BUREAU OF INSTALLATION.

LENGTH (EAST AND WEST), 1,880 FEET,

WIDTH 464 FEET,

HENRY PETTIT,
Chief of Bureau.

KINGSFORD'S OSWEGO STARCH

HAS BECOME A
HOUSEHOLD NECESSITY.

By its great **PURITY, UNIFORMITY** and **EXCELLENCE** it has secured a higher reputation and more extensive use than any other, and by its greater **STRENGTH** is found to be the most **ECONOMICAL** in use.

The **SILVER GLOSS STARCH** is far superior to all others for dressing **LACES, LINENS, MUSLINS**, and all fine fabrics.

KINGSFORD'S OSWEGO CORN STARCH (or Prepared Corn) is the most delicious of all preparations for **PUDDINGS, BLANC MANGE, CUSTARDS, &c.**, and on account of its greater purity and delicacy, is preferable to Bermuda Arrow-Root.

The manufacture of these delicate articles from **INDIAN CORN** were the sole invention of **MR. KINGSFORD** more than Thirty years ago.

The name of **T. KINGSFORD & SON** is on every box and package.

REPORT ON KINGSFORD'S OSWEGO CORN STARCH (or PREPARED CORN), BY DR. HASSALL, of London.

I have subjected to microscopical examination and chemical analysis a sample of Kingsford's Oswego Corn Starch (or, Prepared Corn).

I find that it consists entirely of the starchy portion in the form of innumerable granules of the grain of Indian corn, free from the oil and nitrogenous products contained in the whole grain. That it has been very carefully prepared is shown by its color and by the absence of cellulose and albuminous compounds. The article is in fact to be regarded both chemically and dietetically as an arrow-root. It may be remarked of this preparation, with which I have been acquainted for many years past, that it is carefully prepared, very pure, and that, taken in conjunction with milk or beef tea, constitutes a valuable article of diet.

ARTHUR H. HASSALL, M. D.,

Author of "Food and its Adulterations" "Adulteration Detected." Editor of "Food, Water, and Air."

MAIN EXHIBITION BUILDING.

Main Exhibition Building, the largest of the five principal buildings, is situated on Elm avenue, east of Belmont avenue, having a frontage on the former of 1880 feet, and a width of 461. It is constructed of iron, wood and glass; the larger portion of the structure being one story in height, the interior height being 70 feet.

The East Entrance will form the principal approach for carriages, visitors being allowed to alight at the doors of the building under cover of the arcade.

The South Entrance will be the principal approach from street cars, the ticket offices being located upon the line of Elm avenue, with covered ways provided for entrance into the building itself.

The Main Portal on the north side communicates directly with the Art Gallery, and the Main Portal on the west side gives the main passage way to the Machinery and Agricultural Halls.

The form of the building is such that all exhibitors will have an equally fair opportunity to exhibit their goods to advantage. There is comparatively little choice of location necessary, as the light is uniformly distributed, and each of the spaces devoted to products is located upon one of the main thoroughfares.

The articles to be exhibited in the Main Building will comprise a display of the products of Mining and Metallurgy, Manufactures, also instruments and works relating to education and science.

WIDTH 360 FEET.

JOHN S. ALBERT,
Chief of Bureau.

THE IMPROVED Hoosier Grain Drill,

70,000 in use
In the Middle and Western States.
The Simplest and Most Accurate Grain Drill in the Field.

A positive and reliable
FORCE FEED.

Sows any desired quantity of all kinds of Grain or Seed, without Changing Gear Wheels, and will not bunch or crack the Grain.

THE IMPROVED Hoosier Drill

has given complete satisfaction, and is the general Favorite of the Farmers and Dealers of the Middle and Western States.

The opposite cut shows our
NEW FORCE FEED

The Sliding in or out of the Fluted Wheel attached to the Feed Rod running through the Cup, makes the Cup larger or smaller, by which means the quantity of Grain to be Sown is regulated.

