building trades was more actively employed than during the corresponding month a year ago. The fine winter weather allowed the contractors to rush construction of the many buildings under way. The leather industry was active. The shoe factories had a good month, overtime having to be made so as to keep up with orders. The sash and door factories were busy. The clothing industry was very active. The corset factory had a good month. and a good season is anticipated in that line. The Penman Manufacturing Company, Limited, had a most active month, certain departments working night and day with two shifts. A new company, for the purpose of building pipe organs, called "The Canadian Pipe Organ Company," has been formed, and a \$6,000 bonus has been asked of the City as well as exemption from taxes, with the exception of water rates for a period of ten years, the Company agreeing to establish its factory within the limits of the city, to fit it up with all the necessary machinery, a shop to be worth at least eight thousand dollars; to employ during the second, third and fourth years at least twenty men, and at least thirty during the six following years; and to pay at least \$10,000 in yearly salaries during the second, third and fourth years, and at least \$15,000 during the six following years. The proposition was submitted to the voters, on March 17, and carried by a big majority; the building of the factory will be commenced forthwith.

The Militia Department has established a military school, where the rank of lieutenant and captain may be obtained. The school will be opened early in April.

Retail trade was fairly active during the month. Wholesale trade has resumed considerable activity, the country dealers buying much more liberally than in past years. The banks reported a good month with easy payments. There were no changes in the rates of wages or the hours of labour and the relations between capital and labour have been very cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers benefitted by the good prices obtained for cattle and dairy products. Everything indicates an early spring. The month has been an active one for the farmers. Farm labourers were fairly well employed. The demand for these labourers begins to make itself felt, but the supply is still sufficient to meet the demand.

Manufacturing.—All the factories reported a good month.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, and plasterers were fairly busy; painters, paperhangers, plumbers and gas and steamfitters were well employed. Building labourers were fairly active.

Iron moulders, iron workers and helpers engineers, electricians, blacksmiths, boilermakers and horseshoers had a good month.

Woodworking establishments, as well as carriage shops, worked full time. Printers and pressmen were fully employed.

Journeyman tailors and garment workers were active. Boot and shoe workers were very active.

Bakers and confectioners, butchers and ice cutters were active.

Leather workers were all employed and the condition of these trades is very good.

Barbers, clerks, delivery clerks, hotel, restaurant and laundry employés had plenty of work.

Railroad trainmen reported very active conditions. Cab drivers, hackmen and carters had plenty of work.

Unskilled labour was fairly active and there were not as many unemployed as during the corresponding month of last year.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was more active than during the preceding

month, and the prospect is that the season will be still more active than last year. Work is more common than in the corresponding month of 1909. All the factories were very active, with a large amount of orders, and several had to increase their staff. There is work for all those who can work. A revolving bridge is being built in place of the old bridge, for the passage of the dredges used in deepening the Richelieu. Repair work on the dredges and scows was rushed at the Government yards. Business men are satisfied with the season. Money was much easier than last year. There was no change in the rate of wages or hours of labour. The best relations seemed to exist between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a good season. The market was well attended and prices of grain were the same as last month. Butter went up and eggs were lower towards the end of the month.

Railroad construction.—It is intended to push still more actively the work on the Canadian Pacific Railway bridge, between St. Johns and Iberville, the river being free of ice.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were rather quiet. Carpenters and joiners reported a good season with all the men working. Lathers and plasterers were still rather quiet. Painters and decorators reported a good month. Plumbers and steam-fitters were well employed on repair work. Stonecutters and helpers were active. Iron moulders, iron workers and helpers and coremakers were well employed. Machinists, engineers and steam engineers reported a good month. Tool sharpeners, horseshoers and jewelers reported a fair month. Woodworkers, upholsterers, varnishers, polishers and wood carvers reported a good month. Carriage and wagon makers were reported very busy. Printers, pressmen, electrotypers and bookbinders were reported very busy. Journeymen tailors,

garment workers, hatters and glove makers were all busy. Bakers and confectioners, butchers and meat cutters were active. Barbers, clerks, stenographers and delivery clerks were busy. Hotel and restaurant employés had a dull month. Theatre and laundry workers were all well employed. Railroad conductors, engineers, telegraph operators, trainmen, switchmen, maintenance-of-the-way men and freight handlers reported an active month. Cab drivers hackmen, carters and draymen reported employment good. Unskilled labour had an active month and was in good demand.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With the advent of spring there has been a resumption of activity, and the month was much ahead of the corresponding month of 1909. All the building operations suspended in the fall are now in full activity and new buildings are under way, which gives employment to many workingmen. The prospect is for an unusually active season. There were no changes in the rate of wages, and no unrest in the labour circles. Permits to the value of \$202,500 have been taken out during March, in Maison-neuve and district. Several large real estate transactions have taken place.

CONDITION OF PARTICULAR TRADES.

The building trades were more employed than in the corresponding month of 1909, without, however, being very active, except for painters, who were in demand. The metal trades were from active to busy, except for linemen and shipbuilders, who were quiet. Upholsterers were busy, polishers active, woodcarvers quiet, and carriage and wagon makers in demand. Car builders were active, moulders in good demand, coopers quiet and gilders active. The printing trades were all very busy, such as press-

men and bookbinders, being in demand. Journeymen tailors and garment workers were in demand, the others in this branch being busy. Bakers and confectioners, butchers and meat cutters, trunk and travelling goods makers were active, with tanners and curriers fair. All in the miscellaneous trades were busy, barbers being in demand, as well as clerks. The transportation trades were fairly active, except ship labourers and longshoremen, who are without employment during the winter season. Unskilled labour is beginning to become more active.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The duties levied in the port of Montreal on goods imported during February, last, exceed those of the same month in 1909, totalling \$1,397,947.37. Last year the amount was \$1,359,215.52, making an increase of \$38,731.85. The average was \$58,247.80 a day. A larger quantity of raw sugar than usual was imported this year, which tended to swell the figures.

Building was fair in March, as the operations begun last fall were actively pushed. Bricklayers had a good winter, as the cold was not very severe in Montreal. Stonecutters were rather quiet.

Merchants are quite satisfied with the month of March. The wholesale trade showed an improvement, as there were not as many failures as in the preceding winters. The rubber company has large orders on hand, and about one-third of the employés have to do night work.

CONDITION OF LOCAL INDUSTRIES.

All the industries were in full activity.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners and lathers and plasterers were active. Painters, decorators and

paperhangers were busy. Plumbers and gas and steamfitters were active. Stonecutters and building labourers were fair. The metal trades were from fair to active. Shipbuilders, shipwrights and caulkers were quiet. Sheet metal workers, tool sharpeners, horseshoers and jewellers, woodworkers, upholsterers, varnishers, polishers and wood carvers, carriage and wagon makers, pattern makers, and the printing and allied trades were active, as were the clothing trades. Bakers and confectioners, butchers and meatcutters were active. Ice cutters and drivers were quiet. Cigar makers and tobacco workers, tanners and curriers, leather workers, saddlers, trunk and bag makers had a good month. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés and laundry workers were active. The railroad transportation trades were active. Steamboatmen, ship labourers and longshoremen were quiet. Cab drivers, hackmen, carters, draymen, teamsters and expressmen had a good month. Unskilled labour was quiet.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During March the usual number of workmen has been kept busy in Eddy's and Booth's mills, and in Matthew's pork packing establishment. The number of men employed at the International Portland Cement Works, now forming part of the Canada Cement Company, has been reduced considerably.

Owing to the continued mild weather, the shantymen have been dismissed and are waiting for the opening of the three large saw mills, on the first of April.

There is marked activity in the mica industry, all shops working to their full capacity.

Operation on the main sewer, from Flora lake to the Ottawa river, are progressing slowly, owing to a strike

of hard rock, measuring some eight feet in depth.

No change was reported in wages or hours.

Country roads are still in a bad state. This has caused a slight advance in the price of hay and other farm products.

CONDITION OF LOCAL INDUSTRIES.

Fishing will not start before May, on account of the high water.

The City has awarded the contract for the enlargement of the power house at a cost of \$15,500, and for a bridge over Brewery creek, at a cost of \$6,000. The bridge will enable the Hull Electric Company to extend its street car service.

Postal delivery in the city will be started as soon as the authorities have the houses numbered.

It is expected that when the City Assessors present their yearly report to the Council, an increase of about \$10,000 will be registered in the value of immovable property.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Civic works planned for the ensuing season provide for an expenditure of \$1,100,000, or double the amount of any previous year. The completion of the West End drainage system and water-works intake and aqueduct will cost about \$400,000. The widening of Wellington and Little Sussex streets, and the paving of portions of Sparks, Bank, Wellington, Mutchmor and St. Patrick streets, are other large projects. A possible street railway extension to Ottawa East or Ottawa South would entail an expenditure of about \$80,000 by the corporation. The new office of street commissioner was created, carrying a salary of \$1,500.

Upper Ottawa lumber camps closed earlier than usual on account of the mild winter and frequent thaws. Some of the shanty hands were retained for the log drive, but many returned. At the end of

the month, Mr. J. R. Booth, and other large mill owners were waiting for reports from their foremen as to the number of logs which cannot be removed to the streams this season on account of the early break up.

Building operations continued as brisk in March as during the previous winter months, affording work for nearly all skilled builders. The building permits of February totalled \$97,200, or forty-six per cent. more than for the corresponding month of last year.

Stone cutters were not so actively employed as during the last two winters, when the construction of the new Government Museum gave work to fifty. The local union called upon the Government to increase the duty on cut stone which now enters the country at twenty per cent. It was pointed out by the union that the largest user of cut stone in the city was supplied from Indiana. The opinion of one of the largest contractors for cut stone in the city is that there will be a normal demand for cutters when summer building gets under way.

Domestic help appears to be the scarcest kind of labour in the Ottawa district. The local National Trades and Labour Council dealt with the problem and recommended that more comforts be provided for servants in the homes of their employers.

Citizens have contributed \$3,000 to augment a \$10,000 fund provided by the city to carry on an advertising campaign for industries. The Board of Trade is appealing for another \$2,000.

The Council of Women investigated a statement that seating accommodation for shop girls behind the counters in large city stores was inadequate, and reported that the complaint was unfounded.

The Ottawa Public School Board raised the maximum of salaries for principals holding first-class certificates from \$1,800 to \$2,000. A corresponding increase was made to teachers in the lower grades two years ago.

The tenders for civic printing were considered by the Board of Control to be so high this year that new tenders were invited. The firms which tendered ex-

plain that much of the work last year was done at a loss, a reason being that wages in the printing trades have been increasing for the last five years.

The head of the City Charity Office replied to a London company offering to send labour to Canada, that only the kind advisable to send would be domestics or farm help.

Harness makers have benefitted by an advance in wages. Employers state that wages are advanced according to each man's merit. The union claims the increase is the result of the strike settled in February, and amounts to an advance in the average workman's wages from \$10 to \$11 a week.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Several thousand acres subject to flooding in spring will be reclaimed in Carleton County by dredging Carp river at a cost of \$25,000. Mild weather contributed to an increase in the supply of eggs and the end of March witnessed a drop in price to twenty-two cents a dozen for strictly new laid stock, compared with forty cents, a month earlier. Veal was the only plentiful meat and sold at an average of ten cents per pound. Beef and pork were very scarce. Potatoes were shipped to Western Canada.

Lumbering.—Ottawa valley mills were obliged to refuse orders for high-class white pine, worth from \$50 to \$60 per thousand, owing to scarcity. All lines of lumber are firm and worth a dollar or so a thousand more than a year ago.

Railway construction.—Two companies, with charters to build railways to connect the Capital with centres in the Ottawa valley, report arrangements completed to start construction.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters and plasterers were very busy. One employer reported that it is necessary to import concrete workers to fill the demand. Some stone cutters were idle. Iron workers and machinists employed in repair shops were working overtime on orders from lumber mills getting ready for summer work.

Electrical workers and linemen were busy. Orders are heavy in the carriage and wagon shops, and woodworkers have been fairly busy. Blacksmiths and bicycle workers are actively employed. Some of the printing shops are working overtime and all the printing trades are actively employed. Harness makers have been busy on account of the interruption to the industry.

Journeyman tailors were well occupied. Girls are needed in most of the factories making women's clothing. Hat makers had a busy month. Bakers and confectioners were busy. The meat trade is quiet. Clerks were steadily employed. The demand is only for the very best stenographers. Delivery employes and laundry workers were busy. Railroad employes were steadily employed. There was a slight lull in shipping where it was possible to wait for the cheaper water rates. Freight handlers and expressmen were busy. Unskilled labour is actively employed for the time of year. Until the shanty crews arrived home, there were not many idle labourers in the city.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The outlook for work in the various trades is very bright. Unprecedented activity characterized many lines during the month. There is not much likelihood of strikes or other troubles from present indications. It is the intention of the Public Works Department to call for tenders shortly for the construction of a wing to the Kingston post office. Much work is going on at Queen's University, at the Hotel Dieu, and on many private residences and places of business. N. C. Polson & Company, manufacturing chemists, have decided to erect a large cement building in which to carry on their business, which has outgrown the premises at present occupied. The Property Committee of the Board of Education has decided to ask for from \$20,000 to \$25,000 to add another wing to the Collegiate Insti-

tute. It is only a short time since the Institute was enlarged. There is also more money required for public school accommodation. A new building is being refitted for an automobile garage to accommodate forty or fifty automobiles. Bower tanks and the latest equipment are being introduced. It is expected that the garage will be in operation by April 1.

Navigation opened on March 24; last year it began on April 6, as also in 1908. On March 16, 17, and 18 the merchants of Kingston conducted a "Spring Opening". Places of business were decorated and new goods displayed. The "Opening" proved a profitable innovation; much outside business was secured, as the railways gave reduced rates for the occasion. Citizens also took advantage of the special display to make many purchases. Arrangements were made during the month for the holding of a military camp at Kingston, to begin on June 13. On Monday, March 21, a by-law was carried by 1,597 for, and sixty-four against, exempting the Government dry-dock from general taxation, under the management of the recently formed company. On Monday, March 28, a staff of men began laying the foundation for a two-storey building to be used as a punch shop and mould-loft. The building is to be 65 x 125 feet, and modern in construction and equipment. This is only a sample of the many improvements under consideration. On March 28, the civic budget was passed. A review of the budget shows that while the rate of taxation remains the same, \$9,000 will be taken from the waterworks depreciation funds to meet required expenditure. Liquor licenses this year, will yield nearly \$1,200 less than last year. The police department will cost \$400 more; schools, \$7,554.18 more; and civic salaries will be increased about \$400, and contingencies, nearly \$600.

During the year 1909, the declared exports from the United States Consulate at Kingston, amounted to \$328,436.84. This was an increase over the exports from this district to the United States during 1908, to the extent of over \$34,000.

At a meeting held on March 10, the

Board of Education passed increases in salaries to Collegiate teachers and school principals to the extent of \$1,911 more than last year. The general teaching staff of the public schools were not included.

On Monday, March 21, employés of the Wormwith Piano works, to the extent of 100 refused to return to work, as a result of an attempt to cut the various prices previously paid for piece work. After a number of conferences, the men remaining out for one week, an agreement was made for one year on practically the old rates.

There were no further changes in the rates of wages or hours of labour reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Farming, fishing, lumbering, manufacturing, mining, railroad construction and other industries were all active.

CONDITION OF PARTICULAR TRADES.

The building trades were unusually active for this period of the year. The metal, shipbuilding and repairing was very active. Woodworkers experienced a revival during the month and were very active. Printers, clothiers, bakers, butchers, cigar makers, tanners, barbers, broom makers, clerks, furriers, hotel, restaurant and laundry workers, as well as most branches of the transport trades and unskilled labour reported a busy month.

DISTRICT NOTES.

Carleton Place.—A joint stock company is being organized here to build and control a \$10,000 skating rink.

Wilbur.—Negotiations are on foot for taking over the Wilbur mines by American capitalists, who are making enquiries as to shipping facilities at Kingston.

Brockville.—The light and power department, which is the property of the corporation is asking the Town Council to guarantee bonds to the extent of \$50,000 for necessary improvements and the maintenance of the plant. The revenue from the plant has already paid \$50,000 on

the purchase of the plant from a private company some years ago.

Smith's Falls.—During the month 300 coremakers in the employ of the Smith's Falls Malleable Castings Company, went on strike for an increase of fifteen per cent. in pay for piece work, an agreement for one year, and for certain changes in the shop rules.

Gananoque.—Towards the end of the month, the Ontario Wheel Company here, requested its finishers to do some overtime work on a rush order. A higher figure was asked for this overtime work, and being refused the men walked out. Their places are reported as being gradually filled.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of March was favourable for nearly all branches of trades, as the weather was quite mild. As a result considerable building operations were proceeding. There were very few idle men in the district. The outlook for a busy summer is favourable, especially in the building and manufacturing lines. All local industries were busy. The Belleville Hardware Company added a number of men, as well as the Brass and Steel goods. The Belleville Iron and Steel Company was running to full capacity, turning out large quantities of iron. Over 200 men are employed at this plant. The Canada Cement Company's works were running night and day. Both retail and wholesale merchants reported a good month's trade, while transportation was active. All the Banks reported payments prompt. The news of the coming of the Canadian Northern Railway is gladly received. It is expected that grading between this city and Toronto will begin next month. Many skilled men were employed on the addition to the courthouse, chiefly plasterers, plumbers, electricians and painters. A \$20,000 addition to the hospital will be

erected this spring. Many city labourers started work this month. There were no changes in the rates of wages or hours of labour; nor was there any unrest in the labour market..

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are all in readiness for spring ploughing. Fall wheat promises well. Hay is plentiful.

Fishing was dull.

Lumbering was active in the northern part of the county.

Manufacturing was active in all branches.

Mining was very active, especially at the Deloro reduction works, where from three to seven tons of refined silver are being turned out weekly.

CONDITION OF PARTICULAR TRADES.

Carpenters, joiners, plasterers, painters, paperhangers and plumbers had a busy month. Builders' labourers were fairly well employed.

Iron moulders, iron workers and helpers, machinists, electrical workers and linemen were all working full time. Brass workers, blacksmiths and boilermakers had an active month. Shipwrights and caulkers were busy getting the numerous vessels ready for the opening of navigation. Many men were employed at this work.

Nearly all branches of the woodworking and furnishing trades were well employed, especially carriage and wagon makers and coopers.

Every printer and pressman in the city were working full time, as were bookbinders.

Journeymen tailors were very active on spring orders. A new tailoring establishment opened during the month.

Bakers and carpenters, butchers and meat cutters, and cigar makers were all busy. Ice will be plentiful this season.

Harness makers had an active month.

Barbers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés, as well as laundry workers reported a very busy month.

All employed in railway work had an active month. Cab drivers, carters, draymen and teamsters were busy.

Unskilled labour was in good demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Active conditions prevailed in manufacturing. The building trades, though quiet during the greater part of the month, showed improvement with the advance of the season. Real estate is taking an upward movement. The Quaker Oats Company has purchased the property opposite the mills and will build more railway sidings. The city will build a new Isolation Hospital this year, to cost \$12,000. The City Council has decided to borrow \$70,000 to develop electric power at the new waterwork's dam. The cornerstone of the new Knox Presbyterian church will be laid on the 16th of April. There is going to be a good deal of building in the south end of the city this summer; preparations are being made to erect many new houses; they will be the kind mostly rented by the mechanic or labourer. The W. Hamilton Company has been awarded the contract for supplying the water wheels and other portions of the water power plant for the Simcoe Railway and Power Company, at Big Chute, on the Severn river, for the purpose of supplying power to Midland and other towns in the neighbourhood. The contractors for the new dam at Burleigh have been getting material on the ground during the winter. The cost will be between \$60,000 and \$70,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers report the outlook for fall wheat good, the weather, so far, being favourable. They expect to start ploughing the first of April.

Lumbering.—The mills are getting ready to start for the season. The Peterborough Lumber Company is bringing

down a drive of logs. Some of them are at the mill now. Sawing will commence next week.

Manufacturing.—Activity prevails in all the factories in the city. At Lindsay, the Madison Williams foundry is experiencing busy conditions necessitating an increase to the staff. John McCrae's foundry is also busy and is running night and day. Horn Brothers are building an addition to their woollen mill; they are very busy.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been quiet the greater part of the month but are becoming busy again as the weather has been most favourable. Carpenters have been fairly well employed. Plasterers have been rather quiet, as have been painters and decorators. Plumbers have had all they could do. Stone cutters and builders' labourers were quiet.

Iron moulders, core makers and iron workers and helpers have been fairly well employed. Machinists have been very busy.

Electrical workers have been steadily employed. Metal polishers, buffers, platers and brass workers have been very busy. Blacksmiths had a busy month. Horseshoers were also busy.

Woodworkers carriage and wagon makers had all they could do. Pattern makers were well employed. Coopers were busy.

The printing trades were well employed. Bookbinders had a good month.

Journeyman tailor and garment workers were very busy.

Bakers and confectioners were active. Butchers and meat cutters were busy. Cigar makers and tobacco workers reported some improvement.

Leather workers were very busy.

Barbers report business good.

Railway workers and street railway employes had a good month. Teamsters and expressmen were a little quiet, but were improving.

Unskilled labour had not much to do, the first part of the month, but were fairly well employed later.

DISTRICT NOTES.

Oshawa.—The Ontario Malleable Company is building a number of new houses for its workmen; the number may probably reach 100 before fall.

TORONTO ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been an active one in nearly all lines, with skilled mechanics well employed and an increasing demand for unskilled labour. The building season was fairly under way at the end of the month, with every prospect of a busy year. Several extensive civic undertakings were in progress, giving work to a large number. In connection with the civic electric power and lighting plant, which is to cost \$2,750,000, contracts have been let for the pole line supplies, and the cable and conduit laying. About 360,000 feet of cable have been laid and 201,000 direct of feet of conduit. Contracts have been let for three sections of the trunk sewer, which is to cost \$2,400,000, and work on two of them is in progress. Up to the present time expenditures on this work have amounted to \$304,250. Work on the filtration plant has been progressing slowly during the winter, but the force will shortly be considerably increased.

The city's revenue for the year is estimated at \$6,799,500, as against \$6,268,500 in 1909. The receipts from taxes are estimated at \$4,657,500, and the other revenue at \$2,142,000, bringing the total up to \$6,799,500, which is \$531,000 in excess of the revenue last year.

The city police force has been increased by taking on fifty-eight additional men, bringing the total strength up to 475. This will allow an arrangement, by which the men will have two days off every month, which will be put into effect as soon as the recruits commence regular duty.

Navigation has commenced considerably earlier than usual this year, the bay being clear of ice two weeks sooner. Freight traffic will probably be in full operation by the middle of April. There is great activity in preparation for the season's work, and a good deal of freight is waiting for the first boats.

The contract for erecting the superstructure of the new north wing of the Parliament Buildings has been accorded to Frederick Holmes, for \$517,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were slack towards the beginning of the month, but the fine weather which prevailed during the latter part of March resulted in increased activity, and spring work was fairly commenced. There has latterly been a remarkably heavy demand for good horses, which have commanded high prices, and cattle have also been much in requisition.

Manufacturing.—Activity continued to prevail in all the leading lines, with plenty of orders. A heavy demand for agricultural machinery in the west is reported. The Canada Foundry Company is engaged on several important structural steel contracts and has secured a contract for supplying cast iron pipe for the civic drainage system, at \$12,479. The Company has given an increase of five per cent. in wages to all employes who are on an hourly basis.

Railway construction.—The Toronto Railway has begun work on 100 new cars, in view of a contemplated extension of the system, involving the building of from fifteen to twenty miles of new tracks. The scheme embraces a new cross-town route, running via Wilton Avenue, two miles east of the Don; a second west end route reaching Harbord Street via College Avenue and running west along Harbord Street, and several new loop lines, including one round the City Hall. In accordance with recent legislation application will be made to the Ontario Railway and Municipal Board for approval of the scheme.

CONDITION OF PARTICULAR TRADES.

Bricklayers, stone masons, builders' labourers, carpenters, lathers, plasterers and painters were active. Plumbers and steamfitters quiet.

The carpenters affiliated with the Amalgamated Society and the Brotherhood of Carpenters, having asked for an increase of wages, the master carpenter offered to increase the minimum from thirty-three cents to thirty-five cents per hour. At a meeting held by the men, on the nineteenth, they decided to reject the increase as insufficient. The matter was left in the hands of a committee to negotiate with a view of getting the employers to increase their offer.

Blacksmiths, boilermakers, moulders, machinists, electrical workers and structural steel-workers had plenty of work. Brass workers were active. Jewellers and silversmiths had a good month.

Furniture workers and cabinet makers were fairly well employed. Carriage workers and coopers had ready work. Piano workers were active.

Printers, bookbinders, pressmen, stenographers and lithographers had continuous employment.

Custom tailors and garment workers were active. Boot and shoe, and hat and cap workers had a good month. Whitewear workers were busy. The provision trades were steady. Cigar makers were active. A strike of sixty girls at Milligan's cigar factory for increased rates for piece work was settled by a compromise, under which they were to receive regular wages.

Harness and leather workers were active.

Hotel and restaurant employés, laundry workers and barbers were generally well employed.

Railway and street railway workers, teamsters and expressmen had an active month. The pay of freight handlers and checkers employed by the Canadian Pacific Railway has been increased one cent per hour.

Unskilled labour was more generally employed than during the winter.

DISTRICT NOTES.

Newmarket.—The ratepayers have voted a bonus of \$5,000 to the Office Specialty Manufacturing Company, which will erect an addition to their present factory at a cost of \$80,000, and considerably increase their working force.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

It is many years since this city and district have seen so busy a month of March. The temporary industrial depression of February, due to bad weather, was forgotten. Work of every sort prospered, and the outlook was excellent.

Extensive public and semi-public works will employ a large number of men all summer, and the outlook for the building trades is good.

General business felt the effects of renewed industrial activity and railway traffic was heavy.

The city tax rate was fixed at twenty-five mills. Good progress was made in laying the new main line pipe of the city waterworks, and further extensions and improvements of the system are planned.

New school-houses are being erected in several neighboring townships, including one at *Falls View*, just outside the city, which will cost \$12,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Early spring weather brought activity to farmers and fruit growers. Ploughing was commenced. Farm labourers began to make engagements for the season. The outlook for both crops and employment was good.

Fishing.—Fishing in the lakes improved. Prices dropped.

Manufacturing.—Manufacturing concerns were all active and generally busy. The railway switch and frog plant re-

ceived large orders, the carriage mountings factory was rushed with work and advertised for young men for bench work, the cyanamid works made large shipments, the shredded wheat factory wanted more hands, the sanitary can factory was very busy and the foundry and machine shops, corset, neckwear, suspender and shirt factories were all busy.

According to the annual report of Queen Victoria Niagara Falls Park Commission, within a few months the electric plants on the Canadian side of Niagara Falls will have a capacity of 261,300 horse power. The Ontario Power Company, with its new conduit, will have a capacity of 90,000 horse power, and will at once provide for 24,000 more. The Canadian Niagara Power Company has completed arrangements to develop 62,500 horse power, while the Electrical Development has a capacity of 42,800, and is arranging for 42,000 more.

During March, the Ontario Power Company employed a large number of labourers, concrete workers, stationary engineers and other classes of men on its new conduit. While only the second conduit is being built now, excavation is being made for a third one. Each conduit is eighteen feet in diameter, and over a mile long, all underground. A new spill-way house, 60 by 100 feet in size, underground cable-conduits and other works will be commenced soon.

The roof was being put upon the Hydro-Electric Commission's transforming station, the long distance transmission line to Hamilton, London and Toronto was nearing completion, and six of the nine forty-two-ton transformers were installed in the station.

Railway construction.—The Niagara, St. Catharines & Toronto Railway resumed work on its new line from Welland to Port Colborne. It will be in operation in July. A further extension from Port Colborne to Fort Erie may be commenced this year.

The International Railway Company decided not to extend its line from Queens-ton to Niagara-on-the-Lake and an independent company was formed to build the line.

The Niagara Falls, Welland and Dunnville Railway Company was incorporated and surveys for the proposed line commenced.

Work on the Niagara Boulevard will be resumed in April. The section from Niagara Falls to Chippawa will be built this year and further work done on other sections. Many labourers and teamsters will be required. A new bridge will be built across the Welland river at Chippawa.

CONDITION OF PARTICULAR TRADES.

The building trades were busy and their outlook was good. All crafts were fully employed except plumbers and builders' labourers.

Foundries, machine shops and all concerns working in both light and heavy metal were busy and employment was consequently good. Steam engineers were active. Linemen were rushed with work. New power transmission lines, extensions and improvements to electric light systems and similar undertakings kept them busy in all parts of the district.

Journeyman tailors and employers of three haberdashery factories were active.

The food and tobacco trades were more active.

Barbers, clerks and laundry workers were more active. The large summer hotels will re-open about the middle of May.

Freight and passenger traffic was good, on steam and electric lines, and engine and trainmen were fully employed. Trackmen were active. Electric lines began to train new men for extra summer service. Steamboat men were engaging for the season and many joined their boats for fitting-out work. Teamsters were busy.

Unskilled labour was well employed. Large numbers of foreigners were employed by the power companies. These men were proving to be irregular workers, some leaving the works and others taking their places every day. Many go west and north for railway work.

DISTRICT NOTES.

Bridgeburg.—The new varnish factory was completed, a marble-working factory will be built, electric power lines were being extended, railways were improving yards and buildings.

Chippawa.—Buildings for the electric steel works were finished. A new wharf and warehouses were being built for the handling of cement, stone, gravel, etc.

Dunnville.—Sewers will be built this summer, more factories are in prospect.

Fonthill.—The nurseries will employ hundreds of men this spring. A hundred men are coming from the old country

Fort Erie.—A \$50,000 waterworks by-law was carried at a special election.

Port Colborne.—Contracts were let and work commenced on the mammoth new flour mill. The Government will build a third pier, making a new 200-foot slip. Electric lines were being extended. An early opening of navigation is expected.

Welland.—The steel tube works commenced running with 150 men, and many orders ahead. The Ontario Steel & Iron Company erected another shop, 50 by 170 feet in size. They employ 350 men. The drop-forging plant and cordage factory were very busy. The new glass company will build a factory this year. The N. S. & T. railway was erecting a powerhouse to cost, with equipment, \$32,000.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was a noticeable increase of activity in the labour market during March, as compared with the preceding month. The unusually warm weather permitted the building trades to resume active operations at an earlier date than for many years past. The cleaning of the city streets kept large gangs of

men at work. Business, wholesale and retail, was very good, and a very optimistic feeling prevailed in business and manufacturing circles for a prosperous season. The Monarch Knitting Factory started operations. Machines are being added as rapidly as possible and the Company expects to be in full operation at an early date. Fifteen hands are employed at present; when in full running order this number will be more than doubled. The promoters of the Wellandport, Dunnville and Beamsville Electric Railway have approached the city with a view to extending the line from Beamsville to St. Catharines. Their proposition was considered at a public meeting of ratepayers and another conference will be held at an early date. A meeting of those interested in railway matters, particularly in the building of an electric line from St. Catharines to Niagara-on-the-Lake, was held and an effort will be made to proceed immediately with that work. The journeymen tailors have secured an agreement with the merchant tailors for an increase of ten per cent. in wages, being an increase from a twenty cents per hour bill of prices to twenty-two cents, to take effect April 11, 1910.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Spring ploughing, seeding and spraying kept farmers and fruit growers busy.

Manufacturing.—Activity prevailed.

CONDITION OF PARTICULAR TRADES.

The building, woodworking, printing, food and tobacco preparation, leather, miscellaneous and transport trades reported active conditions. The metal and clothing trades were busy. Unskilled labour was active, being better employed than in the preceding month.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed. The Maple Leaf Rubber Company is adding a large warehouse to its plant.

Merritton.—Active conditions prevailed in the labour markets, all mills and factories were running full time.

Thorold.—Favourable labour condition were reported. The new pulp mill of the Colonial Wood Products Company is now in running order, turning out from sixteen to eighteen tons of pulp per day and it is expected that this output will be doubled in the near future. All the machinery is up-to-date.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

March has been a busy month in all lines of industry. Weather conditions allowed building operations to start earlier than usual. The building permits issued during the month number 103, with a total value of \$289,390, which constitutes a record. In March, 1909, sixty-five permits were issued for buildings, valued at \$172,350. Among the permits were six for additions to manufacturing. One of these was for a warehouse for the Sawyer-Massey Company, Limited, the specifications for which exclude the use of any inflammable materials.

The report of the Hamilton Clearing House Association for the month of March establishes a record beyond any previous month in the history of the institution. Ever since the beginning of the year the weekly clearings have shown increases over the corresponding weeks of the last two years. The monthly report shows that about \$2,200,000 more business passed through the Clearing House this month than passed in the month of March last year, and it was nearly \$3,000,000 greater than the amount of March, 1908. The figures follow:—

Clearings for March, 1910. . . .	\$8,183,549
Clearings for March, 1909. . . .	5,939,033
Clearings for March, 1908. . . .	5,392,646

The Ludlan-Ainslie Lumber Company, of Sarnia and Leamington, has located

here. The Company manufactures sash doors and interior woodwork for houses and offices, and will start with a staff of about 100 employés.

Retail merchants report a largely increased Easter trade over last year. Passenger traffic during the Easter season was very heavy.

The increasing activity of manufacturing establishments has absorbed many of the city's unemployed, and the opening up of operations by the city works department will further reduce the pressure of unemployment. The street railway company is preparing to finish the work started last year, of reconstructing its roadbed. The tracks on North James street, York street, West King street and Herkemer street will be relaid this spring and summer. Work will commence about April 15.

The Hydro-Electric Commission has announced that it will be able to supply electric power to the city in June.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Features of the Hamilton market during the month were the steady decline in the price of eggs, the upward movement in pork prices, and the cheapness of potatoes. Eggs sold March 26, at twenty-two cents per dozen, which was about half the price asked at the beginning of the month. Pork reached \$12.75 per hundredweight, the highest price on record. Potatoes sold as low as forty-five cents per bag.

Manufacturing.—The Sawyer and Massey Company has been reorganized, under the title of The Sawyer-Massey Company, Limited. The orders in hand for delivery during the year call for double the output of last year. The firm is the largest manufacturers of threshing machines and farm engines in the Dominion, and is further increasing its capacity. Extensions are also being made to the factories of E. T. Wright & Company, tin and wire goods; the International Harvester Company; the Moodie Company, knitting mills; the Geo. E. Tuckett & Sons Company, cigar factory; D. Aitchison Company, planing mills; the B. Greening Wire Company;

the Otis-Fensom Elevator Company, the Burton-Baldwin Company, interior woodwork, and others. Warehouses are being erected by the R. Simpson Company, and the Home Outfitting Company. The Tallman Brass & Metal Company have begun the manufacture of brass, copper and aluminum specialties.

The annual meeting of the Canadian Westinghouse Company, Limited, was held March 28, at its head office, in Hamilton. The annual report shows the following assets:—Cash, \$608,402.52; accounts and bills receivable, \$853,233.51; property and plant, \$2,766,488.97; materials and products on hand, \$1,269,728.44. Under liabilities:—Accounts payable, \$275,515.14; reserves for depreciation and inventory adjustment, \$320,000.00; undistributed profits, \$536,103.87. The profits for the year ended December 31, 1909, were \$498,379.94. Dividends paid 1909, at six per cent., \$261,540.33. The sales for the year were the largest in the history of the Company, and were about double those for the year 1908.

Railroad construction.—It was announced during the month that the property acquired in the vicinity of the Toronto, Hamilton and Brantford station was purchased in the interests of the Canadian Pacific Railway Company for depot purposes.

The steamer *Macassa* commenced her trip between this city and Toronto, March 28. The *Turbinia* will go on the same route April 18. Passenger rates will be the same as last season.

CONDITION OF PARTICULAR TRADES.

Conditions in the trades may be designated in one word "busy." The mild weather prevailing during the whole month enabled the building trades to get started rather earlier than usual, and an unusually active month is reported. Cigar makers are scarce, the Tuckett firm not being able to get as many as they were willing to employ. This firm is about to commence work on another big addition to its establishment, to accommodate increasing business in cigars and cigarettes. Garment workers were also unusually active, women operators and

handsewers falling short of the demand.

Unskilled labour has been pretty well absorbed by the start of building operations, the activity in manufacturing establishments, and the demands for labour on the farms, orchards and market gardens in the vicinity. The city works department employes are getting to work, and the relaying of the street railway tracks will provide employment for the remainder of those seeking work.

DISTRICT NOTES.

Grimsby.—A board of trade was organized here March 9. The Board will endeavour to induce new industries to locate, start an agitation for a market, and for the erection of a public hall and other improvements for the village.

Dundas.—Business is brisk in all industrial departments. S. J. Lennard & Company will build a large addition to their mill this spring. The Bowman-Grey Lumber Company is also adding to its facilities.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions during March compared favorably with February and were better than the corresponding month of last year. The factories were busy, a number working overtime; large shipments of machinery were made for the spring trade. A very busy season is anticipated. The building trades are showing signs of activity, many permits having already been applied for. Builders expect a very busy summer. Merchants had a fair month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were actively preparing for spring work toward the close of the month.

Manufacturing.—Manufacturers generally, were busy, and in a few cases very

busy, overtime being worked. Several large factory additions are under way.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, lathers and plasterers found trade slack. Carpenters in factories were busy, on outside work there was little employment. Printers, paper-hangers and decorators were from active to busy at the close of the month. Plumbers, gas and steamfitters were active.

Iron moulders, coremakers, machinists, metal polishers and buffers, blacksmiths and boilermakers were busy. Electrical workers, linemen and sheet metal workers were active. Stove mounters and horseshoers were not very busy.

Woodworkers generally, were busy. Carriage and wagon makers were from active to busy. Pattern makers were busy. Coopers were active.

The printing and allied trades were busy.

Tailors and tailoresses were busier than last month. Boot and shoe workers were busy. Bakers and confectioners were busy. Cigar makers and tobacco workers were active.

Leather workers and saddlers were busy.

Barbers, clerks, delivery employes, hotel and restaurant employes were steadily employed. Laundry workers were busy.

Railroad trackmen were active. Freight handlers were very busy. Street railway employes were steadily employed. Teamsters were active. Draymen were busy, but cab drivers and hackmen were not very busy.

Unskilled labour toward the close of the month, was pretty well employed.

DISTRICT NOTES.

Paris.—Labour was well employed during the month.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of March saw continued improvement in the labour market.

Labour was better employed than during the preceding month, mills and factories being very active, while the exceptionally fine weather provided out-door work for many. Prospects are good for a busy season in the building trades. Wages and hours will probably be the same as last season. Wholesale and retail merchants reported trade fair and in excess of the corresponding month last year.

No settlement has yet been reached in the Guelph Brussels Carpet Weavers' strike, but a number of the men have left town and secured employment elsewhere.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had a very active month, the very favourable weather allowing them to go on with spring work, many on the dry lands ploughing and in some cases seeding. The annual Pure-bred stock sale which was held in the Winter Fair building, here, was the best on record as regards quality of animals and prices paid. The spring Seed Fair was not so largely attended as usual, owing to the bad condition of the roads.

Manufacturing.—Conditions in most lines were very active, with prospects good for the coming season.

CONDITION OF PARTICULAR TRADES.

In building quietness generally, prevailed, but some new work was started towards the end of the month giving employment to out-door trades. A considerable number of indoor workers have been engaged on alterations and repair work. Iron moulders, coremakers and helpers, tube-mill workers and blacksmiths had a very active month. Machinists, electrical workers and linemen had a busy month. Woodworkers in sash and door factories reported trade fair, while piano and organ makers were active. Carriage makers and coopers had a quiet month, with pattern makers active.

The printing and allied trades had a good month. Journeymen tailors and garment workers were well employed. Bakers, confectioners, and cigar makers had a fair month. Unskilled labour had a good month, but with the supply still in excess of the demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During March, labour was, on the whole, well employed, factory hands being much more active than in the previous month, or in the corresponding month of last year. A number of hand shoelasters are wanted at the C. A. Aheran's Shoe factory. The C. Hehn block and the addition to the Wipper block were completed during the month. Twelve building permits were issued, valued at \$88,825, one being for a public school, to cost \$70,000, the contract for which has been awarded. The other permits were for dwelling-houses. The Town Council increased the fire chief's salary \$100 per annum, and four of the regular fire staff, \$50 per annum. Corporation labourers were also granted an increase of one cent per hour, making the scale \$1.60, \$1.80 and \$2.00 per day.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During the first half of the month, farmers were quiet, owing to the breaking up of the sleighing. In the last half of the month they have been getting ready for spring seeding. Some ploughing has been done.

Lumbering.—Sawmills have been very busy.

Manufacturing.—Manufacturing establishments were very busy, some working overtime. The J. J. Shantz button factory began operations the middle of the month, with some thirty hands. The Kauffman planing mill will be enlarged. The addition will be of concrete.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners plumbers and stone cutters were active. The other building trades were quiet. The metal and woodworking trades reported from busy to active conditions. The printing trades were active and the clothing trades busy. The other skilled

trades were active. Unskilled labour was somewhat inactive.

DISTRICT NOTES.

Waterloo.—All classes of labour were well employed. Manufacturing establishments were very busy, overtime being necessary in some cases. The building outlook is good. Work was begun on the Mutual Life Company's building, which will cost \$200,000. A large market building will be erected this season.

Elmira.—Labour was fully employed. The Elmira Transmission Company was busy. Moulders were in demand.

Galt.—Busy conditions prevailed in the labour market and factories were active.

WOODSTOCK, ONT., AND DISTRICT.

Mr. John Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The very favourable industrial conditions referred to in recent reports continue. Practically all the large wood-working factories are running to their full capacity, and all report the outlook very bright. This is true of the manufacturers of musical instruments, of the furniture manufacturers and of the wagon manufacturers, but they all say they have all the men they need for the present.

The factory of the Tobin Arms Company, a new industry, will be running at normal capacity in two or three weeks. It will employ from forty to fifty men, both iron workers and woodworkers, and mostly skilled hands. It is believed that most of the men can be obtained in the city.

The Stewart Stone Works report conditions excellent, and prospects particularly good. A few more good moulders could find employment here.

The outlook for the building trade is described as fairly good.

There is a scarcity of female labour here. Both the Bean and Westlake Biscuit factories, and the Oxford Knitting Company would be glad of more girls. The Bean and Westlake Com-

pany is enlarging its premises and will also increase the staff of girls. The Oxford Knitting Company would give employment to a dozen more girls at once, if they could get them. The factory is working overtime, and additional machinery is being added. Some of the factories report the loss of men who are moving to other parts of the country, chiefly to the West, but so far it has been possible to fill their places without much difficulty.

CONDITION OF PARTICULAR TRADES.

The building trade promises to be fairly brisk. There is more work now for bricklayers and masons, but the season has not yet fairly opened. Painters and paperhangers report business very good.

Iron workers of various kinds are busy, and the Stewart Stove Works would give employment to a few more moulders. Blacksmiths and stovemounters are busy.

Woodworkers of various kinds, upholsterers, varnishers, polishers, carvers, are well employed.

Printers are busy. There is some demand for competent pressmen, machine operators and hand setters.

Tailors and garment workers are steadily employed.

Bakers, butchers and confectioners are all busy.

Cigar makers report business just fairly good. All the men here are working, but there is no demand for men.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during March improved, as compared with February. Not many skilled mechanics were idle, and all manufacturing industries were running full time. Building operations have commenced and a large number of men and teams were engaged in excavating for new buildings; prospects for the coming season are bright. Tenders were opened for the work on a

new Registry office, a white brick building with stone foundation and slate roof. An important civic construction is the new sewage disposal plant to be erected at a cost of \$25,000, this season. The ratepayers will vote on a by-law, on April 14, to provide \$85,000 for a distribution plant for Niagara power in this city.

The Mayor's salary has been increased from \$200 to \$500 per annum, from January 1, 1910. The city firemen's salaries are increased from March 1, 1910, as follows: chief, from \$70 to \$75 per month; foreman, from \$50 to \$60 per month; driver, from \$47.50 to \$52.50 per month; two firemen, from \$45 to \$52.50 per month.

Customs returns for the month were, \$11,747.30. Wholesale and retail merchants reported trade active.

No change in the hours of labour and no trouble in the labour market was reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy the latter part of the month, ploughing and preparing for seeding. Market prices were:—

Butter, 25c. per lb.
Eggs, 20c. to 22c. per dozen.
Maple syrup, 40c. a quart.
Apples, 75c. to 80c. a bag.
Potatoes, 60c. to 65c. a bag.
Hogs, \$9.65 to \$9.75 per cwt.
Wheat, \$1.04, per bushel.
Oats, 41c. per bushel.
Barley, 45c. to 48c. per bushel.
Peas, 75c. to 78c. per bushel.
Flour, \$3.05 per cwt.
Bran, \$22, per ton.
Shorts, \$25, per ton.

Manufacturing.—All industries were busy, especially the woodworking factories.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet, but prospects are bright for the season.

Iron moulders, workers and helpers were active. Machinists, blacksmiths and boiler makers were busy. Horse-shoers and general blacksmiths reported trade active.

Woodworkers, upholsterers, polishers and carvers were active. Carriage and wagon makers were busy.

All engaged in the printing trades were very busy.

Journeyman tailors reported trade very good. All engaged in the factories were busy.

Bakers, confectioners and butchers report an active month. Cigar makers were steadily employed.

Harness makers were busy.

Barbers, clerks and delivery employes were active. Hotel, restaurant and laundry workers were active.

Railroad train crews were active. Freight handlers were busy. Cab drivers, draymen and teamsters reported business very good.

Unskilled labour was fairly well employed the latter part of the month.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The best weather for the month of March experienced in years, brought with it a resumption of outdoor work. After the winter's inactivity, the general indication is of a first-class season. With the exception of the Bolt and Hinge works, which have been closed for a month, now, all the factories and foundries throughout the city are very busy, and increasing their staffs in nearly every case. An exceptionally large number of building permits were taken out during the month, chief among these being one for Geo. White & Sons' new boiler and farm implement works; one for Hobbs Manufacturing Company, manufacturers of wire nails, plate glass, etc.; one for a residence; and others totalling \$114,765.

The local brickmakers are preparing for the making of brick, and are engaging help.

The exodus of people to the West continues, large numbers are leaving this section.

The charity organization has discontinued its woodcutting scheme; \$223 was paid out to those wanting work, for which 223 cords of wood were cut.

Along with the other Grand Trunk Railway operators and dispatchers on the middle division, fifteen employed in this city received increases of from \$5 to \$10 per month; street railway employes will receive an increase on April 1, as follows: spare and first-year men, same as before, sixteen cents per hour; second-year men, increased from from seventeen cents to eighteen cents per hour; third-year, from eighteen to nineteen cents; those with three years' service to receive twenty cents per hour.

CONDITION OF PARTICULAR TRADES.

In the building trades, the outlook is more favourable than for the past two years, and already all hands are at work. A number of local bricklayers, who were working in the United States for the winter are arriving back.

Moulders are busy. Iron workers are very busy, and a number of extra hands have been employed at the Rolling mills. Machinists are very busy. A force of linemen are engaged stringing wire and trimming trees for the Niagara power line. Bicycle workers are exceptionally busy on repair work.

Carriage and wagon workers report trade extra good, and a very large amount of their work being shipped to the Northwest. Car builders are very busy, and taking on more men. Coopers are busy.

Printers and pressmen report trade as fair. Bookbinders and lithographers are busy.

Business has improved with journeyman tailors. Garment workers are busy. Boot and shoe workers are very busy, working overtime.

Bakers and confectioners are busy. Cigar makers report trade good, a number have left for Hamilton, to work for the Tuckett Company.

Tanners and leather workers are exceptionally busy, with trade continually growing.

Broom makers are busy. Laundry workers are very busy.

The street railway company is taking on extra men in anticipation of the summer traffic. Carters and draymen are very busy.

Unskilled labourers are rapidly securing employment, and with sewers being laid, and other civic work being started, conditions look favourable.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The favourable weather conditions during March permitted outside work to be commenced, and, as a result, the building trades were able to get an early start with the season's work. The prospects are bright for a busy season.

Conditions in the local railway shops have been good. All hands have been well employed. In the traffic departments business has been better than during March, of the past year. It is reported that the Michigan Central Railway is handling as many as 100 cars more, daily, than during March, 1909. The local industries report the month a fair average. Unskilled labour has been fairly well employed, and prospects are there will be few idle men in the city during the coming summer. The census returns show an increase of 300 in the population.

The negotiations which have been carried on by the city officials with Mr. A. E. Medcalf, representing a shoe manufacturing establishment, with a view to having the firm locate in the city, have been successful, inasmuch as a by-law will be submitted to the ratepayers, and if same is endorsed by them, a loan of \$15,000, with a fixed assessment of \$5,000, exclusive of school taxes for a term of ten years, will be granted. It is understood that the firm will give employment to thirty-five skilled workers.

A by-law is also being submitted to the ratepayers, asking their endorsement to granting a loan of \$10,000 to C. Norsworthy & Company, with a fixed assessment of \$5,000, exclusive of school taxes, for ten years, in consideration of their establishing a factory in St. Thomas, for the manufacture of furnaces, stoves and other articles. This firm is one of the

oldest in St. Thomas, and has given steady employment to a considerable number of hands, for many years.

The Sutherland Innis Stave factory commenced operations during the month, and already a considerable number of hands are at work, and will be increased in the very near future. With plenty of material on hand, the prospects are bright for a busy summer.

The Street Railway Commission, which heretofore has had charge of the Street railway, has been abolished, and henceforth the affairs of the street railway will be handled by a committee of the City Council. It is altogether likely that considerable expenditure will be made on equipment so as to better the system.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Plowing has been commenced; the fine weather favouring this work. The local markets have been well attended during March. The offering of maple syrup has been satisfactory; it has been selling at an average price of \$1.25 per gallon.

Manufacturing.—Conditions in the industries were normal.

CONDITION OF PARTICULAR TRADES.

Mechanics in the building trades have commenced work and the prospects are bright for a very steady season's work. Railway shop employes, iron workers, moulders and blacksmiths have been busy. Printers have been busy. Journeymen tailors were busy. Railway conductors, engineers, firemen and others employed in the transport department report the month active. Unskilled labour was fairly well employed.

DISTRICT NOTES.

Port Stanley.—Extensive improvements are contemplated on the wharfs. It is expected that a large number of hands will be given employment during the coming summer. Considerable concrete work will be done.

CHATHAM, ONT., AND DISTRICT.

CONDITION OF PARTICULAR TRADES.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of March showed a slight improvement over the preceding month, especially in the building trades. Contractors expect an early beginning of building operations. Towards the last of the month, there were a number of buildings of a very high class started, principally residences. The foundations were completed for the modern Malleable Range Company. The newly established Canadian branch of the Anhut Motor Car Company will commence the manufacture of cars, here, in a few days. Already there are a number of men at work, and in a short time a large number of skilled mechanics will find employment. The Gananoque Spring and Axle Company has, owing to increased business, been compelled to enlarge its plant. Gray & Son, carriage makers, and the Manson-Campbell Company were working overtime throughout the month. Park Brothers, and McKeough & Trotter, foundrymen, have been very busy and report prospects good. There were no complaints from any one wishing employment, a number of firms advertising for mechanics. The prospects are that 1910 will surpass 1909 in activity.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Very little work was done until towards the end of the month. Reports from several sections are that the fall wheat has been badly damaged. Prices for farm produce still remain firm. Live hogs reached their highest during March, *yiz.*: \$9.50, live weight, and \$12.00, dressed. Clover hay sold at \$11.00 to \$12.00; timothy at \$13.00, and seed corn at \$1.00 per bushel. Many farmers are contracting with the Michigan Sugar companies for the coming season.

Railroad construction is quiet at present.

Bricklayers and masons were quiet, but carpenters and joiners were busy, especially towards the latter part of the month. Painting, decorating and paper hanging was slack, but plumbers and steamfitters reported trade fair. Builders' labourers were idle. Iron moulders, iron workers, machinists and engineers were busy.

Electrical workers were very busy, and linemen had a very good month. Metal polishers, buffers and brass workers were busy. Blacksmiths, sheet metal workers and horseshoers reported a slight improvement over the preceding month.

Woodworkers, upholsterers, carriage and wagon makers were busy. Printers and pressmen were very busy. Bookbinders reported trade fair. Journeymen tailors, garment workers and boot and shoe workers were busy. Bakers, butchers, cigar makers and tobacco workers had a very good month. Barbers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés and laundry workers reported a good month. Cab drivers, hack-men, carters, draymen and teamsters were quiet.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market for the month, has been very active in all branches. Owing to the cold weather in January and February, the building permits were not as many as a year ago, but prospects are now better in the building trades than last year. The A. W. McLean Lumber Company has built a large addition to its planing mill, and is installing a 100-horse power engine and boiler, and several new machines. The Palmer Medical Company has let a contract for a large building to cost \$15,000. The wholesale and retail merchants report trade better than for the same two months, a year ago.

The Act amending the Act respecting the City of Windsor became law on March 19. By this amendment, the city is

allowed to submit a by-law to the people to be carried by a two-thirds vote of the people who actually vote. The city is also given power to buy factory sites and sell, lease or give them away to incoming industries. The amendment Act also gives the city of Windsor power to grant exemptions to factories locating here, for a period of ten years. New industries can also be given free water and light.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are all busy getting things in shape for spring work. They report that fall wheat has wintered well and is looking good.

Manufacturing.—Manufacturers are all running full time.

Railroad construction.—The Michigan Central Railroad Company has a large gang of men building new yards at the end of the tunnel, and building a large round house.

CONDITION OF PARTICULAR TRADES.

There is a demand for men in all branches of the building trades. Houses that rent from \$12 to \$15 per month are in demand.

Iron moulders, machinists, engineers, electrical workers and brass workers have had an active month, and good skilled workers are in demand. Blacksmiths and horseshoers were all well employed.

All branches of the woodworking trades had a good month.

Printers and pressmen were busy.

The clothing trades are active and coat makers are in demand. Garment workers are also in demand.

Bakers, confectioners, butchers, cigar and tobacco workers have been fully employed.

Barbers report a fair month. Clerks are in demand. Delivery employés, hotel and laundry workers have been fully employed.

Railway and street railway men were well employed, also expressmen and teamsters.

Unskilled labour was well employed.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was very well employed during the month, though the supply in most lines exceeded the demand. Conditions, on the whole, however, were better than in the previous month. This was attributable to good weather. Plenty of work remains to be done. Business during the month was fair. The Town Council introduced a building by-law under which intending builders will have to obtain permits. In this way a record of building operations can be kept, a thing not done in the past. The season's outlook for building is bright.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Conditions were normal.

Lumbering.—Operations were over for the season with the exception of the drive.

Manufacturing.—The Dominion Tar and Chemical Company, of London, England, intends erecting a tar distillery plant in Steelton, (a suburb of Sault Ste. Marie) and will employ twenty or thirty hands. The town of Steelton has granted the company some small concessions. A company has been formed to operate the Lake Superior Corporation's brick plant, which has been idle for some years. This plant is a fine one, and twenty-five or thirty men will find employment therein. The Standard Chemical Company is increasing the capacity of its charcoal and by-product plant. The blast furnaces and steel mills operated full time during the month, also the other industries, including pulp mills, machine shops, etc. The prospects for the season are the brightest for years.

Normal conditions prevailed in all of the skilled trades during the month.

PORT ARTHUR, FORT WILLIAM,
ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET. ²

All branches have been more active than last month, and with open spring weather, trade generally is, at least, a month in advance of last year.

Many buildings have been commenced in both cities, and everything points to a very large building season.

The contract for the Western dry docks has been let, and the work has been started.

At the docks, everything is being put in order for the opening of navigation. The vessels that have wintered in these ports have been overhauled and crews are in charge. The first boat from Duluth arrived in Port Arthur on Thursday, March 31.

There have been no changes in rates of wages. The unrest between the organized workers in the iron trades, at Fort William and the Canadian Foundry Company is not yet settled; the foundry is worked as an open shop.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The small farmers in the vicinity are busy on their land and early ploughing is taking place.

Many of the Scandinavians here, are farmers, carpenters and bushmen. These are now busy preparing their land and after seeding will come into the cities for the building trade. In this way the agricultural land is being developed and in a few years the city populations should be supplied from these farms with all the potatoes and other root crops and garden produce required.

Lumbering.—The winter and spring season has been dull from the merchant's standpoint, in the number of lumbermen and railwaymen returning to town without good earnings.

CONDITION OF PARTICULAR TRADES.

The building trades have not yet fully started, but the best men are already

being engaged for the summer work, and all trades are expected to be very busy this season. All iron workers, machinists and engineers have had steady work, but some trades have been, and are still, on short time.

Printers and pressmen have had a steady month. Journeymen tailors have been very dull. Ice cutters have had a bad season, owing to mild weather and the uncertainty of the ice field remaining solid, after the breakup in January. Barbers, clerks, stenographers and delivery employés have been steadily engaged; also hotel, restaurant and theatre employés. The transport trades are getting ready for the opening of navigation. Unskilled labour has been fairly well employed; at present there are more men on the market than needed.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

During April, active preparations are usually made for the work of the summer. Generally speaking, large numbers of men congregate at Winnipeg to secure employment, at this period of the year. The weather during March has been so exceptionally favourable that towards the end of the month large numbers of men were employed. Outdoor work has been so prevalent that the labour offering has been steadily absorbed and there is not much likelihood, at the present time, of there being a repetition of the annual congestion of previous years. The outstanding feature of the labour market during March has been the demand for farm labour. In no previous year has it been so acute.

The factories in Winnipeg, generally speaking, were very busy. This is evident particularly in the iron trades, and in the clothing factories.

For the month of March the bank clearings amounted to \$60,067,844, a total that is twenty per cent. greater than that of March, a year ago. For the first three months of the present year, the bank

clearings are twenty-seven per cent. greater than in 1909, an increase that is very close to the record made for the month of March in the year 1907. This increase is exceptional, in view of the fact that the Easter holidays, this year, came in March.

The bank clearings indicate a steady increase in the volume of business being transacted in Winnipeg. During the month, one of the most active branches of the jobbing trade has been hardware. In this particular branch the amount of business will, for the first three months of the year, exceed very largely, the totals for any similar period in the past. The cause of this increase is largely the active building operations throughout the entire Canadian West.

The Canadian Pacific Railway Company has invited tenders for the construction of a subway under the tracks which cross McPhillips Street, Winnipeg; work will be done during the present summer.

The Canadian Northern Railway Company is already making rapid progress with the construction of a subway under the tracks on Pembina street, Winnipeg.

The city of Winnipeg proposes to submit a by-law to the ratepayers of the city to sanction the raising of \$600,000 for extending the accommodation in the Winnipeg General Hospital. Out of this sum a new isolation hospital, an auxiliary hospital in the northern part of Winnipeg, and a new wing to the present hospital, will be built. The by-law will be submitted in the course of a few weeks.

During March, the Provincial Government of Manitoba appointed a commission to enquire into the question of publicly controlled abattoirs and stock-yards. At present cattle raisers and dealers complain that there is not sufficient accommodation for marketing cattle. The commission has already interviewed the Board of Control of the city of Winnipeg, and the city council of St. Boniface, and as a result of their negotiations they will outline a plan and submit it for approval. The railway companies desire union stock-yards, but the cattlemen favour these being under the public control, and not under the control of the railroad companies. The Provincial Government passed a measure which gives power to any muni-

cipality to raise \$250,000 for stock-yard purposes, without submitting a by-law to the ratepayers. The Government also offers aid to the extent of \$50,000 for the establishment of a municipal abattoir. During the session which ended in March, the Government received a report from the commission appointed a year ago to enquire into the need of an act providing for compensation for injuries to workmen. A unanimous report was presented, and the Legislature passed an act in accordance with the recommendations of the commission.

In several cases, negotiations between workmen and employers for an advance in wages are proceeding. The agreement of the shopmen of the Canadian Northern Railway with that Company, terminates on May 1, and the agreement between the Canadian Pacific Railway and its shopmen, on April 1. There is some doubt expressed as to what the exact term was. No official notification of a termination of the agreement, in the case of either party has been given. The prevailing wage schedules for the machinists, boilermakers and carpenters, the three trades principally concerned in the present negotiations, on the three railroads with shops in Winnipeg, so far as can be learned, are as follows:—

	C.P.R. per hour.	C.N.R. per hour.	G.T.R. per hour.
Machinists.....	\$.42½	\$.40½	\$.39½
Boilermakers.....	.43	.41	.40
Carpenters.....	.33	.33	.33

The directors of the proposed Centennial Exhibition for Winnipeg, have fixed 1914, as the year during which it should be held. A special report was placed before a meeting of those interested, and it represented that Canadian Pacific Railway and the Grand Trunk Pacific had promised each \$500,000, and the Canadian Northern Railway, \$250,000. Other sources of revenue enumerated were a grant from the Manitoba Provincial Government of \$250,000, and the sale of stock amounting to \$750,000, which makes a total fund available at the present time, of \$2,250,000. Of the \$750,000 named, the city of Winnipeg will raise \$500,000, and a by-law authorizing that amount, it is proposed, will be submitted to the ratepayers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During March the weather has been excellent for agricultural purposes throughout the entire Canadian West. Farmers have been able to cultivate the land and some seeding has been done. Although the land was in good condition for seeding, in many districts there is a difference of opinion on the advisability of putting in the seed as early as the latter part of March. Farmers have not been able to get all the help they wanted.

Railroad construction.—Arrangements have been made by the several railroad companies for an amount of construction that will represent a greater mileage of new road than has been attempted in any previous year. Each of the three trans-continental roads have a very large programme. The principal difficulty, it is feared, will be the supply of labour. With the exception of the Canadian Northern Railway, the largest contracts have been let. The last named railroad, although definite contracts have not as yet been made, will undertake more work in the West this year, than in any previous season, according to a statement made by the Superintendent of Construction.

CONDITION OF PARTICULAR TRADES.

Building.—The amount of building projected for the coming summer in Winnipeg is greater than heretofore. The comparative figures in tabular form, are as follows:—

The comparative figures in tabular form are as follows:

	March, 1909	March, 1910
Permits.....	167	256
Buildings.....	208	326
Cost.....	\$ 861,200	\$2,526,350

	1st three months 1909	1st three months 1910
Permits.....	274	423
Buildings.....	352	545
Cost.....	\$1,070,000	\$3,031,950

There are many new large warehouses being built, new bank buildings of elaborate character, apartment blocks and residences. Activity is not confined to any particular part of the city, but is general. It is estimated by one or two of the loan

company managers that the amount of building for the year, judging by the applications for mortgage loans being made, will exceed \$15,000,000.

In the woodworking and iron trades there is exceptional activity in consequence of the large amount of building being done.

The clothing trades are also very busy and in one or two cases employers state that they are unable to get the help they need.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

March has been a very good month for all kinds of labour. Considering the time of the year, much work has been done. The weather has been exceptionally mild, there having been no severe frosts since the commencement of March. The ice left the Assiniboine river on the twenty-fourth and twenty-fifth, the earliest date on record. On the twenty-third of the present month seventy-six degrees in the shade was recorded at the Experimental farm, the highest March temperature ever recorded. With such splendid spring weather much building has been possible. The three-storey brick warehouse for McDiarmid & Clark has been completed. Messrs. Clement Bros, are pulling down buildings occupying the site for their new five-storey block. The contract for the St. Michaels Convent has been let and work commenced.

The by-law allowing the Canadian Northern Railway to close Lorne avenue for the purpose of erecting an hotel was carried by a large majority.

Messrs. Beattie and Son, of Fergus, Ontario, implement manufacturers, will erect a branch house in Brandon. A site has been secured on the south side of the Canadian Pacific Railway tracks and work commenced.

The labour market was quiet and a very busy season is expected.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—With splendid weather, the farmers have been able to start work on the land. Ploughing and seeding has been general since the middle of the month.

CONDITION OF PARTICULAR TRADES,

About twenty per cent. of the bricklayers and masons were reported working, with prospects good. Carpenters and joiners were reported active. Lathers and plasterers were busy. Plumbers and steamfitters were active. Stonecutters were dull, with builders' labourers active.

Iron moulders, machinists and electrical workers were busy.

Printers, bakers and confectioners, cigar makers and railroad employés were busy. Unskilled labour was active.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month has been active for this season of the year, for which probably the exceptional weather conditions are to a large extent, responsible. Building operations, which have never wholly ceased throughout the winter, have become more active during the month. Excavations for buildings are to be seen in all parts of the city, and a limited amount of construction is proceeding. While it is rather early yet to attempt an accurate forecast of the building programme for the coming season, there is every reason to believe that as formerly predicted, activity will be above normal, and present indications point to a very active building year.

The labour outlook is especially bright, both for skilled and unskilled workmen, with a possibility of a shortage in some lines. In this regard, however, a cautious attitude must be taken in view of the immigration movement, and the

possibility of a large influx of men seeking work. So far, the supply is fully equal to the demand. But spring work has not yet, of course, commenced.

An extensive programme of civic improvements points to a brisk demand for unskilled labourers. This programme calls for street paving, boulevarding the construction of the sewer and water connections, the erection of a produce market, and considerable sidewalk construction. In addition there is the construction of an overhead bridge, by the city, and the Canadian Pacific Railway jointly, connecting South Hill with the main part of the city at Sixth Avenue.

At a meeting of the City Council, on March 26, an agreement was reached granting a franchise (conditional upon the approval of the ratepayers) to an Ottawa company, for the constructing and operating of an electric street railway system in Moose Jaw. The franchise, which is for a term of twenty years, calls upon the Company to have three miles of the system in operation this year and an additional three miles before the end of 1911. A by-law has been published and will be voted on by the ratepayers on April 19.

A pressing need of the city at the present time is houses for rental. From the workingman's standpoint the situation is acute. Real estate men generally report a demand which they cannot possibly cope with. It is therefore, but a natural consequence that rents should be comparatively high. For the "cost of living table" published elsewhere in this issue the average rent for a dwelling in "the workingman's quarter" is placed at \$25.00 per month. It is somewhat difficult, however, to strike an average in this connection. In the first place, there is not—strictly speaking—any clearly defined "workingman's quarter" in the city. Then in the matter of dwellings one has to consider all kinds, from the one or two room "shack" to the "modern house", the essential of the latter being water and sewer connections, with furnace and electric light. Naturally, therefore, the rents vary very considerably, say from \$10 to \$40 per month. It is after most careful

investigation, however, that the average of \$25 per month is struck.

Twenty labourers in the employ of the city suffered a decrease of wages from twenty-five cents per hour to twenty cents. The reduction was made upon the advice of the city engineer. This is only a winter rate, however, and the old rate will be paid as soon as the regular season's work commences.

Business generally has been good throughout the month and retailers report a good Easter trade. A new wholesale house has decided to build in Moose Jaw, namely the Codville Company, wholesale grocers. This is the third wholesale grocery to open here within the past twelve months.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—With springlike weather the farmers of the district have been busy on the land during the past two weeks. Odd cases are reported of seeding having been done, but agriculturists generally, are wary of seeding in March, and even with a continuation of the present weather, two or three weeks will probably elapse before seeding becomes general.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been quiet. Carpenters and joiners, lathers, plasterers, painters and decorators were fairly active for the time of the year. Plumbers were quiet. Iron workers, machinists and engineers, blacksmiths and boilermakers were fairly active. Electrical workers and linemen have been quiet. Printers and allied tradesmen were all busy. Store clerks, hotel employes, railroad conductors, locomotive engineers, firemen, trainmen and freight handlers have all been well employed. Unskilled labour was fairly active for the time of the year.

CALGARY, ALTA., AND DISTRICT.

Mr. Edwin Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market showed no marked change over the preceding month or the

corresponding month of last year. Building operations were quiet. Many brick buildings are being held in abeyance, owing to a scarcity of brick. The situation, it is expected, will not be relieved for another month. There is ample work ready to keep all local bricklayers fully employed, if brick could be gotten.

The City Council is starting some excavating for sewer and water extensions. The work will be rushed.

The City Commissioners have declared their intention of proceeding with the construction of a subway under the Canadian Pacific Railway tracks at First Street East. The work it is hoped, will absorb most, if not all the unskilled unemployed.

The rapid extension of the City necessitates a change of the building by-laws; a new set of by-laws are to be submitted by an expert committee to the Council for ratification.

The City Engineer's department has completed the estimates for the improvements in the island parks this summer. They reach very close to \$100,000.

A strike of freight men, employed in the Canadian Pacific Railway freight sheds occurred during the month. The men are not organized. A deduction of \$1 was made for doctor's fees and sick benefit from every employe. This was resented by the men and all but two refused their pay and would not resume work. The strike terminated on the second day, the men returning to work, upon receiving their pay in full.

The Bank clearings for March, were \$11,047,202, an increase of 63.9 per cent. over corresponding month of last year.

The building permits for March, are valued at \$415,680. The number of permits issued were 148, as compared with fifty-four permits, at a value \$94,000, in the corresponding month last year, and an increase of \$245,800 over last month. The total receipts of the Calgary Customs department for March, exceeds \$80,000, the largest amount recorded, the increase over corresponding month of last year being \$12,000.

March was also the banner month for the street railway company, since it has been in operation. It earned \$1,250

more than the previous highest, the total receipts being \$13,175.

CONDITION OF PARTICULAR TRADES.

Bicklayers and masons had a dull month, but carpenters, joiners and lathers were busy. Plasterers were quiet. Painters and decorators had a very busy month. Plumbers, steamfitters, stonecutters and building labourers had little to do.

Iron moulders, iron workers and helpers, machinists and engineers reported a good month. Electrical workers and linemen were active. Sheet metal workers and horseshoers reported a good month.

Woodworkers, upholsterers and polishers were actively employed.

Printers, pressmen and bookbinders experienced a very active month.

Tailors reported a good month.

Bakers, butchers and meat cutters had a very active month.

Leather workers had a busy month.

Barbers and laundry workers had a good month. Hotel and restaurant employés were in demand.

All classes of railway and transport-employés were actively employed. Teamsters and expressmen were busy.

Unskilled labour had little to do.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market improved slightly during the month. Compared with the corresponding month last year, prospects are much brighter. This is owing to the very mild weather. Excavators report very little frost in the ground. This will enable builders to commence work much earlier than usual.

The City Council is preparing to do a large amount of work during the summer. The estimates for 1910, follow:—

Tenders for the construction of a hospital are being called for. The estimated cost is \$150,000.

The bank clearings for the month

were \$3,823,302, an increase of \$704,421 over February, of last year.

Customs receipts for February, 1910, were \$32,704, and for February, 1909, \$21,695. Wholesale and retail trade was fair. There were no changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have commenced preparing the ground for the crop. According to reports of the Minister of Agriculture, the area under cultivation will be twenty-five per cent. larger than last year.

Railroad construction.—In view of the exceptionally early spring, contractors are preparing for an early start on railway construction. Within the next week or two, construction will be started on four lines of railway tributary to this city. The Grand Trunk Pacific Company is already grading on the one hundred-mile extension of the main line, west into the mountains, and will have contractors at work in a few days on the Tofield-Calgary branch. The Canadian Northern Company is preparing to start on the extension of the main line, west, and will resume construction on the Vegreville-Calgary branch shortly. This is the earliest start on construction work ever reported in the west.

NELSON, B. C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market, throughout Kootenay district, during March, has been quiet. There was a slight surplus of miners at the quartz mines, but coal miners were fairly well employed.

A considerable number of woodsmen were out of employment through the closing down of the lumber camps, because of the disappearing of the snow. A slight shortage of experienced sawmill hands was reported at the few mills that have started up.

Snowslides caused considerable damage during the month. At the Ymir mine,

the boiler room, with the boilers, dynamo, and the superintendent's house were completely destroyed; the loss is estimated at \$15,000. The loss at the Wilcox mine is estimated at \$1,500, while two miners sustained severe injuries, both being in the hospital as a result.

At the Kootenay Belle mine, on Sheep's Creek, the watchman and his little son were buried in a snowslide, but were rescued.

A rich discovery of silver-lead ore has been reported in one of the tunnels at the "Society Girl" mine, at Moyie, B.C.

The sawmill at Nelson has started operations, with a full crew of about sixty men. About 5,000,000 feet of logs have been cut for this mill at Creston camp.

At the first meeting of the proposed cooperative stone company, officers were elected.

The snow has almost disappeared at Fernie, and building operations are again commencing.

The Home Bank is calling for tenders for the construction of a brick building in Fernie, B.C.

The Crow's Nest Pass Coal Company is producing on an increased tonnage, each month, since the beginning of this year. Coal miners are fairly well employed.

NEW WESTMINSTER, B. C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market have somewhat improved in the last few weeks and with the opening of spring will show a further improvement and will give employment to the majority of idle men, here at the present time.

The Hassam Pavement Company has started the laying of the cement sidewalk on the main street of this city.

A new steamer, built, owned, and operated by a local company, has been put on the river to ply between here and the City of Chilliwack.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are preparing for spring work and with the continuation of the present mild weather they will be busy for some time to come. The weekly market was fairly well attended and the demand in all lines was equal to the supply. The following are quotations:—

Beef, hindquarter, per lb.,	9c. to 10c.
Beef, forequarter, per lb.,	7c. to 8c.
Lamb, per lb.,	15c.
Mutton, per lb.,	14c.
Veal, large, 9c. to 10c.	
Veal, medium, 11½c. to 12c.	
Pork, medium, per lb.,	12½c.
Eggs, wholesale, dozen,	30c.
Eggs, retail, dozen,	35c.
Butter, wholesale, per lb.,	30c.
Butter, retail, per lb.,	35c.
Fowl, per dozen, live,	\$10 to \$11.
Chickens, per dozen, live,	\$6 to \$8.
Broilers, per dozen,	\$4 to \$6.
Geese, each,	\$1.50.
Potatoes, per ton,	\$20.
Onions, per sack,	\$1.50.
Turnips, per sack,	50c.
Carrots, per sack,	60c.
Beets, per sack,	\$1.
Parsnips, per sack,	75c.
Cabbage, per sack,	60c.
Cauliflower, per head,	5c.
Apples, per box,	\$1.25 to \$1.75.

Lumbering.—The lumbering trade is very good at the present time, the majority of the sawmills running full time.

Railway construction.—The British Columbia Electric Railway Company is double tracking the main street of this city, and replacing the present rails with heavier ones. The Company is also making fair progress on the line from this city to Chilliwack.

The skilled trades were as a rule active, but steamboat men and unskilled labourers were dull.

VANCOUVER, B. C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

More favourable weather prevailed during March than in February, resulting in unusually active building operations. The outlook for a very busy season for the building trades is encouraging. A rush to the mining camps at the head of

Portland Canal commenced, and an extra steamer was put on the run to Stewart, the headquarters for the new mining camp. Loggers in increased numbers are taking to the woods, and expect a good season.

The Bakers' Union took steps to have the "Shops Regulation Act" enforced, alleging that bakeries were not living up to the same.

The Trades and Labour Council demand of the city authorities: (1) that all executive appointments be thrown open to competition; (2) that convict labour shall not be employed on the construction of a stable for mounted police horses. The contract for police clothing will be for union-made. Hindoo carpenters are working in and around the city. Twenty-seven Japanese applied for membership in the Moulders' union and were refused. The Cooks' and Waiters' Union adopted the monthly button system, i.e., a new and different colored badge will be worn by each member every month.

The volume of spring business was reported greater than ever before in this city, and generally speaking, prices are soaring. Especially is this so in provisions, the great prospective demand for camp work and railway construction are attributed to this fact. Ham, bacon and butter increased in price, but eggs decreased. Potatoes were plentiful, and may decline in price. First-class apples were scarce. California table vegetables were in demand. Contractors' and builders' hardware supplies were in demand.

Activity prevails in the Oriental shipping trade. Many ships from various points are on their way to this port with large cargoes.

Unabated activity prevailed in real estate. A three-storey brick block, at Hastings and Richards, occupied by the Bank of Ottawa, (eighty feet) brought \$310,000, or nearly \$4,000 per foot.

The Government Commission to enquire generally into the business of Fire Insurance as carried on in British Columbia, including the placing of insurance by persons in British Columbia with companies or associations in the United

States and other jurisdictions, met on March 14.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Ploughing at the Delta, and gardening have been started.

Fishing.—Unusually large catches of halibut were made. Three boats on one trip brought in twenty-four carloads for shipment, besides filling all local demands. Spring salmon, though plentiful brought ten cents a pound.

Lumbering.—The local demand was brisk.

Mining.—At the Texada mines, at a depth of 1,000 feet, the bornite ore is the best found there. All grades of ore are found, some nine or ten per cent. copper, \$7 to \$8 gold, and twenty to thirty ounce silver. The mines of the island give promise of good yields.

Railroad construction.—Active conditions prevail throughout the province.

CONDITION OF PARTICULAR TRADES.

Building operations are active, particularly with the carpenters. All union lathers have received a twenty per cent. increase in wages, and all are at work.

Metal and woodworking conditions were fairly active, and prospects were particularly bright for the electrical workers.

Printing branches were very active and prospects good.

Union tailors had three non-union concerns to compete against, besides the usual large number of Oriental shops, which made trade very unsettled.

Leather. The eight-hour day has been adopted. One firm, however, refused to agree to the change.

Bakers are very unsettled and have trouble on, but no strike. Cigar makers report trade very quiet.

Hotel, restaurant and theatre employés had an active month. Bar tenders, though double shifts are worked in the hotels, which are doing a large trade, report a surplus of men.

DISTRICT NOTES.

North Vancouver.—Building is very active. By-laws to raise \$25,000 for

sidewalks, and \$17,200 for schools, were passed by the ratepayers.

Delta Municipality.—About forty miles of water works mains will be laid, to cost over \$100,000.

Prince Rupert.—The British Columbia Mainland and Coast Industrial Company will spend \$1,500,000 in developing coal fields and erecting a smelter and coke plant. They proposed to the Board of Trade to supply gas for \$1.00 per thousand, and electric light at ten cents per killo-watt hour. A large number of idle men are here awaiting spring to open in the interior points.

VICTORIA, B.C., AND DISTRICT.

Mr. W. E. Ditchburn, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to favourable weather conditions outside labour was employed to a much greater extent than during the preceding month. All the local industries were running full time, and conditions, generally, were in a very healthy condition. During the present month construction work has started in the new wing of the Empress Hotel, and the large wharf of the Grand Trunk Pacific Railway Company was started. The prospects for a very busy summer for all those engaged in the building trades are extremely bright.

The annual report of the different departments of Civic Government, just issued, gives a fairly good idea as to the extent to which labour has benefitted by the immense amount of local improvement and construction work done during the year 1909. From the report of the city engineer is it learned that there were seven miles of surface drains laid; six and a half miles of sewers' extension; thirteen and a half miles of cement sidewalks; 118,000 square feet of macadam roads, and twelve and a half miles of boulevarding, done during the year. The report of the building inspector gives, in detail, the number, class and cost of buildings constructed during the past year. The building permits issued by the city during the month of February, totalled \$151,760,

as against \$122,680 for the same month of last year. During the months of January and February there were 123 person-mits issued, compared with eighty-seven for the same two months of 1909.

The bank clearings for February show an increase of over \$2,100,000 over the same month of the previous year. The total for the past two months was \$13,795,337, as against \$8,556,873 for the same period of time during 1909, equaling an increase of sixty per cent.

That the month of February was a brisk one in transportation is shown by the returns of the British Columbia Railway Company; 359,325 passengers were carried on their different lines, compared with 320,779 for the same month of the preceding year. For the months of January and February there were 774,475 passengers carried, while for the same two months of 1909, the number totalled only 649,859.

At the last meeting of the Victoria Trades and Labour Council a resolution was adopted supporting the eight-hour law now before the Dominion Parliament, after the reading of a report of the Legislative Committee.

CONDITION OF PARTICULAR TRADES.

All employed in the building trades found work in plenty during the month, except in a few instances where the weather conditions prevented the constant employment of these on outside work. This condition did not prevail during the present month to such a marked extent as in the previous month.

Iron moulders and iron workers found trade conditions about normal. Machinists and engineers also were well employed. There were a few engineers idle, but they are men who will go North again as soon as navigation opens in the northern rivers. Sheet metal workers were busy. Shipwrights and caulkers had very little lost time during the present month.

Woodworkers had another busy month getting out store fittings for the different new stores being constructed and remodelled. The upholstering trade was in a normal condition. Varnishers and polishers were well employed. Carriage

and wagon makers had plenty to do, as also had pattern makers.

During the month, the organization known as the "Printers' Board of Trade," composed of the master printers of the city, was disbanded owing to a disagreement. All the offices have been fairly busy during the month. Bookbinders and pressmen were also well employed.

Journeyman tailors and garment workers were fairly busy, but there were no idle tailors reported.

Bakers and meat cutters had constant employment during the month. Cigar makers state that the condition of trade is about normal.

Clerks were kept busy during the month. There has been a demand for competent stenographers. Laundry workers are always kept well employed in the four white laundries of the city.

The percentage of unskilled labourers employed was much greater during the past month than during the preceding one, owing to the weather conditions being much more favourable. This state of affairs is liable to prevail from now on.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. W. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The conditions of the labour market in this district have not shown much change from last month. There has been more outside work done, but there have also been more men looking for work, which has hardly opened up as yet. Transportation has been very heavy during the month. Merchants, wholesale and retail, report business as good. There have

been no changes in hours of labour or rates of wages during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy getting ready for their spring work and some are sowing.

Fishing.—There was little activity among the fishermen. The Whaling Station on the Gulf reported good catches.

Lumbering.—The sawmills of the district are working steadily and report prospects good. The logging camps are starting up and some of the sawmills are opening new camps.

Mining.—The coal mines of the district are working steadily, but the demand for coal is not as pressing as during the last few months, though as yet, the mines are working nearly full time.

Railroad construction and employment.—Railroad construction is being pushed on the extension of the Eastern and Nanaimo Railway. At Alberni on the west coast, a town site is being cleared, at the end of the extension of the railroad.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported work as active. Carpenters and joiners were very busy, as there are a large number of new buildings started. The prospects are that this will be a record year in building, principally dwelling houses. Painters and paperhangers, and plumbers were active, but there is not much demand for builders' labourers as yet. Blacksmiths and carriage makers were active. Teamsters and expressmen reported work good. Unskilled labour has been better employed than during last month, but there are a good many idle men.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—STATEMENT OF PROCEEDINGS UNDER ACT FOR YEAR ENDING MARCH 31, 1910; ALSO SUMMARY STATEMENT OF PROCEEDINGS, MARCH, 1907—MARCH, 1910.

THE Industrial Disputes Investigation Act, 1907, received the Royal assent on March 22, 1907, and had, therefore, been in operation three years at the close of the month of March last.

A table is presented in the present issue of the *Labour Gazette*, showing the proceedings under the Act, during the year ending March 31, 1910, as follows:—(1) the dates on which the various applications

for Boards of Conciliation and Investigation were received; (2) the names of the parties concerned; (3) the name of the party making the application; (4) the locality affected; (5) the number of persons affected; (6) the nature of the dispute; (7) the names of the members of Boards, in cases where Boards have been established; (8) the dates of the establishment of Boards; (9) the dates of the receipt of Board's report; and (10) the result of the reference under the Act.

In all twenty-seven applications under the Act were received during the year ending March 31, 1910, as a result of which twenty-five Boards were established. In one of the remaining cases the matters in dispute were adjusted by mutual agreement whilst communications were passing with the Department, in respect of the establishment of a Board. In another case communications regarding the establishment of a Board had not been concluded at the end of the month of March, 1910. In addition to the twenty-seven cases above mentioned, proceedings under the Act, during the past year, occurred also in connection with three applications, which were received prior to April 1, 1909.

Industries Represented.

The disputes dealt with under the Act, during the year, were distributed among the different industries as follows; namely:—

Coal mining.....	9
Metal mining.....	2
*Railways.....	12
Street railways.....	1
Freight handlers.....	2
Longshoremen.....	1
Teamsters.....	1
Civic employés.....	1
Industries other than public utilities.....	1
	30

During the year communications were received in respect of three disputes relating to industries other than public utilities, and in which Boards could, under the terms of the Act, be established only by the consent of all parties concerned. In two of these cases such consent was not obtained, so that no Boards were established in respect of the same. Correspondence was also exchanged between the Department and persons concerned in various disputes in which, however, the circumstances did not call for any formal procedure under the Act.

Four Strikes After Investigation.

In connection with each of the thirty disputes above mentioned sworn statements were furnished to the Minister of Labour to prove that, failing an adjustment of the differences or a reference of the same under the Industrial Disputes Investigation Act, a strike or lockout, as the case might be, would be declared.

From the table which is published herewith, it will be seen that there were only four cases in which the strikes were not either averted or ended. Three of these were in the coal mining industry, two of the number relating in the main, not to rules or hours of labour, but to the question of the recognition of certain labour unions. One of the disputes occurred in the metal mining industry and was mainly concerned, like the cases above mentioned, with the subject of union recognition. In each of the remaining disputes referred under the Act, the investigation before the Board resulted either in a direct agreement between the parties, or in affecting such an improvement in their relations that no cessation of work occurred. It may be said, also, that in cases where members of Boards disagreed in their findings, or where one of the parties to a dispute stood apart from the enquiry as far as voluntary action was concerned, enquiry has none the less resulted in a clearer understanding of conditions on the one side or the other, and a change of attitude which has been effective in averting the threatened trouble.

*Among the classes of labour concerned in these twelve disputes were the following: conductors, engineers, telegraphers, machinists, firemen, station agents, roundhouse employés, fitters, brakemen, baggagemen, yardmen, and maintenance-of-way employés.

The four cases in which strikes were not either averted or ended were as follows:—

1. A dispute between the Nicola Valley Coal and Coke Company and its employés to the number of 150, in which the latter went on strike whilst proceedings were pending for the establishment of a Board of Conciliation and Investigation, and the mines were closed down until after the investigation was finished, when operations were resumed, the men being engaged under new conditions. In a letter from the Company, dated June 15, 1909, to the Department, it was stated that an understanding, which is understood to have been promoted by the enquiry, had been reached between the management and the men.

2. A dispute between the British Columbia Copper Company, and its employés, to the number of 225, a strike being declared on June 26, 1909, in which the employés demanded recognition of the Western Federation of Miners, and continuing until July 24, 1909, when a settlement was effected.

3. A dispute between the Dominion Coal Company, of Glace Bay, C.B., and certain of its employés, to the number of 3,000, in which the latter refused to abide by the findings of the Board, a strike being declared on July 6, 1909, in which recognition was sought for the United Mine Workers of America. A considerable number of the Company's employés, members of the Provincial Workmen's Association, declined to participate in the strike, and on December 31, 1909, renewed for a period of two years, the agreement which the Dominion Coal Company had entered into with that organization on March 16, 1908, and which was based on the award of a Board of Conciliation and Investigation, established under the Industrial Disputes Investigation Act. It is claimed by the Company that the output of coal from its mines, during the winter months, had practically ceased to be affected, although a considerable number of workmen, members of the United Mine Workers of America, still remained on strike.

4. A dispute between the Cumberland Railway and Coal Company, of Spring-

hill, N.S., and its employés, to the number of 1,700, relating in the main to recognition of the United Mine Workers' organization, to which the employés in question belonged. A strike was declared on August 9, 1909, which resulted in the closing down of the Company's mines. Operations were resumed on a limited scale early in the month of March, 1910, but a considerable number of the Company's former employés still remained on strike at that time.

On March 31, 1909, a strike was declared of coal miners, to the number of 2,100, employed in the mines controlled by the members of the Western Coal Operators' Association, in Alberta, and in British Columbia, on the expiry of the agreement, under which they had previously been employed. On May 3, 1909, application was made to the Minister of Labour, for the establishment of a Board, whose report was received in the Department on June 21, 1909. The Department was shortly afterwards informed that a two years' agreement was signed between the parties on June 30, 1909, which was based on the report of the Board.

On April 23, 1909, a strike was declared of coal miners to the number of 300, employed by the Canada West Coal Company, Limited, of Taber, Alberta, in consequence of failure to agree upon the terms and conditions of a working agreement to take the place of an agreement which had expired on March 31, 1909. On June 10, application was made to the Minister of Labour, for the establishment of a Board, whose report was received on July 19. The Department was advised on August 2 that, on receipt of the Board's report, negotiations were resumed between the parties and an agreement reached on July 31, effective to March 31, 1911.

A strike occurred on May 7, 1909, of longshoremen to the number of 200, employed by the Canadian Pacific Railway Company at Owen Sound. The strikers returned to work on May 10, 1909, when application was made for the establishment of a Board of Conciliation and Investigation. The report of the Board provided for increased rate^t
s

of wages to the employés concerned, and was accepted by both parties to the dispute.

A strike occurred on August 9, 1909, of 1,200 freight handlers employed by the Canadian Pacific Railway Company, at Fort William. The strikers, the great majority of whom were foreigners, returned to work on August 16, 1909, when application was made for the establishment of a Board, the strikers in their application stating that the strike was declared in ignorance of the Canadian law. The report of the Board, providing for increased rates of wages to the employés, was accepted by both parties to the dispute.

At the close of the period, reports had not as yet been received in the following cases, namely:—

Alberta Coal Mining Company, of Cardiff, Alta., and its employés, to the number of thirty-five, directly, and twenty-five indirectly.

Canadian Pacific Railway Company, and its conductors, baggagemen, brakemen and yardmen, to the number of 4,360.

Grand Trunk Railway Company, and its conductors, baggagemen, brakemen and yardmen, to the number of 3,017.

Toronto, Hamilton and Buffalo Railway Company, and its conductors, baggagemen, brakemen and yardmen, to the number of 101

Grand Trunk Pacific Railway Company, and its telegraph and station employés, to the number of 75.

Dominion Atlantic Railway Company, and its employés, to the number of four, directly, and twenty-five, indirectly.

The Shipping Federation of Canada, comprising various lines of steamships navigating to Montreal, and the Syndicated Longshoremen of the port of Montreal.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

Table showing Proceedings under Act from March 31, 1909, to March 31, 1910.

Applications concerning disputes in mines and public utilities.								Applications concerning disputes in industries other than mines and public utilities.	Total applications under Act.
29								1	30
Concerning mines and smelters.		Concerning transportation and communication					Concerning civic employés.	Disputes referred by consent of parties concerned under sec. 63 of I.D.I. Act, 1907.	30

Strikes not averted or ended .	3	1	0	0	0	0	0	4	

¹ At the close of the financial year results were still pending in connection with seven applications, namely: (1) application made on behalf of the Alberta Coal Mining Company, of Cardiff, Alta., and employés; (2) application made on behalf of the conductors, baggagemen, brakemen and yardmen of the Toronto, Hamilton and Buffalo Railway Company; (3) application made on behalf of conductors, baggagemen, brakemen and yardmen of the Canadian Pacific Railway Company; (4) application made on behalf of conductors, baggagemen, brakemen and yardmen of the Grand Trunk Railway Company; (5) application made on behalf of the Syndicated Longshoremen of the Port of Montreal and various Steamship Companies navigating to Montreal; (6) application made on behalf of telegraphers and station employés of the Grand Trunk Pacific Railway Company; and (7) application made on behalf of the employés of the Dominion Atlantic Railway Company.

APPLICATIONS FOR BOARDS OF CONCILIATION AND INVESTIGATION.

A.—MINES, AGENCIES OF TRANSPORTATION AND COMMUNICATION, AND OTHER PUBLIC UTILITIES.

1. Appointed by the Minister, under section 8, sub-sec. 1, of the I.D.I. Act, on recommendation from party concerned.
2. Appointed by the Minister, under section 8, sub-section 2, of the I.D.I. Act, in the absence of a recommendation from party concerned.
3. Appointed by the Minister, under section 8, sub-section 3, of the I.D.I. Act, on the joint recommendation of the two members first appointed.
4. Appointed by the Minister, under section 8, sub-section 4, of the I.D.I. Act, in the absence of a joint recommendation by the two members first appointed.

I.—MINING AND SMELTING INDUSTRY.

1. COAL MINES.

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality.	No. of persons affected.	Nature of Dispute.	Names of Members of Board: (C) Chairman; (E) Employer; (M) Men.	Date on which Board was constituted.	Date of receipt of report of Board.	Result of Reference.
1909. Mar. 4	Dominion Coal Company and employés, members of U.M.W.A.	Employés	Glace Bay, C.B.	3,000	Alleged discrimination against certain employés of U.M.W.A.	His Honour Judge Wallace (C) ¹ G. S. Campbell (E) ² Daniel McDougall (M) ³	Mar. 22	April 16	The Board did not present a unanimous report, Mr. McDougall presenting the minority report. The Board found against the contentions of the men, and the latter refusing to accept the findings struck, on July 6. It was claimed by the Company that the output of coal from its mines had practically ceased to be affected during the winter months following, although a considerable number of workmen, members of the U.M.W.A. remained on strike at the end of March, 1910.
April 13	Nicola Valley Coal & Coke Company and employés.	Employés	Middlesboro, B.C.	150	Alleged discrimination against certain employés.	His Honour Judge P. S. Lampman, (C) ¹ Thos. Kiddie (E) ² Thos. Chas. Brooke (M) ³ .	May 7	June 3 " 16 " 11	The Report of the Board was accompanied by a minority report signed by Mr. T. C. Brooke, the member appointed on behalf of the employés. The report was not accepted by either party, and whilst proceedings were pending for the establishment of a Board in this case the employés ceased work on April 28, and remained on strike until the month of June. On June 15, the Department was informed that an understanding had been reached between the management and the men.

April 26	Nova Scotia Steel & Coal Company, Limited, and employés.	(Sydney Mines, C.B.	340	Wages and conditions of labour and recognition of U. M.W.A.	His Honour Judge J. P. Chipman, (C) ¹ . His Honour Judge MacGillivray, (E) ² D. McDougall (M) ¹ .	June 7	July 23	The Report of the Board was accompanied by a minority report, signed by Mr. D. McDougall, member appointed on behalf of the employés. The report of the Board found against the claims of the employés. There was, however, no cessation of work, the threatened strike being averted.
May 8	Western Coal Operators' Association, comprising: Alberta Railway & Irrigation Company; H. W. McNeill Co.; Pacific Coal Company; Leitch Collieries, Ltd.; Western Canadian Collieries, Ltd.; International Coal & Coke Company, Ltd. and Hosmer Mines, Limited, and their employés.	Lethbridge, Coleman Lill Bankhead, Hillcrest, Bellevue Passburg, Canmore and Taber, Alta, Hosmer and Frank, B.C.	2,100	Wages and conditions of labour.	Rev. Hugh Grant (C) ¹ . Colin MacLeod, (E) ¹ . F. H. Sherman, (M) ¹ .	May 15	June 21	The Report of the Board was accompanied by a minority report, signed by Mr. Colin MacLeod, which was, however, in substantial agreement with that of the Board. The report was not definitely accepted by either party, but conferences between the employers and the employés followed its publication, with the result that an agreement was reached, closely following the terms of the award, effective to March 31, 1911. The employés, who had been on strike from April 1, resumed work on July 1.
May 10	Cumberland Railway & Coal Company and employés.	Springhill, N.S.	1,550	Wages and conditions of labour and recognition of U. M.W.A.	Hon. Mr. Justice Longley (C) ⁴ Chas. Archibald (E) ² E. B. Paul, (M) ¹ .	June 5	July 23	The Report of the Board was accompanied by a minority note, signed by Mr. E. B. Paul, the member appointed on behalf of the employés. The Board's findings were substantially in favour of the Company. The award was not however, accepted by the employés, and a strike was declared on August 9, which resulted in the closing down of the Company's mines until early in the month of March, 1910, when operations were resumed on a limited scale.
June 15	Canada West Coal Company and employés.	Taber, Alta.	300	Wages and conditions of labour.	His Honour Judge R. Winter (C) ³ Colin MacLeod (E) ¹ W. C. Simmons (M) ¹	July 3	July 19	An unanimous report was presented by the Board, making recommendations for the settlement of the dispute. An agreement based on the findings of the Board was subsequently signed by the parties concerned, effective from July 30, 1909, to March 31, 1911. The employés who had been on strike from April 23, returned to work on July 30.

I. COAL MINES.—Continued.

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality.	No. of persons affected.	Nature of Dispute.	Names of Members of Board: (C) Chairman; (E) Employer; (M) Men.	Date on which Board was constituted.	Date of receipt of report of Board.	Result of Reference.
1909. Nov. 18	Edmonton Standard Coal Company, Limited, and employes.	Employer	Edmonton, Alta.....	75	Wages and dismissal of employes.	Geo. F. Cunningham (C) ³ . Frank B. Smith (E) ³ Clement Stubbs (M) ³	Dec. 2	27	A unanimous report was presented by the Board making certain recommendations for the settlement of the dispute, which were accepted by the parties concerned, a strike being thereby averted.
Dec. 2	James W. Blain, contractor for output of Cardiff Coal Co., Ltd. and employes.	Employer	Cardiff, Alta.....	60 dir. 15— indir.	Wages and conditions of employment.	Proceedings in connection with this application were discontinued in view of an agreement being reached by the parties concerned.
1910. Jan. 5	Alberta Coal Mining Company and employes.	Employer	Cardiff, Alta.....	35 dir. 25— indir.	Wages and conditions of employment.	R. G. Duggan (C) ³ . J. O. Hamah, (E) ³ . Clement Stubbs (M) ³	Jan. 17	Proceedings unfinished.

2. METAL MINES.

1910. April 5	British Columbia Copper Company and employes.	Employes.	Greenwood, B.C.....	225	Alleged discrimination against certain employes.	His Honour Judge P. E. Wilson, (C) ⁴ Edward Cronyn (E) ⁴ John McInnis, M.P.P., (M) ⁴ .	April 29	21 3 11	Three separate reports were presented in this case, the Company expressing its willingness to accept that of the Chairman as a basis of settlement, while the men accepted the report of Mr. John McInnis. The men declared a strike on June 28, which continued until July 24.
1910. Jan. 8	British Columbia Copper Company and employes.	Employer	Greenwood, B.C.....	350	Employes unwilling to work with non-union men.	J. H. Senkler (C) ⁴ . John A. Mara (E) ⁴ . John McInnis (M) ⁴ .	Jan. 10	29	The Report of the Board was accompanied by a minority report, signed by Mr. John McInnis. The Board's report was substantially in favour of the Company at the close of the year the Department was in communication with the parties to the dispute. No cessation of work occurred.

II.—TRANSPORTATION AND COMMUNICATION.

I. RAILWAYS.

1908 Dec. 26	Kingston & Pembroke Railway Company and employees, members of Order of Railroad Telegraphers.	Employés	Kingston & Pembroke Railway system.	19 dir. Wages and conditions of labour.	1,600—indir.	His Honour Judge Gunn, (C) ^y , J. L. Whiting, K.C. (E) ^h , J. G. O'Donoghue (M) ^h .	Jan.	15 April	22 A	A unanimous report was presented by the Board which made certain recommendations for the settlement of dispute. The report, with recommendations, was accepted subsequently by both parties, a strike being thereby averted.
1909 May 7	Canadian Pacific Railway Company and railroad telegraphers in its employ.	Employés	Canadian Pacific Railway lines	Concerning alleged unfair dismissal and breach of contract.	1,600	Hon. Mr. Justice Fortin, (C) ^y , Wallace Nesbitt, K.C. (E) ^h , W. T. J. Lee, (M) ^h .	May	29 June	11 A	A unanimous report was presented by the Board, making certain recommendations for the settlement of the dispute, which were subsequently, in correspondence with the Department, accepted by both parties concerned, a strike being thereby averted.
June 3	Grand Trunk Pacific Railway Company and engineers, firemen, conductors, brakemen, baggage-men and yardmen in its employ.	Employés	Grand Trunk Pacific lines.	Wages and conditions of labour.	300	Hon. R. F. Sutherland, M.P., (C) ^y , F. H. McGuigan, (E) ^h , J. G. O'Donoghue, (M) ^h .	June	24 Aug.	14 A	A unanimous report was presented by the Board, making certain recommendations for the settlement of the dispute and no cessation of work occurred, the threatened strike being averted.
June 8	Canadian Northern Railway Company and its Maintenance-of-way employees.	Employés	Canadian Northern Railway lines west of Port Arthur.	Wages and conditions of labour.	1,100 dir. 700—indir.	His Honour Judge R. H. Myers, (C) ^y , W. J. Christie, (E) ^h , J. G. O'Donoghue, (M) ^h .	June	24 July	21 A	The report of the Board was accompanied by a minority report, signed by Mr. W. J. Christie. The findings of the Board were subsequently accepted by both parties to the dispute, a strike being thereby averted.
Aug. 11	Intercolonial Railway of Canada and its round-house employees.	Employés	Halifax, N.S.	Alleged discrimination against certain employees.	20 dir. 1,000—indir.	Sir Geo. Garneau, (C) ^y , Jas. H. Gilmour, (E) ^h , Aaron A. R. Mosher, (M) ^h .	Sept.	25 Nov.	17 A	A unanimous report was presented by the Board, making certain recommendations for the settlement of the dispute. The findings of the Board were subsequently accepted by both parties to the dispute, a strike being thereby averted.
Oct. 2	Intercolonial Railway of Canada and machinists and fitters in its employ.	Employés	Intercolonial Railway System.	Concerning dismissal of certain employees and alleged violation of contract.	363 — dir. 43—indir.	His Honour Judge John A. Barron, (C) ^y , Jas. H. Gilmour, (E) ^h , J. G. O'Donoghue, (M) ^h .	Oct.	19 Dec.	8 A	A unanimous report was presented by the Board, making certain recommendations for the settlement of the dispute, which were accepted by both parties concerned, a strike being thereby averted.

