling was his, and that he was going to do as he pleased with them; that the plaintiffs were using an unpatented motor in their machines, and that he knew it was unnecessary for him to maintain prices.

Suit was accordingly entered in the name of both the American Graphophone Co. and the Columbia Graphophone Co. in the U. S. District Court, and a motion for preliminary injunction came on for hearing before Hon. Frederic Dodge, Circuit Judge, on November 21. In the course of the argument Elisha K. Camp, attorney for the Graphophone companies, raised the point that the defendant was estopped under his price maintainence contract from denying the validity of the patents under which Columbia records are manufactured, or raising any dispute or contest as to any of said patents, or the right of the American Graphophone Co. thereto, and the Court sustained the point and made a ruling to that effect.

The Court wrote no opinion, but ordered that a Writ of Injunction issue in accordance with the prayers of the bill, and accordingly a Writ of Injunction was issued under the seal of the said Court, enjoining and commanding the defendant, his servants, attorneys, clerks, agents, working men, associates, and assigns, and each and every one of them, "on pain of $10,000 to be levied on your and each of your goods, chattels, lands and tenements, to our use," not to directly or indirectly infringe the patent monopoly rights of the plaintiffs through violating the price maintenance contract of May 18, 1916, or any part thereof, and particularly from directly or indirectly selling or offering for sale, or otherwise disposing of, any patented Columbia products at less than the official list prices thereof, until the further order of the Court.

Since the argument of the preliminary injunction, counsel for the defendant has been convinced that it would be useless to proceed further with the litigation, and he has just agreed to pay the costs to be taxed by the Clerk (approximately $25 or $30), and in addition, damages in the sum of $50.

MAKING CONSTANT IMPROVEMENTS

The Universal Fixture Corporation, 131 West Twenty-third street, New York, are experiencing good business in their display fixtures for the showing of records. A new fixture of interest to the dealers is a new adaptation of the easel display frame for the monthly record lists. Instead of the easel this frame may now be suspended by chain.

The Phono Motor Manufacturing Co., Inc., Brooklyn, N. Y., has been incorporated with a capital stock of $25,000 to manufacture and deal in motors, accessories and equipment for talking machines and musical instruments. The incorporators are L. B. Rogers, F. E. Beveridge and M. M. Roemer.

Talking Machine Dealers should write at once to their Congressmen urging strongly the passage of the Stephens-Ashurst Bill, H. R. 13,568, providing for maintenance of retail prices on trade-marked articles. There is no time to be lost.

UNHEALTHY FOR FAKE ADVERTISERS

Vigilance Bureau of Minneapolis Advertising Forum Takes Action Against Advertiser Who Used Wrong Name and Valuation in Copy

MINNEAPOLIS, MINN., December 9—The Vigilance Bureau of the Minneapolis Advertising Forum is still showing great activity in running down fraudulent advertising of talking machines, the latest case concerning an advertisement which read, "A Victrola. A nice $50 size for $18.50 cash." Three complaints were filed concerning this advertisement, each of which questioned whether the phonograph mentioned in this advertisement was a genuine Victrola.

Investigation showed that the machine in question was made by a concern other than the Victor Talking Machine Co., and bore the label of the real manufacturer on the lid. The advertiser was interviewed and informed of the violation of the state advertising law, and disclaimed responsibility for the copy. He, however, immediately cancelled the advertising order with the newspapers and stated that he would use new copy with the name Victrola and the reference to the $50 size eliminated

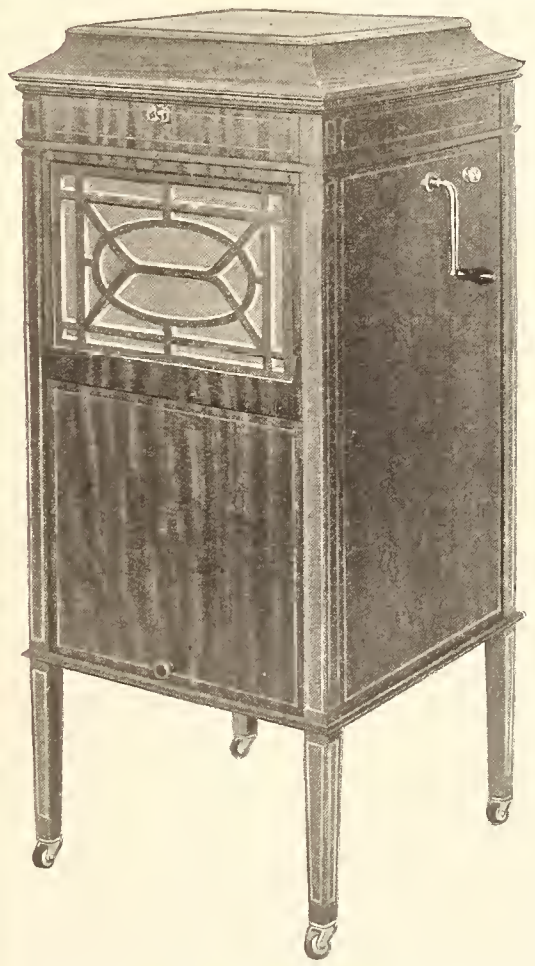
STRONG EDISON HOLIDAY ADS

Double-Page Spreads Used in Newspapers of Leading Cities Describing the New Edison and Re-Creation and Giving Lists of Dealers.

One of the attention-commanding features of the various talking machine campaigns carried on for the purpose of developing holiday business has been the strong double-page advertisements run in the daily papers of the principal cities of the country by Thos. A. Edison, Inc. One page, bearing the caption "Edison's Most Sublime Gift to Man," was devoted to a talk on the new Edison and its re-creation of music. Practically half the space was occupied by a large picture of Anna Case, the Metropolitan star, standing at the side of the new Edison as she does in her tone tests. The second page was devoted to lists of local dealers where the new Edison and the "Re-Creation" might be heard. The commanding character of the display should have good effect on Christmas trade.

An Endorsement from a Famous Tenor

Johannes Sembach, the celebrated Metropolitan Opera Tenor, owner of a National Bluebird machine, under date of December 5th, wrote as follows:



One of the National Bluebird Models
They are made in genuine mahogany and oak, and are beautiful in finish and design. The motors, tone-arms, sound-boxes and tone modulators are the best made. All machines play all makes of disc records without an attachment.
There are four models retailing at $50, $85, $150 and $200, with liberal discounts to dealers.

"I am exceedingly well pleased with your Bluebird Talking machine. The motor is wonderful, and there is none of the noise which is so disturbing in other machines I have heard.

"Again extending you my hearty thanks, I am,

"Very sincerely yours,

Johannes Sembach"

An Irresistib
The Pathé
the Pat

"The WORLD'S Record"

THE name Pathé inevitably brings with it the thought of world wide dominance. *More* laurels have lately been added to the Pathé crown. Behold their latest achievement!

"Professional" Model No. 125

Originally built for one of Pathé's principal artists, this instrument suited him so well that we decided to duplicate it in our regular line.

We place model No. 125 in dealers hands, confident in the knowledge that it is a masterpiece.

Not only is it a well built, handsomely constructed instrument, but it also has all the acoustic excellence of phonographs selling at twice its price.

Its unusually large sound chamber amplifies to an extraordinary degree every delicate shading of tone, each detail, each little trick of the artist's interpretation—*nothing is lost,*

Jacques Thibaud
Master Virtuoso
Plays exclusively for Pathé

A New Sales Outlet

For this reason Pathephone No. 125 is of unequalled value to the student of music.

The pupil in vocal culture can study the marvelous quality of Muratore's beautiful voice.

Jacques Thibaud's virtuosity will be of invaluable assistance, even to those who have played the violin for years.

This new professional model with its unusual acoustic properties enables the student who has reached a certain point, and who has greater ideals in view, to obtain an advantage secured in no other way.

He can at his own convenience play over and over again Pathé records by the world's great singers and instrumentalists, until he has analyzed the talent and technique which has established such artists' fame and success.

Dealers who know the advantages of specialization are going to sell Pathephone No. 125 not only to the general public but to professional people who will use it in their studios to assist their hours of instruction.

We can make prompt delivery on orders for model No. 125 received before January 30th, 1917.

If you have not yet stocked this model, place your order NOW! Join Pathé for Profit, Prestige and Progress.

REPAIRS

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World is designed for the service of all classes of our readers, including those who make, and those who sell, talking machines.
Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 25 East Fourteenth street, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

CHANGE OF SPEED IN MOTORS

In my article for July, 1916, I wrote on the subject of Columbia double spring motors, and I will now continue my talk on the same type of motor, taking up the causes and remedies for that often-met-with trouble—the change of speed of the motor—and the consequent change of pitch in the voice or music being reproduced.

Taking it for granted that the graphiting and governor springs and balls have been attended to properly, as outlined in my July article, I will take up in sequence the several troubles in the motor, any of which might be the cause of the change in speed.

The lack of oil on the shafts of the two intermediate gears sometimes causes either one or the other to run hard and in some cases bind so tight as to almost prevent motor from running—take out gear check washers—remove gears from shafts—drive shafts out of casting with proper sized punch—take emery cloth and clean shafts so that gears will work perfectly free—replace shafts in casting—oil—replace gears and gear check washers—and trouble No. 1 is well taken care of.

The fibre gear on the Turntable Spindle gear (in the old style only) may be loose or its teeth may be mashed or worn badly—look to these points and either tighten the old gear, put in a new fibre, or a new gear. In setting this gear in relation to the main driving gear be positive that the turntable spindle check collar is close enough to casting to prevent bevel teeth of spindle gear becoming disengaged from the bevel teeth on the main driving gear.

The hole in the fixed governor bearing may have became so large through wear that the spindle has too much side play—put in a new bearing. The spiral cut on spindle may be worn, very little wear at this point will cause noise—put in a new spindle. In placing governor into position allow quite some end play by adjusting fixed bearing, and adjust spindle cut to fibre gear by means of the movable governor bearing, at the same time getting this bearing into such a position that it will bring both governor-bearing holes into perfect alignment, thus insuring an easy starting motor. The two little felt pads on the governor swivel often cause trouble. Their constant pressure against the governor friction disc tends to harden the bearing surface of the belt, and in most cases oiling will not effect a cure. Take a very sharp knife and (back of the hard spot) cut off about a sixteenth of an inch of the belt, then cut a cross slot in surface of pad and soak well with oil; this will in most every case do away with the noise and variation of speed which the hard spot in the belt causes.

With the turntable in position so that it does not rub against anything, there cannot possibly be found any other causes for change of speed in this type of motor.

Fixing the Diaphragm

A. H. Dodin, care Talking Machine World:

Will you kindly advise me if in adjusting the diaphragms and sound boxes of the usual types, the rubber washers or gaskets should be so placed as to allow the edge of the diaphragm some play, or, whether they should be set solid against the diaphragm surface.

I have put new gaskets in one or two reproducers, but don't seem to be able to secure the original quality of tone, there being an inclination to blast.

W. D. B.

ANSWER—Mica should in all cases be cemented to one gasket in such a position that will prevent its edge from touching sound-box ring, and gaskets should always be of such size that when back or clamp ring is placed in position, enough pressure will be exerted against mica to hold it securely in position.

A. H. DODIN.

When the Needle Skids

Editor Talking Machine World:

On my machine, which is a standard make, I find that unless I stop the motor as soon as a number is finished, the needle frequently slips across the center of the record, and sometimes across the grooves on the other side. This slipping has ruined several records.

Would you advise me if the trouble is with the construction of the record or represents some mechanical defect.

G. N. S.

ANSWER—Your trouble is no doubt in the record. The majority of records now sold have at the end of the cut an annular grooves which prevents needles from running across label.

A. H. DODIN.

The Delpheon

Model C

"The Phonograph with an Individuality"

It has more features than any other—all selling points.

It is made by a firm that is conservative—that will take just enough business to care for its output and no more—one that fills all orders promptly—one that is building for the future.

It is establishing a reputation for quality through its many superiorities that is causing a sure and steady growth—a growth that is sound.

Delpheon dealers are given the right kind of assistance and co-operation.

The convenient record filing cabinet and the tone control by which you actually "play" each selection "through the silken cord" sell the instrument for you.

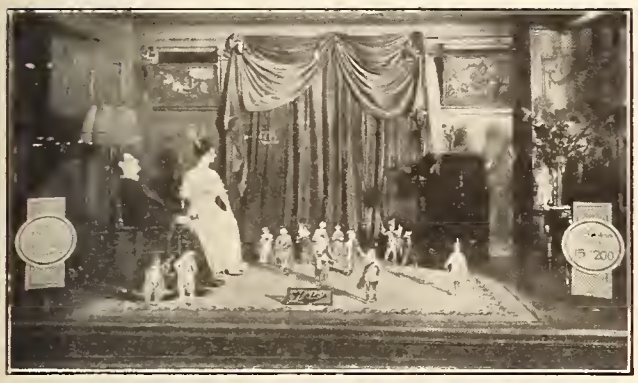
Where can you find one better?

The Delpheon Company
BAY CITY 810-812 BOUTELL PLACE MICHIGAN

TRADE IN EXCELLENT SHAPE ON THE PACIFIC COAST

Demand for Talking Machines Is Strong, and Stocks Are Fairly Satisfactory—New Association Officers Elected—New Stores and Changes—What Various Concerns Report

San Francisco, Cal., November 28.—In these days of soaring prices it is gratifying to know that in talking machines the prices have not materially changed, and that even better values than formerly can be obtained by the public desirous of making the home homelike by the addition of talking machine merchandise. The past month in the trade has been exceedingly healthy as far as the demand is concerned, and conditions in shipping appear to be improving somewhat. There is a shortage of stock with many dealers, but most of the larger concerns are well provided for the holidays. Sufficient stocks of both machines of all styles and records are here to warrant full scope in the advertising departments. Business is such that



Victor Window Display of Hall Bros., Inc.

there is no special need for elaborate recitals and public demonstrations of any kind. The natural growth keeps pace with the ability of the dealers to supply goods in most quarters. The only feature in the trade that is different from the past is that there is a pretty steady drifting away from the exclusive talking machine shop idea, both in the department stores and the regular music houses. The best concerns now seem to prefer carrying several makes of machines, as well as all standard records.

Association Has Fine Banquet and Meeting

A most successful banquet and meeting of the San Francisco Talking Machine Dealers' Association was held last month, when the officers for the ensuing year were elected. This was the annual meeting of the aggressive body, and the number present embodied almost the entire membership. James J. Black, manager of the talking machine department of the Wiley B. Allen Co., was elected the new president, amid cheers and acclamations of accord; Charles Mauzy, of the Byron Mauzy talking machine departments, vice-president, and A. W. White, manager of the Emporium talking machine department, was chosen the secretary-treasurer. This meeting was made specially attractive by the splendid musical program provided. Among those who participated were: Harry Vegar, who did things on the piano, and Ray MacDonald and Robert Canning, who demonstrated to what heights of beauty the human voice can attain even in the commercial world. A number of informal speeches were delivered on topics of intimate interest, and it was agreed among the dealers present that a minimum price on old machines should be maintained. The usual spirit of harmony prevailed, and said harmony was in no small measure due to the gastronomic diplomacy of Billy Morton, chairman of the "Good of the Order" committee, who arranged the banquet. He was voted a tribute of thanks.

A. W. White, manager of the Emporium talking machine department, has a good supply of machines and records for the holidays, having begun to anticipate his holiday needs as early as May.

A Growing Department

The talking machine department of Hale's Department Store has been growing steadily since it was first established, and the volume of business for the present month shows a big increase over last year at this time. The department has been enlarged once, and several more fine demonstrating rooms are to be added shortly. Victor machines are handled exclusively. Edwin Humphreys, manager of the department, says the largest demand is on the higher-priced machines.

Pathephone Shop Closed

The Pathephone Shop, 322 Post street, has been discontinued. This shop has been under the management of Louis S. Blackly for some months, but the venture was not a success. The location was against the business, and the exclusive line imposed too great a restriction on the enterprise in this particular field. The stock of the shop was sold by Mr. Blackly to O. N. Kruschke, who has a talking machine business in Berkeley. Mr. Kruschke will conduct a jobbing business also in the California territory.

F. B. Travers, manager of the Phonograph Shop, 109 Stockton street, says business in the new stand is flourishing, and that they are in splendid shape on deliveries. They have ample supplies of every model and finish. Business on Columbia machines is good, and the show window showing the process of manufacturing Columbia goods has just been installed. This is the same exhibit which the Columbia Co. had at the Exposition last year.

Visits Sonora Factory

F. M. Steers, president of the Western Sonora Co., has just been visiting the factory in New York, and has succeeded in getting a carload of $100 machines for the San Francisco Christmas trade.

The Emporium of Music at Reno, Nev., is the latest Coast music concern to take on the Sonora line. This firm already handles the Victor line.

Mrs. Aline M. Baker, who formerly was with the San Francisco Edison Shop, but who for the past few months, has been in Portland, has now returned to the Edison Shop here. The Edison Shop is in pretty fair shape for the holiday trade. Records have been coming in better this month than last.

An Effective Window Display

A particularly effective local window display was recently made by Hall Bros., Inc., who arranged the window of their store at Market and Fifth streets as a drawing room with figures representing the famous Victor artists entering the room just as they do in the magazine advertisements. The idea was that of Edward Humphrey, manager of the department, and is illustrated herewith.

New Demonstrating Room for Mauzy

The latest new demonstrating room in the Byron Mauzy talking machine department is hung with old rose draperies and furnished with comfortable wicker furniture. The room is as cozy as a home living room. Charles Mauzy says the talking machine business is picking up fast in response to the progressive advertising done by the firm. They now run ads in the newspapers, on the billboards and in the street cars all at the same time.

Fred A. Dennison, Pacific Coast manager of the Columbia Graphophone Co., is at present on a trip to the factory in the East trying to hasten the delivery of Columbia merchandise to the Coast.

Columbia Co. Auditor a Visitor

F. S. Binger, of the auditing department of the Columbia, has been visiting in San Francisco for two weeks. He had already been in the Northwest, and from here went to Los Angeles. This was Mr. Binger's first visit to San Francisco, and as usual in such cases, the gay old city by the Golden Gate paralyzed him with delight. He expressed the fond hope, as so many have done before, of sometime making this city his permanent abode.

Kahn Bros., of Oakland, Cal., who have an exclusive Columbia department, which is under the management of W. C. Henry, held a three days' special term sale last week, and in those three days did more business than for any single month up to that time. It is estimated that less than 5 per cent. of reverts result from easy-term sales on the Coast.

New Department Manager

The manager of the Columbia department in the Eastern Outfitting Co. on Market street, is A. R. Timanus, formerly of the talking machine department of the Hauschildt Music Co.

Hockett & Bristol, well-known piano dealers of Fresno, Cal., have taken the Columbia line. They also handle the Edison line.

F. F. Dawson, of the executive office of the Columbia Co., who has now returned East, put in new Columbia agencies on his recent trip at the following cities and towns: Petaluma, Arcata, Porterville, San Jose, Lindsey, Hanford, Tulare, Merced and a few others.

The Jackson Furniture Co., of Oakland, which firm has been handling the Columbia line on a limited scale, now have stocked the complete catalog.

Awaiting New Victrola Style

James J. Black, manager of the talking machine department of the Wiley B. Allen Co., says they are eagerly looking forward to the new Victrola style XVII, to sell for $250. None of these machines have yet arrived in San Francisco. He says the local store is not short on any line, and can take care of the holiday trade without difficulty this year.

Mr. Louder, manager of the talking machine department of the Portland store of the Wiley B. Allen Co., is preparing for an aggressive holiday campaign in the North.

A LOGICAL COMBINATION

November 27, 1916.

To Our Patrons:

Right in this little booklet containing a list of Victor records for December there is wrapped up a whole lot of GENUINE PLEASURE FOR YOU.

At this time of the year when the majority of us have a good many long evenings at home, we are only too glad to have an amiable friend come in to wind up each day with a bit of pleasantry.

The Victor Company seem to have realized that that friend is not always to be had, and they have come to your rescue with the December records.

A tip-top record is No. 64622, "THE SUNSHINE OF YOUR SMILE" by John McCormack.

Record No. 18167 is a truly funny song, "O'BRIEN IS TRYIN' TO LEARN TO TALK HAWAIIAN".

The Trinity Choir sing two beautiful old Christmas Hymns, record No. 35594.

Then there are many others in which we know YOU would delight; but we would rather PLAY them for you than tell you about them.

Come in at your convenience, you are always welcome.

Yours very truly,

JOHN DOE TALKING MACHINE CO.

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., December 9.—If anyone in the Chicago and Western trade entertained hopes of a less acute shortage in machines this year than last they have been keenly disappointed. In spite of the number of new machines on the market with an aggregate output reaching really important totals, the demand for the product of the older companies has been undoubtedly far greater than ever in the history of the trade, and in spite of tremendously increased factory facilities, the disparity between demand and supply is wider than in any previous year.

Dealers have been present on the market in unusual numbers the past few weeks clamoring for goods, and the jobbers have been driven to desperation to even partially satisfy them and convince them that every effort was being made and had been made to do justice to everyone.

"Here's the situation," said one man. "There is not a dealer of enterprise and standing who has not received much larger shipments this year than last. But the fact is that business has been so much better than last that they have not been able to accumulate stock. They ordered more liberally and earlier, much earlier, many of them, and received an unusual amount of goods during the Summer and early Fall. But the goods didn't stay in the stores. Everyone has done an immense year's business, and even if, in spite of all the efforts of manufacturers and jobbers, there is still a deficiency this fall, there should be a philosophical attempt to be satisfied with the increased volume of business and profit. Let everyone consider the facts and be grateful conditions are so favorable. It's manifestly better to have more business than you can care for than to go over the holiday season with large instead of depleted stocks.

Every distributor lays stress on the wonderful record business which is being done and the manner in which the dealers have responded to the advice of manufacturers and jobbers to specialize on this branch of their business and thus counteract in a measure the machine shortage.

While the big holiday rush with the local retail departments and stores starts in another week, the trade since the first of November has been exceptionally good and showing a heavy increase over last year, according to reports all along the line. Newspaper advertising and window cards in the loop stores have advised the public to anticipate the usual before-Christmas shortage, and within the past fortnight there has been an unusual number of sales of talking machines and records for delivery just before the holiday.

Changes at Geo. P. Bent Store

Sweeping changes in the retail talking machine department of the Geo. P. Bent Co., followed the retirement of Otto Y. Schnering last week from the general management of the Geo. P. Bent retail department and the return to control by G. Harry Bent, son of George P. Bent, who had been in charge of the retail destinies of the company until two years ago, when he retired to become the Coast representative of the Cheney Talking Machine Co.

Mr. Schnering has formed a new company to engage in the brokerage of food stuffs, and with him will be associated Edwin V. Zeddies and William Bickel, members of the retail department, who have been closely associated with him in the piano business.

"I shall conduct the business under the policies which obtained when I was here previously, and that is about all I can say regarding the future," said Mr. Bent to The World. "Harry C. Meek, who was formerly retail manager here and who later was identified with Pathé interests, will again take charge. Victor talking machines and records will be handled exclusively."

Kennedy Now Handles Manophone

M. J. Kennedy, manager of the Chicago division of the Jesse French & Sons Piano Co., informs The World that they have taken on the Manophone line of talking machines, manufactured by the James Manoil Co. of New York. "The Manoil Co. is prosecuting a very extensive campaign in a number of National magazines," said Mr. Kennedy," and we expect to do a considerable volume of business with the new addition to our other lines. We have the representation in Illinois and surrounding territory and have already opened several new accounts."

Six Best Sellers

The six best Victor sellers this month included "The Sunshine of Your Smile," sung by John McCormack; "Killarney" and "Kathleen Mavourneen"; "Pretty Baby" and "There's a Little Bit of Bad in Every Good Little Girl," "My Lonely Lola Lo" and "My Own Iona"; "Give Me All of You" and "Pretty Baby," "Angels from the Realms of Glory" and "Oh, Little Town of Bethlehem."

The Columbia best sellers were: "Rigoletto," sung by Lazaro; "Hark! the Herald Angels Sing" and "Oh! Come All Ye Faithful"; "Oh! Holy Night" and "Star of Bethlehem"; "Oh, How She Could Yacki Hacki Wicki Wacki Woo" and "You Were Made to Order for Me"; "The Golden Cobwebs" and "The Gingerbread Boy," and "1812 Overture," Parts 1 and 2.

The six best sellers in the Pathé library this month included "Tales of Hoffman"; "Hark! The Herald Angels Sing," and "While Shepherds Watched Their Flocks by Night"; "Mother Machree" and "Has Sorrow the Young Days Shaded"; "Down in Dreamy Honolulu Town" and "On the Beach at Waikiki"; "United States Boy Scouts' Official March" and "The High School Cadets" and "Bachelor Girl and Boy" and "And They Called it Dixieland."

The Edison best sellers the past month have been: "Old Black Joe" and "Valse in E Flat"; "Lily and the Frog," and "Oh! How She Could Yacki Hacki Wicki Wacki Woo"; "Fair Hawaii," and "She Sang 'Aloha' to Me"; "Rock Me to Sleep, Mother," and "When You and I Were Young, Maggie"; "Baby, Swing High, Swing Low," and "Long, Long Ago," and "Annie Laurie" and "Old Folks at Home."

Edison Publicity Work

Two Edison artists, who have been widely heralded through the press of the Middle Western States in conjunction with their Edison recitals, have been doing considerable work in the territory surrounding Chicago during the past two weeks. On Monday evening, November 27, Miss Christine Miller, contralto, assisted by Arthur Walsh, violinist, gave an interesting tone-test recital before a large gathering in Orchestra Hall. Mlle. Alice Verlet, coloratura soprano, of the Parish Opera, who makes records for the Edison Co. exclusively, has appeared in several tone-test recitals with the Edison talking machine recently. On December 5 she sang at Gary, Ind., under the auspices of James A. Ward, the local Edison dealer. On December 6 Mlle. Verlet appeared in a similar performance at Nashville, Tenn., and on December 8, in South Bend, Ind., at the hall of the local dealer, A. H. Heller.

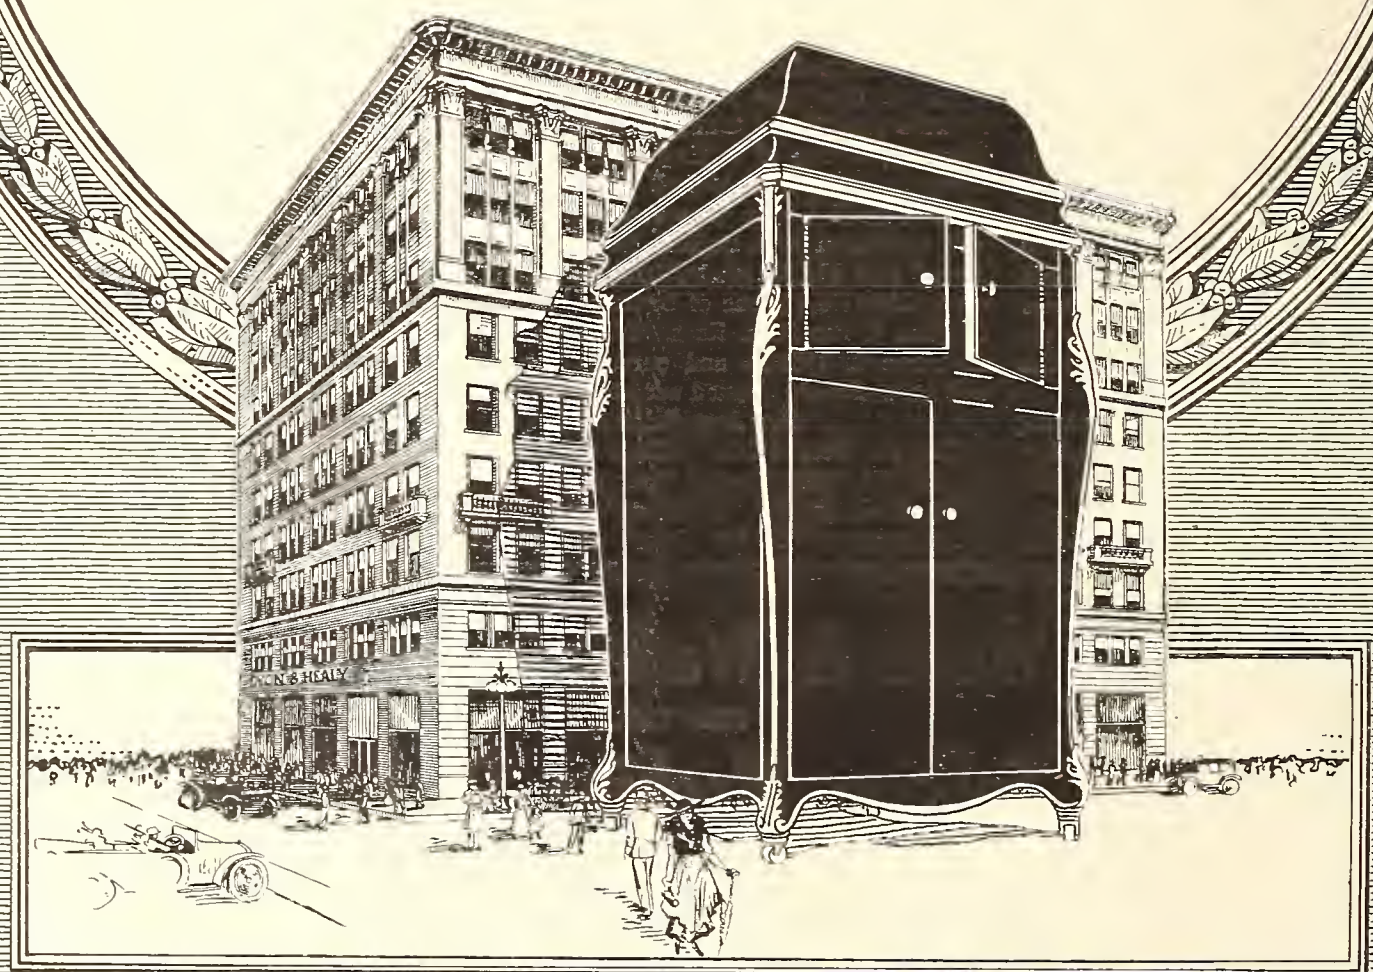
CHICAGO



FROM OUR CHICAGO HEADQUARTERS—(Continued from page 73)

C. E. Goodwin, general manager of the Phonograph Co., Edison distributors in the Chicago zone, returned recently from a trip to the various Edison jobbing centers. He reports an altogether unprecedented demand for Edison machines and records.

