However, the public finance authority may lend money to political

²⁵ Section 6-09.4-06 was also amended by section 3 of House Bill No. 1431, chapter 80.

subdivisions through the purchase of securities issued by the political subdivisions through the capital financing program without regard to the principal amount of the bonds issued, if the industrial commission approves a resolution that authorizes the public finance authority to purchase the securities. The capital financing program authorizing resolution must state that the industrial commission has determined that private bond markets will not be responsive to the needs of the issuing political subdivision concerning the securities or, if it appears that the securities can be sold through private bond markets without the involvement of the public finance authority, the authorizing resolution must state reasons for the public finance authority's involvement in the bond issue. The public finance authority may hold such municipal securities for any length of time it finds to be necessary. The public finance authority, for the purposes authorized by this chapter or chapter 40-57, may issue its bonds payable solely from the revenues available to the public finance authority which are authorized or pledged for payment of public finance authority obligations, and to otherwise assist political subdivisions or other contracting parties as provided in this chapter or chapter 40-57.

2. The public finance authority may lend money to the Bank of North Dakota under terms and conditions requiring the Bank to use the proceeds to make loans for agricultural improvements that qualify for assistance under the revolving loan fund program established by chapter 61-28.2.
3. The public finance authority may transfer money to the Bank of North Dakota for allocations to infrastructure projects and programs. Bonds issued for these purposes are payable in each biennium solely from amounts the legislative assembly may appropriate for debt service for any biennium or from a reserve fund established for the bonds. ~~This section may not be construed to require the state to appropriate funds sufficient to make debt service payments with respect to the bonds or to replenish a related reserve fund. The bonds are not a debt of the Bank of North Dakota or the state. The full faith, credit, and taxing powers of the state are not pledged to the payment of the bonds. As of the date appropriated funds and reserves are not sufficient to pay debt service on the bonds, the obligation of the public finance authority with respect to the bonds must terminate, and the bonds are no longer outstanding. In addition to providing funds for the transfers, the public finance authority may use the bond proceeds to pay the costs of issuance of the bonds and establish a reserve fund for the bonds. Neither the obligation of the state to pay the bonds nor the obligation of the issuer to pay debt service will constitute a debt of the state or any agency or political subdivision of the state within the meaning of any constitutional or statutory provision. The issuance of the bond does not directly or contingently obligate the state to pay the bond payments beyond the appropriation for the current biennium of the state. The issuer has no taxing power. In addition to providing funds for the transfers, the public finance authority may use the bond proceeds to pay the costs of issuance of the bonds, capitalized interest, and establish a reserve fund for the bonds.~~
4. Bonds of the public finance authority issued under this chapter or chapter 40-57 are not in any way a debt or liability of the state and do not constitute a loan of the credit of the state or create any debt or debts, liability or liabilities, on behalf of the state, or constitute a pledge of the faith and credit of the state, but all such bonds are payable solely from revenues pledged or available for their payment as authorized in this chapter. Each bond must contain on its face a statement to the effect that the public finance authority is obligated to pay such principal or interest, and redemption premium, if any, and that

neither the faith and credit nor the taxing power of the state is pledged to the payment of the principal of or the interest on such bonds. Specific funds pledged to fulfill the public finance authority's obligations are obligations of the public finance authority.

5. All expenses incurred in carrying out the purposes of this chapter or chapter 40-57 are payable solely from revenues or funds provided or to be provided under this chapter or chapter 40-57 and nothing in this chapter may be construed to authorize the public finance authority to incur any indebtedness or liability on behalf of or payable by the state.

The notice must require the intended recipients to appear and assert the claims of the recipients to the property within sixty days from the date of the notice. The receiver shall make such agreements or arrangements as may be necessary for the disposition of property held by the closed institution for safekeeping and the contents of safe deposit boxes, and for the termination of any leases or other contracts relating to the property or contents.

6-07.2-14. Actions for enforcement or rights, demands, or claims vested in an institution or its shareholders of creditors.

Notwithstanding any other provision of state law, the receiver may, within five years from the date of closing of the institution, institute and maintain, in the name of the receiver, any action or proceeding for the enforcement of any right, demand, or claim that is vested in the institution.

6-07.2-15. Contents of articles of dissolution.

If the proceedings described in this chapter have been completed, the receiver shall execute and file, in the manner provided in this section, articles of dissolution, setting forth the following information:

1. The name of the institution;
2. The place where the institution's main office was located;
3. The names and addresses of the directors and officers of the institution at the time the liquidation proceedings were begun;
4. A brief summary of the aggregate amount of general claims finally allowed against the institution, the order in which the claims were paid, and the aggregate amount of all other claims against the institution. A statement of the aggregate payments made on each of the groups of claims must be provided, referencing the orders of the receiver authorizing those payments and the current reports documenting such payments; and
5. A brief summary of the aggregate amount of payments made to the shareholders of the institution, whether of money or other property, and a reference to the orders of the receiver authorizing the payments and to the current reports in which documentation of the payments is made.

6-07.2-16. Execution and filing of articles with department - Certificate of dissolution.

1. The articles of dissolution must be executed in duplicate and presented in duplicate to the department of financial institutions.
 - a. Upon presentation of the articles of dissolution, the commissioner shall endorse the commissioner's approval upon each of the duplicate copies of the articles if the commissioner finds the articles conform to law.
 - b. The commissioner shall file one copy of the articles in the department and issue two certificates of dissolution. The commissioner shall file one

certificate of dissolution with the department and shall deliver the second to the receiver.

2. Upon the issuance of the certificate of dissolution, the institution is dissolved and its existence ceases. Upon the issuance of the certificate of dissolution, the receiver is authorized, as agent for the directors and shareholders of any subsidiary trust company, to file any and all documents with the secretary of state necessary to terminate the subsidiary trust company's corporate existence under applicable corporate law.

6-07.2-17. Emergency temporary suspension or conservatorship.

1. If upon the examination or investigation of an institution regulated by the commissioner, the commissioner determines the laws are not being fully observed, that any irregularities are being practiced, or that the institution's capital has been or is in danger of being impaired, the commissioner shall give immediate notice of such determination to the officers and directors of the institutions. In addition, if it is deemed necessary in order to conserve the assets of the institution or to protect the interests of depositors and creditors of the institution, the commissioner may do any one or more of the following:
 - a. Temporarily suspend the right of the institution to receive any further deposits;
 - b. Temporarily close the bank, for a period not exceeding sixty days, which period may be further extended for one or more sixty-day periods as the commissioner may deem necessary;
 - c. Require the officers and directors of the bank to liquidate its outstanding loans insofar as required;
 - d. Recapitalize the institution;
 - e. Require that any irregularities be corrected promptly;
 - f. Require the institution to make reports, daily or at such other times as may be required to the commissioner; and
 - g. Without examination, close or appoint a receiver to operate, for such period as the commissioner may deem necessary, an institution facing an emergency due to withdrawal of deposits, a liquidity event in which the institution is unable to continue operations, a cyber or technology related incident, or otherwise, or, without closing the institution, grant the institution the right to suspend or limit the withdrawal of deposits, for such period as the commissioner may determine.
2. If an institution fails or refuses to comply with any such order of the commissioner, or if the commissioner determines a receiver for the institution should be appointed, the commissioner may apply for the appointment of a receiver to take charge of the business affairs and assets of the institution and to wind up the institution's affairs as provided in this chapter.
3. A bank or credit union may request a hearing before the state banking board or state credit union board within ten days of the emergency temporary suspension or conservatorship to review the factual basis used to issue the emergency temporary suspension or conservatorship. The decision made by

the state banking board or state credit union board during the hearing is final. If a hearing is not requested, the initial decision of the commissioner is final.

6-07.2-18. Voluntary liquidation of a bank.

1. An application for approval to voluntarily liquidate the affairs of a bank must be submitted to the commissioner in the manner and form that the commissioner may prescribe, must include the information set forth in this section, and must contain such additional information the commissioner may require. The application must include duplicate copies of a resolution authorizing the dissolution and duplicate copies of a certificate, verified by the applicant's president or chief executive officer or a vice president, stating the facts pertaining to the resolution and that the applicant's liabilities have been paid in full. Each duplicate certificate must have annexed to the duplicate, over the official signatures, evidence showing:
 - a. The date on which the resolution was authorized by the affirmative vote of the holders of at least a simple majority of the outstanding shares entitled to vote on the resolution;
 - b. The number of shares of each class entitled to vote on the resolution which were outstanding on the date of the stockholders' meeting;
 - c. The number of shares of each class entitled to vote on the resolution whose owners were present in person or by proxy;
 - d. The number of shares of each class voted for and against the resolution; and
 - e. The manner in which the meeting was called and the time and manner of giving notice, with a certification that the meeting was lawfully called and held.
2. Upon receipt of the application, the commissioner shall investigate the merits of the application. If the commissioner is satisfied the application is complete and all applicable provisions of law have been complied with, the commissioner shall cause an examination to be made of the applicant institution for the purpose of verifying the payment of all the applicant's liabilities. If the examination satisfies the commissioner that all of the applicant's liabilities have been paid, the commissioner shall endorse one copy of the certificate with the commissioner's statement that the institution is voluntarily liquidating. The return of the endorsed copy of the certificate operates to free the institution from further examination and to authorize the institution, under the original corporate name of the institution, to sue and be sued, to execute conveyances and other instruments, to take, hold, and own property, and to do all such other things as may be necessary to realize upon the institution's remaining assets for the pro rata benefit of the institution's stockholders, but not to engage or continue in any new or other business under the institution's charter or otherwise. The liquidation must proceed as expeditiously as possible, and upon conclusion, the institution shall surrender its charter. In lieu of continuing the liquidation under the original corporate name, the institution may transfer the remaining assets to a trustee agreed upon by the stockholders by a majority vote and upon so doing shall surrender the institution's charter.

- the Bank of North Dakota on a continuing basis for loan disbursements and administrative costs.
2. The state water commission shall approve eligible projects for loans from the water infrastructure loan fund. The state water commission shall consider the following when evaluating eligible projects:
 - a. A description of the nature and purposes of the proposed infrastructure project, including an explanation of the need for the project, the reasons why the project is in the public interest, and the overall economic impact of the project.
 - b. The estimated cost of the project, the amount of loan funding requested, and other proposed sources of funding.
 - c. The extent to which completion of the project will provide a benefit to the state or regions within the state.
 3. Projects not eligible for the state revolving funds under chapters 61-28.1 and 61-28.2 must be given priority for loans from the water infrastructure revolving loan fund.
 4. In consultation with the state water commission, the Bank of North Dakota shall develop policies for the review and approval of loans under this section. Loans made under this section must be made at the same interest rate as the revolving loan funds established under chapters 61-28.1 and 61-28.2.
 5. The Bank of North Dakota shall manage and administer loans from the water infrastructure loan fund. The Bank shall deposit in the fund all principal and interest paid on loans made from the fund. Annually, the Bank may deduct one-quarter of one percent of the outstanding loan balance as a service fee for administering the water infrastructure revolving loan fund. The Bank shall contract with a certified public accounting firm to audit the fund. The cost of the audit must be paid from the fund.

³⁷ **SECTION 3. AMENDMENT.** Section 6-09.4-06 of the North Dakota Century Code is amended and reenacted as follows:

6-09.4-06. Lending and borrowing powers generally.

1. The public finance authority may lend money to political subdivisions or other contracting parties through the purchase or holding of municipal securities which, in the opinion of the attorney general, are properly eligible for purchase or holding by the public finance authority under this chapter or chapter 40-57 and for purposes of the public finance authority's capital financing program the principal amount of any one issue does not exceed five hundred thousand dollars. However, the public finance authority may lend money to political subdivisions through the purchase of securities issued by the political subdivisions through the capital financing program without regard to the principal amount of the bonds issued, if the industrial commission approves a resolution that authorizes the public finance authority to purchase the securities. The capital financing program authorizing resolution must state that the industrial commission has determined that private bond markets will not be

³⁷ Section 6-09.4-06 was also amended by section 20 of Senate Bill No. 2014, chapter 42.

responsive to the needs of the issuing political subdivision concerning the securities or, if it appears that the securities can be sold through private bond markets without the involvement of the public finance authority, the authorizing resolution must state reasons for the public finance authority's involvement in the bond issue. The public finance authority may hold such municipal securities for any length of time it finds to be necessary. The public finance authority, for the purposes authorized by this chapter or chapter 40-57, may issue its bonds payable solely from the revenues available to the public finance authority which are authorized or pledged for payment of public finance authority obligations, and to otherwise assist political subdivisions or other contracting parties as provided in this chapter or chapter 40-57.

