H. H. BERGER & CO'S RICE LIST

SAN FRANCISCO
CALIFORNIA

FOR THE TRADE
ONLY
1895-1896

Citrus trifoliata. (See page 16.)

1878.

1895-6.

To Our Friends and Patrons.

WE PRESENT you herewith our Catalogue for the season of 1895-96, and, while thanking you for patronage bestowed on us heretofore, we trust to be again favored with your orders. Our endeavor shall always be, as it has been within the past *seventeen years* since the establishment of our house, to do all in our power to give satisfaction.

The stock we offer is of the best, and our packing is done with such care that we can *guarantee safe arrival* of bulbs and plants, accidents or delays to carriers excepted.

EARLY ORDERS, especially for goods in larger quantities, are indispensable to insure delivery at specified times. We are at all times willing to give any information relating to freights, time of transportation, or any other points relating to our business.

TERMS.

All bills are payable sixty days from date of invoice, unless otherwise agreed upon.

UNKNOWN CORRESPONDENTS must send cash with order, or furnish satisfactory reference. *No accounts will be opened for less than \$10.*

DISCOUNT.—On bills paid within 30 days from date we allow a discount of 2%.

REMITTANCES are to be made by Bank Draft, P. O. Money Order, or money in letters, which latter must be registered to insure safety.

PACKING.—No extra charge is made for boxes, packing or shipping.

SHIPPING DIRECTIONS should be given clearly and explicitly; that failing, we use our best judgment. In making out orders, use our Order Sheet.

All complaints must be made within one week from receipt of goods; otherwise, no cognizance can be taken of them.

Address all letters to

H. H. BERGER & CO.,
San Francisco, California.

← **SPECIAL NOTICE.**—On **LARGE ORDERS** for any of the stock mentioned in this Catalogue, proportionate discounts will be given, and we invite correspondence. We give estimates, and any particulars desired. →

Japanese Lily Bulbs.

NOTE—READ CAREFULLY.

TIME of delivery begins October 1, except with Longiflorums, which are ready the end of August. We repack all bulbs on arrival from Japan from the heavy clay into sawdust, sort out every decayed bulb, and guarantee the arrival of bulbs in **sound condition**, delays or accidents to carriers excepted. Prices given below are f. o. b. San Francisco. If desired we will, on application, give you **net prices delivered**; or, you can calculate for yourself.

- Bulbs, 8 to 9 inches, packed for transport in sawdust average weight per 1,000, 375 pounds.
- “ 9 to 11 “ “ “ “ “ “ “ “ “ 500 “
- “ 11 to 13 “ “ “ “ “ “ “ “ “ average weight per 1,000, 600 to 650 “
- Small Bulbs, 6 to 8 inches weight per 1,000, from 50 to 200 “

We will also import, for any one willing to risk it, bulbs direct from Japan. Prices are about 40 per cent. less f. o. b. Yokohama, and bulbs will be shipped right through to destination. All freight, custom and transfer charges are payable by consignee, and **any and all responsibility** on our part **ceases with delivery of goods on board** steamer at Yokohama. This offer applies only to orders of at least 1,000 bulbs. Bulbs shipped from Japan are packed in clay, weighing double the weight of bulbs repacked in sawdust.

Any information relative to shipping, prices, etc., will be cheerfully given.

Special Notice.

We have found it of the *greatest value* in our trade, especially with retail customers, to whom the mere name of a bulb, plant or tree carries no special meaning, to use pictures or representations of the article in question. To further our end, and to introduce the floral beauties of Japan more and more into our favored land, we are now prepared to supply

PICTURES TRUE TO NATURE,

in no instance exaggerated or beautified, of the following:

- | | |

REBLANC
PHILIP.

Japanese Chrysanthemums.

In the fall of '95 we are prepared to ship as follows: **Choice Collections of the Novelties of '94.** Strong clumps, \$3 per 10, \$25 per 100.

