THE LABOUR GAZETTE

JULY, 1909.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JUNE, 1909.

I.—GENERAL SUMMARY.

THE feature of the month which had the most far-reaching effect on general industry and labour was the excellent growing weather which prevailed throughout the Dominion, especially during the second half of the month. Notwithstanding that the completion of seeding was fully two weeks later than last year, it was estimated at the close of June that the condition of the grain crops was little behind that of the corresponding date in 1908. The grain plant, moreover, was reported healthy, and the outlook was for good to heavy agricultural yields. As a result, manufacturing and general trade showed additional buoyancy, following upon the steady process of revival of the past few months. The building season also promises to be one of unusual activity the amount of building already contracted for largely exceeding that at the corresponding date in 1908. Lumbering and mining showed an improvement compared with the preceding month, and transportation companies of all kinds reported increased earnings compared with June, 1908. The market for unskilled labour was well absorbed in most localities at the end of June, and in a few centres a scarcity was already reported as a result largely of the heavy demands for men to work in the railway construction camps and on civic improvements, both of which fields of labour became considerably more active during

the month. With favourable weather, prospects for the rest of the year are regarded as promising, the outlook being for a continuous though steady expansion in general industry as the season advances.

Changes in Wages and Hours.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the department of Labour, during June:—

Building.—At Hull, Que., plumbers (9) had their wages increased from 33 to 35 cents per hour, and steamfitters (8) from 38 to 40 cents per hour. Lathers (100) at Ottawa, Ont., had their wages advanced 25 cents per 1,000.

Metal.—Sheet metal workers (74) at Ottawa, Ont., had their wages advanced from 25 to 30 cents per hour, Saturday afternoon to be allowed off.

Printers.—Job printers in Ottawa, Ont., received a substantial increase in scale. At Hamilton, an increase for the same class took effect.*

General transport.—Street car employees (20) at Quebec, Que., had their wages increased one cent per hour to date from July 1.

*See report of Ottawa and Hamilton, Ont., correspondents. The text of the new Ottawa agreement was published in full under the heading: "Recent Industrial Agreements," in the June issue of the *Labour Gazette*.

Civic employees.—Teamsters (40) employed by the corporation of Ottawa received an increase in wages from \$3.85 to \$4.32 per day. Corporation labourers (10) at Sault Ste. Marie, Ont., had their wages advanced from \$1.75 to \$2.00 per day.

Unskilled labour.—At Hamilton, Ont., street railway labourers received an advance from 15c. to 17c. per hour.

Cost of Living—Prices.

From the standpoint of cost of living, the most noteworthy developments of the month were the increase in the price of bread at many points and the high level of meat prices. The former was a result of the prevailing high prices of wheat and flour. Soda biscuits advanced sharply from the same cause. Meats showed a tendency to decline in the closing days of the month. Other farm produce sold at high prices, though butter and eggs declined in the last week of June. Oats were very high. The metal markets were quiet, buyers not making purchases ahead of requirements; speculation in tin and copper caused some advances in these metals. Leather was upward. Real estate values remained very firm.

Interruptions to Industry.

Among industrial and other establishments and buildings destroyed by fire or other cause during June, as reported in the press of the Dominion, the following may be mentioned:

Nova Scotia.—Store, dwelling, express office and barn at Joggins' Mines, loss, \$30,000; furniture factory at Halifax, loss, \$30,000; hotel at Sydney.

The schooner *Omega* laden with coal was wrecked at Arichat, N.S., on June 8, and became a total loss.

Prince Edward Island.—Hotel at Charlottetown, loss, \$10,000.

New Brunswick.—A considerable portion of the village of Bath was destroyed by a forest fire, loss, \$22,000; saw-mill and lumber at Glen Titus; general store and dwelling (partial) at Jerusalem, loss, \$1,000; copper shop and lumber at Pokiok; saw-mill (partial) and tannery at Woodstock, loss, \$5,000.

Forest fires during June caused heavy damage in New Brunswick. It was estimated that over 10,000 acres of timber lands were burned over.

Quebec.—Grocery store and dwelling at Bordeaux, loss, \$15,000; store and contents at Chapeau, loss, \$8,000; floating lighthouse at Chateauguay river; general store, hotel, machine shop and 2 dwellings at Fort Coulonge, loss, \$75,000; saw-mill at l'Ange Gardien; railway sta-

tion at Massawippi; outbuildings and season's make of maple sugar at Kingsley Falls, loss, \$1,000. At Montreal gas works (partial); jewellery store, business block, loss, \$12,000; bakery (partial) loss, \$1,000; hardware store, loss, \$20,000; 4 stores and 3 dwellings, loss, \$7,000. Summer resort at North Hatley, loss, \$60,000; sash and door factory, lumber and 40 residences at Quebec, loss, \$125,000; two saw-mills, lumber and a large portion of the village of St. François, loss, \$200,000; saw-mill at St. Alexis des Monts, loss, \$6,000; church at St. Gabriel de Brandon, loss, \$19,000; warehouses and dwellings at Sorel, loss, \$7,000; saw-mill at Moe's river, loss, \$2,500.

Forest fires caused heavy damage in the Lake St. John and Bonaventure county district.

In a collision near Isle Raisins, St. Lawrence river the river boat *Pierreville* was struck by the S.S. *Torgorn* and foundered.

The S.S. *Campana* struck a reef in the St. Lawrence off St. Valier de Bellechasse and sank.

Ontario.—Summer hotel and dwelling at Bala, loss \$50,000; outbuildings and contents at Balacava Mills; barber shop and grocery store at Barrie; button factory at Berlin, loss, \$150,000, (150 hands out of employment) lively stable and machine shop at Blenheim; bakery at Cornwall, loss, \$1,000; spice mill at Hamilton, \$6,000. At Ottawa, business block, loss, \$20,000; lively stable and 7 residences, loss, \$6,000; stores, loss, \$6,000. Railway tank car and 2,000 gallons of gasoline at Port Arthur; business block at Streetsville, loss, \$30,000. At Toronto, coopeage, loss, \$8,000; poultry yard and chickens, loss, \$1,000; garage, loss, \$11,000. Store and dwelling at Villanova, foundry at Warton, loss, \$2,000; saw-mill (partial) at Woodstock, loss, \$1,000; store at Port Hope.

On June 9, a lock on the Sault Ste. Marie Canal was struck by the S.S. *Walker* and swept away causing damage estimated at \$500,000.

On June 28, the freight steamer *Tempest H.*, was burned to the water's edge at Parry Sound.

Forest fires in the Elv Lake district caused considerable damage to standing timber.

Barns were destroyed by fire at Flesherton, Mohawk, South Augusta, Westminster and Woodstock.

Manitoba.—Saddlery company's premises at Winnipeg, loss, \$400,000.

Forest fires in the Dauphin district caused about \$75,000 worth of damage to property.

Saskatchewan.—Saw-mill and 100,000 feet of lumber at Carrot river; laundry at Moose Jaw; hotel, stores and warehouse at Abernethy, loss, \$25,000.

Alberta.—Saw-mill at Banff, loss, \$10,000; store a Calgary, loss, \$3,000.

British Columbia.—A dam at Surprise Lake in the Atlin district gave way and the water wrecked a railway bridge costing \$250,000 and a saw-mill and other damage estimated at \$75,000. The coasting steamer *Coquittam* was almost totally destroyed, loss, \$30,000. Floods caused a heavy loss of logs in the interior of the province.

Conditions in the Industries and Trades.

Conditions of employment during June in the several industries and trades throughout Canada, as indicated by the reports of correspondents of the *Labour Gazette* and by information received at the Department from other sources, may be briefly summarized as follows:—

Agriculture.

From all sections of Canada crop reports received during June were of a fa-

avourable character. The weather was for the most part warm with a fair supply of moisture, and growth during the latter half of the month very rapid. Notwithstanding that seeding was fully two weeks later than last year, owing to the backward spring, it was estimated that this loss had been recovered both in Ontario and the western provinces at the close of June. Wheat throughout the west was reported as looking better than the average. The hay crop will be fair, though the drought of last autumn has prevented a heavy crop in many localities. Dry weather during May and June affected the yield in the Maritime Provinces. The Ontario alfalfa crop has been heavy, and was safely gathered in the closing week of June. Pastures were in excellent condition and fruits were coming on well. The yield of small fruits was unusually heavy, especially in Ontario. The first shipment of strawberries from the Niagara district to the Canadian west was made during June. Experienced farm labour was scarce and in demand. Prices for farm produce of all kinds continued high.

In Alberta a considerable amount of wheat was winter killed and has been re-seeded to oats.

The first crop and live stock bulletin issued by the province of Saskatchewan showed an increase of 10.08 per cent. in acreage.²

The secretary of the Northwest Grain Dealers' Association estimated the increased acres under wheat in the three prairie provinces as approximately 4 per cent.

In the Maritime Provinces the outlook is for a good average agricultural yield. The acreage in potatoes in the lower St. John Valley is much larger than last year

Fishing.

Mackerel struck in large quantities on the Nova Scotia coast and some heavy catches were made. Shipments to the American market were larger than for several years past. Lobster fishing was actively prosecuted throughout the month

but catches were lower than last year, and in some sections were very light. Fair catches of cod and halibut were taken. On the Great Lakes conditions were unchanged from last month. In British Columbia interest centered on the preparations under way for the sock-eye season. The present is the year of the "big run" of sock-eyes, which occurs every four years, and upwards of 12 traps will be in operation off Vancouver Island, while the number of cannerie throughout the province will be 73. High water in the Fraser river prevented fishing during June. Representations were made to the government of Canada during June by the British Columbia Cannery Association with reference to close season and other Federal regulations.

Lumbering.

Conditions showed an improvement throughout Canada compared with the preceding month. In Ontario and the eastern provinces the drives have been unusually successful and very few logs will be left in the streams. The high water which caused embarrassment at the mills during May fell rapidly and conditions were normal by the middle of June. The cut, however, it is thought, will be lighter than last year owing to the delay ensuing from this cause and from the backward spring. In British Columbia still further improvement was reported, both from the mountain and coast mills. There was also some revival in logging operations. Some loss was caused in the mountain section by high water in the streams, several booms on the Kootaney river having broken away.

For the purpose of encouraging tree planting on the prairies for fuel and protection from storms, a special meeting of the Canadian Forestry Association will be held at Regina, Sask., September 3-4.

The government of Nova Scotia will shortly undertake a thorough and expert examination of the timber and pulp wood resources of the province.

An important event of the month was the opening of the inquiry of the International Waterways Commission at Van Buren, Maine, for the taking of evidence

² For detailed information with regard to the scale see report of the Regina correspondent.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has references only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

City and district of correspondent.	Agricultural operations.	Fishing.	Lumbering (including saw-milling.)	Mining.	Manufacturing.	Railway construction.	Building trades.

with reference to the question of logging privileges on the St. John river.

Mining.

There was a further increase in activity in the Nova Scotia collieries and both out puts and shipments were well maintained, though the Springhill district was quiet. The output for the year thus far has been less than during the corresponding period last year. In Quebec the asbestos mines were more active than in several months past. The mica market, however, remained dull. Operations in Hastings and Frontenac counties in eastern Ontario were active. Conditions in the Cobalt camp showed little change. In British Columbia an improvement was reported in the metalliferous camps, and coal mining both in the Crow's Nest Pass and on Vancouver Island was becoming active. As a result of labour disturbances in Alberta, the coal supply in that province was becoming exhausted.

Manufacturing.

From all the leading industrial centres reports received were of a steady increase in the activity of manufacturing establishments. Staffs were increased in nearly all branches and full time was the rule. An increase in demand during the past month was particularly noticeable in the case of agricultural implements and in heavy construction material, though the upward tendency was general in view of the further expansion of the western market. With continued favourable crop reports the outlook is for active to busy conditions in the manufacturing industry for the rest of the season.

The annual meeting of the Dominion Iron and Steel Company was held at Montreal during June. In the annual address of the president reference was made to the satisfactory outcome of the suit against the Dominion Coal Company, which was stated to have met the claims of the Steel Company in a fair minded spirit. The Steel Company thus far has received \$2,750,000 damages.

With regard to the business outlook the president spoke as follows:—

Turning to the past year's business, we might well repeat what was said at the last annual meeting. We have passed through a time of depression, and we have seen every steel plant on the continent shut down for shorter or longer periods, except our own. The reports of most of the iron and steel companies in the United States have naturally shown lessened earnings, and although we have kept our works in full operation and have maintained the volume of business, with steady employment and no decrease in wages of our men, we have naturally shared in the disadvantages of a slackened demand at home for our products, and of the lower prices that have prevailed. The export business has served a good purpose, and, so far as we can judge, was satisfactory on both sides. The outlook is now much more hopeful, but it would be a mistake to expect an immediate return to our former position; that is more than we should look for either in our own business or in the business of the country generally. I think that the depression has passed away, but we must expect a period of quiet recuperation before we get back to a full tide of prosperity.

Experts have made a thorough examination of the plant of the company during the past year with satisfactory results. Large extensions, including a new blast furnace, new coke ovens and a new finishing mill will be proceeded with at once.

Railway construction.

Railway construction camps took on still further supplies of men during June and in some localities all available labour was absorbed. The work proceeded under favourable conditions and satisfactory progress was reported.

The Grand Trunk Pacific Company announced during June that the following contracts for branch lines have been let: Eighteen miles of Yorkton-Melville branch to Messrs. Rigley and Hyland, Winnipeg; thirty-five miles of Yorkton to Regina branch to McMillan Bros. and Kenny limited, of Winnipeg.

After two and a half years work the last of the 67 steel towers of the Canadian Pacific Railway Company's bridge on the Lethbridge-Macleod cut-off was completed during June. The entire work, it is expected, will be finished in August. The structure is to cost \$1,500,000 and is 1 mile and 47 feet in length, its height at the highest point being 312 feet.

General Transport.

Railway, steamboat and canal employees had a good month. General freight traffic was steadily increasing. Passenger traffic compared favourably with 1908, the tourist season having opened in the closing week of the month and the volume of immigrant arrivals being heavy.

A break in the canal at Sault Ste. Marie delayed traffic for some days, but repairs were completed and lockage recommenced on June 21.

The Board of Management of the Intercolonial Railway recently appointed by the Dominion government completed a tour over the system during June and inaugurated a number of economies. The staffs were materially reduced at several points.

Street railway employees had a busy month and longshoremen an active one.

The Board of Railway Commissioners recently issued an order granting independent telephone companies the right to place telephones in all railway stations. Previously the Bell Telephone Company held exclusive rights to this privilege on many of the railway lines. In view of the numerous accidents which have occurred owing to the location of switch stands being too close to the track, the board also considers it advisable that the railway companies be required to remove all switch stands and other obstructions, to a distance six feet clear of the main line, and in cases where high switch stands cannot be removed to this distance, that they be replaced by a dwarf switch.

The first regular train on the Grand Trunk Pacific left Winnipeg on the morning of the 14th of June to go through to Scott, a distance of 569 miles.

The Trades.

Building.—There has been a very material revival in building activity, throughout Canada during the past three months. Especially noticeable has been the increase in house building, but a large number of industrial structures have also been begun. Employees in nearly all classes have had a very active month, with local exceptions, and there is every prospect of a continuance of the same conditions throughout the rest of the building season.

Metal and woodworking.—Employees in industrial establishments reported a further increase in activity during June in nearly all localities.

Printing.—The allied trades were well employed.

Clothing.—The month was favourable for tailors, garment workers, boot and shoe workers, etc.

Leather.—Tanners, curriers and leather workers had a fair month, conditions showing an improvement compared with May.

Textile.—Some increase in activity was reported.

Food and tobacco preparation.—Bakers reported an appreciable increase in sales of bread. Confectioners, cigar makers and tobacco workers were fairly active.

Miscellaneous.—Hotel and restaurant employees were more active with the opening of the tourist season. Other miscellaneous employees had a fair month.

Unskilled labour.—The available supply of this class was well absorbed in nearly all industrial centres, and in some localities, including Winnipeg, there was a demand for additional men.

There has been a very considerable increase in elevator capacity in the Northwest provinces during the past year. At present the total capacity of western Canadian elevators is estimated at 64,000,000 bushels, 22,750,000 bushels being at terminal points and the rest at interior points. It is anticipated that in view of the elevators now projected the capacity of interior elevators will exceed 50,000,000 bushels before the close of the year.

Canadian Trade and Revenue.

Foreign trade.—During May, 1909, the total value of imports entered for consumption was \$28,159,077, compared with \$23,424,684 in May, 1908. For the first two months of the fiscal year ending May 31, 1909, the total value of imports entered for consumption was \$50,760,648, compared with \$43,626,293, in the corresponding period last year. The total value of domestic exports during May, 1909, was \$15,810,207, compared with \$13,906,472, in May, 1908. The total value of domestic exports for the two first months of the present fiscal year, ending May 31, 1909, was \$27,673,004, compared with \$24,201,300 in the corresponding months of last year. During May, 1909, there was an increase in exports of the mine, the fisheries, the forest, animals and their produce and in manufactures, and a decrease in agriculture. The grand total of Canadian trade for May, 1909, was \$44,911,736, compared with \$37,882,077 in May, 1908. For the first two months of the present fiscal year, total Canadian trade was \$79,910,590, compared with \$68,852,664 in the same months of 1908.

An opening for Canadian canned meats, lard, fish oils and flour was reported in Italy. There was also reported an opening for Canadian furniture in Cuba.

Imperial trade.—Canadian basswood broom handles, printing paper, motor cars and hay found a good market in Great Britain. Openings for Canadian stoves and tree felling machinery, were reported in South Africa and Australasia.

Domestic trade.—Domestic trade, wholesale and retail, showed on the whole a steady improvement throughout June. Following the completion of seeding country trade was more active. Collections were well met, money being fairly plentiful. The trade in summer dry-goods has been satisfactory.

The May bank statement showed a decrease in current loans by Canadian banks and a small increase in circulation. Call loans outside the Dominion showed a heavy increase. Deposits showed an increase of approximately, \$10,000,000.

The ninety-first annual report of the Quebec Bank showed a falling-off in

profits as a result of the lessening demand and comparable cheapness of money during the past year. Four new branches were opened. The Home Bank, reported a large increase in savings and current deposit accounts, as well as in profits. The sum of \$35,948 was added to rest account. The thirty-fourth annual statement of the Imperial Bank showed deposits and savings accounts to have increased materially.

Canadian revenue.—Canadian revenue for the month of May, 1909, amounted to \$7,233,563.03, compared with \$6,306,270.66 in May, 1908. For the first two months of the fiscal year 1909-10, to May 31, 1909, the total revenue was \$13,613,974.55, as against \$11,899,381.47. in the same months of 1908. The total expenditure on capital account during May, 1909, amounted to \$809,773.88, compared with \$429,828.35 in May, 1908. For the two months ending May 31, 1909, the total expenditure on capital account amounted to \$1,101,013.98 compared with \$445,446.72 in the same months of 1908. The leading items of expenditure during May, 1909, were public works, railways and canals, \$389,989.92; railway subsidies, \$164,172.29; bounties, \$142,333.39 and Dominion lands, \$111,773.78.

Notes.

Mr. G. E. Gordon of Vancouver, B.C., has been appointed an inspector under the British Columbia Factories' Act of 1908.

The citizens of Edmonton voted in favour of Sunday cars during June by a large majority.

The bread and cake manufacturers' Association of Canada met in convention at Niagara Falls, Ont., June 16-17.

The Dominion Wholesale Grocers' Exchange held its annual convention at Vancouver, B.C.

The Vancouver, B.C., Employers' Association will open a free employment bureau.

On June 15, a number of Ontario municipalities interested in the question of claims for royalties set up by septic tank companies met in conference at Toronto.

The nineteenth annual convention of the Canadian Electrical Association took place at Quebec, Que. Some 130 delegates were present.

The Canadian Street Railway Association held a convention at Winnipeg, Man.

A dining-room for the workmen employed by the McClary Stove Company, London, Ont., was opened during June. The room is about 100 by 100. The men are provided with hot water and towels for cleaning their hands, and in addition tea, coffee and the necessary dishes have been supplied without cost to themselves. The dishes are thoroughly sterilized after each meal. To the other inducements are added current periodicals, and playing cards, and a quiting ground. The action of the firm is an effort to improve the health conditions of the men. Formerly they were in the habit of staying in the workrooms and eating their lunch in the odors that are at necessary adjunct of certain processes. Now the men are compelled to leave the works promptly at noon and are not permitted back again until 12:45.

An agreement has been signed on behalf of the city of Port Arthur with a company, known as The Western Dry-dock and Shipbuilding Company, Limited, calling for the construction, equipment, and operation of a dry-dock capable of receiving the largest vessels on the great lakes, and a shipbuilding plant capable of building such vessels. The plant would employ three hundred men from the start.

In connection with the occurrence of certain labour disputes among workmen engaged in the erection of the provincial parliament buildings at Regina, Sask., and in order to determine a fair minimum wage to be paid to the various classes employed thereon, the government of Saskatchewan conducted an investigation during June and announced a scale of wages, to come into effect from May 26, the date of the disturbances in question.*

On June 24, a deputation representing the leading meat packing concerns of

Canada, waited upon the Dominion government, to discuss the administration of the pure foods' act. The deputation urged the necessity for co-operation between the government of Canada and the provincial legislatures and the bringing into effect of provincial acts to supplement the existing federal legislation. It was pointed out that the federal act only deals with firms doing an inter-province or export business, and that there was a necessity for similar regulations to control the packing industries doing a local trade. Another question discussed was that of compensation for animals seized.

The Provincial board for granting certificates to colliery officials in Nova Scotia held the examinations during June at Halifax. A number of applicants failed to pass. From Cape Breton, of 32 applicants for manager's certificates, but 6 passed; for underground managers 10 failed, and for overmen, 15 failed. From Pictou, of 23 applicants, 3 passed for managers, 9 for underground managers, and 3 for overmen. From Inverness, out of 9, 8 passed, 3 of them for managers, 2 for underground managers, and 3 for overmen. Of 19 candidates from Cumberland, 4 passed for underground managers, and 4 for overmen.

The Pattern Makers' League of North America held its twelfth annual convention at Toronto, Ont. About 100 delegates were present from Canada and the United States, representing a membership of over 7,000. The receipts of the League during the year were \$166,774.08, out of which \$45,229 were paid in sick and death benefits and \$50,934 in connection with labour disputes. It was decided to levy a per capita tax of 5 cents per week for the purpose of strengthening organization. A report on the Law Committee to abolish the district councils and to concentrate all business and management of the organization at headquarters, was adopted. Apprenticeship is to be extended from four to five years, and technical education is advised. Where there is no technical school, pattern-makers are urged by the League to establish a training school of their own,

* For further details see report of Regina, Sask. correspondent.

instructing the apprentices in mechanical drawing, geometry, trigonometry, and other branches of study of use to the trade. Apprentices are to be more thoroughly organized. Objection is taken to such work as sweeping, as it is held that apprentices should learn their trade as soon as possible.

The first annual meeting of the Brantford Co-operative Association was held during June. There being a good attendance of members. In submitting the financial statement for the year the President, Mr. George Keen, remarked that had the organizers of the Association anticipated the prolonged depression of trade they would probably have deferred inauguration until industrial conditions were more conducive to immediate success. In a time of exceptional stress, however, they had succeeded in creating an absolutely new business on spot cash lines in a city where it is said the credit system is particularly predominant. The opportunities of employment were now rapidly becoming normal and it was consequently hoped the members would be able to extend to the association full loyalty. The membership of 214 was, he further said, sufficiently large even without increase, to pay a substantial dividend on purchases if the members were able to give all their trade. The president intimated that he had been asked by the Co-operative Union of Canada to bring under the notice of the annual meeting a scheme whereby it is proposed to issue a 16-page monthly journal for circulation by the various societies in the Dominion to give

expression to co-operative principles under the auspices of the Union, the same to be conducted on a co-operative basis as to profit and loss. It was resolved to leave the matter in the hands of the board.

As recently announced the members of the Commercial Telegraphers' Union of America employed by the Canadian Pacific Telegraph Company have re-organized under what is known as the local system plan. The organization is divided into districts to correspond with the various divisions of the Canadian Pacific Railway Company, namely, Pacific District, Western District, Central District, Lake Superior District, Ontario District, Eastern District, and Atlantic District. For each of these districts there is a vice-president, and a committee of three selected by the vice-presidents and endorsed by the members employed in the district. These with the president and secretary-treasurer comprise the executive of the system. Mr. Charles E. Hill of Toronto has been elected President, and Mr. D. Warner of Winnipeg, secretary-treasurer. The president of the system will perform the functions of general chairman, while the vice-presidents will act in a similar capacity for their respective district. The president also acts as chairman of the Eastern lines committee, and the secretary-treasurer, who is vice-chairman of the general committee, becomes chairman of the Western lines committee in matters pertaining exclusively to the respective sections.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were active throughout the month. All the large industries continued busy, and were operated to

their full capacity. The smaller works shared the general prosperity. The weather was very favourable to rapid growth, and corps of all kinds are showing up well.

Every department of the Sydney steel works was fully employed, and an effort was made to make June a record month. The rod mill was double shifted, as were some of the other departments. Orders for steel products are

plentiful, and rail orders are booked which will keep the mill running steadily for upwards of seven months. Beside the five hundred coke-ovens that are to be constructed, a blast furnace will be built. Machinery for construction work is on hand.

The Nova Scotia Steel and Coke Co., had a busy month. The steel department was active, while the mines will show increased outputs. A large amount of prospecting was done by this company on their ore areas at Wabana which showed an enormous quantity of ore. The company will ship more ore this year than in any past year.

The Dominion collieries were active, and the June output was large. Considerable coal was filled from the coal heaps, yet there is a large supply on hand. All the Inverness collieries were very active.

Transportation by water was brick, but rail transportation fell off during the month. A number of employees of the I.C.R., were laid-off. A night service from Sydney began on the 28th.

The building trades were not so active as in June of last year, and carpenters state that employment is scarcer than for many years.

Examinations for mining engineers and other mining positions such as overman, underground-manager, and manager, were held. A large percentage of the candidates were successful in obtaining certificates.

A Board of Conciliation under the Industrial Disputes Investigation Act was appointed at Florence, C.B. The Chairman Judge Chipman with Judge MacGillary and D. McDougall went into the mine in order to better understand the facts placed before them by the witnesses.

The Mira Brick Company is enlarging the capacity of its kiln to enable it to meet the demand. This brings up the capacity of the plant to 1,250,000 bricks per year.

Wholesale and retail trade had a fair month, but business was unsettled, owing to labour unrest. Labour of all kinds was abundant, though the skilled trades were generally active.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Although the spring was late and growth retarded by cold weather, the sudden change to warm rains and sunshine, has had a good effect, and an abundant hay crop is in sight. All other crops are doing well.

Fishing.—Fish has been very plentiful. Good catches of mackerel have been obtained, while herring, cod and lobsters have been caught in great quantities. The recent agitation among the lobster fishermen will lead to a large number of them packing their own lobsters, as many of them have obtained licenses.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was a falling off in shipments from the various coal centres during the month of May, 1909, compared with the month of May, 1908. Disputes during the early part of the month caused a considerable reduction in the output. The Drummond colliery showed a decrease in shipments of about 10,000 tons. For the five months ending May 31st, 1909 the province shows a decrease in shipments of about 430,000 tons.

There has been considerable work performed on the various roads and bridges in the district.

Teams were busy hauling the spring cut from the different lumber mills to shipping points along the railways.

The outlook in this district at present is not very promising for a good hay crop. There has been a very meagre rain fall since spring opened. The general crops are at present much in need of rain.

The manufacturing industries were actively employed.

The mining industry in this district was well employed during June.

The skilled trades were generally active.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As May showed improvement over April, so June showed similar improvement over May. While building and repairing operations were not sufficiently active to afford employment to all, there were few idle hands. The building permits of the first six months of 1908, numbered 291, with a value approximately of \$368,239. For the first six months of 1909, the number of permits was 301, with a valuation of \$390,962. Last year the permits embraced some for building and repairing operations of an extensive character, while those of this year call for a greater number of buildings, and betoken a greater degree of building activity. Work on all the big buildings has steadily progressed, notably on the Technical College and the new round house for the government. On the latter there are now some 60 hands employed, and the structure will probably be finished by September. There are about 30 hands employed on the post office repairing contract, and good progress has been made. Much freight has been handled along the waterfront, including some large shipments of sugar. The corporation works department, although not as busy as in corresponding periods of other years, paid out in wages on June 4th, \$3,860.10, and on June 18th, \$4,036.04.

The excavation for the new lead reduction works at Dartmouth has been commenced. The new factory is to be operated by the Starr Manufacturing Co. It will have a floor area of 3,600 square feet, an engine room 30 ft. x 20ft.

CONDITION OF LOCAL INDUSTRIES.

Agriculture is making good progress. Crops with continued good weather should be up to the average.

Fishing.—Mackerel struck in large quantities and local fishermen made

some good hauls. The fish made their appearance early in June. The schooner *Monica*, Captain Thomas, brought in some 50,000; the Christian Brothers of Prospect, sent 13,000; the schooner *Kathleen*, 20,000; and schooner, *Theresa*, 15,000. In all some 850,000 mackerel were landed in Halifax the first week in June. The fish was sold in the local market for immediate consumption; a good portion was packed in ice for exportation to the United States, while considerable were "frozen down" for the fall trade. Halibut and cod were taken in fair quantities. A shipment of 3,220 packages was made on June 5th for Rio Janeiro. The cargo was valued at \$23,698.49.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a fair month; there were few idle hands. The demand for the eight hour day has been conceded to by all city firms, with the exception of one, which employes, as a rule, a big staff. Carpenters were busy, as were painters and decorators. Stonecutters had a fair month. Plumbers were about the same as last month.

Builders' labourers were busy. Machinists had a falling off as compared with May. Electrical workers were busy. The union hands in this line are endeavouring to have the city ordinance re certification more rigidly enforced, and that certificates are only to be granted to those who pass the examination as defined by law. Boilermakers were not as busy as in May. Printers and pressmen had a fair month; bookbinders were busy. Tailors had a fair month, but custom work was not as active as expected. Butchers and meat cutters were busy. Longshoremen had a fairly good month, about 75 per cent. being employed. Maintenance-of-waymen, carmen and railway clerks were about the same as in May. Street railway employees had a good month. About 100 employees on government works have been notified that they will be laid off; this will cause a falling off in the demand for those employed in transportation. Unskilled labour had a good month.

DISTRICT NOTES.

Shelburne.—A small steamer was launched from the shipyard of Joseph McGill on May 29. She was built for the North Shore Steamship Co., of Sydney, C. B., and is for passenger and freight service between Sydney, North Sydney, St. Amis, Ingonish, Aspy Bay and Bay St. Lawrence. Her length is 124 feet, with a beam of 25 feet, and is 9 feet deep. She will accommodate about 40 passengers, and after being fitted with machinery by the New Burrill-Johnson Iron Co., will be placed in commission about August 1st.

Yarmouth.—There is now being constructed here the first steel steamer, including boilers and engines, ever built in the Maritime Provinces. The New Burrill-Johnson Iron Co., is the builder. The company now employs about 120 men, but with the advent of new plant now being installed, it contemplates many orders in shipping and other lines. The Burrill-Johnson Co., is also building two wooden passenger steamers, 110 and 125 feet respectively. One will be used on the Bay of Fundy, the other by the North Shore Steamship Co., and will have accommodations for 125 passengers.

One June 3rd the S.S. *Prince Arthur*, sailed from here to Boston with the largest cargo of live lobsters ever shipped from this point, consisting of 1,630 crates, valued at about \$18,000.00. One hundred and fifty barrels of fresh mackerel were also sent.

Lunenburg.—Most of the spring fishing fleet from the banks returned early in June. Thirty-one schooners had reported at the Custom House up to 8th inst., showing a return of 20,325 quintals. The *Aquadilla*, which left to return to the fishing grounds on June 4, met with a mishap off Halifax harbor, and had to return to port for repairs.

AMHERST, N. S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

June closed with labour conditions

largely the same as at the beginning of the month.

The greater number of local industries were operating under normal conditions, giving steady employment. Two of the larger industries, the Rhode Curry Company and the Robb Engineering Company, do not work on Saturdays; this is partly due to the desire for a holiday during the warm weather and partly due to the scarcity of orders.

Building operations were slack. There are a number of private residences being erected but not nearly as many as in 1908 or 1907.

The mining centres have not had a busy month. There have been a good many "off" days but this is generally the case during the summer month.

The Maritime Gypsum Company which suspended operations two years ago has resumed active work, and has now eighty men employed.

There is a feeling of unrest among the miners in the country. A conciliation Board is now considering the differences that have arisen between the men and management.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The spring was late and June was well advanced before the crops were in. Weather was very dry and indications are that the hay crop will be light. Other crops are promising. Prices for farm produce continue high.

Fishing.—Lobster fishing has been a complete failure and although the season does not close until July 20, many of the packers have ceased operating, the catch being so insignificant.

Lumbering.—Prices advanced and shipment to European markets will be larger than was anticipated.

Manufacturing.—In the main the industries were working steadily. A few were complaining of scarcity of orders, but others were increasing their output.

Mining.—Work has been slack in all the collieries except at the Joggins property of the Maritime Coal Company.

The *Railway & Power Company*, is pushing forward its work of development and placing the areas controlled in good condition.

The plaster quarry has taken on renewed activity, and shipments have already been begun to the American market.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported work dull. Carpenters were fairly busy, but the local supply was sufficient. Paper-hangers and painters were busy, but plumbers were very dull and stonecutters dull.

Iron moulders were busy in some shops, dull in others, machinists reported work rather dull. Boiler makers reported slackness of work.

Woodworkers were fairly busy. Car workers were only working half time. Pattern makers were dull.

Printers were fairly busy.

Journeymen tailors were very busy a scarcity of labour being reported. The same applies to garment makers. Boot and shoe workers were very busy.

Trunk and bag makers had steady employment.

A number of unskilled workmen were out of work. Conditions are not improving and the indications point to a dull summer.

CHARLOTTETOWN, P. E. I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during June was satisfactory. In Charlottetown, the chief features were the building of the railway wharf, the equipment of a new railway shop with electrical drives, the commencing of work at the new building for the Canadian Bank of Commerce, and the usual amount of repair work. In other sections of the Island the construction of wharves, the work at the Summerside breakwater, and at the new Elmira branch railway as well as several lesser contracts, were sources of employment. Demand and supply on the whole, were well balanced. By middle of the month the crops were practically all in, and the farmers with some leisure

on his hands, was able to attend more to trading, with the result that business was brisk.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The close of the month finds the crops promising a good yield although more rain would be acceptable.

Fishing.—All departments were in full operation, the lobster business being the most important. The catch up to date, was considerably lower than that of last year.

Mining.—Boring for minerals was concluded at Uigg, but resumed at Wood Islands. Nothing of value has yet been discovered.

Railroad construction and employment.—The principal work carried on comprized the building of wharves at Charlottetown and Souris, and clearing and concrete work along the line of the Elmira branch railway.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, decorators, paper-hangers, plumbers, stonecutters, and builders' labourers were active.

Iron moulders, workers and helpers, machinists and engineers, steam engineers, electrical workers and linemen were active, bicycle workers, were busy.

Woodworkers, carriage and waggon makers and car builders, were active.

Printers, bookbinders, journeymen tailors, boot and shoe workers, bakers and confectioners, butchers and tobacco workers, tanners, carriers, saddlers, barbers, clerks, stenographers, laundry workers and railroad employees were active. The supply of unskilled labour was about equal to the demand.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during June has been satisfactory

though perhaps not as active in all lines as in June 1908. The building trades, however, were more active than at this season last year, 54 permits having been issued so far within the city, 40 of these being for cottages and double tenements and totalling in the vicinity of \$150,000. The majority of these permits are for private residences. In the various outlying suburbs a large amount of building is in progress and builders and contractors are decidedly busy. The I. C. R. Board of Management have been making a personal investigation of conditions upon the Intercolonial Railway several changes were made in the summer time table which came into effect June 27th, the chief of which was the consolidating of the C. P. R. train No. 26, from St. John with the Ocean Limited at Moncton. At Chatham the diversion of the I. C. R. line so as to enter the town was decided upon and surveys will be made. In Moncton it was decided to instal safety gates at the Main Street crossing and electric gongs at the street crossings for the protection of the public. Sunday trains will not be put on as public sentiment is adverse. A new branch to be known as "business opportunities" will be added to the Traffic Department for the purpose of encouraging the establishment of industries and increasing the better classes of freight. Reductions in the staff at various points upon the road were also made. At Moncton twelve men and boys were laid off in the General Offices and sixty-eight men in the shops. Twenty-two of these by length of service were eligible for the Provident Fund and were placed upon it.

Serious forest fires prevailed during the first half of June in York, Carleton, Victoria, Restigouche and Northumberland counties and damages to timber lands amounting to \$300,000 occasioned. A number of farm houses in the back districts were also burned. Couillard and Guinonts mill near Campbellton a large amount of lumber, shingles and outlying buildings were burned on the 11th inst. the residents having to abandon everything. Dickenson's tannery at Woodstock was burned June 9th.; loss \$90,000, and several men thrown out of employment.

A serious fire also occurred at Bath Village 9th inst., loss, \$30,000.

The warrant for the city assessment this year is \$100,893 as against \$93,340 in 1908. The rate of assessment is 2 per cent. as compared with 2.02 per cent. in 1908, and 2.4 per cent. in 1907.

Retail trade has been active and wholesale trade fair, no material changes in hours of labour or rates of wages were noted and no friction occurred between employers and employees.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very active, the season being very favourable for planting operations. The acreage of crops is in excess of last year. Cool and dry weather the first half of June had a bad effect upon upland hay which does not promise well. Farm help is still scarce. Produce quotes at fairly high prices. Meats of all kinds are hard to obtain. Much Ontario beef is on the market the local supply being insufficient. Dairy produce is abundant, country butter rating at 20c.

Lumbering.—The season has been very favourable for river driving and all the drives upon N. W. & S. W. Miramichi, Nashwoak and Nepisignit are in. The mills were running very actively and many heavy shipments of deal made.

Railroad construction and employment.—Much repair work to the roadbed upon I. C. R. is under way. About 1,200 men are at work upon the International Ry., which is expected to be completed this autumn. Upon the Central Railway a large force of men is working on general repair work and a new iron bridge is to be built across the Washademoak. The estimates for the Transcontinental Railway for work in New Brunswick in May were \$423,547. June is expected to show a substantial increase.

CONDITION OF PARTICULAR TRADES.

Building.—Bricklayers were dull, but carpenters were in good demand at \$1.75 for rough and \$2.00 to \$2.75 for skilled workmen. Painters and decorators were active at \$2.00 to \$2.50 per day. The

greatest demand in this line is for men who combine the trades of painting and paperhanging. Plumbers were active, also stonecutters and builders' labourers.

Metal.—Normal conditions prevailed in the various trades and no material changes from last month's conditions were noticed.

Woodworking.—All woodworking factories throughout this section were active the demands for joiners work being heavy.

Printing.—Printers and pressmen were well employed and all other lines active.

Clothing.—Journeyman tailors, garment workers, milliners and milliners apprentices were active.

Food and tobacco preparation.—Bakers and butchers were active.

Leather.—Conditions were quiet.

Miscellaneous.—Barbers were active. Clerks and stenographers were in fair demand. Hotel and restaurant employees were busy, also theatre employees and laundry workers.

Transport.—Freight traffic was some what below last year's, but passenger traffic was heavy, showing an increase towards the end of the month. Regular train crews were steady, but there were fewer specials. Teamsters and express men were busy.

Unskilled labour.—The demand was good at wages ranging at \$1.50 per day the supply however has proved sufficient and while operators appear to have the requisite number of labourers there seems to be very few unemployed.

DISTRICT NOTES.

Campbellton.—Building shows an increase over last year many private cottages being erected. Two S. S. lines are running between here and Gaspé this season.

Bathurst.—The Municipal Council of Gloucester County on June 10th adopted resolutions pledging a bonus of \$25,000 to the Drummond Co., if they brought the Railway from the iron mines to Black Cut and thence to Bathurst Harbour. This line will be 16 miles long, the contract for construction has been let and work commenced. The Drummond Co.,

has also an option on the Adams Burns Co's Mill property.

Sackville.—Tenders are being called for the erection of a wharf extension and breakwater at Pink Rock Gypsum quarries.

ST. JOHN, N. B., AND DISTRICT.

Mr. W. H. Coates, correspondence, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of June was more active than the preceding month, masons, carpenters and stonecutters being well employed, while other out-door work was active. Work has been commenced on the new building for the Bank of New Brunswick on Charlotte street. The Savings Bank transactions for the month of May were: Deposits, \$51,701.02; withdrawals, \$68,438.73—Bank clearings for the four weeks ending June 24 were \$5,285,285, and for the corresponding period last year \$5,251,200, being \$34,085 greater in 1909 than in 1908, and \$1,307,516 less than during the five weeks ending May 27 of the current year. The St. John Street Railway Company held its fourteenth annual meeting June 9. After providing for interest on the bonds and all other charges, a net profit of \$52,980.58 out of which two half-yearly dividends of 3 per cent. amounting to \$48,000 was declared, leaving a balance of \$4,980.58 which was transferred to profit and loss account.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from the farming districts state that the strawberry crop promises to be a heavy one. The outlook is good for garden produce. The hay crop is backward, but it is expected that it will be a good one.

Lumbering.—The annual meeting of the Nepisiguit Lumber Company was held at the office of the secretary in this city early in June. It was decided to increase the capital stock from \$100,000 to \$500,000. This company already holds

some valuable mill and lumber properties in Gloucester County, including the Stacey mill, and the object of increasing the capital stock is to make additional purchases. The mill at Bathurst and the lumber lands of the Adams Burns Company, Limited, have been bought. The lumber operations on the Upper St. John River have been very successful, all the drives reaching safe water. Forest fires did a large amount of damage all over the province.

CONDITION OF PARTICULAR TRADES.

The building and woodworking trades were from active to busy. Sheet metal workers were dull but other metal trades had a good month. Printers and pressmen were very busy. Bookbinders, journeymen tailors, bakers and confectioners, cigar makers, brush and broom makers were active. Railroad conductors, locomotive engineers, firemen, railroad telegraphers, trainmen, switchmen, trackmen, freight handlers, steamboat-men and steamboat firemen were busy. Shiplabourers were active and street railway employees busy. Teamsters, expressmen and unskilled labourers were active.

DISTRICT NOTES.

Bath.—A serious fire occurred here on June 10th, when the general store of Tompkins Brothers and Gilbert Giberon's hotel were destroyed. The loss is estimated at \$12,000; partially insured.

Fredericton.—The annual meeting of the stockholders of the Hart Boot and Shoe Company was held June 16. A dividend of 6 per cent. was ordered paid; the dividend paid last year was 5 per cent. The report of the managing director showed that the business of the year amounted to upwards of \$260,000. The annual meeting of the Gas Light Company took place June 10, the usual annual dividend of 6 per cent. being declared.

Upham.—The portable lumber mills of B. W. S. Titus, were totally destroyed by fire June 16, together with a pile of boards, a lot of cordwood, and a pile of laths. There were no forest fires in the neighbourhood.

Woodstock.—The tanneries of John Dickinson, together with outbuildings and office, were destroyed by fire June 10. At a meeting of the Board of Trade on June 14 a resolution was passed memorializing the town council to submit a property vote to the people as to granting a bonus of not more than 25 per cent. of the cost of the plant for the new tannery to take the place of the one destroyed. The annual output of the tannery was \$300,000 and would soon have increased to \$350,000. Thirty families were depending on the wages paid, which were over \$20,000 a year.

NEWCASTLE, N. B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Since the beginning of the month conditions in the labour market have been favourable. The sawmills were all busy, and had plenty of logs on hand. These mills give employment to nearly all the labour available for the summer. There was considerable work in other lines. The Drummond Mining Company was busy, laying off its dock site preparatory to shipping iron ore, and surveying a line to its mine. This alone will create a lot of work, and a brisk summer is looked forward to. Shipping was quiet, though the mills were all running. However, activity is expected soon. There were no labour disturbances. The supply of labour was equal to the demand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Seeding was completed and the grain crop looked well. Hay, however, is late and not up to last year. The season has been cold and very dry. These conditions changed towards the end of the month.

Fishing.—The catch of salmon down the river was good but poor up river. Shad was a fair catch.

Lumbering.—The lumber merchants had favourable drives this spring there being plenty of water.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busier than for some time past. The repairs on the Presbyterian church were well advanced and those on Harkins' Academy were being pushed along rapidly. Carriage and wagon makers were not so busy as usual, money being scarce and people only buying when necessity required. Tailors were quiet. A number of men have been set back on the Intercolonial Railway, the supply being in excess of the demand. The supply of unskilled labour was equal to the demand.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

June was a considerably more active month for labour than May, though less active than June 1908. The city corporation started repairs on a number of streets, giving a good deal of employment. Towards the end of the month the tourist season opened, somewhat later than last year.

The Ship Labourers Benevolent Society held its annual meeting.

Wages have been somewhat downward in tendency in individual cases, though organized labour has not accepted any reductions.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have finished sowing. The weather has been excellent for growth and the crops, though sown late, are in a promising condition. A good root crop is predicted.

Lumbering.—All of the large mills of the district have commenced cutting. Driving conditions have been excellent; notwithstanding the exceptionally high water no serious damage has resulted.

Railway construction.—Operations were active. The Canadian Northern is expecting to open its new branch line from Quebec to Harvey Junction in July.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, painters and builders' labourers had a good month. Other building trades, however, were quiet to dull. Electrical workers and linemen were active, as were iron moulders iron workers and helpers, machinists, and engineers. The woodworking trades were busy. Printers, bookbinders, tailors and garment workers were active, but boot and shoe workers were dull. Cigar-makers were active. Hotel, restaurant, theatre, and laundry workers were busy, but longshoremen and shiplabourers were quiet. Unskilled labour continued in excess of the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A certain section only of the labour market has been well employed, that is to say, those employed in outside work have been busy, but the machine shops have been quiet. Every other line of industry has been busy, and men have been in demand. It was thought that with the advent of the open season work would increase in the machine shops. There were a few heavy orders in the first of the seasons which brightened up the prospects considerably, but after these were completed few followed. It has been a matter of laying off hands during the past month in the shops which make a specialty of mining machinery. During the last week of the month the Rand Co., closed down for one week for stock taking. The Fairbanks Co., is busy, and has all it can do to fill orders. As a matter of fact it has had to have stock sent in from the American Branch to fill orders. Those engaged in building operations are well employed, and there is no other industry except as stated above that is not running full time. The new structural steel concern will soon be in running order, the buildings for the plant

being almost completed. The wholesale and retail merchants reported business good.

The city valuers have not yet completed their work, but from what can be gathered from the reports already submitted, there will not be the same increase in population this year as was shown during the past few years. There will be a small increase in population. Several large business blocks are in course of erection. There has been no unrest among employees during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers predict a light hay crop owing to the drought last year, and the backward spring. Other crops are looking well. There is a good demand for farm labourers.

Lumbering.—Lumbering operations are at a standstill in the woods, but the continued high water has enabled the smaller sawmills to get down their season's cut much earlier than usual. The large concerns have also got down their supply with but little difficulty, and there will not be the same inconvenience experienced in this respect as last year.

Manufacturing.—All branches of the manufacturing industry are running full time and report plenty of work on hand. The carpet company has again started up, and is steadily increasing the output, followed by a demand for more help.

Mining.—The mining industry is now in full operation and gives employment to a large number of men.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade are busy. In addition to several new business blocks, a number of private residences are going up.

Machinists and moulders are very quiet. In some of the shops machinists are being laid off, while the moulders in one large shop are only working five days a week.

The woodworking trades are busy, and in some shops where they make a specialty of fixtures for houses, they are working overtime.

The printing trade is busy, and in some shops extra hands have been taken on.

Journeymen tailors and garment workers have been busy. Glove makers are quiet.

Bakers and confectioners are busy. Cigar makers are more active than they have been for some time.

Hotel employees and laundry workers are busy and additional help has had to be taken on.

Railroad employees are busy, owing to the additional summer services being put on this month.

Unskilled labour is good demand.

DISTRICT NOTES.

Granby.—The vicinity of the works of the new Miner Rubber Co., presents a very animated appearance at present. Over 50 workmen, laborers, masons, carpenters, etc., are employed in and about the buildings.

Back Lake.—The building trade has been very busy, giving employment to a large number of workmen. At present there are twenty-five dwelling houses in course of construction.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity in the labour market has become more general and prospects are good; according to the Building Inspector there have been taken out in the 4 weeks 21 permits for a total valuation of \$129,900.00.

The water level having been lower this month, the harbour was more active than during May and several steamers were unloaded and loaded. There has been an improvement in retail trades compared with previous month. Construction lines were very active. Rates of wages remained the same and the best of understanding prevailed between employers and employees.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very busy this month and report good prospects.

Fishing.—Fish were plentiful, specially eels, perch, shad and bass.

Lumbering.—Lumbermen were very active floating down logs. The season was a great deal better than for several previous years.

Manufacturing.—Conditions continued active, and all factories working steadily.

Mining.—Very little mining is done in the vicinity.

Railroad construction.—Hardly any work is in progress in this district.

Manufacturing.—The new cotton factory is in full operation and prospects are good.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, decorators and paper hangers, plumbers, gas and steamfitters, stonecutters and builders labourers were very busy. Moulders, iron workers and helpers, core-makers, machinist and engineers were fairly employed, but the ship building trade was dull. Blacksmiths, bicycle workers, Horseshoers and jewellers were fairly busy. Woodworkers, carriage and waggon makers, and pattern maker, reported a good month. The printing and allied trades were fairly busy. Journeymen tailors, garment workers, glove makers, boot and shoe workers were active. Bakers have raised the price of bread to 22c. which is higher than ever was paid before. Butchers and meat cutters were doing very well, Ice cutters and drivers were kept very busy. Cigar makers and tobacco workers had plenty to do. There was not much work amongst tanners and curriers, but leather workers and saddlers were busy. Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees and laundry workers were well employed. Transport was fairly active, but more with navigation than by railroad. Ship labourers and

longshoremen were fairly active. Cab drivers, hackmen and carters report a good month, also teamsters and expressmen. Unskilled labour was in fair demand and very few labourers were idle.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. V. Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity increased during June, and conditions were more favourable than in May. Building operations were active, and there was an improvement over the corresponding month of 1908. Sash and door factories were active, but iron works were rather dull. The leather industry was also active and tanners were increasing their output. Manufacturing of musical instruments were busy, and have made many improvements and additions. The confectionery establishment had a good month. Activity was well maintained in boot and shoe factories. The Ames Holden Company resumed operations and had an abundance of work on hand. At the last meeting of the city council, the finance committee presented its report on the verification of the books of the Ames Holden factory. The results were most satisfactory from the standpoint of the city. The company paid more than \$83,000 in wages during the past financial year, being \$23,000 more than required by the contract; 260 workmen were employed. In comparison with the past year there was a surplus of \$1,000. On the whole, the industrial labour situation was good, but the workingman felt embarrassment owing to the high price of meats and bread; the latter was increased 3 cents per loaf in price. Wholesale and retail trade was fairly active. Banks reported a good month with comparatively easy collections. There were no labour disturbances nor changes in wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—General conditions were favourable, the weather having improved. Notwithstanding the delay through the unfavorable weather of May, prospects are for a large crop. Farm labour was in good demand, and the supply was hardly sufficient. Farm produce continued very high in price and sold freely.