2. The public finance authority may lend money to the Bank of North Dakota under terms and conditions requiring the Bank to use the proceeds to make loans for agricultural improvements that qualify for assistance under the revolving loan fund program established by chapter 61-28.2.
3. The public finance authority may transfer money to the Bank of North Dakota for allocations to infrastructure projects and programs. Bonds issued for these purposes are payable in each biennium solely from amounts the legislative assembly may appropriate for debt service for any biennium or from a reserve fund established for the bonds. This section may not be construed to require the state to appropriate funds sufficient to make debt service payments with respect to the bonds or to replenish a related reserve fund. The bonds are not a debt of the Bank of North Dakota or the state. The full faith, credit, and taxing powers of the state are not pledged to the payment of the bonds. As of the date appropriated funds and reserves are not sufficient to pay debt service on the bonds, the obligation of the public finance authority with respect to the bonds must terminate, and the bonds are no longer outstanding. In addition to providing funds for the transfers, the public finance authority may use the bond proceeds to pay the costs of issuance of the bonds and establish a reserve fund for the bonds.
4. Bonds of the public finance authority issued under this chapter or chapter 40-57 are not in any way a debt or liability of the state and do not constitute a loan of the credit of the state or create any debt or debts, liability or liabilities, on behalf of the state, or constitute a pledge of the faith and credit of the state, but all such bonds are payable solely from revenues pledged or available for their payment as authorized in this chapter. Each bond must contain on its face a statement to the effect that the public finance authority is obligated to pay such principal or interest, and redemption premium, if any, and that neither the faith and credit nor the taxing power of the state is pledged to the payment of the principal of or the interest on such bonds. Specific funds pledged to fulfill the public finance authority's obligations are obligations of the public finance authority.
5. All expenses incurred in carrying out the purposes of this chapter or chapter 40-57 are payable solely from revenues or funds provided or to be provided under this chapter or chapter 40-57 and nothing in this chapter may be construed to authorize the public finance authority to incur any indebtedness or liability on behalf of or payable by the state.

SECTION 4. AMENDMENT. Section 6-09.4-10 of the North Dakota Century Code is amended and reenacted as follows:

6-09.4-10. Reserve fund.

1. The public finance authority shall establish and maintain a reserve fund in which there must be deposited all moneys appropriated by the state for the purpose of the fund, all proceeds of bonds required to be deposited therein by terms of any contract between the public finance authority and its bondholders or any resolution of the public finance authority with respect to the proceeds of bonds, any other moneys or funds of the public finance authority which it determines to deposit therein, any contractual right to the receipt of moneys by the public finance authority for the purpose of the fund, including a letter of credit or similar instrument, and any other moneys made available to the public finance authority only for the purposes of the fund from any other source or sources. Moneys in the reserve fund must be held and applied solely to the payment of the interest on and the principal of bonds and sinking fund payments as the same become due and payable and for the retirement of bonds, including payment of any redemption premium required to be paid when any bonds are redeemed or retired prior to maturity. Moneys in the reserve fund may not be withdrawn therefrom if the withdrawal would reduce the amount in the reserve fund to an amount less than the required debt service reserve, except for payment of interest then due and payable on bonds and the principal of bonds then maturing and payable and sinking fund payments and for the retirement of bonds in accordance with the terms of any contract between the public finance authority and its bondholders and for the payments on account of which interest or principal or sinking fund payments or retirement of bonds, other moneys of the public finance authority are not then available in accordance with the terms of the contract. The required debt service reserve must be an aggregate amount equal to at least the largest amount of money required by the terms of all contracts between the public finance authority and its bondholders to be raised in the then current or any succeeding calendar year for the payment of interest on and maturing principal of outstanding bonds, and sinking fund payments required by the terms of any contracts to sinking funds established for the payment or redemption of the bonds.
2. If the establishment of the reserve fund for an issue or the maintenance of an existing reserve fund at a required level under this section would necessitate the investment of all or any portion of a new reserve fund or all or any portion of an existing reserve fund at a restricted yield, because to not restrict the yield may cause the bonds to be taxable under the Internal Revenue Code, then at the discretion of the public finance authority no reserve fund need be established prior to the issuance of bonds or the reserve fund need not be funded to the levels required by other subsections of this section or an existing reserve fund may be reduced.
3. No bonds may be issued by the public finance authority unless there is in the reserve fund the required debt service reserve for all bonds then issued and outstanding and the bonds to be issued. Nothing in this chapter prevents or precludes the public finance authority from satisfying the foregoing requirement by depositing so much of the proceeds of the bonds to be issued, upon their issuance, as is needed to achieve the required debt service reserve. The public finance authority may at any time issue its bonds or notes for the purpose of providing any amount necessary to increase the amount in the reserve fund to the required debt service reserve, or to meet such higher or additional reserve as may be fixed by the public finance authority with respect to such fund.

4. In order to assure the maintenance of the required debt service reserve, there shall be appropriated by the legislative assembly and paid to the public finance authority for deposit in the reserve fund, such sum, if any, as shall be certified by the industrial commission as necessary to restore the reserve fund to an amount equal to the required debt service reserve. However, the commission may approve a resolution for the issuance of bonds, as provided by section 6-09.4-06, which states in substance that this subsection is not applicable to the required debt service reserve for bonds issued under that resolution.
5. If the maturity of a series of bonds of the public finance authority is three years or less from the date of issuance of the bonds, the public finance authority may determine that no reserve fund need be established for that respective series of bonds. If such a determination is made, holders of that respective series of bonds may have no interest in or claim on existing reserve funds established for the security of the holders of previously issued public finance authority bonds, and may have no interest in or claim on reserve funds established for the holders of subsequent issues of bonds of the public finance authority.
6. The industrial commission may determine that this section is inapplicable in whole or in part for bonds issued under section:
 - a. Section 6-09.4-06;
 - b. Section 6-09.4-24; or under the
 - c. The public finance authority's state revolving fund program.

SECTION 5. A new section to chapter 6-09.4 of the North Dakota Century Code is created and enacted as follows:

Debt service requirements - Bonds for infrastructure projects and programs.

Each biennium, the public finance authority shall request from the legislative assembly an appropriation from the general fund, derived from legacy fund earnings, Bank of North Dakota profits, or other sources to meet the debt service requirements for bonds issued by the authority for allocations to infrastructure projects and programs.

SECTION 6. REPEAL. Chapter 6-09.5 and section 61-02-78 of the North Dakota Century Code are repealed.

SECTION 7. PUBLIC FINANCE AUTHORITY - BOND ISSUE LIMITATION - BANK OF NORTH DAKOTA - APPROPRIATION.

1. Pursuant to the bonding authority under section 6-09.4-06, the public finance authority may issue up to \$680,000,000 of bonds for transfer to the Bank of North Dakota for allocations to infrastructure projects and programs, for the biennium beginning July 1, 2021, and ending June 30, 2023.
2. The term of any bonds issued under this section may not exceed twenty years. The public finance authority may issue bond anticipation notes or borrow from the Bank to support the allocations to infrastructure projects and programs prior to a bond issue. The public finance authority shall make

available up to ten percent of the bonds for sale directly to North Dakota residents and financial institutions.

3. After payment of any issuance costs or any transfers to a reserve fund, \$680,000,000 from the bond proceeds issued by the public finance authority is appropriated to the Bank of North Dakota for allocations to infrastructure projects and programs, for the biennium beginning July 1, 2021, and ending June 30, 2023, as follows:
 - a. \$435,500,000 for the Fargo diversion project;
 - b. \$74,500,000 to the resources trust fund;
 - c. \$50,000,000 to the infrastructure revolving loan fund under section 6-09-49;
 - d. \$70,000,000 to the highway fund; and
 - e. \$50,000,000 to North Dakota state university, which is appropriated to North Dakota state university, for an agriculture products development center including a northern crops institute project.

SECTION 8. RESOURCES TRUST FUND - LOAN REPAYMENT. The state water commission shall use the bond proceeds allocated to the resources trust fund under section 7 of this Act to repay loans issued to the western area water supply authority from the resources trust fund.

SECTION 9. APPROPRIATION - RESOURCES TRUST FUND. Payments may not duplicate any benefits or expenses paid to the warranty holder by an insurer providing comprehensive coverage under a motor vehicle insurance policy covering the stolen motor vehicle. SECTION 2. AMENDMENT. Section 12.1-05-07 of the North Dakota Century Code is amended and reenacted as follows:

- c. When used by an individual in possession or control of a dwelling, place of work, motor vehicle, or an occupied motor home or travel trailer as defined in section 39-01-01, or by an individual who is licensed or privileged to be there, if the force is necessary to prevent commission of arson, burglary, robbery, or a felony involving violence upon or in the dwelling, place of work, motor vehicle, or occupied motor home or travel trailer, and the use of force other than deadly force for these purposes would expose any individual to substantial danger of serious bodily injury.
 - d. When used by a public servant authorized to effect arrests or prevent escapes, if the force is necessary to effect an arrest or to prevent the escape from custody of an individual who has committed or attempted to commit a felony involving violence, or is attempting to escape by the use of a deadly weapon, or has otherwise indicated that the individual is likely to endanger human life or to inflict serious bodily injury unless apprehended without delay.
 - e. A detention facility is any place used for the confinement, pursuant to a court order, of an individual charged with or convicted of an offense, charged with being or adjudicated a juvenile delinquent, held for extradition, or otherwise confined under court order.

 - g. When used by an individual who is directed or authorized by a public servant, and who does not know that the public servant is not authorized to use deadly force under the circumstances.

12.1-05-07.2. Immunity from civil liability for justifiable use of force.

1. 2. The court shall award loss of income, reasonable attorney's fees and court costs, and disbursements incurred by the defendant in defense of any civil action brought by a plaintiff if the court finds that the defendant is immune from civil liability as provided in subsection 1.

SECTION 4. A new section to chapter 62.1-02 of the North Dakota Century Code is created and enacted as follows:

 - (2) The following three factors are met:
 - (a) The theft was not committed by threat;
 - b-(b) The theft was not committed by deception by one who stood in a confidential or fiduciary relationship to the victim of the theft; and
 - e-(c) The defendant was not a public servant or an officer or employee of a financial institution who committed the theft in the course of official duties.
- b. The special classification provided in this subsection paragraph 2 of subdivision a applies if the offense is classified under this subsection in the charge or if, at sentencing, the required factors are established by a preponderance of the evidence.
- c. A second or third offense under paragraph 1 of subdivision a occurring within three years is a class A misdemeanor. A fourth or subsequent violation under paragraph 1 of subdivision a occurring within four years is a class C felony.
- d. A sentence imposed under this subsection must be accompanied by a written statement by the court providing notice of any offense under this section which provides an enhanced penalty, including the penalty for a subsequent offense.
6. Notwithstanding subsection 3 of section 12.1-06-01, an attempt to commit a theft under this chapter is punishable equally with the completed offense when the actor has completed all of the conduct which the actor believes necessary on the actor's part to complete the theft except receipt of the property.

7. For purposes of grading, the amount involved in a theft under this chapter is the highest value by any reasonable standard, regardless of the actor's knowledge of such value, of the property or services which were stolen by the actor, or which the actor believed that the actor was stealing, or which the actor could reasonably have anticipated to have been the property or services involved. Thefts committed pursuant to one scheme or course of conduct, whether from the same person or several persons, may be charged as one offense and the amounts proved to have been stolen may be aggregated in determining the grade of the offense.

SECTION 2. AMENDMENT. Section 12.1-23-10 of the North Dakota Century Code is amended and reenacted as follows:

12.1-23-10. Definitions for theft and related offenses.