Hebert to Design Vitanola Cabinets

The Vitanola Talking Machine Co. announces that it has obtained the services of Maurice Hebert, one of the leading international designers, and that Mr. Hebert is now at work upon the creation of some exquisite new case designs for that company.

Mr. Hebert is well-known throughout Europe

Maurice Hebert

and America, and as a builder and designer of note, has created designs for many of the royal houses of Europe. His reputation in the architectural and interior decorating world is a very high one, and foreign sovereigns and members of the European nobility have deferred to his knowledge when it came to the matter of furnishings and decorations. Many American millionaires have enjoyed his services, and Mr. Hebert earned considerable reputation in this country for his work in designing and decorating the $5,000,000 residence of Charles M. Schwab, the steel magnate, which stands on Riverside drive in New York City. In his work upon the steel king's mansion Mr. Hebert designed or selected everything from the building to the silverware, draperies and porcelains.

It is the object of the Vitanola Talking Machine Co. to manufacture several beautiful models of high-grade cabinet phonographs under the personal and direct supervision of Mr. Hebert. Although he is being paid a large sum for his services, still it is not the financial result which he desires, but it is the love of his art which is the incentive to make the Vitanola models his masterpieces.

Phonographs being designed and built by Mr. Hebert for the Vitanola Co. are to be listed at prices ranging from $250 to $1,000 each. Some of the favored few who have seen the preliminary work of Mr. Hebert and his assistants have declared these to be genuine works of art.

"Many orders have already been placed for these Vitanolas by some of our dealers and by many of the leading citizens of Chicago," said one of the officials of the company, "and those who have seen the specimens of Mr. Hebert's art, say that a large volume of business will be done on these new models."

Maurice Hebert is a nephew of the distinguished French painter of that name.

Demand for Empire Model "B"

John H. Steinmetz, president of the Empire Talking Machine Co., reports a great demand for their model "B," which retails for $100. This style has been improved, and its attractiveness greatly increased. The Empire Co. is finding business good beyond expectation.

Emerson Records Selling Good

F. W. Clement, manager of the Chicago office of the Emerson Phonograph Co. of New York, reports an excellent Western business in the company's records. "December will probably witness an increase over the great sales of the past month," he states. "The Christmas selections have been selling very well. The best of these have been the "Night Before Christmas," "Raggedy Man," "On the South Sea Isle," "Turn Back the Universe and Give Me Yesterday" and "Pretty Baby."

Talking Machine Shop in Big Holiday Business

George B. Davidson, of the Talking Machine Shop, which opened up at 234 South Wabash avenue a short time ago, is doing a remarkable business for a firm that has so recently made a change of quarters. The demand for Victrolas is so great that the company is finding great difficulty in securing machines for customers. A week or two before Christmas the Talking Machine Shop sent out specially selected lists of records for everyone in the family from the youngest to the oldest, and found the plan an excellent stimulant to record sales. The two Victor books, "The Book of the Opera" and "What We Hear in Music" have proved ready sellers. In the window of the Talking Machine Shop there appears this month a large painting of "Die Walkure." It has attracted much operatic record business, and the big local opera season has helped in this.

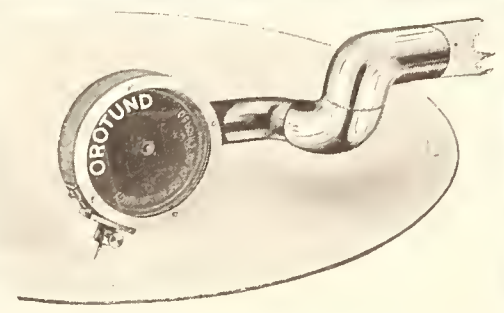
Attractive Window Displays

The retail talking machine trade has produced some exceptionally pleasing and effective window arrangements for the winter holiday season. All of the music houses are giving their talking machines a large share in the various window displays, and a mediocre window is becoming a rare sight.

Wurlitzer's has prepared a very artistic display in which talking machines occupy the chief interest. In one of their windows appear scenes in miniature of famous operas. There are eight of these: "Carmen," "Rigoletto," "Königskinder," "Magic Flute," "Faust," "Madam Butterfly" and "La Boheme." The miniature stage settings are illumined from the rear by differently colored electric lights that create a very pleasing and artistic effect. Between each of the scenes is placed a Victrola, and in the front of the window are placed the records that correspond to the operas depicted above. The window is trimmed with blue velvet cloth and white panelings. The remaining window of the store contains two high-grade Victrolas finished in Chinese and Japanese style, together with three harps of an old French pattern.

Lyon & Healy are devoting three of their spacious windows to talking machine displays. The principal window of the store looking out on Wabash avenue and Jackson boulevard contains a huge, beautifully trimmed Christmas

(Continued on page 77)



THE most important part of a talking machine is the sound producer. Other parts, which convey the sound waves, must be scientifically correct. But remember! the reproducer or sound-box must have the finest workmanship to produce the delicate tones recorded on the record in a musical way.

The "Orotund"

sound reproducer will reproduce all tones uniformly. "It is built like a watch." The only sound-box on the market, having an invisible stylus bar. We reduce surface and scratching sounds by the special construction.

We manufacture "Orotund" sound reproducers, attachments, etc., for the high grade phonographs.

Diamond and Sapphire jewel points, also **a high-class tone-arm.**

The BRUNSWICK

The Phonograph Your Customers Want

This new phonograph, made by the Brunswick-Balke-Collender Co. of Chicago, is scoring a huge success wherever introduced. In Chicago all dealers are doing a capacity business. This is true of every city where the Brunswick is sold.

The superiority of the machine, the perfection of its tone production, the beauty of the Brunswick cabinet work, outstrips all competition.

The fact that it plays all records, both the Pathé and American, is another great selling feature.

Backed By Advertising

Back of this hundred per cent. perfect machine is a national advertising campaign appearing in leading periodicals. Double-page spread announcement ads in the Saturday Evening Post brought us a flood of inquiries both from dealers and consumers. This has been followed by page advertisements that will be continued indefinitely.

In addition we are conducting vigorous local campaigns in every territory where we have agents.

From $30 to $175

The Brunswick Phonograph is made in styles designed to sell at $30 to $175.

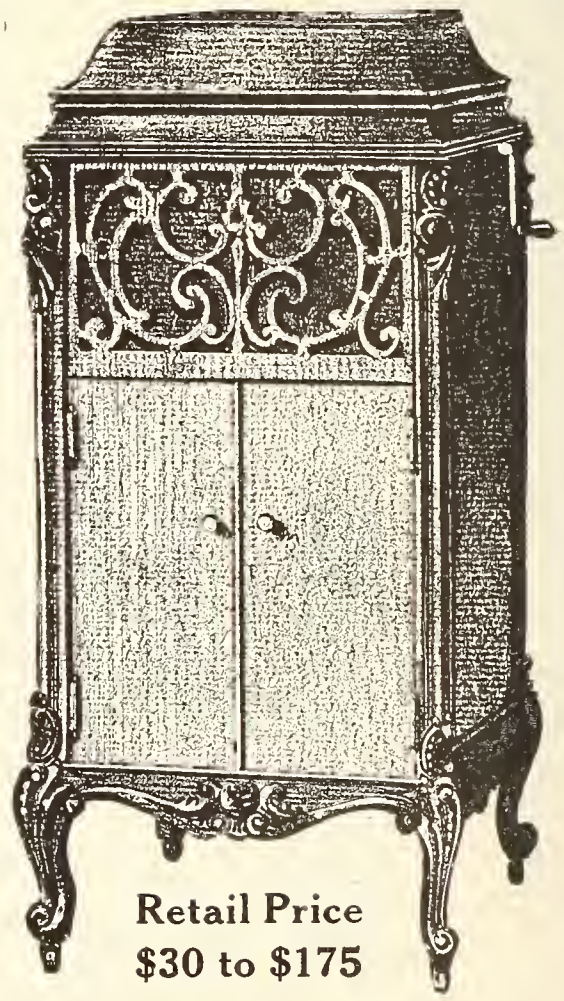
It is equipped with two sound boxes—one for playing Pathé records and another for other kinds—without extra charge.

There is a sapphire ball, jewel point and steel needles, 12-inch turn-table, automatic stop.

A special Brunswick feature is the tone modifier which operates through the "throat" of the machine. This alone distinguishes the Brunswick from all other machines.

The Brunswick has been christened "all phonographs in one," because it combines the best features of the best phonographs made. Added to these are special Brunswick features still more important. Then the dealer has the advantage of handling the wonderful Pathé records. This is the largest library of records in the world, containing great selections available through no other source.

Once one of your customers hears the Brunswick, a sale is sure to be made. Write for further information.



Retail Price $30 to $175

Some valuable jobbing territory still available

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 75)

tree in what is supposed to be a family hall. Standing beneath the tree is a Victrola, amidst the other presents, and opposite this stands a child in a "nightie" who has just awakened to the realization that the family is the possessor of a Victrola. In large, white cardboard letters above the talking machine is written "The Gift." Two other L. & H. windows contain talking machine displays that are effective, although less striking. Two of the instruments in one of these windows are finished in a bright gold.

The Talking Machine Shop at 234 South Wabash avenue this month has a large painting of Wotan and Brunhilde of "Die Walküre" about five by seven feet in their window. On either side of this there is placed a Victrola, and in the front of the window are the records of the famous German opera. The window is trimmed in white with a gray rug. In the background clusters of red art lights add to the general artistic appearance.

The Grafonola Shop is this month featuring the historic early models of the Columbia Co. in their show window. To the left of the window appears the 1906 model with its small tin horn and cylindrical records; in the center is an old 1910 type with the large flower-shaped metal horn, and at the right is the present cabinet style of instrument. A large arrow stretches from the earliest to the latest machine. The arrangement well brings out the wonderful development of the talking machine in the past ten years.

Otto Heineman Makes Visit to Chicago

Otto Heineman, of the Otto Heineman Phonograph Supply Co., was in Chicago December 5 to 8. The factory heads of every branch of the company were gathered here December 7 for the purpose of discussing means by which the 1917 output can be increased, and for other purposes relating to the production end of the Heineman business. Mr. Heineman predicted that the coming year would witness an increase over the volume of phonographs sold during the past remarkable twelve months, notwithstanding the fact that munition markets are acquiring enormous quantities of everything that goes into the manufacture of talking machines. Mr. Heineman stated that his own business had advanced beyond all precedent, and that he, personally, had obtained some very large contracts in the West.

Buys Grafonola Shop, Chicago

W. H. Wade, who about seven years ago was identified with Lyon & Healy as a department manager, and who has had much experience in the talking machine business, has acquired the Grafonola Shop, 14 North Michigan avenue, from the Columbia Graphophone Co., which has been conducting the store for the past three years.

In discussing the sale, H. A. Yerkes, district manager of the Columbia Co., said: "We have disposed of the Grafonola Shop because of our policy of interfering in no way with the retail business of Columbia dealers. We are very happy to have Mr. Wade take the business over, as we know he will conduct it along the high-grade lines that we have managed it in the past."

Mr. Wade announces that the organization will be continued intact, and no changes will be made in the personnel of the sales organization. For the past seven years Mr. Wade has devoted his time to the business of Becker & Wade, which conducts a series of cleaning and dyeing establishments in Chicago.

The business is being continued under the name of The Grafonola Shop, the Wade Talking Machine Co. proprietors, and some aggressive advertising is being done in the Chicago dailies.

The Morgan Music Co., Murphysboro, Ill., has added a new sales room to its store on Walnut street, where it will feature the Victor and Edison lines.

Praise Lyon & Healy Posters

Attention has been called from time to time in The World to the remarkable posters produced by Lyon & Healy, exploiting Victor goods, and which have not only been used to excellent effect on the billboards of Chicago, but have been furnished at low prices to Victor dealers and jobbers. The unusually artistic character and convincing force of these posters has attracted the attention of "The Poster," the monthly journal devoted exclusively to that type of advertising, and in its November issue an extended article is given devoted to Lyon & Healy and its poster advertising, which is highly commended. The famous poster, showing the complete line of Victrolas with Victor artists standing by them and which has been a familiar sight to Chicagoans as well as those in other cities where dealers have hastened to take advantage of it, is reproduced in colors. A cut is also presented of the latest Lyon & Healy effort, the "Victrola for Christmas" poster.

Extends "Orotund" Line

The Combination Attachment Co., 524 Republic building, this city, is experiencing a greatly increased demand for their "Orotund" patented sound box, one of the distinctive features of which is the invisible stylus bar, the special construction of which it is claimed reduces the surface scratching sounds to a minimum. The company is doing a large business with dealers on the "Orotund" sound box in connection with the attachments for adapting it for playing either hill and dale or lateral cut records and are also prepared to supply diamond and sapphire jeweled points. The "Orotund" has been adopted by a number of manufacturers with excellent results and the company is now extending its line of supplies, and are prepared to supply a high class tone arm of special construction that will interest manufacturers.

Brunswick Phonograph Progress

Although according to Martin Nystrom, manager of the phonograph department of the Brunswick-Balke-Collender Co., upwards of a hundred Brunswick phonographs are being shipped from the large plant at Dubuque daily, and the capacity is being continually increased, they will be crowded to the utmost to supply the demand for the holidays. A heavy increase in output, however, is being arranged for the future. Mr. Nystrom says that they will be able to commence shipments by December 20 on two new additions to the Brunswick line. These are table machines retailing at $30 and $50 respectively and will supplement the remarkable line of cabinet machines which range

IN POSITION FOR LATERAL-CUT. PLAYS ALL DISC RECORDS

A PERFECTED Tone-Arm and Reproducer Means a PERFECT Machine—

AT LEAST FROM A TONAL STANDPOINT!

Formerly we bought our tone-arms and reproducers. Now our experts have completed their experiments and all of our machines are entirely equipped with our own—and at last we are satisfied.

This combination is so designed that whether in position for hill-and-dale or lateral cut the location of the needle is always the same.

We claim that this new invention provides 50 per cent. additional volume and reduces surface scratch, besides leaving the wonderful tone-quality unimpaired. There are no screws to tighten, no threads to strip and there is no binding at the tone-arm base.

The Playerphone Automatic Stop is a REAL AUTOMATIC STOP. It is simple and positive and has been developed after years of careful experimentation. It is beautifully finished and fits any of the higher class machines. A talking machine without a stop is sold under a handicap.

The Playerphone is nationally known and popular everywhere. The beauty of its cabinet work, the sweetness of its tone and its wonderful up-to-date advantages have sold thousands of the Playerphone. We have just started a national advertising campaign to popularize this wonderful talking machine.. The first advertising started in the Saturday Evening Post on October 28.

On account of our very large output we can yet make holiday deliveries on numbers 175 and 125 in mahogany and on number 50 in both oak and mahogany. All Playerphone cabinets are made of the highest grade of oak and genuine mahogany, very finely finished.

Write your orders for holiday deliveries on above numbers and get in line for the agency for the Playerphone in your locality for the new year.

from $70 to $175. Mr. Nystrom promises that the new models will be a revelation in point of design and will constitute unusual value. Both will be equipped for playing hill and dale and lateral cut records.

Will H. Davenport, who has been sales manager of the Brunswick phonograph department since its inception, has gone on an extended trip to California, and A. J. Kendrick, who has been the Middle Western representative for the Brunswick line is now looking after the selling end. Kendrick reports some notable additions to the company's dealers within the past month.

The Weaver Piano Co., of Dallas, Tex., is opening an exclusive talking machine store to be known as the Brunswick Shop.

Stouthamer Bros., prominent jewelers of 767 Third street, Milwaukee, have rented the adjoining store which they will operate as an exclusive Brunswick Shop.

The Ideal Furniture Co., of Indianapolis, have opened an exclusive Brunswick department, as has also the Boston Store, of Joliet, Ill.

Among others who have recently added the Brunswick line are the Wallblon Furniture Co., of St. Paul, Minn.; M. J. Connell Co., of Butte, Mont.; Smith-Rice Piano Co., St. Louis, Mo., and Schober Bros., Waukesha, Wis., and Mandell Bros., Chicago.

Department Stores Doing Large Business

Without exception, the talking machine departments of Chicago's big stores report a volume of business exceeding that of any previous year. This is probably due to a great extent to the liberal advertising that these departments are getting in the daily papers.

Mandel Bros. have added the Brunswick to the Columbia, Mandel and Stewart lines of machines. They now also handle the Pathé records and have found sales excellent in both of the new acquisitions.

Manager R. A. Hicks, of Hillman's Department Store, reports an especially good business in higher class machines and records. The $100 model Grafonola is in great demand. Mr. Hicks makes a policy of having an attractive record on a machine every minute of the day to arrest the attention of possible buyers. As a great variety of selections are used the music never becomes monotonous to listeners. Mr. Hicks also pursues a policy of pushing the less known records in preference to the best sellers. This is an excellent plan as it not only popularizes a greater number of selections, but aids the record companies in meeting the demands of purchasers.

The Boston Store's talking machine department, managed by B. Cook, has recently added the Vanophône to their Victor line. The Vanophone, which they are selling for $7.98, is proving a considerable success. Mr. Cook reports a good business in foreign musical selections.

Harry D. Schoenwald, manager of the Fair's talking machine section on the fifth floor, is enjoying a good holiday business. Their "Fair view" model which plays all lateral cut and hill and dale records is most in demand. This style sells for $64.50. Their "Vista" universal tone arm model which sells for $59.50 is also finding a ready sale. They have recently placed on special sale a small cabinet model at the price of $15.00. This is about two and a half feet high, finished in mahogany.

Rothschild's department store, which made special preparations for the large business that was expected to come with the 1916 holidays, has found the demand for machines and records enormous, and although they now have on hand a larger supply than they have ever had before at this time of the year they expect to be among those who are already feeling the shortage of machines, before the first of the year. Manager Dvorak has increased the talking machine space and taken on an increased sales force. He states that the better grade of machines are having the best sales.

Mandel Bros. to Give Free Language Courses

Mandel Bros. department store of this city has completed a contract with the Cortina Co. by which they obtain the exclusive right to demonstrate and sell the Cortina language course records. L. L. Lewis, B.A., of the Cortina Academy of Languages, is in charge of a special department of the talking machine section which will extend a series of free lessons to whoever wishes to enter the classes. There will be sixty pupils in a class twice a day and each student will be enabled to receive one lesson a week. There will be no expense to pupils except the price of a text book which can be purchased at any book store. The plan is calculated to stimluate the sales of Cortina records by putting the right people in touch with the talking machine method of instruction. Mr. Lewis, however, states that the class lessons will have nothing whatever to do with the record method. He will instruct orally, and will hope to arouse a desire in the minds of his pupils to pursue the work at home by means of the Cortina records.

(Continued on page 81)

FlexiFile Co. Increases Capital

The FlexiFile Sales Co., of 335 S. La Salle street, this city, have increased their capital stock from $75,000 to $150,000 to take care of their rapidly increasing business. The company manufactures the FlexiFile disc record cabinet which incorporates the FlexiFile system owned exclusisvely by them and are also prepared to make arrangements with the talking machine manufacturers for FlexiFiling cabinet machines. The demand for the FlexiFile record cabinets has increased to such an extent that they are now preparing to manufacture them in New York as well as Chicago, in order to take care of the large business being done by the Eastern office, which is located at 395 Broadway, New York.

Dealers' Service Room Popular

The new dealers' service room, which the Chicago Talking Machine Co. opened last month, is proving wonderfully popular. Both local dealers and those visiting the city are taking advantage of the opportunity offered to

LET US TELL YOU ALL ABOUT OUR DEALER PROPOSITION

Magnola Talking Machine Company

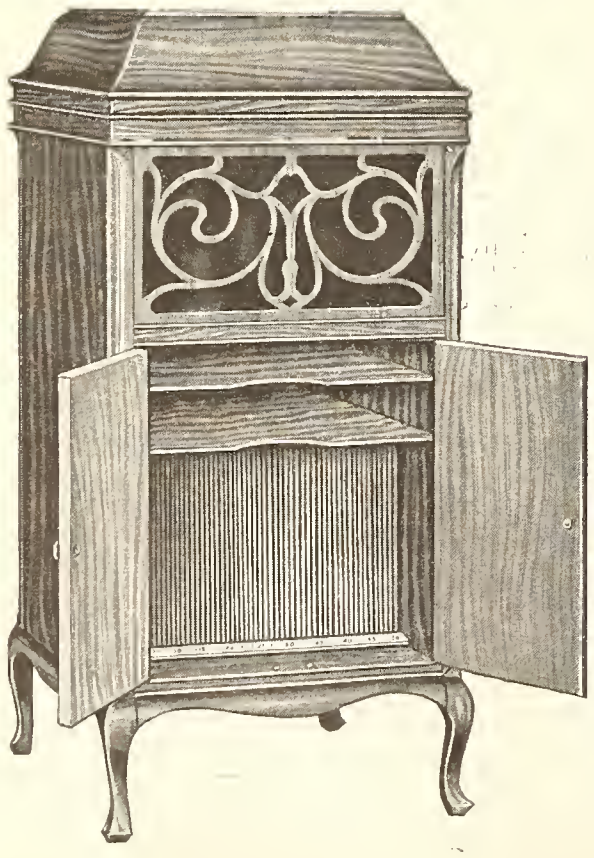
OTTO SCHULZ, President

711 MILWAUKEE AVENUE, CHIGACO

NEARLY TWO THOUSAND MANDEL DEALERS

The Mandel No. 2 can be had in Mahogany, Golden Oak or Fumed Oak. It is 15½ inches high, 20 inches deep and 17 inches wide. This table model is a regular $50 type of phonograph. Our List Price is $35.

The Mandel No. 3 is made in Genuine Mahogany, Golden Oak or Fumed Oak. It is 48 inches high, 23 inches deep and 22 inches wide. This model is fully the equal of any other phonograph selling at $150 to $200. It possesses every desirable feature required in a phonograph. It plays all makes of disc records. Has fifty individual record compartments and two shelves for record albums. It is finished on all four sides. Retail price of the Mandel No. 3 is $100.



who read our first announcement realized the enormous sales possibilities of the Mandel Phonograph and are cashing-in on the livest phonograph proposition ever presented to them.

Why? Because the Mandel is a high-grade phonograph, selling at a low price. netting over 100% profit to the dealer, and insuring everlasting satisfaction to the ultimate purchaser.

These facts are the basis for our wonderful progress. In less than six months we have made nearly *two thousand dealers.*

Every part of the Mandel phonograph is manufactured by us—*not assembled—but built.* Every single part is produced under our own supervision by experts in the art of phonograph construction.

Two big factories—one in Chicago and one in Benton Harbor, Mich., are busy supplying our dealers' demands. In our Chicago factory we make the motors, tone arms, sound boxes, and all of the other metal parts which enter into the assembling of the phonograph.

In our Benton Harbor factory we make the beautiful cabinets which have won the admiration of thousands of dealers and customers all over the country.

The Mandel Phonograph Plays Any Disc Record

Our combination reproducer, in a jiffy, is converted to play any style of disc record. This gives the owner of a Mandel phonograph a choice in the selection of records from the catalogs of the world's largest and best record manufacturers.

You Will Be the Judge

We positively claim that in tone quality, design and general appearance, the Mandel is fully the equal of any other phonograph selling at twice our price. A strong statement, you say. Yes, but we will let the burden of proof rest on us.

You will be the judge. Give the Mandel a chance to talk and play for itself. Let it demonstrate more effectively than printed words that it is second to none in its performance. Test it for yourself. Play it in your own store or business office. Compare it with any other talking machine—not only in design and general appearance, but in tone quality as well. Give it the acid test and if you do not conclude that the Mandel phonograph is fully the equal of machines selling at about twice our price, ship it back at our expense.

This, in short, is our proposition. Write today for descriptive literature and our free trial offer.

MANDEL MANUFACTURING COMPANY, Inc.
501-511 S. Laflin St., Dept. H. CHICAGO, ILL.

inspect the various devices proffered by the Talking Machine Co. for systematizing the dealers business. The splendid systems for efficiency in handling record stocks and in pushing record sales attract particular attention. There is hardly a minute in the day when G. P. Ellis, who has charge of the service and efficiency department, is not found in the service room going over matters with an earnest dealer.

Wireless Orders for Needle Cutters

S. O. Wade, of Wade & Wade, manufacturers of the Wade fibre needle cutter, states that so far the orders for their product for the holiday trade are far ahead of previous years. They have received a number of large orders by wire, and two orders from England by wireless. The Wade plant at 3807 Lake Park avenue, is working night and day to meet the demand, and they hope to be able to make shipments promptly right up to the last possible moment.

Columbia Increased Facilities

At the Chicago branch of the Columbia Co. the remarkable gains which have characterized every month this year are reported as still being in evidence. Although November of 1915 was one of the biggest months in the history of the branch, that of 1916 showed an increase of nearly 75 per cent., according to Manager C. F. Baer. Notwithstanding the heavily increased production there is still a shortage on a number of the styles, but the shipments of the large assembling and distributing plant on South Peoria street is expected to relieve this congestion to some extent, even before the close of the holiday sason. The building has been completely equipped, and the first shipments of finished machines are expected to come forth in a few days. Among the new Columbia accounts which have been opened up in this territory in the last month are the Wabash avenue store of the house of Adam Schaaf, and the Meek Music Co., 1025 Wilson avenue, Chicago; E. J. Kuhls Co., Janesville, Wis.; J. F. Gruenheck, Fond du Lac, Wis.; Frank T. Gillespie, St. Joseph, Mich.; J. A. Scalf, Greenview, Ill.; the Pine Street Furniture Co., Muskegon, Mich., and Siegel & Balkin, Grand Rapids, Mich.

H. A. Yerkes, district manager for the Columbia Co., returned last week from a trip to the East, where he was accompanied by E. H. Dalzall, of the Columbia Stores Co., Columbia distributors at Salt Lake City, Utah. Mr. Yerkes left on Thursday for a few days' trip to Omaha and Lincoln, Neb.

Victor Dealer Dies

Word was recently received in Chicago of the death by pneumonia of William J. Vose, long a Victor dealer at Appleton, Wis. The business will be continued by Mrs. Vose.

Republic Co. Organized

Papers have been filed with the Secretary of State af Springfield, for the incorporation of the Republic Phonograph Corp., a $250,000 organization that has just been completed. The officers are Henry T. Schiff, president and general manager; Lee Cowan, vice-president, and J. Winter Burn, secretary and treasurer. Offices have been arranged for upon the second floor of the Railway Exchange Building, while extensive factory facilities have been arranged for at Rockford, Ill. Two lines have been decided upon so far. They are the "Virtuoso" and the Republic. President Schiff states that large contracts for the new lines have already been placed upon the strength of the design and performances of the first models. The new line will have, it is said, many distinctive feaures, including a tone-arm that is claimed to be decidedly superior and an automatic stop that never fails to hold.

Passow Bankruptcy Case

During the past month the hearings in the Passow & Sons bankruptcy case have been concerned almost entirely with the examination and cross-examination of expert witnesses employed by the creditors for the placing of valuations upon a Passow real estate. There is a wide difference between the valuation of the contending parties. The principal witness to take the stand was Walter L. Mills, of this city, a real estate man; others who testified were Messrs. Kubelic, Van Vlissinger and Gray.

Adam Schaaf Takes on Columbia Line

In November Adam Schaaf closed a contract with the Columbia Co., and is now handling the Columbia machines and records in addition to the Edison line. When interviewed Mr. Schaaf stated that the new line had received a very encouraging reception by his customers and was selling very well. The daily concerts given by the concern to the public from 11 to 5 o'clock are proving a very attractive feature, and Mr. Schaaf plans after the first of the year to run a series of special entertainments, which will present noted artists to the public. The Schaaf concert hall is a large and well decorated room on their main floor.

Prospect of Enormous South American Business

An order for $1,000,000 worth of American made pianos and talking machines, a large proportion of which will fall to Chicago manufacturers, is indicated in a statement made by an official of Baldwin Shipping Co., a Chicago export firm. The business is promised as a result of a $750,000 order for furniture made in Chicago, Grand Rapids and Rockford, of which twenty-five carloads have already been shipped to New York for trans-shipment to Buenos Aires.

The order is the first big break from a monopoly which European manufacturers have held upon South American trade for many years. There is no doubt but that if properly cultivated, South American trade would prove an inestimable boon to the American music trade. The official of the Chicago export firm gave as his reasons for the lack of business with our neighboring continent, the fact that, many

times heretofore, unscrupulous American concerns have unloaded faulty merchandise upon the South American countries, our salesmen have failed to conform their manners and courtesies to the Southern temperament, our firms have demanded too short credit arrangements with nations that are far away, and the high shipping rate imposed upon Americans by the foreign bottoms that carry our merchandise.

Playerphone Using New Space

D. R. McKenzie, president of the Playerphone Talking Machine Co., has arranged for additional space in the building at 2123 South Wabash avenue, every foot of which is being made thorough use of because of the remarkable holiday business that the Playerphone Co. is enjoying.

"Our own tone-arm and reproducer is enjoying a tremendous degree of popularity," said Mr. McKenzie, "and our dealers are reporting that it forms one of their chief assets."

Personals and Visitors

Charles F. Weingar, of the Chicago Hinged Cover Support & Balance Co., has returned to Chicago after an absence of several weeks in the East. While there Mr. Weingar made arrangements for a decided increase in the company's Eastern business. Henry T. Young, also of the Chicago Hinger Cover Support & Balance Co., is in Pittsburgh, where he is arranging for increased delivery of steel and other materials.

Recent visiting dealers were L. C. Parker, of Gimbel Bros., Milwaukee, Wis.; H. G. Power, Taylor Carpet Co., Indianapolis, Ind.; H. C. Whitman, Pearson Piano Co., Indianapolis, Ind.; E. K. Andrews, of the J. L. Hudson Co., Detroit, Mich., and J. Kuncel, of the J. Kuncel Co., Cedar Rapids, Ia.

George Graves and Mr. Charles, of Young & Chaffee, Grand Rapids, Mich.; Mr. Hoffman and George Walker, of the Herrick Piano Co., Grand Rapids, Mich.; George H. Eichholz, Milwaukee, Wis.; Mr. Gensch, of the Gensch-Smith Co.; Mr. Hartenstein, of the E. C. Fisher Co., Battle Creek, Mich.; Charles E. Roat, of the Charles E. Roat Music Co., Battle Creek, Mich.; Theo J. Miller and Ray Miller, of T. J. Miller & Son, Dixon, Ill.; R. L. Berry, Springfield, Ill.; E. C. Gallup, Niles, Mich.; Walter E. Fox, Fond du Lac, Wis., and Herman Bucheim, of the H. Bucheim Co., Sheboygan, Wis.