CONDITION OF PARTICULAR TRADES.

Building operations having become more active, bricklayers and masons were busy, and the other building trades were well occupied. Horseshoers were active; the other metal trades were fairly well employed. Woodworkers had a very active month. The printing trades reported a quiet month. The clothing, food and tobacco preparation, leather, miscellaneous and transport trades reported satisfactory conditions. A large number of unskilled labourers were taken on in the latter part of the month owing to the resumption of general activity, and in some cases there was a scarcity of hands.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The building trades were very active during the month of June. The value of building permits increased greatly as compared with June last year. In the town of Maisonneuve for the months of March, April, May and June 1908, the value of these permits was \$136,200 as against \$261,950 for the corresponding months of 1909, or an increase for this year of of \$125,750. Permits valued at \$351,800 were granted in other parts of the district, of which the town of St. Louis furnishes a large proportion, so that prospects in building are very encouraging. Wages which last year were reduced have increased; in some cases considerably. There have been no changes

in hours of labour. Sales of real estate has been active in certain quarters of Maisonneuve, and an increase in some cases of from eight to ten cents per foot has taken place. Several new properties have been subdivided into building lots and in view of the easy conditions granted for payment many workmen were buying and several building. There has been a general improvement on all sides, especially in view of the increase in civic improvement work to be performed by the city of Montreal and the towns of Maisonneuve and St. Louis.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, joiners, painters and builders' labourers were well employed. Stonecutters were very busy and were in demand. Plumbers, gas and steamfitters and electrical workers were quiet, but with good prospects. Conditions in the metal trades were much improved, especially with horseshoers and tool shapeners. Upholsterers were in demand. Polishers, carriage and wagon makers and car builders were well employed. Wood carvers were dull. Pressmen and bookbinders were quieter than in the preceding month. Journeymen tailors were in demand. Glove Makers were fairly well employed. Bakers, confectioners and butchers were very active, but the summer holidays will somewhat decrease activity. Ice-handlers were very busy. Cigarmakers and tobacco workers expect a decrease in demand for some time. Barbers were very busy not being able to supply the demand. Street railway employees were very busy as were also carters, draymen and teamsters engaged in building operations. The demand for unskilled labour was good, but wages were somewhat low.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The last report of the Harbour Commissioners announced that the receipts

from customs during April were \$1,203,-937.60 compared with \$908,990.78 in the corresponding month of 1908, or an increase of \$294,946.82. This is the largest monthly increase noted in many years. Owing to the improvement of the port, the trade of Montreal is expanding greatly. The revenues of the Port for May, 1909, were \$36,724 as against \$35,219 in May 1908. The revenue on imports in May 1908 was \$26,000; this year there was an increase of \$1,000. The revenues on exports remained about the same. Since the opening of navigation to June 1st, 112 vessels visited the port, with a tonnage of 317,388. Last year during the same period the record was 127 vessels with a tonnage of 336,057, or a decrease for 1909 of 15 vessels and 18,669 tons.

The total revenue of the city of Montreal during 1908 amounted to \$5,858,244.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Business was good.

Manufacturing.—The rubber factories were quiet during May and a number of hands were laid off.

Railway construction.—Extensive repair work was being done on the Montreal Street Railway.

CONDITION OF PARTICULAR TRADES.

The building, printing, clothing and leather trades were active, and the metal, woodworking, food and tobacco preparation, miscellaneous and general transport trades from good to active. Unskilled labour had a good month.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

For the three last weeks in June, the market has been very busy. At the time of writing in May, mills and shops were closed down and were expected to remain so for two weeks more, no one expecting the level of the river to fall as suddenly as

it did. The amount of money which the loss of one full month of work means to the 3,500 or 4,000 people thus affected in Hull alone is about \$100,000. The mills, however, were able to resume their operations sooner than anticipated, and consequently the loss totalled at the most \$65,000. Nevertheless great inconvenience was experienced by merchants as well as by the working people themselves.

Conditions have improved wonderfully in the past three weeks, and factories and mills are being worked full time with their full complement of hands. Booth's and Eddy's establishments are the principal employers of labour, and they state that they have more orders in hand than they can possibly attend to with their mills running all the time. The same state of affairs prevails at the Cement Company, which now employs over 350 people.

A plumbing and steamfitting firm granted a voluntary increase to its 17 employees. The increase is two cents an hour, and was due to the great number of contracts in hand. This firm has succeeded in getting a \$4,000 contract in Plattsburg, N. Y., for setting a large heating apparatus in an American public building.

The Co-operative Company is still under organization. It has not so far realized the required amount by the sale of its stock, but the shares are being gradually disposed of. The election of the officers for the current year was held lately, and Mr. Alphonse Desjardins, of the Hansard staff of the House of Commons, was elected honorary president, Mr. Auguste Foucault was elected president, and Mr. Telesphore Lemay, secretary. The club has an executive council and a board of control. Its object, as was already stated, is to run a general store for the benefit of its members.

A new sash and door factory has been put up in Hull and is soon to start operations. It will employ about twenty men. Dupuis & Coy., are the owners.

The toothpick industry, recently established in Hull is in full operation and has been making stock preparatory to filling orders taken by the agents sent

out last May. Nearly all the capital of \$40,000 was subscribed in Hull.

The Hull theatre Company, a local concern with a capital of \$20,000, has started a very substantial structure on Main Street.

The last work is being put on the Normal school, in preparation for the opening of the classes next September. The building will cost, complete, \$75,000.

The C. P. R. Co., is spending large sums of money on electric lines for passenger and freight purposes. It is also improving several of the leading streets through which its lines will run. A squad of about 100 men are engaged at this work.

Building operations are very brisk all over the city, and no trades people are idle.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The high water which stopped nearly all the industries at the Chaudiere in May was felt until the middle of June. The saw mills lost from three to four weeks both in manufacturing and shipping. It is estimated that during this period the production fell two million feet per day and that there will be a reduction of 25 per cent. in the season's cut of lumber, considering also the setback to sawing caused by the late spring. Building operations were brisker than usual, permits in May amounting to \$268,075 compared with \$242,200 last May. June permits will far exceed these, the Grand Trunk Co., having started its new hotel on Major's Hill Park to cost \$875,000. The civic corporation is rushing a considerable amount of sewers and water-works, and the Ottawa Electric Railway Co., is prosecuting extensions and renewals as fast as the steel can be procured. Trade was steady during the month with signs of improvement in nearly all lines.

Labour conditions were disturbed by a strike on May 31 involving 40 or 50 cor-

poration carter who asked for an advance in wages from \$3.85 per team per day to \$4.50. This was not granted and substitutes were taken on by the city. After the first day, normal conditions were restored.

The city council afterwards increased the wages of teamsters to 48 cents an hour or from \$3.85 to \$4.32 per day. This concession was made in view of the increased cost of fodder for horses and because other expenses had greatly increased. As a consequence of the strike an association of master carters and a teamsters' union are in course of formation.

On June 4 about 100 labourers employed at the Grand Trunk Hotel went on strike without notice demanding \$1.75 for a nine hour day instead of \$1.50 for ten hours. The company refused the request and in a few days reported that all the men needed had been secured at the old wage. The company also objected that the men had not given notice before quitting work. The wages asked by the men were current on corporation work, and most of those who left the G. T. R., found employment there.

Organization among the International unions has been active. The permanent organizer reports additions as follows to existing unions: barbers 6; bartenders, 30; carpenters, 9; painters, 20; butchers, 2; leatherworkers, 17; electricians, 44; lathers, 5; plasterers, 3; Blacksmiths, 30; machinists, 4; sheet metal workers, 4; plumbers and steamfitters, 3; ordinary labourers, 132. The formation of a labourers' union to include all men not of the skilled trades is under way and will include chiefly the corporation hands and employees of sawmills.

Following the agreement made between the newspaper publishers of Ottawa and the typographical unions for increased wages, an agreement was made giving the job printers a similar advance. Job printers who were getting \$15. a week receive a 50 cent increase immediately and two other 50 cents increases making a wage of \$16.50 at the end of three years for which period the agreement was drawn. Operators and caster men are advanced \$16. to \$17. per week and will get two

50 cent increases before the agreement is ended. Machine tenders benefit in exactly the same way. Work on holidays is to be paid for at time and a half. The apprenticeship term is reduced from five to four years. Provision is made that if ten days elapse before any dispute is settled, arbitrators must be named composed of residents of Ottawa. Two are to be named by each side and if they are unable to agree they appoint a fifth member. The decision of this board is to be final.

The Ottawa Board of Control on June 15 approved certain rates recommended by the International Allied Trades Association as follows: Stonecutters, 44 cents per hour; bricklayers, 50 cents; carpenters, 25 cents, joiners, 30 cents; lathers, \$1.75 per thousand; painters and glaziers 27½ cents per hour; tinsmiths 30 cents; metal roofers, 30 cents; plumbers and steamfitters 36 cents; electrical workers 25 cents; builders' labourers, 25 cents; ordinary labourers, 18 cents and stone masons, 50 cents; These rates are lower than specified in the city fair wage agreement, but the amounts named in that agreement are higher than in the agreement between some employers and unions and are consequently impracticable. The Board of Control has decided to require all contractors with the city to pay these specified rates.

Lathers, have been given an increase amounting to 25 cents per thousand raising the price to \$1.75 per thousand. The advanced means about 25 to 50 cents a day.

The price of biscuit was advanced two cents a pound at the beginning of the month following several advances in the price of flour. The price of bread has also been raised one cent a loaf by many bakers who were selling under the standard price.

Mill hands were somewhat alarmed by the recommendation of the Board of Control to prohibit the piling of lumber in certain yards held by Mr. J. R. Booth. The mill owner said it would necessitate the curtailing of production and the consequent loss of \$180,000 a year in wages.

The City Council refused then to enact the prohibition.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farming operations were delayed three weeks by wet weather, and farmers along the Ottawa river lost heavily from flooding. Growth has been rapid in the latter half of June. Cheese making in active and prices firm. Oats are scarce and dear.

Lumbering.—Lumber shipping by barges to the United States began the middle of the month or a fortnight later than last year. A reduction in the freight rate is helping the movement of low grade lumber which was held in large quantities.

Manufacturing.—Manufacturers of pulp and paper were hindered by the high water. Booth's pulp mill was idle a few weeks during which the firm had to buy pulp for its paper factory.

CONDITION OF PARTICULAR TRADES.

The building trades were very busy. Caulkers, sheet metal workers and blacksmiths were busy. Woodworkers were quiet as were iron moulders, but car repairers were active. Printers were busy. The clothing trades and food workers were quiet. The leather trades were busy as were laundry workers, but barbers and stenographers were quiet. Conditions were fairly active in transportation lines. Unskilled labour was fairly busy.

KINGSTON, ONT., AND DISTRICT.

Mr. Wm. Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during June, in nearly all industries was better than in many years. The amount of general building under-way was unprecedented.

The local trustees of Queen's University have selected sites for the erection of two new buildings, to cost \$92, 000 and

\$40,000 respectively, the former for the study of chemistry and mineralogy.

The outlook for the season's business on the St. Lawrence river is the brightest in many years. Shipments of grain were very heavy.

The Military camp at Barriefield broke up on June 25, after a successful period of training.

Customs duties for May amounted to \$16,510.04. Collections at the Inland Revenue office were:—Spirits, \$4,988.19; malt, \$603.75; tobacco and cigars, \$1,972.23; bonded factory vinegar, \$140.34; methylated spirits, \$35.11, and other receipts \$35.49, making a total of \$7,775.11.

There were no strikes, lockouts or changes in rates of wages or hours of labour reported. On the 9th of the month, His Honour Judge Madden, when addressing the the jury, congratulated them on the absence of crime in the county.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had an active month, and prospects for good crops are bright.

Lumbering, manufacturing, mining, railroad construction and other industries were active.

CONDITION OF PARTICULAR TRADES.

Very active conditions prevailed in all branches of the building, metal, engineering, shipbuilding and woodworking trades, and general activity in all other trades.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All branches of labour were very active in this vicinity during June, being more active than in the same month of last year. As a result the supply was about equal to the demand, there being few

idle men. Good wages prevailed. Every industries, both large and small, was running full time, with a full complement of worker. Any one looking for work could secure it at either of the two cement plants. The Lehigh works have about 600 men employed, running night and day, while over 200 men are engaged at the Belleville works. A large number of skilled men are employed erecting the new Burnell Rock Drill Shops. Men are engaged on the erection of the \$30,000 addition to the Court House while the many new dwellings being erected gave employment to many more. The city is putting down new granolithic walks which kept many men and teams engaged. The outlook is most promising for a busy summer. The various banks reported money easy while both wholesale and retail merchants are pleased with business. The operation of the cheese factories, for which this county is noted, has added much to the activity of trade. Farming operations were all well advanced and prospects are splendid for good crops. The mining industry throughout the county was very active especially at Deloro where several switches were erected for treating Cobalt ores. The rolling mills, the Belleville Hardware company, and the brass and steel works were in full operation. There was no unrest in the labour market and no change in the rates of wages during June. Canning factories were busy the latter part of the month preserving strawberries of which there is an abundant crop.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy during June, owing to the backward spring, but all grain, roots and fruits are looking well. Cheese and butter factories were active.

Fishing.—Was fairly active, mostly rough fish being caught.

Lumbering.—Was inactive.

Manufacturing.—Was busy in nearly all branches.

Mining.—Was very active and a large number of men engaged.

Railroad construction and employment.—Was normal.

CONDITION OF PARTICULAR TRADES.

Building trades.—Every branch of the building trade was active during June, especially stonemasons, carpenters and painters; stonecutters, were also busy. Builders' labourers had an active month.

Metal, engineering and shipbuilding trades.—Iron moulders and helpers, machinists and engineers, electrical workers, lineman, brass workers, iron workers, horseshoe makers, blacksmiths, boiler makers and bicycle makers had a busy month with nearly all members employed full time. Horshoers were fairly active.

Woodworking and furnishing trades.—The three large furniture factories were running to full capacity during June with a full staff employed. Carriage and wagon makers were busy as well as car builders at Deseronto. Coopers were busy turning out cheese boxes and butter crates.

Printing and allied trades.—Printers, both job, machine operators and hand-setters were all engaged. Pressmen had a busy month, one of the offices installing a new Web press. Bookbinders were active.

Clothing trades.—Journeymen tailors reported a very busy month.

Food and tobacco preparation.—Bakers and confectioners, butchers, meatcutters and ice drivers were very active. Local cigar makers were busy.

Leather trades.—Harness makers were all employed.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees, as well as laundry works, were active. Theatre employees had a quiet month.

Transport.—Railway employees generally had a fairly active month all branches being well employed. The steamboat men had a very active month as well as sailors and longshoremen. Cab drivers, carters, teamsters and expressmen were all busy.

Unskilled labour.—Was in good demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. A. Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued busy and in some respects showed an improvement over the corresponding month of last year. Considerable building was under way. The municipal authorities have awarded the contract for the construction of a new dam, work to be commenced at once. The pumps will be supplied by the Wm. Hamilton Company, of Peterborough and Mr. John McDugal, of Montreal. The city has also made arrangements to take all the power that the Ontario Power Company can supply at \$7.50 per horse-power. The city bakers have raised the price of bread from 10 to 12c. per two pound loaf.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Seeding is practically completed and fall wheat and clover look very well. Excellent growing condition are making up for the lateness of the season.

Lumbering.—Logs are in the river and employees busy getting them to the mills.

Manufacturing.—The factories showed some improvement compared with the corresponding period of last year. The Central Milling Company has closed down to enable it to make extensive improvement that will double its capacity.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters and plumbers were busy. Stonecutters were active and builders' labourers busy. Iron moulders and core makers were fairly busy. There was some improvement among machinists compared with last month, but they were not very busy. Boat builders and canoe makers were busy.

In the printing and allied trades fairly busy conditions prevailed. Tailors were also busy. Bakers and confectioners reported business good, but cigar makers were not very busy, although there was a slight improvement over last month. Leather workers reported business active. Steamboatmen were very busy. There was plenty of work for unskilled labour.

TORONTO, ONT., AND DISTRICT.

Mr. Phillip Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions during June have been favourable, and are steadily improving. The building trade has been very busy, with a number of large contracts in prospect. Nearly all lines of manufacturing are active. Civic work occasioned by the expansion of the city, and the construction of the trunk sewer and the water works extension gave employment to a large number. Employment both of skilled and unskilled labour is more general than at any time since the late depression set in. The relations between employers and employed continued harmonious.

The number of buildings for which permits were issued for May was 809, representing an approximate value of \$1,887,532 as compared with 592 permits representing a value of \$1,216,982 for May 1908. The total approximate value of the buildings for which permits have been issued for the first five months of the year, was \$6,827,830 as compared with \$3,957,840 for the corresponding five months of last year.

The construction of the section of the trunk sewer extending from the corner of Jarvis and Duchess Streets to the Don River, was begun on the 7th by the Godson Contracting Co., Contracts for sections 4 and 5 of the sewer were awarded on the 9th to John Wagner of Cleveland Ohio, for \$91,589 and \$132,860 respectively. The total cost of the sewer, including sewerage disposal plant, will be about \$2,400,000 and the work may be completed about the end of 1910.

On the 5th two money bylaws were submitted to a vote of the ratepayers. The by-law to raise \$700,000 for the completion of the sea wall on the Humber Bay water front was defeated by a vote of 1276 for 2981 against. The by-law to raise \$466,000 for the improvement of the water works system was carried by a very narrow majority, the vote being 2121 for and 2092 against it.

Tenders for 31,680 ft of 12 in. pipe and 12,720 ft, of 16 in. pipe, required for the extension of water mains, have been called for, a contract for the centrifugal pump at the filtration plant has been awarded to the John Inglis Co., Toronto for \$9,200.

The Toronto General Trust Corporation will erect an 8 storey office building on the corner of Bay and Melinda streets, with a frontage of 90ft. and a depth of 90 ft.

The receipts of the Toronto Railway for May were \$328,961 as compared with \$300,263 for May 1908, the city's percentage being \$49,344 as compared with \$45,039.

Representatives of the harness-makers, teamsters, wagon workers and horseshoers met on the 28th, and organized the United Trades Council, the object being to include all trades interested in the teaming industry.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Haying was unusually late but the crop is a large one, and work was well under way at the end of the month. Alfalfa yielded well, and had mostly been got in. Oats, barley and spring wheat were looking well and fruit prospects good. The dairying industry was flourishing, with excellent pasturage.

Manufacturing.—Active conditions prevailed in nearly all lines with but few skilled men out of work. Agricultural implement manufacturers were busy. The Massey Harris Co., on the 23rd, shipped 20 cars of harvesting machines to Winnipeg and points further west and have heavy orders on hand. The Toronto Furniture Co., has purchased a site of 200 ft. frontage on Dufferin St., and will build a factory at a cost of \$75,000.

CONDITION OF PARTICULAR TRADES.

Building.—Bricklayers, masons, stone-cutters, carpenters, builders labourers, lathers and plasterers were all busy. Plumbers steam and gas fitters generally well employed. Some interruption to work was occasioned during the earlier part of the month by a shortage of brick. owing to the sudden heavy demand, but the difficulty was soon overcome.

Metal.—Iron and brass workers were generally actively employed, a few machinists being out of work. Jewelers and silversmiths had plenty of work.

Woodworking and furnishing.—Activity prevailed in these trades.

Clothing.—Custom tailors were well employed early in the month but slack toward the close. Garment workers had steady work. Hat and cap workers and boot and shoe workers had a fair month.

Printing.—Printers and allied tradesmen were actively employed.

Food and tobacco preparation.—Bakers, confectioners and butchers had plenty of work. Brewery workers were quiet. Cigar makers found trade improved.

Leather.—Harness makers and other leather workers were active.

Miscellaneous.—Hotel and restaurant employees, barbers and laundry workers were busy. Clerks, salesmen and warehousemen had steady work.

Transport.—Railway workers, expressmen teamsters and street railway employees were active, sailors and longshoremen had a good month.

Unskilled labour.—Unskilled labour was generally well employed.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

June was a good month for industrial and labour interests. Nearly every trade was active, some were busy, and only one

or two, and these of small importance, were dull.

While no men works of importance were undertaken those commenced earlier in the season continued to employ many men. The building and electrical trades appeared to be the most active. Transportation business improved and general trade was brighter.

No settlement of the controversy between the carpenters and their employers was reached. The men continued at work at the old scale but no agreement was signed.

The price of bread was raised from 5 to 6 cents for a twenty-ounce loaf.

Tenders were invited for building the local transforming station of the Ontario Hydro-Electric Power Commission and the new public library. The Canadian Niagara Power Company voted a new bond issue which will permit of the enlargement of its plant as business may require. A small extension of the powerhouse to accommodate one more 10,000 horse-power.

The enlarged plans for the Niagara Boulevard require an expenditure of \$50,000 on a "sea-wall." Tenders for this work will be invited soon.

The International Railway secured a stay in the operation of the order requiring it to reduce its fares within city limits.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural conditions were good and crop reports excellent. The acreage of wheat is less, but larger areas are devoted to corn, roots and vegetables. The growing of vegetables for canneries is becoming a more important interest every year. Heavy fruit crops seem assured. Good farm labourers are scarce. Wages vary from \$18 to \$25 per month with board. Berry-pickers were in demand. Produce prices were high.

Fishing.—Fishing in Lake Erie was reported to be improved.

Manufacturing.—The Sanitary Can Company's factory was running overtime and 25 more female employees were advertised for. The Shredded Wheat, Spirella Corset, Ramapo switch and Frog,

Dominion Suspender, Niagara Neckwear, and Niagara Fall Machine and Foundry concerns were all busy. The American Cyanide Co., had part of its new plant in operation and employed additional hands. The canning companies were commencing their season's work and will employ hundreds of men and women till October. The silverware and cutlery factories were employing full staffs at full time. The Shredded Wheat Company increased its capital stock from \$100,000 to \$250,000.

CONDITION OF PARTICULAR TRADES.

One large factory and many small buildings were being erected. Concrete was being extensively used and bricklayers and masons were feeling the natural effect on their employment. Carpenters were busy. Painters were very busy at house-painting and a few were employed in painting one of the bridges across the river. Plumbers were quiet, as were also builders labourers. Stonecutters were dull. Foundry and machine shop men were generally active. Electrical workers and linemen continued very busy. Printers were active. Bakers were busy.

The season of Summer travel having opened, many additional persons were employed in the two amusements parks, the many souvenir stores and in hotels and restaurants. Barbers were more active.

Railway freight traffic was better, but still below normal. Passenger traffic was good. Electric lines were very busy. Steamboats in passenger service were busy. Freight traffic by lake and canal was quiet. Teamsters were busy.

Unskilled labour was fairly well employed.

DISTRICT NOTES.

Chippawa.—The smelting plant, recently burned is being re-built on a larger scale than before.

Fort Erie.—Surveys and soundings for the proposed new bridge across the Niagara river were being made. The season opened very briskly at the many summer

resorts along Lake Erie, and hotels and places of amusement are employing many persons.

Port Colborne.—Boards of trade and marine interest in a number of lake cities organized to further the project of an enlarge Welland canal. Marine business was brisk, the reduced number of towing-tugs being unable to handle all the canal traffic promptly at times. Oceanward freight rates were low but up-bound business was good.

Welland.—Building trades were very active. Two large factories and many dwellings are being erected. The new brick yard was in operation. During June, July and August retail stores will close on Wednesday afternoons. Factories were all busy. The Niagara, St. Catharines and Toronto Railway will be extended to Port Colborne.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

June proved another good month for labour, general activity prevailing. Work on the construction of pavement, sewers, etc., was well under way, giving employment to a number of men. The new school for St. Patrick's ward, and the additional forge building for the Whitman-Barnes Manufacturing Company, were nearing completion. The building trade was more active with better prospects than for some months.

The Niagara, St. Catharines & Toronto Railway Company is building a switch line to the Welland Vale works, to facilitate shipping. The Reo Motor Car works are rapidly preparing to commence operations; skilled machinists, etc., have been secured, and the plant is expected to be in full operation by the beginning of July.

The employees of hardware firms, meat cutters and butchers, and some other trades have been granted the Wednesday half-holiday during June, July and Au-

gust. A similar half-day holiday will be granted by the retail and wholesale firms commencing with July.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers were busy with the season's work, which owing to the backward spring and the sudden warm weather has been very active. Strawberries are unusually large and abundant, and prospects for other fruits are good. Grain and vegetable are all that could be desired. Reports from Beamsville and western points are very satisfactory. The canneries are becoming busy, and additional hands are being employed.

Manufacturing.—Industrial establishments were active. Mills and plants of a like nature were experiencing favourable conditions.

CONDITION OF PARTICULAR TRADES.

The building trades were active, with conditions much improved over those of last month. The metal and engineering trades in all lines reported trade good, and similar conditions prevailed in the woodworking and furnishing trades. The printing and allied trades, clothing, etc., were busy. Food and tobacco workers were active, while tanners, curriers, saddlers, trunk and bag makers, and leather workers were busy. Active conditions prevailed in the miscellaneous trades, and in all branches of transportation. Unskilled labour was well employed.

DISTRICT NOTES.

Thorold.—Conditions generally were favourable, labour being well employed.

Merriton.—Activity prevailed, factories running full time.

Port Dalhousie.—Employment was good and general conditions favourable. Work on the completion of a building for the Sterling Bank was being rushed.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

No special features marked the condition of the labour market during June

The building trades were fairly well employed, but there was no unusual demand for labour in any of the trades. There are no large buildings under construction, the work being mostly on dwellings. Building permits showed a decrease, compared with those of June, 1908, the figures being as follows: June, 1909, \$144,480; June, 1908, \$185,425; decrease, \$40,945.

There was no exceptional rush in any of the trades, but operatives were fairly well employed.

Business has been good among the retail merchants. The city has been well filled with visitors, as several large conventions met during the early part, and the spring meeting of the Hamilton Jockey Club the latter two weeks taxed hotel accommodation.

The offer of the Dominion Power and Transmission Co., to supply power for civic purposes was submitted to the rate-payers for ratification on June 7. The question of dealing with the Hydro-Electric Commission for the power supply (already twice endorsed by the voters) was also re-submitted. The Hydro-Electric Commission contract was again endorsed, this time by a majority of 185.

A new registry office for the city and county will be erected, at an estimated cost of \$40,000.

The Technical School is rapidly nearing completion, and is expected to be ready for opening September 7. Instruction will be given in English, mathematics, physics, chemistry, freehand and mechanical drawing, practical electricity, domestic science; wood, forge and machine shop practice, and principles and processes underlying the following trades: Printing, plumbing, house and sign painting. Day and evening classes will be held. Other courses will be added from time to time.

The Wednesday half-holiday in the retail trade is being generally observed; it will continue till the end of September.

On June 1, about 75 Italian labourers employed at the Hamilton Rolling Mills struck for an advance in wages. Their places were filled. They were getting 15c. per hour.

On June 2, the Italians employed

on the Street Railway, track laying, struck for an advance from 15c. to 20c. per hour (the city rate). After work had been delayed about a week through this cause and a couple of wet days, they accepted 17c. per hour and returned to work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The prospects of large crops of fruit and vegetables in this district are excellent. The strawberry season commenced the last week in the month, and is an unusually good one, in quantity and quality. The large crop is evidenced in the prices asked, select fruit selling on June 30 at \$1.50 per crate of 24 boxes, and good quality berries were offered as low as \$1 per crate. Pork continues scarce and dear, being quoted at \$10.50 per cwt. Butter and eggs also command unusually high prices for this season of the year, butter being quoted at 25c. to 28c. per lb., retail, and eggs 23c. to 25c. per dozen.

Manufacturing.—The contract awarded to the Canadian Westinghouse Co., by the Hydro-Electric Commission for equipment is expected to keep the electrical department busy, with a full complement of men, for about ten months. The air-brake department has not yet got back to full time, but business is getting better.

The Howell Lithographing Co., will enlarge its plant by the erection of an addition.

The Canadian Manufacturers' Association will hold its annual meeting in this city in September.

Railroad construction.—The buying of property and securing options in the vicinity of the T. H. & B. Railway station was continued during the month. The property is being acquired by the Mercantile Trust Co., as trustees, and it is stated that the land and buildings already bought and options secured represent in value about \$200,000.

The Street Railway Co., has made good progress with its work of laying a new roadbed, and a couple of weeks more may see it completed.

Other industries.—The canning factories have commenced their season's

work, and are giving employment to a large number of operatives, mostly women and girls. They anticipate a very busy summer.

CONDITION OF PARTICULAR TRADES.

Conditions in the trades are much the same as last month, excepting that the building trades have had a little more to do. Bricklayers were fairly well employed, but a number had left the city for Toronto and other places where the demand was more brisk. Carpenters, lathers and plasterers, painters, plumbers and building labourers report conditions fair.

Stove foundry moulders are still on strike. The supply of non-union men appears to be sufficient to meet the demands, but the foundries are far from busy. The number on the strike roll at the end of the month was about 100, many of the strikers finding employment at other work or leaving the city. Other iron workers were not very busy. Metal polishers were all employed. Stove mounters were slack, and a number left the city. Blacksmiths' conditions improved slightly. Sheet metal workers had a good month. Horseshoers were busy.

Woodworkers, upholsterers and carriage makers were fairly well employed. Pattern makers were dull.

The printing trades had a good month. The arbitration between the I. T. U. and the Spectator Co., over wages in its news room resulted in a decision on June 4, that the Spectator pay the rate agreed to by the other city newspapers. The new rate applied from the date of the agreement with the other offices and the Spectator employees received back pay on this basis. The arbitration took place at Indianapolis, Ind., and the company and the local union had representatives present.

The clothing trades were busy, a good deal of overtime being worked in some shops. Boot and shoe workers had a fair month.

Bakers and confectionery workers were busy, as were tobacco workers and cigar-makers.

Barbers were all employed, as were

broom makers. Broom corn is very scarce.

Hotel and restaurant employers had an exceptionally good month, owing to the large number of visitors at conventions and attending the races.

Railroad employees' conditions were somewhat good, and street railway employees had a very busy month. Teams-
ters had all they could do.

Unskilled labourers found more work, but there were more than sufficient to meet the demand. The street railway operations and the laying of new pavement by the city in connection therewith helped out materially, but the city works department is not employing as many men on general work in other portions of the city as is usual at this season.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was more satisfactory than during May. The iron trade on agricultural implements was busy, and the building trades more active. Street pavement work has commenced, giving work to a large force of men. The Brantford Foundry and Development Co., Ltd., organized recently will commence work at once. An important exchange of real estate in the business centre of the city was made during the month; a block of stores will be erected at once. The Brantford Emery Wheel Mfg. Co., has been re-organized with a capital stock of \$40,000 to manufacture emery wheels. Merchants wholesale and retail had a satisfactory month. Barber shops close on Wednesday afternoons for the weekly half holiday during June, July and August.

The Brantford Co-operative Association, dealers in general groceries held their first annual meeting during the month. There is a membership of 214. In view of the fact that the business was launched during a period of depression,

and has been successfully carried on on a cash basis the results of the first year are satisfactory.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and gardeners were very busy. Crop prospects are good. There is no present demand for extra labour.

Manufacturing.—Conditions in the factories are about the same as last month.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers, painters and paper hangers were busy. Plumbers gas and steamfitters were active.

Iron moulders and core makers in some foundries were busy, in others a little quiet. Machinists, engineers, electrical workers and linemen, metal polishers, Buffers and platers and stove mounters were active, blacksmiths in most cases were busy, boiler makers, sheet metal workers and horseshoers were active.

Carriage and wagon makers were active, pattern makers and coopers were fairly busy.

The printing and allied trades were fairly busy.

Tailors and tailoresses were active.

Bakers and confectioners were busy.

Cigar makers were active.

Leather workers and saddlers were active.

Barbers, clerks, delivery employees, hotel and restaurant employees were fully engaged. Laundry workers were busy.

Railroad trackmen and freight handlers were busy. Street railway and transportation employees were fully employed. Teamsters and draymen were busy.

There are still a few unskilled labourers unemployed.

DISTRICT NOTES.

Paris.—Labour generally was well employed. Work has commenced on the new Sanderson-Harold factory.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During June, the labour market showed little change from the preceding month. Outdoor workers and all connected with the building trades had a busy month. A large number of buildings are fairly well advanced, and the work on the Winter Fair extension is being pushed ahead.

The City Council has let contracts for street paving to the amount of \$58,877.07, the work to be finished this season.

Merchants reported retail trade for the month very good. The Guelph Radial Railway Co., had a very busy month owing to the excursions to the Ontario Agricultural College. Retail clerks have been granted their usual Thursday half holiday during July and August.

Customs returns for May totalled \$15,850.93 as compared with \$10,666.94 during May 1908, an increase of \$5,183.99 or nearly 50 per cent.

Though the season has been one of the latest on record, there is, owing to the continued fine weather of the past few weeks, every indication of a good crop, growth being more forward than last year. Farmers report that the supply of farm labour is equal to the demand.

The Grand Trunk Co., has strengthened all bridges on the north line out of the city, to carry the heavier class of engines, and is now laying 80 pound steel rails. This is another step in the improvement of the W. G. & B. Division, which of late has become important in both freight and passenger departments.

An increase of one cent per hour has been granted to the employees of the Guelph Radial Railway Co., The wage scale had been fourteen, fifteen sixteen and seventeen cents per hour according to length of service. The minimum according to the new scale is fifteen cents an hour and the maximum eighteen cents. With this exception there have been no changes in rates of wages or hours of labour.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and carpenters reported an active month as did lathers, plasterers, painters and plumbers. Iron moulders had a fair month, tube mill workers were very busy. Electrical linemen and engineers were active. Carriage and wagon workers reported trade fair. Woodworkers, upholsterers, varnishers and polishers were fairly busy. The printing and allied trades reported work slackening toward the end of the month. Journeymen tailors were busy. Bakers, confectioners, hotel and restaurant employees had a very active month. Brussels carpet weavers were slack. Street railway employees were very busy, also carters and teamsters. Unskilled labour was active, the supply and demand being about equal.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Skilled and unskilled labour was well employed during the month, employment being more abundant than in the previous month or in the corresponding month of last year. The supply of labour, however, was equal to the demand. Twenty-eight building permits were issued, among which were permits for the erection of a business block on King Street, and a packing house for Mr. J. W. Schneides. The value of these permits amounted to \$53,200. Good progress was made with the erection of the Ahrens shoe factory, and Knipple's laundry. Transportation was reported active, and bank clearings, and wholesale and retail trade satisfactory.

The bricklayers and masons went on strike on June 3 for an increase of wages from 35c. to 40 c. an hour. They had their wages reduced to 35c. an hour during the depression in 1908. They were promised the increase as soon as the building trades improved, but failing to

receive it they went on strike. After being out three weeks, the men made a further demand for a three year's contract which was agreed to and signed, and was as follows:—

That on and after July 1, they receive 40c. per hour; in 1910, 43c. per hour, and in 1911, 45c. per hour, with an 8 hour day.

On Monday June 21 the men resumed work, and the usual activity now prevails in the building trades.

Fire destroyed the Shantz button factory causing a loss of about \$150,000, partly covered by \$90,000 insurance. The firm employed about 150 hands,

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were somewhat quiet. Crops promise to be abundant. Small fruits will be very plentiful.

Manufacturing.—Industrial establishments were all running full time.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy, excepting for three weeks when they were on strike. Carpenters and joiners also were busy. All other building lines were more or less active. Active conditions prevailed in the metal and engineering trades, and in the woodworking and furnishing trades. Other trades, were active except that cigar makers and tobacco workers were somewhat inactive. Unskilled labour was fully employed.

WOODSTOCK, ONT., AND DISTRICT.

Mr. W. N. McEltheran, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of June brought steady improvement in practically all trades. Compared with a year ago, the condition of the outside trades was greatly improved. More contracts were underway, consequently more men found steady employment. There was no change reported in wages schedules. All available masons

and carpenters found ready employment. Transportation companies reported a large volume of business over and above the amount for the same month last year. In retail trade, there was not much change from the preceding month. While the amount of employment could not be termed exceptional, it was nevertheless sufficient to absorb all available labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Some heavy rains during the month kept men off the land at times, but on the whole the month was a very good one. Crops are hardly as far advanced as usual on account of the early wet weather, which retarded growth, but there were no serious setbacks on account of June frosts. One or two very slight frosts in scattered low areas were all that were reported, and practically no damage was done. Prices for cheese remained firm at 11½ to 11 7-8 c. per lb. Oats went to 63c. per bushel on the local market.

During the month the County Immigration Agent for Oxford, placed twenty skilled farm labourers. Most of these were men from the Counties of Ayrshire and Dumfriesshire, Scotland. All having a good knowledge of farming, and the class of labourers which command the highest wages and give the best satisfaction.

Cheese factory employees were extra busy, the milk supply being satisfactory and the quality of cheese the highest.

Railway construction.—Two serious washouts on the main line of the Grand Trunk between Woodstock and Ingersoll, caused by the heavy rain during the month resulted in no further loss or inconvenience than that of retarding through traffic at the point affected for 5 or 6 hours at a time and the employment of extra gangs of men and trains repairing the damage.

Work on the northern division of the County Road gave employment to about 30 men and teams during the month. The men found considerable difficulty in getting board along the line of work and to overcome the difficulty a large van on trucks was ordered; which will in future

be used as dining hall and sleeper for all the men.

Manufacturing. — Concerns reported steady conditions. Orders were increasing especially from the west, though Ontario and Eastern business has not assumed its former condition.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were all busy. Several new residences were in course of building as well as warehouses and factory extensions. The E. J. Coles Co., is adding a three-storey and basement warehouse to its departmental stores. Work on the new factory for the Oxford Knitting Co., went forward rapidly. The machine workrooms and stores on Peel Street were nearing completion.

At Ingersoll the contract was let for the new Public Library at a cost of \$9,685.00, the work to commence as soon as the plans are approved by the agent of Andrew Carnegie.

Carpenters and joiners were busy on both inside and outside work. The Woodstock Lumber and Mfg., Co., was increasing its force for the manufacture of the Plus and Mines School desks, orders for which were coming in with increasing numbers.

Lathers and plasterers were active painters, paperhangers and plumbers were busy. Gas and steamfitters, and stone-cutters were quiet. Builders' labourers were all employed.

Machinists and engineers reported business picking up some, though there was still room for improvement. Electrical workers were rushed. Stove mounters and moulders were active, with business holding up well, but horseshoers were not very busy.

Printers and pressmen were busy, but a slackening was reported towards the end of the month. Bookbinders were busy. Journeymen tailors were active. Bakers and confectioners were very busy. Cigar makers reported a steady month. Tanners were busy.

Woodworkers were busy in all lines. Furniture makers reported orders good and wagon factory employees were also busy. Piano makers were back at work

after a short lay-off for re-arrangement of rooms and machinery, church organ builders were very busy, and reed organ builders were active. Wire fence operators had a very busy month orders being good from all parts of the Dominion.

Knitting factory operators were busy for this season of the year, this being usually the quiet season.

Railroad trainmen were steadily employed, as were also freights handlers and teamsters. Street Railway employees had a very busy month.

Unskilled labourers were all working.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market showed some improvement over last month, especially in the building trades, and a big improvement over last year in the number of dwellings being erected. A number of men are engaged in building a new dam and beautifying the river front and park. The factories have shown some improvement over the preceding month.

The new corrugated pipe factory is nearly completed and the company expects to commence operations soon. Ratepayers will vote on two by-laws on July 9, to guarantee bonds to the Stratford Motor & Carriage Co., for \$25,000 and to raise \$15,000 for hospital enlargement.

Wholesale and retail merchants reported business very good. No changes in rates of wages or hours of labour and no trouble in the labour market, were reported

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Market prices were:—

Wheat, \$1.35 per bushel;
Oats, 52 cents per bushel;
Barley, 55 to 60 cents per bushel;
Eggs, 18 cents per dozen;
Butter, 18 cents per lb.;
Live hogs, \$7.50 per cwt.;
Chickens, 40 to 50 cents, each.

Manufacturing.—The factories were all busy.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were busy. Painters, plumbers and paperhangers were active and gas-fitters were busy. Stonecutters and builders' labourers, were active.

Iron moulders workers and helpers were busy engaged. Machinists, blacksmiths and boiler makers reported a good month. Horseshoers did a good trade.

Woodworkers, carriage and wagon makers were active. Coopers were busy.

The printing and allied trades had an active month.

Journeymen tailors were busy.

Bakers and confectioners reported a very busy month, butchers did a good trade, cigar makers were fairly well employed.

Barbers, clerks and delivery employees were busy. Hotel, restaurant and laundry workers were active.

Railroad conductors engineers and firemen were busy, trainmen, trackmen and freight handlers were active. Car drivers, draymen and teamsters had a busy month.

Unskilled labour has been well employed.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of labour showed an improvement over the past months of the year, and all local workers have secured employment. The supply, however, is equal to the demand. Railroad business is very active, and passenger traffic is heavy. Two new passenger, and a number of extra regular freight trains have been put on the C. P. R. making 30 scheduled trains on the London division. On the G. T. R. an average of 700 freight

cars are passing through the city daily. Building permits during May totalled \$85,020 or an increase of \$35,720 over the same month last year. The London & Petrolea Barrell Co., is erecting a new factory, to meet the increasing trade. A new cigar factory is to open in the east end. The McClary Mfg. Co., has established a new dining hall for the convenience of its men, and will provide tea, coffee and sugar free of charge. A piano is to be put in, and magazines provided. This will be a great convenience, during the winter months especially.

The cost of living is again on the increase in this city, as the accompanying table of prices in January and June this year will show:

	January.	June.
Beef, per lb.....	\$ 15	\$ 18
Mutton, per lb.....	10	18
Veal, per lb.....	8	15
Pork, per lb.....	15	17
Hams, per lb.....	16	18
Bacon, per lb.....	20	22
Flour, per barrel.....	6 50	7 50
Butter, per lb.....	30	20
Eggs, per dozen.....	35	20
Potatoes, per bag.....	65	90

The greatest percentage of advance was in Soda Biscuits, which could be purchased in January for 8 cents a pound retail. Now they are 12 cents, an increase of 50 per cent.

There are a number of houses empty, but all are of the smaller kind, without modern conveniences.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers in this locality are satisfied, seeding being done, and ideal weather prevailing. Prospects for the crops were never brighter. Hay is growing fast. Fruit trees of all kinds are loaded with fruit. The question of experienced help is still to the front as all available hands are moving to the West.

CONDITION OF PARTICULAR TRADES.

Building.—Conditions were very good in all branches each working to the limit, although there are no large buildings being erected.

Metal.—Iron moulders, workers and machinists were busy. Metal polishers and buffers reported trade fair. Stove mounters and sheet metal workers were busy.

Woodworking.—Carriage and wagon workers were busy. Car builders were slack, and only working 50 hours per week, their usual summer hours being 55. Coopers were busy.

Printing.—Printers and pressmen reported trade as fair. Lithographers were busy.

Clothing.—Journeymen tailors were busy and garment workers very busy. Boot and shoe workers reported trade good.

Food and tobacco preparation.—The local biscuit and candy factories were busy, especially in the biscuit departments. Cigar makers reported local option as making inwards into their trade.

Leather.—Tanners and curriers were doing little on account of the high price of hides.

Transport.—Business was good on all the railways, both in freight and passenger departments, and all hands were busy. Teamsters were busy.

Unskilled labour.—Practically all of this class are now employed, but the supply is fully equal to the demand.

DISTRICT NOTES.

Strathroy.—By a vote of 528 for and 74 against, the electors of Strathroy voted to loan a new furniture company \$20,000 for 20 years. The company will build immediately, and will employ 50 hands.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during June has been very favourable to those engaged in the buildings trades and to those employed at unskilled work. On the railways, in the traffic department, conditions have been normal. Railway shop employees are still working on short hour schedules, but a

good deal of overtime is being put in, especially by those engaged in roundhouse repair work. In the local industries conditions have been fair. Unskilled labour has been well employed, considerable civic work is now underway and the Bell Telephone Company has commenced the work of putting its wires under ground along the main thoroughfare. It is expected that the Company will expend in the neighbourhood of \$80,000 in the erection of the central energy station and offices, and in changing the system.

The building trades continued active. In a number of cases tenders were called for and no replies were received, which would indicate that contractors are well stocked with orders. The handsome new hall of the Brotherhood of Locomotive Engineers is about ready for occupation.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Markets have been well attended. A plentiful supply of produce has been offered, the crop of strawberries being exceptionally heavy. Reports from outlying districts, so far as the crops are concerned, are very favourable.

CONDITION OF PARTICULAR TRADES.

In the building trades, all hands were well employed during June. In the railway shops machinists were busy. Blacksmiths and moulders fairly well employed. In the woodwork and finishing trades, conditions were normal. Printers were fairly active. Tailors continued active although certain firms reported business not very brisk. Railway men have been making fairly good time during the month, but spare men have not been well employed. The demand for and supply of unskilled labour was fairly well balanced.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has been very active, many contractors

advertising for skilled mechanics, especially carpenters and joiners. Every available carpenter was eagerly sought after. All wood working factories were running to full capacity. The Wolverine Brass Works took stock during the latter part of the month, consequently there were a number of the hands off for a week or ten days. The company reports prospects bright for the fall and winter trade. The carriage and wagon industry was never busier than during the present month, and reported orders steadily coming in.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers began cutting hay towards the last of the month. The crop will be above the average. Small fruits are very plentiful and are bringing good prices. The apple crop will be light throughout the Western District.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners were very busy, as were also lathers and plasterers. Painters, decorators and paperhangers were exceedingly busy as were also plumbers, mostly on new work. Builders' labourers reported none idle.

Machinists and engineers reported trade fair. Electrical workers and linemen were somewhat slack. Blacksmiths and horse shoers were busy.

Wood workers and upholsterers, varnishers and polishers, carriage and wagon workers reported trade very good.

Printers and pressmen were very active. Bookbinders were fairly active.

Journeyman tailors and garment workers were very busy the whole month.

Bakers and confectioners, and butchers reported trade very good. Cigar makers and tobacco workers reported work very fair.

Barbers, clerks and stenographers have had a good month.

The C. W. and Lake Erie Electric R.R. employees have been steadily employed on the line ballasting the road during the whole of the month.

There was no unskilled labourers idle.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Great activity prevailed in all lines of industry during the month, especially in the building trades. Contracts were let for the erection of a new hotel to cost \$14,000, an addition to one of the public schools to cost \$15,000, an additional building for the Lufkin Rule Company to cost about \$12,000, and a number of dwellings. A Battle Creek, Michigan, Cereal Manufacturing Company has purchased eight acres of land upon which it purposes to erect a branch of its industry; the building is expected to cost \$75,000, and to provide employment for one hundred workpeople. Wholesale and retail trade was fair.

A strike occurred at the tunnel works, but was of short duration, as the contractors secured sufficient men to take the places of the strikers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—In consequence of unfavourable weather the crops are expected to be somewhat light, with the exception of hay and oats. There will probably be an abundant fruit crop. Farmers are securing good prices for their products.

Railroad construction and employment.—The Canadian Pacific Railway Company has a large number of men employed laying new rails from Windsor to London, and the Michigan Central Railway Company is putting its yards at the tunnel in shape and laying miles of side tracks.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy. Competent carpenters were in demand, as the building trades were generally well employed. The iron trades have improved considerably during the month and all were working full time. Wood-

workers, upholsterers, carriage and wagon makers were busy. Printers and pressmen were very busy. Journeymen tailors were working overtime, and garment workers were in demand. Those employed in the food and tobacco trades were well employed. Similar conditions prevailed in the leather and miscellaneous trades. Business with transportation companies was very good; the railway companies found it necessary to increase staffs. Teamsters and unskilled labour had plenty of employment.

DISTRICT NOTES.

Walkerville.—Industrial establishments were all running full time.

Sandwich.—The municipality is spending \$45,000 on improvement to the sewer system.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Business during the month showed a marked improvement in nearly all lines. Labour was well employed. The Algoma Steel Company has decided to build another blast furnace in connection with its plant here. A plant for rolling structural steel is also to be erected. These, with an open hearth furnace, will greatly increase the number of employees required by the company.

A serious accident to the ship canal here hampered navigation somewhat for a couple of weeks, but repairs were made and locking resumed on June 21.

The town council increased the wages of street labourers from \$1.75 to \$2.00, from six to ten men were affected.

A contract was awarded by the Lake Superior Corporation for the construction of eight miles of its Manitoulin and North Shore Railway.

Employees in the various industries in town were working full time and on the whole the outlook was favourable.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were good, but the weather has been rather dry.

Manufacturing.—The several manufacturing plants in town were working full time and with full staffs of employees.

CONDITION OF PARTICULAR TRADES.

The building trades were busy; the other skilled trades reported normal conditions.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Generally speaking all classes of workpeople have been employed during June to a fuller extent than for many months. In the case of ordinary manual labour there is some indication that the supply will be unequal to the demand during the next three months. Employment agents are already visiting other points with a view to getting men for heavy manual work. Factories are fairly active. Work on the construction of the repair shops for National Transcontinental Railway has begun. In a few days a new railroad bridge over the Red River will be commenced by the same railroad. It would have been in operation for some time, but for the delay resulting through negotiations with the cities of Winnipeg and St. Boniface with the end in view of making the bridge a joint traffic and railroad bridge. It is also understood that in a few weeks there will be some work done on the construction of terminals in Winnipeg for the Great Northern Railway.

The citizens of Winnipeg have voted favourably upon three money by-laws which provide \$400,000 for improvements to existing bridges over the Red and the Assiniboine Rivers and for a new viaduct over the Canadian Pacific Railroad tracks joining Brown with Brant street. \$150,000 is for the purchase of

new park sites and \$50,000 is for the erection of a new fire hall in the Western Part of the City.

Exceptional activity is evident in the building trades in Winnipeg at the present time. Permits continue to be issued at a rate greater than that of previous years and several large structures, in addition to those in course of erection, are being contemplated.

Bank clearings indicate a growing expansion of business. Crop prospects are excellent and as a result there is more activity in trade circles.

Conditions amongst wage earners are slightly unsettled in the case of some classes of workers. Between the engineers of the Canadian Northern Railway and the management, there is friction and the relations between the Grand Trunk Pacific and its employees are disturbed. A small strike amongst the cigar makers took place on June 18th, and no settlement has been effected. No settlement has been effected of the garment workers' strike; the Union of garment Workers reports that all their members who went on strike are now employed at other work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops in the entire west are reported in excellent condition. Rains during June have been regular and the land is well charged with moisture. Although the spring was late and the cold kept the farmers off the land until late in April and towards the middle of May the growing conditions that set in towards the end of May and through June have been such as to bring the crop fully up to the standard for this season of the year. The acreage under crop is estimated by local grain dealers to be slightly greater than in previous years with respect to wheat, but in regard to the coarser grains there is a decided increase in the acreage sown.

Mining.—Considerable local interest is taken in the discoveries in Northern Saskatchewan and Manitoba. Samples of ore from recently discovered veins are regarded as evidence of the existence of gold bearing quartz in the northern territory of these two provinces.