Novelties of '95. Prize winners of Chrysanthemum shows in Japan. 10 root-stalks, \$10.

☞ Pictures and descriptions of above will be sent on application.

For all other California-grown and Collected Bulbs we have a separate List, which will be sent on application. List contains Calochorti, Brodiaea, Fritillarias, etc.

PALMS.

CYCAS REVOLUTA.

These Palms are imported in a dormant state, with roots and fronds cut off, and we can deliver only from February to May. As our collector leaves for the southern islands of the Japan Sea at the end of November, all orders should be in by that time, as we do not import any large quantity over orders, and these stems cannot be kept on hand. This applies especially to larger orders.

We guarantee our stock to be the best in the market—true *Longifolia*, with well-developed hearts. Stems are sold by weight, customers giving sizes wanted. Best terms for quantities on application. Will develop magnificent leaf-crowns, if placed on bottom heat, in two to three months. Samples of small stems can be sent by mail, or four-pound packages by express. If you want your full money's worth of this grand Palm write us, and we will send full particulars.

Price to any point in the United States, net, \$12 per 100 pounds, \$100 per 1,000 pounds, delivery included.

Cycas revoluta.

RHAPIS.

This Palm grows mostly in groups of from three to thirty stems.

Variegated. Extra fine double sorts. Same price as Pure White Double.			

CAMELLIA SASSAMQUA.

(See List of Pictures.)

A species of Camellia which deserves particularly to be known. The flowers are produced from early in September to December. Foliage and flowers much smaller than Camellia Japonica. The flowers of many sorts are deliciously fragrant. Following varieties are the choicest:

Early Snow. Pure white, double; profuse bloomer, often having 200 to 250 blooms on one plant. 60 cts. each, \$5 per 10, \$40 per 100.

Rose and White variegated. Large flower; single.

Rose-Carmine. Single.

Red and White spotted. Single; beautiful for window culture.

	Each	10	100
12 to 24-inch	\$0 30	\$2 50	\$20 00
15 to 30-inch	50	4 50	40 00

JAPANESE AZALEAS.

These compare very favorably with the Belgian sorts, and we offer them this season at a particularly low figure to introduce them more largely. They force well, are literally covered with blossoms, and have a wide range of color.

Azalea mollis. In three shades—lemon-yellow, scarlet or salmon.

A. Sinensis alba. Very large, white flower; single.

A. S. rubra. Very large, red flower; single.

A. indica, var. Otsu. Salmon-red, white at base; single.

A. striata. White and red striped and spotted. One bush often bears pure red and pure white at the same time.

A. Yodogawa. Pale lilac; double.

A. Rollisonia, or balsaminiflora. Bright salmon-pink; flowers very double, like a balsam; prolific bloomer.

UNNAMED VARIETIES.

Brilliant Red. Small flower; profuse bloomer.

Rosy Lilac. Small flower; profuse bloomer.

Salmon-Red. Small flower; profuse bloomer.

White. Double, with greenish center.

Carmine and White striped.

Prices given are for bushy, good sized plants. \$4 per 10, \$30 per 100.

RHODODENDRON Metternichi. Exquisite large, rosy flower, in immense clusters. \$2 each, \$15 per 10.

Azalea.

Evergreen Flowering Shrubs.

MOST USEFUL FOR WINTER FORCING.

I. latifolia. Very long leaves; very much resembles <i>Ficus elastica</i>	50	4 50			

We can ship all these plants with perfect safety to any point east by freight. Freight rates on shrubbery, under which we classify all plants, \$2.60 per 100 lbs. Add about 5 to 7 cts. to each plant, and you have net cost to you.

Aspidistra lurida.

Deciduous Flowering and Ornamental Trees and Shrubs.

Japanese Maple.

JAPANESE MAPLES.

Foremost among ornamental stock are the Japanese Maples, which for beauty of coloring are unsurpassed. They are yearly gaining in favor, and for effective grouping in landscape gardening they are invaluable and unrivaled.