 - b. Preventing another from acquiring information which would affect his judgment of a transaction;
 - c. Failing to correct a false impression which the actor previously created or reinforced, or which he knows to be influencing another to whom he stands in a fiduciary or confidential relationship;
 - d. Failing to correct an impression which the actor previously created or reinforced and which the actor knows to have become false due to subsequent events;
 - e. Failing to disclose a lien, adverse claim, or other impediment to the enjoyment of property which he transfers or encumbers in consideration for the property obtained or in order to continue to deprive another of his property, whether such impediment is or is not valid, or is or is not a matter of official record;
 - f. Using a credit card, charge plate, or any other instrument which purports to evidence an undertaking to pay for property or services delivered or rendered to or upon the order of a designated person or bearer (1) where such instrument has been stolen, forged, revoked, or canceled, or where for any other reason its use by the actor is unauthorized, and (2) where the actor does not have the intention and ability to meet all obligations to the issuer arising out of his use of the instrument; or

- g. Any other scheme to defraud. The term "deception" does not, however, include falsifications as to matters having no pecuniary significance, or puffing by statements unlikely to deceive ordinary persons in the group addressed. "Puffing" means an exaggerated commendation of wares in communications addressed to the public or to a class or group.

6. "Obtain" means:

 - b. In relation to services, to secure performance thereof.
7. "Property" means any money, tangible or intangible personal property, property (whether real or personal) the location of which can be changed (including things growing on, affixed to, or found in land and documents although the rights represented thereby have no physical location), contract right, chose-in-action, interest in or claim to wealth, credit, or any other article or thing of value of any kind. "Property" also means real property the location of which cannot be moved if the offense involves transfer or attempted transfer of an interest in the property.
8. "Property of another" means property in which a person other than the actor or in which a government has an interest which the actor is not privileged to infringe without consent, regardless of the fact that the actor also has an interest in the property and regardless of the fact that the other person or government might be precluded from civil recovery because the property was used in an unlawful transaction or was subject to forfeiture as contraband. Property in possession of the actor shall not be deemed property of another who has a security interest therein, even if legal title is in the creditor pursuant to a conditional sales contract or other security agreement. "Owner" means any person or a government with an interest in property such that it is "property of another" as far as the actor is concerned.

9. "Receiving" means acquiring possession, control, or title, or lending on the security of the property.

SECTION 2. Section 13-04.1-09.3 of the North Dakota Century Code is created and enacted as follows:

13-04.1-09.3. Maximum charges permitted for loans - Installment payments - Permitted charges.

1. Interest charges and other fees must be set at rates, amounts, and terms as agreed to by the parties within the loan contract. However, a licensee may not contract for or receive finance charges pursuant to a loan in excess of an annual rate of thirty-six percent, including all charges and fees necessary for the extension of credit incurred at the time of origination.
2. Additional charges may be assessed for nonpayment or late payment as agreed to by the parties within the loan contract. However, a licensee may not contract for or receive charges in excess of five percent of the payment. For loans originated for fifty thousand dollars or less, these charges may not exceed twenty dollars for each nonpayment or late payment. The charge may be collected at the time of the default or any time after default. SECTION 4. AMENDMENT. Section 13-08-12 of the North Dakota Century Code is amended and reenacted as follows:

13-08-12. Fees for service - Deferred presentment service transaction procedures - Penalty.

1. Before disbursing funds under a deferred presentment service transaction, a licensee shall provide to the customer a clear and conspicuous printed notice indicating:
 - a. That a deferred presentment service transaction is not intended to meet long-term financial needs.
 - b. That the customer should use a deferred presentment service transaction only to meet short-term cash needs.
 - c. That the customer will be required to pay additional fees if the deferred presentment service transaction is renewed rather than paid in full when due. If the transaction is renewed, any amount paid in excess of the fee applies to the payoff amount.
 - d. A schedule of fees charged for deferred presentment service.
 - e. Any information required under federal law.
 - f. No property, titles to any property, or mortgages may be received or held directly or indirectly by the licensee as a condition of a deferred presentment service transaction or as a method of collection on a defaulted deferred presentment service transaction without proper civil process.
2. A licensee may charge a fee for the deferred presentment service, not to exceed twenty percent of the amount paid to the customer by the licensee. This fee may not be deemed interest for any purpose of law. No other fee or charge may be charged for the deferred presentment service, except that a fee, not to exceed the cost to the licensee, may be charged for registering a transaction on a database administered or authorized by the commissioner. No property, titles to any property, or mortgages may be received or held directly or indirectly by the licensee as a condition of a deferred presentment service transaction or as a method of collection on a defaulted deferred presentment service transaction without proper civil process.
3. A licensee may not disburse more than five hundred dollars to the customer in a deferred presentment service transaction.
4. A licensee may not engage in a deferred presentment service transaction with a customer who has an aggregate value of all outstanding obligations from any one customer exceeding six hundred dollars which is payable to the same or any other licensee. A licensee may not enter a new deferred presentment service transaction with a customer within three business days of that customer's completion of a previous deferred presentment service transaction.

A licensee may rely on a written or electronic representation of a customer regarding the existence of any outstanding obligations for deferred presentment held by a licensee other than the licensee receiving the representation until the database provided for under this subsection is in operation, and after that time may not rely on a customer's representation but must verify the fact using the database. However, if a licensee has multiple locations, that licensee may not rely on the representation of a customer regarding the existence of any outstanding obligation for deferred presentment held by that licensee, or one of the licensee's multiple locations, unless the licensee and the licensee's multiple locations use a point of sale registry or some other accounting system to attempt to prevent violations of this subsection. The commissioner shall administer or authorize the development of a database in which each transaction must be recorded for the purpose of preventing violations of this section. The commissioner shall adopt rules governing the creation, structure, and use of the database.

5. Before a licensee may negotiate or present a check for payment, the check must be endorsed with the actual name under which the licensee is doing business.
6. Each deferred presentment service transaction, including a renewal, must be documented by a written agreement signed or similarly authenticated by the customer. The original agreement must contain the name of the licensee; the transaction date; the amount of the obligation; a statement of the total amount of fees charged, expressed as a dollar amount and as an annual percentage rate; the name and signature of the individual who signs the agreement on behalf of the licensee; the name and address of the check maker; the transaction number assigned by the database; the date of negotiation of the check; the signature of the check maker; a statement that a licensee may not renew a transaction more than once; a statement that the renewal fee may not exceed twenty percent of the amount being renewed; a statement that the maximum term of the transaction, including the renewal, may not exceed sixty calendar days; a statement that the term of the renewal period may not be less than fifteen calendar days; and a statement containing the right of rescission printed immediately above the signature line of the written agreement in a minimum of ten-point font and providing a space for the check maker to initial that the notice to the right of rescission was received. The original agreement may not include a hold harmless clause; a confession of judgment clause; any assignment of or order for payment of wages or other compensation for services; a provision in which the check maker agrees not to assert any claim or defense arising out of the agreement; a waiver of any provision of this chapter; any representation from the check maker as to the sufficiency of funds regarding any past deferred presentment service transactions; or any statement regarding criminal prosecution with respect to the agreement. A renewal agreement must be contained in a separate section, as part of the original written agreement or in other form as approved by the commissioner. The renewal agreement must restate the original transaction date, the renewal transaction date, the amount of the check paid to the check maker, the fee charged in dollars, and the maturity date. The agreement must authorize the licensee to defer presentment or negotiation of the check, or electronic debit of the customer's account, until a specified date. The maker of a check may redeem the check from the licensee at any time before the negotiation or presentment of the check by making payment to the licensee. A customer agreeing to an electronic deferred presentment service transaction may repay the obligation at any time before the agreed-upon date. A customer

may rescind any transaction by the close of the business day following the day on which the customer receives payment from the licensee at no cost. If a customer agreeing to an electronic deferred presentment service transaction rescinds the transaction, the licensee must facilitate the repayment of the funds through the same electronic means the licensee used to deliver the funds to the customer.

7. If a check or electronic debit is returned to the licensee from a payer financial institution due to insufficient funds, closed account, or a stop payment order, the licensee has the right to all civil remedies available to collect the obligation. The licensee may contract for and collect a returned check or electronic debit charge not to exceed the collection fees and costs authorized in subdivision c of subsection 2 of section 6-08-16. No other fee or charge may be collected as a result of a returned check or electronic debit or as a result of default by the customer in timely payment to the licensee.
8. A customer who has authority to make a check or authorize an electronic debit and enters a deferred presentment service agreement is not subject to a criminal penalty relating to the check, electronic debit, or the deferred presentment service agreement unless the customer's account was closed on the original date of the transaction. At the time of entering a transaction involving a written check, a licensee shall verify that the account on which the check is written is open. A licensee may not pursue or threaten to pursue criminal penalties against a customer for criminal penalties prohibited by this subsection.
9. A licensee may not engage in unfair or deceptive acts, practices, or advertising in the conduct of a deferred presentment service business.
10. The amount paid to the customer by the licensee in a deferred presentment service transaction must be paid in the form of cash, check, or an electronic credit to the customer's account.
11. Each licensee must conspicuously post in the licensee's licensed location a notice of the fees imposed for the deferred presentment service. A licensee that engages in a deferred presentment service transaction via the internet shall require its customers to acknowledge the fees imposed using a click-through or other method that prevents customers from completing the transaction without reviewing the licensee's fees.
12. Except as provided under subsection 13, a licensee may not renew a deferred presentment service transaction more than once. A licensee's renewal fee may not exceed twenty percent of the amount being renewed. The renewal fee must be paid in cash, money order, or cashier's check. The total period of deferral, including the initial deferral and one renewal, may not exceed sixty days. An individual renewal period may not be less than fifteen days. After sixty days the renewed deferred presentment service transaction must be paid off in cash, money order, electronic payment, or cashier's check by the customer or, if a check is used, the check must be deposited by the licensee.
13. A licensee may enter a workout agreement with the borrower if the borrower believes financial hardship prevents the borrower from paying off the deferred presentment service transaction at the end of the original agreement or following any renewal. The workout agreement must outline the repayment

terms in writing and must require weekly, biweekly, or monthly even installments not to exceed twelve months. An additional interest or fee may not be charged as part of this workout, the deferred presentment service provider shall continue to report the transaction as an outstanding deferred presentment service transaction on any database administered by the commissioner, and entering a workout agreement is voluntary on the part of the deferred presentment service provider and the borrower.

14. A licensee may not renew, repay, refinance, or consolidate a deferred presentment service transaction with the proceeds of another deferred presentment service transaction with that licensee by the same maker or customer. It is presumed that a deferred presentment service transaction initiated within three business days before completion of a deferred presentment service transaction is a violation of this subsection.
- 44-15. A licensee may not conduct another business, other than a bona fide pawnbroking business, within the same office, suite, room, or place of business at which the licensee engages in deferred presentment service transactions unless the commissioner provides written authorization after a determination the other business is not contrary to the best interests of consumers.
- 45-16. A licensee shall provide a notice in a prominent place on each deferred presentment service agreement in no less than ten-point type in substantially the following form:
- State law prohibits this business from allowing customers to have outstanding at any one time, deferred presentment service transactions totaling more than six hundred dollars.
- 46-17. A licensee or any agent of a licensee who willfully violates this section is guilty of a class A misdemeanor.

15-05-10. Royalties from oil leases - Obligation to pay - Rents from other leases - Breach - Rules.