Railway construction.—The Grand Trunk Pacific Railway between Winnipeg and Edmonton will shortly be ready for operation. Only a few more miles of steel are to be laid. Between Port Arthur and Winnipeg the National Transcontinental Railroad will be ready for operation by the first of August.

CONDITION OF PARTICULAR TRADES.

Carpenters have been in demand in the building trade as a result of the very large number of new dwellings being erected. During the month also some extensive alterations and repairs have been made to the Exhibition buildings to be in readiness for the exposition which takes place on the 10th of July and continues until the 17th. This work required the services of a number of carpenters. In connection with the exhibition, the City of Winnipeg is making arrangements for an electrical display and the building for this has been erected during June. The large amount of building that is being done and the fact that activity in this respect started early in the year will give steady employment to men in all trades for the balance of the season.

All the iron foundries were busier than last month. Orders from provincial points appear to increase every year. Some of the local foundries are getting a good deal of work from Alberta and Saskatchewan.

All the planing mills were busy. They have filled up their staffs to full capacity and the orders coming in are very considerable. The class of work being asked for is of a higher grade every year.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during June showed an improvement over the preceding month, though the supply of labour has been

greater than the demand. The building trades were more active than at the same period last year, caprenters and plasterers being in demand. Work has commenced on a brick block on Ninth street. W. Bell, of this city has been awarded the contract for the Provincial Sanitarium at Ninette, and work has been started. The new trunk sewer is well under way, and the duplicate water main has been commenced. The Labour Temple Co. has purchased a site, and work will be commenced immediately. Wages are practically the same as last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crop reports from the district are very encouraging, the weather being satisfactory. Everything points to an exceptionally good crop.

CONDITION OF PARTICULAR TRADES.

Bricklayers reported nobody idle, but not much work in hand. Many members leaving the city for other places has helped the remaining members to secure work. Carpenters and joiners, lathers, plasterers and stonecutters were busy. Cigarmakers were active. For unskilled labour the demand was quite as good as last year. And the wages practically the same.

REGINA, SASK., AND DISTRICT.

Mr. Hugh Peat, correspondent. Reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during June was very good. Active conditions prevailed in all branches of the building trades, and prospects for the continuance of the present favourable conditions for the balance of the season are excellent.

A small army of men are rushing forward the work on the Parliament Buildings, and the Willoughby and Duncan Block and the Heintzman Block are making rapid progress. The former of

these buildings will have a frontage of 100 ft., built of sand lime with tyndall cut stone trimmings, whilst the latter will have a frontage of 30 ft., built of brick with slab marble trimmings. A number of men were also engaged on the new Darke block on 11th, Ave, which will be built of solid brick. A large number of building permits for residences have been issued during the month, and the firm of Messrs. Cook & Vanstone have made application for a permit for the building of a flour mill of a hundred barrel capacity.

The investigation instituted by the Saskatchewan Government for the purpose of determining the prevailing rates of wages in the various branches of the building trades throughout the Province was brought to a close early in the month, the result being as follows:—

	Per Hour.
Joiners.....	\$. 35
Carpenters.....	.30
Carpenters' Improvers.....	.55
Brick masons.....	.25
Handy men.....	.22½
Builders' labourers.....	.20
Labourers.....	.20

This investigation was made by the Provincial Government in order to determine the minimum rate of wages that should be paid on the new Parliament Buildings now in course of erection at Regina. Two disputes occurred on this building last month, and it was with a view to obviate a recurrence of the same that the investigation was made and the above rates established. These rates will take effect from the time the striking labourers returned to work, May 26th.

In response to the request of the Regina Trades and Labour Council for a fair wage clause in city contracts the City Council passed the following resolution:—

“That contractors on municipal work shall pay the rate of wages current in Regina; that none but skilled workmen and their apprentices shall be employed and they shall not be required to work more hours per day or week than is customary in the locality; that as far as possible and reasonable none but resident Canadians are to be employed on the work.”

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—According to a bulletin recently issued by the Department of Agriculture the estimated acreage increase for 1909 is 10.86 per cent. on the final figures of 1908. This increase is distributed amongst the principal grain crops as follows:—

	1909	1908
Wheat.....	3,912,497	3,703,563
Oats.....	2,192,416	1,772,976
Barley.....	235,463	229,574
Flax.....	278,835	264,728
Total....	6,619,211	5,970,841

The reports of the Department's correspondents re new settlers in their districts indicate the rapidity with which the land is being brought under cultivation. The following are the totals from the combined districts:—

Homesteaders.....	2,137
Tenants.....	217
Purchasers.....	489
Total.....	2,843

Seeding in many sections was late owing to unfavourable conditions, but the subsequent excellent conditions has more than compensated for the backwardness in seeding, and the present outlook is most promising.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were active. Electrical workers, sheet-metal workers, painters and decorators, builders labourers and ordinary labourers were active. Printers had a busy month; conditions were a little better than last month. Bookbinders were active. Laundry workers were active. Cigar-makers were fairly active.

DISTRICT NOTES.

Prince Albert.—Building operations in this city are proceeding apace.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month has been

active, especially in the building trades, both skilled and unskilled workmen being in brisk demand. The amount of building in the city has so far exceeded the spring estimates, and it is probable that before the season closes a record will be established in this connection. The weather during the month has been exceedingly favourable and the crop outlook is bright. Everything seems to point to a prosperous fall. The Imperial Bank opened a branch here during the month in temporary quarters, pending the completion of a building. The Dominion Bank will also establish a branch here in the near future having purchased a site.

Work on the C. P. R., shops slackened somewhat towards the end of the month and a number of men were laid off, this condition, however, is only temporary.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers everywhere throughout the district report crop conditions excellent. The growth is good and the soil in splendid condition. Unless there are severe setbacks between now and harvest a heavy crop is anticipated.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, lathers and plasterers were all very active, with painters fairly busy and plumbers quiet. Electrical workers reported trade somewhat quiet. Blacksmiths and boiler makers were fairly active. Printers were very busy. Bakers, confectioners, butchers, hotel employers and barber were all busy.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market at the beginning of the month

showed an improvement over the previous month and the corresponding month last year.

On the 8th, inst, the Union Carpenters numbering about 350 went on strike to enforce a demand previously made for a minimum rate of \$3.75 per day of eight hours. The plumbers, steamfitters and lathers, came out in sympathy with the carpenters. The builders Exchange has refused to arbitrate the dispute with the carpenters. As a result of the strike very few building permits were taken out the latter part of the month.

The school board is calling for tenders for the erection of a new high school. Which will cot when completed about \$175,000. The contract has been let for a large apartment house to cost \$140,000, also for a \$60,000 addition to the Alberta Hotel.

There are five business blockss under construction at the present time also a considerable number of residences. The development on the northern outskirts of the city has been very rapid since the erection of the packing plant which was commenced about two years ago. There were no buildings in that district when the plant was commenced. Whereas now there are fifty dwelling houses and stores, a well equipped hotel and a church. The highest frontage rate yet secured for First Street realty was reached this month, fifty foot frontage on that street being sold for \$27,000 or \$540 a foot. The same property was purchased eight years ago for \$300.

The city is doing a large amount of street paving and grading and is building a five mile extension to the street railway which furnishes employment for a large number of unskilled labourers.

The following are returns for May as compared with the same month a year ago.

	May, 1908.	May, 1909.
Customs.....	\$14,081.17	\$19,125.87
Building permits.....	77,362.00	368,005.00
Post Office.....	4,900.00	5,300.00
Bank clearings.....	2,972,637.00	3,794,559.00

Street Railway returns.

	April, 1909	May, 1909.
Passengers carried.....	152,203.00	152,911.00
Revenue.....	\$ 6,575.25	7,008.15

On the 18th. inst., the ratepayers endorsed the following money by-laws: one for \$40,000 to purchase a hay market; \$45,000 to purchase an addition to the market site; \$3,000 to purchase a fire hall site, and \$50,000 as a bonus towards a new public hospital. A by-law was also carried to provide for the operation of Sunday Street cars.

Transportation companies reported business active. Wholesalers reported trade fair. Retail trade was very quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — Notwithstanding the lateness of the season, the crops are growing very fast and are now as far advanced as they usually are in the month of June. There have been no frosts and no sign of cut-worms.

New hay is being sold at from \$15 to \$17 per ton. As a result prices of good timothy hay have fallen from \$28 to \$20 per ton. Prices for other farm produce on the city market were as follows:—

Oats.....	45c. per bu.
Feed wheat.....	75c. to 80c. per bu.
Barley.....	45c. to 50c. per bu.
Shorts.....	\$1.35 per cwt.
Bran.....	1.30 per cwt.
Fat steers, 1,200 lbs.....	4½c. to 5c. per lb.
Cows and heifers.....	3½c. to 4½c. per lb.
Hogs.....	6 c. per lb.
Calves.....	4½c. to 5½c. per lb.
Sheep.....	5c. to 5½c. per lb.
Lambs.....	5½c. to 6c. per lb.
Dairy butter.....	20c. to 25c. per lb.
Eggs to dealers.....	20c. per doz.
Potatoes.....	75c. to \$1.00 per bus.
Turnips.....	1½c. per lb.
Carrots.....	2c. per lb.
Parsnips.....	2½c. per lbs.
Cabbage.....	8c. per lb.
Beets.....	2½c. per lb.

Lumbering.—The local lumbermen expect to have all their logs down the river by July 1st. They will have about 20,000,000 feet to cut this year.

Manufacturing.—A company has been formed to be known as the G. & J. Safety Blasting Powder Co., manufacturers of smokeless, odorless blasting powder which it claim has the further advantage of not exploding from concussion. The company made its first shipment of twenty tons on the 19th. inst., to be used in mining operations in B. C.

Railroad construction.—Over a thousand men are at work on the Canadian

Northern Railway branch line from Vigreville to Camrose and construction is progressing rapidly. It is reported that the Grand Trunk Pacific will have the steel laid to this city by July 10th. Lifting and ballasting gangs are close behind track layers. The track will be ready for regular service by early fall.

CONDITION OF PARTICULAR TRADES.

Owing to the strike of the carpenters, plumbers, steamfitters and lathers, a great many bricklayers and masons, plasterers, painters and building labourers were idle.

Machinists and engineers, electrical workers and linemen, blacksmiths and horseshoers reported trade fair, sheet metal workers were quiet.

Printers were active, Journeymen tailors and garment workers were quiet. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers were active. Barbers, clerks, delivery employees, hotel, restaurant and theatre employees were active. The supply of unskilled labour was more than equal to the demand.

NELSON, B. C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market throughout the Kootenay district during June was quiet, the supply of hands exceeding the demand. The Imperial Bank opened a branch at Moyie, C. B. and the Canadian Bank of Commerce one at Nakusp, B. C. The directors of the LeRoi mine at Rossland announced that they had completed financial arrangements for extensive development work, which it was reported would be started without delay. Since the LeRoi mine was closed down in February last the miners and workmen employed at and around the Rossland camp only numbered about 600 men. The sale of the Highland mine at Ainsworth, B. C., to

New York capitalists was reported. This property though idle for some time past has been a large producer of silver lead ore of low grade in silver but with high percentage of lead. Operations will be started without delay with a force of about 35 men. About June 1st, the weather being warm, the snow in the mountains melted quickly and suddenly raised the water in the several rivers throughout the district, resulting in the breaking away of considerable quantities of saw logs belonging to many of the different lumbering companies and entailing heavy loss. The same freshet caused damage to the railways throughout the Kootenay district, washing away the track in many places and weakening a few of the bridges. The damage, however had been fully repaired at the end of the month. Fernie is enjoying a fair share of building activity at present, eight large and commodious brick and cement business structures being in course of erection and a large number of frame residences. Notwithstanding this, there was said to be 100 idle carpenters there and more than that number of idle labourers. The Crow's Nest Pass Coal Company was gradually increasing its working force. The strike at the Hosmer, B. C., and other mines in Alberta was not yet reported settled. Strawberries were plentiful at Nelson, Creston and other parts of the district and the outlook for the fruit crop in general was reported good.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. D. J. Stewart, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district is very satisfactory at present, supply and demand being about equal. Better conditions prevail in all lines than was the case in the corresponding month of last year. Several new business blocks are under construction, a large addition is being made to the local land Registry office, and the Provincial government has let a contract at a cost of \$369,000,

for the construction of one of several new buildings to be erected on grounds which comprise an area of 900 acres, secured for the hospital for the insane in Coquitlam Municipality. The exhibition officials propose to build an additional building at a cost of \$8,500.00 to be used for horse show purposes. Construction is still going on in connection with the electric railway between this City and Chilliwack, and steel is being laid on the first 18 miles. The railway between this city and Eburne is completed with the exception of the wiring which will be done at once; this road will connect this city with the fine agricultural lands of Lulu and Sea Islands. A fatal wreck took place during the month on the Great Northern Railway near this city and resulted in the death of three men and the injury of several others. Several steamers and sailing vessels called at this port during the month for cargoes of lumber, boxes and ect. The feeling among shipping men at present is that the Fraser river channel is safe for the vessels that visit this coast; in this connection the two dredges still continue to do good work. Free mail delivery is now an accomplished fact in this city and the benefits therefrom are fully appreciated. It is reported that the Chinese are holding out for increased wages this year for cannery work. The work they do requires considerable experience.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions are active and good prices prevail for all commodities. Strawberries have already made their appearance on the market; the supply is as yet however limited; the price being two boxes for 25 cents or at the rate of \$3.00 per crate of 24 boxes of one pound each.

Fishing.—Conditions on the Fraser river are quiet at present, as owing to the annual freshet the fishermen find rowing rather difficult, and the floating debris constitute a source of danger to their nets. They have, therefore, abandoned the river to some extent for the present, and are preparing for the sockeye run

which is expected to be heavy this year.

Lumbering.—Conditions are still improving, the demand from the prairie provinces being better than for some time past. The companies are finding it much easier to meet their obligations.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, plumbers, and builders' labourers were active.

Iron moulders, iron workers, machinists, engineers, and blacksmiths were active.

Car builders (electric) were busy with shingle weavers quiet.

Printers, pressmen, bookbinders, journeymen tailors, and boot and shoe workers were busy.

Bakers and butchers were active, with cigar makers quiet.

Barbers and laundry workers were active, with clerks and stenographers quiet.

Steamboat men, street railway men, teamsters and expressmen were active.

Unskilled labour was active.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Business has never been better in all lines than during the past month. Outward shipments increased, and business locally was unusually brisk. Prices were firm on every hand, with a general tendency to rise. Potatoes sold at \$62.00 a ton.

The labour market improved over May, and the skilled trades were the gainers thereby. Unskilled workers were not so fortunate as their numbers were rapidly added to by new arrivals.

The Young Women's Christian Association reported that there were over 6,000 wage earning women in Vancouver as follows:—

Clerks and saleswomen.....	1,250
Bookkeepers and stenographers.....	1,200
Trained nurses.....	200
Teachers.....	360
Telephone operators.....	100
Domestics.....	1,440
Waitresses.....	450
Lundresses.....	390
Factory workers.....	270
Tailoresses and dressmakers.....	450
Total.....	6,110

A strong resolution was passed at a mass meeting of workmen calling upon the city council to adopt the 8-hour day, and to pay the 9-hour day rate therefor.

The real estate market continued brisk.

The past month has been a busy one for the local shipyards, the three ways on Burrard Inlet being always full with tugs, scows, launches and other small craft.

A contract for \$40,000 was let for the new high school in the east end.

The B. C. Electric Railway Co., has added 46 additional miles of street car lines since January 1st.

The new post office has been completed, and is now being filled with its office fixtures and furniture. The total cost approximates \$500,000. The lot 150 x 120 feet was bought in 1904 for \$52,000, and is now valued at \$300,000. The total value of building and land is \$800,000. A \$3,500 clock will be placed in the tower.

Seventy men and six donkey engines were employed on the Granville street bridge.

A company, capitalized at \$5,000,000, purchased the entire plant and assets of the Stave Lake Power Co. The new concern will shortly enter the electrical power field in Vancouver and New Westminster and will bring 130,000 horse power into the two cities. The lake is 25 miles distant.

The Board of Trade is in negotiation with the C.P.R. for a better local train service.

A considerable improvement is taking place in the mining districts of the province.

CONDITION OF PARTICULAR TRADES.

Building.—These trades were generally active, all classes being well employed.

Metal.—General activity prevailed among iron moulders, machinists, en-

gineers and linemen. Electrical workers reported trade conditions as extremely bad, owing to the dispute over the "card system." Blacksmiths, boiler-makers and horseshoers were active.

Printing and allied.—Printers (Job) were inactive. News printers were well employed with pressmen and bookbinders active.

Clothing.—Journemen tailors reported trade fair.

Food and tobacco preparation.—Bakers reported trade fair. Butchers were very active and cigarmakers quiet, with a number of idle men.

Leather.—Workers on horse goods reported trade quiet and eight shops employing about 20 hands.

Miscellaneous.—Barbers had a quiet month. Clerks and delivery employees were fairly well employed. Laundry workers reported trade fair.

Transport.—Transportation companies were very active. Steamboat men and deck hands were well employed. Longshoremen fair, but unsettled. Street railway men were active. Cab men reported a falling off in trade owing to competition with automobiles. Express men and teamsters were well employed with prospects of a good season.

DISTRICT NOTES.

Point Grey.—The electors decided to expend \$300,000 on local improvements. Contracts will be let immediately, which means that a large number of road workmen will go there from Vancouver.

North Vancouver.—The McDougall-Jenkins Engineering Company will establish a \$75,000 iron establishment here shortly. The Wallace's shipyards are very busy.

Prince Rupert.—No building has yet been started on the high priced lots. Four frame buildings, valued at about \$2,000 were started on lots purchased at the Vancouver sale. A large number of workmen are idle.

Since the advent of the long summer days again the working forces along the construction work of the Grand Trunk Pacific have been greatly increased, much better progress is being made and

the work on the first hundred miles of the road is being hurried to completion. With good daylight until 11 o'clock at night, and with barely one hour of darkness, most of the contractors have increased their forces and are now working day and night gangs.

VICTORIA, B.C., AND DISTRICT.

Mr. W. E. Ditchburn, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the latter part of May and up to the 20th of June labour generally was well employed, all the industries working full time. This was particularly true of the building trades. It is expected that the present year will be the best experienced in the history of the city. The value of new buildings contracted for in May was \$100,000 in excess of that for the corresponding month of last year, and the aggregate amount for the first five months of 1909 over-lapped the same period of last year by \$252,300. The value of building permits for the first five months of the present year is as follows:—

First five months, 1909.....	\$699,080
First five months, 1908.....	446,760
Excess, 1909.....	\$252,300

The figures quoted above do not include the large amount of building under way in the suburbs.

Owing to the large amount of civic improvement to be completed this year it has been found necessary to have some of the work done by contract. For a number of years all civic work has been done under the day labour system, which has hitherto proved satisfactory. In order that all labourers, etc., employed by those receiving civic contracts may receive the same rate of wages as are paid by the city, the building inspector has been appointed "Fair Wages' Officer" for the city. Practically the same scale will be enforced on all city work as prevails under the Dominion Government fair wage schedule. At present about seven hundred and fifty men are being

employed on different municipal improvements.

The demands of the leather workers have been conceded by two of the four firms located here; the two other firms have not yet complied with the men's requests, and are carrying on business with reduced staffs. The carpenters are taking steps to further improve their organization.

Transportation this summer has not come up to expectation. The cheap rates previously existing, the result of keen competition between the different companies, are a thing of the past.

The city council is considering a by-law dealing with the reclassification of the employees of the city hall; it is expected that it will be ratified next month.

Business generally, both wholesale and retail, was reported as normal.

During the present month eighty-four Chinese entered Canada at this port and paid the \$500 head-tax.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The local strawberry crop will not be up to expectation, owing to a great number of the plants being injured by frost during the latter part of May. There will only be about three-quarters of an average crop, and consequently high prices prevail.

Fishing.—Great preparation are being made along the coast of Vancouver Island, in anticipation of the big run of salmon this year. No less than twelve or thirteen traps will be in operation at Sooke, a few miles from this city. As this is considered the "big year" for salmon canning, a much larger number of canneries will be in operation than last year. No less than seventy-three canneries will be in operation in the province this year. A new salmon packing enterprise, the San Juan Fishing Company, has located in this city, and commenced operations. It expects to employ about thirty men.

Lumbering.—The lumber mills in the city and on the Island were running full time endeavouring to keep up with orders. More logging camps are working this year than last, owing to the high price prevailing in the earlier part of the year.

Other industries.—All other industries of this city and district were in a prosperous condition, and reported prospects encouraging.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been more active than during May. While there has been no lack of men, there have been few idle. Business men reported trade good and prospects fair. There have been no changes in hours of labour or rates of wages during the month.

Work on the extension to the City water works is being pushed ahead as rapidly as possible. It is employing all the men available.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There was no activity among the fishermen in this district outside of the local trade.

Lumbering.—Work in the lumber camps has been more active than had been expected. The saw mills in the district are working full time, there seeming to be a revival in the demand from the Northwest provinces.

Mining.—The coal mines in the district are working full time and two of the new companies are pushing development work.

Railroad construction work is quiet, but clearing the right of way is going ahead.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were actively employed. Carpenters and joiners reported work as active, being better than for some years.

Painters, plumbers and builders' labourers were well employed. Machinists and engineers also were active. Blacksmiths and carriage makers reported work plentiful. Printers were active. Teamsters and express men were fairly active. Unskilled labour has been well employed.

REGULATION BY THE DOMINION GOVERNMENT OF OVER-SEAS IMMIGRATION TO CANADA.

IT will be remembered that on several occasions during the past two years amendments of the Immigration Act of the Dominion, and of the regulations issued under that legislation have been adopted by the Canadian government, especially in the matter of securing more strict supervision of the quality of the immigrants admitted into Canada, from Great Britain and the continent of Europe. This policy has been enforced with still greater care since the financial stringency of the autumn of 1907, owing to the comparatively larger amount of unemployed that has prevailed in the more important industrial centres since that date. With a view of bringing to the attention of the transportation companies interested, the exact terms of the law with regard to the exclusion of undesirable immigrants from Canada as it obtains at the present time a circular

letter was sent out during the past month by the Superintendent of Immigration to all of the railway and steamship companies engaged in the transport of immigrants. The text of the letter, which contains a full exposition of the policy of the government and of the intention of the law in this connection, is as follows:—

OTTAWA, 4th June, 1909.

In Re Exclusion of Over-seas Immigrants.

Sir:—

In view of the fact that the Immigration Act at present in force has been amended several times, and that in accordance with its provisions its express terms have been supplemented by several Orders-in-Council, there is a possibility of misunderstanding arising between the

several steamship and railway companies and the Immigration Department in the application of its exclusion provisions.

As a help towards avoiding such misunderstanding it seems advisable that the immigration policy of the Canadian government and the understanding of the Interior Department of the exclusion provisions of the Immigration Act should be stated as shortly and plainly although informally as possible:—

1. Money is expended and administration is exercised with the object of securing immigrants whose purpose in life is to occupy farm lands, either as owners, tenants, or labourers.

2. Money is voted and administration is exercised with the object of excluding those whose presence in Canada would tend to add to the congestion of our towns and cities.

Immigration effort is made in those countries which are considered most likely to furnish the people coming within the first of the two classes above specified.

No immigration effort is made in those countries which are considered likely to furnish the people coming within the second class.

The Act is interpreted and its administration conducted throughout, to give effect to the above two distinct lines of policy.

Certain of the exclusion provisions of the Immigration Act are mandatory and apply equally to the people of every class and of every country. These are the provisions which exclude the physically, mentally or morally unfit.

Other provisions exclude for financial or other reasons, not physical, mental or moral.

These provisions exclude:—

1. Charity aided immigrants.

2. Europeans who have in possession less than \$25 in cash besides ticket to destination, and Asiatics who have less than \$200 besides ticket to destination; excepting citizens of China or Japan, in regard to whom there are special arrangements. (Chinese must pay \$500 head tax; Japanese must have in possession \$25 cash and a passport).

3. Immigrants who do not come by continuous passage from, and on ticket

purchased in, the country of their birth or citizenship.

Provision is made for relaxing the first of these causes of exclusion in the case of persons who have been inspected and approved before sailing by the Assistant Superintendent of Emigration for Canada in England. No other relaxation will be made.

In regard to the second, provision is made for relaxation (a) in the case of persons going to friends permanently resident in Canada who are capable of supporting them, and (b) in the case of those going to assured employment.

The relaxation in the case of persons going to friends only applies to persons ordinarily dependent on such friends; that is, wife or children going to husband or father; brother or sister going to brother, minors going to married or independent sisters, or parents going to children capable of supporting them.

The provision as to relaxation of the money qualification, because going to assured employment, is dealt with as follows:—

(a) Immigrants from countries, other than those in which immigration effort is being made by Canada, cannot be assumed by the Immigration Officials to be going to assured employment, and therefore each individual will be required to produce the amount of money the regulations call for.

(b) In view of the difficulties encountered by non-English speaking immigrants in securing employment, even though coming from the countries in which immigration effort is being made, (in case of their not having the money required and ticket to destination), the agent must be satisfied by evidence which he must record that such immigrant is going to assured employment at farm work. (The over-sea countries in which immigration effort is made are Great Britain and Ireland, France, Belgium, Holland, Germany, Denmark, Iceland, Norway, Sweden and Switzerland.)

(c) In case of English speaking immigrants, while the steamship companies must be prepared at all times for a strict enforcement of the money requirement, the agent may, in case the immigrant is

otherwise desirable, accept a reasonable assurance that he will find employment, provided such employment is at farm work.

Regarding the third cause for exclusion: All immigrants who are unable to satisfy the agent either that they have independent means of support or that they are suited to farm work and intend to engage in it, are liable to be excluded

under the indirect passage provision.

The Officials of the Immigration Department at ocean ports are being instructed that they will be held strictly to account for the enforcement of the Act in accordance with the foregoing statement of its terms.

Your obedient servant,

(Sgd.) Superintendent of Immigration.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JUNE, 1909.

THREE applications for the establishment of Boards of Conciliation under the Industrial Disputes Investigation Act, 1907, were received in the Department during the month of June, as follows:—

(1) On behalf of engineers, firemen, conductors, brakemen, baggagemen and yardsmen, members of the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Engineers, the Order of Railway Conductors and the Brotherhood of Railroad Trainmen, employed on the lines of the Grand Trunk Pacific Railway Company, the number of employees affected being estimated at 300 directly and 800 indirectly;

(2) On behalf of the Maintenance of Way employees of the Canadian Northern Railway Company, members of the International Brotherhood of Maintenance of Way Employees, the number of employees affected being estimated at 1,100 directly and 700 indirectly;

(3) On behalf of the employees of the Canada West Coal Company, Limited, of Taber, Alberta, as represented by District No. 18, United Mine Workers of America, the number of employees affected being 300 directly and upwards of 5,000 indirectly.

Earlier Applications.

Of applications received prior to the beginning of June, proceedings in connection with which remained at that date unfinished, there were the following:—

(1) On behalf of railroad telegraphers employed along the lines of the Canadian Pacific Railway Company's system, the number of employees affected being estimated at 1,600;

(2) On behalf of employees of certain coal mining companies, members of the Western Coal Operators' Association, in the provinces of Alberta and British Columbia, as follows:—Alberta Railway and Irrigation Company, H. W. McNeill Company, Pacific Coal Company, Leitch Collieries, Ltd., Western Canadian Collieries Ltd., International Coal and Coke Company, Ltd., and Hosmer Mines Ltd., the number of employees affected being estimated at 2,100;

(3) On behalf of employees of the Cumberland Railway and Coal Company, Springhill, N. S., the number of employees affected being estimated at 1,550;

(4) On behalf of longshoremen employed by the Canadian Pacific Railway Company at Owen Sound, Ont., the number of employees affected being estimated at 250;

(5) On behalf of the employees of the British Columbia Copper Company of Greenwood, B. C., the number of employees affected being estimated at 225;

(6) On behalf of the employees of the Nicola Valley Coal and Coke Company of Middlesboro, B. C., the number of employees affected being estimated at 150;

(7) On behalf of the employees of the Nova Scotia Steel and Coal Company at Sydney No. 3, Florence, Cape Breton, the number of employees affected being estimated at 340 directly and 120 indirectly.

Reports Received.

During June, the Department received reports in the case of five Boards established under the act as follows:—

(1) That arising out of the application of the members of the British Columbia Copper Company, of Greenwood, B. C.;

(2) That arising out of an application of the employees of the Nicola Valley Coal and Coke Company, of Middlesboro, B.C.;

(3) That arising out of the application of the Railroad Telegraphers employed along the lines of the Canadian Pacific Railway Company's system;

(4) That arising out of the application of the employees of certain Coal mining companies, members of the Western Coal Operators' Association, in the Provinces of Alberta and British Columbia, viz:—The Alberta Railway and Irrigation Company. The H. W. McNeill Company, Pacific Coal Company, the Leitch Collieries, Limited, the Western Canadian Collieries, Limited, the International Coal and Coke Company, Limited and Hosmer Mines, Limited.

(5) That arising out of an application of the Longshoremen employed by the Canadian Pacific Railway at Owen Sound, Ontario.

Other Proceedings under the Act.

In the case of the dispute between the Nova Scotia Steel and Coal Company of Sydney, C. B., and its employees in Florence, C.B., His Honour Judge J. P. Chipman, County Judge, Kemptville, N. S., was appointed Chairman of the Board of Conciliation and Investigation in the absence of a joint recommendation from His Honour Judge MacGillivray, Antigonish, N. S., and Mr. Daniel McDougall, Glace Bay, the other members of the above Board. Sittings of this Board, were held during June, but the report had not been received at the end of the month.

In the case of the dispute between the Cumberland Railway and Coal Company, of Springhill, N. S., and its employees, the Hon. J. W. Longley, of the Supreme Court of Nova Scotia, was appointed

Chairman of this Board on June 5th in the absence of any joint recommendation from Messrs. Charles Archibald, Halifax, N. S., and E. B. Paul, M. P. P., Springhill, N. S., the other members of the Board. The Board met during the latter part of June, and a report had not been received at the end of the month.

In the case of the Canada West Coal Company, Limited, of Taber, Alberta, and its employees, the application was made by the Company, and alleged as the cause of the dispute failure to agree upon the terms and conditions of a working agreement which expired on March 31, 1909. In this dispute it was stated that 300 employees were directly and more than 5,000 other indirectly affected.

Mr. Colin MacLeod, of MacLeod, Alberta, and Mr. W. C. Simmons of Lethbridge were appointed members of the Board on the recommendation of the employers and employees respectively. His Honour Judge Winter, of Lethbridge, was appointed Chairman on the recommendation of the two members above named.

In the case of the dispute between the Grand Trunk Pacific Railway Company and its engineers, firemen, conductors, brakemen, baggagemen and yardsmen, the Board was asked to consider the adoption of schedules of rates of pay and rules covering the service and working conditions of engineers, firemen, conductors, brakemen, baggagemen and yardsmen, on the Company's lines, including provisions therein as to the dismissal and promotion of employees, as well as other matters. In this case 300 employees were declared to be directly and 800 others indirectly affected. Mr. F. H. McGuigan, and Mr. John G. O'Donoghue, both of Toronto were appointed members of this Board on the recommendation of the Grand Trunk Pacific Railway Company and of the employees respectively and on June 24 the Board was completed by the appointment of Hon. W. P. Sutherland, M. P., of Windsor, Ont., as chairman, on the recommendation of Messrs. McGuigan and O'Donoghue.

In the case of the dispute between the Canadian Northern Railway Company and Maintenance of Way employees, the dis-

pute is stated to have arisen out of a demand on the part of the applicants for an increase in pay averaging approximately 15c. per day. The applicants asked also for amendments in the agreement relating to allowance made for expenses during absence from headquarters, overtime and other matters. In this case 1,100 employees were stated to be directly and

700 others indirectly affected. Mr. J. G. O'Donoghue; of Toronto, and Mr. W. J. Christie, of Winnipeg, were appointed members of the Board on the recommendation of the employees and of the Company respectively, and the Board was completed on June 24 by the appointment of His Honour Judge Myers of Winnipeg, as Chairman.

I.—REPORT OF BOARD IN DISPUTE BETWEEN THE BRITISH COLUMBIA COPPER COMPANY, OF GREENWOOD, B.C., AND ITS EMPLOYEES.

THE Department received on May 21 the report of his Honour Judge P. E. Wilson, of Cranbrook, B. C., as Chairman of this Board. At the same time a separate report was received from Mr. John McInnes, M. P. P., of Phoenix, B. C., the member appointed on the recommendation of the employees. The report of Mr. Edward Cronyn, of Toronto, the member of the Board appointed on the recommendation of the Company, was received in the Department on June 11.

The application for the establishment of this Board, received in the Department on March 30, alleged discrimination on the part of the British Columbia Copper Company against two members of the Greenwood Miners' Union, No. 22, Western Federation of Miners; namely, T. Y. McKay, J. B. Ming, and others, "by discharging them from their employment for no apparent reason but their being active members of Greenwood Miners' Union." The Union demanded that the British Columbia Copper Company cease discriminating against their members and reinstate all members so discriminated against; also that the British Columbia Copper Company adjust all grievances that may arise in the future through a committee from Greenwood Miners' Union." The number of persons affected by this dispute was said to be approximately 225 men. Mr. John McInnes, M. P. P., of Phoenix, B. C., was appointed a member of this Board on the recommendation of the employees and Mr. Edward Cronyn, of Toronto, was appointed on the recommendation of the Company. In the absence of any joint recommendation from Messrs. McInnes

and Cronyn, the Board was completed on April 29 by the appointment of his Honour Judge P. E. Wilson, of Cranbrook, as Chairman.

At the opening sitting of the Board the complaints of the employees concerned were amplified as follows:—

"(1) That the Management of the B. C. Copper Co., recognize a Committee from Greenwood Miners' Union No. 22, W. F. M., to adjust all grievances between the B. C. Copper Co. and its employees.

"(2) That the B. C. Copper Co., cease discriminating against members of Greenwood Miners. Union No. 22, W. F. M.

"(3) That the B. C. Copper Co., reinstate J. B. King and T. Y. McKay, and pay to them their wages in full from the time of their dismissal until such time as they are re-instated.

"(4) That the B. C. Copper Co., shall not discriminate against men on account of their political opinions.

"(5) That the B. C. Copper Co., shall not alter existing conditions of employment of their employees, without notifying the President or Secretary of the Greenwood Miners' Union No. 22, W. F. M., and all notifications shall be in writing.

"(6) That the Management of the B. C. Copper Co., or any of its officials, use any influence, or in any manner interfere with their employees in their choice of doctor or doctors.

"(7) That the management of the B. C. Copper Co., cease in soliciting the Board of Trade, and certain individuals, for the purpose of discrediting Greenwood Miners' Union No. 22, W. F. M."

Summary of Several Reports.

His Honour Judge Wilson in his report observes that "the whole industrial situation in this camp is unfortunate. A feeling of distrust pervades the whole atmosphere and so long as that feeling continues so long will trouble continue." In respect of the recognition of the Union, which was one of the main points of the dispute, the Company claimed that some of their employees were not members of Greenwood Miners' Union and that as to these it was manifestly unfair that they should have to adjust grievances through the Union. Judge Wilson, Chairman, and Mr. Cronyn, member of the Board appointed on the recommendation of the Company, both refer in their reports to certain letters submitted in evidence by the Company in which individual workmen had been informed by the Secretary of Greenwood Miners' Union that a fine had been placed against them for refusing to become members of that body, and that they would be advertised as "unfair to organized labour." In commenting on these letters the Chairman observed that "such action on the part of the Union seems, in my opinion, to depart from the true spirit of unionism which, as I understand it, is to obtain a fair deal for the employees. In my opinion, the letters strongly smack of disloyalty not only to unionism but to the laws of the country itself and such of course as that adopted by the Greenwood Miners' Union cannot do otherwise than lead to distrust by the employer and not only to that but to non-recognition by the employer who should fairly recognize his non-union employees, as well as his union employees and these letters certainly give him fair grounds for stating that he finds it impossible to recognize the Union under such conditions. If it had not been for this unfortunate evidence, I certainly feel that there was no justification whatever for the Company refusing recognition of the Union."

The Chairman is of opinion that in fairness not only to capital but to labour itself each Union should have the power to make a binding contract and that if this were the case "it would much to lessen the feeling of permanent unrest

which seems to prevail at Greenwood." With these two points settled he sees no reason why the parties to the dispute could not come together. The one foundation for the dispute was the demand of the Greenwood Miners' Union for recognition at the hands of the Company and Judge Wilson adds "upon elimination of the Union's procedure as against non-union men and union men who are in arrears, as above outlined, that the Company might and should recognize the Union in dealing with Union employees. In conclusion he recommends: (1) That the Union eliminate any practice of discrimination as against non-union men; (2) That upon the cessation of such procedure the Company recognize and deal with the Union in regard to all questions affecting Union men; (3) That no discrimination be shown against any person by reason of his taking an active part in the Union."

Mr. Cronyn, in his findings gives it as his opinion that the British Columbia Copper Company was amply justified in refusing to recognize or to deal with Greenwood Miners' Union.

Mr. McInnes, finds that "the charges made by the Greenwood Miners' Union were well founded," and gives it as his opinion that "the difficulties between the management and the employees were due largely to the failure of the Manager of the Company to meet his employees in a spirit of fairness." "There had been," Mr. McInnes observes, "scarcely any serious labour troubles for a number of years and this condition is due in a large measure to the fact that nearly every company operating in the provinces recognize the Western Federation of Miners." He recommends, therefore, that the British Columbia Copper Company recognize and do business with Greenwood Miners' Union and that all questions affecting wages and conditions between the Company and the employees be adjusted through the said Union.

Mr. McInnes, in his report states that "after all the evidence was adduced, the Board endeavoured to get the parties to the dispute together so that, if possible, they might arrive at an understanding. The officials of the Company signified

their willingness to confer and settle on reasonable terms but the representative of the Company refused point blank to have any dealings with the Union." The Department has received copies of correspondence showing that in a letter dated June 16 to His Honour Judge Wilson of Cranbrook, the British Columbia Copper Company disputed the accuracy of the foregoing statement in Mr. McInnis' report and asserted that no such suggestion had been received by the Company. In reply Judge Wilson declares the Company's statement in this matter to be correct, and added that a statement by Mr. Cronyn that it was no use to have suggested a conference as in the face of the evidence he, (Mr. Cronyn) knew that the Company could not consider the points, was the only ground that could exist for such a statement.

Report of Chairman of Board.

The text of the findings of His Honour Judge P. E. Wilson, as chairman of the Board, is as follows:—

In the matter of the Industrial Disputes Investigation Act 1907, and in the matter of differences between the British Columbia Copper Company and its employees

The Chairman of this Board begs to report as follows:—

On my appointment at the earnest solicitation of both parties I forthwith went to Greenwood, and a meeting was at once held on my arrival on May 1st.

The complaint as filed with the Board was amplified by the employees who submitted a statement in writing which sets out their ground for complaint. That statement is as follows:—

Mr. Chairman and Members of Conciliation and Investigation Board,
Gentlemen,—

The members of Greenwood Miners' Union, in making application for a Conciliation and Investigation Board, under the Industrial Disputes Act, do not wish to leave the impression on the public that we consider this Act is, in any way intended to benefit the working class.

In fact we consider the Industrial Dispute Act the most hostile piece of

legislation on the statute books of Canada, at the present time, against the labouring class.

Our reason for thinking so is that the corporations can ignore it in nearly every case and as shown in one case in which Greenwood Miners were interested, and it would have been to our benefit to have a Board appointed, the deputy Minister of Labour advised us that the Department of Labour did not consider a copper mine a public utility. In May, 1907, the members of Greenwood Miners' Union, believing that they were entitled to a higher rate of wages as the cost of living had advanced, and as the price of copper had been over 24 cents for the previous six months, made a demand on the different mining companies operating properties in the jurisdiction of Greenwood Miners' Union, for an advance of fifty cents a day in wages, and believing that copper mines would come under the Industrial Disputes Act, we made the demand to take effect the 1st June, 1907.

The members of Greenwood Miners' Union believed at that time that if we could get a conciliation and investigation Board that we had the whip hand, as there had been enormous losses to the B. C. Copper Company through mismanagement, and if we could get a board to demand the Company's books the management of the B. C. Copper Company would grant our demands before he would allow an investigation.

But as the charges have often been made that the Western Federation of Miners is a lawless organization, we invite you to make a thorough investigation into our method of doing business, as we have nothing to conceal, and in making application for a Conciliation and Investigation Board one of our objects is to let the public know the true condition in Greenwood camp.

When we made the demand in May, 1907, for an increase in wages the managers of the different companies operating in the boundary asked the committees representing the different unions to meet them in a body as they would like to make a scale of wages to be general all over the boundary country, and when

the committees met them they asked for time to go to New York to interview the executive board of the different companies, or alien corporations operating in the boundary, and the committees representing the unions granted them the time on condition that they would give an answer before 1st of June, 1907. After the managers returned and we realized after meeting them that they did not intend to grant the raise on the plea that with copper at 24 cents a pound there was very little profit for them. After showing them that 50 cents advance in wages per day would amount to about one-tenth of a cent on a pound of copper, taking their own reports as a basis to work on, as they claimed that they could produce copper and lay it down in New York at between 9 and 10 cents a pound. Mr. Hodges, the Chairman of the managers, remarked that the reports as they sent them out were only to hornswoggle the stockholders. The committee representing the various unions then made up their minds to apply for a conciliation board, and in answer to a telegram that we sent to the Minister of Mines his deputy notified us that we did not come under the Lemieux Act, as the copper mines were not considered by the Department a public utility. Then realizing that we had all the power of capital with the public press, including the Mining Journals of Canada and America, printing lying reports sent out by agents of the Mine Owners' Association against us we arrived at a compromise.

After the union voted on the scale, and we adopted it we posted a copy of the scale on a building at the Mother Lode Mine so that the men would know what they were being paid, so that they could mark their cards supplied daily by the company for that and other purposes. Mr. McAllister sent word to the superintendent at the mine to take the copy of the scale down as he had not been notified officially by the Greenwood Miners' Union of adoption of scale. We had then to make a trip to the B. C. Copper Company office and notify him to that effect.

The managers of the various com-

panies began to realize that the men by being organized were a power to be reckoned with, and Mr. McAllister started in very soon to show us that any man taking an active part in the Union could not work for him. Notwithstanding the fact that we did not ask for a raise in wages for six months after copper had advanced to 24 cents and when we did demand the raise we gave the management over one month's notice, but when the price of copper dropped and the conditions in the labour market were favourable to the operators, the various managers of the large companies got together and closed all the properties in the boundary without even 12 hours' notice, for no other reason than to defeat the objects of the Lemieux Act, as the Minister of Labour had given a decision after we had settled our grievances in May, 1907, that a copper mine was a public utility.

In May, 1908, the B. C. Copper Company resumed operations under a reduced wage scale, but as copper was nearly one cent lower than when they shut down they cannot claim as an excuse the high wages paid in November, a reason for shutting down in November, 1907.

During the shut-down of the B. C. Copper Company's properties in November, 1907, and the resumption of work in May, 1908, Mr. McAllister was very active in getting the Greenwood Board of Trade to adopt certain resolutions placing all the responsibility of the closing down of the B. C. Copper Company's properties on the labouring class, and the same resolutions were published and comments made in a great many of the mining journals published in America. Mr. McAllister also tried to influence foreman in charge of other properties near Greenwood to not employ certain men that belonged to the union, giving as a reason that if the said foreman employed union men that they would divide their wages with men that he was trying to drive out of Greenwood, and he also made the remark that he had two good men in the union to report what was going on.

In the appointment of E. C. Warren to

the position of Manager at the B. C. Copper's smelter we believe we can show to the satisfaction of this Board that the only qualifications that he had for this position was that he was President of Greenwood Board of Trade and the recognized political boss in Greenwood of the Conservative party in B. C., and that the said B. G. Warren would use his influence to disrupt Greenwood Miners' Union.

A few of the reasons that Mr. McAllister wanted to disrupt the union were because that Greenwood Miners' Union were trying to get the benefit of certain laws on the statute books of British Columbia, namely the Master and Servants' Act, and the Workmen's Compensation Act, and we believe that we can show to the satisfaction of this Board that he has deliberately schemed to impose a Company Doctor on his employees to defeat the objects of said acts. We also believe that we can show to the satisfaction of this Board that there has been no effort on the part of the present management of the B. C. Copper Company to operate the mines and smelter of the said company, for the interest of the stockholders as a whole, but their only object was to handle a large tonnage, and in trying to treat a large tonnage it resulted in enormous losses to the B. C. Copper Company.

And we also accuse Mr. McAllister of using every means in his power to compel Greenwood Miners' Union to call a strike so that he can place the responsibility of his mismanagement on to the shoulders of Greenwood Miners' Union.

Respectfully submitted,

Acting for Miners' Union.

Greenwood, B.C., May 1, 1909.

Demands made by Greenwood Miners' Union of the B. C. Copper Company.

1st. That the management of the B. C. Copper Company recognize a committee from Greenwood Miners' Union, No. 22, W.F.M. to adjust all grievances, between the B. C. Copper Company and its employees.

2nd. That the B. C. Copper Company cease discriminating against members of

Greenwood Miners' Union, No. 22, W.F.M.

3rd. That the B. C. Copper Company re-instate J. B. King and T. Y. McKay in their employment, and pay the said J. B. King and T. Y. McKay their wages in full from the time of their dismissal until such time as they are re-instated.

4th. That the B. C. Copper Company shall not discriminate against men on account of their political opinions.

5th. That the B. C. Copper Company shall not alter any existing condition of employment of their employees without notifying the President or Secretary of Greenwood Miners' Union, No. 22, W.F.M and all notifications shall be in writing.

6th. That the management of the B. C. Copper Company, or any of its officials, use any influence, or in any manner interfere with their employees, in their choice of doctor or doctors.

7th. That the management of the B. C. Copper Company cease in soliciting the aid of the Board of Trade and certain individuals, for the purpose of discrediting Greenwood Miners' Union No. 22, W.F.M.

In reply to that the Company filed a statement denying the statements:—

The first complaint is that the management of the B. C. Copper Company refused to recognize a committee from the Greenwood Miners' Union to adjust all grievances between the B. C. Copper Company and its employees.

The company undoubtedly refused to recognize the union. Undoubtedly the great majority of the company's employees belonged to the union. On this point I certainly think that in fair dealing in industrial occupations there must be a recognition of the union by the employer in all matters in which a member of the union is involved. The union simply seeks by combination to protect its members, and so long as it does that it seems to me that it must and should be recognized by the employer. In this case, however, the employer objects to recognizing this particular union. If that objection is against unionism as such then clearly the employer is in the wrong; but if, as the company maintains in this case, the complaint is against unionism in the manner in which it is

adopted at Greenwood, then there may be some grounds for the refusal to recognize the union at Greenwood. The company assert that they have such grounds by reason of the stand taken by the union as against non-union men and against members of the union who refused to re-instate themselves in the union. On that question they put in evidence certain letters which follow:—

GREENWOOD MINER'S UNION
No. 22.

Greenwood, B.C., April 26, 1909

Mr. Fred. Hopkins,
Greenwood, B.C.

Dear Sir:—

Take notice that the members of Greenwood Miners' Union at a regular meeting, placed a fine of \$50 against you for refusing to join this organization while working under our jurisdiction, and I was instructed to advertise you as unfair to organized labour, until such time as you become a member of this organization and pay the above fine into the treasury of Greenwood Miners' Union.

(Sgd.) GEORGE HEATHERTON,
Secretary.

Greenwood, B.C., April 20, 1909

Mr. Bert Hopkins,
Greenwood, B.C.

Dear Sir:—

I wish to notify you that at a regular meeting of Greenwood Miners' Union the members of this organization placed a fine of \$50 against you for refusing to put yourself in good standing in Greenwood Miners' Union, and I was instructed to advertise you as unfair to organized labour, until such time as you pay the fine and put yourself in good standing in Greenwood Miners' Union.

I remain,

Yours truly,

(Sgd.) GEORGE HEATHERTON,
Secretary.

Greenwood, B.C., April 24, 1909.

Mr. George Aiken,
Greenwood, B.C.

Dear Sir:—

I wish to notify you that at a regular meeting of Greenwood Miners' Union the membership of this organization placed a fine of \$25 against you for refusing to become a member of Greenwood Miners' Union, and I was instructed to advertise you as unfair to organized labour, until such time as you become a member and pay the above fine into this union. I remain.

(Sgd.) GEORGE HEATHERTON,
Secretary.

Such action on the part of the union seems in my opinion to depart from the true spirit of unionism which, as I understand it is to obtain a fair deal for the employee. In my opinion the letters strongly smack of disloyalty not only to unionism, but to the laws of the country itself, and such a course as that adopted by the Greenwood Miners' Union cannot do otherwise than lead to distrust by the employer, and not only that, but lead to non-recognition by the employer, who should fairly recognize his non-union employees as well as his union employees, and these letters certainly give him fair grounds for stating that he finds it impossible to recognize the union under such conditions. I cannot find, by reason of the date of the letters, that they were the cause of complaint in this matter, but it seems to me that such letters having come to the knowledge of the employer that he is to that extent justified in refusing to recognize the officials of the union that acts in that manner. If it had not been for this unfortunate evidence I certainly feel that there was no justification whatever for the Company refusing recognition of the union.

The employer stands in a peculiar position. He must deal fairly with his non-union men as well as with his union men, and it seems to me that he is not acting outside the scope of fairness to protecting his non-union employee from an unfair demand made by union.

Again it must be borne in mind that the

employer dealing with the union is dealing with a body which has not, in itself, any power to make a binding contract, and on this point it seems to me that in fairness not only to capital, but to labour itself, that each union should have the power to contract. If that were the case I think it would tend much to lessen the feeling of permanent unrest which seems to prevail at Greenwood.

These two points being settled I can see no reason why the parties in this dispute cannot get together. Really, the one foundation for the dispute is based on this one demand, *i.e.* recognition of the union, and I think that upon the elimination of the union's procedure as against non-union men and union men who are in arrears, as above outlined, that the company might and should recognize the union in dealing with union employees, I felt that there might be some question on this point. The dismissal complained of happened at an unfortunate time. The Company was putting down its force. There was a feeling among the men, and everything that was done on either one side or the other was looked upon with distrust by the opposite party. I cannot find on this point that there was a clear discrimination against union men as such. There is suspicion in regard to cause of dismissal, but as it was done at a time when the Company was cutting down its force I cannot find this charge is proved.

(3) This demand is covered by my findings in the above.

(4) As to discrimination on account of political opinions I do not think that existed.

(5) I think that this demand must necessarily stand or fall on No. 1. The Company in fairness should notify the men as to altering existing conditions of employment within reasonable scope. This matter is also one that speedily will be remedied when an adjustment can be arrived at between the Company and the union, as to recognition of the union by the Company.

(6) This demand is also one on which I cannot find that the men have any complaint, and one which will speedily be remedied by recognition of the union by the Company.