No Wheels or Complicated Gearing is required to be changed.

THE Hoosier & Campbell CORN DRILLS.

30,000 IN USE

Saves Labor and Yields 10 to 20
Bushels

More per acre than when
planted in any other manner.

These Drills have been introduced and in use in the Corn growing regions of the Western States for several years, and the principle of Drilling Corn is becoming more popular every year. With these Machines, one man can plant ten acres per day after the ground is put in order.

Also, Beans, Broom Corn, and Osage Orange can be planted with more uniformity, and more correctly, than in any other way.

Drilled Corn will yield more than when planted in any other manner, and can be cultivated with less labor and expense.

HOOSIER DRILL CO.,

MANUFACTURERS,

MILTON, WAYNE COUNTY, INDIANA.

MACHINERY BUILDING.

MACHINERY BUILDING, on a direct line with Main Building, is 542 feet from the west front of the latter. It is 1402 feet long and 360 feet wide, with an annex of 208 feet by 210 feet, for Hydraulic Machines. South of this Building is situated the Boiler Houses, and Shoe and Leather Building.

The east entrance will form the principal approach from street-cars, from the Main Exhibition Building, and from the railroad depot. The west entrance affords the most direct communication with George's Hill, which point affords the best view of the entire Exhibition grounds.

The materials used in its construction are wood and glass.

Here will be exhibited *all machines, tools and apparatus used in mining and manufacturing, except those applicable to farm economy.*

Many processes will be shown in actual operation.

JOHN SARTAIN,
Chief of Bureau.

MEMORIAL HALL. ART GALLERY.

This structure is located on a line parallel with and northward of the Main Exhibition Building.

It is on the most commanding portion of the great Landsdowne Plateau and looks southward over the city.

It is elevated on a terrace six feet above the general level of the plateau—the plateau itself being an eminence one hundred and sixteen feet above the surface of the Schuylkill River.

The entire structure is in the modern renaissance. The materials are granite, glass and iron. No wood is used in the construction, and the building is thoroughly fireproof. The structure is 365 feet in length, 210 feet in width, and 59 feet in height, over a spacious basement 12 feet in height, surmounted by a dome.

The doors, which are of iron, are relieved by bronze panels, having the coats-of-arms of all the States and Territories.

In the centre of the main frieze is the United States coat-of-arms. In this will be exhibited

Works of Art, embracing Photography, Mosaic and Inlaid
Work of this and Foreign Countries,
PAINTING, SCULPTURE AND ENGRAVING.

HACKNEY COACH FARES.

UNLESS, before entering the carriage, a different bargain is made, the following are the rates hackmen are entitled to:

For carrying one person one mile or less.....	\$ 75
“ two “ “ “	1 25
“ each additional passenger one mile or less.....	25
“ one person more than one and not exceeding two miles.....	1 25
“ two “ “ “	1 75
“ each additional person more than two miles.....	25
“ one person more than two miles, each additional mile or part of a mile over two miles.....	50
“ each additional passenger “ “ “ “ “	50

For the use of a carriage by the hour, with one or two passengers, stopping as often as required, each hour..... 1 50

For each additional passenger, more than two, per hour..... 25

If not expressly agreed for by the hour, the hiring is by the mile.

Twelve blocks, of one hundred numbers each, is counted as a mile.

Children between five and fourteen years of age, half fare.

Children under five years age, to the number of one for each two grown persons, must be carried free.

Each passenger is entitled to have conveyed, without additional charge, one article of baggage not exceeding 100 lbs. in weight, and for each additional article or excess over 100 lbs., ten cents.

Each carriage must be registered, and have in a conspicuous place a card printed in English, French, Spanish, and German, giving the registered number of such carriage, and the name and residence of the owner.

Drivers of carriages are also required to have the number of their carriage in plain figures on the lamp, in which a light shall be burning in the night, so as to make the number plainly visible.