1. Oil leases must be made by the board of university and school lands at such annual minimum payments as are determined by the board, but the royalty ~~shall be~~ may not be less than twelve and one-half percent of the gross output of oil from the lands leased. Oil leases made by the board may authorize a royalty of less than twelve and one-half percent for production from stripper well properties or individual stripper wells and qualifying secondary recovery and qualifying tertiary recovery projects as defined in section 57-51.1-01. Leases for gas, coal, cement materials, sodium sulfate, sand and gravel, road material, building stone, chemical substances, metallic ores, or colloidal or other clays must be made by the board in such annual payments as are determined by the board.
2. The obligation arising under an oil and gas lease to pay oil or gas royalties to the board of university and school lands, to deliver oil or gas to a purchaser to the credit of the board, or to pay the market value thereof is of the essence in the lease contract, and breach of the obligation may constitute grounds for the cancellation of the lease in any case in which it is determined by the court that the equities of the case require cancellation. If the lessee or the lessee's representative or assignee under an oil and gas lease fails to pay oil or gas royalties to the board within the time prescribed by administrative rule and cancellation of the lease is not sought, the lessee or the lessee's representative or assignee thereafter shall pay interest on the unpaid royalties at a rate of three-quarters of one percent per month, not to exceed nine percent per annum. The commissioner may waive all or a portion of the interest under this subsection for good cause.
3. If a lessee or the lessee's representative or assignee fails to respond or refuses to file an amended royalty statement and pay the royalty owed within

ninety days of receiving written notice by mail of an overpayment, as provided by rule 4 of the North Dakota Rules of Civil Procedure, the board may impose a penalty of one-half percent per month, not to exceed six percent per annum. A party is deemed to have failed to respond if the party has not responded within ninety days of receipt of the written notice, or the party in response to the notice affirmatively indicates the intent not to pay the royalty or amounts due. The commissioner may waive all or a portion of the interest under this subsection for good cause.

4. If a lessee or the lessee's representative or assignee disputes a royalty assessment or demand by the board, the lessee or the lessee's representative or assignee may tender full payment of the disputed amount under protest any time after an assessment or demand is made by the board. Upon payment of the disputed amount under protest, all interest and penalties must cease to accrue. If it is determined that the payment of the disputed amount resulted in an overpayment, the party that made the payment is entitled to a refund of the overpayment amount plus interest at the rate established under section 28-20-34.
5. If a lessee or the lessee's representative or assignee fails or refuses to comply with demands by the board to pay royalties, interest, or penalties under this chapter, the board may file an action to cancel the lease, recover unpaid royalties, and recover interest and penalties on the unpaid royalties. Notwithstanding chapter 28-01, an action under this subsection must be commenced within seven years of the date oil or gas was produced under a lease. An action to cancel a lease, recover unpaid royalties, or recover interest or penalties on unpaid royalties may not be filed for production that occurred under a lease before August 1, 2013.
6. The board may adopt rules regarding annual payments and royalties under this section.

If the operator under an oil and gas lease fails to pay oil or gas royalties to the mineral owner or the mineral owner's assignee within one hundred fifty days after oil or gas produced under the lease is marketed and cancellation of the lease is not sought or if the operator fails to pay oil or gas royalties to an unleased mineral interest owner within one hundred fifty days after oil or gas production is marketed from the unleased mineral interest owner's mineral interest, the operator thereafter shall pay interest on the unpaid royalties, without the requirement that the mineral owner or the mineral owner's assignee request the payment of interest, at the rate of eighteen percent per annum until paid, ~~except that the commissioner of university and school lands may negotiate a rate to be no less than the prime rate as established by the Bank of North Dakota plus four percent per annum with a maximum of eighteen percent per annum, for unpaid royalties on~~

~~minerals owned or managed by the board of university and school lands. Provided, that if the aggregate amount is less than fifty dollars, the operator may remit semiannually to a person entitled to royalties the aggregate of six months' monthly royalties where the aggregate amount is less than fifty dollars. The district court for the county in which the oil or gas well is located has jurisdiction over all proceedings any proceeding brought pursuant to under this section. The prevailing party in any proceeding brought pursuant to under this section is entitled to recover any court costs and reasonable attorney's fees. This section does not apply when if mineral owners or their assignees elect to take their proportionate share of production in kind, in the event of a dispute of title existing that would affect distribution of royalty payments, or when if a mineral owner cannot be located after reasonable inquiry by the operator; however, the operator shall make royalty payments to those mineral owners whose title and ownership interest is not in dispute.~~

The coal mine reclamation trust may be used to fulfill the requirement of a qualified third party and the requirements of a collateral bond.

15-72-02. Powers and duties of the board - Transfer.

The board of university and school lands shall set up a coal mine reclamation trust. The coal mine reclamation trust may receive and accept assets as directed by the public service commission which are held in the public service commission's custody under North Dakota Administrative Code section 69-05.2-12-04 as collateral in a security agreement with any person as defined in section 38-14.1-02. The commissioner of university and school lands shall consult with the public service commission in carrying out the powers and duties of administering the coal mine reclamation trust. Any expenses incurred by the board of university and school lands or the public service commission under this section must be reimbursed by the permit applicant or qualified third party.

The schedule of the real property must allow the regulatory authority to evaluate the adequacy of the real property offered to satisfy collateral requirements. The schedule must include:
 - (1) A description of the property;
 - (2) The fair market value of the property, as determined by an independent appraisal conducted by a certified appraiser; and
 - (3) Proof of possession and title to the real property.

Reimbursements to the board must be deposited in the trust fund account from which the expenses were incurred. The net income derived from the assets held in trust must be used for trust purposes. Any assets placed in the trust may be sold, leased, invested, managed, or otherwise disposed of by the board to fulfill the reclamation activities and obligations related to the performance bond. If any of the trust assets include real property, net income from the trust assets must be used in part to pay to the county where the real property is located the same amount that would have been assessed against the real property for real property taxes if the real property was privately owned. The board may maintain separate accounts in the trust if necessary. The board shall manage all assets in the trust in the same manner that the board manages the board's other trust assets or as otherwise may be required to satisfy the purposes of this chapter.

Beginning with the 2020-21 school year, the superintendent shall reduce the baseline funding for any school district that becomes an elementary district pursuant to section 15.1-07-27 after the 2012-13 school year. The reduction must be proportional to the number of weighted student units in the grades that are offered through another school district relative to the total number of weighted student units the school district offered in the year before the school district became an elementary district. The reduced baseline funding applies to the calculation of state aid for the first school year in which the school district becomes an elementary district and for each year thereafter. - c. Beginning with the 2021-22 school year and for each school year thereafter, the superintendent shall reduce the district's baseline funding per weighted student unit. Each year the superintendent shall calculate the amount by which the district's baseline funding per weighted student unit exceeds the payment per weighted student unit provided in subsection 3. The superintendent shall reduce the district's baseline funding per weighted student unit by fifteen percent of the amount by which the district's baseline funding per weighted student unit exceeds the payment per weighted student unit for the 2021-22 school year. For each year thereafter, the reduction percentage is increased by an additional fifteen percent. However, the district's baseline funding per weighted student unit, after the reduction, may not be less than the payment per weighted student unit provided in subsection 3.
3. a. For the ~~2019-20~~2021-22 school year, the superintendent shall calculate state aid as the greater of:
- (1) The district's weighted student units multiplied by ~~nine thousand eight hundred thirty-nineteen thousand one hundred thirty-six~~ dollars;

- (2) One hundred ~~one~~two percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units, not to exceed the district's 2017-18 baseline weighted student units, plus any weighted student units in excess of the 2017-18 baseline weighted student units multiplied by ~~nine thousand eight hundred thirty-nine~~ten thousand one hundred thirty-six dollars; or
- (3) The district's baseline funding as established in subsection 1 ~~less the amount in paragraph 1, with the difference reduced by fifteen percent and then the difference added to the amount determined in paragraph 1.~~
- b. For the ~~2020-21~~2022-23 school year and each school year thereafter, the superintendent shall calculate state aid as the greater of:
- (1) The district's weighted student units multiplied by ten thousand ~~thirty-six~~two hundred thirty-seven dollars;
- (2) One hundred two percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units, not to exceed the district's 2017-18 baseline weighted student units, plus any weighted student units in excess of the 2017-18 baseline weighted student units multiplied by ten thousand ~~thirty-six~~two hundred thirty-seven dollars; or
- (3) The district's baseline funding as established in subsection 1 less the amount in paragraph 1, with the difference reduced by ~~fifteen~~thirty percent for the ~~2021-22~~2022-23 school year and the ~~reduction percentage increasing by fifteen percent each school year thereafter until the difference is reduced to zero, and then the difference added to the amount determined in paragraph 1.~~
- c. The superintendent also shall adjust state aid determined in this subsection ~~to ensure the amount does not exceed the transition maximum as follows:~~
- (1) For the ~~2019-20~~2021-22 school year, ~~to ensure the amount does not exceed~~the transition maximum rate is one hundred ~~five~~ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units from the previous school year.
- (2) For the ~~2020-21~~2022-23 school year ~~and each school year thereafter, to ensure the amount does not exceed~~the transition maximum rate is one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units from the previous school year.
- (3) For the ~~2023-24~~ school year, ~~the transition maximum rate is one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, plus twenty percent of the difference between the rate under paragraph 1 of subdivision b of this subsection and one hundred ten percent of the district's baseline funding per weighted student unit. The transition maximum is~~

determined by multiplying the transition maximum rate, which may not exceed the rate under paragraph 1 of subdivision b of this subsection, by the district's weighted student units from the previous school year.

- (4) For the 2024-25 school year, the transition maximum rate is one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, plus forty percent of the difference between the rate under paragraph 1 of subdivision b of this subsection and one hundred ten percent of the district's baseline funding per weighted student unit. The transition maximum is determined by multiplying the transition maximum rate, which may not exceed the rate under paragraph 1 of subdivision b of this subsection, by the district's weighted student units from the previous school year.
 - (5) For the 2025-26 school year, the transition maximum rate is one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, plus sixty percent of the difference between the rate under paragraph 1 of subdivision b of this subsection and one hundred ten percent of the district's baseline funding per weighted student unit. The transition maximum is determined by multiplying the transition maximum rate, which may not exceed the rate under paragraph 1 of subdivision b of this subsection, by the district's weighted student units from the previous school year.
 - (6) For the 2026-27 school year, the transition maximum rate is one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, plus eighty percent of the difference between the rate under paragraph 1 of subdivision b of this subsection and one hundred ten percent of the district's baseline funding per weighted student unit. The transition maximum is determined by multiplying the transition maximum rate, which may not exceed the rate under paragraph 1 of subdivision b of this subsection, by the district's weighted student units from the previous school year.
4. After determining the product in accordance with subsection 3, the superintendent of public instruction shall:
- a. Subtract an amount equal to sixty mills multiplied by the taxable valuation of the school district, except the amount in dollars subtracted for purposes of this subdivision may not exceed the previous year's amount in dollars subtracted for purposes of this subdivision by more than twelve percent, adjusted pursuant to section 15.1-27-04.3; and
 - b. Subtract an amount equal to seventy-five percent of all revenue types listed in subdivisions c and d of subsection 1. Before determining the deduction for seventy-five percent of all revenue types, the superintendent of public instruction shall adjust revenues as follows:
 - (1) Tuition revenue shall be adjusted as follows:
 - (a) In addition to deducting tuition revenue received specifically for the operation of an educational program provided at a residential treatment facility and tuition revenue received for the provision of an adult farm management program as directed in paragraph 3 of subdivision c of subsection 1, the superintendent of public

instruction also shall reduce the total tuition reported by the school district by the amount of tuition revenue received for the education of students not residing in the state and for which the state has not entered a cross-border education contract; and

- (b) The superintendent of public instruction also shall reduce the total tuition reported by admitting school districts meeting the requirements of subdivision e of subsection 2 of section 15.1-29-12 by the amount of tuition revenue received for the education of students residing in an adjacent school district.

(2) After adjusting tuition revenue as provided in paragraph 1, the superintendent shall reduce all remaining revenues from all revenue types by the percentage of mills levied in ~~2018~~2020 by the school district for sinking and interest relative to the total mills levied in ~~2018~~2020 by the school district for all purposes.

5. The amount remaining after the computation required under subsection 4 is the amount of state aid to which a school district is entitled, subject to any other statutory requirements or limitations.
6. On or before June thirtieth of each year, the school board shall certify to the superintendent of public instruction the final average daily membership for the current school year.
7. For purposes of the calculation in subsection 4, each county auditor, in collaboration with the school districts, shall report the following to the superintendent of public instruction on an annual basis:
 - a. The amount of revenue received by each school district in the county during the previous school year for each type of revenue identified in subdivisions c and d of subsection 1;
 - b. The total number of mills levied in the previous calendar year by each school district for all purposes; and
 - c. The number of mills levied in the previous calendar year by each school district for sinking and interest fund purposes.