(7) This demand is one in regard to the Company soliciting the aid of the Greenwood Board of Trade and certain individuals for the purpose of discrediting the Greenwood Miners' Union. On this point I think there was no question that the men who signed the resolution complained of, did so in all fairness and sincerity for the good of the community. The people of Greenwood, suffering as they did from shut-down after shut-down, were extremely anxious that work continue on this, the largest, property in their community. When apparently labour troubles had been arranged the appearance of a notice requesting the men not to return to work until further notified, although it was accompanied by a notice calling a meeting of the union, filled their minds with distrust as to the future labour situation, and they, I think reasonably, felt as a Board of Trade, that a resolution deprecating the spirit of agitation in the district was one that would fairly meet with the approval of all parties without it being suggested that it was in any way directed against unionism. I think they were absolutely fair in that matter and were acting, as they thought, in the best interests of the community, apart altogether from any solicitation by the Company.

I would recommend.

(1) That the union eliminate any practice of discrimination as against non-union men.

(2) That upon the cessation of such procedure the Company recognize and deal with the union in regard to all questions affecting union men.

(3) That no discrimination be shown against any person by reason of his taking an active part in the union.

The whole industrial situation in this camp is unfortunate. A feeling of distrust pervades the whole atmosphere, and so long as that feeling continues so long will trouble continue. Unless some feeling can arise which will tend to a belief by each party in human nature, even if the party is of the opposite side, no cessation of the present trouble can be contemplated. If the employer will fairly recognize fair union labour and the union will fairly deal with the employer, then

trouble will cease, otherwise it will continue forever.

(Signed) P. E. WILSON,
Chairman.

Mr. Cronyn's Report.

The text of the findings of Mr. E. Edward Cronyn, member of the Board appointed on the recommendation of the Company, is as follows:—

In the Matter of the Industrial Disputes Investigation Act 1907, and in the matter of differences between the British Columbia Copper Company and its Employees.

Report of the member of this Board nominated by the Company:—

At the conclusion of the sessions of the Conciliation Board, when it became apparent that it was impossible to make an unanimous report, it was arranged between the Chairman and myself, that as we were entirely agreed upon all the points in question, that we should send in a majority report signed by both of us. Later, however, the Chairman advised me that after talking with some of the citizens of Greenwood, he had come to the conclusion that his report would have a more beneficial effect on the laboring classes if he were not associated with the Company's nominee in making it, although he again unqualifiedly agreed with me in the whole matter.

Having lived for some years in the Mining Camps of British Columbia, including Greenwood. I am thoroughly familiar with labour conditions there. It is a fact, that the American Labor Organization, known as the Western Federation of Miners, has for years been strenuously endeavoring to establish itself in the Mining Camps of British Columbia. It is notorious that many of the leading spirits of this organization in the States not only countenance, but encourage methods and principles which are entirely in defiance of law and order, and it is greatly to be deplored that this organization should have been permitted to gain any foot-hold whatever in Canada. It is hard for citizens of the Eastern part of this Country to understand to what

lengths prominent members of this organization are prepared to go in their effort to dominate other members, and to enforce their wishes upon any community in which they operate. It is clear from evidence given at trials in the Western States, that violations of the law sometimes involving crimes of violence and even murder have been committed and justified by prominent members of this organization, and their defence has been paid for by the unions and public subscriptions made for them through the unions.

After a most careful consideration of all the evidence brought before the Board, I am convinced that the employees of the British Columbia Copper Co., have no real grievances against the Company and that the grievances alleged by the Miners' Union were merely trumped up by officers of the Greenwood Miners' Union No. 22, a branch of the above mentioned Western Federation of Miners, as they considered that the time was an opportune one to force the Company to recognition of the Union in such a way as to make it absolutely necessary for any one applying for work in the Company to join the Union.

It is quite clear from the evidence offered that these officers were not only not acting in the best interest of the employees of the Company, in endeavouring to make trouble with the Company but were actually taking steps to this end in opposition to the expressed opinion of a large proportion of the employees.

The leading spirit in the Greenwood Miners' Union appears to be one Heather-ton, who conducted the case of the Miners Union before the Conciliation Board, and in giving evidence he took a pride in describing methods followed by the Union in recruiting new members, in retaining old members, and in dealing with those who would not become members, in which intimidation and blackmail were the leading features.

The address made to the Board by the Manager of the Company at the first session, held on Saturday the 1st., day of May, and the answer thereto, made by the above mentioned Heather-ton on Monday the 3rd., of May, are set out at

full length, as they seem to give a reasonable indication of the spirit in which the Company and the Union approached the Board.

The address of the Company's Manager was as follows:—

“Upon receipt of the copy of the application for a Board of Conciliation, we wrote the Honourable the Minister of Labour suggesting that this Board be not appointed as there were no matters in dispute between ourselves and our employees. The Honourable Minister decided that it was better to grant the board and we have therefore willingly entered into the spirit of the Conciliation and are here to assist you in every manner in our power.

You will note that the word “employees” while used by the Department of Labour in its communication to us in this matter, does not appear at all in the application for the Board, so that it would seem we are called upon to deal with a matter respecting the Western Federation of Miners only.

First and last we wish to emphasize that we have no dispute with this organization nor have we discriminated against its members. Our works are open to all capable men seeking employment, and we never inquire whether they belong to the Western Federation of Miners, carpenters, electrical workers or any other Craft Union, but as the same time we consistently refuse to discriminate against men who do not happen to be allied to these, nor will we countenance coercion to force our employees to attach themselves to any organization. Our attitude is simply, that while we sympathize with organized labour when properly directed, we do not assume an arbitrary stand in any direction as regards the individual, merely requiring that he performs the duties assigned to him to our satisfaction.

It is our endeavor to stand faithfully by our employees who are honest in their endeavor to do what is right and on this account we intend that you shall have every evidence of the conciliatory spirit in which we appear before you. Should it be required we shall give you most conclusive evidence that there has been no discrimination, not only in the cases cited

in the application, but also at any time, and in addition we shall show you why it is not practicable to accede to the demand made in the application that any grievances that may arise be adjusted through a committee of the Greenwood Miners' Union of the Western Federation of Miners.”

The address of the Secretary of the Union was as follows:—

“The Members of Greenwood Miners Union in making application for a Conciliation and Investigation Board, under the Industrial Disputes Act, do not wish to leave the impression on the Public, that we consider this Act is in any way intended to benefit the working class.

In fact we consider the Industrial Disputes Act, the most hostile piece of legislation on the statute books of Canada, at the present time against the labouring class.

Our reasons for thinking so is that the corporations can ignore it in nearly every case, and as shown in one case in which Greenwood Miners' Union was interested, and it would have been to our benefit to have a Board appointed, the Deputy Minister advised us that the Department of Labour did not consider a copper mine a public utility.

In May 1907, the members of the Greenwood Miners' Union believing they were entitled to a higher rate of wages, as the cost of living had advanced, and as the price of copper had been over 24 cents for the previous six months, made a demand on the different Mining Companies operating properties in the jurisdiction of the Greenwood Miners' Union, for an advance of fifty cents per day in wages, and believing the Copper mines would come under the Industrial Disputes Act, we made the demand to take effect the 1st of June 1907.

The members of the Greenwood Miners' Union believed at that time that if we could get a Conciliation and Investigation Board, that we had the whip hand, as there had been enormous losses to the B. C. Copper Co., through mismanagement and if we could get a board to demand the Company books the Management of the B. C. Copper Co., would grant our demands before he would allow an investigation.

But as the charges have often been made that the Western Federation of Miners is a lawless organization, we invite you to make a thorough investigation into our method of doing business, as we have nothing to conceal, and in making application for a Conciliation and Investigation Board, one of our objects is to let the public know the true condition in Greenwood Camp.

When we made the demand in May 1907 for an increase in wages, the Managers of the different companies operating in the Boundary asked the committees representing the different Unions to meet them in a body as they would like to make a scale of wages to be general all over the Boundary Country, and when the committees met them, they asked for time to go to New York to interview the Executive Board of the different companies operating in the Boundary, and the committees representing the different Unions granted them the time on condition that they would give an answer before 1st. of June 1907.

After the Managers returned and we realized, after meeting them, that they did not intend to grant the raise on the plea that with copper at 24 cents a pound there was very little profit for them. After showing them that 50 cents per day advance in wages would amount to about one-tenth of a cent on a pound of copper taking their own reports as a basis to work on, as they claimed they could produce copper and lay it in New York at between 9 and 10 cents per pound. Mr. Hodges the Chairman of the Managers remarked that the reports as they sent them out were only to "Hornswabble" the stockholders.

The Committee representing the Various unions then made up their minds to apply for a Conciliation Board, and in answer to a telegram we sent to the Minister of Mines, his Deputy notified us that we did not come under the Lemieux Act, as the copper mines were not considered by the Department as a Public Utility. Then realizing that we had all the Power of Capital with the public press, including Mining Journals of Canada and America printing lying reports sent out by the agents of the mine

Owners' Association against us, we arrived at a compromise.

After the Union voted on the scale and we adopted it, we posted a copy of the scale on a building at the Mother Lode Mine, so that the men would know what they were being paid, so that they could make their cards supplied by the company daily for that and other purposes. Mr. McAllister sent word to the Superintendent of the mine to take the copy of the scale down, as he had not been notified officially by the Greenwood Miners' Union of the adoption of the scale. We had then to make a trip to the B. C. Copper Co., and notify him to that affect.

The managers of the various companies began to realize that the men by being organized were a power to be reckoned with, and Mr. McAllister started in very soon to show us that any man taking active part in the union would not work for him.

Notwithstanding the fact that we did not ask for a raise for six months after copper had advanced to 24 cents, and when we did demand the raise we gave the management over one month's notice, but when the price of copper dropped and the conditions in the labour market were favourable to the operators, the various managers of the larger companies got together and closed all the properties in the boundary without even 12 hours' notice, for no other reasons than to defeat the objects of the said Lemieux Act, as the Minister of Labour had given a decision after we had settled our grievances in May 1907, that a copper mine was a Public Utility.

In May, 1908, the B. C. Copper Company, resumed operations under a reduced wage scale, but as copper was nearly one cent lower than when they shut down, they could not claim as an excuse the high wages paid in November, as a reason for shutting down in November 1907. During the shut-down of the B. C. Copper Co's., properties in November 1907, and the resumption of work in May 1908, Mr. McAllister was very active in getting the Greenwood Board of Trade to adopt certain resolutions placing all the responsibilities of the closing down of the B. C. Copper Co's., properties on

the labouring class, and the same resolutions were published and comments made in a great many of the Mining Journals published in America. Mr. McAllister also tried to influence foremen in charge of other properties near Greenwood to not employ certain men that belonged to the Union, giving as a reason that if the said foreman employed union men that they would divide their wages with the men that he was trying to drive out of Greenwood, and he also made the remark that he had two good men in the union to report what was going on.

In the appointment of E. O. Warren to the position of Manager to the B. C. Copper Co.'s, smelter, we believe that we can show to the satisfaction of the Board, that the only qualification he had for the position was that he was President of the Greenwood Board of Trade, and the recognized political boss in Greenwood, of the Conservative Party in British Columbia and that the said E. C. Warren would use his influence to distrust Greenwood Miners' Union.

A few of the reasons that Mr. McAllister wanted to disrupt the Union for were because the Greenwood Miners' Union were trying to get the benefit of certain laws on the statute books of British Columbia, namely, the master and Servant's Act, and the Workmen's Compensation Act, and we believe that we can show to the satisfaction of the Board that he has deliberately schemed to impress Company Doctor on his employees, to defeat the objects of said Acts. We also believe that we can show to the satisfaction of this Board that there has been no effort on the part of the present management of the B. C. Copper Co., to operate the mines and smelter of the Company for the interests of the stockholders as a whole, but their only object was to handle a large tonnage and in trying to treat a large tonnage it resulted in enormous losses to the B. C. Copper Co., and we also accuse Mr. McAllister of using every means in his power to compel Greenwood Miners' Union to call a strike so that he can place the responsibility of his mismanagement on to the shoulders of Greenwood Miners' Union."

Attached to the address of the Secretary

of the Union were the following demands:—

1st; That the Management of the B. C. Copper Co., recognize a Committee from Greenwood Miners' No. 22, W. F. M., to adjust all grievances between the B. C. Copper Co., and its employees.

3rd: That the B. C. Copper Co., reinstate J. B. King and T. Y. McKay in their employment, and pay the said J. B. King and T. Y. McKay their wages in full from the time of their dismissal until such time as they are reinstated.

4th: That the B. C. Copper Company shall not discriminate against men on account of their political opinions.

5th: That the B. C. Copper Co., shall not alter existing condition of employment of their employees, without notifying the President or Secretary of the Greenwood Miners' Union No. 22, W. F. M., and all notifications shall be in writing.

6th: That the Management of the B. C. Copper Co., or any of its officials, use any influence, or in any manner interfere with their employees in their choice of Doctor or Doctors.

7th: That the Management of the B. C. Copper Co., cease in soliciting the Board of Trade, and certain individuals, for the purpose of discrediting Greenwood Miners' Union No. 22, W. F. M.

The first demand is for the recognition of the Greenwood Miners' Union No. 22, Western Federation of Miners.

The Company claimed that some of their employees are not members of the Union, and as to these it is manifestly unfair, under any circumstances, that they should have to adjust grievances through the union. The company also produced letters sent to their employees, copies of two of which omitting dates and the names of the recipients, are as follows:—

Greenwood, B. C.

Mr.

Greenwood, B. C.

DEAR SIR:—

I wish to notify you that at a regular meeting of Greenwood Miners' Union, the membership of this organization placed a fine of \$25 against you, for refusing to become a member of Greenwood Miners'

Union, and I was instructed to advertise you as unfair to organized labour, until such time as you become a member and pay the above fine into this Union.

I remain,

(Signed) GEORGE HEATHERTON,
Secretary.

Greenwood Miners' Union.

(Seal of
(Union.)

Greenwood, B. C.

Mr.

Greenwood, B. C.

DEAR SIR:—

Take notice that members of the Greenwood Miners' Union, at a regular meeting placed a fine of fifty dollars against you for refusing to join this organization while working under our jurisdiction, and I was instructed to advertise you as unfair to organized labour until such time as you become a member of this organization and pay the above fine into the treasury of the Greenwood Miners' Union,

(Signed) GEORGE HEATHERTON,
Secretary.

(Seal of
(Union.)

The Secretary of the Union, George Heatherton, was called and admitted that these letters were regularly authorized at a meeting of the union and that he had signed and sealed them under such authorization and sent them to the men to whom they are addressed and that this was their regular method of procedure. He further testified that they got new men by "rustling" for them. They approached a man two or three times, asking him to join the Union and if he did not do so they considered him "unfair to organized labour" and advertised him in their official organs as "unfair to organized labour." On being asked if he thought the Union had the right to do this he said they had—that might was right in the matter.

The Company claimed that it was impossible for them to recognize or deal with a Union which would authorize such methods of blackmail and intimidation, and that to negotiate was also impossible. I think the Company's position in this

matter is amply justified. I have frequently read in the official organs of the labour Unions the advertisements referred to and have seen many hand-bills posted in a Miners' Union Hall containing the names and descriptions of men, who it was alleged, were unfair to organized labour, and were therefore "scabs" and were to get no employment of any kind. In such cases these bills are scattered broadcast through the Mining Country both North and South of the line—a terrible condition of affairs to be permitted in a country where law and order are supposed to prevail.

The *Second* demand deals with discrimination against members of the Greenwood Miners' Union. The representatives of the Union brought a number of witnesses who testified as to discrimination. These stated that a number of employees had been dismissed shortly after having shown activity in the affairs of the Union, or in canvassing the employees of the Company who were not members with the object of getting them to join the Union. In the majority of the cases mentioned, it was shown that the positions of the men dismissed were filled by other members of the Miners' Union, and that in all cases there was a good reason for the dismissal of the men. These facts were brought out from the witnesses produced by the Union itself and the Company did not bring in any evidence on the point, as they claimed that no discrimination against members of the Union had been proved.

I cannot find that any discrimination has been proved, in fact it is quite clear from the evidence of the Union's own witnesses that the Company never made enquiry as to whether a man was a member of the Union or not.

The *Third* demand embodied specific instances of alleged discrimination. The evidence given by J. B. King shows that no discrimination was made in his case. He admits that he was told when he "got his time" that the Company was reducing its forces and was giving the preference to married men. He also testified that men were discharged at the same time that he was, and while he

thought that men had been taken on since, he was not positive of this. He admitted that he has been guilty of infractions of the rules.

The evidence given by T. Y. McKay shows clearly that the Company was reducing its forces at the Mother Lode Mine where he was employed—that quite a number of men were layed off before he was and that the man who took his position on the work was a member of the Miners' Union. He also admitted that he had broken some of the rules and had been absent frequently from work during the time immediately preceding his discharge.

I do not find any discrimination in either of these cases, as the Company was justified when making a reduction of its staff in selecting the men best fitted for the work, and the fact that Union men took the places of these two shows there was no discrimination against the Miners' Union. I do not think that any injustice was done to either J. B. King or T. Y. McKay in their discharge, and therefore cannot find that the Company should pay either of these men any wages as is demanded.

The *Fourth* demand speaks of discrimination on account of political opinions. There was no evidence produced that any such discrimination took place.

The *Fifth* demand, that the Company should not alter any existing condition of employment of their employees without notifying the Union is of a very general nature. No evidence was given by the Union supporting the demand or pointing out more specifically the conditions referred to. I do not think it either practicable or reasonable that the Company should be required to give such notice.

The *Sixth* demand deals with the question of a choice of a Doctor for the men. The Union produced no witnesses to show that the present system worked any hardship upon any of the employees of the company. This was the only question the Company produced any evidence on, as its Manager had taken a personal interest and pride in improving the condition of its employees so far as medical and hospital attendance is concerned. The Company went fully into the arrangements made in this res-

pect and showed that the change in the arrangements, which appears to be found fault with in this demand, has operated very greatly to the advantage of the employees and their families. The change spoken of involved the election of Doctors by the employees, the majority in favor of the present doctors and of the new system being overwhelming, and as a result the men now have a well equipped emergency hospital and surgery at the Mother Lode Mine, and all first aid necessaries at the smelter and at the different other properties operated by the Company. The monthly fee under the new arrangement includes a great number of common diseases for which the men formerly had to pay the ordinary Doctor's fees and the fees for attendance on families of employees have been very materially reduced by the new system.

The *Seventh* demand speaks of the solicitation of the Board of Trade and certain individuals by the B. C. Copper Company, for the purpose of discrediting the Union. The Union officials produced a large number of witnesses members of the Board of Trade, nominally to testify to this point, but quite evidently for the purpose of intimidating the tradespeople and others called and of injuring their trade with the laboring class. All these men stated positively that no solicitation of any kind had been made to them for the purpose of discrediting the Union, and I find that the Management of the Company has not so solicited either the Board of Trade or other individuals as is charged.

(Signed) EDWARD CRONYN,
10 June, 1909.

Mr. McInnes' Report.

The text of the findings of Mr. John McInnes, member of the board appointed on the recommendation of the employees, is as follows:—

The Department of Labour,
Ottawa, Canada.

In the matter of the dispute pending between the British Columbia Copper Company, and the Greenwood Miners'

Union acting in behalf of the employees of this Company, and the investigation held thereon, under the "Industrial Disputes Investigation Act."

As the representative of the employees on the board, I regret to say that the members of the board have been unable to agree on a joint report. And we were unable to bring the parties involved to an amicable agreement.

Therefore, the undersigned respectfully submits the following report and recommendation:

After hearing the evidence given by over thirty witnesses examined, and after careful consideration of the same, it was evident that the charges made by the Greenwood miners were well founded. The company by its failure to produce evidence to the contrary, left the impression that the case as presented by the union was a very strong one indeed. That the manager of the B.C. Copper Company is a hard man to deal with, was fully proven by the investigation. And in the opinion of the writer the difficulties between the management and the employees, were due largely to the failure of the manager of the company to meet his employees in a spirit of fairness.

In paragraph 3 (three) of the Company's reply to the employees demand for a Board of Investigation, we find the following: "The Company has never had any relations with the Union" but the evidence shows that the manager had at various times dealt with the Union in adjusting questions of wages and conditions.

That the officials of the B. C. Copper Company were doing their utmost to disrupt the union, was amply proven. The discharge of men who took any active part in the work of their organization, would eventually result in crippling the union, and render it ineffective. This was the policy of the company as proved by the evidence. Testimony by several witnesses tended strongly to show that a "Black-list" exists in this district. Men who were not agreeable to the officials of the B. C. Copper Company, had experienced considerable dif-

ficulty in holding positions where any influence could be brought to bear by the officials of this company. That there was no necessity or justification for the passing of certain resolutions, by the Greenwood Board of Trade was practically admitted even by those who had signed those resolutions themselves.

No proof being found with which to substantiate the recitals contained in these resolutions. After all the evidence was adduced, the board endeavoured to get the parties to the dispute together, so that if possible they might arrive at an understanding.

The officials of the union signified their willingness to confer and settle on reasonable terms, but the representatives of the company refused point blank to have any dealings with the union, or recognize them in any way as a union.

The manifest willingness of the union to meet the company and settle on reasonable terms, would indicate that if the company was desirous of settling the dispute, it could be settled with very little difficulty.

After taking considerable pains to get the true facts in this dispute, and having some knowledge of the conditions in this district, the following would in my judgment be a fair basis of settlement.

1. That the British Columbia Copper Company recognize and do business with Greenwood Miners' Union, No. 22, W.-F.M. And that all questions affecting wages and conditions between the company and their employees be adjusted through said union.

2. That active participation in the work of the union, or the holding of any political opinions should not interfere with securing or retaining employment.

3. That every facility be given the employees to take advantage of laws upon the Statute Books of British Columbia for the protection of labour.

4. That both parties to the disputes lay aside all ill feeling towards each other, and endeavour to have more harmonious relations in the future.

These suggestions, if put into effect, could not interfere with legitimate mining operations, and would be mutually

beneficial throughout the metalliferous mining districts of British Columbia.

There has been scarcely any serious labour troubles for a number of years, and this condition is due in a large measure to the fact that nearly every company operating in the Province recognizes the Western Federation of Miners.

The miners of British Columbia are an

intelligent body of men, and in their dealings with their employers they invariably show a spirit of fairness. If capital invested in British Columbia is to have smooth sailing it must be represented by men who are willing to grant their employees rights as men and citizens.

(Sgd.) JOHN McINNIS.

II.—REPORT OF BOARD IN DISPUTE BETWEEN NICOLA VALLEY COAL AND COKE COMPANY OF MIDDLESBORO, B.C., AND ITS EMPLOYEES.

THE Department received on June 3, the report of the board established to adjust a dispute between the Nicola Valley Coal and Coke Company of Middlesboro, B.C., and its employees. This report signed by His Honour Judge P. S. Lampman of Victoria, B.C., Mr. Thomas Kiddie of Northport, Wash., member appointed on the recommendation of the company, and Mr. Thomas Charles Brooke, member appointed on the recommendation of the employees, showed that there were various points on which Mr. Brooke was unable to concur in the findings of the chairman and Mr. Kiddie. A subsequent report was received on June 16, bearing the signatures of the chairman and of Mr. Kiddie, and a minority report was received on June 11, signed by Mr. T. C. Brooke.

The application in this matter, received on March 19, alleged discrimination on the part of the company in the dismissal of James Hardman, one of its employees, on account, it was claimed by the employees, of his being an active member of the local union of the United Mine Workers of America during the organization of this camp. The application called for Mr. Hardman's re-instatement with compensation for lost time. To this complaint a further statement of grievances was added during the sessions of the Board, the principal item in which was the dismissal of another employee for the first offence of dirty coal. The number of employees affected in the dispute was about 150. Mr. Thomas Charles Brooke, of Merritt, B.C., was appointed a member of the board on the recommendation of the employees. Mr.

Thomas Kiddie of Northport, Wash., U.S.A., was appointed a member of the board on the recommendation of the company. His Honour Judge P. S. Lampman of Victoria, B.C., was appointed chairman on the recommendation of the other members of the board. During the formation of the board, it was announced that the employees affected had gone on strike. The board, in its report, dated May 26, expressed regret that its efforts to effect a settlement were unsuccessful. The department was subsequently advised that operations had been resumed and that the company did not intend to recognize the United Mine Workers of America, but preferred to deal with its employees as individuals.

In its findings above referred to, the board expresses the opinion that the company was justified in discharging James Hardman and that there was no discrimination against him within the meaning of the complaint. The company's charge against Hardman was that of firing a shot off the solid. Mr. Brooke does not agree with this finding but holds Hardman innocent of the offence charged against him and is also of the opinion that discrimination was shown against him on the part of the company.

In the case of W. L. Read, who was discharged for the alleged offence of "dirty coal", the board is of the opinion that it was shown that Read deliberately loaded rock in his car for the express purpose of precipitating trouble and in such cases the company was justified in discharging him. Mr. Brooke, in his minority report, claims that a less severe

punishment should have been given in this case.

At the sitting of the board in Vancouver, a resolution passed at a mass meeting of the Middleboro Miners, held on May 21, was filed with the board. This resolution was one agreeing to be bound by the decision of Judge Lampman, the chairman. An adjournment was taken to obtain the company's decision which was against this proposition. Mr. Brooke, in his minority report, referring to the passage of this resolution, claims that this was "refused by the representative of the company, Mr. Kiddie, the company instructing him that they would be bound by no decision, which left chances for a settlement impossible."

Reports of the Board.

A report of the board was received in the department on June 3, as follows:—

26th May, 1909.

In the matter of the Industrial Disputes Investigation Act and in the matter of a dispute between the Nicola Valley Coal and Coke Company, Limited, and its employees.

The board composed of Messrs. Thomas Charles Brooks and Thomas Kiddie with Judge Lampman as chairman after having visited the mines in the Nicola Valley and having taken evidence and considered the various matters referred to it begs to report as follows:—

The nature of the complaint or grievance is first given and then the conclusions of the board.

1. *Complaint.*—The nature of this dispute is a charge of discrimination by the company against James Hardman who was discharged for an alleged offence of firing a fast shot.

Conclusion.—The board is of the opinion that the company was justified in discharging Hardman and that there was no discrimination against him within the meaning of the complaint. Mr. Brooks does not agree with this finding and holds that the evidence shows that Hardman did not fire the shot, and he is also of the opinion that there was discrimination.

2. *Complaint.*—The case of W. L. Reid who was discharged for the first offence of dirty coal.

The board is of the opinion that it was shown that Reid deliberately loaded rock in his car for the express purpose of precipitating trouble and in such circumstances the company was justified in discharging him, and that it was not incumbent on it to invoke the provisions of Article 18 of the agreement respecting dockage.

Mr. Brooks is of the opinion that Article 18 of the agreement was broken by the company and the company was not justified in discharging, but if satisfied beyond all doubt that the rock was loaded wilfully he would say that Reid could have been discharged even for a first offence.

3. *Complaint.*—The case of Geo. Martinovitch who was laid off work on account of sickness and was refused employment upon making application after recovery.

Conclusion.—The board does not think there is any merit in this complaint, but Mr. Brooks thinks the company was not justified in its course having regard to Article 8 of the agreement.

4 and 5.—The settlement of the price of coal in certain places.

In view of the stand taken by both parties respecting a settlement the board was unanimously of the opinion that no useful purpose would be served by making an investigation in these matters, and so announced at the hearing and its decision was agreeable to both parties.

6. *Complaint.*—Request for re-instatement of George McGruther as stableman.

Conclusion.—As the stableman is included in the agreement the men felt they should protect him in his employment but the company says it had no fault to find with McGruther, but it thought that man appointed in his stead was better especially in his ability to deal with sick horses. The board is unanimously of the opinion that it would be better if the stableman was not included in the agreement.

7. *Complaint.*—Request that the Coal Mines' Regulation Act respecting ven-

tilation be enforced and complaint against unqualified mine manager.

The board was unanimously of the opinion that these were not matters for it to investigate but were rather matters for the Minister of Mines of British Columbia and the Inspector and the complaint was forwarded by the board to the Minister of Mines.

The board regrets that its efforts to effect a settlement were unsuccessful.

Dated at Vancouver, B.C., this

26th day of May, A.D., 1909.

(Sgd.) P. S. LAMPMAN,
Chairman.

T. CHAS. BROOKS.
THOS. KIDDIE.

On June 11, a subsequent report bearing on signatures of the chairman and of Mr. Kiddie was received in the department as follows:—

A Second Report.

In the matter of the Industrial Disputes Investigation Act, and in the matter of a dispute between the Nicola Valley Coal and Coke Company, Limited and its employees.

The board composed of Messrs. Thomas Charles Brookes and Thomas Kiddie with Judge Lampman as chairman pursuant to a previous arrangement made at a preliminary meeting in Victoria held its first public meeting in a public hall in Merritt on 17th May, 1909. The mines are situated at Middlesboro, about a mile from Merritt, and the miners live some in the one place and some in the other. The grievance of the employees as stated in the application for the appointment of the board was in respect to the case of a miner named James Hardman, who had been discharged for firing a shot off the solid. Before proceeding, the company in writing stated that it was unwilling to be bound by the decision of the board and the employees through the union, Local No. 872 of the United Mine Workers of America, in writing stated that they were willing to be bound by the unanimous decision of the board. As to the decision of two members of the board according to the Act, section 46, con-

stitutes the decision of the board, it will thus be seen that neither of the parties was willing to be bound by the decision of the board. In addition to the Hardman case there were other matters for the board to consider, as will be seen from the following letter addressed to the board.

“United Mine Workers of America.”

Local No. 872.

Middlesboro, B.C., May 17th, 1909.

“To Judge Lampman & Members of Board of Conciliation:

Dear Sirs,—

The following grievances in addition to the case submitted to Ottawa. We request you to take into consideration and deal with during your sitting at this time, in order to bring about a peaceable settlement here if possible.

1. The case of W. H. Reid who was discharged for first offence of dirty coal.

2. The case of Geo. Martinovitch who was laid off work on account of sickness, and was refused employment upon making application after recovery.

3. The settlement of a price on coal in No. 2 Slope and District.

4. The settlement of a price on coal in No. 5 Mine.

5. The re-instatement of George McGruther as stableman, the company not giving a reasonable cause for his removal, stating the man was quite competent to hold that position, prior to his removal.

6. The Coal Mines Regulation Act respecting ventilation be enforced.

Also qualification of Mine Managers and Overman. The dispute is bad ventilation and unqualified Mine Manager.

On behalf of Local Union 872,

We are, Sirs,

Truly yours,

D. R. McDONALD,

President.

W. H. REID,

Secretary.

Immediately on our arrival at Merritt arrangements were made for the use of a public hall, and both sides to the dispute were notified of a meeting which was

held in the evening and the taking of evidence was commenced. The men were represented by D. R. McDonald, President of the Union, James Hardman and W. H. Reid, while the company's representatives were W. H. Armstrong, General Manager, J. J. Plommer, Secretary-Treasurer, and James Gray, the Mine Manager. The two chief matters of dispute were in respect to the cases of Hardman and Reid, and it was known from the beginning that the company took a firm stand and under no consideration would it re-instate either, while the men, on the other hand, were just as firm in their resolve to not go back to work unless both re-instated. However, after taking much evidence the board decided to have a private conference with the representatives of both sides to see if some amicable settlement could not be arrived at, the board hoping that one or the other, if not both of the parties, would be willing to concede a little. As both Reid and Hardman were so directly interested it seemed to the board that it would be better if the men appointed other representatives to attend the conference, and acting on this suggestion James Paton and Abram Reid were appointed. It should be mentioned that at the time the suggestion was made it was stated that it was merely a suggestion and the men were free to appoint whomsoever they pleased. The men so appointed in the place of Hardman and Reid, along with the President of the Union, attended next morning the conference, but they stated that they could not recede from their position already stated, and as the company's representatives also adhered to their stand there was nothing left for us but to proceed with the taking of the evidence.

Each case will be dealt with separately.

1. *The Hardman case.*—On Sunday (there is no general work in the mine on Sundays) 14th February, Fireboss Reid saw indications of a fast shot, or a shot fired off the solid without any mining having been done before firing in place No. 10½ in No. 2 mine, and on Monday morning he reported it to the overman.

On Saturday morning's shift, 7 a.m. to 3 p.m., two men named Lambert were in that place, and Hardman and Brown followed them for the afternoon shift, 3 to 11 p.m., and from then till Monday there was no work there. The next week the men changed shifts and Hardman and Brown went in for the morning shift, but when they got there the overman, David Gray, sent them out because of the fast shot; as Hardman and Brown were there last he held them responsible, and sent them out. They then saw James Gray, the mine manager, and denied having fired the shot; the manager told them he would investigate. He saw the fireboss, W. N. Reid, who he says told him he saw the place at 2.20 p.m., Saturday, the Lamberts had quit at 3 p.m., Saturday, and Hardman and Brown had gone on, and there were then no indications of preparations being made for a shot, overman David Gray saw the place at 2.40 p.m., and saw no preparations; David Forsyth, who was timbering in the place during the Lamberts' shift, told him no shots were fired out of the solid while he was there, and Robert Henderson, who was mining in place No. 10 told him he heard one shot in 10½ at about 6 p.m. Hardman came to the office for his pay cheque as it was pay day, and the manager told him he had concluded he had fired the shot, and Hardman's reply was "Can you prove it?" Gray told him he could. At that time the company had no agreement with the Union, but under the agreement with the employees then in force, provision was made for meetings between the management and a committee of six men, the manager asked this committee, called the Pit Committee, to inspect the place, this the Committee did, and the Manager told them he had discharged Hardman, and added that if Hardman did not fire the shot he wanted to know who did. Complaints had been made to the Manager before about Hardman's firing off the solid; Fireboss Reid had told him that he would have trouble with Hardman as he would not mine his coal, Brown had a good reputation and the manager re-instated him, but not Hardman.

On 23rd February Hardman went to work at the Diamond Vale Colliery, and worked there till it shut down on 20th March.

The case on behalf of Hardman as presented to us was that Hardman was discharged without justification and that there was discrimination against him by the management.

In the first place it should be pointed out that it was impossible for the board to arrive at a really satisfactory conclusion on the fact as to who fired the shot because of the fact that many of the most important witnesses had left the camp, in many cases the absentees had made statements in writing, but not much reliance could be placed on these as they were not seen by the board, and there was no opportunity to cross-examine.

The evidence adduced on behalf of Hardman was his own, in which he denied the charge and contended that the manager had a grudge against him. He said that in February he took his case to the union, but as an agreement with the company was then under negotiation he agreed to wait rather than prejudice the chances of an agreement being reached. He said that he and the Manager once had a dispute over a place in which he refused to work as he considered it unsafe. He produced a letter from Tim Lambert in which Lambert admitted firing the shot, and stated that he hoped Hardman would forgive him, also a declaration from Brown to the effect that when he and Hardman went into the place on Saturday they found the shot blasted off the solid and they could not work until they timbered the place up.

Abram Reid, a miner, testified to a conversation with Lambert's brother who said he fired a shot in the place, but he did not know if it was the one for which Hardman was discharged, also to a conversation with Tim Lambert, who admitted he fired the shot to spite Hardman because one night on the street he would not recognize him; Reid admitted Tim Lambert was drunk at the time of this conversation.

Fireboss W. N. Reid testified to examining the place at 1.50 p.m. on Saturday (not 2:20 as stated by the manager), and to Tim Lambert telling him Hardman did not fire the shot; he had had instructions from Grey to watch Hardman and to report him if he caught him firing off the solid.

Joseph Westwood was working in No. 11 Saturday afternoon's shift, and says he thinks 1 or 2 shots were fired in 10 or 10½ at quitting time, i.e., while the Lamberts were on.

John Houldsworth, with whom Gray boarded in December, testified to hearing Gray say that the first chance he got he would discharge Hardman.

Andrew Kalien, who was working in 10 on Saturday afternoon, testified to Hardman's helper coming to in 10 for clay, and saying they were going to fire a nigger head in 10½.

For the company, Benjamin Borwitt, the certificated mine manager, gave unimportant testimony; in cross-examination by Hardman he said that Gray never told him that he (Hardman) was born with a drill in his hand, but that there was a man who told him that and that Hardman wanted to shoot off the solid. Hardman did not ask who the man was.

Bruce R. Warden, the Superintendent Engineer, testified to having returned to the mines from England on 1st March, and on 6th March Hardman saw him about the case and as he (Warden) knew nothing about it he asked if he (Hardman) had seen Gray about it and Hardman said "no" but that it was up to Gray to prove that he fired the shot. Warden then told him he should see Gray as he could not expect the manager to run after him over the trouble. The agreement (to take effect 1st March) between the local union and the company was accepted by both parties on 15th March, and the first intimation that the company had that the men intended to interfere in the Hardman case was on 20th March, when the copy of the application for Board of Arbitration to Minister of Labour, dated 19th March, was received by mail.

Lewis Beltner testified to mining with Hardman and seeing him fire shots off the solid.

David Forsyth testified to being in the Lamberts' place timbering, and not hearing any shot, or seeing any preparation for or after effects of same, he had to go occasionally about 400 feet for props, but heard no shots while away.

Hugh Gillespie, overman, testified to seeing Hardman the afternoon he was discharged, and he then told Hardman he should get all those that worked in that place up at the office and try to find out who fired the shot, but he never tried to get an investigation. There had been some evidence by the mine manager to the effect that Hardman said one time in the blacksmith shop in his presence that he carried his mining in his powder can, and Gray then told him he must mine his coal and not shoot off the solid. Gillespie testified to Ward, the then President of the local union, saying to him (Gillespie) that he had told Hardman that he was a fool to make such a statement in the presence of the manager. Gillespie also said he had seen in No. 2 mine in Hardman's place indications of shots having been fired off the solid.

David Gray, the overman, who had sent Hardman and Brown out, testified that the Lamberts denied to him having fired the shot.

A written statement by Martin Lambert denying that he or his partner fired the shot was put in.

The chairman asked for a member of the pit committee to state what the committee did. Thomas Skelton came forward from the body of the hall and testified that he was one of the committee, and that along with the other members he examined the place; that they reported to the union, and that the dispute was not taken up.

On Hardman's behalf John Moon was afterwards examined in Vancouver. He was helper to Hardman and Brown. He testified to finding the place full of smoke at 3 p.m., on Saturday when he went in ahead of Hardman and Brown, the fast shot had just been fired and the place was in a bad state. Timbering was done by Hardman and a nigger head was

broken up; he went in the next place for the clay and the shot used in the nigger head was the only one in that place during the shift. The whole shift they worked clearing the place up and sending out the coal blown down by the fast shot. He said he told the manager that the shot was not fired that shift.

On this evidence the board was asked to find that Hardman did not fire the shot and that therefore he was unjustly discharged, but the board is of the opinion that the mine manager on 15th February, when he made his investigation was quite justified in coming to this conclusion. All the necessary witnesses were then on the spot and he was in a better position to get at the truth than was the board. In the first place he was quite right in holding that Hardman and Brown were responsible, as it was in their place, and they had been there the shift before it was discovered. Hardman seemed to think he must be proved guilty before any action could be taken, but under the circumstances the onus was on him to prove the shot was not fired during his shift. He knew he was being watched and if he found the shot, smoke, etc., as soon as he went on at 3 o'clock Saturday afternoon, he could easily have removed suspicion from himself by at once reporting it. Then again if he had a good case it is strange that he did not convince the pit committee of it and get them to take it up; this feature of the case the board considered very significant.

Of course if Moon's evidence is given full credit it would clear Hardman, but Moon could not conceal the fact that he had a strong feeling against the company. Besides if Moon's story is correct, Forsyth's must be wrong, as it is hardly possible that the shot could have been fired in the Lambert's place without Forsyth's knowledge, especially in view of the smoke, etc., that Moon told of. The evidence of Moon and of Forsyth offset each other.

As to the charge of discrimination, this entirely failed. There was no evidence of Hardman ever being prominent as a union man, and the management had nothing against him on that score. Some attempt was made to show that

*Hardman's place was a dangerous one, and that he was especially picked out for a bad place. The reports on the different places by the fire-bosses were produced and for a long time before 13th February, and after it appeared that No. 10½ had a good average record as to its condition in regard to safety, etc. The mine manager had no doubt said he would discharge Hardman if he did not mine his coal and he had probably some feeling against him, but he apparently did not let that feeling act unfairly. Brown had a good reputation and Hardman a bad one as to firing off the solid, and no fault should be found with the decision to re-instate the man with the good reputation. While on account of the suspicion that the Lamberts might have been responsible for the shot the board had some doubt about the Hardman case, it is of the opinion that Hardman failed to make out a case for re-instatement.

2. *The Reid case.*—On 12th April, William H. Reid and one Tully were mining on contract work in place No. 5 in No. 1 mine, and about 10 a.m., Hugh Gillespie, an overman, noticed a car come out of the mine with a lot of rock on the top; he looked at the tally on the car and saw it was from Reid's place. As Gillespie's evidence is important, and as it is practically uncontradicted, a part of it is here set out in full:—

“On Monday morning April 12th, between 7 and 8 a.m., Mr. Gray and myself went into No. 1 mine. We went into all the working places including the place in which Wm. Reid and Thos. Tully were working. After examining the said place Reid brought up the subject of rock in his place. Mr. Gray referred to the schedule, saying that it covered all the abnormal places. Reid stated to Gray that if he could get a reasonable price for the rock he would prefer it rather than work for \$3.30 on day work. Gray asked Reid how much he would like for the rock and Reid asked for \$1.50 per yard. Gray said he thought that it was too much and offered Reid and his partner \$1.00 which they agreed to as being sufficient to cover the deficiency and Mr. Gray warned Reid to fill

his coal as clean as possible. . . . I met Reid and Tully coming out and I saw that they were prepared to go home. I stopped them and told them I did not intend them to go home. All I wanted them to do was to go out and look at the car in question and return to work and to fill cleaner coal. Reid went over to the car and exclaimed that it was a hell of a note if men were to be called out from work to look at the like of that. I said it was too bad, meaning the amount of rock. I again asked them to return to work and Reid said there had been enough trouble in the Crow's Nest Pass over the sending in the mine for men for the same thing. I then told Reid and his partner the reason that I sent in the mine for them was that Reid had made the remark in my presence that Gray had it in for him and I wanted them to see that there was no crooked work going on in regard to this car. Reid seemed satisfied with that, but still refused to go back to work, saying that once he came out of the mine he thought it was unlucky to return the same day. I then told Reid that I would dock the car and see how much rock was in it, and he told me if I did dock it he would call a special meeting of the union, and that there would be trouble. I told Reid to go ahead and call all the meetings he liked. The company could not stand for any such stuff coming out of the mine. He said anyhow the little coal they would produce that day would not affect the output much, and I said that it would not, so they went home. I went over to the office about half an hour after. Gray was in and I brought up the subject with him. I asked him if he would take a look at the car and tell me if I had done right in asking the men to come out and look at the car, and he told me I had done right. I then told him that I had requested the men to return to work, but they would not do so, so we called the weigher along and told him to mark the car and pick out all the rock, lay it aside separately for future reference. About 2 o'clock Warden, Gray and myself were standing on the mine tracks when the weigher came and told us he was going to dump the car, and if we wished to see

it to come on to the tipple. We went out and all the rock, which is in the office which came out of that car, amounting to 364 lbs., one piece of which was 81 lbs., and 6 other pieces, weighed 61 lbs. Gray then decided to discharge the men, which he did. Tully came to me the next day and took his time, making no remarks to me as to the place being underpaid, he having made \$4.77 during the time he worked in it. Reid admitted to me that when they received the word to come out and see me he said to his partner, that's about our coal."

The Union took up Reid's case, and after he was off 8 or 9 days the committee and the manager arranged that he should go back at company work, and as to just what was meant by that a dispute arose which brought about the strike. Reid had been working underground and the minimum wage there when on company work was \$3.30 for 8 hours. Reid was put at outside work and as soon as he found out he was to get only \$3.00 for 9 hours he quit, and in consequence of this and the delay by the company in answering the application for the appointment of a Board of Conciliation the men went on strike and on 23rd April the Company received the following communication:

Middlesboro, B. C., April 23rd, 1909.

"To the Nicola Valley Coal & Coke Co.

DEAR SIRS:

Referring to the conversation which took place between Mr. Plommer and our Dist. Representative, Mr. C. Brooks, as to what terms our men will return to work, we have to submit to you the following ultimatum, dictated by your employees, and upon which they will resume work.

1. That James Hardman, who was discharged by firing a shot from the solid which has since been proved he was innocent of, is reinstated with compensation for time lost.

2. That W. Reid, who was discharged for the first offence of dirty coal is also reinstated to his old position prior to discharge, or a similar one.

3. That Geo. Martinovitch, who was laid off sick, and has since applied repeat-

edly for employment, without results, is given back employment.

4. That the check-off system be put into effect by the management, re the signing up.

5. That the prices for work in No. 2 Slope and District, also No. 5 Mine be satisfactorily settled.

6. That the management will refrain, endeavouring to bring about individual contracts on any class of work, as per agreement.

7. It being distinctly understood that the management will refrain from personal prejudice or discrimination on matters affecting the U. M. W. of A.

On behalf of the local Union 372, U.M. W. of A.

Signed

Committee: D. R. McDONALD,
President.

W. N. REID,
JAS. PATON,
B. R. BARLOW,
A. B. REID,
T. CHAS. BROOKS,
Rep. Dis. 18

Article 18 of the agreement between the company and its employees, and which had just been entered into, was as follows:—

DOCKAGE

To offset refuse or other material in car, 28 lbs. shall be added to the tare of the mine cars; but any miner filling rock in his coal in excess of 200 lbs. in any one car, shall be liable as follows:—

First offence, warned.

Second offence, docked 500 lbs.

Third offence, docked 1,000 lbs.

Fourth offence, he shall loose his car.

Fifth offence, he shall be suspended three days.

Sixth offence, he shall be discharged, provided the offences have all occurred within thirty days.

But before dealing with this Article the evidence respecting the car of coal sent out by Reid should be considered. Reid's defence was that the place had very poor ventilation, and in consequence it was full of smoke; that the

coal was interspersed with bands of rock, and that the roof was in bad shape with hanging rock; that it was impossible to load coal because there was so much rock and that the big piece must have fallen from the roof. Gillespie's account of what happened was uncontradicted, and the dispute was over the question as to how the rock got in the car. Witnesses were called by Reid to show that the place contained a lot of rock and that a miner on contract work could not make pay and load clean coal, but as a matter of fact the men that followed Reid in the place ran \$3.52 per day. They also said the roof was bad and likely to fall, and that some of the rock may have fallen from the roof into the car.

For the company evidence was given to the effect that where the car stood rock falling from the roof could not fall into the car. Frederick Shields, who owns a building in Middlesboro in which the Middlesboro Social Club has its rooms, was called and deposed to a conversation he had with Reid before the strike, while he boarded at Reid's house. He said that Reid said he did not have to work for the company, and that he would give them an opportunity to fire him, but if they did not do it in a proper way he would make it warm for them. Shields acts as a barber and bartender at the club, whose members are largely officials of the company.

Now, in considering the question as to whether or not Reid deliberately loaded rock in his car it should be mentioned that he is a good miner, the records showing that while mining he had earned as high as \$8.85 on one shift, and for some months had worked as a fire-boss; and he is not so likely to mix rock with coal unwittingly as a less competent workman. The rock had been saved, and the Board and representatives of both parties inspected it. The largest piece was about 3 ft. long and so thin that it would probably have broken if it had fallen into the car from the roof. It certainly was not put in on a shovel, and the experienced miner if lifting it in with his hands would detect the difference in weight. Reid argued that under Article 18 of the agreement the company cannot discharge for

a first offence of loading dirty coal even though loaded wilfully. The Board accepted Shields' statement in full, and is of the opinion that Reid deliberately loaded the rock and intended to make the company work out the tedious procedure of Article 18 as to discharging him, and if it did not that he would bring about just about the very trouble that his act caused. The Board is of the opinion that Article 18 is intended to apply to cases of carelessness, and that where a man loads rock wilfully it is not incumbent on the company to invoke the provisions of that Article as to discharging. Reid's excuse of the place being full of rock is a poor one, as he was paid \$1.00 a yard for rock and it was his business to separate it from the coal. The inspection of the box of rock taken from the car caused the Board to think that it was unfortunate that this rock was not at once placed on view so that all the miners might see it (McDonald, McNab and Hardman, the representatives of the men at the inspection, had not seen it before), as in that case it is doubtful if they would have felt justified in taking up Reid's fight to the extent they did. There can be no doubt that the men as a whole considered that the company had broken its agreement (Article 18) when it discharged Reid for a first offence. Sub-section (f) of Article 2 of the agreement provided that "any breach of this agreement by any of the parties hereto is not to render the agreement void, but the agreement is to continue in full force and effect", and the company considered that the men in quitting work had committed an offence according to Sec. 56 of the Act.

A copy of the application for the appointment of a Board of Conciliation was mailed by the men to the company at Middlesboro on 19th March; this was forwarded to the office of the company in Vancouver, but on receipt there was mislaid unread, and it was not until the Department (on 17th April) sent a copy of the application to the company that the matter was dealt with by the company, and its reply is dated 28th April. The men knew nothing of the cause of this delay, and quite reasonably considered they were being ignored, and having this

feeling, and thinking that the agreement they had just entered into had been broken by the company, they quit work. Under the circumstances the Board did not feel justified in saying anything about any offence against the provisions of the Act having been committed.

3. THE CASE OF GEORGE MARTINOVITCH: Articles 7 and 8 of the agreement were as follows:—

ART. 7. THE RIGHT TO HIRE AND DISCHARGE.

The management of the mine and the direction of the working forces are vested exclusively in the company; and the U. M. W. of A. shall not abridge this right. It is not the intention of this provision to encourage the discharge of employees, or the refusal of employment to applicants because of personal prejudice or activity in matters affecting the U. M. W. of A.

ART. 8. ABSENCE FROM WORK.

When any employee absents himself from his work for a period of over two days (unless through sickness, or by first having arranged with the pit boss) he may be discharged. Any employee whose absence would cause any stoppage of work, must, prior to absenting himself, arrange for such absence, otherwise he may be discharged.

This man had been discharged by the mine manager who succeeded Gray, but as this was unknown to Gray he engaged him as a labourer, but the other Servians objected to him and would not have him back with them loading cars. He got hurt and was unable to work for some time, and on his recovery the manager would not take him back. When asked how he got hurt, he said he was shooting rabbits and fell into a brush pile, and in falling his arm came in contact with a razor he had in his pocket and he received some bad cuts. This to the Board seemed a lame story, and from the manner in which the men in the hall took it, it was evidently not the truth; that he was in some sort of fight would likely be nearer the truth.

Grievances 4, 5, 6 and 7 have been dealt with in the report, dated 26 May, as

in respect to them the Board was unanimous.

There had recently been a change in the management, James Gray having taken the place of Alexander Faulds, and the new manager's new way of having things done seemed to cause some friction, and there was a strong antipathy on the part of the men against Gray. The men had a feeling that he was bringing in new men and giving them the good positions, and the fact that some of the new men were his relatives added to their feeling of resentment. It is only natural and in some cases necessary for a new manager to make changes and to appoint to some positions of trust under him men with whose work he is acquainted, but to bring in relatives without creating discontent is well nigh impossible.

From an inspection of the buildings around the mines and the facilities afforded for the convenience and accommodation of the men—boarding houses, wash houses, &c., it appeared that the company had done very well.

The Board regrets that its efforts to settle the trouble were unsuccessful, and although it at one time had hopes that some arrangement might be come to whereby Hardman—whose offence was caused by carelessness or laziness, and lacked the design and purpose present in the case of Reid—might be re-instated, still it does not feel that it would be justified in going the length of recommending that he be re-instated.