1. RAILWAYS.—Continued.

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality.	No. of persons affected.	Nature of Dispute.	Names of Members of Board: (C) Chairman; (E) Employer; (M) Men.	Date on which Board was constituted.	Date of receipt of report of Board.	Result of Reference.
1909. Dec. 3	Grand Trunk Railway Company and telegraphers and station agents in its employ.	Employés	Grand Trunk Railway lines, east of Detroit, Mich.	760	Wages, advertising of vacancies, etc.	J. E. Atkinson, (C) ^M . Wallace Nesbitt, K.C., (E) ^M . W. T. J. Lee, (M) ^M .	Dec. 21	Feb. 24	A report was presented which was unanimous on certain of the matters in dispute, Mr. Wallace Nesbitt, K.C., member appointed on behalf of the Company dissenting from the views of the other members on two points. At the close of the year the Department was in communication with the parties to the dispute. No cessation of work occurred.
1910. Mar. 17	Canadian Pacific Railway Company and conductors, baggagemen, brakemen and yardmen in its employ.	Employés	Canadian Pacific Railway lines.	4,360	Wages and conditions of employment.	J. E. Atkinson, (C) ^M . Wallace Nesbitt, K.C., (E) ^M . J. G. O'Donoghue, Mar. 18 (M) ^M .	Mar. 18	Proceedings unfinished.
Mar. 17	Grand Trunk Railway Company and conductors, baggagemen, brakemen and yardmen in its employ.	Employés	Grand Trunk Railway lines.	3,017	Wages and conditions of employment.	Wallace Nesbitt, K.C., (E) ^M . J. G. O'Donoghue, (M) ^M .	Mar. 18	Proceedings unfinished.
1910. Mar. 17	Toronto Hamilton & Buffalo Railway Company and conductors, baggagemen, brakemen and yardmen in its employ.	Employés	Toronto, Hamilton & Buffalo lines.	101	Wages and conditions of employment.	F. H. McGuigan, (E) ^M . J. G. O'Donoghue, (M) ^M .	Mar. 18	Proceedings unfinished.
Mar. 19	Grand Trunk Pacific Railway Company and its telegraph and station employés.	Employés	Grand Trunk Pacific lines.	75	Rules and rates of pay.	W. T. J. Lee, (M) ^M .	Mar. 30	Proceedings unfinished.
Mar. 22	Dominion Atlantic Railway Company and employés.	Employés	Kentville, N.S.	4 dir.— 25— indir.	Terms of employment and dismissal of certain employés.				Proceedings unfinished.

2. STREET RAILWAYS.

1910 April 20	Winnipeg Electric Railway Company and employes.	Employés	Winnipeg, Man.....	600	Concerning wages and conditions of labour.	Rev. C. W. Gordon, D.D., (C) ¹ , W. J. Christie, (E) ¹ , J. G. O'Donoghue, (M) ¹ .	May 10	June 1	A unanimous report was presented by the Board, accompanied by an agreement covering all points in dispute and effective from May 1, 1909, to May 1, 1911, a strike being thereby averted.

Three Years' Proceedings under Act.

During the three years which elapsed between the enactment, in March, 1907, of the Industrial Disputes Investigation Act, and the end of March, 1910, eighty-two applications were received for the establishment of Boards of Conciliation and Investigation, as a result of which, seventy-four Boards were established. In sixty-eight, out of the seventy-four cases referred for investigation, the enquiry resulted either in a direct agreement between the parties, or in such an improvement of relations as led to the settlement of the dispute. The six cases in which reference under the Act was not successful in either averting or terminating a cessation of work, were as follows: (1) Cumberland Railway and Coal Company and its employés; (2) Canadian Pacific Railway Company and its mechanical employés; (3) Nicola Valley Coal and Coke Company and its employés; (4) British Columbia Copper Company and its employés; (5) Dominion Coal Company and its employés; and (6) Cumberland Railway and Coal Company and its employés.

In the foregoing statement of proceedings under the Act, during the year ending March 31, 1910, particulars have been given of four of these disputes above mentioned, the other two cases being as follows: (1) the dispute between the Cumberland Railway and Coal Company and its employés, Springhill, N.S., which resulted in a strike of coal miners, commencing on August 1, 1907, and continuing until October 31, 1907, when the men returned to work on the terms originally recommended by the Board, 1,700 men being concerned; and (2) the dispute between the Canadian Pacific Railway Company and its mechanical employés, which also resulted in a strike, commencing in this case on August 4, 1908, and continuing until the end of September, following, when the employés returned to work on the terms originally recommended by the Board, about 8,000 men being concerned.

Strikes not averted or ended	4	1	1	0	0	0	0	0	0	0	6

²At the close of the financial year results were still pending in connection with seven applications, namely: (1) application made on behalf of the Alberta Coal Mining Company, of Cardiff, Alta., and employés; (2) application made on behalf of the conductors, baggagemen, brakemen and yardmen of the Toronto, Hamilton and Buffalo Railway Company; (3) application made on behalf of conductors, baggagemen, brakemen and yardmen of the Canadian Pacific Railway Company; (4) application made on behalf of conductors, baggagemen, brakemen and yardmen of the Grand Trunk Railway Company; (5) application made on behalf of the Syndicated Longshoremen of the Port of Montreal employed by various steamship companies navigating to Montreal; (6) application made on behalf of telegraphers and station employés of the Grand Trunk Pacific Railway Company; and (7) application made on behalf of the employés of the Dominion Atlantic Railway Company.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF MARCH, 1910.

DURING the month of March six applications were received for the establishment of Boards of Conciliation and Investigation, as follows:—

1. On behalf of the conductors, baggagemen, brakemen and yardmen employed on the lines of the Canadian Pacific Railway Company, the dispute affecting, it was stated, 4,360 employés.

2. On behalf of the conductors, baggagemen, brakemen and yardmen employed on the lines of the Grand Trunk Railway Company, the dispute affecting, it was stated, 3,017 employés.

3. On behalf of the conductors, baggagemen, brakemen and yardmen employed on the lines of the Toronto, Hamilton and Buffalo Railway Company, the dispute affecting, it was stated, 101 employés.

4. On behalf of the Syndicated Long-

shoremen, of Montreal, employed by the companies comprising the Shipping Federation of Canada, the dispute affecting, it was stated, 1,800 employés.

5. On behalf of the telegraph and station employés employed on the lines of the Grand Trunk Pacific Railway Company, the dispute affecting, it was stated, seventy-five employés.

6. On behalf of certain employés of the Dominion Atlantic Railway Company, at Kentville, N.S., members of Local Division No. 25 of the Canadian Brotherhood of Railroad Employés, the number of employés concerned being estimated at four directly, and twenty-five indirectly.

Report Received.

During the month of March, the report was received of the Board of Conciliation

and Investigation, to which had been referred certain differences between the British Columbia Copper Company, of Greenwood, B.C., and its employés, members of Greenwood Miners' Union, No. 22 of the Western Federation of Miners. The report was signed by Mr. J. H. Senkler, of Vancouver, B.C., Chairman, and by Mr. J. A. Mara, of Victoria, B.C., member appointed on behalf of the Company; and was accompanied by a minority report signed by Mr. John McInnis, member appointed on behalf of the employés.

Other Proceedings under the Act.

On March 12, the attention of the Minister of Labour was drawn to statements appearing in the press, representing that certain freight handlers in the employ of the Grand Trunk Railway Company, at Toronto, had gone on strike without the matters in dispute having first been investigated by a Board of Conciliation and Investigation appointed under the terms of the Industrial Disputes Investigation Act, and an officer of the Department was immediately dispatched to Toronto to represent to the employés concerned the requirements of the Industrial Disputes Investigation Act, 1907, so that they might not, in ignorance of such requirements, take action contrary thereto. The officer of the Department, in conversation with the local officials of the Canadian Brotherhood of Railroad Employés, to which the employés in question belonged, learned that the parties concerned were ignorant of the provisions of the Industrial Disputes Investigation Act; and was also informed that a reference of the dispute to a Board under the Act would be considered as greatly preferable to a general strike, and that if the matter was not satisfactorily adjusted otherwise, it would be referred to a Board for inquiry on the lines required by the Act. The strike occurred on March 11, and lasted only a portion of the afternoon. Negotiations for settlement were then resumed, and at the close of the month there had not been any further cessation of work.

In the applications of the conductors, baggagemen, brakemen and yardmen em-

ployed on the lines of the Canadian Pacific Railway Company, the Grand Trunk Railway Company, and the Toronto, Hamilton and Buffalo Railway Company, respectively, it was stated that on January 3, 1910, a uniform request had been made to the managements of these systems for increased compensation and improved conditions, but that the same had been refused by the Companies. Mr. Wallace Nesbitt, K.C., of Toronto, was appointed, on the recommendation of the employers, a member of the Boards in respect of differences between the Canadian Pacific Railway Company and their employés, and between the Grand Trunk Railway Company and their employés, respectively, and Mr. F. H. McGuigan, of Toronto, was appointed a member of the Board in respect of differences between the Toronto, Hamilton and Buffalo Railway Company and their employés. Mr. J. G. O'Donoghue, of Toronto, was appointed a member of all three Boards, on the recommendation of the employés affected.

In the application of the Syndicated Longshoremen of the port of Montreal, for the establishment of a Board, to which might be referred certain differences between the longshoremen of that port and the owners of vessels doing business at the port of Montreal, it was stated that the differences in question related to the hours of labour and rates of wages. After certain correspondence between the Department of Labour and the parties concerned, it was decided by the Minister of Labour, that a Board should be established for the adjustment of the differences existing between the Syndicated Longshoremen of the port of Montreal and the Steamship Companies doing business at that place, comprised in the Shipping Federation of Canada. Messrs. William Lyall, of Montreal, and Gustave Francq, of Montreal, were appointed members of this Board on behalf of the Shipping Federation of Canada and of the Syndicated Longshoremen of Montreal, respectively.

In the application of the telegraph and station employés of the Grand Trunk Pacific Railway Company for the establishment of a Board, it was stated that the

dispute related to a proposal regarding rules and rates of pay, which had been submitted to the Company by the employés, in the month of October, 1909. A copy of the proposed schedule in question of rules and rates of pay, was attached to the employés' application in this matter.

In the application of certain employés of the Dominion Atlantic Railway Company, at Kentville, N.S., members of Local Division, No. 25 of the Canadian Brotherhood of Railroad Employés for the establishment of a Board, it was

stated that a dispute had arisen respecting the dismissal of certain employés, and notices of further dismissals which were attributed by the applicants to the membership of the individuals concerned in the Canadian Brotherhood of Railroad Employés. It was also declared that the Company had refused to continue to employ a certain number of their employés, with a view to compelling the latter to accept certain terms of employment. At the end of the month of March, the Department was in correspondence with the parties concerned in this matter.

I. REPORT OF BOARD IN DISPUTE BETWEEN THE BRITISH COLUMBIA COPPER COMPANY, OF GREENWOOD, B.C., AND CERTAIN EMPLOYÉS.

ON March 29 the report was received of the Board of Conciliation and Investigation, to which had been referred certain differences between the British Columbia Copper Company, of Greenwood, B.C., and certain of its employés, members of Greenwood Miners' Union, No. 22, of the Western Federation of Miners. The report in question was signed by Mr. J. H. Senkler, of Vancouver, B.C., Chairman and by Mr. J. A. Mara, of Victoria, B.C., member appointed on the recommendation of the employer. On March 1, a minority report on the differences in question, was received from Mr. J. McInnis, of Phoenix, B.C., member appointed on behalf of the employés.

This dispute arose out of a communication which was addressed to the manager of the British Columbia Copper Company, on December 8, 1909, by the secretary of Greenwood Miners' Union, No. 22, of the Western Federation of Miners, in which the Company was informed that "unless every man (except officials and shift-bosses) working in the mines and smelter, under our jurisdiction, has a paid-up card in our Union by noon, the 11th of January, 1910, we will go out on strike and refuse to work with the non-union men."

In its report, the Board declares that the sole question to be considered by it was whether it was in the interests of the employés, employés and immediate com-

munity, that the demand of the Western Federation of Miners, as contained in the letter of the 8th of December, 1909, should be complied with by the Company, or not. In its hearing of evidence bearing on the present dispute, the Board was informed of the circumstances attending a strike which occurred in the Company's mines in the summer of 1909, and of the terms on which this dispute was terminated. The Board finds in its report, that there is no justification whatever, for the Union's demand, above mentioned, and says: "We are of the opinion, that the Company should not be deprived of its undoubted right to hire and discharge its employés, so long as it exercises no discrimination amongst them. Indeed, if the present demands of the Unions were conceded, the Company would be most unjustly discriminating against those of its employés who do not belong to the Western Federation of Miners. It is undisputed that general conditions at the Company's works and mines are good, no complaint being made against the wages or working hours, every employé who gave evidence agreeing as to this."

In conclusion, the Board observes that, "while the Board, at the conclusion of its sittings was unable to conclude a settlement between the parties to this dispute, we are confident that the members of the Union will, upon careful reconsideration of the questions involved in this dispute, agree with us that the proposed strike is

quite unnecessary, and indeed, unreasonable, and will not declare a strike which would result in the closing down of the Company's plant and mines, loss of employment to hundreds of men and consequent want and distress to themselves and their wives and children, and general loss to the community which is dependent practically upon the pay-roll of the British Columbia Copper Company for its existence."

In his minority report, Mr. John McInnis expressed himself as unable to agree with his colleagues upon the points in question. It was, he said, a difficult matter indeed, to convey to those who were not familiar with local conditions in the Boundary district, a thorough idea relative to the facts connected with the various aspects of this dispute. Briefly stated, it was, he said, a controversy arising from an endeavour on the part of the Miners' Union to maintain their jurisdiction against the encroachment of a so-called "Electricians' Union." In bringing this matter to an issue, the Miners' Union had adopted, in his judgement, the only methods that could promise a reasonable measure of success. The miners' stand against the formation of dual unions in the mining industry was, he averred, absolutely correct, both in regard to the interests of the workmen and of the industries, as well. Mr. McInnis observes, in conclusion: "It is regrettable that the parties to the dispute have been unable to come to some understanding that would avoid a suspension of work, and until such time as both parties are willing to lay aside the mutual distrust that exists between them, there seems to be but a slim chance to arrive at an adjustment containing any degree of permanency."

Report of Board.

The text of the findings of the Board of Conciliation and Investigation, in this matter is as follows:—

In the matter of the Industrial Disputes Act, 1907, and of a dispute between the British Columbia Copper Company, Limited, of Greenwood, British Columbia, (employer) and its employes, members of the Greenwood Miners' Union, No. 22 of the Western Federation of Miners:—

The application for a Board of Conciliation and Investigation arose out of a demand made by Greenwood Miners' Union, No. 22 of the Western Federation of Miners, as contained in a letter dated December 8, 1909, directed to J. E. McAllister, manager of the British Columbia Copper Company, at Anaconda, and which letter is as follows:—

GREENWOOD, B.C., December 8, 1909.

"Mr. J. E. McALLISTER,
Manager, B. C. Copper Coy.,
Anaconda, B. C.

"Dear Sir:—

"At a special meeting of Greenwood Miners' Union, December 6, 1909, at Mother Lode mine, the following motion was carried unanimously.

"Regularly moved and seconded, that the secretary be instructed to notify the Manager of the B. C. Copper Company that unless every man (except officials and shift-bosses) working in the mines and smelter, under our jurisdiction, has a paid-up card in our Union by noon, the 11th of January, 1910, we will go out on strike and refuse to work with the non-union men.

"At a special meeting of Greenwood Miners' Union, at Greenwood, December 7, the above motion was endorsed by a unanimous vote.

Yours truly,

GEORGE HEATHERTON."

At the outset of the investigation, we were of the opinion that the sole question to be considered by the Board was, as to whether it was in the interests of the employers, employes and immediate community that the demand of the Western Federation of Miners, as contained in the above letter of the 8th of December, 1909, should be complied with by the Company or not.

As must necessarily occur where proceedings such as these are not restricted to that class of evidence, which should be received in a Court of Law, a tremendous amount of entirely irrelevant matter was introduced as evidence at our sessions, but after hearing it all and again reading the stenographer's notes thereof, we are

most firmly convinced that the above question is the only one to be considered. The facts do not appear to be disputed, and are as follows:—

In, or about, the month of March, 1909, the same Union of the Western Federation of Miners asked for a Board of Conciliation under this Act, their principal complaint being that the Company had discriminated against their men and that the Company had not recognized their Union as such. The then Board of Conciliation, or a majority thereof, found adversely against the applicant Union, on the point of discrimination, and held that the Company should recognize the Union as such.

Subsequently, in or about the month of July, of the same year, a strike was declared by the Union, although it appeared that at the time, because of a shortage of coke, consequent upon a strike at the adjacent coal mines, the Company's plant had been shut down.

After some negotiations between the Company and the employés, and with the assistance of Mr. John McKinnon, who was president of the Western Federation of Miners in Canada, a settlement was arrived at between the employers and the employés. This settlement is contained in a letter, dated July 23, 1909, written by the British Columbia Copper Company to the secretary of the Union, and answered by that Union on the 26th day of July, 1909, copies of which appear hereunder.

July 23, 1909.

“W. B. EMBREE ESQ.,
Acting Secy. Greenwood Miners’
Union, No. 22,
Greenwood, B.C.

“Dear Sir:—

“We have your letter of the 19th inst., and have noted what you say regarding the stand taken by the Union. Since the receipt of your letter, Mr. John McKinnon and Mr. Chas. Brice have discussed the situation with us, which discussion we now write to confirm.

“We told these gentlemen that it was our intention to accord your organization the same measure of recognition as was given it by the other large operating companies in this district. We believed that the adoption of a standard policy in this direction would tend towards maintaining

industrial peace, and be of mutual benefit to the companies and the employés.

“To concur in your request for a free choice of doctor and a written agreement would be an immediate violation of this policy, and in our opinion, could not be productive of anything but unsatisfactory results. In addition to what has already been told your Committee, and to the Union in our letter of the 17th inst. regarding the subject of doctor, we told Messrs. McKinnon and Brice today, that the matter was one absolutely in the hands of our employés, the Company insisting on only the one point, that the work should be handled by one physician, who should have one or more assistants. This matter being one of mutual benefit to the Company and its employés, and not being in violation of any Union principle, (being adopted by Union men elsewhere in the district) we are unable to consider it otherwise.

“Regarding discrimination, we contended that there had been none in the past and assured your representatives that there would be none in the future. The right to hire and discharge such men as we think necessary in our own interests, must of course remain with us, but any man claiming to be discriminated against could take the matter up with his Union and the Committee would be given a hearing.

“It is our intention to resume operations next week, and we hope, by that time, your members will be ready to go to work. We have endeavoured to set the stand of the Company clearly before you, and having offered the same recognition, the same wages and the same conditions of employment as the other large operating companies of the district, we cannot see how, in fairness to us and yourselves, you can continue this strike.

Yours truly,

“For General Manager.”

GREENWOOD, B. C., July 26, 1909.

“MR. EDW. G. WARREN,
Act. Gen. Man. B.C.C.Co.,

“Dear Sir:—

“The members of this Union have accepted the conditions you stated in your communication of July 23, and declared the strike off.

"I was instructed to inform you that we expect you to live up, not only to the letter of your communication, but to the spirit of the sentiments you expressed to our Committees.

"Yours very truly,

"W. M. B. EMBREE.
"Act. Sec. Treas."

On the 8th December, the Union notified the Company as stated above.

From the evidence, we concluded that there are employed at the smelter from twelve to fifteen men, who are not members of the Western Federation of Miners, of which a small proportion are non-union men, the remainder being members of craft unions which are affiliated with the American Federation of Labour. There was nothing definite in the evidence as to the number of men at the mines of the Company who did not belong to the Western Federation of Miners, but it appeared that the proportion there was about the same as at the smelter, and in round numbers from fifteen to twenty.

While Mr. Heatherton, in his address to the Board, suggested that the employes had some slight grievances against the Company, it is quite clear that these supposed grievances do not exist, and we find as a fact, that the sole reason why this demand of the 8th of December, 1909, was made by the Union, was its desire for more power, Mr. Heatherton's own evidence being clear and distinct on this point.

We cannot find in the evidence, that the Company has, in any way, broken its agreement, as contained in the letters of the 23rd and 26th days of July, 1909, no charges of discrimination having been proved, and it appearing that the Company had recognized and dealt with the Union as such.

Some considerable time of the Board was taken up in hearing evidence as to the power of the Union to declare a strike, without taking referendum vote, as required by section 1, of Article 5, of the Constitution and By-laws of the Western Federation of Miners, which reads as follows:—

STRIKES AND ADJUSTMENTS.

"Section 1. It shall be unlawful for any Union to enter upon a strike unless order-

ed by two-thirds of the votes cast upon the question; such question shall be decided by referendum vote, notice of such referendum vote posted three days in advance, vote to be by ballot, and polls to be open for not less than eight hours. No call shall be made for a referendum vote on a strike until after having received the approval of the Executive Board of the W. F. M."

And while we are of the opinion that by said Constitution the Union must not declare a strike for any reason, without first having complied with that section, still that has very little to do with the present matter, except as evidence to show that the Union has not exercised that care and deliberation in its proceedings, particularly amongst its own members, which are undoubtedly necessary in connection with so serious a matter as a strike, such as the present contemplated one. Neither do we think it necessary to draw more than passing attention to the fact that from the evidence it appears that the actual carrying out of the strike is left with the chief officers or executive of the Western Federation of Miners, at its headquarters, we think in Denver, Colorado.

From these facts we can come to but one conclusion, that there is no justification whatever, for the Union's demand of the 8th of December, 1909. We are of the opinion that the Company should not be deprived of its undoubted right to hire and discharge its employes, so long as it exercises no discrimination amongst them. Indeed, if the present demands of the Unions were conceded, the Company would be most unjustly discriminating against those of its employes who do not belong to the Western Federation of Miners.

It is undisputed that general conditions at the Company's works and mines are good, no complaint being made against the wages or working hours, every employe who gave evidence agreeing as to this.

While the Board at the conclusion of its sittings at Greenwood, were unable to conclude a settlement between the parties to this dispute, we are confident that the members of the Union will, upon careful reconsideration of the questions involved

in this dispute, agree with us that the proposed strike is quite unnecessary, and, indeed, unreasonable, and will not declare a strike which would result in the closing down of the Company's plant and mines, loss of employment to hundreds of men, and consequent want and distress to themselves and their wives and children and general loss to the community, which is dependent, practically entirely, upon the pay-roll of the B. C. Copper Company, for its existence.

Dated at Vancouver, this 19th day of March, 1910.

(Sgd.) J. H. SENKLER,
Chairman.

J. A. MARA,

Minority Report.

The text of the minority report of Mr. John McInnis, above referred to, is as follows:—

Department of Labour,
OTTAWA, CANADA.

In the matter of the dispute between the British Columbia Copper Company and the Greenwood Miners' Union, No. 22 of the Western Federation of Miners, and the investigation held thereon, under the "Provisions of the Industrial Disputes Investigation Act, 1907."

Being unable to agree with my colleagues on the Board, as to a joint report I therefore submit herein, a minority report.

It is a difficult matter, indeed, to convey to those who are not familiar with local conditions in the Boundary district, a thorough idea relative to the facts connected with the various aspects of this dispute. Stating it briefly, it is a controversy arising from an endeavour on the part of the Miners' Union to maintain their jurisdiction against the encroachment of a so-called "Electricians' Union."

The Western Federation of Miners has been organized in the Boundary district over eleven years, and held jurisdiction over all men working in and around the mills, mines and smelters (including skilled labour). But recently the Electricians' Union has been making inroads upon the membership of the Western Federation of Miners. A course, which is quite apparent, had the sanction and

support of the British Columbia Copper Company, as their bosses were the most active in soliciting members for this new Union. It was made plain by the evidence taken, that the Electricians' Union solicited and admitted to membership, persons who were neither eligible nor qualified to become members. Also that the employés of the British Columbia Copper Company, who are affiliated with the Electricians' Union, do not belong to a local lodge, but are members of a lodge in another town, in the district where the president of the lodge is foreman in the electrical department of a large mining corporation.

In view of these facts it is not surprising that the members of the Miners' Union should take steps to protect themselves, when their existence as an organization, was seriously threatened.

In bringing this matter to an issue, the Miners' Union adopted the only method that could promise a reasonable measure of success.

The miners, in taking a stand against the forming of dual unions in the mining industry, are doing, what, in the opinion of the writer is absolutely correct, both in regard to their own interests as workmen and the industries as well. So long as the workmen in any industry are organized into one union, they have an opportunity of coming together and discussing matters pertaining to their welfare and taking such steps as are best calculated to conserve the interests of all concerned.

Under this mode, it is possible to restrain those who would otherwise make unreasonable demands. Such demands would not receive the support of the general body. So that actions of a reasonable nature only would be supported. This system gives every man involved, a voice in all matters relating to conditions, in so far as they are determined by the efforts of organized labour. The system that is being introduced by the Electrician's Union gives each craft engaged in any industry the right to organize into separate unions. This method would allow some eight or ten unions in the mining industry. Such a condition would cause a continual unrest owing to the fact that the members of any of these craft unions could go out on strike, without consulting

their fellow workmen, although the effect of the strike would be to tie up the entire industry. This being the case, there can be no beneficial results follow the establishment of unions where the ground is already covered. To insist on tactics of this character will have the effect of bringing about a condition of affairs so unsatisfactory to all concerned, that much loss will ensue, not only to the working class of the district, but to the employers and every person who has an interest in the community.

When men who hold positions as bosses

for corporations are permitted to hold the most important offices in labour unions, it is high time the membership began to look with suspicion on unions so constituted. It is regrettable that the parties to the dispute have been unable to come to some understanding that would avoid a suspension of work, and until such time as both parties are willing to lay aside the mutual distrust that exists between them, there seems to be but a slim chance to arrive at an adjustment containing any degree of permanency.

(Sgd.) JOHN McINNIS.

PRICES AND COST OF LIVING—RESULT OF SPECIAL INVESTIGATION BY DEPARTMENT INTO THE WHOLESALE PRICES OF DAIRY PRODUCE AND FISH.

PUBLICATION is continued herewith of the statistical tables and charts compiled by the Department, in the course of its investigation into wholesale prices in Canada during the past twenty years, the scope and method of which have been described in a previous issue of the *Gazette**.

The portions of the investigation published in the present issue relate to Dairy Produce and Fish. The commodities covered are as follows:

DAIRY PRODUCE.

Commodity.	Measure.	Market.
Butter, creamery, prints	Per lb.	Toronto, Ont.
Butter, dairy, solids.....	"	"
Cheese, western, coloured	"	Montreal, Que.
Eggs, storage.....	Per dozen.	Toronto, Ont.
Milk.....	Per gal.	Montreal, Que.

FISH.

Commodity.	Measure.	Market.
Codfish, market size, dry..	Per lb.	Canso, N.S.
Haddock, dry.....	"	"
Halibut, white, fresh.....	"	"
Lobster, canned.....	"	"
Mackerel, salted.....	"	"
Herring, salted.....	"	"
Salmon, canned.....	Per case.	Victoria, B.C.
Salmon trout, fresh.....	Per lb.	Toronto, Ont.
White, fish, fresh.....	"	"

In the case of each of the above commodities, the price on the opening market day of each month is quoted from a reliable authority, back to 1890. In order to compare the course followed by the prices of the several commodities and to combine them so as to show the course of

prices as a whole, a table of relative prices or index numbers has been prepared and is published herewith. These numbers show for each commodity the percentage which the average price of the commodity from year to year was of the average for the decade 1890-1899. Thus, in the case of butter, creamery prints, the number 120.1 in the year 1909, means that the average price of creamery butter during that year, at Toronto, was 20.1 per cent. above the average for the decade 1890-1899. By adding these index numbers and averaging the total, from year to year, the courses of prices of dairy produce and fish, as a whole, are shown, reckoning each of the several commodities as of equal importance.

A series of charts is added which shows, in graphic form, the course of the several commodities during the past twenty years.

It will be seen that dairy products were at their lowest in 1896-1897, and at their highest, in 1908, when the general level was 36.3 per cent. above the average for 1890-1899. Prices in 1909 were slightly lower than in 1908, though eggs were considerably higher, being 71.5 per cent. above the average for the base decade. Since 1897 the price of eggs has advanced approximately 122 per cent. In the case of dairy produce generally, prices have advanced 46.6 per cent. since 1897.

In fish there has been a similar rise in price, the average being 34 per cent. higher in 1909, than in the decade 1890-1899. The lowest year shown is 1892, since when prices have advanced 40.8 per cent.

*See the *Labour Gazette* for February, 1910, page 893. The portions of the investigation already published relate to animals and meats and to grains and fodder.

REPORT OF MANITOBA COMMISSION ON WORKMEN'S COMPENSATION.

THE report of the Royal Commission appointed by the Manitoba Government, to inquire into and report upon the question of workmen's compensation, was laid upon the table of the Legislature on March 2, by the Provincial Secretary. The report was signed by the three Commissioners, Hon. Corbet Locke, Arthur W. Puttee, and Thomas R. Deacon.

The Commission recommended that a Workmen's Compensation Act be passed by the Legislature, the provisions of which shall apply to all employers of five or more workmen. It is recommended that the compensation be paid by the employers, and shall amount to one-half the diminution in the wage earning capacity of the victim in non-fatal cases, and to a sum not exceeding \$1,500 in cases of fatal accidents.

The report contains a review of legislation of a similar kind in Great Britain, and elsewhere, and in an appendix gives the evidence submitted to the Commission.

Recommendations of the Commissioners.

The recommendations of the Commission follow:—

1. That the bill be made to apply to all employers of five or more workmen, and that the word employer be declared to include the Crown and Municipal Corporations.

2. That the compensation be paid by the employers.

3. That the measure of compensation in non-fatal accidents be one-half of the diminution which the accident shall have caused the wage-earning capacity of the victim, Provided that where the injured workman is not a journeyman tradesman working at his own trade, that for the first month of his employment with the employer against whom he claims compensation, he shall only be entitled to twenty-five per cent. of such diminution,

and for the second month forty per cent. and thereafter as hereinbefore provided.

Amount Paid Dependents.

3a. That in case of fatal accidents the compensation paid dependents shall be fixed at \$1,500.

4. That notice of accident shall be given within fourteen days of the happening of the accident, except where all parties entitled to compensation are out of the province, when an additional fourteen days shall be allowed. Notice of claims to be given within three months of the happening of the accident, and action begun within six months from date of accident.

5. That the workman shall be limited to one remedy, and that he shall, in his notice claiming compensation, state what remedy he proposes to pursue, and that it be enacted that an infant equally with an adult shall be bound by such election.

6. That a casual workman be, as he has been in the Imperial Act, exempted from the result of the Act.

Must Reside in Province.

7. That compensation in case of fatal accidents be paid to dependents only resident in the province at the time of the accident, and that any to whom compensation is payable for non-fatal accidents shall be disentitled to such compensation on becoming non-residents.

8. That compensation be paid only when the disability lasts over two weeks, and the liability for compensation to begin the third week.

9. That compensation in case of permanent disability shall in no case exceed what would have been payable in case of death.

10. That in case of fatal accidents, the compensation payable to dependents shall be paid into court, to be paid out in such sums and at such times as the judges may direct, and that in all other cases compensation be paid to the party injured.

Cases of Serious Misconduct.

11. That in case of total and permanent incapacity and in case of death, negligence shall not be a bar to recovery, except in case of drunkenness.

12. That should it be proved that the workman at the time of the accident was drunk, this shall be serious misconduct, and he shall be debarred compensation.

13. That the rescue, or attempted rescue, of a fellow-workman from a threatened danger shall not be deemed to be serious or wilful misconduct, and the accident will be deemed to have occurred "in the course of his employment."

To Appoint Medical Referee.

14. That the Government should appoint and pay a highly skilled physician as medical referee, whose decision in case of disagreements between the physician of the workman and the employer should be final, and that such referee might, on request, at any time, sit with an arbitrator as an assessor in fixing compensation.

15. That a workman should not be required to offer himself for review at shorter intervals than three months, except by order of a judge.

15a. That when a workman returns to work the compensation that was received by him shall be reduced so that his present wages and compensation should together amount to his former wages.

15b. That when weekly compensation is commuted for a lump sum the amount of such commutation shall, including the amounts already paid, not exceed in the whole \$1,500.

When Compensation Shall Cease.

15c. That in case of fatal accidents compensation shall cease to any dependent so soon as, in the opinion of the judge, such dependent is capable of self-support.

15d. That the judge may or may not award costs to either parties as

to him may seem just, and if he allows costs he shall tax and fix the amount thereof. In no case shall he award more than \$25 costs against the petitioner or more than \$100 costs against the respondent.

17. That provision shall be made for a substantial deposit of cash or bonds to be made with the Government by all companies doing accident and liability insurance in the Province, and that all such companies should be required to make to the Provincial Government regular returns, such as are now made to the Federal Government by life companies.

Workmen's Right of Action.

18. That in all cases where a claim is established against an employer, and he is covered by liability insurance, the party entitled, by serving a written notice on the Company or its representative in Manitoba, shall have a charge against the said insurance Company to the extent of its liability to the insured, or up to a sufficient amount to satisfy the award, and further that the workman shall have right of action against the Company as for a debt to that amount.

19. That the Board of county judges be forthwith commissioned to fix rules of Court and that they may, as far as the same are applicable, adopt the rules of Court prevailing under the Imperial Act.

Question of State Insurance..

20. That notwithstanding the recommendation herein, that compensation be borne by the employer, that the Government should appoint a commission or otherwise exhaustively investigate the question of state insurance when, if found practicable, any legislation following this report may be amended in that regard.

Changes in Legislation Suggested.

The Commission does not contemplate framing a bill and we do not propose to do, or assume to do so.

The recommendations we have made if adopted, will very materially change the present bill, yet many of the provisions of the bill will be maintained. In working out the scheme and without assuming to define what the changes will be, other than as above, there are certain amendments in sections of the bill which, we think, could be made. If these sections, or anything akin to them, should be included in the new Act, and these amendments we now propose to suggest:—

1. As it is the employer who is in all cases to be liable, we can see no reason why the expression "undertaker" should be retained, and would strike it out, and perhaps amplify the word "employer."

2. If all the employers of five or more workmen are to be liable, then there would appear to be no necessity to more particularly designate the parties to be bound, but if it should be thought necessary to do so, we would suggest that the definition of the word railway be enlarged so as to include lines and sidings not used for public traffic.

3. That if clause two of the bill is to be retained, it should be amended by striking out the following words, "exceeds thirty feet in height," and in the fourth and fifth lines and words, "by means of a scaffolding," in the fifth and sixth lines and that after the word "demolished" in the sixth line, add the words, "altered or decorated."

4. That the Act be made to apply not only to accidents "on, or in, or about" the premises of the employers but "elsewhere while actually employed in the services of the employer for which he will receive pay." Provided however, that this latter clause shall only bind the employer as to his own workmen, and not to the workmen of sub-contractors.

5. That the word "or" should be substituted for "and" wherever it appears between the words "serious" and "wilful."

6. That section six be amended by providing that where a principal contractor may be liable to the workmen of a sub-contractor that the principal may, under the rules of the King's Bench Acts, have such sub-contractors added a party to the proceedings and shall have relief ever against such sub-contractor for any damages and costs which may be adjudged against him.

7. That sub-clause 1, section 8 be amended by substituting the words 'either' for 'both' and 'or' for 'and,' in the first and second lines respectively of each clause.

8. That clause ten of the first schedule be amended, by substituting the word 'judge' for 'clerk,' in the third line thereof, striking out the word 'as' and putting in the word 'of' and striking out the word 'his' and putting the word 'the,' all of the said in the third line and adding thereto the words 'and only to be paid out on the order of the judge.'

9. Clause twelve of the first schedule be amended by inserting after the word 'practitioner,' in the sixth line, the words 'or by a medical practitioner.'

10. After the word 'prescribed,' in the eighth line of paragraph three of the second schedule, strike out the words 'by the rules of the court of Appeal,' and substitute the words, 'by the statute governing appeals from the county Court.'

11. Add to clause ten of the second schedule the words, 'or before any arbitrator appointed under the provisions of this Act.'

12. In clause two, sub-section A, of the first schedule, reduce allowance for medical attendance and funeral expenses to \$100.

Other amendments will be required to make the Act consistent with the recommendations, and the above is not to be regarded as a final revision of the Act.

THE WHOLESALE GROCERS' GUILD ACQUITTED OF CHARGE OF CONSPIRACY IN RESTRAINT OF TRADE.*

ONE of the most noteworthy court inquiries in the annals of Canadian trade was ended during March, 1910, by the delivery of judgement by Chief Justice Falconbridge, in the case of the indictment of the Wholesale Grocer's Guild of Canada for an alleged conspiracy in restraint of trade.

The part of the indictment naming the defendants was as follows:—
 "That Henry C. Beckett, George E. Bristol, John I Davidson, Thomas B. Escott, W. G. Craig, Joseph F. Eby and Thomas Kinnear, the Dominion Wholesale Grocer's Guild, did during the years 1898, 1899, 1900, 1901, 1902, 1903, 1904 and 1905, at the City of Hamilton, and elsewhere in the said Province, unlawfully conspire, combine and agree and arrange one with the other, and with the Canada Sugar Refining Company, the St. Lawrence Sugar Refining Company, the Acadia Sugar Refining Company, the St. Lawrence Starch Works, the Edwardsburg Starch Company, the Brantford Starch Works, the Empire Tobacco Company, Wm. C. McDonald, the International Brokerage Company, the Pacific Selling Company, the Force Food Company, Canada Cannery Limited, Canadian Grocers Limited, G. E. Tuckett & Son, the Hudson Bay Company, the Davidson & Hay Company, the Eby Blain Company, Thomas Kinnear & Company, Perkins, Ince & Company, A. F. MacLaren Imperial Cheese Company, the Malta Vita Pure Food Company, the E. B. Eddy Company, Lumbers & Company, Lumsden Bros., and about 175 other firms.

The case was commenced on September 21, 1907, and occupied in all nine days, ending on January 7, 1908, when three days more were occupied in legal argument.

The Indictment.

The indictment charged that the above mentioned conspired:—

(1) To unduly limit the facilities in producing, manufacturing, supplying, and

dealing in sugar, tobacco, starch, canned goods, salt and cereals, and other articles and commodities which are the subject of trade and commerce.

(2) And to restrain and injure trade and commerce in relation to such articles and commodities.

(3) And to unduly prevent, limit and lessen the manufacture and production of such articles and commodities.

(4) And to unreasonably enhance the price of such articles and commodities.

(5) And to unduly prevent and lessen competition in the production, manufacture, purchase, barter, sale, and supply of such articles and commodities, against the form of the statute in such case made and provided.

The Judgement.

The effect of the judgement is to completely absolve the Guild from the specific charges preferred as above. In all it contains 7,000 words, and based upon the facts concludes:—

"1. The defendants have not, nor has any of them, intended to violate the law.

"2. Nor have they, nor has any of them, intended maliciously to injure any persons, firms or corporations, nor to compass any restraint of trade unconnected with their own business relations.

"3. They have been actuated by a bona fide desire to protect their own interests and that of the wholesale grocery trade in general.

"As far as intention and good faith, or the want of it, are elements in the offence with which they are charged, the evidence is entirely in their favor.

"I therefore say that the defendants are not, nor is any of them, guilty as charged.

"There are minor matters as to which I, sitting as a jury, give the defendants (as I am bound to do) the benefit of

*See the *Labour Gazette* for January, 1906, p. 785; February, 1909, p. 910; March, 1906, p. 1023; and April, 1906, p. 1149.

the doubt, and as to which I warn the defendants and those in like case to be careful, e.g., as to alleged efforts to coerce wholesale dealers into joining the Guild.

"It is of the essence of the innocence of the defendants that the privileges which they seek to enjoy should be extended to all persons and corporations who are strictly wholesalers, whether they choose to join the Guild or not."

Viewing the case from a common law standpoint, His Lordship remarked:—

"It would be dangerous to accept as a settled doctrine of political economy or proposition of law, that under any and all conditions, and at all times, every man or corporation should be declared to have an absolute and inalienable right to buy and sell, trade or barter, with any other person or corporation, without restriction as to quantity or price.

"Here the endeavour is to protect

the interest and welfare of the wholesale grocers of Canada, whether they are members of the Guild or not. The Guild invited the membership of legitimate wholesale dealers from the beginning, and the prices, in all cases, have been fixed by the manufacturers themselves.

"In the present case any wholesale merchant could buy exactly on the same terms as members of the Association. There has been no evidence of the enhancing of prices, no complaint by any consumer, nor any retail dealer, but rather approbation."

The Chief Justice further stated that "the Guild's origin (in 1883) was due to the fact that conditions of the trade were very bad, and it was found necessary, in order to prevent disaster amongst those engaged in wholesale business, to meet and confer with a view to seeing what measures might be arrived at to improve such conditions."

PARLIAMENTARY REVIEW OF BILLS, MOTIONS, ETC., RELATING TO LABOUR

ON February 28, notice was given by the Honourable W. L. Mackenzie King, Minister of Labour, of the proposed introduction, in the House of Commons, of a Bill entitled "An Act to amend the Industrial Disputes Investigation Act, 1907; and in connection with one of the proposed amendments to the Act, notice was given on March 3, of a proposed resolution in the following terms:—"Resolved, that it is expedient to amend the Industrial Disputes Investigation Act, 1907, by providing for the payment to the Chairman and members of a Board of Conciliation and Investigation, of an allowance, at the rate of twenty dollars for each day's sitting of the Board, and for each day necessarily engaged in travelling from or to their place of residence to attend or after attending a meeting of the Board."

On March 9, a Bill Respecting Cooperation, which had been introduced by Mr. Lloyd Harris, Member for Brantford, was considered by the House of Commons Committee on Banking and Commerce. The first clause of the Bill was defeated

on division, and the Committee accordingly recommended that the Bill be not passed.

On March 17, a Bill Respecting Co-operative Credit Societies, which had been introduced by Mr. F. D. Monk, Member for Jacques Cartier, was considered by the House of Commons Committee on Banking and Commerce, and was reported with an amendment providing that cooperative savings and credit societies organized under the authority of this legislation must establish and maintain guarantee funds for the security of deposits, and that no society which has a withdrawable share capital shall carry on the business of credit and savings unless such society lays aside at least ten per cent. of its annual net profits, in order to establish a guarantee fund to meet losses, and unless such guarantee fund is equal to the maximum amount at any time of the paid-up share capital and deposits.

A meeting was held on March 11, of a Special Committee of the House of Commons, which was appointed to inves-

tigate the subject of proportional representation, at which it was decided that on account of the illness of Mr. F. D. Monk, Member for Jacques Cartier, and one of the members of the Committee, who had taken a deep interest in this question, further enquiry should be deferred until next session.

Bill Respecting Hours of Labour on Public Works.

Sittings were held on March 2, March 9, and March 16, of a Special Committee of the House of Commons, to which was referred Bill No. 21, entitled "An Act respecting the Hours of Labour on Public Works." At the sitting of March 2, further evidence on the subject of hours of labour was given by Mr. J. D. McNiven, one of the Fair Wages Officers of the Department of Labour, who had been under examination at the previous meetings. Evidence was also given at this sitting by Mr. John Armstrong, Chief of the Bureau of Labour of the Province of Ontario, and by Mr. Louis Guyon, Chief Inspector of Factories,

of the Province of Quebec. At the sitting on March 9, the following gentlemen appeared as witnesses:—Mr. F. B. McKune, superintendent of the open hearth department of the Hamilton Steel and Iron Company, Hamilton, Ont.; Mr. Daniel W. Evans, foreman of the finishing department of the same Company; Mr. Justus Post, engineer of the blast furnace department of the same Company; Mr. Phelps Johnston, general manager of the Dominion Bridge Company, Montreal and Lachine; and Mr. Chas. M. Doolittle, stonecutter of Dundas, Ont., who expressed to the Committee their views in respect of the effect which the adoption of the Bill Respecting Hours of Labour on Public Works was likely to have on the industries, with which they were severally connected. At the sitting of the Committee, on March 26, Mr. G. M. Murray, Secretary of the Canadian Manufacturers' Association, expressed the view of that Association with regard to this Bill.

At the end of the month, the work of this Special Committee had not been concluded.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

British Emigration Returns.

During the month ended January 31, 1910, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

Nationality.	1910.	1909.
English.....	1,692	1,414
Welsh.....	66	18
Scotch.....	445	257
Irish.....	34	51
British Colonial.....	46	21
Total British subjects.....	2,283	1,767
Foreign.....	1,283	1,007
Total.....	3,566	2,774

Homestead Entries During February, 1910.

The following statement shows the number of homestead entires made during the month of February, 1910, as compared with February, 1909.

Winnipeg.....	97	80	17
Yorkton.....	70	73	3
Total.....	2,254	1,364	997	107

It will be seen that there has been a net increase for February, 1910, of 890 in the number of entries made.

A statement of the entries made during the first two years of the calendar year 1910, compared with the corresponding months of 1909, is as follows:—

HOMESTEAD ENTRIES DURING JANUARY AND FEBRUARY, 1910-1909.

Month.	1910.	1909.	In-crease.	De-crease.
January.....	2,698	1,308	1,390
February.....	2,254	1,364	890
Total.....	4,952	2,672	2,280	2,280

It will be seen that there has been a net increase of 2,280 in the number of homestead entries made during the first two months of 1910, as compared with the same months of 1909.

Nationalities of Homesteaders.

The nationalities of homesteaders during the month of February, 1910, as reported by the several agencies of the Department of the Interior in Manitoba, Saskatchewan, Alberta and British Columbia, were as follows:—

Nationalities.	No. of Entries.
Canadians from Ontario.....	180
“ Quebec.....	35
“ Nova Scotia.....	12
“ New Brunswick.....	7
“ Prince Edward Island.....	5
“ Manitoba.....	92
“ Saskatchewan.....	202
“ Alberta.....	72
“ British Columbia.....	12

Coal lands' sales.....	35	9,702.60
Homesteads.....	1,797	284,849.936
License of occupation.....	6	
Manitoba Act grants.....		
Military homesteads.....	1	321.54
Mineral rights (6,467.63 acres) ..	32	
North-west halfbreed grants.....	28	4,453.78
North-west Mounted Police grants.....	1	160.00
Parish sales.....	1	64.30
Quit claim, special grants (294 acres).....	2	

Railways:		
Canadian Northern Railway	2	11.99
Canadian Pacific Railway grants.....	1	2.77
Canadian Pacific Railway roadbed and station grounds		
Grand Trunk Pacific Railway Manitoba and North-western Railway.....	2	869.15
Sales.....	1	4.89
School lands' sales.....	35	4,414.73
Special grants.....	37	5,055.02
Yukon Territory sales.....	24	925.81
	2	103.25
Totals.....	2,039	317,089.49

In February, 1909, the number of patents issued was 2,583, covering an area of 526,857.38 acres, showing a decrease for the month of February, 1910, of 544 in the number of patents issued and of 209,767.89 acres in the area patented.

MONEY QUALIFICATION OF IMMIGRANTS ON ENTERING CANADA.

UNDER date of March 15, 1900, an important amendment was made, by order-in-council, in the provisions governing the amount of money which an immigrant is required to have in his possession on entering Canada. Previously this was placed at \$50, for the period from January 1 to February 15 in each year.* The law now requires that immigrants must have at least \$25 on entering Canada between March 1 and October 30, in addition to the means of transport to their destination in Canada, with a further sum for members of their family accompanying them. The full text of the order-in-council is as follows:—

At the Government House, at Ottawa, Tuesday, the fifteenth day of March, 1910.

His Excellency-in-Council is pleased to Order that the Order-in-Council of eleventh September, 1908, passed under the authority of section twenty of the Immigration Act, Revised Statutes of Canada, 1906, chapter ninety-three, with regard to the amount of money to be possessed by immigrants entering Canada, shall be and the same is hereby rescinded.

His Excellency-in-Council is further

*For text of Order-in-Council see the *Labour Gazette* for October, 1908, page 439. For original action see the *Labour Gazette* for January, 1908, page 741.

pleased to make and doth hereby make the following regulations under the authority of the said section twenty of chapter ninety-three of the Revised Statutes of Canada, 1906.

1. If an immigrant, male or female, other than a member of a family provided for under the next following regulation, intended to enter Canada, arrives at the border, or at any place of landing in Canada, between the first day of March and the thirtieth day of October, both days inclusive, he or she shall, as a condition of permission to enter Canada, have in his or her possession at the time of arrival, money, belonging absolutely to such immigrant, to the amount of at least \$25, in addition to a ticket or such sum of money as will purchase a ticket or transport for such immigrant to his or her destination in Canada.

2. If an immigrant so intending to enter Canada is the head of a family and is accompanied by his or her family, or any member or members thereof, the foregoing regulations shall not apply to such family or the members thereof, but the said immigrant, head of family, shall have, in his or her possession, in addition to the said sum of money and means of transport hereinbefore required, a further sum of money, belonging absolutely to such immigrant,

equivalent to \$25 for each member of the said family of the age of eighteen years or upwards, \$12.50 for each member of the said family of the age of five years and upwards and under the age of eighteen years, and in addition tickets or a sum of money equivalent to the cost of transport for all the said members of the family to their place of destination in Canada.

3. Every such immigrant arriving at the border or at any place of landing in Canada, between the first day of November and the last day of February, both inclusive, shall be subject to the foregoing regulations, with the substitution of \$50 for \$25, and \$25 for \$12.50, wherever the said sums of \$25 and \$12.50 are mentioned in the said regulations.

4. It shall be the duty of the immigration agents at the various places or ports of arrival, or landing in Canada to see that the foregoing regulations are complied with. Provided, however, that the immigration agent may, notwithstanding anything hereinbefore contained, exempt any immigrant from the operation of the foregoing regulations if it is shown to his satisfaction that:—

(a) The immigrant, if a male, is going to assured employment at farm work, and has the means of reaching the place of such employment; or

(b) that the immigrant, if a female, is going to assured employment at domestic service, and has the means of reaching the place of such employment; or

(c) That the immigrant, whether male or female, is of one of the following descriptions, and is going to reside with a relative of one of the following descriptions, who is able and willing to support such immigrant, and has the means of reaching the place of residence of such relative:—

- (I) Wife going to husband.
- (II) Child going to parent.
- (III) Brother or sister going to brother.
- (IV) Minor going to married or independent sister.
- (V) Parent going to son or daughter.

(Sgd.) F. K. BENNETTS.

Asst. Clerk of the Privy Council.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF MARCH, 1910.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 394 individual work people in Canada, during the month of March, 1910, were reported to the Department of Labour. Of these, 133 were fatal, and 261 resulted in serious injuries.

In the preceding month there were forty-one fatal, and 196 non-fatal accidents reported, a total of 237, and in March, 1909, there were seventy-eight fatal, and 194 non-fatal accidents, a total of 272. The number of fatal accidents reported in March, 1910, is, therefore,

ninety-two more than in the preceding month, and fifty-five more than in March, 1909. The number of non-fatal accidents reported in March, 1910, was sixty-five more than in the preceding month, and sixty-seven more than in March, 1909. Altogether, there were 157 more industrial accidents reported in March, 1910, than in the preceding month, and 122 more than in the same month of the preceding year.

Of 209 returns received during the month giving the ages of the victims of industrial accidents, twenty-two referred to persons under twenty-one years of age, sixty-eight to persons between twenty-one and forty-five, and eleven to persons over forty-five. One hundred and eight persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month, by industries and trades:—

STATEMENT OF ACCIDENTS DURING MARCH, 1910, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	13	27	40
Fishing and hunting.....	2	2
Lumbering.....	10	18	28
Mining.....	8	28	36
Building trades.....	5	24	29

Woodworking trades.....	1	11	12
Printing trades.....	5	5
Clothing trades.....	2	2
Textile trades.....	3	3
Food and tobacco preparation.....	2	6	8
Railway service.....	72	33	105
General transport.....	4	13	17
Public employés.....	6	6
Miscellaneous.....	6	9	15
Unskilled labour.....	5	15	20
Total.....	133	261	394

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman, were: the killing of sixty workmen in an avalanche in Rogers' Pass, B.C.; the death of five employés of the Western Explosives Company, Bowen Island, B.C.; the crushing to death of three quarrymen, at Revelstoke, B.C.; the drowning of two trainmen in a derailment at McNeillie Siding, B.C.; and the drowning of two fishermen in Mitchell's Bay, Ont.

Fatal Avalanche in Rogers' Pass, B.C.

On the night of March 4, while a large number of railway employés were engaged in the clearing away of the debris of a snow and earth slide, in the vicinity of Rogers' Pass, Rocky Mountains, B.C., a second avalanche overwhelmed them, and caused the death of sixty men. The coroner's jury that was empanelled in the case brought in a verdict of accidental death, with a recommendation that the practice of clearing away snow slides on stormy nights be discontinued.

Dynamite Explosion on Bowen Island, B.C.

Five employés of the Western Explosives Company were killed on March 12, by an explosion at the dynamite works on

Bowen Island, eighteen miles from Vancouver, B.C.

Fatal Fall of Rock at Revelstoke, B.C.

On March 21, while three quarrymen were engaged in rock drilling on the south bank of the Illecillewaet river, for the Revelstoke power works, they were all crushed to death by a flake of rock, weighing upwards of a ton, which fell on them.

Railway Disaster at McNeillie's Siding, B.C.

As a freight train was shunting cars at McNeillie's Siding, B.C., on March 19, the engine and tender, detached from the freight, jumped the rails and plunged a hundred and fifty feet down the embankment to Goat river. On the engine, were an engineer, a head brakeman and a fireman. Of these, the engineer and the fireman were killed instantly, and the brakeman was dangerously injured.

Drowning Accident in Mitchell's Bay, Ont.

On March 23, while two fishermen were grappling for lost nets in Mitchell's Bay, a short distance from Chatham, Ont., the small boat in which they were working capsized, owing to rough water, and they were both drowned.

Record By Trades and Industries.

Agriculture.—In this industry, there were thirteen fatal and twenty-seven non-fatal accidents in March, 1910, compared with six killed and twenty injured in February last and twelve killed and twenty-four injured in March, 1909. Of the fatal accidents four were due to falls, three to falling material, two each to exposure and to being run over, and one each to a runaway and to live stock. Eight of the minor accidents were due to live stock, seven to falls, four each to runaways and to falling material, and one each to electric shock and to flying material, and two to being run over.

Fishing.—Two fishermen were drowned during March. In February there was

one fatality. There were no accidents in March, 1909.

Lumbering.—Ten workers in this group were killed and eighteen injured in March, 1910, compared with three killed and eleven injured in the preceding month and six killed and nineteen injured in March, a year ago. Seven of the deaths were caused by falling material, two by being run over and one by a fall. Eight of the injuries were caused by falling material, five by machinery, two each by flying material, and by tools, and one by exposure.

Mining.—During March, 1910, eight mine workers were killed in accidents and twenty-eight injured, compared with six killed and eighteen injured in February last, and ten killed and four injured in March, 1909. Six of the fatalities were due to falling material, and two to

explosions. Seven of the non-fatal accidents were due to falls, five to falling material, four to molten metal, three each to explosions and to being run over, two each to flying material and to being caught between cars, and one each to machinery and live stock.

Building trades.—Five workers were killed and twenty-four injured in this group during March, 1910, compared with eleven injured in the previous month and eight injured in February last. Falls and falling material were each responsible for two fatalities and electric shock for one. Falls caused fourteen injuries, falling material nine, and an explosion one.

Metal, engineering and shipbuilding trades.—The record in these trades during March, 1910, was five killed and sixty-one injured, as against six killed and

thirty-seven injured in the preceding month, and five killed and forty injured in March, of last year. Three of the deaths were caused by falling material, and one each by electric shock and being scalded. Twenty-five of the injuries were caused by machinery, seventeen by falling material, six each by flying material and by falls, four by molten metal, and one each by being run over, by being burned and by electric shock.

Woodworking trades.—During March, a woodworker was killed by flying material, and eleven others injured, compared with ten injuries in February, last, and two killed and nine injured in March, 1909. Five of the injuries were due to machinery, four to flying material and one each to falling material and to a fall.

Printing trades.—During March, four of these workers were injured by machinery, and one by being run over. The record of the month before, was one killed and two injured; in March, 1909, there were five injuries.

Clothing trades.—Machinery caused one injury, and an explosion another, in this group. One worker was injured in February, and one killed and two injured in March, a year ago.

Textile trades.—Machinery seriously injured three workers. In the month before, the record was one injury, and also one injury in March, 1909.

Food and tobacco preparation.—Two workmen were killed and six injured, as against one killed and six injured in February, and fourteen injured in March, 1909. The two deaths were due to falls. Three of the injuries were due to falls, two to machinery and one to live stock.

Railway service.—Seventy-two railway employés were killed and thirty injured, during March, 1910, compared with six killed and thirty-one injured in February, last, and thirty killed and twenty-three injured in March, 1909. Sixty of the accidental deaths were due to the avalanche at Rogers' Pass, B.C., above described, five to being run over, two each

to falls, to derailments and to being caught between cars, and one to an explosion of dynamite. Eleven of the injuries were due to falls, six to falling material, five to being caught between cars, four to being run over and one each to being assaulted by a passenger, to falling material, to being struck by an object in passing to machinery, to flying material, to a derailment, and to burns.

General transport.—Among these workers there were four killed and thirteen injured, during March, 1910, compared with two killed and seven injured in the preceding month, and one killed and twelve injured in March, 1909. Two of the fatalities were caused by collisions, and one each by being caught between vehicles and by live stock. Four of the injuries were caused by falls, three by electric shock, two each by falling material, and by collisions, and one each by a runaway and by live stock.

Public employés.—Six of these employés were injured in March, three by falls, two by live stock and one by a fall. In the month previous, the record was two killed and eleven injured, and in March, of last year, one killed and eleven injured.

Miscellaneous.—During March, 1910, six of these workers were killed and nine were injured, compared with three killed and eleven injured in the month before, and one killed and eleven injured in March, 1909. To an explosion of dynamite, was due six deaths, and to a fall the sixth. Three of the injuries were due to falls and two each to machinery, to explosions and to falling machinery.

Unskilled labour.—Five labourers were killed and fifteen injured, during March, just past, compared with two killed and ten injured in the month before, and three killed and nine injured in March, 1909. Of the fatalities, two each were caused by falling materials and by being run over, and one by a fall. Seven of the non-fatal accidents were caused by falling material, four by explosions, and two each by falls and by flying material.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF MARCH, 1910.

The following is a list of contracts awarded by the Department of Public Works, and the Department of Railways and Canals which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

CONCRETE PIERS, &C., AT CHAPLEAU, QUE.,

Concrete piers and abutments, etc., at Chapleau, Que.; date of contract, March 24, 1910; name of contractors, V. L. Fallon and J. J. Fallon, Cornwall, Ont.; amount of contract, \$14,895.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter.....	\$2.80
Foreman mixing concrete.....	2.25
Foreman laying concrete.....	2.50
Foreman stone crusher.....	2.25
Carpenters.....	2.00
Blacksmiths.....	2.25
Blacksmiths' helpers.....	1.50
Ordinary labourers.....	1.60
Driver with 1 horse and cart.....	2.50
Driver with 2 horses and wagon.....	4.00

Department of Railways and Canals.

Extension of water service pipe line and construction of Dam at Cedar Hall, Que., on the Intercolonial Railway. Date of contract, March 7, 1910. Amount of contract, schedule rates. Contractor, Laura M. McManus.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Blasters.....	\$1.50
Pipefitters.....	2.00
Excavators.....	1.25
Labourers.....	1.25
Carpenters.....	1.75
Drillers.....	1.50
Driver, 1 horse and cart.....	2.00
Driver, 2 horses and wagon.....	3.00

STATION AND FREIGHT ROOM AT RENOUS, NEW BRUNSWICK.

Erection of a combined passenger station and freight room at Renous, N.B. Date of contract, March 15, 1910. Amount of contract, \$1,700. Contractors, The Renous Lumber Company, Limited.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Concrete layers.....	\$1.50
Masons.....	3.00
Carpenters.....	1.75
Builders' labourers.....	1.50
Common labourers.....	1.35
Painters and glaziers.....	1.75
Metal roofers.....	2.00
Driver, 1 horse and cart.....	2.00
Driver, 2 horses and wagon.....	3.00

FENCING ON INTERCOLONIAL RAILWAY LINE.

For the erection of fencing along the line of the Intercolonial Railway. Date of contract, March 19, 1910. Amount of contract, schedule rates. Contractor, Laura M. McManus.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
<i>District No. 5—Campbellton to Newcastle:</i>	
Foreman.....	\$2.25
Labourers.....	1.25
<i>District No. 6—Newcastle to Moncton:</i>	
Foreman.....	\$2.25
Labourers.....	1.35
<i>District No. 8—Painsec Junction to Truro:</i>	
Foreman.....	\$2.25
Labourers.....	1.35

March 29, 1910.

Post Office Department.

During the month of February, 1910, orders were given by the Post Office De-

partment for the supplies below mentioned, subject to the regulations for the suppression of the *sweating* system, and the securing of payment to the working-men and working-women of fair wages and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 721.60

Making and repairing rubber dating stamps and type, also other stamps.....	116.90
Supplying stamping material and wooden boxes, and repairing stamping pads.....	570.81
Supplying mail bags.....	1,471.15
Repairing mail bags.....	1,622.62
Making and repairing Post Office Scales....	495.50
Making and repairing mail locks and supplying mail bag fittings.....	402.91
Supplying Street Letter Boxes and repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes, parcel receptacles and Street Letter Boxes.....	3,208.25
Making and repairing miscellaneous articles of Postal Stores.....	7.25
Making and supplying articles of official uniform.....	214.65

TRADE DISPUTES DURING THE MONTH OF MARCH, 1910.

THE only trade dispute of great magnitude in Canada, during the month of March, was a strike of coal miners at Springhill, N.S., which had been in existence since August 10, 1909. Some improvement, however, was shown with regard to this dispute, one of the mines having been re-opened. The new disputes of the month were all of small proportions, and none of them lasted more than a week.

Analysis of Trade Disputes During the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during March, was eleven, one less than in the previous month, and four more than in March, 1909. About twenty-one firms and 2,405 employes were affected by these disputes, five firms and 532 employes being affected by new disputes.

Loss of time in working days.—The loss of time to employes through trade disputes, during March, was approximately 50,570 working days, compared with a loss of about 49,484 days in February, and 10,450 in March, 1909.

Trades affected by new disputes.—The following table shows the trades affected by new disputes of the month, and the number of workpeople involved in each group of trades.

Trades.	No. of disputes.	No. of workers.
Metal trades.....	1	120
Woodworking trades.....	2	100
Clothing trades.....	1	60
Food and tobacco preparation	1	252
Total.....	5	532

Localities affected by new disputes.—The new disputes of the month occurred in the following Provinces of the Dominion.

Province.	No. of disputes.
Quebec.....	1
Ontario.....	4
Total.....	5

Causes of disputes.—The following were the causes of the new disputes of the month.

Cause.	No. of disputes.
For increase in wages.....	1
For increase in wages and other changes....	1
Against reduction in wages.....	1
Against promotion of an employe.....	1
Against conditions of employment.....	1
Total.....	5

Methods of settlement.—Of the eleven disputes in existence during March, six were settled, leaving five still in existence at the end of the month. Three disputes were settled through negotiations be-

tween the parties concerned, and the remaining three were settled without negotiations, work being resumed in two cases, and the places of the strikers being filled in the third.

Results of disputes.—The employers were successful in four of the disputes which were terminated, the employés in one, and one resulted in a compromise.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes in existence in Canada during March, which began in previous months, comprised strikes of coal miners at Springhill, N.S., carpet weavers at Guelph, Ont., garment workers at Toronto, Ont., and cloak makers at Toronto, Ont., and Montreal, Que.

Strike of Coal Miners at Springhill, N.S.

No settlement was effected in a strike of employés of the Cumberland Railway and Coal Company, at Springhill, N.S., which began on August 10, 1909, on account of the refusal of the Company to grant demands for the recognition of the United Mine Workers of America, an increase in wages, and certain changes in the working conditions. Throughout the remainder of the year 1909, mining operations were completely suspended owing to the strike, but early in the present year, one mine was re-opened with a few men, who had been secured to take the places of the strikers, and the Company reported in March, that 300 men were then at work. The strikers originally numbered about 1,700 men.

Strike of Carpet Weavers at Guelph, Ont.

No settlement was reported in the case of a strike of carpet weavers at Guelph, Ont., who stopped work on December 11, 1909, on account of the refusal of their employers to grant a demand for extra pay for overtime, and general dissatisfaction with the conditions of employment. About twenty-eight men were affected directly, and twelve, indirectly, by the dispute. During the month of March, it was reported that a number of the strikers had left to seek work elsewhere, and the Company had secured

some new men to take the places of the strikers.

Strike of Garment Workers at Toronto, Ont.

On February 2, a strike of about fifty-eight female garment workers took place at Toronto, Ont., on account of the refusal of the employers to provide thread free, it having been their custom for twenty years to deduct the cost of the thread from the wages of their employés. No settlement of this dispute was reported during March.

On February 8, a strike of cloakmakers took place at Toronto, Ont., affecting about forty-eight male and twenty-two female employés directly, and twelve male and three female employés indirectly. The cause of the dispute was the refusal of the employers to make their establishment a strictly Union shop. Work was resumed on March 30, without this demand being granted, but the employers agreed to place price tags on garments to be made, the absence of them having frequently been the occasion of disputes. It was stated that nearly all the employés were members of the Cloakmakers' Union.

Strike of Cloakmakers in Montreal, Que.

No settlement was reported in the case of two strikes of cloakmakers in Montreal, one of which began on February 18, and the other on February 23. The former dispute, involving forty male and twenty-five female employés, was caused by the refusal of the employers to grant a demand for an increase in wages, and the latter, in which about twenty-five firms and 935 employés were originally involved, was due to sympathy with the other strikers. A number of firms reached an agreement with their striking employés, and at the beginning of March, there were about eleven establishments and 225 employés still affected.

Strike of Cigarmakers at Winnipeg, Man.

In the *Labour Gazette* for March mention is made of a strike of twenty-three cigar-

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month, or at its termination, affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employes, or of less duration than twenty-four hours.

makers at Winnipeg, Man., which began on February 8, the cause of which, according to the employers was said to be the promotion of an apprentice before his full time had expired. It has since been reported by the Cigarmaker's Union that the cause of the dispute was the refusal of the employers to pay journeymen's wages to a member who had completed his term of apprenticeship.

New Disputes.

The new disputes of the month comprised a lockout of piano-makers, at Kingston, Ont., and strikes of moulders and coremakers, at Smith's Falls, Ont., cigar makers, at Toronto, Ont., garment workers, at Montreal, Que., and wheel finishers at Gananoque, Ont.

Strike of Moulders and Coremakers at Smith's Falls, Ont.

On March 23, about 120 moulders and coremakers declared a strike at Smith's Falls, Ont., on account of the refusal of their employers to grant a demand for an increase of fifteen per cent. in pay for piecework, and for certain changes in shop rules. A settlement was effected on March 25, mutual concessions having been made.

Lockout of Pianomakers at Kingston, Ont.

During the month of March, the Wormwith Piano Company, of Kingston, Ont., endeavoured to effect a rearrangement of piecework prices in a number of departments of their factory. The factory is run on the contract system, being divided into different departments, and a price is placed on the work to be done in each department. This price is paid to a contractor, who engages his own help and pays them. The Company claimed that most of these prices had been made when the factory was turning out only four or five pianos a week, instead of twenty-five as at present, and that, with the added machinery and labour-saving devices

some of the contractors were making very large pay. It was claimed by the contractors, however, that they could not afford to accept the reduced rates offered by the Company, and on March 21, about 100 of the employes stopped work. On March 28, an agreement was reached, according to which the old rates were to prevail for one year after the resumption of work.

Strike of Cigarmakers at Toronto, Ont.

On March 18, about sixty-five stripper girls declared a strike in a cigar factory at Toronto, Ont., causing about 187 men to stop work also. It was reported by the employers, that the strikers had objected that there were too many bosses, but it was claimed by the strikers, that they wanted higher wages. Work was resumed on March 24, according to the employers, on the same basis as before the strike, but according to another report, a compromise was reached, under which they were to receive regular wages.

Strike of Garment Workers at Montreal, Que.

On March 24, a strike of about thirty male and thirty female employes of the Semi-Ready Company, took place at Montreal, Que., According to the Company, the dispute arose because certain employes objected to the promotion of an assistant-foreman to the position of foreman, on the grounds that he was an Italian, and that at times, he had spoken rudely to one or two of the men, and they feared he would discharge some of them. Work was resumed on March 29, the employes admitting that they had been misled.

Strike of Wheelwrights at Gananoque, Ont.

It was reported, in the press that a strike of wheelwrights took place at Gananoque, Ont., about March 23, on account of the refusal of the Company to grant a demand for extra pay for overtime. No

settlement was reported, but the places of the strikers were filled.

The table which is published herewith, is a compilation of the trade disputes of

the Dominion of Canada, which began or were in continuance during the month of March, and which have been reported to the Department.

RETAIL PRICES OF STAPLE ARTICLES OF CONSUMPTION, CANADA, DURING MARCH, 1910.

The accompanying table sets forth the retail prices prevailing on or about the fifteenth day of the month preceding the present issue of the *Labour Gazette*, of the more important staple commodities entering into the cost of living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement is given of the rental of a representative workingman's dwelling of the better class in the quarter of each locality usually occupied by workingmen.

The exact quality for which the quotation is given is

set forth in the case of each commodity, and every care has been taken to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of every Province in the Dominion.

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the respective localities, under detailed instructions as to sources of information, quality of goods to be quoted, etc., from the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during March, 1910.

DOMINION REPORT.

Mineral Production of Canada.

Preliminary Report on the Mineral Production of Canada during the calendar year, 1909. Ottawa: Government Printing Bureau, 1910. Page, 18.

THE preliminary report on mineral production in Canada, issued by the Department of Mines, shows the total value of the production in 1909, to have been in excess of \$90,000,000. Compared with the total value for 1908, which was \$85,927,802, the production of 1909, shows an increase of a little over five per cent. The actual increase or

betterment in the mining industry in 1909 was, however, somewhat greater than is indicated by this comparison. Owing to a slight change in the method of compiling statistics of the quantities of metals produced the values for 1909, are somewhat less than they would otherwise have been.

Of the total production in 1909, \$45,-188,387—or 49.9 per cent of the total—is credited to the metals, and 44,927,376—or 49.7 per cent—to non-metallic products; a small allowance being made for mineral products not reported. Amongst the individual products coal is still the most important, its value constituting twenty-seven per cent of the total; silver occupies second place with 15.9 per cent; gold and nickel come next

with 10.8 and 10.5 per cent respectively; copper contributes 7.8 per cent; cement 5.8 per cent; clay products 6.1 per cent; asbestos 2.5 per cent.

The metals nearly all show an increased output compared with 1908. The average prices remained fairly steady throughout the year, differing but slightly from those of the year before; copper, nickel, and silver, being lower in price, while lead, spelter and tin, were higher.

NOVA SCOTIA REPORTS.

Factory Conditions in Nova Scotia.

Second annual report of the Factories' Inspector of Nova Scotia, Halifax, N.S., Commissioner of Public Works and Mines, King's Printer, 1909. Page, 43.

The second annual report of the Factories' Inspector, of Nova Scotia, contains many valuable suggestions for the protection of employes in factories, from accidents. The number of industrial accidents in Nova Scotia, reported by

employers during the year ending September 30, 1910, was 591, of which twelve were fatal. Eighteen children under the statutory age were found employed.

The danger of contracting tuberculosis, to which factory workers are exposed, is pointed out, and the precautionary measures which may be taken against this disease are described, as they are set forth in a recent report of a special committee of the State of Connecticut. It is suggested that this matter is one which might very well be taken up by the trade unions, since in proportion to their numbers, factory workers are the greatest sufferers from consumption, of all classes of the community.

Mining Conditions in Nova Scotia.

Province of Nova Scotia. Report of the Department of Mines, 1909. Halifax, N.S., King's Printer, 1910. Page, 154.

In the report of the Department of Mines of Nova Scotia for the fiscal year,

ended September 30, 1909, it is stated that the returns of coal sold during that year showed 4,615,713 tons, compared with 5,485,583 in 1908, the reduction being chiefly due to three strikes, which took place during the summer of 1909. One at Springhill caused an estimated loss of 75,000 tons, another at Glace Bay caused a loss of about 538,000 tons, and the third, in Inverness county, a loss of about 45,000 tons up to the end of the fiscal year.

The production of gold in Nova Scotia during the year was 12,597 ounces. recovered from 59,058 tons of ore, a slight increase compared with the previous year. There were quarried 299,045 tons of gypsum, in which industry 600 men were employed, and 19,400 tons of building stone. There were manufactured 22,000,000 bricks and 300,000 feet of drain-pipe.

ONTARIO REPORT.

Production and Distribution of Milk.

Report of the Milk Commission, appointed to inquire into the production, care and distribution of milk, 1909. Toronto: King's Printer, 1910. Page, 142.

On May 14, 1909, a Commission was appointed by the Ontario Government, to inquire into the methods of supplying milk in the Province, and the best means of securing a pure supply. In their report, which has recently been published, the Commissioners show the necessity of providing a good quality of milk, inasmuch as it is one of the best mediums for the development of harmful germs such as those of tuberculosis, typhoid, diphtheria and scarlet fever. The rate of infantile mortality is also shown to be largely dependent upon the quality of the milk. An account is given of the means adopted in various parts of Canada, and the United States, in Copenhagen, and London, to guard against the selling of inferior milk, and following recommendations are made for adoption in this country.

That the present laws governing the production, care and distribution of milk be consolidated and amplified, and that the general principles relating to the treatment of milk for human con-

sumption be fixed by the Legislature. That larger powers of licensing and supervision be given to municipal authorities, enabling them to fix a standard of food value for the milk, to make inspections at the sources of supply, and to establish and maintain, or assist in the establishment and maintenance of infants' milk supply depots. That all cows suffering from tuberculosis of the udder should be promptly removed from dairy herds, That in cities of over 50,000 population, no milk should be sold in shops except in bottles or other sealed packages. That producer, distributor and consumer should alike be educated to the importance of cleanliness in handling milk, and to the value of prompt chilling and keeping in a cold place.

BRITISH REPORTS.

Labour Statistics.

Thirteenth abstract of labour statistics of the United Kingdom, 1907-1908. London: Wyman & Sons, 1910. Page, 305. Price, 1s., 3d.

The thirteenth abstract of labour statistics of the United Kingdom contains a general statistical summary, relating to the conditions of labour in the years 1899 to 1908, and detailed statistical tables showing fluctuations in employment, labour bureaus, production, exports of textiles, clothing and coal, home consumption, rates of wages and hours of labour, changes in rates of wages and in hours of labour, wages and earnings of agricultural labourers, earnings in the textile and clothing industries, profit-sharing, prices, trade disputes and conciliation and arbitration, diseases of occupations, industrial accidents, associations of employers, trade unions, workmen's clubs, cooperative societies, friendly, building and loan societies, growth and movement of the population, housing of the people, ages and occupations of the people, employment in factories and workshops, employment of seamen, workmen's compensation schemes, savings banks and pauperism.

Compared with 1907, the year 1908 is shown to have been an unfavourable one, industrially, in nearly every respect. The number of trade unionists employed

fell from 96.05 per cent. to 91.35 per cent. There was a net loss of £59,171 in weekly wages, compared with a net gain of £200,912 in the previous year. The aggregate duration of trade disputes in working days increased from 2,161,151 in 1907, to 10,834,189 in 1908. The percentage of unemployed was greatest in the shipbuilding trades, in which it amounted to 22.1, in the building and engineering trades it was over eleven per cent, and in the furnishing trade, 10.4 per cent.

Conciliation in Trade Disputes.

Seventh Report by the Board of Trade of Proceedings under the Conciliation (Trade Disputes) Act, 1896. London: Wyman & Sons, 1910. Page, 172. Price, 8½d.

Marked progress in the movement for the settlement of trade disputes by conciliation rather than by strikes is shown in the seventh report by the British Board of Trade on proceedings, under the Conciliation (Trade Disputes) Act, 1896. The report covers a period of two years and six months, from July 1, 1907, to December 31, 1909, during which time 133 cases were dealt with, under the Conciliation Act. Since the Act came into force in August, 1896, 365 cases were dealt with. In 234 of these cases joint applications were received by the Board of Trade from both employers and employés, in eighty-two cases the applications were from the workpeople only, and in twenty-four cases the applications were from the employers only.

In October, 1907, when through the mediation of the Board of Trade, a settlement was arranged in a dispute affecting railway employés, a scheme was accepted by the parties concerned for the reference of disputes regarding wages and hours of labour to conciliation Boards, with final reference to arbitration when necessary, in the case of disputes which could not be settled through the usual channels. Conciliation Boards have since been formed by thirty-three railway companies in England and Wales, six in Scotland and seven in Ireland. At the end of 1909, the total number of Conciliation Boards in existence,

to the knowledge of the Labour Department was 277, an increase of sixty-eight compared with the number in existence in August, 1907.

In September, 1908, the intention of the Board of Trade to establish a Court of Arbitration in connection with the Conciliation Act, was announced. The Court, in respect to each dispute referred to it, is composed of three or five members nominated by the Board of Trade from three panels, the chairman's panel, the employer's panel, and the labour panel. Applications have since been received for the establishment of a court of arbitration in eight disputes.

Public Health and Social Conditions.

Statistical Memoranda and Charts prepared in the Local Government Board, relating to Public Health and Social Conditions. London: Wyman & Sons. 1909. Page, 113. Price, 5s.

A report prepared by the local Government Board, in 1909, shows in a series of statistical memoranda and charts, certain aspects of social conditions in the United Kingdom, during a period of years, extending in most cases from 1850. The report is divided into six sections, dealing respectively with population, public health, occupations, wages and unemployment, the poor law and pauperism, local Government and local taxation, and miscellaneous statistics, relating to education and illiteracy, friendly societies, trade unions, savings banks, income tax returns, and crime.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NOVA SCOTIA CASE.

Money Qualification of Immigrants.

ON or about February 13, a party of fourteen miners arrived at Halifax, N.S., on prepaid passage, for the Dominion Coal Company. Six of them were Germans, four Belgians, one Swiss, two French and one Russian. They were of excellent physique, and had employment guaranteed by the Dominion Coal Company, but they were quite unable to comply with the money qualification prescribed by the Immigration Department. They were accordingly rejected by the Immigration Agent at Halifax.

Before, however, they could be deported, the Agent was served with a writ of Habeas Corpus, and, on producing the immigrants before Mr. Justice Russel, of the Supreme Court, he ordered their release, holding that they were entitled to entry under the regulations.

The following extract is taken from the instructions for the guidance of Immigration Officials, dated the fourth of June, 1909.

"The provision as to relaxation of

the money qualification because going to assured employment is dealt with as follows:—(a) Immigrants from countries other than those in which immigration effort is being made by Canada, cannot be assumed by the Immigration Officials to be going to assured employment, and, therefore, each individual will be required to produce the amount of money the regulations call for. (b) In view of the difficulties encountered by non-English speaking immigrants in securing employment, even though coming from countries in which immigration effort is being made, (in case of their not having the money required and ticket to destination) the Agent must be satisfied by evidence, which he must record, that such immigrant is going to assured employment at farm work."

The Court held that the Order-in-Council of the eleventh of September, 1908, requires every immigrant to have in his possession the sum of \$25, unless satisfactory evidence is offered that the immigrant is going to some definite employment, and that this Order does not contain any provision limiting the employment to farm work. It was on this point the case turned, and the Judge granted an Order for the release of the immigrants, and they were thereupon discharged from custody and allowed to go forward to the work await-

ing them with the Dominion Coal Company.*

QUEBEC CASES.

Damages for Loss of Eye.

A verdict for \$2,000 damages was the result of a jury trial, at Montreal, in the case of Alexis Binette vs. the Dominion Bridge Company. The plaintiff claimed \$5,000 for the loss of his left eye, into a which a splinter of steel flew while he was engaged in doing rivetting work for the Company. The jury assessed the damages at \$3,000, but owing to contributory negligence on the part of Binette, reduced their award to \$2,000. The defendant moved for a reserve case, but the presiding judge, Mr. Justice Guerin, did not see any ground for this, and he rendered judgement in accordance with the verdict.

Girl Strikers Fined.

Six striking cloakmakers, four girls and two men, were before Judge Lanctot, in the Recorder's Court, charged with disturbing the peace and blocking traffic on St. Catherine Street, in front of Sumner's establishment, a few weeks ago. All were condemned to pay a fine of \$15 or spend one month in jail, and they also received a severe lecture from the Judge for their conduct. Judge Lanctot warned them that he would be more severe on any others brought up before him on similar charges. All must recognize that the streets must be kept clear and the public protected from danger by mobs.

The arrests were made by a squad of policemen called to disperse a crowd of two or three hundred strikers who had gathered around Sumners's about the time the non-strikers were due to leave the establishment. When the policemen arrived on the scene and commenced to clear away the strikers, some of the latter refused to move on. Two girls

were arrested by Constable Foucault, and while they were being placed in the patrol wagon, two others attempted to interfere with the policemen, and they too, were taken into custody. A couple of young men, who were shouting "scabs" were also taken into custody, and had to pay a \$15 fine yesterday.

ONTARIO CASES.

Penalty Clause in Contract.

A contractor brought action against the executors of J. S. for balance alleged to be due for slating a roof for him. Defendants counterclaimed for damages, alleging that the work was not completed within time agreed upon. At the trial, judgement was given plaintiff for \$117 with costs, on proper scale, and judgement was also given defendant for \$227 on their counterclaim, with costs on County Court scale, one to be set off against the other. The Divisional Court, on appeal, held that the contractor was delayed by the default of the proprietor or his workmen not beginning his work until a date after the termination of the time fixed by the contract, and that there was in effect a new contract at the contract price, but without revival of the penalty clause in the contract. This penalty clause provided, that should the contractor fail to finish the work at the time agreed upon, he should pay by way of ascertained damages, \$1 per day thereafter, for the time that the works remained incomplete; due allowance to be made for extension of time for additional work or alterations, and for delay occasioned by the default of the contractor for other parts of the work, unless the proprietor had proceeded promptly against such other contractor. It appeared that the carpenter's work was not done on the roof till the third of August, and that the slating and tiling part of the work could not be commenced before the expiration of the time limit fixed in the contract, which was the first of August. The Divisional Court also held, that the delay in the after prosecution of the work should not be

*An Order-in-Council amending the Order-in-Council of September, 1908, with regard to the money qualification of immigrants was passed during March, and is published elsewhere in the present issue.

visited by the imposition of the penalty of so much per day, but should be limited to damage sustained thereby, following the decisions in *Holme v. Guppy*, (3 M. & W. 387) and *Moore v. Hamilton*, (33 U. C. R. 279, 520). The Court directed a reference back to one of the Officers of the Court, in order to allow amendments, and to have the damage for delay in the prosecution of the work ascertained upon evidence. Costs of appeal to plaintiff, other costs to be disposed of by Referee. *Findlay v. Stevens*, 15 Ont. Weekly Reporter, 212.

Mechanics' Lien Act—Preservation of Lien.

The plaintiffs supplied the defendants with certain hardware for use in the construction of a building for F. The last delivery was on the first of April, 1908, within thirty days of the filing of the lien. By section twenty-two, subsection 2, of the Act, a claim for lien for material may be registered before or during the furnishing or placing thereof or within thirty days after the furnishing or placing of the last material so furnished or placed. The last delivery, in this case, was of expansion bolts to the value of eighty-four cents, required for use in connection with guards to an elevator shaft. The elevator was installed without guards, but otherwise it was completed in October, 1907. After January, 1908, little remained to be done by the defendants under their contract. F. insisted that defective concrete should be replaced or repaired, and that the elevator should be properly safeguarded. There were structural difficulties preventing, it was thought, the installation of the guards, and the defendants' superintendent was endeavoring to provide guards that would serve the same purpose. In installing a working model of the proposed device he required four bolts to secure to a brick wall a plate to which one of the guards was attached. The bolts were delivered to him at the building and used by him there. The Referee, before whom the case first came, considered that the contract did not

call for gates, and that, as the bolts were used for a temporary or experimental purpose, the supplying of them by the plaintiffs had not the effect of keeping alive the plaintiff's lien. Upon an appeal to the Divisional Court it was held, that the delivery of the bolts referred to, although these were of trifling value and used for a temporary or experimental purpose only, was under the contract, and that the lien for all the materials supplied was preserved by registry of the claim therefor within thirty days from the delivery of the bolts, although, if that had not been regarded, the registry would have been too late. It was held also (Mr. Justice Magee dissenting), that having regard to section twenty-eight of the Mechanics' Lien Act, the material men (*viz.*: the men supplying the materials) had not lost their lien by accepting from the contractors, in part payment of their account, a promissory note which they discounted with their bankers, and which has come back into their hands unpaid prior to the registry of their claim of lien. The appeal was allowed.

(*Brooks-Sanford Company v. Theodore Tellier Construction Company*, 20 Ontario, L. R., page 303.)

Is Workman Liable for Defective Work?

A case of some interest was recently tried at the Guelph Division Court. The question for decision was whether or not a brussels weaver of the Guelph Carpet Mills was responsible for defective work. H. sued for a balance of wages owing him by the Company, when the brussels weavers went out. The Company did not dispute his claim, but set up a counterclaim for a rug which they said had been spoiled by the plaintiff's work. The case was a test case to decide whether or not the Company had a right to make a deduction for defective work. The rug in question was made up some time last summer, and no deduction was made at the time, as the foreman was endeavouring to dispose of it without loss. But from the plaintiff's wages in December the deduction was made. Upon the main point Judge

Jamieson held that a weaver could not charge for defective work and was liable for damages for goods spoiled by reason of imperfect work. He held, however, that the Company by paying wages at the time had waived the right to deduct and could not make the deduction from December wages. As a result the defendants withdrew their counterclaim and the Judge gave the plaintiff judgement for the balance of his December wages.

Damages for Injuries.

A jury in the Assize Court, presided over by Mr. Justice Latchford, has awarded James Dolley \$1,500 damages for injuries received last June, by falling from the second to the first floor in the McCann-Knox Milling Company's factory on Jarvis street. Dolley sued for \$5,000, and the statement of claim was to the effect that the elevator gave way either through improper construction or through not being properly protected.

Fined for Calling "Scabs."

Police Magistrate Denison has demonstrated that the word "scabs," as applied to employes acting as substitutes for strikers, cannot be used. Two men have been fined by him twenty dollars and thirty dollars respectively, with the option of thirty days in jail, for applying the epithet to strikebreakers at the Continental Costume Company. "I want it to be distinctly understood that I object to that word," he stated decisively before imposing the fine.

A judgement in favour of the City of Winnipeg was recently rendered by Judge Matthew, in the action brought against the Winnipeg Electric Company, maintaining rights estimated at millions of dollars and many important differences between the municipal plant and the private one. The judgement decides that the city is entitled to an injunction against the Company, to restrain it from distributing electricity for light and power purposes within the city of

Winnipeg until the Company obtains the consent of the city by by-law. This does not prevent the Company from using electricity from Lac du Bonnet, for driving the street car service, but it does not apply to the Company's light and power business. The judgement further grants the city an injunction ordering that the street railway remove from the streets the poles which the company is using for distribution of electricity, for light and power purposes, except such poles as are being used for the street car service. The city was granted the costs of the action.

BRITISH COLUMBIA CASES.

Longshoremen's Working Hours.

At an inquest upon the body of a longshoreman who was drowned at one of the seaports, the jury brought in a verdict of accidental death, coupled with a rider stating that in its opinion longshoremen should not be employed more than ten hours out of each twenty-four hours. This rider was the result of testimony showing that the drowned man had worked on the unloading of heavy material from the steamer *Trapeza*, almost continuously from noon of Friday to the time of his death, about eight-thirty a. m., on Saturday. This was done by remaining on duty four shifts, each of five hours, with an interval of only one hour between shifts. The jury was unanimously of the opinion that such hours of labour on the waterfront should not be permitted.

UNITED STATES CASE.

Heavy Damages for Strike.

A verdict of \$222,000 was recently rendered in the United States Court by the jury, in the suit of D. E. Loewe, of Danbury, against 200 hat makers, members of the Union Hatters of North America. After being out a little over two hours the jury ordered actual damages of \$74,000 to the plaintiff, but as

the suit was brought under the Sherman Anti-trust Law, triple damages must be assessed.

There was a remarkable scene in the court-room when the verdict was announced. The defendants in attendance were stunned, and groups dejectedly discussed the significance of the blow. A conference with the Court followed, at which it was decided to give the attorneys for the defence a hearing, on motion to set aside the verdict on the ground of being excessive. It is estimated that the costs will amount to at least \$10,000.

Attorney Davenport, senior counsel for the plaintiffs, said of the verdict:—

“It means that individual members of labour unions are bound by the actions of their officers, and they cannot allow them to do as they please. Secondly, it means that the Sherman Anti-trust law protects manufacturers and merchants

from boycott attacks. In substance, it is a new declaration of independence,”

The judge in his charge, practically instructed the jury to bring in a verdict for the plaintiff. He said the only question for them to decide was one of damages, and these were to be based upon the losses sustained by the plaintiff, between July, 1902, and September, 1903, the period during which the boycott against the Loewefactory was maintained. A bill of exceptions will be filed by the defence, and the case will eventually reach the United States Supreme Court.

The suit has been on trial for eleven weeks. It was instituted by the Anti-boycott Society, through Mr. Loewe, but it is understood the damages awarded were to go to the Danbury hat makers. The expense of defending the suit is being met by the United Hatters of North America.

THE
LABOUR GAZETTE

MAY, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF
APRIL, 1910.

I.—GENERAL SUMMARY.

THE season of outdoor activity has opened fully three weeks earlier than last year. This fact, and the general buoyancy of industry and trade due to favourable financial conditions and the heavy projected expenditures in connection with the development of the country, rendered employment more active during April than at the corresponding season in many years past. Navigation opened at several points at the earliest date on record. Agriculturists had completed seeding in many sections; the early season has resulted in a considerable increase in the acreage under crop. Unskilled labour generally was in very active demand for the season, the supply being already exhausted at many points by the resumption of railway construction and civic improvement work. The building year gives every promise of exceptional activity. The lumbering and mining industries have been favourably affected by the prevailing weather conditions. In the former, nearly all the mills in Ontario and the Eastern Provinces had resumed work, while good progress was made with the drives. In the mining industry, metalliferous mining increased in activity; in coal mining the cessation of labour disturbances in the Cape Breton fields and the early opening of navigation were favourable incidents of the month. The fishing industry in the Maritime Provinces has profited by the absence of off-shore ice, and lobster fishing promises a larger return than for some time past.

Manufacturing continued to increase in activity, and staffs were being steadily enlarged; a scarcity of labour, especially of female labour, was reported at several manufacturing centres. Immigration into Canada has been on a scale that promises to exceed all previous records. The outlook is for a season of exceptional activity in nearly all branches and localities.

Changes in Wages and Hours of Labour.

Wages changes, nearly all being in an upward direction, have been larger in number than for some time. The following is a statement of the various changes in wages and hours of labour, information concerning which was received at the Department during April:—

Lumbering.—Millmen (950) at St. John, N.B., received a ten per cent. increase in wages, namely from a scale of \$1.35–\$2.00 per nine-hour day, to one of \$1.42–\$2.20. The increase was granted after a strike.

Building trades.—Plumbers and steamfitters (fourteen) in New Westminster, B. C., obtained an increase of twelve and one-half cents. per hour, namely from \$22.00 to \$27.50 per week of forty-four hours. Bricklayers, stone masons and plumbers at Vancouver, B.C., received increases in schedule, the latter being advanced from a minimum of \$4.00 to one of \$5.00 a day. Carpenters at Saskatoon, Sask., obtained an increase from thirty-five to forty-five cents per hour, with a

reduction in hours from ten to nine per day. At Lethbridge, B.C., a general increase in wages of employes in the building trades was granted, the classes affected including bricklayers, carpenters and joiners, electrical workers, lathers, plasterers' labourers, painters, plumbers, sheet metal workers, hod carriers and general labourers.

Metal trades.—Electrical wirers at Brantford, Ont., had their wages increased from twenty-two and one-half cents to twenty-five cents per hour. Foundry employes to the number of 160 at Waterloo, Ont., obtained an increase in wages. Labourers in the employ of the Hamilton, Ont., Iron and Steel Company had their wages increased by from five to ten per cent.

Woodworking trades.—Pattern makers (twenty-five) at Peterborough and Port Hope, Ont., had their wages increased from twenty-seven and one-half to thirty cents per hour.

Clothing trades.—By an agreement which took effect at London, Ont., on March 28, thirty-five coat makers received a twelve per cent. increase in piece work prices; the increase amounts to about \$3 per week. Journeymen tailors (forty) at St. Hyacinthe, Que., were granted an increase of approximately \$1 per week on piece work.

Leather trades.—Leather workers (thirty) at Vancouver, B.C., had their hours reduced from nine to eight per day, without reduction in pay.

*Railway employes.*¹—Maintenance-of-way employes of the Michigan Central Railway Company had their wages advanced from April 1, as follows:—

A number of freight-handlers of the Toronto, Hamilton and Buffa'o Railway Company, at Hamilton, Ont., had their wages advanced one cent per hour. Dating from April 1, 1910, telegraphers in the employ of the Michigan Central Railway Company obtained a substantial increase in wages.²

Street railway employes.—Conductors and motormen in the employ of the Ottawa Electric Railway Company received an increase of one-half cent per hour in the case of first and second year men, and one and one-half cents per hour in the case of men over two years in the service. Street railway employes at London, Ont., also received an increase.³

General transport.—An agreement was reached at Fort William, Ont., by which grain trimmers will be paid a flat wage ranging from fifty to sixty-five cents per 1,000 bushels. The agreement is to be effective for three years.

Public employes.—Corporation teamsters (thirty-five) at Ottawa, Ont., obtained an increase from \$4.32 to \$4.50 in the rate per nine-hour day for man and team. The rate for men with horses and carts (twenty-five) was increased from \$2.25 to \$2.50 per nine-hour day. Civic employes (twelve) at London, Ont., received increases ranging from \$25 to \$100 per year from March 1.

Miscellaneous.—Waitresses (sixteen) at Ottawa, Ont., had their wages increased \$3 per month, the new rate being \$3.75 per week, with board and lodging. Stokers (fourteen) in the employ of the Ottawa Gas Company received an advance from \$15 to \$16 per week of seventy-seven hours.

²Copy of the schedule is published under the heading "Recent Industrial Agreements" elsewhere in the present issue.

³See report of St. Thomas, Ont., correspondent.

Unskilled labour.—Corporation labourers (ten) at Paris, Ont., had their wages increased from \$1.50 to \$1.75 per day. Corporation labourers at Guelph, Ont., were also advanced.

Several establishments at Ottawa, Ont., have changed the hours of labour from 7.00 A.M., to 4.00 P.M., instead of from 8.00 A.M., to 5.00 P.M., during the summer months in order to give the employés another hour of daylight.

Interruptions to Industries.

Among industrial establishments, etc., destroyed by fire or through other causes during April, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Shoe factory at Yarmouth, loss, \$30,000.

On April 8, the schooner *Vivian Walter* was wrecked at Black Rock, New Harbour. On April 27, the fishing schooner *Niagara* struck on a shoal north-east of Cranberry Island and became a wreck.

Prince Edward Island.—Outbuildings and residence at Morrell.

New Brunswick.—Residence and outbuildings at Georgetown, loss, \$3,500; boarding house at Moncton; carriage factory at Woodstock.

Quebec.—House hospital at Bury; sash and door factory at Black Lake, loss, \$35,000; hotel at Fraserville, loss, \$3,000; creamery cheese factory and stock at Mascouche, loss, \$4,000; tenement houses at Maisonneuve, loss, \$6,000; foundry at Maisonneuve, loss, \$1,500; manufacturing establishment at Montreal, loss, \$125,000; sash and door factory at Montreal, loss, \$615,000; hardware store at Quebec, loss, \$15,000; stables and six horses at Quebec; grist and sawmill at St. Eugène, loss, \$12,000; business section of St. Eustache, loss, \$40,000; implement factory and warehouse at Warwick, loss, \$50,000.

Ontario.—Hotel and business block at Cornwall, loss, \$250,000; outbuildings and residence at Fingal; theatre at Galt, loss, \$25,000; wholesale crockery store at Hamilton, loss, \$8,000; railway warehouse at Hawkesbury; lumber yard at Mechanicsville, loss, \$5,000; business block at London, loss, \$4,000; planing mill and lumber at Mount Forest; theatre and lodge rooms at Niagara Falls, loss, \$5,000; round house and lumber at Ottawa, loss, \$14,000; driving park at Peterborough; outbuildings and stock at Sandwich West, loss, \$2,500; sawmill and planing mill at Stevensville, loss, \$10,000; woollen mills at Stratford, loss, \$50,000, (forty hands thrown out of employment); business block at Tilbury, loss, \$10,000; five stores at Tilsonburg, loss, \$5,000; rag factory at Toronto, loss, \$7,000; tea warehouse and contents at Toronto, loss, \$40,000; tug *Kate* of Ganley line at Sault Ste. Marie; hotel at Wiarton, loss, \$4,500; cooperage at Windsor, loss, \$3,000; varnish factory at Wychwood loss, \$5,000.

Manitoba.—Fifteen thousand telegraph poles at Brandon, loss, \$2,000; elevator and grain at Rosthern, loss, \$8,000. At Winnipeg, barber shop, tailor shop, laundry and residence, loss, \$5,000; elevator; wholesale grocery warehouse, loss, \$125,000 (sixty-five hands out of employment); brewery, (forty hands out of employment.)

Saskatchewan.—Elevator and 15,000 bushels of wheat at Indian Head, loss, \$15,000; general store and hotel

at Manor, loss, \$50,000; stables, barns and contents and granary at Wynard.

During April prairie fires caused damage to farm houses, outbuildings and contents in Manitoba and Saskatchewan.

Alberta.—Elevator at Calgary, loss, \$300,000; sawmill at Edmonton, loss \$20,000, business section of Tolfield, loss, \$20,000.

British Columbia.—Sawmill and lumber at China Creek, loss, \$35,000.

Conditions in the Industries and Trades.

Conditions of employment during April in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of the *Labour Gazette* and by information received at the Department of Labour from other sources, may be briefly summarized, as follows:—

Agriculture.

From the standpoint of agriculture, the month just passed has been the most favourable, compared with the corresponding period in previous years, in many seasons past. Seeding had been already completed in several localities at the close of the month, and in Western Canada a large proportion of the wheat had been sown, seeding having become general throughout the three Prairie Provinces in the second week of the month. The cool dry weather of the first half of the month was especially favourable for the working of the land. This was followed, in the closing weeks of the month, by general and heavy rain falls, which greatly promoted growth. Pastures were reported in excellent condition throughout Canada. The result was an unprecedented supply of milk, considering the season, at the cheese factories, which in Ontario and Quebec were nearly all in operation by the opening week of the month. Though there were occasional cold waves, no damage from frost was reported. The outlook for fruit is exceptionally promising, and small fruits are expected to be on the market at an unusually early date. Cattle, sheep and other live stock wintered well. Altogether, the season is earlier by at least three weeks than that of 1909, being, in the general opinion, the earliest recorded for at least fifteen years back.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

City and district of correspondent.	Agricultural operations.	Fishing.	Lumbering (including saw-milling.)	Mining.	Manufacturing.	Railway construction.	Building trades.

Farm and dairy produce advanced in price during April, and marketing was active. Meats advanced two to four cents per pound, and butter, five cents a pound, in many sections. The maple sugar yield will be somewhat lighter than usual owing to the early closing of the season.

The British Columbia Fruit Growers' Association held its annual convention at Kamloops, B.C. The reorganization of the Association was accomplished. A feature of the meeting was a thorough discussion of co-operative marketing.

According to an estimate of the *Census and Statistics Monthly*, the quantity of

wheat in farmers' hands at the close of March, was upward of 30,000,000 bushels, as compared with 22,747,000 bushels, last year. It is estimated that ninety-five per cent. of the wheat crop of the Dominion of 1909 was of merchantable quality.

