3. As for price authorization of impounded rice

Kataoka, Chief of Food Section, EIA outlined as follows:
As a step in conformity with the abolishment of Foodstuffs Distribution Kodan, decision was reached on the principles how to dispose of the confiscated rice and the notice thereof was delivered. However there is room for doubt on the detailed points and the opinion about the matter is to be inquired of Food Office.

With regard to the disposition of the confiscated rice, article by article explanation was made by Mr. Kamikawa, Director of Food Office on the notice issued by the Director General, Foodstuffs Board.

The Director, EIA set forth his findings:
On the agreement reached formerly among prefectural governors, Food Office and EIA, it is preferable to work out a proper countermeasure after drastic re-examination lest they should be troubled by such a inefficient doubt and waste to the extent that the labourious work is reduced to an awkward decision.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

The part of Food Office gave an all-out consent to the fact that the questions on the detailed points should be arranged and laid their wish to have an assembly of persons in charge of the actual affairs. This was assented unanimously and was decided to refer the problem to the sectional committee meeting at the first possible moment.

Subsequently, the representative of Public Procurators' Office asked for explanation on the doubt with regard to the construction of the wording of the regulation.

The reply was given by the side of Food Office that this will sound Foodstuffs Board on the doubtful points in relation to the Price Board Notification No.613.

The following two items were here to be brought up for discussion. However, these are much concomitant problem with the overture submitted by Public Procurators' Office and were reserved for the subsequent item --- (Subject No.6)

a) Government purchase price of polished wheat is not designated in the notification issued on 18th Dec. '50. --- (Subject No.4)

b) Supervision of the controlled amount of sales price of cereals except pulse category have no regulations to go by. --- (Subject No.4)

6. <u>Doubtful points on the staple food controlled prices designated anew and the counter-measure thereof.</u>

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

On this item views were set forth by the representative of Public Procurators' Office as follows:

In view of the discontinuance of the Price Board Notification No.2 effective on 29th Dec. '50, competent authorities have no way of maintaining strict control over wheat flour and cereal, however dear those would be dealed by blackmarketers. Since the date of abolishment of the said notification, all the violations against Price Control Ordinance have been left to take its own course, from the point of view that the supervision on such violations lacks the regulations to go by. Under these circumstances, lack of the controlled price of wheat flour substantially makes the supervisions delicate, even if violations on large scale are passing under the very investigators' eyes. The Public Procurators' Office entertains a doubt on it.

In the meantime, some contradict can be seen on the authorization of price of pulse category, which does not meat with realities in relation to the Price Board Notification No.613.

In this connection, taking many concrete instances the representative have doubtful points explained by Food Office and set forth his views to amend the regulation.

The Food Office replied to take a proper step to meat the situation after mature scrutinizing of the spirit of the regulation.

The director of EIA suggested to hold a sectional

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Committee meeting among Price Board, Foodstuffs Office, National Rural Police and MPB on this matter at the earliest possible date and obtained their consent.

7. Supervision of Designated Imported Daily Necessities.

On this subject Y. Shiraga, 2nd Division Chief, EIA outlined as follows:

The special investigation into sugar get underway beginning on 21st August '50 for two months mainly to disclose violations on sugar for domestic consumption. Since 1st Nov. '50 the investigation has also been expanded to the sugar for foreigners' use namely the sugar to which the Designated Imported Daily Necessities Regulation is applicable.

The results of the investigation cleared up by the date are as follows:

Objects investigated:	250
Cases judged as violations:	31
Violations indicted:	9
Violations to which administrative dispositions are demanded:	11

As for dealing of sugar for foreigners' use:

Volume of sugar imported without requiring foreign exchange from January '50 to the end of June of the same year: 6,221 tons (12,442,000 lbs.)

Volume of sugar licenced to import during the term July - August '50: 700 tons (1,400,000 lbs.)

5,000 tons

Ditto in October:- .....

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Number of aliens to be rationed totals 16,000 throughout the country, and the distribution volume stands at 6 lbs. per person per month. This means the total volume of sugar for registered foreigners' use totals 9,600 lbs. or 48 tons per months. If the volume for special facilities for the Allied Forces and others is estimated generously at 48 tons, all the requisite monthly volume numbers 96 tons. Even in U.S.A. the standard of the monthly distribution is 10 lbs. per person. In this rate, 160,000 lbs. or 80 tons of sugar is deemed to be sufficient for 16,000 registered foreigners and the said 96 tons is considered to be decently generous in estimation. Actually there is more or less stock, however, considerably much quantity was consumed and diverted into Japanese confectionaries and tea-rooms etc. through illegal channels.