Galli-Curci on the Victor

Local Victor dealers were highly elated this week when the announcement was made that Madam Galli-Curci, the Italian singer, which has created such a furor because of her work in the Chicago Grand Opera Co., had made arrangements to sing exclusively for the Victor Talking Machine Co.

Madam Galli-Curci's advent on the American operatic stage had not been greatly heralded except by her particular friends and Cleofonte Campanini, director of the Grand Opera Co. However, her first appearance resulted in such demonstrations as the usually phlegmatic American opera lovers do not generally indulge in, and columns of favorable criticism appeared in every daily paper. Madam Galli-Curci has jumped immediately to the front rank of the world's sopranos and her meteoric rise is already reflected in the calls for records for her voice. Those that have so far been offered to the general public are 74499—"Caro Nome" from "Rigoletto," and 74500—"La Partida," both most satisfying records.

Kennedy Co. Successful With "Playerette."

The Kennedy Furniture Co., which operates a number of branch stores about the city is now handling the "Playerette" in addition to their line of Columbia machines and records. This is a very small metal model that sells retail for $4.95. The company's new branch at 1968 Milwaukee avenue has had great success during the past month in its talking machine department.

Incorporated

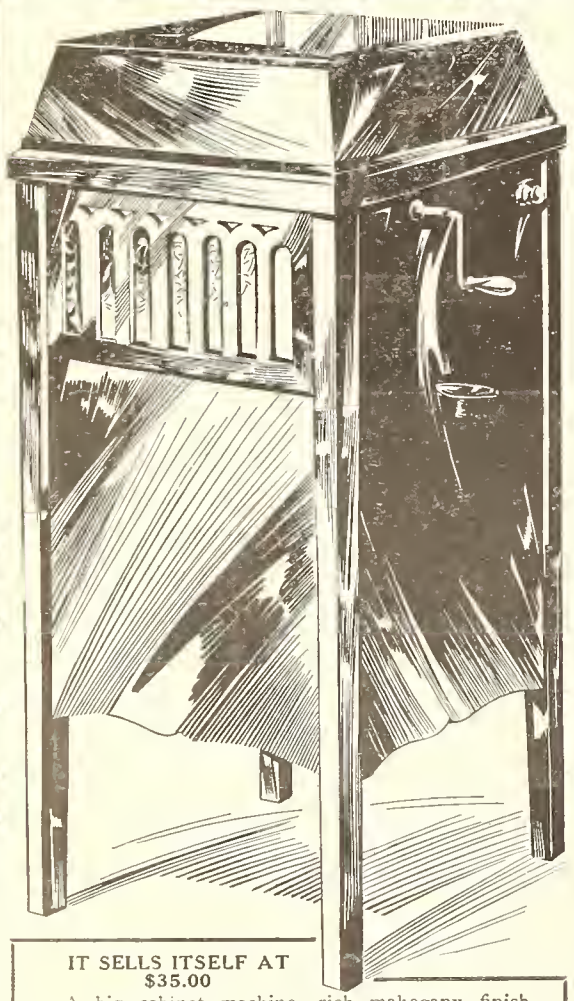
It is reported that the Davis Phonograph Co., of Chicago, Ill., has been incorporated under the laws of the State of Delaware. The incorporators are Meyer Davis, Abraham Davis and Samuel Davis.

STATE STREET SHOP TO HANDLE COLUMBIA EXCLUSIVELY

CHICAGO, ILL., December 9.—The State Street Pathephone Shop, which occupies the busy northeast corner of State and Monroe streets, has changed its name to the "State Street Phonograph Co.," and will handle the Columbia line of machines and records exclusively according to an announcement made to The World today. Complete new stocks of Columbia machines and records have been installed, and on Monday morning formal announcement of the change will be advertised in the local dailies.

"It is our purpose to make this the greatest Columbia store in the World," said Harry K. O'Neill, "and I think we are located and equipped so as to make this quite possible. We are located on a corner which is passed by hundreds of thousands of people every day, but I doubt if there is one in a hundred of those people who is not acquainted with Columbia machines and the great Columbia library, thanks to the Columbia Co.'s advertising. I know that there is something for everyone in the Columbia library, and it is the same way with machines. We start into the work of the holiday rush with the conviction that it will be the greatest ever. We are greatly indebted to the entire local Columbia organization, and particularly to H. A. Yerkes, C. F. Baer and C. R. Ely. All three of these gentlemen were of very great assistance to us in laying our plans.

The State Street Pathephone Shop was organized last Spring and capitalized at $50,000. The officers are Arthur D. O'Neill, president and treasurer, and Harry K. O'Neill, vice-president



IT SELLS ITSELF AT $35.00

A big cabinet machine, rich mahogany finish. Stands 35 inches high, 17½ inches deep and 15½ inches wide.

and secretary. The O'Neills were among the organizers of the Pathé-Pathephone Co., the first of the Pathé distributing houses in the West. After disposing of their interests and taking a handsome profit, they startled the trade and set a record for high rentals in the local trade by securing the present location in the ground floor of the Mentor Building, at an annual rental of $25,000.

CAPITAL NOW $1,300,000

Merger of Chicago Ferrotype and Mandel Mfg. Co. Into Mandel Corporation a Move of Importance—The Parties Interested

CHICAGO, ILL., December 9.—The recent merger of the Chicago Ferrotype Co. and the Mandel Mfg. Co. into the Mandel Corporation, at a capitalization of $1,300,000, represents one of the most striking successes in local commercial history.

Louis Mandel

M. B. Silverman

The growth and popularity of the Mandel phonograph has also been so rapid that a little sketch of the company's history is interesting.

Slightly less than ten years ago Manuel and Louis Mandel decided they saw an opportunity in the manufacture of cameras and photographic supplies, with particular reference to the "instantaneous" finish side of it. The fact that they were without funds did not deter them, and, borrowing a mere $50, they started on their career. Hard work and the application of the most progressive ideas soon resulted in their success, and for some time past the Chicago Ferrotype Co. has been well known in all parts of the country. Since the company's entrance into the phonograph field almost 2,000 representatives have been secured. The ideal upon which the organization embarked in the phonograph industry was "to build the machine from the ground up." believing after ten years of manufacturing experience that no greater service could be offered to the dealer than the service which only the manufacturer of the machine in its entirety could give, and, as a result, the Mandel phonograph carries an "unwritten guarantee' upon every part.

Manuel Mandel

The new merger will enable the Mandel Co. to enlarge its manufacturing facilities and increase its output to a point where it can take care of all the phonograph business offered to it, and, although both of the large Mandel factories are going at full speed and running at 100 per cent. efficiency, the future will doubtless soon call for additional productive facilities.

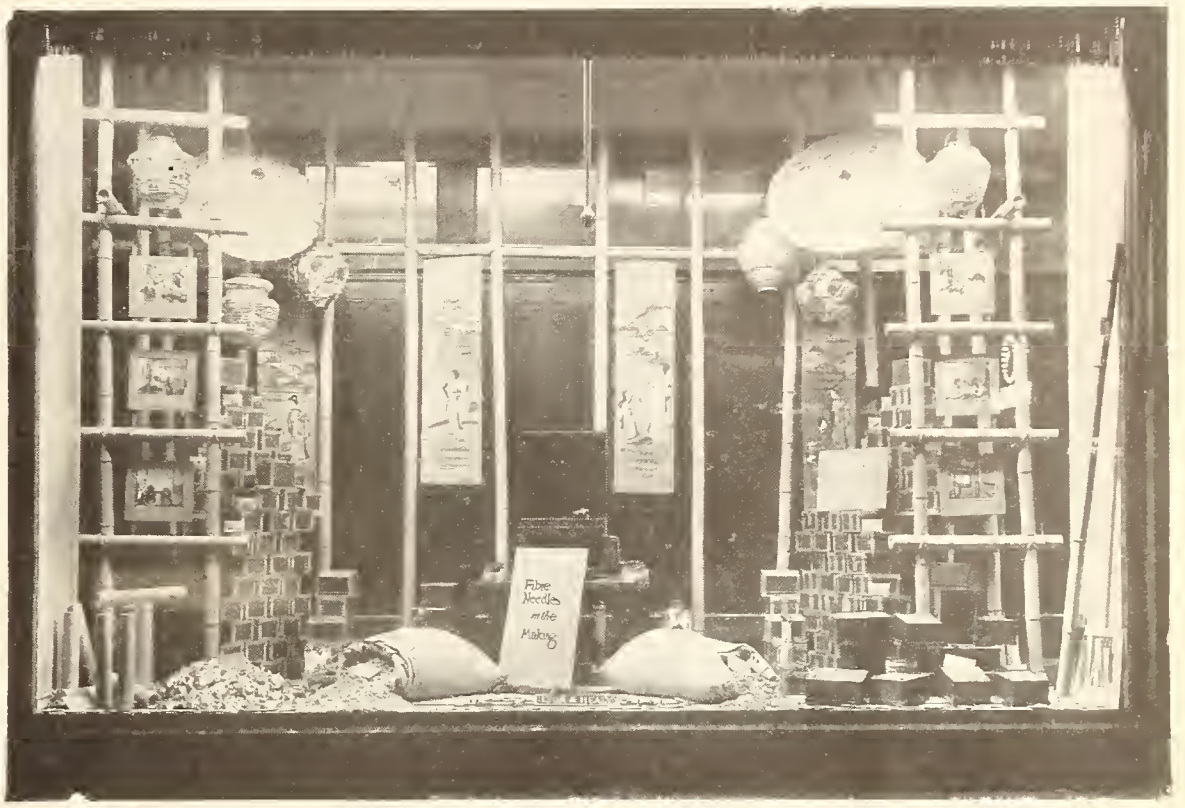
Manuel Mandel and Louis Mandel, the principal officers of the corporation, are devoting their personal attention to the manufacturing organization, with the assistance of able and efficient department heads in their motor department, sound-box department, tone arm department and in their cabinet factory, and by keeping in close touch with every branch of the institution through their department heads, are maintaining the ideals upon which the business is founded.

M. B. Silverman, who has charge of the sales department, has been associated with the Mandel organization since its inception, ten years ago. His aim is to keep in close touch with the men on the firing line and render to the dealer the best possible service that a sales and advertising department can give.

Dealers in the Mandel line have been persistent in their demand for additional models. The Mandel Co. have been unable, on account of the large number of orders received, to attempt the manufacture of new models, but their designers have been busy and have recently submitted new designs for consideration after the present holiday demands have been fulfilled. There will be at least two new models added to the Mandel line next season.

MAKE AN EFFECTIVE DISPLAY OF FIBRE NEEDLES

CHICAGO, ILL., December 9.—Lyon & Healy, for the past two weeks, have had a most attractive display in one of their large windows on Wabash avenue of fibre needles in various processes of manufacture from the crude bamboo pole to the finished product, as shown in the accompanying illustration. The display was rendered more interesting by a series of photographs taken at the factory of the B. & H. Fibre Manufacturing Co., in this city. Japanese lanterns, parasols and bric-a-brac were cleverly displayed throughout. The window gave an oriental and artistic aspect to the whole. The display attracted a large crowd who evinced a keen interest in the evolution of the fibre needle, etc.



Lyon & Healy's Remarkable Fibre Needle Window Display

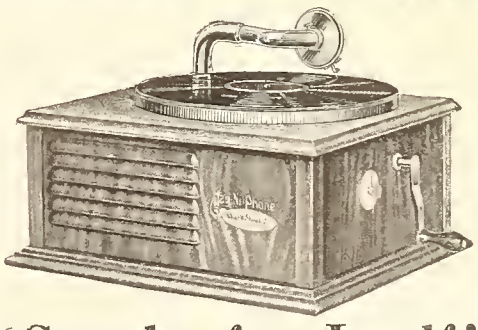
M. L. BORRIS IN WINNIPEG

M. L. Borris, talking machine dealer and inventor, long connected with and well known in the New York trade, is now connected with the Malaton Talking Machine Co., Ltd., Winnipeg, Man., as superintendent of their talking machine factory.

Write to your Congressman at once strongly urging the passage of the Stephens-Ashurst Bill, H. R., 13,568.

Immediate Shipments

Mag-Ni-Phone



The Talking Machine that

"Speaks for Itself"

Send in your late Xmas orders by mail or wire. They will be filled the same day received.
The retail price of the Mag-Ni-Phone is $15.00.

Price to Dealers:

1 to 4 Machines - - -	$10.00 each
5 to 9 " - - -	9.50 "
10 or over - - - - -	9.00 "

F.O.B. FACTORY.

Terms:—2% cash 10 days, 30 days net.

Packed in individual shipping cases weighing approximately 22 lbs. each.

The Mag-Ni-Phone is beautifully finished in genuine mahogany, all metal parts nickel-plated. Equipped with a worm driven motor of our own design—12 inch Turn Table. Tone Arm of sufficient length to play 14 inch records and a genuine mica Sound Box.

The Mag-Ni-Phone plays all makes of standard disc records with such beauty of tone that it not only pleases the general public, but also gratifies the best musicians. One of the chief beauties of this home instrument is the fact that the listener is able to distinguish the individual character of each instrument of an entire orchestra. The Reproducer picks up each tone and over-tone and does not confuse the whole together.

Merchants not handling the Mag-Ni-Phone should write for our interesting proposition.

Stewart Phonograph

$6.50

West of Rockies $7.00
In Canada $8.00

All Dealers Prepare For The Big Xmas Demand

The Stewart Phonograph is going into tens of thousands of homes this Christmas.

Nothing of its kind has ever made such a big, instantaneous hit.

It is just what the buying public has been hoping for and waiting for—a beautiful, practical phonograph at a price well within reach of everyone.

It is that one easy seller that every store needs at Christmas time. Everybody wants it. Your market is as large as the population of your vicinity.

A Stewart Phonograph on the counter, with someone to play it now and then, will sell hundreds for you.

It is the musical wonder of the age, and a beauty, too. It is finished in that rich verde green, the color so often used on high-grade clocks and costly vases.

The moderate price—$6.50—makes it a value unheard of in a phonograph.

Since the announcement of the new and improved Stewart Phonograph in the Saturday Evening Post, October 14th, orders have literally poured in from dealers all over the country.

Stores of all kinds and all sizes are clamoring for Stewart Phonographs to supply the Christmas demand. It doesn't matter what line you are in you can sell Stewart Phonographs. If people come into your store you can sell Stewart Phonographs.

Our big new phonograph plant is now working full swing—night and day. Our mechanical facilities and our manufacturing organization are unexcelled. Our daily production right now runs up into the thousands.

That, and that alone, enables us to build such a sterling, high-grade instrument to retail for so moderate a price as $6.50.

The Stewart Phonograph makes an excellent premium proposition at Christmas time for any kind of a store. We can give you full information on how other dealers are using it as a premium. It's a great business getter.

The Stewart Phonograph plays records of any type, any make, any size or any price. Its universal reproducer, which makes this possible, is a most important advantage from a sales standpoint.

A newly designed tone arm and an improvement in the sound chamber have given the Stewart Phonograph a volume and quality of tone absolutely unsurpassed.

Another big improvement is the new motor, acknowledged to be the best in any popular priced phonograph. Its quietness and smoothness are astonishing. With a single winding it plays two ten-inch records.

There is a stop which works automatically on the tone arm, preventing the needle from swinging across the record when the piece is finished. This prevents gouging or destroying the record.

The time control, exclusive to the Stewart Phonograph, is another big sales feature. Merely by moving a little lever you get any time you want. It is instantaneous.

The demand for the Stewart Phonograph is already enormous. And it is growing.

You can readily see the unlimited market for such a wonderful instrument.

Now is the time for you to order your stock for Christmas. Do not delay.

Every day you lose now means money—big money—out of your pocket.

Remember, we are rushed with orders. We can give you prompt deliveries now, but later it will be "first come first served."

Act quickly—today. Wire or write us for our liberal dealer proposition.

Stewart Phonograph Corporation, 2866 N. Lincoln St., Chicago, U.S.A.

Our phenomenal increase over a very remarkable 1915 business has been very largely in *records*. Naturally, they are great records. And the prices are attractive. And the guarantee is good as gold. And plenty of the records are made by artists that record buyers want to hear and cannot hear anywhere else.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Co.
Woolworth Building, New York

Columbia Records TRADE MARK Note the Notes

ATTRACTIVE MAGNOLA STYLE

Contains Many Important Improvements Which Have Won the Praise of the Trade

CHICAGO, ILL., December 9.—The accompanying illustration of the Magnola, style Louis XVI, No. 150, show some very important improvements in the case construction of the Magnola Talking Machine, especially in the arrangement for filing and indexing records. The Magnola Talking Machine Co. has adopted a filing system for records which is virtually a vertical file, enabling a person to pick out any desired record without the necessity of fussing with albums. This also avoids delay in finding desired records.

Magnola Louis XVI—Open Showing Vertical Filing System Doors for Records and Drop Panel Door in Open Position

The drop cabinet door is also a valuable improvement as it enables one to look right into the machine. This feature also enables the dealer to more fully demonstrate the advantages of the Magnola tone-reflecting system. It is a sort of prolongation of horn and projects tone waves. The drop door may be used as a shelf for records.

Features which have made the Magnola Talking Machine popular are the tone graduator, tone-reflecting system, Universal sound-box and balanced cover.

Since the completion of the two additional stories to their factory, the production of the Magnola Talking Machine Co. has become normal, and the outlook is for a good business during 1917.

"PAN AND HIS PIPES" PUBLISHED

New Volume Issued by Educational Department of Victor Co. Has List of Suitable Illustrative Records Following Stories for Children —An Interesting and Valuable Volume

A most interesting addition to the growing list of Victor literature is a beautiful little volume entitled: "Pan and His Pipes and Other Tales for Children," by Katherine Dunlap Cather, and published by the educational department of the Victor Talking Machine Co.

The little volume has a foreword by Frances Elliott Clark, director of the Victor Co.'s educational department. The stories include: "Pan and His Pipes," "The Tortoise That Gave the World Music," "The Holy Bird," "The Harp King Alfred Played," "Stephen, the Child Crusader," "When Knighthood Was in Flower," "The Violin Makers of Cremona," "A Star and a Song," "The Holy Grail," and "The Song of Hiawatha."

The text is well written and designed to be understandable and thoroughly interesting to the little ones. Each story is suitably illustrated. Perhaps the most interesting feature of "Pan and His Pipes" is the suggestive list of Victor records given after each story. The story of "Pan and His Pipes," for instance, is followed by a list of sixteen selections played on wood-wind instruments, descended from the Pipes of Pan. The story of the tortoise is followed by selections on instruments descended from the ancient lyre. Similarly the story of "The Violin Makers of Cremona" is followed by a list of selections by violin and 'cello, and the story of "Stephen, the Child Crusader," is accompanied by a list of songs and instrumental numbers, played on a variety of instruments such as the mandolin, guitar, etc., descended from the lute which was brought by the Crusaders from the East.

On the whole the volume is interesting not only for the character of the contents, but for the originality that has been displayed in its compilation, and it is safe to predict for it a wide use not only in the schoolroom, but in the private nursary and music room.

In commenting upon "Pan and His Pipes" Mrs. Frances E. Clark, director of the educational department of the Victor Co., said:

"The little book is the result of plans which we have had for two years or more to connect the well-known myths of the discovery of musical instruments with their present day descendants. Everybody knows the myth of the discovery of the membrane tortoise shell which gave us the lyre, but not one person in hundreds ever stopped to think whatever became of the lyre nor to realize that it was metamorphosed into the harp, the spinet, the harpsichord and the modern piano. The same interesting tracing of the pan pipes and the wood wind section of the orchestra and our pipe organ is interesting."

Mrs. Cather, who wrote the stories under Mrs. Clark's direction and plan, is a teacher of English in San Jose, Cal., and has written a number of stories for St. Nicholas and other magazines.

AGAIN MINING MICA IN RUSSIA

Operation of Old Deposits Brought About by the War and Consequent High Prices for That Product—Should Help Talking Machine Trade in Providing Mica for Diaphragms

The war in Europe has had at least one good effect, resulting in the rediscovery of mica in Russia. Before window glass was made Russia supplied the world with mica, and in 1681 was exporting nearly 10,000 kilograms of mica to other countries in Europe and also to America. As the glass industry grew, the demand for mica waned. The mining of it became unprofitable, and deposits were practically forgotten. Before the present war Russia was importing mica from Canada and India. To-day some of the mica beds have been rediscovered in the Mamsky Forest, which are now producing 6,000 kilograms of mica annually. Other deposits are being worked in the Ural Mountains, near Archangel, and also in Siberia.

The fact that the price of mica has risen from $1.50 per pound to $35 per pound has added interest to the work at this particular time.

The rediscovery of mica in Russia should interest the talking machine trade, inasmuch as supplies of mica of the quality necessary for diaphragms has been quite limited at times during the year.

Talking Machine Supplies and Repair Parts

THE RENÉ MANUFACTURING CO.
HILLSDALE, NEW JERSEY

ABOUT DEALER DIPLOMACY

Paull Hayden, of Columbia Co. Advertising Department, Pays Tribute in Verse

The difficulty of the talking machine dealer in catering to the great variety of tastes that one comes in contact with in the talking machine store, has been delightfully set forth in verse by Paull Hayden, of the advertising department of the Columbia Graphophone Co. Mr. Hayden's verse, which was published in the "Columbia Record" under the heading of "Dealer Diplomacy," reads as follows:

Irving Berlin and Beethoven,
Schumann, Von Tilzer, Bizet;
"Love Me at Twilight," Aida,
"At the End of a Perfect Day";
Casals and Marguerite Farrell,
Opera, dance—believe *me*
To handle the lot in a single shop
Is dealer diplomacy.

Drum, violin and piano,
Baritone, orchestra, bells,
Jolson and Kathleen Parlow
Unite in a "Medley of Reels,"
"Beautiful Isle of Somewhere,"
"On the Beach at Waikiki,"
To sell at all to each and all
Is *dollar* diplomacy!

CATERING TO SOUTHERN TRADE

Crescent Sales Co., New Orleans, Organized to Handle Accessories in That Section—Plan to Block Out Country in Territories

The Crescent Sales Co. has been recently formed for the purpose of catering to the Southern trade, especially in accessories. The headquarters will be at 228 Chartres street, New Orleans, La., and will be under the management of J. Henry Blache. This company for the present will be equipped with the Crescent machines, but will confine their activities entirely to the sale of parts and accessories. Dealers desiring the general line of machines will save time by getting in direct touch with the New York office of the Crescent Talking Machine Co., at 89 Chambers street.

The Crescent Sales Co. now have offices in Chicago and New Orleans. Inquiry shows that their policy is to block out the United States into selling territories. The Pacific Coast is the next territory they plan to cover with offices either in Denver or Ogden as the critical points. They are even now contemplating issuing to persons interested a general agency in one of these cities to handle not only machines but tone arms, sound boxes, etc., as well.

I AM THE TALKING MACHINE

The talking machine has, of course, inspired a great many thoughts of a literary sort. Among the latest is a piece of prose poetry by Charles E. Byrne, who is well and favorably known in music trade circles. It runs as follows:

I am the Talking Machine.

The jewels of Music are the treasures I bring you.

From my heart comes the tenderest lullaby—the sacred hymn—the melody of romance—the song of songs.

To the young I tell of happiness, of fondest longing, of hopes fulfilled and thrilling conquest.

To the old I give comfort and sweet contentment and golden hours, in which the memories of the past arise through the mists of enchantment.

The noblest impulses awaken at my call.

Inspiration, the passion to achieve and the thrill of Ambition are born of the dreams that my minstrelsy weaves.

I am the heart's desire—the faithful companion of all mankind. Castle and cabin resound with my singing.

My voice enthralls the ruler in the palace and delights the pioneer in the depths of the wilderness—for it is the voice of Friendship.

Children claim me as their comrade, because of the goodness and gladness and laughter I install in their hearts.

I am the herald of Enlightenment, I bear the torch of Learning and lead the way to Culture.

My message is Cheerfulness, Entertainment and Education.

I am your obedient servant—The Talking Machine.

Copyright, C. E. Byrne.

VICTOR NUMERICAL RECORD LIST

Newest Volume Lists All Records Up To and Including November Supplement

The Victor Talking Machine Co. has just sent out to the trade the numerical list of Victor records dated November, 1916, and including all records up to and including the November supplement. The list makes up a volume of 228 pages and is so arranged and indexed as to facilitate the finding of any particular desired record.

The numerical list follows closely the issuance of the regular Victor catalog for use of machine owners, and with it has been sent out advance information regarding records to be omitted from the May, 1917 edition of the Victor record catalog, and for the information and convenience of dealers.

WORDS OF PRAISE FROM LAZARO

Famous Tenor Comments on the Fidelity of the Columbia Recordings of His Voice

The Columbia Graphophone Co., New York, is now featuring in its newspaper advertising the following letter written by Hipolito Lazaro, the famous Spanish tenor and Columbia artist, whose first Columbia records were announced recently:

"The Columbia records of my voice made in your laboratory under my exclusive contract with you are truly wonderful in the fidelity of their reproduction. In justice to your company and the American public I make the statement that the only records that reflect my present ability as a singer and give a true reproduction of my art are the Columbia records I recently made.

"The records I sung for another company more than five years ago were made when my voice was immature and are unsatisfactory to me. Columbia records are the only perfect reproduction of my voice. Very truly yours (Signed), Hipolito Lazaro."

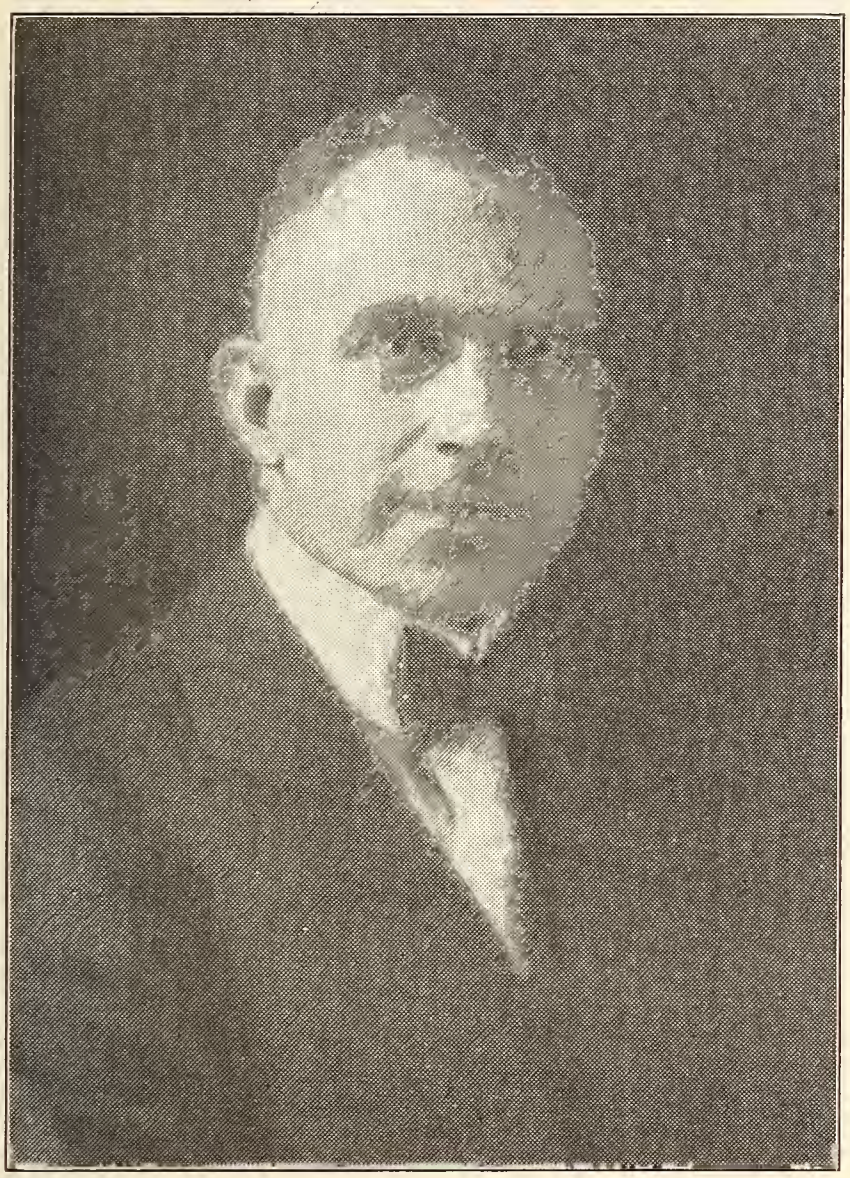
John Jay Ross has opened a very attractive talking machine store at 422 Geary street, San Francisco.

Talking Machine Dealers should write at once to their Congressmen urging strongly the passage of the Stephens-Ashurst Bill, H. R. 13,568, providing for maintenance of retail prices on trade-marked articles.

THE COLLEGE MAN IN THE TRADE

Success of Roy J. Keith, of Chicago Talking Machine Co., and Other Men of Organization Proves the Value of College Training

Arthur D. Geissler, vice-president of the New York Talking Machine Co., New York, and the Chicago Talking Machine Co., Chicago, Victor distributors, a college man himself, maintains that college men have at least as good chance in business life as the average beginner. In his New York organization there are five college men, each one of them have battled through a rough training siege—before even being allowed to demonstrate their sales



Roy J. Keith

ability. In the Chicago organization there are also five university men. Two of these men spent a good many months with the broom, hammer and nails in the shipping department before starting their cruise upwards through the various departments preparatory to selling goods.

One of the shining examples of successful college men in the talking machine business is Roy J. Keith, sales manager and a director of the Chicago Talking Machine Co. Mr. Keith graduated from that famous California University, founded by Senator Leland Stanford. Always a man active in college interests and athletics, president of the class of 1903, the year he graduated, and the leader of the musical clubs, it seemed quite natural upon his return to his home in Chicago his interests, instead of following the profession in which he graduated—law—should have turned to a more active field.

About this time Arthur D. Geissler went to Chicago to take charge of the Chicago Talking Machine Co. Mr. Keith and Mr. Geissler were fraternity brothers in college. Mr. Keith, fascinated by the tales of wonderful successes and business possibilities of the Victor, begged to be permitted to forget his legal inclinations and to enter the talking machine business. That was eleven years ago, and Mr. Keith has certainly "made good."