As indicating the increase during recent years in the price of dressed hogs, the following table from the *Census and Statistics Monthly* shows the average price per 100 lb. of dressed hogs paid by the George Matthews Company, Limited, for the nine years ended March, 1910, at their factories at Hull, Peterborough and Brantford, and representative of the prices paid in Ontario and Quebec by all buyers during that period:—

Month.	1901-1902	1902-1903	1903-1904	1904-1905	1905-1906	1906-1907	1907-1908	1908-1909	1909-1910

November.....	7.62	8.18	6.98	6.75	7.92	8.25	8.03	8.58	11.03
December.....	8.34	8.20	6.86	6.66	8.36	8.70	7.54	8.44	11.13
January.....	8.73	8.36	7.02	7.00	9.18	9.15	8.06	8.93	11.79
February.....	8.24	8.16	7.01	7.22	9.59	9.43	7.44	9.59	11.67
March.....	81.8	8.72	7.32	8.24	9.69	9.52	7.48	9.99	11.14
Averages.....	8.98	8.90½	7.71½	7.51½	9.04½	9.52½	8.53½	9.08½	11.35½

In the first two years of the period there was little fluctuation, and prices were fairly steady at about \$9 per 100 lb. In the next two years they veered from \$6.66 to \$8.88, with averages of \$7.51½ to \$7.71½. Then ensued four years of higher prices in which twenty-six quotations were over \$9 and twenty-two under that figure, with four over \$10. In the last year, three monthly quotations are over \$10, with eight over \$11, and one over \$13. The top figure was reached in March, and the average for the year was \$11.35½ per 100 lb., being \$2.37¼ more than the average for 1901-2.

The estimated number of live hogs in the country fell from 3,445,282, in 1907, to 3,369,858 in 1908, and to 2,912,509, in 1909. The number in 1901 was 2,353,828.

The greater number of Ontario farmers who are this year making application to the Ontario Government immigration office for help, offer to give men work the year around, and a large proportion of them want a man with a wife and family. The wages offered run from \$10 to \$15 a month for inexperienced men, \$15 to \$20 for partly skilled, and \$20 to \$25 per month for those who are experienced. This includes board and washing, and in many cases a house or cottage is provided, some offering, also, to include fuel, vegetables, milk and fruit.

Latest reports received by the Superintendent of Immigration from the Officials of the Interior Department in the Western Provinces, show a widespread demand for labour.

The following statement will show the condition of the labour markets in the various districts covered, and the wages offered:—

Brandon, Man.....	Men wanted.....	Wages, \$15 to 30.
Battleford, Sask.....	No demand.	
Canora, Sask.....	Men wanted.....	" \$30 to \$40.
Craik, Sask.....	"	" \$35 to \$45.
Calgary, Alta.....	Supply equals demand.....	" \$35.
Coutts, Alta.....	"	" \$35 to \$45.
Daysland, Alta.....	Men wanted.....	" \$1.50 to \$2 per day.
Dauphin, Man.....	"	" \$10 to \$35.
Davidson, Sask.....	"	" \$30 to \$40.
Duck Lake, Sask.....	Supply equals demand.	
Dubuc, Sask.....	"	
Edmonton, Alta.....	Strong demand for experienced men farm hands, railroad men, and also domestics.....	Wages \$30 to \$35, with board.
Emerson, Man.....	Men wanted.....	" \$15 to \$30.
Fort Saskatchewan, Alta.....	Demand for men increasing.....	" \$35 to \$40.
Indian Head, Sask.....	Men wanted.....	" \$35 to \$40.
Innisfail, Altn.....	"	" \$25 to \$30.
Lacombe, Alta.....	"	" \$25 to \$35.
Lethbridge, Altn.....	Men in great demand.....	" \$25 to \$45.
Lloydminster, Sask.....	Little demand.....	" \$30.
Makinak, Man.....	No demand.	
Maple Creek, Sask.....	"	
Macleod, Alta.....	Men wanted.....	" \$30 to \$40.
Medicine Hat, Alta.....	No demand.	
Moosomin, Sask.....	Men wanted.....	" \$35 to \$40.
Moose Jaw, Sask.....	Fair demand.....	" \$20 to \$30.
Manton, Alta.....	Supply limited.....	" \$35 to \$40.
Olds, Alta.....	Men wanted.....	" \$35 and board.
Quill Lake, Sask.....	No demand.	
Regina, Sask.....	Keen demand for all kinds of farm help. Married couples.....	" \$15 to \$40. " \$35 to \$50.
Revelstoke, B.C.....	No demand.	
Saskatoon, Sask.....	No demand.	
Stettler, Alta.....	Men wanted.....	" \$20 to \$35.
Strathcona, Altn.....	Fair demand.....	" \$30.
Swan River, Man.....	Men wanted.	
Wetaskiwin, Alta.....	"	" \$30 to \$40.
Winnipeg, Man.....	Men in great demand at Immigration Office. Wages offered for season.	\$15 to \$30 per month.
Yorkton, Sask.....	Men wanted.....	Wages, \$20 to \$40.

It is anticipated that the demand will increase as the season advances. It is to be noted that the phenomenal influx of American settlers this season is affording most acceptable help. The wages offered include board and are estimated according to the experience of the man offering.

The final returns of the Alberta grain crops for 1909, exceed the estimates of the Department based on the reports of its crop correspondents. The total area reported under crop was 1,242,644 acres, an increase of forty-eight per cent. over 1908, and the total yield in bushels is 36,761,493, an increase over the previous year of forty-six per cent.

Fishing.

The month showed a marked improvement over March in the Maritime Prov-

inces. The absence of drift ice on the Atlantic coast has facilitated operations, and some good catches of herring and mackerel were made. Lobster men were very busy in the closing week of the month, the season having opened under favourable conditions. An increase in the catch over last year is expected. In British Columbia, the run of spring salmon has been light. The whaling station on the Eastern coast of Vancouver Island is very active, operations not having yet been begun on the Western side of the island.

The report of the Lobster Commission was presented to Parliament, and was discussed in the House of Commons. The terms under which licenses will be issued to canneries in British Columbia was under discussion.

The seal catches of the Halifax fleet this season have been as follows:—

Latooka.....	730
Ulva.....	171
Alice Gertrude.....	398
Agnes Donohue.....	1,054
Village Bell.....	312
Beatrice Corkum.....	746

Total..... 3,411

This is an average of 568 each. The Corkum will increase her catch, however, having left Cape Town, January 27, for the old sealing grounds.

Lumbering.

In Ontario and the eastern provinces interest has centered on the opening of the sawmills and the progress made with the drives. The former opened fully two weeks earlier than last year, and gave employment to a large number of men. The outlook is for an active season. The drives were retarded in certain localities by dry weather, in the beginning of the month, but the heavy rains at the close rendered conditions favourable in this respect, and on many of the rivers the drives had been completed by the close of the month. Fewer logs than usual will be left in the streams.

The British Columbia mills were very active and there was renewed activity in the logging camps. Prices have been firm to upward throughout Canada.

The Honourable the Premier of Quebec announced, during April, that the Government of that Province would prohibit the exportation of pulp wood cut on the Crown lands of the Province after May 1. An increase in stumpage dues from \$1.30 to \$2 per thousand feet in the case of pine logs, and from sixty-five cents to \$1.05 in the case of spruce logs; and in ground rents from \$3 to \$5 per square mile, will also go into effect on September 1. The provision prohibiting the cut of pulp wood for export is as follows:—

All timber cut on Crown Lands after May 1, 1910, must be manufactured in Canada—that is to say, converted into pulp or paper, into deals or boards, or into some other article of commerce or merchandise as distinguished from such timber in its raw state. It is further provided that there shall not be considered as manufactured, within the meaning of the present regulations, timber merely cut into lengths or logs piled up, barked or otherwise worked preliminary to the fabrication of pulp or paper, of deals or boards or of any other articles of commerce, nor waney timber nor poles; but actual square timber and railway ties are considered as manufactured.

A revision of the Timber Regulations has been carried into effect by the Government of Ontario. Dues are increased and the lessee must now pay the cost of fire protection.

The annual report of the Chief Fire Warden of British Columbia shows that in all 370 fires were reported during 1909, of which eighty per cent. were extinguished before damage resulted. The causes were: locomotives, 137; unknown, seventy-one; settlers, sixty-four; campers, fifty-six; donkey engines, twenty-three; lightning, nineteen. The loss: amount of timber destroyed and damaged by fires, 8,000,000 feet board measurement. The estimated area burned over amounted to some 30,000 acres of timber lands, and 40,000 acres of land that had been logged over, and which will be cleared for settlement. The total number of informations laid were thirty-three; convictions, nineteen; dismissed, eight; suspended, four; withdrawn, two. Fines collected amounted to \$800. The number employed to fight fires was 850. Total wages paid to fight fires were \$12,000. Total expenditures for Government to protect the timber will amount to over \$40,000. In patrolling their districts the fire wardens travelled some 60,287 miles, posting some 4,000 notices. Permits were granted to 2,530 settlers to start fires to clear their lands. There are 215 sawmills and fifty-nine shingle mills in British Columbia.

Mining.

In mining there was a considerable increase in activity during April, especially in the metalliferous camps, and the month compared very favourably with the corresponding period of 1909.

In Nova Scotia, a feature of the month was the decision of the striking miners, formerly in the employ of the Dominion Coal Company of Cape Breton, to return to work. At Springhill, N.S., however, the men still continued on strike. Outputs continued to increase during the month, and the outlook is for a heavy shipping season, the first steamer reaching Montreal, Que., in the third week of the month. The metal mines of the Eastern Provinces reported an exception-

ally early resumption of activity, and the outlook in Nova Scotia and New Brunswick is for a more active season than in several seasons past. In Quebec, the asbestos mines continued very busy. Shipments from the Cobalt camp amounted to 2,624 tons during March, compared with 2,113 tons in February. The annual report of the Nipissing Mines Company showed payments of dividends amounting to \$1,500,000, and an increase in earnings of \$775,000; the total shipments amounted to 6,412 tons, averaging 724 ounces of silver to the ton. The collieries of Alberta and the Crow's Nest Pass were producing steadily. On Vancouver Island there was a diminution of output as compared with the preceding months of the year. Metalliferous camps in British Columbia reported little change from March. The output of the British Columbia Copper Company, during January and February, was 1,339,707 pounds of copper, 15,151 ounces of silver, and 5,073 ounces of gold.

According to an official return, sales of Nova Scotia coal amounted to 4,615,713 tons in 1909, being 870,000 tons less than in 1908.

The seventh annual convention of District Union No. 18, United Mine Workers of America, was held at Fernie, B.C., during March. The annual report of the President dealt with the negotiations held with the Western Coal Operators, and the proceedings of the Board named under the Industrial Disputes Investigation Act. The subject of workmen's compensation during the year was also dealt with, and the question of the affiliation of the members of the district union with the Trades and Labour Congress of Canada. A review showing progress of the organization during the year was given. The Secretary-Treasurer's report showed total receipts to be \$54,576, the total average membership of thirty local unions in the district being placed at 4,429. New unions were organized at Edmonton, Lethbridge, Blairmore, Fraser Flats, Carbondale, and Cardiff; and unions at Merritt, Carbonado, Strathcona, Edmonton, Middlesboro, and Woodpecker went out of existence. An appeal was sent out during the year for financial

assistance to the widow and children of the late ex-President of the district union, Mr. F. H. Sherman; up to the present time the sum of \$2,624.80 has been subscribed to this fund.

The annual statement of the Dominion Coal Company shows that in spite of the extra expense incurred by the Company as the result of the strike, there should be sufficient earnings to provide for the bond interest, the interest on the preferred stock, and a balance left to be appropriated to common stock interests. The net earnings for the year were \$1,113,091. Out of this amount there was appropriated for renewals and repairs \$350,000, leaving a net balance of \$763,091.

Manufacturing.

Manufacturing activity continued steadily to increase. Nearly all establishments were working full time, with full staffs, overtime prevailing in some branches and localities. In many manufacturing centres a scarcity of skilled employes was reported. The supply of female labour, in particular, was at several points less than the demand, as at Toronto, Hamilton, London, Brantford, Woodstock, Ottawa and other centres in Ontario.

At the three beet sugar factories in operation last year, in Canada, 75,056 short tons of beet were treated, and 19,711,801 pounds of sugar produced. The Wallaceburg factory has given the highest returns to the growers of beets, although the per cent. yield of sugar was somewhat lower than at either of the other factories. The roots were an average yield of 7.46 tons, and the average value was \$43.83 per acre. At Berlin, the average was 6.09 tons, and the value \$25 per acre; and in Alberta 5.4 tons and \$27.07 per acre.

The incorporation of the Maple Leaf Milling Company, with a capital of \$5,000,000, being a consolidation of milling interests for the purpose of expansion, was announced. The mills controlled by the consolidation are situated at Brantford, Kenora, Welland, Thorold, St. Catharines and Port Colborne.

In 1909, there were manufactured in Canada, 4,089,191 barrels of cement, while 156,456 were imported. In 1900, 292,124 barrels were manufactured, and 374,966 barrels imported. The statistics not only represent a very large growth in the consumption of cement, but an increase in the proportion of Canadian cement used from forty-four to ninety-five per cent.

Railway Construction.

Work in connection with railway construction showed a marked increase in activity during April. Large numbers of men were recruited for employment in the camps throughout the summer, especially in Western Canada, the general market for labour at some points being depleted by the demand in this connection. A still further increase in the demand will occur in May.

Tenders have been received by the Commission for the supply of 24,733 gross tons of eighty-pound steel rails, together with the necessary splice bars, track spikes, bolts and nuts, nutlocks and tie plates. Tenders have also been received for the erection of a pump house at the locomotive shops near Winnipeg, the building to be completed by July 1; for the necessary pumping-plant to equip the same, and for the construction of a 2,000,000 gallon reservoir, to be completed by August 1. Tenders were received by the Commission to April 12, for the supply of the plant for the equipment of the locomotive shops east of Winnipeg as follows:—Machines and tools; leather belting; shafting; hangers; steel frame work, etc.; miscellaneous equipment; industrial track and lockers; motors; furnaces and forges; cranes; air compressors; grey iron foundry equipment and brass foundry equipment.

The following contracts have been let for construction on Canadian Pacific Railway western lines:—

From Forward, Sask., westerly for twenty-five miles, to McArthur and Dutton;

From Craven, Sask., to Colonsay, 110 miles, to J. Bradley;

From Outlook, Sask., northwesterly for ninety-three miles, to McArthur and Dutton;

From Macklin, Sask., southeasterly to a junction with the line from Outlook, fifty-four miles, to Janse, McDonald and Timothy;

From Carmangay, Alta., northwesterly for thirty miles to Foley, Welch and Stewart;

From Irricana, Alta., easterly for fifteen miles, to Foley, Welch and Stewart.

It is estimated that during the coming season the three principal railroads will spend \$30,000,000 in improvements and extensions through Western Canada. This compares with \$28,000,000 so spent last year.

General Transport.

The most important feature of the month was the opening of navigation at the earliest date recorded in several years past. The first transatlantic steamer arrived at Montreal on April 26. The first coasting steamer to arrive was on April 11; the earliest previous date was April 22. Canal and lake traffic became heavy in the closing week of the month. By order of the Inland Rate Association the water rate from Fort William to Montreal was lowered from five and one quarter cents per bushel to four and three quarters cents. The total rate for Canadian grain from Fort William to Liverpool is now 8.13 cents, by the all-water route; the rate via Buffalo and United States ports is 8.52 cents per bushel. Canadian shipping companies report space taken for some time in advance.

Railway traffic was much heavier than at the corresponding period of 1909. The handling of the influx of settlers increased the activity of railways, while the general volume of freight and passenger traffic was well maintained. Railway shops became very busy during April, some large orders for rolling stock having been placed.

A new all-water fast freight service between England and the head of the lakes was announced by the Canadian Northern Railway Company.

The half-yearly meeting of the Grand Trunk Railway Company was held at London, Eng., on April 14. It was announced that gross receipts had increased by £306,000, of which £237,000 came from freight and live stock traffic. There was an increase of £345,000 in working expenses. Referring to the progress of the Grand Trunk Pacific, it

was stated that by September next, 1,361 miles would be completed west of Fort William.

The Trades.

Building.—The outlook is for a very active building season. Permits issued in nearly all of the larger centres are greater in number and represent a higher estimated valuation than last year. The favourable weather enabled operations to be begun at an exceptionally early date and the outside trades had nearly all resumed activity at the close of the month. Carpenters were very busy, and additional men were in demand in some localities. Bricklayers and plasterers had not resumed full activity at some points, but were generally well employed.

Metal and woodworking.—These trades had an active month. Steadily increasing activity in industrial establishments rendered conditions and prospects much more favourable than a year ago.

Printing.—An active month was reported by the allied trades.

Clothing.—Tailors were busy and garment workers well employed. Boot and shoe workers had a good month.

Textile.—Woollen mills employes were more active than in several years past. Cotton mills were working steadily.

Leather.—Tanners and curriers had a good month. Leather workers of all classes were busy. Hides and leather continued firm. Crude rubber was higher in price than in several years past.

Food and Tobacco.—Bakers and confectioners were busy. Flour prices were firm. Ice delivery employes had begun their active season. Cigar makers and tobacco workers had a good month.

Miscellaneous.—Retail clerks, barbers, etc., reported favourable conditions. Laundry workers had a good month. There is a very active demand throughout Canada for domestic servants.

Unskilled labour.—The early opening of the spring season has rendered this class more active than at the corresponding period in several years past. The extensive railway construction, civic improvement and building operations projected have created an active demand for

the less skilled branches, and men were already scarce in several localities. The outlook is for an exceptionally active season for general labour.

Canadian Trade and Revenue.

Foreign trade.—During March, 1910, the total value of imports entered for consumption was \$43,391,991, compared with \$33,863,362 in March, 1909. For the first twelve months of the fiscal year ending March 31, 1910, the total value of imports entered for consumption was \$375,783,660, compared with \$298,123,792 in the fiscal year ending March 31, 1909. The total value of domestic exports during March, 1910, was \$22,199,275, compared with \$18,397,774 in March, 1909. The total value of exports for the fiscal year ending March 31, 1910, was \$279,211,537, compared with \$242,603,584 in the fiscal year preceding. In March, 1910, there was an increase in exports of the mine, the forest, animals and their products, agriculture and manufactures, and a decrease in exports of the fisheries. The grand total of Canadian trade for March, 1910, was \$66,564,208, compared with \$53,171,277 in March, 1909. For the fiscal year ending March 31, 1910, the total Canadian trade amounted to \$677,142,189, compared with \$559,635,951 in the previous fiscal year.

According to reports of Trade Commissioners received at the Department of Trade and Commerce, Canada, there is a market for Canadian confectionery in Cuba; Canadian trade with this island was reported as increasing, especially in paper, stone and potatoes. For Canadian products generally, but especially for apples and lumber, good openings were reported in Holland.

Imperial trade.—In Great Britain and the different Dominions of the Empire, openings for Canadian products were reported as follows:—

For Canadian lumber, steel ceilings, hardwood flooring, furniture timber and furniture, in South Africa. A ready market is reported in Australia for steel and iron manufactures, special machinery, gas engines, nail and fencing wire, tube piping, farming machinery and imple-

ments, tools of trade, shelf and heavy hardware, shovels, silver plate, lamps and lanterns, enamelled ware, chairs, furniture roll top desks, motor cars, musical instruments, carriage woodware, washing machines, oars, special lines of apparel, cotton ducks, drills, prints, denhams and piece goods, sewing silks, wall, news and writing paper, carbide of calcium, canned and (some) salt fish, breakfast foods, leather, rubber goods, oils, paints, lumber, such as spruce, clear and white pine, oak, ash, hickory and poplar.

Domestic trade.—Country trade was quiet, farmers being at work on the land, but the general tone among wholesalers was buoyant. Prices were generally firm. Shipments of heavy goods were on a large scale, the demand for builders' supplies being particularly active. Collections have been generally satisfactory.

Business failures totalled 426 during the first quarter of the present year, compared with 584 in the corresponding three months of 1909.

The March bank statement was favourable, every important item showing a gain over the previous month, especially under the head of Deposits and Current Loans. Circulation has expanded by nearly \$4,000,000.

Canadian revenue.—Canadian revenue for the month of April, 1910, amounted to \$1,731,287.18, compared with \$1,954,901.82 in April, 1909. The total revenue to April 30, 1910, was \$100,394,261.74, compared with the sum of \$85,055,427.36 to April 30, 1909. The total expenditure on capital account during April, 1910, was \$1,914,768.66, as against \$2,842,279.80 in April, 1909. The total expenditure to April 30, 1910, on capital account, amounted to \$33,376,455.11, compared with \$44,366,700.74 to April 30, 1909. The leading items of expenditure during April, 1910, were: Public works, railways and canals, \$1,662,900.86; bounties \$174,546.70, and militia, capital, \$63,352.02.

The revenue of the City of Toronto, for 1910, is estimated at \$6,868,755, an increase of \$787,223 over last year.

The annual revenue of the Province of Quebec was \$6,082,187, and the expenditure, \$5,962,761. Prince Edward Island

expenditure was \$407,441, showing a deficit of \$38,235.

Notes.

The Ontario Wholesale Grocers' Exchange held its annual meeting at Toronto, April 25-28.

The Montreal Light, Heat & Power Company have made a reduction of over twenty per cent. in the rate for residential lighting and of over ten per cent. in that for commercial lighting.

It was announced by the Honourable the Minister of Labour that an appropriation would be made by the Government of Canada for the purpose of securing the services of an efficient commission of investigation on technical education.

The organization of a federation of capital and labour in Montreal, was begun during April. The first step taken was the appointment of a committee of six employers and six workmen to prepare details to be submitted to a further meeting. A committee was also appointed to interview the principal public bodies and labour societies, with a view to calling public meetings to discuss the question.

Full details were published during the month with regard to the proposed harbour extensions at Montreal, Que., for which a loan of \$6,000,000 is being asked. The works will double the capacity and convenience of the harbour and will require about ten years to complete.

A commission of five will investigate the requirements of commercial and technical education in Toronto. The members of the commission are: Wm. Pakenham, B.A., Dean of the Faculty of Education in the University of Toronto, Chairman; Mr. R. H. Verity, General Superintendent of the Massey-Harris Company, these representing the Young Men's Christian Associations of the city; Mr. Frank Bancroft, a member of the educational committee of the Toronto District Labour Council; Mr. J. D. Allan, Vice-President of the A. A. Allan Company, representing the Board of Trade, and a member to be chosen by the Toronto Branch of the Canadian Manu-

facturers' Association. This action is the outcome of the recommendations of a joint educational committee of the Y. M. C. A.'s, with representatives of other bodies interested in the educational needs of young men.

The Honourable the Minister of Public Works for the Province of Quebec, introduced in the Legislature of that Province, during April, a bill respecting the working hours of women and children in certain factories. In cotton or woollen factories, no boy less than eighteen years old, and no child, girl or woman, shall, in accordance with the terms of the proposed Act, be employed more than ten hours in one day, or more than fifty-eight hours in any one week. The clause was suggested by the report of the Honourable Mr. Mackenzie King, C.M.G., as Royal Commissioner in 1907, to inquire into the conditions in the cotton mills, who dealt in his report with the unfavourable conditions of child and female workers which he found in certain of the factories in question. The Bill also forbids persons in charge of a theatre, or hall for moving pictures, where views are given by means of a cinematograph, or of any other establishment of a like nature to allow any child less than fifteen years of age, to

act or sing in such theatre, hall or establishment. This article does not apply to educational institutions nor to entertainments for charitable purposes.

A general militia order was issued from headquarters on April 5, with respect to military bandmen as follows:

The attention of the Department of Militia and Defence has been called to the fact that in certain instances, military bandmen have refused to take part in engagements with members of other military bands solely for the reason that they are not members of a recognized union of musicians. While the department does not intend to interfere in any way with the right of militiamen to join unions, yet as such bandmen are provided with uniforms, quarters, light and heat, and, in addition, grants of money from public funds are made to militia bands, it is not considered in the interests or the discipline of the force that military bandmen, while in uniforms, should be permitted to act in an unmilitary and improper manner.

No exception is to be taken on the score of membership or non-membership of military bandmen in any union or society, and no discrimination shall be made in consequence of such membership or non-membership, provided that such membership or non-membership is not allowed to interfere with the performance of military duties, or to prevent bandmen, when in the uniform of their corps, taking part in public or private engagements with other members of the militia in uniform, whether they are or are not members of any like union or society.

A man who disobeys this regulation is not to be permitted to serve as a bandsman, but must perform his military service in the ranks of his corps.

The allowance mentioned in Article 301, Pay and Allowance Regulations, shall not be paid to, or on account of, any band the members of which raise any objection to playing, when in uniform, with non-union members of the corps.

Commanding officers will be held responsible that this regulation is read to members of their units before they are detailed as bandmen.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

GENERAL activity prevailed throughout this district during April. All the large industries were busy, while smaller ones were more active than is usual at this season of the year. This is owing to excellent weather conditions, and the non-appearance of drift-ice on the coast.

The steel industry was very busy, and will continue so for many months, there being a heavy demand for steel products. Every department of the steel

industry at Sydney continued active. The large additions and extensive improvements being made to the plant were carried on rapidly, as it is the intention of the Company to increase the output by one-third. The steel plant at Sydney Mines was also very busy, and will continue active for many months to come, as the Company is well supplied with orders.

The usual activity prevailed at the collieries, and the output of April will be much the same as in March. The shipments of coal for the first four months of this year exceed those of last year by many thousands of tons. The mild winter being favourable to shipping enabled the coal companies to ship larger quantities than is usual during the

winter months, and less coal was placed in the heaps, though there are fairly large quantities banked at some of the collieries. The Dominion Coal Company continues to rapidly develop the Victoria areas, and within two years three collieries have been opened up. At two of these collieries modern bank-heads have been built, and surface plants erected. Another colliery will shortly be added in that district.

The Sydney Mines collieries were active during the month, and fairly large outputs were obtained. The opening up of new collieries has largely added to the amount of coal produced in the Sydney Mines district, and if work continues uninterrupted, this Company will show a very large increase at the end of the year. The Inverness collieries were not so active as usual, but will have steady employment after the first of May.

More than the usual amount of outside work was done during the month, especially towards the latter part of it, as the season seems to be about three weeks earlier than last year. The building trades were quiet, but will soon have a fair amount of work in Sydney. At North Sydney and Sydney Mines a number of workmen's houses will be erected. Transportation by rail was fairly heavy and shipping at the various ports was active. Wholesale and retail trade was normal. Unskilled labour was plentiful.

There is considerable unrest throughout the mining districts of the Province, but conditions are gradually improving.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather was favourable to farming, and considerable activity, in the way of fencing, plowing, and fertilizing was carried on during the latter part of April.

Fishing.—Fairly large catches of herring were obtained, and the fishing fleets brought in large quantities of mackerel. Bait is reported scarce.

Railroad construction.—About the last of the month, work began on the new railway, from George's river to Sydney Mines and North Sydney, by way of

Little Bras D'Or, and thence to Sydney. The new route to Sydney has been selected, because of the easier grades.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month was busy. Shipments from the collieries in this district, in March, were about equal to those of February, namely, about 41,000 tons. Being about 4,000 tons increase over the corresponding month of 1909.

The total increase in the shipments of coal from the various collieries throughout the Province, for the three months ending March 31, 1910, is about 200,000 tons over that of the same period in 1909. The manufacturing industries were busily engaged and the outlook for a continuance of the same is very good. The supply of labour is at present equal to the demand, but there is an advertisement in the daily press calling for drillmen, lumbermen and helpers to work as miners at the Torbrook Metalliferous Mines, Annapolis county, Nova Scotia.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This industry is entering on the busy season, spring work, seeding, etc.

Fishing.—Fishing has commenced. Good catches of herring are reported, retailing at twelve cents to twenty cents per dozen.

Lumbering.—This industry is at present quiet.

Manufacturing.—The different industries are, with few exceptions, actively engaged. The Sutherland Rifle Sight Company has resumed operations, after some months of inactivity, it has secured a large order for the improved sight.

Mining.—Up to the present time, this industry has been generally busy, maintaining the usual output. The Acadia Coal Company's management

has posted up notices to their employes, that on or about the fifteenth day of May there is likely to be a reduction in the number of men now employed at the collieries. The notice states that any men, who in the interval can secure employment, should take it. Slack trade is assigned as the cause of the change.

CONDITION OF PARTICULAR TRADES.

The skilled trades were well employed. For unskilled labour the supply has been fully equal to the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month has been rather dull. Rainy weather prevailed, and outside operations were considerably interfered with. Work on the Post Office progressed towards completion, as did the new school. Exterior and interior work on the new cathedral was advanced several stages, while there remains but little to do on the Royal bank alteration. There were several permits issued for new dwellings and alterations to several now erected. The largest contract now spoken of is the new Y.M.C.A. building, for which upwards of \$100,000 have been subscribed. Tenders were asked for the erection of this edifice, but it is understood that the figures submitted were in excess of the amount of cash on hand; and it is said modified specifications will have to be issued, or a supplementary subscription list opened.

Work along the water front has been fairly plentiful. At times the arrivals of immigrants made conditions active, but labour was always available to handle either freight, baggage or mail.

As indicated some months ago, the arrivals of immigrants at Halifax has been very heavy. During the season

of 1908-9 the total reached 16,343. The arrivals during the season of 1909-10 were:—

November.....	1,991
December.....	3,300
January.....	2,305
February.....	3,478
March.....	11,675
Up to fourth week in April....	10,334

33,083

In addition to the above, the officials reported that there were enough immigrants booked to arrive before the close of the season to bring the total up to 37,095, which is 20,752 in excess of last season. The new settlers were brought by the Allan, North-West Transport, White Star, Dominion, Canadian Pacific Railway, Red Cross, Plant, Pickford and Black's and Plant lines. The number detained and deported was about 1,300

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The following are wholesale quotations prevalent near end of month:—

Fishing.—Local fishermen made but small catches. Some big hauls were brought in from the Western banks, four schooners arriving in one day, their cargoes totalling 90,000 haddocks and 8,000 halibuts. There were some large exportations of live lobsters to the United States. The result of the large arrivals of fresh fish caused a slight fall in prices in local markets.

Lumbering.—Lumbering was more active than usual.

Mining was quiet.

Manufacturing was brisker than in March.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull. Carpenters and joiners were fairly active. Lathers and plasterers were fair, the season considered. Painters had a fair month, but were retarded on outside work by rainy weather. Plumbers were fairly active. Stonecutters and build-

ers' labourers were dull. Electric workers and boilermakers had a fair month; other metal lines were about normal.

Printers, pressmen and bookbinders were busy. Tailors showed decided improvement over last month. Boot and shoe makers had a fair month. Butchers and meat cutters were busy. Barbers had an active month. Railroad men were well employed. Longshoremen had a fair month. Unskilled labour was dull.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is a steadily upward tendency in the labour market. Industrial conditions are improving, from month to month. No building boom is expected this year, but the town will more than hold its own. There is not an idle workshop in town. Every factory is rushed with orders, and more men are employed at present than at any previous year, since the summer of 1907. For the three years previous to that date the town had a phenomenal growth, adding three thousand to its population in as many years. Then came the stringency in the money market, that hampered industrial development, but the crisis is over and conditions have again become normal. Industries that were idle or working short time are now working at their full capacity. Many of them have added to their list of employés, and the most optimistic feeling prevails.

The Canada Electric Light Company was acquired by the Maritime Coal Railway and Power Company; the selling price was in the vicinity of \$90,000.

The Maritime Gypsum Company, at Amherst Point has greatly added to and improved its plant during the past month. The Amherst Worsted Company has added many new machines.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The spring has been very advanced, the earliest for years. The

grass is already high enough to pasture cattle and if the favourable weather continues the seeding will be exceptionally early.

Fishing.—The lobster season opened on the twenty-fifth instant and the catch so far has been of the most encouraging kind. The lobsters are very plentiful and are larger than usual.

Lumbering.—The past winter was not favourable to lumbering operations. There was but comparatively little frost in the woods, the snowfall was light and rain fell in abundance, interfering with cutting and hauling. Stream driving too has been difficult as there have been but few freshets, and in the small streams there are many logs that will have to be hauled to the mills instead of floated down the rivers. The market, however, is good, prices are high and the lumbermen are far from being discouraged.

Manufacturing.—All industries are working actively, many of them working overtime. More men are now employed than for any time during three years.

Mining.—The strike at Springhill still continues, but the other collieries are active. The Maritime Coal Railway and Power Company is preparing for extensive improvements to the railway line this summer. Plaster quarrying is now an important industry, employing about eighty men, and shipping products to the New York market.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have had but little employment. Carpenters and joiners were fairly well employed, but reported no demand for extra help. Painters and paperhangers were busy, but stonecutters had but little work. Iron moulders were well employed, and iron workers and helpers were steadily at work. Machinists, electrical workers and linemen were busy. Blacksmiths have had steady work, and boilermakers were steadily employed. Woodworkers were very busy, but upholsterers reported work dull. Carriage makers were busy, and car builders were better employed than at any past period in three years. Printers were busy, with pressmen all

working. Journeymen tailors were all busy, with garment workers and boot and shoe workers steadily employed. Butchers and meat cutters report work steady. Trunk and bag makers were very busy. Barbers were busy, with clerks and stenographers well employed. Furriers were dull. Conditions have improved among unskilled labourers. All anxious for work can obtain it, but there is no demand that the local cannot supply.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With the advent of spring and the early opening of navigation on the St. John river, business in all lines has been good. In the building trades, especially with carpenters, trade was prosperous, overtime being resorted to to complete the improvements going on in various establishments before May 1.

Nearly all the mills started sawing the first of the month, giving employment to a large number of men. Hilliard's mill will commence sawing May 7.

There have been filed at the Customs' house, to April 26, cargoes for 108 steamers, the total number of sailings last year. The total valuation of last year's shipments was \$23,877,707, against \$22,073,177 for the 108 cargoes sent this season. There are four cargoes yet to forward, which will bring the valuation near to that of last year. During the season just closing, the steamers of the Canadian Pacific Railway line landed at St. John 20,489 passengers, nearly all for Canada. The total grain shipments for the season of 1909-10, through the Canadian Pacific Railway elevator, amounted to 6,150,000.

Bank clearings for the five weeks ending April 28, were \$6,863,957, and for the corresponding period last year, \$6,077,919, being \$786,038 greater in 1910 than in 1909, and \$1,440,264 in excess of the four weeks ending March

24, of the current year. Deposits at the Savings Bank during the year ending March 31, amounted to \$635,-941.16, and the withdrawals \$800,426.04. During the month of March the deposits were \$67,063.25, and withdrawals \$72,151.66. The city cashier paid out, for the four weeks ending April 29, the sum of \$17,685.89, as follows: Official, \$9,852.74; labourers, \$7,833.15. The exports for the United States cleared at St. John during the quarter ending March 31, show a net decrease of \$160,000, the totals for 1910, being \$634,103.95, and that for 1909, \$694,833.03.

A strike of about 120 men took place, April 12, at Stetson & Cutler's mill at Indiantown. A ten per cent. increase on their present wages, which range from \$1.35 to \$2.00 a day, was demanded, and this being refused the men quit work. After being out eight days the men resumed work, having been granted the increase asked for.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The annual meeting of the Tobique River Log Driving Company was held at Fredericton, on April 6. The contract for getting out the Corporation drive for the next three years was awarded to J. D. McLaughlin, of Red Rapids, Victoria county. It is expected that about 27,000,000 feet of lumber will be driven on the Tobique this year.

The annual meeting of the St. John River Log Driving Association was held at St. John, on the sixth of April. Reports were submitted showing that last year's operations amounted to 112,000,000 feet of logs.

With all the logs out on Bay du Vin, Nappan, Black river, Bartibogue, Tabusintac and Tracadie, and the logs in the Northwest branch of the Miramichi running into the booms at the rate of seven million feet daily, the driving season is coming to an end, with a new record for an almost complete clean out and quick driving. On the Bay du Vin drives, three large drives totalling ten million feet were brought down in thirteen days and only a small quantity

of hardwood remains to be brought down. The upper drives are always later.

The recent heavy rains swelled all the rivers and streams, and the prospects for lumber driving were never better. Local merchants are receiving good prices for lumber, and reports indicate that the season will be a good one. Last year, about \$14 was received for gang-sawed deals, while this year as high as \$16.50 had been received by St. John shippers.

CONDITION OF PARTICULAR TRADES.

The various skilled trades were from active to busy, with unskilled labour active.

DISTRICT NOTES.

Sackville.—Upwards of forty men will be employed during the summer in the freestone quarry, and the stone sawmill will be kept running night and day.

St. Andrews.—The Algonquin hotel annex is being rushed to completion. The new wing will give ninety-six additional bedrooms. This town has not been so full of busy workmen for twenty years as it is at present.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has been dull, though not more so than is usual at this time of the year. The men are out of the woods and work generally, has not commenced. Some of the mills are now running as the river opened much earlier than usual. The water was at first very low in the streams, but this has changed with rain every day for a week, and there is now plenty of water for driving logs. The mills will be running soon and building operations will be brisk by the first week of May. Wages will be about the same as last year.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons are not busy yet, but carpenters and joiners are commencing their summer work. Already one or two new houses are started. Painters and paper hangers are busy; painters are hard to get at present. Plumbers are also busy. Machinists and engineers are in demand, getting the mills and steamboats ready for work. There are three new boats nearly ready to launch.

CONDITION OF LOCAL INDUSTRIES

Agriculture.—There is little activity yet in this section. Little seeding is done until the fifteenth of May. At the present time there was never a better prospect for hay.

Lumbering.—Prospects are good. The cut was about the same as last year. Prospects for driving were never better. The price of sawn lumber is firm.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions were more active in April, compared with the previous month. Mild and rainy weather prevailed, and the season was fully fifteen days earlier than usual. Navigation opened earlier, the ferries between Lévis and Québec crossing the river on April 18, and the first coal steamer, the *Wobun*, from New Glasgow, N.S., arriving on April 9. The steamer *Iona*, from Middlesboro, with a general cargo, for Quebec and Montreal, arrived in port on April 25, being the first vessel this season from Europe. The steamer *Athenia*, from Glasgow, arrived on April 26, being the first passenger ocean vessel. The *Athenia* brought out 270 cabin, and 350 steerage passengers; she also brought 103 horses, one pony and fifty-one prize cattle. The Richelieu and Ontario Company's steamer *Quebec*, the first passenger boat from Montreal, arrived at Quebec on April

15. Two new ferry boats for the Levis Ferry Company, Limited, were successfully launched during the latter part of the month. They were constructed during the past winter at the shipyards of Messrs. G. T. Davis & Sons, at Lauzon, Levis. All the buoys in the south channel, below Quebec, were placed in position this season, on April 5; this is believed to be the earliest on record. The new Post Office, St. Roch, was completed and will be in service in the first week in May.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were quiet, very little work having as yet been done in the fields.

Lumbering.—The cut of lumber will about equal that of last year. The drive was at its height, the men receiving the same rates as last year.

Manufacturing.—A new rubber factory is to be started in Limoulou, the recently annexed suburb.

Railway construction.—The new road on the North shore was being pushed forward rapidly. The Quebec Municipal Council will take action to have the Canadian Northern Railway to rebuild its workshops in Quebec.

CONDITION OF PARTICULAR TRADES.

Bricklayers, stonecutters and builders' labourers were active; the other building trades were busy, with the exception of plumbers, who were quiet. Blacksmiths were active, but electric workers and linemen were quiet; the other metal trades were busy. Bookbinders were active and printers and pressmen very busy. Boot and shoe workers were active, journeymen tailors and garment workers were busy; glove makers were quiet. The food and tobacco preparation, and the leather trades, with the exception of tanners and curriers, who were active, were quiet. Railroad and street employés were quiet, as were also cab drivers and carters. Steamboat men were busy, but teamsters and expressmen were dull. The supply of unskilled labour was in excess of the demand, but if all the con-

templated improvements are carried out there will be a large amount of labour required by the city this summer.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during April was in good demand, more so than in any corresponding month of the previous year. This was due to the fact that the season was about one month ahead, so that building and farm work was proceeded with, and there was an active demand for men. Building operations have started, and several large contracts have been let. On the main street of the city, J. S. Mitchell & Company broke ground for a large business block. It will be three storeys high, in which a large wholesale and retail business will be carried on. A new hotel has just been completed, and work has been begun on a large addition to another hotel. The building trade will be busy throughout the season, for, in addition to several extensions in the business centre, several of the industries that located here but a short time ago have decided to extend their shops. The newly organized Street Railway Company has given out the statement that the contracts for the development of power, and for the extension of the line of railway will be awarded during the first week in May. Taken as a whole, there should be no idle men, skilled or unskilled, around Sherbrooke during the season of 1910.

The machine shops are running full time. In some instances, more men are being taken on, as there is a rush to get out machinery. At the Jenckes Machine works, one of the largest crushers ever built in the world, is under way. The casting came out all right, and the machine men are now getting it ready for shipment.

One of the largest lumber deals in the Eastern Townships was concluded

on the last day of the month, by which the Brompton Pulp and Paper Company took over the timber limits and mills of the Champoux Company, in the Central Quebec district. They extend to about 18,000 acres, besides the mill properties. The actual price will be decided by two arbitrators who are now at work. \$200,000 was paid over, and the balance will be paid when the final report is made. This Company gives employment to a large number of men at Brompton and East Angus. At the latter place, ground has just been broken for a new ground pulp mill, which, it is expected, will be finished and in operation this fall.

Wholesale houses, who have men out in the west and east report business exceptionally good. Orders have been coming in so that the staff of employés has had to be augmented. Retailers report business as good. As showing the value of real estate, a small property changed hands at the price in the neighbourhood of \$15,000. Twelve months ago it went for between \$9,000 and \$10,000. There are some real estate owners in the city, to-day, who transferred the same building for \$3,000.

There has been no change in wages or hours during the month.

Agriculture.—Work is well advanced, and in the majority of cases crops are in the ground much earlier than usual.

Lumbering.—The various drives have been secured in good season and without much loss. The sawmills, dependent upon the logs coming down are running to the limit.

Mining concerns are fully engaged. The properties that have to close down during the winter are again starting up, and there is much activity in this direction.

Railroad construction and employment.—The Canadian Pacific Railway has started a large gang here and work on the new buildings has started.

CONDITION OF PARTICULAR TRADES.

The building trade is busy and will be so for some time to come. Moulders, machinists, and all classes of labour

in machine shops are busy, and each department is running full time. Electrical workers, linemen, and blacksmiths are active. Jewellery workers are busy. Woodworkers and all allied trades are busy. Carriage and wagon builders are busy. The printing and allied trades are active. Journeymen tailors are busy, and in demand. Garment workers are busy. Bakers and confectioners are active, while cigar makers are more so than for some time past, the orders from the West being heavier than for some time past. The miscellaneous trades have had a good month. Railroad men are more in demand, and as extra trains are being put on there is considerable more activity. Unskilled labour is busy, and in good demand.

DISTRICT NOTES.

Danville.—The Chair and Specialty Company is running its sawmill department day and night, in order to cut the hard wood before the warm weather comes on. About 25,000 feet of lumber are being sawn daily.

Magog.—Meetings are being held for the purpose of discussing the establishing of a co-operation grocery store.

Coaticook.—When many are complaining of the dullness of trade, the Coaticook Woollen Mills Company is working to full capacity and buying all the wool that can be secured.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions during April compared favourably with those of March, and were better than the corresponding month of last year. The factories were busy. The building trades are showing signs of activity. The last week saw the arrival of the first steamer, loaded with a cargo of bituminous coal, and the loading of canal boats with pulp-wood for exportation.]

Commercial activity showed an improvement over March, both in wholesale and retail circles. Rates of wages and hours of labour remain the same. No strikes or lockouts were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy plowing and sowing.

Fishing.—Very little fishing was done in April.

Lumbering.—Lumber firms are getting their mills in working form for the sawing season, and are expecting the logs soon.

Manufacturing.—Factories were busy this month.

Railroad construction.—Railroad construction was rather quiet, except on the St. Maurice Valley Railroad between Shawinigan and Grand Mere.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers and plasterers, were fairly employed. The painting, decorating and paperhanging trades were becoming active at the close of the month. Plumbers were fairly busy on repair work, but stonecutters and builders' labourers were quiet. Iron moulders, workers and helpers were dull. Machinists, engineers, electrical workers and linemen were fairly busy. Blacksmiths were active. Horse-shoers had a fair month. Bicycle workers were very active. Woodworkers were active. Carriage and wagon makers were busy, but pattern makers were quiet. Printers reported steady and fairly active conditions. Journeymen tailors and garment workers were active; glove makers also; and boot and shoe workers were fairly employed. Bakers were active. Butchers and meat cutters had a quiet month. Cigar makers and tobacco workers were active. Leather trades were rather dull. Barbers were active. Clerks and stenographers were steady, Hotel, restaurant and theatre employés were busy. Laundry workers were active. Freight and passenger traffic are both becoming more active. Freight handlers were busy, and teamsters and express-

men were fairly employed. The demand for unskilled labour is still light but is up to the average for this season of the year.

DISTRICT NOTES

Shawinigan Falls will have a cotton factory. Work has started on an extensive factory building.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in April was favourable. Building trades were still quiet, in spite of a more active season than in 1909, there being more buildings planned and several under way. The supply of labour, however, was equal to the demand. Woodworking establishments were active, and the metal trades had a good month. There was a little less activity in the boot and shoe industry than in March; stock-taking will commence about the middle of May, and manufacturers are trying to fill orders on hand. Activity continued in the leather industry, and the prospect is good. Woollen mills and corset and ladies' wear factories had an active month. Wholesale and retail dealers had a fair month. Banks reported a good month. There was no change in the hours of labour, or rate of wages, and cordial relations continued to exist between employers and employés. A new factory is to be established, a bonus to that effect having been voted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The main occupation in April was the marketing of farm products. The price of meat has increased, and that of dairy products has shown a tendency to rise. The maple sugar season was very fair. Farm work has become active, but the demand for farm labourers has been limited.

CONDITION OF PARTICULAR TRADES.

Painters were in great demand. Plumbers and stonecutters had fair employment. Active conditions were reported among iron workers, iron moulders, machinists, engineers, boilermakers, blacksmiths and horseshoers. Woodworkers had an active month. Active conditions prevailed among printers. Journeymen tailors and garment workers had a satisfactory month. Boot and shoe workers were dull. Butchers, bakers, confectioners and ice handlers were active. Active conditions were reported among the leather trades. Miscellaneous trades had a busy month.

Railroad employes, carters and draymen had a good month. Unskilled labourers had a good month, work being plentiful. The supply, however, was equal to the demand.

DISTRICT NOTES.

Sorel.—Great activity prevails in the harbour of Sorel, where the hundreds of vessels which wintered there are receiving the finishing touches. Almost three thousand sailors from all parts of the country will be placed on the various vessels. A stone lifter, built at the Government yards during the winter was successfully launched. The hull is built of steel, and has a length of 125 feet; it is provided with machinery to crush the rock in the bed of the river. Dredge No. 19, which wintered in the St. Joseph navy-yard, has been launched. Important changes were made to the hull as well as to the machinery. The vessel will be used on the lower St. Lawrence.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

On account of the early spring, work is active in all branches. The prospect is that the season of navigation will be

more active than last year. Several canal boats from the United States have already arrived, some of them unloading in the harbour. The dredging fleet has commenced deepening the Richelieu. Work has been resumed on the Canadian Pacific Railway bridge, having been suspended for some time, on account of the high water. Active preparations are being made to build the new iron bridge for teams and pedestrians, which will be free to the public, both municipalities having made arrangements with the Government to that effect.

The new works of the steel pipe company are almost completed, and machinery is being installed. Factories are all working steadily, and several have taken on additional hands. Wholesale trade is firm, while retail trade is fairly active. Bank clearings show an increase. There has been more money deposited in the banks than during the same month last year.

There has been no change in the rate of wages or hours of labour. Harmony prevailed between capital and labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are very busy seeding, and farm labourers are in good demand. Farm products are getting scarce in the market.

Fishing.—The price of fish has gone up. Richelieu river fish is in great demand on the American market.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were fairly well employed. Carpenters and joiners were very active, in consequence of the great amount of building going on. Lathers and plasterers reported a fair month. Painters and decorators were active and in good demand. Plumbers and steamfitters were in good demand. Stone cutters were active. Builders' labourers reported a good month. Iron moulders, iron workers and helpers, coremakers, machinists, engineers and mechanical engineers reported a good month. Electrical workers and linemen

reported a good month. Tinsmiths, tool sharpeners, horseshoers and jewelers all had a good month. Upholsterers, varnishers and polishers, wood carvers, were all well employed. Carriage and wagon makers, car builders, pattern makers and coopers reported a good month. Printers, pressmen, electrotypers and bookbinders had a good month. Journeymen tailors, garment workers and hat and glove makers were fairly active. Bakers and confectioners, butchers and meat cutters, and ice cutters and drivers reported a good month. Barbers, clerks, stenographers, delivery clerks, furriers, hotel, restaurant, theatre and laundry employés were active. Railroad conductors, engineers, firemen, telegraph operators and trainmen were well employed. Switchmen freight handlers, steamboat men, ship labourers and longshoremen were all well employed. Cab drivers, hackmen, carters, draymen, teamsters and expressmen reported a good month. Unskilled labour was well employed.

MAISONNEUVE, QUE. AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Compared with the preceding year and with the corresponding month a year ago, there was a great improvement in the condition of workmen, especially in the building trades. The supply, however, is amply sufficient to meet the demand, though the number of unemployed is rapidly decreasing. Building operations will be exceptionally busy this year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There are hardly any farmers in Maisonneuve, but those who follow that business are prosperous, and are well advanced in their preparations for seeding.

Manufacturing.—All the mills and factories are in full operation and from active to very active.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, and all the building trades are commencing to be busy. The number of unemployed in that branch is rapidly decreasing. Some trades, such as painters and decorators, are in demand. The metal trades, were a little more active than in March. Woodworkers were busy, with upholsterers active, varnishers and polishers in demand, wood carvers quiet, carriage and wagon makers in demand, car builders very active, pattern makers fair, and coopers busy. Almost all the men in the printing and allied trades were in demand, and getting fair wages. Journeymen tailors were in demand, garment workers fair, hat and glove makers fair, and boot and shoe workers very active. Bakers were active, confectioners a little more active than during the month before. Butchers and meat cutters were well employed. Ice handlers were a little more employed. Cigar makers and tobacco workers were fairly active; they were in demand in some factories, without this having the effect of increasing wages. The leather trades were fairly active. Barbers were very much in demand. The other miscellaneous trades were from fair to good. Transportation trades have been more busy since the opening of navigation. Good cab drivers are in demand. Street railway employés were very busy and have received a voluntary increase of one cent per hour in their wages. Unskilled labour is beginning to be fairly active. There are still, however, many unemployed.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Building operations in Montreal are rapidly increasing in activity, and the year promises to be prosperous. There were in April, 100 more permits taken out than in the same month last year, and the amount represented was

\$676,804, or almost double that of April, 1909. Customs receipts were nearly \$20,000 more than during the same month, last year. Bank clearings continued to show a steady increase.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There was much activity on preliminary work.

Manufacturing was active during the month.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, painters, decorators and paperhangers, and gas and steamfitters were active. Carpenters and joiners, lathers and plasterers, plumbers and stone cutters were busy. Builders' labourers were quiet. Iron moulders, iron workers and helpers, machinists and engineers, metal polishers, buffers, platers, brass workers, sheet metal workers, blacksmiths, boilermakers, iron shipbuilders, jewellers and watch case makers were busy. Steam engineers, electrical workers, linemen and horseshoers were active. Shipbuilders, shipwrights, caulkers and tool sharpeners were quiet. Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, car builders, pattern makers and gilders were busy. The printing and allied trades were busy. Journeymen tailors, garment workers, hat and glove makers were active. Boot and shoe workers were busy. Bakers and confectioners, butchers and meat cutters were active. Ice cutters and drivers were quiet. Cigar makers and tobacco workers were busy. Tanners and curriers, leather workers and saddlers were busy; trunk and bag makers were active. Barbers, clerks, stenographers, delivery employés and furriers were busy. Hotel, restaurant and theatre employés and laundry workers were active.

Railroad employés were active, as well as street railway employés. Steamboat men and steamboat firemen, ship labourers and longshoremen were quiet. Cab drivers, hackmen, carters and draymen were busy. Teamsters and expressmen were active. Unskilled labour was busy.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Fairly good conditions prevailed in the labour market during April, and although the approach of the active season has brought to Hull an influx of population, demands for mill hands and unskilled labour were very brisk. All lumber, pulp and paper mills have been running steadily for a couple of weeks. Fraser's sawmill at Aylmer, has the same number of hands at work as last year. The MacLarens, of Buckingham, Que., have sold their business to a syndicate, and it is expected that the latter will lose no time in further developing the industry. The cement works were busier than in March; orders are plentiful and prospects encouraging for the employés. The rumours circulated that the merger was going to close up the Hull plant applied to the business which was in Ottawa; its closing does not affect the Hull works. There was no question of change in the wages. Those engaged on blue fleet of the Ottawa Forwarding Company have applied for a readjustment of their scale, allowed for the purchase of food. Those at present employed in the completion of the sewer, from Lake Flora to the Ottawa river will have work all summer. The building trades were active, the scale of wages being the same as last year.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The opportunities for employment of unskilled labour were increased in April, this year, as compared with other seasons, by the starting of sawmills in the Ottawa Valley from two to three weeks earlier. Wages are practically the same as last year, ranging from \$1.50 to \$2 per day for

ordinary hands. The building permits for April, promise to exceed those for the same month in 1909. Statistics for March, show a gain of thirty-four per cent., totalling \$220,000. The corporation is giving work to 100 carters, forty of these being an extra spring gang for scavenging. Business activity is evidenced by the enlargement of several of the leading stores. Rents have advanced in the centre of the city owing to the demand for desirable quarters. Freight shipments are heavier than a year ago, and wholesale trade brisk. Hotels and restaurants are confronted with a difficult problem in the high prices for foods. Advances in the wages paid in several branches of labour indicate the trades that are busiest. The city of Ottawa increased the pay of carters from \$2.25 to \$2.50 per day, for men with horses and carts. Men with teams received an increase from \$4.32 per day to \$4.50. There are 100 carters and thirty-five teams at present employed. The Ottawa Gas Company increased the wages of fourteen stokers from \$15 to \$16 per week. A staff of sixteen waitresses and helpers in a restaurant received an advance of from \$12 to \$16 per month (board and lodging additional). An agreement covering five years was entered into between forty-eight pressmen and some eighty assistants with the master printers, establishing a scale of wages better by from \$2.50 per week upwards, than the one previously in existence. Owing to the fact that nearly all the printing pressmen were paid in excess of the old scale, the new scale increases wages only in some isolated cases. Cylinder pressmen, and pressmen on one cylinder and three platens for the year starting April 18, 1910, are insured a minimum of \$17.50 per week. The wage rises gradually to \$19 per week at the end of five years. Platen pressmen run from \$15 to \$16.50 in the five years; cylinder feeders from \$9 to \$10; pony feeders from \$7 to \$8. A clause requires that feeders, cylinder and platen pressmen apprentices must have served four years to be entitled to the wage stated. The newspaper proprietors agreed with the pressmen on a five-year scale, working up from \$17.50 to \$20 per week. First assistants grade

up from \$11 to \$13, and second assistants, from \$7 to \$9, during the five years. The old scale called for a fifty-four hour week. The forty-eight hour week came in some time ago, and it is provided for in the new agreement.

There is some unrest among the conductors and motormen of the Ottawa Electric Railway who have requested a nine-hour day and twenty-five cents an hour. The Company has offered an increase, but no settlement has yet been reached. The building trades appear to be satisfied with agreements which maintain the rates of wages paid last season.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm work in the Ottawa Valley is a few weeks ahead of the average season on account of the early break-up. Heavy, warm rains advanced the pastures, but dairy products remained scarce due to the small herds of cattle kept by farmers, who, in years when meat was cheap, would have many more cows. Farmers are benefiting from the high rates for eggs, pork, beef and butter.

Lumbering.—Lumbermen started sawing three weeks earlier than last year. The demand for the best qualities of white pine stock has sent prices \$8 or \$10 above those of last year. Manufacturers expect a good year.

Manufacturing.—Paper making is helped by abundant water power. Brick manufacturing is very brisk and several yards are sold out.

Railroad construction.—Incorporators of the Kingston, Smith's Falls and Ottawa Railway Company, and promoters of the Ottawa, Rideau Valley and Brockville Railway propose to start operations soon. The Grand Trunk Railway Company plans to have its new station in Ottawa finished in October, and the new hotel, next April. The Ottawa Electric Railway Company has given an order to the Ottawa Car Company for eight new cars.

CONDITION OF PARTICULAR TRADES.

A brisk demand prevailed for builders of all trades. Paper hanging, painting and decorating contracts were delayed by scarcity of help. Stone cutters are least

affected by the building activity. The Ottawa Electric Company and the Municipal Electric Commission report briskness among linemen and electrical hands. Bicycle workers, carriage makers and car builders were very busy. Engineering and metal trades were all active. Wood workers on house furnishings and upholsterers were busy. Linotype operators and pressmen were in demand. Harness shops have many orders ahead and expert hands on piece work are sought. Dairy and bakery employes, and butchers were steadily employed. Express and railway hands were rushed and, in some quarters, had exceptionally active employment, for the season. Unskilled workmen, though proportionately more plentiful than most of the other branches of labour, were well employed. The early opening of the sawmills helped this class. The demand for unskilled female help in garment factories, hotels and restaurants was unusually active. There is an extreme scarcity of domestic help.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity characterized every department of the labour market during the month of April. While from special causes there were a few cases of idleness, the opportunities for employment were abundant. The number of building permits issued to date indicates a heavy season's work for the various lines in the building trades. The new building being erected by the Kingston Shipbuilding Company made rapid progress during the month and is nearing completion. The new building at Queen's University, the corner stone of which was laid by Sir James P. Whitney, on the twenty-seventh, is being rushed along rapidly. Many other important buildings were started during the month. No serious difficulties have arisen between the various contractors and their men. A copy of the plans for the addition to the Kingston post office have been received. On April 20, excavation was started for the first concrete

walk. This is a month earlier than usual. In the federal supplementary estimates provision is also made for an expenditure of \$10,000 for additional dormitory accommodation for the cadets at the Royal Military College.

The amounts of the various tenders for the new metallurgy building at Queen's totalled nearly \$60,000, whereas only \$40,000 is at the disposal of the governors. As it is deemed unwise to erect a smaller building than the one specified, an effort will be made to secure the additional amount required. The annual meeting of the subscribers of the School of Mining was held on the twenty-fifth. Reports were presented showing that there were 321 students registered for the engineering courses, and 344 in the other courses, making a total of 665 students.

During the month a new livery stable was opened. Local railway offices report that a large number of people from Kingston and district have left for the West. Notwithstanding the fact that over 100 new dwellings were erected last year, there has been a general increase in rents this spring. Houses that formerly rented at \$13 are now rented at \$15. Increased cost of labour and material, as well as a slight increase in taxes for local improvements, etc., are assigned as the cause.

There were no strikes or lock-outs, or changes in the rates of wages, or hours of labour reported during the month. Several important meetings conducted by the Trades and Labour Council, were addressed by prominent labour leaders. As the result of a collision between a Kingston and Pembroke railway train and an electric railway car at the diamond crossing on Montreal street, on Friday, April 22, a conference was held by representatives of the Kingston and Pembroke Railway Company and the Street Railway Company, on April 23. The object of the meeting was to devise means of preventing another mishap, and to adopt some contrivance to make the lines absolutely safe for the travelling public at all times, on both lines.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in this district report very active conditions, and farm

help is in great demand. Everything is making fine progress, and prospects are good.

Fishing, lumbering, manufacturing, mining, railroad construction and other industries had an active month.

CONDITION OF PARTICULAR TRADES.

All branches of the building, metal, engineering, shipbuilding and woodwork-ing trades reported an active month.

Printers, clothiers, bakers, butchers, ice cutters and drivers, cigar makers, tanners, carriers, barbers, broom makers, clerks, delivery employés, furriers, hotel, restaurant, theatre and laundry workers, unskilled labourers, as well as all branches of the transportation business were active.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows;—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally, has been well employed, although there were not so many men employed in building operations this month as during the same month last year. Manufacturing industries, however, were very active, a number of factories having to work overtime. During the latter part of the month, labourers were in good demand, and from now on work will be plentiful in nearly all trades. Tenders were given out for a sewerage system, which will give employment to a large number of men, and by next month several other works will be under way. The Canada Cement mill is running night and day, with about 500 men employed. The extension to the county buildings, at a cost of \$40,000 was concluded this month, as well as the new power transmission building for the Trenton Electric and Power Company, which has put the price of power to \$20 per horse-power. The Belleville Iron and Horseshoe Company has added a number of skilled men, and is now running to full capacity.

The local Brass and Steel Goods Company started a \$15,000 addition to its new factory, while the Belleville Hardware Company can barely keep up with orders. Canadian Northern Railway engineers have been busy all month taking different surveys of the proposed line with this city. The Canadian Pacific Railway engineers are surveying a branch line to connect with Belleville. Retail and wholesale merchants reported business excellent, despite the fact that the farmers are very busy. There was no sign of any labour disturbance.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Most of the cheese factories in the district started operations this month and prospects for a busy season are bright. All grain crops look well and fruit is promising. Much ploughing and seeding was done.

Fishing.—Fishing was active, only rough fish being caught.

Lumbering was very active in the northern part of the county.

Manufacturing was active.

Mining promises to be very active this year.

CONDITION OF PARTICULAR TRADES.

Members of the various building trades, with the exception of painters, paper-hangers and decorators were not as busy as a year ago, but prospects for next month are very bright. Many new dwellings will be erected in May. Iron moulders, iron workers and helpers, machinists, engineers, electrical workers, linemen, brass workers, lockmakers, blacksmiths, boiler makers, and horseshoers had an active month. A number of shipwrights and caulkers were employed. Woodworkers, upholsterers, polishers, carriage and wagon makers, coopers, cheese box makers, report a busy month. Car builders at Deseronto were active. Job printers were very active. Machine men and pressmen had a busy month. Bookbinders were all busy. Journeymen tailors had an active month. Bakers and confectioners, butchers and meat cutters, and cigar makers were all active. Harness

makers, saddlers and leather workers generally were well employed. Barbers, clerks, stenographers, delivery employés, hotel, restaurant, theatre and laundry employés all report a busy month. Railway employés in all branches had an active month, this place now being a divisional point for the Grand Trunk Railway. Steamboat men were also busy. Sailors were in big demand, owing to the early opening of navigation. Longshoremen were fairly active. Cab-drivers, hackmen, carters, draymen and teamsters were all busy. Unskilled labour was in fair demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions are steadily improving and at the present time are satisfactory. There is considerable activity in the building trades. The Quaker Oats Company will build an \$80,000 warehouse, also an elevator of 600,000 bushel capacity. The elevator will cost in the neighbourhood of \$125,000. The Canadian General Electric Company, owing to its increasing business, will erect additional buildings and plant, and will have to obtain more electric power for the operation of the same. They have arranged with the Water Commissioners, who are willing to dispose of the surplus waterpower at the new dam for a term of twenty years, for the sum of \$2,000 a year, the Electric Company to build the power house, put in the wheels and plant, and at the end of twenty years to turn it over to the city free of cost. The corner stone for a new church was laid, to cost in the neighbourhood of \$25,000 and to have a seating capacity of 900. Wholesale and retail trade was active. The pattern makers received an increase in wages of twenty-five cents per day.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were generally active. Farmers were very busy; seeding is well advanced.

Lumbering.—There is pronounced activity in the lumbering business. The mills are starting three weeks earlier than usual. Bradley and Son have built a new mill at Lovisich; they have a large contract to fill for the new dam which is being built at Burleigh Falls.

Manufacturing.—All local manufacturing concerns were running full time, and in some cases were working overtime.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were actively employed and wages were well maintained. The metal trades continue active. The woodworking and furnishing trades were more or less active. The printing and allied trades had a good month. Journeymen tailors were very busy. Bakers and confectioners had a good month, also butchers. Cigar makers reported trade fair. Leather workers were active. Railway employés were well employed. Unskilled labour was in good demand and good wages were being paid.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour, both skilled and unskilled, was well employed during April, the unusually early opening of spring having stimulated business and industry. The building trade has been very active and promises to continue so throughout the season, provided no serious difficulties occur over the demands for increased wages made by several unions. The situation at present appears favourable to a peaceful settlement of all matters in dispute.

The number of building permits issued for March, was 643, representing an approximate value of \$1,583,165, as compared with 637, representing \$1,703,840, for March, 1909. The number issued for the three months, January-March, this year was 782, representing a value of \$3,125,693, as against 776 permits, representing a value of \$2,936,900 for the corresponding three months of 1909.

On the ninth instant the ratepayers adopted by large majorities, by-laws authorizing the grant of a further sum of \$250,000, towards the cost of the new General Hospital; and the issue of debentures to raise \$279,539 for the extension of water mains.

The estimated expenditure of the city of Toronto, for the current year, as passed by the City Council on the twenty-first, is \$6,871,755. The revenue from taxation was estimated at \$4,645,610, and from ordinary and special sources of revenue at \$2,226,145. The tax rate was fixed at seventeen and a half mills on the dollar. The City Treasurer's report showed that the assessment was \$269,966,219, an increase of about \$34,000,000. It is estimated that there were 72,000 persons employed in factories in 1909, as compared with 68,500 in 1908, and 50,000 in 1904. The invested capital in the factories is \$82,000,000, and the annual payroll amounts to about \$36,000,000. During the past year \$740,000 was invested in new factories, and \$159,310 in additions to factories already in operation.

Manufacturers have for some time been complaining of a scarcity of female help in the lighter manufacturing industries. One cause assigned is the difficulty of girls coming alone to the city in obtaining suitable boarding house accommodation at reasonable prices. At a luncheon held by a number of manufacturers, on the nineteenth, it was proposed to meet this requirement by forming a company, with a capital of \$50,000, to build and equip a home for 100 girls, to be managed by a committee selected from the shareholders and the Young Women's Christian Association. It is proposed to give board and rooms

for about \$3 per week, firms subscribing to the company to have the privilege of sending girls to the home, in proportion to their stock. An organization committee was appointed, consisting of George Gale, Chairman; Thomas Roden, R. Fairbairn, G. F. Beer, W. R. Johnston, Jr., S. B. Brush, R. Parker, J. S. King and Alfred Jephcott. A number of firms have taken up shares.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busy ploughing and seeding. The heavy rains which fell during the latter part of the month have been very favourable to pasturage and vegetation. The fall wheat generally, came through the winter in good condition and promised well.

Manufacturing.—Great activity continues to prevail in nearly all lines and many plants find it difficult to overtake orders. The western trade is very brisk, there being a great demand for agricultural implements and gasoline traction engines. The installation of water works systems in many western towns has caused extensive demands for water towers, piping and pumping equipments. Many additions to plants are being made or are in contemplation. In consequence of the great expansion in production some manufacturers are unable to obtain all the skilled help they require at current wages.

The Polson Iron Works has several important contracts on hand and is now employing 500 men, having increased their force by about 250 this year.

The Ontario Wind Engine and Pump Company have increased their capital from \$250,000 to \$750,000, and are extending their distributing facilities in the West.

Henry Disston & Sons, saw manufacturers, are erecting an addition to their new plant, 260 x 60 feet, to cost \$25,000, which will double their present capacity.

S. F. Bowser & Co., manufacturers of oil storage systems, will increase the capacity of their plant, by the erection of an additional storey and an extension 50 x 180 feet.

CONDITION OF PARTICULAR TRADES.

Nearly all the building trades were active, with the exception of plumbers, steam and gas fitters who were fair. The carpenters have been offered an increase of wages to thirty-five cents an hour after May 1. Many carpenters are among the immigrants arriving from England. The employing printers have agreed to advance the minimum rate of wages to thirty cents per hour. The lathers have asked that the old scale of wages, reduced last year, be restored, viz., \$3.50 per day for first-class men, \$3 for second class, and \$2.50 for third-class. The iron and shipbuilding trades were busy. The sheet metal workers have secured an increase of wages, outside workers receiving thirty-three cents, and inside men thirty-one and one-half cents per hour. Brass workers, jewelers and silversmiths have plenty of work. Woodworkers were all busy, especially cabinet makers. Upholsterers have effected a settlement of the dispute with their employers on the basis of a ten per cent. increase in wages, giving them a minimum rate of thirty-five cents per hour. Piano workers were active. Printers, bookbinders and allied trades had a good month. Custom tailors, garment workers, boot and shoe workers, and hat and cap workers were well employed. The provision trades and cigar makers had continuous work. Leather workers were active. Hotel and restaurant employés, laundry workers and barbers had steady work. Railway and street railway employés, teamsters and expressmen had a busy month. Navigation opened considerably earlier than usual and sailors, longshoremens and others were well employed towards the end of the month. Unskilled labour was generally well employed.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

April was a busy month for every class and the outlook continued to be good.

Fine weather prevailed and out-of-door work was advanced by several weeks as compared with other springs. Agricultural and building operations profited most by this favourable condition. Municipal work was giving some employment. No extensive paving or sewer construction will be undertaken this year. A new calcium carbide company, with a capital of \$600,000 was incorporated.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural operations are said to be a month in advance of last year. Grain and meadows were in good condition and all orchards and small fruits wintered well and promised large crops. No damage was done by late frosts. Tobacco growing will occupy a much larger acreage than heretofore.

Manufacturing.—Manufacturing concerns were all busy and employing full staffs. The works of the Ontario Power Company were pushed forward with all possible speed. A great force of labourers and many men skilled in concrete work, steam engineers, hoist runners, carpenters, teamsters, civil engineers and office men were employed.

Railroad construction.—Further surveys for new steam and electric railways were made but no further construction was undertaken.

CONDITION OF PARTICULAR TRADES.

The building trades were all busy. A feature of the present season is the general use of metal lath. Old-time lathers find less demand for their services. In the metal working trades there was continued activity. Linemen were in demand and the enamelled can factory was rushed with work. In the clothing trades special activity was reported by the employés of the suspender, neckwear and linen factories. Journeymen tailors were active. Bakers and butchers and icemen were expecting a busy summer. Barbers were busy. Sales people and employés of hotels and restaurants will be more active after May 15, when the tourist season opens. Transportation employés of all classes were active. Rail traffic was good and navigation opened on April 15. Lines

of passenger steamboats will not give full services till June. Electric railways were busy for the season. Teamsters were very busy. Unskilled labour was in demand.

DISTRICT NOTES.

Fort Erie.—Contracts were left for the new waterworks system. An addition of seventy-five rooms was being made to a summer hotel.

Niagara-on-the-Lake.—The militia training camp will open on June 7. Navigation and the fruit season will commence a little earlier. A busy summer is expected.

Port Colborne.—Work went forward on the new flour mill. The section of the mill now being built will have the largest capacity of any mill in Canada, with one exception. It will turn out 6,000 barrels of flour per day, grinding 30,000 bushels of wheat. The storage capacity will be 250,000 bags of flour, and the elevator will hold a million bushels of wheat. Provision is made in the foundations for doubling the capacity of the mill.

Welland.—The Dain agricultural implement works commenced work with sixty employés. A rail-joint shop was added to the Ontario Iron & Steel Company's plant. A large number of foreign labourers arrived for employment in different works. Building trades were active, many dwellings being in course of erection.

Dunnville.—The ratepayers voted on three by-laws:—To loan \$30,000 to the promoters of an industry for the manufacture of auto parts, furnaces, shovels, and other articles; to grant a fixed assessment of \$25,000 and free water for ten years, to the Dominion Hammock Manufacturing Company, and to spend \$30,000 for a new high school building. All three were carried by large majorities.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Increased activity in the labour market

continues with the advance of spring. Building operations are increasing in volume, with plenty of work ahead. Street pavement and other civic improvement work was started during the month; the work planned for the season will give employment to a large number of men.

The three factory by-laws: (1) *re* the Crocker-Wheeler Company, manufacturers of electrical machinery, to employ not less than 100 hands and pay out in wages, annually, \$50,000, to be granted a fixed assessment of \$10,000 for ten years; (2) *re* the Monarch Knitting Company, to employ not less than fifty hands (exclusive of office help) and pay out annually not less than \$15,000, to be granted a fixed assessment of \$5,000 for ten years; and (3) *re* the St. Catharines' Woollen Mills Company, employing forty hands, to be granted a fixed assessment of \$2,000 for ten years; were all voted on and carried by the ratepayers, on April 22.

A new factory for the preparation of chicle from its raw state for manufacturers of chewing gum, will be established here. The factory will employ fifteen hands to start with.

The Canadian Hairecloth Company has decided to enlarge its plant by an addition in order to meet its rapidly increasing business.

St. Catharines will be the centre of the new Phanton Coil system of telephoning to be installed by the Bell Telephone Company between Niagara Falls and Hamilton. The new system will enable six lines between Niagara Falls and St. Catharines to do the work now done by nine.

All factories and mills are busy. Business generally is reported fair. Navigation on the Welland Canal opened April 15, traffic being light, but increasing in volume by the end of the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers are busy with their spring work. The prospects are good for crops. The trees, bushes and plants have wintered well and weather conditions are favourable for a heavy fruit yield. The fruit growers are petitioning Parliament to retain the duty on imported fruits and green goods.

CONDITION OF PARTICULAR TRADES.

The building trades are busy, with prospects good. All lines of the metal and engineering trades were active. The woodworking and furnishing trades were well employed with conditions favourable. The allied printing trades were active, with conditions of employment good. Journeymen tailors were active. Boot and shoe workers busy. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers were active. Tanners and curriers, leather workers, saddlers, trunk and bag makers were active. Barbers, clerks, stenographers, delivery employés, hotel and restaurant employés, and laundry workers were active. All lines of transportation were active, with the volume of trade on the increase. Unskilled labour was active, with conditions of employment better than for last month.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed during the month.

Merritton.—All the mills and factories were running full time, with conditions of employment good.

Thorold.—Favourable conditions prevailed in the labour market. The supply and demand being about equal. Thorold will have a new pulp and paper factory. The factory will be in operation in July or August.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month was an exceptionally busy one in manufacturing establishments, in some cases overtime having to be resorted to to keep up with orders. The building trades were favoured with good weather the first part of the month, and good progress was made on the unusually large volume of work in hand. The latter part of the month was very wet, which hampered outside operations considerably.

The Street Railway Company expected to resume the reconstruction of its roadbed April 15, but was delayed by the non-delivery of rails, about ten days. The work was in progress during the last week. Owing to the wet weather, only a small force was employed.

The disturbed conditions in the United States bituminous coal districts was felt here by manufacturers, through decreased supplies of that fuel, and much anxiety was experienced in consequence. The supply, while much curtailed, was sufficient to prevent any shut downs, and conditions in this respect improved towards the end of the month.

Real estate transactions were very active. There is a scarcity of houses for rental at from \$12 to \$18 per month, and this has stimulated building operations. Building permits for the month, totalled about \$385,000, the great bulk of which was for dwellings. The permits issued in April, 1909, totalled \$225,000. Real estate prices are increasing rapidly.

Clearing house reports continue to show large increases, over the corresponding weeks of last year, the increases ranging from \$200,000 to \$500,000 per week.

Increased opportunities for employment, consequent on the general activity, resulted in several demands by labourers for increases in wages. On April 1, about 500 foreign labourers at the works of the Hamilton Iron and Steel Company struck for a rate of twenty cents per hour. The Company had announced a raise in the rate from fifteen cents to sixteen cents, to take effect April 1. The strikers also complained that they had to pay foremen and sub-foremen various sums per week to hold their jobs. After being out several days they returned to work on the promise of an investigation of their grievances. On April 12, an agreement was announced providing for increases ranging from five to ten per cent., and the posting of a regulation providing for the summary dismissal of any foremen, sub-foreman or other employé exacting any payment from labourers. T. H. & B. freight handlers made a demand April 11, for a rate of twenty cents per hour. Seven men quit work, and their places were filled. Subsequently, the Company an-

nounced an increase of one cent per hour. About twenty employés of the city waterworks department quit work, because of a change of foreman, and notice that more work was expected of them. Wet weather suspended operations, but no settlement has been announced. All of these workmen were unorganized.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from the farmers, fruit growers and market gardeners are to the effect that crops have come through the month satisfactorily. Everything points to a record-breaking fruit crop. Berries are so well advanced that the fruit will be on the market much earlier than usual.

Manufacturing.—The International Harvester Company has a large force of men engaged on the extensions to the Company's works. Those in hand are stated to total in value about \$250,000. The Company has recently taken over the business of a Paris implement firm, and will likely bring it here. The works are full of western orders.

The Otis-Fensom Elevator Company will further extend its works this summer.

The Hamilton Bridge Company has been buying more property, in view of an enlargement of its works, and is erecting a large office building.

The Dunham Company, of Marshalltown, Iowa, which manufactures heating appliances on the vapor vacuum principle, will locate its Canadian factory here.

CONDITION OF PARTICULAR TRADES.

The building trades are all busy, and lots of work is in prospect. Carpenters are asking for a rate of thirty-seven and one-half cents per hour, and a working agreement with employers. Last year the rate varied from thirty-two cents to thirty-five cents, but no wage agreement existed. Sheet metal workers are asking an advance of the wage rate from thirty cents to thirty-five cents. So far, neither has been acceded to. The trades are uniformly busy, cigar makers, custom tailors and garment workers exceptionally so.

The railroads have been handling a large quantity of general freight, but the slack-off in the receipts of coal made matters rather quiet among the railroad men. Unskilled labour found lots to do; in some of the factories, it was stated during the month, they were short of labourers, and experienced builders' labourers were scarce.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed for the season of the year. The month was more active than the preceding one or the corresponding one of last year. Building operations started earlier than usual indications pointing to a busy season. All branches of manufacturing are busy, the pressure of increasing trade making it difficult to proceed with additions and extensions which are urgently needed. The outlook at present is the brightest in many years. There has been a demand for semi-skilled labour in several factories; while it seems impossible to secure the number of female operatives wanted. Steady employment and perfect sanitary conditions are offered at the Penman mills here and in Paris. Civic improvement work is employing a large force of men in the construction of sewers, walks and pavements, and the Street Railway Company is employing a large force in the work of reconstructing tracks and roadbed. In a case before His Honour Judge Hardy recently, a painter was given judgement for \$170 against his employer for injuries received from a fall while in his employ. Merchants had a fair month.

The License Commissioners have refused licenses to seven hotels, reducing the number of licensed hotels to nine. Electrical wirers, five in number, received an increase in wages from twenty-two and a half cents to twenty-five cents per hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners were very busy. There is a demand for men in some localities.

Manufacturing.—Manufacturers continue to be very busy. Several factories working overtime. The Crown Electric Company, of Illinois, will erect a factory here at once, to manufacture gas and electric fixtures. It will commence with seventy-five men. The Brantford Cordage Company is erecting a large addition, which will increase the output sixty per cent. The foreign trade of several of the factories necessitates large additions. In the iron trades there has been a demand for intelligent unskilled labour.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners were nearly all busy. Lathers and plasterers were slack. Painters, decorators and paper hangers were very busy. Plumbers, gas and steamfitters were active. Iron moulders, coremakers, machinists, blacksmiths, boilermakers and linemen were very busy. Electrical workers and sheet metal workers and stove mounters were active. Metal polishers, buffers and platers in most cases, were very busy. Horseshoers were active. Woodworkers generally, were busy. Carriage and wagon makers and pattern makers were very busy. Coopers were from active to busy. The printing and allied trades were busy. Tailors and tailoresses were busy, and boot and shoe workers were very busy, some working overtime. Bakers and confectioners were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were busy. Barbers, clerks, delivery employés, hotel and restaurant employés were steadily employed. Laundry workers were busy. Railroad trackmen were busy, with freight handlers very busy. Street railway employés were steadily employed. Teamsters and draymen were busy. Hack drivers were active. There were a few unskilled labourers unemployed, although there was a demand from the factories for more men.

DISTRICT NOTES.

Paris.—The International Harvester Company has acquired the works formerly occupied by the Paris Plough Company. Work commenced on the first of the month with a large force of men. The factories and mills are all very busy. There is a demand for male and female labour. Numbers of operatives are being brought out from Great Britain, so great is the demand for help.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally, was well employed during April, being more active than during the same month a year ago. This is attributable to the fine weather. There was a good demand for unskilled labour. All local industries, with the exception of the Standard Valve and Fitting Company, were running full time and with full staffs. The starting of civic work gave employment to a large number of men and teams which will continue for the season, as a number of streets are to be macadamized. Banks reported business good, while wholesale and retail merchants had an active month. The starting of several new buildings gave work to nearly all branches of the building trades. Work has also been commenced on temporary buildings for the new Provincial Reformatory and a number of local men have been employed thereon.

The City Council has agreed to advance the pay of labourers from seventeen and a half cents to twenty cents per hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers report a very busy month. Owing to the fine weather seeding is about finished in this district, being a month in advance of last season. Fall wheat has wintered well. The supply of farm labour is equal to the demand.

Manufacturing.—Local industries have been well employed. The J. B. Armstrong Company, which has been running only eight hours a day, is now working full time and taking on additional men. Messrs. Stratton and Taylor have purchased property in the city and will erect a first-class cheese and butter factory.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners had a very active month, with lathers and plasterers fair. Painters, decorators and paper hangers were well employed, as were plumbers, steamfitters and builders' labourers. Tubemill workers, iron moulders, helpers and coremakers were active. Electrical workers and linemen were well employed getting ready for Niagara power. Blacksmiths had a good month. Stove mounters were very busy, taking on additional men. Horseshoers were well employed. Sash and door workers report a good month, also piano makers. Carriage makers were fair, also coopers and pattern makers. Printers and allied trades were very active, also journeymen tailors and garment workers. Bakers and confectioners report a good month. Cigar makers fair. Carters, draymen, teamsters and expressmen were active. Unskilled labour was well employed, with the supply equal to the demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour of all classes was well employed during April, especially factory labour. Good progress was made on the Weber blocks. The excavation on the new public school building has been completed and the foundation is being put down. There were twenty-seven building permits issued during the month, valued at \$74,630, one of the permits being for Tippert & Company's new furniture factory and another for an addition

to the J. Kaufman planing mill, door and sash factory, to be 40 x 100 feet and four stories high, of concrete. Shipments and bank clearings were heavy. Business, both wholesale and retail, was favourable. The employés of the Waterloo Manufacturing Company had their wages increased one cent per hour to the number of 160; this was granted voluntarily by the firm. The Ahern Shoe Company gave notice, on the ninth of April, that hereafter employés must give two weeks' notice before leaving or forfeit two weeks' wages. The employés disapproved and went on strike on the eleventh. On the twelfth, the firm proposed to make the period one week. After being out ten days the men accepted the proposition and went back to work on the twenty-first.

There was a slight demand for unskilled labour towards the close of the month. Experienced shoemakers were wanted at the Kaufman Rubber Company, and girls were wanted by the Ahern Shoe Company and by the Hagen Shirt and Collar Company. Also a number of machine hands and a bench hand wanted at the P. W. Gardiner Door Factory, Galt, Ont.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy, plowing and seeding. The weather has been fine during April, and the fall wheat and grass are looking well.

Manufacturing establishments were busy, some of them running overtime.

CONDITION OF PARTICULAR TRADES.

The various skilled trades were from active to busy, with unskilled labour well employed.

DISTRICT NOTES.

Waterloo.—All classes of labour were well employed, with manufacturing establishments working overtime. The building trade is progressing. Good progress has been made on the new Mutual Life Company's building, the foundation walls being nearly completed. The build-

ing is to cost about \$200,000 when completed. The excavation for the new market building has been completed. Part of the old woollen mill is being remodeled for Mrs. F. Dering & Company's new trunk factory. Girls are wanted at the Wm. A. Green cuff and collar factory, experienced hands preferred.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The reports of business prosperity and industrial activity continue. There are no complaints of want of employment. On the contrary, some of the factories find difficulty in securing all the labour they require, both skilled and unskilled. A notable feature is the scarcity of unskilled labour. The call of the West, and the opening up of spring work on the farms account in some measure for this condition. Farmers report some difficulty in securing sufficient help. They are looking forward to the coming season and are anxious to secure capable men. Wages run from \$25 to \$30 a month, board and lodging included, on eight-month terms, and about \$25 a month by the year. Some of the factories are looking for skilled help—moulders, painters, woodworkers. The Stewart Stove Works are running five days a week, which is full time for them, and it is probable that before long the men will be asked to work every other Saturday. Business prospects were never brighter in this line. There is room for a few more moulders.

Hay & Company are looking for both skilled woodworkers and labourers. The manufacturers of musical instruments report business excellent. The same report is received from the furniture and wagon manufacturers. The Woodstock Wagon Company could employ a few more woodworkers, blacksmiths and labourers. The knitting factory, which employs 150 girls, has all the help it needs at present, but before long there will be employment for from thirty-five

to fifty more. An indication of the improvement of industrial conditions is afforded by the report of the Karn-Morris Company, organ and piano manufacturers, that their output for this year, so far, is \$45,000 in excess of the output for the same period last year. The improvement in business, generally, is indicated by the fact that the Customs returns for the port of Woodstock, for the last fiscal year, were \$20,000 in excess of the previous year. The revival is spreading. The Board of Trade is renewing its activity, and the City Council has decided to avail itself of the services of an Industrial Commissioner to assist in securing additional industries. The building season has not yet fairly opened, but it is expected that there will be a fairly good year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy putting in their crops and many of them would be glad of additional help.

Manufacturing.—The reports from various sources might be summarized in the expression "Conditions and prospects were never brighter."

CONDITION OF PARTICULAR TRADES.

The season has not yet fairly opened; but the coming year promises to be a fairly good one for the building trades.

Meantime, bricklayers and masons, carpenters, plasterers, etc., have no difficulty in finding work. Labourers are all employed, and the demand is outrunning the supply. Moulders, machine hands, stove mounters, blacksmiths, are all well employed, and there is some demand for both blacksmiths and moulders. Woodworkers of all kinds, upholsterers, wood carvers, carriage and wagon makers are busy. The printing business is reported to be excellent. The Sentinel Review is in need of competent pressmen, hand compositors and linotype operators. The clothing trade is active. Merchant tailors are behind with their orders, and there is a demand for garment makers. Bakers, butchers and cigar makers are busy; but no complaint is heard of lack of help.

STRATFORD, ONT., AND DISTRICT.

CONDITION OF PARTICULAR TRADES.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month was active, especially in the building trades and among outdoor workers. A number of men and teams were engaged in excavating for two new business blocks. The excavating for the addition to the McLagan furniture factory is completed; the addition will be 160 x 60 feet. The brick work will be finished by the end of June.

A by-law to raise the sum of \$85,000 to provide for a distribution plant for Niagara power was carried April 14.

Full time has been worked in all the factories and foundries.

The new steel bridge on Waterloo street, which has given employment to a number of men for some months, is finished. The Dufton Woollen Mills, which gave employment to about thirty hands, was badly damaged by fire; temporary repairs have been made, and work resumed with half a staff.

Wholesale and retail merchants reported trade active. No change in the rates of wages or hours of labour, and no trouble in the labour market was reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy seeding and preparing for the root crop. Market prices were:—

Butter, 25c. per lb.
Eggs, 20c. per dozen.
Potatoes, 50c. to 60c. a bag.
Apples, 70c. to 75c. a bag.
Hay, \$10 per ton.
Bran, \$22 per ton.
Shorts, \$25 per ton.
Wheat, \$1 a bushel.
Oats, 35c. per bushel.
Peas, 70c. per bushel.
Barley, 45c. per bushel.
Flour, \$2.95 per cwt.
Hogs, \$8.50 to \$8.65 per cwt.

Manufacturing.—All factories were running full time.

Bricklayers, masons, carpenters, lathers, plasterer, painters, paperhangers, plumbers and all the building trades had steady work the latter part of the month. Iron moulders, workers, helpers and machinists were busy. Electrical workers were active. Blacksmiths and boiler-makers were busy. Woodworkers, carriage and wagon makers were doing a good business. Coopers were busy. Printers were steadily employed. Journeymen tailors were very busy. Garment workers and milliners were in their busy season. Bakers, confectioners and butchers were busy. Harness makers reported trade very good. Barbers, clerks and delivery employés were busy. Hotel, restaurant and laundry workers were active; there is a demand for girl help in hotels and private houses. Railroad conductors, engineers and firemen were active, and trainmen, trackmen, switchmen and freight handlers were very busy. Cab drivers, draymen and teamsters were busy. Unskilled labour was very busy.

DISTRICT NOTES.

Mitchell.—A number of telephone line-men are in town installing new poles and extending the service; about 130 new subscribers have been added in this district.

St. Marys.—The stone quarry owners report a large number of orders ahead. The prospect is that the season will be a very busy one.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is no lack of applicants for vacant positions, which shows that the supply is greater than the demand, especially amongst unskilled workers. The outlook is not as hopeful as earlier in the year. The London Bolt and Hinge Works,

which closed on March 1, is to be sold by public auction on May 2, and is expected to open again shortly after. On the first of April, the Sen Sen Chiclet Company moved its plant to Toronto, and the local factory was reorganized under the name of the Somerville Paper Box and Printing Company, which has retained all the former employés. The Customs returns for the month of March, were, \$79,716, the second greatest return that London has ever had, and being \$16,184 over the same month last year.

The continued increase in the price of domestic supplies and other commodities has caused decided unrest among the workers, and, in many cases, a doubling up of families has taken place; while large numbers have left the city, especially for the Canadian West. In almost any block in the city vacant houses can be seen, and rents are being reduced.

A number of increases were given to the employés of the city hall, to go into effect at the first of the month. Grand Trunk Railway operators and dispatchers, on March 1, received increases of from \$5 to \$10 a month, in their salaries. On the street railway, increases went into effect as follows: First year and spare men, sixteen cents per hour, as formerly; second year men, increased from sixteen cents to eighteen cents per hour; third year men, from seventeen cents to nineteen cents; and fourth year or over, from eighteen to twenty cents per hour. Under the revised scale, they work nine and one-half hours per day, instead of ten hours.

CONDITION OF PARTICULAR TRADES.

Bricklayers and carpenters are all working, but trade conditions are not very bright. Lathers are not as busy as in former years. Plasterers are busy. Painters are all working. Moulders are busy, as are also machinists. The work of stringing wire for Niagara power has given a lot of extra work to linemen, and they are very busy. Metal polishers, stove mounters and brass workers are busy. Carriage and wagon workers are busy. At the Grand Trunk Railway car shops a great number of changes are taking place, old hands quit-

ting and new ones taking their places. Coopers are busy. Printers, with other tradesmen, are undergoing a period of unrest, and a number left lately for the West, necessitating a search for others to take their places. Pressmen are busy. Bookbinders report trade fair. Paper box makers are very busy. Journeymen tailors report trade very good. Garment workers are exceptionally busy, and are continually looking for female help. Boot and shoe workers are very busy. Bakers and confectioners are busy. Cigar makers report trade fair, and about thirty have left this city to work for the Tuckett Company in Hamilton. Tanners and leather workers are very busy, with considerable overtime being worked. Broom makers are busy. Furriers report trade good. This has been a dull month on the railroads, the quantity of freight moving being small, and the summer passenger traffic not yet commenced. The local cartage agencies have requested the wholesale houses to have their shipments ready by 3:00 P.M., so as to allow the freight shed employés to get away from their work earlier, it having been after 7:00 P.M. when they have been able to get their work done. Teamsters and expressmen are very busy. The demand for unskilled labour is not as great as in former years, and there are a number out of employment.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during April, was, in some respects, more satisfactory than during the corresponding month of the previous year. The prospects are bright for a busy season in the building trades, a number of large contracts being in sight, in addition to a large number of residential contracts for which permits have been issued. All hands are, at present, well employed, and there need be no idle men, as the demand is good for all classes of labour.

The feature of the month was the passage of the two by-laws whereby substantial loans will be given to Norsworthy & Company and the Medcalf Shoe Company. Work will be commenced at an early date on the construction of the new shoe factory and the enlargement of the present Norsworthy factory property. These two factories will add considerably to the industrial progress of the city.

On the railways and in the railway shops the month has been characterized by a general increase in pay and reduction in the working hours to some of the skilled workers.

The Pere Marquette machinists have an offer from the Company under consideration, which will, if accepted, give them an increase of one and one-half cents per hour. At present, machinists employed by that Company are being paid thirty cents per hour with full time. The boiler-makers have been given an increase of one and one-half cents per hour, which gives them thirty-one and one-half cents per hour. In addition to the increases, other concessions have been granted the men, which are specially in the interest of men entering the service. During the corresponding month of last year a reduction of thirty-five to forty men was made in the Pere Marquette shops. The officials report the present month an active one, with plenty of work on hand.

In the Michigan Central shops a general increase was granted to all employés, amounting to from one to two cents per hour. In the case of boiler-makers, who were being paid thirty cents per hour, an increase of one and one-half cents was granted, with a reduction in the number of hours to constitute the working day. In future, the working day will consist of eight hours, with overtime of time and one-half, thereafter.

A general increase in wages was granted to the Michigan Central Railroad section-men, and the section gangs increased. Labourers who were formerly receiving \$1.45 per day have been advanced to \$1.60 per day, and foremen have been granted an increase of \$2.50 per month.

Sunday service was inaugurated on the South Western Traction lines from London to Port Stanley, on Sunday, April 24.

The cars were well patronized, notwithstanding that the weather was anything but favourable for outings.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The dry spell was broken by heavy showers, and, as a result, the danger of injury to growth by drought was averted. Fruit looks well in this district.

Manufacturing.—The few local manufacturing were operating under normal conditions, demand and supply being well balanced.

CONDITION OF PARTICULAR TRADES.

Men employed in the building trades were busy during April. Employés in the machine shops and allied trades were busy. Journeymen tailors and garment workers were busy. Railway employés were well employed. For unskilled labour the demand was slightly in excess of the supply.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The outlook for work in the various building trades is very bright. During the past month activity prevailed in every department in the building trade. There were a large number of buildings started, but a number were brought to a standstill owing to the scarcity of brick, the supply having been exhausted by the large demand.

The Swift Motor Car Company, a new industry, has arranged for a large addition, and is installing \$22,000 worth of new machinery. The Anhut Motor Car Company is engaging more men every day. In a few days, the new plant for the Modern Malleable Range Company will be completed; it is expected the number of skilled men will be doubled.

The building permits for April, show a large gain over the same month for 1909. Carpenters are scarce, a number having

left for the Canadian North-west, and good mechanics are hard to secure.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops throughout the district are reported in excellent condition. The recent rains were a great benefit.

Railroad construction.—There was not much activity, but efforts are being made to have the C. W. & L. E. Electric railroad Company extend the road to Eneau, to connect with a boat running from Cleveland.

Manufacturing.—Every branch seems to be running to fullest capacity, and very few men are idle. For the first time in two years, the Chatham Navigation Company will put a boat on the Chatham and Detroit route.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet, but carpenters and joiners were busy, while lathers and plasterers were very busy, mostly on small contracts. In painting and decorating there was not much activity until towards the end of the month. Plumbers, gas and steamfitters, and builders' labourers were well employed. Machinists and engineers were busy. Electrical workers and linemen were very busy, in a number of instances working overtime. Metal polishers, buffers, platers and brass workers had an excellent month. Blacksmiths, boiler makers and sheet metal workers were fairly active. Horseshoers were quiet. Woodworkers, upholsterers, carriage and wagon makers reported an excellent month. Printers, pressmen and bookbinders were busy. Journeymen tailors, garment workers and boot and shoe workers had a good month. Bakers and confectioners, cigar makers and tobacco workers were very busy. Barbers, clerks, stenographers and laundry workers were steadily employed. Unskilled labour had a good month.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour, both skilled and unskilled, was well employed during the month. There is a demand for men, both skilled and unskilled. Manufacturers have notices posted on their buildings: "Help wanted". There is also a heavy demand for female help. The building trade is very brisk and the prospects are fine for a good summer. The Regal Motor Company has purchased three and one-half acres of land from the city and will build a large plant and give employment to a large number of hands. There is a scarcity of houses to rent from \$12 to \$15 per month; it is almost impossible to get one. The Collector of Customs reports that collections for the month of March, were the largest in the history of the port of Windsor; duty to the amount of \$176,060.51 was collected, as against \$92,291.65 for March, last year. Total collections for the fiscal year just closed showed an increase of nearly forty per cent. over the year 1909.

The wholesale and retail merchants report trade good. There has been a general raise in wages from six to eight per cent. in most all the principal industries in the city. There were two small strikes, one on the Grand Trunk Railway, and one at the gas works.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from the fruit growers in this vicinity, are that the late frosts have done no damage, the blossoms not being sufficiently advanced to be affected. The steady fine weather has enabled farmers to sow oats, barley and peas. They are now preparing the ground for tobacco and corn.

CONDITION OF PARTICULAR TRADES.

The building trade is active and there is a demand for men in all branches, especially for carpenters. The metal, en-

engineering and shipbuilding trades are very busy. Printers and pressmen are all fully employed. Journeymen tailors and garment workers are working overtime. Food and tobacco workers can find plenty of employment. Leather workers and saddlers are busy. Barbers report trade fair. Clerks, delivery employes, hotel and laundry workers are in demand. Railroad and steamboat men are all employed. Teamsters and unskilled labour are well employed.

DISTRICT NOTES.

Walkerville.—Real estate transfers and building operations have been very active in the last month, and prospects are for a busy season. Manufacturers are very busy and are advertising for help every day. The Kerr Engine Company is building a large addition to its plant.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month was a busy one, labour being well employed throughout. Navigation opened much earlier than usual this year, the date being April 12, whereas the usual date is about April 25. Many complaints are heard concerning the high cost of living. The outlook for a good season's business in all lines was never brighter. The demand for unskilled labour and for machinists and building trade mechanics was brisk, the supply being below the demand. Contractors report the best season's business in sight than in several years.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There was little activity, it being too early in the season.

Fishing.—Conditions were normal.

Lumbering.—Lumbering operations are over for the season, except the drive. This was delayed for a couple of weeks,

owing to lack of rain in the early part of the month; this difficulty disappeared later in the month.

Manufacturing.—The Lake Superior Corporation is pushing construction work on the enlargement of the various plants, including docks, coke ovens, blast furnaces, rolling mills for structural shapes, etc. Other manufacturing plants were operating full time with full staffs.

Railroad construction.—Activity in railroad construction had not yet begun. The Algoma Central Railway Company is advertising for tenders for extensions.

CONDITION OF PARTICULAR TRADES.

Busy conditions were reported in the building and metal trades, there being a great demand for carpenters and machinists. The printing trades were normal. Unskilled labour was in active demand.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was pretty fully employed in this district and more men were engaged than last month. The season is considerably earlier than last year.

Industrial activity commences in earnest at the opening of navigation. Navigation opened with Duluth on the last day of March, and the first boat to arrive at Fort William, from the East, was here on April 14.

Everything points to an exceptionally busy building season, and many foundations are already being put in and important buildings started. The Western Dry Docks Company have begun excavating for building operations, and expected to have a great deal of the work completed by end of October. The Masonic building, Port Arthur, has been started this month, and the contract is also let for the new Young Men's Christian Association building, which is to be erected at a cost of \$35,000, raised by public subscription.

Commercial activity began with the opening of navigation, and very heavy consignments of package freight have been landed here, so that work at the docks has been brisk for the first month of navigation, though heavy storms on the lakes have delayed boats.

There has been no change in wages, and no strikes or lock-outs during the month.

An employment agent from Winnipeg engaged some two hundred Greek and Italian dock labourers to go West on Canadian Pacific Railway construction work; their places at the docks will be filled by new immigrant arrivals.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The small farmers in the vicinity are all busy, clearing, burning and breaking.

Railroad construction.—It is reported that the Canadian Pacific Railway Company will make extensive additions to its work shop accommodation at Fort William, and that the Canadian Northern Railway Company intends increasing its round house and dock accommodation at Port Arthur. The employment agents have shipped many men out of the cities for railway construction work at points on the Grand Trunk Pacific and the Canadian Pacific Railway.

CONDITION OF PARTICULAR TRADES.

The bricklayers and masons are not fully employed. Carpenters and joiners are more fully employed, but buildings are not sufficiently advanced yet for other branches, such as plasterers, lathers, painters, plumbers, steamfitters, stone cutters and labourers. Electrical workers and linemen on street railway work and extensions have been busy. The local saw-mills are expected to be in full operation in a few days. Lumber yards are busy. When the mills are in full operation many men will be employed. The blast furnace is getting ready for an early start.

An important move has been made in the newspaper world by a combination of forces which will tend towards greater unity and cohesion. The Port Arthur *Evening Chronicle* is issued in both cities

as an evening paper, and the Fort William *Herald* in both cities as a morning paper. Subscribers to either paper are now to be supplied with both papers at the same charge as formerly asked for one paper. The Port Arthur *Daily News* will also be issued as a morning paper in both cities, and the Fort William *Times-Journal* as the evening paper, on the same terms as the *Chronicle* and *Herald*.

The miscellaneous trades are quiet. Owing to the absence of large lumber camps in the vicinity this winter, there has not been the spring rush that was depended upon by the retail merchants and others, two or three years ago.