Drivers of carriages must be licensed, and wear a badge bearing the word “HACK,” in bold Roman letters.

The penalty for an overcharge is a forfeiture of the fare for which the overcharge was made, and also a forfeiture of the license.

Penalties attach for violating the ordinance in other respects.

In case of dispute, apply at the Mayor's office.

ROAD

DESCRIPTION OF PLATE.

THE annexed Lithograph shows in ground plan, the principal buildings and numbers of minor ones erected within the Centennial Enclosure, which contains not less than 450 acres.

On the opening day of the Exhibition, (MAY 10,) it is anticipated that, at least 250 buildings will have been erected on the grounds, thus presenting the appearance of a well-appointed city, cosmopolitan in character, in which the stranger from every clime may feel well provided for.

A cursory glance at the plate shows prominently in the western portion, the grounds reserved for West Point Cadets, the various State structures, and British Government Building. Eastward are seen the Women's Pavilion, Buildings for Germany, Brazil, Japan and Sweden; Photograph Hall, Judge's Hall, Dairy Building, Carriage Factory, Restaurant Sudreau, Photograph Gallery, Art Gallery and Extension, and lastly the Vienna Bakery.

North of these are situated Horticultural Building, German and American Restaurants, Kansas Building, and most northward of all is Agricultural Building.

South of the two principal buildings are located three hotels of large capacity for the accommodation of visitors. Depot for passengers, and grounds for Exhibition of Live Stock.

The following table gives the area covered by each building :

	Acres.
The Main Building covering	21.47
Art Gallery (Memorial Hall)	1.50
Machinery Hall	14.00
Horticultural Hall	1.50
Agricultural Building	10.15
Making a total	48.62
Add to this, other structures, such as the Women's Pavilion, Government, Leather, Carriage, and Photograph Buildings, special Agricultural displays, annex, and Engine House	15.00
And it will give, of actual flooring for Exhibition purposes, about.	63.62

This is exclusive of the space occupied by the buildings erected by foreign nations, the several States, and for general purposes connected with the Exhibition.

GUIDE TO PLACES OF AMUSEMENT.

- American Centennial Exhibition—Lansdowne Plateau, Fairmount Park.
Commences May 10, 1876, remaining open six months.

PHILADELPHIA.

AGRICULTURAL BUILDING.

AGRICULTURAL BUILDING is located on the north-east section of the Centennial enclosure, and most distant from the Main Building. It was commenced on October 15th, and will be finished by March 15th. Erected for the temporary exhibition of six months, it is not of the same substantial character as some of the other buildings.

The design of the structure comprehends a grand nave, formed of a Howe truss arch, 826 feet long, 100 feet wide, and 70 feet high, and three transepts, each 540 feet long, and nearly of same width, the entire floor area of ten acres being open and unobstructed.

The system of the location of goods exhibited will be objective, not geographical; the various groups, of which there are ten, running lengthwise with the building. The area of available exhibition space is 236,572 square feet, of which one-third has been appropriated to foreign countries—Great Britain, France, Germany, Austria, Norway and Sweden, Russia, Belgium, Netherlands, Spain, Italy, China, Japan, Siam, Sandwich Islands, Chili, Brazil, Mexico and Canada. The remaining area is for the exhibition of American products, the requisitions for which exceed double that area.

The display of Agricultural Machinery, both in motion and at rest, will cover nearly three-eighths of the entire building. In addition to machinery there will be exhibited in this building, Products of the Soil, Food Products, Forestry and Forest Culture, Pomology, Farm Administration, Cotton and Wool, Veterinary Surgery and Fish, including the varied apparatus and appliances for their culture and capture.

Agricultural Building not being sufficient to accommodate all exhibitors, another of smaller size will be provided adjacent to the same, and including exhibits of a similar character.

Live Stock, under the administration of this department, will be exhibited on grounds in close proximity to the enclosure for a season of ten weeks. This exhibition will be of a highly meritorious character, and will embrace the most finely bred animals of this and foreign countries.