As for blackmarketing:

OSS made import with requiring foreign exchange, while SPS without it.

The SPS totals around 760 throughout the country. They are clasified into three, namely wholesalers, retailers and those combined both.

From U.S.A. or others a few SPS import the sugar, which is blackmarketed by the rest of them. Such is the state of things. The imported sugar is disposed of by the importers, SPS through three steps. The monetary settlement is camouflaged legally by subtle ways. Consequently no violations can be

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

disclosed from the statement on ledgers.

Briefly the blackmarketing of sugar for foreigners' use is infracted by taking advantage of unrestricted permit of import without requiring foreing exchange and of weak points of the Designated Imported Daily Necessities Regulation. .....

So long as the existing regulation and system of import are kept up, the effective supervision can not be hoped for. In this consequence to root out the blackmarketing of sugar for foreigners' use we conclude the following measures to be taken inevitably keeping pace with the strengthening of supervision.

a) Unlimited registration of SPS should be abolished and an alternative system ought to be established in which after strict inspection the authorization of licence is confined to those who fulfilled the qualifications and the necessary conditions.

b) At present the means of payment in the transactions among SPS are not covertible yen but dollar cheque or bank-cheque mainly, which play the leading part in the subtle ways to cover the blackmarketers' trade.

The counter-measure now required are to seak some way to force SPS to conduct their dealings by convertible yen or yen only and in case of the latter, some influential steps should be worked out with a view to restrict the import.

c) Proper step should be taken to prevent MPC from diverting into illegal channels by forbidding the circulation of MPC.

d) SPS which have no store will have their business licenses revoked.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

The meeting was adjourned by the salutation of the Director, EIA hoping the cooperation and joint efforts among the relevant authorities for the sugar inspection with a view to clean up the indirect disturvance of economic control brought about by foreigners as the sugar forms the staple article for the Designated Imported Daily Necessities. .....

Subject: S.P.S. Lucky Star Store's violation case.

A report was submitted to you on the arrest of Tien Shiao Tung the further investigation of whom by Tokyo Prefectural E.I.B. disclosed the following violation. Charge was filed by the E.I.B. with Tokyo District Public Prosecutor's Office of the first fact of the violation on Dec. 21 and of the second fact on Dec. 27, 1950.

1. Lucky Star Store, under the joint investment by Tien Shiao Tung, "Kan Fuku Ryo", and Ikeda Kei, got the registration of S.P.S., and is running business at 7/6 Hongo, Bunkyo-ku, Tokyo. It bought 1,000 bags (one bag contains 12 "Kan"'s) of granulated sugar (designated imported daily necessities) from Japan International Corporation (Evergreen) and sold them to "Ham Sai Do" (who got the registration of S.P.S. at 1/2 Shinbashi, Minato-ku, but has no fixed address) in Japanese Yen and redeemed 200 bags out of them at 1,600,000 yen. It, further, had Suzuki Tsuno (an employee of the shop) sell 40 bags (250 "Kan") to Hirata Yoshimi at 1/7 Yushachi, Hongo Bunkyo-ku who is neither a S.P.S. nor a designated consumer at 375,000 yen exceeding 151,221 yen over the official price (fixed by Price Board).

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

2. It sold 250 bags (3,000 "Kan") of granulated sugar which is a designated imported dayly necessity to Sanada (who has no fixed address, no S.P.S. registration and is not a designated consumer) and five others (whose names are unknown) at 2,250,000 yen exceeding 1,344,480 yen over the official price fixed by Price Board in December.

Sub-section Chief Hara said; ---

The K.K.P. in cooperation with the autonomous police carried out control in November, when 126 offenders were rounded up and 123 offenders were sent to the public procurators and the grains seized amounted to 45,731 kg. The control would be tightened from Dec. 15. What had been seized in the meantime amounted to 959 kg.

Chief Manago of this Agency:

When the good result obtained was reported to the Civil Affairs Region, the officer in charge was pleased at the efforts made. Further efforts are desired in this respect.

Chief Kitamura

We are very much pleased at the favorable turn-ins of barley and wheat despite the heavy quota imposed. No particular movement of the Communist party was seen against the quota turn-ins of barley. An exception was noted in a certain Kawabata of Hachioji city. He is said to be habitual evader of the quota turn-ins.

The Hachioji city authorities desire a close investigation of this man and it is desired that strict investigation would be made of this man for fear of his example would be taken precedent, if no step were taken against him.