RED-LEAVED SORT.

Acer polymorphum sanguineum. Bright blood-red.

DARK RED or MAROON-LEAVED SORTS.

- Acer p. atropurpureum.*
- A. p. a. dissectum.*
- A. p. a. scolopendrifolium rubrum.*

YELLOW and GREEN and YELLOW-LEAVED SORTS.

- **Acer p. aureum.* Golden yellow.
- A. p. pictum aureum.* Green, variegated with yellow.
- A. p. reticulatum.* Green, with network of golden yellow.

GREEN-LEAVED SORTS.

- Acer p. palmatum,* or *Japonicum.*
- A. p. filicifolium.*
- A. p. dissectum.* Green.
- A. p. scolopendrifolium.* Green.

VARIEGATED-LEAVED SORTS.

- Acer p. atropurpureum variegatum.*
- A. p. a. dissectum variegatum.*
- A. p. pictum albi.* Green and white variegations.
- A. p. versicolor.* Pink, green and white.
- A. p. roseo-marginatus.* Green, with clear rose margin.

We furnish all these sorts and others, which can be selected from pictures, as per our "List of Paintings," in sizes as follows:

Prices of Japan Maples—

	10	100
1 to 2 feet	\$2 00	\$15 00
2 to 3 feet	3 00	25 00
3 to 4 feet; extra fine	5 00	40 00

Extra specimens, over 4 feet, \$1 and upwards. Varieties designated with a star (*) can be furnished in the smaller sizes only.

To secure good stock, orders for Maples should come in EARLY. We import from November 1 to March 1.

Maple Seedlings, for grafting, \$3 per 100, \$25 per 1,000, \$200 per 10,000.

Japan Maples. 5 to 7 sorts grafted on one stem; very beautiful and odd. 75 cts. each, \$6 for 10. Same, with two stems, twisted and grown together; grafted with 5 to 7 sorts. 75 cts. each, \$6 for 10.

DECIDUOUS MAGNOLIAS.

Magnolia conspicua. Large, fragrant white flowers, with deep carmine corolla; flowers appear prior to foliage.

M. stellata. Exquisite double, starry flowers, rosy white and very fragrant; invaluable for Easter forcing.

M. Kobus. Blooms profusely; white flowers, reverse of petals pink shaded.

M. hypoleuca. Stately ornamental tree, with extremely beautiful foliage.

M. obovata. Red flowers; interior pearly grey, outside reddish purple; very beautiful.

M. obovata. Purple; darker tints.

M. Watsoni, or *parviflora oyama.* The beautiful fragrant white flower stands upright.

M. parviflora Gio Kuse. The flower droops bell-like from its stem.

We furnish in above sorts fine flowering plants:

	10	100
12 to 20 inches high	\$3 00	\$25 00
18 to 30 inches high	4 50	35 00

Magnolia.

EVERGREEN OAK TREES.

	Each	10	
3 <i>Quercus cuspidata</i> . One of the finest evergreen trees in the world; leaves like the Bay tree		\$0 50	\$4 50
3 <i>Q. Buergeri</i> . Same as <i>cuspidata</i> , but foliage bluish green		60	5 00

EVERGREEN MAGNOLIAS.

	Each	10	100
<i>Magnolia grandiflora exoniensis</i> . Native of China. The foliage and flower are same as our Florida Magnolia, with the exception that the Chinese Magnolia, which is grafted, blooms when only 1 foot high. 1 to 2 feet		\$0 40	\$3 00 \$25 00
2 to 3 feet		75	7 00 60 00
3 <i>M. compressa</i> , or <i>Banana</i> Shrub		45	4 00 35 00
3 <i>M. fuscata</i>		60	5 00 40 00

	Each	10	
<i>Magnolia Michelia Champaca</i> . A novelty, with very fragrant blossoms		\$1 00	\$7 50
Same variety, <i>longifolia</i>		1 00	7 50

JAPANESE FLOWERING PRUNUS, ETC.