At the sitting in Vancouver a resolution passed at a mass meeting of the Middleboro miners held on 21st May was filed with the Board. This resolution was one agreeing to be bound by the decision of Judge Lampman, the Chairman. An adjournment was taken to get the company's decision, which was against the proposition.

The minutes of evidence and the exhibits produced at the hearing accompany this report.

All of which is respectfully submitted.

(Signed) P. S. LAMPMAN,
Chairman.

THOS. KIDDIE.

Minority Report.

The text of a minority report, bearing the signature of Mr. Thomas Charles Brooke, member of the Board, appointed on the recommendation of the employees, was received in the Department on June 11, as follows:—

Merrit, B. C., May 29, 09.

The Minister of Labour,
Ottawa.

Re Nicola Valley Dispute:

Honourable Sir:—

In forwarding to you my report, which is a minority one, I have to state that I am myself disappointed over the fact that no possible settlement could be reached in this matter, at the same time I can only on behalf of the employees refer you to the fact that prior to the decision of the Board at Vancouver a resolution was placed in Judge Lampman's hands to the effect that "the employees were willing to be bound by Judge Lampman's decision". This was again refused by the representative of the Company, Mr. Kiddie, the Company instructing him that they would be bound by no decision, which left chances for a settlement impossible.

Over the decision I am still somewhat confused, for notwithstanding the fact that Judge Lampman during the sitting of the Board, recommended that Jas. Hardman be reinstated, and William Reid be discharged, his decision eventually is that the Company were justified in discharging him, and that there was no discrimination.

In the face of this also there is a written statement signed by two witnesses from the man Lambert, stating that he had fired the shot, and was sorry for the wrong he had done Hardman, besides two sworn affidavits from men who were working all the shift with Hardman, to the effect that Hardman did not fire that shot; if there was no discrimination why was Hardman picked out as he was from the rest, and was the only one discharged, when five men in all were working in that particular place where the shot was fired? Are not the men compelled to think that Hardman was discriminated against,

being that there had been a little misunderstanding between him and the Mine Superintendent a very little time before that? On the other hand there is absolutely no sign whatever in the evidence put up by the Company to show that Hardman was guilty of firing that shot, and upon those grounds, I consider that I am fully justified in opposing the decision rendered by Judge Lampman at Vancouver.

Re case of William Reid, who was discharged for first offence of dirty coal, evidence given shows that he working in a an abnormal place, the Company themselves states this, and being that there is a dockage clause in the agreement drawn up between the Company and the employees, which states that there shall be in excess of 200 lbs. of rock before first offence, is sufficient to say that the Company are not prepared to live up to their agreement on any of its weak places at the same time I would refrain from encouraging any one to take advantage of a clause of this nature, and will readily agree that if it had been proven that Reid deliberately loaded this rock for the purpose of taking advantage of that clause the Company would have been encouraged by the organization to have this man discharged, after his case had been investigated, but being this was the first offence of any kind, and the possible chances there are in this mine for the rock to fall from the roof into his car, I think a less severe punishment should have been given for the first time, also considering this was the first case of dockage under the agreement, which has been in force since March 1st, 1909, which distinctly shows the men do not wish to impose on the weak parts of the agreement, to the detriment of the Company, is sufficient to convince me that this was not done with malicious intent.

Re case of Geo. Martinovitch: I can only say that the Company again ignore living up to the article eight of the agreement which covers this man's case entirely.

The other cases referred to the Board for adjustment were unanimously dealt with by us, which I trust will be accepted satisfactorily by you.

Taking the dispute on a whole, Judge Lampman considered the men (or employees) were not open to punishment, for ceasing work at the time they did, and ruled it out when the Company appealed for this to be done; therefore he must have had just cause to think they were justified in doing so. Speaking for myself, I do not want to encourage or see the laws of our country violated at any time by anyone, at the same time I have to admit that the men had gone thirty days from the time their application was made, and had been told by the officials of the Company that they would get no Conciliation Board, which went to show they would cause delay, if possible; and when questioned on the reason for stating to the Department that they had not received a copy of the application, which was registered to them on March 19th, the only defence put up was that the application was pinned at the back of

other correspondence forwarded from here, and had not been read by the Secretary in the General Office. Does this look feasible?

In conclusion, Sir, I have to state that unfortunately I am forced to think that an attempt has been made to bring discredit on "the Industrial Disputes Investigation Act," from none other than the opposition party, who frankly state that no law can stop the corporations from discharging a man or men if they wish to do so; and being that this is directly against the laws of the labour organization of the men to do so, without a sufficient and reasonable cause for so doing, nothing but friction can be expected by such statement or decision.

I am, Sir,

Yours truly,

(Signed) T. CHAS. BROOKE,

III.—REPORT OF THE BOARD IN THE DISPUTE BETWEEN THE CANADIAN PACIFIC RAILWAY COMPANY AND ITS RAILROAD TELEGRAPHERS.

THE Department received on June 11 the report of the Board established to adjust differences between the Canadian Pacific Railway Company and its railroad telegraphers relating to the following claims which had been made in the employees' application:—(1) Unfair dismissal of Mr. L. H. Devault, from the position of train dispatcher at Farhnam, Que., December 18, 1908; (2) Breach of contract with the order of Railroad Telegraphers by displacing dispatchers from regular positions at Montreal, contrary to the terms of Article 2 of Schedule agreement since January 1, 1909.

The telegraphers called for the reinstatement of Mr. Devault with payment for lost time and requested also that the displaced dispatchers should be allowed their regular positions and reimbursed for loss of salary sustained by their removal. The application in this matter was signed by Messrs. D. Campbell and G. D. Robertson, of Toronto, and it was therein stated that 1,600 employees were likely to be affected.

Mr. Wallace Nesbitt, K. C., Toronto,

and Mr. W. T. J. Lee, Toronto, were appointed members of the Board on the recommendation of the employers and employees respectively. In the absence of a joint recommendation from Messrs. Nesbitt and Lee, the Honourable Mr. Justice Fortin, Montreal was appointed by the Minister as Chairman of this Board.

The unanimous findings of the Board are to the effect that the officials of the Company were justified in the dismissal of the said Devault and the contention of the Company is therefore sustained. In the matter of —Rose, the Board concluded that the contention of the Order of Railroad Telegraphers as to the construction to be placed on Rules 1 and 2 was incorrect and that the contention of the Company is therefore sustained.

On June 17, the Department was advised of the acceptance by the Canadian Pacific Railway Company of the report of the Board in this matter, and on June 21, word was received of the acceptance of the findings by the Order of Railroad Telegraphers.

Finding of the Board.

The text of the findings of the Board is as follows:—

In the matter of the Industrial Disputes Investigation Act 1907 and of the Dispute between the Canadian Pacific Railway Company, Employer,

and

the Order of Railroad Telegraphers, employees.

THE UNDERSIGNED having been appointed as a Board of Conciliation and Investigation under the above Act held at Montreal on the 3rd day of June, 1909, and having heard the parties proceed to investigate the following claims:

In the matter of—Rose.

The Board came to the conclusion that the contention of the Order of Railroad Telegraphers as to the construction of

Rules 1 and 2 was incorrect and the Company were justified in appointing the said—Rose to the position of First Track Despatcher.

The contention of the Company is, therefore, sustained.

In the matter of L. H. Devault.

The Board having heard the parties are of the opinion that the officers of the Company were justified in the dismissal of the said Devault, and the contention of the Company is therefore sustained.

DATED at Montreal this 4th day of June, 1908.

(Sgd.) THOMAS FORTIN,
Chairman.

“ WALLACE NESBITT,
for C. P. R.

for Employees.

IV.—SETTLEMENT OF DIFFERENCES BETWEEN WESTERN COAL OPERATORS' ASSOCIATION AND THEIR EMPLOYEES.—TERMS OF UNDERSTANDING REACHED ON QUESTION OF DISCRIMINATION.—FINDING OF BOARD OF CONCILIATION AND INVESTIGATION.

THE department received early in the month of July a communication from Mr. Lewis Stockett, President of the Western Coal Operators' Association, stating that on June 30, an agreement was signed terminating the differences which have existed for the past three months between the Western Coal Operators' Association and District No. 18 United Mine Workers of America, the companies affected by the agreement being as follows, namely, The Bankhead Mines, Limited, The H. W. McNeill Co., Limited, Coal Department of Alberta Railway and Irrigation Company, Leitch Collieries, Limited, Royal Collieries, Limited, West Canadian Collieries, Limited, (Bellevue and Lille mines) Hillcrest Coal and Coke Company, Limited, International Coal and Coke Company, Limited and the Hosmer Mines, Limited. The agreement, it was stated, will be in effect until March 30, 1911, and is practically the same as the findings of

the Board of Conciliation and Investigation mentioned below.

The following was given in the press as a resume of the conditions and rates:—

The right to hire and discharge, the management of the mine and the direction of the working forces, are vested exclusively in the company, and the United Mine Workers of America shall not abridge this right.

The company will give to the United Mine Workers of America full recognition, and concede the check-off system, that is to say, upon the individual request in writing of any of the company's employees, the company shall deduct such moneys from their wages each month as is designated for dues, assessments, fines and initiation fees. In other words, the company will retain from the wages due employees any sum that they may have given orders upon the company for in writing payable to such officers of the United Mine Workers of America as may be designated in such orders. The

United Mine Workers of America do not in any way prohibit the employment of Chinese in or around the mines, but, where such labour is employed they shall be paid the scale for such work with the following provisions, *i.e.*, that where they are now employed at Bankhead and Canmore present rates shall not be interfered with in any way by the United Mine Workers of America during the life of this agreement. Machine men and machine helpers are to be paid \$3.00 a trip. Employees shall be at liberty to purchase goods wherever they desire. Miners taken to do company work shall be paid \$3 a day.

The department was further informed that a mutual undersanding was reached as between the parties with reference to the question of discrimination and that it was agreed that the witnesses to the signatures attached to the agreement should write a joint letter to the Minister of Labour setting forth the fact that this mutual understanding was effected and to be binding upon both parties and that the Minister should be requested to have the same published in the first issue of the *Labour Gazette*. Accordingly, with the letter addressed to the Minister by the President of the Western Coal Operators' Association, was forwarded a joint communication to the Minister from Messrs. T. E. James and Hamilton B. Fuller expressing the terms of the undersanding effected on the subject indicated and requesting that the same might be published in the *Labour Gazette*.

The following is the text of the joint communication from Messrs. James and Fuller which is hereby published as requested:—

THE WESTERN COAL OPERATORS' ASSOCIATION.

HOSMER, B.C., June 30th, 1909.

To the Honourable,
The Minister of Labour,
Ottawa, Ontario.

Sir:—

In accordance with an agreement entered into this date between District

No. 18, United Mine Workers of America, and the Western Coal Operators' Association, to which agreement, we are the witnesses, to the signatures of both parties, and carrying out the following:

Witnesses to the signatures of the agreement, to write a letter to the Minister of Labor stating, "that the settlement reached was based on the understanding, that it is distinctly understood and agreed between the parties, that there is to be no discrimination on the part of the companies against union men, or on the part of the union men against non-union men employed, and that it is agreed that the same be published in the *Labour Gazette*."

Kindly have the above published in the *Labour Gazette*, and oblige,

Your obedient servants,

(Sgd.) T. E. JAMES,
(Sgd.) HAMILTON B. FULLER.

Report of Board.

The report of the Board established to adjust certain differences between the members of the Western Coal Operators' Association and their employees, as signed by the Rev. H. R. Grant, Chairman, and Mr. F. H. Sherman, member appointed on the recommendation of the employees, was received in the Department on June 21; also a minority report signed by Mr. Colin MacLeod, member appointed on the recommendation of the Western Coal Operators Association.

This dispute arose out of a "failure to agree upon the terms and conditions of working agreements which expired on March 31, 1909". The Board, in its report, expresses the opinion that these old agreements are agreeable to both parties and therefore recommends a general agreement based on the old form of agreement effective from April 1, 1909, to March 31, 1911.

In this case Mr. Colin MacLeod, of MacLeod, Alta., and Mr. F. H. Sherman, of Taber, Alta., were appointed members of the Board on the recommendation of the Western Coal Operators Association and of the employees respectively.

Rev. Hugh Grant, of Fernie, B. C., was appointed by the Minister as Chairman in the absence of a joint recommendation from the other two members. In the application it was stated that this dispute affected directly 2,100 men and indirectly probably 10,000 others. The Board began its labours on May 20 and exerted itself to induce the parties concerned to adjust their differences by mutual agreement but as no settlement was reached in this way the Board visited the various mines affected and took evidence on the questions at issue. In its findings it was referred to a dispute respecting differential rates on pillars and contract rates at Lille, Bellevue, Hillcrest and Coleman mines, and expresses the opinion that if the parties each made an earnest effort they can easily settle by mutual agreement or joint committee any difficulties outstanding in this connection. On the subject of discrimination the Board advises that the understanding arrived at with regard to discrimination, as reported by the Deputy Minister of Labour in the report of the Department of Labour in 1907, be observed by the parties to the present agreement.

The effect of the report of the Board, if accepted, would be, the Chairman explained in a covering letter, to give neither a "closed shop" nor an "open shop"; but to continue an agreement which had worked out amicably for two years.

The minority report of Mr. Colin MacLeod is in substantial agreement with the report of the Board. Mr. MacLeod has discussed at some length the merits of the points at issue and finds the chief dispute to be "the matter of the preamble and check-off clause, the miners contending that the preamble and check-off clause submitted by them would constitute a legal and binding agreement, the operators replying that it would not improve the legal aspects of the agreements heretofore existing and that its only effect was the establishment of a 'closed shop' to which they could not agree." Mr. MacLeod submits that the preamble prepared by the miners does not improve the legal and binding effect of the

preamble, used in the old agreement, nor on the other hand should the preamble, he thinks, of the operators be adopted. Mr. MacLeod has incorporated in his report a draft agreement covering all points in dispute between the Western Coal Operators' Association and its employees. On the subject of a check-off clause, Mr. MacLeod says in his report "The applicants are undoubtedly entitled to a check-off clause in their agreement, but the check-off clause submitted by them being inconsistent with the laws in force in British Columbia and Alberta should not be accepted, and the check-off clause of the old agreements should be continued, the same being shown in the agreement above referred to"

Report of Board.

FERNIE, B.C., June 15, 1909.

To the Honourable
The Minister of Labour,
Ottawa, Ont.

Sir:—

Having concluded our investigations, and bearing in mind the interests of the parties involved, and the suffering in consequence of the dispute, we have the honour to recommend the following, as the basis of a settlement:

We believe that the old agreements, expiring on March 31st, 1909, are agreeable to both parties, and we therefore, recommend a general agreement, based on the old agreement, expiring on the above date, the term of the agreement, to date from the 1st, of April, 1909, to the 31st, March, 1911.

Differential on Pillars and Contract Rates at Lille.

We are of the opinion that if the parties each make an earnest effort, they can easily settle any difficulties that may exist, at Lille, Bellevue, Hillcrest and Coleman mines, in the same manner as heretofore, by mutual agreement, or by the Joint Committee, and Independent

Chairman, as provided for by all previous agreements between the parties. We, therefore, recommend that this course be adopted and a definite settlement be made within thirty (30) days of signing an agreement.

Discrimination.

We recommend that the understanding arrived at with regard to discrimination, as reported by the Deputy Minister of Labour, in the report of the Department of Labour, in 1907, be observed by the parties in this agreement.

We have the honour to be, Sir,

Your obedient servants,

(Sgd.) H. R. GRANT,
Chairman.

(Sgd.) F. H. SHERMAN,
Member of Board.

Minority Report.

The text of the minority report is as follows:—

MacLeod, Alta., June 16, 09.

To the Honourable,
The Minister of Labour,
Ottawa, Ont.

SIR:—

In the matter of the industrial Disputes Investigation Act 1907, and in the matter of a dispute between the Western Coal Operators' Association.

and

The employees of the above companies as represented by district number eighteen, United Mine Workers of America.

I have had the advantage of seeing the award of my colleagues, and regret that notwithstanding we are agreed as to the matters in dispute, we differ as to the conception of our duties. I feel that under Section 26 of the Industrial Disputes Investigation Act, it is incumbent upon the Board to deal with each item of

the Reference, and that the Board should not hesitate to give an opinion upon the questions it is called upon to decide. The objection I have to signing the award of my colleagues will, no doubt, be your objection to accepting it—it is not an award. Moreover, Sir, I feel that after the prolonged investigation had in this matter, that the Board should be in a position to render a decision upon at least one of the questions in dispute, and that it should not return the Reference to you without a word of comment as to the merits of the case. Since the twentieth day of May last the Board has practically been in continuous session, during which time voluminous evidence was taken, and after full and thorough investigation and inspection I beg to report on the matters in dispute as follows:

This dispute arose by reason of the parties being unable to renew an agreement which expired on the thirty-first day of March, 1909. From the evidence adduced it appears that during the month of March the parties by their representatives met in conference, and made an agreement satisfactory to the representatives, which the Operators agreed to adopt, and which was submitted to the several local Unions for consideration on a referendum vote. This vote carried by a large majority, but notwithstanding this vote and the agreement of the committees, operations were suspended by the applicants.

The following is the text of the Application and Reply:—

“*Application*—

“It is hereby agreed—

Between the Western Coal Operators' Association, consisting of the Pacific Coal Company, Limited, the W. H. McNeill Company, Limited, the Leitch Collieries, Limited, the West Canadian Collieries, Limited, The Hillcrest Coal & Coke Company, Limited, The International Coal and Coke Company, Limited, The Alberta Railway and Irrigation Company, of the one part, and the employees of the said Companies, as represented by the United Mine Workers of America, District Number Eighteen, of the other part,

that the agreement existing prior to April 1st, 1909, respecting general provisions and scales of contract prices and wages, shall govern the parties hereto for the period of two years commencing April 1st, 1909, and ending March 31st, 1911, in so far as the same may not be modified or affected by the provisions of this agreement; it being understood and agreed that the parties hereto will meet in conference sixty days prior to the expiration of this agreement to discuss a renewal thereof. This agreement covers all the mines, coke ovens and outside plants operated by the Companies and all persons accepting employment at these mines shall be governed by the following rules and regulations:—

“The Company will require each person employed by them, or to be employed by them, as a miner, mine labourer, or otherwise, in and about the mines and coke ovens of the prospective Companies, to sign this agreement, as a condition precedent to continued employment of the person already employed or to be employed. The agreement to be placed in a book together with a Legal Check-off clause and signed by all employees.

Hours of Labor—

“All underground wages shall be computed from the time of entry at the surface of the mine to the time of return to the surface of the mine based upon the eight (8) hour bank to bank shift.

Lille Collieries—

“A contract price to be agreed upon for the seams at present being worked at Lille.”

Reply—

The Western Coal Operators' Association above mentioned state in reply to the application made herein as follows:—

“1. That a strike exists at the following named collieries, viz.: Bankhead Mines, Limited, The H. W. McNeill Company, Limited, Coal Department of the Alberta Railway & Irrigation Company, Royal Collieries, Limited, The Leitch Collieries, Limited, The Hillcrest Coal & Coke Company, Limited, The West Canadian

Collieries, Limited, The International Coal & Coke Company, Limited, and the Hosmer Mines, Limited, and the employers at said collieries are members of the Western Coal Operators' Association.

“2. The applicants have caused the said strike to be declared at each of the said collieries named, and the Board should enquire into the Dispute existing at each and all of said collieries.

“3. That the discontinuance of operations at the said collieries is the result of a strike ordered by the President and Secretary of District number Eighteen, of the United Mine Workers of America contrary to the provisions of the Industrial Disputes' Investigation Act, 1907.

“4. That the demands of the applicants as shown on page one of said application is unfair and should not be allowed, and in lieu of the said demands the following should be adopted:—

“IT IS HEREBY AGREED:—

Between the Western Coal Operators' Association (consisting of Bankhead Mines, Limited, The H. W. McNeill Co., Limited, Coal Department of The Alberta Railway & Irrigation Co., Royal Collieries, Limited, The Leitch Collieries, Limited, The Hillcrest Coal & Coke Co., Limited, The West Canadian Collieries, Limited, The International Coal & Coke Co., Limited, and The Hosmer Mines, Limited) of the one part, and the employees of the said Companies as represented by the United Mine Workers of America, District No. 18, of the other part, that the following agreement, respecting general provisions and scale of contract prices and wages, shall govern the parties hereto for the period ending March 31st, 1912; it being understood and agreed that the parties thereto will meet in conference thirty days prior to the expiration of this agreement, to discuss a renewal thereof.

“5. That the agreement made between the parties hereto at the conference held in March, 1909, should be adopted, with the exception of the modifications following:—

(a) The check-off clause should be struck out.

(b) After the twenty-fifth word in the

discrimination clause the words "or interference with" should be inserted.

(c) In the Schedule relating to outside and inside wages the clause in regard to minimum and higher wages should be omitted.

(d) There should be a differential on all pillars and a reduction on some of the contract rates in the previous agreement.

(e) A Blacksmith charge of fifty cents per month per miner, and a uniform rate of \$2.50 per ton for run of mine coal, and \$3.00 for screened coal delivered to employees residing at the mines.

(f) No check-off clause or deductions should be allowed other than as provided for by the laws of the Provinces of Alberta and British Columbia."

You will note the chief dispute between the parties is the matter of the preamble and check-off clause, the miners contending that the preamble and check-off submitted by them would constitute a legal and binding agreement, the operators replying that it would not improve the legal aspects of the agreements heretofore existing, and that its only effect was the establishment of a "closed shop" to which they could not agree. The matters relating to hours of labor, contract prices at Lille and Differential on Pillars have arisen since the cessation of work, and their existence is due largely to the friction now existing between the parties.

Taking up the questions as they appear in the Reference and in the Reply, I am of the opinion that the Board's Award in respect of the several matters should be,—

1. That the preamble submitted by the applicants does not improve the legal and binding aspects of the preamble used in the old agreement, nor should the preamble submitted by the Operators be adopted, but on the other hand the preamble which is set out in the agreement hereafter recommended should be adopted.

2. *Check-off Clause.*—The applicants are undoubtedly entitled to a check-off clause in their agreement, but the check-off clause submitted by them being inconsistent with the laws in force in British Columbia and Alberta should not be

accepted, and the check-off clause of the old agreements should be continued, the same being shown in the agreement above referred to.

3. *Hours of Labour.*—After hearing the evidence on this question, it is quite apparent to the Board and to the parties that no grievance existed between them on this question, but that by reason of a misunderstanding between them, this demand was made; moreover, the matter being governed by the Statutes in force in British Columbia and Alberta, the Board has no jurisdiction to deal with the same.

4. *Lille Collieries.*—The applicants demanded at these Collieries that a contract price be fixed on what is known as "BEAR Valley No. 1 seam", and the Company objected to grant a new rate, on the ground that this seam is the original Lille No. 1 seam" already under contract rates, and that by reason of a fault they were obliged to work this seam under the rates applicable to abnormal conditions. From personal inspection of the mine and the evidence adduced, the Board is of the opinion that the contention of the Operators as to the identity of the seam is correct, but on the other hand recommends that there should be some consideration given to the miners for the extra timbering required.

5. *Differential on Pillars.*—The Board is also of the opinion that the system of paying for timber in the pillars at Coleman and Hillcrest Mines constitutes a grievance on the part of the Companies, and in view of the fact that the evidence discloses that differential on pillars should exist in all pitching seams, the Board recommends that this matter together with the demand relating to differential on pillars at Bellevue be referred to the Special Committee.

6. *Other Demands.*—The demands relating to Blacksmith charge and price of coal at mines being trivial, the Board cannot recommend any variance from the Macleod agreement, to which each party has committed itself.

7. *Discrimination.*—The Board says in regard to the matter of discrimination that having heard the evidence submitted by the applicants to the effect-

that some Managers discriminated between non-union and union men, and that Union men have discriminated against non-union men, and being satisfied that such evidence is correct, the Board is of the opinion that a discrimination clause should be embodied in the agreement to be made between the parties.

Unfortunately one of the members of the Board, who has a practical knowledge of mining, is ill and unable to discuss and advise with me, therefore, I hesitate to fix any definite Award in regard to the Lille, Bellevue, Hillcrest and Coleman mines, but in lieu thereof recommend the same to the consideration of the Special Committee as provided for in the agreement hereafter written, and recommend also that it be embodied in the agreement that the Special Committee meet at the earliest possible moment.

Having in mind the agreements which existed between the parties prior to the First day of April, 1909, and the Macleod agreement which was approved of on a referendum vote, I have compiled an agreement based on these agreements, which I would recommend to the parties for acceptance, subject to the findings of the Special Committee in regard to the Bellevue, Hillcrest, Coleman and Lille Mines, which when made should constitute a part of the said agreement.

The agreement referred to is as follows:—

AGREEMENT between the Western Coal Operators' Association (consisting of Bankhead Mines, Limited, The H. W. McNeill Co., Limited, Coal Department of The Alberta Railway & Irrigation Co., Royal Collieries, Limited, The Leitch Collieries, Limited, The Hillcrest Coal & Coke Co., Limited, The West Canadian Collieries, Limited, The International Coal & Coke Co., Limited, the Hosmer Mines, Limited) of the one part and the employees of the said companies as represented by the United Mine Workers of America, District No. 18 of the other part; with respect to prices to be paid at the several collieries, and with respect to other matters governing the relations between the said parties,—

Outside Wages.—The outside scale of wages, which governed the parties hereto on March 31st, 1909, shall continue in effect during the life of this agreement.

Inside Wages.—The inside scale of wages, which governed the parties hereto on March 31st, 1909, shall continue in effect during the life of this agreement, with the following exceptions: Machinemen are to be rated at \$3.50 per shift, and Machine Helpers at \$3.00 per shift, and schedule "D" of the agreement expiring March 31st, 1909, is annulled.

Contract prices.—The scale of contract prices, which governed the parties hereto on March 31st, 1909, shall continue in effect during the life of this agreement, in so far as the same are not modified or effected by the provisions herein.

IT IS EXPRESSLY AGREED between the parties hereto that the matter of the timber grievance in No. 1 seam at Lille mine, timpering in the pillars at Hillcrest and Coleman mines and a differential on pillars at Hillcrest Bellevue and Coleman mines, shall be referred to a Special Committee, said Committee to consist of five members, two appointed by the president or vice-president of District No. 18 United Mine Workers of America, and two appointed by the president of the Western Coal Operators' Association, at the time of the signing of this agreement, the fifth member to be appointed immediately by the Minister of Labour. The Committee thus constituted shall take up the matters referred to and render a decision on the same within ten days, this decision to be binding on the parties and become part of this agreement, and to take effect from the date hereof.

Management of Mine.—The right to hire and discharge, the management of the mine, and the direction of the working forces, are vested exclusively in the Company, and the United Mine Workers of America shall not abridge this right.

Duties of Pit Committee.—The Pit Committee shall be a committee of three in each Colliery or other plant covered by this Agreement, selected by the employees working at such Colliery or other plant, from amongst their own number,

except one member may be a Checkweighman or an Officer of the Local Union, not necessarily an employee of the Company. This member must previously have been selected as Checkweighman or Officer from amongst the employees of the aforesaid Colliery or other plant; due notice of such selection properly certified shall be given to the Company.

The duties of the Pit Committee shall be confined to the settlement of disputes between the Pit Boss or Foreman, and any employee working in or around the Mines, arising out of this agreement, and all agreements made in connection therewith, the Pit Boss or Foreman, and man or men having failed to agree.

The Pit Committee, in discharge of its duties, shall under no circumstances go around the mine for any cause whatever, unless called upon by the Pit Boss or Foreman, or by a Miner or day man, who may have a grievance which he has first tried to and cannot settle with the Boss.

Members of the Pit Committee employed as day men shall not leave their places of duty during working hours, except by permission of the Pit Boss or Foreman, or in cases involving the stoppage of the mine.

Settlement of Local and General Disputes.

A.—In case any dispute or grievances arise under this agreement, or any local agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the Company or any person or persons employed or by the men as a whole, then the parties shall endeavour to settle the matter as hereinafter provided. But before any grievance or disputes shall be submitted to the Pit Committee, the person or persons effected shall endeavour by personal application to the Pit Boss, overman or foreman in charge of the work where the dispute arises to settle the matter and in the event of their agreeing their decision shall be final.

B.—In case of any local dispute arising in any mine and failure to agree between the Pit Boss, overman or foreman in charge of the work where the dispute

arises, and any employee, the Pit Committee and Mine Superintendent, or Mine Manager shall endeavour to settle the matter, and if they agree their decision shall be final.

C.—In the event of the failure of the Pit Committee and the Mine Superintendent or Mine Manager to settle any dispute so referred to them, as well as in the event of other disputes arising, the matter in dispute shall be referred to the general superintendent or general manager of the Company, and the officers of District No. 18 United Mine Workers of America to settle, and if they agree their decision shall be final. Should they fail to agree it shall be referred to a Joint Committee, said committee to be made up of three operators appointed by the Western Coal Operators' Association, and three miners appointed by District 18 United Mine Workers of America for settlement. If they agree, their decision shall be binding upon both parties. A majority of a full committee must vote in favour of any action before it can be declared carried.

In the event of a failure to agree, the committee shall endeavour to select an independent chairman and failing to agree upon an independent chairman the Minister of Labour shall be asked to appoint such chairman, the decision of the committee thus constituted shall be binding on both parties.

The Joint Committee shall meet every three months on the second Tuesday or at any time on the joint call of the president of the Western Coal Operators Association and the president of District 18, United Mine Workers of America.

D.—In the meantime and in all cases while disputes are being investigated and settled the miners, mine-labourers and all other parties involved must continue to work pending investigation, and until final decision has been reached but where miners, mine labourer or mine labourers has or have been discharged by the Company he or they shall not remain in the employ of the Company while his or their case is being investigated and settled. If a claim be made within five days where a man or men has or have been unjustly discharged the case shall be

dealt with according to this article, and if it is proven that he or they have been unjustly dealt with he or they shall be reinstated. If claim is made for compensation for loss of time in cases where reinstatement has followed it shall be left to the Joint Committee to decide what amount if any is to be paid.

E.—Any breach of this agreement by any of the parties hereto is not to void the said agreement, but the same is to continue in full force and effect. It is not intended however by this sub-section to abridge the right of a man to suspend work after the final settlement as herein provided, if any operator or operators refuse to be bound by any decision given against them under this article.

New Work.—Whenever any new work arises, the price for which has not been provided for in this agreement, on the request of the Company or the Miners the Joint Committee of the Western Coal Operators Association and District No. 18 of the United Mine Workers of America shall meet within thirty days after the said request and arrange a price. Meantime and until such price has been arranged all men shall be paid upon the day wage scale.

Employees not under jurisdiction.—The following employees are not under the jurisdiction, of the United Mine Workers of America, Mine Manager or Superintendent, Overman or Pit Boss, or Assistant overman or pit bosses, fire bosses, boss driver, stable boss, master mechanic, electricians, weighmen, head carpenter, tipple or breaker foreman, loader boss, night watchman, coke over foreman, outside foreman and all other foreman, time keepers coal inspectors and head lampmen.

Construction and extensive repairs.—It is agreed that all men working on improvements and extensive repairs are not included in the jurisdiction of the United Mine Workers of America. The erection of head frames tipples, breakers, washers, buildings, coke ovens, scales machinery, railroad tracks, switches, etc., necessary for the completion of the plant all being in the nature of construction work and extensive repairs or rebuilding of the same class of work are to be considered as im-

provements and extensive repairs, and the employees thereon are to be excluded as above when employed on such work only.

Check-off.—The Company will give to the United Mine Workers of America full recognition and concede the check-off system, that is to say, upon the individual request in writing of any of the Company's employees, the Company shall deduct such moneys from their wages each month as is designated for dues assessments, fines and initiation fees, in other words the Company will retain from the wages due employees any sums they may have given orders upon the Company for in writing payable to such officers of the United Mine Workers of America as may be designated in such orders.

Discrimination.—No person shall be refused employment or in any way discriminated against on account of membership in labour organizations, and there shall be no discrimination against any employee who is not a member of a labour organization by members of such an organization.

Penalty for absence from work.—When an employee absents himself from his work for a period of two days unless through sickness or by first having properly arranged with the Pit Boss or foreman and obtained his consent, he may be discharged. All employees whose absence would cause any stoppage of work must before absents themselves properly arrange with or notify the Pit Boss or foreman for or of their absence, otherwise they may be discharged. Any employee who habitually to the extent of five days per month absents himself from work may be discharged.

Penalty for stoppage of work.—If any employee or employees shall cause a stoppage of work in violation of this agreement, he or they shall be subject to discharge by the Company without recourse.

Check Weighman.—The Company will grant the right to the miners to employ check-weighers, and will grant the said check-weighers every facility to enable them to render a correct account of all coal weighed and will allow the cars to be tared from time to time, and the machine to be properly tested from time to time

and will deduct from the wages of all contract miners such amounts as may be designated from time to time, and will pay over the same to the secretary of the local union for wages of check-weighers.

Preference of employment.—In case an employee is thrown out of employment unless discharged he shall be given preference over new man in other mines in the same camp operated by the same Company.

Minimum rate.—When a mines working place becomes deficient owing to any abnormal conditions preventing him from earning the minimum wage of \$3.00 per shift, and should the Company desire to continue to work such place or places, the mine manager and Pit Committee shall examine said place or places and agree upon a rate to be paid a miner for such deficient work. Failing to agree upon such rate the place if worked shall be worked on the day wage scale per miner.

Miners taken to do company work.—The Company shall pay the sum of \$3.00 per day for all miners taken from contract work to do Company work.

Delivery of Timber.—In accordance with the Coal Mines Regulation Act of British Columbia and Alberta the Company shall at all times deliver an adequate of suitable timber rails ties and sheet iron at the nearest cross-cut to the face of all raise workings, and in places where the regular pit cars go to the working face without being handled by the miner, they shall be deliver on the cars the working face, in other places across pitch the timber, rails, ties, planks and sheet iron shall be delivered at the mouth of the room.

Loading of coal from chutes.—In pitching seams where chutes are used the Company will handle all coal placed in chutes by the miners.

Doctor and Hospital.—The matter of doctor and hospital arrangements is to be arranged between the employees and the management, and when so arranged the Company agrees to make collections for that purpose. This is subject in British Columbia to the laws of the Province.

In camps where doctor and hospital arrangements have already been made

and are satisfactory, the customs prevailing in such camps shall continue.

The Joint Committee shall at their first meeting provide rules for the mode of procedure for the making of arrangements between the employees and the manager.

Store.—It shall be understood and agreed that the employees shall be at perfect liberty to purchase goods wherever they may choose to do so.

Holidays.—The following days only shall be observed as holidays:—New Years Day, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, District and International Election Day, Christmas Day.

Funerals.—In the event of an instantaneous death by an accident in the mine or outside the mine, the miners underground and all other employees except in the seam where the accident occurred shall continue to work until the day of the funeral when it is optional with them whether they shall work or not.

Backhands.—The present practice of working miners either as partners, or with miners and labourers as it exists in the several camps at the present time shall be adhered to.

With the following provisions, that the clauses in regard to the same in the agreements expiring March 31st, 1909 shall remain in effect.

On all company work the company shall employ such class of men as the work requires, and at the rates of wages provided for in this agreement.

Sub-contracting.—No sub-contracting shall be allowed in any mine operated by the Company, but this shall not apply to the employment of backhands.

Employees to care for mine.—In case of either local or general suspension of mine either at the expiration of this contract or otherwise, the engineers, firemen and pumpmen shall not suspend work but shall when mining is suspended fully protect all the company's property under their care and operate fans and pumps and lower and hoist such men and supplies as may be required to protect the company's property, and any and all coal required to keep up steam at the company's coal plant, but its understood

and agreed that the companies will not ask them to hoist any coal for sale on the market.

Single shift.—The single shift system in rooms and pillars shall be adhered to as far as practicable.

Wet Places.—The working place in the mine where water drips from the roof in quantities sufficient to wet a man's clothing or where standing water is sufficient to wet a man's clothing above his knees shall be considered a wet place, a place where the use of gum-boots will keep a man's feet dry shall not be considered a wet place.

Rock miners.—Where a man is continually engaged on rock work where hammer and steel are used, he shall be considered a rock miner, and paid a rock miner's wages.

If an air drill is used, the driller shall be paid machine wages, and the helper machine runners helpers wages, the other men engaged shall be classed as miners or labourers as may be.

Where a man is engaged on work in both rock and coal, if the amount of rock is greater than the amount of coal he shall be classed as a rock miner, and where the amount of coal is greater than the amount of rock he shall be classed as a coal miner.

Brushing.—Where a man is engaged in continuous brushing either top or bottom using the usual drills and tools, he shall be classed as a coal miner; if the brushing is done by hammer and steel he shall be classed as a rock miner.

Timbermen taking out rock while engaged in re-timbering or repairing shall not be classed as rock miners.

Retirement.—Where any employee has drawn his time before the regular pay day he thereby severs his connection with the Company and any alleged grievance he may have ceases to be a question for consideration under this agreement.

Chinese labour.—The United Mine Workers of America does not in any way prohibit the employment of Chinese in or around the mines, but where such labour is employed they shall be paid the scale for such work with the following provisions, that is, that where they are now employed at Bankhead and Canmore the present rates shall not be interfered with in any way by the United Mine Workers of America during the life of this agreement.

Oil.—Present conditions to prevail.

Pay day.—The Companies will continue to pay the regular pay rolls according to the present customs at the several mines. Statements to be issued two days before pay day.

Any employee desiring to leave the services of the Company shall on his request be paid all moneys due him within two days after his stoppage of work.

Market restrictions.—It is agreed that District No. 18 United Mine Workers of America will not in any way restrict or interfere with the marketing of coal or coke to any person, firm or corporation.

Local conditions.—The same as those existing at the several mines previous to the 31st day of March, 1909.

This agreement shall govern the parties hereto for the period ending March 31st, 1912, and it is understood and agreed that the parties hereto shall meet in conference thirty (30) days prior to the expiration of this agreement, to discuss a renewal thereof.

Hoping that this recommendation may be acceptable to you and the parties concerned in the dispute.

I have the honour to be,

Sir,

Your obedient servant,

COLIN MACLEOD.

V. REPORT OF BOARD IN DISPUTE BETWEEN THE CANADIAN PACIFIC RAILWAY COMPANY AND LONGSHOREMEN IN ITS EMPLOY AT OWEN SOUND, ONTARIO.

THE Department received on June 17, the report of the Board established to adjust a dispute between the

Canadian Pacific Railway Company and longshoremen in its employ at Owen Sound, Ont. In their application for the

appointment of this Board the employees claimed that the wages paid were not sufficient compensation for their services nor on a par with the wages paid at other ports on the Great Lakes for similar work. The matters of difference brought to the attention of the Board were, however, three in number, the first being the question of wages, the second a question of what was described as discrimination, and the third, the claim of the employees to be paid fortnightly instead of monthly as at present. The number of employees likely to be affected was stated to be between 250 and 500 as the season advanced. Pending the negotiations between the company and its employees for a settlement in this matter some 200 longshoremen refused to return to work, but later decided to apply for a Board of Conciliation and Investigation and thereupon resumed their positions in the Company's employ. Mr. Wallace Nesbitt, and Mr. J. G. O'Donoghue both of Toronto, were appointed members of the Board on the recommendation of the employers and employees respectively and in the absence of any joint recommendation from Messrs. Nesbitt and O'Donoghue, Mr. Donald Ross, of Barrie, was appointed by the Minister as Chairman.

The members of the Board are unanimously of opinion that it is impossible to suggest any remedy for the so-called discrimination. The Board also finds that desirable as it might be in the interests of the employees to have payment fortnightly, the difficulties suggested by the company in doing this and maintaining a proper system of audit over their extensive system are insuperable.

On the question of wages to be paid the Board advises that there should be an alteration in favor of the men in the rate of wages agreed to by a written contract by each of the men at the beginning of the season. It is remarked in the report that "where the men would expect the company to be bound by a contract to pay a certain wage, they themselves, in all fairness, should abide by a contract which they have entered into; otherwise there

can be no confidence in bargains made which are repudiated so soon after as it appears to be in the power or to the advantage of either party to do so." In the present case the men had agreed to take 15c. per hour for week days and 16c. per hour for night and Sunday work, and 20c. per hour for the handling of grain and coal. The majority of the Board agree however, that 17c. per hour for week day work (7 A. M. to 6 P. M.) and 18c. per hour for night (6 P. M. to 7 A. M.) and Sunday work should be paid and accepted and 23c. per hour for the handling of grain and 25c. for the handling of coal. These figures are slightly higher than in the negotiations between the parties and higher than the company stated they would accept, and slightly lower than the men stated they would be content to receive.

In the minority report Mr. J. G. O'Donoghue, member of the Board appointed on the recommendation of the employees, expresses the opinion that the only difficulty in the way of bi-monthly payment of wages was one of book-keeping and "that the necessities of the men should not be sacrificed for any such reason." The evidence before the board shows, in his opinion, that the cost of living in Owen Sound was much higher than at Midland, Collingwood, Windsor and other points where similar work was performed, yet the wages paid at Owen Sound were much below those paid at these other towns and cities. The season for this class of work was, he urged, about seven months long and the average wage received by the men during that time probably less than \$300. Mr. O'Donoghue advises that the following rates should be paid:—shedmen, 22c. by day and 25c. by night; grain men, 30c. by day or night, and coal men the same, with double time for all Sunday work.

On June 21 the Department was advised that the majority report of the Board in this matter had been accepted by the employees concerned. On June 23 the Department was advised that the report of the majority of the Board was accepted by the Company.

Report of Board.

The text of the report of the Board is as follows:—

In the matter of the Industrial Disputes Investigation Act 1907 and of the dispute between the Canadian Pacific Railway Company, Employer,

and

Longshoremen in its employ at Owen Sound, Ontario, Employees.

THE UNDERSIGNED, together with Mr. J. G. O'Donoghue, having been appointed as a Board of Conciliation and Investigation under the above Act, held sittings at Owen Sound on the 10th day of June 1909, and having heard the parties and considered the evidence, beg to report as follows:

There were three matters of difference brought before the Board, the first, or substantial one, being the question of the wages which should be paid; the second being a question of what was described as discrimination, and the third the claim by the employees to be paid fortnightly instead of monthly, as at present.

All the members of the Board were of the opinion that it was impossible to suggest a remedy for the so-called discrimination, a view which the employees themselves, after discussion, we inferred concurred in. It seems difficult, if not impossible, to lay down any rule by which when there are say, 100 men, seeking the employment of unloading a boat on her arrival, and only 80 required, to avoid the natural desire upon the part of the employer to select those best fitted and capable to perform the work.

The Board also agreed in the view that desirable as it might be in the interests of the employees to have payment fortnightly, the difficulties suggested by the Company in doing this and maintaining a proper system of audit over their extensive system, were insuperable.

On the question of the wages to be paid, the undersigned, the majority of the Board, after weighing the matter carefully under all the circumstances have come to the conclusion that there should be an alteration in favour of the men in

the rate of wages agreed to by a written contract by each of the men at the beginning of the season. It is to be remarked that where the men would expect the Company to be bound by a contract to pay a certain wage they themselves in all fairness should abide by a contract which they have entered into; otherwise there can be no confidence in bargains made which are repudiated so soon as it appears to be in the power or to the advantage of either party to do so. The men, also, seemed to have gone on strike in direct violation of the law. So far as these considerations are concerned the course followed was improper and unwise. The men, however, could have given thirty days' notice and terminated the contract, and the Board have only felt themselves called upon to deal with the evidence as to what in their opinion under all the circumstances, and in the present condition of the labour market would be a proper wage to suggest that the employer should pay and the employee should be content to accept for the various classes of work described.

The men had agreed to take 15c. per hour for week-day work and 16c. per hour for night and Sunday work, and 20c. per hour for the handling of grain and coal.

The majority of the Board have come to the conclusion that 17c. per hour for week day work (7 a. m. to 6 p. m.) and 18c. per hour for night (6 p. m. to 7 a. m.) and Sunday work should be paid and accepted, and 23c. per hour for the handling of grain and 25c. per hour for the handling of coal. These figures are slightly higher than in the negotiations between the parties the Company stated they would accept, and slightly lower than the men stated they would be content to receive, and the majority of the Board, after anxious consideration of the views of both parties, beg to report that the figures given above are in their opinion fair.

Dated this 15th day of June, 1909.

(Sgd.) DONALD ROSS,
Chairman.

WALLACE NESBITT,
for C. P. R.

FACTORY LEGISLATION AND INSPECTION IN CANADA.

LEGISLATION for the protection of employees is in Canada a matter of provincial jurisdiction. Every province in the Dominion, with the exception of three, namely Prince Edward Island, Alberta, and Saskatchewan, has enacted legislation of this character. The three provinces named are primarily agricultural, or, in the case of Prince Edward Island, agricultural and fishing, provinces.

The earliest factories' act to take effect in Canada was the Ontario Act which was passed in 1884. A factories' act was passed by the province of Quebec in the following year. The third province to enact legislation of this character was Manitoba in 1900. The Nova Scotia act was passed in 1901, the New Brunswick act in 1905, and the British Columbia act in 1908.

In Ontario and Quebec, inspectors to enforce this legislation were appointed shortly after the acts became law. Ontario has at present a staff of ten inspectors, including two female inspectors, while Quebec has a staff of 8 inspectors including 2 female inspectors. One inspector has been appointed in each of the provinces of Nova Scotia, New Brunswick, Manitoba and British Columbia.

The following are the names and addresses of the inspectors at present on the staffs of the several provinces.

NOVA SCOTIA.

Philip Ring, Halifax, N. S.

NEW BRUNSWICK.

John McMulkin, St. John, N. B.

QUEBEC.

Louis Guyon, Chief, Montreal.
James Mitchell, Montreal.

O. J. Monday, Montreal.
Mrs. Louisa King, Montreal.
Miss Robertine Barry, Montreal
P. J. Jobin, Quebec.
Felix Marois, Quebec.
R. H. Gooley, Coaticook.

Besides the above named, there is a Board of Examiners for Boiler Inspectors, they are Messrs. Wm. Laurie, E. O. Champagne and Louis Arpin, of Montreal, Mr. Joseph Samson, of Levis, and Mr. F. X. Drolet, of Quebec.

The number of boiler inspectors on the list is forty-two, but all of these are not engaged in inspection work.

ONTARIO.

James T. Burke, Parliament Bldg, Toronto.
Thomas Keilty, Ottawa, Ont.
A. W. Holmes, Parliament Building's, Toronto.
H. B. Tutt, Parliament Building's, Toronto.
Miss M. Carlyle, Parliament Building's, Toronto.
Mrs. J. R. Brown, Parliament Building's, Toronto.
Robt. Hungerford, Parliament Building's Toronto.
Henry Clarke, London.
Fred. Kellond, Hamilton.
Stephen J. Mallion, Stratford.

MANITOBA.

Daniel H. Smith, Winnipeg.

BRITISH COLUMBIA.

G. E. Gordon, Vancouver.

In the head inspection office of Ontario three additional clerks are permanently employed. In Quebec there are five clerks serving in this capacity.

BOUNTIES PAID IN CANADA DURING THE FISCAL YEAR 1908-09.

A RETURN prepared by the department of Trade and Commerce Canada, shows that the Dominion paid in bounties during the fiscal year ended March 31, 1909, the sum of \$2,467,304 as compared with \$2,787,357 during the fiscal year 1908, a decrease of \$320,047.

The total bounty paid during 1909 on pig iron was \$693,222 a decrease as compared with 1908 of \$170,394; on steel \$838,100 a decrease of \$254,100; on wire rods \$333,090, a decrease of \$14,094; on lead \$307,433 an increase of \$256,432; on manilla fibre \$34,561, a decrease of \$7,422; on crude petroleum \$260,698 a decrease of \$130,519. It will be seen that the only increase in bounties took place in the case of upon lead, a result of the amendment made to the Lead Bounty a last year.

The production of pig iron upon which bounty was paid during the fiscal year ending 31st March, 1909, was as follows: Pig iron produced from Canadian ore, 97,826 tons; pig iron produced from foreign ore, 511,605 tons; representing a decrease of 73,348 tons.

The production of steel during the fiscal year ending 31st March, 1909 amounted to 570,588 tons as compared with 661,939 tons during the previous year. After the first of January the steel bounty was decreased from \$1.65 to \$1.05.

The production of wire rods was 55,515 tons, compared with a production of 57,855 tons in 1908.

In the manufacture of pig iron there was used during the fiscal year 1909 a total of 179,735 tons of Canadian ore, a decrease as compared with the previous year of 53,778 tons, and of foreign ore 1,037,586 a decrease 131,221 tons

The reduction in output of the Canadian iron industries is not remarkable, considering that the major part of the fiscal year was marked in the United States by a partial suspension of production, many of the mills being closed down altogether.

The bounty paid upon crude petroleum indicates a production for the fiscal year of 173,799 gallons a decrease of some eighty-seven thousand gallons as compared with the fiscal year 1908.

There was produced in Canada last year 10,590,456 pounds of binder twine and 6,770,165 pounds of cordage. There is no duty upon binder twine imported into Canada, the protection having been removed some years ago. The United States government, however, imposes an export duty upon all manilla fibre, which is the chief constituent of twine, sent out from the Philippine Island to any other country than the United States. To offset this the government of Canada allows a countervailing bonus of about three-eighths of a cent per pound to Canadian manufacturers upon fibre imported from the Philippines.

PROCEEDINGS OF THE FOURTH QUINQUENNIAL CONGRESS OF THE INTERNATIONAL COUNCIL OF WOMEN.

ON Thursday, June 24th, the Fourth Quinquennial Congress of the International Council of Women was opened at Toronto, Ont., in the Convocation Hall of the University of Toronto by the Countess Grey. Hon. President of the National Council of Women of Canada. Lady Edgar, President of the N. C. W. C. occupied the chair. At the opening meeting, addresses were delivered by Her Excellency, Lady Grey, and the Countess

of Aberdeen, President of the International Council of Women. Continuous sessions of the Congress were held until June 30, during which a wide variety of subjects relating to the industrial and social activities of women were ably discussed by the delegates to the Congress who represented most of the principal countries of the world, and who had attained prominence in their special spheres of work.

Adresses were also delivered at various meetings by eminent public men, educationalists, and others actively identified in the work before the Congress. The interchange of ideas on the many vitally important matters discussed can hardly fail to exert a wide influence upon industrial and social progress.

The International Council of Women had its origin at a meeting held at Washington in 1888, when the National Council of Women of the United States was formed, and steps were taken for the organization of similar National Councils other countries and their union in one International Council. The first quinquennial meeting was held in Chicago in 1893 and subsequent one in London in 1899 and in Berlin in 1904.

The objects of the International Council as well as of the National Councils are:

(a) To promote greatest unity of thought, sympathy, and purpose between women workers of all classes, parties, and creeds.

(b) To further the application of the Golden Rule to society, custom and law.

There are at present affiliated with the International Council, 23 National Councils, of which seventeen were represented at the Quinquennial Congress of 1904.

The Congress was divided into 9 sections dealing respectively with the following subjects. Art, Education, Health and Physical Training, Industries, Laws concerning Women and Children, Literature, Philanthropy, Professions and Carreers for Women, Social Work and Moral Reform.