He has always maintained that the chief asset in his success has been his ability to go into a dealer's store and actually advise with him on the smallest details of the business. He maintains that this is the day and age of efficiency playing the main part in the sale of Victor goods; that the day of the old slap-bang sure-shot-closer as a salesman has passed; that the young man with a knowledge of actual detail of the business, particularly the record end of the business—who can go into the dealer's store and take an actual inventory of the record stock—suggest cutting down here on certain numbers and adding there on others, and at the same time be able to make suggestions on various systems, sales letters, advertising campaigns and, above all, instilling in the dealer's mind not how little down can be accepted on a machine sale, but how large a first payment can be demanded and how cash sales and charge account sales may be made, is the type of salesman who will eventually win the business for his employer.

Mr. Keith very modestly claims that any success he may have made has been through the continued aid of Mr. Geissler and the co-operation of Daniel Creed, his partner in the management of the Chicago Talking Machine Co.

PETE'S VOICE IS BROKEN

He Grieves Over the Loss of the Record Containing an Original Song by Himself

Pete is sad and lonely. Likewise he is a pessimist, and not even the best efforts of his friend, Curator Raymond L. Ditmars, of the New York Zoological Park, serve to cheer him up. Pete is the best Hullock gibbon in the New York Zoo. Until about a year ago, he was very downcast and longed for companionship. Mr. Ditmars, after listening to Pete sing a mourning song every hour in the day, finally managed to get a talking machine record of the anthropoid ballad and entertained Pete by allowing him to listen to himself.

To the somewhat undeveloped mind of Pete the "canned" music brought the impression of his native climes. Pete was decidedly happy with the phonograph, learning to operate it and treating himself with the weird sounds. So much, however, did Pete use the record of his own voice that it began to show signs of wear, and last week it was broken.

Mr. Ditmars is now perplexed regarding how to replace the record. Pete, despite his disappointment at losing his companion's voice, has not yet become disconsolate enough to sing his mourning song again and is just sulking. He shows no interest in the spectators or in his food.

In the hope that Pete will again feel moved to song, a phonograph has been placed in position prepared to make another record. The keepers have been instructed to start the machine when Pete begins tuning up.

R. H. Stowell, of Florence, Mass., recently opened a talking machine store on Center street, Northampton, where he is carrying a full line of Sonora and Columbia machines and records. He reports that prospects for a heavy holiday trade are unusually promising.

THE PATHEPHONE IN CONCERT

The Pathephone was strongly featured recently at a concert given by Jacob Doll & Sons' branch in Jersey City in connection with the opening celebration of Christmas Land in that city. The concert attracted an audience that packed the recital hall to capacity, and the records featured included those by Muratore, Grace Hoffman, Thomas Egan and Anna Fitziu.

THE TRADE IN NEW YORK CITY AND VICINITY

A record-breaking holiday business is being closed by all members of the local talking-machine trade. This condition, while very gratifying, was not unexpected, as the sales of machines and records during the past few months established totals which augured a banner Christmas trade. This prosperity is general, the smaller dealer in the residential section securing just as large a share proportionately as the twenty-five booth departments in the leading department stores.

The shortage of machines has been embarrassing in many instances, although large shipments of the most sought for models are expected to reach the local market a few days before Christmas. The manufacturers have been handicapped by the lack of adequate shipping facilities, and recent rulings of the Interstate Commerce Commission in connection with the loading and unloading of cars have not helped the situation. The manufacturers, however, are to be congratulated upon their unceasing efforts to help their distributors and dealers in every possible way.

The record situation continues to give reason for optimism and good-cheer. The great majority of record orders being received by the distributors are being filled in their entirety, and it is pleasing to note that the better class of records, particularly the records made by famous singers are enjoying unusual popularity.

Remarkable Christmas Advertising

The past few weeks may be justly termed as an "advertising spree," on the part of the talking-machine manufacturers and dealers. Every local newspaper has carried talking-machine advertising that in volume and character is far beyond the publicity efforts of any previous year. Rotogravure pages in the leading newspapers, black and white pages featuring records by famous artists, other advertisements devoted to certain types of machines and pages listing the names of local dealers have all made their appearance the past month, and have acted as a powerful stimulus to machine and record sales in the local trade. From an advertising standpoint, this talking-machine publicity is entitled to commendation from every angle, as practically every advertisement used by the talking-machine fraternity bears the stamp of "quality and prestige." There is a noticeable tendency on the part of the leading manufacturers and dealers to pay more attention to the musical and educational functions of the talking-machine, and this tendency is reflected in the artistic character of the 1916 holiday season advertising.

Prosperity of the Victor Trade

A visit to the local Victor distributors furnishes a remarkable tribute to the progress and activities of the Victor dealers in New York and adjacent territory, as every Victor wholesaler is working day and night to take care of the demands of his dealers. For the past year there has been a shortage of Victrolas in practically every type and finish, and with the advent of the holiday season, this scarcity has, of course, been more pronounced. The distributors, however, have left no stone unturned to get a sufficient supply of machines for the immediate needs of their dealers, and during the past week, particularly, good-sized shipments of Victrolas have been forwarded to Victor dealers in this territory. The call for Victor records has reached unheard of sales totals, and the Victor situation in New York at the present time furnishes conclusive proof of the co-operation and assistance which the Victor Co. is rendering to every member of its vast sales organization. Among the Victor distribtuors whose activities are indicated in the hustle and bustle of their establishments are the New York Talking Machine Co., Blackman Talking Machine Co., C. Bruno & Son, Inc., Silas E. Pearsall Co., Inc., G. T. Williams Co., American Talking Machine Co., and others.

Columbia Wholesale Activities

At the wholesale offices of the Columbia Graphophone Co., 83 Chambers street, New York, District Manager Bolton points to the loaded trucks as the best sign of the prosperity and activity of Columbia dealers. During the past few months, every Columbia Grafonola received from the factories has been shipped from the sidewalk the moment it was received at the Chambers street establishment, and in many instances shipments have been made direct from the railroad terminals. The Columbia Co. has materially increased its factory facilities the past few months, but even these extra facilities have not been sufficient to take care of the requirements of Columbia dealers. The local advertising campaign sponsored by the Columbia Co. has produced innumerable Grafonola sales for the dealers, who are enthusiastic in their praises of the practical efficiency of this campaign. There has been a tremendous demand for the Columbia records made by Lazaro and Barrientos, and the latter artist's records, which were only announced a few weeks ago are apparently destined to achieve country-wide popularity.

Comparison Recitals Prove Successful

At the Edison Shop a number of comparison recitals have been held before capacity audiences. Miss Gladys Rice, well-known soprano and an Edison Diamond Disc artist, appeared recently at the Edison Shop auditorium, and gave an interesting comparison recital in conjunction with her Edison Diamond Disc records. The new Edison art models which are on display at the Edison Shop have been admired by music-lovers from all sections, and these models have been the center of attraction at the warerooms. A recent full-page advertisement in one of the Sunday newspaper presented a group photograph of these art models, and extended an invitation to the public to see these instruments whenever convenient.

New Pathé Dealers

The Pathé line has been making very gratifying progress in local territory the past few months, and a number of prominent stores have arranged to handle the Pathé line in their phonograph departments. Senior & Co., one of the leading uptown department stores, is one of the latest additions to the ranks of Pathé dealers, having opened attractive Pathé warerooms the past month. Pye & Co., a prominent Bronx furniture house, has been conducting an extensive advertising campaign in behalf of its Pathé line, which has been productive of excellent results. This advertising has featured both the Pathephone and Pathé discs.

Local Sonora Campaign

The real spirit of Christmas has been apparent in all of the publicity used by the Sonora Phonograph Corp. the past few weeks. A recent page in one of the Rotogravure sections illustrated every model in the Sonora line, interwoven with an artistic holly border. This advertising, which won the approval of the local trade, was thoroughly in keeping with Sonora quality, and listed the addresses of the Sonora retail establishments in New York, Boston and Philadelphia.

Active in Civic Affairs

The residents of Brightwaters, L. I., recently held quite a celebration in honor of the incorporation of Brightwaters as a village. J. Newcomb Blackman, president of the Blackman Talking Machine Co., Victor distributor, was a prominent factor in the successful culmination of these civic activities, and was congratulated on all hands upon the manner in which he handled this important project.

TRADE BRIEFLETS

The Haag Cabinet Co., of Wilmington, Del., has been incorporated for the purpose of manufacturing talking machines, cabinets, and records, with a capitalization of $100,000.

The Ideal Music Co., 29 Market street, Poughkeepsie, N. Y., has just completed extensive alterations to its store, making it one of the finest Victor sales rooms in that section of the country.

J. Ed. Howe, of New Orleans, La., has recently been appointed local distributor for the Stewart Phonograph.

H. H. Houston, trustee for the Houston Phonograph Co., bankrupt, of Houston, Tex., has been authorized and directed to pay a final dividend of 6¼ per cent. on all claims against the estate.

Seems like more machines than we know what to do with—doesn't it? You know there are not enough to even begin to take care of our orders, but there is always this one redeeming feature—every dollar's worth is allotted direct to you, Mr. Dealer.

"AMBEROLA ANDY" THE LATEST

New Character Created to Bring Home to Edison Dealers Methods for Handling the Retail Trade—A Typical "Andy" Story

There is a new member of the large family of fictional commercial characters and including such well-known personages as the "Gold Dust Twins," "Phoebe Snow," "the Campbell Kids" and "Velvet Joe." He is "Amberola Andy," who was created for the purpose of impressing dealers in the New Edison Amberola with the underlying ideas of good Edison salesmanship. "Andy," who made his debut in the pages of the November number of the Phonograph Monthly issued by Thos. A. Edison, Inc., sells the Amberola in "Littleburg" and his experiences are designed to acquaint other dealers with how the work may be done most effectively. "Andy's" first experience is the conversion of the parson's wife to an appreciation of the possibilities of the Amberola and is told as follows:

"AMBEROLA ANDY"

He Converts the Parson's Wife

D'y know thet a Amberola dealer, even in a little one-hoss place like Littleburg, hez a chance to get'a lot'a entertainment out'a his store and to do whut might be called a good merchandisin' in a big place. I don't pat myself on the back much fur my dealin's, but once in a while I kind'a put a good one over, as the feller says. I kind'a enjoy figurin' out how to get people int'rested in Amberolas and Blue Amberols 'cause I knew thet if I once gets 'em to see somethin' in the insterments or records thet strikes 'em in the right way, I've as good ez made a sale. Y'h can't get a'quainted with a person by seein' 'm and you can't get a'quainted with goods by just lookin' at 'em. Fur ten years I walked up and down the streets of Littleburg only noddin' to Sim Davis. Akchully, I thought, most'a the time, thet he wuz sort'a stuck on hisself and, though I try not to hate nobody, I couldn't allus conceal my dislike fur Sim. And I never knew nothin' about 'im! Then one time we both went to the Democrats' Barb'cue and got set side by side. Well, we hed a good dinner and some refreshments and th' fust thing y'h know we wuz talkin' and chatterin' away ez though we allus hed been the best'a friends. I found he wuz int'rested in the same things I wuz and that he was just t'e kind'a feller I had been wantin' fur a friend. Thet's the way it goes. I hed allus looked at the bad side of Sim, but arter I got to know 'im, darned if I could see any bad side.

Thought Rag Devil's Music

Th'other day the parson's wife come in to get some records. I knew just what she would want. It would be some sacred solos or quartets or somethin' like that. I ain't saying thet that ain't good music and thet there ain't a lot'a pleasure in listenin' to it. I like it myself. But that wuz the only kind that the parson and his missus ever bought and I allus hate to see people hev records all of the same kind. To me all kinds'a music are good and beautiful and t'seems to me that everybody should try to hear and enjoy all kinds of it. Listenin' to one kind'a music is like eatin' one kind'a grub. It ain't natchral and it's goin' to make anybody tired of music mighty quick. I kind'a felt that the parson and his wife wuz gettin' tired of their Amb'rola 'cause they hadn't been buyin' many records. I wuz really 'sprised to see her comin' in at all. It struck me all of a sudden thet if I only could sell her some good lively rags, whut a change it would make in her and the parson. But I knew thet both of 'em thought thet rag-time wuz the invention of the Devil. Rag-time wuz the music thet people danced to, and that alone would'a kept it out'a the pars'nage. The Rev. Ebenezer Larkin wuz the kind'a parson who believed in gettin' his parishioners into heaven by scarrin' 'em away from 'tother place and anything thet was lively or enjoyable seemed to him to have some connection with the Devil.

Self Punishment

He wanted old hymns along with his old religion and he and the missus wouldn't even buy records of the latest Billy Sunday hits. Said thet they sounded like saloon songs. All they bought wuz the slowest and most saintly songs they could pick out and when they played 'em they would run the Amb'rola at the slowest speed they could. Then they'ed set with solemn faces list'nin' to the music. The way they looked, you'd think it wuz punishment fur them—and I guess it wuz. But some people enjoy inflictin' sufferin' on themselves and I guess thet must'a been the way with Parson Larkin and his missus. How I did long to fix up some deal on 'um so thet when they thought they hed some slow old hymn on the Amberola, it would start and play some snappy rag that would make 'em get up and do one of these rag-time dances. I used to think about such a thing until it made me most die laffin', but I knew I could never do it.

Andy Gets An Idea

I don't know how it ever happened thet I had this "Yaaka Hula Hickey Dula" thing when the parson's missus came in the day I'm talkin' about, but I did. When she gets herself sat down and all adjusted I tells her that I has a new record on the Amb'rola thet I would like her to hear. And I started it up.

Ez soon ez she hears the first few notes she kinda' stiffens out like a cat with a fit.

"That is one of them dance records, Mr. Simmons," she says. "I guess I won't listen much to that. You can put on something quiet and refined and sacred."

Then I happened to have a bright i'dee. I had read somethin' in the Phonograph Monthly about Hawaiian music bein' old hymn tunes that taken to Hawaii by missionaries and then taken by the natives to play on these here guitar-like things they plays. I stopped the instrument.

"That's Hawaiian music," I says, startin' to take off the record. "The tunes of most of the Hawaiian songs, wuz tak'n from old Methodist hymns thet the sacrificin' missionaries took there years and years ago. The natives learned these gospel songs and they used to sing them at services the missionaries held. Then they began to play 'em on their guitars and make up songs in their own gibberish, and finally they made 'em into what most people now think is real Hawaiian music."

Missus Larkin perked up considerable.

"What did you say the name of thet song was?" she asked.

"Yaaka Hula Hickey Dula," I told her.

"They don't sound like Scriptural characters," she said with a kind'a puzzled look on her face. I bet she was runnin' over the Old Testament to find out if any of them wuz the sons of Jabeth or some of them other old-timers.

"It's the music thet wuz taken from the old hymns," I says. "I don't know much about the words."

"Well, you might start it again," she says in a kind'a unconcerned way. "If there is any hymn music in it, it must be good."

Converted

So pretty soon the strains of thet old fox trot song wuz comin' out in fine shape. As she heard them, she nodded her head up and down as though she was approvin' of it.

"It sounds just like hymn music," she says at last. "I don't approve of them words exactly, but then you don't have to listen to them. I guess I'll take thet record. Have you any more of them Hawaiian hymn tunes?"

I got out all the Hawaiian records I hed in stock and I'll be swanked if I didn't sell her every one of 'em. I could see thet she wuz just hungerin' fur somethin' new and when she got a'quainted with Hawaiian music from the right angle she got ez friendly with it as I am with Sim Davis. I met the parson next day—he saw me before I could get out'a his way. But he surprised me by tellin' me thet those were fine records that I hed sold Missus Larkin, though it wuz a shame to put such triflin' words to sacred tunes. But, when I wuz goin' past the pars'nage later in the day, I hears his solumn baritone voice floatin' out:

"Ya-a-a—k-a-a H-u-u-u-la-a-a Hic—e-e-e-e Du-u-u-u—l-a-a," he wuz singin'.

And I bet he wuz havin' the time of his life, even if he did feel a little bit wicked about it.

And th' next Sunday, when I wuz just dozin' away comfortable in church, I hears the parson's voice say:

"And Yaaka went over into the land of Hula—"

I woke up with a start, in time to see the parson kind'a blush and check hisself and say:

"The next hymn will be No. 244, 'On Thet Beautiful Island Over There.'"

SALES EXECUTIVE

A sales executive, who has been associated with the piano industry for twenty-four years is planning to enter the talking machine field January 1st.

He has called upon dealers for fifteen years, understands their problems and policies and can develop and increase business as a sales executive for a high class, responsible talking machine company. First class references can be furnished. Address Box No. 2, care of The Talking Machine World, 373 Fourth Ave., New York.

TROOPS DRILL TO DOMESTIC MUSIC

Pennsylvania Militiamen Use Talking Machine to Advantage on Mexican Border

PHILADELPHIA, PA., December 11.—When the Tenth Pennsylvania Infantry left for the Border some months ago, there went with them as a Captain, Thomas D. Anderson, a brother of George B. Anderson, one of the directors of the Domestic Talking Machine Corp. The latter at once took advantage of the opportunity to present to the soldiers a Domestic Talking machine to provide music for the dreary hours.

Marching to "Domestic" Music

After reaching the Border, Companies M and L of the Tenth Regiment were sent on detached duty to Boquillas, Texas, ninety miles from the railroad. As the companies had no band with them, the Domestic talking machine was fitted to a wheelbarrow and used to supply music for drill purposes. The accompanying photograph shows the companies lined up with the Domestic being wheeled in front of them. The fact that the machine was used in the open air for several months without damage speaks well for the quality of its construction.

The Artofola Talking Machine Co., Springfield, Ill., has been incorporated with a capital stock of $10,000 by M. J. Hewlett, J. H. Feltman and J. J. Nieger.

A permit has been granted for the erection of a new dry kiln at the plant of the Victor Talking Machine Co., Camden, N. J.

Columbia Records TRADE MARK Note the Notes

PROGRESS IN THE TALKING MACHINE TRADE DURING 1916

Unprecedented Development of Business During the Past Year—How the Trade Has Been Strengthened and Enlarged—Special Attention Being Paid to Record Exploitation

With every branch of the talking machine business unanimous in stating that 1916 has been the best year in the history of the industry, there are one or two features of the year's activities which stand out as the predominating factors in the wonderful progress of the past twelve months.

During 1916 there has been a gradual appreciation of the value of co-operation as applied to the talking machine industry. The manufacturer has evolved new ideas for the benefit of his distributors, and the latter in turn have studied the actual problems confronting the dealer, and by serious thought and consideration to these problems, have been able to give the retailer invaluable assistance.

The jobber or distributor no longer considers that his mission is completed when he has delivered the merchandise to the dealer's establishment, but the modern viewpoint is now based on the idea that the distributor is a link in a merchandising chain that is completed only when the dealer shows a profitable turnover on his merchandise.

Many of the distributors have sent members of their staffs to work with the dealer in the actual sale of his merchandise, and assist the dealer in keeping his stock at a proper level; eliminating doubt and uncertainty, and removing the possibility of over or under-ordering. Display cards of real artistic merit, selected lists of records, window hangers, etc., are included in the present day ideas of co-operation.

How the 1916 Record Trade Developed

The old and time-worn proverb: "'Tis an ill wind that blows nobody good" is well exemplified in the activities of the talking machine trade the past year. The ill wind consisted primarily of a shortage of machines which has been current the entire year; a shortage that has included every style and type of machine, and which even continued throughout the summer without abatement. This scarcity of machines, provoked, of course, many complaints from the dealers who had planned to concentrate their energies on the development of machine business. The manufacturers pointed out, however, that the shortage of machines was something far and beyond their control, as the factories were working day and night to take care of the dealers' demands; more machines were being turned out than during any year in the history of the industry, and new buildings constructed the previous year were in practical operation. In other words the shortage of machines was one of those conditions colloquially termed a "circumstance beyond our control."

Twelve months ago the leading manufacturers prepared themselves to handle a record-breaking machine business. New departments were added to the already mammoth plants, new buildings were erected, and in short, every possible step was taken to handle an increased business during 1916. This increase soon materialized, but by the first of March it had so far exceeded expectations that all the elaborate plans made the previous years were found inadequate to cope with the demand.

With this condition an actual fact, the manufacturers gave serious thought to alleviating the situation along different lines. They made a careful investigation of their record manufacturing resources, and were pleased to learn that the tremendous increases which they had made in their record plants in 1915 would enable them to make their 1916 output far and beyond the 1915 totals.

100 Per Cent. Records

They thereupon decided to give their dealers 100 per cent. record service, if such a thing was possible, and with that end in view, commandeered every available vacant room in the record plants, and installed new machinery with experienced workmen. The results soon become apparent, and the distributors and dealers were gratified to find that their record orders were being filled on practically a 100 per cent. basis.

The new supplements were the subject of extended conferences and thought, and as each month's records were announced, the trade was delighted to find that the new selections represented the "cream" of the available music. Standard and popular selections of indubitable sales possibilities were included in the different supplements, and the dealers were quick to realize that the manufacturers were placing within their reach a series of records that far out-distanced any previous year's offerings.

With the record output established, the manufacturers and distributors joined hands in preparing plans which would enable the dealers to achieve record sales totals commensurate with the quality of the records, and which would act as a powerful stimulus to future record business. National advertising was prepared, which concentrated on the record division of the business, sales helps were conceived which talked "records, records, records," and a campaign was commenced which made itself felt in every section of the country.

The Beneficial Effects of the Record Campaign

The results of this campaign soon became evident, and the distributors thereupon determined to assist the dealer in a manner which would insure his reaping the deserved benefits of the manufacturers' publicity. "Dead" stock, which had been lying on the dealers' shelves for several years, was unearthed, and instead of littering the shelves with this class of stock, the dealers commenced to pay close attention to their record orders, and install "system" in their record departments. Card indices were installed, which showed at a glance the purchasing capabilities of an individual patron. Other systems were developed which practically eliminated the bugaboo of over-stocking records, and to their great surprise, many dealers found that they had been losing many record sales as a direct result of under-ordering.

The most powerful influence of the record campaign was the impression made upon the general public, who, in previous years had not been the subject of such an intensive record campaign. A taste for the better class of records among talking machine owners whose former limits were popular and dance numbers is one of the lasting results of this campaign, and dealers in every section of the country are using space in their local newspaper to feature the records of a celebrated tenor, soprano, or violinist. If nothing else had been accomplished in 1916, but the development of public appreciation of the better type of records, the year could be considered a signal success, but there have been many other achievements which make 1916 a monument to the energy and progressiveness of the industry.

Add An Art Model To Your Line

Art Model Phonograph Open—Showing Filing Device

That Your Dealers Can Retail at $100

WE are now ready to furnish talking machine manufacturers with a table-style talking machine that has previously been offered, only at art model prices—$300 and upward. We have enlarged our factory tremendously the past few months, installed the latest types of machinery and can furnish this cabinet to the manufacturer ready for the installation of motor sets, at a price that will enable his dealers to retail this machine at $100.

This phonograph is also a handsome piece of furniture and can be utilized as a serving table, which by lifting the lid is converted into a phonograph.

THIS new art model will be equipped with the finest record holding device which has ever been conceived. The handling of clumsy albums is eliminated, patented push button or shelving devices are done away with, and a minimum of space is required to hold a maximum capacity of records.

This system is built on a level with the turntable and tone arm so that the user will not be obliged to bend down and search beneath the sound chamber for a desired record. This in itself is a valuable talking point for your dealers.

We are also prepared to install this record storing device as illustrated, in any style of floor cabinet machine

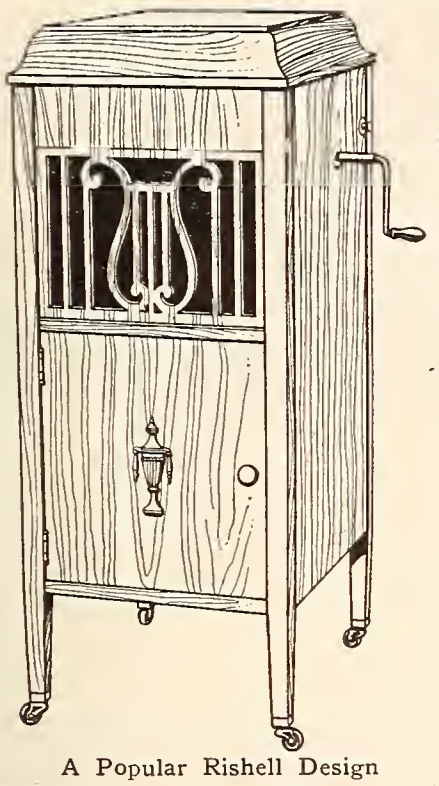
PLACING DUPLICATE ORDERS

Pleasing Proofs of the Satisfactory Qualities of the Phonographs Being Placed on the Market by the Rishell Phonograph Co.

Williamsport, Pa., December 8.—"We are more than pleased with the results we have secured in marketing our phonographs," said Ralph T. Smith, secretary of the Rishell Phonograph Co. "The most gratifying feature of our business has been the fact that our dealers have placed many duplicate orders, indicating the



A Popular Rishell Design

satisfaction that our machines are giving in general.

"Some of our customers have been placing their orders by long-distance telephone in order to receive them in time for the Christmas season, and in many instances we made our shipments by express to avoid any unnecessary delays.

"We attribute a considerable measure of our success to the fact that our cabinets embody the best class of workmanship and the best materials that we can secure. Our forty-nine years' experience in furniture and cabinet business has enabled us to furnish our dealers with cabinets that cannot fail to attract the favorable attention of their patrons.

"The violin sounding chamber in our phonograph has also won the enthusiastic praise of our dealers, and, in fact, we have received many letters from our representatives expressing their high regard for the tonal qualities of our phonograph.

COLUMBIA SOCIAL NEWS

Miss Wanda Hilborn, for two years a member of the educational division of the Columbia Graphophone Co., New York, was married on Thanksgiving Day to Julius Asherman, at the home of her parents, Mr. and Mrs. Louis Hilborn, 545 West End avenue, New York. Mr. and Mrs. Asherman are at present away on a honeymoon down South, and upon their return will reside in New York.

While associated with the Columbia educational department Miss Hilborn rendered invaluable co-operation to Columbia dealers throughout the East in the development and expansion of their educational activities. Conversant with every angle of this special work, Miss Hilborn was able to assist Columbia representatives in a practical, result-productive way.

C. W. Wolfe, a member of the advertising department of the Columbia Graphophone Co., New York, was married a fortnight ago to Miss Anna E. Pierre, at the home of the bride's parents, 203 West 131st street, New York. To properly celebrate his entrance into the ranks of benedicts, Mr. Wolfe was a host to the members of the Columbia advertising division at an enjoyable wedding luncheon.

SWINDLER GETS LIFE SENTENCE

Charles E. Ackron, Convicted of Selling Talking Machines of Doubtful Origin as Victrolas, Goes to Sing Sing as an Habitual Criminal.

Charles E. Ackron, who was arrested some time ago in Brooklyn, N. Y., on the charge of securing money under false pretenses by advertising and selling as Victrolas machines labelled "Victoria" and made in a New York factory, was convicted after a short trial and was sentenced on Monday of this week to life imprisonment in Sing Sing. The extreme sentence was due to the fact that it was Ackron's fourth conviction for a felony, which carries with it a life term as an habitual criminal.

The conviction is expected to discourage the operations of a growing number of what in some lines of trade are called "gyp" dealers, who sell instruments from private homes and under misleading statements regarding quality and value. Only recently another man in New York was fined $25 under the misleading advertising law for making fraudulent claims regarding the talking machines he sold. The newspapers and advertising clubs are on their trails and fraudulent dealers will probably find things a little too warm for comfort.

LOUIS STERLING TO LONDON

Louis Sterling, general manager of the European interests of the Columbia Graphophone Co., sailed for London Saturday on the "St. Louis," after spending several months in this country. While here Mr. Sterling received optimistic reports from his associates abroad, indicating that the Columbia Co. is closing a healthy business on the other side of the Atlantic.

J. C. Ray, of the Columbia Co.'s executive offices, returned to his desk Monday, after a ten-days' stay down South.

ENLARGE FACTORY FACILITIES

The Presto Phono Parts Corp. has recently enlarged its manufacturing facilities materially to take care of the demands of its trade. Harry Davis, secretary of the company states that large orders have been received for sound boxes, tone arms, needle cups, etc., from prominent manufacturers. Associated with Mr. Davis in the management of this company is Otto Paschkes, well known in the talking machine trade.

L. D. ROSENFIELD WITH COLUMBIA

Appointed Sales Manager of the International Record Division of the Company, Which Is an Expanding Department

In order to handle adequately the fast growing business of the International record department of the Columbia Graphophone Co., Anton Heindl, manager of this department, has appointed Louis D. Rosenfield, sales manager of the International record division.

Although he is still a young man, Mr. Rosenfield is well equipped to cope with all sales problems arising in his new work. He has spent almost fifteen years in the sales and

Louis D. Rosenfield

advertising profession and resigned his position as advertising manager of the New York Herold (one of the leading German newspapers) to accept the proffered position with the Columbia Graphophone Co.

Mr. Rosenfield will personally look after the sales of Columbia foreign records, and will be ready at all times to co-operate with any member of the Columbia Co.'s vast sales organization. He will travel extensively, and give practical assistance and service to Coulmbia dealers in developing foreign record business.

It may be interesting to note that thirty-four languages are now recorded in song and music under the supervision of Mr. Heindl. The International record department of the Columbia Co. has shown tremendous increases in sales the past year, due to the splendid quality of the records produced, and the efficiency of the sales and manufacturing organizations.

WORTHINGTON WITH CONDON CO.

Prominent Talking Machine Man Joins Condon Organization—Well Posted on General Trade Conditions and Esteemed in the Industry

The Condon Autostop Co., New York, manufacturer of the "Noset" automatic start and stop, has made a number of changes in its organization, some of which will be announced later. During the past few years it has frequently been rumored that the Standard Oil Co. is planning to enter the phonograph industry, and more recently it has been stated that the Condon Auto-

Everett Worthington

stop Co. was affiliated with these interests. E. T. Condon, Jr., president of the Condon Autostop Co., has not denied this affiliation.

Identified with the present Condon Autostop organization is Everett Worthington, who leaves shortly for an extensive Pacific Coast trip in the interests of the company's products, which will include "Noset" and other products to be announced later.