All transport workers are gradually working up to full time as the freight trade increases, and will likely be fully employed during the coming month.

The supply of unskilled labour, at present, is in excess of the demand, but, with the building trades busy everyone will shortly be working. In both cities, large numbers of labourers will be needed for the projected city improvements. During the last week in April, some 300 men were engaged in developing new roads in Port Arthur alone. In Fort William and West Fort improvements are being made.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During April, there was a large immigration of workmen seeking employment in unskilled occupations. The market was kept well supplied. Normally, there is a large surplus of labour at this season of the year. A feature of the labour situation, at the present time, is the demand for skilled assistants in stores and garment factories. Competent stenographers are also in keen demand. Generally speaking the factories of the city are busy, and there is a continuation of activity in the garment factories. The bank clearings for the month of April, totalled \$70,546,417, an increase over the corresponding month of last year of 29.6 per cent. For this period of the

year this rate of gain is considered by business men to be exceptionally large. Generally speaking, wholesale traders are very busy, and it is estimated that the general business is thirty per cent. higher in volume than at the corresponding period of last year. Dominion Express Company receipts at western points and in Winnipeg continue to exceed largely those of the previous year. Permits for new buildings are being issued in greater volume, and incurring a larger estimated cost, than heretofore in the city's history.

Two serious fires occurred during the month. The most serious was that in connection with the wholesale warehouse of Foley Brothers & Larson. The total loss will aggregate \$125,000, and sixty hands were thrown out of employment. Another fire occurred in connection with the brewery plant of Blackwood Brothers. The bottling factory was destroyed, involving a serious loss which as yet has not been estimated. About forty workpeople will be thrown out of employment.

Early in April about 400 tailors went out on strike and after negotiations which lasted a week, they returned to work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During April, the weather has been variable, but on the whole, favourable to seeding operations, but not for growth. The season is still early however. No official figures have as yet been issued with regard to the acreage in crop, but some of the oldest and most experienced of the grain traders who have studied the situation give it as their opinion that the increased acreage in crop will be approximately thirty-five per cent.

Railroad construction.—The contractors so far have not found any great difficulty in procuring the number of hands they require, but they have to take into their gangs more men unaccustomed to construction work than they care to. There has been a fairly good supply of experienced men but not in proportion to the extra work that will be done during the present summer.

CONDITION OF PARTICULAR TRADES.

Building.—The following report for the month of April, with comparative figures, has been given out by the city building inspector, E. H. Rodgers:

	Permits.	Bldgs.	Cost.
April, 1910	501	621	\$2,211,000
April, 1909	252	279	1,064,200
April, 1906	489	579	2,072,400

Comparative figures for first four months of each year:

	Permits.	Bldgs.	Cost.
1910.....	924	1,166	\$5,673,000
1909.....	526	631	2,134,200
1906.....	857	1,084	3,222,700

The year 1906 is used in the comparative statement, as up to the present year it had furnished the highest recorded figures. It will be seen that 1910 is way ahead at every point, and especially in the aggregate cost of buildings for the first four months of the year.

Clothing.—On April sixth, 400 employés from forty tailoring establishments went out on strike demanding an advance of ten per cent. in their piecework prices. After some negotiations, lasting about a week, a compromise was arranged by which the men agreed to return to work on a scale eight per cent. higher than the one it displaced. Approximately ninety per cent. of the work is done by piece. The balance is done by day men who under the old scale received \$17 per week, and under the new one, will receive \$18.25. The hours of labour for day men are nine per day without any change on Saturdays. In regard to time there is no change as a result of the strike. On an average piece hand's work nine hours, but they are irregular.

All the hands involved in the tailors' strike returned to work on April 13th.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to the exceptionally fine weather, the general condition of the

labour market shows a marked improvement on the preceding month, and is a great deal better than the corresponding month of last year. The warm weather has allowed building operations to be started fully a month earlier than usual. Many large buildings are now under way, including a five-storey office building a seven-storey warehouse and offices, an implement warehouse, a convent for the Sisters of St. Michael and an apartment block. The majority of building trades are working, and on the whole the prospects are for a busy season.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The exceptionally fine spring has enabled the farmers to do all their seeding early this year, the majority having completed seeding. Some wheat is already two inches above ground.

Railroad construction was active.

CONDITION OF PARTICULAR TRADES.

The building, transport and metal trades were busy, with other skilled lines active. Unskilled labour was very active.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was active during April, having slightly improved over the preceding month, but having shown a marked improvement over the corresponding period of last year. In all the building trades, the supply just meets the demand of labour. A new cigar making establishment has opened up here, and trade is reported as improving. Commercial activity has advanced so as to necessitate the building of more spacious freight sheds to handle the increased traffic; a new cold storage building of large dimensions has also been completed.

The Painters and Paperhangers' agreement which came in force on April first,

affords an increase from thirty cents to thirty-five cents per hour for competent mechanics, and a reduction of hours from sixty to fifty-five hours. The Master Painters have formed a branch of the Master Painters' Association.

The value of building permits for the first three months of 1910, over those of 1909, shows an increase of 386 per cent. Building permits for the month of March, amounted to \$329,650.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have taken advantage of the early spring weather, and reports from all quarters are that seeding operations are nearing completion.

Manufacturing.—Owing to the increased demand, the Young-Thomas Soap Company found it necessary to add to their present structure, an additional two-storey and basement, 50 x 75 building, costing in the neighbourhood of \$12,500. Haug Brothers-Nellermoe Company have moved their head office for Canada, from Winnipeg to Regina, having bought lots for the immediate erection of an \$8,000 warehouse. This firm has the agency for the Avery Manufacturing Company and deals in separators, feeders, weighers, wind stackers and steam plow outfits.

Railroad construction is active; already three carloads of scrappers, graders and horses accompanied by grading gangs of the Y. D. McArthur Company have arrived. It is the intention of the Company to start immediately on the Grand Trunk Pacific, extension to Weyburn.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were very active and carpenters and joiners were fairly busy. Lathers and plasterers were dull but have improved over the preceding month. Painters, paperhangers and decorators were very active, the demand being greater than the supply. Plumbers, steamfitters and stone cutters had a very good month, as did builders' labourers. Machinists and engineers were

busy and electrical workers active. Bicycle workers were active, reporting a decided increase of business over the preceding month. Upholsterers were active, also soap makers. Telegraph operators were busy and were in demand. Printers had an active month. Pressmen, electrotypers and bookbinders were in demand. Journeymen tailors and garment workers were fairly busy, and the bakers and butchers had a good month. The cigar makers have been very dull, but slightly improved the latter part of the month. Barbers have been fairly busy, and clerks and stenographers were in demand. Delivery employés, as well as hotel and restaurant workers were active. Laundry workers in general, were well employed, trade having increased to such an extent, as to render it necessary for the steam laundry to add another storey. Freight handlers were much in demand. Teamsters and expressmen had a good month. Unskilled labour was well employed.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been very active during the past month, more so than in this particular period during many seasons. The springlike weather has given an impetus to trade generally, and labour, in almost all branches, has been in brisk demand.

As previously forecasted the season will assuredly be one of unwonted activity for all engaged in the building trades. New business blocks, and residences in all parts of the city are already in course of erection. Among the more important buildings to be erected this season, are a new telephone exchange, land titles offices, extensions to the post office, Dominion Bank building, and the Natham-Hopkins block.

Unskilled labour will also be in great demand this summer, and wages are expected to rule high. The city itself has started on an extensive programme

of improvements, which includes sidewalk construction, street paving, sewer and water connections, and boulevarding.

Another milestone in the city's history was passed when the citizens carried a by-law authorizing the Council to grant a franchise to a syndicate of Ottawa capitalists, for the construction and operation of a street railway. The franchise is a term of twenty years, and by its provisions three miles of railway are to be in operation this fall, and three more by the fall of 1911.

Business generally has been active throughout April, and all branches of both the wholesale and retail trade report conditions excellent.

The master builders and contractors of the city have organized a builders' exchange, to be affiliated with the exchange at Winnipeg.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather conditions during the past month have been distinctly favourable for agriculture in this district. In fact, the general opinion among farmers is that the season has been the best for a good many years. A considerable number of farmers have all their wheat sown, and with a continuation of the present fine weather, seeding should be finished, in this district, in about two weeks' time. The seed bed is reported as in splendid condition, with sufficient moisture at present, although, owing to the fact that the snowfall, during the past winter was light, considerable rain will be needed as the season advances. Agricultural labour, especially around harvest time will probably be in keen demand this year. So far the farmers appear to be fairly well supplied.

CONDITION OF PARTICULAR TRADES.

There has been no demand for bricklayers or masons during April, but a very busy season is expected and conditions will quickly improve. Carpenters and joiners, on the other hand, have made an early start, and labour has been in fairly brisk demand. Lathers and plas-

terers have been rather quiet but their season will soon open. Painters and decorators have been fairly busy. Plumbers and gasfitters were fairly active. Iron workers, moulders, machinists and engineers were all fairly active. Electrical workers and linemen were rather quiet, but with good prospects. Blacksmiths, boilermakers, horseshoers, jewelers were busy. Printers and allied trades were very busy.

CALGARY, ALTA., AND DISTRICT.

Mr. Edwin Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in general has been more active than during the previous month, and much more so than during the corresponding month of last year. Carpenters and lathers had a very busy month and were in demand. Masons, bricklayers and stonecutters experienced a dull month, owing to the shortness of material. A shortage in lumber is also making itself felt, and it is expected to become more acute.

Work on the Canadian Pacific Railway Company's freight yards, in East Calgary, has been commenced. The water mains for the suburbs of Hilhurst and Sunny-side are being rushed to completion. Street grading has been commenced at Bankview, as a preliminary to extensive operations in street grading, in various parts of the City. Fifteen miles of sewer pipe have been ordered; this will necessitate the building of 150 manholes beside the necessary catch basins. Excavating for a ten-storey block (stores and offices) has been commenced, to be constructed of reinforced concrete. Contractors are commencing work on the subway, under the Canadian Pacific Railway's tracks. A gang of men has been started on the trunk sewer extension. A by-law will again be submitted to the ratepayers, asking for \$125,747 to complete the City Hall. The carpenters and painters' schedules are under consideration by the employers. A conference is to be held of the leather work-

ers and employers of the Great West Saddlery Company to endeavour to settle without an arbitration the demands made by the men.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a quiet month. Carpenters and joiners were busy with lathers very busy. Plasterers and painters, plumbers, gas and steamfitters were active. Stonecutters and building labourers had a quiet month. Iron moulders, iron workers and helpers had a good month. Machinists, engineers, electrical workers and linemen were busy, with a demand for electrical workers. Blacksmiths, boilermakers and sheet metal workers were actively employed. Printers, pressmen and bookbinders were busy. Tailors were fully employed. Butchers, bakers and confectioners had a busy month. Leather workers were very busy. Laundry workers were active. Hotel and restaurant employés were in demand. All grades of railway and transport employés had a busy month. Teamsters and expressmen were very active. Unskilled labour was well employed.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout Kootenay district, during the month of April, has been about normal in so far as mining was concerned, the surplus miners of the winter months having scattered to various districts. The lumber mills of the district are now operating, though in a few cases, short of mill men. Harmonious relations exist between employers and employés.

The new street railway company has an extension under construction; the length of the extension is nearly one and a half miles. The pole line is completed and part of the route graded, the steel rails are on hand, and the new cars are about to be shipped from Toronto.

The Company expects to have cars running about June 1.

The foundations for the "Annable Block," a brick structure three stories in height, with a frontage of 120 feet, are being laid. The estimated cost of the building is \$60,000.

Many of the fruit trees are now in bloom throughout this district, and a considerable number of young trees have been set out this spring by the fruit growers.

In the War Eagle mine at Rossland, recently, a large body of high grade ore was struck.

The Blue-Bell mine on Kootenay Lake closed down temporarily about April 1, awaiting further and more complete equipment. About fifty men went out of employment, a few of whom went to Alberta to take up farms, while the others have found employment at the surrounding mines.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has greatly improved since last month, likewise over the corresponding month of last year. Owing to the many avenues of employment being opened up there are not many idle men here at present, and what few there are will be placed in a few days if the present fine weather continues. The City Council is considering the advisability of appointing a building inspector, and introducing a building by-law. The plumbers and steamfitters of this city have secured an increase of wages, with the same number of hours per day as heretofore.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy plowing, seeding, etc. The weekly market was well attended; the following are the quotations:—

Beef, hindquarters, per lb., 9 to 10c.
 Beef, forequarters, per lb., 7 to 8c.
 Lamb, per lb., 15c.
 Mutton, per lb., 14c.
 Veal, large, 9 to 10c.
 Veal, medium, 11½c. to 12½c.
 Pork medium, per lb., 12½c.
 Eggs, wholesale, dozen, 25c.
 Eggs, retail, dozen, 30c.
 Butter, wholesale, per lb., 30c.
 Butter, retail, per lb., 35c.
 Fowl, per doz., live, \$10 to \$12.
 Chickens, per dozen, live \$8 to \$9
 Broilers, per dozen, \$4 to \$6.
 Ducks, per dozen, \$15.
 Potatoes, per ton, \$18.
 Onions, per sack, \$1.50.
 Turnips, per sack, 50c.
 Carrots, per sack, 75c.
 Beets, per sack, \$1.
 Parsnips, per sack, 75c.
 Apples, per box, \$1.25 to \$1.75

Fishing.—Very few salmon are being caught in the Fraser just now, the retail trade being barely supplied.

Lumbering.—This industry has been very active, all the mills running full time. One of the largest transfers that ever took place in Canada happened here a few days ago, when the Canada Western Lumber Company acquired possession of the holdings and interests of the Fraser River Lumber Company.

Railway construction.—The British Columbia Electric Street Railway Company is pushing the construction of its line to Chilliwack, and will in a few days call for tenders for the erection of a large depot in this city.

CONDITION OF PARTICULAR TRADES.

Printers, pressmen, carpenters, plumbers, bricklayers, plasterers, lathers, car builders, barbers, bakers, butchers, and in fact all tradesmen are busy at the present time. Steamboat employes are active. Street railway employes are all working; as are teamsters and expressmen. Cigar makers, stenographers, and clerks are active. Hotel and restaurant employes are active, but the supply is equal to the demand.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity prevailed in all branches of industry, especially the building trades.

Job printers notified the Printers' Board of Trade that, after July 1, the scale will be \$4.50 for eight hours, instead of the prevailing \$4.00. ■

The Street Railway Employés Union are negotiating a new wage schedule.

The Ministerial Association was allowed to send delegates to the Trades and Labour Council, upon the same basis as the trades unions. Thirteen trades unions will request the recognition of the working card system on May 2.

The steamship companies reported a dearth of coast seamen. The rapid increase in the number of ships in service was the cause.

The following is the schedule of the Vancouver Shinglers' Union:—

Roofs, plain, per M, \$1.00.
 Roofs, over half pitch, \$1.25.
 Re-shingling, plain, per sq. \$1.75 up.
 Hips, ridges, valleys and freize 3c. per lineal foot, extra.
 Fancy Hips and Ridges, Flashed Valleys extra.
 Shed Dormers, extra, 50c.
 Tight sheeted roofs 25c. per M., extra.
 Side shingling to be done by the square, openings to be measured in as solid \$1.75 per square.
 For using paper on roof or sides 10c. extra.
 Openings between columns to be measured as two separate walls.
 Fancy shingling towers and circular work by the hour.
 Returns No. 2 Shingles—Bay window tops, etc., extra.
 All day work, 75c. per hour.
 Roofs over 27 ft. to eaves 10c. per M. extra.
 Nails over 1½ in. 5c. extra.

Wholesale business continued good, and increased in volume. Prices in all lines of provisions were firm, with a rising tendency. Eggs rose five cents a dozen; butter remained firm. Large supplies of Australian apples arrived. New potatoes arrived from California.

Large tramway extensions will be made by the British Columbia Electric Railway Company.

DISTRICT NOTES.

Stewart, B.C.—Since the new strike of pay ore on Portland Canal, there has been a rush of miners and prospectors from Prince Rupert, California, interior British Columbia and other mining places. About three miles on the American side from Stewart, a new settlement, to be called Portland City, has been started, and is over-crowded.

Port George, B.C.—The town is already booming, there being already a bank, livery stable, two butcher shops, two real

estate offices, two restaurants and a newspaper. Messrs. Blair & Company are building a large general store, six cottages are being built, a school house is being erected, and very shortly a sawmill is to be erected, that will employ 200 men. The townsite was started last year.

Prince Rupert.—A Builders' Exchange was organized. A new daily paper will appear shortly.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district, outside of the mines, has shown an improvement over last month. Outside work has started up, but while there has been a lot of work going on there has been no compliant of any scarcity of men, though there are not as many idle men around as during the last month.

Transportation has been active, both passenger and freight, during the month. Business men report trade as in a healthy state, with fair prospects. There have been no changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are well in advance with their spring work, with no shortage of help.

Fishing.—Outside of the supplying of local markets, there was little activity among the fishermen in this locality. The whaling station on the Gulf is active, as the stations on the outside coast have not started up as yet.

Lumbering.—The sawmills in the district are very busy, the demand being steady for dressed lumber. The logging camps have nearly all started; there are several new camps starting this spring.

Mining.—The coal mines of the district have not been quite as active as last month, some of the new mines having stopped the three shifts and are working only one shift a day. The mine in this city has been idle for a little over a week

owing to a little heating up which has been successfully handled.

Railroad construction on the extension of the railroad is being pushed. The clearing of land by the Canadian Pacific Railway for settlement is also going ahead. There is a considerable area of cleared land on the market.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons report work active. Carpenters and joiners are active, there being more new building of a good style contracted for than in years past. Painters and paperhangers are very

active. Plumbers and builders' labourers are fairly well employed, with blacksmiths and carriage makers active.

Printers have been fairly active during the month. Cigar makers report work as steady. Teamsters and expressmen are active. Unskilled labour has been fairly well employed at clearing for building, and other spring work.

DISTRICT NOTES.

Work is active at *Albemi*, and the business outlook good. The extension of the Eastern and Northern Railway is expected to reach there by the end of the year.

BUILDING OPERATIONS IN CANADA DURING 1909.

A DETAILED statistical return is presented herewith relating to building operations in the leading industrial centres throughout Canada, during the calendar year 1909. The return is similar in general scope and form to those previously issued by the Department with reference to building operations in the years 1905, 1906, 1907 and 1908.

The article is intended to afford an index to the nature and extent of building activity during the period mentioned, and to throw light thereby, not only on the amount of employment rendered available to workmen in the building trades and in the manufacture of building material, but on the general character of industrial development in Canada during the period covered.

The statistics were collected by the Department during the months of January, February and March, information being sought of the number of permits issued in municipalities having a population of 5,000 and upwards and of the declared valuation of the buildings erected therein, the returns being further classified according as the work was in connection with new buildings or repairs. In municipalities in which no system of issuing permits is in use returns based on estimates prepared by local architects, building contractors, assessment commissioners or others in a position to furnish reliable information were secured.

The statistical information collected in this way is presented in full in the accompanying tabular statement, details being added where such were available for the preceding year. A description in detail is given below with reference to the more important features characterizing the operations of the year in the several localities.

The General Result.

It will be seen that detailed information was obtained by the Department with reference to operations in eighty-two localities throughout the Dominion, compared with seventy-three localities in 1908, and fifty-one in 1907, an estimate of the total value of the buildings being obtained in each case. The total value of the buildings erected in the above localities was \$85,133,077. Of this total, Toronto, Ont., contributed \$18,139,247, being, as in 1908, 1907 and 1906, the locality in which building was most active during the year. The city of Winnipeg, Man., with \$9,226,325, stood second; the city of Montreal, with \$7,783,621, stood third; the city of Vancouver, B.C., with \$7,258,565, stood fourth; and the city of Ottawa, Ont., with \$4,527,590, stood fifth.

The following statement shows the localities in Canada, other than above mentioned, where an expenditure of \$500,000 or over in building operations, took place:—

Comparative returns relating to the value of buildings in 1909 and 1908, were obtained in the case of sixty-four localities. These included all the larger centres. In these localities the total value of buildings erected in 1908, was \$51,929,763, and in 1909, \$76,979,007. The increase of building in these localities in 1909, was, therefore, \$25,049,234, or approximately fifty per cent. as compared with 1908. The year 1908, it will be remembered, showed a decrease of building in forty-four localities, of \$5,853,554, as compared with the year 1907, and 1907 in turn showed a decrease in the principal cities, compared with 1906, of \$2,309,381.50.

The localities from which returns were received to the effect that the year was less active than in 1908, were, Halifax and Amherst, N.S.; Charlottetown, P.E.I.; Newcastle, N.B.; Sherbrooke and Hull, Que.; Smith's Falls, Collingwood, Niagara Falls, St. Catharines, Guelph, Berlin, Stratford and Sault Ste. Marie, Ont.; Edmonton, Alta.; and Nelson, B.C., but in none of the above mentioned localities did the decrease amount to \$500,000, whereas in 1908, there were nine such decreases.

There was an increase in the amount of building during the year at Sydney and Sydney Mines, N.S.; St. John and St. Andrews, N.B.; Quebec, Montreal, Three Rivers, St. Hyacinthe and Lachine,

Que.; Ottawa, Kingston, Belleville, Peterborough, Lindsay, Toronto, Welland, St. Catharines district, Hamilton, Brantford, Waterloo, Preston, Galt, Elmira, Woodstock, London, St. Thomas, Chatham, Windsor, Port Arthur, and Fort William, Ont.; Winnipeg, Brandon and Portage la Prairie, Man.; Regina, Moose Jaw and Saskatoon, Sask.; Medicine Hat, Red Deer, Fort Saskatchewan, Lethbridge and Calgary, Alta.; Fernie, Vancouver and Victoria, B.C.

Nature and Extent of Building by Localities.

The following is a brief statement showing the general nature and extent of building operations in 1909, in the more important centres of population throughout Canada:—

Nova Scotia.

Sydney.—Ninety permits were issued for new buildings and repairs amounting in value to \$160,470, compared with a total of \$65,615 in 1908, of \$87,175 in 1907, and of \$118,000 in 1906 and in 1905.

Sydney Mines.—Buildings to the approximate value of \$65,000 were erected during 1909. The estimated value of buildings in 1908, was \$60,000. No system of issuing permits is in practice.

Westville.—The building operations in Westville, during 1909, were valued at \$20,000, being similar in amount to those of 1908.

Halifax.—One hundred and forty permits for new buildings valued at \$501,880, and 407 permits for repairs valued at \$128,870, were issued, making a total of \$630,380, compared with a total of \$857,271 in 1908, of \$626,000 in 1907, and of \$688,000 in 1906. Much of the work done during 1909, was on residential buildings; construction work was also proceeded with on the Technical College, and the engine house and laboratory (brick) in the rear of the college.

Amherst.—The total value of buildings erected during the year, and of repair work done was \$65,000, compared with \$225,000 in 1908. There is no permit system in use here.

Joggins' Mine.—About \$60,000 were expended on building in 1909.

Truro.—Ten permits for new buildings valued at \$30,600, and twenty-one permits for repairs, valued at \$3,545, were issued. Building operations showed more activity than in 1908.

River Hebert.—About \$10,000 were spent on building during 1909.

Prince Edward Island.

Charlottetown.—A list of building operations, repairs, etc., for Charlottetown and the adjacent districts, during 1909, is as follows:—

LIST OF BUILDING OPERATIONS, REPAIRS, ETC.

<i>Repairs:</i>	
Lowden property.....	\$ 300
B. Stewart, residence.....	700
Ross & Matthews, office.....	150
Hegan residence.....	300
Queen's County Jail.....	350
Mrs. Bourke, residence.....	75
T. Handrahan, residence.....	50

	\$37,980

New Brunswick.

Moncton.—Eighty-eight permits for new buildings valued at \$180,610, and nineteen for repairs valued at \$9,500 were issued in Moncton proper, during 1909. The eighty-eight permits issued for new buildings were as follows:—

Class of Building.	Number of permits.
Bank.....	1
Stores.....	2
Single and double tenements.....	70
Shops, warehouses and barns.....	15
	88

In addition to the above, thirty buildings valued at \$49,500 were erected in the suburbs of Moncton, comprising Georgetown, Sunny Brae, Humphreys, Lewisville and Legère Corner. Thus sum added to that expended in Moncton proper, shows the total building operations of Moncton and suburbs during 1909, to have been \$239,610. The total value in 1908, was \$236,200; in 1907, \$157,800, and in 1906, \$118,600.

St. John.—The number and value of buildings erected in 1909, were as follows:

No.	Brick Buildings.	Value.
2	Stores.....	\$32,000
6	Dwellings.....	40,000
2	Hotels.....	41,000

112		\$195,800

RECAPITULATION.

24	Brick.....	\$179,500
112	Wood.....	195,800
136		\$375,300

The record for 1909, shows an increase in the value of building operations of \$105,150 over 1908.

Fredericton.—Sixteen new buildings valued at \$68,500, and repairs amounting to \$33,860, were completed in 1909.

Newcastle.—An estimate of the amount of building done throughout this district in 1909, is as follows:—

Locality.	New Buildings.	Repairs.
Newcastle.....	\$66,000	\$ 4,000
Chatham.....	65,000	20,000
Nelson.....	8,000	10,000
Millerton.....	11,500	
North and South Esk....	3,200
Doaktown & Blackville	6,500	1,600
	\$157,000	\$38,800

Making a total expenditure of \$195,800, compared with an expenditure of \$365,000, in 1908, or a decrease of \$169,200.

Quebec.

Quebec.—One hundred and nineteen permits for new buildings valued at \$686,790, and eighty-five for repairs valued at \$24,729, making a total of \$711,519, were issued. The total value of building operations in 1908, was \$546,248.

Sherbrooke.—Building operations in Sherbrooke during 1909, approximated \$234,000 in value, as against \$345,000 in 1908. The prospects for 1910, are about the same as for 1909. There is no system of permits.

Several industrial and business firms erected new buildings. They are, McKinnon and Holmes, structural steel establishment, \$10,000; Olds Gas Power Company, \$2,000; A. Ames & Sons, cold storage warehouse (addition), \$7,000; Hovey Packing Company (addition), \$5,000; repairs to Stadium, \$3,000; Wilson & Sons, new block, \$15,000; new amusement building and stores, \$12,000; new hotel, \$20,000. The Canadian Pacific Railway Company extended its yards and finished a new round house and coal shoots. Alterations were made in several other establishments, but it is difficult to secure figures, although they must have amounted to several thousands of dollars. The dwelling houses erected during the past year were chiefly for mechanics and those of moderate means. Some sixty-four such houses were erected, being eight in the Centre ward; ten in

the north; thirty in the south ward, and sixteen in the east ward. These houses would average about \$2,500 each in cost.

So far as new work is concerned the prospects are about the same as last year. The Canadian Pacific Railway Company will erect a new station and other buildings; a new Roman Catholic church will go up in the south ward; the Fairbanks Company will extend, as will also the Sherbrooke Machinery Company; J. S. Mitchell will erect a new block, and the Sherbrooke Street Railway will spend \$250,000 on an extension of the system, according to an agreement with the city. So far, the prospects are, according to contractors, that as many, if not more dwelling houses will go up as last year.

In connection with buildings in outside towns the report is that the building trade was never so brisk as last year, and that more dwelling houses were erected than usual.

Three Rivers.—One hundred and forty-six permits for new buildings, representing a value of \$969,900, and seventeen for repairs valued at \$10,450, were issued in 1909, making a total of \$980,350, compared with a total of \$581,900 in 1908. Buildings erected during 1909, for which permits have not as yet been issued included one church, one public market, one convent, one school, one presbytery, and some business places and residences; the value of these is included in the estimate above given.

St. Hyacinthe.—Nineteen new buildings valued at \$249,400 were completed, and repairs to the value of \$22,800 were carried out, making a total expenditure of \$272,200 in 1909, compared with a total of \$126,000 in 1908, or an increase for 1909 of over 100 per cent.

Montreal.—The total number of permits issued for new buildings in the city of Montreal, proper, in 1909, was 1,707, and for repairs 724, the former being valued at \$6,829,927, and of the latter at \$953,694, a total of \$7,783,621, or over fifty per cent. greater than the total of 1908, which was \$5,062,326.

The following is a list of the expenditures on building operations during 1909, in the suburbs of Montreal.

Ville St. Louis.....	\$ 2,100,000
Westmount.....	1,417,600
Maisonneuve.....	1,200,500
Outremont.....	918,500
Verdun.....	722,000
Notre Dame de Grace.....	345,000
Ville St. Paul.....	248,300
Delorimier.....	236,500
(Greater Montreal).....	14,972,021

Lachine.—Seventy-eight permits for new buildings, valued at \$259,385, and nine permits for repairs, estimated at \$4,180, making a total of \$263,565, were issued in Lachine during 1909. In 1908, the value of building operations was \$211,740.

Valleyfield.—New factories to the value of \$50,000, and repairs to the value of \$10,000, making a total of \$60,000, were carried out. The total for 1908, was \$45,000.

St. Johns.—Nine permits for new buildings valued at \$27,250, and twenty-two permits for repairs valued at \$37,965, making a total of \$65,215, were issued in 1909. The Department has no returns for 1908.

Hull.—It is estimated by the civic authorities that about 128 new buildings, at a cost of \$114,500 were erected during 1909. The total value of new buildings in 1908, was \$150,000.

Ontario.

Ottawa.—The following table shows the number of building permits granted during each month in 1909, and the value of the buildings covered by the same.

BUILDING PERMITS ISSUED DURING 1909, AT OTTAWA.
FOR NEW BUILDINGS.

Month.	Number.	Value.
January.....	12	\$ 23,900
February.....	28	66,940
March.....	59	144,125

October.....	72	341,150
November.....	69	205,100
December.....	31	104,125
	683	\$4,527,590

In the year 1908, there were 507 permits, and the value was \$1,794,075. The building inspector in his report on the last season's building operations stated that the value of building permits issued was increased by the several exceptionally large structures authorized. Examples given by him are: Grand Trunk Railway hotel (\$850,000), Grand Trunk Railway station and annex, J. R. Booth's power house, Carling business block, Canada Life business block, Rideau club addition, Sacred Heart church, Woods building and the City Tuberculosis Hospital. He added that many departmental and residential houses of a first-class type were erected.

There were 176 more permits than in 1908, and 328 more than in 1907. Several of the large buildings are far from being completed, and their construction will add to the activity of the 1910 building season. The most noticeable of these are the Grand Trunk Railway station and hotel. The demand for houses renting at from \$15 to \$20 per month attracted considerable investment into that class of building, and many tenements containing two, three, or four dwellings were started and are still proceeding. An evidence that the present year will be active in building operations is shown in the issue of permits for January, amounting to \$57,650, an increase of 137 per cent. over the corresponding month of 1909.

The value of solid brick or stone buildings in 1909 was \$2,763,400; brick veneer, \$1,253,840; concrete, \$352,075; iron clad, \$18,700; wood or frame, \$139,575. The comparative small number of frame houses is partially due to the fire by-law which prohibits this material in many areas. The western side of the city is growing fastest and there was consequently a large increase in the number of dwellings of small cost erected in Dalhousie, Wellington and Victoria wards.

Outside of Ottawa, along the Britannia electric railway line, houses are being built, ranging in value from \$600 to \$4,000, at a rapid rate. Many Ottawans have summer houses along the river beaches and mechanics and labourers

take advantage of instalment schemes offered them to own homes.

Cornwall.—The following new buildings have been constructed during the year 1909:—

One (brick and wood).....	\$ 3,000
Two (brick, 5,000-3,000).....	8,000
One (brick, double tenement).....	5,000
Two (concrete blocks).....	7,500
One (wood).....	2,000
	<hr/>
	\$ 25,500

All of these are dwellings, with the exception of one industrial establishment of concrete (\$3,500).

Smith's Falls.—Thirty-six new buildings were completed during 1909, at

an estimated cost of \$83,400, and repairs were carried on costing \$4,500, or a total expenditure of \$87,900 for building. The total outlay for this purpose in 1908, was \$88,250.

Kingston.—Information furnished by the city engineer's department showed that the total number of permits for new buildings in 1909, was 875, and the approximate value of the same, \$500,000. Building operations in 1908, amounted to \$170,600.

Toronto.—The following is a copy of the official classified list of buildings erected in Toronto during 1909:—

LIST OF BUILDINGS ERECTED IN TORONTO, 1909.

Belleville.—During 1909, approximately \$160,000 worth of new buildings, and \$40,000 worth of repairs, were completed, forming a total of \$200,000, compared with a total of \$178,000 in the preceding year. No system of permits prevails.

Peterborough.—Two hundred and twenty-eight permits for new buildings and repairs, valued at \$343,489, were issued during 1909; the total value the previous year was \$238,963. No separate account of permits for repairs is kept, but a permit is not issued for repairs costing less than \$100.

Lindsay.—The record for 1909, was twenty-four permits, for buildings valued at \$38,000; in 1908, the expenditure was \$36,700.

It will be seen that the total number of permits was 7,184, and that the total valuation of new buildings was, \$18,139,247. In 1908, the total number of permits was, 5,056; and the total valuation, \$11,795,436. Last year's total exceeds that of the preceding twelve months by nearly \$6,500,000. Many of the new buildings were of a very substantial character.

Collingwood.—In 1909, fifty-nine permits for buildings valued at \$76,625 were issued, as against a total valuation of \$84,275 for 1908.

Niagara Falls.—Building operations in 1909, were extensive, and the total value of new buildings and improvements to other buildings was about \$500,000. This is a decrease of \$190,000 from the estimate for 1908, but an increase of \$40,000 over that for 1907. One factory was erected at a cost of \$37,000, and the electric power companies spent probably \$100,000 on new buildings and extensions of others (not including cost of machinery, &c.) A hotel to cost \$30,000 was nearly completed. Dwellings erected were numerous and of good class, the total expenditure being about \$310,000. Repairs to the amount of \$15,000 and small factories, storehouses and stables account for the balance of expenditure. The outlook for 1910, is excellent, the chief works planned being those of the power companies.

Welland.—The total expenditure for

building in 1909, was \$703,600, compared with \$525,000 in 1908, \$403,000 in 1907, and \$450,000 in 1906.

St. Catharines.—Eighty-one permits for new buildings valued at \$188,900, and eighty permits for repairs valued at \$49,350 were issued during 1909, in St. Catharines, proper, making a total expenditure of \$238,250 as against a total of \$403,705 in 1908. The above includes about thirty workmen's residences, and two schools valued at \$28,000 and \$40,000 respectively. In the district surrounding St. Catharines approximately twenty-five new buildings, the valuation of which would be \$1,545,000 were erected. Included among these is the New Lincoln paper mill at Merritton and a new pulp mill at Thorold.

Hamilton.—The report of the Building Inspector of Hamilton for the year ended October 31, 1909, showed that 566 permits were issued during the year, representing a total value of \$1,547,425, being an increase of \$216,243 over 1908. The classification of the buildings is as follows:—

	No.	Value.
Brick dwellings.....	400	\$ 722,200
Frame dwellings.....	118	110,700
Alterations to dwellings.....	59	30,805
Stores and office buildings.....	52	144,700
Churches and schools.....	9	88,700
Theatres and halls, etc.....	2	73,000
Warehouses.....	13	90,100
Factories and additions.....	38	192,850
Car barns.....	2	65,000
Cement buildings.....	6	7,800
Stables and other buildings.....	31	21,570
Total.....	730	\$1,547,425

The number and value of permits from month to month were as follows:—

Year.	Month.	No.	Value.
1908.....	November.....	38	\$108,075
1908.....	December.....	33	53,400
1909.....	January.....	8	12,850
1909.....	February.....	9	10,700
1909.....	March.....	64	172,350
1909.....	April.....	92	225,380
1909.....	May.....	42	84,195
1909.....	June.....	64	144,945
1909.....	July.....	61	205,475
1909.....	August.....	47	102,755
1909.....	September.....	52	181,950
1909.....	October.....	56	247,350
Total.....		566	\$1,547,425

For the calendar year 1909, 587 permits were issued for new work and repairs, valued at \$1,623,100. The classification of this work was as follows:

	No.	Value.
Brick dwellings.....	433	\$788,200
Frame dwellings.....	118	110,700
Alterations to dwellings.....	59	30,805
Stores and office buildings.....	52	144,700
Churches and schools.....	9	88,700
Theatres and halls, etc.....	2	73,000
Warehouses.....	13	90,100
Factories and additions.....	39	202,525
Car barns.....	2	65,000
Cement buildings.....	6	7,800
Stables and other buildings.....	31	21,570
Total.....	764	\$1,623,100

Brantford.—The value of new buildings erected in 1909 was \$370,800, and of repairs carried out \$68,535. The number of permits issued in the former connection was 211, and in the latter case, ninety-seven. On new churches and alterations the sum of \$24,775 was expended; on new stores and repairs, \$39,250; on new factories and extensions, \$43,200; on the Collegiate Institute, \$100,000 and 155 new houses were erected costing from \$900 to \$7,000 each. In 1908, the aggregate was \$308,155, in 1907, \$510,000 and in 1906, \$409,675, compared with \$439,335, the total for 1909. The outlook for 1910, is bright.

Guelph.—According to information obtained from the city engineer, seventy-three new buildings were erected at an estimated value of \$127,625, compared with an aggregate of \$331,770 last year. The sum of \$82,330 was expended on local improvements.

Berlin.—Seventy-nine new building and eleven repair permits were issued of an aggregate value of \$232,365, compared with a value of \$250,000 in the previous year.

Waterloo.—The record of the year was as follows:—

Class of Buildings.	Value.
24 Residences.....	\$ 45,600
1 School house.....	15,000
1 Business block.....	4,000
1 Warehouse.....	3,500
1 Addition to factory.....	3,500
1 Office building.....	3,000
1 Cold storage building.....	3,000
Alterations and repairs.....	1,800
	\$79,400

The aggregate value for 1908, was \$58,850.

Preston. — Fifteen new residences valued at \$32,000; two business blocks

valued at \$16,500; one hydro-electric station, valued at \$19,000; one Carnegie library building valued at \$8,000; one Pullman car, a coach building and alterations and repairs valued at \$3,450, making a total of \$85,950 were completed in 1909, compared with an expenditure of \$71,000 in 1908.

Galt.—An aggregate sum of \$172,500 was expended on new buildings and repairs, classified as follows:—

Class of Buildings.	Value.
1 Addition to a school.....	20,000
4 Business blocks.....	30,000
2 Factories.....	25,000
35 Residences.....	87,500
Alterations and repairs.....	10,000
Total.....	\$172,500

The record in 1908 was \$157,500.

Elmira.—During 1909, fifteen residences were built at a cost of \$27,000; one factory building at a cost of \$5,000 and alterations and repairs at a cost of \$1,200, or a total value of \$33,200, compared with \$31,000 in 1908.

Hespeler.—There were built in 1909, one church valued at \$30,000; five dwelling houses valued at \$7,100; one addition to a factory valued at \$20,000; and repairs valued at \$1,300; making a total of \$58,400.

The total sums expended in Berlin and district in building operations during 1909, were as follows:

Locality.	Aggregate amount.
Berlin.....	\$232,365
Waterloo.....	79,400
Preston.....	85,950
Galt.....	172,500
Elmira.....	33,200
Hespeler.....	58,400
Total for district.....	\$661,815

Woodstock.—The building operations of the year amounted to \$165,300. This total includes \$25,000 for a knitting factory, \$18,000 for the Tobin Arms Company's factory, the balance being principally for residences. The aggregate expenditure in 1908, was \$102,450.

Stratford.—Sixty-one permits for new buildings and 107 for alterations and re-

pairs, making a total of 168 permits for an aggregate sum of \$158,964, were issued in 1909. The total value spent in building in 1908, was \$163,607. Contractors report that business looks bright for the building trades during 1910.

London.—There were issued in 1909, 684 building permits covering the expenditure of \$850,134, as against an aggregate value of \$464,180 in 1908, or a gain of 83.14 per cent.

Strathroy.—The sum of \$28,500 was expended in building operations, including a new furniture factory, new store fronts and repairs and alterations to dwelling houses.

St. Thomas.—One hundred and twenty-eight permits for new buildings aggregating \$256,375 and fifteen permits for repairs estimated at \$5,225, forming a grand expenditure of \$261,600, were issued during 1909; the aggregate for 1908, \$219,300. Prospects for the coming season are good. The Michigan Central Railway Company contemplates extensive changes in their building, which should give employment to many, and contractors are of the opinion that several new residences will be erected during the season of 1910.

Chatham.—During 1909, forty permits for new buildings costing \$88,332.50, and eleven permits for repairs costing \$22,288, forming an aggregate of \$110,600, compared with \$57,902 in 1908, were issued, showing an increase of over forty-five per cent. The class of buildings erected in 1909, consisted of the Ursuline Academy, \$27,000; addition to High School, \$17,500; hotel, \$5,000; addition to gas company's premises, \$4,500, the balance being expended for ordinary residences averaging from \$2,000 to \$3,000 each. The year throughout the district was a quiet one, though Thamesville, with a population of 900, expended in buildings \$14,000, which included a bank and a few residences.

Windsor.—One hundred and ninety-eight permits for new buildings and repairs, approximating \$431,060 were issued. In 1908, the estimate was \$350,000.

Sault Ste. Marie.—The approximate value of building operations in 1909, was

\$48,000, compared with \$69,200 in 1908.

Fort William.—A total of \$2,970,365 covered by 729 permits was the record of Fort William for 1909. In 1908, the total was \$1,560,865, thus showing a gain for 1909, of 90.1 per cent.

Port Arthur.—Building operations to the extent of \$500,000 were carried on during 1909, compared with an expenditure of \$293,000.

Manitoba.

Winnipeg.—Altogether there were 2,497 permits issued covering 2,942 buildings erected at a total cost of \$9,226,325, compared with an expenditure of \$5,513,700 in 1908, of \$6,455,350 in 1907, of \$12,760,450 in 1906, and of \$10,840,150 in 1905. The activity in building operations in 1909, was, therefore, 67.33 per cent. greater than in the preceding year.

Brandon.—One hundred and forty-one permits for new buildings and repairs, aggregating in value \$350,120, were issued in 1909. The aggregate value of building in 1908, was \$293,000.

Portage la Prairie.—The sum of \$195,000 was expended on buildings in 1909; in 1908, the amount spent was \$120,000.

Saskatchewan.

Regina.—Permits covering an expenditure of \$744,479 were issued in 1909. The above total showed an increase of fifty-six per cent. over the previous year.

To this amount should be added progress estimates paid on the Provincial Parliament Buildings during the year, the amount totaling, \$505,887, this bringing the total up to \$1,250,366. In addition to this there were some residences built just outside the city limits, and additions to factories which would total, at a conservative estimate another \$25,000.

Among the permits issued during the past season were no exceptionally large buildings, with the single exception of the City Hospital (\$103,000), but a feature of the building for the past year has been the large number of first-class residences that have been erected.

Moose Jaw.—The year 1909, goes on record as the most active building year in Moose Jaw's history. The total expenditure on buildings, estimated from information recorded at the City Hall, together with that furnished by local architects and contractors was \$1,007,500. This is an increase of slightly over 100 per cent. over last year, when the total figures were \$500,000. The following are the most important expenditures on buildings:

Class of Buildings.	Value.
Collegiate Institute (completed).....	\$130,000
South Hill School.....	25,000
Y.M.C.A. (completed).....	40,000
Anglican Church.....	35,000
Niel McMillan, store, 50 x 96.....	80,000
Simington extension 32 x 54.....	12,000
Mathews, Ferguson store 27 x 70.....	10,000
Rat Portage Lumber Company's warehouse	2,500
Elson's tenement, six houses.....	15,000
J. F. Lindsay, Imperial Bank, and new store	
100 feet frontage.....	35,000
T. W. Robinson Co., extension of stores....	20,000
Mitchell, Hembroff, Maybee Ltd., extension	10,000
Mitchell, Hembroff, Maybee, Ltd., warehouse	2,000
John Grayson, store 27 x 110.....	15,000
Moose Jaw Hardware, new store 27 x 54....	8,000
Kent, "Brown Ltd., extension.....	8,000
Bellamy, 3 stores.....	2,500
Bogues, new store, 25 x 80.....	10,000
Manley, Loney Company, office.....	1,000
New coal sheds.....	2,500
Immigration Hall.....	3,000
Foundry.....	1,000
Alex. MacDonald, wholesale grocery Co.,	
50 x 100 feet.....	25,000
New Fire Hall.....	35,000
Extensions to Saskatchewan Flour Mills....	40,000
Exhibition Buildings.....	4,000
Wing to Hospital.....	5,000
Basement to Apartment Block.....	10,000
Enlargement of Stores.....	10,000
New Bridge on Main Street (leading South)	60,000
Total.....	\$607,500
Estimated Expenditure on private residences	500,000
Total.....	\$1,007,500

The building prospects for 1910 are for an even greater amount of construction; while the number of new residences will, no doubt, equal this year, the amount expended on larger buildings will be much greater. There are already in sight a Lands' Title Office, an Armoury, a new post office and two banks, with several warehouses in prospect.

Saskatoon.—This locality records the greatest proportional increase in building activity in the Dominion, building operations in 1909, aggregating \$1,002,905, com-

pared with \$115,625, or an increase of 767 per cent.

Alberta.

Edmonton and District.—New buildings were erected and repairs carried out during 1909, valued at \$2,128,161. In 1908, the aggregate was \$2,549,847. The following is a list showing the class of buildings and value:—

Class of Buildings.	No.	Value.
Residences.....	461	\$ 662,335
Stores.....	39	497,108
Schools.....	4	116,200
Churches.....	4	83,950
Convent.....	1	25,000
Hotel and Apartment Houses.....	4	376,300
Factories.....	3	15,200
Curling rinks.....	2	5,000
City power plants.....	3	76,820
G.T.R. round house.....	1	60,800
Foundries and machine shops.....	3	41,500
Stables.....	80	30,990
Excavations.....	2	900
Warehouses.....	20	48,090
Additions and alterations.....	233	87,968
Total.....		\$2,128,161

The following list shows the extent of building operations of several localities in the Edmonton district:—

1909.			1908.	
Locality.	No.	Value.	No.	Value.
Red Deer.....		\$ 50,000	40	\$ 40,000
Innisfail.....		20,000		No returns.
Fort Saskatchewan.....		36,330	14	18,100
Strathcona.....	60	573,000		No returns.
Daysland.....		75,300		No returns.

Medicine Hat.—The record for 1909 was 108 buildings, valued at \$228,168. The aggregate value in 1908, was \$138,072.

Calgary.—Seven hundred and seventy-seven permits representing a value of \$2,420,450 were issued in 1909, as against an aggregate value of \$1,004,520. The following is a classified list of the buildings erected in 1909, with values thereof.

Class of Buildings.	No.	Value.
Warehouses.....	15	\$ 278,640
Schools.....	4	148,800
Elevators and grain tanks.....	5	178,400
Private residences.....	617	1,033,350

For 1910, there is every indication of an increase in building over 1909. During the past few months a number of sites have been procured by large business firms, who state they will erect upon them large business premises and warehouses.

Lethbridge.—Building operations aggregating in value \$1,268,215 were erected last year, compared with \$369,145 in 1908, or an increase of over 243 per cent. The year 1909, was the most active building year in the history of Lethbridge far outstripping the year 1908.

British Columbia.

Fernie.—Building activity was very pronounced in Fernie during 1909, amounting to an aggregate total of \$1,374,700, as compared with a sum of \$250,000 in 1908, or an increase of 450 per cent.

Nelson.—The following estimate obtained from contractors shows the class of buildings erected in Nelson during 1909, together with their value:—

Class of Buildings.	No.	Value.
New brick buildings.....	3	\$75,000
New frame buildings, business.....	3	20,000
Frame dwellings.....	25	50,000
Alterations and repairs.....	30,000
		\$175,000

In 1908, the aggregate value of buildings was \$440,000. The outlook for 1910, at present may be said to be normal or about the same as last year.

Vancouver.—The building total for Vancouver for the year 1909, as announced by the Building Inspector, stands at \$7,258,565, an advance over the record of 1908 (\$5,950,893) of \$1,307,672, or twenty-two per cent. There were 2,052 applications for permits made, as against 1,698 for the year previous.

Victoria and district.—The past year has broken all records of the city in building, the aggregate amount spent in buildings within the limits of the city during the past twelve months being \$1,773,420, as compared with \$1,314,740 in 1908. The increase during the year was about thirty-five per cent, in value. The activity in building operations has been shown all over the city in

handsome residences, business blocks and additions to the industrial plants. Some of the larger buildings for which permits were issued during 1909, were: the six-storey Pemberton block, a new wing on St. Ann's Convent, two new large public schools, the Royal Bank, two new business blocks built by wealthy Chinese merchants. Bannerman & Horn's new block, and seven other blocks of stores and office buildings.

The year 1910, has opened with very bright prospects, and it is fully anticipated that last year's record will be equalled if not passed; already permits have been taken out for some large buildings, amongst which are the "Times" five or six-storey building, the McCallum block, and the Calbert building.

The following is a copy of the official classified list of buildings erected in Victoria during 1909:

WOODEN BUILDINGS.

	Cost.
214 One-storey dwellings.....	\$ 276,005
152 One and a half storey dwellings.....	373,560
30 Two-storey dwellings.....	113,850
1 Two and a half storey dwelling.....	9,000
1 Three-storey dwelling.....	12,000
1 Three-storey private hotel.....	10,000
2 Greenhouses.....	1,500
26 Barns, garages, etc.....	11,970
2 Churches.....	7,300
2 Boathouses.....	600
Plumbing shop.....	1,250
Brewery.....	9,000
Stores, etc.....	12,400
Additions to dwellings and stores.....	33,695
Total.....	\$ 872,130

CONCRETE AND BRICK BUILDINGS.

	Cost.
14 Stores and offices, two storeys.....	\$ 155,750
8 Stores and offices, three storeys.....	142,550
2 Stores and offices, four storeys.....	38,000
1 Convent, etc., four storeys.....	60,000
1 Store and office building, six storeys.....	250,000
1 Dwelling, one storey.....	5,000
2 Schools.....	103,000
2 Theatres.....	8,500
2 Cabin buildings.....	4,700
Pump house.....	3,850
Additions to stores and churches.....	17,640
Engine house and blacksmith shop.....	1,200
Work shops, store rooms, etc.....	6,850
Stable and smoke house.....	750
Carriage shop.....	3,500
Total.....	\$ 801,290

RECAPITULATION,

Total wood buildings.....	\$ 872,130
Total brick and concrete buildings.....	801,290
Sundry repairs, etc., not included in above....	100,000
Total for the year.....	\$1,773,420

The Building Inspector concludes his report with the following remarks:

"The total amount of building operations for the year is the largest in the

history of the city for any one year, and from present indications, I believe we may safely expect that the coming year will be better still.

AN ACT TO PROVIDE FOR THE INVESTIGATION OF COMBINES, MONOPOLIES, TRUSTS AND MERGERS.

ON May 3, the Royal assent was given to the Bill entitled: "An Act to provide for the Investigation of Combines, Monopolies, Trusts and Mergers".

The measure in question was introduced by the Minister of Labour, in the House of Commons, on January 18, on which occasion a short statement in explanation of its purpose and of the procedure thereunder, was made by the Minister, to which reference has already been made in the February number of the *Labour Gazette*.¹

In his speech on the second reading, on April 12, the Minister dealt with the reasons which had prompted the introduction of this legislation at the present time, the object which it was hoped that the measure would serve, and the spirit in which it had been brought before Parliament. The Minister discussed, also, the trust problem as it had been viewed by public men, and by leading economists in other countries, and in this connection reviewed briefly the legislative measures which had been adopted in Canada, in the United States, in various European countries, and in Australia, for the protection of the public against the abuse of the privilege of industrial and commercial combination.

The ensuing debate on the Bill, in the House of Commons, was participated in by the following Members²: Messrs. E. N. Lewis (West Huron); Michael Clark (Red Deer); John Haggart (South Lanark); M. Y. McLean (South Huron); Richard Blain (Peel); F. F. Pardee (West Lambton); J. A. Currie (North Simcoe); T. S. Sproule (East Grey); William Wright (Muskoka); and Morley Currie (Prince Edward County). On the same day, the Bill was considered in Committee of the Whole.

On April 25, the Bill was further considered in Committee of the Whole, and

was reported with certain amendments. One of these amendments was designed to make clearer the intention that the proposed law should be equally applicable to the investigation of combines operating to the detriment of producers as to the case of combines which were believed to be injurious to consumers. In the interpretation Section (No. 2 of the Bill), the definition of a combine for the purposes of the proposed law was amended by adding the words, "to the detriment of consumers or producers of such article of trade or commerce", so as to read as follows:—

"(c) 'combine' means any contract, agreement, arrangement or combination which has, or is designed to have, the effect of increasing or fixing the price or rental of any article of trade or commerce, or the cost of the storage or transportation thereof, or of the restricting competition in or of controlling the production, manufacture, transportation, storage, sale or supply thereof, to the detriment of consumers or producers of such article of trade or commerce, and includes the acquisition, leasing or otherwise taking over, or obtaining by any person to the end aforesaid, of any control over or interest in the business, or any portion of the business, of any other person, and also includes what is known as a trust, monopoly or merger."

In Section 5, dealing with applications for the establishment of Boards of Investigation under the Act, an amendment was made to provide that applications must bear the signatures of not fewer than six persons, "British subjects, resident in Canada, and of full age". An amendment was made, also, in Sub-section 4, of Section 5, respecting the form of statutory declaration to be furnished by each person whose name is appended to an application under the Act. As amended, it will be necessary for each of the applicants to

declare that "the alleged combine operates to the detriment of the declarant as a consumer or producer."

An amendment was also made to Section 15, containing the form of oath which must be taken by members of Boards before entering upon the exercise of the functions of their office, by adding the words: "That I am not immediately connected in business with any of the parties applying for this investigation, and am not acting in collusion with any person herein".

On motion of the Minister, a new section (No. 48) was added to the Bill, in the following terms:

"48. This Act shall not be construed to repeal, amend or in any way affect *The Trade Unions Act*, chapter 125 of the Revised Statutes, 1906."

To make plain the purpose of this section, the Minister communicated to Parliament, the terms of a letter which had been received from the Dominion Trades and Labour Congress, in the following terms, the Minister observing that the request contained in this letter appeared to be a perfectly reasonable one.

"OTTAWA, ONT., March 14th, 1910.

"HON. W. L. MACKENZIE KING, C.M.G.,
Minister of Labour,
House of Commons,
OTTAWA.

"DEAR SIR:—

"Regarding Bill (No. 101) of this session, the Combines Investigation Act, introduced by you on January 18, we, the Executive Council of the Trades and Labour Congress of Canada, representing various trade and labour organizations throughout Canada in *re* legislative enactments, have had the said Bill under careful consideration.

"From the title of the Bill we gather that it is intended to apply only to such combines, monopolies and mergers as may enhance prices or restrict competition to the detriment of consumers. As the working classes compose the largest body of consumers, we believe that they, more than any other class in the community, are likely to suffer the most through the enhancement of prices or anything that

may prove of general detriment to consumers, and consequently they may be expected to view with favour any legislation which may result in the betterment of their conditions.

"We realize that trusts and monopolies may become not merely a serious menace to consumers through the methods which they have sometimes employed to enhance prices, but that these powerful aggregations of capital may also become a serious menace to labour, by their power where they have control of industrial establishments, to force unfavourable conditions upon workingmen, as well as producers and consumers, through the closing up of establishments or by other arbitrary methods of procedure, and we, therefore, feel that any measure which will secure publicity where such unfair methods are resorted to, cannot be other than of service to all classes in the community.

"We are most anxious, therefore, that any legislation calculated to improve the condition of the working classes of this country should receive the support of Parliament. At the same time, we feel it most important that care should be taken to see that any rights and privileges secured to the working classes by past legislation should in no way be impaired. The Trades Union Act of 1872, which forms chapter 135 of the Revised Statutes of Canada, was passed to secure to workingmen certain rights as members of trade unions. We do not think it is the intention of your Bill to, in any way, take away any rights already secured to labour by legislation. As, however, some doubt has been expressed on the possible effect of the measure in this respect, we think the intention of Parliament, in this particular, should be made plain, and would, therefore, suggest the insertion of the following clause:—

"This Act shall not be construed to repeal, amend, or in any way affect chapter 125 of the Revised Statutes, 1906, intitled: 'An Act respecting Trade Unions.'

You will see that the insertion of such a clause gives to trade unions now, no rights or privileges, but merely guarantees to them the enjoyment of rights which they have had by statute for some thirty-eight years.

"Similarly, we will say that we do not think your Bill contemplates depriving organizations of capital of any rights which they may enjoy by statute, at the present time, nor do we think it should. Labour does not ask more than it is prepared to give.

"Should, therefore, Parliament see well to insert the safeguard herein suggested, we do not hesitate to say that the Bill would have the hearty endorsement of the organizations which we represent, and which are some 628 in number, and have a total membership of 40,738.

"Yours very respectfully,

"(Sgd.) WM. GLOCKLING,

" "GUS. FRANCO,

" "P. M. DRAPER,

Executive Council,

Trades and Labour Congress of Canada."

Experience had shown that the legislation of 1889, had not been effective in dealing with the evil of trusts and combines, but that, on the contrary, its real effect had been to prevent the investigation which might otherwise have taken place. The necessity which it involved of branding as criminals any body of men joined together for commercial purposes, before finding out whether or not they had been guilty of any criminal offence, was a step which very many persons would hesitate to take. There was no doubt that this necessity had prevented many an investigation which would have been in the public interest. Therefore, the present measure did not propose to place persons accused of being concerned in an unlawful combine, in the position which defendants would occupy in a criminal court, but rather would treat them as persons whose business, for the time being, was examined into to ascertain whether or not it was being carried on in a fair and proper manner.

In 1897, an amendment was made to the Customs Tariff Act by which it was provided that if the Governor-in-Council had reason to believe that a trust, combine or association existed among manufacturers, which was unduly enhancing prices, an investigation should be ordered into the operations of the alleged combine,

and that, if upon such inquiry, it was found that an injurious combine existed which was benefited by the Customs tariff, the tariff might be either reduced or abolished on the articles affected, so as to afford to consumers the redress to which they were entitled.

*"Office of Secretary-Treasurer,
Trades and Labour Congress of Canada.*

For purposes of convenience in the procedure under the Act, a schedule was also added, containing: (1) the form of application for an order directing an investigation under the Act; and (2) the form of order by a judge, directing an investigation under the Act.

On April 26, the Bill was read a third time and passed by the House of Commons, under the title of "An Act to provide for the investigation of Combines, Monopolies, Trusts and Mergers".

The Bill was read a first time in the Senate, on April 27, and a second time on the following day. It was considered by the Senate in Committee of the Whole, on May 2, and reported therefrom without amendment. On motion for a third reading, the word "unduly," where it appeared before the words "to restrain or injure trade or commerce," was stricken out of Sections 22 and 23, so as to make the same conform with Section 498 of the Criminal Code. An amendment was also made to Section 32 by adding the words, "from any part of Canada", so as to make it quite clear that Boards under the Act should have the power to enforce the attendance of witnesses from any part of Canada.

On the same day, May 3, the House of Commons concurred in the foregoing amendments, and on May 4, as above mentioned, the Bill was assented to by His Excellency the Governor General, and passed into law.

In his speech on the second reading of the Bill, the Minister of Labour dealt, in opening, with the very serious rise in prices, and in the cost of living in Canada and in the United States which had occurred within the past few years, and which was attracting so much attention at the present time. This increase in the cost of living had not been confined to any one

class of the population, but was a serious matter to rich and poor alike, and especially to the wage-earning classes, and to persons of limited or fixed income. In the popular mind the increased cost of living was associated with another phenomenon, namely, that of the trusts and mergers which had been a conspicuous feature of the industrial and commercial development of recent years. The rise in prices, the growth in trusts mergers constituting the two outstanding phenomena, the one a matter of daily experience, the other of daily observation, the public had come to believe that in some way or to some degree the one had been the cause of the other. The Minister was of opinion that this conclusion might be justified in some particular cases, but that the full explanation of the increased cost of living of to-day was not to be found in this cause alone. Whilst trusts and mergers might have increased prices in some instances, they had not always had that effect, and he would like the House to understand that in introducing the present legislation no attempt was being made to legislate against combines, mergers and trusts as such. The intention, rather, was to place some restraint on these large aggregations of capital so that the advantages accruing from them might be, in some measure, secured to the public who had granted these large combinations the wide powers which they enjoyed.

An investigation conducted by the Department of Labour of Canada had shown that the prices of various farm and field products in this country had increased during the past ten years, from 30 to 40 per cent. over the average prices for the years 1890 to 1899 inclusive. In manufactured articles the increase had not been as marked, although during the past ten years there had been a very perceptible upward tendency in many lines of manufactures.

Two or three years ago an investigation with respect to the increase in the cost of living had been made in connection with the Royal Commission appointed to inquire into conditions in the Civil Service. Referring to this inquiry, he found that

for families living in Ottawa, on fixed incomes varying from \$600 to \$900, the cost of living in the decade between 1897 and 1907, had increased between thirty per cent. and thirty-five per cent. Of course, the rate of increase in the cost of living was more considerable to people on smaller incomes. The rates, as shown by this inquiry, were:—

Amount of Income.	Rate of Increase.
\$ 300	34%
1,200	30%
2,000	25%

A special report, based on the results of this investigation into wholesale prices in Canada, was now in course of preparation, and would, he believed, prove one of the best reports on prices ever produced on this continent. From this inquiry, it would appear that on certain classes of commodities, the classes on which the masses of the people mainly depend,—grains, fodders, animals and meats, dairy produce and foods, hides, leathers, boots and shoes, and the like,—the increase had been very much higher than the average, and had ranged anywhere from thirty per cent. to fifty per cent. These figures were borne out by investigations made in other countries. In the United States a special inquiry under federal authority into the causes of the increased cost of food and other products had shown that prices in that country had increased during the past decade from twenty-five to fifty and seventy per cent. In Great Britain prices had also risen materially, although not to the same extent as in the United States and in Canada.

Trusts and Mergers.

Continuing, the Minister quoted from Nelson's Encyclopedia of 1909, and also from Mr. John Moody's work, entitled "The Truth about the Trusts," statistics showing the remarkable growth of the trust movement in the United States in recent years. The number and the immense capitalization of these corporations should, he thought, impress on every one the tremendous power which had thereby been placed in the hands of a few men, and point out the necessity for

some form of state control so that the powers of combinations might not be exercised to the detriment of individuals. No exception could be taken to a trust doing all that was justifiable to further the interests of those whose capital was invested therein, but the business should be carried on with due regard to the interests of the large body of consumers who make up society. While this rapid growth of trusts and mergers had occurred in the United States a similar movement, although not on so large a scale, had manifested itself in this country. It had been asserted by the "Monetary Times", that the formation of consolidations and mergers in 1909 had constituted an outstanding feature of the industrial and financial situation in Canada during that year. Since the beginning of the present year scarcely a day had passed that mention was not made in the press of some new consolidation or merger. The fact that the formation of these large corporations had coincided with such a remarkable increase in prices had created in the minds of the Canadian people an impression that the two were intimately associated with one another, and the people were accordingly demanding some form of legislation which would enable them to say whether they were right or wrong in this conclusion.

The question was: How could the public secure for itself some of the benefits to be derived from the advantages of large combinations, without suffering from the possible evils which appeared to be more or less incident to the increasing power of large capitalistic organizations

The Minister referred to the principal Canadian mergers and consolidations which had taken place in 1909, and also to those which were engaging attention at the present time. In this connection reference was made to an article in the "Montreal Star" of March 14, of the present year, relating to an alleged combine among various ocean steamship companies in respect of trans-Atlantic freight rates on westbound traffic to Canada, and to a proposed increase in the rates of ocean freights by all lines comprising the Canadian North Atlantic Westbound

Freight Conference. In this article Mr. Richard Grigg, British Trade Commissioner in Canada, was quoted as having stated that "it was alleged, and very generally believed, that an understanding exists between the Canadian North Atlantic Westbound Freight Conference and lines of steamers from Great Britain and the Continent to New York, Boston, and Portland, and that these are, therefore, regulated by combination." It was further asserted in this article that the natural result of such a condition would be to lessen the value of the British preference, while United States exports to Canada, being carried by rail and therefore not subject to the same increased charges, would profit by the handicap to British trade.

It was noteworthy in connection with the discussion of the problem of trusts and mergers that the largest industrial combinations in this country had escaped criticism altogether, namely, the railway companies. The latter, however, were already subject to the authority of a body known as the Board of Railway Commissioners which was vested with authority to enquire into their rates and methods of management.

The Minister believed that if the present Bill were passed into law that a great deal of the agitation in Canada, against industrial and commercial combinations as such would cease altogether, because the public would then realise that a means was provided of protecting the public against any combination which used its powers in a manner detrimental to the public interest.

Causes of Increased Prices.

Referring to the increased cost of food and other products, the Minister observed "In so far as the rise is due to the discovery of new sources of wealth, to the increased investment of foreign capital in the Dominion, to the opening of new areas to cultivation, to larger and wider markets, to increased settlement of hitherto unsettled parts, to the increased number of people who have to be fed, to increased transportation, storing and refrigerating facilities, to the prevention of waste, to improved methods of pro-

duction and distribution, the rise is to be welcomed as an actual increase in the wealth of the world, and as reflecting the increased prosperity of our time, a prosperity in which the farmer, the mechanic, the business and professional man have all shared to a greater or less degree." In the study of the history of the movement of prices in Canada it would, he thought, be seen that the causes above mentioned had operated to a very considerable degree. There were, however, other causes contributing to the rise in prices, among which the Minister specified the extravagance of the wealthy classes, and the improvement in the standard of living which had occurred within recent years among all classes in North America, the immense increase which had taken place in the world's production of gold, the very large increase of population in Canada, and the unprecedented expenditures on public works, and undertakings incidental to the industrial and commercial expansion of the country within recent years. The increased prices had made the working classes feel the necessity for increased wages, and, on the other hand, the increased wages had resulted in increased prices. High wages in the centres of population had led many to forsake the farms for the centres of population, which, in turn, accounted, at least in part, for the increased prices of farm produce. Another element in the situation was the increased demand for Canadian produce in foreign countries, due to improved methods of transportation, the efforts of commercial agencies abroad, and the Government's policy of trade development. Expenditures during the past decade on wars and warlike preparations by other nations had diverted a large amount of capital which might otherwise have gone into productive industry.

The Customs Tariff and the Combines.

Two other contributing causes remained—the Customs tariff and the combines. The tariff, undoubtedly, had the effect of excluding foreign competition up to a certain point, with a possible resultant where industries combined to

gain full advantage of the protection afforded of an increase in the prices of some of the commodities, which are produced within the tariff wall. It did not follow that a tariff was necessarily injurious in the long run. The effect of a tariff might be to stimulate industry generally, so that in the long run the people would be better off. It was not, the Minister said, his intention to argue at the moment the advantages, pro and con, of tariff, but simply to point out that in the United States and Canada prices ranged at a much higher level than they did in a free trade country like Great Britain, and that the differences while not wholly attributable to their respective tariff policies, might be in part due thereto. Where competition was limited from without, and industry was carried on within by only a limited number of producers, a very strong inducement was put in the way of the domestic producers to unite their forces and gain for themselves the full benefit of the incidental protection which the tariff afforded. The object of the present measure was to see that where an advantage was given to any industry through the tariff, that the whole of such advantage should not necessarily accrue to those who were engaged in the manufacture but that some of it should be conserved for the general public in whose interests, as a whole, the tariff was framed. Another point which the Minister emphasized was that trusts and combines are not necessarily injurious but that on the contrary they might be of distinct advantage if their operations were subjected to effective control. The advantages of combinations were set forth from time to time in newspaper advertisements, and were expressed also in the writings of leading economists. In this connection the Minister referred to Professor J. W. Jenks' work, entitled "The Trust Problem," and to a work by Mr. Wm. E. Collier, entitled "The Trusts—What can we do with them? what can they do for us?" The advantages of large combinations of capital were so obvious that if these organizations had regard to the public interest as well as to the private interest of their share-

holders, there would be no need of any legislation to control their operations. Unfortunately human nature, being what it is, these organizations did not consider primarily the good of the nation as a whole, and it was, therefore, the business of the Government to see that no private interest was allowed to operate against the public good.

Having thus referred to the advantages of combination, the Minister quoted, also, from a pamphlet written by Mr. Wm. W. Cook, of New York, and from Mr. Jenks' work, regarding the evils incident to industrial and commercial consolidation to investors, consumers, producers, wage-earners, political organizations, and to the mental and moral tone of the business community. It was apparent that no single law could hope to cope with all these possible evils. In the present legislation it was the interest of the consumer and producer rather than the interest of the investor which it was hoped to protect. It was sufficiently shown that through large consolidations of capital enormous power had been concentrated in the hands of a few men. At the same time these consolidations of power had lessened the individual responsibility for the proper exercise of the power which these trusts and mergers possessed; and the sense of personal obligation to the community became submerged in vast corporate entities. The possible resulting abuses called for some restraint to take the place of personal obligation. Government supervision and publicity must be that substitute.

There was an additional reason for Government supervision and publicity at the instance of the state. The form of organization which enabled wealth to become concentrated in the hands of a few, and secured great commercial powers to these few, was itself rendered possible only through conditions created by society, of whose interests the state was the guardian and by the direct agencies of government itself.

All organization on a large scale was alone rendered possible by the peace and security which the State assured, and in the maintenance of which the heaviest

expenditures of governments were incurred. Without the concessions made by the public, and guaranteed by the State, the agencies of transportation and communication, the railway, the telegraph and telephone, the postal service, could not exist for a day, and constituting as they did, the transmitting and distributing agencies of all great and industrial organizations, the possibility of effective organization on a large scale would vanish with their withdrawal. Then there were the banking and currency systems, with all the sensitive mechanism of that vast superstructure of credit without which the creation of great capitalistic concerns would be an impossibility. What would become of this if the state representing the people as a whole were to withdraw its sustaining and regulating powers? What, too, of international trade, with all that it implied of diplomatic and consular service, of treaty rights and privileges secured by the state and maintained by good will, by concession or by power? And lastly, what scope for organizing intelligence could there be, what values of lands or goods to reckon with, without the powers of this great army of producers, the needs of this great army of consumers, without the thousand and one conditions which arise out of multitudes of human beings scattered the length and breadth of the land, congregated at centres interdependent in a thousand and one ways, all going to make up modern society as we know it, each contributing his part, albeit unconsciously to the weal or the woe of the whole.

Clearly, the opportunities which the state, itself, had created the state had a right to see should not be used against itself, but more, if society as at present constituted made possible great economies, great savings, through organization on a large scale, society had the right to expect that some of these advantages should be conserved to itself. This double purpose it was hoped this legislation might serve.

Much of the legislation on the subject of trusts and combines had started from the wrong point of view. It had started

from the conception that combines were necessarily an evil, and should be legislated against as such. Such legislation saw only the possible evils, but did not consider the advantages to be derived from organization on a large scale. It made a most fatal error, it ignored altogether the outstanding feature of present day development, the strongest tendency of our times, which was all in the direction of concentration and consolidation. It was control, not prohibition that was required, and while leaving individuals to the enjoyment of their rights and not hampering them in their initiative, would conserve to the public some of the advantages which the public itself had helped to create.

Continuing, the Minister referred to representations which had been received by the Government from various quarters to the effect that combines had operated in Canada in a manner detrimental to the public interest, referring especially to a representative deputation on this subject which was received by the Minister of Finance and the Minister of Trade and Commerce on February 26, 1909.

The Minister explained that in the present Bill the Government had sought to avoid the limitations which experience had disclosed in the legislation in other countries on the same question.

Anti-Combines Legislation Elsewhere.

The United States, after twenty years' experience of the Sherman Anti-Trust law, had now come to the conclusion that the only way to deal with large combinations, where there was any reasonable ground for suspicion that they had been organized in violation of the anti-trust law, was to investigate and find out whether or not, as the result of such investigation, the suspicion was well founded. In England trusts were held to be illegal only where competition was shown to have been wholly removed or prices excessively raised. But while the law in England and on the continent left the development of trusts to be shaped by economic conditions, it had guarded more and more closely the incorporation and supervision of corporations.

Anti-Combines Legislation in Canada.

At this point in his address the Minister reviewed the existing legislation in Canada in respect of combines, trusts, etc., referring in this connection to sections 496, 497 and 498 of the Criminal Code, which were based on a law adopted in 1889, and subsequently amended in 1899 and 1900; the Anti-Combines clause of the Customs Tariff Act adopted in 1897 and amended in 1907; and the amendment which was made to the Inland Revenue Act, in 1904, empowering the Minister of Inland Revenue to withhold licenses from manufacturers who sought to impose upon their customers any monopolistic form of contract in articles for the sale of which a license from the Inland Revenue Department was required.

Many members of the House would recall the inquiry which was conducted by a special committee of the House of Commons in the session of 1888, appointed to investigate and report upon alleged combinations in manufacture, trade and insurance in Canada. Although it had sat for only two and a half months, it had been able, during that short time, to disclose to the country the existence of some thirteen combines, and no stronger evidence in support of the measure now before Parliament could possibly be had than was to be found in the results of this inquiry of twenty-two years ago. Moreover, the advantages of investigation had been shown by the fact that whilst this committee was at work certain combinations, which were believed to be operating to the detriment of consumers, ceased their operations in order to avoid the publicity which an examination before this committee would entail. It had also been shown by the late Mr. Clarke Wallace, the chairman of the committee, that as a consequence of the inquiry, a combine which had unduly enhanced prices, saw fit to reduce the latter. It is to be noted that these results were brought about simply through the force which this inquiry and the report of the special committee had had upon public opinion. The anti-combines legislation of 1889, which had come down as a part of the Criminal

Code, was merely declaratory of the common law on the subject.

Under this feature of the tariff law complaint had been made by the Canadian Press Association that there existed among the paper manufacturers and dealers in this country, a combine which had unduly enhanced the price of paper. This complaint was brought to the attention of the Governor-in-Council, on May 18, 1900. The late Mr. Justice Taschereau had been appointed a Commissioner to ascertain the facts in question, and as a result of his findings, relief had been afforded to consumers of paper, by the reduction of the duty on news printing paper, from twenty-six per cent. to ten per cent.

Continuing, the Minister alluded to various grounds of objection which had been urged against the measure of 1897, with the object of showing wherein the present Bill removed these objections, and made good any deficiencies which experience had revealed in that connection. Under the present Bill it was not left to the Governor-in-Council to order investigation, but it was open to any six individuals who had suffered from the exactions of any combine themselves to set the law in motion, in order that the facts might be established and punishment meted out to offenders. The Bill recognized that where it was in the public interest that an alleged combine should be inquired into, the cost of such inquiry should not fall upon a few individuals who had shown themselves patriotic enough to take up the work on behalf of the consumers as a whole. It was, therefore, provided that where a *prima facie* case was made out before any High Court Judge, showing reasonable ground for believing that a combine had been formed and that the same was unduly enhancing prices or restricting competition, to the detriment of consumers, an investigation should take place, at the cost of the state. The House would probably agree that it was indeed difficult to devise any measure which would meet every kind of abuse which might arise. But certainly the first step towards arriving at any remedy was to get at the facts. Special remedies

could then be provided, in cases where the necessity for the same was shown.

Reference was made by the Minister, at this point, to the inquiry which was made in 1902, into the existence of an alleged combine in the tobacco trade, by which it was complained that the American Tobacco Company, Limited, of Canada, and the Empire Tobacco Company, Limited, had sought to impose an exclusive form of contract upon tobacco dealers, which would prevent the latter from handling the goods of other manufacturers. The inquiry into this matter was made by His Honour Judge MacTavish, of Ottawa, who found that the contract system complained of by the parties, did, in fact, exist and was in general use in the cigarette and tobacco trade in Canada; that the provisions of the contracts in question, were not illegal, either under the Dominion law or under any statutory law heretofore enacted by the Parliament of Canada, but that the manufacturers of cigarettes and the growers of tobacco in Canada, other than the American and the Empire Tobacco Companies, were at a disadvantage in the distribution of their goods, and in the prosecution of their business generally, by reason of such contract system. In 1904, an amendment was made to the Inland Revenue Act, providing for the cancellation of Inland Revenue licenses where manufacturers holding the same, sold goods under a monopolistic form of contract, designed to prevent the purchaser from buying goods from any other manufacturer or dealer. In the case of this particular combine, a Royal Commission was necessary to disclose the facts; but if the present Bill had been in force at that time, the matter could have been effectively dealt with under a Board of Investigation.

There was reason to believe, that a form of combination which had worked considerable hardship in many directions, had grown out of the unfair use of rights granted under the Patent Act. It had been alleged that in some cases, the holders of a patent which was more or less essential to an industrial process, had declined to sell such article to parties re-

quiring it in connection with the work of manufacture, unless the latter agreed to purchase all other articles required by them, either directly from or through the holder of such patent. Of this nature was the case of Brunet and others *versus* the United Shoe Machinery Company, of Canada, which had been carried to the Judicial Committee of the Privy Council. In this case the judgement of the Canadian courts was reversed on the appeal, on certain points of law respecting contract, but Lord Atkinson, in delivering the judgement of the Privy Council, made the following significant statement, in part:—

“If the monopoly established by the appellants, and their mode of carrying on their business, be as oppressive as is alleged (on which their lordships expressed no opinion) then the evil, if it exists, may be capable of cure by legislation or by competition, but in their view, not by litigation. It is not for them to suggest what form the legislation should take, or by what methods the necessary competition should be established. These matters may, they think, be safely left to the ingenuity and enterprise of the Canadian people.”

It was claimed that the holders of patented articles, not infrequently made arrangements with dealers, binding them to sell only the goods made by the holders of such patented articles, on penalty of refusal to supply them with their goods at all. Through exactions of this kind, which were much more numerous than the public imagined, trade had been very seriously restricted. In some cases, worthy producers and manufacturers had been ruined either in part or in whole, and in all cases there had been exacted from the consuming public a toll such as appears to have had no justification whatever, especially when one considered that a patent was a special privilege granted by the public itself through a government to which the holder of the patent was responsible. The present measure proposed to deal in a special way with combinations of this kind, in the only way that was calculated to afford effective redress.

As the present measure had been before the country for over two months, ample

opportunity had been afforded for full consideration of its various features, and for ascertaining through representations which had been made by correspondence, by personal interviews, by comments in the press, and by resolutions, what were the alternative courses of procedure or lines of criticism which might have suggested themselves to those who had been giving serious consideration to this measure. Omitting reference to such criticism and comments as were merely of a combative, discursive or trivial nature, the objections to the measure appeared to be based largely on the self-interest of the parties making them, rather than on general public grounds. One group said that the proposed Act went too far, the other that it did not go far enough; one that investigation was too easily obtained, the other that there was still too much difficulty in obtaining investigation. Such expressions would appear to indicate that, on the whole, a fair compromise had been reached, and that from the point of view of the public, the balances had been evenly held.

Two other plans had been proposed, which, in the Minister's judgement, were deserving of careful consideration. Each had merits of its own, but each was also subject to distinct limitations under existing conditions. The fact that the present measure stood as it were, midway between the two, combining the conditions of both, without being handicapped by the limitations of either, should help to afford a common ground for union, to the advocates of these alternative views.

In the first place it was suggested that the Government should appoint a special agent or agents, whose business it would be to make the preliminary investigation, wherever there was ground for believing that a combine injurious to trade might happen to exist. This view had been put forward by different persons. It must be perfectly apparent that if the Government were to adopt that plan, one investigator would not be sufficient, but a host of investigators would be necessary. Moreover, the objection that had been urged against giving the Governor-in-Council power to remove officials in certain cases, could be urged with even

stronger effect in this case. If the Government came down with a measure of that kind, it would probably be asserted that the officials whom they would be likely to appoint, would become mere tools of the Government, and very little confidence would be placed in their investigation. No such argument could be urged against the appointment of a High Court Judge.

The other alternative plan was to appoint a permanent commission, like the Railway Commission. There was much to commend that proposal; but the time had hardly come yet for taking such a step. In any case, the individual Boards of Investigation established under the present Bill would assist in revealing the necessity or non-necessity for the establishment of a permanent board to deal with the regulation of trusts and combines. More than that, they would reveal the best class of men to appoint on such a body, should it be found desirable to appoint a permanent board to deal with trusts and combines. The United States, from which we had copied many good things, whose Interstate Commerce Commission, the Minister thought, had suggested the idea of our Railway Commission, up to the present time had not found it desirable to appoint a permanent board to deal with trusts and combines; and we, with our limited experience, would have been hardly justified in taking that step. Rather they had taken the step of establishing first a Bureau of Corporations in connection with the Department of Commerce and Labour, for the purpose of exercising greater supervision over industrial corporations. The result of the examination of these bodies would be to show whether or not we, in this country, would be wise to proceed towards the establishment of a similar bureau of corporations, or whether it would be better to go in the direction of establishing a permanent commission.

Procedure under Combines Investigation Bill.

The present Bill aimed at providing a means whereby any six consumers in Canada, who had reason to believe that a combination existed in any branch

or department of industry which had unduly enhanced prices or unfairly restricted trade to the detriment of consumers might make application before any High Court Judge for the establishment of a Board of Investigation to report upon such alleged combine. If a *prima facie* case was made out before the High Court Judge an investigation would be ordered, and carried out at the expense of the Government.

Boards of Investigation would consist of three members, one nominated on behalf of the persons who had preferred the complaint, another nominated on behalf of the persons concerned in the alleged combine, and the third, who must be a judge, chosen by the foregoing to act as chairman. In the event of failure to agree upon a chairman, the Minister of Labour would make this appointment. In this way it was hoped to fashion a Board of Investigation, composed of experts on both sides, who would have the power and the ability to examine into the facts bearing on the case, and to report the same for publication in the *Canada Gazette*. Where it was shown that a combine existed and that the same was fostered to any extent by the Customs Tariff, the Governor-in-Council was empowered to either reduce or abolish the duties on such articles, so as to give the consumers the benefit of increased competition. In the event of any combine being found guilty of unduly enhancing prices or restricting competition to the detriment of consumers, the Bill provided for a penalty of \$1,000 per day, where such offence was continued after the expiration of ten days from the date of publication of the Board's report. In any case where it is shown that a patent was being used so as to restrict trade, such patent might be revoked on application to the Exchequer Court of Canada.

The work of the Board of Railway Commissioners of Canada was all in the nature of investigation, and the splendid service which had been rendered to the country as well as to the railways themselves by this body was one of the strongest arguments which could be advanced in favor of state control. Similarly,

the banking business was subject to important restrictions and regulations imposed by the state. Some of the largest corporations on this continent had found it to their interest to invite publicity.

What the Bill Seeks to Accomplish.

All the arguments that could be urged against the powers of investigation conferred by the present Act could be urged with equal strength against the provisions of the Industrial Disputes Investigation Act, which the present Bill followed closely in many particulars. Businesses which were carried on in a legitimate and an honourable way had nothing whatever to fear from investigation. Many a concern which today was being unfairly criticised would be protected by this very legislation, because it afforded the means of bringing before the public the true facts of the case. On the other hand, the one aim and object of this legislation was to prevent the mean man from profiting by virtue of his meanness. It was not claimed for the measure that it would by any means abolish all the evils which resulted from the operation of trusts and combines. The most that could be hoped for from any such legislation was that it constituted a step in the right direction.

Broadly viewed, it was in the machinery for investigation and for the framing and shaping of an intelligent public opinion which the measure provided, that its main features consisted. It

aimed to get at the truth and to have the truth when ascertained so presented that the remedy for a wrong disclosed would be self-evident. It was framed in the belief that once in possession of the facts which were of first importance to itself, the public would find a way of seeing that any evil under which it might be wrongfully suffering would be removed and that no situation, however complicated would prove too intricate for a satisfactory solution, but to ascertain the facts, to get at the truth was the first of all essentials. It relied on the moral sense of the community as a "compelling force" when concentrated intelligently on a business wrong. Intelligent public opinion would protect honest business and condemn unfair practices.

In the publicity therefore, which the measure secured, not to the private affairs of honest business men, as might be urged by those who were interested in thwarting legislation of the kind, but to the wrongful acts of mean men, lay its strength in securing the well-being of the people, which it was its purpose to maintain. It was an honest endeavour to grapple in a fearless, practical and thorough manner with what was, undoubtedly, the most complicated, intricate and far-reaching of those problems to which our present social, industrial and commercial life had given rise, and which presented, he believed, more difficulties than any single problem in the world to-day.

AMENDMENTS TO THE INDUSTRIAL DISPUTES INVESTIGATION ACT.

AMONG the enactments of the past session of the Parliament of Canada was an Act to amend the Industrial Disputes Investigation Act, which was explained by the Minister of Labour, who introduced it, as being designed to simplify the procedure under this statute, in the light of experience, and to meet representations from labour organizations as to certain features of the law as it stood, which they believed to operate to their disadvantage. The amendments in question were adopted in their entirety by

both Houses of Parliament without division.

In a statement to the House of Commons on the motion for the second reading of the Bill, on April 26, the Minister of Labour explained that the proposed amendments did not in any way affect the principle of the Act. The Act had, indeed, given general satisfaction during the three years of its existence, but it was claimed by the railway employes that they were at a disadvantage compared with members of other labour organiza-

tions as respects procedure under this Statute, for example, the Act required that before a Board of Investigation could be established, the applicants must take an oath that the necessary authority to declare a strike or lock-out had been obtained. Where a dispute was confined to one locality it was not difficult to have this expression of opinion, but where it extended through various provinces, it was represented, the taking of a vote under these circumstances involved great expense and inconvenience. It was proposed by Section 3 of the present Bill, that where a dispute directly affects employes in more than one Province, and such employes were members of a trade union having a general committee authorized to carry on negotiations in disputes between employers and employes, and so recognized by the employer, that the necessary statutory declaration provided for under the Act might be signed by the Chairman or President, and by the Secretary of such committee.

Continuing, the Minister explained that under the law, as it stood, at present if either of the parties changed the conditions of labour, and the other party was dissatisfied with such change, then before a strike or lock-out could take place, a Board of Investigation must be established. Experience in the working of the Act had shown that, whilst either party might change the conditions, in so far as railway employes were concerned, the onus had invariably devolved upon the latter, of making the application for a Board. It was proposed by the present Bill to effect that the onus of asking for a Board should be imposed upon the party, whether employers or employes, from whom the proposal for any change in conditions of labour emanated.

By section 4 of the Bill it was also proposed to fix at twenty dollars per day, the allowance to all members of Boards, the Chairman only having been previously remunerated at that rate, and the two other members at fifteen dollars per day. The following sections were substituted for those previously in the Act:

“(a) to members other than the chairman, an allowance of five dollars a day

for a time not exceeding three days during which the members may be actually engaged in selecting a third member of the Board;

“(b) to each member of the Board, including the chairman, an allowance at the rate of twenty dollars for each day's sitting of the Board, and for each day necessarily engaged in travelling from or to his place of residence to attend or after attending a meeting of the Board.”

The Minister explained also that the proposed amendments to the Industrial Disputes Investigation Act had already been submitted to the Parliamentary Representatives of the various railroad brotherhoods, and that the replies received from the latter, had, for the most part, expressed the opinion that the proposed changes removed the objections almost in whole, which any of these brotherhoods entertained towards the Act.

The following, reprinted from Hansard, will give the text of the communication which was sent by the Minister of Labour to the Legislative representatives of the different brotherhoods of railroad employes, and of the replies received, as read in the House.

“Department of Labour, Canada,

“OTTAWA, March 5, 1910.

‘Dear Sir:

‘I am inclosing a copy of proposed amendments to the Industrial Disputes Investigation Act, 1907, which have been framed, after consultation with yourself and others, with a view of meeting what seem to me very reasonable requests made on behalf of the working men of this country through some of their representative labour bodies and officers, and in particular with a view of removing the possibilities of certain injustices which have been alleged on behalf of railway employes as existing, in so far as the provisions of the measure are applicable to them.

‘I wish you would kindly look carefully over the amendments proposed, and let me know whether in your opinion, they are satisfactory, and whether if adopted by Parliament they would bring the Industrial Disputes Investigation Act

into a form generally satisfactory and acceptable to railway employés.

'Yours faithfully,

(Sgd.) W. L. MACKENZIE KING."

"To this communication, I received the following reply from Mr. Calvin Lawrence, the legislative representative of the Brotherhood of Locomotive Engineers:—

"Windsor Hotel,

'OTTAWA, March 5, 1910.

'The Hon. W. L. Mackenzie King, C.M.G.,

'Minister of Labour,

'Ottawa.

'Dear Mr. King:

'I have the honour to acknowledge the receipt of your communication of March 5, together with a copy of the proposed amendments to the Industrial Disputes Investigation Act, 1907, and in reply, I am pleased to say, that I have very carefully looked over the suggested amendments and they appear to me to be very satisfactory and, in my opinion, if adopted by Parliament they should bring the Industrial Disputes Investigation Act of 1907 into a form generally satisfactory and acceptable to railway employés; therefore, as representing the Brotherhood of Locomotive Engineers, I can consistently endorse the Act when so amended, believing that it will, if amended as proposed, be a benefit not only to railway employés, but also to the public generally.

'I wish to avail myself of this opportunity to express to you the appreciation of myself and those I represent for the courtesy and consideration you have extended to me during our interviews regarding railway legislation.

'I have the honour to be, Sir,

'Yours very respectfully,

'(Sgd.) CALVIN LAWRENCE,

'Legislative Representative B.L.E.

"The following communication was received from Mr. Dowell, the legislative representative of the Brotherhood of Locomotive Firemen and Engineers:—

"OTTAWA, March 10, 1910.

'W. L. Mackenzie King, Esq.,

'Minister of Labour,

'Ottawa.

'Sir:—

'I have your letter of the 9th instant with inclosed copy of proposed amendments to the Industrial Disputes' Investigation Act, 1907.

'I have gone carefully over the amendments proposed and I am of the opinion that they will be satisfactory should they become law as they are drafted. I am also of the opinion that the Industrial Disputes Investigation Act, if it is amended as proposed, will bring the Act into a form that will meet with the general approval of the railway employés that I have the honour to represent.

'Thanking you for the many courtesies that you have extended to us in the past,

'I am, respectfully yours.

'(Sgd.) W. J. DOWELL,

'Legislative Representative of the Brotherhood of Locomotive Firemen and Enginemen.

"From Mr. John Maloney, the legislative representative of the Brotherhood of Railway Trainmen, I have received the following reply:—

"OTTAWA, March 10, 1910.

'Hon. W. L. Mackenzie King,

'House of Commons,

'Ottawa.

'Honourable and Dear Sir:

'I beg to acknowledge receipt of your letter of March 5, inclosing copy of the proposed amendments to the Industrial Disputes Investigation Act of 1907.

'I have carefully read over the amendments, and wish to state, as a representative of the Trainmen's Organization, I find them entirely satisfactory, and in my opinion will bring about all desired results. I also feel if proposed amendments are adopted by Parliament, will bring the Industrial Disputes Investigation Act into a form satisfactory and

acceptable to all members of the Trainmen's Organization.

'Respectfully yours,

'(Sgd.) JOHN MALONEY,

'Dominion Legislative Representative,
'Brotherhood of Railroad Trainmen.'

enacted, and we are hopeful that Parliament will see the wisdom of them.

'Wishing you success,

'I am,

'Yours sincerely,

'(Sgd.) D. CAMPBELL,
'Third Vice-President.'

'Mr. SPROULE. May I interrupt the honourable gentleman? Is there any need of risking the time of the committee with these letters when he has told us that all the letters are in approval of the legislation?

'Mr. KING. I think it important that these letters should be placed on record, as these amendments are being introduced to make the Act acceptable to the railway employes, and I think the public should know the view of the amendments taken by the representatives of the various classes of railway employes.

'Mr. SPROULE. I think the House is accepting with full confidence the statement of the honourable gentlemen that he has written to these bodies and has received replies from them in approval. I think that should be sufficient, as no person is disputing his statement.

'Mr. KING. Possibly I might abbreviate by giving the gist of what is said in one or two of the letters. The next letter is from the representative of the telegraphers:—

'Order of Railroad Telegraphers,
264 Rusholme Road,

TORONTO, March 14, 1910.

'The Honourable

'W. L. MACKENZIE KING, C.M.G.,

'Minister of Labour,

'Ottawa, Ont.

'DEAR MR. KING:—

'Replying to your favour in reference to the proposed amendments to the Industrial Disputes Investigation Act, I desire to say that if these amendments can be obtained, the Act will be entirely satisfactory to our organization. In fact, we have felt the need of these amendments almost ever since the law has been

'Mr. Harvey Hall, representing one of the other branches, writes in part, as follows, under date of March 14:

'This will acknowledge yours of March 9, with a draft copy of proposed amendments to the Industrial Disputes Act attached. * * * a board. * * *

'I have gone carefully over the proposed amendments, and believe they will, to some extent, relieve the railway employes of a very serious complaint, namely, delay and expense, when they are forced to apply for a board. * * *

'I must admit that the amendments proposed, if adopted, will certainly meet the views of the railway men as far as they go.'

'Mr. HUGHES. What order does Mr. Hall represent?

'Mr. KING. I think he represents at this time, the railway conductors. Then, I have a letter, dated March 11, 1910, from Mr. A. B. Lowe, the president of the International Brotherhood of Maintenance-of-Way Employes, in which he says:

'My opinion of the Act itself has never changed, that it is one of the best pieces of legislation that has been passed to my knowledge, in the interests of industrial peace.'

'And, on March 18, he writes:

'I hope that the amendments proposed may be placed in the law.'

'The House will observe that these communications cover all the different classes of railway labour—locomotive engineers, firemen, trainmen, telegraphers, conductors and maintenance-of-way employes. I have also discussed these amendments with representatives of the railway companies, and they have stated to me, without exception, that they think they are fair and reasonable, and I understand that no opposition will be offered to them if they are enacted by the House.'

**THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS
UNDER THE ACT DURING THE MONTH OF APRIL, 1910.**

DURING the month of April, an application for the establishment of a Board of Conciliation and Investigation was received on behalf of the Canadian-American Coal and Coke Company, Limited, of Frank, Alta., in respect of matters in dispute between that Company and its employés.

Report Received.

During the month of April, the report was received of the Board of Conciliation and Investigation to which had been referred certain differences between the Alberta Coal Mining Company, Limited, of Edmonton, Alta., and its employés. The report was signed by Messrs. R. G. Duggan, Chairman; C. Stubbs, member appointed on the recommendation of the employés; and Jos. O. Hannah, member appointed on the recommendation of the employer.

The report was also received during the month of the Board of Conciliation and Investigation, to which had been referred certain differences between the various Steamship Companies doing business at the Port of Montreal, comprising the Shipping Federation of Canada, and the Syndicated Longshoremen of the Port of Montreal. This report was signed by all three members of the Board, namely: the Honourable Mr. Justice Fortin, Chairman; and Messrs. William Lyall, member appointed on the recommendation of the employers; and Gustave Francq, member appointed on the recommendation of the employés.

Other Proceedings under the Act.

On March 31, Mr. J. E. Atkinson, of Toronto, was appointed Chairman of three several Boards established under the Act, in respect of differences between the Canadian Pacific Railway Company, the Grand Trunk Railway Company, and the Toronto, Hamilton and Buffalo Railway Company, and employés in the train and yard service of these

respective Companies. Mr. Atkinson's appointment was made by the Minister in the absence of any joint recommendation from the other members of these Boards.

In the application of the Canadian-American Coal and Coke Company, Limited, of Frank, Alta., for the establishment of a Board it was stated that the matters in dispute related to a proposal by that Company for a reduction in the price of pillar work to the amount of five cents per cubic yard, and to a demand which was made by the employés for full recognition of the United Mine Workers of America. In an affidavit from the liquidator of the Canadian-American Coal and Coke Company, Limited, accompanying the foregoing application it was stated that there had been a suspension of work by the employés of this Company, excepting some fifty-seven in number, since April 2. Messrs. Colin MacLeod, of MacLeod, Alta., and Clement Stubbs, of Bellevue, Alta., were appointed members of the Board in this matter, on the recommendation of the employer and of the employés respectively; the Board being completed by the appointment of Mr. I. S. G. VanWart, of Calgary, Alta., as Chairman. Mr. VanWart was appointed by the Minister, in the absence of any joint recommendation from the other members of the Board.

During the month of April, a Board was established by the Minister, for the adjustment of matters in dispute between the Dominion Atlantic Railway Company and its employés at Kentville, N.S., to which reference has been made in the April number of the *Labour Gazette*. Mr. Aaron A. R. Mosher, of Halifax, N.S., was appointed a member of this Board, on the recommendation of the employés. In the absence of any recommendation from the Company concerned, Mr. McCallum Grant, of Halifax, N.S., was appointed by the Minister of Labour as second member of the Board; and in the absence of any

joint recommendation from the two members above mentioned the Board was completed by the appointment, by the Minister, on April 29, of Honourable John N. Armstrong, of North Sydney, N.S., as Chairman.

In the September, 1909, number of the *Labour Gazette*, extended reference was made to certain matters in dispute between the Grand Trunk Pacific Railway Company and its engineers, firemen, conductors, brakemen, baggagemen and yardmen, and to the findings of a Board of Conciliation and Investigation in respect thereto. Subsequent to the receipt of the report of this Board, and to its communication to the parties concerned, a question was raised by the employés concerning the correctness of the schedules thereto attached, as a result of which the Board was reconvened and agreed to amend the report as originally received in the Department by the substitution for clause seven of such report of the following paragraph:—

“After full hearing and consideration the matters in dispute were amicably adjusted with the exception of the claim of the employés that ‘road engineers will be paid for switching at terminals

and turn around points at through freight rates, time to count from time engine is ordered for until switching is completed, each six minutes to count as one mile, this in addition to mileage made on trip.”

The decision of the Board in this matter was promptly communicated to the Company, and was accepted by the latter.

In a communication which was received in the Department of Labour, on April 15, from Mr. Jno. V. Paul, Secretary of the Joint Committee of the engineers, firemen, conductors, brakemen, baggagemen and yardmen concerned in this matter, it was stated that a conference had been asked on behalf of the trainmen, with the management of the Company, for the purpose of effecting, if possible, an agreement on the one disputed clause of the schedule, namely, that relating to terminal switching. It was also stated by Mr. Paul, that the recommendations of the Board had been accepted by the organization representing the enginemen as a settlement of the differences referred for adjustment in so far as they were concerned.

REPORT OF BOARD IN DISPUTE BETWEEN THE ALBERTA COAL MINING COMPANY, LIMITED, OF EDMONTON, ALTA., AND ITS EMPLOYÉS.

ON April 2, the Minister of Labour received the unanimous report of the Board of Conciliation and Investigation to which had been referred certain differences between the Alberta Coal Mining Company, Limited, of Edmonton, Alta., and certain miners in its employ.

In the application of the Alberta Coal Mining Company, Limited, for the establishment of this Board, it was alleged that a number of its employés had gone on strike without notice. It was further alleged that about two months before a demand had been made for higher wages, as a result of which an application had been made by the Company for the establishment of a Board under the Industrial Disputes Investigation Act, but that as the men had continued working the matter was allowed to drop. On behalf

of the employés it was stated that the dispute between the Company and its workmen related to proposed changes in the conditions of employment which had been requested by the employés some three months before, and that these causes of dispute still existed. It was also denied that the employés had ceased work without any demands being made. Complaint was made by the employés respecting the accuracy of the scales in use by the Company in the weighing of coal mined by its employés; and recognition was demanded for the local union of the United Mine Workers of America, to which the employés were understood to belong.

Mr. J. O. Hannah, of Taber, Alta., and Mr. Clement Stubbs, of Fernie, B.C., were appointed members of the Board on the

recommendation of the employing company and of the employés, respectively; and the Board was completed on January 17, by the appointment of Mr. R. G. Duggan, of Taber, Alta., as Chairman, on the recommendation of the other two members of the Board.

In its report the Board states that it had made several recommendations to the General Manager of the Alberta Coal Mining Company relative to changes in the method of working in the mine, which the Board believed would be adopted and which, in its opinion, would be of considerable benefit to all parties concerned. The Board also finds that two of the causes of dissension and dispute were removed by the closing down of one particular section of the mine in which the miners had had to contend with a considerable quantity of water and bone, and further by the retirement of the person who had charge of the workings at that time. Various other recommendations are made also in the report for the settlement of the differences in question.

A communication was received in the Department on April 14, from the Alberta Coal Mining Company, Limited, in which it was stated that there was nothing in the findings of the Board with which that Company could not and would not comply; and further that the differences between the parties were caused by misunderstanding and exaggerated by outside parties, and that, so far as the management of the mine was concerned, there would be no further trouble. "We are pleased" this letter concluded "to be able to refer differences to such a Board as is established under the law, for without this recourse there would have been either a strike or a lock-out and the mine would have been idle during the busiest portion of the year." It was understood by the Department that the findings of the Board are regarded as acceptable also to the employés concerned.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation is as follows:—

In the matter of the Industrial Disputes Investigation Act 1907, and of a dispute between the Alberta Coal Mining Company (employer) and miners, mine labourers and others (employés).