Baseline funding - Establishment - Determination of state aid. (Effective after June 30, 2025)

1. To determine the amount of state aid payable to each district, the superintendent of public instruction shall establish each district's baseline funding. A district's baseline funding consists of:
 - a. All state aid received by the district in accordance with chapter 15.1-27 during the 2018-19 school year;
 - b. An amount equal to the property tax deducted by the superintendent of public instruction to determine the 2018-19 state aid payment;
 - c. An amount equal to seventy-five percent of the revenue received by the school district during the 2017-18 school year for the following revenue types:

- (1) Revenue reported under code 2000 of the North Dakota school district financial accounting and reporting manual, as developed by the superintendent of public instruction in accordance with section 15.1-02-08;
 - (2) Mineral revenue received by the school district through direct allocation from the state treasurer and not reported under code 2000 of the North Dakota school district financial accounting and reporting manual, as developed by the superintendent of public instruction in accordance with section 15.1-02-08;
 - (3) Tuition reported under code 1300 of the North Dakota school district financial accounting and reporting manual, as developed by the superintendent of public instruction in accordance with section 15.1-02-08, with the exception of revenue received specifically for the operation of an educational program provided at a residential treatment facility and tuition received for the provision of an adult farm management program;
 - (4) Revenue from payments in lieu of taxes on the distribution and transmission of electric power;
 - (5) Revenue from payments in lieu of taxes on electricity generated from sources other than coal;
 - (6) Revenue from the leasing of land acquired by the United States for which compensation is allocated to the state under 33 U.S.C. 701(c) (3); and
- d. An amount equal to the total revenue received by the school district during the 2017-18 school year for the following revenue types:
- (1) Mobile home tax revenue;
 - (2) Telecommunications tax revenue; and
 - (3) Revenue from payments in lieu of taxes and state reimbursement of the homestead credit and disabled veterans credit.
- e. Beginning with the 2020-21 school year, the superintendent shall reduce the baseline funding for any school district that becomes an elementary district pursuant to section 15.1-07-27 after the 2012-13 school year. The reduction must be proportional to the number of weighted student units in the grades that are offered through another school district relative to the total number of weighted student units the school district offered in the year before the school district became an elementary district. The reduced baseline funding applies to the calculation of state aid for the first school year in which the school district becomes an elementary district and for each year thereafter. For districts that become an elementary district prior to the 2020-21 school year, the superintendent shall use the reduced baseline funding to calculate state aid for the 2020-21 school year and for each year thereafter.

2. a. The superintendent shall divide the district's baseline funding determined in subsection 1 by the district's 2017-18 weighted student units to determine the district's baseline funding per weighted student unit.
 - b. For any school district that becomes an elementary district pursuant to section 15.1-07-27 after the 2017-18 school year, the superintendent shall adjust the district's baseline funding per weighted student unit used to calculate state aid. The superintendent shall divide the district's baseline funding determined in subsection 1 by the district's weighted student units after the school district becomes an elementary district to determine the district's adjusted baseline funding per weighted student unit. The superintendent shall use the district's adjusted baseline funding per weighted student unit in the calculation of state aid for the first school year in which the school district becomes an elementary district and for each year thereafter.
 - c. Beginning with the 2021-22 school year and for each school year thereafter, the superintendent shall reduce the district's baseline funding per weighted student unit. Each year the superintendent shall calculate the amount by which the district's baseline funding per weighted student unit exceeds the payment per weighted student unit provided in subsection 3. The superintendent shall reduce the district's baseline funding per weighted student unit by fifteen percent of the amount by which the district's baseline funding per weighted student unit exceeds the payment per weighted student unit for the 2021-22 school year. For each year thereafter, the reduction percentage is increased by an additional fifteen percent. However, the district's baseline funding per weighted student unit, after the reduction, may not be less than the payment per weighted student unit provided in subsection 3.
3. a. For the ~~2019-20~~2021-22 school year, the superintendent shall calculate state aid as the greater of:
 - (1) ~~The district's weighted student units multiplied by nine thousand eight hundred thirty-nineteen thousand one hundred thirty-six dollars;~~
 - (2) One hundred ~~one~~two percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units, not to exceed the district's 2017-18 baseline weighted student units, plus any weighted student units in excess of the 2017-18 baseline weighted student units multiplied by ~~nine thousand eight hundred thirty-nineteen thousand one hundred thirty-six~~ dollars; or
 - (3) The district's baseline funding as established in subsection 1 less the amount in paragraph 1, with the difference reduced by fifteen percent and then the difference added to the amount determined in paragraph 1.
 - b. For the ~~2020-21~~2022-23 school year and each school year thereafter, the superintendent shall calculate state aid as the greater of:
 - (1) ~~The district's weighted student units multiplied by ten thousand thirty-six~~two hundred thirty-seven dollars;

- (2) One hundred two percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units, not to exceed the district's 2017-18 baseline weighted student units, plus any weighted student units in excess of the 2017-18 baseline weighted student units multiplied by ten thousand ~~thirty-six~~two hundred thirty-seven dollars; or
 - (3) The district's baseline funding as established in subsection 1 less the amount in paragraph 1, with the difference reduced by ~~fifteen~~thirty percent for the ~~2021-22~~2022-23 school year and the reduction percentage increasing by fifteen percent each school year thereafter until the difference is reduced to zero, and then the difference added to the amount determined in paragraph 1.
- c. The superintendent also shall adjust state aid determined in this subsection to ensure the amount does not exceed the transition maximum as follows:
- (1) For the ~~2019-20~~2021-22 school year, ~~to ensure the amount does not exceed~~the transition maximum rate is one hundred five percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units from the previous school year.
 - (2) For the ~~2020-24~~2022-23 school year ~~and each school year thereafter, to ensure the amount does not exceed~~the transition maximum rate is one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units from the previous school year.
 - (3) For the 2023-24 school year, the transition maximum rate is one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, plus twenty percent of the difference between the rate under paragraph 1 of subdivision b of this subsection and one hundred ten percent of the district's baseline funding per weighted student unit. The transition maximum is determined by multiplying the transition maximum rate, which may not exceed the rate under paragraph 1 of subdivision b of this subsection, by the district's weighted student units from the previous school year.
 - (4) For the 2024-25 school year, the transition maximum rate is one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, plus forty percent of the difference between the rate under paragraph 1 of subdivision b of this subsection and one hundred ten percent of the district's baseline funding per weighted student unit. The transition maximum is determined by multiplying the transition maximum rate, which may not exceed the rate under paragraph 1 of subdivision b of this subsection, by the district's weighted student units from the previous school year.
 - (5) For the 2025-26 school year, the transition maximum rate is one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, plus sixty percent of the difference between the rate under paragraph 1 of subdivision b of this subsection and one hundred ten percent of the district's baseline

funding per weighted student unit. The transition maximum is determined by multiplying the transition maximum rate, which may not exceed the rate under paragraph 1 of subdivision b of this subsection, by the district's weighted student units from the previous school year.

- (6) For the 2026-27 school year, the transition maximum rate is one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, plus eighty percent of the difference between the rate under paragraph 1 of subdivision b of this subsection and one hundred ten percent of the district's baseline funding per weighted student unit. The transition maximum is determined by multiplying the transition maximum rate, which may not exceed the rate under paragraph 1 of subdivision b of this subsection, by the district's weighted student units from the previous school year.
4. After determining the product in accordance with subsection 3, the superintendent of public instruction shall:
- a. Subtract an amount equal to sixty mills multiplied by the taxable valuation of the school district; and
 - b. Subtract an amount equal to seventy-five percent of all revenue types listed in subdivisions c and d of subsection 1. Before determining the deduction for seventy-five percent of all revenue types, the superintendent of public instruction shall adjust revenues as follows:
 - (1) Tuition revenue shall be adjusted as follows:
 - (a) In addition to deducting tuition revenue received specifically for the operation of an educational program provided at a residential treatment facility and tuition revenue received for the provision of an adult farm management program as directed in paragraph 3 of subdivision c of subsection 1, the superintendent of public instruction also shall reduce the total tuition reported by the school district by the amount of tuition revenue received for the education of students not residing in the state and for which the state has not entered a cross-border education contract; and
 - (b) The superintendent of public instruction also shall reduce the total tuition reported by admitting school districts meeting the requirements of subdivision e of subsection 2 of section 15.1-29-12 by the amount of tuition revenue received for the education of students residing in an adjacent school district.
 - (2) After adjusting tuition revenue as provided in paragraph 1, the superintendent shall reduce all remaining revenues from all revenue types by the percentage of mills levied in ~~2018~~2020 by the school district for sinking and interest relative to the total mills levied in ~~2018~~2020 by the school district for all purposes.
5. The amount remaining after the computation required under subsection 4 is the amount of state aid to which a school district is entitled, subject to any other statutory requirements or limitations.

6. On or before June thirtieth of each year, the school board shall certify to the superintendent of public instruction the final average daily membership for the current school year.
7. For purposes of the calculation in subsection 4, each county auditor, in collaboration with the school districts, shall report the following to the superintendent of public instruction on an annual basis:
 - a. The amount of revenue received by each school district in the county during the previous school year for each type of revenue identified in subdivisions c and d of subsection 1;
 - b. The total number of mills levied in the previous calendar year by each school district for all purposes; and
 - c. The number of mills levied in the previous calendar year by each school district for sinking and interest fund purposes.

1. Average daily membership is calculated at the conclusion of the school year by adding the total number of hours that each student in a given grade, school, or school district is in attendance at the school's physical plant during a school calendar and the total number of hours that each student in a given grade, school, or school district is absent during a school calendar, and then dividing the sum by:

management program, and beginning in the 2021-22 school year, seventeen percent of tuition received under an agreement to educate students from a school district on an air force base with funding received through federal impact aid, and an additional seventeen percent of tuition received under an agreement to educate students from a school district on an air force base with funding received through federal impact aid each school year thereafter, until the 2024-25 school year when sixty-eight percent of tuition received under an agreement to educate students from a school district on an air force base with funding received through federal impact aid must be excluded from the tuition calculation under this paragraph;

- (4) Revenue from payments in lieu of taxes on the distribution and transmission of electric power;
 - (5) Revenue from payments in lieu of taxes on electricity generated from sources other than coal; and
 - (6) Revenue from the leasing of land acquired by the United States for which compensation is allocated to the state under 33 U.S.C. 701(c) (3); and
- d. An amount equal to the total revenue received by the school district during the 2017-18 school year for the following revenue types:
- (1) Mobile home tax revenue;
 - (2) Telecommunications tax revenue; and
 - (3) Revenue from payments in lieu of taxes and state reimbursement of the homestead credit and disabled veterans credit; and
- e. Beginning with the 2020-21 school year, the superintendent shall reduce the baseline funding for any school district that becomes an elementary district pursuant to section 15.1-07-27 after the 2012-13 school year. The reduction must be proportional to the number of weighted student units in the grades that are offered through another school district relative to the total number of weighted student units the school district offered in the year before the school district became an elementary district. The reduced baseline funding applies to the calculation of state aid for the first school year in which the school district becomes an elementary district and for each year thereafter. For districts that become an elementary district prior to the 2020-21 school year, the superintendent shall use the reduced baseline funding to calculate state aid for the 2020-21 school year and for each year thereafter.
2. a. The superintendent shall divide the district's baseline funding determined in subsection 1 by the district's 2017-18 weighted student units to determine the district's baseline funding per weighted student unit.
- b. For any school district that becomes an elementary district pursuant to section 15.1-07-27 after the 2017-18 school year, the superintendent shall adjust the district's baseline funding per weighted student unit used to calculate state aid. The superintendent shall divide the district's baseline funding determined in subsection 1 by the district's weighted student units

after the school district becomes an elementary district to determine the district's adjusted baseline funding per weighted student unit. The superintendent shall use the district's adjusted baseline funding per weighted student unit in the calculation of state aid for the first school year in which the school district becomes an elementary district and for each year thereafter.