These exquisite double-flowering Prunus, etc., are most desirable for forcing, and would adapt themselves especially for EASTER DECORATIONS.

- 3 *Prunus Mume*. (Japan Flowering Plum). In pure White, Rose, Deep Red—single and double.
 - 3 *Prunus pseudo-Cerasus*. (Flowering Cherry.) In all the above colors.

	Each	10	100
Rosa rugosa. Red	\$0 30	\$2 50	\$20 00
“ “ White	35	3 00	25 00
Goyabara, Crimson Rambler. Strong, pot-grown plants	25	2 00	18 00

NOVELTY, WHITE RAMBLER.

Same as Crimson Rambler, but PURE WHITE; DOUBLE. Stock small. \$1 each, \$7.50 per 10.

White Rambler Rose.

FROM A PHOTOGRAPH BY FRANK S. H. PLATT SIX FEET HIGH TRAINED TO A STAKE

Bamboo.

This wonderful plant, so invaluable to eastern nations, is gradually gaining favor with us as *useful* as well as *ornamental*. In our more southern states it grows with as great vigor and rapidity as in Japan, and there as no reason why varieties for both use and ornament should not be profitably grown in quantity. We give herewith a descriptive list, comprising all Japanese sorts, with their respective Japanese names.

GIANT SORTS.

- ↓ **Bambusa, Common Giant.** Attains a height of 40 feet, 4 to 5 inches in diameter.
- ↓ **Bambusa, Moso-chiku.** *Giant sort*; 6 in. in diameter; height of 30 feet.
- ↓ **Bambusa, Taisan chiku.** Of rapid and easy growth. Diameter, 2 to 3 inches; height, 40 feet.

Prices for Giant Bamboos, \$4 per 10, \$30 per 100.

☞ **Root cuttings** of above giant sorts, 75 cts. per 10, \$6 per 100, \$50 per 1,000.

ORNAMENTAL AND FANCY SORTS.

- ↓ Attaining a height of 10 to 20 feet.
- ↓ **Bambusa, Hakone-chiku.** Slender stems; very ornamental.
- ↓ **Bambusa, Ha-chiku.** Stem 2 inches in diameter; much used for furniture making.
- ↓ **Bambusa, Kinmei-chiku.** Stem green and yellow striped.
- ↓ **Bambusa, Kau-zau-chiku.** Very ornamental; bushy growth, slender stems.
- ↓ **Bambusa, Tai-ko-chiku.** Slender stem; 10 feet.
- ↓ **Bambusa, Taimin-chiku.** Slender and ornamental.
- ↓ **Bambusa, Kuro-chiku.** Black-stemmed Bamboo. One of the most beautiful. Stems 1 to 2 inches in diameter. Same in black and green variegations.
- ↓ **Bambusa Yadake.** (Arrow Bamboo.) Foliage distinct from others, being broad and trifoliate.
- ↓ **Bambusa quadrangularis.** Square-stemmed Bamboo; highly interesting. Much used for walking canes.
- ↓ **Bambusa, Shibo-chiku.** Wrinkled stem. Much used for umbrella handles.

☞ We furnish fancy and ornamental Bamboos at 50 cts. each, \$4 per 10, \$35 per 100.

DWARF VARIETIES OF BAMBOO.

- ↓ **Bungo Sassa.** Small, slender, grassy Bamboo. Loves shade. 2 to 3 feet.
- ↓ **B. agrestis.** Slender stem; height 4 to 5 feet, ½ inch in diameter. Variegated leaves.
- ↓ **B. sananensis.** Dark green leaves, white margin. Very ornamental. Loves a shady place.
- ↓ **B. pygmaea.** Grassy; ornamental.

☞ We furnish Dwarf Bamboos at 50 cts. each, \$4 per 10, \$35 per 100.

Bamboo.

Conifers.

Umbrella Tree.

SCIADOPITYS.