Art.—In nearly all the sections much of the time was devoted to the discussion of industrial questions. In the Art Section the subject of handicrafts and home industries, were discussed at several meetings and papers were read on the value of encouraging them, their value in philanthropic work, the modern development of these industries in the several Nations represented in the Congress and the habitant industries of Quebec.

Health and Physical Training.—In the section on Health and Physical Training the subjects discussed were Physical

Training, Public Health, Medical Inspection of Schools, Pure Milk and Infantile Mortality, the Health of the Child, Personal Hygiene, Pure Food and Water, the Teaching of Anatomy, Physiology and Hygiene Alcoholism and Tuberculosis.

At the Session on Public Health, the Hon. Sydney Fisher, Minister of Agriculture for Canada explained the manner in which the care of the public health was divided between the Federal and Provincial authorities, and showed the need of an educated public opinion to support measures taken for the prevention of disease.

Industries.—In the Industrial Section the following subjects were discussed training for Domestic Service, House-keeping a backward industry, Thrift among Women Workers, Labour Bureaux, Recent Labour Legislation in several countries, Working Girls' Clubs, Women in Commerce and industries, Inspection of Shops and Factories Employment for Married Women and Children, the Problem of the Unemployed, Industries for the Blind, Industries for Crippled Children.

In the discussion on labour legislation, instance was given, where the restriction of the hours of labour of Women had tended to drive them out of the occupations to which the restrictions applied. In Paris the Women had thus been driven out of the printing trade, and in Holland owing to the same cause women were being supplanted by men in the dress-making and millinery trades. In America however, where the labour market is not so over crowded, the restriction of the hours of labour of women does not appear to have the effect of taking away their employment. It was the opinion of many speakers that while women should be protected by law from the disabilities due to their sex, all restrictive measures should apply to men and women alike.

Laws that concern Women and Children.—In the section on laws that concern Women and Children, the paper and discussions dealt with Parliamentary and Municipal Enfranchisement of Women Treatment of Juvenile Offenders against

the law, legal rights Married Women, Marriage Laws and Divorce.

Literature in the section of Literature two sessins.—Were devoted to Public Libraries in which the following topics among others were treated; the training of librarians, the influence of literary culture of arts and crafts, and the development of the public library for the public will.

Accounts were given of public libraries in various countries. The public library movement in Canada was set forth by Mr. E. A. S. Hardy, Secretary of the Ontario Library Association, who traced the growth from the old mechanic institutes to the present system of public circulation, and reference libraries and travelling libraries.

Education.—In the Educational Section the principal matters taken up were the progress in education in the various countries since 1904. play grounds, the education of mentally defective children, secondary education, co-education, domestic science, rural schools and technical schools.

An interesting development in Scotland was referred to by Mrs. Ogilvie Gordon, where employment bureaus have been established under the school authorities for the purpose of placing boys and girls on leaving school in occupations suited to their individual tastes and capacities.

Great stress was laid on the importance of playgrounds in crowded cities for the proper development of children both physically and morally. It was stated that in Chicago \$11,000,000 are invested in playgrounds. The importance of manual training and technical education, in developing the construction faculties was emphasized, and education was shown to be concerned in the growth of

the child, the development of its personality and powers as a means to the highest possible social service.

Philanthropy.—Among the special subjects discussed in the section of Philanthropy were Relief Methods in Industrial Crises, Advantages and Disadvantages of Institutional Life, Provident Schemes and Pensions' and Travellers' Aid.

Professions and careers for women.—Besides some general discussions on Women in the professions the following careers for Women, more particularly treated. Social Service, Scientific Investigation, School Inspection, Journalism, Medicine, Dentistry, Agriculture, law, Secretarial Work, Banking and Librarianship.

Social Work and Moral Reform.—The section on Social Work and Moral Reform dealt with social settlements, Prison Reform, Juvenile Courts, Emigration and Immigration, Housing of the Poor, Associated Charities, Temperance, the mother in home life, and the need for an equal moral standard for men and women in the relations of the sexes. The grave extent of the Social evil and the white slave traffic was referred to and means for combatting these evils were discussed.

At a meeting of the International Council on June 19, the following officers were elected for the next quinquennial, President, the Countess of Aberdeen, First Vice-President, Mrs. Ogilvie Gordon, Second Vice-President, the Countess Responi Spalletti of Italy, Third Vice-President, Herr Heinrich of Austria, Corresponding-Secretary, Dr. Alice Saloman of Germany, Recording-Secretary, Dr. Skoglund of Sweden, Hon. Treasurer, Mrs. W. P. Sanford of Hamilton, Ont.

It was decided to hold the next quinquennial Congress in 1914 in Rome, Italy.

PROCEEDINGS OF THE ASSOCIATION OF FACTORY INSPECTORS—PRESIDENTIAL ADDRESS.

IN opening the separate sessions of the association of Factory Inspectors for the discussion of the various subjects of the official programme, the President, Mr. James J. Burke, Chief

Factory Inspector for Ontario, read his annual presidential address which contained a number of recommendations relating to sanitary and safety conditions for workmen. Among the sug-

gestions made were devices for better protection against smoke, dust, etc., proper provisions for fire escape, ventilations methods for the prevention of child labour; the enforcing of proper restrictions on the employment of women; protection from dangerous machinery, etc.

Following the address reports from the various departments concerning the work of the year were heard. The reports showed that a pronounced advance has been made throughout the United States and Canada in the direction of more complete legislative protection for the working class.

The Report of the Secretary-Treasurer, Mr. Thos. Keilty, showed cash on hand amounting to \$11.40 out of total receipts of \$485.30.

The following is a list of the more important formal papers that were presented:

The Health and Comfort of the Industrial Classes, by E. T. Davies, Chief Factory Inspector of Illinois.

Tenement House Manufacturers in New York, by Daniel O'Leary, Superintendent of Licences, New York.

Industrial accidents, by H. L. Schnur, Factory Inspector, N.Y.

On each of the above subjects a discussion in which most of the delegates took part was held. Especially valuable was a comparison of legislations for securing proper ventilation in factories which was incidentally afforded, the debate being led by the chief representatives from New York, and Illinois. In a less formal way a large variety of subjects were dealt with in connection with the presentation of the reports of the several departments.

Among the resolutions passed by the convention was one commending two of the recommendations contained in the president's address, 1. that it is expedient to provide in laws governing child labour, for the employment of an indigent child who is below the minimum age or upon whom younger children are dependent; and 2. that the question, whether women should be allowed to work more than ten hours a day or as an alternative be allowed to work only ten

hours at night, should be thoroughly discussed and a decision arrived at.

Officers were elected as follows:—

President: J. Ellery Hudson, Providence, R. I.

First Vice: W. W. Walling, Albany, N.Y.

Second Vice: John I. Holt, Trenton, New Jersey.

Third Vice: R. H. Gooley, Coaticooke, Quebec.

Fourth Vice: Miss Kate L. Kane, Rochester, N. Y.

Secretary Treasurer: E. J. Watson, South Carolina.

Hendersonville, N.C., was selected as the place of meeting for the annual convention of 1910.

A pleasant feature of the closing session was the presentation of a locket to Mr. Thos. Keilty the retiring secretary.

Joint Sessions.

On the opening day of the conventions, committees were appointed from both associations to confer with regard to the holding of joint sessions for the discussion of topics of interest to both organizations. On Thursday, June 17, accordingly, the associations met in joint session, and the following programme of subjects was presented for debate:

The general question submitted, viz.: the possibilities for co-operation and co-ordination of work between factory inspectors and labour statisticians, was set forth under three headings:

1. The Factory Inspector as a collector of Statistics.

2. The statistician as a director of the work of factory inspection.

3. The advantages or disadvantages of an amalgamation of the two associations.

After a full and free discussion of the various topics, the proposal to amalgamate was negatived.

Discussion of Child Labour Problem.

An interesting event in connection with the convention was an evening meeting at which Dr. A. J. McKelway of Atlanta, Ga., member of the National Child Labour Committee, gave an illustrated lecture on "Child Labor Conditions in the United

States." Dr. McKelway has made an exhaustive study of the subject and had a number of valuable suggestions to offer. The lecture was free to the public. There was also a discussion of the child labour question at Hotel Seneca. The programme of addresses includes a number of experts on the subject viz.: Mrs. Florence Kelley, member of the National and New York State Child Labour Committee; Owen Lovejoy, secretary of the National Child Labour Committee; George A. Hall, secretary of the New York State Child Labour Committee; Dr. J. A. McKelway of the National Child Labour Committee of the Southern States, and

John Williams, commissioner of labour for New York.

Entertainment.

A pleasant incident of the meetings was the entertainment of the delegates on the afternoon of June 17, by the Rochester Chamber of Commerce with an excursion to the various city parks and to Ontario Beach Park, at Charlotte N. Y., with dinner at the Ontario Beach Hotel.

It is understood that still more complete arrangements for the holding of joint sessions will be made in connection with the conventions of 1910.

PUBLIC HEALTH AND SOCIAL CONDITIONS IN THE UNITED KINGDOM.

IN a volume entitled public health and social conditions, a copy of which has been received in this department, the Local Government Board of the United Kingdom has endeavoured to illustrate in a convenient and readily intelligible form "various matters of importance in study of those conditions, such as the growth of population, mortality and public health administration, the changes in the occupations of the people, the recurring periods of industrial prosperity and depression, pauperism, and the action of the poor law, local taxation and local debt, and the development of education and of thrift." The population of the United Kingdom in the middle of the year 1908 was estimated at 44,539,593, as compared with 41,458,721, in 1901, and 27,368,736 in 1851. Hence, in the half century the population increased by 14,089,985 persons, or 51.5 per cent. This increase of population has not, however, been distributed equally over the several divisions of the Kingdom, for, while the population of England and Wales has nearly doubled in the 57 years, that of Scotland has only increased by 67 per cent. and that of Ireland has decreased by 33 per cent.

The population above the age of 10 years was at the census of 1901, 25,323,844 persons in England and Wales and 32,335,350 in the United Kingdom. In England and Wales occupied males num-

bered 10,156,976 and formed 84 per cent. of the male population over 10 years of age. Females returned as definitely engaged in occupations numbered 4,171,751, or not more than 32 per cent. of the female population over 10 years of age, but this figure does not include a large number of women (daughters and wives) who are occupied in e.g., farm work, without direct remuneration.

If the occupied population is analyzed into its component age groups at successive census dates it is found that the proportion of young persons engaged in occupations on the one hand, and that of persons over 65 years of age on the other, are decreasing. In the case of young children there has been a persistent decrease in the numbers employed during the past half century, which may be attributed largely to the operation of the Factory Acts, and of the Education Acts, which have limited the age of employment of young children and have raised the age of compulsory school attendance. The agricultural population as a whole appears to have declined in the half century from 1,544,087 males and 168,652 females to 1,153,185 males and 38,982 females, being a decrease in the half century of over 30 per cent. The aggregate number of agricultural labourers has decreased in the same period by as much as 64 per cent. Concurrently with the decline in agricultural labour

there has been a substantial rise in agricultural wages from 9s., 3½d., to 14s., 6d., a betterment of 56 per cent. The building trade, which, with the allied trades grouped under that general term, is numerically among the largest occupations, comprising in the census of 1901, 1,042,864 males or 8.6 per cent. of the male population of England and Wales above the age of 10 years, occupies a special place among trades. The building trade is the most widespread of occupations, contrasting in this respect with most other skilled trades, such as engineering, the cotton trade, the boot trade, and mining, which are very largely or entirely localized in certain centres. The trade is also in a special degree expansive, attracting in good times a large number of labourers belonging to the class of general or casual labour.

“Wages and their development in the course of the past half century may fittingly be noticed in connection with the subject of employment. In all trades for which records are available the rate of wages shows a very material rise during the past century. Agricultural wages have already been alluded to. From a comparison of Chart 3, which illustrates the advance in the rate of agricultural wages, with Chart 4, in which the course of general wages since 1850 is indicated, it will be apparent that, subject to periods of fluctuation, there has been a persistent tendency to increase in the remuneration of labour since 1850. The net result of the successive changes in the rate of general wages, as shown in the Chart, is an apparent increase of over 80 per cent. in the average rate between 1850 and 1907. But the comparison of single years cannot properly be pressed to support this inference. Comparison can only be drawn between

averages calculated over a course of years, and on this basis it is found that the average rate of wages in 1900-07 was to the average rate in 1860-1867 as 140 to 100; in other words, wages have risen in the 40 years by, approximately, 40 per cent.”

A chart is published in which a curve indicates the course of general prices, which are based on the average wholesale prices of a large number of the principal articles of common use, over the period 1850-1907. In the case of general prices, comparison of single years is even less reliable than in the case of wages, owing to the fluctuation, from various causes, of the price of particular articles, such as coal, which may unduly affect the general price in any given year. It is sufficiently clear, however, from this chart that prices show over the period as a whole an appreciable decrease, notwithstanding some increase in their level since 1895. Taking the average of prices in the two periods 1850-60 and 1897-1907, it would appear that the general level of prices was approximately, 24 per cent. lower in the latter than in the earlier period.

The two curves of prices and wages in juxtaposition afford a rough indication of the fact that while the bare rate of money wages has increased, the real increase is materially greater when the purchasing power of money, as measured by the average price is taken into account. The curve of general prices does not fully represent the changes in the cost of living, since it does not include the item of rent. Rents have probably, on an average, risen since 1850, but there are no reliable data for ascertaining the extent of the increase.

Statistical Memoranda and Charts prepared in the Local Government Board relating to Public Health and Social Conditions; Wyman & Sons, Limited. Pages 109. Price 5s.

CURRENT WAGES IN BUILDING TRADES AT REGINA.

IN the June issue of the *Labour Gazette* reference was made to a strike of Builders' labourers to the number of 150 employed by Peter Lyall & Son in the con-

struction of the new Legislative Buildings at Regina, Sask., which was terminated on May 26 on the pronouncement by the Provincial Government as to what con-

stituted the current rates of wages in this district. The investigation instituted by the government of this province for the purpose of determining the prevailing rates of wages in the various branches of the building trades throughout the province of Saskatchewan was brought to a close early in the month of June, the report being as follows: Joiners, 35c. per hour; car-

penters, 35c. per hour; carpenters' improvers, 30c. per hour; brick masons, 55c. per hour; handy men, 25c. per hour; builders' labourers, 22½c. per hour, labourers, 20c. These rates will accordingly take effect on the construction of the Legislative Buildings from May 26, the date when the strike of the builders' labourers was terminated.

TWO INTERESTING CONVENTIONS AT ROCHESTER, N. Y.—OFFICIALS OF BUREAUS OF LABOUR STATISTICS AND INTERNATIONAL ASSOCIATION OF FACTORY INSPECTORS HOLD ANNUAL MEETINGS.

TWO annual conventions of wide-spread interest to labour on this continent held during the month of June, were the twenty-fifth annual convention of the association of officials of bureaus of labour statistics of America, and the twenty-third annual convention of the International Association of Factory Inspectors. Both meetings were convened for the first time in their history at the same place and time, in the city of Rochester, N. Y., during the third week of the month. In view of the essential similarity at many points of the work of both, advantage was taken of the opportunity to hold a number of joint sessions for the discussion of topics of common interest. The meetings were of special interest to those engaged in the administration and enforcement of labour legislation, both associations having for their main object the interchange of views as to the best methods available and the lines along which improvements both in legislation and administration are possible. About 128 delegates attended the conventions, the majority being accredited to the Factory Inspectors' Association. The Department of Labour, Canada, was represented at both conventions.

Opening Proceedings.

Both conventions were opened in joint session on June 15, when addresses of welcome were delivered by the Mayor of Rochester, Mr. Hiram H. Edgerton, and the general secretary of the Rochester Chamber of Commerce, Mr. Roland B.

Woodward. The presiding officers of the two associations responded. The associations immediately thereafter proceeded to hold separate business sessions for the appointment of committees, reports of officers and standing committees, and miscellaneous business.

Proceedings of the Labour Commissioners.

At the separate sessions held by the representative of Bureaus of Labour Statistics, the first subject discussed at length was "The Cooperation and Co-ordination of State and Federal Bureaus in connection with the Census." A paper was read by Mr. Chas. P. Stewart, Director of the U. S. Census, advocating that in the years in which the decennial census of the United States is taken by the Federal Bureau, the State Bureaus engaged in the collection of industrial statistics of a similar kind should suspend operations or assist the federal authorities, the object being to prevent duplication of work, with consequent unnecessary trouble for those furnishing the information, and to secure uniformity in the presentation of results. The question was discussed in full detail, the representatives describing the situation in their respective states as it would be affected by the proposed arrangement. Though of a local and technical nature, the discussion was of very general interest, as throwing light upon the working relations possible between the state or provincial and federal authorities in confederations like the United States and the Dominion of

Canada. No final action was taken, the matter being referred to the executive for further report and the submission of a definite plan.

The rest of the proceedings of the convention was devoted to the presentation of reports from the various departments having delegates present. In this way a complete resumé of the work done by Labour Departments throughout the continent was given and an opportunity presented for a comparison of legislation and methods over a wide and varied field. In all, twenty-four departments presented reports, either written or oral, some fourteen having been printed in advance and distributed in pamphlet form at the convention. Among the topics discussed in this connection that of child labour received, perhaps, the largest degree of attention, special interest being shown in the reports of progress received from the Southern states. The settlement of labour disputes, and the presentation of statistics of different subjects were also dealt with. As a means of facilitating discussion of this character, it was decided that at future meetings of the association a number of

subjects would be taken up *seriatim* and treated exhaustively in order, the programme being varied from year to year so as to cover the entire field periodically.

The delegates reported a continuous increase in the interest taken by the public in the work of the bureaus. In many of the states of the American Union, they are meeting with a greater degree of assistance than at any previous time, and the task of obtaining and distributing reliable information concerning labour is becoming much more effective as a result.

Officers were elected as follows:—

President.—Chas. P. Neill, Washington, D.C.

First Vice-President.—Chas. F. Gettemy, Massachusetts.

Second Vice-President.—E. W. Vanduyn, Iowa.

Secretary Treasurer.—W. L. A. Johnson, Kansas.

Executive.—M. L. Shipman, North Carolina; E. J. Watson, South Carolina; C. J. Fox, Maryland.

Hendersonville, N.C., was selected as the place of meeting of the convention in 1910.

RECENT INDUSTRIAL AGREEMENTS.

Printers' Wages at Hamilton, Ont.

THE following scale of wages was agreed to by the Times and Herald Printing Companies of Hamilton, from January 10, 1909. By the award of an arbitration board delivered June 4, 1909, the same scale will be paid by the Spectator, also dating from January, 1909:

1. Compositors, admen, makeups, bankmen, headingmen, proofreaders on evening newspapers shall receive not less than:

January 1, 1909 . . . \$16.00

January 1, 1910 . . . 16.50

January 1, 1911 . . . 17.00

per week.

Overtime price and one-half.

2. Linotype operators on evening newspapers shall receive not less than \$16.00

per week for 194,000 ems of brier; 197,000 ems of minion and 217,000 ems of nonpareil. Overplus to be paid for at the rate of 9 cents per 1,000 ems of brier, 8 cents per 1,000 ems of minion and 7 cents per 1,000 ems of nonpareil. The measurement to be the same as at present.

3. All operators on two-letter machines, where two faces are used, Monotypes, Monolines, Rogers, etc., shall receive not less than \$18.00 per week. Overtime, price and one-half. No clock or register to be attached to machine. ☐

4. Tabular matter of three columns or more, double price; matter requiring six ems or over cut-off, single column, shall be paid for at price and one-half, initial cuts excepted. All ad. matter requiring type other than in the original font to be paid for at price and one-half. All objectionable copy to be sent back to foreman.

5. Machinists shall be paid not less than \$18.00 for ten machines, or under.

6. That the use of plate matter and the borrowing of matrice or interchange of matter, either in the form of advertisements or otherwise, be prohibited between newspapers in Hamilton. Provided, that when an office finds it absolutely necessary to use plate matter or borrow matter or matrice in a case of emergency, it shall pay for the same into the funds of the chapel the sum of 10 cents per 1,000 ems nonpareil per matter or matrice; or the matter be reproduced, by the newspaper using same, within 3 days, and that under no consideration shall any matrice or matter of any kind be given or loaned to a non-union office.

7. The ratio of apprentices shall be as follows:—In newsrooms, one apprentice to four journeymen or less regularly employed; two apprentices when the journeymen number from five to eight; three apprentices when the journeymen number from nine to twelve and so on.

8. Hours of work shall be between 7 a.m. and 6 p.m. for day work, and between 7 p.m. and 6 a.m. for night work.

9. Overtime shall apply to work done before and after the eight hours specified in preceding clause.

10. Newspaper employees required to work on Sundays or public holidays to get out a paper shall receive \$3.00 for five hours or fraction thereof, and 75 cents per hour thereafter. All other Sunday work 75 cents per hour. This is not to apply to regular morning news papers.

11. In newspaper offices journeymen put to work after the regular starting time and working five hours shall receive a full day's pay; if working less than five hours they shall receive overtime rates for the time worked.

12. Operators capable of setting 30,000 ems per day of eight hours shall be eligible to work in any office where this scale is signed.

13. No member of Hamilton Typographical Union No. 129 shall act as operator-machinist in an office where three or more machines are in operation.

14. Operators shall receive one cent extra per 1,000 ems for each point of type larger than brevier.

15. Where Linometers are in operation on machines there shall be no deduction for a day's or week's work for corrections or anything else.

16. The apprenticeship on machines shall consist of three months, to be paid at the rate of \$12.50 per week, after which time operators shall receive the regular journeyman rate.

17. Regularly employed apprentices shall be privileged to practice on machines during the last three months of their apprenticeship.

18. Foreman and proofreaders must be active members of Hamilton Typographical Union No. 129.

19. This scale of prices shall not prevent superior workmen from getting a higher rate of pay; but it shall be held that no workmen shall work for less than the prices herein specified.

20. This scale in effect from January 1, 1909 to May 1, 1912.

Wages of Longshoremen at Montreal, 1909.

The following is the text of the agreement entered into by various shipping companies of Montreal, Que., and longshoremen of that port for the season of 1909:—

The undersigned owners and agents of Steamship Lines trading to the Port of Montreal will pay wages to such longshoreman as may be employed by them in accordance with the schedule of wages printed below for all time worked during the season of 1909; that is, from the opening of navigation until the last steamer shall have left the port in that year, and in addition all such longshoremen as shall between the 26th day of April and the 31st day of May, 1909, sign a contract (which can be obtained from any of the undersigned for that purpose) undertaking to work for any of the undersigned throughout the season whenever required and who carry out that undertaking shall be entitled to a bonus of two and one-half cents (2½cts.) per hour for each hour so worked from the date of the signing of the contract which bonus shall

be paid on application in person after the last ocean steamer shall have left the port for the year.

SCHEDULE OF WAGES.

On general cargo vessels:—

General cargo, $27\frac{1}{2}$ c. per hour by day and $32\frac{1}{2}$ c. by night.

Grain, light or heavy, $27\frac{1}{2}$ c. per hour by day and $32\frac{1}{2}$ c. by night.

Coal shovellers' $32\frac{1}{2}$ c. per hour by day and night.

Coal, all other labourers, $27\frac{1}{2}$ c. per hour by day and $32\frac{1}{2}$ c. by night.

Lumber, $27\frac{1}{2}$ c. per hour by day and $32\frac{1}{2}$ c. by night.

Full coal cargoes:—

Shovellers, $37\frac{1}{2}$ c. per hour by day and $42\frac{1}{2}$ c. per hour by night.

Stagemen, $37\frac{1}{2}$ c. per hour by day and night.

All other labourers, $27\frac{1}{2}$ c. per hour by day and $32\frac{1}{2}$ c. per hour by night.

Full lumber cargoes—

Side runners, $37\frac{1}{2}$ c. per hour by day and night.

All other labourers, $27\frac{1}{2}$ c. per hour by day and $32\frac{1}{2}$ c. per hour by night.

Midnight suppers to be provided by the ship.

Sunday work, double time to be paid.

Quarter hours to be paid.
Any waiting time after 7 p.m., to be paid half rate, and only to count from time ordered out.

Rigging, unrigging and all changes to be paid at the rate of $27\frac{1}{2}$ c. per hour by day and $32\frac{1}{2}$ c. by night.

BONUS CONTRACT TO BE SIGNED BY
LONGSHOREMEN.

In consideration of the undertaking hereby entered into by each of the above Steamship Lines to pay at the end of the season of navigation a bonus to such of us as carry out the present contract, we the undersigned longshoremen hereby agree to work in the Port of Montreal for any of the above steamship lines whenever so requested throughout the season of navigation of 1909; that is until the last ocean steamer shall have left the Port of Montreal in that year at the rate of wages set forth in the schedule of wages printed on the back hereof the bonus so to be paid at the rate of two and one-half cents ($2\frac{1}{2}$ c.) per hour for each hour worked by us from the date of our signature hereto, and to be payable only after the last ocean steamer shall have left the Port of Montreal at the end of the season of 1909 and there will be no bonus due to any one of us who will not have carried out the present contract.

We have each set opposite our respective names our correct addresses at the time of the signing of this contract and we each undertake to at once notify the shipping line with whom we have signed this contract of any change in our respective addresses.

REGULATIONS CONCERNING LONGSHORE-
MEN'S BONUS.

1. Such Longshoremen as shall have signed the special bonus contract with one of the undersigned shipping lines between the 26th day of April, 1909, and the 31st day of May, 1909, and shall have carried out the same, shall be entitled to the bonus of $2\frac{1}{2}$ c. per hour for each hour worked.

2. The bonus shall begin for each longshoreman from the time of his signing the contract with any of the undersigned Shipping Lines, and shall be payable after the last ocean steamer shall have left the Port of Montreal, at the end of the season of 1909, upon application made by the said longshoreman in person.

3. Each of the undersigned shipping lines will keep a list of the names of the

longshoremen who sign the bonus contract with such lines and will issue to each longshoreman, at the time of his signing, a metal disc bearing his registration number, corresponding with the number of his name on the list and bearing the name of the line with which he has signed the contract, and the time keepers will credit such longshoreman with bonus upon exhibition of the said disc.

4. The shipping lines with which any longshoreman signs such bonus contract, will furnish such longshoreman with a certificate, that he did so sign upon application by him for such certificate at the end of the season, to enable such longshoreman to identify himself with any of the other shipping lines.

5. Superintendents to warn all foreman to tell strangers starting work to produce metal disc to timekeepers, thereby identifying and securing to the workman the bonus he is entitled to. The following is a specimen of the disc that the men will have who are registered, with the distinguishing marks of the respective companies.

Agreement between Builders' Exchange of County of Waterloo, Ont., and Bricklayers, Masons and Plasterers' Union No. 15, at Berlin, Galt, Preston, and Hespeler, Ont.

The following is the text of the agreement made between the Builders' Exchange of the County of Waterloo, Ontario and Bricklayers' Masons' and Plasterers' Union, No. 12, of Berlin, Ontario, and Bricklayers', Masons' and Plasterers' Union, No. 15, comprising the towns of Galt, Preston and Hespeler, Ontario of the B.M.I.U. of America.

ARTICLE 1, Section 1. This Agreement shall be in full force and effect from July 1st, 1909 to April 30th, 1912.

Section 2. Three months' notice shall be given in writing by either party to this Agreement as to any alteration before the expiration of same.

ARTICLE 2. The rate of wages during the term of this Agreement shall be Forty cents (40c.) per hour from July 1st, 1909 until April 30th, 1910, and Forty-three (43c.) cents per hour from May 1st, 1910 until April 30th, 1911, and Forty-five (45c.) cents per hour from May 1st 1911, to April 30th, 1912.

ARTICLE 3, Section 1. The Bricklayers', Masons' and Plasterers' Unions, No. 12 and 15 as a whole shall not order any strike against any member or members of the Builders' Exchange.

Section 2. Nor shall any number of the Union men leave the work of a member of said Exchange before the matter in dispute is broguht before the Joint Committe for settlement, provided the same is called within forty-eight (48) hours of such dispute.

Section 3. If any trouble shall arise with any other mechanics or labourers on a job or building, the Bricklayers, Masons, and Plasterers shall not be withdrawn from their work.

ARTICLE 4, Section 1. The Members of the Builders' Exchange hereby agree to employ on all contracts taken by them, only Union Bricklayers, Masons and Plasterers, and members of this Union shall work only for contractors who recognize the terms of this Agreement.

Section 2. The Members of the Builders' Exchange agree that not more than Two members of a mason contracting firm shall be allowed to work at the trade.

ARTICLE 5. The Bricklayers', Masons', and Plasterers', Unions No. 12 and 15 Hereby agree that on and after July 1st, 1909 none of its members shall be allowed to contract or sub-contract any work.

ARTICLE 6, Section 1. Nine (9) hours shall constitute a day's work from date of this Agreement until April 30th, 1911. From May 1st, 1911, eight hours shall constitute a day's work.

Section 2. Except in cases of necessity, no work shall be done before the hour of seven o'clock a.m., nor after the hour of five o'clock, p.m., from the date of this Agreement and until April 30,

1911, nor before the hour of eight o'clock a.m., nor after the hour of five o'clock p.m., from May 1st, 1911.

Section 3. All overtime shall be paid for at the rate of time and one-half, also on Dominion Day, Christmas and New Year's. No work to be done on Labor Day.

Section 4. All work done between the hours of five o'clock p.m., Saturday and seven o'clock Monday morning until April 30th, 1911, shall be paid for at the rate of double time. The same rate shall be paid for the same hours worked from May 1st, 1911, until April 30th, 1912, except from said date of May 1st, 1911, it shall be eight o'clock Monday morning.

ARTICLE 7. That the shop steward or business agent be allowed upon the works at all times to examine the working

cards. He shall not be discharged for examining his fellow-workmen's cards.

ARTICLE 8. That the members of the Bricklayers, Masons, and Plasterers' Unions, No. 12 and 15, shall be paid their wages on or before 5 p.m., on the regular pay day, and not more than one day to be held back.

Section 2. If any member of the Bricklayers, Masons, and Plasterers' Unions, No. 12 and 15 shall be discharged, he must be paid at once, or waiting time will be charged from the time of his discharge.

ARTICLE 9. It is hereby understood and agreed that any and all parties to this Agreement shall report to their respective bodies any known violation of any provision or provisions of this Agreement.

CO-OPERATIVE OR PEOPLE'S BANKS.—A PAPER READ BEFORE THE TWENTIETH CENTURY CLUB OF BOSTON, BY M. ALPHONSE DESJARDINS, PRESIDENT AND MANAGER OF THE LEVIS PEOPLE'S BANK, CANADA.*

A co-operative or people's savings and credit bank is an association of individuals established on a somewhat new principle, that of a variable capital and membership. It is not, therefore, a mere aggregation of funds. The persons feeling the same wants unite together to help themselves upon an accepted and comprehensive basis; well understood and rigidly adhered to. For, without these primary conditions success could not be achieved nor even expected. Capital here is only a mere tool, the stock in trade, almost a slave; it is not the dominating power, as in ordinary financial combinations which have one object in view, that of enhancing their productive value at the expense of non-organized economic forces. As this union of capital must have rules to make it reach its aim, so with the association of individuals. The first one, the most necessary of all, is the selection of those who may be allowed to join the society. And this selection is made upon a basis that can be achieved by any one, since it is character, honesty, industry and thriftiness

that are the essential qualities required. This shows that here lies a principle which will commend itself strongly to an audience like this recruited among a people that have given to the world such examples of the grand possibilities of such a principle.

Objects of Co-operative Banks.

The two main objects of such an association are the encouragement and development of the true spirit of thrift on the one hand, and the granting of credit on the other to the very humblest classes of the community, based upon universal suffrage.

In order to insure the best possible selection of members, the field of activity of the society must be closely restricted, either in territory or within the radius of a local trade. In a

* Since the date at which this paper was read by Mr. Desjardins, legislation has been enacted by the Commonwealth of Massachusetts providing means for the establishment of Co-operative Banks.

limited field, the individuals can be better known and their qualities better appraised.

As it is an association of persons, not of capital, there is only one vote for each person. Instead of having the principle of the voting power based on the number of shares, it rests exclusively upon the principle of one man, one vote, just as in a political democracy. Moreover, as the members are recruited within a small area, access being therefore easy to the place where the general meetings are held, voting by proxy is rigidly excluded, on account of the numberless inconveniences and abuses to which it so often leads.

One individual must not by any means or device contrary to the spirit of the organization, be in a position to exercise a damaging influence, and in order to safeguard it from such a personal power, none can hold in shares or in deposits an amount greater than he one determined upon by the general meeting. It has been thought, and experience has proved it to be correct, that a member, if allowed to hold any number of shares, although his voting power should be restricted to one vote at a special moment or under critical circumstances, deeply influence the working of the society by threatening to withdraw his capital. This condition should never be allowed to exist, hence the necessity of fixing from time to time the maximum amount that can be held in shares or even deposits, as well as the obligation of keeping a large fund of idle money to meet such threats. These precautions are necessary, for black sheep may always make their way into a society, however stringent may be the rules to prevent their entrance.

Capital.

This brings us to the question of capital. It has been said at the outset that this sort of society is of a special nature called in the French law, "*à capital et personnel variables*," that is to say, the capital of which may be increased or diminished by the subscription and payment of new shares, or the withdrawal

of paid up shares. The membership of this kind of society may also be increased or diminished by the admission of new members and the withdrawal of old ones. This feature is a necessity on account of the special conditions under which these associations have to work. They appeal almost exclusively to the laboring classes, to those people who more than any other cannot afford to lock up their savings, however small they may be, in non-withdrawal shares. The same rule that applies to the funds deposited in the savings banks must also be applied here. The co-operative people's bank must therefore offer in this respect the same facility as the ordinary savings banks, in order to attract the necessary funds. Moreover, the membership must be variable. Being an association of persons, you cannot expect that the individual will not keep his freedom to move away or give up his membership.

The funds are provided by the issuing of shares unlimited in their number. Their value is determined by the general meeting and must be of a small amount in order that the poorest may have access to the membership. In Belgium, this amount is frequently as low as 2 francs—40 cents—and even one franc. In Canada, we have adopted the five dollars shares, with the exception of one society out of twenty-two in existence, that has chosen a one dollar share. It is far better that the law should not prescribe the amount in order to give more scope to the societies in fixing the value of the shares, for the circumstances of the various localities and environments may and do often differ so widely as to justify a great variety of amounts so chosen. In Italy, France, Germany and Belgium as well as in England, the law is very liberal in this respect and gives the greatest possible freedom in not stating any amount for these shares.

How are those shares payable? By weekly, semi-monthly or monthly instalments, as the shareholders, as a body, may decide to be the most convenient to themselves. In Canada, our five dollars shares are payable by the trifling instalments of ten cents a week per share sub-

scribed. Fifty weeks or almost a year is therefore granted for the payment of a share. These payments are a splendid training in thrift, and pave the way to a higher conception of economic affairs.

The number of shares that any member can hold is annually fixed by the general meeting of the society, with a view to prevent misgivings and operate as a safeguard in certain critical circumstances. Besides, members are also at liberty to deposit other small savings bearing a fixed rate of interest, equal generally to the current rate in the locality for such deposits. These deposits as well as the funds accumulated by the payment of the shares are used for loans to members, taking always good care to keep a reserve on hand of from twelve to twenty per cent. of the general assets. This reserve is, of course, deposited in ordinary banks, benefiting thereby the larger institutions, for it must be admitted that most of these funds would not have otherwise found their way to the banks. The percentage varies and experience shows what amount should be constantly available in order to meet readily all demands of withdrawals or loans. In my practical experience of eight years with the working of such a society in Levis, I have always found that from ten to twelve per cent.—even seven to nine—was quite sufficient to meet all the possible requirements of the members.

Loans and Interest.

These societies do not deal with outsiders, that is to say, they do not take deposits from or grant loans to the general public. They deal exclusively with their own members, and no one can participate in their benefits, unless he be admitted as a member. This condition adds a new safeguard in the granting of loans, admission being allowed only after the applicant has showed that he possesses to a reasonable extent the required qualifications.

With regard to the loaning aspect, there is a striking feature to which your attention should be specially drawn, and that is that the small loans have always the preference. It is held that

the larger borrower is supposed to have a better chance to secure elsewhere what he wishes than the smaller one. Thus comes in the golden rule of benefitting the many without injury to the few. Moreover, being divided in very small amounts, the loans stand a far better opportunity of being faithfully reimbursed than would larger ones, a greater number of people being pledged to the repayment of the total sum loaned. In order to facilitate the reimbursement, the instalment plan is always preferred by these societies. It is a great advantage for the borrower and a better security for the society, as every instalment enhances the value of the loan.

The amount that can be loaned at once to one member is always passed upon at the annual general meeting, having regard to the funds available and the necessity of providing useful employment for all the monies at the disposal of the society.

The rate of interest is fixed in certain such associations by the general meeting, but as a matter of fact experience has shown that this practice is not the best one that can be adopted. The number of borrowers are most of the time a minority in such societies and, therefore the majority being those under the impression that they will not appeal for any loan, would seek to insure the highest possible return for their savings at the expense of the minority, by deciding a rather high rate of interest on such loans. The best way is to leave the matter in the hands of the Commission of credit, the members of which have no personal interest to serve, being deprived of the right to borrow, and who will only endeavor to strike a fair and reasonable rate.

Liability.

With reference to the much discussed question of liability, I have in Canada gone much further than the various types of European co-operative Banks, I have adopted a new one combining limited liability with constantly withdrawable shares, such a liability being therefore of a very mild character, for it lasts only so long as the withdrawal has not actually taken place. But in connection with

this new type of liability, the Canadian co-operative banks are not allowed to deal with the public generally, as I have already stated. Therefore this form of liability, taken in connection with the other safeguarding provisions to be mentioned, is quite sufficient for its purpose. In making the shares always withdrawable, I have followed the régime of the American uncapitalized Savings Banks, particularly of New England, as regards the constant availability of the funds deposited with them, which availability is a necessity for the class of people most likely to adopt such institutions.

On this question of liability: The two main types of people's banks prevalent in Europe are those of Schulze-Delitzsch and Raiffeisen in Germany, and of Luzzatti in Italy, the two former being based upon the principle of unlimited responsibility on the part of the members. Schulze having coupled it with rather large shares payable in instalments which he called "forced savings"—and Raiffeisen, refusing to admit any shares at all, but using the security of this strong responsibility in order to appeal to the savings of the public as a source providing the funds required. Luzzatti, on the other hand, contended that the unlimited responsibility was neither acceptable to his countrymen nor necessary for the success of these institutions, and started the Italian Banche Popolare upon the principle of share capital and limited liability. That was considered at first as a dangerous departure from the German system of unlimited responsibility, but the phenomenal success of the Italian co-operative Banks proved that Luzzatti was right in his view.

Reserve Fund.

Benefitting from this experience, and that acquired through the working of the Savings Banks, I took as a basis the withdrawable shares and limited responsibility. But in order to strengthen what weakness there might be in such a system, I adopted as a rigid preliminary condition the creation of a strong reserve or rest fund, made up by entrance fees and a high percentage of

the annual net profits, which fund must continue to accumulate until it reaches, say, double the total amount figuring at any time as paid-up capital, even if later on this amount be reduced by subsequent withdrawals. This rest fund is the indivisible capital replacing the non-withdrawable shares, becoming therefore the real strength of the society, serving also as a bulwark for the protection of the shares in case of losses. Twenty per cent. is put aside out of the annual net profits for that purpose. Compare that twenty per cent. with the minimum of one-eighth or the maximum of one-fourth of one per cent. set aside by the Savings Banks from the net profits to accumulate as a guarantee fund until such fund reaches five per cent. of the deposits, as prescribed under the law of the State of Massachusetts. The law of the State of Maine provides that this fund must amount to ten per cent. of the deposits, and the law of the State of New York fixes the maximum of such guaranty or surplus fund at 15 per cent. of the deposits held. Again, compare the five, ten and fifteen per cent. as a guarantee fund provided by the law of these various States with the double of our paid-up share capital required, and any one will admit that our safeguard is much stronger. Moreover, our by-laws forbid any boni or dividend of more than 7 per cent. until this fund has reached the aforesaid maximum, the balance going into this fund besides the 20 per cent. above mentioned. Thus, bit by bit, through perseverance and with stringent safeguards against hasty dissolution, the laboring classes can create a treasury that will be their own and will help them, generation after generation, in their borrowing needs.

The European Co-operative Banks receive deposits from the outside public. We do not, because our shares are withdrawable, preferring this latter advantage to the former, the members only being admitted to make such deposits.

Administration.

In such banks the supreme ruling power is vested in the general assembly of the associates, and the various ad-

ministrative organs selected by the general meeting are always under its strict dependance and supervision.

Three boards, usually called Board of Administration, Commission of Credit, and Commission of Supervision, are chosen. The members of each of these boards are distinct, that is, one member cannot be on two boards.

The President of the Society, however, is ex-officio a member of the Commission on credit, in order to be in a position of acquainting the Board of administration of all that is done in this important body entrusted with most delicate functions, the spirit and reasons upon which its decisions are taken, the à propos of measures having for their object the increasing of the funds of the society. The president being or supposed to be the best man on this general board, and this board being selected out of the best men in the society, his moral authority is large, and so is his responsibility. It is, therefore, but fair that his guiding influence should be strengthened by corresponding opportunities of supervision and advising. But, as just stated, he is the only exception to the rule that one person cannot be member of more than one board or commission. This is so in order to avoid dividing the responsibility, and thereby to make it certain that no excuse can be alleged. Without going into any details, the same being unnecessary for the present purpose, let us come to the various duties to be discharged by these boards.

The board of administration has general powers of supervision and control of the affairs of the society. It controls the admission and expulsion of members, sees to the transfer of shares, if any, makes all the recommendations to the general meeting in connection with the dividing of the profits of the year, apart from the disposal already provided for in the Rules, approves or suggests any desirable amendments to the By-laws; submits any increase in the number of shares that can be held by or the amount loanable to one member, appoints the manager and other officials required and exercises all the necessary

administrative powers not specially given to the two other boards.

The Commission on credit deals only with the loans submitted to it through the manager. It makes by-laws determining the conditions upon which the loans are to be made, the security exacted, the rate of interest to be charged, the proper repayments of such loans. No loan can be made unless the members present are unanimous. In case of refusal for want of unanimity, the would-be borrower can appeal to the Board of administration, and the decision of this body is final. The members of the Commission on credit cannot borrow either directly or indirectly.

As the granting of the loans must be considered as the most important duty devolved upon the Commission on credit, and therefore deserving the closest attention, I must state that the borrower is always required to state distinctly the object for which he asks the loan, how he intends to repay it. If the object is an improvident one in the opinion of the Commission, it cannot be granted for any consideration, be the security of the very highest character. No body is allowed to borrow if it is not to affect an economy or for a productive purpose. This golden rule has been carried out everywhere and has worked wonders as a matter of safety. The character, the habits of the borrower, as well as of his family, have to be inquired into in order to convince one of his ability and willingness to reimburse the loan sought for. The moral security is paramount and refusal must follow if this security is not forthcoming, however reliable may be the other guarantee offered, because the contrary will always bring trouble and discredit upon the society. Thus, honesty, industrious habits, good conduct and thrift, becoming a reliable and valuable asset for the poor man.

Once granted, the loan must be repaid regularly and faithfully; the conditions, in most cases, are those offered by the borrower himself, if considered reasonable and fair, but once accepted he must be held strictly to them, unless there is a case of force majeure, like sick-

ness or unemployment. Punctuality is a virtue that must be taught. Its practice will confer so great advantages that the borrower himself will soon appreciate them.

I need not mention the question of interest, as I have already dealt with it. But I may add that the custom in our society is to make it payable every 3 months, deducting from the capital loaned all the instalments paid in, computing the interest charged upon the balance only, and so on until the whole is reimbursed.

The Board of administration and the Commission on credit are renewable half every year, and are composed of, say, nine and four members respectively.

The Board of Supervision is elected for one year and is composed of, say, three members. Its powers are of the widest character, including the ordinary duties of auditors. In fact I could not better describe its functions than by stating that it is the General Meeting sitting en permanence alongside the officers chosen to administer the affairs of the Society. This board can, and in some stated cases, must call at any time a general meeting and submit to it its appreciation of the acts of either the Board of administration or the Commission on credit, leaving the whole matter in the hands of the society itself as represented by the meeting.

Advantages.

Officers or members of these boards give their services gratuitously. The manager and officials, if any, alone can be paid. These boards meet as often as the affairs of the society require. Were I to mention here all the advantages of such co-operative banks, I would perhaps weary this audience, for they are numerous and far-reaching. Let me, however, enumerate some of them:

1. Their absolute proximity to the saver and borrower.

2. Their ability to excite local confidence, and, consequently, to draw in local capital. This has been admitted to me by a banker, who confessed that no bank could secure to the same degree the

confidence of small folk, the hoarders of every description.

3. Their exact knowledge of their clients and their influence over them, either as members of the same labour union or as co-resident of the same town or city ward.

4. Their power of making the smallest loans and of undertaking operations, however petty, in consonance with local custom and individual needs, in giving preference to the humblest demands.

5. Their ability to help along a general or particular liquidation of debts.

6. Their ability to work cheaply, almost gratuitously, and thus provide cheap credit.

7. Their retention of local capital and of all profits thereon for the members and borrowers.

8. Their ability to act as agents for their members in certain circumstances and for objects outside their field of activity.

9. Their power of influencing borrowers towards the true use of credit, and of watching the utilization of loans in accordance with contract.

10. Their tendency to group themselves into unions for mutual development, instruction, inspection and audit.

11. Their steady educative influence in matter of thrift, association and self-help, by their continuous presence and continuous object lessons, and by their frequent, though small, calls upon the activity, thought and service of their members.

12. Their tendency to develop high forms of individual capacity, of public life and of national character, and finally and most desirably, their strong tendency towards calling forth habits of thrift, economy and prudence, guiding their outlay into productive channels, giving them credit for productive and useful purposes, promoting union and associated action among very often too isolated units.

13. Being administered by people of the local population's own choice, they soon and rightly conquer the confidence of every one.

14. Unlike the ordinary or official savings banks, they have not a mere

slot in their wall through which to receive money, but a month wherewith to give advice and a heart wherewith to feel. In their keeping depositors or members may, so to speak, see their money, see it safely held, see it laid out profitably in the locality, benefitting the district and producing more money, whereas, elsewhere it disappears, to go no man rightly knows where, up in the large monetary market, while the poor is the victim of the shark.

15. They are the best means to put an end to usury, this frightful cancer that is causing so great evils among the laboring classes.

Unfortunately usury is rife in your midst as elsewhere, and the recent pamphlet published by the Charities Publication Committee of New York, under the direction of the Russell Sage Foundation of this city, being a carefully prepared report by Mr. Clarence W. Wassam, is an uncontrovertible witness to the existence here of this terrible plague. The cases quoted in this pamphlet recalls to my mind the most ugly ones I have noted in Canada, and it was with the deepest pleasure that I have read the very valuable article written by so eminent an authority as the Bank Commissioner of your State, the Hon. Pierre Jay, published in "Collier's" of January last. May I be allowed to add here that no law no matter how stringent it may be and how rigidly enforced, can stamp out usury. Centuries of experience has demonstrated this truth. The most dreadful penalties have been imposed in ages gone by, but with no avail, until this all powerful remedy has been found and applied in Europe as shown by Mr. Jay.

To sum up, the association that I have endeavoured to describe, lends to its members and borrows from them by receiving their savings either as shares or deposits, for thrift must precede credit. This is a fundamental principle which it would be dangerous to depart from, even if it could be done. Nothing can be more simple, the more so still when one considers the conditions under which this is to be done. No wonder that those simple organizations

should have spread almost all over the civilized world, but specially in Europe, where they originated, among all classes, industrial as well as agricultural. Their number to-day must reach 40,000, with many millions of members and a general annual turn-over of at least twenty billions of francs, or 4 billions of dollars. In this huge movement of funds, what strikes most forcibly is the comparatively small amount contributed by each society, showing that each one is moving in a very small area, but doing, nevertheless, in its restricted sphere very beneficial work.

Considering these results, one cannot wonder why eminent economists of leading countries have taken a deep interest in such a movement that has sprung from the very bosom, so to speak, of the masses of the working classes. Everywhere inquiries were made, encouragement of all sorts were given, laws were passed, and that sollicitude, acting as the rays of the sun upon an abundant crop, brought every effort to a richer and more beneficial maturity. Books have been and are published in every language, and each year sees the enormous progress and expansion of these really people's banks, even in countries like East India.

Authorities.

Let me state here that one of the best books I have read is that of Mr. Edward F. Peters, of the Office of the Statistician of the Department of Agriculture at Washington. This most valuable book is the result of an extensive and official inquiry instituted by your national Government as far back as 1892. Mr. Peters does not hesitate to recommend the introduction of these co-operative banks into the United States for the special benefit of the working classes and generally of all those who cannot have access for credit to the existing financial institutions. I am particularly happy to have such an authority to rely upon when I venture to say, as I am going to do, that here as well as in other countries these societies would do an immense amount of good without injury to any one, save the shark.

Practibility of Co-operative Banks.

A question now arises no doubt in your mind: Can such banks be established on this continent? One would object perhaps that there is no need of them, that the ordinary banks are catering to all legitimate wants. This brings us face to face with the usury problem. How can one explain, if this objection is sound, the huge amount loaned by usurers all over the country. To prove this, I have only to take the report for 1907 of the Provident Loan Society of New York, organized specially to provide for the wants of small borrowers, and we find that out of 283,045 loans granted in that year, no less than 236,530 were for amounts varying from less than one dollar up to \$50. And that society does business in Greater New York alone, with only six loaning offices. Surely, the population of New York is not the only one who should feel the necessity of borrowing such small sums as one dollar. But in order to better realize the significance of this figure of 236,530 loans, let us detail the elements of which it is formed. We find that loans of \$1 and under amount to 4,043; those of \$5 to one dollar, 39,517; of \$10 to \$5, 52,237; of \$25 to \$10, 96,283; of \$50 to \$25, 44,450. Nothing could better convince one of the existence of such wants and the necessity of providing for them in a systematic and educative way. By letters received lately from various parts of your great Republic, I am safe in saying that the same state of things exists almost everywhere.

But another objection raised is that the labouring classes would be unable to work out such a scheme. Why should our American labourers, artisans, mechanics, be less intelligent, less able than those of the various countries of Europe—or are they less honest? Surely not. One would also object to the shifting character of your population. I admit that therein lies a certain difficulty, but can it not be overcome? I decidedly believe it can be.

I have had to face the very same objections when I proposed to start such a society in Levis, Canada, and

after eight years of practical working. We started with not a cent in the chest, and now our general assets were on the 14th of February, \$85,892.94. We had loaned altogether \$377,686.27, and up to this date covering more than eight years of existence, we are proud to say that we have not lost one cent, although the number of our loans has reached 2,450. Our total membership is over 1,000 in a population of 7,000, about mostly of the labouring class.

This example is now bearing its fruits, for since 12 to 15 months I have had the pleasure to organize 22 other similar co-operative banks in Quebec alone. If the movement has not started to expand earlier, it is because I have always refused to give my aid elsewhere until the Levis experiment had been completed to my entire satisfaction.