- c. Beginning with the 2021-22 school year and for each school year thereafter, the superintendent shall reduce the district's baseline funding per weighted student unit. Each year the superintendent shall calculate the amount by which the district's baseline funding per weighted student unit exceeds the payment per weighted student unit provided in subsection 3. The superintendent shall reduce the district's baseline funding per weighted student unit by fifteen percent of the amount by which the district's baseline funding per weighted student unit exceeds the payment per weighted student unit for the 2021-22 school year. For each year thereafter, the reduction percentage is increased by an additional fifteen percent. However, the district's baseline funding per weighted student unit, after the reduction, may not be less than the payment per weighted student unit provided in subsection 3.
3. a. For the 2019-20 school year, the superintendent shall calculate state aid as the greater of:
 - (1) The district's weighted student units multiplied by nine thousand eight hundred thirty-nine dollars;
 - (2) One hundred one percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units, not to exceed the district's 2017-18 baseline weighted student units, plus any weighted student units in excess of the 2017-18 baseline weighted student units multiplied by nine thousand eight hundred thirty-nine dollars; or
 - (3) The district's baseline funding as established in subsection 1.
 - b. For the 2020-21 school year and each school year thereafter, the superintendent shall calculate state aid as the greater of:
 - (1) The district's weighted student units multiplied by ten thousand thirty-six dollars;
 - (2) One hundred two percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units, not to exceed the district's 2017-18 baseline weighted student units, plus any weighted student units in excess of the 2017-18 baseline weighted student units multiplied by ten thousand thirty-six dollars; or
 - (3) The district's baseline funding as established in subsection 1 less the amount in paragraph 1, with the difference reduced by fifteen percent for the 2021-22 school year and fifteen percent each school year thereafter, and then the difference added to the amount determined in paragraph 1.

-
- c. The superintendent also shall adjust state aid determined in this subsection:
- (1) For the 2019-20 school year, to ensure the amount does not exceed one hundred five percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units from the previous school year.
 - (2) For the 2020-21 school year and each school year thereafter, to ensure the amount does not exceed one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units from the previous school year.
4. After determining the product in accordance with subsection 3, the superintendent of public instruction shall:
- a. Subtract an amount equal to sixty mills multiplied by the taxable valuation of the school district, except the amount in dollars subtracted for purposes of this subdivision may not exceed the previous year's amount in dollars subtracted for purposes of this subdivision by more than twelve percent, adjusted pursuant to section 15.1-27-04.3; and
 - b. Subtract an amount equal to seventy-five percent of all revenue types listed in subdivisions c and d of subsection 1. Before determining the deduction for seventy-five percent of all revenue types, the superintendent of public instruction shall adjust revenues as follows:
 - (1) Tuition revenue shall be adjusted as follows:
 - (a) In addition to deducting tuition revenue received specifically for the operation of an educational program provided at a residential treatment facility and, tuition revenue received for the provision of an adult farm management program, and tuition received under an agreement to educate students from a school district on an air force base with funding received through federal impact aid as directed each school year in paragraph 3 of subdivision c of subsection 1, the superintendent of public instruction also shall reduce the total tuition reported by the school district by the amount of tuition revenue received for the education of students not residing in the state and for which the state has not entered a cross-border education contract; and
 - (b) The superintendent of public instruction also shall reduce the total tuition reported by admitting school districts meeting the requirements of subdivision e of subsection 2 of section 15.1-29-12 by the amount of tuition revenue received for the education of students residing in an adjacent school district.
 - (2) After adjusting tuition revenue as provided in paragraph 1, the superintendent shall reduce all remaining revenues from all revenue types by the percentage of mills levied in 2018 by the school district for sinking and interest relative to the total mills levied in 2018 by the school district for all purposes.

5. The amount remaining after the computation required under subsection 4 is the amount of state aid to which a school district is entitled, subject to any other statutory requirements or limitations.
6. On or before June thirtieth of each year, the school board shall certify to the superintendent of public instruction the final average daily membership for the current school year.
7. For purposes of the calculation in subsection 4, each county auditor, in collaboration with the school districts, shall report the following to the superintendent of public instruction on an annual basis:
 - a. The amount of revenue received by each school district in the county during the previous school year for each type of revenue identified in subdivisions c and d of subsection 1;
 - b. The total number of mills levied in the previous calendar year by each school district for all purposes; and
 - c. The number of mills levied in the previous calendar year by each school district for sinking and interest fund purposes.

Baseline funding - Establishment - Determination of state aid. (Effective after June 30, 2025)

1. To determine the amount of state aid payable to each district, the superintendent of public instruction shall establish each district's baseline funding. A district's baseline funding consists of:
 - a. All state aid received by the district in accordance with chapter 15.1-27 during the 2018-19 school year;
 - b. An amount equal to the property tax deducted by the superintendent of public instruction to determine the 2018-19 state aid payment;
 - c. An amount equal to seventy-five percent of the revenue received by the school district during the 2017-18 school year for the following revenue types:
 - (1) Revenue reported under code 2000 of the North Dakota school district financial accounting and reporting manual, as developed by the superintendent of public instruction in accordance with section 15.1-02-08;
 - (2) Mineral revenue received by the school district through direct allocation from the state treasurer and not reported under code 2000 of the North Dakota school district financial accounting and reporting manual, as developed by the superintendent of public instruction in accordance with section 15.1-02-08;
 - (3) Tuition reported under code 1300 of the North Dakota school district financial accounting and reporting manual, as developed by the superintendent of public instruction in accordance with section 15.1-02-08, with the exception of revenue received specifically for the operation of an educational program provided at a residential treatment facility and, tuition received for the provision of an adult farm

management program, and beginning in the 2025-26 school year, eighty-five percent of tuition received under an agreement to educate students from a school district on an air force base with funding received through federal impact aid, until the 2026-27 school year, and each school year thereafter, when all tuition received under an agreement to educate students from a school district on an air force base with funding received through federal impact aid must be excluded from the tuition calculation under this paragraph;

- (4) Revenue from payments in lieu of taxes on the distribution and transmission of electric power;
 - (5) Revenue from payments in lieu of taxes on electricity generated from sources other than coal; and
 - (6) Revenue from the leasing of land acquired by the United States for which compensation is allocated to the state under 33 U.S.C. 701(c) (3); and
- d. An amount equal to the total revenue received by the school district during the 2017-18 school year for the following revenue types:
- (1) Mobile home tax revenue;
 - (2) Telecommunications tax revenue; and
 - (3) Revenue from payments in lieu of taxes and state reimbursement of the homestead credit and disabled veterans credit.
- e. Beginning with the 2020-21 school year, the superintendent shall reduce the baseline funding for any school district that becomes an elementary district pursuant to section 15.1-07-27 after the 2012-13 school year. The reduction must be proportional to the number of weighted student units in the grades that are offered through another school district relative to the total number of weighted student units the school district offered in the year before the school district became an elementary district. The reduced baseline funding applies to the calculation of state aid for the first school year in which the school district becomes an elementary district and for each year thereafter. For districts that become an elementary district prior to the 2020-21 school year, the superintendent shall use the reduced baseline funding to calculate state aid for the 2020-21 school year and for each year thereafter.
2. a. The superintendent shall divide the district's baseline funding determined in subsection 1 by the district's 2017-18 weighted student units to determine the district's baseline funding per weighted student unit.
- b. For any school district that becomes an elementary district pursuant to section 15.1-07-27 after the 2017-18 school year, the superintendent shall adjust the district's baseline funding per weighted student unit used to calculate state aid. The superintendent shall divide the district's baseline funding determined in subsection 1 by the district's weighted student units after the school district becomes an elementary district to determine the district's adjusted baseline funding per weighted student unit. The superintendent shall use the district's adjusted baseline funding per

weighted student unit in the calculation of state aid for the first school year in which the school district becomes an elementary district and for each year thereafter.

- c. Beginning with the 2021-22 school year and for each school year thereafter, the superintendent shall reduce the district's baseline funding per weighted student unit. Each year the superintendent shall calculate the amount by which the district's baseline funding per weighted student unit exceeds the payment per weighted student unit provided in subsection 3. The superintendent shall reduce the district's baseline funding per weighted student unit by fifteen percent of the amount by which the district's baseline funding per weighted student unit exceeds the payment per weighted student unit for the 2021-22 school year. For each year thereafter, the reduction percentage is increased by an additional fifteen percent. However, the district's baseline funding per weighted student unit, after the reduction, may not be less than the payment per weighted student unit provided in subsection 3.
3. a. For the 2019-20 school year, the superintendent shall calculate state aid as the greater of:
 - (1) The district's weighted student units multiplied by nine thousand eight hundred thirty-nine dollars;
 - (2) One hundred one percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units, not to exceed the district's 2017-18 baseline weighted student units, plus any weighted student units in excess of the 2017-18 baseline weighted student units multiplied by nine thousand eight hundred thirty-nine dollars; or
 - (3) The district's baseline funding as established in subsection 1.
 - b. For the 2020-21 school year and each school year thereafter, the superintendent shall calculate state aid as the greater of:
 - (1) The district's weighted student units multiplied by ten thousand thirty-six dollars;
 - (2) One hundred two percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units, not to exceed the district's 2017-18 baseline weighted student units, plus any weighted student units in excess of the 2017-18 baseline weighted student units multiplied by ten thousand thirty-six dollars; or
 - (3) The district's baseline funding as established in subsection 1 less the amount in paragraph 1, with the difference reduced by fifteen percent for the 2021-22 school year and fifteen percent each school year thereafter, and then the difference added to the amount determined in paragraph 1.
 - c. The superintendent also shall adjust state aid determined in this subsection:

- (1) For the 2019-20 school year, to ensure the amount does not exceed one hundred five percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units from the previous school year.
 - (2) For the 2020-21 school year and each school year thereafter, to ensure the amount does not exceed one hundred ten percent of the district's baseline funding per weighted student unit, as established in subsection 2, multiplied by the district's weighted student units from the previous school year.
4. After determining the product in accordance with subsection 3, the superintendent of public instruction shall:
- a. Subtract an amount equal to sixty mills multiplied by the taxable valuation of the school district; and
 - b. Subtract an amount equal to seventy-five percent of all revenue types listed in subdivisions c and d of subsection 1. Before determining the deduction for seventy-five percent of all revenue types, the superintendent of public instruction shall adjust revenues as follows:
 - (1) Tuition revenue shall be adjusted as follows:
 - (a) In addition to deducting tuition revenue received specifically for the operation of an educational program provided at a residential treatment facility ~~and~~, tuition revenue received for the provision of an adult farm management program, and tuition received under an agreement to educate students from a school district on an air force base with funding received through federal impact aid as directed each school year in paragraph 3 of subdivision c of subsection 1, the superintendent of public instruction also shall reduce the total tuition reported by the school district by the amount of tuition revenue received for the education of students not residing in the state and for which the state has not entered a cross-border education contract; and
 - (b) The superintendent of public instruction also shall reduce the total tuition reported by admitting school districts meeting the requirements of subdivision e of subsection 2 of section 15.1-29-12 by the amount of tuition revenue received for the education of students residing in an adjacent school district.
 - (2) After adjusting tuition revenue as provided in paragraph 1, the superintendent shall reduce all remaining revenues from all revenue types by the percentage of mills levied in 2018 by the school district for sinking and interest relative to the total mills levied in 2018 by the school district for all purposes.
5. The amount remaining after the computation required under subsection 4 is the amount of state aid to which a school district is entitled, subject to any other statutory requirements or limitations.

6. On or before June thirtieth of each year, the school board shall certify to the superintendent of public instruction the final average daily membership for the current school year.
7. For purposes of the calculation in subsection 4, each county auditor, in collaboration with the school districts, shall report the following to the superintendent of public instruction on an annual basis:
 - a. The amount of revenue received by each school district in the county during the previous school year for each type of revenue identified in subdivisions c and d of subsection 1;
 - b. The total number of mills levied in the previous calendar year by each school district for all purposes; and
 - c. The number of mills levied in the previous calendar year by each school district for sinking and interest fund purposes.

Each school district eligible for payment under this section is entitled to receive the percentage of the total amount certified which is the same as the percentage of the number of the district's students who attended the former school district during the prior school year bears to the total number of students who attended the former school district during the prior school year.