Mr. Worthington recently resigned from the Victor Talking Machine Co., and prior to joining the Victor forces was associated with Sherman-Clay & Co. on the Pacific coast, where he distinguished himself in various departments.

In 1914 the Victor Co. engaged him to design, erect their exhibition, the "Victor Temple," and represent their interests as manager of the Panama-Pacific International Exposition. In this capacity he again distinguished himself and won many commendations from the members of the talking machine trade.

Mr. Worthington is a close observer of trade conditions and a student of advertising and publicity. He has covered in the past twelve months over 25,000 miles, calling upon the trade in various parts of the country. As a result, he has compiled an efficiency system for use in sales promotion for the talking machine trade, covering in detail sales methods, store service, advertising and general creative publicity.

NEW JOBBERS OF MAJESTIC RECORDS

Jaques M. Kohner, general manager of the Majestic Record Corporation, returned to New York on December 11, after a ten-day trip to the Middle West. Mr. Kohner said he had made arrangements with numerous jobbers in Chicago, St. Louis, Detroit and other Western cities to handle the distribution of Majestic Records in their territory. In speaking of conditions in the West, Mr. Kohner said business was never better and Majestic Record distributors were going to take advantage of it.

STEPHENS BILL BROUGHT UP

Congress Grants Hearing on Price Maintenance Measure—Some Arguments in Its Favor

Edmond A. Whittier, secretary-treasurer of the American Fair Trade League, announced early this week receipt of a telegram from a member of the House Committee on Interstate and Foreign Commerce reading: "Committee at its meeting to-day granted hearings on Stephens Bill (H. R. 13,568) for next Thursday and Friday."

This action is understood to be in fulfillment of the agreement made at the close of the last session of Congress by which the Stephens Honest Advertising Bill was scheduled as the first measure to be given consideration by the committee at the beginning of this session.

Friends of the measure are arguing that the use of standard products as advertising bait to sell anonymous bulk goods at highly speculative prices contributes, in no slight degree, to the present oppressive cost of living.

It is stated that in spite of rising costs of materials, not only in food products, but in practically every line of household necessity, goods bearing the maker's name have not advanced in price. Supporters of the Stephens Bill insist that the stability of price which branded goods are showing in the present greatly inflated market for unidentified bulk goods makes an unanswerable argument for the bill's speedy enactment as a matter of vital interest to the consuming public.

STEADILY INCREASING OUTPUT

J. B. Ogden Enlarging Facilities to Take Care of Demand for His Sectional Record Cabinet And Sales System—Holiday Greetings

LYNCHBURG, VA., December 11.—J. B. Ogden, manufacturer of the Ogden Sectional Record Cabinet and Sales System, announces that he is steadily increasing his manufacturing facilities in order to take care of the constantly growing volume of business, yet he has been hard put to handle without delay orders that have poured in within the past few weeks.

"I want to extend sincere holiday greetings to the many dealers throughout the country who have so loyally supported me during the past year," said Mr. Ogden, "and am planning to show my appreciation by making much better deliveries of a greatly improved product after January 1."

FINAL DIVIDEND PAID

Harry H. Houston, trustee for the Houston Phonograph Co., bankrupt, Houston, Texas, has sent to those holding claims against the concern a second and final dividend amounting to about 6 per cent.

W. C. Cammett and Herbert W. Watts will open a piano and talking machine store at 154 Fleet street, Portsmouth, N. H.

THE EDISON SHOP IN SYRACUSE

New Home of Frank E. Bolway & Son, Inc., in That City, Handsomely Decorated and Arranged—Convenience a Leading Factor

SYRACUSE, N. Y., December 11.—The new Edison Shop, which is the home of Frank E. Bolway & Son, Inc., in this city, has an interior furnishing which is in every way comparable with the impressive front of the building that was illustrated in The World last month.

The first picture shows the long suite that

Entrance to Edison Shop

greets the eye on entering the Shop. This beautiful hall is finished, for the most part, in soft grays, rich pinks and dull gold. The period furniture, which is that of the early Renaissance, is neatly offset by the handsome art lamps which are placed at comfortable intervals down the entire length of the Shop. The plan of alternating a lamp, a Diamond Disc phonograph and

Artistic Treatment of Record Racks

a place to sit down, is a triumvirate in very excellent taste, as it divides the main room of the Shop into what might aptly be termed "individual units." This means that the salesman and a particular customer or set of customers have, as it were, a privacy of their own.

The second illustration shows a treatment for record racks that is decidely artistic and at the same time ideally efficient.

At the end of the long hall is a handsome music room and recital hall, where half-hour recitals by the Edison Diamond Disc are rendered from time to time during the course of each day. This is proving an attractive feature for the many people who are down on Syracuse's most important street during the afternoon. Business with this house is very brisk.

GOVERNOR SPRING WIRE

LUCKY 13 PHONOGRAPH CO., 3 East 12th Street, New York City, wishes to announce

that they are in a position to manufacture and punch out governor springs in any size required at reasonable prices. Send samples and quantity required and we will gladly quote you.

We also wish to announce that we can furnish the following sizes of Main Springs for immediate delivery in large quantities:

5/8 x .025 x 9 ft. 6 in.	7/8 x .022 x 10 ft.
3/4 x .020 x 8 ft. 6 in.	7/8 x .026 x 11 ft.
3/4 x .025 x 10 ft.	1 x .028 x 12 ft.
13/16x .025 x 9 ft. 6 in.	1-1/8 x .027 x 18 ft. 6 in.

Governor Spring Wire in coil, $1.50 per pound in quantity weight.

Some of these springs can be used in many standard motors. If you will let us know what motors you wish springs for, we will gladly advise you what size mainspring can be used.

Write for our 84-page free catalogue—the only one of its kind in America, illustrating 33 different styles of phonographs, eight styles of motors, 500 different parts for various motors and other phonographic parts, such as Tone Arms, Reproducers, Mica, Sapphire Points, Rubber Gasket, Stylus Bars, Needle Holding Screws, Speed Indicators, Brakes, Brake Springs, Winding Shaft Springs, Governor Balls, Governor Springs, Winding Handles, Horns and Horn Brackets, Horn Elbows, Regulator Stems, Main Springs, Governor Pinions, Governor Springs, Turn Table Shafts, Turn Tables, Turn Table Cloth, Intermediate Gears, Spring Barrels, Spring Barrel Gears, Rubber Washers, Rubber Tacks, Escutcheons, Needle Cups, Waste Needle Cups, Cabinet Hinges, Cover Stays, Cabinet Hardware and Tools for Repairing. Also description of our Repair Department.

AT NATIONAL COUNSELLORS MEET

J. Newcomb Blackman, as Representative of National Association of Talking Machine Jobbers Attends Convention of Division of United States Chamber of Commerce

J. Newcomb Blackman, president of the Blackman Talking Machine Co., New York, Victor distributor, attended a meeting of the National Counsellors of the United States Chamber of Commerce which took place November 17 and 18 at the New Willard Hotel, Washington, D. C. Mr. Blackman attended this meeting in the capacity of National Counsellor of the National Association of Talking Machine Jobbers, which recently joined the United States Chamber of Commerce.

In a recent chat with The World regarding this meeting, Mr. Blackman stated as follows: "I was greatly impressed with the character of this organization, as it represents in my mind the most businesslike body of men of any convention with which I have ever had any connection. This, however, could only be expected, as the National Counsellors constitute representatives from each organization of the various trades and industries.

"I feel that every possible co-operation should be given the United States Chamber of Commerce, for the reason that it is to-day probably the most influential body of business men getting into contact with Congress, and through its deliberations and influence much good can be accomplished and the needed support received and given, which is absolutely necessary if the business man of the country is to get any co-operation comparable with that obtained by the labor union. We must not overlook the fact that the average politician is interested first, in getting elected; second, in keeping elected; third, in the men or organization that can help him accomplish his political desires—therefore he is forced to lend or refuse support when many times he would like to do otherwise."

In an address Mr. Blackman made at one of the association meetings he expressed the thanks of the Victor industry for the influence that he felt was given the cause of the Stephens Bill in the referendum sent out by the Chamber of Commerce which resulted in an overwhelming vote of the organization members in favor of the bill.

"The talking machine industry can be helped and greatly benefited by giving the utmost support possible to the wonderful work being done by this national body, and I hope that every member will vote promptly on the referendum just sent out to the members calling for an expression of opinion on legislation embodied in the following resolution. The committee recommends that there should be remedial legislation to permit co-operative agreements under federal supervision in those industries which involve primary, natural resources on condition that the agreements in fact tend to conserve the resources, to lessen accidents and to promote the public interests.

"The members of our association should vote as promptly as possible on this measure so that their votes can be recorded not later than January 12. This voting of course must represent the consensus of our opinion through our member votes on the subject."

The annual meeting of the National Chamber of Commerce will be held at the New Willard Hotel in Washington, D. C., January 31 to February 2, inclusive, and in view of the many legislative problems being considered now which ought to be of interest to all business men, these meetings should be well attended in order to get results.

MAKING NEW ARRANGEMENTS

St. Paul, Minn., December 8.—The Koehler & Hinrichs Merc. Co., manufacturer of the "Ko-Hi-Ola" combination phonograph and grandfather's clock, has announced that it is now working on a number of important plans, which embody entirely different mechanical arrangements. Their new products will be announced shortly, and should prove of interest to talking machine jobbers and dealers.

INCORPORATED TO MAKE CABINETS

Philadelphia, Pa., December 8.—The Haag Cabinet Co., with executive offices located in Philadelphia, have recently announced the intention to enter the talking machine field as a manufacturer of cabinets. The new company is capitalized at $200,000, and has as its sales manager, E. M. Howard, formerly of the Fergusson Music Co., Newport News, Va.

TO DISTRIBUTE PATHE RECORDS

An arrangement has been effected between the Pathé Frères Phonograph Co. and the Steger & Sons Piano Mfg. Co., Chicago, Ill., whereby the latter will act as distributors of Pathé records in connection with the Steger line of talking machines, which are to be marketed in quantities shortly.

A new room has been added to the Elizabeth Talking Machine Co.'s store at 228 North Broad street, Elizabeth, N. J., which will be used for the demonstration of a complete line of Victor and Columbia machines.

Talking Machine Dealers should write at once to their Congressmen urging strongly the passage of the Stephens-Ashurst Bill, H. R. 13,568, providing for maintenance of retail prices on trade-marked articles. There is no time to be lost.

ing way. The advertising department of the Edison organization reports that already there is a considerable demand for them from dealers in all parts of the country, who appreciate their advertising value.

MOVETTE

Moving Picture Camera

ANNOUNCEMENT

Extraordinary!!

The Movette Moving Picture Camera offers to dealers in Talking Machines an opportunity of money-making that will duplicate and surpass the profits of the Talking Machine business.

This remarkable proposition fits in with the selling plan and organization of Talking Machine Dealers everywhere.

It will be an addition to their business that will amaze them with its instant and continuous success—because everybody will want to own this truly wonderful machine.

The Movette Moving Picture Camera is the most marvelous invention since the Talking Machine. In many respects a greater and more popular one. It embodies 131 patent applications, yet it is so simple that any boy or girl can load and operate it instantly. It is equal in its performance to the professional camera costing a thousand dollars or more. It is trouble proof for the dealer and fool proof for the user. It gives 1600 snapshots, 50 feet of non-inflammable film for $1.50, equal to two minutes upon the screen. And any picture from the film can be enlarged like the ordinary photograph.

Movette pictures are perfect all the time. There isn't an individual man, woman or child, and professional or business men in every walk of life that will not find a fascinating use for this miracle of the Twentieth Century. Who now will want to take lifeless pictures when they can take living pictures? And thirty-two of them in a foot of film for 3 cents. We are convinced there never has been an opportunity for profit such as this wonderful outdoor and home entertainment.

A business building, money making gift to the Talking Machine Dealer and a logical adjunct to his business.

The Movette Moving Picture Camera sells for $29.75 and the projector for $55.00.

Our output is 1200 Movette Cameras a day.

We invite correspondence.

1055 University Avenue, Rochester, New York

COLLECTING ACCOUNTS

Interesting Disquisition on a Subject of Vital Importance to Talking Machine Dealers

"Collecting Accounts" is the title of an interesting article which appeared in the Columbia Record recently, following the valuable talk on installments which appeared previously. This article on the collection of accounts is well worth the attention of the dealers:

(a) Payment Plans.

(b) The follow up.

(a) Payment Plans. The very best arrangement you can make with an installment patron, after definitely deciding upon the dates of payment, is to have him make all payments in your store. There are manifold advantages here. You introduce the personal element. You become better acquainted with your customer and he becomes better acquainted with you. You have ten or a dozen opportunities to make additional record or cabinet sales and keep the account open. The customer has established a habit of coming to your store. Often he will be accompanied by friends—more opportunity! By all odds, if you can have your man make his payments in your store it is to your advantage. In addition you save "collection" expenses and are able much easier to keep the account up to date. If store payment arrangements cannot be made then all depends upon a clear, concise understanding of the payment plans agreed on. This is a most important matter. If you do not expect to see the customer regularly you must make a lasting impression at the initial "payment down." Let your customer know he is entering on a business agreement—he is signing a contract. Explain to him you have payment contracts with your company which you must meet promptly, and it is only a business expectation that he will meet his obligations promptly. This can all be done in a polite way.

Let your man leave your store with a distinct understanding of the date of his first payment. Also it is well to have him know he is to make no payments but to your authorized collector.

(b) The Follow Up. "Everything comes to him who waits" was not spoken of the installment account. Never wait in collecting arrears. Never let arrears collect. If the first payment is not made on the date set call the next morning. If unsuccessful call in the afternoon, call again the next morning. Call regularly, relentlessly. The most obdurate case will improve under this treatment.

A successful "follow up" system must be system. Have collection cards indexed and filed for reference. Go over the complete index daily. Have your collector divide your territory into routes. Have him report to you daily on the status of every over-due account.

By initiative—action—and business-like regularity and promptness in following payments, your installment accounts can be made one of the productive phases of your business.

The vast majority of people are honest, businesslike, well intentioned, and these people will respond to a business-like, well intentioned follow up on their installment accounts.

Do this and success is yours.

REPRODUCER THIEVES ABROAD

Hecht Bros. Suffer Loss of Eleven Grafonola Reproducers in a Single Afternoon

Hecht Bros., who conduct a large department store at 53-57 West Fourteenth street, New York, advised The World that on December 6 between the hours of 2 and 4 p. m., eleven reproducers valued at $5, were stolen from machines in the Grafonola department, conducted by the company. The reproducers were stolen while not less than five sales people were in the department. Hecht Bros. are anxious to hear from other local concerns who have had reproducers stolen under similar conditions, together with any facts regarding persons whom such concerns suspect, believing that concerted action may serve to put a stop to the trouble. The department is under the management of Howard S. Hecht.

The Hammond-White Manufacturing Co. was incorporated in Delaware this week to manufacture sound recording machines, with a capital of $1,000,000. C. A. Cole, R. A. Van Voorhis and A. R. Oakley are the incorporators.

PREPARED FOR CHRISTMAS TRADE

Victor Co. Issues Many Advertising Folders and Window Hangers to Aid the Dealer in Securing a Full Share of Holiday Trade

The dealer in Victrolas and records cannot attribute any dearth in holiday business to the fact that he did not have the material wherewith to advertise the Victor products in his store, for the Victor Co., as has long been its custom, has taken care of this matter most effectively this year. For the dealer's window the company recently sent out some elaborate posters and hangers with the holly of Yuletide conspicuously present. The material includes a large poster with a holly wreath border in colors and showing the words: "There Should Be Music in Every Home on Christmas Morning." To go with this there is supplied a striking strip in red and gold with a holly decoration at one end, bearing the Victor slogan: "Will There Be a Victrola in Your Home This Christmas?" "His Master's Voice" trade-mark is also supplied, set in the center of a holly wreath.

For the attention of record buyers, there is provided two handsome posters for window displays, one listing forty-nine records, particularly appropriate to the Christmas season, and taken from the general catalog, together with sixteen special Christmas records from the German catalog. The other poster also gives a list of Victor records for Christmas taken from the foreign catalogs of the company, including Bohemian, Slovak, Swedish, Finnish, Italian, German, Danish, Norwegian, French and Spanish numbers.

With this wealth of material comes a suggestion for a Christmas window display, whereby the posters and other features may be used to the best advantage.

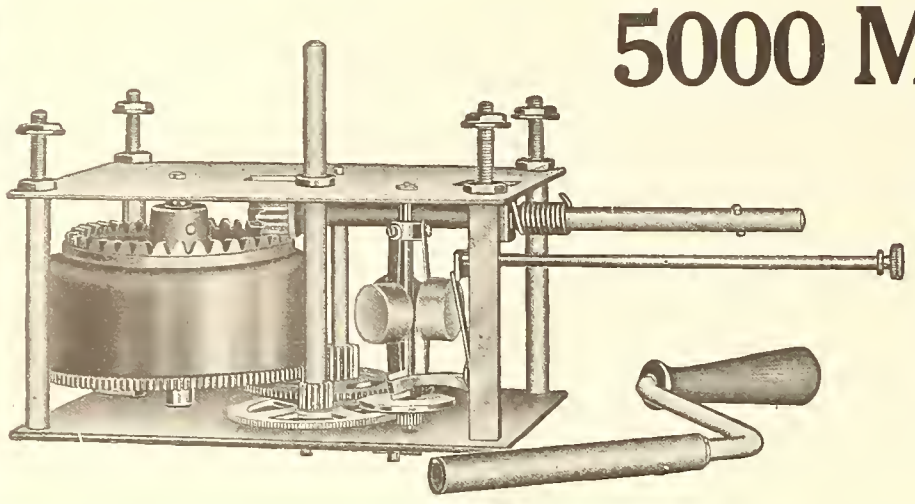
For the use of the customer the Victor Co. has sent out a special lithographed Christmas folder showing the full range of Victrola styles in natural colors. The cover page of the folder shows, through a snow encased window, a family group arranging presents on Christmas Eve, with a Victrola prominently in the foreground.

A second folder features the Victrola IV, together with a specially selected list of records, and a third folder is devoted exclusively to Victor records for Christmas.

With the window signs and the folders, combined with a little energy, the dealer should have everything he requires to stimulate an unusual holiday business, and it must be remembered that Christmas is only three weeks off.

To Make Room For Our New Lines We Offer

5000 Motors at $1.05 each



These motors are single spring, straight gear, and made of brass and steel; the governor gears made of brass and fibre; with each winding they will play one record. 'MUSOLA' LATEST AEOLIAN PRODUCT

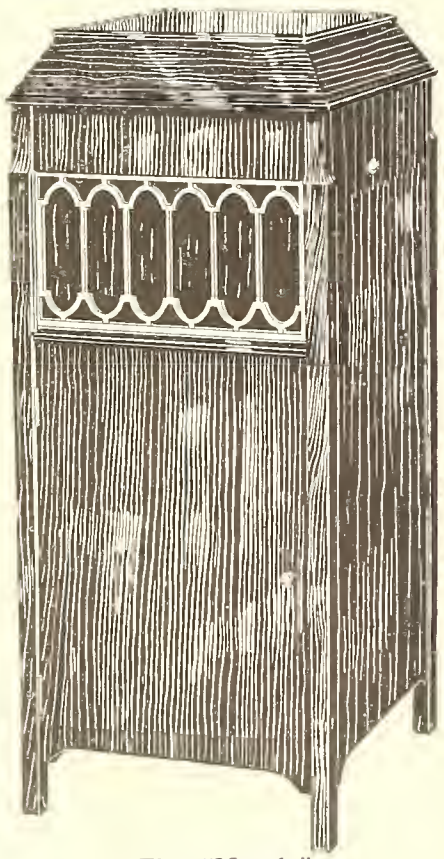
New Model Talking Machine Announced to Sell for $55—Some Features of the Machine

The Aeolian Co., New York, has just announced the addition to its phonograph line of a new machine named the "Musola," which will retail at $55. This new machine was advertised in the local newspapers this week, and, judging from all indications, it will be a pleasing success.

In a full-page announcement the Aeolian Co. called attention to the features of the "Musola" as follows:

"For many months the problem of producing



The "Musola"

a talking machine of large cabinet size and of excellent tonal capacity, yet at a very popular price, has been under consideration by this company. Of course an instrument of this type, to justify the support of the Aeolian name and guarantee, had to display real merit—genuine musical worth. A year ago the construction of such an instrument within reasonable price limits seemed hopeless. Nevertheless it is to-day an accomplished task.

"We announce the 'Musola,' a new Aeolian-made talking machine. All important parts of the 'Musola' are made in the Aeolian Co.'s own factories. In the design of every detail and the supervision of every step of construction, the same mature skill and scientific knowledge have been employed that have created the many other famous Aeolian musical instruments.

"The 'Musola' is equipped with an improved sound-box and tone arm which produce a fine, full, sweet tone from any standard make record, whether of the lateral cut or hill-and-dale type. The tone amplifier or horn is scientifically correct in material and proportions. It delivers a large tone volume, very true and natural in quality.

"The 'Musola' motor is of the Swiss type. It is one of the sturdiest and most reliable talking machine motors ever made. The high quality of this motor is an indication of the severe standards to which every important 'Musola' part has been made to measure up."

ISSUE NEW RECORD CATALOG

Both Seven and Nine-Inch Discs Listed in New Book Issued by the Majestic Record Corp.

The Majestic Record Corporation are now distributing their new catalog, which contains the list of both their seven-inch and their new nine-inch records. Jaques M. Kohner, general manager of the concern, has had prepared display cards and store hangers in order to assist the Majestic dealers in calling the attention of the public to the new nine-inch catalog as well as the seven-inch. The hangers are of a very attractive style, devised to be conspicuous and also attractive. Many dealers have complimented the Majestic Corporation on the addition of the new nine-inch record to their catalog, feeling there will be a big demand for a record which will average over four minutes and sell at a popular price. Orders for the last two months have been very heavy, but shipments have been made promptly, according to the management, and they look for a still heavier demand during the holidays.

Write to your Congressman at once strongly urging the passage of the Stephens-Ashurst Bill, H. R., 13,568.

SOME BRIEFLETS FROM ST. LOUIS

Columbia Co. Headquarters in That City Sets Some New Business Records

St. Louis, Mo., December 11.—Irby W. Reid, Columbia manager, was in high spirits after he had looked over the business reports during his absence in the East. While East he stopped at Washington to attend the golden wedding anniversary of his parents, then went to the Columbia executive offices in New York and visited the factory.

Wholesale Manager C. R. Salmon is exceedingly optimistic over the prospects of the Columbia holiday trade. "We are getting a deluge of orders," he said, "and we are making fairly good deliveries. The conditions in the country appear to be entirely favorable to an immense trade, and the record demand in the smaller towns is surprising.

"Arkansas, Kentucky and Tennessee, especially, are making records in the consumption of machines to be proud of. Our traveling men, J. J. Bennett and E. G. Neighbors, are signing a surprising lot of new dealers, and they report everything set for a big season after the holidays."

Ben Philipps, retail manager at the Columbia, reports a tremendous business in the Lazaro records. The only trouble with them, he says, is the difficulty in keeping up the stock. Collections are very good, Mr. Philipps reports, and the demand is running chiefly to higher priced machines.

The best bit of news concerning Mr. Philipps was volunteered by the young woman who is chief assistant in his department. It was that last month a fine boy arrived at his home.

THE VICTOR IN RURAL SCHOOLS

Comprehensive New Volume for the Information of School Authorities and Teachers Just Issued by Victor Co.—A Big Help to Dealers

The Victor Talking Machine Co. have just distributed among its dealers a most attractive and comprehensive eighty-four-page booklet entitled: "The Victor in the Rural Schools," which is expected to give great support to the work of the educational department of the company. A copy of the booklet has been mailed to each State superintendent of instruction, and to each county superintendent in the United States, as well as the heads of all Normal and Training Schools, and it is strongly suggested that the dealer place a copy in the hands of each country school teacher in their vicinity, copies of the book being supplied to local distributors.

The booklet contains information regarding the use of the Victor in the rural schools, how it helps the teacher, initial and supplementary list of records for school use, rote songs, teaching exercises, folk songs, selections from oratorios and operas, lists of instrumental music, artists, and fifty test questions.

ENTER THE GABEL-OLA

CHICAGO, ILL., December 10.—The Automatic Machine & Tool Co., 210 North Ann street, this city, is putting on the market the Gabel-Ola, something very unique in the way of an automatic machine for the home. The distinctive feature of the Gabel-Ola is that it is self-operating. Twenty-four lateral cut records, both ten and twelve inch are placed in the instrument. A starting button is pressed and all of the records are played without the slightest attention by the owner. The idea is to enable the arrangement of an entire evening program which can be proceeded with without further attention, the host giving his time to his guests. Any one of the twenty-four records can be selected and played as desired by the manipulation of an unique selective device. The instrument can be operated by a switch from any room in the house. The instrument places a record on the playing disc, plays it, returns it to its place, at the same time placing another record on the playing disc, all without the touch of a hand. The tonal effects of the Gabel-Ola are excellent, and the case designs are decidedly artistic and symmetrical. They are finished in three attractive styles.

THIRD CLASS RATE FOR RECORDS

Freight Classification Committee Heeds Protest of Talking Machine Men Against Changing Records From Third to Second Class

CHICAGO, ILL., December 11.—L. C. Wiswell, chairman of the traffic committee of the National Association of Talking Machine Jobbers, announces that the official classification committee has granted the protest of jobbers and manufacturers against the proposed increase of freight rates on records in carload lots from third to second class. The present third-class rating is retained. A carload rating has also been given on machines in cars of 16,000 pounds minimum of second class.

SWAMPED WITH HOLIDAY BUSINESS

Schloss Bros., prominent talking machine cabinet manufacturers of 637 West Fifty-fifth street, New York, report a demand from the trade for cabinets for the holidays that has practically swamped their facilities, despite the fact that the company recently secured additional space in the same building with a view to increasing their output.

"We have called in our salesmen," declared Edwin G. Schloss, manager of the company" because we felt that it was not fair to solicit new orders when we were hard put to take care of the demand for our regular trade."

George W. Case, Jr., has resigned as secretary, director and patent council of the Pathé Frères Phonograph Co., New York. Mr. Case will resume the practice of patent law, and has opened offices at 55 Liberty street, New York.

ALL DEPARTMENTS UNDER ONE ROOF

Improved Facilities Provided for the Manufacture of Operaphone Records—The New List

With all their various departments, with the exception of the general offices, under one roof, the Operaphone Manufacturing Corp., manufacturers of the Operaphone records, has prepared to take advantages of trade opportunities during the new year. The concern has moved its recording and electroplating departments to the building which houses its pressing plant in Long Island City.

The latest record list of the company includes several new operatic and standard selections in addition to the usual offering of popular numbers, and special and attractive hangers and signs are being furnished to dealers to call attention to the new records.

NEW STORE IN CHICAGO

CHICAGO, ILL., December 11.—H. C. Meek, who has conducted the Broadway Pathephone Shop for the last year and a half, first on Broadway, near Wilson avenue, and latterly at 1025 Wilson, has moved the business across the street to the new store, and has changed the name to the Meek Phonograph Co. He has added the Columbia and Edison lines and retains the Pathé. The store is fifty feet deep, about twenty wide, and is fitted up in a most artistic manner in French gray and mulberry trimmings. Handsome draperies and period furniture and a mosaic tile floor add to the elegance of the store. On the mezzanine gallery is a large demonstration room and the office. On the main floor there are three beautiful record rooms. The record stock room provides for 10,000 records.

Although Mr. Meek was this week made manager of the retail Victor department of the Geo. P. Bent Co., it will make no difference in the conduct of his north shore store.

The Ryan & Gruender Furniture Co., East St. Louis, Ill., have taken the Columbia agency.

THE "EDMONDSON"

Style 4—Retail Price $75

HERE is a line of machines that embodies all the desirable features of the up-to-date machine. Cabinet work, motor equipment, tone arm, sound box, etc., are as good as can be secured. We leave the rest to you. A sample order will prove our claims.

Write or Wire Today for open territory

Liberal Trade Discounts

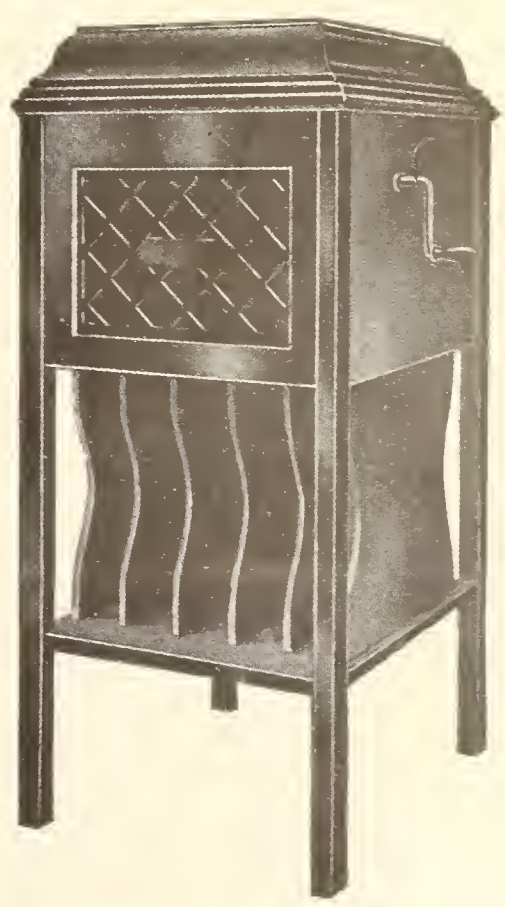
Prompt Deliveries Guaranteed

Style 4

Height 42 inches, depth 22 inches, width 19 inches. Fancy mahogany or oak cabinet, holding 10 Edmondson record albums for 100 records. Latest improved tone arm, heavily nickel plated sound box, automatic stop, indicator, speed regulator and brake, worm-gear, triple spring motor. Plays four records at one winding. All exposed parts nickel plated. Our special variable tone regulator is a feature of this instrument.

Style 3

Height 43 inches, depth 22 inches, width 17 inches. Fancy mahogany or oak cabinet with record compartments. Latest improved tone arm, heavily nickel plated sound box, automatic stop, speed regulator and brake, worm-gear, double spring motor. Plays two records with one winding. All exposed metal parts nickel plated.



Style 3—Retail Price $50

We are equipped to turn out sound-boxes and tone-arms in any quantity

THE MANUFACTURE AND TRADE USE OF DIE CASTINGS

By CHAS. PECK, Chief Chemist and Metallurgist, Doehler Die Casting Co.