The famous Umbrella Pine of Japan. Has been recognized as the grandest conifer in the world. Its appearance is truly wonderful. It attains a height of 80 feet in extra fine, well-shaped specimens.

	Each	10	1,000
12 to 18 inches	\$0 40	\$3 50	\$30 00
18 to 24 "	65	6 00	50 00
24 to 30 "	1 75	15 00	
30 to 36 "	3 00	20 00	
36 to 48 "	4 50	40 00	

Larger specimens, up to 10 feet. We have imported these successfully, and many are growing now in the east, especially in the state of Massachusetts.

These Pines are perfectly hardy, and especially fine for decorations.

DWARF CONIFERS.

In any variety desired.

Araucaria excelsa. The Norfolk Island Pine.

	Each	10	1,000
4 to 6 inches	\$2 50	\$20 00	\$200 00
6 to 12 "	\$0 65	6 00	50 00
12 to 18 "	1 00	9 00	75 00
18 to 24 "	1 25	12 00	
24 to 30 "	2 00	17 50	

Price for larger specimens on application.

Fresh Araucaria Excelsa seed comes in by September. Per lb., \$5. Order at once.

A. Bidwillii. Same price as above.

POT-GROWN CONIFERS.

	Each	10
Abies firma and other <i>Abies</i> sorts. Strong plants in pots	\$0 50	\$4 50
Cryptomeria Japonica	30	2 50
C. elegans	30	2 50
Cunninghamia Sinensis	60	5 00

Aspidium cordifolium. Long, hanging fronds. 2 to 3 feet	30	2 50
A. falcatum	25	2 00
A. viridescens	25	2 00
Asplenium nidus. (Bird's Nest.) Broad leaves. Attains a height of 3 to 4 feet	60	5 00
Onychium Japonicum in tufts. Very fine	30	2 50
Pteris serrulata. Thread-like long leaves	25	2 00
P. serrulata. Leaves with white stripe	30	2 50
Woodwardia Orientalis	30	2 50
Lygodium Japonicum. Climbing Fern	30	2 50

Araucaria excelsa.

Stauntonia hexaphylla.

JAPANESE TREE FERNS.

From the Southern Islands.

Cyathea spinulosa. Slender stems, long, glossy green fronds; especially adapted for table decorations. 6 to 12 in. high . . . \$0 50 \$4 00 \$35 00
 12 to 24 inches high 1 00 7 50 65 00

Davallia bullata. The roots of this Fern are worked into curious shapes — balls, globes, rings, ships, birds, and other novel and interesting forms—which render the plant very curious and attractive when covered with young fronds in spring. Very salable at retail, and attractive at a florist's store. Can be shipped, when dormant, like bulbs, from December to March 40 3 50 30 00

AQUATIC PLANTS.

Nelumbium speciosum. In Pure White, Rose, Red and Striped, Single and Semi-double. Large, full roots \$1 50 \$12 00
 Single roots 1 00 7 50

Trapa bispinosa. Water Chestnut. Interesting on account of the curiously shaped seed, like an ox-head with horns 25 \$2 00

CLIMBERS and CREEPERS.

Extra Strong Plants.

	Each	10
Actinidia polygama	\$0 50	\$4 00
Akebia quinata	30	2 50
Berchemia racemosa. White blossoms; later, beautiful China blue berries	40	3 50
Clematis florida. White, double	50	4 00
" paniculata	25	2 00
Clematis. Large white, single	40	2 50
" Large white, double; sweet-scented	50	4 50
" Large violet, single	40	3 50
" Lilac, double	50	4 50
Kadsura Japonica. Interesting greenhouse climber. Foliage glossy green; blossoms wavy cream white; berries brilliant red, like glass. Extremely beautiful	45	4 00
Pueraria Thunbergiana. Perennial vine; papilio violet flowers	20	1 50
Tecoma grandiflora. Fiery red, large, trumpet-shaped flower	40	3 50
Schizophragma hydrangeoides. Climbing Hydrangea	40	3 50
Wistaria Sinensis. Blue, single	45	4 00
" " Blue, double; rare	1 00	7 00
" " White	45	4 00
" brachybotrya. Double, white	60	7 50
Stauntonia hexaphylla. Flowers like large bells, pure white; foliage bright green and large. Fruit juicy, edible	50	4 00
Rubus rosaefolius. White, double, climbing rose; fine	30	2 50

Rosa rugosa.