2. A school district may not receive more than ninety percent of the actual costs incurred for the transportation of students.
3. For purposes of this section, actual costs include the transportation operating expenditures reported to the superintendent of public instruction for the most recent year plus the eight-year average cost of transportation equipment determined by the superintendent of public instruction. Any district having contracted for transportation services may determine the actual costs for the first year the district provides its own transportation services by using the statewide average cost of transportation during the first year.

If the lottery prize claim is paid through an annuitized payment option, each prize payment must be used to set off a delinquent debt owed to or collected through a claimant agency.
3. If the director determines that a winning player owes a delinquent debt to or has a delinquent debt collected through a claimant agency, the director shall set off the amount of the debt from the prize payment due and notify the player, in writing, of the setoff. If the setoff accounts for only a portion of the prize payment due, the remainder of the prize payment must be paid to the player. The director shall transfer the setoff amount to the claimant agency unless the player notifies the director, in writing, within thirty days of the date of the notice of the setoff, that the player disputes all or part of the debt owed to or collected through the claimant agency. If the director receives a notification that the player disputes the setoff amount or claim upon which the setoff is based, the director shall grant a hearing to the player to determine whether the setoff is proper or the claim is valid, unless a review by a court is authorized under section 50-09-14. At a hearing, no issue may be reconsidered that the player has or could have previously litigated in a court or administrative proceeding.
4. The lottery is discharged of all further liability for the amount of any debt setoff paid to a claimant agency.
5. If two or more claimant agencies have delinquent accounts for the same player, the director shall apportion the prize payment equally among them. However, a setoff to the department of human services for child support payments has priority over all other setoffs.

¹¹⁵ Section 53-12.1-12 was also amended by section 483 of House Bill No. 1247, chapter 352.

6. If the prize payment is insufficient to satisfy the entire debt, the remainder of the debt may be collected by a claimant agency as provided by law or rule and resubmitted for setoff against any other prize payment awarded.
7. If two or more claimant agencies make adverse claims to all or a part of a prize payment, upon receipt of written notice from the claimant agencies setting forth their claims, the director may deposit, in accordance with section 32-11-02, the contested amount of the prize payment with the clerk of court in the district in which an action pertaining to the contested amount is pending or with a court-authorized depository. If one of the claims is for child support, the director shall transfer the setoff amount to the state disbursement unit before depositing any remaining prize payment or award. Any review of this transfer to the state disbursement unit must be done pursuant to section 50-09-14. Upon making the deposit or transfer, the state and its officials and employees are discharged and relieved from further liability to any individual or claimant agency related to the prize payment.

SENATE BILL NO. 2237

(Senator Bell)

AN ACT to amend and reenact section 23.1-06-07 of the North Dakota Century Code, relating to limitations on regulation of coal-fueled electric generating units; to provide a penalty; and to declare an emergency.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. AMENDMENT. Section 23.1-06-07 of the North Dakota Century Code is amended and reenacted as follows:

23.1-06-07. Requirements for adoption of air quality rules more strict than federal standards.

1. Notwithstanding any other provisions of this title, the department may not adopt air quality rules or standards affecting coal conversion and associated facilities, coal-fueled electric generating units, petroleum refineries, or oil and gas production and processing facilities which are more strict than federal rules or standards under the federal Clean Air Act [42 U.S.C. 7401 et seq.], nor may the department adopt air quality rules or standards affecting such facilities when there are no corresponding federal rules or standards, unless the more strict or additional rules or standards are based on a risk assessment that demonstrates a substantial probability of significant impacts to public health or property, a cost-benefit analysis that affirmatively demonstrates that the benefits of the more stringent or additional state rules and standards will exceed the anticipated costs, and the independent peer reviews required by this section.
2. The department shall hold a hearing on any rules or standards proposed for adoption under this section on not less than ninety days' notice. The notice of hearing must specify all studies, opinions, and data that have been relied upon by the department and must state that the studies, risk assessment, and cost-benefit analysis that support the proposed rules or standards are available at the department for inspection and copying. If the department intends to rely upon any studies, opinions, risk assessments, cost-benefit analyses, or other information not available from the department when it gave its notice of hearing, the department shall give a new notice of hearing not less than ninety days before the hearing which clearly identifies the additional or amended studies, analyses, opinions, data, or information upon which the department intends to rely and conduct an additional hearing if the first hearing has already been held.
3. In this section:

-
- a. "Cost-benefit analysis" means both the analysis and the written document that contains:
- (1) A description and comparison of the benefits and costs of the rule and of the reasonable alternatives to the rule. The analysis must include a quantification or numerical estimate of the quantifiable benefits and costs. The quantification or numerical estimate must use comparable assumptions, including time periods, specify the ranges of predictions, and explain the margins of error involved in the quantification methods and estimates being used. The costs that must be considered include the social, environmental, and economic costs that are expected to result directly or indirectly from implementation or compliance with the proposed rule.
 - (2) A reasonable determination whether as a whole the benefits of the rule justify the costs of the rule and that the rule will achieve the rulemaking objectives in a more cost-effective manner than other reasonable alternatives, including the alternative of no government action. In evaluating and comparing the costs and benefits, the department may not rely on cost, benefit, or risk assessment information that is not accompanied by data, analysis, or supporting materials that would enable the department and other persons interested in the rulemaking to assess the accuracy, reliability, and uncertainty factors applicable to the information.
- b. "Risk assessment" means both the process used by the department to identify and quantify the degree of toxicity, exposure, or other risk posed for the exposed individuals, populations, or resources, and the written document containing an explanation of how the assessment process has been applied to an individual substance, activity, or condition. The risk assessment must include a discussion that characterizes the risks being assessed. The risk characterization must include the following elements:
- (1) A description of the exposure scenarios used, the natural resources or subpopulations being exposed, and the likelihood of these exposure scenarios expressed in terms of probability.
 - (2) A hazard identification that demonstrates whether exposure to the substance, activity, or condition identified is causally linked to an adverse effect.
 - (3) The major sources of uncertainties in the hazard identification, dose-response, and exposure assessment portions of the risk assessment.
 - (4) When a risk assessment involves a choice of any significant assumption, inference, or model, the department, in preparing the risk assessment, shall:
 - (a) Rely only upon environmental protection agency-approved air dispersion models.
 - (b) Identify the assumptions, inferences, and models that materially affect the outcome.

- (c) Explain the basis for any choices.
 - (d) Identify any policy decisions or assumptions.
 - (e) Indicate the extent to which any model has been validated by, or conflicts with, empirical data.
 - (f) Describe the impact of alternative choices of assumptions, inferences, or mathematical models.
- (5) The range and distribution of exposures and risks derived from the risk assessment.
- c. The risk assessment and cost-benefit analysis performed by the department must be independently peer reviewed by qualified experts selected by the environmental review advisory council.
4. This section applies to any petition submitted to the department under section 23.1-01-04 which identifies air quality rules or standards affecting coal conversion facilities, coal-fueled electric generating units, or petroleum refineries that are more strict than federal rules or standards under the federal Clean Air Act [42 U.S.C. 7401 et seq.] or for which there are no corresponding federal rules or standards, regardless of whether the department has previously adopted the more strict or additional rules or standards pursuant to section 23.1-01-04. This section also applies to any petitions filed under section 23.1-01-04 affecting coal conversion facilities, coal-fueled electric generating units, or petroleum refineries that are pending on the effective date of this section for which new rules or standards have not been adopted, and the department shall have a reasonable amount of additional time to comply with the more stringent requirements of this section. To the extent section 23.1-01-04.1 conflicts with this section, the provisions of this section govern. This section does not apply to existing rules that set air quality standards for odor, hydrogen sulfide, visible and fugitive emissions, or emission standards for particulate matter and sulfur dioxide, but does apply to new rules governing those standards.

CHAPTER 211

SENATE BILL NO. 2238

(Senator Bell)

AN ACT to create and enact section 23.1-06-16 of the North Dakota Century Code, relating to the state regional haze plan; to provide a penalty; and to declare an emergency.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. Section 23.1-06-16 of the North Dakota Century Code is created and enacted as follows:

23.1-06-16. Implementation of federal regional haze program requirements.

1. Consistent with the federal Clean Air Act [42 U.S.C. 7401 et seq.] and the regulations adopted under the Clean Air Act, the department shall develop and implement a state regional haze plan in accordance with this section.
2. The state regional haze plan must include an analysis of the natural and international causes of visibility impairment.
3. In developing a periodic comprehensive revision of the state implementation plan, the department shall consider whether additional measures are necessary to make reasonable progress toward meeting the national goal of visibility improvement, as required by the federal Clean Air Act [42 U.S.C. 7401 et seq.] and further defined by the United States environmental protection agency to be natural visibility conditions by 2064. The department may not require controls the department has determined serve only to increase total costs with little corresponding visibility benefit.
4. If the environmental protection agency disapproves the state regional haze plan, the department may develop and submit as expeditiously as possible a revised plan to address the reasons for the disapproval in accordance with the requirements of this section.
5. Any new control measures mandated by the state regional haze plan are effective only upon final approval by the environmental protection agency.
6. If federal laws, a federal court, or a final federal agency action renders any control measures included in the state plan unenforceable by the environmental protection agency, the requirement to implement the measures may not be enforced under state law to the same extent the measures are unenforceable under federal law.

SECTION 2. EMERGENCY. This Act is declared to be an emergency measure.

The board of county commissioners and a county zoning commission shall state the grounds upon which any request for a zoning amendment or variance is approved or disapproved, and written findings upon which the decision is based must be included within the records of the board or commission. The board of county commissioners shall establish zoning requirements for solid waste disposal and incineration facilities before July 1, 1994. The board of county commissioners may impose tipping or other fees on solid waste management and incineration facilities. SECTION 2. AMENDMENT. Section 23.1-10-02 of the North Dakota Century Code is amended and reenacted as follows:

23.1-10-02. Environmental quality restoration fund - Continuing appropriation.

There is established an environmental quality restoration fund into which the funds recovered in this chapter may be deposited. The fund is to be administered by the department of environmental quality and may be used by the department for costs of environmental assessment, removal, corrective action, or monitoring as determined on a case-by-case basis. All moneys placed in the fund under this section and section 23.1-10-05 are appropriated to the department on a continuing basis.

SECTION 4. Section 23.1-10-05 of the North Dakota Century Code is created and enacted as follows:

23.1-10-05. Revenue to the fund.

Revenue from the following sources must be deposited in the state treasury and credited to the fund:

1. If the balance of the fund is less than five million dollars, moneys recovered by the department in an action or administrative proceeding based on violation of the state's environmental statutes, including actions for administrative expense recoveries, civil penalties, compensatory damages; and money paid pursuant to any agreement, stipulation, or settlement. This section does not limit the department's ability to agree to a supplemental environmental project as part of a settlement.
2. Moneys donated to the department for the purposes of this chapter.
3. Transfers from the abandoned oil and gas well plugging and site reclamation fund under subdivision f of subsection 2 of section 38-08-04.5.
4. Moneys received from a federal agency for the purpose of this section.

SECTION 5. Section 23.1-10-06 of the North Dakota Century Code is created and enacted as follows:

23.1-10-06. Release of regulated substance prohibited - Exception.

The release of a regulated substance is prohibited. This section does not apply to releases of regulated substances pursuant to and in compliance with the conditions of a federal or state environmental permit.

SECTION 6. Section 23.1-10-07 of the North Dakota Century Code is created and enacted as follows:

23.1-10-07. Releases from petroleum tanks.

Releases from petroleum tanks are subject to this chapter, but the department may expend moneys in the fund to address releases from petroleum tanks only if there are no available moneys in the petroleum tank release compensation fund under chapter 23.1-12.

SECTION 7. Section 23.1-10-08 of the North Dakota Century Code is created and enacted as follows:

23.1-10-08. Responsible parties.