One of the notable features of the recent wide development of the talking machine manufacturing trade has been the general demand for and broad use of die castings of the metal parts of machines, such as reproducer cases, tone arms, motor frames and similar details. It has been found that in the long run die castings make for uniformity of parts and incidentally cut production costs, as compared with some other methods. In view of the general use of die castings in talking machines, it is my object in this article to give the readers of The Talking Machine World an elementary understanding of the term "die casting" and also describe briefly the process by which they are produced and which is highly essential to the economical production of the modern talking machine, as well as many parts of other musical instruments such as player-pianos.

Definition

Die castings may be defined as metal castings that have been made by forcing molten metal under pressure, into a metallic die or mold. The castings so produced are accurate and have a smooth finish requiring no further machining.

History

The art of casting metals has been known and practiced since prehistoric times. It is claimed the Egyptians cast metal into molds 4,000 B. C. Their mold was made of stone or baked clay. These types of molds were used during the classic Greek and Roman periods, continued to be used during the Dark and Middle Ages and up to the latter part of the eighteenth century. So called sand molding as practiced to-day began about 1708. The advantage of the sand over the clay method was that the former being porous allowed the air to pass through the mold while pouring insuring solid castings.

The introduction of printing by Guttenberg in 1454 created a demand for a cheap method of producing type, and we find that as early as the sixteenth century metal molds were being used for casting type. Pewter tableware had come into fashion at this time and metal molds were used in casting. Metal molds were also used for casting lead pipe before the modern extrusion method was known and practiced.

The first inception of the die casting process is found in the linotype machine where the metal is forced into a metallic mold by pressure which is produced by means of a cylinder and piston immersed in the molten metal. After the introduction of the linotype machine many attempts were made to apply this principle to the production of machine parts on a commercial basis which met with indifferent success. Die casting as a commercial metallurgical industry was practically established in 1907, when H. H. Doehler patented his die-casting machine which has since been adapted in England, Germany, Austria-Hungary, France and Canada. This machine and process have been improved to a large extent and castings made by this process are recognized as the finest in the art.

Process and Alloys Used

The casting machine primarily consists of a suitable melting pot in which is immersed a cylinder and piston, the whole being heated by gas or electricity. The die or steel mold is clamped to the outlet of this cylinder and the metal is forced into it by means of the piston which is operated automatically. Since the mold is made of a heat-conducting material, the casting chills almost instantaneously, which insures a casting of maximum density, and allows of its immediate ejection from the die, which is also accomplished automatically.

Aside from the machine proper there are two vital factors in the process which are never constant and must be varied in accordance with the requirements of each individual parts. They are:

1—Construction of dies or molds.
2—Composition of alloys used.

Construction of Dies

No set rules can be made for the construction of dies—every piece having its own peculiar shape. To insure uniformly solid castings, the proper location for the gate or metal inlet must be ascertained. Ejector pins to allow for the rapid removal of the casting from the mold must be provided. Dies must also be properly vented to prevent the foundation of "air pockets" in the castings. Besides these fundamental principles there are a thousand and one other minor factors that must be considered if a perfect product is desired.

From the foregoing it can readily be seen that the proper designing of dies is dependent upon knowledge that has been derived by years of experience. For this purpose a staff of well trained engineers must be maintained whose function it is to make a thorough study of this phase of the industry, and tabulate their knowledge and experience for later use.

Where necessary the accuracy of a die casting may be held to without .0010 to the running inch. With this fact in view, it can readily be understood that for the actual construction of these dies, only the finest class of mechanics can be employed. Every die is of different construction and comprises within itself the finest example of mechanical skill. A better understanding of the complexity of the die construction may be gained from the fact that the cost of a single die may vary from $75.00 to $1,200.00, requiring from two weeks to five months' time of a skilled mechanic.

Alloys

The assumption that all die castings are alike is not only erroneous but is likely to lead to considerable trouble. A die casting alloy may be eminently suitable for talking machine parts, but when the same alloy is applied to player action parts, the results are disastrous. Likewise, an alloy may be used for one part of the talking machine with phenomenal success, but is either too soft, too brittle or too weak for some other part.

The specification of the proper alloys must be left to competent and well trained metallurgists who are guided by experience as well as theoretical knowledge, in their decisions. The mixing of the alloys properly also requires expert metallurgical supervision and the raw materials entering into the alloy must be analyzed to ascertain their purity and further guarantee the quality of the product.

Where Die Castings May Be Used

From the comparatively high initial cost of the die, it can readily be seen that die castings can only be used economically where large quantities of castings are required. It is difficult to place any definite minimum limitation on the quantity. Generally speaking, die castings are rarely economical where quantities less than 1,000 are required.

The die casting process cannot compete with the rough sand casting, screw machine or punch press products, but will show a large saving where a number of machining operations are necessary. The castings are delivered finished to blue print limitations, all holes, slots, large internal and external threads, etc., being cast accurately.

In ordering die castings a blue print or model should be submitted. The important dimensions should be marked and limitations given as liberally as conditions will permit, since it must be borne in mind that close limitations means very accurate die work and consequently higher die charge. The functions of the part should be given as should also the physical and chemical conditions surrounding the part while in service. This is to enable the metallurgists to specify the proper alloy.

Die castings when made from the proper alloy may be electro-plated with gold, silver, nickel, brass, etc., without any difficulty.

"Doehler Die Castings"

By the term "Doehler Die Castings" is meant die castings made as outlined in the foregoing article by the Doehler Die Casting Co. This company operates plants in Brooklyn, N. Y.; Newark, N. J., and Toledo, Ohio. Each plant has an independent staff of well trained mechanical, metallurgical and chemical engineers, who make a study of the functions of every part produced, insuring a satisfactory product.

Supremacy of Majestic Records
IN THE
Popular Priced Field Is Undisputed

BECAUSE

25c—7 in. Records (Double Disc)—25c

The tonal quality compares with the best, regardless of price. We have practically eliminated surface noise.

The MAJESTIC CATALOG embraces all that is best in the world's musical literature—Vocal and Instrumental—Classical—Humorous—Secular and Sacred—and all the popular hits of the day.

Our proposition to jobbers and dealers is most liberal and MAJESTIC RECORDS mean quick sales and quick profits.

50c—New 9 in. Records—50c

In our new 9 inch double disc record we give another remarkable demonstration that the MAJESTIC is making the retailing of records a big, profitable business.

WORLD'S CLASSIFIED ADVERTISING

Any member of the trade may forward to this office a "Situation" advertisement intended for this Department to occupy a space of four lines, agate measure, and it will be inserted free. Replies will also be forwarded without cost. Additional space will be at the rate of 25c. per line. If bold faced type is desired the cost of same will be 25c. per line. Business opportunities 25c. per line.

POSITION WANTED—Wish to connect with live concern where opportunity would be given to develop original patentable ideas in connection with talking machines and accessories, or would consider position in charge of manufacturing with above features as side issue. Am a practical man with many years' experience and a thorough knowledge of every detail in connection with the manufacture and installation of spring motors and accessories. Address "Box 380," care The Talking Machine World, 373 Fourth Ave., New York.

LATE OFFICER, director and patent counsel of one of the largest phonograph companies, manufacturing records and machines, thoroughly familiar with industry, will consider an attractive proposition. Address "Box 11," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—A complete file of The Talking Machine World since its foundation some twelve years ago, or a file for part of these years. Send information to "Desirous," care of The Talking Machine World, 373 Fourth Ave., New York.

POSITION wanted by mechanic of experience. 20 years on instrument work. Expert on motor troubles, as repairman, assembler and adjuster of phonographs; have A1 reference from one of the best firms in New York City. Address "Box 381," care The Talking Machine World, 373 Fourth Ave., New York.

EXPERIENCED man in the talking machine business, thoroughly schooled in salesmanship and with experience as manager, desires position with live talking machine dealer—Edison dealer preferred. Address "Box 382," care The Talking Machine World, 373 Fourth Ave., New York.

REPAIRMAN WANTED—Must be thoroughly familiar with both Victor and Columbia motors and capable of turning out the best of repairs on same. Send complete references in first letter. Address Tri-State Talking Machine Co., El Paso, Texas.

SALESMAN, thirty years of age, eight years experience as salesman, competent to produce results, seeks connection, wholesale or retail. Highest references. Address "Box 383," care The Talking Machine World, 373 Fourth Ave., New York.

YOUNG MARRIED man of good appearance and over twelve years' experience in the phonograph business, desires the management of a Victor or Edison department. Prefer the Southern States. A-1 references. Address "Box 372," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION wanted by a young man who is thoroughly acquainted in the Victor products as inside salesman. Capable of furnishing first-class reference. Address "Box 373," care The Talking Machine World, 373 Fourth Ave., New York.

MANAGER—Experienced talking machine man (all lines) desires a change; 33 years of age; seven years with present firm as manager. Will consider managerial duties and permanent place with contract only. Replies confidential. Address "Box 375," care The Talking Machine World, 373 Fourth Ave., New York.

SPECIALTY SALESMAN—(Live wire type.) To handle profitable side line—sold among talking machine and piano dealers exclusively. Big future on repeat business. Write to-day for particulars. Master Manufacturing and Specialty Co., Box 96, Camden, N. J.

FOR SALE—Live Victrola Agency in growing suburb of Eastern city of 500,000 population. Store modernly equipped and well stocked. Good reason for selling. Address 376, care Talking Machine World, 373 Fourth Ave., New York City.

FOR SALE—Fine Victor retail store in business center of Eastern city of half-million population. Store and fittings modern in every particular. An opportunity. Address 377, The Talking Machine World, 373 Fourth Ave., New York City.

POSITION WANTED—By two experts in manufacture of disc records. Thoroughly familiar with latest and best method of recording, electrotyping, pressing and equipments. Address Box 378, care The Talking Machine World, 373 Fourth Ave., New York City.

POSITION WANTED—By all-around repairman, experienced in all kinds of motors, as I have had full charge of motor and assembling department. Address Box 379, care The Talking Machine World, 373 Fourth Ave., New York City.

PHOTOGRAPHS WITH A MEANING

A Pictorial Story of the Wonderful Progress That Has Been Made by the Otto Heineman Phonograph Supply Co. at Its Factory in Elyria, O.—Sets a New Record

In another section of this issue of The World there is presented one of the most interesting collections of photographs that has ever been prepared for the attention of the talking machine trade. This series of pictures, which were "taken" at the factory of the Otto Heineman Phonograph Supply Co., Elyria, O., bespeaks most emphatically the wonderful progress achieved by the talking machine industry the past year, and the phenomenal success attained by the "Motor of Quality," the leader in the group of phonograph parts manufactured at the Heineman plant.

Last April Otto Heineman, president of the Otto Heineman Phonograph Supply Co., arranged to illustrate in the columns of The World a group of twelve photographs which represented the more important departments at the Heineman factory. These photographs attracted the attention of all members of the trade, who were deeply impressed with the magnitude and extent of the Heineman manufacturing resources.

Since April, however, the Heineman business has shown such a remarkable increase, and the demands made upon it have jumped ahead so rapidly, that the illustrations shown at that time are totally inadequate in their purpose, and do not by any means reflect the enormous strides made by the "Motor of Quality" institution. During the past eight months every single department in the Heineman factory has been enlarged considerably, and the net results of these activities are evidenced in the thirty odd illustrations shown in this month's World, which form an amazing example of modern manufacturing proficiency and efficiency.

The average member of the talking machine industry will probably find it difficult to realize that the Otto Heineman Phonograph Supply Co., has been actively associated with this country's industrial affairs for less than two years. To the great majority of phonograph men the name "Heineman" is synonomous with motors, tone arms and sound boxes, and the remarkable success achieved by the company in the short while it has been in business is indeed a tribute to the quality of the Heineman products, and the personal force of the man directing its destinies.

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., who is now recognized as one of the "captains" of the talking machine industry, has made a life-long study of the talking machine field. Although a comparatively young man in point of years, Mr. Heineman has been associated with the production of phonographs for upwards of fifteen years, and there is no phase of the industry which has not received his careful thought and study. One of the founders of the world-famous house of Carl Lindstrom, Berlin, Germany, and for many years its managing director. Mr. Heineman is thoroughly familiar with the history of the phonograph, from its earliest days to its present worldwide fame and popularity.

The success of the Otto Heineman Phonograph Supply Co., is based on the doctrine "quality first," and every motor, tone arm or sound box produced at the Heineman factory is an exponent of this principle. The term "Motor of Quality" was adopted as the company's trade-mark about a year ago, and to-day the "Motor of Quality" trade-mark emblazoned in red on the Heineman letterheads, publicity matters, etc., is a familiar object in all sections of this country, and even abroad.

INCORPORATED

The Goldenstone Needle Co., Inc., New York, has been incorporated with a capital stock of $5,000 to manufacture and deal in patented articles, musical instruments, needles, phonographs, labor saving devices, etc. The incorporators are H. E. Fitzsimons, J. J. Brennan and E. W. Hart.

Chandler W. Smith, of Wollaston, Mass., who is well-known in the piano trade, has opened a talking machine shop in the Norris Block, where he will carry a full line of talking machines and records.

Talking Machine Dealers should write at once to their Congressmen urging strongly the passage of the Stephens-Ashurst Bill, H. R. 13,568, providing for maintenance of retail prices on trade-marked articles.

FORMAL OPENING OF NEW AEOLIAN HALL IN THE BRONX

Handsome Quarters at 367 East 149th Street, in Heart of Busy Section, Both Exterior and Interior of Building Specially Designed—Wm. G. Whitbeck Manager

The Aeolian Co., New York, held the formal opening of its new Aeolian Hall in the Bronx, late last month, and this new establishment was the subject of extensive advertising in the local newspapers.

Aeolian Hall in the Bronx is located at 367 East 149th street, in the heart of the business center, and adjacent to all modes of transit. Architecturally this building follows the general plans of Aeolian Hall in New York and Brooklyn, and the furnishings and decorations are thoroughly in accord with the prestige and standing of the Aeolian Co.

The Aeolian-Vocalion is prominently displayed in this new Aeolian Hall, one entire floor being devoted to the exhibition and sale of these instruments.

William G. Whitbeck is the manager of Aeolian Hall in the Bronx, which is under the general supervision of Thomas H. Fletcher, manager of the Aeolian Co.'s retail interests.

One of the advertisements announcing the opening of Aeolian Hall is reproduced herewith, and this copy traces the growth of the Aeolian Co. from the time it occupied a one-story shop at 831 Broadway, some forty years ago, until to-day when it has establishments in all of the leading countries of Europe and occupies one of the most magnificent buildings in the musical world.

The reason for opening a new Aeolian Hall in the Bronx is well set forth in the following paragraph:

"And now as the expansion of the Greater City has made no longer possible the serving of the thousands of Aeolian patrons from one great metropolitan center, the beautiful Aeolian Hall in Brooklyn is already established, and to-morrow the doors of the new Aeolian Hall in the Bronx will open."

Striking Aeolian Announcement

TAMING MULES BY MUSIC

California Farmer Has Talking Machine Play When He Breaks His Mule Colts

The Colorado farmer who gets more milk from his cows by giving them a dash of grand opera and a bit of ragtime on his talking machine is not a pioneer in this novel field of farm efficiency.

George A. Gage, of Sutter county, California, claims to be the first "musical farmer."

Gage raises mules and horses. He has a big talking machine on his farm and he plays band pieces, preferably soothing melodies and waltzes, when he is breaking his mule colts.

"Mules love music," said Gage. "I discovered that ten years ago when I drove Benjamin Harrison—the orneriest old mule you ever saw—to Yuba City when a brass band was playing.

"The mule had one of his balky, contrary spells that day, and I could hardly do a thing with Benjamin until we got to Yuba City. You'd never believe it if I told you the change just a few band selections made in that animal. From that day until Benjamin's death he was the gentlest, lovingest old mule you ever would want to see.

"That gave me an idea. When I break my mule colts now I always have the talking machine play. It seems to attract the mule's attention from the harness and wagon.

"Horses don't seem to be affected much. But mules are nearer human than horses anyway."

Gage also avers his chickens like talking machine music, but would not go on record as saying ragtime made the hens lay more eggs.

OFFER LEADER FOR HOLIDAY TRADE

"125 Crescent Outfit Complete" Has All Metal Parts Gold Plated—Big Demand for Parts

The Crescent Talking Machine Co., Inc., of New York, reports big business, especially in parts, tone arms, sound boxes, etc. A brisk business is also being done in Canada.

The World representative who called was informed that this company is putting out a holiday leader in the form of "125 Crescent Outfit Complete." "This outfit," said a member of the Crescent firm, "consists of a mahogany cabinet machine, equipped to play all makes of records. The metal parts throughout, including the casters, are handsomely goldplated, and there is also a clever one-hand automatic cover support."

TO HANDLE TALKING MACHINES

The Electrotone Auto Music Co., 127 West Fifty-sixth street, New York, which for several years has acted as local representatives for the J. P. Sceburg line of automatic pianos and orchestrions, have leased additional space adjoining their present quarters and will shortly install a line of straight pianos and talking machines.

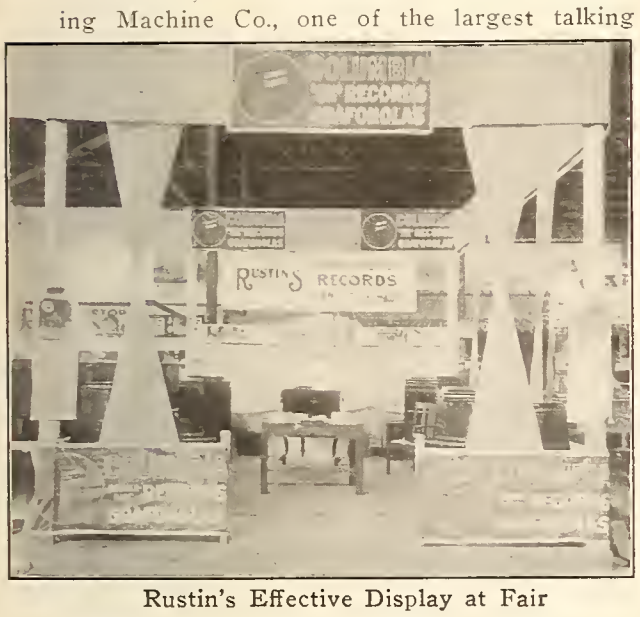
MAKE EXHIBIT AT STATE FAIR

Rustin's Talking Machine Co. Displays Columbia Line at South Carolina Exhibition

COLUMBIA, S. C., December 7.—Rustin's Talking Machine Co., one of the largest talking machine dealers in this State, recently conducted a very attractive exhibit at the Columbia, S. C., State Fair, which furnished excellent publicity for the products of the Columbia Graphophone Co. and produced numerous Grafonola and Columbia record sales.



Rustin's Effective Display at Fair

This company has been handling the Columbia line for sometime past, and through the use of energetic sales methods, coupled with practical service to its patrons, it has been able to rapidly expand its business.

IMPROVE PORTLAND, ORE., STORE

Wiley B. Allen Co. Provide Additional Rooms for Victor Talking Machines and Records

PORTLAND, ORE., December 2.—The Wiley B. Allen Co., of this city, have been making extensive improvements to their store at Broadway and Morrison street.

The new arrangement allows first and second floors for Victor goods, and six new Victor record rooms and several machine salesrooms.

Manager James L. Lorder predicts an unprecedented holiday trade. Business to date has broken all previous records, and Mr. Loder finds demands for Victrolas, styles XI and XIV, exceed the supply. Also, an increasing demand for Victrola, style XVIII, electric.

ROBBED COLUMBIA FACTORY

Watchman and Pals Get Away With Parts Valued at $50,000—Arrested

BRIDGEPORT, CONN., December 8.—Charged with being members of a gang working as employes of the American Graphophone Co., who looted the factory of electric motors, records and talking machine parts, valued at more than $50,000. Timothy Sullivan and Royal Saph were arrested here last week. Sullivan admitted his guilt.

Sullivan was employed as a watchman in the factory, and it was his custom to pile the goods outside of the window for his accomplices to remove in dress suit cases. It is estimated goods valued at $2,000 were carried away in one night. The police are endeavoring to discover where the goods were sold in New York.

FIGNER MANOIL SUPERINTENDENT

Promoted From Assistant Factory Manager of Plant Where Manophone is Manufactured—Has Had Wide Talking Machine Experience

Arthur Figner, who as announced some time ago in The World, became assistant factory manager of the James Manoil Co., Newburgh, N. Y., is now superintendent of this plant. Mr. Figner has devoted most of the years of his life to the practical end of the talking machine business, having at one time been connected with the Columbia Graphophone Co., and also other talking machine manufacturers. He has not only made a close study of manufacturing methods, but particularly the producing of tone arms and sound boxes.

He also comes from a family which has been interested in the talking machine business for many years, having an uncle, Gustave O. Figner, of Sao Paulo, Brazil, who is agent for the Columbia Graphophone Co. in that country. Another uncle claims to have been the first man to have brought the phonograph to South America; while still another controls a certain patent on records in Brazil.

SAME OLD STORY IN KANSAS CITY

"Victrolas, Victrolas, Victrolas," the Cry, Declares Schmelzer Arms Co.—Closed Tremendous November Business, Says A. A. Trostler

KANSAS CITY, MO., December 4.—The Schmelzer Arms Co., Victor distributors, state that it is the same old story, Victrolas, Victrolas, Victrolas, with dealers flocking in and telegraph and telephone wires humming in an effort to get some sort of a machine with the Victor name on it to satisfy the retail trade.

A. A. Trostler, manager of the talking machine department of the company, states that he has about decided to move his office to a dark corner of the cellar where no one can reach him for the next thirty days, before he loses his reason entirely.

"We have closed a tremendous November," declared Mr. Trostler, "and when the curtain rises on 1917 we will have closed the most prosperous year in the history of the Schmelzer Arms Co., which is more than gratifying, to say the least, and 1917 promises to be still greater."

Write to your Congressman at once strongly urging the passage of the Stephens-Ashurst Bill, H. R., 13,568.

AN ORIGINAL WINDOW DISPLAY

Southern California Music Co. Shows Edison's Laboratory in Store Window During Recent Edison Week—An Interesting Home Scene

Los Angeles, Cal., December 2.—During the recent Edison Week, the Southern California Music Co. had one of the most interesting window displays featuring the Edison product ever seen in this city. The display was under the direction of W. H. Richardson, manager of the Edison department of the company, and was entered in the window display contest.

The most striking scene was labeled: "From Edison's laboratory to your home," and occupied one of the main windows with a frontage of thirty feet. The scene represented Edison's laboratory at Orange, N. J., with the details usually associated with such a laboratory. Mr. Edison himself was impersonated by Mr. Titus, of the Fox Film Co., and the faithfulness of detail served to excite enthusiastic comments from the hundreds who stopped to inspect the display closely.

In a window on a placard was given a short history of Mr. Edison's exploits in the phonograph field since 1878. Another sign read: "This display represents a corner in Mr. Edison's laboratory where he invented and perfected his most famous inventions, the best known of which are: the Incandescent Electric Light, the Cylinder Phonograph, the Motion Picture Machine, and the Diamond Disc Phonograph, the instrument which re-creates music." There was also on display in the window a model of the first cylinder machine invented by Mr. Edison which used tin foil records.

Another scene occupied the same width of window space showing the living room of a typical high-class home, with a mother and two small children being entertained by an Edison Disc phonograph. One child was being taught to operate the instrument, while the other was seated on the floor playing with Edison disc records, thus demonstrating their indestructability.

Edison in Laboratory as Window Display

The caption of the display read: "Let your family enjoy Mr. Edison's wonderful re-creation of music." A picture of the laboratory scene is reproduced herewith.

TALKING MACHINE WINS OVER FORD

Family Council Decides That Talker Would Be Best for All Hands.

St. Louis, Mo., December 5.—This rather interesting story is told by a man who was rapidly reaching the point where there was to be some money to spend for the benefit of the family. The question as to what the family would most like to have had been discussed several times, and finally it was put up to all members, three children and the parents, at the dinner table. The question rapidly narrowed down to a $250 talking machine or a Ford automobile. The discussion at this point got very interesting, and then came a vote and the talking machine carried. This family has not bought yet, but it will some time in the near future.

Notice to Victor Jobbers

You will be glad to know that we are in a position to furnish you with the "Best Record Album" containing Famous Heavy Green Bristol Paper Envelopes the same as we have been using for the last ten years.

Despite the shortage of dyes, green paper and silk cloth you can secure our patent album made of the highest grade materials.

Our patent envelopes are locked in metal.

We can Guarantee them to you and you can do likewise to your customers.

To convince yourself give us a small order and let us prove all we say is the truth.

We are also the Sole Manufacturers of the now "Famous Edison Re-Creations Album."

Developments in Trade in the Talking Machine Field Have Demonstrated That These Instruments Are no Longer a Luxury, but a Downright Necessity—The Demand Has Become Quite Acute—The Matter of Labor a Decided Issue—How a Conference of Manufacturers Would Help—Eisdell With Columbia Co.—Marathon Records May Reappear—Some Interesting Issues of Records During the Month—Gramophone Co., Ltd., Declare Ten Per Cent. Dividend—Columbia Activity in Record Field—Other News of General Interest to Talking Machine Trade

LONDON, E. C., December 5.—In retrospect talking machine commerce from the main view point—that of bulk sales—has belied all prognostications. Upon the outbreak of the titanic struggle, it was perhaps natural that the pessimists should hold the field, and in one sense they were right. Arguing from the point of view of industrial dislocation, the financial drain upon private resources, etc., it certainly appeared that such articles as musical instruments would not, as a trade, survive to any great extent. This in relation to the fact that gramophones were then regarded more as luxuries than anything else rather strengthened the belief that maintenance of business under the circumstances would at least be precarious. True, it might have been. But for one thing. And that? There is only one answer. To-day the gramophone is no longer a luxury; it is a downright necessity! It charms into pleasant thoughts the minds of our wounded soldiers and makes easier the monotonous days of their convalescence; in fact, to them it is a golden solace of inestimable worth. Nearly every hospital, if not all, now possesses a gramophone and quantity of records as a necessity. Similarly, it finds a treasured place in the homes of thousands of munition workers, whose main relaxation is the music thus provided. So much is all this recognized that the difficulty has been to produce machines and records fast enough. There is, in fact, no cause for doubting that trade prospects are in every way satisfactory. Machines and records do not require selling to-day; people come in and buy them! That being so, one's thoughts instinctively deviate in the direction of supply. From this side the picture is by no means so encouraging, though there is no great cause for alarm. At this moment, the trade is undergoing some reconstruction, which calls for the exercise of careful judgment on the part of all manufacturers. With the scarcity of ordinary labor—the chief difficulty at the moment—there is a growing tendency to initiate women in the work of those departments which hitherto have been considered only suitable for male labor. Experiments are being made to that end, and doubtless it will be found that the more robust female will gradually adapt herself in the work of the sections in question, but whether or not they can be utilized on a sufficiently large scale for the onerous work of record pressing is still an open question. It is of immediate importance, however, that this matter should be thoroughly threshed out. Already the difficulties of record production has involved in a number of cases the refusal of orders on fixed time delivery. Unless some efficient steps in co-operation by all manufacturers are at once taken, it may be that the future will provide cause for regret. The government is now arranging a big scheme of substittuion which will further militate against the retention of male labor on such work as the making of gramophones and records. One is precluded from saying too much on this point, but certainly the time has arrived when a round table conference of manufacturers would go far in the elucidation of an urgent problem. Isolated and half hearted effort is never productive of much solid result, and I therefore make a strong plea for united action before the trouble becomes acute. Classes at one of the factories might conceivably be started with advantage while there yet remain the means whereby to coach women and boys into work which takes some time to learn. The progress of the gramophone industry is of national importance in more ways than one. It must be maintained at full strength—and it can be, if valuable time is not lost. That it may be so let us take the needful steps without delay.

Seasonable Wishes

All good wishes for the festive season and a real new year of happiness to all my readers. The fervent hope of everyone, whatever be his interests, must be concentrated upon an honorable and satisfactory conclusion of this terrible war. May 1917 see the end of it!

Preserver of Languages and Dialects

Nothing has taken a more leading part in the preservation of languages or dialects than the gramophone. That is an established fact which continual experiment has endorsed over and over again during the last few years. Many learned professors have come to recognize the value of records in this regard with the result that to-day the British Museum is in possession

FROM OUR LONDON HEADQUARTERS—(Continued from page 105)

of as fine a collection of world dialects as can be found anywhere under one roof. The subject is brought to fresh prominence by a recent article in the London "Observer," which speaks of the work done by Professor Jones, reader in phonetics at the University of London, in securing fine record specimens of the Welsh, Japanese, Hungarian, Czech, Zulu and other languages. In an interview Mr. Jones said, "We have other ways of recording speech besides the phonograph. There is the kymograph, an instrument which records the waves of speech on a revolving drum. The words are spoken into a tube and very beautiful curves, corresponding to the sound, are recorded on smoked paper. From these curves we are able to analyze the nature of the sound, demonstrating for example, that the Japanese whisper many of their vowels instead of sounding them in the ordinary voice. The preservation of dialects is of historical importance and of great value for philologists. Some dialects are disappearing, and if records were taken it would go a long way to keeping them alive."

Hubert Eisdell on Columbia Records

Hubert Eisdell now records exclusively for Columbia! This news of one who by sheer merit alone has forged his way into the front rank of the greatest tenors will give immense satisfaction to his admirers. He has a wide host of friends throughout the country who will be pleased with his new Columbia recordings. In the rare intervals between his arduous duties on a patrol boat scouring the coast. Mr. Eisdell was able to secure leave, and came to town expressly to make his first Columbia records.

These are announced this month and they are certain to create something of a sensation by reason of their being double-sided records. There are two discs, one giving us "Love's Garden of Roses" and "O Flower Divine," and the other "Wait" and "Parted." Mr. Eisdell writes as follows: "I am delighted with my Columbia records, which I have just heard, and am astounded at hearing my voice so faithfully reproduced by your wonderful recording process."

Dividend of Ten Per Cent.

A dividend of 10 per cent. on the ordinary shares for the past year is made by the Gramophone Co., Ltd. This is identical with that declared for the last two years, preceding which the figure was not less than 20 per cent! All things considered it must be regarded as a satisfactory distribution, especially when it is remembered that practically the whole of the continental business is shut off by the war.

Winding Up Polyphon Supply Co., Ltd.

