ADDENDUM ON WAGES IN AGRICULTURE 1914-1924.....	44		

WAGES AND HOURS OF LABOUR IN CANADA, 1920 TO 1925

THE present bulletin is the ninth in the series on Wages and Hours of Labour, the first having been issued as a supplement to the *LABOUR GAZETTE* for March, 1921, and giving figures as to wages and hours of labour in certain trades in various cities in Canada from 1901 to 1920, with index numbers by groups based on wages in 1913 as 100. Reports numbered two, three, four and six in the series continued this record with certain additions. Report No. 5 dealt with Hours of Labour in Canada and Other Countries. Report No. 3 contained also statistics of wages and hours in coal mining in Canada from 1900 to 1921 with index numbers for the three principal districts and Report No. 7 covered the years 1920 to 1924 and included figures for agriculture from 1914 to 1923. Report No. 8 gave additional statistics for factories, etc., for 1920 to 1924.

The main object of these reports is to show the changes in wage rates and in hours during the periods covered. In each report the figures given constitute as far as is possible a continuous record and in each instance throughout the report the figures are from the same source, continuity being thereby assured within reasonable limits. The figures in each report are not necessarily in continuation of those in previous reports as from year to year more sources of information are available.

In the building trades, metal trades, printing trades and in employment on electric street railways the figures are given for thirteen cities throughout Canada. Information is secured from union agreements and from reports of representative employers and of trade unions secured each year. These reports are supplemented by figures secured by officers of the Department and by correspondents of the *LABOUR GAZETTE* resident in each city. The statistics as to building trades show the prevailing rates of wages and hours of labour for eight classes of labour for the years 1920 to 1925 inclusive for the building season beginning in the spring of each year. In the metal trades the figures are for metal manufacturing industries and do not include wages in the metal trades on railways, in mining, construction, etc.

Wages in manufacturing and various other industries are shown by samples. For common labour in factories, these are given by localities. The figures are secured from reports from employers and from such union agreements as are available.

On steam railways, wages of employees on the regular staffs are fixed according to agreements between the several railways and the organizations of railway employees, the principal railways paying the same rates to nearly all the principal classes. The figures published are taken from these agreements.

In coal mining, the wages in the principal districts are arranged by agreements between the coal mining operators and the employees, in some cases represented by unions and in others committees of employees. The figures published are taken from such agreements. In some of the mines in each district the wages of unorganized employees are somewhat lower than those in the agreement. In metal mining the rates of wages and hours of labour are shown as samples for mines in the various parts of Canada.

For civic employees wages of policemen, firemen and labourers are included and shown by localities. For laundries, grain elevators, telephones, and electric current production and transmission the figures are given by samples, as for factory labour.

Index Numbers of Wage Rates

In Report No. 1 tables of index numbers were given in order to show the general trend of the movement in rates of wages. The first set of index numbers was for the rates of wages from 1901 to 1920 in the thirteen selected cities. For each series of rates, that is, for each trade or occupation in each locality, index numbers were calculated both from the hourly rates and from the weekly rates, and these index numbers were averaged for all localities, by groups, thus indicating the percentages of changes in weekly rates and in hourly rates. The year 1913 was taken as the base period, that is, the rate for 1913 in each case was taken as 100, so that the index numbers showed the percentages of changes from time to time prior to and since that date. An average was also made for all of the series in these tables, in order to indicate the general trend in wages in such trades as a whole. In making the average index numbers the simple arithmetical averages were taken. In Report No. 3 this table of index numbers for the thirteen cities was brought down to September, 1921.

In subsequent reports the table of index numbers of hourly rates only since 1901 have

been reproduced, the figures since 1921 being calculated by ascertaining the average increase or decrease per cent in the figures for each group each year from the figures for the preceding year and adjusting the group index number accordingly. The index numbers therefore show approximately the movement of wage rates in each group for the past year as compared with the movement in previous years and show current levels as compared with levels in 1913. In Report No. 3 index numbers of daily rates in coal mining were given, calculated in the same manner as the index numbers in Report No. 1. The index number for the coal mining group since 1921 was calculated in the same manner as those of the other groups.

labour unions. The statistics given in these tables, therefore, show wage rates and hours of labour in a number of organized occupations in certain cities at the dates under review. They do not, however, indicate the changes in wages outside of industrial centres.