We, the undersigned members of the Board, having carefully gone over the evidence submitted by both parties, and having made a thorough inspection of the mines of the Company, situated at Cardiff, Alta. make and submit to you the following findings and recommendations:

1. That the employés appoint a committee to represent them, whose duties it will be to take up all grievances arising at the mine, with the management of the coal company, and that in case of any grievance arising, that the men should continue at work pending an adjustment of these grievances, it being understood that an attempt to settle matters in dispute will be made without delay.

2. That in all cases where the men take down or remove bone that they be paid for same at a price, per lineal yard.

3. That the Company remove the water from the working places or, if the water is removed by the miner that he receive compensation for time so occupied.

4. That the Company issue pay statements to the men, if possible, at least three days prior to each pay day, showing the amount due for the different classes of work done, also giving particulars of deductions, etc.

5. That the Company arrange the dump on the tipple, so as to eliminate coal falling from the pit cars to the outside of the chute, while coal is being dumped.

6. That when conditions arise, where the use of timber sets are necessary, and the placing of same ordered by the management, that the miners receive extra pay for this class of work.

a. We, the members of the Board, have further made several recommendations to the General Manager of the Alberta Coal Mining Company relative to changes in the method of working in the mine, and which we believe will be adopted, and which in our opinion will be of considerable benefit to all parties concerned.

b. We also found, that two of the causes of dissension and dispute have been removed by the closing down of one particular section of the mine, in which the miners have had to contend with a considerable quantity of water and bone, and further by the retirement of the person who had charge of the workings at that time.

Respectfully submitted,

(Sgd.) R. G. DUGGAN,

Chairman.

EDMONTON, ALTA., March 24, 1910.

REPORT OF BOARD IN DISPUTE BETWEEN CERTAIN STEAMSHIP COMPANIES DOING BUSINESS AT MONTREAL, AND THE SYNDICATED LONGSHOREMEN OF THAT PORT.

ON April 20, the unanimous report was received of the Board of Conciliation and Investigation to which had been referred for adjustment certain differences between certain of the steamship companies doing business at the Port of Montreal, and the Syndicated Longshoremen of the Port of Montreal.

On April 26, the Department of Labour was formally advised of the acceptance of the findings of the Board by the members of the Shipping Federation of Canada on the one hand, and of the Syndicated Longshoremen of Montreal on the other, an agreement having been concluded on April 22, between the Allan Line, Donaldson Line, Thompson Line, White Star, Dominion Line, Leyland Line, Manchester Liners, Canada Line, South African Line, Mexican Line, Black Diamond Line, Head Line, and the Canadian Pacific Railway and Steamship Company, as employers, and the Syndicated Longshoremen of Montreal as employés, effective for a period of five years from January 1, 1910.

The application for a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act in this matter was received in the Department of Labour on March 14, from the officers of the Syndicated Longshoremen's organization, and declared that, failing an adjustment of the dispute or a reference of the same for investigation under the Act, a strike would be declared, and that the necessary authority to declare the same had been obtained. The matters in dispute, which affected

1,800 employés, related to wages and conditions of labour and had already been the subject of unsuccessful negotiation between the parties directly interested.

Messrs. William Lyall and Gustave Francq, of Montreal, were appointed members of the Board on behalf of the shipping companies and of the Syndicated Longshoremen respectively, and, in the absence of any joint recommendation from the foregoing, the Board was completed on April 7, by the Minister of Labour, by the appointment of the Honourable Mr. Justice Fortin, of Montreal, as Chairman.

In the findings of the Board it is stated that, after a prolonged discussion of the matters in dispute, a unanimous conclusion was reached which they were assured would be embodied in an agreement between the parties concerned. Such agreement would be effective for five years, during which period the Syndicated Longshoremen would undertake to supply the necessary men to perform the work required of them each season. In addition to such contract the men would be required to sign individually, when commencing work each season, an undertaking to work in accordance with the above mentioned contract until the close of navigation, the men so signing to be given work in preference to others. Under the terms of the agreement a deposit was also to be made by the parties with the Royal Trust Company of Montreal, as trustees, of a sum of \$2,000 each, as a guarantee for the due performance of the agreement, such sum

to be applied by the trustees to the payment of the order or judgment of any court in the Province of Quebec. The agreement would provide also for the rates of wages and hours of labour which all ocean steamships and sailing vessels entering the port would be bound to pay.

The Board recommends in its report the establishment of a permanent Board of Conciliation to settle all such possible difficulties, the members of the Board adding that from appearances this recommendation would shortly become an accomplished fact. In its report the Board has also stated that the utmost harmony prevailed throughout the proceedings, and that the parties appeared to be animated by the most conciliatory spirit.

The Canadian Pacific Railway Company, though not a party to the procedure before for the establishment of a Board in respect of this dispute participated in the proceedings before the Board and in the settlement effected.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation is as follows:—

MONTREAL, 19th April, 1910.

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of a dispute between the Syndicated Longshoremen of the Port of Montreal, (employés) and the Steamship companies doing business at the Port of Montreal, comprised in the Shipping Federation of Canada, viz.: The Allan Line, Donaldson Line, Thompson Line, White Star, Dominion Line, Leyland Line, Manchester Liners, Canada Line, South African Line, Mexican Line, Black Diamond Line, Head Line, and the Canadian Pacific Railway and Steamship Company, (employers);

DEAR SIR:—

The undersigned, members of the Board of Conciliation appointed in this matter, beg respectfully to report as follows:—

Their first meeting was held on the 11th inst., in the morning, and they immediately resolved, in view of the urgency of the matter, to set to work and try to

carry out the purposes for which they had been appointed.

They have been in session the whole of that day, hearing the parties and their witnesses, and have kept on doing the same work until Friday, the 15th inclusive, when the investigation proper was brought to a close. From that date they adjourned to the 18th instant, when the consideration of the whole case, as resulting from the position of the parties, the documentary and testimonial evidence produced before them, was continued.

After a prolonged discussion of the various questions raised, the Board is pleased to state that it has come to a unanimous conclusion and that their recommendation, they are assured, will be embodied in an agreement between the parties, containing the following conditions:—

1. Such agreement shall be entered into for the period of five years, from the 1st of January, 1910, and during that period the Syndicated Longshoremen will undertake to supply the necessary men to perform the work required of them during each season.

2. In addition to such contract between the parties herein, the men will be required to sign, individually, when commencing to work each season, a paper, undertaking to work in accordance with the said contract until the close of navigation; and the men signing said agreement will be given work in preference to others.

3. The parties herein agree to deposit with the Royal Trust Company, of Montreal, as Trustees, the sum of \$2,000 each, as a guarantee of the due performance of the agreement to be signed by the parties. The said sum shall be applied by the said Trustees in payment, in order of priority in time, of any and all judgements or orders of any Court in the Province of Quebec. Upon the expiration of this agreement, the deposit or balance of it, with accrued interest, will be returned to each party entitled to same.

4. The working hours shall be from seven o'clock A.M. until twelve o'clock A.M., and from one o'clock P.M. until six o'clock P.M., at the rate of thirty cents

per hour for day work; and from seven o'clock P.M. until twelve o'clock P.M., and from one o'clock A.M. until six o'clock A.M., at the rate of thirty-five cents per hour.

All other hours, including Sundays, to be paid at double rate.

5. Night meal to be taken between eleven o'clock P.M. and one o'clock A.M., each man being entitled to one hour, and ship owners to supply good meals or to pay the cost of same.

6. Grain trimming to be paid at regular rates, and the running of the grain in the pipes to be stopped while the men go down in the hold to work; two men to stand on the deck of the ship during that time, if necessary.

The Board recommends that the ship owners furnish the men, if requested, the best respirators to protect them while trimming the grain.

Nitrate cargo and bulk sulphur to be paid at the rate of fifty cents per hour, day and night.

7. When the men are ordered out to work during the night and are kept waiting after the time called for, they shall receive half-pay from the time called out until discharged.

8. Fifteen men shall constitute a gang for discharging a ship, and sixteen men for loading, according to the nature of the cargo and the capacity of the ship.

9. All ocean steamships and sailing vessels coming in to the Port of Montreal, will be bound to pay the wages aforesaid.

Owing to the importance of the Harbor of Montreal, and the nature of the work to be performed by the men, and the many difficulties that may arise, from time to time, either in carrying out the above or otherwise, the Board cannot too strongly recommend to the parties the establishment of a permanent Board of Conciliation to settle all such possible difficulties, and the members of the Board feel satisfied, judging from appearances, that this recommendation will shortly become an accomplished fact.

It only remains to the Board to say that, throughout their proceedings, the utmost harmony prevailed and the parties appeared animated by the most conciliatory spirit.

The whole is respectfully submitted.

(Sgd.) THOMAS FORTIN,
Chairman.

WILLIAM LYALL.
GUSTAVE FRANCO.

To the Honourable

W. L. MACKENZIE KING,
Minister of Labour
Ottawa.

REPORT OF SPECIAL COMMITTEE OF HOUSE OF COMMONS ON BILL NO. 21, AN ACT RESPECTING HOURS OF LABOUR ON PUBLIC WORKS.

ON May 3, a Special Committee of the House of Commons, to whom was referred Bill No. 21, an Act respecting Hours of Labour on Public Works, presented its fourth report, which was in the nature of a review of the comprehensive inquiry, which this Committee has made since its appointment on December 9, last.

In the course of their report it was stated that "owing to the number of persons who expressed a desire to give testimony, the Committee has been obliged to continue its sittings for the taking of evidence up to the present time, but notwithstanding, has been unable to hear all persons who have asked

to be allowed to give testimony. Owing to the volume of evidence taken, the Committee has not had opportunity of giving to the evidence, and the large number of communications which have been received, the careful consideration which their importance demands. The Committee think that the communications should be carefully classified and together with the evidence, duly printed, and rendered available for distribution, in order that the members of the House of Commons and of the Senate, and those who may be especially interested in or affected by the proposed legislation, may have an opportunity of becoming fully informed on the many important

bearings of the proposed measure." The fourth report of the Special Committee was concurred in by the House of Commons without division.

The text of the report in question is as follows:—

"Your Committee, since its appointment, on the ninth day of December, 1909, has held nineteen meetings, all of which were open to the public, and heard a large number of witnesses, representing interests specially affected by the proposed legislation. The Dominion Trades and Labour Congress, and the Canadian Manufacturers' Association were represented by their respective secretaries, each of whom presented the views of the members of these bodies, in carefully prepared and comprehensive memorials. The views of the Shipping Federation of Canada were given by its Secretary. Individual employers of labour and leading trade union officials, representing special industries and trades in different parts of Canada, gave testimony from the point of view of labour and capital respectively, whilst information of an official nature as well as expressions of opinion were obtained from the Fair Wages Officers of the Department of Labour, Ottawa, the Secretary of the Ontario Bureau of Labour, Toronto, and the Chief Factory Inspector of the Province of Quebec. An exhaustive analysis of the nature and administration of the legislation of other countries respecting the hours of labour on public works was given by Professor Skelton, of Queen's University.

"2. In addition to the evidence of witnesses, the Committee obtained by correspondence, in reply to 3,600 communications sent out, expressions of opinion from 721 different persons. Of the replies received, approximately eighty per cent. contained valuable suggestions and arguments respecting the Bill. Of these replies 304 were from officers of labour unions; 302 from manufacturers, including the Employers' Association of Toronto; sixty-five from Farmers' Institutes and the Dominion Grange; thirty-nine from Boards of Trades, and eleven from transportation companies, including the Marine Association.

"3. The evidence taken together with the proceedings of the Committee, but not including communications sent or received, covers some 400 pages of printed matter.

"4. Owing to the number of persons who expressed a desire to give testimony the Committee has been obliged to continue its sittings for the taking of evidence up to the present time, but notwithstanding, has been unable to hear all persons who have asked to be allowed to give testimony. Owing to the volume of evidence taken, the Committee has not had opportunity of giving to the evidence and the large number of communications which have been received, the careful consideration which their importance demands. The Committee think that the communications should be carefully classified and together with the evidence, duly printed, and rendered available for distribution, in order that the members of the House of Commons and of the Senate, and those who may be especially interested in or affected by the proposed legislation may have an opportunity of becoming fully informed on the many important bearings of the proposed measure.

"5. The Committee, therefore, recommends that the Clerk of the Committee be directed to classify the correspondence which has been received, and prepare an index in detail of the evidence and correspondence; also that Rule 72 of the House be suspended, and that the reports of the Committee, the proceedings, evidence and communications be printed in one volume, available for distribution to the number of 5,000 copies in English, and 1,000 copies in French.

"6. The Committee also recommends that the reports, proceedings, evidence and correspondence be printed as an appendix to the Journals."

During the month of April, sittings of the Special Committee were held as follows:—April 6, April 13, April 20, and April 28. At these sittings a number of witnesses from different parts of the Dominion were examined.

The witnesses which were heard before the Committee during the month of April, were as follows:—

On April 6:—Messrs. John H. Lauer, Secretary-Treasurer of the Montreal Builders' Exchange and of the General Association of Builders of Canada; Edward T. Nesbitt, President of the Canadian National Association of Builders and of the Builders' Exchange of Quebec; and John Tweed, of Toronto, General Organizer for the United Brotherhood of Carpenters and Joiners in Ontario; on April 13: Messrs. Wm. Watkins, of Springhill, N.S., a member of the United Mine Workers of America; Jos. Ainey, a member of the United Brotherhood of Car-

penters and Joiners of America; and Edward J. Stephenson, of Winnipeg, a member of the International Typographical Union; on April 20: Messrs. Patrick M. Draper, of Ottawa, Secretary-Treasurer of the Trades and Labour Congress of Canada; and Gustave Franço, of Montreal, First Vice-President of the Trades and Labour Congress of Canada; and on April 28: Professor O. Skelton, of Queens' University, Kingston; and Mr. Thomas Robb, of Montreal, representing the Shipping Federation of Canada.

PROPOSED AMENDMENT OF THE CRIMINAL CODE RELATING TO TRADE UNIONS.

ON March 17, the Honourable N. A. Belcourt introduced in the Senate a Bill entitled: "An Act to amend the Criminal Code", to provide for the insertion of the words "whose members are British subjects", after the word "union" in Section 497 of the Criminal Code, which reads as follows: "The purposes of a trade union are not, by reason merely that they are in restraint of trade, unlawful within the meaning of the preceding Section"; also to amend sub-section 2, of Section 498, of the Criminal Code, reading as follows: "Nothing in this Section shall be construed to apply to combinations of workmen or employés, for their own reasonable protection as such workmen and employés", by the insertion of the words, "who are British subjects", after the word "employés". In the Senate, on April 20, when the measure was called for second reading, the Honourable Mr. Belcourt announced that he had introduced the measure merely for the purpose of evoking discussion of this subject in Parliament, and among trade unions as well, so that with the consent and co-operation of the latter legislation might be enacted which, while not interfering with their rights, would afford Canadian labour and Canadian capital, the protection to which they are entitled. At this advanced stage of the session it was, however, impossible that the matter could receive the consideration which it should have,

and for this reason, he would ask that the Bill be dropped. On motion of the Honourable Mr. Power, the debate on the Bill was, instead, adjourned. In the course of Mr. Belcourt's speech on April 20, reference was made by him to the receipt of a communication from the President of the Canadian Federation of Labour, suggesting that the Bill should be amended by the insertion of the words "not chartered or having direct affiliation with any union in a foreign country", after the word "union", in Section 497 of the Criminal Code, instead of the words which Mr. Belcourt's Bill proposed; and further declaring that the Canadian Federation of Labour would unanimously support such an amendment. In the course of further discussion on the Bill, on April 26 and on May 3, reference was made also to communications which had been received from representatives of the International Brotherhood of Locomotive Engineers, the Parti Ouvrier de Montreal, the Order of Railway Conductors, the Bricklayers' Union, the Machinists' Union, the Plasterers' Union, the Montreal Trades and Labour Council, the Typographical Union, the International Association of Machinists, the Brotherhood of Carmen of America, the International Brotherhood of Blacksmiths and Helpers, the Brotherhood of Boilermakers, the Brotherhood of Boilermakers' Helpers, and the Brotherhood of Electrical Workers.

Amendment Withdrawn.

On May 3, an amendment was moved by the Honourable Mr. Coffee, seconded by the Honourable Mr. Poirier, for what is commonly known as "the six months' hoist". This amendment was, however, subsequently withdrawn, and the Bill, on motion of its author, Mr. Belcourt, was dropped from the Order Paper.

The sections of the Criminal Code relating to offences connected with trade and breaches of contract, conspiracies in the restraint of trade, etc., are as follows:—

496. A conspiracy in restraint of trade is an agreement between two or more persons to do or procure to be done any unlawful act in restraint of trade. 55-56 V., c. 29, s. 516.

497. The purposes of a trade union are not, by reason merely that they are in restraint of trade, unlawful within the meaning of the last preceding section. 55-56 V., c. 29, s. 517.

498. Every one is guilty of an indictable offence and liable to a penalty not exceeding four thousand dollars and not less than two hundred dollars, or to two years' imprisonment, or if a corporatin,

is liable to a penalty not exceeding ten thousand dollars, and not less than one thousand dollars, who conspires, combines agrees or arranges with any other person, or with any railway, steamship, steamboat or transportation company,—

(a) to unduly limit the facilities for transporting, producing, manufacturing, supplying, storing or dealing in any article or commodity which may be a subject of trade or commerce; or,

(b) to restrain or injure trade or commerce in relation to any such article or commodity; or,

(c) to unduly prevent, limit, or lessen the manufacture or production of any such article or commodity, or to unreasonably enhance the price thereof; or,

(d) to unduly prevent or lessen competition in the production, manufacture, purchase, barter, sale, transportation or supply of any such article or commodity, or in the price of insurance upon person or property.

2. Nothing in this section shall be construed to apply to combinations of workmen or employés for their own reasonable protection as such workmen or employés. 63-64 V., c. 46, s. 3.

WAGES AND OTHER CLAIMS AGAINST GOVERNMENT CONTRACTORS—PAYMENT MADE OF OVERDUE WAGES OF RAILWAY EMPLOYÉS—FAIR WAGES SCHEDULES FOR GOVERNMENT CONTRACTS.

ON March 25, a communication was received in the Department of Labour in which complaint was made that an infringement had occurred of the Fair Wages Clause of the contract with Messrs. P. Lyall & Sons, Limited, for the construction of the Montreal Post Office Annex, in the rates of wages paid to Mr. Herve Hamel and Mr. Philippe Rioux, carpenters, both of the city of Montreal, during their employment on this work. On receipt of the same an investigation was made by one of the Fair Wages Officers, who reported that the workmen in question had been paid at the rate of twenty-five cents per hour instead of at the rate of thirty cents per hour, provided for this class of labour in the Fair Wages Schedule of the contract, and that Mr. Herve Hamel was accord-

ingly entitled to recover from the contractors an amount of \$42.87, and Mr. Philippe Rioux an amount of \$12.03. On April 7, a communication was received from Messrs. P. Lyall & Sons, Limited, with which was enclosed a cheque for \$54.90 in payment of the above mentioned claims. Settlement was accordingly made with the workmen in question, and receipts have since been received from the latter in full, of their respective claims.

On February 10, a communication was received by the Minister of Labour from Mr. M. Walsh, Secretary of the Trades and Labour Council of Quebec, in which complaint was made that the Quebec & Lake St. John Railway Company was in arrears in the payment of wages to its employés. On receipt of the

same the complaint was brought to the attention of the Minister of Railways and Canals, and of the Post Master General, and the Department of Labour also communicated with the General Manager of the Company in Quebec. Under instructions from the Minister of Labour an investigation into the circumstances of this matter was made by one of the Fair Wages Officers of the Department of Labour, which went to show that the Company had been for some time, in financial difficulties and that, after various efforts had been made to remedy this condition, the road had passed into the hands of a receiver. On March 30, a letter was received from the General Manager of the Company in which it was stated that the December pay-roll, due on January 20, was paid on February 7; that the January pay-roll, due on February 20, was paid on March 5; and that the February pay-roll, due on March 20, was paid on March 23; the General Manager also expressing an expectation "that the pay-rolls in future will be paid on about the due dates."

A communication was received by the Minister of Labour, on January 29, from Mr. Jas. E. Noble, of Brandon, Man., enclosing a copy of a judgement in favour of one A. Fulcher, for an amount of \$3,122.91 for personal injuries suffered by him owing to an accident which he had sustained during his employment by the firm of Dumais and Lachance, contractors for the construction of Government armouries in the city of Brandon Man. Mr. Noble's communication was accompanied by a petition from the Bricklayers and Masons' Union of Brandon, asking that efforts should be made to have this judgement paid. The Minister communicated at once with the firm concerned, and also with the Minister of Public Works. In his letter to the latter the Minister of Labour pointed out that "while the matter under discussion may appear to be one for the courts rather than for the Government, I observe that from the petition of the Bricklayers' Union, the members of the firm are said to be still Government contractors, and it would appear that where contractors, in such cases, remain

indifferent to the just claims of their employes injured on public works, the Government would be justified in using its influence to secure a settlement of outstanding claims, failing which contractors should be given to understand that their future tenders will not receive consideration."

On February 11, Mr. Lachance, of the firm of Dumais and Lachance concerned, called at the Department of Labour and claimed in an interview with the Minister that the judgement was an unfair one; that Fulcher's injury had been slight, and that the same was caused only by his own carelessness; also that the firm had, before the matter went to court, made an offer to this workman in settlement of the case; and that the firm had paid costs of the suit amounting to over \$1,100. The Minister pointed out that if the judgement remained unpaid it would be in his opinion very questionable whether the Government would be justified in granting any further contracts to this firm.

On February 17, a communication was received from the firm of Dumais and Lachance, in which it was stated that it was the firm's intention to settle the claim of Mr. Fulcher. On April 22, the Department of Labour was informed by the Department of Public Works that a settlement had been made of this claim, and that a receipt had been received from Mr. Fulcher for \$2,122, as in full settlement and satisfaction of the judgement which had been given in his favour, by the Court of King's Bench, at Manitoba, against the firm of Dumais and Lachance.

Fair Wages Schedules.

During the month of April, the Department of Labour prepared, at the request of the Departments concerned, Fair Wages Schedules for the protection of labour employed in connection with various public works, as follows:—

Removal of certain shoals at the Upper entrance of the Sault Ste. Marie Canal.

Construction of a boarding house at the site of the Quebec bridge.

Construction, under subsidy, of a line of railway, from a point near the town of Red Deer, Alberta, to a point on the North Saskatchewan river near Rocky Mountain house.

Widening the Welland canal on the west side, about half a mile south of the Welland Aqueduct.

Construction of a subway at New Mills, N.B.

Construction of a subway at Beresford, N.B.

Construction of an overhead crossing at Lac au Saumon.

Construction of a line of railway, from a point on the main line of the Canadian Northern Railway, at or near L'Epiphanie, passing by way of Jacques de l'Achigan, to the village of Rawdon, Que.

Removal of approach spans, false work, and erection materials of collapsed Quebec bridge.

Construction of a cut-off line in connection with the Intercolonial Railway, at Moncton, N.B.

Construction of a crib work breakwater at Blue Rocks, N.S.

Construction of a pile and cribwork breakwater at Paspébiac East, Que.

Construction of a pile and cribwork extension to the wharf at Maria, Que.

Construction of a cribwork landing pier and approach at Ayer's Cliff, Mas-sawippi lake, Que.

Construction of public building at Fergus, Ont.

Construction of a wharf at Bic, Que.

Construction of public building at Elora, Ont.

Construction of cribwork extension to pier at Kingsport, N.S.

Construction of a cribwork breakwater at Dublin Shore, N.S.

Construction of cribwork breakwater at Duncan's Cove, N.S.

Construction of extension to breakwater at Hampton, N.S.

Construction of cribwork block extension to wharf at Kamouraska, Que.

Construction of extension to breakwater at Liscomb, N.S.

Construction to breakwater and wharf at Little River, N.S.

Construction of public building at Marieville, Que.

Construction of dredging, pile and cribwork breakwater at Matane river, Que.

Construction of cribwork wharf extension at Miscou, N.B.

Construction of cribwork extension at New Mills, N.B.

Construction of cribwork pier at St. Croix, Que.

Construction of cribwork wharf at Sackville, N.B.

Construction of wharf approach at Spanish Ship Bay, N.S.

Construction of cribwork wharf at Shediac, N.B.

Construction of pilework breakwater at Sorel, Que.

Construction of cribwork wharf at Westport, N.S.

Construction of public building at Battleford, Sask.

Construction of wharf at Gravenhurst, Ont.

Reconstruction of breakwater at Port Hope, Ont.

Construction of wharf addition at Sault Ste. Marie, Ont.

Construction of cribwork and span wharf at Port Felix, N.S.

Construction of cribwork and span wharf at Dover, N.S.

All trades at Halifax, N.S.

Winnipeg Rifle Range at Winnipeg, Man.

Nelson Rifle Range at Nelson, B.C.

Dominion Arsenal at Quebec, Que.

Rockcliffe Rifle Range, at Rockcliffe, Ont.

**PRICES AND COST OF LIVING—RESULT OF SPECIAL INVESTIGATION BY
DEPARTMENT INTO THE WHOLESALE PRICES OF HIDES, TALLOW,
LEATHER AND BOOTS AND SHOES.**

PUBLICATION is continued here- with of the statistical tables and charts compiled by the Department, in the course of its investigation into whole- sale prices in Canada during the past twenty years, the scope and method of which have been described in a previous issue of the *Labour Gazette*.¹

The portions of the investigation pub- lished in the present issue relate to Hides, Tallow, Leather and Boots and Shoes. The commodities covered are as follows:

HIDES, TALLOW, LEATHER AND BOOTS AND SHOES.

Commodity.	Measure.	Market.
Hides No. 1, inspected steers and cows.....	Per lb. ...	Toronto, Ont.
Calfskins, green No. 1.....	" ...	Toronto, Ont.
Horsehides, western.....	Per hide..	Montreal, Que.
Tallow, rendered, No. 1 stock in barrels.....	Per lb.	Toronto, Ont.
Leather, No. 1, slaughter sole, heavy.....	" ...	"
Leather, No. 1, Spanish sole for jobbing.....	" ...	"
Leather, harness No. 1, U.O.	" ...	"
Leather, heavy, upper.....	" ...	"
Boots and shoes:		
Men's split, Blucher, bals, pegged.....	Per pair..	Ottawa, Ont.
Men's Box calf Blucher bals, G.W.....	" ..	"
Women's Dongola, Blu- cher bals, F.S.....	" ..	"

In the case of each of the above com- modities, the price on the opening market day of each month is quoted from a reli- able authority back to 1890.

In order to compare the course followed by the prices of the several commodities,

¹See the *Labour Gazette* for February, 1910, page 893. The portions of the investigation already published relate to animals and meats, dairy produce and fish, grains and fodder.

and to combine them so as to show the course of prices as a whole, a table of rela- tive prices or index numbers has been prepared and is published herewith. These numbers show for each commodity the percentage which the average price of the commodity from year to year was of the average for the decade 1890-1899. Thus, in the case of calfskins, the number 192.3 in the year 1909, means that the average price of calfskins during that year, at Toronto, was 92.3 per cent. above the average for the decade 1890-1899. By adding these index numbers and averaging the totals from year to year, the courses of prices of hides, leathers, etc. as a whole, are shown, regarding each of the several commodities as of equal im- portance.

A series of charts is added which shows in graphic form, the course of the several commodities during the past twenty years.

Result.

It will be seen from the tables that hides, tallow, leathers and boots and shoes were higher in 1908 and 1909 than at any time in the past twenty years. Compared with average prices for the decade 1890-99, the increase is approxi- mately thirty-five per cent. Prices on the whole, were steady from 1890 to 1899, but began to rise in 1900, each year thereafter showing a considerable gain. The most noteworthy recent feature has been the exceedingly rapid advance of cowhides and calfskins during the past year, an advance which was felt by most leathers, and has since extended also to boots and shoes.

WHOLESALE PRICES, CANADA, 1890-1909.—HIDES, TALLOW, LEATHER AND BOOTS AND SHOES.

HIDES: NO. 1, INSPECTED, STEERS AND COWS.

RETAIL PRICES OF STAPLE ARTICLES OF

The accompanying table sets forth the retail prices prevailing on or about the fifteenth day of the month preceding the present issue of the *Labour Gazette*, of the more important staple commodities entering into the cost of living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement is given of the rental of a representative workingman's dwelling of the better class in the quarter of each locality, usually occupied by workmen.

The exact quality for which the quotation is given is

LOCALITY.	Beef.		Veal forequarter, per lb.	Mutton, hindquarter, per lb.	Pork.		Bacon, best smoked, per lb.	Fish, fresh, good quality, per lb.	Lard, pure leaf, per lb.	Eggs.		Milk, per quart.	Butter.		Cheese, Canadian, per lb.
	Sirloin steak, per lb.	Medium chuck roast, per lb.			Fresh roasting, per lb.	Salt, per lb.				New laid, per doz.	Packed, per doz.		Dairy, tub, per lb.	Creamery prints, per lb.

CONSUMPTION, CANADA. DURING APRIL, 1910.

set forth in the case of each commodity, and every care has been taken to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of

every Province in the Dominion.

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the respective localities, under detailed instructions as to sources of information, quality of goods to be quoted, etc., from the Department.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

British Emigration Returns.

During the month ended March 31, 1910, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING MARCH 1910-1909.

Nationality.	1910	1909
English.....	10,924	6,204
Welsh.....	310	36
Scotch.....	3,718	1,689
Irish.....	780	317
British Colonial.....	418	111
Total British subjects.....	16,150	8,537
Foreign.....	3,284	2,209
Total.....	19,434	10,566

During the three months ending March 31, 1910, the number of passengers leaving the United Kingdom, as above, was:—

EMIGRATION FROM GREAT BRITAIN DURING JANUARY, FEBRUARY AND MARCH, 1910-1909.

Nationality.	1910	1909
English.....	16,196	9,885
Welsh.....	458	69
Scotch.....	5,159	2,303
Irish.....	955	435
British Colonial.....	587	221
Total British subjects.....	23,355	12,913
Foreign.....	6,509	4,527
Total.....	29,864	17,440

Homestead Entries.

The following statement shows the number of homestead entries made during the month of March, 1910, as compared with March, 1909:

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF MARCH, 1910, AS COMPARED WITH MARCH, 1909.

Agency.	Manitoba.		Saskatchewan.		Alberta.		British Columbia.		Remarks.
	1910	1909	1910	1909	1910	1909	1910	1909	
Battleford.....			142	118					
Brandon.....	4	11							
Calgary.....					850	277			
Dauphin.....	103	71							
Edmonton.....					305	293			
Estevan.....			93	44					
Humboldt.....			135	156					
Kamloops.....							25	24	
Lethbridge.....					571	359			
Moose Jaw.....			1,627	636					
New Westminster.....							3	1	
Peace River.....									Monthly report for March not yet received.
Prince Albert.....			123	113					
Regina.....			27	69					
Red Deer.....					155	148			
Saskatoon.....			425						
Winnipeg.....	95	137							
Yorkton.....			116	135					
Total.....	202	219	2,688	1,271	1,881	1,077	28	25	2,209

It will be seen that there has been a net increase for March, 1910, of 2,209 in the number of entries made.

A statement of the entries made during the first three months of the calendar year 1910, compared with the corresponding months of 1909, is as follows:—

	Manitoba.		Saskatchewan.		Alberta.		British Columbia.	
	1910	1909	1910	1909	1910	1909	1910	1909
January.....	152	125	976	605	1,558	566	12	12
February.....	161	168	1,069	636	1,007	543	17	17
March.....	202	219	2,690	1,271	1,881	1,077	28	25
Total.....	515	512	4,735	2,512	4,446	2,186	57	54

Nationalities of Homesteaders.

The nationalities of homesteaders during the month of March, 1910, as re-

ported by the several agencies of the Department of the Interior in Manitoba, Saskatchewan, Alberta and British Columbia, were as follows:—

Nationalities.	Manitoba.	Saskatchewan.	Alberta.	British Columbia.	Total.
Canadians from Ontario.....	8	182	125	1	316
“ Quebec.....		50	20		70
“ Nova Scotia..	1	14	5	1	21
“ New Brunswick		2	2		4
“ P. E. Island		11	2		13
“ Manitoba.....	54	100	27	1	182
“ Saskatchewan		204	78		282
“ Alberta.....		203	78		281
“ British Colum- bia.....		2	16	3	21
Persons who had previous entry Newfoundlanders.....	34	70	58	2	164
Canadians returned from the United States.....	1	37	78	1	117
Americans.....	12	657	679	10	1,358
English.....	24	456	262	6	748
Scotch.....	6	55	28		89

Of 1,276 entries made by persons coming from the United States, there were 282 from South Dakota, 275 from North Dakota, 215 from Minnesota, sixty-seven from Wisconsin, fifty-two from Indiana, forty-three from Iowa, thirty-five from Florida, thirty-four from Oregon, thirty-three from Michigan, thirty-one from Illinois, twenty-six from Washington, twenty-three from Kansas, and twenty-one from Indian Territory.

Lands Patented.

An abstract of letters patent covering Dominion lands, situate in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory, from the Department of the Interior, during the month of March, 1910, as compared with March, 1909, is as follows:—

Nature of Grant.	March, 1910.	
	No. of Patents.	No. of Acres.
Alberta Railway and Irrigation Company's sales.....	21	12,661.00
Assignment of mortgages.....
British Columbia homesteads..	4	640.00
British Columbia sales.....	6	373.45
Coal lands' sales.....	7	1,988.20
Homesteads.....	1,846	291,965.513
License of occupation.....	2
Military bounty grants.....	7
Mineral rights (2,246 acres)...	17	3,592.60
North-west half-breed grants...	1	180.05
Parish sales.....
Quit claim, special grants.....
Railways:		
Calgary and Edmonton Ry. Co	5	2,083.00
Canadian Northern Railway..
Canadian Pacific Railway grants.....	3	773.09
Canadian Pacific Railway roadbed and station grounds
Grand Trunk Pacific Railway
Manitoba South western Col. Railway.....
Sales.....	52	11,765.28
School lands' sales.....	46	4,504.053
Special grants.....	20	1,534.87
Yukon Territory sales.....
Totals.....	2,037	332,061.10

In March, 1910, the number of patents issued was 3,609, covering an area of 591,997.18 acres, showing a decrease for

the month of March, 1909, of 1,610 in the number of patents issued, and of 259,936.10 acres in the area patented.

Land Sales.

The following is a statement of the farm land sales made by the Canada Northwest Land Company, Limited, during the month of March, 1910, compared with the sales of March, 1909, and for the year 1910 to March, 1910, compared with the corresponding period a year ago.

	Acres.	Price obtained.
March, 1910.....	4,169.80	\$49,203.00
" 1909.....	801.23	8,812.30
Increase, 1910.....	3,368.57	\$40,390.70
From Jan. 1 to March 31, 1910	14,439.16	\$157,398.60
From Jan. 1 to March 31, 1909	2,413.33	27,134.75
Increase, 1910.....	12,025.83	\$130,263.75

Notes.

Immigrant arrivals during April have been on a very heavy scale. The early opening of the spring season has stimulated the movement, which has been fully half again as heavy during the past month as during the corresponding period of 1909. The demand for bookings by immigrants coming to Canada has exhausted all available steamship accommodation for some time in advance, and in some cases extra steamers have been placed on the route.

The movement from the western States into the Prairie Provinces has also been on an exceptionally heavy scale, train loads of settlers and their effects crossing the international boundary daily. The railways have had difficulty in transporting the incoming settlers and their effects owing to the extent of the movement.

During April a report was submitted to the United States Congress by the Chairman of the Joint Immigration Commission with regard to the movement of emigrants from the United States to Canada. The report contains a review

of the immigration policy of the Dominion. It is estimated that 12,000 citizens of the United States with from \$1,000 to \$5,000 each, entered Canada and took up land during the past year.

The Province of New Brunswick has appointed a representative of the Province in London, England, for the purpose of encouraging immigration to that Province.

FAIR WAGES RESOLUTION ADOPTED BY THE CITY OF MONTREAL, QUE.

A FAIR WAGES resolution was adopted by the City Council of Montreal, Que., during April, under which a fair wages clause will be inserted in future contracts awarded by the city, and other conditions enforced for the protection of the workmen employed on the contracts in question. In framing the provisions of the resolution, the policy adopted by the Government of Canada, in 1900, with subsequent amendments, was closely followed.

In addition to specifying the wages to be paid to each class in the case of each contract, the following conditions are enjoined upon the contractor:—

All workmen employed on the works contemplated or to be executed in accordance with the said contract, must be residents of the city of Montreal, unless the Board of Control are of opinion that the supply of labour in Montreal is insufficient, or for special circumstances it would be contrary to public interest to enforce this condition.

No workman employed on the works shall, under any circumstances, receive remuneration at less than the minimum rate of salary, or work during a greater number of hours than fixed by the fair wage schedule.

The schedule of fair wages shall include all classes of workmen necessary for the execution of the work, but should the work in hand require the execution of items not included in the fair wages schedule, the Board of Control, or one of its officers, as often as the need is felt, have the right to fix the minimum scale of wages for such workmen.

The contractor will not have the right to payment payable, otherwise than in accordance with the terms of his contract regarding the work, or the execution thereof, unless he has beforehand laid before the Board of Control, in support of his claim, the schedule of wages, the amounts paid, or, as the case may be, owing and unpaid, for salaries or services rendered in the execution of such work, and such account rendered shall be verified under oath, in the form required by the statute, on the part of the contractor.

The contractor shall, at least once a week, if so required, furnish to the Board of Control or to such person authorized in this behalf, a detailed account indicating the name, the amount of salary, the amount paid on account, and the balance, as the case may be, of amounts due for salary or wages for services rendered, to a foreman, workman, day labourer, or driver in the execution of the work.

No piece work will be allowed.

The number of hours to be worked per day or per week will be those current in the different trades in the city of Montreal. The hours of labour shall be similar to those observed in the city of Montreal, and the workman shall not be obliged to work longer hours, unless in cases of urgency, for the protection of the citizens, or of property, or other urgent case.

Any contract entered into between the contractor or any of his workmen whereby the latter agrees to accept a lesser salary than mentioned in the schedule, or in violation of the same, shall be null and void.

The list of fair wages above mentioned

must be observed in its entirety, in so far as the hours of labour are concerned, and any violation thereof must be at once brought to the notice of the Board of Control, or person authorized by it. Any person giving notice of such violation of

the schedule, will be considered as furnishing strictly confidential information.

The Council also passed a resolution recommending the appointment of a fair wages officer, to enforce the above provisions.

FALSE REPRESENTATIONS TO INTENDING IMMIGRANTS TO CANADA.

THE following report of a Committee of the Privy Council of Canada, in the matter of alleged misrepresentations to an intending immigrant to Canada from Great Britain, was approved by His Excellency the Governor-General, on March 31, 1910:

"The Committee of the Privy Council have had before them a report, dated March 22, 1910, from the Secretary of State for External Affairs, submitting copy of an affidavit from one Harold Spencer, of the town of Brighouse, in the County of Yorkshire, England, weaver, to the effect that he has been induced by false representation and contrary to the terms of Section 24 of the Merchants' Shipping Act, 1906, of Great Britain, to emigrate to Canada and to proceed to the city of Guelph, to work in a factory in which a strike was in progress.

"The Minister also submits a copy of a letter from the Guelph Trades and Labour Council to the Deputy Minister of Labour, setting forth the serious wrong which, it is held, is done to workmen by deceiving them in the manner above set forth, so that upon their arrival in Canada "they are placed in the cruel position of working

as strike breakers or starving"; the said communication further requesting that steps may be taken for the prosecution in Great Britain, under the terms of the Merchants' Shipping Act, 1906, of the person alleged in the aforesaid affidavit of Harold Spencer to have made the false representations inducing his emigration to Canada.

"Your Committee, on the recommendation of the Secretary of State for External Affairs, advise that Your Excellency may be pleased to forward a copy hereof, together with copies of the documents above mentioned, to the Right Honourable the Principal Secretary of State for the Colonies, with the request that the attention of the proper authorities in Great Britain may be called to the matters therein set forth.

"All of which is respectfully submitted for approval.

(Sgd.) F. K. BENNETTS,

Assist. Clerk of the Privy Council

The Honourable

THE MINISTER OF LABOUR."

RECENT INDUSTRIAL AGREEMENTS.

Memorandum of Agreement made the 11th day of April, 1910, between the Building Trades Council* of Lethbridge and Contractor.

THIS agreement comes into force on May 1, 1910, and shall continue and be binding upon the parties and

those represented by them until April 1, 1911, and if neither party shall give notice to the other of their desire to alter or amend the terms hereof before January 1, 1911, this agreement and everything herein contained shall be deemed to be continued and be in force until April 1, 1912.

The Trade Unions agree not to allow any of their members to work on any other occupation or work of any kind after hours for which they may be receiv-

*Representing unions of carpenters and joiners, plumbers and steamfitters, lathers, painters and decorators, hod carriers and builders' labourers, electrical workers and sheet metal workers.

ing remuneration, (other than overtime on the work on which he is engaged during hours) and also the Contractors agree not to work themselves with the tools more than eight hours per day.

During the term of this agreement, the Contractor or Contractors agree to pay the following schedule of wages, to be paid to all members of the aforesaid Trade Unions, that is to say:

Carpenters and joiners, fifty cents per hour for an eight-hour day. Overtime, time and one-half till midnight. Double time from midnight till eight a.m., also Sundays and all legal holidays.

Electrical workers, forty-five cents per hour for journeymen. Helpers' wage shall be:—

First year, twenty-five cents per hour.

Second year, thirty-five cents per hour.

Third year, forty cents per hour.

Eight (8) hours shall constitute a day's work.

Plasterers' labourers mixing and carrying mortar, forty-three and three-quarter cents per hour. Eight hours per day.

Bricklayers, mortar mixers, hod carriers and carpenters' labourers, thirty-five cents per hour; ten hours per day.

General labourers, twenty-seven and one-half cents per hour; ten hours per day.

Lathers, five cents per yard for four nail work; six cents per yard for five nail work. Lathers to furnish nails; fifty cents per hour for all repair work. Contractors to deliver lath above second floor.

Painters and decorators, forty-five cents per hour, eight hours per day.

Plumbers and steamfitters, fifty-five cents per hour. Eight hours per day, excepting Saturdays, when the working hours will be four.

If there be five or more men employed in a shop, two apprentices will be allowed, otherwise only one.

Sheet metal workers, forty-five cents per hour. Overtime, time and one-half. Double time to be from twelve midnight till seven a.m., also Sundays and all legal holidays.

In all instances in the above schedule, where no overtime is mentioned, it shall be at the rate of time and one-half till midnight. Double time from midnight till starting time following morning, also Sundays and all legal holidays.

The Contractors also to agree during the term hereof not to employ any other than Union Men at the above trades, provided, however, that if any three contractors certify under their hand that any worker, at any of the said trades, is a competent workman at such a trade he shall be forthwith (if willing) elected a member of the Union of that particular trade for the City of Lethbridge.

And it is further provided that all Contractors and Sub-contractors be allowed to retain all men employed by them at the time of the aforesaid strike, provided such men are willing to join the Union of their trade.

It is also further agreed that in case any breach of this agreement is made by either party to this agreement, the breach shall be tried before and be determined by a committee of four members, two to be appointed by each of the parties to this agreement, and in case of disagreement, the dispute shall be settled by the appointment by the said four members of the Committee, of a fifth member. He shall be appointed on the application of either party by the Judge of the District Court, for the Lethbridge district, and the decision of such Committee, or such fifth member shall be conclusive and binding upon all parties concerned.

Agreement between Michigan Central Railway Company and Telegraphers.

The following will be rules and rates of wages for telegraphers:

ARTICLE 1.

This schedule applies to telegraphers. A telegrapher is defined as one who fills a position other than an official or semi-official position in which ability to telegraph is a necessity.

Nothing in this Article is to be construed as meaning that a telegrapher is ineligible for promotion to any agency or any other position in the Company's service, for which he may be considered fit.

ARTICLE 2.

Section 1. Telegraphers will be regarded in line for promotion, and where ability is sufficient seniority will prevail. In making transfers and promotions, seniority will govern, provided ability to fill the position is sufficient. Seniority will date from the last time of entering the service and will extend over each Superintendent's Division. Transfers from one division to another will be at the discretion of the General Superintendent, and will be made when a position cannot be filled on account of lack of ability among the telegraphers on the division on which the vacancy exists. The Superintendent of the Division on which the vacancy exists, or the Superintendent of Telegraph, will be the judges as to the ability of the applicant. Temporary vacancies on any division will be filled by transfer from the general extra list by the Superintendent of Telegraph. Telegraphers transferred from one division to another will carry their seniority with them.

Sec. 2. Vacancies will be promptly bulletined to all offices on each division and will be filled by the Division Superintendent, or Superintendent of Telegraph, in accordance with Section 1. A vacancy will be filled as soon as practicable. Applications for the vacancy must be filed within forty-eight hours after the issuing of the bulletin. When a telegrapher is transferred or promoted, and after a fair trial is found incapable, he will take his place on the extra list, but will retain his seniority rights. Telegraphers declining to accept promotion or transfer to any position do not forfeit their rights to it or another position when vacancy occurs.

Sec. 3. In the event of a reduction of telegraphers the men on the extra list will be laid off first, and the men last appoint-

ed to a regular position will be the first to be placed on the extra list. Appointment to a regular position will be governed by fitness and ability, according to Section 1, Article 2. The oldest man on the extra list shall be first considered.

Sec. 4. A list of telegraphers on each division will be prepared according to seniority, posted in the Telegraph Office at Division headquarters, and revised annually.

Sec. 5. Seniority will only be effective when vacancies occur or new positions are created.

ARTICLE 3.

When new positions are created compensation will be arranged in conformity with positions of the same class as shown in this schedule.

ARTICLE 4.

Telegraphers will not be suspended or discharged without just cause. When they consider they have been unjustly treated, they will have a right to appeal to the Division Superintendent, General Superintendent and General Manager in the order named. In case a telegrapher has been disciplined or discharged and after investigation found not at fault he will be re-instated and paid for all time lost. Such investigation is to be held within ten days after the request of the party designated. Telegraphers may be accompanied by one or more co-employees from their department at any or all investigations if they so desire.

ARTICLE 5.

Telegraphers absent from regular duty on business of the Company, whether attending court, or on other assigned duties, will be allowed their regular pay and authorized expenses while away from home.

ARTICLE 6.

One hour will be allowed for dinner, when consistent, between the hours of

11:00 A.M. and 1:00 P.M. If less than one hour is allowed for dinner, one hour overtime *pro rata*, but not less than twenty-five cents will be paid.

ARTICLE 7.

Sec. 1. Where but one operator is employed, twelve consecutive hours, including meal hour, shall constitute a day's work, except operators at Chicago CG & OW, Niles, Kalamazoo, Jackson, Jackson Junction, Z Office Car Shops, Bay City, Detroit F and St. Thomas, where ten consecutive hours, including meal hour, will constitute day's work. Where more than one operator is employed ten consecutive hours, including meal hour will constitute day's work.

Sec. 2. At stations where but one operator is employed and who works ten hours or more per day, such operators will, after a continuous service in the Telegraph Department of four years or more, be given fifteen days' vacation yearly under full pay or be paid in lieu thereof fifteen days' extra pay at the rate applying to their station. Vacations can be granted only up to the ability of the company to provide relief, and applications will be granted according to the seniority of the applicants; all applications to be filed during the months of January, February and March for vacations during the current year.

ARTICLE 8.

Sec. 1. When telegraphers are required by the Train Dispatcher to remain on duty longer than the number of hours constituting a day's work, they will be paid overtime.

Overtime will be based on the regular salary. The rate per hour will be determined by dividing the monthly rate by the number of hours required for the month's work, provided that the rate per hour will in no case be less than twenty-five cents. Allowance will be made for the actual time of service computed to the nearest five minutes.

Sec. 2. When telegraphers are called to

the office by proper authority outside of their usual hours for duty, the compensation for one hour's work or less shall be twenty-five cents when the call is within three hours after the appointed time for relief, otherwise it will be fifty cents. If held more than one hour overtime will be paid as per Section 1.

Sec. 3. Day telegraphers are expected to report at an appointed hour on Sunday, but if held by the dispatcher for work they will be allowed overtime. Day telegraphers are expected, however, to know that their relief reports for duty Sunday night.

Sec. 4. When day telegraphers are required to work Sundays, overtime as per Section 1 (this Article) will be allowed.

Sec. 5. Night telegraphers will be paid one day extra at the scheduled daily rate for each Sunday they are required to work.

Sec. 6. At three trick telegraph offices, the second and third trick men will be considered as night operators.

ARTICLE 9.

Sec.1. Telegraphers will not be required to scrub waiting rooms, offices or out buildings, clean or disinfect stock cars.

Sec. 2. When telegraphers are required to attend pumps, they will receive five dollars (\$5.00) per month extra compensation.

Sec. 3. When telegraphers are required to attend switches or work interlocking levers in interlocking towers they will be paid five dollars (\$5.00) per month extra compensation. This extra compensation paid for attending to switches will include attending to the lamps pertaining to said switches.

Sec. 4. Telegraphers required to attend to pumps and switches will be paid \$7.50 extra pay per month.

Sec. 5. Telegraphers will be allowed four dollars (\$4.00) extra compensation for taking care of six (6) switch or sema-

phore lamps or less, and fifty cents (50c.) for each additional lamp per month will be paid, it being understood that in cases where the day and night operators share in the performance of the work the compensation shall be equally divided.

ARTICLE 10.

Sec. 1. Regular telegraphers transferred or promoted, or extra telegraphers assigned to regular positions will be furnished free transportation for themselves, family and effects.

Sec. 2. Regular telegraphers transferred or promoted will not suffer any loss of pay on account of the time lost in making the transfer, but will be paid at the rate of the position left until they go on duty in the new position.

ARTICLE 11.

Telegraphers will be granted leave of absence from time to time for the purpose of attending their meetings, provided such leave of absence does not interfere with the business of the Company, and they will be granted the necessary transportation over the lines of the Michigan Central Railroad.

ARTICLE 12.

Telegraphers will not be discriminated against on account of their serving on Boards of Adjustment, representing the telegraphers, and will be furnished transportation over the lines of the Michigan Central Railroad, and relieved without unnecessary delay for that purpose.

ARTICLE 13.

In case telegraphers are dismissed or should resign and should be re-instated or re-employed within one (1) year they shall retain their rights; after one year they shall be considered as new men.

ARTICLE 14.

Telegraphers shall receive the same

rate of pay as agents or telegraphers relieved. Nothing in this article shall be considered as meaning that telegraphers shall suffer a reduction in their pay while temporarily relieving an agent or telegrapher.

ARTICLE 15.

Nothing in these articles will relieve telegraphers from responsibility under the rules.

ARTICLE 16.

These rules will be effective April 1, 1910, and will remain in effect until April 1, 1911, and thereafter until it is shown that there is some change in conditions which warrant a revision; either party to give thirty days' notice of a desire to change these rules.

WAGES.

The changes in wages granted under the agreement in Canada are shown in the following:—

S. W. BROWN,

General Superintendent.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF APRIL, 1910.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 340 individual workpeople in Canada, during the month of April, 1910, were reported to the Department of Labour. Of these, ninety-four were fatal, and 246 resulted in serious injuries. In addition, two fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before April, 1910.

In the preceding month there were 132

fatal and 261 non-fatal accidents reported, a total of 394, and in April, 1909, there were sixty-four fatal and 186 non-fatal accidents, a total of 250. The number of fatal accidents reported in April, 1910, was, therefore, fifty-four less than in the preceding month, and ninety more than in April, 1909. The number of non-fatal accidents reported in April, 1910, was fifteen less than in the preceding month, and sixty more than in April, 1909. Altogether, there were fifty-four less industrial accidents reported in April, 1910, than in the preceding month, and ninety more than in the same month of the preceding year.

Of 186 returns received during the month giving the age of the victims of industrial accidents, twenty-four referred to persons under twenty-one years of age, fifty-eight to persons between twenty-one and forty-five, and seventeen to persons over forty-five. Eighty-seven persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month, by industries and groups of trades:—

STATEMENT OF ACCIDENTS DURING APRIL,
1910, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.	10	18	28
Fishing and hunting.	9	9
Lumbering.	16	11	27
Mining.	7	10	17
Building trades.	7	7
Metal trades.	7	52	59
Woodworking trades.	1	28	29
Printing trades.	2	2
Textile trades.	1	4	5
Food and tobaccopreparation.	6	6
Railway service.	16	40	56
Navigation.	4	4	8
General transport.	3	8	11
Public employés.	4	30	34
Miscellaneous.	8	11	19
Unskilled labour.	8	15	23
Total.	94	246	340

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman, were: disastrous landslides at Bagotville, Que., and at Coucoucache, Que., in each of which four workmen lost their lives; the drowning of three river drivers near Tewkesbury, Que.; a fatal fire at Cornwall, Ont., in which five hotel employés were burned to death; the drowning of three fishermen off Priest Pond, P.E.I.; the drowning of three sailors off St. John, N.B., of two fishermen at Bear Point, N.S., of two fishermen at Grand Marais, P.E.I., of two mail carriers at Little Pabos, Que.; and the killing of two sawmill hands at Toronto, by a fall of timber.

Fishermen Carried to Sea off Priest Pond, P.E.I.

On April 19, three fishermen of Priest Pond, on the north side of Prince Edward Island, left in a gasoline dory to attend to their fishing nets, about half a mile out. The engine apparently broke down, and the dory being unable to make headway

against the strong wind blowing off shore, was carried out to sea. A search for the men was made, but they could not be found.

Drowning of Three Sailors off St. John, N.B.

On April 21, a squall struck the schooner *Arthur M. Gibson*, New York to St. John, about four miles off the latter place, and three sailors were swept overboard and drowned.

Drowning Accident at Bear Point, N.S.

Two brothers left Bear Point, N.S., on April 2, for Emerald Isle, to meet a steamer for the purpose of shipping lobsters. While on their way, their boat capsized, and they were both drowned.

Killed by Fall of Lumber at Toronto, Ont.

While unloading a car of lumber in the yards of the Rosedale Lumber Company, Limited, Toronto, Ont., on the night of April 20, a pile of lumber slipped off a car which was being backed up, and fell on two workers, instantly killing one, and injuring the other in such a manner as to cause his death on the morning of April 21.

Drowning of Two Fishermen at Grand Marais, P.E.I.

While two fishermen were plying their calling in a gasoline boat, outside of Grand Marais, P.E.I., on April 19, their boat upset, and they were both drowned.

Drowning of Two Mail Carriers at Little Pabos, Que.

While two mail carriers were crossing the river at Little Pabos, Que., on April 28, in order to get the mail from the railway train at Caplin, Que., the scow in which they were making the trip, swamped, and they were both drowned.

Disastrous Landslide at Bagotville, Que.

On April 15, a premature explosion of dynamite dislodged about 2,000 cubic feet of earth on the line of the Ha Ha Bay Railway, at Bagotville, Que., causing a slide of earth and rocks, and burying underneath the same a gang of railway construction hands, killing four of them outright, and more or less injuring five others. The jury empanelled in the case, brought in a verdict of accidental death imputing blame to nobody.

Landslide at Coucoucache, Que.

On April 18, while a gang of construction hands were proceeding to work on a ballast train, on the line of the National Transcontinental Railway, at a place called Coucoucache, Que., a recently erected embankment, about fifty feet high, composed of rock and earth, gave way, precipitating the train down the embankment. In the wreck, four workmen were killed and ten others more or less seriously injured.

Drowning of Three River Drivers near Tewkesbury, Que.

On April 26, while driving logs on the Jacques Cartier river, three drivers were precipitated into the river, in the Bedard rapids, near Tewkesbury, Que., and were drowned before help could reach them.

Fatal Fire at Cornwall, Ont.

On April 29, a fire occurred in the Rossmore Hotel at Cornwall, Ont., in which five of the hotel employés, and several boarders were burned to death.

Record by Trades and Industries.

Agriculture.—There were ten fatal and eighteen non-fatal accidents in this industry, during April, 1910, compared with thirteen killed and twenty-seven injured, in the preceding month, and ten killed and twenty-four injured in April,

1909. Four of the deaths were due to runaways, two to blood-poisoning, and one each to a fall, to electricity, to being run over, and one to being found dead. Of the serious accidents, six were due to falls, four to machinery, three to tools, two each to live stock and to falling material, and one to a runaway.

Fishing and hunting.—Nine of these workers were drowned during April, 1910. The previous month showed two fatalities, and April, 1909, nine killed and five injured.

Lumbering.—Sixteen workmen were killed and eleven injured in April, 1910, compared with ten killed and eighteen injured in March, last, and four killed and twelve injured in April, 1909. Eight of the fatalities were caused by drowning, five by falling material, two by machinery and one by flying material. Of the other accidents, six were caused by machinery, three by falls, and one each by flying and falling material.

Mining.—In this group, there were seven fatalities and ten serious accidents, compared with eight fatalities and twenty-eight injured in the previous month, and seven killed and six injured in April, a year ago. Two of the fatalities were due to falling material, and one each to being run over, to a fall, to an explosion, to mine cars and to machinery. Five of the minor accidents were due to cars, two to falling material, and one each to being run over, to an explosion and to machinery.

Building trades.—Seven workers were injured during April, last, five by falls, and one each by falling material and by machinery. The record of March, last, was five killed and twenty-four injured, and of April, 1909, thirteen injured.

Metal trades.—During April, 1910, there were seven deaths caused by accident and fifty-two injuries, compared with five deaths and twenty-four injuries in the month before, and four deaths and forty-three injuries in April of last year. Three of the fatalities were due to electricity, and one each to drowning, to an elevator, to an explosion and to machin-

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF APRIL, 1910.

Trade or Industry.	Locality.	Date	No.	Cause of Fatality.
<i>Agriculture</i>				
Farmer.	St. Francois, Que.	April	1	From results of amputation of hand.
"	Chalk River, Ont.	"	4	Fell from train.
"	Rush Lake, Sask.	"	13	Struck by lightning.
"	North Oxford, Ont.	"	19	In a runaway.
"	St. Hilaire, Que.	"	23	Run over by train.
"	Cleveland, Que.	"	15	In a runaway.
"	Westminster Township, Ont.	"	25	Stepped on fork, died of blood poisoning.
"	Stoney Creek, Ont.	"	27	Found dead.
"	Moose Jaw, Sask.	"	25	In a runaway.
"	Bathurst Township, Ont.	"	30	In a runaway.
<i>Fishing and hunting</i>				
Fishermen.	Bear Point, N.S.	"	3	2 Drowned, boat capsized.
"	Port Medway, N.S.	"	17	1 Drowned, dory upset.
"	Priest Pond, P.E.I.	"	19	3 Drowned, gasoline dory carried out to sea.
"	Liscombe, N.S.	"	17	1 Drowned, dory foundered.
"	Grand Marais, P.E.I.	"	21	2 Drowned, gasoline boat upset.
<i>Lumbering</i>				
River driver.	Near Harcourt, N.B.	"	11	1 Drowned in jam of logs.
"	Near LaPatrie, Que.	"	12	1 Drowned, fell from logs.
"	Wyckham, N.B.	"	15	1 Bow of logs fell on him.
"	Salmon River, N.S.	"	19	1 Drowned, boat capsized.
"	St. Tite des Caps, Que.	"	23	1 Drowned, fell off logs.
"	Tewkesbury, Que.	"	28	3 Drowned, fell off logs.
"	St. John River, N.B.	"	26	1 Drowned.
Logger	White Rock Bay, B.C.	"	12	1 Tree fell on him.
"	Vancouver, B.C.	"	24	1 Tree fell on him.
Sawmill hand	Toronto, Ont.	"	21	2 Pile of lumber fell on them.
"	Sackville, N.B.	"	6	1 Caught in shafting.
"	Campbellton, N.B.	"	28	1 Caught in shafting.
Pulp Mill foreman	Clark City, Que.	"	11	1 By flying wood from saw.
<i>Mining</i>				
Miner.	Coal Creek, B.C.	"	2	1 By fall of rock.
"	Coal Creek, B.C.	"	2	1 Run over by train.
"	Michel, B.C.	"	7	1 By fall of coal.
"	Sherbrooke, Que.	"	20	1 Fell 50 feet in shaft.
"	Babine Mountain, B.C.	"	11	1 Drilled into missed hole.
"	Middlesboro, B.C.	"	9	1 Crushed between car and wall.
Concentrating mill emp.	Eustis, Que.	"	19	1 Caught in shafting.
<i>Metal, engineering and shipbuilding trades</i>				
Electrical worker.	St. Johns, Que.	"	5	1 Electrocuted.
"	Kenora, Ont.	"	14	1 Electrocuted.
"	Fort William, Ont.	"	18	1 Electrocuted.
Bridge builder.	Rusecomb, Ont.	"	12	1 Drowned, jumped from bridge to avoid a train.
Iron and steel worker.	London, Ont.	"	21	1 Crushed in elevator.
Foundryman.	Sault Ste. Marie.	"	24	1 By blast of gas.
Iron worker.	Longue Pointe, Que.	"	30	1 Caught in shafting.
<i>Woodworking trades</i>				
Woodworker.	Southampton, Ont.	"	12	1 By flying wood from saw.

Labourer	Niagara Falls, Ont.	" 5	1	Derrick boom fell on him.
"	Levis, Que.	" 5	1	Run over by train.
"	Lachine, Que.	" 9	1	Run over by train.
"	Winnipeg, Man.	" 5	1	Bucket filled with earth fell on him.
"	Saskatoon, Sask.	" 19	1	Boom of derrick fell on him.
"	Niagara Falls, Ont.	" 5	1	Crushed by hoist.
"	Montreal, Que.	" 27	1	Telegraph pole fell on him.
"	New Glasgow, N.S.	" 16	1	Run over by train.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN APRIL, 1910.

Miner	Coal Creek, B.C.	Mar. 30	1	By fall of rock.
Iron and steel worker	Welland, Ont.	" 31	1	Died of injuries received February 9, by falling on gearing.

ery. Sixteen of the injuries were due to falling material, thirteen to machinery, eight to flying material, four each to falls and to electricity, two each to scalds and to explosions and to tools, and one to molten metal.

Woodworking trades.—One workman was killed and twenty-eight injured during April, compared with one killed and eleven injured in the month before, and one killed and thirteen injured in April, 1909. Flying material caused the fatal accident; twenty-one of the other accidents were caused by machinery, three to flying material, two to elevators, one each to a fall and to live stock.

Printing trades.—Machinery caused two accidents in the allied trades. In the preceding month, there were five non-fatal accidents, and in April a year ago, four.

Textile trades.—To a fall was due one death, and four other workmen were seriously injured, two being due to machinery and one each to an explosion and to flying material.

Food and tobacco.—During April, 1910, six workmen were injured, four by machinery, and one each by an elevator and by electricity. In March, last, the record was two killed and six injured, and in April, 1909, two injured.

Railway service.—There were sixteen employés killed and forty injured during April, compared with seventy-two killed and thirty-three injured in the preceding month, and thirteen killed and twenty injured in April, 1909. Six of the fatalities were due to being run over, and five each to derailments and to falling material. Fourteen of the non-fatal accidents were due to derailments, eight to falling material, four to being run over, three each to collisions, to being run over, to machinery and to flying material, and two to falls.

Navigation.—During April, four of these workers were drowned and four others were seriously injured, three by

machinery and one by falling material. There were no accidents in March, and in April, 1909, the record was eight killed and five injured.

General transport.—In this group there were three killed and eight injured, compared with four killed and thirteen injured in the month previous, and seventeen injured in April, of last year. To runaways were due two of the deaths, and being crushed between cars, the other one. Of the injuries, four were due to collisions, and one each to a fall, to being run over and to an explosion.

Public employés.—Four public employés were killed and thirty injured, during April, 1910, as against six injuries in the month before, and one injury in April a year ago. Two of the fatalities were caused by drowning, and one each by being assaulted by tramps and by being run over. Of the non-fatal accidents, twenty were caused by falling material, three by explosions, and by being assaulted by prisoners, two by flying material, and one each by a fall and by electricity.

Miscellaneous.—The record for April, 1910, was eight killed and eleven injured, for the month before, six killed and nine injured, and for April, 1909, two killed and eight injured. Five of the victims were burned to death, and one each of the others was killed by a fall, by electricity, and by being caught between cars. Four of the minor accidents were caused by falls, three by runaways, and one each by machinery, by an explosion, by a tool, and by live stock.

Unskilled labour.—Eight labourers were killed and fifteen injured, compared with two killed and fifteen injured in the previous month, and five killed and seven injured in April, 1909. Five of the deaths were due to falling material, and three to being run over. Seven of the injuries were due to falling material, three to explosions, two each to being run over, and to falls, and one to machinery.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF APRIL, 1910.

The following is a list of contracts awarded by the Department of Public Works, the Department of Railways and Canals, and the Department of Marine and Fisheries, which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

PROTECTION PIER, WINNIPEG BEACH, MAN.

Protection pier, Winnipeg, Man., name of contractor, John Lowrey, Ottawa Ont.; date of contract, April 13, 1910; amount of contract, \$14,960.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter.....	\$4.00
Engineman for pile driver..	3.00
Carpenters.....	3.50
Blacksmiths.....	3.00
Blacksmiths' helpers.....	2.00
Labourers.....	2.00
Driver with 1 horse and cart	3.50
Driver with 2 horses and wagon.....	5.00

Department of Railways and Canals.

BRIDGE OVER TRENT CANAL, AT LINDSAY, ONT.

Erection of a Strauss Trunnion Bascule bridge over Trent Canal, at Lindsay, Ont.; date of contract, April 6, 1910; amount of contract, \$14,600; contractors, The Hamilton Bridge Works Company, Limited.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Bridge erection foreman....	\$2.50
Assemblers.....	2.00
Riveters.....	2.00
Rivet heaters.....	1.75
Structural iron workers....	2.25
Labourers.....	1.50
Hoisting engine driver....	2.00
Carpenter.....	2.25
Painters.....	2.00
Watchman.....	1.50
Machinists.....	2.00
“ helpers.....	No rate.
Carpenters' helpers.....	No rate.

CONSTRUCTION OF RAILWAY, THESSALON, ONT.

For a line of railway from Thessalon, northerly, not exceeding four miles; date of subsidy agreement, April 19, 1910; amount of subsidy, \$3,200 per mile, not exceeding \$6,400 per mile; railway company, The Thessalon and Northern Railway Company.

RATE OF WAGES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefore is filed in the office of the Minister of

and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

RAILWAY, RED DEER, ALTA., ROCKY
MOUNTAIN HOUSE.

For line of railway from a point at or near town of Red Deer, to a point on the North Saskatchewan River, at or near Rocky Mountain House, not exceeding seventy miles; date of subsidy agreement, April 25, 1910; amount of subsidy, \$3,200 per mile, not exceeding \$6,400 per mile; railway company Alberta Central Railway Company.

RATE OF WAGES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefore is filed in the office of the Minister of

and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

Department of Marine and Fisheries.

LIFEBOAT HOUSE AT ESCUMINAC, N.B.

The construction of a wooden lifeboat house at Escuminac village, in the County of Northumberland, N.B.; date of contract, October 7, 1909; name of contractor, Edward Burke, Esq., St. John, N.B.; amount of contract, \$855.00.

Trade or class of Labour.	Rate of Wages, Per Day of 10 Hours. Not less than
Carpenters.....	\$1.75
Painters.....	1.75
Labourers.....	1.25
Builders' labourers.....	1.50

CRIBWORK PIER, GRAND ENTRY HARBOUR,
MAGDALEN ISLANDS, QUE.

The construction of a cribwork pier for a pole light at Grand Entry Harbour, Magdalen Islands, Que.; date of contract, March 17, 1910; name of contractor, George J. Murray, Esq., Pictou, N.S.; amount of contract, \$704.00.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours. Not less than:
Carpenters.....	\$1.50
Masons.....	2.50
Bricklayers.....	3.00
Labourers.....	1.25

Post Office Department.

During the month of April orders were given by the Post Office Department for the supplies below mentioned, subject to the regulations for the suppression of the *swearing* system, and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	838.75
Making and repairing rubber dating stamps and type, also other stamps.....	42.40
Supplying stamping material and wooden boxes, and repairing stamping pads.....	1,840.05
Supplying mail bags.....	1,749.75
Repairing mail bags.....	1,984.01
Making and repairing Post Office Scales.....	683.00
Making and repairing mail locks and supplying mail bag fittings.....	672.40
Supplying Railway Mail Clerks' tin travelling boxes, and repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes, parcel receptacles and Street Letter Boxes.....	237.25
Making and repairing miscellaneous articles of Postal Stores.....	59.30
Making and supplying articles of official uniform.....	1,126.73

TRADE DISPUTES DURING THE MONTH OF APRIL, 1910.

WHILE there were a number of trade disputes affecting large bodies of men, which began in April, few of them were of long duration, and industrial conditions were impeded by them for only a short time. Building operations were brought to a standstill at Lethbridge, Alta., for eleven days, at the beginning of the month, and the towns of Frank, Alta., and Greenwood, B.C., suffered to some extent from strikes of coal miners and smelter men. The chief point of disturbance, however, continued to be at Springhill, N.S., where a strike of coal miners, which began on August 10, 1909, was still in force. The strike at Glace Bay, C.B., of the employés of the Dominion Coal Company, was formally declared off, on April 28, and the men will return to work as soon as vacancies can be found for them. The strike had lasted from July 6, 1909, but according to the Company, conditions had not been affected for several months.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada, during April, was sixteen, five more than in the previous month, and six more than in April, 1909. About 122 firms, and 3,704 employés were affected by these disputes, about 107 firms, and 1,916 employés being affected by new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes, during April, was approximately 49,110 working days, compared with a loss of about 50,570 days in March, and 79,500, in April, 1909.

Trades affected by new disputes.—The following table shows the trades affected by new disputes of the month, and the number of employés involved in each group of trades.

¹See pages 6861-6904, House of Commons debate.

Trades.	No. of disputes.	No. of workers.
Lumbering.	1	150
Mining.	2	401
Building trades.	1	400
Metal trades.	2	580
Clothing trades.	2	222
Transport.	2	145
Unskilled labour.	1	18
Total.	11	1,916

Localities affected by new disputes.—

The new disputes of the month occurred in the following provinces of the Dominion.

Province.	No. of disputes.
New Brunswick.	1
Ontario.	5
Manitoba.	1
Alberta.	2
British Columbia.	2
Total.	11

Causes of disputes.—The following were the causes of the new disputes of the month.

Cause.	No. of disputes.
For increase in wages.	3
For increase in wages and shorter hours.	1
Against reduction in wages, for recognition of Union and 'closed shop'.	1
Against declaration for 'open shops'.	1
Against employment of particular persons.	3
Against conditions of employment.	1
For 'closed shop'.	1
Total.	11

Methods of settlement.—Of the sixteen disputes in existence during April, ten were terminated, leaving six still unsettled at the end of the month. Eight were terminated by negotiations between the parties concerned, one by reference to a Board under the Industrial Disputes Investigation Act, 1907, and in the remaining case, the places of the strikers were filled.

Results of disputes.—The employers were successful in two of the disputes that were terminated, the employés were successful in three, and compromises were effected in three cases. In one case, the employés were partially successful, most of them having been granted their demands, and in the remaining dispute, the result was indefinite, the matter having been left to a Board under the Industrial Disputes Investigation Act.

Disputes which Commenced Prior to the Beginning of the Month.

The disputes in existence during April, which began in previous months, comprised strikes of coal miners at Springhill, N.S., carpet weavers at Guelph, Ont., garment workers at Toronto, Ont., and cloak makers at Montreal, Que.

Strike of Coal Miners at Springhill, N.S.

No settlement took place with regard to a strike of coal miners at Springhill, N.S., which began on August 10, 1909, on account of the refusal of the Cumberland Railway and Coal Company to grant a demand for recognition of the United Mine Workers of America, an increase in wages and certain changes in the conditions of employment. About 1,700 men were originally affected by this dispute, but a number of them had left the district, and the Company had resumed operations to a limited extent early in the present year, having about 300 men employed during the month of March.

Strike of Carpet Weavers at Guelph, Ont.

No settlement was reported in the case of a strike of carpet weavers at Guelph, Ont., who went out on December 11, on account of the refusal of their employers

to grant a demand for extra pay for overtime, and general dissatisfaction with the conditions of their employment. About twenty-eight men were directly and twelve indirectly affected by this dispute, but some of the strikers left to seek work in other localities, and the Company were reported to have secured a number of men to take their places.

Strike of Garment Workers at Toronto, Ont.

No settlement was reported in a strike of fifty-eight female garment workers, which began at Toronto, Ont., on February 2, on account of the refusal of the employers to give thread free, instead of deducting the cost from the wages of their employés, which the Company claimed had been their custom for twenty years.

Strike of Cloak Makers at Montreal, Que.

No settlement was reported in the case of a strike of forty male, and twenty-five, female, cloak makers, at Montreal, Que. which began on February 18, on account of the refusal of the employers to grant a demand for an increase in wages. On February 23, a sympathetic strike was declared by about 935 cloak makers in twenty-five other shops, but agreements were quickly reached with many of these establishments, only eleven firms, and 225 employés being affected during March. In the course of April, industrial conditions ceased to be affected by the dispute.

Settlement of Strike of Coal Miners at Glace Bay, N.S.

On April 28, the strike of coal miners of the Dominion Coal Company, which began on July 6, 1909, was formally declared off by the local branches of the United Mine Workers' of America, who were involved in it, and on the following day about 100 men applied for re-instatement. It was stated by the Company, that the terms upon which they were willing to take back the strikers had been repeatedly set forth by them. These conditions were reported by the Union to

be as follows (1) Foremen employés out of work, would be taken back as soon as possible, and there would be no discrimination against them (2) The men, so far as possible, would be given work similar to that in which they were previously employed. (3) The men would be housed as soon as possible after they had returned to work. (4) When the men had gone back to work, the Company would receive a committee of any of its employés to discuss any grievances that might arise.

Some months before, the Company claimed to be producing the normal quantity of coal, having secured sufficient men to replace those on strike, but the formal termination of the dispute, on the part of the men, enabled the Company to extend its operations.

New Disputes.

The new disputes of the month affected coal miners at Frank, Alta., smeltermen at Greenwood, B.C., building trades at Lethbridge, Alta., sawmill hands at St. John, N.B., tailors at Winnipeg, Man., iron workers' labourers at Hamilton, Ont., sheet metal workers at Vancouver, B.C., shoe workers at Berlin, Ont., longshoremen at Point Edward, Ont., freight-handlers and civic labourers at Hamilton, Ont.

Strike of Coal Miners at Frank, Alta.

On April 2, about 234 coal miners of the Canadian-American Coal and Coke Company, stopped work at Frank, Alta. The causes of the dispute were the reduction in wages of twenty-eight employés, and the refusal of the Company to concede the extension of the jurisdiction of the Union over certain shaftmen, or to agree to the principle of a 'closed shop'. No resumption of work was reported during the month, but on application of the Company, a Board was formed under the Industrial Disputes Investigation Act, 1907, to deal with the matters in dispute.

Strike of Smeltermen at Greenwood, B.C.

On April 19, a strike of 167 smeltermen of the British Columbia Copper

Company took place at Greenwood, B.C. According to the company, the alleged cause of the dispute, was the desire of the men to have the principle of the 'closed shop' adopted in its works. No settlement took place during the month.

Strike in the Building Trades at Lethbridge, Alta.

On April 1, a general strike in the building trades took place at Lethbridge, Alta., with the object of gaining an eight-hour day and certain changes in wages. About 400 men were reported to have been involved in this dispute, including carpenters, painters, plumbers, sheet metal workers, electricians, lathers and labourers. All the contractors in the town, about sixty in number were involved, as well as ten other firms indirectly affected. The strike was terminated on April 12, by the signing of an agreement conceding the eight-hour day and 'closed shops' after May 1.

Strike of Sawmill Hands at St. John, N.B.

On April 12, about 150 sawmill hands employed by Messrs. Stetson & Cutler, at St. John, N.B., declared a strike on account of the refusal of the employers to grant a demand for an increase of ten per cent. in their wages. Work was resumed on April 20, the increase demanded having been granted. On the termination of this dispute, the five other mill owners of St. John, employing about 800 men, voluntarily granted a similar increase to their employés.

Strike of Tailors at Winnipeg, Man.

On April 6, a general strike of tailors took place at Winnipeg, Man., in which all the establishments and about 150 employés were involved. The object of the strike was to procure an advance of ten per cent. in wages. The strike was terminated on April 12, an increase of eight per cent. having been conceded.

Strike of Iron Workers' Labourers at Hamilton, Ont.

On April 1, about 500 employés of the Hamilton Steel and Iron Company stop-

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES C, No. 115.

TABLE OF TRADE DISPUTES DURING THE MONTH OF APRIL.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.				Date of termination.	Result.
			Directly.	Indirectly.	Directly.		Indirectly.			
					Fe-males.	Males.	Fe-males.	Males.		
<i>Mining</i> Coal Miners.....	Springhill, N.S.	For recognition of union and increase of wages and against conditions of employment...	1	1,400	Aug. 10	No settlement reported, but places of many strikers were filled.
<i>Textile trades</i> Carpet weavers....	Guelph, Ont.	Demand of men for extra pay for overtime, and general dissatisfaction with conditions..	1	28	12	Dec. 11	No settlement reported, but some strikers sought work elsewhere, and some places were filled.
<i>Clothing trades</i> Garment workers..	Toronto, Ont.	Refusal of employers to give thread free, instead of deducting cost from wages.....	1	58	Feb. 2	No settlement reported at end of month.
Cloakmakers.....	Montreal, Que.....	Demand for increase in wages..	1	40	25	Feb. 18	No settlement reported at end of month.
.....	Montreal, Que.....	In sympathy with striking cloak makers.....	11	100	125	Feb. 23	No settlement reported at end of month, but conditions ceased to be affected.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.

DISPUTES WHICH BEGAN DURING THE MONTH.

<i>Lucumbering</i> Sawmill hands	St. John, N.B.	For increase of ten per cent. in wages.	1	150	April 12	April 20	Increase of ten per cent. in wages granted.
<i>Mining</i> Coal miners	Frank, Alta.	Against reduction in wages, for recognition of union with respect to certain employes and for a 'closed shop'.	1	234	April 2	April 29	Dispute referred to Board under I.D.I. Act, 1907.
Smeltersmen	Greenwood, B.C.	For employment of union labour only.	1	167	April 19		No settlement reported at end of month.
<i>Building trades</i> All building trades	Lethbridge, Alta.	For eight-hour day and certain changes in wages.	60	400	April 1	April 12	Agreement signed in favour of employes.
<i>Metal trades</i> Iron workers	Hamilton, Ont.	Employes were dissatisfied with foremen.	1	500	April 1	April 2	Foremen were removed by Company and work resumed.
<i>Labourers</i> Sheet metal workers	Vancouver, B.C.	Against declaration of employers for 'open shops'.	28	80	April 8		Work resumed by all but 12 unionists and 8 apprentices on agreement being reached in some shops. Negotiations still pending at end of month.
<i>Clothing trades</i> Tailors	Winnipeg, Man.	For ten per cent. increase in wages.		110	April 6	April 12	An eight per cent. increase in wages granted.
Shoe workers	Berlin, Ont.	Against rule requiring two weeks notice of intention to leave.	1	49	April 3	April 20	Agreement signed; one weeks' notice only required.
<i>General transport</i> Freight handlers	Hamilton, Ont.	For increase in wages.	1	20	April 11	April 13	Increase of one cent per hour granted
Longshoremen	Point Edward, Ont.	Against employment of Italians.	2	125	April 28	April 29	Work resumed on understanding that Italians could not be molested and that strikers would not be discriminated against.
<i>Unskilled labour.</i> Civic labourers	Hamilton, Ont.	Men objected to foreman.	1	18	April 18	April 19	Work no longer affected by strike.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employes, or of less duration than 24 hours.

ped work at Hamilton, Ont., the alleged cause being dissatisfaction with certain of the foremen. Work was resumed on April 2, the Company having removed the foremen, with whom the men were dissatisfied.

Dispute of Sheet Metal Workers at Vancouver, B.C.

On April 8, a dispute affecting sheet metal workers took place at Vancouver, B.C., in which about twenty-eight firms, and eighty employés were involved. In the course of the month, settlements were reached in many cases, and at the end of April, it was reported that only twelve journeymen and eight or ten apprentices were still out.

Strike of Shoe Workers at Berlin, Ont.

On April 11, a strike of shoe workers took place at Berlin, Ont., in which about forty-nine male, and sixteen female employés were affected directly, and four male, and three female employés indirectly. The dispute arose on account of the Ahrens Shoe Company notifying their staff that a two weeks' notice would be required of any employé wishing to leave the factory, and pay for that time would be withheld, to enforce this order. Negotiations were immediately instituted with a view to arriving at a settlement, and on April 20, work was resumed, on the following terms:—

“That in the event of an employé desiring to leave the employ of the firm, one week's notice must be given at the office. Otherwise, one week's pay will be forfeited. That the time for collecting the work checks of the piece-workers, and the time for the day-workers, will be Wednesday morning, with pay-day on the following Saturday, at the time of closing the factory for that week's work. Pay-day shall be every other week. In the case of the discharge of any employé, a week's notice will also be given, unless

the cause for such discharge is a case of misdemeanor.

Strike of Longshoremen at Point Edward, Ont.

On April 28, about 125 longshoremen employed by Messrs. Bassett & Smith, contractors, and the Northern Navigation Company, declared a strike at Point Edward, Ont., refusing to work with some Italians, whom the employers claimed they had to bring from Toronto, as they had been unable to get sufficient labour. On the next day, the strikers returned to work on the understanding that they would not molest the Italians, and that the employers would not discriminate against them.

Strike of Freighthandlers at Hamilton, Ont.

On April 11, a strike of freight handlers of the Toronto, Hamilton and Buffalo Railway Company, took place at Hamilton, Ont., on account of the refusal of the employers to grant a demand for an increase in wages. On April 13, an increase of one cent per hour was granted. Seven men who went out on April 11 were not taken back. About twenty men were affected by this dispute.

Strike of Labourers at Hamilton, Ont.

On April 18, a strike of civic labourers working on the water mains at Hamilton Ont., stopped work, on account of a foreman being placed over them. Twelve men were dismissed and six left of their own accord. The work was not affected longer than one day.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of April, and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during April, 1910.

DOMINION REPORT.

Canal Statistics.

Department of Railways and Canals. Canal Statistics for the season of navigation, 1909. Ottawa: King's Printer, 1910. Pages 100. Price, 10 cents.

IN the report on canal statistics of Canada, for the year 1909, it is stated that the traffic of the canals, during the last season of navigation, amounted to 33,720,748 tons, representing an increase of 16,217,928 tons, or 92.6 per cent. over 1908. The principal increase of traffic was through the Sault Ste. Marie Canal, which amounted to 12,759,216 tons in 1908, and 27,861,245 tons in 1909.

NOVA SCOTIA REPORT.

Education in Nova Scotia.

Annual Report of the Superintendent of Education of Nova Scotia for the year ended July 31, 1909. Halifax: King's Printer, 1910. Pages 294.

The report of the Superintendent of Education of Nova Scotia, for the year ended July 31, 1909, shows good progress compared with the previous year. The regular public school enrollment increased from 100,105 to 101,680 pupils, and there were in addition 1,375 pupils attending the technical schools. These latter included 566 at the coal mining schools, 333 at the engineering schools, and 471 at evening technical schools. The current cost of the technical schools to the Provincial Treasury rose from \$29,972.25 to \$33,068.15. The Nova Scotia Technical College was completed and ready for occupation on September 24, 1909, and classes were opened on September 28. This college is closely affiliated with the Universities of Acadia, Dalhousie, King's and St. Francis-Xavier in Nova Scotia, and Mount Allison in New Brunswick, by the terms of which the universities offer a uniform course in engineering,

covering the first two years of a four years' course, and the technical college offers the last two years in civil, electrical, mechanical and mining engineering. A system of short winter courses is planned for the benefit of men employed on railroad construction, land surveying and bridge building, and for mining superintendents, and firemen in charge of power plants around the mines. All students in civil and mining engineering are required to take practical work in surveying in a summer camp.

In nearly every colliery town there has been established an evening school for instruction in coal mining, and in Glace Bay and Sydney Mines special classes are held for the advanced work suited for underground managers who wish to become managers. An optional coal mining course has also been introduced into the public schools, conducted by special mining instructors in the employ of the Department of Technical Education.

QUEBEC REPORT.

Industrial Conditions in Quebec.

General report of the Minister of Public Works and Labour of the Province of Quebec for the year ending June 30, 1909. Quebec: King's Printer, 1909. Pages, 145.

The portions of the report of the Minister of Public Works and Labour, relating to industrial conditions are the chapters on trade disputes and on the inspection of industrial establishments and public buildings. In the report of the Registrar of Councils of Conciliation and Arbitration, it is observed that the number of manufacturers and workmen who are disposed to settle disputes by peaceful means is on the increase, and his services have been sought rather to prevent than to settle conflicts. Particulars are given of the following disputes in which his intervention was sought: strike of employes in lumber coves at Sillery, Que., complaint of lumber mill hands at Louiseville, complaint of weavers at Chambly Canton, strike

of shoe lasters at Quebec, dispute between a foreman and workmen in a shoe factory at Quebec, strike of leather cutters at Quebec, and strike of asbestos miners at Thetford Mines. In one case a dispute was finally settled by reference to a board under the Industrial Disputes Investigation Act, 1907, on the recommendation of the Registrar.

The report of the Chief Inspector of industrial establishments states that 380 inspections of factories and public buildings were made, and 660 industrial accidents were reported. It is stated that many of the accidents are due to the lack of protective appliances, manufacturers as a rule, not being eager to buy special apparatus, such as guards for saws or joiners. Another cause of accidents is the use of old buildings for workshops, not originally constructed for that purpose. With a view to the prevention of factory accidents, a small museum has been formed containing models of protective appliances for use in factories.

ONTARIO REPORTS.

Work of the Bureau of Labour.

Tenth report of the Bureau of Labour of the Province of Ontario for the year ending December 31, 1909. Toronto: King's Printer, 1910. Pages, 282.

The report of the Ontario Bureau of Labour for 1909, deals with a wide variety of topics. Among these are municipal and industrial statistics based on returns received from clerks of municipalities and manufacturers, work of the free employment bureaus, returns from labour organizations, changes in wages and hours of labour, labour legislation of Ontario, legal decisions affecting labour, trade disputes, and British and foreign labour news.

There were received 756 returns from municipalities, including all the cities and incorporated villages of the province, all but five of the towns, and a great majority of the organized townships. The tabulation of the statistics contained in all but five of these returns shows that in 1908, there were erected 14,626 new buildings, at a cost of \$31,611,934, and there were expended on permanent

improvements \$5,169,379, and on sanitation \$1,333,127.

The four free employment bureaus at Hamilton, London, Ottawa and Berlin, continued to do successful work, there having been, during 1909, 964 male and ninety-nine female applications for work. There were applications for 731 male and 345 female help wanted, and 465 male and fifty-seven female situations were filled.

Education in Ontario.

Report of the Minister of Education, Province of Ontario, for the year, 1909. Toronto: King's Printer, 1910. Pages, 634.

The report of the Department of Education of Ontario for 1909, shows that encouraging progress has been made. The amounts directly paid for elementary, secondary and university education by the Province have increased from \$7,761,890 in 1905, to \$10,392,088 in 1908. The supply of well trained teachers has been affected by the demand in the west, but to counteract this tendency there has also been an increase in salary paid, the average for male teachers in the public schools having increased in five years by thirty-four per cent. and that of female teachers by thirty-three per cent. For the first time in forty years there was a slight increase in the percentage of men engaged in teaching in public schools.

The subject of technical education received attention during the year, and the Superintendent of Education, Dr. John Seath, was authorized by the Government to visit Great Britain, France, Germany and Switzerland, in order to examine the instruction given in the trade schools of those countries.

Temiscaming and Northern Ontario Railway.

Eighth annual report of the Temiscaming and Northern Ontario Railway Commission for ten months, ended October 31, 1909. Toronto: King's Printer, 1910. Pages, 239.

On October 31, 1909, the total mileage of the Temiscaming and Northern Ontario Railway was 335.08. For the ten months ended on that date the total

operating revenue amounted to \$1,361,224.88, and the operating expenses to \$974,796.88. The ore royalties amounted to \$108,516.68, and there was paid for hire of equipment the sum of \$19,073.47, making the total earnings for the ten months \$655,871.21. Steps have been taken by the Commission to replant some of the waste lands near the line with trees of economic value. Surveys were made of the mining districts of Elk Lake, Gowganda, and Porcupine, and the Land Department was opened for the purpose of encouragement of settlement of the regions in North Ontario, suitable for agriculture.

Lands, Forests and Mines.

Report of the Minister of Lands, Forests and Mines of the Province of Ontario for ten months ending October 31, 1909. Toronto: King's Printer, 1910. Pages, 110.

The report on lands, forests and mines indicates the rapid development of the northern regions of Ontario. During the ten months ended October 31, 1909, there was sold for agricultural purposes 78,658 acres of Crown lands, the price being \$128,154.28. For mining purposes 10,708 acres were sold for \$363,635.78, and 3,296 acres were leased for \$3,295.64. Two new townships were opened up for settlement, one in the Rainy River valley, and the other in Kenora district. The Department has endeavoured to allow settlers to take up only lands suitable for agriculture, and close inspections are made to see that the settlers prosecute their improvements in compliance with the law and regulations.

The production of ores and minerals proceeded vigorously during the ten months. It was estimated that the total yield of the silver mines of Cobalt in 1909, would be not less than \$25,000,000 ounces.

BRITISH REPORT.

Cost of Living in Belgian Towns.

Report of an Inquiry by the Board of Trade into working class rents, housing and retail prices, together with rates of wages in certain occupations in the principal industrial towns of Belgium. London: Wyman & Sons, 1910. Pages, 259. Price, 2s., 2d.

The report of the Board of Trade of Great Britain, on the cost of living in

Belgian towns is the fourth of a series of volumes, the preceding ones relating to the United Kingdom, Germany, and France. The report contains a general account of conditions in Belgium, with regard to housing, rents, family budgets, retail prices, wages and hours of labour, a comparison between Belgium and England and Wales in these respects, and detailed reports on the principal towns. In the appendices there are contained summary tables of wages and hours of labour, rents, and retail prices; specimen workshops and colliery rules, and conditions of municipal employment, workpeople's benefits; laws and regulations relative to the preparation and sale of food, and building laws and regulations.

UNITED STATES REPORTS.

Labour Statistics of Maine.

Twenty-third annual report of the Bureau of Industrial and Labour Statistics for the State of Maine, 1909. Pages, 500.

The subjects discussed in the Report of the Bureau of Industrial and Labour Statistics of Maine for 1909, comprise 'Industrial conditions of women wage workers in Westbrook', 'Statistics of labour bureaus,' 'Opportunities for new industries,' 'Directory of trade unions,' 'Mineral resources of Maine,' 'Summer cottages and hotels,' 'Court's decision in damage suits,' and 'requests, strikes and agreements.' The volume also contains the report of the Board of Arbitration and Conciliation, and the report of the Inspector of Factories, workshops, mines and quarries.

Industrial Conditions of New Jersey.

Thirty-second annual report of the Bureau of Statistics of Labour and Industries of New Jersey. For the year ending October 31, 1909. Pages, 312.

The report of the Bureau of Statistics of New Jersey for 1909, is divided into three parts. Part I contains statistics of manufactures, statistics of steam railroad transportation, tables of retail prices, and an account of the fruit and vegetable canning industry. Part II deals with the law of employers' liability in the

United States under the Common law, and under the statute law of various states. Part III contains an industrial chronology of New Jersey for the year ended September 30, 1909, showing industrial accidents, changes in hours and wages, labour unions, and strikes and lockouts.

OTHER REPORTS RECEIVED.

Nova Scotia.—Report of subsidized railways and other public works, for the year ended September 30, 1909.

Annual report of the roads' division of the department of public works and mines for the year ended September 30, 1909.

Ontario.—Report on the operation of the Liquor License Acts, for the year 1909.

Annual report of the Bureau of Industries, 1908. Part III, Municipal statistics.

Alberta.—Annual report of the department of agriculture, 1908.

Great Britain.—Statistical abstract for

the principal and other foreign countries in each year from 1897 to 1907-8.

Statistical abstract for the British Empire in each year from 1894 to 1908. Despatch from His Majesty's Minister in China forwarding a general report by Sir Alexander Hosie respecting the opium question in China.

Correspondence respecting the application to British subjects of the benefits of the Swedish law, in regard to workmen's compensation for accidents.

Australia.—Vital statistics of the Commonwealth for the quarter ended September 30, 1909.

Transvaal.—Mines Department. Administration report of the Inspector of white labour for the year ended June 30, 1909.

United States.—Eighteenth annual report of the Bureau of Statistics and Information of Maryland, 1909.

Connecticut Labour Bulletin, 1909.

Twelfth annual report of the Bureau of Labour Statistics of Virginia.

Italy.—Ufficio del Lavoro. Lavoro dei fanciulli e crescita del corpo, per il Prof. Giovanni Loriga.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NOVA SCOTIA CASES.

THE action instituted by the United Mine Workers Union against Messrs. Alexander Dick and J. R. Cowans, on the charge of conspiring to increase the price of coal was quashed on April 1, when the Grand Jury threw out the indictment, reporting no bill.

The preliminary examination before Stipendiary Fielding took about thirty sessions, and voluminous evidence and lengthy arguments of counsel were presented. The stipendiary dismissed the information as against James Ross, of Montreal, then President of the Dominion Coal Company, and put the other defendants, Mr. Alexander Dick, sales agent of the Dominion Coal Company, and Mr.

J. R. Cowans, manager of the Springhill mines, on trial. Mr. Justice Drysdale placed the case before the Grand Jury.

Mine Workers Must Not Interfere.

In the Supreme Court, on April 7, Judge Laurence filed a lengthy judgement in the case of the Dominion Coal Company versus Bousfield and others. This was an action for an interlocutory injunction on the part of the plaintiff to prevent the defendants (sixty members of the United Mine Workers of America) from besetting and watching the places where the plaintiff Company carried on business, with a view to compel, by unlawful means, other persons from working for the plaintiff Company.

The Judge in his decision stated:—
“On July 6, 1909, according to affidavits of Daniel McDougall, an official of the United Mine Workers' Association,

about 5,000 workmen of the plaintiff Company ceased work, and went on strike, and a very large number of these men remain yet on strike.

"During this period the strikers have concertedly and systematically interfered with the workmen of the Company, who remained at work. They have insulted, molested, assaulted, beat, watched, and beset these men who remained in the employ of the Company, and that to such an extent the Company has been obliged to employ a large force of peace officers and constables (to the number of 600 at one time, and now 200) to escort and protect their workmen going to and returning from their work.

"The affidavits on the part of the plaintiff fully establish these facts and they are not satisfactorily answered by the affidavits read on behalf of the defendants.

"Recent cases very clearly establish the right of the plaintiff Company to be protected by injunction in such a case."

In conclusion, the Judge stated:—

"I am of the opinion the injunction should be continued until the trial of this action."

ONTARIO CASES.

Brakeman's Damages for Injuries.

Plaintiff, a brakeman in the employ of defendants, brought action to recover damages for injuries caused, as alleged, by negligence of defendants in placing a switch stand where it was placed. The injuries were sustained at the St. Thomas yards, in August, 1908. The main question was, whether the switch was negligently placed in such a position as to be dangerous to persons whose heads, arms, or bodies protruded beyond the car, in or upon which they were when passing the switch stand. If its distance from the track was the usual and proper distance, having regard to its efficient operation, and all other circumstances bearing upon the question, then there was no negligence, and no liability. The plaintiff, as stated in the particulars given at the second

trial mentioned below, was on the ladder on the side of a car which was passing the switch stand, at the time of the injury. At the trial, Mr. Justice Teetzel granted a non suit with costs, but subject to the opinion of the Divisional Court whether there was any evidence in the charge of negligence which should have been submitted to a jury. If there was, judgement to be entered for plaintiff for \$2,520. The Divisional Court entered judgement for plaintiff for that amount. On appeal, the Court of Appeal ordered a new trial, on the ground that the best evidence available, for the plaintiff, had not been adduced at the trial, and gave no costs of the former trial to either party: "The Case", said Mr. Justice Meredith, "is one in which the plaintiff may have a good cause of action but has not gone the right way about proving it; and the defendants have done nothing to disprove it, as they easily might, if in truth there be no good cause of action; and the result should be a new trial, if the plaintiff choose to take it, otherwise the judgement at the trial should be restored. New trials, in the discretion of the Court, should be very exceptional, but this case seems to be one of such exceptions. I do not see how justice can otherwise be done."

The new trial of the above action took place at Chatham, on the twenty-first ulto., before Chancellor Boyd and a jury. Plaintiff claimed that while descending a ladder at the side of a freight car, the conductor stepped on his hand, causing him to let go, so that he fell outward striking a switch stand, and within five feet of the track, whereby he was thrown under the wheels, and his feet crushed so that his toes had to be amputated. The jury awarded plaintiff \$4,000 damages, and judgement was directed for that sum and costs. It is stated the defendants will appeal.

(Leitch v. Pere Marquette Railway Company.)

Reversal of Judgements for Damages on Building Contract and Liens on Property.

Reversal of judgements for damages on building contract and liens on property. Plaintiff brought action to recover

\$15,000 damages, alleged to have been caused plaintiff by reason of actions threatened and liens put upon his property in Hamilton, known as the Grand Opera House, which had been erected by defendants for him, at an agreed price of \$25,000, and which liens plaintiff had to pay. At the trial Mr. Justice Anglin gave judgement for the plaintiff for \$8,750 and costs, and the Divisional Court dismissed defendants' appeal therefrom. The Court of Appeal reversed these judgements, and entered judgement for defendants for \$950 on a counterclaim, with costs throughout. Plaintiff's claim consisted of two chief items—one, the damages under the defendant's covenant that the building should not cost more than \$22,500; the other, the damages said to have been sustained by the delay in completion within the time agreed upon. As to the first, the parties appear to have agreed at the trial that, if the defendants were held liable the amount of the damages under that head would be fixed at \$7,500. They were held liable by Mr. Justice Anglin, and the sum agreed upon was accordingly awarded. Upon the second head, Mr. Justice Anglin reached the conclusion that the defendants were also liable, and he fixed the amount of the damages in that respect at \$1,700. The substantial defence applicable to both heads, but particularly to the first, was, that alterations and variations in the work which formed the subject of the agreement were subsequently made by the defendants, at the request of the plaintiff, to such an extent that the work actually done was not contracted to be done, but a much more extensive and expensive work. Defendants also alleged that the original agreement between the parties had been waived by the plaintiff. The issue between the parties was one of fact depending upon the evidence, the result being as above stated.

(Small v. Clafin, 15 Ontario Weekly Reporter, 574.)

The Litigation with the Toronto Street Railway Company.

"The Judicial Committee of the Privy Council has dismissed with costs the appeal in the action of the corporation

of Toronto vs. the Toronto Street Railway. Lord MacNaughton delivered the judgement, dismissing the appeal with costs. The judgement declared it a singular appeal, and, in their Lordships' opinion, a very idle one. In substance it was an attempt to avoid or impugn an order of his Majesty-in-Council, and to reopen a question finally determined in litigation." This decision affirms the right of the Toronto Railway Company to lay down new lines, or extensions of its present system, on any street that was a part of the city in 1891. The Judicial Committee's judgement, however, is virtually overruled by an Act, passed at the last session of the Ontario Legislature, under which the control of the Toronto Railway Company, over the streets of the city, is vested in the Ontario Railway and Municipal Board. By that Act the Toronto Railway Company must first obtain the permission and approval of the Ontario Railway Board, whenever it desires "to begin the construction of a railway or make any extension," on any street of the city. And this approval of the Board shall be based on its opinion as to whether such new tracks are "necessary" or "convenient for the public service," or "in the public interest."

Damages under Workmen's Compensation Act.

Chief Justice Meredith has found Wm. J. McLaughlin entitled to recover \$1,750 and costs against the Ontario Iron & Steel Company, of Toronto. It was an action for damages to the plaintiff, who was employed in defendants' manufactory as a foreman moulder, and received injuries on December 17, 1908, while engaged in his work, owing to a hook, a heavy part of an overhead crane, falling and striking him on the head, causing a fracture of the skull; as he alleges, through the negligence of the defendants. The jury negatived the grounds of negligence advanced, and found that the appliances were reasonably safe and sufficient for the purpose for which they were used, but found that the man's injuries were caused by negligence on the part of the

man who operated the crane. The judge states: "In my opinion, Murphy vs. Wilson does not apply, and McCauley (who operated the crane) should be held to have been a person having the charge or control of an engine or a machine upon a railway, within the meaning of clause 5 of section 3, of the Workmen's Compensation for Injuries Act, and the plaintiff is entitled to recover."