The rice quota was revised at the recent gubernatorial conference and all farmers were advised of the individual quota on December 22. It is our earnest desire that the quota would be fulfilled though there had been experienced some damage to the crops in the fall. As at Dec. 10, there was turned in 11,432 koku or 39.3% of the quota. By the end of December, it would reach 80% of the quota and we desire 100% would be collected early next January.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

2. Investigation concerning sugar imported without bills of exchange for foreign nationals use.

Agency chief explained about the S.S. and Second Division Chief Shirega explained about cases of violation involving sugar. He said sugar is being brought over from Yokohama and through brokers, it is being flown into illegal channels. But he said there is a difficulty of directly investigating the S.S. as no substantial proof could be produced. He said the best method would be to gain complete knowledge of the quantity of sugar being shipped to the S.S. and for that purpose, the Customs House would be requested to cooperate, to which Customs House agreed. He said there is much likelihood of practicing blackmarket deals in sugar shipped to S.S. because of the great quantity involved. Mr. Kakaoka said that the matter of increase of the budget would be taken up with the Ministry concerned on recommendation now being made by Regional Agency chief. Agency chief said then as there are some more items under control, there should be carried out strict control over them to ensure the living of the people and he requested cooperation of those concerned.

4. Report on the result of the audit conducted to the Fertilizer Distribution Kodan (Kodan Branch Office and outlying station).

V. Summary Proceedings:

1. On counter-measures for blackmarketings of staple foodstuffs:

Food Section Chief KATAOKA,

Of the Tokyo Pref. E.I.A., reported that the E.I.A. has been marking considerably good records is the checks and controls for the subject purpose with hand-in-hand cooperation of the M.A.F.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

and the Tokyo Metropolitan Police Board, and explained the contents of the matters consulted about at the All Kanto Bloc Conference for checks and controls of transportation which had been held at the Gumma Pref. E.I.A. on October 25, and required the Governmental agencies concerned to be cooperative to this E.I.A.

2. On the investigation of sugar:

Food Section Chief KATACKA

reported that, among the cases investigated by the Tokyo Pref. E.I.A. ——

a) Blackmarketing case of sugar allottee for drinks.

b) Blackmarketing case of sugar allotted for medical uses.

c) Blackmarketing case of sugar allotted for powdered fish, for which sugar is in fact unusable.

d) Blackmarketing case of sugar allotted for preservation of candies —— those balckmarketing cases as mentioned above amount to fifteen.(15), which are expected to be subjected to some administrative disposition.

2nd Dept. Chief SHIRAGA stated that this investigation of sugar is still in the preparatory stage but is steadily put forward upon the bases of considerably reliable informations that the blackmarketeered sugar is imported from U.S.A. and other countries without any allocation of foreign currency funds, at sirst to Yokohama, and then is moved into the Metropolis; and he added that this investigation would hereafter be carried out to the designated dealers for S.S. as well as restawrants, tea-rooms and confectioneries, and moreover, further strengthened investigation would be carried out to the great amount of sugar which is scheduled to arrive at Yokohama in early December of this year according to the Ministry of Trade and Industry.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

3. On how to handle the unpolished barley flowing into the metropolis under the pretext of fodder:

Food Section Chief KATAOKA asked, the N.R.P. for explanation of the recent case in which unpolished barley had come from Iwate Prefecture to the Metropolis and had been put on free sale under the pretext of foodders.

For this the N.R.P. made a detailed explanation. The Food Office, Ministry of Agriculture and Forestry, said that this measure taken by the Iwate Food Office was almost proper. The Governmental agencies charged with law enforcement said that, if the unpolished barley was flowing as fodder, that would be Okay, but, if the subject food was processed into pressed barley, that would be another metter. The Public Procurator's Office opined that would be in contravention of the Food Control Law. And at last Director NANAKO said that it was considered to be somewhat inadequate to bring this case to some conclusion at this conference, and so it was decided unanimously that this case would be discussed at another meeting of the governmental agencies concerned.

4. Report on the results of the audit conducted to the Fertilizer Distribution Kodan (Kodan Branch Office and outlying stations)

On the subject inspection conducted for the two weeks following 6 October of this year, 2nd Materials Section Chief SUDŌ reported as follows:

The subject inspection was conducted on the following points:

a) On the ratio between the budgets and the actual records.

b) On the amount of goods in hand.

c) On credits.

d) On interests for delay.

~~e) On advance payment customers~~

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

d) On advance payment by customers.

f) On the liquidation of properties.

Conclusion Reached:

As stated above, the inspection was carried out upon both the plase of accountings and that of business affairs, but there were found out no vital deficiencies nor vicious violations which were constituting abstacles to the progress of the liquidation of the Kodan.

Effect produced by Subject Inspection:

a) The inspection served for speeding up the collection of credits for a short period of time.

b) It served for expediting the business for liquidation.

c) It served for prevention of violations which otherwise would probably be committed.