The index numbers calculated from sample rates of wages show to some extent the trend of wages for labour in factories, and for the lumbering industry as compared with the changes in the classes mentioned above.

Changes since 1920

The table of index numbers here given includes the figures referred to above for each group with yearly averages for all groups for which figures are available from 1901 to 1925.

TABLE OF INDEX NUMBERS OF RATES OF WAGES FOR VARIOUS CLASSES OF LABOUR IN CANADA
1901-1925

(Rates in 1913 = 100)

Year	Building Trades	Metal Trades	Printing Trades	Electric Railways	Steam Railways	Coal Mining	* Average	Common Factory Labour	Miscellaneous Factory Trades	Logging and Saw-milling

*Simple average of six preceding columns.

A table of index numbers of wages for factory trades, for common labour in factories, and for lumbering, calculated from the sample rates published was also given for the period 1911 to 1920 in Report No. 1. This was brought down to 1924 in the same manner as the other index numbers since 1921 were calculated.

The classes of labour for which rates were used for the calculation of the index number table for the period 1901 to 1925, are, in the main, skilled trades; and practically all of these, even the unskilled, are in most cities organized to a great extent in trade and

It will be seen that by 1920 wages had reached levels almost one hundred per cent higher than in 1913, in some groups the increase being over one hundred per cent while for the building trades and steam railways the increases were appreciably less, being only about eighty to eighty-five per cent. Since 1920 all groups have shown some decreases, although printing trades and coal mining were higher in 1921 than in 1920, declining somewhat thereafter, the decreases in coal mining in 1925 being comparatively steep and tending to reduce the average for all groups.

In the building trades up to 1919 there were smaller increases than in any of the other groups, but in 1920 there were considerable increases. In 1921 decreases of 10c. per hour were general and in 1922 decreases of 5c. per hour were numerous. In 1923, 1924 and in 1925 while there were upward movements in the averages it was due to increases in particular trades and in certain cities and not to an upward movement general for most of the trades and localities.

In the metal trades the increase in wage rates up to 1920 was greater than in most of the other groups, there being a good demand for labour in the manufacture of munitions. During the industrial activity in 1919 and 1920 further increases were made, but in 1921 and 1922 considerable decreases were made. In 1923 and 1924 some recovery was experienced, but in 1925 there was practically no change.

In the printing trades up to 1920 increases were about the same as in the building trades, but in 1921 when many of the three or five year agreements between employers and the unions expired rates were advanced and hours were reduced in many cases. Since 1921 there have been some reductions but these were only in a few localities and in some cases were followed by increases later.

In electric railway service, rates had almost doubled by 1920 but declined slightly in 1921

and 1922 but recovered somewhat in 1923 and very slightly in 1924 and 1925. Reductions in rates were general in 1921 and 1922.

In steam railway employment, wage increases were considerable in 1918, 1919 and 1920, but in 1921 decreases averaging about twelve per cent for all classes were made and in 1922 decreases for shop crafts, maintenance of way employees and for freight handlers, clerks, etc., were made averaging about ten per cent.

In coal mining the index number reached its peak in 1921, increases having been made in the closing weeks of 1920. In 1922 decreases were made in some districts and in other districts in 1923 and 1924. In 1925 decreases occurred in the three principal districts, being especially steep in Alberta and southeastern British Columbia (as in 1924) where no decreases occurred until 1924.

In wages for common factory labour rates had more than doubled by 1920 but fell steeply in 1921, again in 1922 and slightly in 1923 but recovered a little in 1924 and in 1925. In miscellaneous factory trades the recovery began in 1923 but also appeared in 1924, a decrease appearing in 1925 in the average.

In lumbering considerable decreases appeared in 1921 with recoveries in each year thereafter until 1925 when reductions again occurred.

TABLE I.—RATES OF WAGES AND HOURS OF