Damages for Loss of Legs.

The Divisional Court has awarded Walter C. Barnett, a London butcher, \$6,000 damages against the Grand Trunk Railway for the loss of both legs. He was riding home on a Pere Marquette train when there was a collision in the London yards, with a Grand Trunk engine and van, and he was injured. He had paid no fare, but officials of the Pere Marquette, who had seen him, had asked for no fare. At the trial he was nonsuited by Chief Justice Meredith, the Grand Trunk contending that the plaintiff was a trespasser on the Pere Marquette.

Thrown by a Train Step.

A "portable step", such as is used to enable passengers to descend from the high steps of trains, caused Miss Essie M. Hoskin a broken leg for which, at the trial, she was awarded \$1,250 and costs against the Michigan Central Railway. The Divisional Court dismissed the railway's appeal. Miss Hoskin was a traveller for the sale of corsets and costumes and stumbled on the "step" at the Amherstburg station, on her trip there in May, 1909. She alleged that the step had been carelessly placed by the conductor, so that one edge was on the station platform, and it lurched when she stepped on it.

Compensation for Husband's Death.

A settlement has been reached between Frank Smith's widow and Beardmore & Co., whereby the widow and child receive \$1,350. Smith was a labourer, fifty years of age, and received a daily

wage of \$1.10. He met his death by falling into a hot vat at the Company's works, at Acton. "A generous settlement," was the comment of Chief Justice Mulock, who ratified the settlement.

Damages against Tunnel Contractors.

D. Rorion, at the recent Sandwich assizes, was awarded \$4,000 damages against Butler & Hoff, the Michigan Central tunnel contractors, for the death of his son, an engineer, who was thrown off a hoisting tackle and fell sixty feet to the tunnel floor last January.

QUEBEC CASES.

Is Absence from Work without Leave Criminal?

That it is no offence under the criminal laws of this country for an employé to absent himself from work, without the permission of his employer, and that no by-law could or can be passed declaring it an offence against criminal law, was the contention made by Israel Sherman, who questioned the validity of a by-law of the City of Montreal, under which he was fined for absenting himself from work. He was one of the striking garment makers and made application to the Superior Court for a writ of certiorari against the Recorder's Court, with the City of Montreal as *mise en cause*. The petitioner is a tailor. By a written agreement, made on August 2, 1909, he had agreed to serve the Boas-Felsen Company as journeyman operator for a period of one year, to be computed from August 2, last. On March 14, Sherman appeared before the Recorder's Court, on the complaint of Aaron B. Boas, for absenting himself without leave and he was then sentenced by Police Magistrate Lanctot (who presided over the Court) to a fine of \$15. The petitioner declared that he paid the fine under protest, and in order to avoid being imprisoned. The officers of the Recorder's Court, however, refused to enter, in the records of the case, the fact that such payment was made by the petitioner under protest.

Damages for Partial Loss of Hand.

Mr. Justice Demers has recently given judgement in the case of John Littlejohn, of Stanstead, against the Stanstead and Granite Quarries Company. The plaintiff sued the Company for the sum of \$1,800, for the loss of a portion of his left hand, which was crushed in the gear of a derrick, last June. The plaintiff at the time, was repairing the derrick track, and while so doing he was struck by the derrick and swung round so that his hand came in contact with the machinery. His Lordship stated that the plaintiff had fully maintained the allegation of his declaration, and also that it had been proven that the Company had been negligent. He assessed the damages at \$1,175, and costs. Of this amount \$200 goes towards the doctor's and hospital fees. In addition to this the Company paid some \$200 for medical treatment, so that the judgement practically amounts to about \$1,400.

MANITOBA CASES.

Compensation for Injured Workmen.

The report of the Commission appointed last September by the Government, to enquire into the Workmen's Compensation Act, has been presented to the Legislature. The Commissioners were Judge Locke, Thos. R. Deacon, president of the Manitoba Iron Works, and A. W. Puttee, who represented Winnipeg as labour member at Ottawa, some years ago. A prominent feature of the report is that the cost of providing compensation should be borne entirely by the employer, and the word employer shall include the Crown, municipal Corporations, and those who usually employ five or more workmen. Compensation for death is fixed at \$1,500, with a sliding scale for injuries not to exceed the amount of the death claim. Claimants are limited to one legal remedy or procedure, and in claiming, must choose under which Act they proceed, that is, whether they will sue under the common law or the proposed Act. Negligence shall not be a bar to recovery, except in

the case of drunkenness, and injuries incurred in the rescue or attempted rescue from danger, or threatened danger, of a fellow employé, will be deemed to be in the ordinary course of employment.

Blacksmith's Damages against a Railway Company.

M. Zorborsky, a blacksmith, was recently awarded \$3,000 by the jury, at the civil assizes, at Winnipeg, for injuries sustained while in the employ of the C.N.R. shops and was called upon by his foreman to help in moving a locomotive on the turntable. In performing this work he was seriously injured, having three toes of his left foot cut off and the foot badly crushed. The Company contended that the plaintiff was a volunteer in going on the platform, to assist in pulling the locomotive, he having received no orders to do so. In support of this contention, the defendants gave evidence to contradict the statement made by William Smith, the general foreman. When examined as an officer of the Company for discovery, Smith had stated on the eighth of March last that the plaintiff was lawfully on the platform, and in the discharge of his duties, at the time of the accident. It further appeared in evidence that it was usual for the foreman of the transfer table, when short of men, to request the foreman of the section of the shop into which the locomotive was to be moved to supply help. It was also shown, that, according to the information obtained by Smith, one hour after the accident, the locomotive was to be shunted into the section of foreman Foote, who was the foreman of the plaintiff. All these statements were made by Smith, as an officer of the Company, at the examination for discovery, but at the trial Smith and a number of witnesses were put into the box to show that the plaintiff was a volunteer—a defence which the Company had not pleaded, and of which the plaintiff had no notice, until the opening of the defendant's case. The plaintiff, however, swore that he was ordered by his foreman, Foote,

to go on the platform to assist the labourers to pull the locomotive. Mr. Justice Richards, in addressing the jury, threw considerable doubt on the evidence given for the Company, which he said, was, to say the least, suspicious.

BRITISH CASE.

The National Society of Operative Printers' Assistants v. Smith and Others.

This was an action by the plaintiffs for an injunction to restrain the defendant from carrying on business under the name of the National Association of Operative Printers, and from using or causing to be used as or for the title of any trade union any other names or words in such manner as to form or to be a colourable imitation of the title of the plaintiff Society, and from in any manner representing or causing or procuring to be represented or doing anything which might lead to the belief that the defendants were carrying on the business of or acting on behalf of the plaintiff Society. The plaintiff Society was a trade union registered in 1889. It consisted of a large number of male and female members, and had branches in Manchester, Liverpool, Leeds, Sheffield, Glasgow, Dublin, and other places where large printing works are carried on. Its members were chiefly workers in various branches of the printing trade who were not eligible for membership of the compositors', the stereotypers', or machine minders' trade unions. Its objects were to regulate, by agreement and otherwise, with the master printers and those employing labour in printing work, the rates and wages and conditions of employment of the workers. The principal defendant, E. S. R. Smith, was for many years the General Secretary of the plaintiff Society, but for reasons which it is not material to state, his connection with the plaintiff Society was finally severed in March, 1909. Another of the defendants was his sister, who had been the female organizer for the plaintiff Society, but she had resigned her membership in August, 1909. The

other defendants had been more or less connected with the plaintiff Society. It appeared that the defendant had since formed a new Society, under the name of the National Association of Operative Printers, to act in opposition to the plaintiff Society, and this action was brought to restrain the defendants from using such name. The plaintiffs alleged that what was being done by the defendants was calculated to damage the plaintiff Society, and evidence was given on their behalf of instances of confusion which had arisen. In one case orders for advertisements had been applied for by the defendants and given to them by persons who were acting under the belief that they were dealing with the plaintiff Society, in whose publications they had previously advertised.

MR. JUSTICE EVE, in giving judgement, said that the plaintiff Society was a registered trade union, and for a number of years the defendants had been associated with it in various capacities. That connection had been for certain reasons severed. This was a free country, and the defendants were quite at liberty to leave the plaintiff Society, while, on the other hand, the Society was entitled to dispense with their services. Under these circumstances, the defendant Smith, and those who were acting with him determined to organize another association, which, to use Smith's own words, should cater for the same class of workmen as that which the plaintiff Society was formed to benefit. In this they were acting entirely within their rights, and the plaintiffs did not complain of it, but they did complain that in choosing a name for their new Society they did not select one which was sufficiently distinctive. The question his Lordship had to determine was whether there was such a similarity between the two names as to lead to confusion. For himself he thought there was. It was difficult to incorporate the term "operative printers" into the name of the new association without running the risk of confusion. There was evidence that one witness, at all events, had himself been deceived, although he had always printed the plaintiff

Society's report. He said that he was misled by the general similarity of the names, and there was other evidence which showed that the names were not sufficiently dissimilar to avoid confusion. Then one could not shut one's eyes to the fact that the management of the new association was in the hands of persons who had been intimately connected with the plaintiff Society. That being so, they ought to have exercised more than ordinary care in adopting a name which was calculated not to cause confusion. They had, his Lordship thought, apart from the question of the name, shown an honest desire to make it apparent that they were forming a new society, in rivalry to the old. Only as regarded the name did his Lordship see any want of care in distinguishing their Society from that of the plaintiffs. His Lordship came to the conclusion that the name of the defendants' Society was not sufficiently distinctive, and in the result there must be an injunction in the terms asked for by the plaintiffs.

(National Society of Operative Printers' Assistants v. Smith and others.)

UNITED STATES CASES.

Union Loses Damage Suit.

Supreme Court Justice Greenbaum dismissed recently, the suit for \$300,000 damages brought by the New York Electrical Workers' Union against the Electrical Contractors' Association, brought on the ground that the employers broke up the union by refusing to employ any of its members, as the result of which most of the members went into a new

union, known as the Inside Electrical Workers' Union. In dismissing the suit, the Court said that there was nothing to show malicious conspiracy by the employers, such as was necessary to sustain the action for damages.

Dismissal of United Mine Workers' Appeal.

By dismissing an appeal of the United Mine Workers of America, the United States Circuit Court of Appeals, at Richmond, Virginia, made permanent a temporary injunction of a sweeping character. The case was that of President Lewis, of the Mine Workers, as an individual and as Vice-President of the Union, against the Kitchman Coal and Coke Company, of West Virginia. It was an appeal from the decision of the Circuit Court, for the northern district of West Virginia. The injunction restrains the union from interfering with employes of the Company, for the purpose of unionizing the mine; from interfering and conspiring to interfere with employes of plaintiff, so as knowingly to bring about in any manner the breaking by the plaintiff's employes of contracts for service, existing at the time or thereafter entered into, from trespassing on the Company's property, from compelling by threats of violence any employe to leave; from establishing pickets around the property of the Company, for the purpose of using violence or threatening to induce the Company's employes to leave. The case, however, was not decided strictly on its merits as the appeal was not taken within thirty days as required by law.

THE LABOUR GAZETTE

JUNE, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF MAY, 1910.

I.—GENERAL SUMMARY.

THE weather during May was generally cool and showery, being favourable to growth. A heavy hay crop is regarded as assured, and pastures are in excellent condition. Though it was impossible at the end of the month to make any definite estimate of agricultural yields, conditions in every Province were reported exceptionally favourable, the area devoted to crop being larger and the season considerably earlier than that of 1909. In view of the agricultural outlook, general industry was buoyant. Manufacturing was more active than at any time in the past three years. The amount of building projected is on a scale that promises to exceed previous records. Lumbering and mining were very active throughout the Dominion, the former being aided by favourable conditions for the drives, and both by buoyant markets. Railway construction gave employment to many thousands of men and provided an active market for heavy materials. Immigration continued very heavy. General trade, though delayed in certain lines by the prevailing cool weather, was optimistic in tone, values being uniformly firm.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which

was received at the Department of Labour, during May, 1910.

Lumbering.—Sawmill hands at Arnprior, Ont., in the employ of Messrs. McLachlin Brothers, were granted an increase of ten cents per day in wages.

Building trades.—Bricklayers, masons and plasterers at Berlin, Ont., obtained an increase amounting to \$1.62 per week, in accordance with the terms of an agreement signed in May, 1909. Painters and decorators (1,000) at Toronto, Ont., received an increase from thirty to thirty-five cents an hour, after a strike. The wages of carpenters (2,500) at Toronto, Ont., were voluntarily raised from thirty-three to thirty-five cents per hour. Journeymen tile layers at Toronto were granted an increase from thirty-five to forty cents an hour and improvers obtained an increase from twenty-five to thirty cents an hour. Wages of plumbers at Halifax, N.S., were increased from twenty-five to thirty cents per hour and of carpenters from twenty-seven to thirty cents per hour. Bricklayers at Brandon, Man., obtained an increase from fifty-five to sixty cents per hour. A considerable number of employés in the building trades at Lethbridge, Alta., obtained an eight-hour day.

Metal trades.—Sheet metal workers (370) at Toronto, Ont., obtained an increase dating from May 1, of from thirty-one and one-half cents to thirty-three cents an hour. Sheet metal workers at Hamilton, Ont., had their wages in-

creased two and one-half cents per hour.

Woodworking and furnishing trades.—Upholsterers, seventy, at Toronto, Ont., had their wages increased ten per cent., bringing the full rate to thirty-five cents per hour.

Printing trades.—Thirty printers at St. John, N.B., had their wages increased \$2 per week.

Clothing trades.—Tailors at Hamilton, Ont., were granted a twelve and one-half cent increase.

Leather trades.—Leather workers at Lindsay, Ont., obtained an advance in wages.¹

Railway employés.—Trainmen and locomotive firemen in the employ of the Père Marquette and Michigan Central Railway systems had their schedules advanced.²

Unskilled labour.—Corporation labourers, fifty, at Guelph, Ont., received an advance of \$1.50 per week in wages.

Interruptions to Industries.

Among industrial establishments, &c., destroyed by fire or through other causes during May, 1910, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Malleable iron works at Amherst, loss, \$1,000; foundry at Halifax, loss, \$8,000; boarding house at Halifax; forge and machine shop at North Sydney, loss, \$20,000.

On May 4, the schooner *Acadia* capsized in a gale of wind in St. Mary's Bay. No lives were lost.

Prince Edward Island.—Barn at Cape Wolfe.

New Brunswick.—Outbuildings and contents at Hartland, loss, \$2,000; hotel at Memramcook, loss, \$5,000; outbuildings and dwelling at Peel, loss, \$2,000; large dwelling at St. John, loss, \$10,000; outbuildings and twenty-three head of cattle at St. John, loss, \$1,000; outbuildings and residence at Upper Cloverdale.

Quebec.—Boiler and dry houses near Danville; virite factory (explosion) at Hull, loss, nearly \$100,000; stores and dwellings at Hull, loss, \$20,000; hotel, store, butcher shop and boarding house at Kirk's Ferry, loss, \$14,000; store and residence at Kinnear's Mills; two gasoline launches at Lachine, loss, \$1,500; tenement houses at Montreal; clothing factory at Montreal, loss, \$10,000; sash and door factory at North Hatley, loss, \$10,000. At Quebec: tannery, loss, \$57,000; warehouse; paper warehouse. Store and two dwellings, Rodstock; saw-mills at St. Maxime de Scott, loss, \$75,000; veneer mill at Sutton, loss, \$1,500 (twenty hands out of employment;); warehouse at Ville St. Paul, loss, \$5,500; woollen mill and four dwellings at Wakefield, loss, \$50,000.

The schooner *J. B. Young* valued at \$13,000, went ashore at South Point, Magdalen Islands and became a total wreck. A barn was burned at Millington.

¹See report of Peterborough correspondent.

²See report of St. Thomas correspondent.

Ontario.—Cheese factory at Addison, loss, \$3,000; outbuildings and contents at Appleton; acetylene gas plant at Aurora; outbuildings and contents at Brantford; business section of town at Carleton Place, loss, \$130,000; fur store at Collingwood, loss, \$12,000; wollen mill at Georgetown, loss, \$30,000; lumber yard at Hintonburg, loss, \$3,000; shop and dwelling at Iroquois, loss, \$3,500; saw-mill at Kenilworth, loss, \$20,000; stable and three horses at London, loss, \$1,500; public hall and residence at Metcalfe, loss, \$3,000; business portion of Norwood, loss, \$70,000; factory at Orillia, loss, \$2,500; planing mill, lumber and dwellings at Ottawa, loss, \$35,000; business block at Port Hope, loss, \$75,000; machine works at Preston, loss, \$24,000; residence and outbuildings at Peterborough, loss, \$3,000; livery barn at Sarnia, loss, \$3,500; business block at Strathroy, loss, \$10,000; dynamite storehouse at Sturgeon Lake, loss, \$6,000; lumber at Thorndale, loss, \$2,000; tenement house at Toronto, loss, \$5,000; boat house and contents at Toronto, loss, \$1,700; planing and saw mill at Vienna; bakery at Welland, loss, \$2,500; wagon factory at West Lorne, 100 men out of employment.

Manitoba.—Sawmill at Grandview, loss, \$75,000; bottling plant at Winnipeg, loss, \$100,000; oil company's offices and warehouse at Winnipeg, loss, \$25,000; match factory at Selkirk, loss, \$20,000.

Forest fires caused damage north of Swan river.

Saskatchewan.—Flour mill at Kinistino, loss, \$56,000; business block at Pensé, loss, \$5,000.

In the week ending May 28, bush fires destroyed about 150 square miles of timber west of Mistatim, and also burned down a sawmill, box cars, camp stables, stores and other buildings; the total damage was estimated at \$1,000,000.

British Columbia.—Sorting shop and lumber at Chemainus, loss, \$3,000; 11,000 brick damaged by frost at Monarch; mine shafthouse and machinery at Nelson, loss, \$10,000; powder mill at Northfield; business portion of Steveston, loss, \$15,000.

Bush fires caused considerable damage at Salmo.

Conditions in the Industries and Trades.

Conditions of employment during May in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of *The Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

The weather has been cool and the supply of moisture abundant. The various crops made good growth; hay and pasturage were in excellent condition. Little or no damage from frost was reported except from certain localities in southwestern Ontario, where small fruit was injured. Prices were on the whole well maintained, though wheat declined. Reports from almost every locality were to the effect that the season gives every promise of exceptionally heavy yields.

The May crop bulletin of the Ontario Department of Agriculture showed con-

ditions to be generally favourable. Live stock prices are exceptionally high, and there has been a keen demand for horses. Spring sowing is stated to have been completed nearly a month in advance of last season.

The May crop bulletin of the Alberta Department of Agriculture stated that a large amount of winter wheat has wintered well; about thirty per cent. in the area sown, however, suffered more or less severely, from dry weather in the autumn and from frost in the spring. An increase of fifty-one per cent. in the area seeded up to the date of the bulletin was reported. Some large increases in the areas devoted to oats and barley are also shown.

The demand for farm labour has been active throughout Canada. In Ontario over 1,100 men have been placed by the Provincial Department of Colonization.

The movement of last year's wheat was heavy, daily receipts at Winnipeg being in excess of those of last year, The grading was high.

Revised regulations under the Destructive Insects and Pest Act were issued during May.¹

According to a statement issued by the census and statistics branch of the Department of Agriculture, Canada now holds fifth place among the wheat producing nations of the world. In the past two years this country has moved up five places. Canada's total wheat production in 1909 is given at 166,744 bushels as compared with 112,434,000 bushels in the previous year. Last year the wheat production by countries was as follows: Russia, 786,472,363 bushels; United States, 113,286,923 bushels; France, 361,050,000 bushels; British India, 253,592,377 bushels; Canada, 166,744,000 bushels; Italy, 155,711,230 bushels; Spain, 144,511,581 bushels; Germany, 138,399,277 bushels; Argentina 133,581,000 bushels; Hungary, 125,363,28 bushels; Australia, 82,328,514 bushels; Great Britain and Ireland, 67,525,212 bushels. In 1908, the order of precedence in respect to production was as follows: United States, Russia, France, British India, Hungary, Argentina, Italy, Germany, Canada and Australia.

Fishing.

The lobster season thus far has been much more favourable than that of 1909, both in the extent of the catch and the size of the fish. Cannerymen as well as fishermen had an active month; prices were firm.

Some heavy catches of mackerel were reported off the Nova Scotia coast in the closing days of the month. Good catches of salmon, shad and gaspereaux were made by harbour fishermen in New Brunswick.

A fair run of spring salmon was reported in British Columbia. During the sockeye season fifty-six canneries will be operated, of which twenty-two will be on the Fraser river and most of the others on the Skeena river at Rivers' Inlet and the Naas.

Twenty fishermen were convicted at Parry Sound, Ont., of fishing in prohibited waters and without licenses, and a firm of local fish merchants of buying such fish. Fines were imposed in each case of \$10 and costs.

Lumbering.

Progress with the drives in the eastern Provinces was slow during the first half of May, owing to the rapid fall of water in the streams; conditions improved later and no serious losses are anticipated in this connection. The mills were all very active.

Heavy damages were caused by forest fires in Manitoba and Saskatchewan.

Conditions in Western Canada showed little change from last month. Experienced men were in demand for the mills and camps in certain sections of British Columbia.

The eighth Bulletin of the Forestry Branch of the Department of the Interior estimates the total value of the production of lumber, lath, shingles, cross-ties, poles and pulp wood during the year 1909, at \$67,425,044. Ontario leads in the production of sawn lumber and laths, and British Columbia in the production of shingles.

At a meeting of the Forestry Committee of the Conservation Commission held during May, the question of the preven-

¹See the Canada Gazette for May 21, 1910, page 3,600.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

CANADA DURING THE MONTH OF MAY, 1910.

and is intended to present, in brief and accessible form, a generalized statement as to the state of employment in the prevailing, no account being taken as to wage changes, trade disputes and kindred phenomena treated under separate order indicating in each the degree to which general conditions were favourable or unfavourable, as follows: (1) active

	Metal, engineering and ship-building.	Wood-working.	Printing and Allied trades.	Clothing.	Food and tobacco preparation	Leather.	General transport.	Miscellaneous.	Unskilled labour.

tion of fires set by railways was considered and the following recommendations were made:—

“That in addition to the provisions of the Railway Act already on the statute books relating to fires, the following clauses be added:

1. For each and every case in which a fire is started by sparks from a railway locomotive, and either begins outside of the right-of-way or spreads therefrom to the adjoining land, the company which is operating the railway at the time when the fire is started, as aforesaid, shall be liable to a fine of \$1,000, to be recovered by summary prosecution before a stipendiary magistrate or two justices of the peace.

Provided, that it shall be a sufficient defence against any such prosecution if it be shown by the railway company:

1. That the company has used upon the locomotive the best available modern appliance for the purpose of preventing sparks spreading therefrom.

2. That no negligence has been shown by the engineer or fireman of the locomotive, or any other servant of the company, conducing to the starting or spreading of the fire; and

3. That the company has maintained an efficient staff of fire rangers, properly equipped with all suitable appliances for fighting fires, and proper and efficient means of travelling from place to place along the line of railway, and that the said staff has been prompt and diligent in taking all possible means to prevent the fire from spreading.

The committee further recommends that the act respecting Government railways be amended to provide:

1. That the Government railways maintain an efficient staff of fire rangers, properly equipped with all suitable appliances for fighting fires, and proper and efficient means of travelling from place to place along the line of railway; and

2. That the Government railways shall provide transportation for all Provincial fire guardians, properly certified as such, while travelling in the discharge of their official duties.

It was recommended: That the committee again press upon the attention of the Government of the Dominion the desirability of taking immediate action to form a reserve of the forest land on the east slope of the Rocky Mountains and afford efficient fire protection for the same.

The Government of British Columbia is taking active steps to improve the forest service in that province. The force for fighting forest fires has been largely augmented as a result of a vote of \$75,000 for this purpose which was passed at the recent session of the Legislature. The entire forest defence force is now under the direction of one chief fire warden.

The Attorney-General of British Columbia recently referred to the lumber situation in that Province as follows:—

“The industry last year, as I have already stated, was prosperous. The output of lumber for the whole of the province was, for the coast 450,000,000 feet, and for the Mountain mills 325,000,000 feet, or a total of 775,000,000 feet, valued at \$12,000,000; approximating the figures for 1907, the banner year for British Columbia, viz. 846,000,000 feet, and 100,000,000 feet in excess of 1908. At the present time the outlook is so favourable as to anticipate that the production of lumber for 1910 will exceed that of any previous year in the history of British Columbia.”

Mining.

Outputs of the Nova Scotia collieries showed considerable increase in May compared with April. The asbestos and copper mines of Quebec were producing steadily. Buoyancy in the mica trade continued. Production of the Cobalt camp was well maintained and prospecting throughout Northern Ontario was very active. There was increased activity in the metalliferous mines of British Columbia. The coal mines on Vancouver Island and in the Rocky Mountain section had a fair month. It was announced that the Canadian Northern Railway Company would extend its line into the Brazeau coal fields during the present year.

According to a report issued by the Department of Mines, Canada, the total value of the mineral production of Canada during 1908, was \$85,927,000, classified by Provinces as follows:—

Ontario.....	\$30,623,812
British Columbia.....	23,704,035
Nova Scotia.....	14,487,108
Quebec.....	6,743,650
Alberta.....	5,122,505
North West Territories.....	3,669,290
New Brunswick.....	579,816
Manitoba.....	584,374
Saskatchewan.....	413,212

The annual meeting of the Mining Society of Nova Scotia was held at Halifax.

By an Order-in-Council, dated April 20, 1910, important changes are made in the regulations for the disposal of coal-mining rights. The new Order-in-Council became effective on May 25, 1910.

The Quebec Government has decided to send a commission of geologists and engineers to report on the possibilities and probabilities of the Chibougamou region from a mineral standpoint. Three commissioners have been appointed:—Dr. A. E. Barlow, Mr. J. C. Gwillim, and Mr. E. R. Faribault.

Manufacturing.

From almost every manufacturing centre throughout the Dominion and in

nearly every branch of the industry reports received during the past month were that conditions were now more active and the outlook more promising than at any time since the closing months of 1906. Staffs were being increased and additional labour was in demand at many points. A large number of establishments were working overtime in order to meet the demand.

The report of the directors of the Dominion Textile Company, Limited, showed the manufacturing profit for the year, after writing off the usual amount for repairs and betterments, to have been \$893,311.80. To these profits had been added the dividends received on the stocks of the Dominion and Merchants Mills, making in all \$1,016,407.30. After paying interest on bonds regular dividends on preferred and common stock, there was left a surplus for the year of \$35,732.21. Sales for the year amount to \$8,743,706.20 compared with \$6,153,626.16 last year, an increase of \$2,590,080.04. The Company has in operation 7,840 looms, 378,656 spindles, and employs over 6,000 hands, and has paid out in mill wages during the past five years over \$8,500,000. During the past year the Company has increased the capacity of its Magog Print Works by the addition to it of the printing machinery from the Colonial Works, thereby centralizing all the printing at one place, and reducing the cost of operating and other expenses.

Railway Construction.

Conditions are becoming very active, especially in Western Canada, where men for the construction camps are in keen demand. Wages are very firm. The demand for labour is particularly acute in connection with the large undertakings projected in British Columbia.

Tenders were called for by the Canadian Northern Railway Company during May, for the construction of sixty miles of road in British Columbia.

A careful estimate of contracts made and engagements entered into by various Canadian railway companies shows that approximately, 7000 miles of new lines

will be completed and brought into operation within the next five years. It is expected that track will be laid this year on new lines alone for about 1,500 miles, or about the same as last year, British Columbia showing the heaviest increase in mileage.

General Transport.

Railway and navigation employés had a busy month. Passenger and freight traffic was heavy and the outlook is for a busy summer. The Canadian Northern Steamship service between England and Canada was inaugurated on May 13, when the S.S. *Royal Edward* sailed from Avonmore for Montreal.

It was announced that the Canadian Pacific Railway Company had secured control of the Dominion Atlantic Railway system.

The outlook is for an exceptionally busy summer in car building establishments throughout Canada. Canadian railways generally, are making active preparations to cope with the greatly increased traffic which the coming summer and fall seasons is expected to bring. The Grand Trunk Pacific will this year be a large factor in the crop movement. Much rolling stock has been ordered already this season and on the last day of May further orders were given for cars and locomotives to the extent of \$2,000,000.

The past winter season has been an exceptionally busy one at the port of Halifax. The volume of business handled showed a large increase over that of the winter of 1908-9. It is reported that up to December 31, the total number of cars of freight was 9,000 greater than in the previous year and that this rate of increase has been steadily maintained during the later months of the past winter. Both the export and the import trade of the port has grown.

The Trades.

Building.—All branches were very active, permits issued to date being large—

¹See report of St. John, N.B., correspondent for statement of winter port trade of that city.

ly in excess of the records for the corresponding period last year. In many centres the most active building year recorded is expected.

Metal and woodworking.—Employés in these trades had a busy month in industrial establishments.

Printing.—The allied trades were well employed.

Clothing.—Tailors had a good month, and garment workers, hat and cap workers, etc., were busy. Boot and shoe making establishments were somewhat quiet.

Textile.—Fabric mills had a very active month, especially woollen mills.

Leather.—A fairly active month was reported for tanners, curriers, trunk and bag workers, etc. The hide market continued quiet.

Food and tobacco preparation.—Bakers and confectioners had a steady month; flour was downward. Cigar makers and tobacco workers were active; a busy fall trade is expected.

Miscellaneous.—Barbers, laundry workers and retail clerks reported normal conditions. Hotel and restaurant employés were becoming more active, though the tourist trade was late in opening owing to the prevailing cool weather.

Unskilled labour.—The month was a very active one for labour of this class, and men were in demand over a large portion of the Dominion for work at railway construction, civic improvements, building, farming, etc.

Canadian Trade and Revenue.

Foreign trade.—During April, 1910, the total value of imports entered for consumption was \$30,866,987, compared with \$22,601,571 in April, 1909. The total value of domestic exports during April, 1910, was \$14,507,681, compared with \$11,862,797 in April, 1909. During April, 1910, there was an increase in exports of the mine, the fisheries, the forest, animals and their produce, agriculture and manufactures. The grand total of Canadian trade for April, 1910, was \$45,983,894, compared with \$34,998,854 in April, 1909.

The aggregate Trade of Canada for

the twelve months ended March 31, 1910, exceeded that of any previous twelve month's period. For the twelve months ended March 31, 1910, the trade of Canada in merchandise was \$668,530,064, showing a betterment over the same period in 1908, which was the record year in the history of Canadian trade expansion of \$53,336,088, a gain of about 8·7 per cent. When compared with the figures for the same period in 1909, the betterment is \$120,472,348, a gain of about twenty-two per cent.

According to reports of Trade Commissioners received at the Department of Trade and Commerce, Canada, openings in Great Britain and the different Dominions of the Empire were reported as follows:—For Canadian fish in Great Britain; for Canadian kerosene and wooden handles in Australasia. The Australian Customs have recently taken exception to the importation of goods manufactured in the United States being branded 'made in America' as not disclosing the country of origin. Importers have been warned that a repetition of such marks will be dealt with as a contravention of the Commonwealth Customs regulations. Apart from facilitating the interests of their Australian customers by complying with the laws of this country, Canadian exporters are—from an advertising point of view—again urged to mark every article, package or case 'made in Canada.'

Domestic trade.—Trade, wholesale and retail, was of fair proportions. There had been no active demand up to the close of the month for summer lines, and the sorting trade was quiet. In hardware, however, there was a heavy demand for structural and general metal goods. In groceries the demand was steady, and values were well maintained. Leathers were in good demand. Collections were fairly good, and a favourable summer is expected.

The fiftieth annual report of La Banque Nationale showed a satisfactory increase in business, the reserve fund being increased by \$150,000.

The annual report of the Sterling Bank showed an increase in profits; capital stock was increased by \$100,000

during the year, while deposits, circulation and general business have correspondingly advanced.

Notes.

At the spring fur sales at London, Eng., a further increase in general prices was announced.

A co-operative association has been organized among the fruit growers of the south-western portion of Ontario.

The thirty-seventh conference of National Charities and Correction was held at St. Louis, Mo., May 19-26.

On a referendum vote the ratepayers of Regina, Sask., gave a mandate to the City Council to proceed immediately with the construction of a street railway system to be operated by the municipality.

Under the recent waterways treaty affecting Canada and the United States a permanent commission will be appointed to deal with all matters in dispute affecting international waters as between the two countries.

The Registered Drug Clerks' Association of Ontario was organized at Toronto, Ont., the object being for mutual benefit and protection of registered drug clerks. Officers were elected as follows: J. Benson Mahoney, president; Richard P. Colgan, vice-president; Harold Clarke, secretary; Wm. McKay, treasurer.

The first annual convention of the Associated Boards of Trade of East Kootenay was held at Fernie, B.C. Resolutions were passed relative to the prevention of forest fires, the taxation of personal property, the railway commission, the construction of wagon roads, etc.

The appointment of the Grain Elevator Commission under legislation passed at the recent session of the Manitoba legislature was announced during May as follows:—Messrs. D. W. McCuaig, W. C. Graham and F. B. Maclellan. The Commission will proceed immediately to the establishment of a publicly owned system of grain elevators. A Commission appointed by the Government of Saskatchewan to investigate the elevator problem held sessions during May.

The recently appointed Public Utilities Commission of the Province of Quebec has held its initial meetings for the purpose of arranging rules of procedure and for the publication of matter placing the purposes of the Commission before the public. A similar Commission recently authorized by the Legislature of New Brunswick has also been organized in that Province and will hold meetings at St. John, N.B., until further notice on the fourth Wednesday of each month. The headquarters of the Board will be in Fredericton.

A consolidation of eight large oatmeal and flour milling concerns of the Province of Ontario has been effected, the merger to be known as the Canadian Cereal and Milling Company, with headquarters at Toronto. The output of the Company at its inception will be 2,350 barrels of oatmeal and rolled oats, 2,200 barrels of flour, 100 barrels of prepared wheat, 450 barrels of split peas and fifty-five barrels of pot barley and 340 tons of feed per day. The Company will have a total elevator capacity of 700,000 bushels.

The Board of Education of Toronto has under its consideration the question of the adoption of a system of superannuation for the benefit of the teachers under its control. An actuarial report has been prepared by Professor M. A. Mackenzie, M.A., by instruction of the Board. Copies of the report were recently printed and sent to every teacher on the staff. The teachers have been asked to express an opinion on the matter, after which the Board will deal with the report.

A discussion, looking to the improving and strengthening of the Miners' Relief Societies, of Cape Breton, N.S., was in progress between the Dominion Coal Company and representatives of different branches of the Societies at present in existence. Under the Workmen's Compensation Act recently passed by the Nova Scotia Legislature the Coal Company was exempted from the operation of the Act on the assurance that better arrangements for the relief of the employés of the Company would be made.

The second annual congress of the Federation of the Chambers of Commerce of Quebec, was held at Montreal, May 25-26. It was decided to create a board of arbitration composed of twelve members to arbitrate in trade disputes voluntarily submitted to its decision. A Board was duly appointed. Resolutions were also passed favouring the construction of the Georgian Bay canal, and the encouragement of winter navigation on the St. Lawrence. A resolution dealing with interprovincial relations was also carried.

In accordance with the terms of the contract recently signed between the Shipping Federation and the longshoremen of the port of Montreal, a permanent arbitration commission will be formed to take into consideration and settle differences which may arise during the next five years. At a meeting of the longshoremen held on May 29, Mr. G. R. Brunet, secretary-treasurer and organizer of the Trades and Labour Council of Montreal, was named as their representative on the Board.

During the month of May, an important pronouncement was made by the Honourable the Minister of Mines, Canada, relative to legislation with regard to the manufacture, transportation, storage and use of explosives. The large number of accidents occurring to employes engaged in the handling of explosives, especially in the mining and railway construction industries, and the occurrence recently of disastrous explosions at Hull, Que., Victoria, B.C., and elsewhere, has drawn public attention strongly to the matter. It is the intention of the Honourable the Minister of Mines to introduce legislation at the next session of the Parliament of Canada, dealing with the various aspects of the question, an appropriation of \$10,000 having been voted at the last session for the purpose of engaging expert assistance in connection with the drafting of the proposed legislation and the carrying out of the necessary investigations in connection therewith. The Department has already carried out an investigation into the state of the law as at present in the various

Provinces, as well as into other features of the existing situation.

At a meeting of twenty-six delegates from various local unions throughout the Province, the British Columbia Provincial Federation of Labour was organized on May 4. During the discussion which preceded the passing of the motion, it was pointed out that a body such as was contemplated would be in a better position to advance the claims of labour throughout the Province than by individual councils having their representatives attend the Provincial Legislature during its session. The following officers were elected: J. Watters, president; R. S. Storey, first vice-president; S. Thompson, second vice-president; J. Reid, third vice-president; R. P. Pettipiece, secretary; A. J. Aiken, treasurer. The executive later held a session and drew up a constitution and by-laws. The next meeting of the Federation will be held in Victoria in the second week of January, next. The headquarters of the Federation will be at Vancouver, B.C.

The following extract with reference to the conferring of the Albert Medal for gallantry upon Mr. Thomas Reynolds, railway conductor, of North Bay, Ont., appeared in the *London Gazette* of Tuesday, April 16, 1910:—

WHITEHALL, April 25, 1910.

The King has been pleased to confer the Albert Medal of the First Class upon Mr. Thomas Reynolds, Railway Conductor, of North Bay, Ontario, Canada, for conspicuous gallantry in saving the lives of eleven persons on the occasion of the disaster on the Canadian Pacific Railway at the Spanish River Bridge, near Webbwood, Ontario, on January 21, last, as detailed below:—

The ill-fated express train left Sudbury, Ontario, for Minneapolis, at noon on the day in question, in charge of Conductor Thomas Reynolds. It consisted of the engine, a mail and baggage car, an express-package car, a second-class coach, a colonist car, a first-class coach, a dining car, and a Pullman sleeping car, and, as it approached the bridge crossing the Spanish river at a point where the stream is 250 feet wide and thirty feet deep, Conductor Reynolds and several passengers were seated at dinner in the dining car. On reaching the bridge a part of the train left the track and plunged down the embankment.

Two of the vehicles, a first-class car and the dining car, crashed through the ice, which is said to have been eighteen inches thick, and sank to the river bed. The first-class car falling into some fifteen feet of water, it is not likely that any of the occupants escaped. The dining car was almost completely submerged, and but for the resourcefulness and heroic conduct of the conductor the disaster would have resulted in a much heavier death roll.

The fore part of the car rapidly filled with water and the occupants, hurled to the end of the car, were in

danger of drowning in ten feet of water, their situation being made more perilous by the accumulation of debris. Reynolds, on coming to the surface, found daylight entering from the top of a window some six inches above the level of the water, and, grasping a hat rack, he smashed with his feet the heavy plate glass windows. He then turned his attention to the imprisoned passengers, rescuing those in danger of drowning, and urging all to make use of the only means of support, namely, hat racks, lamps, &c. The passengers having been assisted in this way, he turned to effect an exit, only to find that the car had settled down, and that the opening made was submerged. After swimming about and locating the broken window with his feet, he dived and cautiously pushed himself through the window, using his feet to keep a hold on the window frame, in

order that his body might not be swept away by the strong current.

With great difficulty he brought his body between the broken ice and the submerged car and succeeded in gaining a foothold on the top of the car. He at once commenced wrenching the fan lights from the roof and succeeded in rescuing a lad and still another passenger through the small opening thus made. When, shortly after, an axe was brought to him, in response to his cries for help, he enlarged the opening sufficiently to allow of the rescue of the other imprisoned passengers.

Reynolds was badly cut and injured and was for some time under medical care.

The presentation of the medal, in the name of His Majesty, was performed by His Excellency the Governor-General of Canada, at Montreal, on the sixteenth ultimo.

II. REPORTS OF LOCAL CORRESPONDENTS.

MR. J. M. RITCHIE has been appointed correspondent to the *Labour Gazette* for the town of Lethbridge, Alta, and district.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions generally, were active during May; all industries and trades shared in the prosperity of the season. The steel industry, the coal trade, the railways, factories, foundries and building trades were very busy, and the season gives promise of greater activity than in several years.

Near the end of April, the United Mine Workers of America called off the strike at the Dominion Collieries, and their members returned to work. This removes the second disturbing factor in the industrial situation here, (the steel-coal lawsuit having been the first) and business of all kinds has assumed a better tone. The outputs of the Dominion, the Sydney Mines, and Inverness Collieries, were all larger in May than in April.

All departments of the Sydney Steel works continued active, and the Company reported business brisk. The steel plant at Sydney Mines was shut down for repairs all month, but most of the men were employed on repair and other work around the plant.

The woodworkers were busy and report business good.

The building trades have entered upon

an active summer in Sydney and in the colliery districts, and work was begun on most of the important Sydney buildings. The Nova Scotia Steel & Coal Company intends spending \$100,000 in erecting houses for its workmen. The Dominion Coal Company will erect 100 cottages in the Victoria district at New Waterford.

Railway transportation was heavy and shipping was brisk, the bulk of the cargo carried by sea being coal, iron ore, and limestone.

Both wholesale and retail trade was active.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather was excellent for farming and most of the root crops were put into the ground early in May. Seeding, the planting of vegetables, &c, has been done two weeks earlier than usual.

Fishing.—Lobster fishing was fairly successful and the factories did a fair amount of canning.

CONDITION OF PARTICULAR TRADES.

The skilled trades were active, but unskilled labour was plentiful.

WESTVILLE, N. S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during the month of May was well employed, shipments of coal

in the district showing a slight increase as compared with the corresponding month of 1909. In the Allan shaft, miners underground worked full time, but hoisting coal only took place three days per week. Activity was being resumed in the various trades and industries.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were very brisk in this industry. The weather was favourable for farm work and the majority of farmers were busy seeding.

Fishing.—Good catches of trout were reported in the inland lakes. Fair hauls of herring were made at the beginning of the month and good catches of mackerel were reported along the coast.

Lumbering was quiet.

Manufacturing.—With few exceptions active conditions existed.

Mining.—On May 1, the management of the Acadia Coal mine notified its employés that on May 15, some hands would be laid off. The men were duly discharged and the mine had a few off days during the month. The Drummond mine worked nearly full time, but suspended operations on Memorial Day and Victoria Day.

CONDITION OF PARTICULAR TRADES.

The building trades were generally active. Blacksmiths and horseshoers had a fair month; the other metal trades were generally active. Printers and pressmen reported fair conditions. Tailors and boot and shoe workers had a fair month. Food and tobacco preparation workers had a good month. Clerks, stenographers and delivery employés were active, barbers were busy. Activity prevailed in the transportation branches. The supply of unskilled labour was about equal to the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour has been quiet. As foreshadowed some

months ago, the building trade has been duller than during the similar period in some years. Average progress has been made on all contracts on hand, and it is expected the post office will be shortly completed, and ready for occupancy. The contract for the new \$100,000 Young Men's Christian Association building has been awarded. Excavations have begun, but it will be some time before building proper will be commenced. The building permits taken out up to the last week of the month did not indicate a busier period during the coming month. There were several permits for small contracts, and six, for \$3,000, \$2,000, \$2,500, \$2,700, \$2,800 and \$3,700 contracts respectively, representing residences.

Two trades have received increases during the month, one as the result of mutual agreement following a strike, the other being conceded by the employers. The Plumbers' Union notified the master plumbers on February 1, that their rate of pay commencing on May 1, would be thirty-five cents per hour, instead of twenty-five cents. The employers refused, and on the first of May, the men went on strike and remained out until May 13, when a conference was held between representatives of both parties, when a compromise was made, the men receiving thirty cents per hour; \$16.20, per week, of fifty-four hours. The master plumbers had previously offered to increase the pay from \$13.50 (the old rate) to \$15, but this was refused by the Union.

The Carpenters' Union, some ten weeks previous to May 1, notified the employers that on the date named the minimum union pay would be thirty cents per hour, being an increase of three cents. The request was acceded to by most of the master carpenters, including the large firms.

The actors and theatrical employés, of Halifax, have formed a union and are perfecting organization.

The exportation season for apples closed early in May. The total shipments amounted to about 839,207 barrels, 6,281 half barrels and 4,885 boxes, upwards of 700,000 barrels being shipped

from Halifax during the winter port season. There is an increase of about 130,000 over last season. The fruit was shipped principally to Great Britain ports, although considerable was forwarded to West India, Mexico and South Africa. Most of the apples were grown in Annapolis and King's counties, and the farmers have received about \$1,261,713 for their crop.

The purchase of the Dominion Atlantic Railway by the Canadian Pacific Railway Company is reported. This, it is expected, will enable western fruit raisers to have increased facilities to export their crops, and, with the building of branch lines will cause trade activity.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Wholesale quotations, May 17:

Butter, creamery, boxes, 27 to 28 c. lb.
 Butter, creamery, 30 lb tubs, 27 to 28c. lb.
 Butter, dairy, tubs, 24 to 26c. lb.
 Butter, dairy, rolls, 25 to 26c. lb.
 Butter, dairy, prints, 26 to 27c. lb.
 Cheese, large, 13 to 13 ³/₄c. lb.
 Cheese, twins, 13 ¹/₂ to 14c., lb.
 Eggs, fresh, 18 to 19c. dozen.
 Beef, forequarter, 9 ¹/₂c. lb.
 Beef, hindquarter, 12c.
 Lambs, \$3 to \$5, each.
 Veal, 7 to 8 ¹/₂c., lb.
 Pork, 10 to 11 ¹/₂c., lb.
 Bacon, 18 ¹/₂c., lb.
 Hams, fresh, 18c., lb.
 Hams, smoked, 20c., lb.

Fishing.—Local fishermen made but small catches. A few mackerel have been taken, but schools are expected every day. Yarmouth and Lunenburg report a few hundred barrels.

Manufacturing has been well maintained for the season. The Silliker Car Company has enlarged its premises, having added some eighty feet to the car erecting shed, and constructed another track, besides erecting a new shed thirty by sixty, to be used for upholstering purposes. Other improvements are contemplated.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull. Carpenters and joiners, lathers and plasterers, and plumbers were fairly active.

Painters were busy, but stone cutters and builders' labourers were dull. Other lines were normal. Printers, pressmen and bookbinders were busy. Tailors had a fair month, but finer weather would make trade brisker. Butchers and meat cutters were busy. Barbers were busy. Railroad men were well employed. Long-shoremen had a fair month. Unskilled labour was fairly active.

DISTRICT NOTES.

Liverpool.—A schooner was launched at the yard of Messrs. Hendry, Limited, on May 25. She is of 199 tons net, classed A1, American record. Her length is 109 feet, thirty feet beam, eleven feet draught.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continued to improve steadily throughout the month of May. The different industries continued to add steadily to their working staffs. All the industries are working full time and many of them are working at night to catch up with orders. More men are now steadily at work than at any time for three years. Building operations, however, promise to be very light this season, and the men who generally devote their summer months to outside work have been drafted into the different workshops, thus reducing the demand for additional labour from outside points. Notwithstanding this fact, employers complain that many of their skilled mechanics are leaving for the west.

The strike at Springhill is the one dark spot on the labour situation. It has now lasted for ten months. The Company is operating the mines with a working-staff of about two hundred men, but the men only remain as a general rule, for a few months.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather has been somewhat backward and farming operations were thereby curtailed, but during the past few days conditions have improved and seeding is progressing rapidly. Farm produce continues to bring good prices.

Fishing.—The lobster catch is reported exceptionally good on this coast and the packers are receiving good prices.

Lumbering.—The lumber shipments will not be up to the average this year owing to the reduced cut, but good prices are being obtained.

Manufacturing.—It can be stated that the manufacturing industries were never more actively employed than at present. The depression that prevailed has passed away and every plant in town is working to its full capacity.

Mining.—Springhill mines under strike conditions are working with a force of 200 men, while normally they employ about 1,500. The Maritime Coal Company is very busy, increasing its staff and pushing development work. The other collieries are working part time.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had practically no employment. Carpenters and joiners were fairly busy on small repairs. Lathers and plasterers were very dull, but painters and paper hangers were well employed. Plumbers reported conditions very dull, and stone cutters had no employment. Iron moulders were busy, and iron workers and helpers were steadily at work. Machinists and engineers were well employed. Electrical workers and boiler makers were busy. In the wood-working and furnishing trades, wood-workers were busy, but upholsterers were dull. Car builders were very busy. Pattern makers were only fairly well employed. Printers and journeymen tailors were very busy. Garment workers and boot and shoe workers were busy. Bakers and confectioners were very busy, while butchers and meat cutters had steady employment. Trunk and

bag makers were very busy. Clerks and stenographers were well employed, but furriers reported work dull. Unskilled labour was well employed.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour during the months of April and May was about the same as during the same period last year. The principal event in the month of May was the arrival of fifty English settlers. Some of these will buy up farms on the Island, but the majority will be employed by farmers. After becoming intimate with methods and conditions here they intend to acquire lands of their own. In May, labour is probably at its fullest activity in this Province. Business men report conditions normal and there is a hopeful feeling in mercantile circles. In the city, work was started on the new Hertz Memorial hall for the Methodist Church and a number of other buildings. Construction was also begun on the Elmira Branch railway and on a number of other public works in various parts of the Island.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of May finds seeding and planting almost completed throughout the Province, the season being about two weeks earlier than usual. The arrival of the English settlers, including a number of farm hands, was welcomed in a Province where farm labour is scarce.

Fishing.—The lobster season opened the last week in April and the industry has been conducted with satisfactory results up to the present. The traps have been fishing well and the size is slightly larger than usual.

Railroad construction and employment.—Work was resumed on the Elmira

branch railway, and the contract was let for a station and other structures.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators and paper hangers, were busy, especially in the month of May. Plumbers, gas and steamfitters, stone cutters and builders' labourers were active. Iron moulders, workers and helpers, machinists and engineers steam engineers, electrical workers, linemen, sheet metal workers, and bicycle workers were active. Woodworkers, upholsterers, carriage and wagon makers and car builders, were active. The printing, clothing, food and tobacco preparation, leather and transport trades were active. The supply of unskilled labour was about equal to the demand.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of labour during May has been active, showing marked expansion over April, but being hardly up to the corresponding period in the past three seasons, which were affected by exceptional conditions not now existent. The advent of settled weather gave an impetus to all outdoor enterprises, furnishing occupation for large numbers of the various classes of workmen, while all local factories and shops were steadily running with full complements of men. Locally, the supply has been sufficient to meet the demand, with the exception of agriculturists of which there seems a dearth. Employment bureaus however, have experienced much difficulty in obtaining enough men to meet the demands of large lumber and construction operators in other parts of the Province. Building operations have started briskly, a considerable number of cottages being in course of construction, while much remodeling work is in progress. Work upon the new public wharf exten-

sion, 160 feet by 50 feet, has commenced. Extra construction work in the Intercolonial railway shops is also going on and a number of employéés, laid off by the retrenchment orders of last year have gone to work. The New Brunswick Wire Fence Company has enlarged the factory, erected a commodious warehouse and suite of offices and has been operating the plant night and day, to fill orders, some of which are from South America and South Africa. A plebiscite of the electors of the city upon the question of leasing the electric lighting plant and the gas lighting plant belonging to the city, to the Moncton Tramways Electricity and Gas Company was taken on the twenty-seventh instant, and resulted in favour of leasing. Tenders are being asked for by the Board of School Trustees for the erection of a brick and stone school building, known as Victoria school annex. Customs returns for April show a decrease in both imports and duties, as compared with April, 1909. Wholesale trade was of good character, with retail trade normal. Real estate has been moderately active. Rents are steady, but with an extended choice. Saturday half-holiday among Intercolonial Railway shopmen for the summer months commenced on May 7. No other change in hours of labour was noted and no unrest among employéés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very active, the season being very favourable and seeding well advanced.

Fishing.—Large catches of herring were made along the shore, and fishermen were active.

Lumbering.—Rotary mills have been active; the larger stationary mills commenced operations about May 1. Much difficulty was experienced by lumbermen in getting drives out, and large quantities of lumber are hung up on the St. John tributaries on the Miramichi waters. The Nashwank drive however, amounting to twenty-two million feet was safely brought out by 120 men in twenty-eight days. The Bay du Vin drive of ten millions was also safely brought out.

Mining.—The Maritime Oil Fields Company is meeting with success in drilling for oil and natural gas at Coverdale. Nine wells have been sunk and oil and gas in large quantities found. Well No. 8, at a depth of 1,650 feet, struck such a heavy flow of gas that when cupped, a pressure of 265 pounds was shown. The Drummond Company has placed fourteen carloads of machinery in their mines at Nepisigent, and as soon as terminals at Newcastle are completed will commence the mining of ore.

Railroad construction.—The expenditure upon the various contracts of the Transcontinental Railway in New Brunswick for April, amounted to \$130,709. Unfavourable weather was responsible for the small outlay for the month. Conditions for May have been very active and men in good demand. Shovel men receive \$1.75 per diem; concrete workers, \$2.; carpenters, \$2.25; foremen, \$3; with board at \$4 per week.

CONDITION OF PARTICULAR TRADES.

The skilled trades were all active. For unskilled labour the demand has been very good and the local supply is absorbed at \$1.50 per day.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

An improvement was noticeable in the labour market during May, especially for carpenters, as several buildings were improved and renovated, and on the Lyric picture house night-work was resorted to. Several new buildings are being erected for the Dominion Exhibition which will open on Labour Day. The Fenton Land Company has three new dwelling houses under way. It is the intention of this Company to erect fourteen new houses. The assignment of Messrs. André, Cushing & Sons, lumber manufacturers, took place. There are three mills—one at Union Point, and a box and shingle mill at Milford. About

400 persons are employed in these mills. Messrs. H. W. de Forest & Company, tea merchants, assigned on May 3.

The winter port business closed May 4. There were 114 sailings this year as compared with 108 last year, made up as follows: Canadian Pacific Railway, thirty-four; Allan, twenty-nine; Donaldson, seventeen; Furness, thirteen; Manchester, nine; Head, seven; Eldred-Dempster (South African), five. These steamships took away Canadian goods valued at \$18,127,514, and foreign goods valued at \$4,818,770, making a total of \$22,946,287. Last year the total value of shipments was \$23,877,576, and these figures show a decrease in valuation this year of \$931,292. The shipment of Canadian products this season was \$1,210,576 greater than the previous year, while the foreign shipments, such as meats, &c., fell off \$2,141,868. Besides the above there were sent forward by express Hudson Bay furs and Cobalt ores valued at over \$1,450,000. The latter shipments would make the valuation greater than last season. The grain shipments this year were 7,733,273 bushels, as compared with 7,180,375 last year. The flour shipments consisted of 838,708 against 540,890 last season. The cheese shipments were 81,799 boxes, against 78,521 boxes last season.

The cattle trade was very poor the present season, as compared with 1908-9. The number shipped were 3,432 Canadian and 1,200 foreign, a total of 4,632. While last year there were shipped 22,703 Canadian cattle, and 220 foreign cattle. The horses shipped this year were twenty-two, against sixty-five last year.

The deal shipments were 22,804 standards, against 19,430 for the season of 1908-9.

The revenue received by the city during the last four years was as follows: 1906-7, \$21,616.87; 1907-8, \$34,599.82; 1908-9, \$41,146.75; 1909-10, \$46,373.06. The longshoremen claim that their earnings were much smaller than last year, notwithstanding that there were more sailings this season.

Bank clearings for the four weeks ending May 26, were \$5,629,599, and for the

corresponding period last year \$5,534,782, being \$94,817 greater in 1910, than in 1909, and \$176,634 less than for the five weeks ending April 28, of the current year. The deposits in the St. John branch of the Dominion Savings Bank during the month of April, amounted to \$78,098.40, and the withdrawals were, \$94,310.56. The city labourers' pay roll for the four weeks ending May 27, amounted to \$9,478.26. A meeting of the New Brunswick Telephone Company was held at Fredericton on May 19. The usual six per cent. dividend was paid. The total assets were \$1,393,472.74; total liabilities, \$1,387,998.47; surplus, \$5,474.27. The gross earnings were \$271,738.64, and the total expenses \$195,036.67; net earnings, \$76,701.97. It was decided that a new brick and stone building be erected on Chipman Hill, St. John, at a cost of \$35,000.

St. John Typographical Union, No. 85, sent a circular to the employing printers that on and after May 16, the weekly rate of pay for day-work would be \$14, an increase of \$2 per week. The request was complied with.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The harbour fishermen are making very good catches of salmon, shad and gaspereaux.

Lumbering.—On May 12, the St. John Log Driving Company started rafting operations at the Mitchell booms. There was about 20,000,000 feet of logs in the booms at that date. One drive of 10,000,000 feet for the Stetson, Cutler Company on the Tobique is out, and it is thought that the other Tobique drives will come out. The Gibson Company's drive on the Nashwaak river is finished, and the men discharged. About 120 men were employed, and they report that the whole drive on the Nashwaak, including that from Nafadoggan, amounted to nearly 22,000,000 feet, and every stream was clearly driven. In the upper part of the Province several million feet of logs are hung up along the rivers and streams.

Mining.—It is understood that the necessary amount of capital has been

secured to guarantee development on a large scale in the Minto coal fields just as soon as railway connection is made with some of the unexplored areas.

Railroad construction.—The total expenditure on the Grand Trunk Pacific construction work in this Province up to May 14, was \$9,107,370.50. An expenditure of \$15,000,000, or \$60,000 per mile, is estimated as the increased cost of the road. It is reported that the Transcontinental system in New Brunswick will be completed by Christmas Day, 1910.

CONDITION OF PARTICULAR TRADES.

From active to busy conditions prevailed in the various skilled trades. Railway men were busy, but steamboatmen and longshoremen were quiet. Unskilled labour was quiet.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market resumed activity, the mills all running full time and absorbing all available labour, both in the city and surrounding district. Business in other lines was good. Considerable building was proceeding, a new residence to cost about \$6,000 and repairs to the Baptist church to cost between \$3,000 and \$4,000, being in progress. The factories have work ahead. The city has an active Board of Trade and is situated on one of the finest rivers in the Dominion, with plenty of raw material in the way of lumber, hard and soft, and the best of railway accommodation. There were no labour disputes in existence, and no changes in wages and hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy seeding; the season was very dry and cold so that the land was in good condition, but vegetation has been very slow. The

farmers never complete seeding before June 10.

Lumbering.—The mills were all running, but it is feared that a number of the drives will be hung up unless rain comes. In the beginning of the season the water was very high, and the logs were carried high up on the banks, after which it turned dry and cold and the waters fell so rapidly that the logs were left high and dry. The expense of getting them in the streams again will be heavy.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, joiners and carpenters were fairly well employed. In fact, all who desired work could obtain it at wages from \$2.50 to \$3.50 per day of ten hours. Painters, decorators and paper hangers were busy and were in demand. Plumbers were also busy as many people are doing away with stoves and replacing them with furnaces, while baths and water systems are being freely installed.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin, and E. Little, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of May showed an improvement over the preceding month, owing to contemplated improvements, including the terminus for the Transcontinental, approaches to new central station, re-building of Customs House. Should these improvements start during the summer the season promises to be a very busy one. The boot and shoe factories had their customary slackness, but some of them were still working to their capacity.

The new Civic By-law, which prevents bars and saloons from opening before seven o'clock in the morning, went into effect on the second of May.

The authorities of Laval University having decided to make their buildings fire-proof, so as to protect the valuable historic treasures contained therein, have awarded the contract, therefor, to Mr.

Joseph Gosselin, of Levis, who started work in the early part of the month with a large gang of men. The work will last for, at least, a year, and will cost about \$100,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a busy month sowing. Weather conditions were on the whole, favourable although some delay occurred through cold and rain.

Lumbering.—The large number of saw-mills have commenced their season's cutting; this is fully two weeks earlier than usual. There has been plenty of water and the drives have come through very well. Wages were the same as last year.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, stone cutters and builders' labourers were active; carpenters, joiners and painters were busy, but lathers, plasterers, plumbers, gas and steamfitters were quiet. Electrical workers were quiet; the other metal trades were busy. Woodworkers were active and carriage and wagon makers busy. Bookbinders were active and printers and pressmen were busy. Glove makers and boot and shoe workers were quiet, the other branches of the clothing trades were busy. Quiet conditions were reported in the food and tobacco preparation trades. The leather trades were quiet. Railway employés were active, and steamboatmen were busy, but ship-labourers, longshoremen, street railway employés and cab drivers were quiet. Delivery employés were active, but the other miscellaneous trades were quiet. The supply of unskilled labour was in excess of the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally, has been well employed and the demand has been con-

siderably better than in the previous month. The various industries are running full time, and where skilled labour is employed the orders in hand will keep the shops going for some time. The factories, too, are busy, and the local papers are carrying advertisements for help in the woollen mills. There has been a good demand for all classes of labour. The street railway company has a party out surveying and laying out the proposed new extension of the tracks. As soon as this has been completed, tenders will be called for and the worked rushed to completion. The wholesale trade reports business good. There has been no change in the rate of wages, but the Jenckes Machine Company's shop now opens at six-thirty a.m. and closes at six p.m. every night except Saturday, when they close at one p.m. This makes up the fifty-nine hours' week and at the same time gives the men the Saturday afternoon off.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Spring work was pretty well finished before the end of the month, although the crops were a little later in being put in, owing to the wet weather. This season farmers, at least in many instances, are putting down more ensilage corn than usual, so that they will not be caught short of feed for stock, even should the hay crop fail. A great many creameries this year, especially those near the border, are shipping cream to the States, where it is manufactured into butter. In the western section of the townships, it is estimated that since last fall, when this business started, it has meant that one million pounds of butter have been lacking for home consumption. Whatever the cause the price of creamery butter on the Boards is from three to four cents higher than at the same period last year.

Lumbering operations in the woods are over, and the large mills have been fortunate this year, in getting their drives down with but little trouble, owing to the high water. The sawmills are also running full time, as there is no hold-up for want of timber.

All the *manufacturing* industries are running full time, and there is work ahead.

In the various *mines*, work is being rushed. The Eustis Mining Company at Eustis, Que., which operates copper mines, are handicapped for the want of men, and during the month brought out quite a number of miners from England. Those coming out find steady employment and good wages.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades are busy. Plasterers, painters and paper hangers are very busy. Machinists are busy, with good prospects ahead. Electrical workers and linemen are busy, as also are blacksmiths and jewellery workers. All sections of the wood-working trades are fully employed. Pattern makers and carriage and wagon makers are active. Printers and bookbinders are active, and journeymen tailors are in demand, with garment workers busy. Bakers and confectioners have had a good month. Cigar makers are busy, with orders ahead of the output. Railway employes have been more active during the month than for some time past. Cab drivers, teamsters and expressmen have been busy. Unskilled labour was busy.

DISTRICT NOTES.

Ground was broken on May 2, at East Angus for the erection of a new pulpwood mill by the Brompton Pulp and Paper Company.

Bedford.—The Bedford Manufacturing Co. is rushed with orders, more coming in than it can conveniently handle.

Black Lake.—The Municipal Council has passed a by-law whereby all stores must in future close at 8 p.m.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been in fair demand during May. Those engaged in outside work

were active. The Wabasso Cotton Company has given a contract for a new addition. All factories are running full time. The building trade is active, and there is much activity also in the harbour, where several coal steamers have been unloaded and a few others loaded with lumber for exportation. Wholesale and retail trade shows an improvement over April. The city corporation has a good number of men employed macadamizing the streets. The regular scale of wages prevailed. A good understanding existed between employers and employes.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Rain prevented the farmers from doing much work during May.

Fishing.—Fishermen made good catches of shad, but other fish were scarce.

Lumbering.—Lumber mills have not resumed work yet but have done a little shipping.

Manufacturing.—All factories have been fairly busy.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, and all others in the building trades were fairly busy. The metal, engineering and shipbuilding trades were rather quiet. Woodworkers were fairly active, with varnishers and polishers, carriage and wagon makers, but others in the wood-working trades were quiet. Printers, pressmen and bookbinders were very active. Journeymen tailors, garment workers and glove makers were very active. Boot and shoe workers were fairly employed. Bakers and confectioners, butchers and meat cutters, ice drivers, cigar makers and tobacco workers were very active. The leather trades remain quiet. Barbers, broom makers, clerks, stenographers, delivery employes, hotel, restaurant and theatre employes and laundry workers were fairly active. Railroad employes were active, and steamboat men, cab drivers and hackmen were quiet, but carters, teamsters and

expressmen were busy. Unskilled labour had a quiet month on account of the rainy weather.

DISTRICT NOTES.

There was pronounced activity in Shawinigan Falls this month. Active operations are being carried on by the Shawinigan Water & Power Company and other firms.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chenevert, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

May was a very active month in every branch of industry. The building season at the Government yards is well under way, 825 workmen being employed at wages ranging from \$1.35 to \$2.75 for a ten-hour day. A stone crusher and a bucket-dredge, both of steel, are being built. A wooden tow boat and several smaller boats are undergoing repairs. The steamer *Montmagny*, which was launched last fall, is being completed.

The unloading of coal steamers gives considerable employment to labourers, who receive from thirty to forty cents per hour. The steamer *Coaling*, from Iquique, South America, arrived in port a few days ago with a cargo of 6,000 tons of nitrate of soda for the Dupont Powder Company., of Washburn, Michigan. The cargo was transferred to several schooners. Six other steamers with cargoes of nitrate of soda will come to unload here, which will give active employment to longshoremen.

All shops and factories are working steadily and wages are good.

CONDITION OF PARTICULAR TRADES.

Joiners and painters are scarce and in demand. Hundreds of men are employed on the Government dredges and other boats, as well as for the Richelieu Company, the Sincennes-McNaughton Company and others. There is no fear of lack of work. There has not been a strike here for three years.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour was very active. The building trades had a good month, but frequent delays were caused by heavy rain. Sash and door factories were kept busy, with orders enough to employ full staffs all the time. The leather industry had a good month and the season promises to be active. The boot and shoe factories had a good month and have orders ahead for several months.

All the other factories were busy, except in the iron industry, which was not as active as the month before.

Retail trade was rather quiet, the cold and rainy weather having prevented the country people from coming to town. The wholesale trade was fairly active. Banks reported a good month and easy collections. There was no change in the rate of salaries or hours of labour.

According to the Assessors' report, the value of real estate in St. Hyacinthe has increased \$300,000, being \$5,277,150 for taxation purposes, but there is \$3,104,050 worth of property exempt from taxation.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—General conditions were good, the market being well attended and the prices paid for farm products high. Dairy produce was in good demand, but butter and eggs were a little lower. Farm hands were fairly well employed and are in good demand. Work on the farm was somewhat delayed by cold weather and frequent rainfalls.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, and plasterers were fairly active. Painters, paper hangers, plumbers and steam and gasfitters had a good month. Builders' labourers

were fairly well employed. Iron moulders and iron workers and helpers, machinists, electricians, blacksmiths, boiler makers and horseshoers had a good month. Woodworking establishments and carriage and wagon shops were working full time. Printers and pressmen were fully employed and night work was necessary to meet the numerous orders. Journeymen tailors and garment workers were active. Boot and shoe workers had a good month. Bakers and confectioners, and butchers and ice handlers were active. Barbers, clerks, delivery employés, and hotel, restaurant and laundry workers had plenty of work. Railway employés reported very active conditions. The Grand Trunk Railway is building a line in its yard to connect with the Quebec, Montreal & Southern Railway, and a large number of men are employed on the work. Cab drivers, hackmen and carters had plenty of work. Unskilled labour was very active, there being no unemployed, and the demand being good.

DISTRICT NOTES.

Farnham.—A new industrial plant will be located in Farnham. The Company will use the old Canadian Pacific Railway shops and will, it is said, employ about 400 men. It will also build a large foundry, where several men will find work. The town will furnish electric power at the rate of twenty-five dollars per horse power, and will grant the Company an exemption from taxes.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been very active this spring, more so than at the same time last year. On some works the demand somewhat exceeds the supply. Factories are very active and have increased their staffs. Trade, wholesale and retail, is active,

especially in the dry goods line. There was no sign of any disturbance in labour circles. The Government dredges are working steadily, deepening the canal between the Jones and Canadian Pacific bridges. Work on the new Government wharf, at the entrance of the harbour, is to be resumed shortly; it was suspended last year pending an understanding between the Government and the Grand Trunk Railway. The work of deepening the Richelieu river is being pushed ahead; there will soon be a night and a day shift at work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers obtained good prices for their cattle and dairy produce. Farm labourers were in good demand early in the month.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported a satisfactory month. Carpenters and joiners were active. Painters and decorators, plumbers and steamfitters were well employed. Stone cutters and helpers were active and in good demand, as well as building labourers. Iron moulders and iron workers and helpers were all busy. Machinists and engineers had considerable work. Electricians are satisfied with conditions. Shipwrights and calkers, tinsmiths, tool sharpeners, horse-shoers and jewellers reported a good month. Woodworkers, upholsterers, varnishers and polishers, wood carvers and carriage and wagon workers were all busy. Printers and the allied trades were busy. Journeymen tailors and garment workers, hat and glove makers worked full time. Bakers and confectioners, butchers and meat cutters and ice handlers were all busy. Barbers, stenographers and delivery clerks were well employed. Hotel, restaurant and theatre employés and laundry workers were all well employed. The transportation trades were well employed, as well as unskilled labour, which is in good demand.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As compared with the corresponding month of last year, activity has more than trebled, and has increased more than a third over April. Supply and demand were about evenly balanced in the building trades. The other trades were well employed, and everything points to a busy year for all classes of workmen. A slight increase in wages has been given the building labourers, but not by all employers. There is no sign of any unrest.

Permits have been given out representing a value of over \$2,000,000 for buildings in Maisonneuve.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The manufactures are all working full time, and several of them are adding considerably to their plants.

CONDITION OF PARTICULAR TRADES.

Masons and bricklayers were active. Carpenters and joiners were active, with lathers quiet. Plasterers, painters and decorators were active. Plumbers, steam and gasfitters and stone cutters were active, as well as building labourers. The metal trades were fairly active. Electricians, linemen, blacksmiths and tinsmiths were in demand. Upholsterers, varnishers, polishers and wagon makers were busy. The other wood-working trades were well employed. The printing trades were very active, compositors and pressmen being in demand. Journeymen tailors and garment workers were in demand. Boot and shoe workers were busy. Bakers and confectioners were active, butchers in demand, and ice handlers very active. Cigar makers and tobacco workers were busy. The leather trades were from active to busy.

Barbers, stenographers and delivery employés were in demand. There was much activity among the transportation trades, specially among freight handlers, longshoremen and street railway employés. The latter received a slight increase in salaries. Unskilled labour is going to have a very busy summer.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Three hundred and forty-six building permits for new buildings, representing a value of \$1,647,295, were taken out during April, as against 231 permits in April, 1909, representing \$1,016,856. The summer of 1910, promises to be a very active building season. The constructions already begun or soon to be commenced, are valued at several million dollars. The Windsor station will cost \$4,000,000; Viger station, \$1,500,000; St. Lawrence Hall, \$500,000; Mile End station, \$40,000; Earl Grey and Alexandra schools, \$375,000; Labelle building, \$110,000; Ogilvie store, \$900,000; Post Office, \$300,000; Technical School, \$400,000; Yorkshire Building, \$125,000; Trust & Loan Building, \$100,000; new jail, \$2,500,000; St. Joseph's convent, \$100,000; extension to Rea store, \$200,000; School of Commercial Studies, \$750,000.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering, ship-building, also woodworking, printing, clothing, food and tobacco preparation, leather, miscellaneous and transport trades were active. Unskilled labour was also active.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for employés in the various mills, in the city and district,

far exceed the supply. Business is increasing in the mills, and there are no newcomers amongst the labourers, some of whom have gone west.

The pulp, paper, lumber and mica industries are very active, and the shop keepers are looking for a good season.

No changes are reported in wages. The same scale has been in existence for the last three years in Eddy's shops, also in Gilmour & Hughson's lumber mill.

On Sunday, May 8, the establishment of the Canada General Explosive Company for the manufacture of Virite, was entirely destroyed by an explosion. The establishment will not be re-built in Hull. The explosion killed several people in the neighbourhood, some of them in their own homes, and others on the street. None of the dead or wounded were employed by the Company, nor were they at work at the time of the accident.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The continuous rain during the latter part of May, is threatening to injure the seeds in the ground.

Lumbering.—Lumbermen are complaining of the water being low, interfering with the driving of the logs to the mills.

Manufacturing has slightly increased, owing to the re-opening of Eddy's saw-mills.

Mining.—Owners of the mica mines, in the district, are increasing staffs in order to make provision for an expected increase in demand.

CONDITION OF PARTICULAR TRADES.

Fire having destroyed some fifteen houses, mostly all residences of labourers, and the explosions of the establishment of the Canada General Explosive Company having shattered several, house building is brisk. The buildings are being replaced by better ones, involving an expense of some \$10,000. Other trades are active, but without any change since last month.

A number of extra hands have been engaged by the Hull Electric Company to

handle the traffic between Ottawa and Aylmer during the summer months.

The city having bought a fire engine will necessitate the engagement of two additional men in the fire brigade, an engineer and a fireman.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment during May was slightly more active than during the corresponding month of last year. The lumber mills all started earlier and operated without interruption from high water. The civic corporation has some 500 men employed on street works. Building was as brisk as in May, last year, and will be brisker with the commencement of several large works under contemplation. Local brick yards have many orders ahead. Among the important new structures on which work will soon begin, are: the Rosenthal seven-storey block, to cost \$120,000; the Hope nine-storey building, to cost \$90,000; two public schools, costing \$50,000 each; and repairs to the City Hall, costing \$60,000. The city will lay three miles of pavement, if men can be found to do the work. The city has some building under way, and in one rush job, is paying plasterers fifty cents an hour, ten cents above the union scale. There is no marked demand for men of any class, except carpenters. It is apparent that many outsiders have been attracted to the city. The Rescue Mission, maintained for poor unemployed, has fifty inmates, who barely get enough work to pay for their board at fifteen cents per meal. Most of the inmates belong to the floating class.

The burning of J. A. DesRivieres' planing mill threw some ten men out of employment, as well as destroying 400,000 feet of lumber. Surveyors were started to lay out the ground at Britannia for the new electric plant of the Metropolitan Power Company, which proposes to develop energy for prospective industries. The Board of Trade and associates were

given power to control the publicity fund provided by a vote of the ratepayers and supplemented by public subscription, and it is the intention to start an early campaign for industries. Bank clearings and Customs entries show a considerable increase over last year.

Efforts to obtain increases in wages met only with partial success. The city engineer reported on the petition of some 400 corporation labourers for an increase of twenty-five cents a day in their pay of \$1.75 for nine hours' work. The engineer recommended \$1.89 for all men actually engaged in sewer and excavation work. The Board of Control approved the recommendation and sent it to the City Council. One controller wanted to make the minimum wage for any city labourer, twenty-one cents an hour. The city engineer reported that this change would increase the annual expenditure by \$22,000, so no action will be taken until a committee looks into the matter. The Board of Health has recommended to the City Council that three nurses employed in the Isolation Hospital be given an increase from \$30 to \$35 per month. The International Plasterers' Union has applied to the masters for an increase from forty to forty-five cents per hour. Many contracts for plastering are pending, which were taken on the understanding that wages would be forty cents an hour. Some plastering has been refused owing to the uncertainty of the wages situation. The carpenters, who have three unions, are receiving an average of thirty cents an hour. Plasterers' labourers are asking an advance from twenty-five to thirty cents an hour. Bricklayers and stone-masons are paid fifty cents an hour, and stone cutters, forty-four cents. About seventy-five experienced lumber hands were taken from Ottawa, on May 20 to work in British Columbia mills, at \$2.75 a day and up. The minimum wage in Ottawa sawmills is \$1.50, and the average for unskilled men, \$1.75.

The day labour plan was adopted by the Board of Control on two paving contracts on which the city engineer's estimate was lower than any of the tenders. On a \$7,800 contract, the engineer was \$1,000 lower than the next offer, and on a

\$14,700 work, the engineer was \$1,300 lower.

A judgement of the Board of Railway Commissioners, on May 12, showed interesting comparisons made by the Grand Trunk Railway and Canadian Pacific Railway as to the advance in wages in the last decade. In justification of advances in lumber freight rates, the Grand Trunk Railway gave the following samples of increases in wages, in car shops at Pointe St. Charles and the Eastern division out-stations:—

In 1900: blacksmiths, 19c. per hour; carpenters, 16 $\frac{7}{8}$; machinemen, 14; cleaners 12c.; labourers, 13c.

In 1909: blacksmiths, 22 $\frac{7}{8}$; carpenters, 19 $\frac{3}{4}$; machinemen, 16c.; cleaners, 15c.; labourers, 15c.

One of the roads showed that the average wages of trainmen in 1898, was \$1.81 per day; in 1903, \$2.28; in 1909, \$2.53. The average wage for station and yard employés advanced for the same years, from \$1.28 to \$1.42 to \$1.63.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crop outlook is favourable in the Ottawa district. Rains, near the end of the month, did much good. Cheese boarded on the Ottawa market, at the last sale of the month, were 781 boxes, or twice as many as on the corresponding date last year. Butter is plentiful and dropping in price. Meats are still scarce and high priced.

Lumbering.—Lumber shipping was not so brisk in May as in April. United States barges coming up for their first loads of the season, early in June, are expected to improve conditions. Prices are steady. The log drive is slow, but there is enough timber in the Ottawa river below Pembroke, most of it from last season, to supply the mills this season.

Railroad construction.—The Canadian Pacific Railway Company filed plans at the Railway Commission and City Registry Office, asking leave to construct a tunnel a mile long under the business section of the city. The Company also applies for the bed of the Rideau canal, from the "Deep Cut" to Sappers' Bridge. The works would cost a million dollars.

Manufacturing.—The National Bag and Paper Company has purchased a site on which to erect a factory capable of producing a million bags a day, and employing between forty and fifty hands. To start operations in six months, is the present intention of the managing director.

CONDITION OF PARTICULAR TRADES.

Carpenters, plumbers and drain makers are busy. Other building trades are steadily employed. Iron workers, machinists, linemen and electrical workers are well employed, especially the expert hands. Bicycle workers are very busy. The demand for other metal trades is about average. Carriage builders and upholsterers are steadily employed. Woodworkers are busy. The Printing and allied trades are busy, and some shops have difficulty in getting men. Experienced girls on power sewing machines are in demand. Butchers are busy scouring the country buying live animals in advance. The lamb buying season has started actively. The harness shops are busy. Clerks and delivery employés are busy. The number of idle stenographers (female) is considerable. Domestic help is much in demand. Railway and boat hands are busy. Carters and cab hands are doing an average business. Unskilled labour is fairly well employed.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

While the strike of carpenters somewhat retarded building operations, the labour market, here, was generally active during the month of May. During the first four months of this year, permits for building operations were taken out to the value of \$69,000. During April, the estimated cost of the buildings and repairs for which permits were taken out, was \$48,188, made up as follows:—

4 brick buildings, \$10,800.
 4 brick veneer buildings, \$6,600.
 4 frame buildings, \$4,600.
 1 reinforced concrete building, \$12,000.
 3 garage, \$400.
 14 additions, \$4,600.
 15 alterations, \$6,695.
 1 oven and chimney, \$7,000.
 16 verandahs, porticos, etc., \$683.
 11 shingling of houses, \$470.
 9 sheds and barns, \$290.

James Swift & Company are putting in a large cement wharf on Wolfe Island. The firm states that hereafter all extensions and new work will be constructed of cement.

An additional storey is to be put on the Royal Military College dormitories. Tenders for the addition to the post office have not yet been called for as the specifications are not quite ready. On the evening of May 27, a conference was held between the Finance Committee of the City Council and the Marine Committee of the Board of Trade. The object of the meeting was the taking of the necessary steps to replace the old Catarauqui bridge, which connects the city of Kingston with the township of Pittsburg. The old bridge was built in 1828. It having become necessary to improve the Kingston harbour, the first thing required is to remove the present bridge.

On June 1, the city engineer's department had completed eight concrete walks. Two of these were each 900 feet long. Walk building began early this year, two-thirds of a mile being laid already, though only one gang has been at work.

Through the *Consular News*, of Washington, the local Consul has recommended Kingston as a good place for the investment of American capital. Among the possibilities mentioned are: A match manufacturing company, a large hotel and a smelter.

At a meeting of the Board of Trade, held on the twenty-sixth, a resolution was adopted opposing the proposal of the Canadian Pacific Railway Company to close the Ottawa end of the Rideau canal.

A meeting has been arranged for, to take place at an early date, of representatives of all the municipalities from Cobourg to Kingston, inclusive, which are considering the taking of water power for electric light and power. The meeting

will be held in Belleville, for the purpose of forming a Municipal Union to conserve the interests of the places mentioned. It will be decided whether it is advisable to deal with the Trent Water Power Company or the Hydro-Electric Commission.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are actively employed. Hay and other crops are looking fine in this district. There is still a large demand for good farm hands and domestic servants.

Fishing.—Fishermen had an active month.

Lumbering was quiet.

Manufacturing, mining, railway construction and other industries were active.

CONDITION OF PARTICULAR TRADES.

With the exception of carpenters, who are still on strike, all branches of the building trades were active. A number of journeymen carpenters are taking contracts jointly and otherwise. They have a standing advertisement for the same. The contractors are also advertising for carpenters at \$2.50 per day of eight hours. Metal workers, engineers, ship-builders and woodworkers had an active month. Printers, clothiers, bakers, butchers, ice cutters and drivers, cigar makers, tanners, barbers, broom makers, clerks, delivery employés, hotel, restaurant, theatre, laundry workers, and all branches of the transport business, as well as unskilled labour, reported an active month.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally, was very active during May, although it was not as active as in the same month last year. This was principally owing to the quietness of building operations this month. Otherwise labour was active, manufac-

turing establishments being busy. There were no necessarily idle men in the city or district. The cement works, which never close, employ over 400 men; the rolling mills and horseshoe factory employ a full staff, the Belleville Hardware Company is continually adding new employés, mostly skilled men; while the Belleville Brass and Steel Company finds business so brisk that it is building a \$15,000 addition to its factory. It is the intention to start making locks. A large number of labourers are engaged putting in new sewers and gas mains, and all employés on city work were very busy. The \$40,000 addition to the Court House was completed this month and taken over by the county. A large number of skilled men of nearly all trades were kept busy the greater part of the month. A number of Canadian Northern Railway surveyors were engaged taking surveys for the entry of the railway into this city. Work will soon start on the new round house to be built by the Grand Trunk Railway Company, here, Belleville having been made a divisional point. Transportation both by rail and water was very active, vessels leaving almost daily with cement and crushed stone for western points. Both wholesale and retail merchants reported trade good, being ahead of the same month last year. There were no changes in rates of wages or hours of labour, nor were there any strikes, lockouts, &c.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy, and most of the seeding was done. Prospects look bright for a prosperous season. Fall grain looks splendid.

Fishing.—Large catches of rough fish were made.

Lumbering was active, especially in getting out telephone and telegraph poles.

Mining.—A large number of men were engaged in the northern part of the county.

Railroad construction and employment.—A number of men were engaged here during the month on railroad construction work, a number of new tracks hav-

ing been put down in the Grand Trunk yards.

CONDITION OF PARTICULAR TRADES.

Nearly all branches of the building trades reported a quiet month. Painters, decorators and paper hangers were the exception. They were all busy. Stonecutters also had a busy month. Iron moulders, iron workers and helpers, machinists and engineers, electrical workers, linemen, brass workers, blacksmiths, boilermakers and horseshoers were all active. A number of shipwrights were employed. Woodworkers, upholsterers, varnishers, polishers, carriage and wagon makers were well employed. Coopers were very active making cheese boxes, berry boxes and apple barrels. Both job printers and machine men were all employed and had a very busy month. Pressmen and bookbinders were also active. Journeymen tailors were all active and a number of shops worked overtime getting out spring orders. Bakers and confectioners, butchers and meat cutters, ice drivers and cigar makers were active. Harness-makers reported a busy month. Barbers, clerks, delivery employés, hotel, restaurant, theatre employés and laundry workers were very active. All branches of railway and steamboat transportation were active. Longshoremen had a busy month, as well as cab drivers, hackmen, carters and teamsters. Unskilled labour was in good demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been in good demand during May. Building operations were brisk, a large number of high class residences being started, and a good season for the trades being assured. There is marked activity in real estate, many properties having recently changed hands on terms showing an upward tendency

in values. All the local factories and manufacturing concerns were in full operation. The Canadian General Electric Works and the Quaker Oats Company were working overtime. The iron moulders are on strike for better conditions in three of the foundries, having gone out on the twenty-third. A meeting of the trades and labour unions of the city was held early in the month, and it was decided to re-organize the Trades and Labour Council. The ratepayers will vote on a by-law to raise \$30,000 for the construction of a sewage system in the south section of the city. A chime of bells to cost, \$5,000, will be placed in St. John's Church. The city has appointed an Industrial Commissioner at a salary of \$4,000, per year. For some years the city has been building sewers by day labour; this year it will be done by contract. The Peterborough Cheese Board held its first meeting. Twenty-five factories boarded 1,546 boxes of cheese and the lot was cleared off at the unusually high opening prices of ten, eleven and sixteen cents. The contract for building the new Isolation hospital was awarded to W. J. Johnston; it will cost about \$10,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers have about completed their seeding; the grain which was sown early had to be sown over again, which made a good deal of extra work and expense. Fall wheat and clover are doing well. Fruit promises well. Early apples indicate a heavy crop. The movement towards organizing co-operative egg circles bids fair to revolutionize the poultry industry in this section.

Lumbering.—The lumber companies are busy getting their cut to the mills.

Manufacturing.—All branches continue active.

Railroad construction.—The Grand Trunk Company has a large gang laying new 100-pound steel rails on the main line, between Port Hope and Cobourg.

CONDITION OF PARTICULAR TRADES.

The building trades were active, carpenters especially being $\frac{3}{4}$ in demand.

Iron moulders are looking for better conditions in three of the shops; the Lock Works is the only foundry working at present, being very busy in all branches. Machinists and brass workers have been very active, also electric workers, linemen and blacksmiths. Woodworkers in the door and sash factories were very busy. Pattern makers and coopers were active. The printers and allied trades are all working full time, with journey-men tailors very busy. Bakers, confectioners, butchers and meat cutters were active, as were leather workers and saddlers. Railroad workers are very active. The Grand Trunk is, at present, hauling 400,000 bushels of wheat a day, a considerable amount being American grain for Boston. There is a good demand for unskilled labour.

DISTRICT NOTES.

Lindsay.—The Anglo-Canadian Leather Company, Limited, has granted an increase in wages to their employes, an advance of ten to fifteen per cent. Under the new rates the wages will run from \$1.70, per day, to \$1.90, per day, for yard men and beamhouse men, and \$2.20 and \$3.25, per day, for rollers and beamsters. The increase was given voluntarily. The Company is making considerable extensions and improvements to its works, at both Huntsville and Bracebridge. Messrs. H. Jay & Sons, Oshawa, have been awarded the contract to build two new schools, one at a cost of \$30,000, and one at \$18,500. Byers & Anglin, of Montreal, have the contract for the erection of the nurses' home in connection with the Ross Memorial hospital.

Port Hope.—The Bank of Toronto has bought the block recently damaged by fire, and will put in new stone fronts, and fit it up for a bank; the upper stories will be used for offices. The Council has decided to construct five miles of concrete walks this summer.

Beaverton.—A new public library will be built this summer.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Active conditions in all branches of industry continue to prevail throughout the month, with plenty of employment, especially for skilled labour. The building trade was very brisk. Permits issued during April, numbered 950, representing an approximate value of \$2,522,055, as compared with 758 permits, representing \$2,003,398, for April, 1909. A number of civic undertakings were in progress and tenders are being asked for fifty-four new pavements, and thirteen sewers, which will employ a large number of men.

The project for building a home for factory girls, which originated with the members of the Canadian Manufacturers' Association, was placed upon a broader basis and turned over to the Young Women's Christian Association. A campaign for the raising of funds for this object resulted in obtaining the sum of \$150,294.

The civic free labour bureau for securing work for the unemployed has been discontinued, as being no longer necessary under present conditions.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy, and labourers in demand. The Provincial Department of Colonization reported that 1,100 men have already been placed in Ontario this season, and that applications for 300 more were on hand, but that in view of the keen competition for their services from the manufacturers, who offered higher wages, it was difficult to induce immigrants to engage with farmers. The cool weather had considerably retarded vegetation, but fall wheat was looking well, and pasturage was excellent. The Toronto Milk Dealers' Association on May 1, reduced the price of milk from eight to seven cents per quart on loose milk, and from nine to eight cents on bottled milk.

Manufacturing.—Nearly all manufacturing establishments were active, though not quite so busy as earlier in the season, as orders latterly have been less extensive, about enough coming in to keep the plants going at normal capacity. Accumulated orders have been largely overtaken and deliveries have been made more promptly. A twenty-one year's lease of four acres of land in the Ashbridge's Bay district has been granted to the British American Oil Company, at \$800 per year. The Company will erect a factory for the manufacture of steel towers and oil tanks at an expenditure of \$125,000 or more. The Elliott Manufacturing Company will be given a lease of one acre in Ashbridge's Bay district for twenty-one years for the establishment of a paper mill. A. A. Barthelemes & Company, manufacturers of piano actions have let a contract for the erection of a five-storey factory building on Noble street to cost, \$70,000. The Canada Foundry Company have completed an addition to their ornamental iron plant on King street, East, at a cost of about, \$15,000.

Railway construction.—The application of the Toronto Railway Company to the Ontario Railway and Municipal Board for permission to construct a number of new lines in Toronto has been granted and the work will be proceeded with immediately. The Toronto Construction Company has been awarded the contract for the construction of the line which the Canadian Pacific Railway will build from Coldwater to Atherly Junction, to give direct connection with Orillia. The Canadian Pacific Railway will early in June begin operations at the Yonge street crossing in the northern part of the city, where a subway, a new passenger station and extensive freight sheds will be constructed. An expenditure of \$600,000 is involved.

CONDITION OF PARTICULAR TRADES.

The building trades had plenty of work. A strike of union painters took place on the fourth, the men demanding a minimum wage of thirty-five cents per hour in place of thirty cents. Many of

the employers conceded the advance, and on the twenty-eighth, the strike was declared off; the terms asked being granted. Blacksmiths, boiler makers, moulders, machinists, structural steel workers, sheet metal workers and electricians had plenty of work. Brass workers, silversmiths and jewelers were active. Woodworkers of all trades had a good month. Printers and allied trades men were well employed. Custom tailors were active. Garment workers fair. Boot and shoe workers had steady work. Whitewear workers were busy. Butchers, bakers and confectioners, brewery workers and cigar makers were well employed.

Harness and leather workers were steadily employed.

Hotel and restaurant employés, laundry workers and barbers were more active than in April.

Railway and street railway employés, teamsters and expressmen had an active month. Sailors, longshoremen and others engaged in navigation were generally employed during the latter part of the month.

Unskilled labour was fairly well employed.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Aside from the great activity in every line of industry, there were few developments of importance during May. Employment was very plentiful, and some classes of workers were in demand.

While no large buildings were in course of erection, scores of dwellings were going up. The Dominion Suspender Company planned an extension of its factory, and several new shop and office buildings were projected.

The works of the Ontario Power Company gave employment to upwards of 1,500 men.

Contracts were awarded for construction of the Niagara boulevard.

Tenders were asked for extensive dredging in the Welland canal and in the Welland river, near Chippawa.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy putting in their crops. Cool, moist weather favoured grain and grass, and saved the fruit from damage by frost. Prospects for all crops were good.

Manufacturing.—Factories were all busy. Additional employés were wanted by the suspender, shirt and neckwear factories. The chain and trap factory was running overtime, and the corset, enamelled can and shredded wheat factories, all reported "very busy". Metal working and cutlery concerns were also busy.

Railroad construction and employment.—Railway traffic was rather lighter than in April and little construction work was going on.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy with carpenters in demand, plasterers active; painters, very busy; plumbers, busy (helpers in demand); gasfitters, active; and stone cutters and builders' labourers' quiet. The metalworking trades were busy, with electrical workers and linemen very busy. Journeymen tailors were active, and haberdashery factories wanted more hands. The fruit canning concerns will have their first busy time in June. The shredded wheat factory was very busy. Barbers were active, and clerks, salespeople, hotel, restaurant and laundry employés were commencing a busy period. Traffic on steam railways was lighter. That on electric lines, heavier. More steamboats were running. Teamsters were busy. Unskilled labour was still in demand.

DISTRICT NOTES.

Bridgeburg.—Contracts were let for new sewers.

Port Colborne and Humberstone.—Railway construction employed many labourers and canal traffic was more active.

Welland.—The cordage company built a store-house 60 x 300 feet in size. A number of men went from here to Western Ontario to build electric power transmission lines. The town assessment shows twenty-five per cent. increase in valuation, and five per cent. in population.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. James A Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity prevailed in the labour market during May. The building trades were busy and had work ahead. Sewer construction and street pavement work gave employment to a large number of men. The Bell Telephone Company was busy, employing gangs of men changing the overhead to an underground system, on two streets. A greater volume of trade passed through the Welland canal during May than during April. The canal was kept open on Sundays, so that traffic might not become congested. Wholesale and retail business was reported good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Activity prevailed among farmers and fruit growers, and good crops are anticipated.

Manufacturing.—All mills and factories were running full time, and reported conditions favourable. The canning factories were preparing for the season's work.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering and woodworking trades were active. The printing trades were busy. Active conditions were reported in the clothing, food and tobacco, leather, miscellaneous and transport trades. Unskilled labour was active, supply and demand being well balanced.

DISTRICT NOTES.

Thorold.—Labour was well employed.

Merritton.—Favourable conditions for the employment of labour were reported.

Port Dalhousie.—Labour was better employed in May than during April, and prospects are reported good.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been a busy one with the manufacturers, some establishments having had to work extra time, owing to the rush of orders. Complaint was made in several instances, of a shortage of labour, but in the skilled departments the supply seemed to be ample. While there appears to be a good deal of building under way, unfavourable weather delayed the work to some extent. The building permits for the month again showed a large increase over those for the same month last year, the figures being: May, 1910, \$202,625; May, 1909, \$84,195. The total amount of bank clearings for the month ending May 31, was \$7,943,312, as compared with \$6,633,488 in May, 1909, and \$3,673,749 for May, 1908. The city sewers department has been using a trenching machine on the Trolley street sewer, and the machine performed the work so rapidly that difficulty was experienced in getting sufficient men to do the filling in after it. The street railway company had about seventy-five men at work relaying its roadbed, and good progress was made. An order has been placed for a number of new cars. The Oliver Chilled Plow Works Company, of South Bend, Indiana, has decided to establish its Canadian branch in this city. It is stated that the plant will cost \$1,500,000, and employ over 1,500 workmen when it gets into full operation. The Company has purchased a large tract of land in the northwestern section of the city, and work on the building will be started in a few weeks. The city is

experiencing the nearest approach to a real estate boom in its history, and prices are advancing rapidly. Custom tailors, after a week's strike, secured an advance in wages approximating twelve and one-half per cent. Sheet metal workers, on strike a month, have secured an increase of two and one-half cents per hour. They asked thirty-five cents an hour, and settled on a basis of thirty-two and one-half cents. The old rate was thirty cents. About 300 employes of the Imperial Cotton Company went on strike May 3, to enforce a demand for a ten per cent. advance. After being out a week, most of them returned to work at the old rate. On May 13, about forty spinners, mostly girls, at the Chipman-Holton Knitting mills, struck against the system of deductions for spoiled work. They returned to work after a few days, on the firm agreeing to investigate and consider the grievances complained of. On May, 27, about twenty-five city labourers on sewer work, struck for an advance of five cents per hour on the city rate of twenty cents. Their demand was not granted, and most of the strikers secured other employment, their places being filled by others at the old rate. On May 18, about forty Italian labourers on the street railway work struck for an increase from seventeen and one-half cents per hour to twenty cents. The demand was not acceded to; some of the places were filled by other workmen, and eventually the strikers returned at the seventeen and one-half cent rate. Electrical workers are asking an increase from twenty-five cents and thirty cents per hour, to thirty-five cents. Negotiations are still pending. Carpenters are seeking to establish a thirty-seven and one-half cents per hour rate. Last year the rate was thirty-two and one-half to thirty-five cents. The employers have so far refused to pay the new rate, and the men have been at work during the month at the old wages.

CONDITION OF LOCAL INDUSTRIES.

The National Fireproofing Company, of Pittsburg, Pa., has purchased 150 acres of the Hendrie farm on the Plains road, about four miles out of the city, and

will manufacture firebrick and other fire-proof materials. The announcement is made that the plant will cost close to a million dollars. The land acquired contains the variety of clay required for the industry.

The Canadian Westinghouse Company is building an additional warehouse, which will cost \$35,000.

This month's building permits provide for additional buildings for the Canadian Steel Goods Company, and the International Harvester Company.

CONDITION OF PARTICULAR TRADES.

Nearly all the trades have had a busy month. The sheet metal workers were on strike during the whole period, and work in their line was at a standstill. The first break in the stove moulders' strike, which began in April, 1909, occurred about the middle of the month, when the Bowes & Jamieson Company foundry, which had been closed down for several months, opened up again, and put on about twenty union moulders at the old rate of wages. The strike has been prosecuted against a twenty per cent. reduction.

The building trades had only a fair month, weather conditions not being favourable. Carpenters were not very busy. Builders' labourers were in demand.

Iron workers were busy, with the exception of stove mounters, who found work slow.

The woodworking trades were all brisk. The allied printing trades had a fair month. Tailors, garment workers and boot and shoe workers were busy. Cigar makers were exceptionally busy. The Tuckett firm increased its staff by about seventy-five during the month.

Barbers, broom makers and laundry workers reported trade fair; hotel and restaurant employes, and theatrical workers were dull.

Transportation employes had a fair month. Teamsters were in demand, as were labourers. Some factories were unable to secure as many of the latter as there was work for at fifteen cents per hour, and even the city works departments, with a twenty cent per hour rate, could not get all the men required.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally, was well employed during the month, which showed greater activity than the preceding, or corresponding month of last year. The building trades were busy, and prospects for a very busy season are exceptionally bright. The factories and mills were busy, some finding it difficult to meet the demand for goods. There is a demand for labour, particularly unskilled labour, for sewer construction and other work of a similar nature. Several of the factories have granted the Saturday half-holiday to the employés, during the summer months.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners were very busy.

Manufacturing.—Manufacturers, in all lines, were very busy. Factory extensions are being made to meet the demand. A new factory for the Crown Electric Company is in course of erection.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, painters, decorators, and paper hangers were busy, the latter very busy. Lathers, plasterers and plumbers were active.

Iron moulders, coremakers, machinists, engineers, metal polishers, and buffers, blacksmiths and boiler makers were very busy. Electrical workers, linemen, stove mounters and sheet metal workers were active.

Woodworkers generally, were busy. Carriage and wagon makers, pattern makers and coopers were busy. Printers, pressmen and allied trades were busy. Tailors and tailoresses were very busy. Boot and shoe workers were also very busy. Bakers and confectioners were busy, and cigar makers and tobacco workers were active. Leather workers

and saddlers were busy. Barbers, clerks, delivery employés, hotel and restaurant employés were steadily employed, with laundry workers busy.

Railroad trackmen were busy, with freight handlers very busy. Street railway employés were steadily engaged. Teamsters and draymen and expressmen were busy. Unskilled labour was in demand.

DISTRICT NOTES.

Paris.—The factories and mills were very busy. Operatives are arriving from England to meet the demand for female labour.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market showed an improvement over last month so far as the building trades were concerned, all men employed in these lines having a very active month, with prospects good for the season. The Canadian Pacific Railway Company is calling for tenders for a new station, and a large force of men is engaged building concrete retaining walls along the line of the Grand Trunk Railway Company in the city, preparing to raise the roadbed to allow the installation of two concrete subways. This is a big undertaking and will take some time to complete. A new six-roomed school is in course of construction, also a Nurses' Home and many residences.

All manufacturing concerns have had a busy month, with the exception of the Clemens' Sash & Door Company, which has made an assignment, throwing a number of men out of employment.

Civic improvements for the year, including the macadamizing of streets, the laying of cement walks, and work on park decoration, &c., will furnish employment to a large number of men.

Wholesale and retail merchants reported a good month. No settlement has yet been reached in the Brussels Carpet Weavers' strike.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners, also lathers and plasterers, had an active month. Painters, decorators and paper hangers were very active. Plumbers, gas and steamfitters were well employed. Iron moulders, helpers and coremakers had a busy month. Machinists, electrical workers and linemen were active. Stove mounters and blacksmiths fair. Tube mill workers were very active, with large orders ahead. Piano and organ workers were fairly busy. Pattern makers, coopers and carriage makers were well employed. Printers and allied tradesmen had an active month. Journeymen tailors reported an active month on spring orders, as did whitewear garment workers. Bakers, confectioners and cigar makers were fairly active.