1. If the department determines a release has occurred, the department shall identify the responsible party.
2. If no other viable responsible party can be located after the department's reasonable investigation, the department shall consider a person that became an owner of the property after the release to be a responsible party, subject to the limitations in this section.
 - a. Notwithstanding any other provision of law and except as expressly provided by federal law, a person that acquires property is not liable for an existing regulated substance on the property if the person:
 - (1) Acquired the property after the disposal or placement of the regulated substance on, in, or at the property; and at the time the property was acquired did not know and had no reason to know a regulated substance was disposed of on, in, or at the property;
 - (2) Is a governmental entity that acquired the property by escheat, by tax sale, by foreclosure, through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; or
 - (3) Acquired the property by inheritance or bequest, and did not know a regulated substance was disposed of on, in, or at the property; or is the owner of the surface estate and the regulated substance was released as a result of oil or gas drilling and production operations, or other operation authorized by chapter 38-08, and the owner of the surface estate is not and has never been an operator of oil and gas wells permitted under chapter 38-08.
 - b. To establish the person had no reason to know a regulated substance was disposed of on, in, or at the property, the person must have undertaken, at the time of acquisition, all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice in an effort to minimize liability. For purposes of this requirement, the department shall take into account any specialized knowledge or

experience on the part of the person, the relationship of the purchase price to the value of the property as uncontaminated, commonly known or reasonably ascertainable information about the property, the obviousness of the presence or likely presence of regulated substances at the property, and the ability to detect the regulated substances by appropriate inspection.

- c. A person that has acquired real property may establish a rebuttable presumption the person has made all appropriate inquiries if the person establishes the person performed an investigation of the property, conducted by an environmental professional immediately before or at the time of acquisition, to determine or discover the obviousness of the presence or likely presence of a release or threatened release of regulated substances on the property.
 - d. The presumption does not arise unless the person has maintained a compilation of the information reviewed during the investigation.
 - e. This section does not diminish the liability of a previous owner or operator of the property which otherwise would be liable under this chapter, and nothing in this section affects the liability under this chapter of a person that, by any act or omission, caused or contributed to the release or threatened release of a regulated substance that is the subject of the action relating to the property.
 - f. As used in this section, "environmental professional" means an individual, or entity managed or controlled by an individual, such as an engineer, environmental consultant, and attorney, who, through academic training, occupational experience, and reputation, can objectively conduct one or more aspects of an environmental investigation.
3. A lender-owner is liable for a release or threatened release of a regulated substance only as provided in chapter 32-40.1.

SECTION 8. Section 23.1-10-09 of the North Dakota Century Code is created and enacted as follows:

23.1-10-09. Duty to provide information - Inspections.

1. When requested by the department, a responsible or potentially responsible party, or owner of real property where a release or threatened release is located or where response actions are proposed to be taken, shall furnish to the department any information the person may have or reasonably may obtain which is relevant to the release or threatened release.
2. The department, upon presentation of credentials, may:
 - a. Examine and copy any books, papers, records, memoranda, or data of any person that has a duty to provide information to the department under subsection 1; and
 - b. Enter upon any property, public or private, to take action authorized by this chapter, including obtaining information from a person that has a duty to provide the information under subsection 1, conducting surveys or investigations, and taking removal or remedial action.

SECTION 9. Section 23.1-10-10 of the North Dakota Century Code is created and enacted as follows:

23.1-10-10. Authority to establish and enforce remediation requirements.

In determining the appropriate standards to be achieved by corrective actions taken or requested under this chapter to protect public health and welfare and the environment from a release or threatened release, the department shall consider the planned use of the property where the release or threatened release is located. This chapter does not limit the authority of the department to establish environmental standards for remediation of air, soil, or water pollution pursuant to this title or chapters 61-28 and 61-28.1, or to enforce site-specific environmental remediation requirements in particular cases.

SECTION 10. Section 23.1-10-11 of the North Dakota Century Code is created and enacted as follows:

23.1-10-11. Action to compel performance - Injunctive relief.

1. The department may make a request for corrective action to a responsible party. A request must be in writing, state the action requested, the reasons for the action, and reasonable times for the action to begin and be completed taking into account the urgency of the action for protection of the public health or welfare or the environment.
2. If a person responsible for a release or threatened release of a regulated substance fails to take corrective actions or make reasonable progress in completing corrective actions requested under subsection 1, the department may bring an action to compel performance of the requested corrective actions. If any person having any right, title, or interest in and to the real property where the containment unit is located or where corrective actions are proposed to be taken is not a person responsible for the release or threatened release, the person may be joined as an indispensable party in an action to compel performance to assure the requested corrective actions can be taken on that property by the responsible parties.
3. The release or threatened release of a regulated substance may constitute a public nuisance and may be enjoined in an action brought by the department.

SECTION 11. Section 23.1-10-12 of the North Dakota Century Code is created and enacted as follows:

23.1-10-12. Cost recovery.

The department may recover its reasonable and necessary expenses incurred under this chapter, including all corrective action costs and administrative and legal expenses, in a civil action brought against a responsible party. The department's certification of expenses is prima facie evidence the expenses are reasonable and necessary. The department shall provide written notice to a responsible party before incurring costs, except when prior notice is not possible because identity of the responsible party is unknown or situations require emergency remedial efforts.

SECTION 12. Section 23.1-10-13 of the North Dakota Century Code is created and enacted as follows:

23.1-10-13. Corrective action costs as lien - Filing of notice of lien - Contents - Attachment priority.

All corrective action costs expended from the fund pursuant to this chapter constitute a lien on all property owned by the responsible party when a notice of lien is filed with the recorder in the county where the property is located. The notice of lien must contain a description of the property of the responsible party upon which the lien is made, a description of the property upon which corrective action or emergency remedial efforts were made, and a statement of the corrective action costs expended from the fund. Upon entry, the lien must attach to all real property of the responsible party. The lien has priority over all other claims or liens on the property, except those perfected before the department's filing of the notice of lien.

SECTION 13. Section 23.1-10-14 of the North Dakota Century Code is created and enacted as follows:

23.1-10-14. Other remedies.

This chapter does not limit the powers of the department or preclude the pursuit of any other administrative, civil, injunctive, or criminal remedies by the department or any other person. Administrative remedies do not need to be exhausted to proceed under this chapter. The remedies provided by this chapter are in addition to those provided under other statutory or common law.

SECTION 14. Section 23.1-10-15 of the North Dakota Century Code is created and enacted as follows:

23.1-10-15. Voluntary response actions - Liability protection - Procedures.

1. Subject to the provisions of this section, a person that is not otherwise responsible under this chapter or another environmental law for a release or threatened release is not responsible solely because the person undertakes and completes response actions to remove or remedy releases or threatened releases at an identified area of real property in accordance with a voluntary cleanup agreement.
2. A person requesting liability protection under this section shall submit an application in the form required by the department. The requestor also shall submit a voluntary response action plan that includes an investigation report prepared by an appropriate professional describing the methods and results of an investigation of the releases and threatened releases at the identified area of real property, methods of investigation, and the analytical results and professional's evaluation of the reported information. The department may approve the application only if the department determines the nature and extent of the releases and threatened releases at the identified area of real property have been identified and evaluated adequately in the investigation report. The department's approval also must be based on consideration of the following:
 - a. If reuse or development of the property is proposed, the voluntary response action plan provides for all response actions required to carry out the proposed reuse or development;
 - b. The response actions and the activities associated with any reuse or development proposed for the property will not aggravate or contribute to releases or threatened releases that are not required to be removed or remedied under the voluntary response action plan, and will not interfere with or substantially increase the cost of response actions to address the remaining releases or threatened releases; and

- c. The owner of the property or other relevant person agrees to cooperate with the department or other persons acting at the department's direction in taking response actions necessary to address remaining releases or threatened releases, and to avoid any action that interferes with the response actions.
3. If the department approves the application, the department and requestor shall enter a voluntary cleanup agreement in which the department agrees to take no action under title 23.1 and chapters 61-28 and 61-28.1 against the requestor and those persons identified in subsection 5 so long as the plan is implemented pursuant to the agreement's terms and with the exercise of due care. As part of the agreement, the department may require the owner, requestor, or other relevant person agrees to any of the following conditions:
 - a. To provide access to the property;
 - b. To allow reasonable and necessary activities at the property, including placement of borings, wells, equipment, and structures on the property; and
 - c. To enter an environmental covenant for the property containing institutional controls under chapter 47-37. Alternatively, institutional controls may be imposed on the property using zoning regulations under section 23.1-10-16.
4. Response actions taken under a voluntary cleanup agreement are not complete until the department certifies completion in writing. The department shall issue a certificate of completion if the parties demonstrate to the department's satisfaction the response action is complete. If a voluntary response action plan does not require removal or remedy of all regulated substances, the department may condition the certificate of completion on the owner's, requestor's, or other relevant person's continued compliance with conditions in the voluntary cleanup agreement or other conditions deemed necessary by the department.
5. In addition to the person that undertakes and completes a voluntary response action pursuant to a voluntary cleanup agreement, the liability protection provided by this section applies to the following persons so long as the persons comply with any conditions imposed by the department under subsection 4:
 - a. The owner of the identified property, if the owner is not responsible for any release or threatened release identified in the approved voluntary response action plan;
 - b. A person providing financing to the person that undertakes and completes the response actions or that acquires or develops the identified property;
 - c. A fiduciary that arranges for the undertaking and completion of response actions; and
 - d. A successor or assignee of a person to which the liability protection applies.

6. Notwithstanding subsection 1, when a person that is responsible for a release or threatened release undertakes and completes response actions, the protection from liability provided by this section applies to persons described in subsection 5 if the response actions are undertaken and completed in accordance with the following:
 - a. The response actions must be undertaken and completed in accordance with a voluntary cleanup agreement.
 - b. When the department issues a certificate of completion for response actions completed by a responsible party, the department and the responsible party may enter an agreement that resolves the responsible party's future liability to the department for the release or threatened release addressed by the response actions.
7. The protection from liability provided by this section does not apply to a person that:
 - a. Aggravates or contributes to a release or threatened release that was not remedied under an approved voluntary response action plan; or
 - b. Obtains the department's approval of a voluntary cleanup agreement for purposes of this section by fraud or misrepresentation or by knowingly failing to disclose material information, or that knows the approval was so obtained before taking an action that would have made the person subject to the protection of this section.
8. This section does not affect the authority of the department to exercise any powers or duties with respect to a new or additional release or threatened release of a regulated substance on a property or site regulated under this section, or the right of the department or any other person to seek legal or equitable relief against a person not subject to a liability protection provided under this section.

SECTION 15. Section 23.1-10-16 of the North Dakota Century Code is created and enacted as follows:

23.1-10-16. Zoning regulations establishing institutional controls.

1. If an area made subject to institutional controls involves two or more property owners and an area larger than either one city block or ten acres [4.05 hectares], the department and the political subdivision having zoning authority over the property may agree to institutional controls relating to the identified area impacted by the release or threatened release. Before the institutional controls become effective, the controls must be the subject of a public hearing and be established in the same manner as zoning regulations are established by that political subdivision. The political subdivision shall provide all notices under this subdivision, but any public hearing must be held jointly by the political subdivision and the department.
2. The department shall consider the factors in subsection 2 of section 23.1-10-15 before agreeing to institutional controls under this section.
3. Institutional controls may be terminated or amended at any time by written agreement between the department and the relevant political subdivision.

SECTION 16. Section 23.1-10-17 of the North Dakota Century Code is created and enacted as follows:

23.1-10-17. Liability protections issued before August 1, 2021.

This chapter does not affect liability protections related to releases or threatened releases of regulated substances issued by the department before August 1, 2021. These liability protections remain in effect, subject to any conditions that were imposed by the department and the statutes in effect on the date issued.

SECTION 17. AMENDMENT. Section 40-47-01 of the North Dakota Century Code is amended and reenacted as follows:

40-47-01. Cities may zone - Application of regulations.

For the purpose of promoting health, safety, morals, or the general welfare of the community, the governing body of any city may, subject to the provisions of chapter 54-21.3, regulate and restrict the height, number of stories, and the size of buildings and other structures, the percentage of lot that may be occupied, the size of yards, courts, and other open spaces, the density of population, and the location and use of buildings, structures, and land for trade, industry, residence, or other purposes. ~~Such~~The regulations may provide that a board of adjustment may determine and vary the application of the regulations in harmony with ~~their~~the regulations' general purpose and intent and in accordance with general or specific rules ~~therein~~ contained in the regulations.