Perhaps in no other industry was German influence so great proportionately, as in the talking machine trade. It was absolutely satiated with enemy-made goods, which, as a matter of fact practically monopolized the British market. Some businesses closed down soon after the outbreak of the war, others were placed in the hands of controllers appointed to fat salaries by the Board of Trade. There is now an agitation for their complete winding up, and as a result official intimation is given under a Board of Trade order for the winding up of the New Polyphon Supply Co., Ltd., 2 Newman street, London, W., a firm which for many years has conducted a large gramophone jobbers' business.

Busy Bechstein Business

Apropos the foregoing it is interesting to note that the entire stock, good will, leasehold and premises of the Bechstein London business was recently sold under the hammer for £56,500. Starting at £40,000, the bidding rose chiefly in sums of £1,000, until at the price quoted, the complete lot was knocked down to James Boyton, who bought on behalf of Messrs. Debenham & Freebody, Ltd., the great West End stores in Wigmore street, London.

The Marathon to Reappear

The long playing "Marathon" record, having a cut finer than any ever issued, is rumored to be due for resuscitation. The trade censor will not as yet consent to the publication of details, but I am assured a movement is on foot whereby the Marathon will certainly make a new bid for patronage under less financial disadvantages than before. I have held faith in the Marathon all through its somewhat troublous career, and most certainly believe it to be the record of the future. Though in capable hands, its first policy direction was perhaps a little too stringent. The policy and organization was good, but in the opinion of many, a little elasticity in carrying it out would have made a considerable difference. These are important points, but there were many other reasons connected with finance and general conduct of affairs more responsible for the elimination of the Marathon business. The record itself will never die, and I am thinking that any new organization for its reissue will not fail to take full count of previous failings. Definite news as to the composition and policy of the new undertaking foreshadowed, will be awaited with more than ordinary interest!

German Prisoners to Make Musical Instruments

German prisoners are now to be offered work, be it noted, under proper conditions and wages, in various industries, one of which is the making of pianofortes and other musical instruments. As a matter of fact pianos are already under construction at one at least of the internment camps.

Records of Pianoforte Accompaniments

At various periods in the history of the talking machine trade spasmodic efforts, but none the less praiseworthy, have been made to meet the public demand for records of pianoforte ac-

FROM OUR LONDON HEADQUARTERS—(Continued from page 106)

companiments to the more popular class of standard songs which form the chief program in the average suburban home circle. It cannot be said, however, that any great success in this direction has been achieved. Nevertheless some progress is to be registered, and now that "His Master's Voice" company has taken the subject in hand seriously, the prospect is distinctly more encouraging. A good start is made with an issue of six double-sided discs of accompaniments for soprano or tenor of such well known songs as, for instance, "The "Rosary," "A Perfect Day," "O Dry Those Tears," "Little Grey Home in the West," "Somewhere a Voice Is Calling," "Good-bye," etc. For contralto or baritone there is a similar selection. Instructions as to the correct speed, etc., accompany each record, and there can be little doubt but that this splendid recorded innovation of what is often said to be a lost art, will in consequence receive a great stimulus. The action of the gramophone company merits the hearty co-operation of all dealers, and I certainly believe the venture is not only welcome to a very large circle of amateur and professional singers, but am also sure it must prove a greater success perhaps than was at first anticipated. Capital!

Records by Garde Republicaine Band

The famous Garde Republicaine Band, which recently paid what proved to be a triumphal visit to London, was naturally in great demand for the purpose of making new records. To the fore as usual, the Winner Record Co. quickly secured at considerable expense the services of these French semi-state instrumentalists with the happiest of results. Several items were successfully recorded under special conditions, and those announced this month are: "Andante and Scherzo" (A. Deslandres), "Musette" (C. Huguenin), and "Prelude et Minuet" (Ressard). All brilliant masterpieces, to be sold at the standard price!

New Composition Grows in Favor

As the outcome of British enterprise, we should not be again dependent, as before the war, upon importations of record material. The new composition, Ebonitis, is making great headway. Owing to its special elasticity and to some extent, newly tried ingredients, Ebonitis is productive of a very fine surface which practically eliminates the surface noise so common to most records. This, it should be noted, is not at the expense of wear, for it is guaranteed to withstand, under proper treatment of course, more than a fair share of needle friction. Quotations may be obtained from Ebonitis, Ltd., Willowbrook Grove, London, S. E.

A Novel Hornless Instrument

A novel hornlesss instrument which made its appearance some time ago, called "The Rollophone," continues to enjoy a remarkably good sale. It is fitted with a drawer for records which when opened antomatically operates the Venetian roll top and presents the machine ready for immediate use. The construction throughout is good, consistent with the reasonable price asked, and from the viewpoint of tone delivery, the Rollophone is altogether pleasing. In addition to machines, Messrs. W. H. Reynolds (1915), Ltd., specialize in parts, accessories of all kinds, and "Favorite" double records.

Records Whose Quality Is Appreciated

The best evidence of quality is usually reflected by sales which are progressive. This combination sums up better than anything else the trade position held by the "Guardsman" records, and the Invicta Record Co. certainly has good reason to believe that its present support is but an indication of even greater progress ahead. Every effort is put forth under the most difficult circumstances of production—common, by the way, to all record concerns—to issue what is required, up-to-date records of merit. Upon their success one need not elaborate; sufficient is it that the position grows stronger every day, and the Guardsman record sales, likewise. Some fine new lists for the season, suitable Christmas and New Year titles, are now ready. Those who would be prepared have already placed their orders; the last minute school of dealers will, I am afraid, find these days that "procrastination is more than the thief of time!"

New Piano Capitalization

One of the very old and famous pianoforte interests has come under certain financial reorganization by the recent registration of a new company under the title of John Brinsmead & Sons (1916), Ltd. The prospectus does not actually disclose the purchase price, but the capital is put at £100,000 in £1 preference and ordinary shares, besides a £40,000 debenture at 5 per cent. interest. Average profits for the past few years were over £8,000 per annum. This is arrived at after allowing for advertising expenses, which the managing director is reported to have stated should be reduced! Owing to the elimination of German competition, it is thought the new company's prospects are exceedingly good.

Eisdell's Records on Double Discs

The Gramophone Co., Ltd., announce the inclusion of Hubert Eisdell's contributions in the double-sided category. This is evidently a reply to the acquisition of the famous tenor's services by another company, and the consequent competition is naturally arousing some interest in the trade. Hubert Eisdell will now be in greater demand than ever, which should be of mutual value for the four interests concerned. Previous "H. M. V." single-sided records will be exchanged for the new double-sided program, and with this intimation the Gramophone Co. sent a full list of Eisdell's fine records and an order form which dealers are asked to fill in and return without delay.

Concentrate on Certain Styles

The "His Master's Voice" dealers have received intimation that, owing to the companies factories being actively engaged on work of national importance, it has become necessary to curtail the further manufacture of some models until a return to normal times. Eleven types of instruments, numbers 3 to 14 inclusive, will be continued, but the supply of Nos. 1, 1a, 2 and 4 are not in future available. Orders on hand for the latter must, under the circumstances, be considered cancelled. We are sure that all dealers will fully appreciate the overwhelming reasons advanced for this step and make their plans accordingly. There are, of course, other reasons well known to the trade, that militate against the supply of instruments, and we must, all things considered, content ourselves with the thought that it is a matter for satisfaction that gramophones are still available in fairly respectable quantity.

Make Tour of Inspection

In the welfare of munitioners, Her Majesty the Queen has always evinced very sympathetic interest. It has been her practice to visit different centers, and express her personal thanks to those who daily render such good service to the country. The latest occasion in this connection was Her Majesty's visit to the huge factories of "His Master's Voice" Co., whose managing director, Alfred Clark, and others, received the Queen and conducted her over the works on a tour of inspection. Having personally congratulated the girls and workers generally upon their self-sacrifice, Her Majesty departed to the spontaneous singing of the national anthem. It was indeed a memorable day: one that Hayes will not quickly forget!

T. Edens Osborne's Enterprise

To T. Edens Osborne, of Belfast, must again be given the credit of retail enterprise in the maintenance of newspaper publicity. After announcing a list of recent importations, one of his advertisements proceeds to issue a mild challenge. Anyone who doubts that Mr. Osborne holds the largest stock of gramophone goods in Ireland is invited to call and see for themselves. Capital!

Large List of New Records

A very large list of new records is this month announced by the Sound Recording Co., Ltd., London. In the Grammavox special quality series will be found some excellent selling numbers, the trade orders for which are keeping the company's factory facilities of output up to its zenith. There is also a big list of "Star" and "Popular" discs, comprising many well-known songs of the standard school in addition to the more recent compositions of merit.

New Zonophone List

The new Zonophone list of double-sided records bespeaks the exercise of a close watch upon public taste. There is music for every mood. Whatever one's musical appetite may be, it is sure of appeasement from the varied programs announced by this company. Overseas traders would do well to note as a fact that Zonophone records provide a magnificent choice of London's latest in things musical, contributed without exception by artists of

merit and in many instances, of world-wide renown. In the way of window bills, showcards and other publicity matter of attractive design, dealers receive very liberal support.

Columbia Brieflets

The Columbia December supplement features "The Holy City," by Madame Clara Butt, and "Nazareth," by Kennerley Rumford, as appropriate Christmas fare. In addition, a comprehensive list of Christmas selections from the catalog is also given in the supplement, so that dealers and public alike have a splendid choice.

The celebrated "Air on the G string" of Bach is the contribution of the master 'cellist, Pablo Casals, to the Columbia December list. This is the famous air for the violin, transcribed for 'cello, and played by M. Casals with an effective orchestra accompaniment. It is one of those supreme examples of the simplicity of genius that Bach, of all composers, gave to the world.

An instrumental record as high in importance as it is in interest is the Grieg Sonata in C minor, played on a Columbia record this month by no less a combination than Albert Sammons, the well known violinist, and William Murdoch, the popular pianist. The appearance of these two leading soloists is undoubtedly a musical event; and Grieg's delightful sonata offering unique opportunities for the display of their respective arts, the players secure of it an exquisitely balanced performance.

Norman Allin has made a distinct success with the Beecham Opera Co. this season, so his Columbia record of the new ballad, "Back from France," and Coleridge-Taylor's "Thou Art Risen, My Beloved," announced this month, possesses an unusual interest. In these songs his fine virile voice rings clear and true.

Sir Henry Wood continues his orchestra in his own ararngement of the familiar Raff's Cavatina on the Columbia this month, the work being superbly rendered by the massed strings of his famous orchestra against the sustained harmonies of wood and brass. It makes an imposing number in this form, and is marked by many touches of the master conductor.

That popular contralto Miss Marion Beeley, gives us on Columbia this month, two songs that aptly display the richness of her voice. They are "Sonny" and "Little Fleur-de-Lys"—and both are numbers imbued with an honest sentiment. Miss Marion Beeley in her treatment of them evinces a delightful sincerity that is convincing and impressive. This record should be in considerable demand.

Hughes Macklin, who has become an established favorite for the artistic work in his fine tenor records on Columbia, gives his admirers a treat this month in Stephen Adams' delightful "Farewell in the Desert," coupled with a newer song, "Come Home to Me."

"Any Time's Kissing Time," the song hit from the Oscar Asche production of "Chu-Chin-Chow," at His Majesty's Theatre, is announced on a ten inch Columbia record.

Kennerley Rumford recently paid another flying visit home from the front, during which he made some new Columbia records, now announced. This popular baritone places the music lover under a debt of gratitude to him for his artistic performances of four familiar numbers. In "Nazareth" we have a noble and dignified rendering that will prove highly acceptable at this season. The artist's sense of beauty is revealed in his delightful treatment of the pretty song "Until" and the warmth and tenderness infused into both this and "Absent" will ensure a welcome for them.

"High Jinks," the latest success among musical plays, is represented by four distinct recordings in the new Columbia list. Ciro's Club Coon Orchestra plays the catchy air, "Something Seems Tingle-ingleing," figuring also as a vocal number by Stewart Morton and chorus a ten inch record. Prince's Band gives us the "High Jinks" waltz, while the song, "A Nice Little Girl," is in vocal form by Stewart Morton on the ten inch record just alluded to.

The Garde Republicaine Band

The Columbia Co. announce the first of an important series of records by the celebrated band of the Garde Republicaine, made for them during the historic visit of that distinguished company of artists to London in September. The records secured by the Columbia Co. represent much, if not all the music played by the band while it was in this country.

Some interesting details of this, probably the greatest band organization of its kind on the Continent, were given a few days ago in the "Referee," the following being extracts. La Garde Republicaine is a body of wind instrumentalists that has the distinction of being paid servants of the French government. Its establishment dates from 1848, when it comprised sixty-six players, since increased to eighty. Although technically a military band it is independent of the French army and entirely at the disposal of the state. It always plays at full strength; its members are not soldiers but state servants. From these reasons La Garde Republicaine is representative of the French government and hence the importance of its visit to our shores. It may be said with assurance that the performance of the famous band (in London) have deepened esteem for French musicians and have increased the feeling of fraternity between the two nations.

It is interesting to note that of "Le Roi de Lahore," the overture to which forms the first Columbia record by the Garde Republicaine Band, the same musical critic says it was remarkable, the tone of the wood-wind peculiarly rich and refined, and the general attack so spirited as in some passages to approach fierceness.

EMERSON ARTISTS AS THESPIANS

Quite a number of the artists recording for the December supplement of the Emerson Phonograph Co. are active at the present time in theatrical circles. Van and Schenck, who made several records for the December Emerson list, is one of the headliner acts in the new production of the "Century Girl" at the Century theatre, New York. Sallie Hamlin, who made the Christmas recitations for the Emerson Co., reecntly appeared at the Globe Music Club in the New York Public Library, where she was enthusisastically received.

Vernon Dalhart, whose Emerson records have met with a ready sale, is a member of the Chicago Opera Co., and the star of the "Pinafore" production which appeared at the Hippodrome. The Avon Comedy Four, recently added to the Emerson library is at present time touring the country on the Keith and Orpheum circuits.

ENLARGE CAPACITY OF PLANT

James Frazee, head of the Phonograph Appliance Co., New Brighton, N. Y., stated this week that the company had made arrangements to add another unit to its plant thereby enlarging its capacity materially. Mr. Frazee reports the receipt of large orders for "Crystal Edge" mica diaphragms from manufacturers in all parts of the country, and states that the company is making plans to take care adequately of a record breaking 1917 business.

INFORMATION OF VALUE TO THE NEW MAN IN THE FIELD

Some Reasons Why It Is Economical to Change Needles for Each Record—Some Timely Hints Regarding the Packing of Talking Machines for Export Shipment

A man going into the talking machine business as a dealer must remember that in entering any new line of business success depends largely upon an understanding of that business. A little study of the various types of machines and records and the gleaning of some knowledge about the records themselves, should serve to prevent him from investing more or less capital in a line of machines or records that are decidedly foreign to one another, so far as playing qualities are concerned.

In this section of The World information will be given on such problems that do not of necessity concern the technical construction or mechanical features of instruments which are handled in the department of "Repairs" by A. H. Dodin.

Why It Pays to Change Needles

The talking machine dealers are prone to hear from machine owners that for one to insert a fresh needle for each record is simply a scheme to build up a business for the needle makers. As a matter of fact the dealers themselves have been known to make a similar insinuation. A customer is likely to state that he has tried playing several records with the same needle and couldn't notice any difference in the reproduction. The advice on needle changing, however, is good.

There is no substance known that will withstand friction forever. The steel needle after use on one record will be found under the microscope to have worn away to a surprising degree. The smoothness of the sides will have vanished and it will present a rough surface to the record grooves. This roughness becomes more pronounced each time the record is used and naturally results in the wearing and scratching of the record grooves, because the material with which the records are made is not strong enough to resist the steel.

To the untrained ear there may not be any difference in the reproduction noticeable after playing five or six records with one steel needle, but the life of the record has been materially shortened by the experiment. The wear on the needle may not be apparent to the naked eye, but it can be seen by examination under the glass. If changing the needle will insure double life for the record, it would seem a matter of policy to give that matter attention.

From 1,000 to 1,500 needles may be purchased for the price of one average record. In view of that fact economy alone should influence one to sacrifice the needle instead of the record, and some sacrifice is bound to be made.

About the Wearing of Records

Experiments have tended to prove that in the usual run of disc records the greatest wear occurs at the outer edge. The extent of the wear decreases towards the center and a number of interesting explanations have been made of this fact. One explanation is to the effect that the reproducer travels along the record groove at a much greater speed at the outer edge than at the inner edge, for the turntable revolves at the same speed regardless in what position the needle happens to be. Other experts claim that there is little basis for such an explanation because the recording of the outer edge is done at the same speed, or approximately the same speed, as that at which the record is reproduced.

An explanation that is accepted by a considerable number is that in the case of the average disc machine, the needle of the reproducer must find and follow the record groove of its own accord, there being no mechanical means for adjusting its position in the groove. It is conceded that such being the case, it takes several revolutions of the record before the needle is finally settled in the record groove, and that during the revolutions it must cause some damage to the record in the process of adjustment.

In certain selections the heaviest passages occur toward the middle of the record, or at its end. On such records the greatest wear is generally found where these heavy passages occur, because the wide wave amplitude of these heavy strains tends to more or less resistance to the progress of the needdle.

Packing for Export

Export trade in American-made talking machines is growing to substantial proportions owing to the national development of the industry, and particularly with conditions brought about by the European war in the cutting off of all supplies for various types of talking machines.

The export trade naturally brings up new problems for the manufacturer, not the least of which is proper packing. Packing for a cross country journey in drays and freight cars is quite different from packing for a long water journey, and the rough handling that goods receive while being taken ashore in many South American ports.

In this connection the following information on packing talking machines for export, offered by a man who has developed a big business in foreign countries, should prove of interest:

"The cases used for packing goods for export should be made of a size to fit the goods to be packed. Boxes too large and of odd sizes allow too much play and usually cause damage. Boxes to be carried safely for long distances and subjected to rough handling, as is generally the case with goods sent to foreign markets, should be made of good lumber, preferably spruce or hemlock, not too thick or too thin. In my opinion hard woods including yellow pine should be avoided because they are too heavy and are liable to slip in nailing. When the contents is heavy, the box should be battened, and in all cases lined with waterproof paper and strapped. Some steamship companies stipulate the latter conditions in their bills of lading. When boxes are too large the consignee must pay an unnecessarily heavy freight bill, sometimes double on the size and weight of the box. If the box is too small, the packing must of necessity be defective, because of insufficient room for packing material.

"Packing material, such as excelsior, straw or hay, may be used according to the character of the merchandise, but it is important that such material be perfectly dry, so that the contents may not draw moisture therefrom and become spoiled.

"All materials of high polish should be well wrapped, preferably in waterproof paper. Highly polished metal parts should be wrapped separately in waterproof paper.

"In cases, such as talking machine cases, it is well to have boxes built to measure for the machines. It is well before placing a machine in the case to build around it a frame work of battens, two or three inches wide and about three-quarters of an inch thick. Where the battens come in contact with the machine case, cork or rubber bumpers should be placed between them. Rolls of excelsior wrapped in paper may also prove suitable for preventing rubbing. All boxes should be plainly marked in ink which cannot easily be rubbed off.

"When more than one box is included in a consignment, each box should be numbered consecutively and either bear the address of the consignee in full or his distinguishing mark. Naturally, the same marking should appear on the dock receipt, bill of lading and insurance declaration.

"Owing to the many differences in the customs regulations of the various countries, it is well to ship through a regular shipping agency, and thereby avoid expensive errors."

A STARR CHRISTMAS MESSAGE

The distributors of and dealers in Starr phonographs in their campaigns for holiday business have included in all material sent out to prospective customers a neat little card bearing the question: "Will This Christmas Mean a Starr Phonograph for You?" Being on a separate card the question can hardly be overlooked by the receiver of the latter.

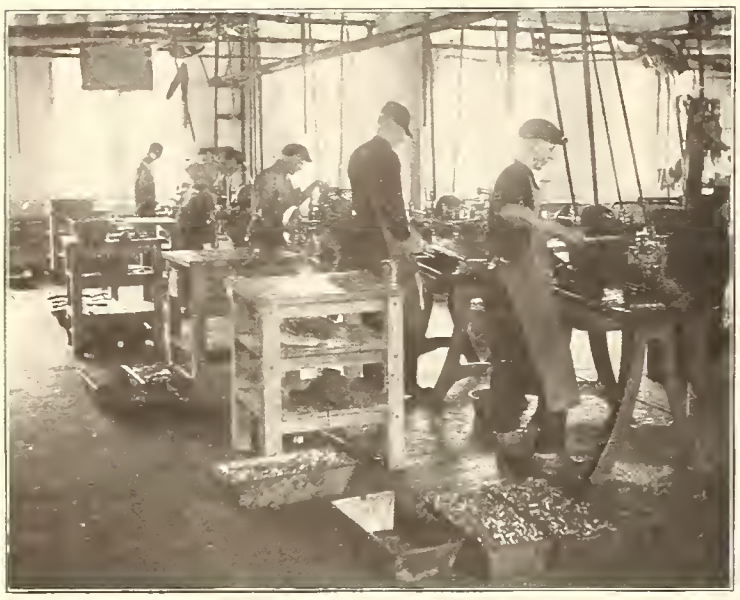
STARR PIANO CO. NOW MAKING OWN PHONOGRAPH MOTOR

Elaborate Mechanical Equipment Installed in the Factory in Richmond, Ind., for That Purpose—New Department Under Competent Direction—Product Rigidly Inspected

RICHMOND, IND., December 8.—The Starr Piano Co., of this city, has added the necessary machinery and equipment for turning out motors for use in their phonographs. The motor department is in the splendid new factory building



Hand Screw Machines

which was completed last August. It is modern in every detail, thus giving the employes the best conditions under which to work. This building is 225 feet long by 50 feet wide and is six stories high. The floors are devoted to the manufacture of parts and the assembling of the motors. On the first floor, a number of punch presses have been installed and are used exclusively for the motor parts. The largest press which is used in forming the turntable has a pressure of 400 tons. There is a large, double-action press for forming the spring barrels and other presses of smaller sizes for various operations.

Deep cement foundations have been constructed for the heavy punch presses, and in that way they are rigidly supported. The raw stock to be used on the punch presses is kept on racks near at hand, where it is placed when unloaded from the cars and saves being handled or trucked. The machine room is located on the third floor of the new building, where there is plenty of light and air. The interior is white, which makes it easy for the workmen to do the closest work without the use of artificial lights. The machines are arranged in the most systematic order from a standpoint of raw material and finished parts.

One cannot help noticing, in going through the factory, how carefully the minute details have been worked out so that each operation can be made under the most favorable conditions.

In order that the various parts can be made most economically and accurately, the Starr Co. has, at heavy expense, equipped the machine room with the best equipment that can be secured for the special operations necessary for making these parts. A large number of the machines were designed and built specially for the work of turning out various parts, also large sums have been spent for the special dies, drill jigs, etc., used in this work. The equipment mostly consists of automatic worm gear cutters, multiple drill presses, precision lathes, hand and automatic screw machines, lathes, gear hobbers, etc. A number of machines have also been installed for making and repairing tools. Individual motors are installed for furnishing power to drive the machinery. It is said that when the Starr Co. first began making plans to manufacture their own motors, plans were worked out whereby George Kunkel and R. M. Allen (then with a prominent motor firm) became affiliated with the Starr Co. and are giving their best efforts to the development of the motor department.

Multiple Drill Presses and Tapping Machine

Mr. Kunkel says that in designing the motor made by the Starr Co. he has given special attention to overcoming all sources of trouble, and that the motor now made meets the three most essential requirements, that is, being noiseless while running, having uniform speed, and standing up without requiring a lot of attention.

While the different parts are going through

Geo. Kunkel R. M. Allen

the various processes of manufacture, a number of inspectors are constantly checking them up to see that there is no variation. This insures a perfect motor after the parts are assembled. The fact that each part must be right has been so forcibly brought before the workmen that it is very seldom any inferior work shows up at all.

A large stock room is in close proximity to the machine and assembly rooms, thus necessitating the minimum amount of trucking the parts and raw material, also it saves time in securing tools required for setting up different jobs. The assembly room is arranged to the best advantage from the standpoint of efficiency, comfort for the employes and light. Substantial benches have been constructed and arranged so the progress from the parts to the finished product is absolutely continuous and unbroken.

Large Blanking Press

In the assembly room a number of small machines have been installed, such as riveters, drill presses, etc., which are used in assembling the various parts. Special testing machines have

John M. Dean Corporation

Putnam, Conn.

Manufacturers of

Talking Machine NEEDLES

Dean Service covers every essential need in talking machine needles. Needles furnished in bulk or in special packages. Quality needles only.

been designed and built for determining the accuracy of such parts as gears, and by means of these a very rigid inspection is made. No guess work goes with Mr. Kunkel. He had years of experience in making mechanical devices requiring close and accurate work before he began the manufacture of motors, therefore, because of this training he is rigid in his demands.

At the present time only two models are being manufactured, but others will be added in the course of a short time and as the requirements of the company may necessitate. The larger model, known as No. 26, is a double-spring motor, nickel finish. The gears and worms are cut by special machines built for that specific purpose. The springs are made of spring steel tempered by one of the oldest spring manufacturers in the business. The governor is accurately made; therefore, it performs its important functions well, causing the mechanism to run at a uniform speed. The bearings are constructed for giving long service.

The frame of the motor gives rigid support to the parts, holding them in the proper position at all times. There is no warping of the frame in these motors when winding the heavy springs. The No. 16 motor is just as accurately made as the larger type and from material just as high grade, and therefore will give absolute satisfaction. It is smaller and does not run as long as the No. 26.

The plans for the motor department were carefully laid by the Starr Piano Co., and every effort was made to make the quality of the motor first class.

FEATURING THE PATHEPHONE

MEMPHIS, TENN., December 5.—The accompanying illustration presents one of the most attractive window displays which has been seen in the local talking machine trade for some time past. This window was featured with excellent results by the W. W. Kimball Co., Pathé dealer, and John S. Vesey, manager of the store, reports the closing of a number of Pathephone sales as a result of this display. The window has attracted considerable attention from the local trade, including many window dressers.

Pathephone Window of W. W. Kimball Co.

The rooster used for the display is six foot tall, and is cut out of beaver board, re-enforced with wooden strips in the back. It is painted in water colors in a brilliant red, trimmed in white. It stands on a large Pathé disc on back of the mailing folder. The roses and piano lamp are red; the background being a light cream color, almost white.

NEW HOME FOR AMERICAN T. M. CO.

Victor Distributors of Brooklyn, N. Y., Close Lease on Four-Story Building to Be Erected on Livingston Street—Will Triple Floor Space—Ready About May 1, 1917

The American Talking Machine Co., Victor distributors, who for a number of years have been located at 368 Livingston street, have just closed a twelve year lease of a new, modern, four-story building to be erected at 356 Livingston street, only a few doors from their present home. Work on the new building will start at once and it is expected that it will be ready for occupancy about May 1, of next year, or possibly before that time. The new home will give the American Talking Machine Co. practically three times its present floor space for the storage and handling of Victor goods.

In talking of the new move, R. H. Morris, manager of the American Co., said: "For a long time past we have been badly handicapped through lack of space in our present quarters. Our business has been growing steadily, and to handle it effectively we decided that larger quarters were absolutely essential. The new building will be built according to suggestions made by us and designed to provide the maximum of convenience in the handling of our business.

"In common with other Victor distributors we have faced a more or less serious shortage in certain popular types of machines. The situation has been saved by the plentiful supply of records, which has enabled us to take excellent care of our dealers in this connection."

E. M. Reynolds, of Canton, Ill., has opened a demonstration room in the basement of his furniture store on North Main street, for the demonstration and sale of the Edison, Columbia and Magnola lines.

Talking Machine Dealers should write at once to their Congressmen urging strongly the passage of the Stephens-Ashurst Bill, H. R. 13,568, providing for maintenance of retail prices on trade-marked articles. Lose no time.

LIBERAL ADVERTISING THE RULE IN KANSAS CITY

Leading Makes of Machines and Records Featured Prominently in Newspapers and by Other Means—Victor Distributors "Snowed Under"—Elaborate Edison Tone Tests—Other News

KANSAS CITY, Mo., December 5.—This year seems almost overwhelming the talking machine dealers with business. Maybe most of them knew the trade was going to keep up, whatever the public might have thought about the trade being "overworked." The fact is that all the jobbers, and apparently most of the stores, are doing exceedingly well, and the only drawback is the inability to get more goods.

There has been no letup of advertising, despite the shortage of supplies, so that goodwill is being maintained in the leading lines. The Edison, Columbia and Victor lines have been particularly well exploited, with pages and half pages, not only in Kansas City, but in the larger towns of the district. The Pathe has done some extensive advertising also, and the dealers themselves are going actively after holiday business.

The Edison shop has been holding tone recreation recitals, and advertising them liberally. One of these was at the Muehlbach hotel, one of the finest hotels in the United States; an invitation affair, that was attended by society folk, and where somewhat of a sensation was aroused by the comparative performances of Mlle. Alice Verlet and Arthur L. Walsh on the phonograph and the direct production. Another recent one was before the City Club, one of Kansas City's largest civic bodies, of which M. M. Blackman, manager of the Edison Shop at Kansas City, is a member.

"The shortage this year is the worst in our history," said A. A. Trostler, manager of the talking machine department of the Schmelzer Arms Co., Victor distributors in Kansas City territory. "We are advising dealers to place their orders for 1917 requirements now, so that they may be on order with their distributors. While the demand is very heavy now, this isn't a holiday proposition any longer—it's an all the year round business. We have many orders for the 1917 Victrola, but no samples in yet. The demand for records is very large, and we are taking care of that in good shape."

E. A. McMurtry, manager of the Columbia Co., at Kansas City, has recently returned from a trip to the East where he visited the factory and the head offices; he also called at the branches at Pittsburgh, Chicago and St. Louis.

The Saturday business, December 2, at the Columbia headquarters in Kansas City, was the largest in the branch's history, and November had been its biggest month. This result is from the general growth of the Columbia business, and the volume represents an increase in the trade of almost every Columbia dealer, since the increase in the number of dealers has been small. The branch is doing considerable advertising in the larger towns of the district, and in Kansas City is about to enter a co-operative campaign with the local dealers with respect especially to window decorations. The branch has been conspicuously successful in assisting the local representatives to stimulate their business.