Teamsters, carters and draymen were well employed. Unskilled labour was well employed, very few men being idle.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of May was more active in the labour market than the preceding month, all classes of labour being well employed, with a slight demand for unskilled labour. Good progress was made with building. There were thirteen building permits, valued at \$33,075, issued, one being for additions to the P. Gies foundry, another for the R. Boehmer block, and the others for residences and outbuildings. The Bitulithic Paving Company commenced operations on May 2, with a large staff of men and teams excavating King street. The transportation branches were busy. Bank clearings were reported good, and business generally, was favourable. Brick-

layers, masons and plasterers received an increase in wages, as agreed upon last year, of three cents per hour, bringing their wages from forty to forty-three cents per hour. There were no changes in hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy sowing and marketing.

Manufacturing establishments were very busy.

Railway construction.—Track laying on King street was in progress.

CONDITION OF PARTICULAR TRADES.

The building trades were very busy, and the metal, woodworking, printing, clothing, food and tobacco preparation, leather, miscellaneous and transport trades were active. Unskilled labour had an active month.

DISTRICT NOTES.

Waterloo:—All classes of labour were well employed. Manufacturing establishments were busy. The metal trades were active. Good progress was made on the new Mutual Life Company's building. The Wardel Shirt & Collar Company is also building a large addition to its factory. The Water & Light Commission is enlarging the present plant.

WOODSTOCK, ONT., AND DISTRICT.

Mr. John Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions on the whole, continued satisfactory. There was plenty of employment for everyone, and from some quarters difficulty in securing men was reported. The West is still taking its toll, and there is, at least, a trace of a back-to-the-farm movement. Farmers are looking anxiously for help. The loss is about balanced by the new arrivals, and the drift cityward; still there is more than the usual demand from the

factories for men. Moulders, blacksmiths, painters and stripers are the classes needed this month, also men to grind castings. The general report is, that business is good, and the prospects bright. Practically all the local factories report conditions satisfactory. On June 10, the moulders at the Stewart foundry will be put on the same wage basis as existed before the recent depression. With this change practically the last trace of the depression will have disappeared.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crop outlook, so far, is promising, and farmers are now facing the problem of securing help for the harvest. Cheese making is now in full progress throughout the dairying districts.

CONDITION OF PARTICULAR TRADES.

There is not a great deal of work in the building trades yet; but the outlook is fairly good. Painters and paper hangers are kept busy. There is some demand for moulders at the Stewart Stove Works, and for iron workers and helpers. There is a demand for blacksmiths at the wagon factories. Woodworkers of various kinds are well employed in the factories; but there does not seem to be any demand for men at present. There are some inquiries from the wagon factories for painters and stripers. Printers are busy, but the demand for men seems to be fully supplied at present. Business is brisk in the clothing trades, generally. Garment workers are in demand, especially vest makers. Bakers, confectioners, butchers and cigar makers all report business active. Tanners and leather workers report business good.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Active conditions prevailed among all classes of labour, especially in the building

trades. Building permits for April totalled \$54,900 in value, compared with \$35,000 during the same month last year. The largest items were: hospital wing, \$15,000; registry office, \$10,000; private residence, \$7,300. The work on Erie street bridge abutments and repairs has commenced. The Stratford Tramway Company is again asking the City Council for a twenty-five year street railway franchise, for an electric line to St. Mary's, and one to Grand Bend. The proposition is under consideration by a committee of the City Council and the Board of Trade. All local industries were active. Wholesale and retail merchants reported trade very good. The local milk dealers announced that, commencing June 1, bottled milk will be sold at seven cents a quart; milk in measure remains at six cents. The Customs returns were \$19,148.22, an increase of \$8,767.72 over the corresponding month of last year.

No change in the rates of wages, and no disturbances in the labour market occurred.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have finished seeding and planting, and were engaged in building and repairing fences and other work on the fields. Market prices are the same as last month.

Manufacturing.—All local industries were busy, with plenty of orders ahead.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were active. Painters, paper hangers, plumbers, stone cutters and builders' labourers, iron moulders, workers, helpers and machinists were busy. Blacksmiths, boiler makers were also busily engaged; as were woodworkers, upholsterers, varnishers, wood carvers. Carriage and wagon makers reported trade extra good, large consignments being shipped to the North-West. Car repairers in the Grand Trunk Railway shops were busy, and more men were taken on. Coopers were busy.

The printing and clothing trades were very busy. Bakers and confectioners are

doing a good business. Butchers were busy. Cigar makers report business improved this month. Harness makers are doing a very good trade. Barbers, clerks and delivery employés were busy. Hotel, restaurant and laundry workers were active. Railroad conductors, engineers and firemen were busy. Passenger traffic was heavy during the holidays, making more work for train crews. Freight handlers were active. Cab drivers, draymen and teamsters were very busy. Unskilled labour was well employed.

DISTRICT NOTES.

St Mary's.—A by-law was voted on and carried to guarantee the bonds (\$40,000) of a new cement industry.

Milverton.—Messrs. Pieffer Brothers are building a new flour warehouse which will be 100 x 30 feet.

LONDON, ONT., AND DISTRICT.

Mr Alex. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Throughout the month disappointment was felt at the small amount of building operations going on, there being less work in this line than for a number of years past, and very little new work was commenced. In the factories and foundries, conditions are better, and business is brisk. On the railroads, conditions have improved.

An announcement of more than ordinary interest was that the Canadian Pacific Railway Company will build extensive car and locomotive repair shops here, and a new round house. The exodus of residents of this locality to the Canadian West continues, and the number of empty houses in this city continues to grow.

The cigar makers in five of the largest shops in the city went on strike on May 16, for an increase in piece rates. Two hundred and eight of them went out, and they are all on strike at present. Four smaller factories agreed to the new scale, and there are nine other small factories who employ no union help. Newspaper

printers are negotiating a new scale with the proprietors of the *Advertiser* and *Free Press*.

CONDITION OF PARTICULAR TRADES.

Bricklayers and carpenters are all working. Lathers and plasterers are fairly well engaged. Painters are busy. Plumbers report trade fair. Iron moulders and iron workers are very busy. Machinists report trade good. Electrical workers and linemen are exceptionally busy. Carriage and wagon makers are busy. Car shops workers are busy on repair work. Coopers are very busy. Printers are exceptionally busy, and several firms are adding new machinery to cope with their increasing trade. Pressmen are very busy. Tailors are busy, as are also garment workers. Boot and shoe workers report trade good. Bakers and confectioners are busy. The leading cigar factories are closed owing to the strike. Tanners are exceptionally busy. Railroad train crews report more work than last month. Teamsters are busy. There is an over-supply of the unskilled class here, and a number out of work.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were well employed during May. Work has been commenced on the new Michigan Central round house, and employment is being given to a large number of labourers. Work is progressing in connection with the Hydro-Electric Company's plant, the Watson Shoe Company's factory, and the number of residences being erected is large. In the railway shops and local factories, the month has been an active one. The Sutherland-Innis Company's stave factory closed down toward the end of the month, on account of scarcity of material and forty men, chiefly unskilled labourers, were thrown out of employment. These will find ready work, as there is a demand for that class of labour.

The different railway organizations have had committees in conference with the officials at headquarters, at Detroit and elsewhere, and as a result, considerable changes will be made in the working schedules, which have, heretofore, governed employés on the Pere Marquette and Michigan Central railways. The Michigan Central trainmen have been granted a considerable increase in pay, and it is given out that the following schedule will be adopted, dating from April 1, 1910:—

Conductors on branch pass trains, from \$90 to \$100 per month; brakemen, \$60; baggagemen, \$65. Conductors on freight, \$3.63 per 100 miles; brakemen, \$2.42 per 100 miles; passenger conductors, \$2.68 per 100 miles; brakemen, \$1.50 per 100 miles; baggagemen, \$1.55 per 100 miles; overtime pro-rata. Switchmen in yards:—Conductors 37c. per hour days, 39c. per hour nights; brakemen, 34c. per hour days, and 37c. per hour nights. Overtime after 10 hours.

The Pere Marquette trainmen have not completed negotiations, but it is stated that they will receive the same rate of pay as that which will govern the Michigan Central trainmen. The locomotive firemen have been granted a considerable increase in pay, but as negotiations are not completed, it is impossible, at this time, to give definite information as to what changes or increases will be made.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The cold weather has had a decided effect upon the fruit in this district, but it is not thought that there has been sufficient frost to do extensive damage. The crops look well.

Manufacturing.—Manufacturing establishments were busy.

CONDITION OF PARTICULAR TRADES.

The building trades had a good month. General labour was well employed.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly active. Factories were busy, and some branches very busy.

There was a lull in the building trade, only a few permits being issued in April and May. The Motor Car Company expects, in a short time, to be in full operation.

The city has secured the Walker Pant & Shirt Company, which has leased premises, and will begin operations on July 1, with about thirty hands, to be increased to fifty in a short time. The steamer *Ossifrage* began regular trips to Detroit, on the sixteenth of the month, and has been handling a large amount of freight; this will be a great convenience to the general public. Merchants reported trade in advance of 1909. There were no changes reported in rates of wages or hours of labour, and no strikes or lockouts.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers completed seeding in the early part of the month, but were delayed considerable with corn planting, owing to the continued wet weather. Many farmers not being able to get on their land.

Manufacturing.—Manufacturing of all kinds report many orders ahead, especially in the carriage and wagon trade which reports six weeks behind with orders.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were very quiet. Carpenters and plasterers were busy. The painting, decorating and paper hanging trade was active.

Plumbers, gas and steamfitters and builders' labourers had a fair month. Iron moulders, machinists and engineers were busy, and electrical workers and linemen were exceedingly busy. Metal polishers, buffers, plate and brass workers, sheet metal workers were very busy, but horseshoers were quiet. Woodworkers and upholsterers reported trade fair. Carriage and wagon makers had a very busy month and were behind with orders. Printers, pressmen, bookbinders, journeymen tailors, garment workers and boot and shoe workers were busy. Bakers and confectioners, but-

chers and meat cutters, cigar makers and tobacco workers reported trade, good. Barbers, clerks, stenographers, hotel, restaurant and theatre employés and laundry workers were busy. Street Railway Employés, cab drivers, carters and draymen, teamsters and expressmen had a very good month. Unskilled labour was fully employed.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Except among bricklayers, labour has been well employed during the month, and the bricklayers expect to have plenty of work in a week or two. The Imperial Bank will locate here as soon as building is ready. Custom's collections for the month of April were the largest in the history of the city. The total amount collected in the local office was \$124,641.76, and for the same month, a year ago, \$54,521.62, an increase of \$70,120.14. On May 3, the city carried a by-law by a majority, giving the city Council power to purchase forty acres of land for manufacturing sites. Wholesale and retail trades are good. Team owners have posted notices that from June 1, the price will be fifty cents per hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the cold, wet weather farmers have had difficulty getting in their crops. Frosts have killed a lot of fruit.

Manufacturers are very busy.

CONDITION OF PARTICULAR TRADES.

Owing to the bad weather, the building trade was quiet, although carpenters were fully employed on repair work. Bricklayers, lathers and plasterers were not very busy, but painters, plumbers, gas and steamfitters were fully employed. Iron moulders, iron workers and helpers, machinists, engineers, electrical workers

and linemen were very busy; other branches of the metal trades were active. The woodworking and furnishing trades were active. Printers and pressmen have been very busy. Journeymen tailors are working overtime, and garment workers are in demand. Bakers, butchers, ice drivers, cigar and tobacco workers have been well employed. The leather trades were active, and barbers reported a good month; clerks, delivery employés, hotel and laundry workers had plenty of work. Transportation employés were all fully employed. Unskilled labour is in demand.

DISTRICT NOTES.

Walkerville.—Ground has been broken for a large three-storey factory for the Peabody's Company for the manufacture of overalls. The factory, when completed, will give employment to 100 hands.

SAULT ST., MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Weather conditions during the early part of the month retarded business somewhat, but taken as a whole the month was a good one. There was a good demand for labour, the supply, in some cases, being short. Work commenced on \$25,000 worth of cement walks to be laid this summer. The New Ontario Dock Company will spend \$20,000 on dock extensions. The building trades were brisk, more building being proceeded with this year than ever before in the history of the city. The city has established a market; commencing on June 3, market days will be each Tuesday and Friday during the summer months. Navigation was in active operation, with prospects of a heavy season. The Algoma Steel Company has a large staff of men engaged in the construction of new works. Business was good in most lines.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Cool weather retarded operations.

Fishing.—Normal conditions prevailed.

Lumbering.—This industry was in its quiet season.

Manufacturing.—The various manufacturing establishments were busy.

Mining.—Quiet conditions prevailed.

Railroad construction.—The contract for the extension of the Algoma Central Railway has been awarded, and work was commenced thereon.

CONDITION OF PARTICULAR TRADES.

From normal to busy conditions existed in the various skilled trades.

PORT ARTHUR, FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of May has been a month of steady employment, being far better than the corresponding month of last year. Street improvements in both cities have called for labourers, but there has been no difficulty in meeting the demand. Labourers have been hired at \$1.75 a day in Fort William and sent west. Transportation has been steady, but the docks have not been kept particularly busy. Retail and wholesale business has been fair. There have been no changes in rates of wages nor hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing. — Manufacturing is steady.

Railroad construction.—There are no railway construction camps close to the city, but many men are recruited at this point for the extension of the Grand Trunk Pacific at Nepigon and other points. Men have also been engaged here by the Canadian Pacific Railway Company for the western lines.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been steadily employed, as have been carpenters and joiners. There are more than sufficient men at present for the work in progress. Lathers and plasterers are getting busier, many buildings at the end of the month being sufficiently advanced for these mechanics; the same may be said of plumbers and steamfitters. Painters and decorators have had a busy month. Electrical workers and linemen have been busy, as have been concrete workers, labourers and road makers. Metal workers, such as casters, boiler makers, machinists have had steady work. The woodworking trades have been steadily employed and one new machine shop for finished lumber has been re-opened in Port Arthur during the month. The printing and allied trades have been doing their usual business.

The clothing trade has been a little busier and journeymen tailors have been better employed. Bakers and confectioners, butchers and meat cutters have been steady. Stenographers have been busy; there has been a demand for lady stenographers. Hotel, restaurants and theatres report their usual trade. All railway men, freight handlers, ship labourers and longshoremen, carters, draymen, &c., have had steady employment, but the demand in all cases has been easily met. Teamsters have been busy on street extension work and road making.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour is fairly active in Winnipeg, and for help for points further west, there is a very keen demand. Winnipeg employment agents are not able to supply the demand, although the immigration is large. Contractors engaged on railroad construction find it difficult to get sufficient men.

Business is very active. In the implement trade, the wholesale distributing houses find great difficulty in getting delivery of goods that are called for in the three Provinces. Plows and gasoline tractors are in especially strong demand.

The wholesale houses, dealing in all classes of merchandise are exceptionally busy, and the volume of business is much greater than at any previous time.

The bank clearings for May show an increase over the corresponding month of last year, of twenty-five and eight-tenths per cent., and for the first five months of the present year the increase is twenty-seven and nine-tenths per cent.

The Midland Railway Company has entered into an agreement with the city of Winnipeg for an entrance into the city. The City Council have agreed that the railway company in question, be permitted to depress the streets at Elgin, Nena, Ross and Brant streets, to a limit of six feet, except in cases where such six feet would cut into the adjoining cross streets at a greater distance than twenty feet. Six subways will be constructed, and the time allotted for the completion of the work is from July 1, 1910, to the end of the year. Everything connected with these subways to be completed by April, 1911.

During May, an Arbitration Board dealing with some differences between the Canadian Northern Railway and some classes of its employés has been sitting in Winnipeg.

The dispute between the journeymen painters and their employés has not been settled. Most of the workmen are at work on contracts they have accepted themselves.

The Government of Manitoba has appointed a commission of three to put into effect the legislation of last session with regard to Government operation of publicly owned elevators. The commissioners are D. W. McCuaig, chairman, W. R. Graham and E. R. McLennan.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During May seeding was completed, and the weather, over the whole of Manitoba, was exceptionally favourable. The acreage, in all classes of

grains, is estimated to be larger than in any previous year. During the latter part of the month, low temperature prevented growth. Deliveries of wheat and other grains at Winnipeg have been larger than during the corresponding period of last year.

Railroad construction.—This work, according to the extensive plans previously indicated, is being pushed forward, but there is some difficulty in getting enough labour. Wages are higher by approximately twelve and one-half per cent. Last year, early in the season, men were employed at \$26 per month and board, with the stipulation that if they continued to work during the whole of the year they would be settled with on the basis of \$30 per month. Higher wages were paid in cases where the men were known to be experienced. This year men are being generally engaged at \$30 per month and board, with the stipulation that they will be settled with at \$35 per month. These are minimum rates for the most unskilled work on railroad construction.

Building.—For the month of May, the total building permits issued was \$2,091,500, which is larger than for May of any previous year, with the exception of May, 1906, when the total reached was \$2,399,000. Comparative figures for May of five years past, and for five months, are as follows:—

	Permits.	Buildings.	Cost.
Five months			
1906.....	1419	1750	\$5,629,700
1907.....	1269	1496	3,333,250
1908.....	518	678	1,436,050
1909.....	887	1055	3,426,400
1910.....	1416	1161	7,428,900
Month of May.			
1906.....	562	666	\$2,399,000
1907.....	450	549	1,190,700
1908.....	211	231	652,150
1909.....	361	424	1,291,800
1910.....	497	579	2,091,500

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued to improve during the past month, everything pointing to a very busy season in all

trades, and especially in the building trades. Many large buildings have already been started, and the excavation completed for many more. Mr. C. W. Hall has secured the contracts for an addition of two stories to the Empire Hotel, and for the erection of the new Brunswick Hotel. Contractor Forbes has secured contracts for the Royal Hotel, and for the new Knox Church. The Brandon Construction Company was awarded the contract for the five-storey steel and concrete block for the McKenzie Seed Company. The Simpson Company, of Winnipeg, was the successful tenderer for the \$75,000 steel and concrete block for Clements Brothers. Rapid progress has been made on the new convent for the Sisters of the Catholic mission. Mr. A. E. Bullock is making good progress on his apartment block. Tenders are being called for the excavation of the new hotel and station for the Canadian Northern Railway Company. On the whole, a very busy season in the building trade is expected. The bricklayers' union obtained an increase of wages, from fifty-five to sixty cents per hour, going into effect last month. The labour market was quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crop reports show a large acreage, and all grain crops in an advanced state for so early in theseason.

Manufacturing.—The Hanbury Manufacturing Company is adding to its sash and door factory. The McDiarmid & Clark Company has also added to its sash and door factory.

CONDITION OF PARTICULAR TRADES.

The building, metal, cigar making and transport trades, with unskilled labour, were very busy.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been a slackening in the labour market in general, over the pre-

ceding month, but conditions compared favourably with the corresponding month of last year.

The existing strikes, to a large extent, are responsible for the number of idle men. Very few building permits were issued, as the contractors were reluctant to figure on more work.

Wholesalers and retailers report business in arrears of what it should be. General unrest exists, as a result of the carpenters (about 180 men), plumbers (fourteen), electricians (sixteen), plasterers (twenty-four) and painters (forty-eight) being on strike. All, with the exception of the painters, are on strike for increased wages and recognition of the union, the Building Trades Council having called the painters out in sympathy.

During the strike, five carpenters were arrested for intimidation, but were released on bail in three securities of \$250 each. The case was remanded twice, and when it came up a third time, there was no evidence to justify a conviction.

A new Municipal hospital is now under construction, at a cost of \$150,000; also a new market building, with a thoroughly equipped cold storage plant. The structure will be 138 feet by 40 feet, and will cost \$16,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The recent rains have relieved the anxiety prevalent among the farmers. Reports throughout Saskatchewan are very favourable; the heavy frosts have done little or no damage.

Manufacturing.—The automobile industry bids fair to be prominent here. The Canadian Motor Sales Company has leased a site with a 300-foot frontage on the main line of the Canadian Pacific Railway. Building operations will start in the near future, and the new factory will be in operation by October 1, 1910, ready for an output of from 1,000 to 1,500 cars for the season of 1911. The Company states that employment will be found for about twenty-five hands all the year 'round.

Railroad construction.—Regina is to have a Union station, and as soon as agreements are prepared between the

Canadian Pacific Railway and the Canadian Northern Railway, plans will be filed and building operations proceed immediately.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons are very quiet, as a result of the other trades being on strike, but stone cutters and builders' labourers are fairly well employed. The demand for iron workers, machinists and steam engineers is well supplied. Bicycle workers, carriage and wagon makers reported conditions active, and slightly improved over preceding month. The printing and allied trades had a good month, there being a slight demand for pressmen and electrotypers. Journeymen tailors and garment workers were active, but are not employed to such an extent as the month of May usually demands. Bakers and butchers were only fairly busy. Cigar makers report conditions quiet. Barbers and clerks had a good month, but there is little demand for delivery employés. There is a fair demand for hotel, restaurant and theatre employés, which is well supplied. Laundry workers were very active, there being a fair demand for female help. Railroad telegraphers report an unusual demand, which is at present not being met. Freight handlers had a good month, though there is little demand for more help. Teamsters and expressmen were quiet. There is no demand for unskilled labour, nor is there likely to be, until the end of the strikes.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have been active in nearly all trades during the past month, improving generally over April, and comparing very favourably with the conditions prevailing at the corresponding period last year. So far, no serious inconvenience has been experienced through a scarcity of workers, the supply gener-

ally corresponding with the demand. Whether this condition will continue throughout the season is, of course, more or less problematical. In the building trades there is exceptional activity, and the demand for labour will certainly increase within the succeeding month.

Much of the work reported as projected in earlier reports has been commenced, during the past month. The basement of the new Hopkins-Natham block has been completed, and work on the main structure will shortly commence. A start has also been made for the erection of the new Provincial telephone building and land titles office, and the work of excavation is proceeding. The contractors for the new Dominion Bank building are also on the ground, and workmen are, at present, tearing down the old temporary structure on Main street, preparatory for a start on what promises to be a very handsome structure. Altogether, judging from present operations and plans, the business part of the city will be considerably improved and extended before the building season of 1910, is over.

But what is true of the business section applies, in an even more marked degree, to the residential district. In all directions, building operations are proceeding at a rapid rate. In the older parts of the city, vacant lots are filling up with substantial looking residences, while north, east, south and west, houses are going up to a surprising extent.

Work on civic improvement is well under way. Gangs of men are employed making sewer and water connections in different parts of the city, while others are laying down cement sidewalks and laying out boulevards.

Business generally, has been good throughout the month. The labour market shows no signs of unrest, and there are no rumors of trouble or strikes to interfere with the season's activity. The contractors of the city formed a builders' exchange, and express their intention of opening offices in the near future.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather during the latter part of the month, has been most

favourable for the growing crops. A long dry spell was followed by a plentiful precipitation of moisture, and sunshine with showers, during the closing days, has helped considerably. Throughout the district, the crops look well.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have not been in much demand during the month, but the prospects are good for the immediate future. Carpenters and joiners have been busy, as were lathers, plasterers and painters. Electricians and linemen were fairly active, with blacksmiths, iron workers and moulders busy. Printers, pressmen and allied trades were all very active. Plumbers were fairly busy, with bright prospects. Barbers, bakers and confectioners, butchers, teamsters, hotel employés, clerks, laundry workers were all busy, as were railroad conductors, engineers, brakemen, firemen, track and trainmen. Unskilled labour has been in good demand.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of April the labour market was quiet. Miners were only working half time. Very little city work was started. There was a strike in the buildings trades, which lasted eleven days, the men gaining their demands with a few exceptions. The principal contention was for an eight-hour day, which was secured. Carpenters' wages were forty-five cents and are now fifty cents; plumbers, fifty-two and one-half cents, now fifty-five cents; sheet metal workers, thirty-five cents to forty cents, now forty-five cents; electrical workers, forty-five cents; lathers, five cents to five and one-half cents per yard; building labourers, twenty-seven and one-half cents to thirty-five cents; plasterers' labourers, forty-two and two-third cents, per hour.

Building statistics are as follows:—

January to April, inclusive, 1909: Permits, 176, estimated value, \$341,405. January to April, inclusive, 1910: Permits, 191, estimated value, \$301,405. Present indications point to a large increase in building over 1909.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Up to May 9, it was a very dry spring and farmers were despairing of their crops, but rain came and there is now every indication of a good season.

Mining.—The coal operators would like to have more orders placed at this time of the year, as the best men are inclined to leave the district, and if a hard winter follows, the output is not equal to the demand. A system of storage would be of great benefit.

CALGARY, ALTA., AND DISTRICT.

Mr. Edwin Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A further improvement in the general labour market was experienced during the past month. With but few exceptions, the supply of labour, however, more than equals the demand, the great influx of immigrants creating this condition. Building is very active, and there is every indication of it continuing so. Brick has been coming in much more rapidly during the past two weeks, than hitherto, and many buildings have been commenced, giving employment to a considerable number of the unemployed bricklayers and labourers.

Excavating for the subway under the Canadian Pacific Railway tracks is now well under way, as well as the excavating for the east wing of the Canadian Pacific Railway depot.

The Sunnyside and Hilhurst water main extension was completed early in the month; other extensions are being carried out in the west end of the city. A by-law was carried by the rate payers, asking for \$126,000 to complete the city hall. Work will be recommenced at

once, and it is expected to be occupied in four months, by the civic officials and staffs. At the same time a by-law was carried asking for \$40,000 to construct a conduit system for telegraph and telephone wires.

The City Commissioners, early in the month, signed a contract with Marshall & Skarin Company for \$28,000 to install curbs and gutters on boulevarded streets and avenues. A considerable number of men are, at present, employed at this work.

Wholesalers and retailers report increased activity.

The local union of painters and decorators struck work on May 7, for an advance in wages from forty cents to fifty cents per hour, and an eight-hour day. The strike lasted eleven days, when a compromise was arrived at, the minimum wage to be forty-five cents per hour, with a nine-hour day, and Saturday half holiday. The strike was called off on the nineteenth of May. The number of men affected was sixty.

Bank clearings for May were \$12,273,936; for May, 1909, they were only \$6,881,994. Building permits for May show an increase of thirty-nine per cent. over corresponding month of last year, the value of permits for this month being \$525,066. The Customs receipts totaled \$87,000, an increase over last year of \$26,234. Homestead entries totaled 1,536 as compared with 896, in May, 1909.

CONDITION OF PARTICULAR TRADES.

Bricklayers had a fair month, and carpenters, joiners, lathers and plasterers had a very busy month. Painting, paper hanging and decorating trades were busy, before and after dispute. Plumbers, gas and steamfitters had a moderately good month. Stone cutters were dull, with builder's labourers fair. Iron moulders, iron workers and helpers had a busy month, as had also machinists, engineers, electrical workers and linemen. Blacksmiths, boiler makers and sheet metal workers were very active. The printing and allied trades experienced a very busy month. Tailors and garment workers, as with bakers and confectioners, were

very busy. Leather workers also were very busy. Laundry workers and hotel and restaurant employes had a busy month. All grades of railway and transport employes again had a busy month. Teamsters and expressmen were very busy. Unskilled labour had an active month.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market improved considerably during May, but the influx from outside points has more than supplied the demand for labour, especially in the building trades. Railway contractors are employing a large number of unskilled labourers. The outlook in all branches of the building trades is very bright. Building permits issued in January, totaled \$44,090; February, \$29,030; in March, \$264,435; and in April, \$262,196: a total for the first four months of the year of \$599,751, as against \$522,925 for the corresponding period of 1909.

April returns compared with the same month last year, are as follows:—

	April, 1909	April, 1910	P. C. Increase.
Customs.....	\$25,779	\$27,500	7
Building Permits.....	210,890	262,196	24
Bank Clearings.....	4,044,055	5,370,145	33
Post Office Returns.....	6,500	6,750	4
Street Railway.			
Passengers Carried.....	152,203	261,670	72
Revenue.....	6,575	11,345	70

The City Council has appointed a Commissioner of Public Works, at a salary of \$10,000 per annum. The following money by-laws were approved by the ratepayers, in the latter part of April:

Addition to city hall.....	\$ 4,000
Police signal system.....	5,000
To complete filtration plant.....	3,500
East Jasper bridge.....	5,500
Great ravine bridge.....	17,000
Two new fire halls.....	34,500
Paving.....	35,000
Electric light extension.....	30,000
Telephone extension.....	52,000
Car barns.....	60,000
Street Railway extensions.....	260,500
Power plant.....	166,000

\$673,000

The saw and planing mill of the Edmonton Lumber Company, Limited, which was destroyed by fire in April, at a loss of \$20,000, is being re-built, and will be in operation June 1.

Transportation companies reported passenger traffic very heavy during the month. Wholesale and retail trade was active. There was no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The first part of the month was very dry, and recent heavy rains have had a beneficial effect. Seeding is about completed under very favourable conditions. Grain is reported from all sections as looking well.

Lumbering.—Operations in connection with the drives were fully under way. The output of lumber will be larger than last year.

Railroad construction.—Contractors for the substructure of the Wolf Creek and McLeod river bridges, on the Grand Trunk Pacific, have completed their work, and the steel work is being placed by the Canadian Bridge Company. Great activity prevails in all construction camps.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were active. Carpenters and joiners, lathers and plasterers, painters, plumbers and steam-fitters were busy, but a large number coming in here caused the supply to more than equal the demand. Stone cutters were more active than the previous month. Builders' labourers were active. The metal and engineering trades were active. Woodworkers and carriage and wagon makers were busy. The printing and allied trades were active. Journeymen tailors were busy. All classes employed in the preparation of food and tobacco were active. Busy conditions prevailed in the miscellaneous trades. Unskilled labour was well employed, but the supply was equal to the demand.

NELSON, B.C., AND DISTRICT,

Mr. A. B. Dockstader, correspondent,
reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout Kootenay district during May, 1910, was active, the demand having been greater than the supply; but this state of affairs applied chiefly to the lumber industry, which could absorb about 750 more men. Only experienced millhands and woodsmen are in demand, and inexperienced men might find themselves unable to obtain employment. There was also a slight shortage of miners, but this is likely to be temporary.

On May 10, the Josie No. 1 mine shafthouse with the machinery therein was destroyed by fire, entailing a loss estimated at \$10,000. Nevertheless, no loss of employment or production ensued as the burnt building had not been in use for some time. The Consolidated Mining & Smelting Company of Trail, has acquired the Molly Gibson Mine and, it is stated, will re-open the mine and resume shipments in the near future. This Company has started operations with a small force on the Queen Victoria Mine, at Beasley siding, near Nelson. About 400 men are on the mine pay-roll at Moyie. The pay-roll of the Crow's Nest Pass Coal Company this month, was reported at about \$170,000, or slightly over \$30,000 less than the previous month, this decrease being reported as due to a shortage of railway cars in which to ship the coal; these conditions no longer exist. The Sheep Creek Gold Mines continued to produce gold bricks, and the adjacent district, commonly known as the Bayonne district, was attracting considerable attention, several groups of free-gold mining claims having been recently bonded. A percentage of cash paid thereon while development work is to continue during the life and tenure of the bond. The grocers and business houses at Nelson have generally granted a weekly half-holiday (Wednes-

day) during May, June, July and August to their clerks. The Kootenay Jam factory has doubled the size of its establishment by adding another storey.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were never better in this locality, and the prospects for a busy summer in all branches seem very favourable. Skilled labour seems equal in supply to the demand, but unskilled labour is scarce owing to street improvements and railroad construction being rushed so as to take advantage of fine weather. The salmon canners are preparing for a fairly busy season; while actual canning does not start for some time yet, the necessary preparations give employment to a few white men. Generally speaking, the month of May this year, showed a vast improvement over that of last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are all busy, and crops are looking good. The last report from the city market showed a slight rise in the price of certain articles, the following being quotations:—

Beef, hindquarters, per lb. 11c. to 12c.
 Beef, forequarters, per lb. 9c. to 10c.
 Lamb, per lb. 18c.
 Mutton, per lb. 16c.
 Veal, large, 10c.
 Veal, medium, 12 to 12½.
 Pork, medium, per lb. 13c.
 Eggs, wholesale, per doz. 30c.
 Eggs, retail, per doz. 35c.
 Butter, wholesale, per lb. 30c.
 Butter, retail, per lb. 35c.
 Fowl, per doz. live, \$10 to \$11.
 Chickens, per doz. live, \$8 to \$10.
 Ducks old, per doz. \$10 to \$12.
 Ducks, young, per doz. \$9 to \$10.
 Geese, each, \$1.50
 Potatoes, per ton, \$12 to \$14.
 Onions, per sack, \$1.50.
 Turnips, per sack, 50c.
 Carrots, per sack, 75c.
 Beets, per sack, 75c.
 Parsnips, per sack, 75c.

Lumbering.—All the mills have been working full time and shipping large quantities of lumber by rail and water.

Railway construction (Electric) was never more active than at present, a large number of men being employed.

CONDITION OF PARTICULAR TRADES.

Activity was the rule in the trades, with unskilled labour in keen demand.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The building trades, during the month, have been particularly busy. Business was fairly active and steady. Mayday was celebrated in Vancouver by an open-air mass-meeting. Delegates from some thirty unions convened on the second, and completed the organization of a Provincial Federation of Labour, which will meet at Victoria, on the second Monday in January, 1911.

The allied printing trades will maintain a permanent secretary, with an office. Printers report machine work as brisk, floor work, fair, and plenty of jobs in the new embossing-lithographing establishment.

The Vancouver Tourist Association has started an active advertising campaign. There are 379 licensed bar tenders in the city, who pay \$4 a year, each. A paper-bag factory, and machine shops will be established shortly on Dufferin street.

The strike of the leather workers is still unsettled. The sailors have decided to form a branch of the Sailors' Union of the Pacific Coast.

On May 23, sixty applications for carpenters were made to the Unions' Secretary, which could not be supplied. The British Columbia Electric Railway issued a circular letter giving reasons to its employes why their demands for an increase of wages could not be complied with on July 1. The teamsters report a member-

ship of over 100. The Trades and Labour Council passed a resolution favouring municipal control of the General Hospital, and that the city make no more public grants thereto. On the whole, activity prevailed in all branches of trade and commerce. Real estate maintains a steady and firm growth in values.

DISTRICT NOTES.

North Vancouver.—Activity prevails in building industry, and is only held back by lack of material. The new wharf is nearing completion. The new Tram line, the extension to Lynn Valley, has been completed; this has caused a number of working people to locate there.

Prince Rupert.—A new morning paper will be started shortly. Carpenters are in good demand. Street workers were busy blasting and building plank roads.

Stewart.—Some 400 houses are under construction at this point. Hundreds of prospectors from California, New Mexico, and the interior of British Columbia, as well as Colorado, are arriving on every boat. The new sixteen-mile railway is about one-half completed.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district has not shown much change from last month. While there are a number of men coming and going there has been no scarcity of work, and there are not many idle men around. Transportation, both passenger and freight has been good during the month, especially passenger. The merchants, wholesale and retail, report business as good, with prospects of continuing so for some time. There have been no changes

in rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is very little activity among the local fisherman outside of the local trade.

The Whaling Stations on the west coast of the Island are having a good season, their catches being ahead of last year's record; whales are plentiful on the coast.

Lumbering.—The sawmills in the district are working steadily and the demand for the product is good.

The logging camps are in full operation, with more working than last year.

Mining.—Work in the local coal mines has been steady during the month; the same applies to nearly all of the coal mines in the district. One of the new mines is working only five days a week.

Railroad construction is being pushed, several crowds of men having been brought over and sent out to work on the extension of the Eastern & Northern Railway. The work of clearing land for settlement is being steadily carried on by the Canadian Pacific Railway

CONDITION OF PARTICULAR TRADES

Bricklayers and masons report work as active. Carpenters and joiners are very active, there being more new buildings going up this year than for years before. Painters and paper hangers report work as active. Plumbers also are active. Builders' labourers are fairly active. Blacksmiths and carriage makers have been active. Printers report a very fair month. Cigar makers report work as steady. Teamsters and expressmen have been active during the month. Unskilled labour has been well employed, there being a lot of work going on clearing lots in the city and surrounding district.

FURTHER REPORT ON THE CANADIAN INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, BY VICTOR S. CLARK, Ph. D.

IT will be remembered that during the spring of 1908, Dr. Victor S. Clark, the noted American educator and labour expert of Washington, D.C., conducted an exhaustive investigation into the operation of the Industrial Disputes Investigation Act, the results of which were published in an article appearing in the May, 1908, issue of the Bulletin of the United States Bureau of Labour (1).

The report described the purpose, administration and results of the law, and the sentiment towards it during the first year of its operation, and gave a detailed commentary on its provisions.

Since the date of this report it has appeared to Dr. Clark that subsequent experience might permit the formation of a more mature judgement as to leading features of the Act, and might reveal also any deficiencies that have developed in the course of its administration. The proximity of Canada to the United States it is pointed out, the similarity of industrial conditions in the two countries, and the fact that the law directly affects several trade unions and corporations in the United States, has created, in the country a very general interest in the Canadian law, and a demand for current information on the subject. This demand Dr. Clark has met by a second report reviewing the operation of the Act from April, 1908 to August, 1909, the report appearing in the Bulletin of the Bureau of Labour for January, 1910, a copy of which was received at the Department during the past month. On the whole, Dr. Clark has not found it necessary to revise the conclusions of the previous report and his latter re-

marks are designed to supplement rather than to supersede his earlier statement.

Disputes Considered.

After a brief introduction descriptive of the Act and its machinery, a statistical review of proceedings under it during the first two and a half years of operation is given as follows:—

Statistics only imperfectly present what has been accomplished by the law during two years and a half of operation. There is a record of the number of boards appointed and of the number of agreements and disagreements following their sessions, of approximately the number of workers affected by the disputes investigated, and the number and duration of lockouts and strikes, lawful and unlawful, which have occurred in industries subject to the act. But it is not possible to measure the margin between these statistics and the figures which would have represented corresponding data if the Act had not been in existence. It cannot be assumed that every settlement made by a board stands for a case where a strike would have occurred if no board had been appointed or that these settlements were in each instance better than a settlement would have been without Government intervention. It is not absolutely certain but that in exceptional cases a strike or lockout is a more wholesome culmination of an aggravated dispute than a series of temporizing and unsatisfactory compromises.

The following table shows the interventions with and without strikes from March 22, 1907, when the law went into force, to the latest information obtainable, in August, 1909:—

¹The report was subsequently re-printed in *The Labour Gazette* for September, 1908, page 265.

NUMBER OF BOARDS APPOINTED, EMPLOYEES AFFECTED, STRIKERS IN ILLEGAL STRIKES AND IN LEGAL STRIKES, AND SETTLEMENTS WITHOUT STRIKES, BY INDUSTRIES.

Industry.	Boards appointed.	Em- ployés affected. (a)	Illegal strikes (begun before or pend- ing in- vesti- gation).	Strikers in illegal strikes.	Legal strikes (begun after report of a board).	Strikers in legal strikes.	Settle- ments with- out strikes.
Coal mines.....	25	27,400	25	6,450	2	34,700	18
Metal mines.....	5	900			2	4625	3
Railways.....	17	27,600			1	5,000	16
Electric railways.....	4	1,100					4
Shipping.....	5	2,700	3	52,200			2
City employés.....	1	300					
Cotton mills ⁶	2	5,200					1
Shoe factories ⁶	1	300					1
	59	65,500	8	8,650	5	10,325	45

¹On account of the difficulty of distinguishing uniformly between those affected directly and those affected in- directly by a dispute, these figures are far from exact.

²These strikes were as follows: (1) April, 1907, Alberta, 7 companies, 3,600 strikers, Act not yet familiar to strikers; (2) May, 1908, Fort Hood, N.S., 300 men struck 4 days; (3) spring of 1909, Nicola Valley, B.C., 150 men struck during formation of board, which was delayed by fault of employers; (4) April 1 to July, 1909, Alberta and British Columbia, 2,100 to 2,500 men on strike; (5) April 22 to August 2, 1909, Taber, Alta., 300 men on strike; also at Inverness Mines, N.S., 200 to 300 men in strike in July, 1909, no board reported appointed.

³August to October 31, 1907, Spring Hill, N.S., 1,700 men; and July 6 to September, 1909, Glace Bay, N.S., about 3,000 men, strike not ended at date of writing.

⁴January, 1908, Moyie, B.C., 400 men, three days; June 26, till late in July, 1909, Greenwood, B.C., 225 men.

⁵All were wharf labourers, most of whom were probably ignorant of the Act.

⁶No strikes are illegal in these industries, and intervention occurs at the consent of both parties. One cotton mill strike was terminated by the appointment of a board.

The number of boards appointed corresponds only by legal definition with the number of disputes investigated. During the first nine months the Act was in force, three boards were established, and others have been in session more recently, to settle a perennial dispute or series of disputes at a single Nova Scotia coal mine. On the other hand, among the small mines of Alberta several independent controversies are sometimes referred, upon the application of the parties interested, to one board.

In a majority of cases, though this is not invariable, the application for a board is made by employés. Employers have sometimes refused to recommend a member for appointment, so that the Government has been obliged to select their representative on these bodies. Likewise employers have in a few instances refused to appear at proceedings, and it has been necessary to subpoena them as witnesses to enable the board to procure information needed in making up its findings. But more frequently both sides have cooperated cordially to make

the proceedings a success. When reluctance to do this appears, it is usually caused by distrust of the personnel of the board, or because one side is prejudiced by an earlier unfavourable decision.

In appraising the value of board intervention, mere numerical statements of the number of hearings resulting in settlements and the number followed by strikes may be more misleading than enlightening. The probability of reaching an agreement is much greater in a case affecting a weak union or a small number of employés than it is in one backed by a strong organization and reaching a large body of workers. Yet if the strong union has prestige and a well-established policy of collective bargaining, and exercises sufficient control over its own members and the industry to avoid frequent or petty strikes, the work of the board is often made very easy. In possibly four disputes out of five, or nine out of ten (in case of such a union), Government intervention simply substitutes a public for a private agency in making a bargain. But the tenth

dispute may threaten consequences of vital concern to the whole community, quite justifying what would be unnecessary precautions in the other nine disputes. Finally, in dealing with a large body of unorganized and unskilled workers, of lower intelligence as a rule—such as wharf labourers—a board faces a problem of unusual difficulty, because the men have no responsible representatives and because the unenlightened and undirected sentiment of such workers veers with the uncertainty of the wind. The relative success of the act in avoiding actual cessation of work has been greatest where it has dealt with strong unions of educated and highly skilled employes, and least where it has dealt with unorganized or partly organized common labourers. Between these classes come the metal and coal miners, who are well organized, but not sufficiently skilled to be protected from the competition of the unspecialized labour market. Most miners' unions adopt collective bargaining, but employ the strike as subsidiary to their negotiations more frequently than do the railway orders; so mining disputes usually threaten a strike in good earnest and the intervention of a Board in such disputes seldom is a perfunctory service.

Disputes in Coal Mines.

In Canada the two principal coal-mining districts are Nova Scotia in the east, and in the west a region in southern Alberta and British Columbia close to the American boundary. The Nova Scotia mines fall into three main groups, in the vicinity of Spring Hill, around Pictou, and in Cape Breton Island. The Cape Breton collieries, which are the most important of the three, employ from 7,000 to 10,000 men. Some of the mines have been in operation for three-quarters of a century, supplying the markets of the St. Lawrence and the Maritime provinces, accessible by water, and of recent years the neighbouring steel works. They also ship some coal to New England. The Alberta and British Columbia field normally gives work to about 4,000 miners and furnishes fuel to the western sections of the Canadian Pacific and Great Northern railways, to the boun-

dary smelters, and to domestic consumers throughout the prairie districts of Canada. A stoppage of these mines, which are the only accessible source of coal supply in this section, not only seriously embarrasses transportation and local manufactures, causing a shortage of merchandise and provisions as well as throwing other labour out of employment, but in winter imposes an extreme hardship upon the farmers of the northern Provinces.

The organized coal miners of Alberta and of British Columbia have for some years belonged to the United Mine Workers of America, while those of Nova Scotia up to last year, belonged to a long-established and conservative local society known as the Provincial Workers' Association. The latter was formerly a composite union embracing many trades but gradually became a specialized miner's society. Its lodges are incorporated under a special Provincial act. The association has had large influence in shaping the labour and mines legislation of Nova Scotia and its leaders are understood to have held intimate relations with the local Government and the party in power. In 1908, a factional fight in this organization, said to have been caused partly by party politics, partly by personal differences among leaders, and in no small degree by a feeling among the rank and file of the members that the organization officially was too closely allied with employing and Government interests, caused disaffection among a large element, who invited organizers of the United Mine Workers of America to enter the district and form branches. Several entire lodges by referendum vote, and a considerable part of the membership of other lodges, separated from the local society and became unions of the international body. But the Provincial Workers' Association still remains strong enough to play an important part in labour matters. Consequently, while in the west the United Mine Workers of America has a monopoly as a labour organization, in the east it meets strong competition.

Meantime, in these two fields the condition of employers is almost the reverse of this, the control of mining property

in the east—especially at Spring Hill and in Cape Breton—being centralized, while in the west it is dispersed. The western operators have an association which is intended to deal as a unit with labour matters; but the strongest mines in the district have withdrawn from this association on account of a difference of labour policy and deal directly with the unions. Out of these general conditions of organization of both workers and employers have followed crises at these two extremities of the Dominion in which the Disputes Act has failed to prevent a stoppage of work at the mines.

In Nova Scotia.

In Nova Scotia the Provincial Workers' Associations and the Dominion Coal Company, which is the largest employer in the Province, made an agreement over a year ago as the result of the intervention of a board appointed under the Act, by which the terms of employment of 7,000 miners were to be governed from March 16, 1908, to December 31, 1909. Soon after this agreement, which has not proved fully satisfactory to the workers, had been concluded the United Mine Workers, as just stated, entered the district and enrolled in their own numbers a large part of the Provincial Workers' Association membership. Consequently what was probably a majority of the workers in these mines came to be employed under an agreement which did not receive their support and which had been made with a rival union. The Company refused to recognize or even to deal indirectly with representatives of the United Mine Workers of America, on the ground that its agreement with the Provincial Workers' Association was and should continue to be the only basis of contract with its employés. The members of the international union also claimed that they were discriminated against in receiving work and in the assignment of places in the mines. These and other grievances caused them to apply for a board, which heard their case and presented two reports, the Chairman siding with the representative of the employers. This majority report dealt unfavourably with international

unionism, making the latter a factor in its decision, and by these animad versions was calculated under the existing conditions to aggravate rather than to alleviate the controversy. As a result, early in July, 1909, some 3,000 or more employés of the Company struck and at the present writing two months later, have not returned to work. The outbreak of the strike was accompanied by some violence, the troops were called out, and the conditions that usually attend a severe and protracted labour disturbance prevailed in the district. Under the law, this strike was quite legal, because the required hearings of the points at issue had been made and the board had reported. While the strike fever was at its height, however, a smaller and apparently illegal strike occurred in connection with another dispute at some neighbouring mines. In the larger trouble, though, the Act was not directly violated, yet it was a failure to the extent that an unfortunately constituted board seems to have lost view of its first object—to conciliate the disputants and compromise their difficulties—and judging from the sentiments of the strikers this had an influence toward widening rather than narrowing the breach between employers and employed. This in turn reacted upon the status of the law itself, which in July, 1909, was decidedly less popular in Cape Breton than it was when the same district was visited sixteen months previously.

In Alberta.

In the Alberta coal district the regular agreement between the operators and the United Mine Workers of America terminated last March, when it was subject to modifications and renewal. While negotiations looking to this end were in progress delays occurred and issues were raised by some of the operators that seemed likely to lead to a disagreement. As a result the Crow's Nest Pass Company, the largest single employer in the district, withdrew from the operator's association and made an independent contract with the United Mine Workers of America, granting the Union concessions which the other operators

were not ready to allow. As a result the United Mine Workers of America stood out for similar concessions from the companies remaining in the Association and brought the matter to an issue by suddenly declaring a strike at the expiration of the old agreement. Between 2,000 and 2,500 miners immediately ceased work in the mines affected. No board had been applied for by either side and the strike was directly in violation of the Disputes' Act. After the mines had been closed several weeks the strikers applied for a board, which was granted, and early in July an agreement based upon the board's recommendations was finally signed and the miners went back to work. This important violation of the law passed officially unnoticed, and up to the time the district was visited (August, 1909) no proceedings had been instituted or were reported in contemplation against the strikers. Employers do not care to start suits, from which they foresee no benefit to themselves or to their business whatever the Court's decision, the general public was not during the summer sufficiently interested to agitate the matter, and the Government avowedly leaves the enforcement of the penal clauses of the act to the parties directly affected by its violation.

Railway Disputes.

The application of the law to railway disputes covers what would be the chief field of jurisdiction of a similar federal statute, should one ever be enacted in the United States. The Canadian Boards have investigated seventeen disputes, and in only one instance has their decision been followed by a strike. No strikes have occurred prior to the publication of a board's decision. These disputes have been the most important, in respect to the number of employes affected, the seriousness of the points at issue, and the prospective disturbance of business that have arisen in Canada since the law was passed. The settlements have applied not only to railways in that country, but also to considerable sections of railway in the United States, and they have covered every organized branch of the railway and railway tele-

graph service. While most of these controversies might have been settled by direct negotiation without the Disputes' Act, yet two or three crises thus tided over were so acute that an extended, protracted and bitter strike was seriously to be apprehended. There seems to be little question that the boards averted these strikes, with one exception to be mentioned, and in so doing they performed a service of greatest value not only to the disputants but also to the general public, and saved money losses far exceeding the cost of administering the law.

The only railway strike that has occurred in Canada since the Act went into operation was called by the machinists and other mechanics employed on the Canadian Pacific, after a board had investigated their grievances and reported. The men struck early in August, 1908, and two months later went back to work on the terms that had been recommended by the Board. The dispute originated in a thirty-day notice, posted by the Company, in accordance with the law, abrogating its old agreements with the complainant unions and reducing wages. The employes invoked the Act, and two reports were presented as a result of the investigation that followed. The majority report, concurred in by the chairman and the representative of the railway, sustained the Company on many points, but in certain matters supported the contentions of the men. The strike involved 5,000 employes, and their defeat was attributed in part, by both the unions and the officers of the railway, to the adverse public sentiment caused by their rejection of the Board's findings.

In several instances a strike already under way has been terminated by the appointment of a Board of Conciliation and Investigation under the terms of the Act, or such a Board after appointment has succeeded in bringing the parties to an agreement. At Montreal, at Owen's Sound and at Fort William unorganized or partly organized wharf labourers have struck at different times without applying for a board or waiting for an investigation of their grievances.

Most of the strikers, many of whom were foreigners, probably knew nothing of the law. In all these cases a board has ultimately been appointed. The one at Fort William has not yet reported, but the others succeeded in bringing the parties to an agreement. A strike at the Valleyfield cotton mills was ended by both sides agreeing to refer the dispute to a board.

Public Opinion Toward the Act.

The attitude of public opinion in Canada toward the Disputes' Act cannot be determined precisely, because it has not been a dominant political issue at any election, and any estimate of general sentiment regarding it needs qualification. Approval or disapproval is often conditioned by some pet theory or demand for amendment made by the speaker. Political affiliations have a decided influence in determining the favour or disfavour with which the law is viewed. In case of an Act so closely identified with the policy of the present Government, it is as difficult for a Conservative cordially to commend as it is for a Liberal unreservedly to condemn. Many people know nothing definite about the Act, or too little to form an intelligent judgement of its merits. A mere poll of opinions, giving each equal weight, has no value under such conditions except to persons interested in votes.

In the class not identified either with organized labour or with the industries to which the Act applies, the law has generally been viewed with favour. Newspaper readers regard it as a measure intended to protect them from the inconvenience of arbitrary strikes. Sober business men welcome any attempt to keep the railways running and to prevent a coal famine. Little men of capitalistic bias speak of it as a wholesome device to curb the power of irresponsible labour agitators. Broad-minded men with enlightened social sympathies believe that the hardships of labour, as well as of capital, will be lessened by its mediation. A popular belief prevails that the law reaches out in the logical line of development toward the coming better way of adjusting the relations

of capital and labour. This favourable sentiment in its various forms, seemed to be stronger and more general in the summer of 1909, than in the spring of 1908, principally because in the meantime, people had become better informed about the provisions, purpose, and operation of the Act. Some Canadians appeared to regard the law with added complacency as an evidence of superior governmental and industrial conditions in the Dominion as compared with similar conditions in the United States. Thus it happened that, though some were lukewarm, hardly a person belonging to this neutral class was met who seriously opposed the law or who advocated its repeal. However, several persons suggested amendments or pointed out what they considered defects in its administration. But such criticism was entirely of details, not of the central principle or of the general provisions of the statute.

Opinion of Employers.

Employers showed almost equal unanimity in favour of the law. Railway officers without an exception supported it, as did nearly every employer not directly affected by the Act. It has many warm friends among mine managers, especially in the east. But here there was more difference of opinion, and in the west some operators of both coal and metal mines, while not actively hostile, were skeptical as to its value. The indorsements of employers, like those of employés, were usually accompanied by some demand for amendment, and often the amendments suggested by the two sides were incompatible with each other. Upon the whole, during the last sixteen months, taking the whole Dominion into account, the Act has probably gained rather than lost in the esteem of employers, though in some cases unexpected weaknesses—from their point of view—have developed. However, these defects have been more than counterbalanced by the gradual disappearance of that distrust with which a new law interfering in industrial matters is always regarded by those immediately affected. A year and a half ago

this distrust had a marked influence on the attitude of many large employers, while in the summer of 1909, it was hardly observable.

Opinion of Labour.

On the labour side there is less unanimity of opinion and more positive opposition to the statute. Here the trend of sentiment is more difficult to detect. The views of different unions differ, and in each union there is an official opinion and an opinion of the rank and file, which do not always correspond. Finally, nothing whatever is known of what unorganized labour thinks about such legislation, if it thinks about it at all.

As the law applies only to a limited number of industries many unions are not directly affected by its provisions, and the opinion of their members and officers is almost as much the opinion of outsiders as is that of the general public. Most of these unions are members of the Trades and Labour Congress of Canada, which at its last two annual meetings has discussed the Act, at the first meeting indorsing it, and at the second suggesting amendments and taking a rather equivocal attitude. In both congresses the law has evoked vigorous debate and a strong minority opposition. Most of the unions represented in this congress are affiliated with the American Federation of Labour, which is not officially in sympathy with this legislation.

Just at present the question of international unionism is a live issue in Canada—at least with a small section of the general public, outside of labour ranks, but interested in labour questions, with some employers, and with a minority of uncertain strength among trade unionists themselves. A movement exists, which is watched with significant sympathy by some employing and political interests, toward organizing exclusively Canadian unions. The importance of this issue in the Nova Scotia coal fields has been mentioned. It has given rise to a group of small organizations in central Canada, including several French-speaking societies, which is associated

in the National Trades and Labour Congress of Canada. This assembly is now seven years old and is a rival of the more important Trades and Labour Congress, which has reached its twenty-fifth year. A national union has also been discussed and may have been the object of some factional scheming among the leaders, in the western district of the United Mine Workers of America. The objects and interests involved in this agitation and the arguments used in its support have nothing to do with the Disputes Act; but they have incidentally brought out certain points of conflict between international unionism and a regulative statute of this character. The first of these arises from a possible difference of policy with regard to such legislation between the branches of an international union within a particular country and the larger organization of which they are a part. But this is a matter affecting chiefly the internal affairs of the union. A practically more important point is that some international unions lodge in their executive authority to call a sympathetic or supporting strike in any district, in order to enforce demands made in another district. Suppose the Grand Trunk switchmen were ordered by the international to strike in order to enforce a demand on connecting railways at Chicago, for instance, to prevent the handling of freight from such roads. If the strike were called without first applying for a board and having an investigation, it would be illegal, though the first offenders might be without the reach of Canadian law. But if a Board were appointed and made an investigation, it would find no grievance existing on the railway for which it was appointed and could not justify the intending strikers. Such an order, under the present constitution of most railway unions, would be impossible, but it might occur in case of other international organizations. The Board in the Dominion Coal Company dispute, which was followed by the present strike in Cape Breton, quoted in this connection the following extract from the constitution of the United Mine Workers of America: "The international officials shall at any

time they deem it to the best interests of mine workers in a district that is idle, for just and sufficient reasons order a suspension in any other district or districts that would not in any way impede the settlement of the districts affected, provided such action would conserve to the best interests of the United Mine Workers of America "

A law has been seriously proposed in Canada making any society, the constitution of which contains provisions contrary to the laws of the country, an illegal society within the Dominion. The main purpose of such an Act would be to meet such situations as the one here suggested. What influence such a law would have upon the attitude of organized labour in Canada towards the Disputes Act is impossible to predict, and might depend on the yet uncertain strength of the present movement in favour of national as contrasted with international unionism.

Among Railway Unions.

When the Disputes Act was passed the railway unions opposed it in principle and detail. These unions held that since their policy was to resort to strikes only in extreme cases, and they normally negotiated peaceably with their employers and observed the contract named, there was no need for such a law to interpose its machinery in place of their own well-tryed system of adjustment committees and trained negotiators. They also felt that they were weakened in treating with the companies by the postponement of a strike until after an investigation, during which period the railways could procure new employés. These unions and their members were more responsible financially than many other classes of workers, and so realized more vividly the burden of the penalties which the Act imposed. Consequently in the spring of 1908, uncompromising opposition to the law was nearly universal among the official representatives of the large railway unions. Some local officials were more favourable, and among the rank and file there were supporters of the Act. However, with longer experience this opposition seems to be lessening, and

officers who were vigorously hostile to the law last year now only criticise mildly some of its provisions. A leading union official, whose jurisdiction covers nearly the whole Dominion, said: "To give the devil his due, the Act has worked very well." The demand for certain amendments affecting procedure is as strong as ever, but these would not affect the principle of the law. The judgement of men whose whole interest is absorbed in the welfare of their union and in bettering the terms of employment of its members depends almost wholly on concrete results obtained by applying the Act. Therefore, an unfavourable decision in an important dispute might change sentiment back to its former unfavourable position. The union officials point out that hitherto boards, have for the most part, dealt with questions evolving the equalizing of working conditions on different sections of the same road. Several decisions have been obtained leveling up conditions in a poorer district to those in a better district. But when the best existing standard has been reached by all the roads and there are practically uniform terms of employment throughout large regions then, these officials fear, it will be very difficult to get a Board to advance beyond that standard and to recommend a general increase of wages or a shortening of hours. But this is at present a theoretical difficulty. In short, it is safe to say that a change of sentiment in favour of the Disputes Act has occurred among railway employés and their officers during the past year. This change might easily be overestimated on the basis of a few interviews in particular districts. But it is appreciable, and where it has not won positive supporters of the law, it has at least, mitigated the previous opposition to it.

Among Miners.

Among miners, if opinion has shifted at all, it has been rather adversely to this legislation than in its favour. Perhaps, it would be better to say that latent opposition which always existed has in some quarters, become more active and apparent. This is due to special causes,

peculiar to each particular locality, such as the failure of certain boards to remedy grievances in Cape Breton and in the west. In Nova Scotia the Provincial Workers' Association, though it rather opposed the passage of the law, has co-operated cordially with the Government and with employers to make it a success; and the general officers of the union commend its influence. The members of the United Mine Workers of America in the same Province, might be expected to oppose a measure indorsed by the rival union, and their brief experience with the law has not been of a kind to win their favour. However, in the midst of a big strike, such as has disturbed this Province the present summer, it is difficult to get candid opinions from labour leaders. The United Mine Workers of America officials at Glace Bay professed to have much respect for the Disputes Act, its main virtue at that moment being that it did not interfere with the strike then in progress. Since the union was fighting for recognition in the contract between employers and miners, its interest might lie in supporting a law that afforded the most likely agency for future negotiations to secure this end. Among the rank and file of the miners were many who thought that because there was a strike the law was a failure. Such comment as "You can see for yourself all the good the law is" was the usual reply of workmen to an inquiry as to its value. Some few suggested amendments, a larger number were unthinkingly hostile, and a majority were indifferent to the Act. The strike was the absorbing and real thing in their minds, the strike weapon the only remedy for labour grievances in which they had real confidence, and such legislation as the Disputes Act was something dim, far off, academic, in which they had no vital interest.

The United Mine Workers of America in the west, while part of the same international organization as the eastern unions, are affiliated with the latter only through the Indianapolis executive and the general convention, and in matters of local policy are to all intents and purposes a distinct organization. The western members are mostly Socialists, while

the eastern miners still preserve conservative trade union ideals. Principally upon the Socialist issue the Alberta district of the United Mine Workers of America recently withdrew from the Trades and Labour Congress. The official paper of that district is a Socialist organ. In this section union leaders were agreed that a referendum of their members would be overwhelmingly against the Disputes Act, and this was confirmed by talks with the miners themselves. Back of this opposition lay Socialist doctrine and distrust of the fairness of the Government, which was believed to have a class bias in favour of capital. It was not unusual to meet miners who thought the law would be an excellent measure if it could be administered with absolute impartiality. In spite of this attitude, however, the miners in this district are continually applying for boards. The recent President of the district has served as labour member on some twelve boards, or nearly every one appointed to consider coal mine disputes in this region since the Act went into operation, including the important board named to settle this summer's strike; and he has on occasions commended the influence of the law.

The United Mine Workers of America and the Provincial Workers' Association are the only unions of coal miners in Canada. The metal miners belong to a single international union, the Western Federation of Labour, which is strongly entrenched in British Columbia and has several branches in the Cobalt silver district of Ontario. The policies of the United Mine Workers of America and the Western Federation of Labour differ in this important respect, that while the former union usually works under written contracts with employers, running for a specific term, and many of its strikes are to secure such an agreement, the Western Federation of Labour by its constitution forbids all forms of agreements with employers except a wage scale. The purpose of the latter policy is to leave the union free to strike at any favourable moment, in the belief that it can thus most quickly force wages up to the highest point. It is hardly necessary to add that the general organization of the

Western Federation of Labour is Socialist, while, in spite of divergent policies in particular districts, the international United Mine Workers of America are old-style trade unionists.

Both the constitution and the general policy of the Western Federation of Labour array it against the Disputes Act. Being a Socialist society, it opposes any Governmental proping up of the wage system by facilitating agreements and preventing strikes; and since its unions can not make contracts with employers the only form of settlement that a board can arrive at must remain for them in the air, so to speak, and for that reason hardly worth obtaining. Nevertheless the union has applied for boards in a few instances and wage scales have been adopted based on board recommendations. But in two cases out of the five heard, the decision was followed by a strike. The officers and members of this union, both in British Columbia and in Cobalt, oppose the Disputes Act without qualification and advocate its repeal. This has been their settled attitude from the first and there is no present indication that it will be modified.

Both the Western Federation of Labour and the United Mine Workers of America have, at their last general conventions, officially condemned the Canadian law, and they are reported to have taken this action at the instance and upon the information of Canadian delegates. This is clearly stated in the resolution un-animously adopted by the United Mine Workers of America at their Indianapolis convention last January, which reads as follows:

Whereas, from press reports and other sources it would appear that several states are contemplating the introduction of a bill to be modeled from the Industrial Trades Disputes Bill of Canada; and

Whereas, it would appear that the workers of the United States, misled by false reports as to the workings of this bill, are viewing it with favour; therefore, be it

Resolved, that we, the delegates from Canada, having had almost two years' experience with said bill, herewith advise

our brothers on this side of the line to oppose any such measure of like nature to the utmost of their powers; and be it further

Resolved, that we, the United Mine Workers of America, in twentieth annual convention assembled, emphatically re- sent any interference with our right to quit work, and will in no wise tolerate any legislation which will force us to submit our grievances to a court, which must in the very nature of things be pre- judiced against us, if we can prevent it.

Without questioning that these resolu- tions fairly represent the sentiment of the coal miners, the formal action of labour conventions, either in opposing or in sup- porting this legislation, does not always stand for an active, settled, and perma- nent conviction. Clever committee man- ipulators and ready speakers can usually procure the presentation and the adop- tion of resolutions suiting their personal views and objects by a good natured and not vitally interested assembly. Labour men who have never viewed the Act directly in operation and who know of its in- fluence and provisions only from hearsay conceive it as an attempt to curtail their right to strike, and instinctively oppose it for that reason alone. The Canadian Socialists are in the west a political party, and it belongs as much to their tactics as to those of the Conservatives to dis- credit the legislation of their Liberal opponents. These extraneous and some- times accidental influences qualify the candor of the formal public utterances of labour bodies as they do those of other popular organizations. It is by talking, man to man, that one gets the best meas- ure of sentiment and learns whether that sentiment is intelligent or uninformed. Such interviews suggest that while labour in masses is inclined to oppose this law, the individual workman who has studied it and forms an independent judgement of its merits and deficiencies is not un- qualified in his disapproval, and in man indorses its purpose and effect.

Résumé of Views of Labour.

In résumé, therefore, observation and interviews with different classes of people all parts of Canada indicate that the dis-

putes Act has with some exceptions the support of the general public and of employers and of the Parliamentary "labourists" and of the unions not directly affected by its provisions. The officials of the railway-orders are divided in their opinion, but on the whole are more favourably inclined toward the law than when it first went into operation, and the rank and file of these orders is probably even more friendly. The leaders and the aggressive membership of the western mining unions are vigorous opponents of the Act, although there is a considerable quiet element in these organizations that probably regards it with more favour. The Nova Scotia miners officially indorse the law, and it has support among their members, but the result of a referendum vote upon it would be difficult to predict. Some public men regard as significant that at the last general elections the Liberal party lost seats in several important labour centres, such as Glace Bay, Cobalt, Winnipeg, and one or two points farther west, where the Act had recently been applied to serious local disputes.

Amendments Suggested.

The experience of the last sixteen months has not materially changed the arguments upon which the law is supported or opposed by different persons, and the demand these persons make for amendments. Such arguments and amendments were fully discussed in a previous report and require only summary repetition here. The practical value of the law depends almost wholly upon the tact and skill of the boards appointed. Personnel and procedure are the kernel around which the rest of the law is merely a dry husk. The principal service of a board is in bringing the parties to the controversy together for an amicable discussion and in guiding their negotiations to a voluntary settlement. If the parties cannot agree in this way, the Board seldom presents a unanimous report. Two and sometimes three contradictory findings in one case do not have a remarkable influence upon public opinion. Neither is public opinion alone so decisive in preventing strikes, though

it may influence their results, as social optimists sometimes imagine. The trouble is that the public opinion that reaches the worker is not the public opinion that emanates from the well-to-do citizen who reads his newspaper on the front porch. The chief merit of the law, then, lies not so much in its compulsory or penal features as in its conciliatory provisions; though its original and interesting element is the temporary prohibition of strikes and lockouts in order that conciliation may not be sacrificed by default.

Those trade unionists who oppose this legislation on principle, object mainly to the provision making strikes illegal pending investigation. They urge that delay enables employers to prepare for a strike by bringing in strike breakers, curtailing penalty contracts, and other measures, thus blunting the edge of labour's most effective weapon. They say they are forced by the law to sell their labour on a future market when they could get a better price for it at current quotations. Most unionists, also, distrust the fairness of the investigating boards, asserting that a chairman appointed by the Government always has a class bias in favour of capital and the majority report, if the board fails of an agreement, consequently sides with the employers and places the workers at a disadvantage in any strike their union may order after the investigation has been held. This fear of bias or improper influence is one of the greatest difficulties a Board encounters in its proceedings. In case of a British Columbia mining dispute recently, the mere fact that the chairman of the Board and the representative of the employers left town on the same train—the only one leaving that day in the direction of their homes—subjected the former to considerable criticism from the labour people of the Province.

The most important amendment not affecting the vital principle of the Act has been suggested and advocated by the railway orders. The law at present requires the party applying for a Board to file an affidavit that a strike or lockout will occur unless a Board is granted.

The purpose of this provision is to avoid the expense and trouble of appointing Boards for trivial disputes. But by their constitution the railway unions are required to take a referendum vote before making a strike issue of any demand upon their employers. Such a vote costs the larger orders several thousand dollars and causes unrest among the members. Therefore, these unions want this clause of the Act modified so as to allow the representatives of the organization to apply for a Board without the formality of a vote. Parliament may consider such an amendment, applying to cases where the members of the union are widely dispersed in different parts of the country.

The strike of the Canadian Pacific machinists, in 1908, was caused by changes in the conditions of employment made by the railway company, but the board, as was to be expected in such a case, was applied for by the employés. When the latter refused to accept the decision of this Board, they were placed at an additional disadvantage by the fact that it was a Board of their own seeking. The public erroneously confused the proceedings with an arbitration and assumed that the applicants were especially obligated to abide by the decision. In order to prevent being prejudiced in this manner, the unions advocated an amendment requiring the party asking for or making a change in existing conditions of employment to apply for the board; so that the aggressor, so to speak, in a dispute may be additionally bound, in public opinion, to abide by the settlement recommended.

The main modification of the present law suggested by employers relates to the constitution of the boards. Sentiment in favour of permanent boards, or at least of permanent chairmen, seems to be growing, especially in the west. A permanent board with local assessors representing the two sides, to be appointed for each dispute, was in some instances recommended. One railway manager said he would prefer to present his case to a board presided over by an outright labour man, provided the latter had had an extended experience in arbitrating

disputes and occupied his office by secure and independent tenure, than to present it to a temporary and inexperienced chairman appointed from the employing or the professional class. A mine manager in another part of the country, in referring to a recent dispute, said both parties gambled on the ignorance of the chairman. Yet as the law stands at present, the same person is appointed repeatedly to preside over different boards, and both employers and employés recognize the advantage of having an experienced arbitrator represent them on these bodies. Men sometimes are selected to serve in these capacities, even when such service will entail a personal and financial sacrifice, because they are thought particularly equipped to adjust the dispute in question. Labour men distrust permanent boards, as likely in time to become subject to influences hostile to their interests.

It will be recalled that if either an employé or an employer violates the law by causing a strike or lockout before an investigation has been held, he is practically immune from prosecution unless the other party to the dispute brings action in the court to punish him. In districts where the law has been violated or evaded in these respects there is a demand by the party that has suffered by the violation, that the Government assume these prosecutions. The Cobalt miners, in Ontario, are urgent that the federal authorities prosecute some of the mining companies for locking out their employés in order to enforce lower wages. The law has been evaded several times by metal mining companies; who have discharged all their men at the end of a week, and re-employed such as wished to come back at lower pay the following Monday morning. Whether such an obvious evasion of the law could be defended in the courts is uncertain; but in face of the probable expense of a protracted suit, and their distrust of the fairness of the courts, the miners are unwilling to venture their funds in a prosecution. In the West a mine manager has been fined several hundred dollars for a lockout, and the judgement was sustained on appeal.

On the other hand, in the Alberta and British Columbia coal region, where the men have recently been on a three month's strike in defiance of the Act, the employers insist that the Government should punish the strikers. Managers assert that they cannot afford personally to institute criminal proceedings against their workmen on account of the permanent ill-will this would occasion. Mine superintendents are in charge of valuable property, with weak police protection, in a country with little resident population except the miners themselves and store and saloon keepers and professional men in sympathy with them. Naturally these superintendents do not wish to push matters to a point that might result in open violence or in covert injuries to the mines. Beside they want their labourers in the mines, and not in jail or in neighbouring States and Provinces dodging fines. Employers in this district cherish as an additional grievance that last summer the application of these law-breaking strikers for a board to be established under the Act they were violating was favourably considered by the Government.

This situation in Alberta and British Columbia raises an important question as to the continued application of the Disputes Act in that part of the Dominion. If men can strike with impunity in disregard of the law, what is the value of the latter in preventing or postponing strikes? Will the Act not fall into abeyance except in those minor and less acute disputes where there is least call for Government intervention? Has a law any force at all that operates only by the tolerance of lawbreakers? It should be recognized that expediency must constantly be consulted in administering such an Act; but it would seem that the latter, though it may retain some residuary value as providing convenient machinery for public mediation, must lose its distinctive character and its interest as experimental legislation unless some way is discovered to secure the observance of the clauses deferring strikes and lockouts until after an investigation has been held. Unless these clauses are enforced, the law becomes an ordinary

conciliation act, burdened by the discredit of its unenforced provisions.

It is hoped that some remedy will be found for this difficulty, which has become serious, only during the present year. In eastern and in central Canada there has not been so much disposition to disregard the prohibitions of the Act, and in those sections there might be less tolerance of outright violations. At Cobalt two union officers were indicted, convicted, and heavily fined for inciting a strike contrary to the law; but the case was appealed, and though not reversed, the penalties were never enforced.

Interpretation in the Courts.

The interpretation of the law by the Provincial courts has revealed some anomalies in its application. The first effort of a board appointed in any dispute is naturally to get the parties to agree upon some sort of a contract, covering the conditions of employment in question. The desirable end of these negotiations, then, is a formal agreement or contract. But when the United Mine Workers of America tried in the courts of Alberta to enforce an agreement made under the auspices of a Board, the Court ruled that as the union was neither an individual nor a corporation it had no power to make agreements, and the contract in question was therefore void, and the union had no remedy against the mining company that had violated it. Moreover, in an obiter dictum, the judge expressed the opinion that an agreement under the Act had no more validity than a private agreement between an employer and a labour organization, that there was no special way of enforcing the agreements signed before the boards, and that as the union was incompetent to contract under any conditions the observance of such understandings must rest solely upon the good will of the parties making them. Because of this decision workers in the western Provinces advocate an amendment to the law, making agreements entered into through the mediation of a board enforceable like ordinary business contracts between corporations or individuals. Such an amendment, if practicable, would add much

to the authority of the law, especially in that part of the Dominion where at present it particularly needs strengthening.

The law is better established than it was sixteen months ago, but it is still regarded as experimental legislation and does not occupy the same position of assured authority as older statutes. The amendments now proposed are fewer than they were at the earlier date, but they are more clearly of a constructive character. There is no observable tendency to extend the law in the direction of compulsory arbitration or state regulation of industry. A few persons advocate broadening its application to other industries than public utilities and mines. One or two petitions to this effect have been presented by employers, and two years ago the Trades and Labour Congress recorded itself in favour of such an amendment. However, this demand is not general or urgent enough to make its serious consideration in the near future very probable. But, though the scope of the law does not promise to be extended, amendments may be presented in Parliament in the near future, to strengthen the application of the law within present limits and to perfect its administration. Hitherto the ministry have been waiting for sufficient experience with its working to guide them wisely in making changes.

Bills Presented in New York and in Wisconsin.

During the last session bills embodying some of the provisions of the Canadian legislation were introduced into the state assemblies of New York and of Wisconsin. The New York project, which appears not to have got out of committee, provided for a single permanent board, and in detail followed the Canadian law chiefly in making a strike or lockout subject to injunction and penalty if the parties in case of any industry had previously bound themselves by a written contract not to strike or lockout. The Wisconsin bill received more consideration from the Legislature. It followed very closely the provisions of the Canadian Act,

except that in case of disputes affecting public utilities the board was to be appointed by the State Railway Commission, and at the option of the parties the dispute might be referred to a permanent board of arbitration, provided for in the bill, or to a special board appointed for the occasion. The bill is reported to have been opposed by organized labour on the ground that it would weaken the unions. Up to the present there is nothing in Canadian experience to suggest that this fear is well grounded. In fact, it has been found so difficult to apply the law to disputes where the workers are not well organized that a strong union seems almost essential to the success of such legislation.

Conclusion.

In conclusion, the Industrial Disputes Investigation Act seems to be gaining support in Canada with longer experience, and has very few opponents outside of labour ranks. The labour opposition is strongest where Socialism is strongest. There seems to be less unqualified opposition to the law among the members of the unions than among the officials, but this is stated as a conjecture rather than as an assured fact. The Act has afforded machinery for settling most of the disputes that have occurred in the industries to which it applies; but in some cases it has postponed rather than prevented strikes, and in other cases strikers have defied the law with impunity. Most of the amendments proposed look toward perfecting details rather than toward revising the structure of the law. There is no likelihood that the Act will be repealed, or that it will be extended to other industries or toward compulsory arbitration. The most serious danger it faces is the non-enforcement of the strike and lockout penalties in cases where the law is violated for the express purpose of weakening its authority. The adoption of a similar statute in any State or by the United States Government, whether desirable or not, is likely to be opposed by organized labour, and probably could be secured only after some industrial crisis, profoundly affecting public opinion had

centred popular attention upon the question of strike prevention. The enforcement of the penal clauses of the law would probably be more difficult in the United States than it is in Canada, and for that reason the success of such a statute somewhat less probable. Under

the conditions for which it was devised, however, the Canadian law, in spite of some setbacks, is useful legislation, and it promises more for the future than most measures—perhaps more than any other measure—for promoting industrial peace by Government intervention.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF MAY, 1910.

DURING the month of May eight applications for the establishment of Boards of Conciliation and Investigation were received as follows:—

1. On behalf of the carmen employed by the Canadian Northern Railway Company, the number of employes affected being 400.

2. On behalf of the plumbers, gas and steamfitters employed by the Canadian Northern Railway Company, the number of employes affected being thirty-two.

3. On behalf of the boilermakers, boilermakers' specialists and boilermakers' helpers employed by the Canadian Northern Railway Company, the number of employes affected being 170.

4. On behalf of the moulders employed by the Canadian Northern Railway Company, the number of employes affected being thirteen.

5. On behalf of the machinists employed by the Canadian Northern Railway Company, the number of employes affected being 300 directly, and twenty-five indirectly.

6. On behalf of the machinists' helpers employed by the Canadian Northern Railway Company, the number of employes affected being fifty-seven.

7. On behalf of the blacksmiths employed by the Canadian Northern Railway Company, the number of employes affected being thirty.

8. On behalf of the blacksmiths' helpers employed by the Canadian Northern Railway Company, the number of employes affected being between thirty and forty.

Report Received.

During the month of May the report was received of a Board of Conciliation and Investigation to which had been referred certain differences between the Dominion Atlantic Railway Company and certain of its employes, members of the Canadian Brotherhood of Railway Employes Local Division No. 25.

The Department was also informed during the month of May of the settlement of a dispute between the Canadian-American Coal Company, of Frank, Alta., and its employes which had been referred to a Board established under the terms of the Industrial Disputes Investigation Act.

Other Proceedings under the Act.

On May 14, a telegram was received from Messrs. Sproule and Locke, of Winnipeg, Manitoba, solicitors for the employes in the eight applications above referred to, containing the information that a settlement had been reached in five of these disputes affecting the following classes of employes, namely, machinists, machinists' helpers, moulders, blacksmiths and blacksmith's helpers, for which reason it would not be necessary to proceed with the establishment of Boards, in so far as these cases were concerned.

On May 19, a telegram was received from Messrs. Sproule and Locke containing the information that a settlement had been reached also in the dispute between the Canadian Northern Railway Company and its boilermakers, boilermakers' specialists and boilermakers' helpers, for which reason it would

not be necessary to proceed further with the constitution of the Board which had been established in this matter.

In the applications of the carmen and of the plumbers, gas and steamfitters employed on the lines of the Canadian Northern Railway Company for the establishment of Boards of Conciliation and Investigation under the Act, for the investigation of matters in dispute between these classes of employés and the Canadian Northern Railway Company, it was stated that the differences in question related to wages and hours of labour, and to the desire of the employés for separate schedules of agreement between the Company and its carmen, and between the Company and its plumbers, gas and steamfitters respectively. It

was further claimed in the applications that the Company had refused to deal with the men except on a joint schedule which the trades concerned had refused to accept. A single Board was established by agreement between the parties to deal with these matters. Mr. D. H. Cooper, of Winnipeg, Man., and Mr. Phillip C. Locke, of Winnipeg, Man., were appointed members of this Board on the recommendation of the Company and of the employés respectively, and the Board was completed on May 23, by the appointment of Mr. Wm. E. Macara, of Winnipeg, Manitoba, as Chairman, Mr. Macara's appointment being based on the joint recommendation of the other two members of the Board.

SETTLEMENT EFFECTED IN DISPUTE BETWEEN THE CANADIAN AMERICAN COAL COMPANY AND ITS EMPLOYÉS.

On May 10, the Department of Labour was informed by telegram, that a settlement had been reached in the dispute between the Canadian American Coal Company, of Frank, Alta., and its employés, which had been the subject of a reference to a Board established under the Industrial Disputes Investigation Act. The differences in question were stated in the application to relate to a proposal by the Company for a reduction in the price of pillar work to the amount of five cents per cubic yard, and to a demand also which had been made by certain employés for full recognition of the United Mine Workers of America. In an affidavit from the liquidator of the Company, accompanying the application, it was stated that there had been a suspension of work by the employés of the Company, excepting some fifty-seven in number, since April 2. Messrs. Colin McLeod, of MacLeod, Alta., and Clement Stubbs, of Bellevue, Alta., were appointed members of the Board in this matter,

on the recommendation of the employer and of the employés respectively; the Board being completed by the appointment of Mr. I. S. G. VanWart, of Calgary, Alta., as Chairman. Mr. VanWart was appointed by the Minister in the absence of any joint recommendation from the other members of the Board.

On May 23, a communication was received from the Chairman of the Board containing an outline of the steps leading up to the settlement of the dispute. In this letter the Chairman stated that the adjustment effected had been highly agreeable to all concerned, also that "the men returned to work on May 12, and that the very best of feeling exists. The merchants of Frank are delighted, as business had been practically at a standstill for six weeks. I was tendered a vote of thanks at a joint meeting of the operators and miners. I found both sides very reasonable and anxious for a settlement."

REPORT OF BOARD IN DISPUTE BETWEEN THE DOMINION ATLANTIC RAILWAY COMPANY AND ITS EMPLOYEES.

ON May 12, the Minister of Labour received the report of the Board of Conciliation and Investigation to which had been referred certain differences between the Dominion Atlantic Railway Company and certain of its employés, members of the Canadian Brotherhood of Railway Employés, local division No. 25.

In the application for the establishment of this Board complaint was made to the effect that "the dismissal of employés and copies of dismissal served were done apparently on account of their membership in the Canadian Brotherhood of Railway Employés." Reference was made also in the application to an alleged refusal on the part of the Company to employ a certain number of their employés, "done with a view to compelling their employés to accept terms of employment." The number of employés concerned in this dispute was stated to be directly four and indirectly twenty-five. Mr. Aaron R. Mosher, of Halifax, N.S., was appointed a member of the Board on the recommendation of the employés. In the absence of any recommendation from the Company, Mr. McCallum Grant, of Halifax, was appointed by the Minister as second member of the Board, and in the absence of any joint recommendation from the foregoing the Board was completed on April 29, through the appointment by the Minister of the Honourable John N. Armstrong, of North Sydney, N.S., as Chairman. The Board proceeded at once with its work of investigation, meeting in Kentville, N. S. on May 3 and 4, and in Halifax, on May 5, 6, 7 and 9. The report as received was signed by all three members of the Board, although reference was therein made to certain points on which Mr. Mosher was unable to agree with his fellow members of the Board.

The representatives of the employés claimed at the first sitting of the Board that if the Dominion Atlantic Railway would re-employ one A. Williams and pay

him as well as three other workmen who had been re-employed, for the time during which they were laid off, it would be regarded by the complainants as a settlement of the matter in dispute. To the claim of the employés' representative for the re-employment of Williams it was replied by the General Manager of the Company that Williams had left the employ of the railway of his own accord, and that this being the case the railway was under no obligation to re-employ him.

With respect to the payment of three other workmen for the time they were off, the General Manager further stated that the Company had been obliged to retrench, through the exigencies of business, and for that reason had laid off these men and taken the same on again as work permitted, and that the fact of membership in the Canadian Brotherhood of Railway Employés had had nothing to do with the course pursued. Further inquiry along this line by the Board elicited the conclusion "that the differences involved were wholly concerned with the question of discrimination." As to the allegation that men were dismissed or threatened with dismissal because they were members of the above mentioned union, the Board finds that this charge was not substantiated by them. Mr. Mosher differs from the other members of the Board and contends that the evidence clearly showed that an officer of the Company, Mr. William Yould, did advise certain of the men dismissed that they could continue in the service of the railway if they resigned from the Brotherhood, and further, that the General Manager, Mr. Gifkins, did cancel the dismissal of one A. Williams because this workman had said he would resign from the Brotherhood. Mr. Mosher contends that the railway is responsible for the acts of Mr. Yould, its mechanical superintendent, and therefore holds that the men who were dismissed should be remunerated for the time they were out of employment. Mr. Mosher further

holds that the claim of the railway that junior men were dismissed was not substantiated by the evidence before the Board, and that the contention that dismissals were for the purpose of retrenchment was not borne out by the facts "as in every instance where the men resigned from the Brotherhood they were continued in the service." Mr. Mosher also further holds that in the case of A. Williams, who has not been re-employed by the Railway, that this is due to a misunderstanding on the part of Mr. Williams. Mr. Mosher, therefore, recommends his re-employment.

The Board expresses itself of opinion that it would have been wiser if the Railway had intimated clearly at the outset that it had no hostility to the Canadian Brotherhood of Railway Employés, so as to avoid anything that would afford ground for suspecting discrimination. In the interests of industrial peace the Board also recommends that in future, the cause of dismissal should be clearly stated and an opportunity given the men to discuss the same with officials of the railway, where a suspicion of discrimination exists.

In conclusion the Board observes that "there should be no discrimination against the members of the Canadian Brotherhood of Railway Employés as such, and the Board wishes to add that as this is now the confirmed policy of the Railway that the General Manager give notice to the employés that there will be no discrimination between union and non-union men."

In a letter received from the General Manager of the Dominion Atlantic Railway on May 23, Mr. Gifkins stated that he had already notified the employés of the Dominion Atlantic Railway "that there will be no discrimination between union and non-union men."

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter, is as follows:—

In the matter of The Industrial Disputes Investigation Act, 1907, and of differences between the Dominion Atlan-

tic Railway and certain of its employés, being members of the Canadian Brotherhood of Railway employés, Local Division No. 25.

To the Honourable W. L. Mackenzie King,
The Minister of Labour,
Ottawa.

The Board, composed of Mr. Aaron R. Mosher, Mr. McCallum Grant, and Honourable John N. Armstrong (Chairman), met on Tuesday morning, May 3, 1910, at the Court House in Kentville, N.S., the locality of the dispute between the above parties, and having taken the oath of office, proceeded with the reference.

The employés were represented by two of their number, Messrs. W. F. Corbin and William Bardell. The Dominion Atlantic Railway was not represented at the first sitting, but the Board was satisfied that the General Manager and other officials would undertake to appear when requested by the Board to do so.

The Board decided to spend the first sitting in discussing the points at issue with the representatives of the employés, and in endeavouring to ascertain the position of the parties, with the hope of bringing about a settlement without proceeding with an investigation under the Act. This course was accordingly pursued, the representatives of the employés submitting a list of names of men dismissed, or upon whom notices of dismissal werè served, as alleged" on account of their membership in the Canadian Brotherhood of Railway Employés."

The representatives of the employés claimed at this first sitting of the Board that if the Dominion Atlantic Railway would re-employ Williams, one of the men named in the foregoing list, who was not now in the service of the Railway, and would pay Williams as well as Barkhouse, Stokes and Meiser, also names in this list, but who had been re-employed, for the time they were off, it would be regarded by the complainants as a settlement of the matter in dispute.

When the Board adjourned until the afternoon, it was with the understanding

that the General Manager of the Dominion Atlantic Railway would be present at the next meeting, in order that the Board might have the opportunity of being made aware if an amicable settlement could be reached on the basis of the proposals of the employés' representatives as submitted at the morning sitting.

Accordingly when the Board resumed in the afternoon P. Gifkins, Esq., General Manager of the Dominion Atlantic Railway, was present, accompanied by Mr. William Yould, Mechanical Superintendent of the Railway. There were also in attendance Messrs. Corbin and Bardell, employés' representatives as before.

To the claim of the employés' representatives that Williams be re-employed by the Railway, the General Manager stated before the Board that Williams had of his own accord left the employ of the Railway, and that being the case the Railway was under no obligation to re-employ him. With reference to paying Stokes, Meiser and Barkhouse for the time they were off, the General Manager further stated that the Railway was obliged to retrench in the exigencies of business, and had laid off the junior men, that Stokes, Meiser and Barkhouse were laid off as juniors under this and taken on as work allowed, that the fact of membership in the Canadian Brotherhood of Railway Employés had nothing to do with the course pursued. Further inquiry along this line at this conference of the Board, with the representatives of the parties elicited the conclusion that the differences involved were wholly concerned with the question of discrimination, and that the Board in order to obtain results should proceed with an investigation under the Act and join with the parties in a searching inquiry into the nature and cause of the whole matter in issue.

In consequence of this decision the Board secured the names of all persons whom either or both parties desired to have appear as witnesses, and determined to take such other steps as would afford the Board all facility in its power to obtain such information as should be necessary. The better to facilitate

the purpose in view, the Board decided to take up the examination of the witnesses under oath at a separate sitting, and to this end fixed the hour of nine o'clock the following morning at the same place, the representatives of both the parties undertaking that all available evidence should in the meantime be requisitioned and be produced before the Board.

The application for the Board contained the complaint of employés to the effect that the dismissal of employés and notice of dismissal served were done apparently on account of their membership in the Canadian Brotherhood of Railway Employés." The Board under all the circumstances realized that the utmost freedom should be given to the employés to make out their case. In view of this the Board did not hesitate to say that the powers conferred by the law upon the Board were exercised to the full in obtaining every possible salient feature of knowledge bearing upon the attitude of the Railway in reference to any dismissals, notices of dismissal given, and re-employment. A large number of witnesses gave evidence at this sitting on behalf of the employés, and the General Manager, Mechanical Superintendent and Mechanical Foremen on behalf of the Railway. Two witnesses called by the employés not being available that day at Kentville, the Board adjourned to Halifax, where this evidence was offered at the sitting on Friday, May 6. The Board deems it proper to state in this connection that the General Manager was most willing to aid the Board in its labours in every possible way.

As to the allegation that men were dismissed, or threatened with dismissal because they were members of the Canadian Brotherhood of Railway Employés, the Board finds that the charge was not substantiated by the evidence.

Mr. Mosher differs from the other members of the Board, and contends that the evidence clearly shows that an officer of the Company, Mr. William Yould, did advise certain of the men dismissed that they could continue in the service of the Railway, if they resigned from the Brotherhood, and fur-

ther that the General Manager, Mr. Gifkins, did cancel the dismissal of one A. Williams because he (Williams) had said, he would resign from the Brotherhood. Mr. Mosher contends that the Railway is responsible for acts of Mr. William Yould, Mechanical Superintendent, and therefore holds that men who were dismissed should be remunerated for the time they were out of employment.

Mr. Mosher further holds that the claim of the Railway that junior men were dismissed is not substantiated by the evidence before the Board, and also that the contention that the dismissals were for the purpose of retrenchment is not borne out by facts, as in every instance where the men resigned from the Brotherhood they were continued in the service.

Mr. Mosher further holds that in the case of A. Williams, who has not been re-employed by the Railway, that this is due to a misunderstanding on the part of Mr. Williams and, therefore, Mr. Mosher recommends his re-employment.

The Board is of opinion that it would have been wiser if the Railway had intimated clearly at the outset, that it had no hostility to the Canadian Brother-

hood of Railway Employés, so as to have avoided anything that would afford ground for suspecting discrimination.

A most gratifying absence of any spirit of hostility between the two parties was apparent at all the Board's sittings.

In the interests of industrial peace the Board also would recommend that in future, the cause of dismissal should be clearly stated, and an opportunity given the men to discuss the same with officials of the Railway, where a suspicion of discrimination exists.

The General Manager declared that his instructions are that there should be no discrimination against the members of the Canadian Brotherhood of Railway Employés as such, and the Board wishes to add that as this is now the confirmed policy of the Railway that the General Manager give notice to the employés that there will be no discrimination between union and non-union men.

(Sgd.) JOHN N. ARMSTRONG,
Chairman.

A. R. MOSHER.
McC. GRANT.

ROYAL COMMISSION OF INQUIRY ON TECHNICAL EDUCATION.

IN the House of Commons on January 28, 1910, the Minister of Labour announced that it was, in the opinion of the Government, desirable that a Royal Commission of Inquiry on the subject of Technical Education should be appointed, and that it should be vested with authority to visit Great Britain, the United States, France, Germany, and, if necessary, other countries, for the purpose of studying the systems of technical education which have been established by these nations, and for the purpose also, of reporting on the same. On May 3, following, an appropriation of \$25,000 was voted by Parliament for the expenses of this inquiry. The personnel of the Commission as appointed by the Governor-in-Council on June 1, is as follows:—

Mr. James W. Robertson, C.M.G., LL.D., of Montreal, Que., Chairman.

Hon. John N. Armstrong, of North Sydney, N.S.

Rev. George Bryce, M.A., D.D., LL.D., F.R.S.C., of Winnipeg, Man.

Mr. Gaspard DeSerres, of Montreal, Que.

Mr. Gilbert M. Murray, B.A., of Toronto, Ont.

Mr. David Forsyth, M.A., of Berlin, Ont.

Mr. James Simpson, of Toronto, Ont.

Secretary and Reporter to the Commission, Mr. Thomas Bengough, C.S.R.

Discussion in Parliament.

The needs of Canada in respect of technical education have been referred to on more than one occasion in the debates of the Dominion Parliament, and

formed the theme of a most interesting discussion in the House of Commons on December 6, 1909, in connection with a motion which was proposed by Mr. Hugh Guthrie (South Wellington) "That in the opinion of this House it is desirable that a Commission of Inquiry should be forthwith appointed to investigate the needs of Canada, in respect of technical education, and to report on ways and means by which these needs may be best met." In introducing the subject Mr. Guthrie stated that he did so at the request of the Canadian Manufacturers' Association and of the Dominion Trades and Labour Congress, and further observed that resolutions in favour of the present motion had been adopted by between fifty and sixty Boards of Trade and Chambers of Commerce in Canada.

In Mr. Guthrie's speech and in the ensuing debate which was participated in by a large number of Members, allusion was made to the attention which has been given to technical education in Great Britain, in the United States, in Germany, and in foreign countries, and to the very great benefits which have been derived therefrom. The point was also strongly emphasized that the subject of technical education and industrial training is one deserving of greater attention than has been bestowed upon it in Canada up to the present time; and that, indeed, if Canadians are to obtain their share of the world's trade they must realise this can only be done by bringing their workmen up to the highest degree of efficiency and by seeing that Canadian industries are managed by men of technical training and knowledge. In the discussion of Mr. Guthrie's motion it was contended that the appointment of a Commission of Inquiry on Technical Education would not conflict with the jurisdiction of the Provinces, and that the results of the inquiry could not but prove of very great benefit to all parts of the Dominion through the full information which it would place at the disposal of the various Governments and interests concerned.

The Minister of Finance, the Minister of Labour, and the leader of the Opposition were among those who took part in

the discussion and expressed their sympathy with the object of Mr. Guthrie's motion. The debate on the motion was adjourned at the request of the Minister of Labour, in order that an opportunity might be afforded to the Government of further considering this proposal from the point of view of the attitude of the Provinces towards Federal action in respect of technical education.

On December 13, a letter was addressed by the Minister of Labour to the Prime Ministers of the several Provinces of Canada, in which the latter were asked whether the appointment by the Federal authorities, of a Commission of Inquiry into the needs and present equipment of the Dominion as respects industrial training and technical education, and into the systems and methods of technical instruction obtaining in other countries, would meet with the approval of the several Provinces and whether, in particular, exception to such a course would be taken by any one of the Provinces on any ground of jurisdiction. Letters of approval from the Provincial Prime Ministers were received in reply to the foregoing, the text of these communications being published in the February number of the *Labour Gazette*.

Terms of Order-in-Council.

The Order-in-Council of June 1, 1910, providing for the appointment of a Royal Commission on the subject of Industrial training and technical education, is in the following terms:

"On a memorandum dated May 28, 1910, from the Minister of Labour, stating that industrial efficiency is all important to the development of the Dominion and to the promotion of the home and foreign trade of Canada in competition with other nations, and can be best promoted by the adoption in Canada of the most advanced systems and methods of industrial training and technical education.

"The Minister further states that the Premiers of the several Provinces of the Dominion have expressed on behalf of the Governments of their respective Provinces, approval of the appointment by

the Federal authorities of a Royal Commission on Industrial Training and Technical Education.

“The Minister recommends that authority be granted for the appointment of a Royal Commission to inquire into the needs and present equipment of the Dominion as respects industrial training and technical education, and into the systems and methods of technical instruction obtaining in other countries; the said Commission to be appointed to vote, No. 477 of the supplementary estimates for the fiscal period ending March 31, 1910, and to consist of the following gentlemen, viz:—

Mr. James W. Robertson, C.M.G., LL.D., of Montreal, Que., Chairman.

Hon. John N. Armstrong, of North Sydney, N.S.

Rev. George Bryce, LL.D., F.R.S.C., of Winnipeg, Man.

Mr. Gaspard DeSerres, of Montreal, Que.

Mr. Gilbert M. Murray, B.A., of Toronto, Ont.

Mr. David Forsyth, M.A., of Berlin, Ont.

Mr. James Simpson, of Toronto, Ont.

“The Minister further recommends that the said Commissioners be instructed and empowered to pursue their investigations at such localities as may appear necessary, in the Dominion of Canada, in the United Kingdom of Great Britain and Ireland, the United States of America, France, Germany, and, subject to the approval of the Minister, elsewhere on the continent of Europe; also that the purpose of the Commission shall be that of gathering information, the information when obtained to be carefully compiled, and together with such recom-

mendations as it may seem expedient to the Commission to make, published in a suitable report to be at the disposal of the Provinces and available for general distribution.

“The Minister further recommends that the Commissioners be appointed under the provisions of the statute respecting inquiries concerning public matters, and report the results of their investigations, together with their recommendations, to the Minister of Labour.

“The Minister further recommends that Mr. Thomas Bengough, of Toronto, be appointed Secretary and Reporter to the said Commission.

“The Committee submit the same for approval.”

Probable Course of Inquiry.

It is expected that the Commission will enter upon its labours early in the month of July. It is understood that it will begin by making a tour of the Dominion from the Atlantic to the Pacific, visiting all important industrial centres and ascertaining by personal inquiry and investigation, as well as by the hearing of evidence, the needs of employers and workmen alike as respects industrial training and technical education. Having completed this part of its work the Commission will then visit the United States, the United Kingdom, Germany, France, and any other countries that may seem necessary, with a view to ascertaining the best methods by which similar needs are being met and the work of technical education furthered in other lands. It is expected that at least a year will be required for this work.

DOMINION LEGISLATION AFFECTING LABOUR, 1910.

DURING the session of the Parliament of Canada which was brought to a close by prorogation on May 4, 1910, (being the second session of the eleventh Parliament of Canada) a large and important body of legislation was added to the statutes of the Dominion. Altogether, 177 Acts received the Royal as-

sent. Among these, the measures for the establishment of a Canadian Naval Service, for the investigation of Combines in restraint of trade, for encouraging the building of drydocks capable of accommodating the largest vessels, making provision for the leasing of lines connecting with the Intercolonial Railway, revising

and amending the Insurance and Currency Acts, and reconstituting the Immigration Act, may be regarded as marking, in their several spheres, new and most important steps in the progress of the country. The appointment of a Commission to inquire into the needs and present equipment of the Dominion as respects industrial training and technical education, was a further result of the session, calculated, as stated in the Speech from the Throne at prorogation, "to prove an important contribution to the work of the Provinces in advancing the industrial development of Canada and the welfare of its working classes."¹ Equally important from the standpoint of trade, were the arrangements concluded between the United States and Canada averting a threatened tariff conflict and opening the way for negotiations which give promise of further improvement in the commercial relations of the two countries, the termination of the long standing tariff dispute with Germany, upon terms favourable to Canada, and the final ratification of the Franco-Canadian convention. Apart also, from the legislation actually passed at the session, several very important measures were introduced and discussed at length.

In previous issues of *The Labour Gazette* reviews have appeared of several of the enactments mentioned above, including all those which had become law prior to May 1, 1910. Other proceedings of importance from the standpoint of industry and labour occurring in the course of the session were reviewed from month to month in *The Gazette*.² The following review is accordingly confined to legislation to which no previous reference has appeared.

The Immigration Act.

A new and very comprehensive measure respecting immigration was passed during the session. The Act consists of eighty-two sections, and repeals the previous legislation on the subject. With the accompanying schedules and regulations it occupies over forty pages of the statutes. The whole has been issued in the form of a pamphlet by the Superintendent of Immigration, Ottawa, in order that magistrates, clerks of municipalities, and the public generally, may be informed of the provisions of the immigration law, and especially of the means for bringing about the deportation of "undesirables". Copies of this pamphlet may be had free of charge on application to the Superintendent of Immigration, Ottawa.

The Act is divided into the following parts: (1) Interpretation; (2) prohibited classes of immigrants; (3) appointments, powers and duties of officers; (4) appointments, powers and procedure of boards of inquiry; (5) special provisions as to passengers by vessel; (6) special provisions as to passengers by land; (7) landing of passengers; (8) medical treatment of sick and disabled passengers; (9) regulations as to monetary and other requirements from specified classes of immigrants; (10) deportation of prohibited or undesirable classes; (11) obligations of transportation companies in cases of rejection or deportation; (12) obligations of masters of vessels and pilots; (13) protection of immigrants; (14) immigration runners; (15) rules, forms and notices; (16) uniforms; (17) prosecutions and procedure; (18) application to Chinese; (19) expenses of administration; and (20) general regulations.