HEDGE PLANTS.

Citris trifoliata. No plant is better adapted for forming impenetrable hedges, owing to the strong, spiny character of its stems. Does not sucker. Covered in spring with flowers the same as orange blossoms. Bears in fall a fruit in color and shape like our orange; not edible in raw state; is used in Japan to prepare jam. \$2 per 100, \$17 per 1,000.

Rosa rugosa. This beautiful shrub is too well known to need description. A hedge of the two contrasting flowers is a sight worthy to remember. \$2.50 per 10, \$20 per 100.

Photinia glabra. Foliage rosy pink, then red, later green. Flowers erica-like, pure white; in fall, black. Berries very much like *Laurustinus*. \$2.50 per 10, \$15 per 100, \$120 per 1,000.

Viburnum odoratum. Green; quick grower. Forms a dense head. White flowers, red berries; very desirable. Half-hardy. \$2.50 per 10, \$20 per 100.

Bambusa Hotei. Forms an extra fine wind-break. Grows rapidly. \$2.50 per 10, \$20 per 100.

These plants are pot-grown, and form large growths immediately upon being put in open ground. Plant in winter.

SEEDLINGS FOR GRAFTING.

Order Early.

	100	1,000	10,000
Maple Seedlings	\$3 00	\$25 00	\$200 00
Pear Seedlings	2 00	17 50	150 00
Chestnut Seedlings	2 50	20 00	150 00
Citrus Seedlings	2 00	17 50	150 00

ECONOMIC PLANTS.

Broussonetia papyrifera. Paper plant, or Tree of Japan; seedless	10	100
Cinnamomum Camphora. 18 to 24 inches. From it is prepared gum camphor	\$1 50	\$10 00
C. sericeum. 12 to 14 inches. The cinnamon of commerce is gained from the rind	\$45 per 1,000	75 5 00
Elaeococa cordata. (Oil Tree of Japan)	2 50	20 00
Mentha arvensis. The famous menthol is gained from it	2 00	15 00
Morus alba. (White Mulberry.) The silk worms are fed with the foliage . .	1 50	10 00
Quercus serrata. Deciduous. Same use as the above	1 50	10 00
Rhus vernicifera. (Lacquer Tree.) The inimitable Japan lacquer is produced from it	2 50	20 00
R. succedanea. (Vegetable Wax Tree.) Candles are made from the berries . .	1 50	10 00
Thea Sinensis. The world-known tea plant	1 50	10 00
Ulmus montana laciniata. From the north. Fiber is used for mats. Grows into a grand tree. Hardy . . .	2 50	20 00

NEW FODDER PLANTS.

POLYGONUM SACHALINENSE.

Roots and seeds are imported from September to November. Roots, \$4 per 100, \$30 per 1,000. Seed, \$3 per lb., \$25 per 10 lbs. Also very ornamental as a lawn plant. (See descriptive sheet, with picture.)

PUERARIA THUNBERGIANA.

Foliage fine for fodder. Roots contain a starch-like substance, equal to the finest corn starch. Roots, \$4 per 100, \$30 per 1,000.

THE CANAIGRE PLANT.

(*Rumex hymenosepalus.*)

This plant has of late come into great prominence and importance. The roots of this plant are largely used for tanning, as, when sliced and dried, they contain 30 to 35 per cent. tannic acid. Can be shipped safely and easily at any time. Very easily grown on any soil. We furnish roots at \$3 per 100, \$20 per 1,000; fresh seed, \$3 per pound.