It may be said that in a panic these banks would be upset by runs. Is it likely? Experience has shown the contrary. When are the shareholders of a bank upsetting their own institutions? No, it is the mere depositor, not the shareholder, that loses his head first; and do not forget that in these co-operative banks there is no depositor who is not also a member.

But experience, I said, has proved that this fear need not be entertained. In 1893, Italy was in the turmoil of the greatest financial panic ever seen there. The largest banks were falling down like corn under the mower, and people were so panic-stricken that in many cities, thousands upon thousands of depositors spent whole nights waiting at the doors of the banks to draw their money. And while this was going on, another stampede was taking place at the *Banche Popolare* or people's banks of the type here described, but there the storm was of a very different character, for the managers of these co-operative institutions—frightened by so enormous and rapid accumulation of funds for which they had no employment—were fighting with the very same people desirous of depositing their money just withdrawn from the banks, not caring to receive one cent of interest, but for the mere advantage of putting such

funds in safety. It was with a very legitimate pride that Luzzatti, the father of the Italian People's Banks, who twice has been Minister of Finance of Italy, could proclaim, later on, that not one of his banks failed or even suffered a run, proving thereby that they enjoyed the entire confidence of the public to an extent never dreamed of even by that most distinguished co-operator.

Functions of Co-operative Banks.

Your financial organization is a most elaborate one. The state, national and savings banks, and lately the trust companies, all so prosperous, are the outgrowth of your greatest minds and of experience. Your buildings and other loan societies are doing well. I am happy to say so. All these large monetary organizations, though beneficial to the public, are nevertheless based upon a principle which is scarcely acted upon in the management of all your other public affairs. If I mistake not, the managers of these public affairs, whether political or municipal, are not self-chosen, nor selected by and out of a few privileged individuals, but by universal suffrage or something very close to it. If, on the other hand, you turn your attention to the economic affairs, is it not quite a different principle that prevails, whereby the masses of the people so powerful in the higher sphere of national life, are kept almost aside without an opportunity of acquiring by practical experience a knowledge that would redound to the immense advantage of all without injury to any? And this result is brought about by rules that give to the few because they have the capital, the means of dominating and, perhaps, tyrannizing over the many, be-

ing more or less isolated units, although these units provide by their labour and savings a large, if not the largest, part of the national wealth. That such a contradiction exists between the regime governing these two spheres of action, no one can deny.

Would it not be wise, prudent and wholesome to the body politic to introduce a reform not by disturbing in any way the existing institutions, but by the organization of new ones catering first to wants not provided for now in a systematic manner and based upon the principle prevailing in a democracy like yours? I am not, I can assure you, a revolutionist, but merely a timid evolutionist, wishing gradual and possible reforms.

Nobody would, I am sure, entertain anything in the way of disturbing uselessly your magnificent financial fabric, but may I be permitted to add that it seems to me that, from the standpoint of a very large proportion of your people, there is a missing link, and that this is clearly evident to me by the usury prevalent in spite of the good laws passed by your legislative bodies.

That missing link is the co-operative bank, and anything done to inaugurate such a system in your great country would confer inestimable good to your labouring and even agricultural communities. It would educate them, teach them how capital is formed gradually by mere cents, how it must be managed, safeguarded, multiplied by useful and provident utilization. It would also prove to them that there is something besides the unchristian economic doctrine of "the struggle for life." Let us have "union for life," union for the bettering of all with injury to none.

RESUCITATION FROM APPARENT DEATH FROM ELECTRIC SHOCK.

IN the *Labour Gazette* for June, 1909,* a reference was made to a circular issued by the Board of Railway Commissioners for the purpose of bringing to the attention of electric railway com-

panies in Canada the necessity for instructing their employees in the latest methods of resuscitation from the effects of electric shock. The circular was accompanied by a report of the Board's Electrical Engineer, which contained a reference to an illustrated sheet pub-

* See Page 1,345.

lished by the Department of Railways and Canals giving a series of rules to be followed for the restoration of the victims of accidental shocks by electricity. The written text of this sheet, of which the author is Austin H. Goellet, Esq., M.D., and which was originally published as a supplement to the *Electrical World and Engineer* on September 6, 1902, is as follows:—

“The urgent necessity for prompt and persistent efforts at resuscitation of victims of accidental shocks by electricity is very well emphasized by the successful results in the instances recorded. In order that the task may not be undertaken in a half-hearted manner, it must be appreciated that accidental shocks seldom result in absolute death unless the victim is left unaided too long, or efforts at resuscitation are stopped too early.

“In the majority of instances the shock is only sufficient to suspend animation temporarily, owing to the momentary and imperfect contact of the conductors, and also on account of the resistance of the body submitted to the influence of the current. It must be appreciated also that the body under the conditions of accidental shocks seldom receives the full force of the current in the circuit, but only a shunt current, which may represent a very insignificant part of the whole.

“When an accident occurs, the following rules should be promptly executed with care and deliberation:

“1. Remove the body at once from the circuit by breaking contact with the conductors. This may be accomplished by using a dry stick of wood, which is a non-conductor, to roll the body over to one side, or to brush aside a wire, if that is conveying the current. When a stick is not at hand, any dry piece of clothing may be utilized to protect the hand in seizing the body of the victim, unless rubber gloves are convenient. If the body is in contact with the earth, the coat-tails of the victim, or any loose or detached piece of clothing, may be seized with impunity to draw it away from the conductor. When this has been accomplished observe Rule 2. The ob-

ject to be attained is to make the subject breathe, and if this can be accomplished and continued he can be saved.

“2. Turn the body upon the back, loosen the collar and clothing about the neck, roll up a coat and place it under the shoulders, so as to throw the head back, and then make efforts to establish respiration (in other words, make him breathe), just as would be done in case of drowning. To accomplish this, kneel at the subject's head, and seizing both arms draw them forcibly to their full length over the head, so as to bring them almost together above it, and hold them there for two or three seconds only. (This is to expand the chest and favour the entrance of air into the lungs). Then carry the arms down to the sides and front of the chest, firmly compressing the chest walls, and expel the air from the lungs. Repeat this manoeuvre at least sixteen times per minute. These efforts should be continued unremittingly for at least an hour, or until natural respiration is established.

“3. At the same time that this is being done, someone should grasp the tongue of the subject with a handkerchief or piece of cloth to prevent it slipping, and draw it forcibly out when the arms are extended above the head, and allow it to recede when the chest is compressed. This manoeuvre should likewise be repeated at least sixteen times per minute. This serves the double purpose of freeing the throat so as to permit air to enter the lungs, and also, by exciting a reflex irritation from forcible contact of the under part of the tongue against the lower teeth, frequently stimulates an involuntary effort at respiration. To secure the tongue if the teeth are clenched, force the jaws apart with a stick, a piece of wood, or the handle of a pocket knife.

“4. The dashing of cold water into the face will sometimes produce a gasp and start breathing, which should then be continued as directed above. If this is not successful the spine may be rubbed vigorously with a piece of ice. Alternate applications of heat and cold over the region of the heart will accomplish the same object in some instances.

It is both useless and unwise to attempt to administer stimulants to the victim in the usual manner by pouring it down his throat.

"While the above directions are being carried out, a physician should be summoned, who, upon his arrival, can best put into practice Rules 5, 6 and 7, in addition to the foregoing, should it be necessary.

For the Physician Summoned.

"5. Forcible stretching of the sphincter muscle controlling the lower-bowel excites powerful reflex irritation and stimulates a gasp (inspiration), frequently when other measures have failed. For this purpose, the subject should be turned on the side, the middle and index fingers inserted into the rectum, and the muscle suddenly and forcibly drawn backwards toward the spine. Or, if

it is desirable to continue efforts at artificial respiration at the same time, the knees should be drawn up and the thumb inserted for the same purpose, the subject retaining the position on the back.

"6. Rhythmical traction of the tongue is sometimes effectual in establishing respiration when other measures have failed. The tongue is seized and drawn out quickly and forcibly to the limit, then it is permitted to recede. This is to be repeated 16 times per minute.

"7. Oxygen gas, which may be readily obtained at a drug store in cities or large towns, is a powerful stimulant to the heart if it can be made to enter the lungs. A cone may be improvised from a piece of stiff paper and attached to the tube leading from the tank, and placed over the mouth and nose while the gas is turned on during the efforts at artificial respiration."

THE CO-OPERATIVE CONGRESS OF GREAT BRITAIN, 1909.

THE Forty-first annual co-operative congress of Great Britain was held at Newcastle-on Tyne during June, when about 1,700 delegates were present from co-operative societies in the United Kingdom, together with deputations from co-operative organizations in Austria, Denmark, Finland, France, Germany, Norway, Sweden, Switzerland, and the United States.

The congress was convened by the co-operative union, the report of which stated that 1,251 societies were now members, comprising an aggregate membership of 2,376,126, or 94.4 per cent. of the total membership of societies eligible for membership of the Union.

Statistics relating to 1,548 co-operative societies were submitted to the Congress, and showed that in 1908 the aggregate

membership was 2,516,194, the share capital £33,244,980, the trade for the year £107,550,654, and the profit £11,728,647. Among the resolutions discussed and adopted by the congress were those in favour of the removal of the restrictions upon the importation of live Canadian cattle; of a minimum wage for co-operative adult male employees of 24s. per week and of 17s. per week for adult female labour, with a sliding scale according to age for young people under 21 years of age; of the adoption of means for preventing overlapping of societies in certain districts; of the promotion by co-operative societies of garden suburbs and villages in connection with their factories and workshops; and endorsing the international alliance of co-operative societies.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

Homestead Entries During May.

The following statement shows the number of homestead entries made during the month of May, 1909, as compared with May, 1908.

Winnipeg.....	91	43	48	14
Yorkton.....	128	142	
Total.....	3,243	2,773	840	370

It will be seen that there has been a net increase for May, 1909, amounting to 470 in the number of entries made.

A statement of the entries made during the first five months of the calendar year, compared with the corresponding months of 1908 is as follows:—

STATEMENT OF HOMESTEAD ENTRIES JANUARY-MAY, 1908-09.

Month.	1909	1908	Increase.	Decrease
January.....	1,308	1,453	145
February.....	1,364	1,420	56
March.....	2,592	1,849	723	
April.....	4,602	2,987	1,615	
May.....	3,243	2,773	470	
June.....				
July.....				
August.....				
September.....				
October.....				
November.....				
December.....				
Total.....	13,109	10,502	2,808	201

Next increase for five months, 2,607.

Nationalities of Homesteaders.

The nationalities of the homesteaders, during the month of May, 1909, as re-

ported by the several agencies of the department in Manitoba, Saskatchewan, Alberta and British Columbia were as follows:—

Nationalities.	No. of Entries.
Canadians from Ontario.....	380
“ Quebec.....	87
“ Nova Scotia.....	23
“ New Brunswick.....	8
“ Prince Edward Island.....	9
“ Manitoba.....	115
“ Saskatchewan.....	239
“ Alberta.....	97
“ British Columbia.....	12
Persons who had previous entry.....	168
Newfoundlanders.....	1
Canadians returned from the United States...	74
Americans.....	941
English.....	418
Scotch.....	104
Irish.....	42
French.....	27
Belgians.....	11
Swiss.....	6
Italians.....	2
Roumanians.....	5
Syrians.....	
Germans.....	36
Austro-Hungarians.....	225
Hollanders.....	6
Danes (other than Icelanders).....	5
Icelanders.....	10
Swedes.....	68
Norwegians.....	52
Russians (other than Mennonites and Doukhobors).....	
Mennonites.....	
Doukhobors.....	
Chinese.....	
Japanese.....	
Persians.....	1
Australians.....	
New Zealanders.....	
Arabians.....	1
Total.....	3,243

Representing 7,885 souls.

Lands Patented, May 1909.

An abstract of Letters' Patent covering Dominion Lands situate in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory issued from the Department of the Interior during the month of May, 1909, as compared with the month of May, 1908, is as follows:—

LANDS PATENED DURING MAY, 1909.

Nature of Grant.	May, 1909.		May, 1908.

Department of the Interior, 28th May, 1909.

Land Sales.

The following is a statement of the farm land sales made by the Canada Northwest Land Company, Limited, during the month of May, 1909, compared with the corresponding month of 1908.

LAND SALES OF CANADA NORTHWEST LAND COMPANY.

	Acres.	Price obtained.
May, 1909.....	1,893.40	\$23,273.60
May, 1908.....	1,281.50	13,145.00
Increase, May, 1909.....	611.90	\$10,128.60
From Jan. 1 to May 31, 1909...	5,638.35	\$64,679.89
From Jan. 1 to May 31, 1908...	3,421.01	38,087.94
Increase, 1909.....	2,217.34	\$26,591.95

British Emigration [Returns.

During the month ended April 30, 1909, the number of passengers leaving the United Kingdom for British North

America, according to official returns of the Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING APRIL, 1909-08.

Nationality.	1909.	1908.
English.....	8,646	9,706
Welsh.....	102	146
Scotch.....	2,087	2,192
Irish.....	698	706
British Colonial.....	112	202
Total of British origin.....	11,465	12,952
Foreign.....	3,391	1,803
Total.....	14,856	14,755

During the first four months of the calendar year, 1909, the number of passengers leaving the United Kingdom as above mentioned was as follows:—

EMIGRATION FROM GREAT BRITAIN JANUARY-APRIL, 1909-08.

Nationality.	1909.	1908.
English.....	18,355	21,409
Welsh.....	171	521

Scotch.....	4,389	4,736
Irish.....	1,133	1,414
British Colonial.....	333	646
Total of British origin.....	24,381	28,726
Foreign.....	7,916	4,285
Total.....	32,297	33,011

Note.

The Canadian Pacific Railway Company has announced that it will offer ten new town sites for sale during the coming summer. These are all located on three of the new branch lines in the West.

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF JUNE, 1909.

The following is a list of contracts awarded by the Department of Public Works, the Department of Railways and Canals, the Department of Militia and Defence and the Department of Marine and Fisheries which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

HARBOUR WORKS, TIGNISH, P.E.I.

HARBOUR works at Tignish, P.E.I., names of contractors, J. H. & E. M. Myers, date of contract, June 4, 1909; amount of contract, \$23,952.00.

Trade of Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter.....	\$2.50
Carpenters.....	1.75
Blacksmiths.....	2.00
Blacksmiths' helper.....	1.50
Ordinary labourers.....	1.25
Driver with 1 horse and cart	2.50
Driver, 2 horses and wagon	3.50

Blacksmiths.....	2.25
Hoisting engine driver.....	2.25
Carpenters.....	2.25
Structural steel erectors....	2.50
Machinists.....	2.25
Driver, 1 horse and cart....	2.25
Driver, 2 horses and wagon	3.50
Labourers.....	1.50
Foreman of erection.....	No special rates.

HEATING PLANT AT AMQUI, QUE.

Installation of a Hot Water Heating Plant in the station building of the Intercolonial Railway at Amqui, in the County of Rimouski, Que. Date of Contract, June 3, 1909. Amount of Contract, \$700.00. Contractor, "Alfred A. Portugais," of Rimouski, Que.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenters.....	\$1.75
Pipefitters.....	2.00
" helpers.....	1.50
Painters.....	1.75
Labourers.....	1.25

Department of Railways and Canals.

ADDITIONAL WINCHES FOR SOULANGE'S CANAL.

Erection of two Winches on the deck of the Gate Lifter of the Soulanges' Canal. Date of Contract, June 3, 1909. Amount of Contract, \$660.00. Contractors, "The Hall Engineering Works," of Montreal, Que.

Trade or Class of Labour.	Rate of Wages, Per Day of 9 Hours, Not less than:
Riveters.....	\$2.25
" helpers.....	1.50

HEATING PLANT AT IONA, N.S.

Installation of a Plumbing and Hot Water Heating System in the station building of the Intercolonial Railway at Iona. Date of Contract, June 11, 1909. Amount of Contract, \$871.00. Contractor, "Alexander C. Thompson," of North Sydney, N.S.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Plumbers.....	\$2.00
Steamfitters.....	2.00
Carpenters.....	2.00
Painters.....	2.00
Labourers.....	1.50

ADDITION ELECTRIC LAMPS AT BATHURST,
N.B.

Installation of Ten (10) 16 c.p. incandescent lamps ("Edison base lamps") at the new Freight Shed of the Intercolonial Railway at Bathurst, N.B. Date of Contract, June 26th, 1909. Amount of Contract, \$214.00. Contractors, William A. Skidd and John M. Skidd, of Chatham, N.B.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Electrical foreman.....	\$2.25
Electrical wiremen.....	1.75

Department of Militia and Defence.

NEW WATER SUPPLY, ROYAL MILITARY
COLLEGE, KINGSTON, ONT.

New Water Supply for Fire Protection and Domestic Service, Royal Military College, Kingston, Ont., names of contractors: Elliott Bros., Kingston, Ont., date of contract, June 6th, 1909, amount of contract, \$6,890.00.

Trade or Class of Labour.	Rate of Wages, Not less than:
Stonecutters.....	\$3.60 per day of 8 hours.
Bricklayers.....	3.60 " 8 "
Masons.....	3.60 " 8 "

Plasterers.....	3.60 " 8 "
Lathers.....	2.00 per 1,000.
Painters and glaziers.....	2.25 per day of 9 hours.
Plumbers.....	2.40 " 9 "

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE, 1909.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board and to the Department of Railways and Canals for their kind assistance of furnishing the Department with the statement of returns of accidents reported to them.

Steamfitters.....	2.40	"	9	"
Tinsmiths.....	2.25	"	9	"
Metal roofers.....	2.25	"	9	"
Electrical workers.....	2.50	"	9	"
Builders' labourers.....	2.00	"	8	"
Ordinary labourers.....	1.50	"	9	"
Driver with 1 horse and cart	2.50	"	9	"
Driver, 2 horses and wagon	3.50	"	9	"

Post Office Department.

During the month of June orders were given by the Post Office Department for the supplies below mentioned, subject to the regulations for the suppression of the *sweating* system, and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of Order.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	593.15
Making and repairing rubber dating stamps and type, also other stamps....	192.79
Supplying stamping material and wooden boxes, and repairing stamping pads....	769.02
Supplying mail bags.....	1,592.75
Repairing mail bags.....	1,415.39
Making post office scales.....	312.50
Making and repairing mail locks and supplying mail bag fittings.....	335.30
Supplying Railway Mail Clerks' tin travelling boxes, and combination letter and newspaper boxes and pedestals, and repairing portable letter boxes, railway mail clerks' tin travelling boxes, parcel receptacles and street letter boxes....	924.50
Making and repairing miscellaneous articles of postal stores.....	33.90
Making and supplying articles of official uniform.....	730.16

INDUSTRIAL accidents occurring to 421 individual work people in Canada during the month of June, 1909, were reported to the Department of Labour. Of these 129 were fatal and 292 resulted in serious injuries. In addition 3 fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before June, 1909.

In the preceding month there were 93, fatal and 185 non-fatal accidents reported a total of 278, and in June, 1908, there were 137 fatal and 263 non-fatal accidents a total of 400. The number of fatal accidents reported in June, 1909, was therefore 36 more than in preceding month and 8 more than in June, 1908. The number of non-fatal accidents reported in June, 1909 was 143 more than in the preceding month and 29 more than in June, 1908. Altogether there were 143 more industrial accidents reported in June, 1909, than in the preceding month and 21 more than in the same month of the preceding year.

Of 148 returns received during the month giving the ages of the victims of industrial accidents, 18 referred to persons under twenty-one years of age, 36 to persons between twenty-one and forty-five, and 8 to persons over 45. Eighty-six persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and groups of trades:—

STATEMENT OF ACCIDENTS DURING JUNE, 1909,
BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	29	27	56
Fishing and hunting.....	2	2
Lumbering.....	23	26	49
Mining.....	16	18	34
Building trades.....	4	39	43
Metal trades.....	6	39	43
Woodworking trades.....	1	28	29
Printing trades.....	1	1
Textile trades.....	2	2
Food and tobacco preparation.....	1	9	10
Railway service.....	23	26	49
Navigation.....	5	32	37
General transport.....	7	19	26
Civic employees.....	2	8	10
Miscellaneous.....	6	14	20
Unskilled labour.....	4	4	8
Total.....	129	292	421

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman, were, the drowning of three river drivers near Grandes Piles, Que.; the killing of

three railway employees in a head on collision near Burnaby Lake, B.C.; the death of two railway construction hands in a derailment at Corbettsville, N.B.; and the drowning in their cab of an engineer and firemen at New Westminster, B.C.

Drowning Disaster Near Grandes Piles, Que.

On June 4 three river drivers attempted to cross the Mattawin river between two rapids in the vicinity of Grandes Piles, Que., when their boat was caught in the current and overturned, drowning the occupants.

Disastrous Railway Collision Near Burnaby Lake B. C.

On June 10, train No. 274, Great Northern Railway running from Seattle, Wash., to Vancouver, B.C., met in a head on collision with a local Great Northern train bound for Ladner, near Burnaby Lake five miles out of Vancouver. In the wreck the engineers of both trains and the fireman of one were instantly killed and an extra engineer, conductor, fireman and railway mail clerk seriously injured.

Disastrous Railway wreck at Corbettsville. N. B.

On June 21, an engine on the Moncton-Chipman section, of the Grand Trunk Pacific line, was drawing a construction train, when it got beyond control on a down grade near Corbettsville, N.B. Three cars were derailed, and a number of workmen thrown off. Of these two were instantly killed and two others seriously injured.

Railway Disaster at New Westminster, B.C.

On June 19, the engine and tender of the Great Northern train, No. 274, left the tracks on the New Westminster side of the Fraser River bridge and plunged into the waters beneath. The engineer and fireman of the locomotive were both drowned.

The Record by Industries and Trades.

Agriculture.—There were 29 fatal and 27 non-fatal accidents during June, 1909, compared with 14 fatal and 22 non-fatal accidents in the preceding month and 29 fatal and 25 non-fatal accidents in June, 1908. Seven of the fatalities were caused respectively by live-stock and by runaways, 4 by drowning, 3 by falls and 2 each by being run over, by falling material, by electricity and by being burnt to death. Of the other accidents 9 were caused by falls, 5 by run-aways, 3 by live stock and 2 each by explosions, by electricity and by machinery, and 1 each by flying material, by railways, by tools and by falling material.

Fishing.—During June 2 fishermen were drowned at Richibucto, N.B. There were 3 fatalities in May last, and 7 fatalities in June, 1908.

Lumbering.—In this industry 23 workmen met death by accident while 26 others were injured. In the previous month the record was 27 killed and 19 injured and in June of last year, 16 killed and 14 injured. Nineteen of the deaths were due to drowning, 2 to

machinery and 1 each to falling material and flying material. Of the minor accidents 12 were due to machinery, 5 to electric shock, 4 to falling material, 3 to tools and 2 to flying material.

Mining.—Sixteen more workers were killed and 18 injured during June, 1909, as against 10 killed and 3 injured in May last and 13 killed and 14 injured in June, 1908. Seven workers were killed by falling material, 5 by mine cars, 2 by falls and 1 each by an explosion and by drowning. Six of the other accidents were caused by mine cars, 5 each by falling material and by explosions of dynamite, and 2 by an explosion of gas.

Building trades.—In this group, there were 4 accidental deaths, and 39 workers were injured, compared with 2 killed and 32 injured in May, and 8 killed and 41 injured in June, 1908. The 4 deaths were due to falls. Of the other accidents, 32 were due to falls, 2 each to flying material and to machinery and 1 each to an explosion, to tools and to falling material.

Metal, engineering and shipbuilding trades.—There were during June, 6 fatalities and 39 accidents, compared with 3 killed and 27 injured in the month be-

fore, and 11 killed and 39 injured in June, 1908. Falls caused 3 of the deaths electric shock, 2, and flying materials 1. Of the minor accidents, 12 were caused by machinery, 8 by falls, 5 by falling material, 4 by molten metal, 3 each by explosions and by flying material, and 2 each by electric shock and by being burnt by sulphuric acid.

Woodworking trades.—A woodworker at Penetanguishene, Ont., was killed by being struck by a piece of a busting fly wheel, and 28 other workers were more or less seriously injured. In the preceding month the record was 9 minor accidents, and in June, 1908, 11 minor accidents. Of the 28 non-fatal accidents 15 were due to machinery, 4 each to flying material and to explosions, 3 to elevators and 1 each to falling material and to a fall.

Printing and allied trades.—Falling material injured one worker in June. There were no accidents in May and 2 minor accidents in June, 1908.

Textile trades.—Two workmen were injured during June, 1 by machinery and 1 by a fall. In the previous month there were 2 injured and in June, 1908, 6.

Food and tobacco preparation.—During June a milkman was run over by a train at Norval, Ont., and killed, and other workmen were injured 5 by machinery, 3 by falling material and 1 by a tool. In May, 1 workman was injured, and in June, 1908, the record was 1, killed and 7 injured.

Railway service.—In June, 1908, 23 railway employees were killed and 26 were injured, compared with 23 killed and 19 injured in May, and 28 killed and 32 injured in June of last year. Eleven of the fatalities were due to the victims being run over, 6 to collisions, 2 to drowning, and 1 each to being struck by an object in passing, to an explosion of dynamite, to electric shock and to a fall. Seven of the non-fatal accidents were due to falls, 4 each to collisions and to being run over, 3 to derailments, 2 each to being caught between cars, to falling material, to burns or scalds, and 1 each to being struck by a locomotive and to machinery.

Navigation.—Drowning was the cause of 4, and machinery of 1 fatal accident in this group. Sixteen longshoremen were nearly asphyxiated by grain in the hold of a vessel at Montreal, 6 other were injured by falls, 5 by explosions, 2 each by falling material and by machinery and 1 by flying material. In May the total was 6 killed and 13 injured, and in June, 1908, 4 killed and 12 injured.

General transport.—Death through accident occurred to 7 during June, and 19 were injured, compared with 3 killed and 18 injured in May, and 5 killed and 19 injured during June, 1908. Three of the fatalities were due to falls and 1 each to live stock, to being run over, by internal hemorrhage caused by lifting a heavy weight, and to drowning. Ten of the injuries were due to falls, 3 each to collisions and to being crushed between vehicles, 2 to live stock and 1 to machinery.

Civic employees.—A policeman was shot and killed near Perry's Station, B. C. while in pursuit of a bandit and a fireman at Halifax, N. S., was killed by falling debris at a fire. Eight other employees were injured, 5 by collisions, 2 by falls and 1 by falling material. In the preceding month there were 1 killed and 4 injured, and in June 1908, 5 killed and 4 injured.

Miscellaneous.—The record for June, 1909, was 6 killed and 14 injured, compared with 7 injured in May last and 7 killed and 9 injured in June 1908. Of the fatalities, 2 were due to falling material and 1 each to drowning, to machinery, to being asphyxiated in a well and to the explosion of a boiler. Of the non-fatal accidents 4 were due to machinery, 3 to falls, 2 to explosions and 1 each to being scalded, to flying material, to being run over, to live stock and to falling material.

Unskilled labour.—Four labourers were killed and 4 injured during June, 1909, compared with 1 killed and 6 injured in May last and 4 killed and 17 injured in June of last year. Three of the fatalities were caused by the victims being run over and 1 by falling material. Two of the injuries were caused by falling material and 1 each by a fall and by being overcome by gas.

TRADE DISPUTES DURING THE MONTH OF JUNE.

DURING the month of June strikes occurred of the fishermen employed by the New England Fishing Company, Vancouver, B.C., of cigarmakers employed by the Keystone Cigar Company, of Winnipeg, Man., of labourers employed in the construction of the tunnel under the Detroit river, of plumbers and steamfitters, lathers, carpenters and joiners at Edmonton, Alberta, of bricklayers, masons and plasterers of Berlin, Galt, Hespeler and Preston, Ont., of labourers employed by the Hamilton Street Railway Company and of labourers employed by the Grand Trunk Railway Company in the construction of its new hotel in Ottawa, Ont. The strike of the coal miners employed in the mines at Coleman, Lille, Lethbridge, Bankhead, Hillcrest, Bellevue, Passburg, Canmore, Taber, Alberta and Hosmer and Frank, British Columbia, in which 2,100 operatives were directly affected was continued throughout June and constituted the most serious trade dispute of the month.

Analysis of Trade Disputes During the Month.

Number and magnitude.—The number of trade disputes reported to have been in existence during June was 14, a decrease of 1 as compared with May, and an increase of 1 as compared with June, 1908. About 28 firms and 4,701 employees were affected by these disputes.

Loss of time and working days.—The loss of time to employees through trade disputes was approximately 86,806 working days, compared with 96,357 working days in May, and 82,527 in June, 1908.

Trades affected by new disputes.—The following table shows the trades affected by the new disputes of the month, and the number of work people involved in each group of trades.

Trades.	No. of disputes.	No. of workers.
Fishermen.....	1	72
Tobacco preparation.....	1	10
Building trades.....	2	600
Unskilled labour.....	3	550
Total.....	7	1,232

Localities affected by new disputes.—The new disputes of the month occurred in the following Provinces of the Dominion:—

Province.	No. of disputes.
Ontario.....	4
Manitoba.....	1
Alberta.....	1
British Columbia.....	1
Total.....	7

Causes of disputes.—The following were the causes of the new disputes of the month:

Cause.	No. of disputes.
For increase of wages.....	6
Against non-union men.....	1
Total.....	7

Methods of Settlement.—In the case of one mining dispute it was reported that operations had been resumed under the old conditions. In the case of another mining dispute it was reported that operations had been resumed with non-union labour. In one case the places of striking cigarmakers were filled by girls. In one case a three years' agreement was signed which provided for increased wages for the bricklayers, masons and plasterers concerned. In one dispute in which labourers were affected a compromise was accomplished which carried a slight increase in wage to the men concerned. In two other cases in which labourers were concerned and in one case affecting teamsters, the strikers' places were at once filled. In six cases it was reported that the strikes still continued at the end of the month.

Disputes which began Prior to the beginning of the Month.

The trades disputes in existence during June which began in previous months comprised a strike by coal miners employed by the Alberta Railway and Irrigation Company, the H. W. McNeill Co., The Pacific Coal Company, Leitch

Collieries Limited, Western Canadian Collieries, the International Coal and Coke Company, Limited, and the Hosmer Mines, Limited, operating Mines at Coleman, Lille, Lethbridge, Bankhead, Hillcrest, Bellevue, Passburg, Canmore, Taber, Alberta, and Hosmer and Frank, British Columbia; a strike by coal miners employed by the Nicola Valley Coal and Coke Company, at Middlesboro, B. C., a strike by coal miners employed at the Drummond Colliery, Westville, N. S., and a strike of iron moulders employed by the Gurney-Tilden Company, the D. Moore Company, the Bowes and Jamieson Company and the Burrow's Stewart and Milne Company, stove manufacturers of Hamilton, Ont.

Strike of Coal Miners in Alberta and Eastern British Columbia.

Sittings of a board of conciliation and investigation appointed under the Industrial Disputes Investigation Act to investigate the dispute affecting certain coal miners in Alberta and Eastern British Columbia were held during the month, and on June 21, the department received a report of this board signed by the chairman, Rev. Hugh N. Grant, of Fernie, B.C., and by Mr. F. H. Sherman, of Taber, Alberta, member appointed on the recommendation of the employees. Later a minority report was also received from Mr. Colin MacLeod, of Macleod, Alberta, member appointed on the recommendation of the company. The text of these reports is published elsewhere in the present issue of the *Labour Gazette*. On June 30 an agreement was signed which brought this dispute to a termination. Particulars of this agreement are published elsewhere in the present issue of the *Labour Gazette*.

Strike of Coal Miners at Middlesboro, B. C.

A strike of coal miners employed by the Nicola Valley Coal Company, of Middlesboro, B.C., occurred on April 28, arising out of a demand on the part of the employees for a recognition of the U.M.W.A., and alleged discrimination against members of the union. A Board of Conciliation and Investigation was appointed to

investigate this dispute and while proceedings for the formation of this board were under way that the cessation of work is understood to have occurred. The report of the board was received in the department during the month of June and is published elsewhere in the present issue of the *Labour Gazette*. The department was informed that work has been resumed at the mines, but that the men were being employed individually under new conditions, which the company regarded as the speediest means of restoring satisfactory conditions.

Strike of Coal Miners at Westville, N. S.

A strike of coal miners employed in Drummond Colliery, Westville, N.S., in which 20 persons were directly and 700 others indirectly affected, was terminated on June 4. The dispute in question had resulted from a demand made by the driver boys for an increase of wages. On June 2 a meeting of Ladysmith Lodge of the Provincial Workmen's Association was held when a ballot was taken which resulted in favour of the resumption of operations in this mine.

Strike of Labourers Employed on Grand Trunk Railway Hotel, Ottawa.

Labourers to the number of one hundred employed on the excavation for the proposed Grand Trunk Railway Hotel at Ottawa, went on strike on June 4, demanding a wage of \$1.75 for a 9-hour day in place of the wage of \$1.50 for a 10-hour day, which had been up to that time in force. The company refused the demand and in a few days it was reported to the department that all the men required had been secured by the company at the old rate of wage. The wages asked by the men are current on corporation work in the city of Ottawa and it was understood that most of those concerned found employment in that way.

Strike of Street Railway Labourers in Hamilton, Ont.

A strike of labourers to the number of 250 employed by the Hamilton Street

Railway Company occurred on June 2, and was terminated on June 4. The workmen in question were receiving a wage of 15c. per hour for the re-laying of the roadbed. Their demand was for 20c. an hour the rate paid to municipal labourers. It was reported to the department that the company had agreed to pay a rate of 17c. an hour.

Strike of Workmen on Detroit River Tunnel.

A strike of labourers to the number of 200 employed by the Butler Bros. Construction Company, in the construction of the tunnel under the Detroit river between Windsor, Ont., and Detroit, Mich., occurred on June 1. In this case the miners concerned were receiving a wage of 35c. per hour and demanded an increase to 40c. per hour. On June 7, the strike was reported to the department as being ended, the company having obtained other workmen to fill the strikers' places.

Strike of of Iron Moulders in Hamilton, Ont.

A strike of iron moulders to the number of 170 employed in the stove foundries of the Gurney-Tilden Company, the D. Moore Company, the Burrows, Stewart & Milne Company and the Bowes & Jamieson Company, in Hamilton, which began on February 22, 1909, was continued throughout the month of June. The strike was caused by a reduction of 20 per cent. in the scale of wages. It was reported to the department at the end of the month although the strike still continued, the supply of non-union labour employed by the Stove Manufacturers was regarded by them as sufficient.

Strike of Textile Workers at Magog, Que.

In the strike of the textile workers employed in the mills of the Dominion Textile Company at Magog, Que., which occurred on May 3, and in which 908 operatives were affected, it was reported in the press that the operatives concerned had returned to work and that conditions in the mills had ceased to be affected.

Strike of Harness Makers at Victoria, B. C.

A strike of harness makers to the number of nine employed by three different firms in the city of Victoria, B.C., occurred on May 3. A demand was made in this case for increased wages and shorter hours of employment, which was refused by the firms concerned. At the end of the month of June, seven out of the nine harness makers affected by this matter were still out.

Strike of Teamsters Employed by the City of Ottawa.

A strike of teamsters employed by the corporation of the City of Ottawa, Ont., which occurred on May 31 and in which 40 teamsters were reported to have been affected, was reported to the department as having terminated by the men in question finding work elsewhere. A demand had been made in this case for an increase from \$3.85 to \$4.50. It was understood that the corporation found men to take the places of the strikers at the rate of \$3.85 per day. The rates were, however, afterward advanced voluntarily by the city to 48c. an hour or \$4.52 per day for teams for a nine-hour day.

Strike of Fishermen in Vancouver.

A strike of fishermen to the number of 71 employed by the New England Fish Company, of Vancouver, occurred on June 21. From statements in the press it would appear that 71 of the 72 fishermen employed by the company were members of the Pacific Halibut Fishermen's Union and that the strike was declared for the purpose of compelling the company to employ only union labour. It was understood that operations have been resumed by the company with non-union labour, but at the end of the month the strike had not yet been terminated.

Strike of Cigarmakers in Winnipeg, Man.

A strike of cigarmakers to the number of 10 employed by the Keystone Cigar Company, of Winnipeg, Man., occurred on June 18th. The president of the cigar

TABLE OF TRADE DISPUTES DURING THE MONTH OF JUNE.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.				Date of commencement.	Result.

Labourers.....	Hamilton, Ont	1	250	2	7 Operations resumed; reported men secured increase to 17 cents per hour.	
Labourers.....	Windsor, Ont	1	200	2	7 Strikers places filled.	

* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon, the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

makers' union stated that the cause of the strike was a difference with regard to the price for making a particular kind of cigar. For making cigars over four-sevenths of an inch in diameter the schedule calls for a rate of \$11 per thousand, while the cigars measuring less are classed as panatellas and are made at the rate of \$8.00 per thousand. The Keystone Company is now making a cigar differently shaped from that formerly produced and claims that it should be classed as a panatella, but the men are of the opinion that it should rank with the \$11 per thousand class. A committee of the cigar makers union waited upon the manager of the Keystone factory and offered to accept a rate of \$10.50 but this offer was not accepted. The number of men on strike is 10 and their places are stated to have been filled by girls.

Strike of Bricklayers, Masons and Plasterers in Berlin, Galt, Hespeler and Preston, Ont.

A strike of bricklayers, masons and plasterers to the number of 200 occurred on June 3 and continued until June 18 when an agreement was signed between the Builders' Exchange of Waterloo and the Bricklayers', Masons' and Plasterers', Union No. 12, of Berlin, and the Bricklayers', Masons' and Plasterers', Union, No. 15, comprising the towns of Galt, Preston and Hespeler. In this agreement provision was made for the pay-

ment of a wage of 40 cents per hour from July 1, 1909, until April 30, 1910; 43c. per hour from May 1, 1910 to April 30, 1911; 45c. per hour from May, 1911 to April 30, 1912. The agreement made provision also for the establishment of joint committees to adjust disputes. The Builders' Exchange agreed to employ only union bricklayers, masons and plasterers and to concede a 9-hour day until April 30, 1911, and an 8-hour day thereafter.

Strike of Carpenters, Lathers, Plumbers and Steamfitters at Edmonton, Alta.

A strike of carpenters to the number of 250 employed by the Master Builders' Exchange and other builders, numbering altogether about 33 firms in Edmonton, Alta., occurred on June 8. This dispute arose out of a demand on the part of the carpenters for a minimum wage of \$3.75 in place of the wage of \$3.36 which had been paid up to that time. On June 19, the carpenters concerned in this matter were joined by the union plumbers and steamfitters of the city, and on June 21 by the union lathers of the city. The action of the plumbers, steamfitters and lathers being in the nature of a sympathetic strike to enforce compliance on the part of the builders with the demands which the carpenters had made. At the end of the month this strike still continued.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

QUEBEC CASE.

Responsibility of Railway Company for Safety of Passenger.

The plaintiff sued the C.P.R. company for \$3,000 damages for the loss of a foot. At the trial it was brought out that plaintiff admitted having been in an intoxicated condition while travelling from Sherbrooke to Magog. He contended

that being in that condition the company's officials should have seen that he got off the cars safely. He attempted to get off the train after it started with the result that he fell under the cars and his leg was so crushed that it had to be amputated.

The court held the company in fault in not seeing Ducharme safely off the cars. The damages were estimated at \$3,000, but as plaintiff contributed to the accident the amount was reduced to \$1,500, with costs.

(Ducharme v.s. C. P. R. Company, Demers, J.)

ONTARIO CASES.

Master and Servant.

A commercial traveller brought action during June against his former employers to recover a sum for commission on sales of goods and for damages for breach of contract of employment. The commission agreed upon was eight per cent., and the agreement was to remain in force for three years from August 1st, 1907. The plaintiff, having through the use of a certain patent medicine contracted the drug habit, was, on October, 1908, taken to a sanitarium. His effects were shortly after seized for rent, among them being the samples supplied by the defendants who were obliged to pay about \$135 to recover their property. Later, they gave notice of the termination of the contract. The action brought by the plaintiff was twofold; first, for the commission "on good and accepted orders", and second, for damages for breach of contract. In respect of the first matter, the Court held that "good and accepted orders", is not synonymous with "orders accepted and filled." As to the second point, the contract contained no term allowing either party to put an end to it. The fact that the illness of the plaintiff was brought on to a great extent, if not wholly, by his own folly, was not held to make any difference, though the loss and annoyance to the defendants caused by the seizure of the samples was held to be more serious, and to involve a breach as the act or omission was not intentional but was due to the illness of the plaintiff, this involuntary default was not held to justify dismissal, though damages might be claimed on that behalf. The judge expressed the hope that the parties would be able to arrange their differences without further litigation.

(McDougal vs. Van Allen Company, Limited, Toronto, June 8th, Riddell, J.)

Sunday Labour.

Several charges of the Lord's Day act were laid before the police magistrate of Hamilton, during June. John Green charged with selling light lunches, was fined \$40. The magistrate ruled that it

was illegal for Hebrews to deliver meat on Sunday mornings. For selling candy to a boy on Sunday, George Culy, Hamilton, Ont., was also fined \$20 by the police magistrate.

Confectioner Fined.

Walter Nixon, confectioner, of Ottawa, Ont., was fined \$100 for selling brandy chocolates.

MANITOBA CASES.

Alleged Defective appliance.

The plaintiff was employed by the defendant in a saw-mill on Lake Winnipeg. He alleged, in an action for damages for personal injuries, that a saw in the mill was not equipped with a sufficient saw-dust carrier and that the same was on the wrong side of the saw. In consequence, while operating the saw he was struck in the eye by a piece of saw-dust or bark and lost the use of that eye. The jury found in favour of the plaintiff for \$1,000. In the appeal, it was brought out that the plaintiff had expressed fear of the saw-dust box and had offered to spend his own time in remodelling it. The evidence, moreover, that the accident had occurred as the plaintiff had alleged was held by the appeal judges to be insufficient. The evidence as to the faultiness of the box was also held to be subject to suspicion. The appeal was dismissed, one of the judges remarking that the tendency of juries to give damages to plaintiffs was so great that he could not, but think that they were frequently influenced to do so by sympathy, irrespective of the evidence or weight of evidence.

(McIntyre vs. Holliday, court of Appeal, Winnipeg Man., April 12, 1909.)

Motorman Fined.

The police magistrate of Winnipeg, recently fined a motorman in the employ of the street railway company for obstructing a military parade, by causing his cars to break the lines of a regiment on parade. It was held that the militia were entitled to the right of way over the street cars.

Damages under the Factories Act.

The plaintiff who worked for the Stephens' Brick company in the latters' brick yards was deprived of his right arm while at work. The arm was caught in the cog wheel and cut off close to the shoulder. The case has given rise to much technical evidence and progress with the trial has been slow. When the case went to the jury they were furnished with a number of questions by

the court and to these answers were given.

Two amounts set down by the jury; \$1,500 representing the earning power of a workman for three years as outlined by the Workman's Compensation act and \$5,000 as the amount at which the jury would fix the amount of damages.

The judge held that the case came under the Manitoba Factories' act and awarded the damages as \$5,000.

(Mayndman vs. Stephens, Assize Court. Howell, C. J.)

THE LABOUR GAZETTE

AUGUST, 1909.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JULY, 1909.

I.—GENERAL SUMMARY.

THE favourable reports regarding the crops was the dominating factor in general industry and trade during July. In nearly all sections, and especially in Western Canada, the outlook is for increased agricultural yields compared with 1908. This combined with the high prices prevailing, had a far-reaching effect on employment. The demand for men to assist in the harvest was unusually keen. The railway construction camps also took on large additional staffs during the month, affecting labour conditions over a wide area. The extent and value of buildings projected was phenomenally large, and promises a busy autumn season in these trades. The fishing industry was dull in the Maritime Provinces, but the take of sockeyes in British Columbia promises to equal that of 1905, the preceding big year. The lumber trade was quiet in the Eastern Provinces, though the mills had a busy month; continued improvement was reported from British Columbia. The strike of the employees of the Dominion Coal Company was a disturbing factor in the coal mining industry; on the other hand the restoration of industrial peace in the mines of Alberta and eastern British Columbia had a very beneficial effect. Metal mining had a better month than June. Transportation employees of all classes were active. The amount of civic improvements in progress was exceptionally large. On the whole, the

season up to the present date, while below that of 1907, in general activity, has been much more active than last year, and the autumn promises to be better for general labour than that of 1908 or 1907.

Changes in Wages and Hours.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the department of Labour, during July.

Building trades.—Plumbers (30) at Calgary, Alta., had their wages increased from 54 to 55 cents per hour, and stone masons (45) at the same place received an increase in wages of from 60 to 62½ cents per hour.

Civic employees.—Street foremen (8) at Ottawa, Ont.; received an increase of 25 cents per day in wages. A number of civic employees at Winnipeg, Man., received an advance in salary.

Railway employees.—Freight handlers (100) at Windsor, Ont., had their wages increased from 20 to 25 cents per hour.

The early closing by-law passed in Montreal four years ago was put into force during July.

Cost of Living—Prices.

The favourable crop reports induced a downward tendency in the price of wheat

and other grains. Hay, however, advanced, and flour remained firm. This movement in grain prices, together with the high price of export hogs, and the uncertain condition of the canned goods supply, were the leading features of the provision market. Bread advanced locally, but sugar was considerably lower than a year ago. Beef was easier, but butter and eggs were firm. The Canadian Cotton Mills withdrew prices of sheetings, shirtings, etc., during July owing to the increased cost of raw cotton, and gave notice of a general advance of five per cent. with a further advance in certain lines. An advance in the price of footwear was foreshadowed, following the recent sharp increase in leather prices. Crude rubber rose rapidly in price during the month. The metal markets remained somewhat quiet, though consumption increased. Silver remained on a high level.

Interruptions to Industry.

Among industrial and other establishments and buildings destroyed by fire or other cause during July, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—The S.S. *Arizona* was wrecked and abandoned off the coast of Cape Breton on July 15. The S.S. *Cairncrag* was wrecked near Canso on July 26.

Forest fires caused considerable damage in Lunenburg County.

New Brunswick.—Prince of Wales store and dwelling, loss, \$5,000.

Quebec.—Cookshire chemical works, partial; reduction plant at Cote St. Luc, loss, \$35,000; church, partial, at Lachenaie, loss, \$1,000; sawmill at Labelle; presbytery at Lac Ste. Marie; the steamboat *Laprairie* was burnt to the water's edge at Laprairie on July 24, loss \$40,000; store and contents at Gatineau Point, loss, \$15,000; factory at Hull, loss, \$4,000; sawmill at Mission Point, loss, \$100,000; outbuildings and contents as Moe's River, loss, \$2,000; barber shop at Quebec; match factory at Ste. Anne de la Perade, loss, \$12,000; club boat house at Ste. Agathe, loss, \$1,300; outbuildings and contents at Ste. Angèle, loss, \$3,000; hotel at St. Benoit, loss, \$8,000; sawmill at St. Didace; shingle mill at Stanstead; warehouse at St. Johns, loss, \$2,000; outbuildings and dwelling at Yamaska, loss, \$3,000.

Barns at St. Didace, St. Georges d'Henryville and Upton.

Ontario.—Hotel, blacksmith's shop and dwelling at Ahmic Harbour, loss, \$21,000; sawmill at Burnham's Point, loss, \$100,000; summer resort at Beaumaris, loss, \$5,000; cheese factory at Chantry; business section of Cobalt, loss, \$500,000; freight shed at Brockville, loss \$1,000; church at Dublin, loss, \$30,000; transformer station at Dundas, loss, \$10,000; planing mill at Dundalk, loss, \$3,000; saw-mill at Glen Robertson, loss, \$4,000; outbuildings at Guelph, loss, \$1,000; factory (partial) at Hamilton, loss, \$3,000; shoestore at Hamilton, loss, \$15,000;

foundry at Hensall, loss, \$8,000; hardware store (partial) at London, loss, \$1,500; outbuildings and contents at Lunenburg, loss, \$5,000; gas engine works and dwelling at Niagara Falls, loss, \$12,500; town hall at Oshawa; warehouse at Peterborough, loss, \$5,000; canning factory at St. Catharines, loss, \$75,000; sawmill at Warsaw, loss, \$4,000; corn flake factory (partial) at London; wagon factory (partial) at West Lorne, loss, \$3,000; factory and storehouse at Welland, loss, \$5,000.

Forest fires along Sturgeon river caused considerable damage.

Barns were burned at Blenheim, Chatham, Fonhill, Howard, Metcalfe, Marshville, Puslinch, Wallaceburg and Whitby.

An electric storm passed over Ontario on July 19, and did considerable damage to barns and outbuildings.

Manitoba.—Livery barn, parsonage and business block at Carman, loss, \$15,000; church at Gimli; elevator and one car of grain at Shoal Lake. A ninety ton water tank crushed through a business establishment at Winnipeg and caused damage valued at \$30,000.

Saskatchewan.—The village of Macklin was nearly entirely destroyed by a cyclone on July 25.

A cyclone in the Gainsboro district of Saskatchewan at the end of the month was the cause of three deaths and heavy damage to settlers' buildings.

British Columbia.—The Barnett saw-mill on Lulu Island, loss, \$100,000; the plant and turning shop in the penitentiary in New Westminster, loss, \$10,000; oil tanks and oil (partial) at Vancouver, loss, \$20,000, sawmill at Maycock loss, \$100,000.

Conditions in the Industries and Trades.

Conditions of employment during July in the several industries and trades throughout Canada, as indicated by the reports of correspondents of the *Labour Gazette* and by information received at the Department from other sources, may be briefly summarized as follows:—

Agriculture.

Conditions were very favourable. In western Canada a heavy crop is regarded as assured, and the only fear is from lateness in ripening and early frost. This danger is for the most part confined to Manitoba, the crops being further advanced in Saskatchewan and Alberta. Estimates as to the yield vary, but all agree that the return will exceed that of last year. Wheat and barley cutting had been begun in the closing week of the month but will not be general until the middle of August. Already some of the new wheat was marketed. The demand for labour to harvest the crops was very keen. Estimates of the number of extra hands which will be required in the prairie provinces range from 18,000 upward. The provincial superintendent of immigration and employment of Manitoba stated in July 26, that places were

immediately available for 5,000 farm hands. Wages range from \$15 to \$40 per month with board according to experience. Rains in the third week of the month did much good to the crop, and were general. The hay crop in Ontario and the Eastern Provinces, especially, was benefitted. Fall wheat cutting in Ontario was general in the fourth week of the month and good yields are reported. Labour was reported very scarce. Hay cutting and the fall wheat harvest occurred very close together. Hay, on the whole, was fair to light. Oats promise to be a good yield. Fruit crops were coming on well, and the outlook is for a heavy return in nearly every section. Small fruits have yielded heavily and large yields of grapes, peaches and apples are expected. In the dairying branch a good flow of milk was reported, pastures having been in good condition. Roots and vegetables promise well. The railway and elevator situation at the close of the month was favourable.

A bulletin of the department of agriculture of Saskatchewan dated July 26, reported a rapid improvement in the conditions of the crops during the month.

The Alberta Government issued July 24, the following report of the acreage in crop within the Province this year, and the estimated yield:

Grain.	Acres.	Estimated yield.	Estimated bushel to acre.
Wheat—			
Spring.....	230,000	5,290,000	23
Winter.....	75,000	1,500,000	20
Oats.....	490,000	19,600,000	40
Barley.....	100,000	2,500,000	25

Other crops bring the total acreage up to 960,180, with a total estimated yield of 29,024,742 bushels.