¹See special article on an earlier page of the present issue.

²In the May issue of *The Labour Gazette* extended reviews of the Act providing for the investigation of combines, trusts and mergers, and of the amendments made in the Industrial Disputes Investigation Act, 1907, appeared at pages 1,260 and 1,271, respectively. The report of the special committee of the House of Commons on the Act respecting hours of labour on public works, and on a proposed amendment of the Criminal Code relating to trade unions, were also reviewed (pages 1,280 and 1,282). In the several issues of the *Gazette* appearing while Parliament was in session, reviews were published from month to month of the various bills, motions &c., relating to labour which received the at-

tention of Parliament during the month preceding the date of issue. In these reviews references will be found to proceedings in connection with the discussion of the eight-hour day bill, the Bill respecting co-operation, the Bill respecting co-operative credit societies, the amendment of the Industrial Disputes Investigation Act, the resolution on technical education, the amendment of the Government railways pension fund Act, proposed amendments to the Dominion Elections Act, various amendments of the Railway Act, a resolution to investigate the different systems of proportional representation, &c., &c. See *The Labour Gazette* for December, page 695; January, page 806; February, page 890; March, page 1,039; April, page 1,170; and May, pages 1,280 and 1,282.

The Fisheries' Act.

The Fisheries' Act is amended in several important particulars. The section requiring the holders of fishing licenses not to operate more than one steamer in connection with a factory under license is repealed. The space permitted between salmon nets is reduced, and the section forbidding salmon to be caught at artificial passes of spawning pools repealed. The part of the Act dealing with general prohibitions is amended with reference to the use of devices to prevent the passage of fish, the use of purse seines, the employment of fish guards and the use of fish as manure. The section requiring the management of lobster factories to send a return to the Minister is made more explicit, as is also the section relating to the confiscation of fishing property and fish taken in violation of the Act. The maximum penalty in cases not otherwise provided for is increased from \$100 to \$1,000. The Act also provides for the bringing into force of International fishery regulations.

Bounties.

Bounties on steel and iron made in Canada are abolished by special statute after June 30, 1911, except in the case of rods sold to be manufactured into wire, or used in the making of wire by the makers in their own factories in Canada.

The total amount of bounty payable on lead contained in lead bearing ore mined in Canada is reduced from \$2,500,000 to \$2,450,000.

A grant not exceeding \$5,000 is authorized for investigating processes used in the production of zinc, or for other purposes for the encouragement of the manufacture of zinc and zinc production from Canadian ore.

On crude petroleum a bounty of one and a half cents per Imperial gallon, when produced in Canada, is sanctioned by a special Act, payment to be made "to the owner or occupier of the soil through which it is mined or won, or to such other person interested, or injuriously affected by the mining operations or works, as the Governor-in-Council by regulation approves." In a similar Act of 1908, payment was made "to the producer of the

petroleum, or to such other person interested as the Governor-in-Council by regulation, approves."

Commission on Conservation of Natural Resources.

Hereafter members of the Commission of Conservation are to be allowed their expenses, incurred while attending committee meetings. The publication of special reports is also arranged for. Safeguards are added as to the officials and employes of the Commission.

Legislation Affecting Transportation Interests.

As during several sessions past, transportation interests received a large share of attention, in view of the rapid development of the country and the important part played therein by transportation facilities. Altogether, not less than seventy-six acts were passed directly relating to transportation. A list alphabetically arranged of the various companies, &c., affected thereby is as follows:—

ALBERTA AND BRITISH COLUMBIA RAILWAY.—Amendment Act.

ALBERTA, PEACE RIVER AND EASTERN RAILWAY.—Incorporation.

ALGOMA CENTRAL AND HUDSON BAY RAILWAY.—Extending time for construction.

BAY OF QUINTE RAILWAY.—Authorizing construction of branch line, and extending time for construction.

BRANDON, SASKATCHEWAN AND HUDSON'S BAY RAILWAY.—Extending time for construction.

BUCTOCHE RAILWAY AND TRANSPORTATION COMPANY.—Respecting Company's powers.

BURRARD INLET TUNNEL AND BRIDGE COMPANY.—Defining Company's powers.

CABLES AND TELEGRAPHS.—To control rates and facilities of ocean cables, and to amend Railway Act with respect of telegraphs and jurisdiction of Board of Railway Commissioners in regard thereto.

CALGARY AND FERNIE RAILWAY.—Amending Act of Incorporation.

CALGARY AND EDMONTON RAILWAY.—Amending Act.

CAMPBELLFORD, LAKE ONTARIO AND WESTERN RAILWAY.—Amending Act.

CANADIAN NORTHERN ALBERTA RAILWAY.—Incorporation, and providing aid for construction of railway.

CANADIAN NORTHERN ONTARIO RAILWAY.—Respecting Company's powers.

CANADIAN NORTHERN RAILWAY.—Extending time for constructing certain branch lines; authorizing construction of additional lines, and otherwise amending powers.

CANADIAN PACIFIC RAILWAY COMPANY.—Respecting Company's powers.

CENTRAL ONTARIO RAILWAY COMPANY.—Respecting Company's powers.

COLUMBIA AND WESTERN RAILWAY COMPANY.—Respecting Company's powers.

DOMINION ATLANTIC RAILWAY.—Authorizing construction of branch line.

- DRY DOCKS.—To encourage construction of dry docks.
- ERIE, LONDON AND TILSONBURG RAILWAY.—Extending time for construction.
- ESSEX TERMINAL RAILWAY.—Extending time for construction, &c.
- EASTERN TOWNSHIPS RAILWAY.—Issue for construction extended.
- EDMONTON, DANVEAU AND BRITISH COLUMBIA RAILWAY COMPANY.—Amendment Act.
- EDMONTON AND SLAVE LAKE RAILWAY COMPANY.—Amendment Act.
- ESQUIMAULT AND NANAIMO RAILWAY COMPANY.—Amendment Act.
- GATINEAU AND UNSAVA RAILWAY.—Incorporation.
- GOVERNMENT RAILWAYS.—(1) Authorizing Government to acquire by lease railways connecting with Government railways; (2) Providing for adjudication of small claims arising in respect to the operation of Government Railways; (3) Amending Government Railways' Act by an extension of the proviso in the section defining the liability of the Government for fire from locomotives.
- GRAND TRUNK RAILWAY.—Authorizing acquiring securities of certain other companies.
- GRAND TRUNK PACIFIC BRANCH LINES COMPANY.—Amending Act.
- GUELPH JUNCTION RAILWAY.—Authorizing city of Guelph to acquire interests of stockholders who are alleged to hold shares in trust for the city.
- HAMILTON, WATERLOO AND GUELPH RAILWAY.—Authorizing extension into Toronto, and extending time for construction.
- JAMES BAY AND EASTERN RAILWAY.—Incorporation.
- KAMLOOPS AND YELLOW HEAD PASS RAILWAY COMPANY.—Amending Act.
- KETTLE RIVER VALLEY RAILWAY COMPANY.—Amending Act.
- KINGSTON, SMITHS' FALLS AND OTTAWA RAILWAY.—Extending time for construction.
- MONTREAL, MAWA AND GEORGIAN BAY CANAL COMPANY.—Extending time for construction.
- MONTREAL AND SOUTHERN COUNTIES RAILWAY.—Extending time for construction.
- LONDON AND LAKE ERIE TRANSPORTATION COMPANY.—Incorporation.
- MANITOBA AND NORTHWESTERN RAILWAY COMPANY.—Amending Act.
- MANITOULIN AND NORTH SHORE RAILWAY COMPANY.—Amending Act.
- MONTREAL HARBOUR COMMISSION.—Providing for further advances of \$6,000,000 by Government for improvements and additional facilities.
- MONTREAL, KAPITACHUAN AND RUPERT'S BAY RAILWAY.—Incorporation.
- MORRISBURG FERRY AND DOCK COMPANY.—Incorporation.
- NAVAL SERVICE.—Respecting Canadian naval service.
- NAVIGABLE WATERS PROTECTION ACT.—Amending existing acts.
- NELSON RIVER RAILWAY.—Incorporation.
- NORTHERN EMPIRE RAILWAY.—Extending time for construction.
- NORTHERN QUEBEC COLONIZATION RAILWAY.—Incorporation.
- ONTARIO AND OTTAWA RAILWAY.—Incorporation.
- OTTAWA, BROCKVILLE AND ST. LAWRENCE RAILWAY.—Extending time for construction.
- OTTAWA, MONTREAL AND EASTERN RAILWAY.—Incorporation.
- OTTAWA AND MONTREAL TRANSMISSION COMPANY.—Incorporation.
- OTTAWA, NORTHERN AND WESTERN RAILWAY.—Amending Act.
- OTTAWA, RIDEAU VALLEY AND BROCKVILLE RAILWAY.—Incorporation.
- PACIFIC AND ATLANTIC RAILWAY.—Amending Act.
- PINE PASS RAILWAY.—Incorporation.
- PRINCE ALBERT AND HUDSON BAY RAILWAY.—Authorizing extension of time for construction, and extension of line.
- RAILWAY ACT.—Amending provisions.
- RAINY RIVER RADIAL RAILWAY.—Incorporation.
- RICHELIEU AND ONTARIO NAVIGATION COMPANY.—Amending the Company's acts.
- SASKATCHEWAN CENTRAL RAILWAY.—Incorporation.
- ST. JOHN.—Authorizing erection of wharves and buildings in St. John, N.B., harbour.
- ST. LAWRENCE POWER TRANSMISSION COMPANY.—Incorporation.
- ST. MAURICE VALLEY RAILWAY.—Time for construction extended.
- ST. CLAIR AND ERIE SHIP CANAL COMPANY.—Act amended.
- TELEGRAPHS' ACT.—(1) Amending Telegraphs' Act; (2) Correcting error in same.
- TORONTO EASTERN RAILWAY.—Incorporation.
- VANCOUVER ISLAND AND EASTERN RAILWAY.—Extending time for construction.
- VANCOUVER AND COAST KOOTENAY RAILWAY.—Amending Act.
- VANCOUVER, WESTMINSTER AND YUKON RAILWAY.—Amending Act.
- VANCOUVER, VICTORIA AND EASTERN RAILWAY AND NAVIGATION COMPANY.—Extending time for construction.
- WATER CARRIAGE OF GOODS.—Act respecting.
- WALKERTON AND LUCKNOW RAILWAY.—Time for construction extended.
- WEST ONTARIO PACIFIC RAILWAY.—Amending Act.

Railway Subsidies.

In addition to the above, an Act was passed granting subsidies in aid of certain railways at the rate of \$3,200 a mile when the cost does not exceed \$15,000 a mile, and increasing to \$6,400 in proportion as the cost of construction increases. It is provided that all the lines for the construction of which subsidies are voted, unless already commenced, shall be begun within two years from August 1, 1910, and completed within a reasonable time, and to exceed four years from August 1. Other railways than the one securing the subsidy, may secure running powers over the lines to be constructed, upon terms and conditions laid down by the Board of Railway Commissioners. In any contract entered into, the Government may make it a condition that the line to be built shall be laid with new steel rails, made in Canada, and that the construction material, rolling stock and other equipment shall, as far as possible be of Canadian manufacture, and that fair wages to labour shall be paid. The cost of the line includes all bridges not exceeding \$25,000, but does not include right-of-way in cities, cost of terminals, or rolling stock. The subsidies granted are revotes of those granted in 1906 and 1908, which have not been earned, or in re-

spect to which contracts have not been entered into between the Government and a company. In some instances, however, there has been a change in one or other of the terminal points, and in others there is a difference in the mileage, as compared with the votes of 1908. Following is a list of the lines to be aided arranged according to Provinces:—

Nova Scotia.

DOMINION ATLANTIC RAILWAY.—To Government pier or wharf at Canning, one mile; from Brazil Lake, to Kentville, eleven miles; from Centreville to Weston, fifteen miles.

HALIFAX AND SOUTH WESTERN RAILWAY.—Lunenburg to Bridgewater, *via* Upper La Have, twelve miles.

INVERNESS RAILWAY AND COAL COMPANY.—From Broad Cove to Cheticamp, thirty-seven miles.

MARGAREE COAL AND RAILWAY COMPANY.—From Orangedale to Chimney Corner Cove, forty-six miles, and from Orangedale to Caribou Cove, four miles.

DARTMOUTH TO DEAN'S SETTLEMENT.—Not exceeding eighty miles.

DEAN'S SETTLEMENT TO MELROSE.—Not exceeding fifty-two miles.

MELROSE, ETC.—From New Glasgow to Melrose, Melrose to Guysborough, and a branch to Country Harbour, not exceeding 116 miles.

TUSKET WEDGE TO RIVERDALE.—Not exceeding eight miles.

New Brunswick.

INTERNATIONAL RAILWAY OF NEW BRUNSWICK.—To cover difference in mileage between Campbellton and St. Leonard's as subsidized in 1908, and as actually constructed, three and five-tenths miles.

YORK AND CARLETON RAILWAY.—From present terminus to National Transcontinental Railway, nine miles.

CONNORS TO BEAU LAKE.—Not exceeding eighteen miles.

GRAND FALL TO ST. JOHN.—Not exceeding 228 miles.

PLASTER ROCK TO RILEY'S BROOK.—Not exceeding twenty-eight miles.

Quebec.

ATLANTIC, QUEBEC AND WESTERN RAILWAY.—From Paspebiac to Gaspé, along the shore, not exceeding 102 miles.

CANADIAN NORTHERN QUEBEC RAILWAY.—From Arundel to Preston-Hartwell township, not exceeding thirty miles, and from Montreal to Hawkesbury, Ont., not exceeding sixty-five miles.

EASTERN TOWNSHIPS RAILWAY.—From St. Leonard's Junction, on the Intercolonial Railway to Dudswell, thirty-six miles.

HA HA BAY RAILWAY.—From Jonquieres to Baie des Ha Ha, not exceeding twenty-four miles.

L'AVENIR AND MELBOURNE RAILWAY.—From Melbourne to Drummondville, not exceeding twenty-eight miles.

LITTLE NATION RAILWAY.—From Papineauville towards Nominique, not exceeding thirty miles.

LOTBINIERE AND MEGANTIC RAILWAY.—From Lyster to Dudswell, fifty miles, and from Inverness township to the Quebec Bridge, thirty miles.

QUEBEC AND LAKE ST. JOHN RAILWAY.—From Valcartier station to St. Catherine, not exceeding three and eight-tenths miles; from Valcartier station towards Gosford, five and five-tenths miles; from the end of the thirty-fifth mile of the branch to La Tuque on the St. Maurice

river, to La Tuque Falls, five miles; from La Tuque Falls to the mouth of the River Croche, five miles; from the La Tuque branch to the steamboat landing near La Tuque not exceeding one and six-tenths miles; from Chicoutimi, south or southeast, not exceeding five miles; from Herbertville to St. Joseph d'Alma, not exceeding ten miles.

QUEBEC AND NEW BRUNSWICK RAILWAY.—From Chaudiere Junction to the international boundary between Quebec and Maine, not exceeding sixty-two miles.

JOLIETTE TO LAKE MANUAN.—Not exceeding 160 miles.

MONTREAL NORTHERLY.—From Montreal to the National Transcontinental Railway, not exceeding 200 miles.

ROBERVAL TOWARDS JAMES BAY.—Not exceeding 100 miles.

ST. JOACHIM TOWARDS SEVEN ISLANDS.—Not exceeding 170 miles, including branches to Murray Bay and Bari St. Paul.

STE. AGATHE DES MONTS TO HOWARD TOWNSHIP.—Not exceeding fifteen miles.

Ontario.

ALGOMA CENTRAL AND HUDSON BAY RAILWAY.—From Sault Ste. Marie to White River or Dalton, 200 miles; from Michipicoten Harbour towards Canadian Pacific Railway, not exceeding twenty-five miles; from White River or Dalton towards the National Transcontinental Railway, fifty miles.

BRACEBRIDGE AND TRADING LAKE RAILWAY.—For a line from Bracebridge to a point near Baysville, not exceeding sixteen miles.

ERIE, LONDON AND TILSONBURG RAILWAY.—From Port Burwell to London, not exceeding thirty-five miles.

KINGSTON, SMITH'S FALLS AND OTTAWA RAILWAY.—From Kingston to Ottawa, not exceeding 101 miles.

LAC SEUL, RAT PORTAGE AND KEEWATIN RAILWAY.—From Kenora to the National Transcontinental Railway, not exceeding twenty-two miles.

MANITOULIN AND NORTH SHORE RAILWAY.—For lines from the Manitoulin and North Shore Railway, between Little Current and Sudbury, westerly towards the Algoma Central and Hudson Bay Railway, not exceeding seventy-six miles; from Little Current, thence crossing the Canadian Pacific Railway near Stanley, thence to Sudbury, not exceeding eighty-eight miles; from Sudbury, northerly, not exceeding thirty miles.

NIPIGON RAILWAY.—From near Nipigon station on Canadian Pacific Railway, to Nipigon Lake, not exceeding thirty miles; from Nipigon Bay to the west side of Lake Helen, on line of Nipigon Railway, not exceeding three and one-half miles; from the Nipigon Railway, near crossing of Fraser river to Lake Jesse, by Cameron Falls, not exceeding one and one-half miles; from north shore of Lake Nipigon, northerly, not exceeding forty-five miles.

ONTARIO, NORTHERN AND TEMAGAMI RAILWAY.—From Sturgeon Falls, northwesterly, to the westerly shore of Lake Temagami, not exceeding fifty miles.

ST. MARY'S AND WESTERN ONTARIO RAILWAY.—From Embro to Exeter, not exceeding thirty-six miles.

TORONTO, LINDSAY AND PEMBOKE RAILWAY.—From Golden Lake to Bancroft, not exceeding fifty-one miles.

SHARBOT LAKE TO CARLETON PLACE.—From Sharbot Lake or Bathurst, *via* Lanark, to Carleton Place, not exceeding forty-one miles.

Alberta.

PACIFIC NORTHERN AND OMINECA RAILWAY.—From Edmonton to or towards Peace river, not exceeding 110 miles.

SOUTHERN CENTRAL PACIFIC RAILWAY.—From two miles west of Pincher northwesterly for ten miles, and southwesterly for forty miles.

British Columbia.

ESQUIMALT AND NANAIMO RAILWAY.—From near Duncans to Cowichan Lake, not exceeding twenty-four miles.

KETTLE RIVER VALLEY RAILWAY.—From Midway to Merritt, not exceeding 250 miles, and from Coldwater river to the Fraser river, not exceeding fifty miles.

KOOTENAY CENTRAL RAILWAY.—From Golden, *via* Windermere, Fort Steele and Ellis, towards the international boundary, not exceeding 186 miles.

The total mileage for which the Act provided subsidies was 3,277.4. At a subsidy of \$3,200 a mile this would call for \$10,487,680.

The sum of \$500,000 was voted upon construction account for a railway to Hudson Bay. The Minister of Railways, in explaining the vote, said the work as proposed will start at Le Pas. It is proposed to utilize this vote, or a portion of it, immediately, to ask for tenders for the erection of a bridge across the river at that point. It is undecided what will be the terminus of the line, but whether it be at Nelson or Churchill, the route for the first 160 miles will be the same. The votes passed for the Marine Department provide for sending a steamer to Hudson Bay by the straits for the purpose of gaining more information with regard to the two ports.

Miscellaneous.

A Pension Fund for employés of the Merchants' Bank was incorporated.

Two acts amending the Government Annuities' Act in matters of detail became law.

SASKATCHEWAN LEGISLATION AFFECTING LABOUR.

AT the recent session of the Legislative Assembly of the Province of Saskatchewan, the most important single act passed from the standpoint of labour was the "Act for the Protection of Persons employed in Factories." Other important legislation of the session was, a "Public Health Act," an Act "respecting Public Works;" and amendments to the "Steam Boilers' Act" and to the "Children's Protection Act." A brief review of this legislation follows:—

The Factories' Act.

The Saskatchewan Factories Act is a comprehensive measure based, in the

The Meat and Canned Foods Act of 1907, is amended in a number of details, as is also the Militia Pensions' Act of 1906.

The Exchequer Court is by special statute given exclusive original jurisdiction as to claims for death, injury or loss on Government railways.

A "Destructive Insect and Pest Act" was passed empowering the Governor-in-Council to make regulations to prevent the introduction into Canada or the spreading therein of insect pests destructive to vegetation. The Act provides for the appointment of inspectors, and repeals the San José Scale Act.

The Civil Service Act is amended in the sections governing transfers from the outside to the inside service, and to provide higher rates of remuneration to employés of the Inland Revenue Department in the outside service and to Post Office inspectors, assistant post office inspectors, and superintendents of the Railway Mail Service.

The following is added to the Criminal Code with respect to injuries due to motor vehicles:

Whenever, owing to the presence of a motor car on the highway, an accident has occurred to any person or to any horse or vehicle in charge of any person, any person driving the motor car shall be liable on summary conviction to a fine not exceeding fifty dollars and costs or to imprisonment for a term not exceeding thirty days if he fails to stop his car and, with intent to escape liability either civil or criminal, drives on without tendering assistance and giving his name and address."

main, on similar legislation existing in Ontario, Quebec, British Columbia and other Provinces. It forbids the employment of children under the age of fourteen in factories, and the employment of youths between the age of fourteen and sixteen and of young girls between the age of fourteen and eighteen in dangerous and unwholesome establishments, a list of which is given in a schedule. Hours of labour for women, young girls and youths, are limited to eight in any one day, and to forty-five in any one week. The usual exemptions are granted to these provisions. The Act also contains extensive provisions for

the ensuring of the safety of employé's, sanitary conditions, the prevention of fire, etc. One or more inspectors, male or female, are to be appointed, the powers and duties of these officers being defined in full. The Act has an extended section devoted to offences and penalties. An annual report of the working of the Act must be laid before the Legislative Assembly within twenty-one days after the commencement of each session.¹

Government Annuities.

The property and interest of an annuitant or of any person interested in or entitled to an annuity under the Dominion Government Annuities' Act of 1908, and its amendments, is to be exempt from seizure or attachment under the process of any court of Saskatchewan, nor is it to be affected by any trust, charge or lien.²

Bartenders' Licenses.

By an amendment to the "Liquor License Act" a bartender is required to take out a license before accepting employment in his calling under a penalty on the part of the employer of not less than \$2 and not more than \$10 for each day during which the offence is continued, or in default of payment to imprisonment for a period not exceeding one month. Licenses are to be issued only to persons of the full age of twenty-one years and of good character. No license may be issued to a female. A licensed bartender who violates the liquor law is liable to a penalty not exceeding \$50. Provision is made for the temporary employment of unlicensed persons as bartenders.³

Miscellaneous.

An "Act respecting Land Surveyors" was passed.⁴

The "Steam Boilers' Act" is amended by the addition of a subsection relating to fees for examinations.⁵

The "Public Health Act" of the session is a comprehensive measure, based on similar legislation in Ontario and other Provinces.⁶

An "Act respecting Agricultural Societies" is framed for the encouragement of "improvements in agriculture, horticulture, arboriculture, manufactures and the useful arts."⁷

A number of amendments in the details of the "Children's Protection Act" were carried. More stringent provision is made against interference with children under the protection of a Children's Aid Society.⁸

Acts authorizing the guarantee of certain securities of the Canadian Northern Railways and the Grand Trunk Pacific Branch Lines Companies were passed.⁹

LABOUR EDUCATION ASSOCIATION OF ONTARIO—EIGHTH ANNUAL CONVENTION.

THE eighth annual convention of the Labour Education Association of Ontario, convened at Brantford, Ont., on May 24, with seventy-eight delegates in attendance. The report of the Executive dealt with improvements in the Industrial Banner, the official organ of the Association.

Resolutions were passed by the convention as follows:

1. Condemning the present system of ward voting, by which a person may vote in every ward where he is a property holder, and advocating the principle of "one man one vote."

2. Recommending Adult Suffrage without property qualification in municipal elections.

3. Advocating equal rights in the use of the mails to all newspapers, the Secretary being instructed to write to the Postmaster General in regard to an alleged discrimination against "Cotton's Weekly."

It was decided not to affiliate with the American Federation of Labour at present.

¹Saskatchewan, statute 1909, chapter 10.

²Saskatchewan, statute 1909, chapter 36.

³Saskatchewan, statute 1909, chapter 38, section 21.

⁴Saskatchewan, statute 1909, chapter 13.

⁵Saskatchewan, statute 1909, chapter 35, section 11.

⁶Saskatchewan, statute 1909, chapter 8.

⁷Saskatchewan, statute 1909, chapter 31.

⁸Saskatchewan, statute 1909, chapter 17.

⁹Saskatchewan, statute 1909, chapters 4 and 5.

The next convention will be held in Guelph, on May 24, 1911.

Officers were elected as follows:— President, O. H. Zimmer, Berlin; First vice-president, J. Driscoll, Kingston; second vice-president, H. B. Archer,

London; third vice-president, C. Anderson, Hamilton; fourth vice-president, E. Thomson, Toronto; fifth vice-president, Miss Lewis, Hamilton; secretary-treasurer, J. C. Coles, Brantford; editor, J. Marks, London.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, &c., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

British Emigration Returns.

DURING the month ended April 30, 1910, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING APRIL, 1910.

Nationality.	1910	1909
English.....	15,464	8,477
Welsh.....	379	102
Scotch.....	6,494	2,086
Irish.....	1,043	698
British Colonial.....	348	112
Total British subjects.....	23,728	11,475
Foreign.....	4,556	3,394
Total.....	28,284	14,869

During the four months ending April 30, 1910, the number of passengers leaving the United Kingdom, as above, was:

EMIGRATION FROM GREAT BRITAIN DURING JANUARY, FEBRUARY, MARCH AND APRIL, 1910-1909.

Nationality.	1910	1909
English.....	31,660	18,362
Welsh.....	837	171
Scotch.....	11,653	4,389
Irish.....	1,998	1,133
British Colonial.....	935	333
Total British subjects.....	47,083	24,388
Foreign.....	11,065	7,921
Total.....	58,148	32,309

Homestead Entries.

The following statement shows the number of homestead entries made during the month of April, 1910, as compared with April, 1909:—

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF APRIL, 1910, AS COMPARED WITH APRIL, 1909.

Agency.	MANITOBA.		SASKATCHEWAN.		ALBERTA.		BRITISH COLUMBIA	
	1910	1909	1910	1909	1910	1909	1910	1909
Battleford.....			306	439				
Brandon.....	10	22						
Calgary.....					1,219	639		
Dauphin.....	116	103						
Edmonton.....					506	656		
Estevan.....			131	54				
Humboldt.....			242	229				
Kamloops.....							22	42
Lethbridge.....					129	386		
Moose Jaw.....			815	1,278				
Medicine Hat.....			402		512			
New Westminster.....							3	2
Peace River.....					5			
Prince Albert.....			287	176				
Regina.....			34	73				
Red Deer.....					249	253		
Saskatoon.....			743					
Swift Current.....			1,172					
Winnipeg.....	198	106						
Yorkton.....			108	146				
Total.....	324	231	4,240	2,395	2,620	1,934	25	44

It will be seen that there has been a net increase for April, 1910, of 2,605 in the number of entries made.

A statement of the entries made during the first four months of the calendar year 1910, compared with the corresponding months of 1909, is as follows:—

ENTRIES DURING JANUARY, FEBRUARY, MARCH AND APRIL, 1910-1909.

Month.	MANITOBA.		SASKATCHEWAN.		ALBERTA.		BRITISH COLUMBIA.	
	1910	1909	1910	1909	1910	1909	1910	1909
January.....	152	125	976	605	1,558	566	12	12

In April, 1909, the number of patents issued was 2,292 covering an area of 441,667.94 acres, showing a decrease for the month of April, 1910, of 127 in the number of patents issued, but an increase of 156,896.33 acres in the area patented.

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF MAY, 1910.

The following is a list of contracts awarded by the Department of Railways and Canals, which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Railways and Canals.

DEMOLITION OF APPROACH SPANS, QUEBEC BRIDGE.

Taking down of approach spans to the Quebec bridge, etc. Date of contract, May 11, 1910. Amount of contract, \$22,750. Contractors, "The Phoenix Bridge Company."

RATE OF WAGES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if, there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim, therefore, is filed in the office of the Minister of Railways and Canals, and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

CONSTRUCTION, SECTION 6, TRENT CANAL.

Construction of section No. 6, Ontario-Rice Lake Division of the Trent canal. Date of contract, May 23, 1910. Amount of contract, schedule rates. Contractors, "Haney, Quinlan & Robertson, Montreal, Que.

FAIR WAGES SCHEDULES PREPARED DURING THE MONTH OF MAY, 1910.

DURING the month of May the Department of Labour prepared at the request of the Departments concerned, Fair Wages Schedules for insertion in contracts for various public works, as follows:—

Construction of a lumber shed at Moncton, N.B., on the Intercolonial Railway.

Construction, under subsidy, of railway bridges over the Nicolet river, the Gentilly river and Becancourt river.

Dredging the Cornwall canal.

Construction and erection of a foot bridge over the tail race of Weir No. 3 of the Soulanges canal.

Widening the deep channel along the West Pier, and the construction of docking west of Government elevator, at Port Colborne, on the Welland canal.

Construction of a line of railway from point at or near Grand Forks to a point fifty miles up the North Fork and East or West Fork of the North Fork of Kettle river.

Construction of a pile and cribwork breakwater at Dalhousie, N.B.

Construction of a cribwork extension to breakwater at Tennecape, N.S.

Construction of a cribwork wharf at Barrington's Cove, Sydney Mines, Cape Breton, N.S.

Reconstruction and enlargement of the wharf at Rustico, P.E.I.

Construction of examining warehouse at Vancouver, B.C.

Construction of public building at Arthabaska, Que.

Construction of public building at Megantic, Que.

Construction of public building at Moncton, N.B.

Construction of public building at Souris, Man.

Construction of crib and span work wharf at Aylmer, Que.

Rifle Range at Farnham, Que.

Construction of stables on Sussex Camp Grounds, N.B.

ORGANIZATION OF CIVIC FEDERATION COMPLETED AT LONDON, ONT.

THE final steps in the organization of a Civic Federation were taken at London, Ont., during May, when officers were elected as follows:—

President, Geo. C. Gibbons, K.C.; Vice-Presidents, Rev. J. G. Inkster, F. G. Rumball and Jos. T. Marks; Secretary, H. B. Archer; Treasurer, A. E. Miller. Committees were appointed as follows:—Executive, Industrial Conciliation, Trades Agreement, Industrial Economics, Membership.

The constitution of the Federation is as follows:—

Purpose.—The purpose of the London Civic Federation shall be to organize the best intelligence of the city in an educational movement towards the solution of some of the problems relating to social and industrial progress, to provide for the study and discussion of such problems, to aid others in crystallizing the most enlightened public opinions, and, when desirable, to provide legislation to that end.

Membership.—The membership shall be drawn from men of practical affairs, whose acknowledged leadership in thought or action fit them for such work as shall come under consideration by the Federation.

Executive.—The Executive Committee shall be composed of men representing the general public, employers and employés.

Officers.—The officers shall consist of a President, a Secretary, a Treasurer, and a Chairman of each of the following departments: Industrial conciliation, in-

dustrial economics, trades agreement, six committee men, who shall form the Executive Committee.

Meetings.—The Federation shall hold monthly meetings, except during July and August, and nine members shall form a quorum.

Fees.—Every member shall pay an annual fee of one dollar, which shall entitle him to a vote at each meeting. Further, an annual subscription of \$50 shall be asked from the City Council and the Board of Trade. The Trades and Labour Council shall be asked for an annual grant of \$10, and such other organizations as may be interested in the work of the Federation, for which they shall be entitled to a representative on the Executive Committee.

Functions of Departments.—The industrial conciliation department shall deal with strikes, lockouts, and shall endeavour to prevent rupture, and the membership shall consist of an equal number of employers and employés.

The industrial economics department shall discuss practical problems in economics, and the members shall be composed of editors, ministers, etc.

The trades agreement department shall deal with hours, wages and conditions of labour, the members to be an equal number of employers and employés.

It shall be the purpose of the Federation to deal with any matter included in the above departments which may be referred to it, and the result of its deliberations shall be taken as the expressed opinion of the Federation.

RECENT INDUSTRIAL AGREEMENT.

WHEREAS the benefits to be derived from an industrial contract depend altogether upon the fidelity with which it is carried into effect.

And whereas it is our earnest and sincere desire that any agreement made and executed by and between the representatives of the Miners of Frank Local

No. 1263, District No. 18, and the representatives of the Canadian Coal Consolidated, Limited, be observed and carried out in its entirety, and that all controversies arising under this agreement shall be agreeably and definitely settled.

It is, therefore, mutually understood and agreed that the following conditions

and rates shall govern the parties hereto for a period ending March 31, 1911, and that the parties hereto will meet in conference thirty (30) days prior to the expiration of this agreement to discuss a renewal thereof.

Management of mine.—The right to hire and discharge, the management of the mine, and the direction of the working forces, are vested exclusively in the Company, and the United Mine Workers of America shall not abridge this right.

Settlement of local and general disputes.—(a) In case any disputes or grievances arise under this agreement or any local agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the Company, or any person or persons employed or by the men as a whole, then the parties shall endeavour to settle the matter as hereinafter provided. But before any grievance or dispute shall be submitted to the Pit Committee, the person or persons affected shall endeavour by personal application to the Pit Boss, Overman or Foreman in charge of the work where the dispute arises, to settle the matter and in the event of them agreeing their decision shall be final.

(b) In case of any local dispute arising in any mine, and failure to agree between the Pit Boss, Overman or Foreman in charge of the work where the dispute arises and any employé, the Pit Committee and Mine Superintendent or Mine Manager shall endeavour to settle the matter, and if they agree their decision shall be final.

(c) In the event of the failure of the Pit Committee and the Mine Superintendent or Mine Manager to settle any dispute so referred to them, as well as in the event of other disputes arising, the matter in dispute shall be referred to the General Manager of the Company and the Officers of the District No. 18, United Mine Workers of America, for settlement, and if they agree their decision shall be final and binding upon both parties.

(d) In the meantime, and in all cases while disputes are being investigated

and settled, the miners, mine labourers, and all other parties involved, must continue to work, pending investigation, and until final decision has been reached; but when miner, miners, mine labourer, mine labourers has or have been discharged by the Company he or they shall not remain in the employment of the Company while his or their case is being investigated and settled.

If a claim is made within five (5) days where a man or men has or have been unjustly discharged, the case shall be dealt with according to this article; and if it is proven that he or they has or have been unjustly dealt with, he or they shall be reinstated. If a claim is made for compensation for time lost in cases where reinstatement has followed, it shall be left to the management of the Company and the Officers of District No. 18, United Mine Workers of America, to decide what amount, if any, is to be paid.

(e) Any breach of this agreement, by any of the parties hereto, is not to void the said agreement, but the same is to be continued in full force and effect. It is not intended, however, by this subsection to abridge the right of the men to suspend work after the final settlement as herein provided, if the Company refuse to be bound by any decision given against them under this article, subject always to the provisions of the Dominion Statutes.

Duties of Pit Committee.—The Pit Committee shall be a committee of three in each mine or other plant covered by this agreement, selected by the employés working at such mine or other plant from among their own number, except one member may be a checkweighman or an officer of the local union, not necessarily an employé of the Company. This member must previously have been selected as checkweighman or officer from amongst the employés of the aforesaid colliery or other plant; due notice of such selection properly certified shall be given to the Company.

The duties of the Pit Committee shall be confined to the settlement of disputes between the Pit Boss or Foreman, and any employé working in and

around the mines arising out of this agreement and all agreements made in connection therewith, the Pit Boss or Foreman and man or men having failed to agree the Pit Committee in discharge of its duties, shall under no circumstances go around the mine for any cause whatever, unless called upon by the Pit Boss or Foreman, or by a miner or dayman, who may have a grievance which he has first tried to and cannot settle with the Boss.

Members of the Pit Committee employed as daymen shall not leave their places of duty during working hours, except by permission of the Pit Boss or Foreman, or in cases involving the stoppage of the mine.

New work.—Wherever any new work arises a price for which has not been provided for in this agreement, on the request of the Company or the miners, the members of District Board No. 18, United Mine Workers of America, and the General Manager of the Company shall meet within thirty (30) days after the said request and arrange a price. Meantime, and until such prices have been arranged, all men shall be paid upon the day wage scale.

Employés not under jurisdiction.—The following employés are not under the jurisdiction of the United Mine Workers of America:—

Mine Manager or Superintendent, Overman or Assistant Overman, Pit Bosses, Fire Bosses, Boss Drivers, Stable Boss, Master Mechanic, Electricians, Weighmen, Head Carpenter, Tipple Foreman, Leader Boss, Night Watchman, Coke Oven Foreman, Outside Foreman and all other Foremen, Timekeepers, Coal Inspectors and Head Lampmen.

Construction and extensive repairs.—It is agreed that all men working on improvements and extensive repairs are not included in the jurisdiction of the United Mine Workers of America.

The erection of head frames, tipples, washers, buildings, coke ovens, scales, machinery, railroad tracks, switches, etc., necessary for the completion of a plant, all being in the nature of construction work and extensive repairs or rebuild-

ing of the same class of work, are to be considered as improvements and extensive repairs, and the employés thereon are to be excluded as above when employed on such work only.

Check off.—The Company will give to the United Mine Workers of America full recognition and concede the check-off system that is to say upon the individual request in writing of any of the Company's employés the Company shall deduct such monies from their wages each month as are designated for dues, assessments, fines and initiation fees. In other words the Company will retain from the wages due employés any sum that they may have given orders upon the Company for in writing, payable to such officers of the United Mine Workers of America as may be designated in such orders. The Company timekeeper will furnish the local secretary a weekly list of all new employés.

Penalty for absence from work.—When any employé absents himself from his work for a period of two days, unless through sickness, or by first having properly arranged with the Pit Boss or Foreman and obtained his consent he may be discharged. All employés whose absence would cause any stoppage of work must before absents themselves properly arrange with or notify the Pit Boss or Foreman for or of their absence, otherwise they may be discharged. Any employé who habitually, to the extent of five days per month, absents himself from work may be discharged.

Preference of employment.—In case an employé is thrown out of employment, unless discharged he shall be given preference over new men in other mines in the same camp operated by the same Company.

Special work.—The Company shall not take contract miners from their places to do Company work unless an emergency exists where it is necessary to do work for the safety of the mine or if the contract miners are out of their working places by reason of some special work to be done to get coal away from them, and they are given employment in such work, the miner is to receive \$3 per day.

Any miner called upon to do dangerous work will be paid a higher rate, according to present practice \$3.50.

Minimum rate.—When a miner's working place becomes deficient owing to any abnormal conditions preventing him from earning the minimum wage of \$3 per shift, and should the Company desire to continue working the said place or places, the mine management and Pit Committee shall examine said place or places and agree upon a rate to be paid the miner for such deficient work. Failing to agree upon such rate, the place if worked shall be worked upon the day wage scale for miners.

Delivery of timber.—In accordance with the Coal Mines Regulations Act of Alberta, the Company shall at all times deliver an adequate supply of suitable timber, rails, ties, planks and sheet iron and clay for tamping at the nearest crosscut to the face of all raise workings and in places where the regular pit cars go to the working face without being handled by the miner, they shall be delivered on the cars to the working face; in other places across the pitch, the timber, rails, ties, planks and sheet iron and clay for tamping shall be delivered at the mouth of the room.

Loading of coal from chutes.—In pitching seams where chutes are used, the Company will handle all coal places in chutes by the miners.

Doctor and Hospital arrangements.—The matter of Doctor and Hospital arrangement is to be arranged between the employés and the management, and when so arranged the Company agrees to make the collection for that purpose.

Holidays.—The following days only shall be observed as holidays:—New Years' Day, May 1, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, District International Election Day, Christmas Day.

Funerals.—In the event of an instantaneous death by an accident in the mine, or outside the mine, the miners underground and all other employés except in the seam where the accident occurred, shall continue to work till the day of the funeral when it is optional with them whether they shall work or not.

Employés to care for mine.—In case of either local or general suspension of mining, either at the expiration of this agreement or otherwise, the engineers, firemen and pumpmen shall not suspend work, but shall when mining is suspended fully protect all the Company's property under their care, and operate fans and pumps and lower and hoist such men and supplies as may be required to protect the Company's property and any and all coal required to keep up steam at the Company's plant, but it is understood and agreed that the Company will not ask them to hoist any coal for sale on the market.

Single shift.—The single shift system in rooms and pillars shall be adhered to as far as possible.

Wet places.—A working place in the mine where water drips from the roof in quantity sufficient to drip a man's clothing, or where standing water is sufficient to wet a man's clothing above his knees shall be considered a "wet place;" a place where the use of gum boots will keep a man's feet dry shall not be considered a "wet place."

Rock miners.—When a man is continuously engaged on rock work, where hammer and steel are used, he shall be considered a rock miner, and paid rock miner's wages.

If an air drill is used, the drillers shall be paid machine runners' wages, and the helper paid machine runner's helpers' wages, the other men engaged shall be classed as miners or labourers as the case may be.

When a man is engaged on work in both rock and coal, if the amount of rock is greater than the amount of coal he shall be classed a rock miner, and where the amount of coal is greater than the amount of rock, he shall be classed as a coal miner.

Brushing.—When a man is engaged on continuous brushing, either top or bottom using the usual drills and tools, he shall be classed as a coal miner; if the brushing is done by hammer and steel he shall be classed as a rock miner. Timbermen taking out rock while engaged in retimbering or repairing shall not be classed as rock miners.

Retirement.—Where any employé has drawn his time before the regular pay day he thereby severs his connection with the Company, and any alleged grievance he may have ceases to be a question for consideration under this agreement.

Oil.—Present conditions to prevail.

Pay day.—The Company will pay the regular pay rolls at the several mines for all wages earned during the previous calendar month, on the fifteenth of each month, if the said fifteenth be a Saturday, and if not on the first Saturday after the fifteenth, except in case of the fifteenth falling on a Sunday, when the Company will pay on the fourteenth.

Any employé desiring to leave the service of the Company, shall on his request be paid all monies due him within two days after his stoppage of work.

Market restrictions.—It is agreed that District No. 18 of the United Mine Workers of America will not in any way restrict or interfere with the marketing of coke or coal to any person, firm or corporation.

Penalty for stoppage of work.—If any employé or employés shall cause a stoppage of work in violation of this agreement, he or they shall be subjected to discharge by the Company without recourse.

Definition of schedule of rates.—The schedule of rates under this agreement are to be the minimum rates paid, but nothing in this agreement shall be construed to prevent the Companies from paying higher rates should they so desire.

It is also understood that where higher rates have prevailed no reduction shall take place.

Wage Scale for Inside Workmen.

	Per day.	Hours.

All other wages not provided by contract to be paid going wages.

Yardage Prices to be Paid as Follows:

Main gangways, main entry shall be driven ten feet wide by seven feet high in the clear inside the timber and be securely timbered with sets not exceeding five feet centres, ditch to be carried on one side to be paid for at the rate of eleven (\$11) dollars per yard, lineal, to include also the laying of ties and short length rails.

Counter gangways shall be driven six feet by six feet, timbered with sets four pieces, five feet centres to be paid for at a rate of six (\$6) dollars per lineal yard.

Horizontal crosscuts between raises and rooms will be six feet by six feet without timber, to be paid for at four (\$4) dollars per lineal yard for the first five yards, then an additional price of fifty cents per yard for the next six yards, then an additional price of fifty cents per yard for the next five yards making a total distance of forty-eight feet that the contract price covers.

Crosscuts or angles will be driven four feet by four feet untimbered and to be paid for at the rate of two (\$2) dollars per lineal yard.

Breasts, nine feet by ten feet square including timber and chute building.

Timber, two props with cap pieces three and a half feet from each rib and eight feet centres up the pitch. Chute,

sides two planks high on each row of props, bottom two planks and sheet iron to be paid at the rate of five dollars and fifty cents (\$5.50) per lineal yard.

Narrow work, six feet by six feet up the pitch untimbered to be paid for at the rate of four (\$4) dollars per lineal yard.

Six feet by six feet timbered up the pitch with sets at five foot centres to be paid at the rate of six (\$6) dollars per lineal yard, or timbered with one prop at five foot centres and to include sheet iron.

All extra props set by the contractors to be paid for at the rate of five cents per lineal foot; by extra timber is meant all timber set by the contractors in excess of the number specified in the schedule for that particular class of work in which he is engaged.

Pillars, all pillars which cannot be measured to be paid for at the rate of \$4 per day including timber and all pillars that can be measured to be paid for at the rate of fifty cents per cubic yard including props at nine feet centres.

Laying of sheet-iron to be paid for at the rate of five cents per lineal foot.

Supplies, etc.

The Company will deliver coal to their employés residing at Frank, at the following prices: mine run, \$2.50 per ton; screened (when possible) \$3 per ton; forty per cent. dynamite @ \$11.50 per case; monobel @ \$13.50 per case, caps and fuse to remain as at present.

Washhouse, all mine employés who use the washhouse will be charged \$1 per month for the use of same.

Company men and contract miners to furnish their own tools which the Company agrees to take back when they leave the service provided tools are in good condition.

Crib chute, nine feet by six feet including partition and lining. Ladders and timber chutes to be built by the Company.

A plentiful supply of timber to be kept as near the face as possible, to be paid at the rate of nine (\$9) dollars per lineal yard.

Company houses, three roomed Company houses, including one sixteen candle power lamp in each room will be rented to employés at the rate of nine (\$9) dollars per month.

Four roomed Company houses, including one sixteen candle power lamp in each room, will be rented to employés at the rate of eleven (\$11.50) dollars and fifty cents per month, the light service in all cases to depend on the Company's electric light plant. The water rate for each house to be one (\$1) dollar per month for outside tap. A charge of fifty cents per month to be made for each house for sanitary purposes. The Company agrees to furnish Calcimine, plaster, etc., for cleaning the houses once each year.

IN WITNESS WHEREOF the parties hereto have hereunto set the hand of their proper officers this twelfth day of May, 1910.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF MAY, 1910.

Under this heading, account is taken of such accidents only, as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of *The Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 376 individual work people in Canada during the month of May, 1910, were reported to the Department of Labour. Of these, 133 were fatal and 243 resulted in serious injuries. In addition, five fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before May, 1910.

In the preceding month, there were ninety-four fatal, and 246 non-fatal accidents reported, a total of 340, and in May, 1909, there were ninety-three fatal and 185 non-fatal accidents, a total of 278. The number of fatal accidents reported in May, 1910, was, therefore, thirty-nine more than in the preceding month, and forty more than in May, 1909. The number of non-fatal accidents reported in May, 1910, was three less than in the preceding month and fifty-eight more than in May, 1909. Altogether there were thirty-six more industrial accidents reported in May, 1910, than in the preceding month, and ninety-eight more than in the same month of the preceding year.

Of 238 returns received during the month giving the ages of the victims of industrial accidents, thirty-one referred to persons under twenty-one years of age, 105 to persons between twenty-one and forty-five, and thirty-one to persons over forty-five. Seventy-one persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING MAY, 1910, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	25	29	54
Fishing and hunting.....	2	2
Lumbering.....	14	14	28
Mining.....	15	11	26
Building trades.....	3	20	23
Metal trades.....	9	32	41
Woodworking trades.....	19	19
Printing trades.....	1	1
Clothing trades.....	2	2
Textile trades.....	1	2	3
Food and tobacco preparation.....	4	4
Leather trades.....	1
Railway service.....	25	39	64
Navigation.....	11	13	24
General transport.....	3	18	21
Civic employés.....	6	19	25
Miscellaneous.....	10	10	20
Unskilled labour.....	9	9	18
Total.....	133	243	376

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman, were the drowning of six persons in Lake Helen, Ont., the killing of five workmen in an explosion at Northfield, B.C., the killing of two workmen by an explosion of dynamite at Skeena, B.C., a railway collision near Ashcroft, B.C., in which three construction hands were killed, and three others seriously injured; the death by exposure of three seamen off the mouth of the Miramichi river, N.B.; the shooting to death of two police constables at Montreal, Que., by an escaping prisoner; and the drowning of two fishermen on Quero Bank, N.S.

Drowning of Six Persons in Lake Helen, Ont.

The finding of an upturned canoe with personal effects, on May 19, established the drowning of six men in Lake Helen, a small lake between Lake Nipigon and Nipigon town. Two of the victims were Provincial fire rangers and the other four, bushmen.

Disastrous Explosion at Northfield, B.C.

On May 19, an explosion of nitro-glycerine at the Hamilton Powder Company's powder works at Northfield, B.C., instantly killed five workmen.

Dynamite Explosion at Skeena, B.C.

On May 23, railway sub-contractor and a construction hand were instantly killed by an explosion of dynamite at Skeena, B.C.

Disastrous Railway Collision near Ashcroft, B.C.

On May 14, a steam shovel which left Ashcroft at midday, collided with an incoming freight engine, and three construction hands, working on the former, lost their lives, three others sustaining serious injuries.

Death from Exposure off Mouth of Miramichi River, N.B.

On May 4, a two-masted schooner went ashore at Tabusintac Gully, near the mouth of the Miramichi. Two men who rowed out from shore on May 5, could not get within fifty feet of the wreck owing to the high sea, but saw three dead men lashed to the rigging.

Killing of two Police Constables at Montreal, Que.

On the night of May 6, two police constables attempted to arrest a burglar, when he fired revolver shots at them, killing one instantly, and wounding the other so that he died a short time after.

Drowning of two Fishermen off the Nova Scotia Coast.

On May 13, two fishermen while attending to their trawls on Quero Bank, off the coast of Nova Scotia, became separated from their schooner by a fog and no traces of them have since been found.

Record by Trades and Industries.

Agriculture.—There were twenty-five fatal and twenty-nine non-fatal accidents

in this industry during May, 1910, compared with ten killed and eighteen injured in the previous month, and fourteen killed and twenty-two injured during May, 1909. Seven of the fatalities were caused by being run over, four by runaways, three each by falling material and by falls, two each by electricity and by being burned to death, and one each by an explosion of dynamite, by being asphyxiated in a well, by live stock and by heart failure while at work. Falling material seriously injured ten workmen, live stock, seven; runaways, five; falls, three; flying material two, and being run over and the explosion of a dynamite cap, one each.

Fishing.—Two of these workers were drowned, May, 1910. In April, last, nine were drowned, and in May, 1910, three.

Lumbering.—Fourteen workmen were killed and fourteen injured in May, 1910. In the month before sixteen were killed, and eleven injured, and during May, of last year, twenty-seven workmen were killed and nineteen injured. Of the fatalities seven were due to drowning; three to flying material, and one each to machinery, to a fall, to being run over and to falling material. Machinery caused ten of the injuries, flying material three, and a fall, one.

Mining.—In this group there were fifteen fatalities and eleven injuries, compared with seven killed and fifty-two injured in the preceding month, and ten killed and three injured in May, 1909. Falling material and being caught between cars caused each four of the fatalities; explosions of dynamite, falls and electricity causing each two deaths, and drowning one. Being caught between cars caused five of the injuries, being nearly asphyxiated three, falling material two, and a fall one.

Building trades.—Three accidental deaths occurred in these trades and twenty workmen were injured, compared with seven injuries in April, last, and two killed and thirty-two injured in May, 1909. Two of the fatalities were due to falls and one to falling material. Nine of the injuries were due to falls, seven to falling material, two to machin-

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MAY, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	South Walsingham, Ont.....	May 3	1	Struck by lightning.
"	Chatham, Ont.....	" 2	1	Struck by lightning.
"	Humberstone, Ont.....	" 3	1	Tree fell on him.
"	New Westminster, B.C.....	" 3	1	Tree fell on him.
"	Moose Jaw, Sask.....	" 5	1	Explosion of dynamite.
"	Oche River, Man.....	" 5	1	Fell from wagon.
"	Paris, Ont.....	" 9	1	In a runaway.
"	Lothimère, Que.....	" 10	1	Run over by load.
"	East Missouri, Ont.....	" 12	1	Falling timber.
"	Edgewood, B.C.....	" 14	1	Fell with wagon over precipice 200 feet.
"	Brantford, Ont.....	" 16	1	Burned to death in home.
"	Brantford, Ont.....	" 9	1	Crushed between barn and wagon.
"	Mount Brydges, Ont.....	" 19	1	Run over by train.
"	Barons, Alta.....	" 13	1	Asphyxiated in a well.
"	Scarboro, Ont.....	" 20	1	Run over by train.
"	Crystal City, Man.....	" 22	1	In a runaway.
"	Castor, Alta.....	" 29	1	Kicked by a horse.
"	Dufferin, Ont.....	" 30	1	In a runaway.
"	Fort William, Ont.....	" 24	1	In a runaway.
"	Athens, Ont.....	" 25	1	Fell forty feet.
Farmer's wife.....	Whitney Pier, N.S.....	" 3	1	Struck by train at crossing.
"	Gananoque, Ont.....	" 16	1	Run over by train.
"	Niagara Falls, Ont.....	" 29	1	Run over by train.
Farmer's daughter.....	Dorchester, N.B.....	" 18	1	Clothes caught fire while cooking.
Farmer's son.....	Lindsay, Ont.....	" 18	1	Dropped dead while digging a drain.
<i>Fishing and hunting—</i>				
Fishermen.....	Off Nova Scotia coast.....	" 13	2	Drowned.
<i>Lumbering—</i>				
Sawmill hand.....	Rainy River, Ont.....	" 9	1	Caught in shafting.
"	Grenville, Ont.....	" 18	1	By board from saw.
"	Campbell's Cove, N.B.....	" 19	1	Fell twenty feet from staging.
"	Dalhousie, N.B.....	" 24	1	Struck by bolt.
"	Near Truro, N.S.....	" 16	1	Run over by car.
"	Montreal, Que.....	" 21	1	By bursting pulley.
Loggers.....	Lake Helen, Ont.....	" 21	4	Drowned, canoe upset.
"	La Tuque, Que.....	" 4	1	Drowned, fell off logs.
"	Blind River, Ont.....	" 4	1	Drowned, fell off logs.
"	Malbaie, Que.....	" 30	1	Drowned.
"	Northampton, N.B.....	" 11	1	Log rolled on him.
<i>Mining—</i>				
Miner.....	Cobalt, Ont.....	" 5	1	Explosion of dynamite.
"	Cobalt, Ont.....	" 6	1	Fell from ore car.
"	Nanaimo, B.C.....	" 7	1	Rock fell on him.
"	Glace Bay, N.S.....	" 11	1	By live wire.
"	Sudbury, Ont.....	" 13	1	By live wire.
"	Thetford Mines, Que.....	" 17	1	By fall of rock.
"	Michel, B.C.....	" 19	1	Caught between cars.
"	Cobalt, Ont.....	" 20	1	Run over by cars.
"	Cobalt, Ont.....	" 25	1	Fell down shaft, 400 feet.
"	Joggins Mines, N.S.....	" 22	1	By fall of stone.
"	Westville, N.S.....	" 12	1	Run over by trip of boxes.
"	Michel, B.C.....	" 11	1	Knocked off jig by car.
"	Phoenix, B.C.....	" 30	1	By rockslide.
Prospector.....	Lake Savant, Ont.....	" 24	1	Drowned.
Quarryman.....	Montreal, Que.....	" 27	1	Explosion of dynamite.
<i>Building trades—</i>				
Carpenter.....	Barrie, Ont.....	" 12	1	Cave-in of earth.
"	Montreal, Que.....	" 21	1	By a fall.
Painter.....	Montreal, Que.....	" 21	1	Fell twenty feet.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MAY, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Metal trades—</i>				
Electrical worker.....	Niagara Falls, Ont.....	May 14	1	By electric shock.
Machinist.....	Rockport, Ont.....	" 13	1	Killed by fall while repairing motor boat.
"	Peterborough, Ont.....	" 11	1	Drowned, fell into mill dam.
"	Montreal, Que.....	" 25	1	Fell forty feet.
"	Kingston, Ont.....	" 29	1	Run over by train.
Stationary engineer	Shippegan, N.B.....	" 9	1	Accidental discharge of gun.
Iron worker.....	Hamilton, Ont.....	" 26	1	By fall in factory.
"	Hamilton, Ont.....	" 17	1	Head crushed by crane.
"	Waterville, Que.....	" 27	1	Run over by car at factory.
<i>Textile trades—</i>				
Woollenfactory hand	Cap St. Ignace, Que.....	" 25	1	Fell into vat of boiling water.
<i>Railway employés—</i>				
Conductor.....	East of Winnipeg, Man.....	" 19	1	In a derailment.
"	Cornwall, Ont.....	" 20	1	Caught between cars.
Engineer.....	Little Valley Island, B.C.....	" 18	1	In a derailment.
Brakeman	New Westminster, B.C.....	" 4	1	Run over by car.
"	Medicine Hat, Alta.....	" 11	1	Caught between cars.
"	North Bay, Ont.....	" 29	1	Caught between cars.
Baggage master.....	Nawwigewank, N.B.....	" 24	1	In head-on collision.
Fireman.....	Sarnia, Ont.....	" 20	1	In head-on collision.
Yardman.....	Netley, Man.....	" 17	1	Run over by train.
"	Nickomen, B.C.....	" 13	1	Iron casting fell on him.
Construction hand	Capetown, Ont.....	" 26	1	Run over by train.
"	Skeena, B.C.....	" 24	2	Explosion of dynamite.
"	Ashcroft, B.C.....	" 14	3	Head on collision.
"	Shawingan Junction, Que.....	" 7	1	Fell from trestle.
"	Rothwell, Man.....	" 5	1	Run over by train.
Roundhouse employé.....	St. Thomas, Ont.....	" 4	1	Fell fifty feet from bridge.
"	Dingwell, Ont.....	" 20	1	Fell from car, struck overhead bridge.
Car cleaner.....	Moose Jaw, Sask.....	" 5	1	Run over by train.
Car shop hand.....	Lambton Mills, Ont.....	" 6	1	Run over by train.
Bridge employé.....	Kettle Creek, Ont.....	" 20	1	Fell eighty-five feet from bridge.
Trackman.....	Mimico, Ont.....	" 21	1	Run over by train.
Station hand.....	Mount Brydges, Ont.....	" 19	1	Run over by train.
<i>Navigation—</i>				
Sailors.....	Tabusinac, N.B.....	" 6	3	Died of exposure, vessel went ashore.
"	Vancouver, B.C.....	" 14	1	Drowned, fell overboard.
Boat hand.....	Near Cumberland, Ont.....	" 23	1	Drowned, fell overboard.
Oiler on vessel.....	Toronto, Ont.....	" 29	1	Caught in shafting.
Longshoreman.....	Montreal, Que.....	" 16	1	Drowned, fell from barge.
Sailor.....	Montreal, Que.....	" 28	1	Drowned.
"	Montreal, Que.....	" 31	1	Run over by train.
Deck hand.....	Montreal, Que.....	" 27	1	Drowned, fell overboard.
"	Halifax, N.S.....	" 26	1	Caught in steam winch.
<i>General transport—</i>				
Driver.....	Montreal, Que.....	" 10	1	In collision with street car.
"	Toronto, Ont.....	" 20	1	In collision with another vehicle.
"	Fort William, Ont.....	" 24	1	Run down by cars at crossing.
<i>Public employés—</i>				
Policemen.....	Montreal, Que.....	" 6	2	Shot by an escaping burglar.
Fire ranger.....	Lake Helen, Ont.....	" 19	2	Drowned, canoe upset.
"	Temagami, Ont.....	" 31	1	Accidentally shot.
"	Obekeka Lake, Ont.....	" 31	1	Drowned, canoe upset.

".....	Brandon, Man.....	" 25	1	Caught in shafting.
".....	London, Ont.....	" 28	1	Run over by train.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN MAY, 1910.

Farmer's son.....	Bertie Township, Ont.....	April 30	1	Tree fell on him.
Miner.....	Extension, B.C.....	" 23	1	Caught between cars.
Sawmill hand.....	Fernie, B.C.....	" 29	1	Caught in gearing.
Yardman.....	Fort William, Ont.....	" 30	1	Fell into bin of hard coal.
".....	Carlstadt, Alta.....	" 26	1	Run over by train.

ery and one each to being crushed between cars and an explosion of gas.

Metal, engineering and shipbuilding trades.—Nine workmen were killed and thirty-two injured during May, 1910, compared with seven killed and fifty-two injured in April, and three killed and twenty-seven injured in May of last year. Four of the fatalities were caused by falls, two by being run over and one each by drowning, by electricity, and by an accidental gunshot wound. Eighteen of the injuries were caused by machinery, six by falling material, three by falls, two by molten metal and one each by flying material, by being run over and by an explosion of gasoline.

Woodworking trades.—Nineteen workmen were injured in this group, machinery being responsible for fourteen, flying material, two; and a fall, being crushed between vehicles, and falling material, one each. In the previous month, one

workman was killed and twenty-eight injured, and in May the record was nine injuries.

Printing trades.—Machinery caused one accident among these workers. Two workmen were injured in the month before, there were no accidents in May, of last year.

Clothing trades.—Tools and machinery caused each one injury in this group. There were no accidents in April last; three workmen were injured in May, 1909.

Textile trades.—Falling into a vat of boiling dye and being scalded to death caused one fatality, and machinery, two non-fatal accidents. In the month previous, one workman was killed and four injured, and in May, 1909, there were three injuries.

Food and tobacco preparation.—There were four minor accidents in this group due to machinery, to a fall; to a

tool and to a runaway, compared with six injuries in April, last, and one injury in May, of last year.

Leather trades.—Machinery caused one accident in this group; there were no accidents in the month previous, nor in May, 1909.

Railway service.—During May, 1910, twenty-five railway employés were killed and thirty-nine were injured, compared with sixteen killed and forty injured in April, and twenty-three killed and nineteen injured in May, 1909. Eight of the fatalities were caused by being run over, five by collisions, four by falls, three by being caught between cars, two each by explosions of dynamite, and by derailments and one by falling material. Of the non-fatal accidents eleven were caused by collisions, six by being caught between cars, five each by being run over and by falls, four by derailments, three by falling material, two by explosions of steam, and one each by machinery, by flying material and by being struck by an object in passing.

Navigation.—In this group death by accident befell eleven workers, and thirteen others were seriously injured, compared with four killed and four injured in April, and six killed and thirteen injured in May, 1909. Five of the fatalities were due to drowning, three to exposure, two to machinery and one to being run over. Of the other accidents, four were due to machinery, three each to falls and to falling material two to explosions of steam, and one to an explosion of gasoline.

General transport.—In this branch, three workers were killed and eighteen injured during May, 1910, as against three killed and eight injured in the pre-

vious month, and three killed and eighteen injured in May, of last year. Of the fatalities two were caused by collisions and the other by being run over. Of the other accidents five were caused by falls, three each by live stock and by runaways, two each by being caught between vehicles, by collisions, and one each by being run over, by falling material and by being attacked by thugs.

Public employés.—During May, 1910, three of these employés were killed by gunshot wounds and three were drowned, while eighteen others were injured, nine by an explosion at a fire, five by falls, four by collisions and one by falling material. In the month before, the record was four killed and thirty injured, and in May, of last year, one killed and four injured.

Miscellaneous.—There were ten killed and ten injured, compared with eight killed and eleven injured in April, and seven injured in May, 1909. Five of the deaths were due to explosions of dynamite and one each to machinery, to electricity, to being burnt to death, to a fall and to falling material. Three of the injuries were due to elevators, two each to machinery and to explosions, and one each to a gunshot wound, to a fall and to a collision.

Unskilled labour.—Nine labourers were killed and nine injured during May, 1910, compared with eight killed and fifteen injured in the month before, and one killed and six injured in May, 1909. Five of the fatalities were caused by the victims being run over, two by machinery, and one each by falling material and by being suffocated by poisonous fumes. Of the injuries four were caused by falls, three by asphyxiation and two by falling material.

TRADE DISPUTES DURING THE MONTH OF MAY, 1910.

THERE was a large increase in the number of trade disputes in Canada during May, compared with the previous month, several strikes having occurred in the building trades. A general strike at Regina, Sask., seriously impeded

building operations during the whole of May, all the building trades being involved, and during a greater part of the month building operations were retarded at Toronto, Ont., owing to a strike of painters. A strike of coal miners

at Frank, Alta., and a strike of smeltermen, at Greenwood, B.C., both of which began in April, continued until the twelfth of the month. There was some improvement in conditions at Springhill, N.S., where a strike of coal miners had been in existence since last August, the Company having secured a number of new employés. The mines, however, were still affected by the dispute.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada, during May, was twenty-one, five more than in the previous month, and five more than in May, 1909. About 328 firms and 4,220 employés were affected by these disputes, about 320 firms and 2,223 employés being affected by new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during May was approximately 71,830 working days, compared with a loss of about 49,110 days in April, and 96,350 in May, 1909.

Trades affected by new disputes.—The following table shows the trades affected by new disputes of the month, and the approximate number of employés involved in each group of trades.

Trades.	No. of disputes.	No. of employés.
Building.....	5	1,483
Metal trades.....	2	45
Textile trades.....	1	300
Clothing trades.....	2	55
Food and tobacco preparation	3	
Miscellaneous trades.....	1	60
Total.....	14	2,223

Localities affected by new disputes.—The new disputes of the month occurred in the following Provinces of the Dominion.

Province.	No. of disputes.
Nova Scotia.....	1
Quebec.....	1
Ontario.....	9
Saskatchewan.....	1
Alberta.....	1
British Columbia.....	1
Total.....	14

Causes of disputes.—The following were the causes of the new disputes of the month.

Cause.	No. of disputes
For increase in wages.....	9
For increase in wages and shorter hours....	2
For increase in wages and recognition of union.....	1
Against conditions of employment.....	1
Unclassified.....	1
Total.....	14

Methods of settlement.—Of the twenty-one disputes in existence during May, definite settlements were reached in nine cases, and in two others conditions ceased to be affected, leaving ten still in existence at the end of the month. Six disputes were settled by negotiations between the parties concerned, two by conciliation, of which one was settled by a Board under the Industrial Disputes Investigation Act, 1907. In one case work was resumed on the employers' terms, and the remaining two came to an end without negotiations.

Results of disputes.—The employers were successful in one of the disputes that were terminated, the employés were wholly successful in five cases, and in one case the majority of the employés were successful. In two cases compromises were effected, and in two the results were not reported.

Disputes which Commenced Prior to the Beginning of the Month.

The disputes in existence during May, which began in previous months comprised strikes of coal miners at Springhill, N.S., and at Frank, Alta., smeltermen at Greenwood, B.C., carpet weavers at Guelph, Ont., sheet metal workers at Vancouver, B.C., garment workers at Toronto, Ont., and cloak makers at Montreal, Que.

Strike of Coal Miners at Springhill, N.S.

There was little change reported in the situation at Springhill, N.S., where a strike of coal miners had been in continuance since August 10, 1909. Oper-

ations were carried on at the mines to a limited extent, the Company having secured a few hundred men to replace the strikers. About 1,700 men were originally affected by this dispute, which arose on account of the refusal of the Cumberland Railway and Coal Company to grant a demand for recognition of the United Mine Workers of America, an increase in wages, and certain changes in the conditions of employment.

Strike of Coal Miners at Frank, Alta.

A strike of about 234 coal miners which took place at Frank, Alta., was declared off on May 12, and work was resumed on the following Monday. The principal causes of this dispute was a proposed reduction in wages amounting to five cents per ton. The dispute was referred to a Board under the Industrial Disputes Investigation Act, which reported against the reduction in wages, and the decision of the Board was accepted by the Company.

Strike of Smeltersmen at Greenwood, B.C.

A strike of employés of the British Columbia Copper Company, which took place at Greenwood, B.C., on April 19, on account of the refusal of the Company to agree to employ none but members of the Western Federation of Miners, was declared off on May 11, and work was resumed on the Company's terms. About 350 men were reported by the Company to have been directly affected by this dispute and two firms and thirty men indirectly affected. Prior to the strike, it was claimed that a Board of Conciliation had reported in favour of the Company.

Strike of Carpet Weavers at Guelph, Ont.

A strike of twenty-eight carpet weavers which began at Guelph, Ont., on December 11, continued throughout May. A number of the strikers, however, were reported to have obtained work elsewhere, and the Company had procured a few new hands to take their places. The cause of the dispute was the refusal

of the employers to grant a demand for extra pay for overtime, and general dissatisfaction with the conditions of employment.

Dispute of Sheet Metal Workers at Vancouver, B.C.

No complete settlement was reported in the case of a dispute of sheet metal workers at Vancouver, B.C., which began on April 8, on account of twenty-eight employers posting up notices declaring for 'open shops.' Negotiations, however, were carried on during April, with the result that out of eighty union men, all but twelve resumed work before May 1. Eight or ten apprentices were also on strike during May.

Strike of Garment Workers at Toronto, Ont.

No settlement was reported in the case of a strike of fifty-eight garment workers which took place at Toronto, Ont., on February 2, on account of the refusal of the employers to supply thread free instead of deducting the cost from the wages, but industrial conditions ceased to be affected by the dispute.

Strike of Cloak Makers at Montreal, Que.

Industrial conditions ceased to be affected by a strike of sixty-five cloak makers at Montreal, Que., which began on February 18, on account of the refusal of the employers to grant a demand for an increase in wages.

New Disputes.

The new disputes of the month comprised strikes of building trades at Regina, Sask., painters at Toronto, Ont., and at Calgary, Alta., cotton mill hands, knitting mill hands, and tailors at Hamilton, Ont., carpenters at Kingston, Ont., cigar makers at London, Ont., plumbers at Halifax, N.S., bakers at Vancouver, B.C., tile layers at Toronto, Ont., butchers at Montreal, Que., sheet metal workers at Hamilton, Ont., and iron moulders at Peterborough, Ont.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES C, No. 116.

TABLE OF TRADE DISPUTES DURING THE MONTH OF MAY, 1910.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.			Date of termination.	Result.
			Directly.	Indirectly.	Directly.	Indirectly.			
						Fe-rectly.	Males, males.		
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.									
<i>Mining—</i> Coal miners.....	Springhill, N.S.	For recognition of union and increase of wages against conditions of employment.....	1		1,200			Aug. 10	No settlement reported, but places of many strikers were filled.
Coal miners.....	Frank, Alta.....	Against reduction in wages, for recognition of union with respect to certain employés, and for a "closed shop".....	1		234			April 2	May 12 Company accepted finding of Commission which reported that wages should not be reduced.
Smeltermen	Greenwood, B.C.....	For employment of union labour only.....	1	2	350	30		" 13	11 Strike declared off, demand of men withdrawn.
<i>Metal trades—</i> Sheet metal workers.....	Vancouver, B.C.	Against declaration of employers for "open shops".....				20		" 8	No settlement reported at end of month.
<i>Textile trades—</i> Carpet weavers ...	Guelph, Ont.	Demand of men for extra pay for overtime and general dissatisfaction with conditions...	1		28	12		Dec. 11	No settlement reported at end of month.
<i>Clothing trades—</i> Garment workers ..	Toronto, Ont.	Refusal of employers to give thread free, instead of deducting cost from wages.....	1			58		Feb. 2	No settlement reported, but conditions ceased to be effected.
Cloakmakers.....	Montreal, Que.....	Demand for increase in wages.....	1		40	25		Feb. 8	No settlement reported, but conditions ceased to be effected.

DISPUTES WHICH BEGAN DURING THE MONTH.

<i>Building trades—</i> Carpenters.....	Kingston, Ont.....	For increase in wages from \$2.50 to \$3.00 for 8-hour day.....	16	70	May	2	No settlement reported at end of month, but 2 firms granted increase.
All building trades	Regina, Sask.....	For increase in wages and recognition of union.....	40	235	"	2	No settlement reported at end of month.
Plumbers.....	Halifax, N.S.....	For increase in wages.....	14	38	"	2	No settlement reported at end of month.
Painters.....	Toronto, Ont.....	For increase in wages from 30 to 35 cents an hour.....	150	1,100	"	4	28 Strike declared off, majority of employers having granted demand.
"	Calgary, Alta.....	For increase in wages from 40 to 50 cents an hour, and an 8-hour day.....			"	7	19 Settled by a compromise.
<i>Metal trades—</i> Sheet metal workers	Hamilton, Ont.....	Demand for increase of 5 cents an hour in wages.....	12	45	"	6	28 Increase of 2½ cents an hour, granted.
Iron moulders.....	Peterborough, Ont.....	For change in conditions of labour.....	3		"		No settlement reported at end of month.
<i>Clothing trades—</i> Knitting mill hands	Hamilton, Ont.....	For increase in wages.....	1		"		No settlement reported at end of month.
Tailors.....	Hamilton, Ont.....	Demand for increase in piece-work prices.....	15	33	5	3	10 Increase in wages granted.
<i>Textile trades—</i> Cotton mill hands	Hamilton, Ont.....	Demand for 10 per cent. increase in wages.....	1	125	"	5	No settlement reported at end of month.
<i>Food and tobacco preparation—</i> Bakers.....	Vancouver, B.C.....	For increase in wages and decrease in hours.....	15	60	"	1	10 Agreement reached in favour of employes.
Jewish slaughturers	Montreal, Que.....	Men alleged that meat was sold to Jews which was not killed in Jewish way.....	48	12	"	11	16 Committee appointed to investigate complaint. Butchers signed agreement to sell only meat of good quality properly prepared.
Cigar makers.....	London, Ont.....	For increase of \$1. per 1,000 cigars.....	5	208	"	16	No settlement reported at end of month.
<i>Miscellaneous trades—</i> Tile layers.....	Toronto, Ont.....	For increase in wages.....		60	"	9	14 Increase in wages granted.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employes, or of less duration than twenty-four hours.

Strike of Building Trades at Regina, Sask.

On May 2, a general strike in the building trades took place at Regina, Sask., in which about forty firms and 282 employés were involved. The strikers comprised 180 carpenters, who demanded an increase in wages of ten cents per hour and union shops, fourteen plumbers and sixteen electrical workers, who demanded an increase of five cents per hour, twenty-four plasterers who demanded an advance from fifty-five cents to sixty-two and a half cents per hour and a day of nine hours with five on Saturdays in place of a ten-hour day, and forty-eight painters who were called out in sympathy with the other strikers. It was claimed by the men that the demands had been submitted last January, and that they had tried to meet the employers twice in April, before declaring the strike. A request for the friendly intervention of the Department of Labour was made by the Building Trades Council, and in compliance with the request, Mr. Acland, Deputy Minister of Labour, proceeded to Regina on May 27, with a view to effecting a settlement. The dispute was still in existence at the close of the month.

Strike of Painters at Toronto, Ont.

On May 4, a strike of painters took place at Toronto, Ont., on account of the refusal of the employers to grant a demand for an increase in wages from thirty to thirty-five cents an hour. It was reported that about 500 men went out on the first day of the strike, but the number of strikers increased later to about 1,100 men. A report received from the Painter's Union placed the number of firms affected at about 150 and the number of employés at about 1,500. On May 28, an official statement was issued by the strikers to the effect that as a majority of the employers were at that time paying thirty-five cents an hour the object of the strike was won and it was declared off, though no agreement was signed. The Master Painters' Association stated that they had not agreed to any minimum rate.

Strike of Painters at Calgary, Alta.

On May 7, a strike of painters was declared at Calgary, Alta., with the object of securing an advance in wages from forty to fifty cents an hour and an eight-hour day. On May 19, the strike was declared off, a compromise having been reached on the basis of a minimum wage of forty-five cents per hour with a nine-hour day and Saturday half-holiday.

Strike of Tailors at Hamilton, Ont.

On May 4, a strike of journeymen tailors took place at Hamilton, Ont., on account of the refusal of the employers to grant a demand for an increase in wages, which was made on the ground of the increased cost of living, and of the fact that the wages had increased very little during the past eleven years. The strike was declared off on May 10, the employers having agreed to the new bill of prices. It was stated by the union that fifteen firms, and fifty employés, of whom thirty-three were males were directly affected by the dispute, and five female employés were indirectly affected.

Strike of Carpenters at Kingston, Ont.

On May 2, a strike of carpenters took place at Kingston, Ont., on account of the refusal of the employers to grant a demand for an increase in wages from \$2.50 to \$3.00 for an eight-hour day. According to a report received from the Carpenter's Union, about sixteen firms and seventy employés were involved in the dispute. Two contractors employing two hands each, granted the demand, but with respect to the others, no settlement was reported during the month.

Strike of Cigar Makers at London, Ont.

On May 16, a strike of cigar makers took place at London, Ont., on account of the refusal of five firms to grant a demand for an increase in piecework rates of \$1 per 1,000 on all cigars made. About 208 employés were involved in

this dispute, of whom thirty-four were females. Four small shops, employing about twelve men altogether, agreed to the new rate. No settlement of this dispute was reported during the month.

Strike of Plumbers at Halifax, N.S.

On May 2, a strike of plumbers took place at Halifax, N.S., on account of the refusal of the employers to grant a demand for an increase in wages. About fourteen firms and thirty-eight employ es were involved in this dispute. No settlement was reported during the month. It was claimed by the men that the increased cost of living in Halifax warranted an increase in wages.

Strike of Bakers at Vancouver, B.C.

On May 1, a strike of bakers and confectioners took place at Vancouver, B.C., on account of the refusal of the employers to grant a demand for an increase in wages, shorter hours, and more sanitary conditions. About twelve firms and sixty employ es were reported to have been originally involved in this dispute, but on May 3, the majority of the employers arrived at a settlement with the men, mutual concessions being made. On May 10, the strike was declared off, an agreement being reached with the remaining firms, which was favourable to the employ es.

Prior to the strike the wages had been from fifteen to eighteen dollars per week, with a working day of from ten to twelve hours. Overtime was paid at the rate of twenty-five cents an hour. The terms of the new agreement, which expires on April 30, 1911, are as follows:—Nine hours to constitute a day's work, and eight and a half hours or less a night's work. Wages to be in single-handed shops \$19 per week, dough men or others \$19, bench hands, \$18, jobbers \$4 per shift or \$3.50 for less than a shift. Overtime to be paid bench hands and jobbers. No Oriental helpers or bakers to be employed.

Strike of Tile Layers at Toronto, Ont.

On May 9, a strike of about sixty tile layers took place at Toronto, Ont.,

on account of the refusal of the employers to grant a demand for an increase in wages. The improvers asked for an advance from twenty-five cents to thirty cents per hour, and the journeymen from thirty-five cents to forty cents. The strike was declared off on May 14, the increase in wages having been granted.

Strike of Jewish Butchers at Montreal, Que.

A strike of twelve Jewish butchers was reported in the press to have taken place at Montreal on May 11. It was stated that the strikers, who comprised all the Jewish slaughterers, alleged that the master butchers were selling meat not killed by them, or according to the Jewish practice. The strike was settled by a committee of representatives from the various synagogues, who induced the butchers to sign an agreement to sell only meat of a good quality properly prepared.

Strike of Sheet Metal Workers at Hamilton, Ont.

On May 6, about forty-five sheet metal workers in twelve shops declared a strike at Hamilton, Ont., on account of the refusal of the employers to grant a demand for an increase in wages of five cents an hour. After negotiations a compromise was reached on May 28, and work was resumed on May 30, the men accepting an increase of two and one-half cents an hour.

Strike of Iron Moulders at Peterborough, Ont.

A strike of iron moulders was reported to have taken place at Peterborough during May, in which three shops were involved. The dispute arose from a demand for better conditions of labour. No settlement was reported during the month.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of May, and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during May, 1910:—

DOMINION REPORTS.

Occupations of the People

Census and statistics. Bulletin XI. Occupations of the people. Ottawa: King's Printer, 1910. Page, 40.

BULLETIN XI, of the Dominion Census and Statistics Office, which has recently been issued, comprises a report on the occupations of the people of Canada, compiled from data of the census of 1910. The number of people of whom account is taken in this bulletin is, 1,615,431 males, and 250,698 females. There were enumerated in that year in all 1,652,990 males, and 1,560,637 females, in Canada, between the ages of fifteen and sixty-five years.

A classification of the occupations shows that there were 716,937 persons engaged in agriculture, 389,873 in the manufacturing and mechanical industries, 277,755 in domestic and personal occupations, and 234,236 in trade and transportation. In the agricultural industries out of 707,997 males, 72,696, received wages, but out of 8,940 females only ninety-two were wage-earners. In the manufacturing and mechanical industries there were 226,001 male wage-earners out of 319,021, and 49,662 female wage-earners out of 70,852.

The actual wages paid amounted to \$15,101,976 in agricultural industries, \$100,708,217 in the manufacturing and mechanical industries, \$75,763,443 in the industries of trade and transportation, \$47,696,641 in the domestic and personal occupations, and \$25,749,101 to those engaged in professional occupations. The total wages paid in all the industries was \$284,028,985, and reckoning the earnings of the workers who did not receive wages at the rate of wages paid in their respective industries, the total estimated wages and earnings for all industries amounted to \$544,408,234.

The Department of the Secretary of State.

Report of the Secretary of State of Canada for the year ended March 31, 1909. Ottawa: King's Printer, 1910. Page, 380. Price, 20 cents.

The report of the Secretary of State for the fiscal year, 1908-1909 deals among other matters, with the incorporation of companies, the naturalization of aliens and the adoption of the Canada Temperance Act.

The number of charters issued under the Companies' Act during the fiscal year 1908-9 was 366, with a total capitalization of \$119,324,875, while the capital of existing companies was increased by \$72,293,000, making a total of \$191,617,875 of new capital. This is far greater than in any previous year with the exception of 1906, when the total new capitalization amounted to \$212,576,075.

During the year 1908, naturalization papers were issued to 25,731 aliens, of whom 9,000 were from the United States, 3,982 from Austria, 3,046 from Russia, 1,852 from Italy, and 1,083 from Galicia. Naturalized aliens from other countries numbered less than 1,000 for each nationality. The total number of persons naturalized was more than double that of any previous year.

The Canada Temperance Act is reported to be in force in ten counties in Nova Scotia, in nine counties and in the city of Fredericton in New Brunswick, and in two counties of Manitoba. An election took place upon a petition to revoke the Order-in-Council by which the Act was brought into force in the county of Westmoreland, N.B., but the Act was sustained by a majority of 682.

Forest Products of Canada.

The Forestry branch of the Department of the Interior has just issued its eighth bulletin, entitled, "Forest Products of Canada, 1908." This gives the result of the first year's work by the branch in the collection of statistics regarding the an-

nual production in Canada of lumber, pulpwood, poles and other wood products.

The total value of the production of lumber, lath, shingles, cross-ties, poles and pulpwood during the year was \$67,425,044.

The production of sawn lumber is shown to be in the neighborhood of 3,348,176,000 feet, board measure, per annum, valued at \$54,338,036. In this Ontario leads, with a production of 1,294,794,000 feet, valued at \$24,398,077, Quebec being second, with 190,135,000 feet, of the value of \$10,838,608, and British Columbia third, with 147,977,000 feet, worth \$9,107,186. The other Provinces rank in the following order: New Brunswick, 308,400,000 feet, valued at \$4,081,402; Nova Scotia, 216,825,000 feet, of the value of \$2,873,730; Saskatchewan, 91,166,000 feet, valued at \$1,576,820; Manitoba, 56,447,000 feet value \$867,969; Alberta, 41,382,000 feet, valued at \$593,244. The total production of wood pulp is 363,079 tons, made from 482,777 cords of wood, and valued at \$2,931,653.

British Columbia easily leads in the production of shingles, producing 724,652,000, of the value of \$1,391,306. Its nearest competitor is Quebec, which produced 406,440,000, valued at \$849,787, and then follow, in their order, Ontario, with a production of 223,533,000, valued at \$461,155; New Brunswick, 109,913,000 worth \$325,865; Nova Scotia making 33,141,000, valued at \$69,370; Manitoba, turning out 1,125,000, worth \$3,150, and Saskatchewan, which produces 592,000, valued at \$1,363.

The total production for the Dominion was 1,499,396,000 shingles, the aggregate value of which was \$3,101,996.

In the manufacture of laths, Ontario takes first place with 263,241,000 to her credit, valued at \$612,856. Little more than half that number, viz., 138,991,000, is made by her nearest competitor, New Brunswick, the value of whose product is \$286,088. Quebec made 92,914,000 laths, worth \$189,076; British Columbia 86,862,000, worth \$208,255; Nova Scotia, 62,638,000, worth \$136,893; Saskatchewan, 18,477,000, valued at \$40,173; Man-

itoba, 7,370,000, at a value of \$10,200, and Alberta, 1,069,000, worth \$3,584.

The total number of laths manufactured was 671,562,000, of the value of \$1,487,125.

During the year the railways purchased 13,978,416, cross-ties for which they paid \$5,281,685. Of these the steam railways (forty-seven in number and having a total of 25,772 miles of track) bought 13,738,157, paying therefor \$5,189,674, and the electric roads numbering thirty-two and having 818 miles of track) purchased 240,259 ties costing \$92,011.

Reports as to the poles purchased were received from forty-six telegraph and telephone companies, 151 electric light, power and railway companies and nineteen steam railways owning their pole lines. These represent 66,544 miles of line, supported by 2,433,245 poles. These companies bought a total of 185,807 poles, paying for these, at the point of purchase, \$284,549. Of these 183,807 poles 162,211 were of cedar, other woods used being tamarack, spruce and Douglas fir.

UNITED STATES REPORTS.

Labour Statistics of Massachusetts.

Thirty-ninth* annual report of the statistics of labour of the Commonwealth of Massachusetts for the year 1908, Boston: State printers, 1909. Page, 331.

The thirty-ninth annual report on the Statistics of Labour of Massachusetts for 1908, is divided into three parts, dealing respectively with strikes and lockouts, labour organizations, and changes in rates of wages and hours of labour.

In the section of the report relating to strikes and lockouts, it is stated that during 1908, there were ninety-eight trade disputes in Massachusetts affecting 471 establishments, in which 7,852 employes struck, throwing out of work 14,539 other employes, and causing a loss in working time of approximately 322,754 days. There was a marked diminution of the number of strikes, compared with the previous year, which is attributed to the business depression which set in after the panic of October, 1907.

In the section relating to labour organizations, a brief historical sketch of the

trade union movement in the United States is given, with statistics of Massachusetts covering the years from 1904 to 1908. Interesting comparisons are made between Great Britain and the United States with respect to the organization, policy and methods of trade unions.

The statistics of wages show that the upward movement which occurred during the first ten months of 1907, was not maintained in 1908, there having been a net decrease of \$89,566.70 in the amount of wages paid in Massachusetts, compared with a net increase of \$141,634.71 in 1907.

Industrial Conditions in Michigan.

First annual report of the Department of Labour of Michigan. Lansing: Michigan State Printers, 1910. Page, 519.

The first annual report of the Department of Labour of Michigan, which was established in 1909, in succession to the Bureau of Labour, includes the inspection of manufacturing establishments, workshops, hotels, schoolhouses, theatres, halls, apartment houses and public buildings, with the annual reports of the inspection of coal mines, and of the various free State employment bureaus. In the introduction to the report, a brief account of labour legislation in Michigan is given, and particular reference is made to the child labour legislation which was enacted last year. It had been found that little reliance could be placed upon the sworn statement of a parent as to his child being old enough to be employed in a factory. The new Act, therefore, requires documentary proof of age. There must first be filed with the superintendent of schools in the school district in which a child seeking employment resides, or with the head of any state employment bureau, or a judge of the juvenile court, an application for an employment permit, containing: (1) The school report of the child, signed by the principal or executive officer of the school. (2) Transcript of record of birth or record of baptism, or other church record. (3) Sworn statement by parent or guardian, where the above records cannot be procured, accompanied by statement of physician or midwife.

Industrial Conditions in Maryland.

Eighteenth annual report of the Bureau of Statistics and Information of Maryland, 1909. Baltimore: State Printers, 1910. Page, 247.

The report of the Bureau of Statistics and Information of Maryland for 1909, deals with the following subjects, among others: Child labour, factory inspection, cost of living, production and value of farm products, average price and value of farm animals, value of annual output of minerals, strikes and lockouts, and immigration. Recommendations are made for changes in the law raising the age limit when children can be employed from twelve to fourteen years, and empowering the Bureau to remove consumptives from the workrooms.

Labour Statistics of Illinois.

Fifteenth biennial report of the Bureau of Labour Statistics of the State of Illinois, 1908. Springfield, Ill. 1910. Page, 599.

The fifteenth biennial report of the Bureau of Labour Statistics of Illinois is divided into three parts: Part I, comprises a report on industrial accidents which occurred in Illinois during the six months ending December 31, 1907. Part II, comprises a report of industrial accidents for the year 1908. Part III, contains the result of an inquiry conducted by the Bureau into the conditions of women employed in department stores in the State, in which nearly every feature regarding their lives, as affected by their employment is fully considered. These subjects include: their wages and earnings, mode of living, whether at home or elsewhere, cost of board or lodging, health, hours of employment, &c.

Industrial Conditions in Virginia.

Twelfth annual report of the Bureau of Labour and Industrial Statistics for the States of Virginia, 1909. Richmond: Superintendent of Public Printing, 1909. Pages, 303.

The report of the Bureau of Labour and Industrial Statistics of Virginia for 1909, contains statistics of all the principal industries of the State, reports from labour organizations, and a summary of labour laws and of decisions of courts affecting labour.

It is stated that the industrial depression reached its climax in Virginia in 1908, when the output declined nearly ten and one-half million dollars from the preceding year. The tendency of wages was downward, but the heaviest percentage of decrease was among the unskilled classes.

Industrial Conditions in Connecticut.

Connecticut Labour Bulletin, No. 3, 1909. Issued by the Bureau of Labour Statistics of Connecticut. Hartford, 1909. Page, 184.

Bulletin No. 3, of the Connecticut Bureau of Labour Statistics contains a synopsis of new factory or mill construction in 1909, an account of the operation of the "Tenement House Act", a directory of labour organizations, a review of strikes and lockouts, a synopsis

of the labour laws of Connecticut, and a resume of labour legislation introduced, but rejected by the General Assembly of 1909.

OTHER REPORTS RECEIVED.

Canada.—Abstract of statements of insurance companies in Canada for the year ended December 31, 1909.

Ontario.—Report of the Women's Institutes of the Province of Ontario, 1910. Part II.

Report of the Inspector of prisons and public charities upon the hospitals and charities, &c., of the Province of Ontario for the year ending September 30, 1909.

Thirty-fifth annual report of the Ontario Agricultural College and Experimental Farm, 1909.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

QUEBEC CASES.

Claim for Damages Dismissed.

In the case of Mrs. Napoleon Martel, Magog, who sued the Canadian Pacific Railway Company for \$10,000 as damages for the death of her husband, the plaintiff alleged that the late Napoleon Martel died as a result of injuries which he received to his head by falling off a hand-car while in the employ of the Company, and which hand-car had been stopped too suddenly and without warning.

The Court held that the evidence of the fellow workmen of the late Martel showed that the hand-car was not going at an excessive rate of speed, and that the usual signal was given before the car stopped, and the deceased had not taken the ordinary precaution to protect himself. The deceased Martel did not die until two months after the accident, and had worked nearly all that time. The medical evidence also went to show that death did not follow as a result of

the accident. The action was dismissed with costs.

Case of Landlord and Tenant.

"Considering that the objection to the sub-tenant does not impugn her respectability, but consists solely in the fact that she and her relatives are Hebrews; considering that such an intolerant, illegal and iniquitous proposition cannot be seriously entertained by a court of justice; considering that this being the only ground left for the cancellation of the lease, it must be dismissed." This was the decision in a peculiar case that has been before Mr. Justice Guerin of Montreal.

Isaie Craig had sued Frederick Hughes for rent and damages, the ground of action being that the tenant had sub-let a house on Laval Avenue to an occupant who was not acceptable to the landlord without getting the latter's consent, as stipulated under the lease. The sub-tenant was a Hebrew, and the landlord had an aversion to Hebrews, claiming that the invasion of the Jewish element into the part of the city where his house was situated depreciated the value of the property.

In rendering judgement the Court granted the plaintiff a certain amount for rent and damages, but refused the cancellation of the lease.

ONTARIO CASES.

A Case under the Workmen's Compensation Act.

At the spring Assizes in Brockville, on April 6, an action for \$1,500, damages for injury received from a rip, or circular bench saw was tried before a jury. The plaintiff was engaged in ripping by means of the circular saw, a piece of wood, for the purpose of packing boxes, into three-inch strips, the board being about three feet long. As he ripped a strip off, he reached back of the saw with his left hand and pulled the piece which he was ripping back preparatory to cutting another three-inch strip. While in this act the board swerved throwing his left hand on the back of the saw. The tendons of his first two fingers were severed and partly destroyed causing in the minds of the medical experts called by the plaintiff, a stiffness which would be more or less permanent. The experts for the defendants considered that an operation might improve the condition of the fingers providing the tendons had not been greatly injured.

While the defendants pleaded in their Statement of Defence that plaintiff met with the accident through stumbling or falling they offered no evidence at the trial on this point whatever, but they did contend that the accident was due to his own carelessness in putting his hand behind the saw to grasp the piece of wood when he should have walked around the table at which he was working and picked the piece of wood up; that is, allowing it to drop to the floor over the rear end of the table, and then return to his place in front of the saw before going through the cutting operation. Witnesses called by the plaintiff, who worked in the same shop with him, deposed that the plaintiff's conduct in reaching to the back of the saw for the piece was the custom there, that they all did it and in fact that it was the custom in all places where similar work was being done. The evid-

ence of the plaintiff and these men who worked with him was that a guard over the saw would have likely prevented the accident, or rendered its occurrence less probable, and that since the accident the saw had been guarded with an adjustable saw-guard which covered the top of the saw so that the only part exposed during the cutting process was that represented by the thickness of the board being passed through. When the piece was sawn the guard dropped to the table. Before the guard was placed on this saw, it projected through the table only about one and one-half inches, the defendants claiming that this table sufficiently guarded saw. Plaintiff claimed that by the provisions of the Factory Act and the Workmen's Compensation Act, the lack of proper guards or protection entitled him to compensation for the injuries sustained.

His Lordship, Mr. Justice Latchford, at the conclusion of the addresses of Counsel, submitted the following questions to the jury for consideration and reply:

1. Was the saw which occasioned the injury to the plaintiff a dangerous part of the defendant's factory machinery? *Answer*—Yes.
2. Was it practicable securely to guard that saw? *Answer*—Yes.
3. If it was practicable securely to guard the saw, was it in fact so guarded? *Answer*—No.
4. Could the plaintiff by the exercise of reasonable care and diligence have avoided the accident? *Answer*—No.
5. What damages, if any, do you find the plaintiff has sustained by reason of the accident? *Answer*—Seven hundred dollars.

(James O'Mara vs. The James Smart Manufacturing Company.)

Postponed Judgement for Wages.

Charles Enberg and Ole Magnussen, two Swedes, with eight others, contracted with Chambers Brothers and McQuigge & McCaffrey to do navvies' work on the Grand Trunk Pacific from Station 400 to Station 443. Enberg and Magnussen are still living in Rainy River, but the other eight have gone back

to Sweden. The contractors paid Enberg and Magnussen, but the others left before they received their pay, and the contractors still have \$1,530 which the eight labourers earned. Enberg and Magnussen brought action against the contractors to recover the unpaid wages earned by their fellow labourers. The contractors, while willing to pay the money into court, refused to pay it to the two Rainy River Swedes on the ground that they had no claim to it. Enberg and Magnussen moved to have the money paid into court and for judgement giving them the money. Chief Justice Meredith refused to make such an order until the eight absent men were added as plaintiffs.

Settlement of Accident Claim.

Mr. Justice Teetzel has approved of the settlement arrived at between A. F. Karajades, administrator of the estate of Chris. V. Safaraes, and The Canada Foundry Company, Limited. Safaraes, while employed at the foundry was killed. The Company pays \$600, one-third of which goes direct to the widow, who, with four children, all infants, is at present in Macedonia. The balance of the money will be paid to her in yearly installments for the support of the little ones. A fifth child, Karsto Safaraes, aged sixteen, is at present in Toronto, and his Lordship directs that he be sent to his mother, transportation and arrears for board, etc., here, to be paid out of the \$600.

ALBERTA CASES.

Master and Servant—Wrongful Dismissal.

Upon an appeal to the District Court of Edmonton, by the Acme Company, from a conviction by the Police Magistrate for the city of Edmonton, under the Master and Servant Ordinance, it appeared that the respondent, who had been dismissed from the Company's service by the appellant Company, had been employed by the appellants as the head clerk of a department. A certain clerk under him in the same department stole certain articles, and the appellants dis-

charged the respondent from their employ, holding him responsible for the theft by the clerk under him. At the time of his discharge he had worked six days of that month. The appellants offered him a cheque for the six days, which he refused, and he then laid an information under the Master and Servant Ordinance for improper dismissal. No claim was made for the six days' work. The appellants took the objection that the Police Magistrate had no jurisdiction to hear the case, as he could only have jurisdiction when there were wages due, and in this case none were claimed as past due. Taylor, District Court Judge, dismissed the appeal. He held that under the Ordinance mentioned, a magistrate can impose a penalty for wrongful dismissal and direct as well the payment of any wages found due, notwithstanding that the complaint is for wrongful dismissal only. He (the judge) sustained the conviction for wrongful dismissal on the evidence, and added to the conviction a direction for payment of the six days' wages at the rate of \$75 per month, less a counter-account, together with the costs of the magistrate's court and of the appeal. He could hardly understand why respondent should be held responsible for thefts in his department when his duties took him away so often. He should not be held responsible any more than the manager, perhaps not as much, as the manager had the power of dismissal and hiring of all employes. The Judge also held that an objection to jurisdiction, not taken before the Magistrate, might be raised on appeal, and that section 753 of the Criminal code did not apply to such an objection.

(*Re Mathie & Acme Company*, 13 Western L.R. 110.)

An Invalid Coal By-law.

Upon an appeal by the defendant, from a conviction made by the Police Magistrate for the city of Strathcona, for selling coal without weighing it on the city scales, as being contrary to a by-law of the city, which provided that all coal sold in the city should be weighed on scales supplied by the city, it was held by Judge Taylor, of the District Court, that the by-law was beyond the

powers of the City Council to pass. The power given by the Municipal Ordinance (R.O. ch. 70, sec. 91, sub-sec. 16) did not extend beyond a by-law to compel dealers in coal to weigh on the city scales, if requested by the purchaser, and he therefore, felt bound to quash the conviction of the appellant for selling coal without weighing, where there was no request by the purchaser. He also held that authority to pass the by-law could not be derived from Title 21, section, 2 of the city charter, which was a general clause giving power to pass by-laws "for the peace, order, good government, and welfare of the city."

(Rex v. Frankfeldt, 13 Western L. R. 108.)

The Reasonable Worth of Work under Contract.

In an action to recover the value of work done for the defendant by the plaintiff in getting out ties, under a contract in writing, it was held upon the evidence, by the full court of Alberta, affirming the judgement of Mr. Justice Beck, that the plaintiff acquiesced in and agreed to an altered arrangement by which he was to place the ties in a place other than that originally agreed upon; that the old contract was abandoned, and nothing more than a new implied contract was created, under which the plaintiff would be entitled to receive what the work was reasonably worth; and, this being so, that the old contract price was not necessarily to be taken as an unalterable basis of arriving at the value of the work done, but only as one element in arriving at an estimate. The Court, therefore, upon the evidence determined what it was reasonably worth to place the ties at the place designated in the contract as altered, and gave judgement for the plaintiff for the amount so found.

(Vanscoyoc v. Simons, 13 Western L. R. 125.)

ENGLISH CASES.

What is an "Accident"?

The strain of work and organic defect were balanced recently by the English Law Lords in considering the cause of a fatal accident to a workman. Reserved judgement was given on an appeal by Clover, Clayton and Company, from the County Court Judge of Lancaster, in a claim made by the widow of a workman named Hughes, who died while working in a ship in the appellants' yard. The question was whether his death was or was not due to "accident." The man was tightening a nut with a spanner, and in doing so strained himself and ruptured an aneurism of the aorti, which caused his death. The county court Judge awarded the widow £300. The post-mortem examination showed that the aneurism was in so advanced a condition that it might have burst while the man was asleep, and that very little exertion or strain would be sufficient to bring about a rupture.

The Lord Chancellor, in the course of a long judgement, said that an "accident" had been defined in that House as "an unlooked-for mishap, or an untoward event, which was not expected or designed." His Lordship's opinion was that he was bound by the finding of the arbitrator, and he found that the strain contributed to the death. There was evidence on which the learned Judge was entitled so to find, and, therefore, the Lord Chancellor advised their Lordships to affirm the order of the Court of Appeal. Lord Macnaghten and Lord Collins read judgements to the same effect.

Lord Atkinson and Lord Shaw both dissented. Neither thought that the event was unexpected so as to make the death the result of an "injury by accident." By a majority of three to two the appeal was dismissed.