There has been almost a constant stream of musical attractions in Kansas City this fall, with which the Columbia headquarters has been able to hook up advertising of the Grafonola and records. Nearly every week there has been one or more famous artists who sing or play only for the Columbia. Perhaps the widest known of these was Josef Hofmann.

Not many of the Victrola dealers of the Kansas City territory have used the display advertising in large space featuring the fact that the Victrola reproduces overtones. Almost all, however, have more or less prominently displayed these facts in their advertising—and the salesmen gently insinuate the remark into their sales talks.

The Pathé is now being sold at retail in Kansas City, at 913 Grand avenue, by the LoBello Music Co., successors to the E. E. Trower Music Co. James LoBello, manager, was formerly with the Frazier-LoBello Music Co., and is well known in the city. The booths in the store have been altered, the ceilings being lowered to make cozier quarters with better acoustic facilities, and the store has been redecorated. Another adjunct to the talking machine business is being built by James T. Clenny, 913 Grand avenue, as headquarters, Mr. Clenny moving December 4 to this location from his former Walnut street store. Mr. Clenny will feature the Pathé locally, but will also handle several other makes of talking machines. He will act as jobber for the Brooks and the Mandel products; and for the Playerphone, which he has represented for a year. The store will also put out a machine, playing Operaphone records, and produced for them by the Mandel Co.

The E. E. Trower Music Co. continues to act as jobber for the Pathé lines at Kansas City, W. C. Junkins being manager of the house. Its headquarters are still at 913 Grand avenue, on the floor above the retail Pathé store which Mr. Trower conducted before going to Wichita; he retains his control of the distributing company.

The Kansas City house of the Starr Piano Co. has received a sample of the new $75 model, the "Three-fourths," and it promises to be a popular machine. The branch has secured many new accounts in the territory; and is particularly gratified to have available machines and records to supply the growing demand. There are enough Starr phonographs out now around Kansas City to make a considerable volume of record business. The branch is supplying many dealers with complete libraries.

Fred C. Comer, now in charge of the retail department of the Starr Piano Co. at this city, with control over both phonographs and pianos, has recently added to the sales force Val Crane, very widely known in Kansas City; J. H. Clemens, formerly with Hoffman, and later with Wunderlich, and C. M. Woodbury, a recent graduate from the Junior College at Kansas City.

C. V. Bissell, manager of the local Starr branch, was particularly interested in the proposal to put on a phonograph section at the Kansas state university next February, during the Merchants' Short Course. "There are two prime advantages," he said. "It gets all dealers together, of all lines, and each one can learn from the others. Then it provides an opportunity for the dealers in special lines to exchange experiences. It is a fine, progressive plan."

The Geo. B. Peck Dry Goods Co. has had a very large sale of Victor records recently, perhaps the McCormack sale being the largest, in its talking machine department. Manager J. F. Ditzell, pays particular attention to the musical events that can be connected with records. For the McCormack recital at Kansas City, he did much advertising, and sent postcards to a large list throughout the Southwest—and did the business. Mr. Ditzell has recently added J. Wilmuth to the sales force.

E. S. Hall of the Hall Music Co. of Kansas City reports that the talking machine business is on the increase. Sales have almost doubled those of last year.

M. W. Bardwell, formerly in charge of the Grafonola department of the Household Fair at Kansas City, is now with the A. M. Armstrong Music Co. at Oklahoma City, Oklahoma. G. Neer, formerly connected with the Columbian Talking Machine Co. at Kansas City, is now in charge of the department.

Miss Bessie Fullerton recently accepted a position with the Hall Music Co. of Kansas City She is an accomplished musician.

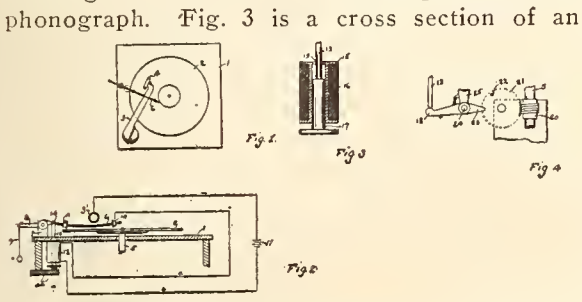
LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., December 5.—SOUND-REPRODUCING MACHINE.—John T. Prout, New York. Patent No. 1,202,312.

This invention relates to talking machines, and its object is to provide an improved means whereby the needle commonly used in the reproducer will be eaused to return to the point of starting automatically after a pieee has been played. A further object is to provide means by which this may be accomplished without injuring the record or without adding any attachment thereto.

In the drawings: Figure 1 is a top plan view of a disk type phonograph equipped with the invention. Fig. 2 is a side elevation partly in section showing the invention in place and indicating its relation to certain parts of the phonograph. Fig. 3 is a cross section of an

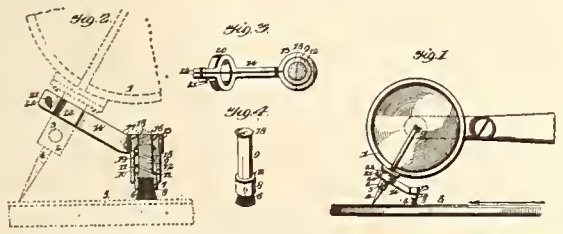


electromagnet of the solenoid type in which the movement of the plunger is restrained giving it the effeet of being equipped with a dash pot. Fig. 4 represents schematically a means for automatically accomplishing the purpose of the invention meehanically.

RECORD CLEANING ATTACHMENT FOR PHONOGRAPHS.—Lorence Ellsworth Rennell, Buffalo, N. Y. Patent No. 1,202,428.

This invention relates to cleaning means for removing particles of dust from the sound groove of a phonographic record, and the principal object is to provide a eleaning brush of soft material, the brush being arranged in a position in advance of the sound reproducing needle, so as to clear the sound groove of any particles of dust and thereby render the reproduction of the sounds more perfect as well as to obviate grinding of the surface of the groove.

Figure 1 is a side elevation of the sound box of a phonograph illustrating the invention as applied to the needle chuek, Fig. 2 is an en-



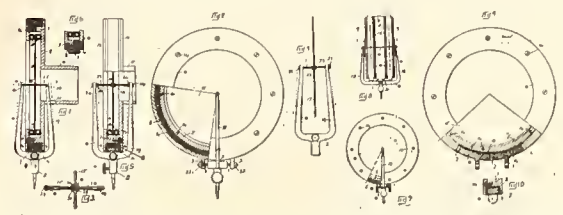
larged longitudinal section of the device showing the needle chuck and the sound box in dotted lines, Fig. 3 is a plan view of the attaehment, and Fig 4 is a detail perspective view of the eleaning brush *per se*.

SOUND BOX.—Jose Hoffay, London, Eng. Patent No. 1,202,520.

This invention relates to improvements in sound boxes or the like for talking machines wherein the supporting means on whieh the stylus lever oscillates is insulated by rubber or other insulating means from the easing of the sound box. Such insulation is not *per se* new but the improvements constituting the invention are more particularly hereinafter indicated.

The invention is illustrated in connection with stylus levers made of a forked formation, the bifurcations straddling the diaphragm, which form the subject matter of other applications for Letters Patent, but the invention is not limited to the use of a forked stylus lever and covers the use of any suitable form of stylus lever in combination with improved insulating means.

The invention consists in forming or mounting the pivots or bearings about which the stylus lever oscillates on a earrier which is itself rigid and is preferably a complete ring though it may be part of a ring. This ring or part of a ring is insulated from the sound box by a ring or part ring of rubber or similar insulating material surrounding the sound box and the tension of this insulator is preferably adjustable. The carrier thus forms a floating ring or section of ring thoroughly insulated from the sound box



while at the same time the adjustment of the stylus lever on its rigid carrier ean be readily made.

Figure 1 is a transverse section of one construction of sound box; Fig. 2 is a face view thereof, the left hand bottom quadrant being in section on 2—2, Fig. 1; Fig. 3 is an enlarged diagrammatic sectional plan of a detail, on 3—3, Fig. 1; Fig. 4 is an elevation of a modification; Fig. 5 is a transverse seetion partly in side elevation of another modification; Fig. 6 is a transverse section of another modification; Fig. 7 is a face view, partly in section, of another modifieation; Fig. 8 is an elevation of another modification; Fig. 9 is a face view partly in section of another modification; Fig. 10 is a transverse seetion of a detail.

GRAMOPHONE AND THE LIKE MACHINE.—Jose Hoffay, London, Eng. Patent No. 1,202,521.

This invention relates to improvements in or relating to the mounting of sound boxes in all kinds of talking machines. It consists in a coupling comprising a hollow block or member, permanently or detachably connected to the sound box or the tone arm or sound tube and pivoted on the tone arm or sound tube or on a support thereon, preferably at a point outside the sound passage adapted to present an opening facing forwardly, approximately in the direetion of the sound groove, or facing laterally transversely to the sound groove, for connecting the sound box to the tone arm or the like, the hollow block or member being adapted, in one position, to complete a tight communication between the sound box and the tone arm or the like, and, in another position, to break the communieation, and displaceable means being provided for restoring the communication when so broken and at such time aiding in securing the hollow block or member in position.

Figure 1 is a plan view of the improved device; Fig. 2 is a side elevation thereof, looking in the direction of the arrow 2 shown in Fig. 1;

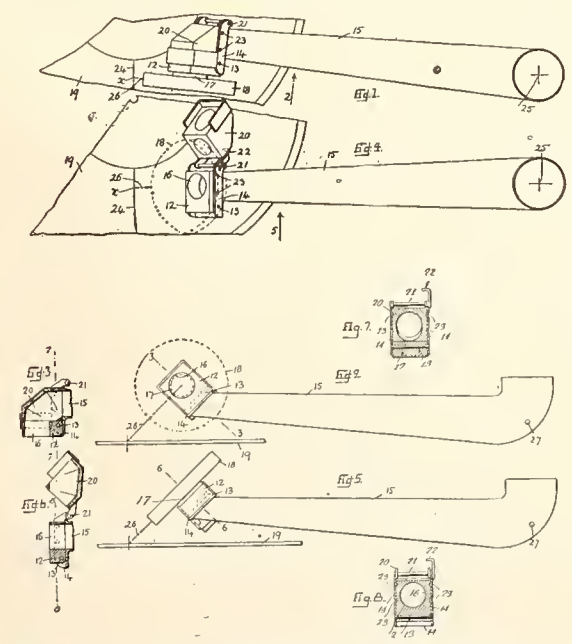


Fig. 3 is a detail sectional view taken on the line 3—3 shown in Fig. 2; Fig. 4 is a plan view of the device shown in Fig. 1; Fig. 5 is a side elevation looking in the direction of the arrow 5 shown in Fig. 4; Fig. 6 is a detail sectional view taken on the line 6—6 shown in Fig. 5; Fig. 7 is a detail sectional view taken on the line 7—7 shown in Fig. 3; and Fig. 8 is a detail sectional view taken on the line 8—8 shown in Fig. 6.

STYLUS FOR TALKING MACHINES.—August Knippenberg, Arnstadt, Germany. Patent No. 1,202,739. This invention relates to improvements in styluses for talking machines, and more especially to those used in connection with the dise records of gramophones.

According to the present invention, the stylus emobdies an operative portion which is elyindrical and the bottom or end of which is rounded, the angle of the bend lying in a plane transverse to the direction of the sound groove in the disc, the slanting position of the cylindrical portion of the stylus causing it to present to one side wall of the sound groove a bearing surfaee of greater extent than that presented to the sound groove by the opposite side of the stylus, wear of the groove in the disc and stylus being thus minimized, resulting in increasing the durability of both the stylus and the records.

A further feature of the invention eonsists in providing the stylus with means for insuring its correet insertion into the stylus holder in order that the stylus will be accurately positioned relatively to the reeord.

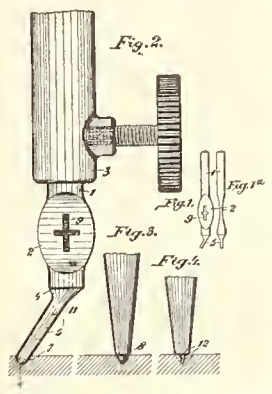

Fig. 1 shows the stylus in co-operative relation with a record disk of a gramophone. Fig. 1a shows the stylus as viewed from one side in Fig. 1. Fig. 2 shows the stylus, on a larger scale, fitted into its holder and in co-operative relation with a record disc. Figs. 3 and 4 represent styluses of a type heretofore used having a conical point, Fig. 4 showing the wear and the resulting deformation of the point.

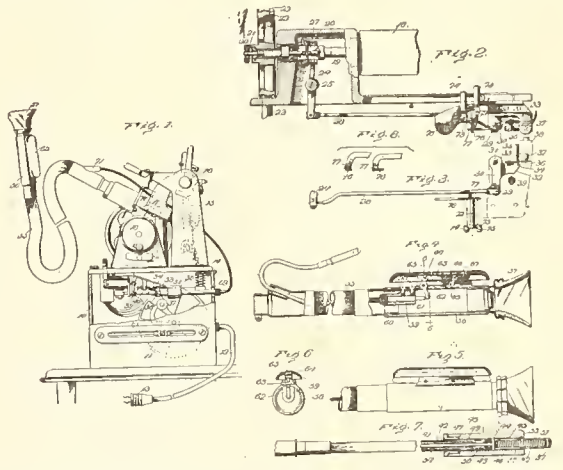
START AND STOP DEVICE FOR TALKING MACHINES.—Clinton E. Woods, Bridgeport, Conn., assignor to the American Graphophone Co., same place. Patent No. 1,203,088.

This invention relates to talking machines, and more partieularly to the start-and-stop mechanism thereof, and has for its objeet to provide a simple, convenient and efficient means for starting and stopping the operation of the parts, whether it be the starting and stopping



of a motor, or the starting and stopping of parts operated by a continuously moving motor.

Generally stated, the invention consists in any suitable start-and-stop mechanism, such as a switch that may be closed or opened for the purpose of admitting electric current to or excluding it from the motor, or a clutch mechanism which may be closed or opened for the purpose of connecting the moving parts of the maehine to, or disconnecting them from, a continuously driven motor. Said start-and-stop mechanism in the present invention is combined in operative relation with one terminal of a flexible power transmitting means, a Bowden wire being the means most suitable. The other terminal of the power transmitting means is freely movable bodily in any direction relatively to the start-and-stop mechanism, and is adapted

(*Continued on page* 114)

to be manually manipulated to control the said mechanism. By the term "manually," as hereinafter used, is meant, not only a hand-operated, but a foot-operated, mechanism, or any other means that is actuated by the operator to impart the desired movement to the power transmitting means.

In said drawings Figure 1 is a cross sectional view, with parts in elevation, of a talking machine of the "Dictaphone" type, embodying the invention; Fig. 2 is a longitudinal vertical section, partly in elevation, illustrating the operation of the device; Fig. 3 is a plan view corresponding to Fig. 2, some of the parts being omitted; Fig. 4 is a longitudinal section, partly in elevation, of the speaking tube, showing one means for operating the Bowden wire from the speaking tube; Fig. 5 is an elevation of the mouth-end of the speaking tube; Fig. 6 is a cross section on the line 6—6 of Fig. 4; Fig. 7 is a longitudinal section, partly in elevation, showing the Bowden wire and the mounting for one of the terminals thereof; and Fig. 8 is a detail.

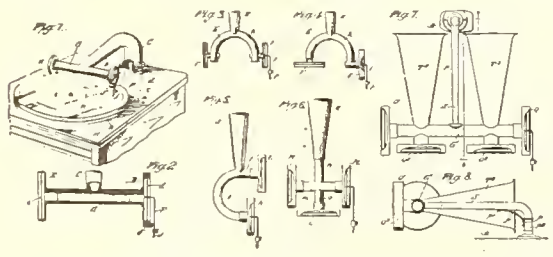
TALKING MACHINES.—Patrick B. Delany, South Orange, N. J. Patent No. 1,202,973.

The object of this invention is to improve the tone and enunciation of talking machines and to eliminate as much as possible the metallic notes or sounds more or less incident to all such machines.

It has been found that if a secondary diaphragm be properly combined with the usual diaphragm or if the usual sound-box be properly combined with an auxiliary diaphragm equipped box and both be made to transmit their vibrations to a common horn, amplifier or tone arm or to horns receiving sound waves from all the diaphragms the desired results above mentioned may be obtained.

In carrying out the invention, two boxes are employed, one, called the primary box, being equipped with a vibratory arm carrying a reproducing needle as usual, and the other or secondary box, being of similar construction but without a vibratory arm and needle. These boxes are preferably though not necessarily mounted at opposite ends of a tube or air chamber communicating with the mouth of an amplifier, horn or tone arm, the arrangement being such that the vibrations produced in the primary box are transmitted to the seconadry box, cause the diaphragm thereof to vibrate and to thus produce secondary sound waves which join the sound waves produced in the primary box and pass with them through the tone arm or other conductor or amplifier to the listener. In this way a clearer, sweeter and more attractive reproduction is obtained.

In the accompanying drawings: Figure 1 is a perspective view of so much of a talking machine as is necessary to show one way of embodying the improvements. Fig. 2 shows a section through a part of a tone arm and air chamber and the primary and secondary boxes applied thereto according to the invention. Figs. 3 to 6, inclusive, show various modified ways of



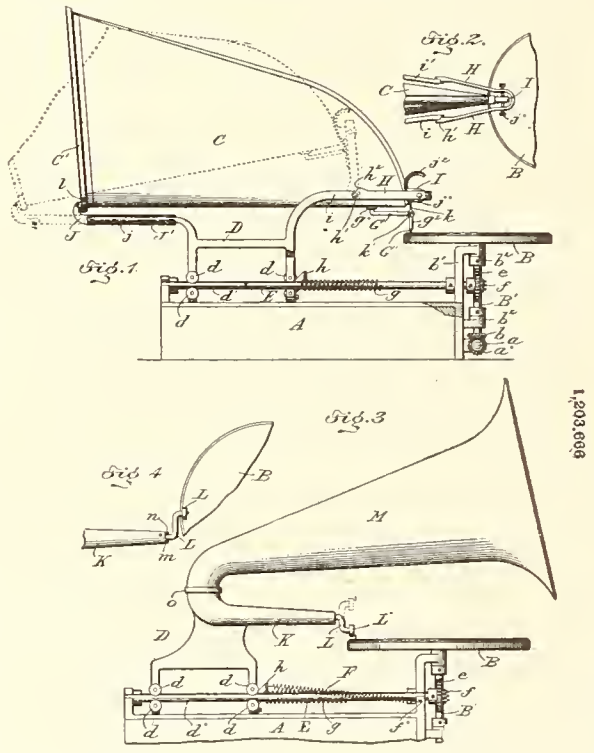
embodying the invention. Fig. 7 shows how a primary box and a plurality of secondary sound boxes may be combined with a plurality of horns, tone arms or amplifiers; and Fig. 8 indicates how the extra weight imposed on the tone arm by the boxes may be compensated.

PHONOGRAPH.—Edwin Walker, Erie, Pa. Patent No. 1,203,666.

This invention is a phonograph or gramophone, the broadly new feature of which consists of means for mechanically carrying the reproducer and horn and positively moving the same relative to or across a rotating record.

In the present invention the machine is equipped with a traveling carriage which is separate from a rotatable record carrier and is operated independently thereof, said record carrier rotating on a fixed axis, and said carriage being in a rectilinear path movable toward and from said record carrier. On said sliding carriage there is mounted the reproducer and horn, the stylus of which is arranged to travel in the groove of the record, and with said carriage co-operates means for positively moving the same, whereby the reproducer and horn are moved in a positive manner and across a record on the aforesaid rotatable record-carrier.

According to one embodiment of the invention, the traveling carriage and the reproducer are equipped with means which permits the operator to readily lift the reproducer away from the record, and to support such reproducer firmly in place while adjusted in a non-working position. Said construction enables the operator to remove a record from the record carrier, and replace it by another one, without danger of mutilating or scratching either record by the



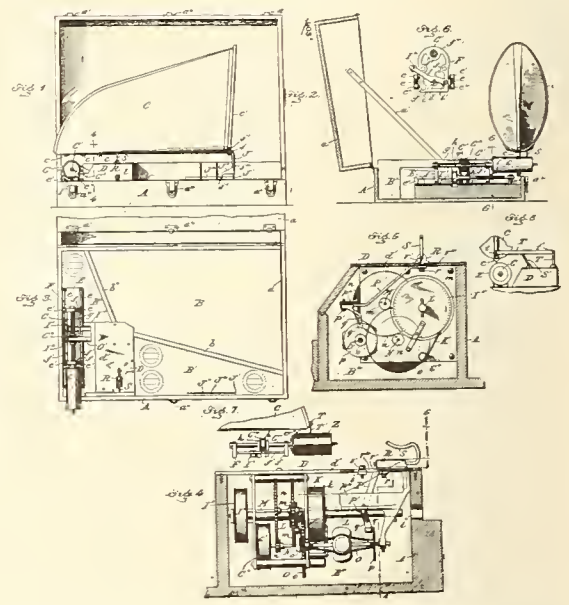
stylus of the reproducer. At the same time, the reproducer and horn are supported in position against accidental dislodgment, and can be easily and quickly replaced for operation after the fresh record is placed on the record carrier.

Figure 1 is a side elevation of a phonograph embodying the invention, certain parts being shown in vertical section. Fig. 2 is a detail plan view showing a portion of the construction illustrated in Fig. 1. Fig 3 is a side elevation of another style of gramophone embodying the present invention. Fig. 4 is a detail view of a part of the machine shown in Fig. 3.

PHONOGRAPH.—Edwin Walker, Erie, Pa. Patent No. 1,203,667. This invention is a phonograph the carrier for the record of which is simultaneously rotated and given a traveling movement with respect to a relatively stationary reproducer.

According to the present invention, the reproducer is, preferably, equipped with means for supporting it firmly in either of several adjusted positions. Said supporting means restrains the reproducer from sidewise movement in a horizontal plane, but permits free movement in a vertical plane. One element of the aforesaid supporting means is foldable into compact relation with the reproducer when the latter is dismounted and packed in a portable case, whereby the reproducer may be easily removed or replaced, as desired.

Figure 1 is a side elevation showing the portable case in an open position and the parts of the phonograph adjusted in position ready for use, the combined horn and reproducer being supported in a raised position with respect to the record carrier or mandrel, in order that a cylindrical record may be placed readily on said carrier or mandrel. Fig. 2 is a vertical cross section, through the portable casing showing certain parts of the machine in longitudinal section and side elevation, the combined horn and reproducer being illustrated in end elevation. Fig. 3 is a plan view of the portable casing and the phonograph, the horn and reproducer being removed. Fig. 4 is a vertical section on an enlarged scale and in the plane indicated by the dotted line 4—4 of Fig. 1 looking in the direction of the arrow, the reproducer and horn being omitted. Fig. 5 is a vertical



section taken on the line 5—5 of Fig. 4 looking in the direction of the arrow. Fig. 6 is a detail cross section through a part of the carriage, showing the feed shaft and the feed lever or traveler which co-operates with said shaft, the plane of the section being indicated by the dotted line 6—6 of Fig. 2. Figs. 7 and 8 are views in side and end elevation illustrating another embodiment of the invention.

Other patents issued relating to talking machines and parts, but not illustrated in this department are:

Sound Box.—Peter Weber, Orange, N. J. Patent No. 1,197,782.

Sweeper for Records of Talking Machines.—A. Herman, New York. Patent No. 1,198,127.

Convertible Sound Box.—Archie E. Parnell, Chicago, Ill. Patent No. 1,198,265.

Sound Reproducing Machine.—Forest Cheney, Chicago, Ill. Patent No. 1,198,416.

Acoustical Instrument.—L. Lumiere, Lyon, France. Patent No. 1,198,464.

Talking Machine.—Albert A. Huseby, Chicago, Ill. Patent No. 1,198,636.

Cabineted Phonograph.—Nathan Shafran, Monticello, N. Y. Patent No. 1,198,782.

Gramophone.—Marcelo Vignali, Montevideo, Uruguay. Patent No. 1,198,977.

Reproducer Attachment for Phonographs.—Willard G. Adams, Weedsport, N. Y. Patent No. 1,199,040.

Talking Machine.—Max Krauss, Philadelphia, Pa. Patent No. 1,199,192.

Tone Purifier for Talking Machines.—Charles P. Marshall, Watertown, N. Y. Patent No. 1,199,197.

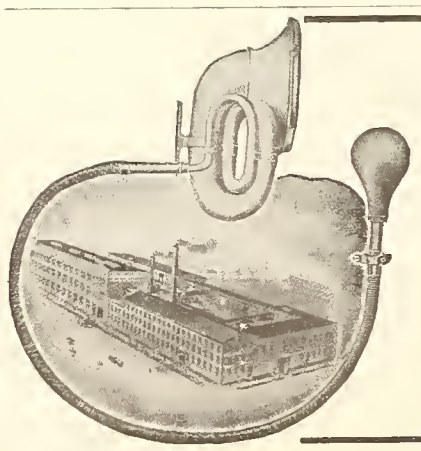
Scratch Muffler for Sound Reproducing Machines.—August C. Rutzen, Cleveland, O. Patent No. 1,199,206.

Playing Brush Record—Stanislaw Wisniewiski, Erie, Pa. Patent No. 1,200,154.

Gage for Sound Boxes.—Henry C. Miller, Waterford, N. Y. Patent No. 1.200,212.

Sound Reproducing and Recording Machine.—Patrick B. Delany, South Orange, N. J. Patent No. 1,199,968.

Sound Modifying Device.—Thomas A. Edison, West Orange, N. J. Patent No. 1,201,499.



TONE ARMS
TURNTABLES

For many years we have been the only manufacturers of good metal phonograph horns, and recently we have added equipment for making Tone Arms and Turntables of highest quality.

TALKING MACHINE EXPORTS

WASHINGTON, D. C., December 3.—In the summary of the exports and imports of the commerce of the United States for the month of September, 1916 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures regarding talking machines and supplies appear:

Talking machines to the number of 7,955, valued at $181,847, were exported for September, 1916, as compared with 2,110 talking machines, valued at $61,924, sent abroad in the same month of 1915. The total exports of records and supplies for September were valued at $106,054, as compared with $78,216 in September, 1915. For the nine months 45,210 talking machines were exported, valued at $1,128,602 in 1916, and 19,434, valued at $558,033, in 1915, while records and supplies valued at $823,858 were sent abroad during 1916, as against $574,505 in 1915.

FORMAL OPENING IN WHITE PLAINS

Public Much Impressed With New Quarters of Hunt's Leading Music House in That City

WHITE PLAINS, N. Y., December 2.—The formal opening of the new quarters of Hunt's Leading Music House, at 114 Main street, this city, was held on Saturday, and, owing to the fact that the opening was announced in full-page advertisements in the local papers and by other means, it attracted a great amount of attention. Large crowds took the opportunity to visit and inspect the new warerooms and enjoy the special musical program. Hunt's Leading Music House features very successfully the Laffargue, Brambach baby grand and other makes of pianos and players and also does a large business in Victrolas.

The new quarters have been elaborately fitted up. The front section of the store is given over to the Victrola department, and is equipped with a number of sound-proof demonstrating booths, finished in ivory white and furnished artistically and comfortably. The main piano warerooms occupy the rear section of the ground floor. The basement is used for player-pianos, music rolls and additional booths for Victor record demonstrations. Among those who attended the opening were: R. W. Morey, general manager of the New York Talking Machine Co., and Roger N. Lagow, district representative for the Victor Talking Machine Co.

If Satan goes to church he doesn't do any sleeping during the sermon. It may be said that he sets a good example by being wideawake and ready for business six days and Sundays.

GRINNELL BROS. OPEN NEW STORE

Remodeled Headquarters in Flint, Mich., Are Attractively Furnished and Decorated

FLINT, MICH., November 27.—The remodeled store of Grinnell Bros. was opened here last week, under the management of E. J. Beard. The new store is finished in old ivory, a large window giving opportunity for fine displays. Several sound proof booths for the demonstration of the Victor line are located at the rear of the piano warerooms on the first floor.

Sach's drug store and music shop, of Harvey, Ill., has moved to quarters in the King Hotel, a very attractive demonstration room for Victor-Victrolas being a feature.

ATTRACTIVE DIAMOND DISC EXHIBIT

NEW OLEANS, LA., November 27.—The Diamond Disc Shop held a very attractive exhibit at the National Farm and Live Stock Show recently. Recitals were given frequently, and the handsomely decorated booth attracted much attention from the throngs who visited the show. The exhibit was in charge of S. T. Brannan.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

Why this is "The Highest Class Talking Machine in the World"

1—Universal Playing

THE Sonora is **designed** to play all makes of disc records perfectly. It was so designed **before** it was built; no make-shifts or awkward, unsatisfactory devices are added to secure this decided advantage.

2—Tone Quality

FOR tone quality the Sonora is without a peer, winuing the highest score for this at the Panama-Pacific Exposition in competition with the world's foremost phouographs and talking machines.

3—Tone Control

AT the sound source, the proper place, is the Sonora tone control. It is simple in desigu, but remarkably effective in expression. This is another notable Sonora patent that assists in making this instrument the very best one that human ingenuity has been able to devise.

4—Sound Box

THIS assists in reproducing the golden tones and is noteworthy for its excellence of construction. Made from the best of materials, it sends forth notes that are clear, distinct, accurate and beautiful.

5—Automatic Stop

ON all machines there is placed an automatic stop, which is decidedly convenient and useful. It is simple and mechanically correct, and gives added pleasure and enjoyment.

6—Cabinet Work and Design

THE Sonora is extraordinary for the exceptional beauty of its design and cabinet work. The graceful, flowing lines ("Bulge" effect) are the result of a patented process and are **exclusive** with Sonora.

7—Motor

THE motor is made in Switzerland by experts with generations of experience, and plays about twice as long as do motors of other machines sold at similar prices. For constructional excellence, durability, and strength, it is the supreme motor of the phonograph world.

8—Sound Amplifier or Horn

THE sound amplifier helps create the wonderful tone that the Sonora is noted for. It is made on scientific principles and with special treatments that are exclusive with us.

9—Envelope Filing System

THIS is a marvel of simplicity and convenience. Records are instantly available and can always be located where and when they are desired.

The Complete Instrument

THE assembled machine is an aggregation of individually perfect parts correctly combined. As a result, the tone is of unrivaled clarity and magnificence, with a depth of expression that makes the Sonora unqualifiedly "The Highest Class Talking Machine in the World."