During the months of June and July will be held trials of Harvesting Machinery on lands situated at Schenck's Station on the Philadelphia & New York Railroad, thirty minutes ride from the Centennial Grounds. There will also be practical tests of tillage implements, during September and October, on the same lands, as shown in lithographed plate.

NOS. 21 & 23 SOUTH SIXTH STREET,

Near the State House,

PHILADELPHIA.

This spacious Building, erected expressly for the Proprietors' Trade, is stored with articles of general interest to Farmers, Gardeners, and Planters, and especially with

SEEDS OF RELIABLE QUALITY,

Chief of Bureau.

HORTICULTURAL BUILDING.

Horticultural Building is located on Lansdowne Terrace, a short distance north of Main Building and Art Gallery, offering a fine view of the Schuylkill River and Northwestern Philadelphia. It presents an extremely handsome appearance, and being constructed of iron and glass will remain as a permanent ornament to Fairmount Park. It is 383 feet long, 193 feet wide, and 72 feet high.

The main floor is occupied by a central conservatory. Running entirely around these at the height of 20 feet is a gallery 5 feet wide.

Four forcing houses are provided for the propagation of growing plants. Surrounding this building thirty-five acres of ground devoted to Horticultural purposes have been suitably planted.

PLACES OF INTEREST.

Academy of Fine Arts, Broad Street above Arch. Admission, 25 cents.

Academy of Natural Science, Broad street below Chestnut Open Tuesdays and Fridays, P. M. Admission 10 cents. New Hall S. W. cor. Nineteenth and Race sts.

Surveys made, work measured, mineral lands examined and professional information given.

Special attention given to designs for the Centennial International Exhibition.

1876

WOMEN'S PAVILION.

1876.

WOMEN'S PAVILION.

West of the Horticultural Hall, facing Belmont Avenue, stands the Women's Pavilion, which has been built at a cost of \$35,000, by the Women's Centennial Executive Committee, and is to accommodate an international exhibition of women's work. It covers an area of 30,000 square feet, and is formed by two naves intersecting each other, each 64 feet wide by 192 feet long, having at the end a porch 8 by 32 feet; the corners formed by the two naves are filled out by four pavilions, each 48 feet square. The whole structure is in modern wood architecture, roofed over by segmental trusses. The centre is raised 25 feet higher than the rest of the building, and is surmounted by a lantern, with a cupola 90 feet high.

PROPOSED RAILROAD RATES.

At the meeting of the Committee on Centennial Rates to the General Ticket and Passenger Agent's Association, the following was proposed as the basis of rates for the Centennial Exhibition :

First.—Round-trip tickets to New York, good for thirty days, may be sold from Detroit, Toledo, Cleveland, Crestline, Columbus, Cincinnati, and points west thereof, in the territory east of Omaha, and at competitive points south of the Ohio river, at a reduction of twenty-five per cent. from Convention rates.

Second.—Round-trip tickets to Philadelphia, good for thirty days, may be sold from Detroit, Toledo, Cleveland, Crestline, Columbus, Cincinnati, and points west thereof, in the territory east of Omaha, and at competitive points south of the Ohio river, at one dollar less than the round-trip rates to New York.

Third.—Round-trip tickets to Philadelphia, via New York, good for thirty days, may be sold from Detroit, Toledo, Cleveland, Crestline, Columbus, Cincinnati, and points west thereof, in the territory east of Omaha, and at competitive points south of the Ohio river, at one dollar more than the round-trip rates to New York.

Fourth.—From the territory east of Detroit, Toledo, Cleveland, Crestline, Columbus and Cincinnati, the basis of reduced rates and the limit for round-trip tickets shall be fixed by the trunk lines, and from competitive points between the trunk lines, in said territory, the rates to Philadelphia, via New York, shall be two dollars more than the rates to Philadelphia by the direct or short line.