Canaigre.

ORCHIDS.

From Japan.

Easy of cultivation, amply repaying all trouble and expense made necessary. Mostly *cool-house*. Very fine when grown in masses.

	Each	10	100
Acrides Jap. Very deliciously scented. Pure white, lilac lip; handsome	\$0 25	\$2 00	\$15 00
Angraecum falcatum. Ivory white, with long spur; very odd in appearance	25	2 00	15 00
Bletia hyacinthina. Red	25	2 00	15 00
" " White	50	4 50	40 00
Calanthe discolor. Large yellow flower	50	4 50	40 00
C. Japonica. White or rose	50	4 50	40 00
Cypripedium Japonicum	1 00	7 50	
C. macranthum	1 00	7 50	
Dendrobium moniliforme. White and blush; very good. Full pots	75	6 00	
Phajus grandifolius.	60	5 00	

From Mexico and Central America.

MOSS.

Best packing moss, for florists; clean and well packed in crates. Per crate, average 80 to 100 lbs., \$4.

ORCHID FIBER.

This is the very finest material for growing Orchids. It is the most durable for that purpose ever found. Is always called for wherever tried. Has been in use for ten years in Golden Gate Park, San Francisco, and nothing better has been found to take its place. It grows on trees in the mountains of the North Pacific Coast. Per crate of average 100 lbs., \$4.

Polygonum
Sachalinense.

Polygonum

→ Sachalinense

THIS newly discovered fodder plant is sure to win favor wherever introduced. It is a native of the Island of Sachaline, a desolate region, and, true to its native land, it thrives on either gravelly and dry, or wet soil, and can endure the severest drought. It bears changes of temperature unharmed, and grows with amazing rapidity. Tilling of the ground is unnecessary. The greatest value of the plant consists in its being most excellent cattle food, principally for horses, who devour the young shoots and leaves with avidity. The best plan is to mow the young shoots off when about 5 feet high, and they are still tender, and to give them either as green fodder, or they may with advantage be dried in the usual way. In France, where extensive trials have been made with this plant, it has been ascertained that even in the first year it yields two or three crops, in the following year three or four may be obtained, and that the weight of a green crop may be safely estimated as from 100 to 200 tons per English acre. The chemical analyses has further shown that *Polygonum sachalinense* is extremely nutritious, exceeding in this quality even trefoil. The contents of protein in the dry substance have meanwhile been found by Professor Soxhlet to be 18.97 per cent.

Cultural Directions.

The seed may be sown in the beginning of March in a hot-frame, one-fourth an ounce on a square yard, covered barely half an inch with light soil, which is pressed down slightly, and must be kept moist and without air and sun until the plants appear. These must be gradually hardened off and accustomed to air and light, and not be neglected with watering. Sowings may also be made with advantage in November and December, in rows and covered with half an inch of soil. Soon after the surface of the ground is warmed by the April sun the young plants will make their appearance, and must only be guarded against night frosts, against which they are very sensitive. By the end of May the young plants are strong enough for planting, which is done at a distance of about 18 inches. Seed may also be sown in spring and summer into the open ground, but care must then be taken to guard it with a thin covering of clean moss against the hot rays of the sun. Transplanting of *P. sachalinense* may be done at any time in summer, if damp and dull weather is chosen. The plants are carefully lifted and transplanted without bending the roots upward in planting, the soil well pressed down, and well watered in dry weather. The plantation has to be kept clean from weeds at first. In the first year the plants may be cut only once, and it must be done when the stalks are still tender. In the following year they are cut when the stalks are about three feet high, as they are then juicy and greedily eaten by the cattle, and as in this way three good crops in a season may be secured.

Roots and seeds are exported **fresh** from September to November.

Roots, 50 cts. per 10, \$4 per 100, \$30 per 1,000.

Fresh Seed, \$3 per pound, \$25 per 10 pounds.