Fishing.

The lobster season came to an end in the Maritime Provinces during July. The catch varied according to locality, but on the whole was smaller than last year. Other catches, including cod, halibut, salmon, shad and mackerel, were light. In British Columbia, the salmon run was

some days later than usual in opening but was very heavy towards the close of the month. Traps off Vancouver Island and boat fishermen made heavy catches and the outlook at the end of the month was that the take would equal that of 1905. Preparations have been made for the packing of about 790,000 cases, or slightly less than the pack of 1905, the year of the last big run. The prices fixed by the British Columbia Cannery Association to be paid for salmon were, 12½ cents per fish during July and 10 cents during August. These rates are the same as those prevailing in 1905.

In accordance with instructions of the Fishery Committee of Parliament, an official investigation has been begun into the condition of the lobster fisheries of the Maritime provinces.

Lumbering.

In the sawmills of Ontario and the Eastern provinces, July was a busy month. The unusually high water in the streams greatly facilitated operations compared with previous years, the sweeping of the streams having been very successful, and the mills dependent on water power being enabled to work to full capacity without interruption. Shipping, however, was somewhat quiet, the market, especially for lumber of low grade, and for laths and shingles, being dull, though spruce deals were upward at St. John, N.B.

In British Columbia logging was fairly active on the coast and several mills were working steadily. A further improvement was indicated by railroad buying and favourable crop reports. Conditions in the mountain district had also improved.

A commission was appointed by the government of British Columbia to investigate conditions in the lumbering industry with reference to such questions as perpetuity of titles, regulations against fire, forest preservation, etc.

The export of pulp wood from Crown lands in Quebec has been prohibited. The pulp and paper trade remained with little change.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has references only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

Mining.

In the coal mining industry, the strike of the employees of the Dominion Coal Company, being members of the United Mine Workers of America, and the unrest prevailing at Springhill, were the cause of considerable diminution in the output in Nova Scotia. In Western Canada, however, the restoration of industrial peace in the coal mines of Eastern British Columbia and Alberta was followed by a general improvement in trade and in the activity both of the concerns immediately affected and of the smelters and other industries dependent thereon for coke supplies. On Vancouver Island the mines were working steadily.

Features of the month in the metalliferous camps were as follows:—The asbestos mines of Quebec were very busy and a large output was recorded. The Quebec copper mines were fairly active. In eastern Ontario general mining was very busy. Shipments from the Cobalt camp during the first six months of 1909 amounted to 14,335 tons, compared with 8,872 tons during the corresponding period of 1908. Twenty-one mines have been shipping, compared with 29 last year. The metalliferous camps of British Columbia reported some good strikes of ore and shipments compared favourably with those of June. The amalgamation of the British Columbia Copper Company and the Dominion Copper Company with the mines and smelters at Greenwood, B.C., was announced.

Manufacturing.

The favourable crops reports caused a still further expansion in the output of manufacturing establishments. Factories in nearly every branch and locality were working full time with good staffs. The activity of the summer of 1907 has not been reached but that of the corresponding season of 1908 has been considerably exceeded. Particularly active were the iron and steel plants and manufacturing of agricultural implements.

The output of the Dominion Iron and Steel Company during June was as follows:—

Product.	Tons.
Pig iron.....	24,260
Steel.....	28,140
Rails.....	18,419
Wire rods.....	7,404

The Sheet Steel Corporation of Morrisburg, Ont., which recently acquired the plant of the Canadian Tin Plate Company has agreed with the municipality to employ 200 men during the next two years and 250 men for two years thereafter. The town has leased the power plant to the corporation for 36 years and has granted a bonus of \$30,000.

Railroad Construction.

Work was being actively pushed forward in connection with the many large contracts at present under way, and staffs were materially increased. In New Brunswick there are now over 4,200 men at work on the sections of the National Transcontinental Railway within the province. Work on the Grand Trunk Pacific line in western Canada was being conducted with all possible speed in order that the road may be used for the grain traffic of the coming autumn. The line between Winnipeg and Edmonton was nearing completion during July. Several towns have already been established along the line, of which Melville is reported to have already a population of 1,100 and Wainwright a population of 800. There are now only about 150 miles of tracklaying to complete between Winnipeg and Lake Superior Junction where the main line joins the completed branch to Port Arthur. Altogether it is expected that over 1,100 miles of the road will be completed in time to handle grain in September. This includes the road from Edmonton to the head of the lakes. West of Edmonton a contract was awarded by the company during July to Messrs. Foley, Walsh and Stewart for the building of the grade from Macleod to Tête Jaune Cache, a distance of 180 miles. This will place the finished grade 50 miles west of the Yellow Head Pass. A further contract will be awarded shortly for 40 miles from Kitsalas Canyon to Aldermere in British Columbia.

The Canadian Northern Railway Company was rushing work on its lines in

western Canada. This company negotiated a loan of \$4,000,000 in Great Britain to be applied towards the construction of a line from Toronto to Niagara Falls, Ont., with an extension eastward to join the existing lines of the company in Eastern Ontario and Quebec. An additional \$6,000,000 to be applied to railway construction in Western Canada was also obtained by the company.

Shield work on the Windsor approach to the Detroit River tunnel was completed on July 14, and the force of miners paid off. About 100 men were retained to finish the concrete and other work on the approach.

It is expected that 102 elevators will be available on the Grand Trunk Pacific between Edmonton and the head of the lakes by the coming autumn.

The Temiscaming and Northern Ontario Railway has started grading a new line from Cobalt to Haileybury, Ont., for the construction of an electric railway to parallel the existing railroad, in order to relieve the present congestion of traffic.

General Transport.

Transportation employees in the various branches had a good month. Railway earnings and street railway earnings showed a considerable increase over the corresponding period of last year. Earnings of the Canadian Pacific Railway Company for the year ended June 30, 1909, showed an increase of over \$1,630,000 compared with the preceding year. Railway shop employees were much more active than in the preceding month, full time having been resumed in a number of shops. Preparations were actively in progress for the handling of the Western grain crop of the present year. The equipment of the railways was reported more efficient than at any previous time. In all, about 35,000 box cars will be available for this purpose. Some reductions of the staff of the Intercolonial Railway were made by the recently appointed Board of Management and other economies introduced which are expected to reduce expenses by \$250,000 annually without impairing the service.

A circular issued by the railway companies operating in Manitoba, Saskat-

chewan and Alberta, gives the elevator capacity of the west as follows:—

	Bushels.
C. P. R. terminals.....	14,752,405
C.P.R. interior.....	29,041,490
C.N.R. terminals.....	7,000,000
C.N.R. interior.....	10,875,500
G.T.P.R. interior.....	1,374,000
Midland Railway interior..	235,000
Hudson Bay interior.....	435,000
Alberta Railway and I. Co..	294,000
Total	64,007,395

The number of elevators in the provinces are situated on the various lines as follows:—C.P.R., 975; C.N.R., 396; G.T.P.R., 46; Midland Railway, 8; Hudson Bay Railway, 15; Alberta Railway and Irrigation Co., 15.

Steamboatmen, longshoremen, etc., had a good month. Business transacted at the Port of Montreal, since the opening of navigation, is slightly below that of the previous year. The announcement that the construction of a dry-dock will be begun shortly at this port is regarded as foreshadowing an expansion in foreign trade. The largest floating crane on the continent has been established at the port and is now in operation. Canal traffic has been active though less grain has passed through the St. Lawrence canals than last year. A summary of the traffic through the Sault Ste. Marie canals during the month of June is as follows:—

	U.S. Canal.	Canada Canal.	Total.
Vessel passages, no...	1,895	455	2,350
Registered tonnage, Net.....	4,426,566	1,171,610	5,598,176
<i>Freight—</i>			
East bound, net tons	3,960,689	1,528,667	5,489,356
West bound, net tons	1,229,701	213,348	1,443,049
Total freight, net tons	5,190,390	1,742,015	6,932,405

During the past six months only foreign vessels of a gross tonnage of over 1,500 tons have been allowed to operate between Canadian ports, other craft having been excluded after January 1. An order-in-council dated December, 1908, exempted the larger class from the

restriction. This order-in-council became inoperative on July 1. The result is expected to be an increase in the amount of business available for Canadian vessels.

Under date of July 12, the railway commission issued a uniform code of train rules for Canadian railways, in the matter of a memorial of the Trainmen's Association of Canada having in view the protection of employees.

By order of the Board of Railway Commissioners for Canada, dated July 24, train crews are required to re-adjust loads of lumber, logs and stone on flat and open cars when the latter has shifted in transit, before the car is allowed to proceed. The order also requires that open or flat cars are to be loaded in accordance with rules and regulations from time to time approved by the Master Car Builders' Association. The order was the outcome of representations calling the attention of the Board to a number of accidents, in some instances fatal, caused by cars not affording proper safeguards for the handling of long materials and stone.

On July 8, the Board of Railway Commissioners ordered a return from each of the various railway companies of all highway crossings upon its lines at which an accident has happened since January 1, 1909, by a moving train, causing bodily injury or death, to a person using the crossing. The record is also to be maintained in the future.

The matter of express rates was also dealt with by the commission. An order was issued disallowing the attempted cancellation of the 30 cent rate to fruit growers in the Niagara district in favour of a 40 cent rate. There has been an understanding between the companies and the board that pending the joint revision now under way old rates will be maintained.

By a decision of the Ontario Railway and Municipal Board the height of street car steps will be standardized throughout Ontario as follows:—On open double truck cars from 14 to 16 inches for the first step and 12 to 14 inches for the two other steps. On open single truck cars, 12 to 15 inches for the first step and 9 to

12 inches for the two other steps. On closed double truck cars the first step must be from 14 to 16 inches from the ground, and on closed single truck cars from 12 to 15 inches.

The Trades.

Building.—Reports with regard to building continued to indicate the projection of new work in all lines of construction upon a larger scale than at the corresponding period of last year. Important gains are shown in most of the large cities and towns in the estimated cost of improvements for which permits have been taken out. The trades have been exceptionally free from labour troubles, and at the close of the month indications were for continued activity until the end of the season. The following table shows the extent of building during the first six months of the present year, as compared with the corresponding period of 1908, in nine of the principal cities of the Dominion:

City.	Six months.	Six months
	1908	1909
Toronto.....	\$5,013,245	\$8,829,375
Montreal.....	1,500,000	4,283,910
Winnipeg.....	2,238,250	5,462,450
Vancouver.....	3,354,050	3,410,195
Ottawa.....	875,225	2,607,665
Halifax.....	362,770	374,900
Regina.....	156,183	362,645
Calgary.....	409,090	949,110
Edmonton.....	1,792,810	1,092,220

Metal and woodworking.—The month was active, showing an improvement both when compared with the preceding month and the corresponding period of 1908. Sash and door factories were especially busy in view of the expansion in building, and the employees of wood and metal working establishments generally were employed in larger numbers and with more work in sight than at any time in the past eighteen months.

Printing.—Conditions showed little change compared with the preceding month. Printers were fairly active and bookbinders busy.

Clothing.—These trades continued for the most part well employed.

Textile.—Some improvement in general conditions was noted and the outlook was for more active conditions.

Leather.—Trade was more favourable than in 1908 and the outlook at the end of the month was promising notwithstanding the high price of hides. Trade in trunks and leather goods was improving at many points.

Food and tobacco preparation.—The bread trade was active throughout July, though uncertainty of prices interfered to some extent with business. In Ontario many of the bakers have reduced the weight of the loaf from 20 to 16 ounces in order to meet the advance in the cost of flour. Confectioners were preparing for the fall trade, which is expected to show a considerable advance over last year. The larger flour mills reported a fair trade; the small millers found local trade about average. Cigar-makers and tobacco workers were more active than in June.

Miscellaneous.—Barbers, hotel and restaurant employees, etc., had a good month owing to the tourist trade, the volume of which was larger than in 1908, especially in British Columbia. Domestic servants remained very scarce.

Unskilled labour.—Common labour was very actively employed throughout the several provinces, a scarcity of men being experienced in Western Canada and at other points where the extensive railway construction is in progress, the demand for farm help, and civic improvement operations have absorbed the supply.

Canadian Trade and Revenue.

Foreign trade.—During June, 1909, the total value of imports entered for consumption was \$31,341,542, compared with \$25,294,814 in June, 1908. For the first three months of the fiscal year ending June 30, 1909, the total value of imports entered for consumption was \$82,102,190, compared with \$68,921,107 in the corresponding period of last year. The total value of domestic exports during June, 1909, was \$21,654,000, compared with \$19,887,476 in June, 1908. The total value of domestic exports during the first three months of the fiscal year ending June 30, 1909, was \$49,327,004, compared with \$44,088,776 in the corresponding period of last year. Dur-

ing June there was an increase in exports of the mine, animals and their produce, agriculture and manufactures and a decrease in the fisheries and the forest. The grand total of Canadian trade for June, 1909, amounted to \$55,657,201, compared with \$46,018,303 in June, 1908. For the first three months of the present fiscal year, total Canadian trade was \$135,567,791, compared with \$114,870,967 in the same months of 1908.

A market for Canadian trees for purposes of restoration was reported in Italy by the commercial agents of the department of trade and commerce. A suggestion came from Mexico that Canadian firms do not advertise their wares sufficiently in the local papers. Such advertisements which would appear in Spanish would serve for all the Spanish-speaking governments of South America. An opening for Canadian fish products and flour was reported in Guadeloupe.

Imperial trade.—Canadian maple flooring, maple blocks, maple sugar, maple syrup and cheese are in good demand in Great Britain. An opening for Canadian sheep and oxen was reported in Trinidad. Lack of advertising was stated to be causing loss to Canadian trade in Newfoundland. Canadian vehicles are in demand in South African markets.

Domestic trade.—Wholesale and retail trade was fairly active for the season and the outlook following the favourable crop reports is very promising. Insolvencies have been fewer in number during the first six months of the year than in the corresponding period of 1908. During June the banks increased their commercial loans by nearly \$7,000,000 and their deposits by \$11,000,000. Bank clearings showed a pronounced increase during July. At Montreal, Que., the total clearings for the six months ending June 30 amounted to \$834,900,000, an increase of \$165,000 over the same period of last year. The June total was \$169,031,230, the largest in the history of the clearing house.

The annual statement of the St. Stephen's Bank of St. Stephen, N.B., for the year ended April 30, 1909, shows assets amounting to \$796,789, current loans and discounts \$635,284, deposits \$334,

970, note circulation \$195,390, on a paid up capital of \$200,000 with a reserve of \$55,000.

Canadian securities have been upward during the past few months.

Canadian revenue.—Canadian revenues for the month of July, 1909, amounted to \$8,437,438.94, compared with \$6,663,460.08 in July 1908. For the first four fiscal years 1909–10, to July 31st, 1909, the total revenue was \$30,030,311.91, as against \$25,502,299.26 in the same months of 1908. The total expenditure on capital account during July, 1909, amounted to \$2,414,922.84, compared with \$2,684,502.38 in the same month of 1908. The leading items of expenditure during July, 1909, were public works, railways and canals, \$2,149,055.22; bounties, \$198,074.79; and militia, capital, \$55,000.

Notes.

The *International Association of Accident Underwriters* held its annual convention at Niagara Falls, Ont.

The fifth annual convention of the *Retail Merchants' Association* of the province of Quebec was held at Quebec, Que. Mr. L. F. Hébert, Lachine, and Mr. J. A. Beaudry, Montreal, were re-elected president and secretary respectively.

Arrangements were under discussion for the amalgamation into one company, with a capitalization of \$25,000,000, of the principal *cement* companies operating in Canada. Altogether there are at present 23 cement mills in Canada, completed and building.¹

The ninth annual convention of the Union of Canadian Municipalities was held at Medicine Hat, Alta., on July 26-27 and at Calgary on July 28. Among the subjects discussed were, methods of street widening and expropriation, water filtration and sewage destruction, public utility commissions, western municipal development, government telephone systems, etc.

The Canadian Association of *Stationary Engineers* held its annual convention at London, Ont., July 27–30. The con-

vention by an unanimous vote adopted a recommendation asking the Government to provide for graded certificates for engineers.

The Canadian conference of the *United Garment Workers Union* held a session at Toronto, Ont. All the unions in Ontario with one exception were represented. It was reported that there had been more work in the trade this year than in two years past.

At the annual meeting of the Montreal branch of the Canadian Manufacturers' Association, Mr. William Caldwell was appointed chairman of the branch. Mr. J. S. McKinnon at the annual meeting of the Toronto branch was appointed chairman.

The Canadian Association of *Master Painters and Decorators* held its annual convention at Peterborough, Ont., July 27–29. A number of papers of a technical character were read. A resolution against the painting and decorating of institutions under government or municipal control by day labour was passed.

The *Alberta telephone system* now comprises about 1,400 miles of trunk lines and about 1,600 miles of farmers' rural lines. Since May 1 about 200 miles of trunk and 400 of private lines have been constructed. Six months ago there were 35 exchanges and toll offices in the province; at present there are 65.

The call for the twenty-fifth annual session of the *Trades and Labour Congress* of Canada was issued during July. In outlining the work of the convention the call stated that a pronouncement is needed against military training in the schools and against military and naval equipment.

The Superintendent of *Government Annuities* has issued a circular letter to manufacturers inviting them to cooperate with the department in bringing the annuity plan to the attention of their employees. He further urges employers to assist in the work by contributing to the annual cost. During the seven months ended June 30, total sales of annuities amounted to \$205,000.

On July 7, representatives of a number of Ontario municipalities, including London, Guelph, Waterloo, Berlin, Wood-

¹ For a detailed statement with reference to the cement industry in Canada see the *Labour Gazette* for December, 1908, page 608.

stock, St. Thomas, Peterborough, Preston and Barrie, had an interview with the Hon. the Premier of Ontario. The deputation pointed out that in accordance with the directions of the provincial board of health they were installing systems calculated to *purify sewage*. They have been threatened, however, with action for infringement of patent by a septic tank company. The government was requested to secure a competent opinion as to the rights of the municipalities in the matter.

The 28th Annual Union Meeting of the Canadian divisions of the *International Brotherhood of Locomotive Engineers, and Grand International Auxiliary*, was held at Hamilton, Ont., July 27, 28 and 29th about 1,500 members being present. These annual gatherings are held for social and fraternal purpose; they have no legislative or administrative powers, though considerable time is devoted to the constitution

of matters pertaining to the wellbeing of the Brotherhood. In discussing the Insurance system of the Brotherhood, the meeting expressed its appreciation of the action of the Dominion Treasury Board in granting the Brotherhood authority to conduct an insurance business among its members in accordance with provisions contained in sub-sec. 2, sec. 4, chap. 34. Among the many prominent members present were, Grand Chief Engineer, W. S. Stone; First Grand Engineer, F. W. Prenter; President of Insurance Association, W. E. Futch, and Legislative Representative Calvin Lawrence, also Grand Officer Kennedy, of Winnipeg. The usual civic and other courtesies were extended. In consequence of the Bi-ennial convention taking place at Detroit next year it was deemed inadvisable to hold a Union Meeting in 1910, but a meeting will take place at Toronto, in 1911.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions owing to the strike at Dominion collieries, were not as active as in June. Many of the smaller works, with the building and other outside trades were affected by the unsettled conditions, and will remain dull until the strike is settled, as but little money will be spent on improvement or new work until business becomes more stable.

The Sydney Steel Works had an active month, and were unaffected by the strike. A contract for the construction of one hundred and twenty (120) coke ovens of superior type, was let to a New York company during the month. These ovens will consume about one thousand tons of coal per day, and when they are burning the Steel Company will be able to

increase its output of rods, rails, blooms, etc.

The Nova Scotia Steel and Coal Company had an active month; the coal outputs were large as was also the tonnage of iron produced in the steel plant.

Port Hood and Inverness collieries were affected by labour troubles early in the month, but both collieries were well over their difficulty by the end of the month.

Transportation by rail and water fell off during the month. Wholesale and retail trade was quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Much moisture fell during July, which tended to rapid growth on the uplands. Crops of all kinds are well ahead.

Fishing.—Fish were not abundant during July, although fair catches of cod were obtained.

CONDITION OF PARTICULAR TRADES.

Activity prevailed in the printing, clothing, food and tobacco, and metal

trades, but the building and woodwork-
ing branches were quiet. Unskilled la-
bour was in demand.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported
as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been steady in
all branches during the month. The
output of coal showed a slight decrease
in tonnage compared with the correspond-
ing month of 1908. The Pictou collieries
showed a decrease of about 10,000 tons
for the month of June, 1909, and about
60,000 tons shortage for the six months
ended June, 1909. The total decrease
for the Province for the six months end-
ing June 30th, 1909, amounted to about
425,000 tons. Conditions are favourable
to both labour and business in Westville
and district. A lodge of the United
Mine Workers of America was recently
organized in Westville. There was no
unrest among any of the workmen em-
ployed in the various factories.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy har-
vesting the hay crop, which has been
very much improved by recent rains; the
grain and root crops were also greatly
benefited.

Lumbering.—The lumber trade was
very active in deals and pit timber, and
there is a scarcity in the supply of inch
boards.

Manufacturing.—All branches were
very active.

Mining.—The mines were working
actively, but there appears to be a
shortage of cars. The fireclay works at
the Drummond colliery, which have
been idle for some months, have re-
sumed operations in four places, produc-
ing chiefly ground clay mainly for fur-
nace repairs.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters
and joiners, lathers and plasterers,

painters, decorators and paperhangers
were active. Iron moulders, iron work-
ers and helpers, coremakers, machinists
and engineers, steam engineers, electrical
workers and linemen were busy. Horse-
shoers, jewellers and watch case makers
found trade good. Journeymen tailors,
boot and shoe workers, bakers and con-
fectioners, butchers and meat cutters,
and icehandlers were active. Street rail-
way employees were busy, and cab
drivers, hackmen, carters, draymen,
teamsters and expressmen well em-
ployed. There was an active demand for
unskilled labourers.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, re-
ported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general activity of the labour
market has been well maintained during
July. There has been a falling off in the
issuing of permits as compared with
July, 1908, when there were a total of 89,
with a valuation of \$62,624 as against
(from June 26th to July 27th) 49 permits
with a valuation of \$47,240 for this year.
The grand total issued so far this year,
however, is in excess of that of 1908, and
activity in most lines has been well sus-
tained. Good progress has been made
on the new round house, and the building
will be finished early in September. The
post office repairs have also been pushed
along, as well as other large contracts.
The Royal Bank of Canada has begun
alterations on its premises. Work along
the water front has been more active
than during the corresponding month of
last year, much sugar and deals having
been handled. Importations of oil have
been on the increase, some 550,000 gal-
lons of gasoline and 300,000 gallons of
illuminating oil being landed during the
month and stored at the tanks some
three miles from the city. On July 7, a
large number of hands—machinists, car-
penters, etc., were laid off from the I.C.R.
works, the reducing of the hands at the
government works being done under the
direction of the new Board of Manage-

ment. The machine shops at Moncton, N.B., owned by the government, and destroyed by fire have been replaced; this, it is claimed, had much to do with the laying off of hands along the I.C.R. line, as repair and other work can now be done more quickly than heretofore.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Indications point to an average crop. Native cabbage has replaced American product and is quoted at \$2.25 per barrel. Spanish onions have supplanted Egyptian and are selling at 3½ cents per lb. Owing to the late season strawberries are over ripe and soft. Plums are selling at \$2.25 per crate. Native strawberries, 10–12 cents per box. Potatoes, (P.E.I.) \$1.35 bag. Carrots, per dozen bunches, 90 cents; beets, 60 cents. Prices quoted are wholesale.

Fishing.—During July was dull. Cod and halibut were not as plentiful as in June while mackerel fell off greatly only a few being taken.

Lumbering.—Was quiet. A new company has been founded in Bridgewater, Lunenburg, having a capital of \$50,000, for operations in Manitoba.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a busy month, the best for upwards of a year. Carpenters were about 75 per cent. employed, which was not as good as in June. Painters and decorators had a good month, but were not as fully employed as last month. Plumbers had a fair month. Stone cutters were dull, exceptionally so for the time of year, not half a dozen being employed at the end of the month. Builders' labourers were busy. Electrical workers were also busy. Shipwrights had a fair month.

Printers and pressmen had a fair month. Bookbinders were busy.

Tailors were well employed, but indications pointed to a falling off. Boot and shoe workers were dull. Barbers, hotel, laundry workers, restaurant employees and theatre employees were busy.

Railway station clerks and maintenance of way employees were not as ac-

tive as in June. Street railway employees were busy. Ship labourers and longshoremen were about the same as last month.

Unskilled labour had a fair month.

AMHERST, N. S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in July continued about the same as in the two previous months. There was no special demand for additional help. In the mining centres work was slack. The different manufacturing concerns were running under normal conditions without any special call for more help.

The most interesting industrial event was the transfer of the Rhodes-Curry Company from its old management to a new board of directors. A controlling interest in the stock was purchased by J. M. Robinson & Son of St. John and C. Meredith & Co., of Montreal. Work is decidedly slack in the freight car department of this industry and men are being constantly laid off. The management does not anticipate any improvement until next spring.

No new industries have been begun during the month. Local arrangements have been made for the Amherst Malleable Iron Company to resume work.

This industry was taken over by the Rhodes-Curry Company and will be operated by that concern.

Bank managers reported payments good. Wholesale men stated that business was well up to the average.

The decision of the Conciliation Board on the difficulties between the men and management at Springhill has been received. A meeting of the Lodge was held Thursday evening July 29 to decide what action will be taken.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—July has been a busy month with the farmers. Dry weather prevailed during the earlier part of the

month and unfavourable predictions were made regarding the hay crop. Rains however, saved the situation and the crops are now in splendid shape. Haying has begun and with a demand for farm help. The crops of all kinds in this county promise well.

Fishing.—The lobster season closed this month. The low prices induced a number of packers to close before the end of the season; but the catch was well up to the average.

Lumbering.—Conditions continued active and heavy shipments are being made to Great Britain from outlying parts.

Manufacturing.—Conditions were fairly active in all lines except in car building. Car builders were only working part time and there was no immediate prospect of improvement.

Mining.—Work is slack at Springhill mines the principal colliery of the county. The smaller collieries were fairly active. The Joggins mines are constantly increasing output. The other collieries were holding their own.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters, joiners, lathers and plasterers were fairly busy, but there was no demand except what the local market could supply.

Iron moulders were fairly active. Among machinists, more men have been taken on and conditions are improving.

Woodworkers were inclined to be dull, with car builders dull and a large number out of employment.

Printers were only fairly busy and there was no demand for other workmen in this class.

Tailors and garment makers were very busy, and there was steady work for boot and shoe makers.

Bakers and confectioners were busy. Trunk and bag makers were well employed.

Furriers were more active this month than last.

The beginning of the harvest has absorbed a portion of the unskilled labour, but the supply was more than sufficient for local demands.

CHARLOTTETOWN, P. E. I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during July was practically the same as in June, except that the close of the lobster season meant the ending of a profitable source of employment for a large number of men and girls. The weather was fine for outdoor work which was carried on briskly. In the city good progress was made with the new Canadian Bank of Commerce building and several other lesser contracts. Both wholesale and retail merchants reported a good month. The tourist traffic reached the high water mark, increasing hotel and other business.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The last week of July found hay-making in full progress all over the province, with favourable weather to start with. The crop promises to be about an average one.

Fishing.—The lobster season which is the principal industry closed down along the greater portion of the Island coasts in the middle of the month. The catch this year, was about one third short of that for 1908. A number of the fishermen will engage in cod fishing and other branches of the industry, but a number will be idle until oystering begins in the fall.

Manufacturing.—The few factories were carried on under normal conditions, supply and demand being about equal.

Mining.—Boring for coal, oil and gas was carried on near Wood Islands and a depth of six hundred feet reached without any minerals being met with.

Railroad construction and employment.—The various works were continued and the contract was let for the erection of a new engine house in Charlottetown. Work on the latter will start at once.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, lathers and plasterers plumbers, stonecutters and builders' labourers were active. Carpenters and joiners, painters and paper-hangers, were busy.

Iron moulders, workers and helpers, machinists and engineers, steam engineers, electrical workers, linemen and sheet metal workers, were active. Bicycle workers were busy.

Woodworkers, upholsterers, carriage and waggon makers, and car builders were active.

The other skilled trades were active, with a fair demand for unskilled labour.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

No material changes in the labour market have been noticed, the steady activity which characterized June still prevailing and the outlook for the next two months being reassuring. Building operations are going along briskly; work upon the erection of two large brick and stone blocks has commenced, while cottage building both in the city and suburbs is being extensively carried on. The Provincial Bank of Canada is preparing to erect a three story block upon Main St., and work will begin at once. All local factories have been running full time with their usual quota of employees. A feature of trade in this city during the last month was the unusual number of cheap sales advertised and seemingly well patronized. Wholesale business was reported as healthy and expanding, while retail business was up to the average. June customs, returns showed imports valued at \$74,677 and duty collected \$7,011 being a considerable increase over June 1908, when the imports were \$61,474 and duty \$5,367.67. The board of Education of N.B. has extended the privilege of 2 weeks additional holidays to all country schools making the summer

vacation uniform at 8 weeks. A number of night operators have been laid off by the I. C. R. Board of Management. No changes in hours of labour or rates of wages have been noted. Relations between employers and employees appear cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The month has been excellent for growth and grain and root crops promise well. Hay has recovered from the set back received by the June drought and will average fair. Haying operations are commencing and farmers will be very active for the next two months, farm help is very scarce and wages high. Creameries and butter factories are active and report the flow of milk good.

Fishing.—All classes of fish along the shore have been considerably below the average particularly lobsters.

Lumbering.—Mills were actively employed manufacturing the winter's cut.

Mining.—Quietness prevailed.

Railroad construction.—During June a total of 4,217 men and 768 horses were employed upon the several contracts of the Transcontinental Railway in this province and the estimates for the same month were \$609,987. Counting sidings a total of 60 miles of permanent track has been laid. On the Moncton-Chipman Section 24 miles of permanent track are laid. The Canada Foundry Company has finished the construction of the Canaan Revis Bridge 540 ft. long and 85 ft. high. Work upon the Coal Creek fill requiring about 800,000 cubic yards is now being pushed. Construction work upon the Drummond mine line from Bathurst to the mine has commenced.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy. Carpenters and teamsters were active and in demand. Plumbers were busy and builder's labourers were in good demand.

Normal conditions prevailed in the metal trades.

In the woodworking and furnishing trades, all classes were active.

In the printing and allied trades, very active conditions prevailed.

Journeymen tailors were active and all class of garment workers and milliners were brisk.

Bakers were very busy and butchers fairly so.

The leather trades were quiet.

Barbers were active, the long hours of this craft said to prevent persons from learning the trade. The city barbers close at 6 p.m. Monday, 9 p.m. all other evenings of week except Saturday evening when they close at 12 p.m.

Hotel and theatre employees were busy.

Among transport employees conditions were fairly active, but railway crews say that they are not making the time they did last year. Teamsters and expressmen were active.

For unskilled labour the demand was good at \$1.50 per day.

DISTRICT NOTES.

Sackville.—Work upon the erection of the Ladies' College, which is to be of stone and four stories high, was commenced. The building is to be completed by March 1, 1910, and to cost about \$40,000. An extension is being built to the box factory and considerable other building in progress. The new I. C. R. freight sheds are completed and occupied.

Shediac.—Building operations were brisk, but fishing operations were not up to the average.

Loggieville.—The I. C. R. is constructing a turntable and five stall roundhouse of concrete and brick. The station also is to be moved and re-modeled. A. & R. Loggie's Mill and Box Factory employing about 200 men is actively running. The salmon and lobster catch has not been good, and the pack is below that of last year.

ST. JOHN, N. B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market improved slightly during the month of July, although some

branches remained quiet. Building operations are now being carried on extensively, and carpenters and bricklayers are well employed. Messrs. J. M. Humphrey & Co., have secured the large wooden building on the corner of Clarence and Albion streets, formerly occupied by the National Biscuit Company, and are engaged installing a plant for the manufacture of shoes. It is anticipated that employment will be given to 40 or 50 persons. It is announced that telephone rates will be increased on October 1st.

Bank clearings for the four weeks ending July 22 were \$5,875,515 and for the corresponding period last year \$4,905,335 being \$970,180 greater in 1909 than in 1908, and \$590,230 in excess of the four weeks ending June 24 of the current year.

The following sums were paid out to workmen by the city cashier for the four weeks ending July 23; ferry, \$288.14, water and sewerage, \$5,578.55; public works, \$6,694.23. Total, \$12,560.92.

The exports from St. John to American ports, as declared at the American Consulate, for the quarter ending June 30th, 1909, show a grand total of \$917,392.34.

The following are prices of produce from the boats from up river: Strawberries, 6 to 7 cents per box; cabbage (by the barrel), 40 to 50 cents per dozen; peas, \$1.10 to \$1.20 per bushel; beans, \$1.25 to \$1.40 per bushel; potatoes, 75 cents to \$1.00 per bushel; blueberries, 6 to 8 cents per box, raspberries, 6 to 8 cents per box.

The International Waterways Commission convened at St. John on the 20th of July, and continued its sessions for three days.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from the country districts are that the hay crop will be light this season, but oats and buckwheat will yield largely. Potatoes and garden truck look well. A heavy hail storm on 5th July did considerably damage to crops in several sections of Kings County.

Lumbering.—The "no mark" and mixed mark" logs which have been rafted

and which will be rafted during the balance of the season at the St. John River Log Driving Company's works at Fredericton were auctioned at the Board of Trade rooms on July 21. The spruce logs, which form a greater-portion of the whole, were bought by Messrs. Randolph & Baker at \$13.90 per thousand feet for dead logs and two-thirds price for battens. The Scott Lumber Company, of Fredericton, secured the hemlock at \$5 per thousand, the cedar at \$7.25 and the pine at \$10.10 per thousand.

Railroad construction.—The C. P. R. Co., extending its yard at Bay Shore. Eleven new tracks will be laid, having an average length of 1,200 feet each, and providing storage room for between three and four hundred cars.

CONDITION OF PARTICULAR TRADES.

The building trades were active, and the metal trades were from active to busy, though sheet metal workers were dull. Woodworkers were active and shingle weavers were busy. Printers and pressmen were very busy and bookbinders, tailors and bakers busy. Cigarmakers and brush and broom makers were active. Railway employees were busy and steamboatmen active. Ship labourers were quiet. Street railway employees were busy. Unskilled labour was dull.

DISTRICT NOTES.

Woodstock.—A meeting of the Produce Shippers' Association was held here on July 22. The constitution provides that the association meet four times a year in Florenceville and Andover alternately, and that the initiation fee be \$1.

NEWCASTLE, N. B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Business generally was quiet during July, very little being done outside of the lumber industry. The mills ran steadily, some both night and day. Wages were

about the same as in former summers. There have not been many ships in port so far. All other lines were unusually quiet, and money was somewhat scarce. The repairs were nearly completed on the Presbyterian church. They will cost about \$4,000. Men have been employed all summer levelling and beautifying the burying ground around the church. The contractors were making good progress with the repairs to Harkin's academy and expect to have it ready by the end of the holidays.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop improved greatly since July 1. Up to that time it was a half short of the previous year, as June was cold and wet. The crop, however, will be one third short. The grain crop is looking well, being, ahead of last year, and the root crop is also good.

Fishing.—Fishing was not very good. Mackerel was the only fish yielding a good catch. Salmon and shad have been scarce.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a good month but carpenters and joiners were quiet. Painters have been busy, there being more than usual of that work going on.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and E. Little, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been quiet, the supply of labour being fully equal to the demand. The building trades, however, were more active than in June, and street repairing by the municipality, and the laying of underground conduits by the Bell Telephone Company caused a demand for unskilled labour. The supply of this class, however, was more than adequate. The tourist trade has been up to the average, and hotels have been taxed to their full capacity.

The population of Limoilou according to a recent religious census has doubled since 1896, being at present 2,475. The new car ferry service of the Quebec and Levis Ferry Company was inaugurated on July 14. This will probably assist the trade of the city and is regarded as a permanent feature of freight transportation in the interval which must elapse before the completion of the bridge.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Hay making was in progress. The crop will be heavy this year, the abundant rains of the past month having caused good growth. Other crops, also, have a good appearance and promise heavy yields.

Lumbering.—All the large sawmills in the district have been running to full capacity, working day and night in a large number of cases.

CONDITION OF PARTICULAR TRADES.

In the building trades, bricklayers, carpenters, painters and builders' labourers had an active month, but the other branches were somewhat quiet. The metal trades were generally active, though boiler makers and shipbuilders were quiet. The supply of printers was in excess of the demand, but bookbinders were active. Tailors, boot and shoe workers were quiet with garment workers active. Bakers, butchers and cigar-makers were active. Ice cutters were busy. Hotel and restaurant employees, laundry workers, etc., had a busy month as had the various branches of the railway service and teamsters, hackmen, etc. Ship labourers were quiet and unskilled labour remained in excess of the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally has been well employed, the only class that was some-

what quiet being machinists, but these have picked up a good deal recently. All outside workers have been well employed, with plenty of work ahead. There has been a heavy demand for agricultural labourers, and the supply does not nearly meet it. The new building of the McKinnon, Holmes & Co., Ltd., structural steel manufacturers, is nearing completion. It is 80 feet wide and 140 feet long. The machinery has been purchased, and part of is already on the ground. Tourist traffic is considerably heavier than at this time last year, and railway men are well employed. Wholesalers and retailers reported a good business so far this summer. There has been no changes in wages.

The valuator has completed their work of valuating [the city's property which show that there has been an increase of 86 over last year in population. This is a considerable falling off from the increases of the past five or six years. It is accounted for by the fact that this being an industrial centre came in for a share of the depression prevalent all over Canada. The population now stands at 15,302. From general appearances it would seem that the city would continue prosperous. Several large buildings and other industries are in contemplation, and when the C. P. R. Co. gets its shops it will mean a considerable increase to the population. The city's valuation is roughly estimated at about \$400,000 which will mean an increased revenue to the city of about \$4,800,

The Lotbinière & Megantic Railway Company has just finished a survey of the proposed line between the Quebec bridge and Sherbrooke. It will run through Lysander Falls, Inverness, Lima Bridge and Sherbrooke, a section of country now without railway. The president of the company states that the matter will be pushed with all despatch, as Federal and Provincial subsidies have been secured.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy haying. They report the crop below the average in a good many sections, but not so low as was anticipated: All other crops

are looking well. Farmers have been handicapped by the scarcity of help.

Manufacturing.—Factories have been working to the limit. The carpet company is daily increasing its output. The Paton Co., purchased sometime ago the A. Lomas factory and is having extensive repairs made to the building for a knitting plant.

Mining.—Work is in full progress both at the asbestos and copper properties, with the exception of the Capelton copper mine which closed down some time ago. At Eustis, about 175 men are employed, and about \$6,000 in wages paid monthly.

Railway construction.—There is no railroad construction going on, but the section crews have been augmented for repair work.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were busy.

Machinists and moulders were somewhat quiet but there has been no laying off as was the case last month. Electrical workers, linemen, and jewelers were busy.

The woodworking trades were very busy, with pattern makers active and carriage and waggon makers busy.

Printers, pressmen and bookbinders were busy.

Journeyment ailors were busy, and garment workers active.

Bakers, confectioners and ice cutters were busy, with butchers and cigar-makers active.

Miscellaneous trades were all busy with the exception of furriers and theatre employees.

All branches of transportation were busy during July.

Unskilled labour was very busy.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. V. Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during July has been good. The

building trades as a whole had a more active month than the corresponding month of 1908; many new buildings were being erected and much repair work was being done. Sash and door factories were active, as were boot and shoe factories, but the iron industry was quiet. The J. A. and M. Coté boot and shoe company is adding a wing 63x40 feet, three storeys high, to its factory in order to increase its output to meet growing trade. In the leather industry the month was an excellent one; the Duclos and Payen Company is erecting an addition to its tannery of 100 x 40 feet for the salting and storing of green hides, and another addition of 60 x 30 feet for storing refuse. The Penman factory had a fair month. The confectionery factory had an active month as did the garment making establishments. The G. Tremblay footwear factory, which last year employed from 10 to 12 hands, now employes from 25 to 30. Civic improvement work employed a large number of unskilled labourers. Retail and wholesale trade was fairly active. The banks reported a good month, with fair collections.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Great activity prevailed in this industry. The demand for farm help increased owing to hay cutting. It was anticipated that the season will be a very active one. The price of different kinds of farm produce remains high. Fruit was scarce and sold at good prices.

CONDITION OF PARTICULAR TRADES.

The building and the woodworking trades were generally active but the metal and printing trades were quiet. Tailors and garment workers were busy and boot and shoe workers had a good month. Bakers, confectioners and butchers were busy. Ice handlers had a very active month. The miscellaneous trades were busy as were also the transport branches. Unskilled labour was well employed, and the demand good.

ST. JOHNS AND IBERVILLE, QUE.,
AND DISTRICT.

Mr. A. D. Pepin correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

The labour market was much more active than in June or the corresponding month of 1908. The extensive works which the Dominion government is carrying on gave employment to a large number of men. The Canadian Pacific Railway Company commenced the double tracking of its line; it was reported that the company's new bridge will be completed by next spring. In the government shipyards two scows have been built and launched, and a tug boat is now under way. This made work in the government yards active. Wholesale trade was better in June and July than in 1908. Bank collections were easy, and deposits increased notably. Manufacturing establishments reported a good demand on the whole, with full staffs. Machinery was being placed in the boot and shoe factory which has been opened here and which will begin active operations in September.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy hay-making. Farm products were very high and scarce. Buggy horses were sold at from \$250 to \$275 and were in good demand.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a fair month; the other building trades had a good month. The metal trades reported a good month, with the exception of employees of the Singer Sewing Machine Company which laid off its employees from June 30 to July 26. The printing trades were all well employed. Tailors, garment workers and hat makers were much more active than at the same date last year. Food and tobacco preparation workers reported a good month. Laundry workers were very active; the other

miscellaneous trades had a fair month. Freight handlers and steamboat men were very busy. Carters, hackmen, and delivery employees had plenty to do.

MAISONNEUVE, QUE., AND DIS-
TRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

The labour market was very active. Among some classes of employees the demand was in excess of the supply. With the commencement of civic improvement work in the different towns of the county of Maisonneuve, there will be abundant employment for all classes of workmen, with a slight increase in wages. Up to the present there have been no labour disturbances in Maisonneuve. During the month of July, building permits to the value of \$199,000 have been granted and building seems to be increasing rapidly. The year 1909, promises more extensive building operations than the year 1908.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing establishments in Maisonneuve were working to their full extent and some were increasing their plants. Among the most active may be cited the Kingsbury Footwear Company with 700 employees and an output of 3,000 pairs per day; the Montreal Terra Cotta works with 150 employees; the Watson-Foster Wall Paper Company with 200 employees and an output of 60,000 rolls of paper per day; Dufresne and Lock manufacturing 12,500 pairs of boots and shoes per week with 450 employees; the Warden King hot water furnace and boiler works with 400 employees. Sash and door factories were very active and have all increased their staffs.

CONDITION OF PARTICULAR TRADES.

Bricklayers were very active; masons were somewhat quiet as were also

plumbers, steam and gas-fitters, and painters, plasterers, lathers, stonecutters and builders' labourers were in demand. Tinsmiths had fair employment, and the other branches of the metal trades were active. Woodworkers had a good month. Printers, pressmen and bookbinders were active, with the other branches of the printing trade fairly active. Garment workers had a fair month and the other clothing trades a good month. Bakers, confectioners, cigarmakers and tobacco workers reported a quieter month than the preceding one. Butchers and ice handlers were active. Saddlers were busy; the other leather trades were dull. Barbers and laundry workers were very much in demand. Clerks and stenographers were active for the holiday season; the other miscellaneous trades were busy. Cab drivers, hackmen, draymen and teamsters were active, street railway employees busy and longshoremen and freight handlers fairly well employed. Unskilled labour was busy.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The gross receipts of the Montreal street railway for the past six months amounted to \$1,828,421, compared with \$1,734,069 for the corresponding period of 1908.

The customs receipts for June, 1909, were \$1,336,283, compared with \$1,060,328, in June, 1908, or an increase of \$220,655. For the first three months of the present fiscal year the customs receipts were \$13,089,997, an increase of \$2,364,128 as compared with the same period last year.

The revenues of the port of Montreal for June, 1909, were \$5,329.84, whereas in June 1908, they were \$54,941.20. The following table will show the number of vessels and their tonnage arriving since the opening of navigation up to July 1, in the years 1906, 1907, 1908 and 1909:

Year.	Number of vessels.	Tonnage
1906.....	257	634,790
1907.....	218	75,688
1908.....	246	655,155
1909.....	224	622,649

As was anticipated building operations in Montreal during the first six months of 1909 showed a phenomenal increase as compared with the same period of 1908. The total value of permits granted during that time was \$4,000,000 in 1909, compared with \$1,500,000 in 1908. The value stated in the permits only represents 60 per cent. of the real value. Naturally the months of May and June show the largest activity during the present year and the month of June, 1909, exceeded that of June, 1908, by \$300,000. It seems likely that the record established in 1907 in building operations may be surpassed this season. The total for the year 1907 was \$7,532,136. For six months in 1909 the total is \$3,795,046. To this last amount must be added \$488,864 for permits granted for repairs, or a grand total of \$4,283,910. The total number of permits granted for the first six months of the present year was 3,795 for new buildings and 1,200 for repairs. In 1908, the value of permits for new buildings during the whole year was only \$4,317,753.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This industry was very active.

Manufacturing.—Cotton and rubber factories have been quiet during July.

Railroad construction.—The Montreal Street Railway Company was making heavy repairs to its line in July.

CONDITION OF PARTICULAR TRADES.

The building, printing, food and tobacco preparation, leather and transport trades were active. The metal trades ranged from busy to active. Wood carvers, car builders, pattern makers and gilders were fairly busy, and the other woodworking trades were active. Hat

makers were active; the other clothing trades were busy. Clerks, stenographers, hotel, restaurant and theatre employees were quiet, but barbers, furriers and laundry workers were active. Unskilled labour had a good month.

HULL, QUE., AND DISTRICT.

Mr. Rod. Laferrière, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during July has been very busy, employers having their hands full of orders, and employees having in many instances to work overtime. The condition of the waterpowers is exceptionally favourable to industrial activity. The demand for products is unusually brisk. Several local firms have merged with other similar manufacturing concerns or have increased their capital for the purpose of enlarging their business. Workmen have good opportunities of employment, and wages in the whole field of labour are in a satisfactory condition.

The Cement Company has been merged in a \$25,000,000 Canadian syndicate, and stock holders are offered almost double their original investment. Stock bought at 100 is now worth 180, and is still increasing. The Walters axe factory, an old concern which has been gradually increasing its business, has been incorporated by federal letters patent with a capital of \$300,000, and is embarking in the manufacture of cutlery and knives for industrial purposes, such as moulding knives and others. The E. B. Eddy company has extended its plant for the manufacture of chemical pulp, by the addition of two extra digesters. Common labour is receiving \$2 a day, a price unknown before. Farm help is also receiving \$2 a day, and the probability is that shantymen will command a much higher price this season than last. The comparative scarcity of labour last winter and this spring for shantymen and log drivers sent away a large number of these classes who have sought employment on railway construction. Consequently their number here just now is

limited. Men who were paid \$26 a month last season will likely get \$30 this coming season.

The general prosperity of the city of Hull is evidenced by the last report of the assessors which shows that in the course of the last twelve months, the population has increased from 15,000 to about 16,000, not counting outsiders who work here, while property has increased over one million and a half, and exemptions have decreased by one million.

OTTAWA, ONT., AND DISTRICT.

W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for common and skilled labour became more active during July than at any previous time in the last twelve months. Farm help was scarcest, and wages ranged from \$26 to \$30 a month and board. The civic corporation has improvements under way totalling in cost nearly half a million dollars. Building operations were very active, as evidenced by the record of building permits increasing every month over the corresponding months of other years. The amount for June was \$1,385,000, compared with quarter of a million in 1908. The largest permit was for a new G.T.R. hotel, valued at \$850,000. The contract for this building has been let to an outside company which promises to employ local labour. About 300 men are employed on the Grand Trunk station works and 500 more will be needed when the construction of the hotel begins. The continuance of a steady water supply keeps the mills and factories at the Chaudiere going; this has increased the opportunities for work compared with last season. There has been a cessation of work on the retracking of the Ottawa Electric railway due to the difficulty of getting material and other obstacles and the fact that the principal parts of the line have been finished. All the hands laid off from this work found ready employment elsewhere.

The extensive hiring for the G.T.R. hotel and station drew attention to the wages paid there. The contractors and company announced that men were all paid irrespective of unions what they were considered to be worth. The minimum rate is \$1.48 a day for 10 hours' work. Two cents are kept off for insurance. - Skilled labourers, bricklayers and stone masons belonging to unions receive the union rates. The city scale of wages is the same as last year—\$1.75 for common labour, nine hours a day and \$1.80 to \$2 for skilled men laying concrete sidewalks, etc. Increases went into effect during the month for eight city foremen amounting to 25 cents a day over \$2 formerly paid. The inspector of drains and water mains and street superintendent were each advanced from \$1,500 to \$1,700 a year out of which they have to maintain a horse.

Manufacturers of men's and women's clothing are filled with orders, and girls experienced with power sewing machines are in great demand. The wages range from \$3 to \$9 a week according to efficiency. The increased business is partially attributable to orders for supplies for Grand Trunk Pacific contractors.

The demand is brisk for carriage makers and car builders. The Ottawa Car Works has completed eight cars for the Electric line of Calgary at a value of \$50,000. The company's carriage making branch is busy and were the weather not hot the men would be working overtime. The season has been free from labour disputes.

Wholesale and retail trade has been steady although the lumber and paper trades were quiet. This is attributable to the unsettled state of the United States tariff.

The city assessor reported a marked expansion in the value of property shown by an increase in the total property assessment of four million dollars, from the \$38,400,000 of last year. Real estate transfers have been numerous and there has been a considerable increase in the number of houses offered at from \$16 to \$20 a month.

The counties of Carleton, Renfrew and Lanark have decided to act jointly in the

erection of an hospital for the care of consumptives.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop was light due to dryness in the early summer. The grain and root crops promise to yield exceptionally well in the Ottawa valley. Farmers' help has been very scarce and wages high. Eggs brought 26 cents retail, butter 25 cents, and beef 18 cents all about 10 per cent. higher than at this time a year ago.

Lumbering.—Manufacture of lumber, paper and pulp have been aided by a plentiful water supply. Shipping was quiet in these lines. The St. Lawrence Pulp and Paper Co., began operations on July 20, with a capacity of 35 tons a day of pulp board. The full staff of men is not yet employed.

Railroad construction.—The Ottawa Electric Co. is making a survey of an extension of its line to Beechwood and Notre Dame cemeteries, a distance of a couple of miles. The Canadian Northern Railway has been given permission to enter the city and the company contemplates operating trains between Ottawa and Hawkesbury this autumn.

CONDITION OF PARTICULAR TRADES.

The building trades were very active, but the metal trades were quiet, though line men were busy. Woodworkers and furniture hands were very busy. The printing trades also were busy, and the clothing trades very busy. The leather trades were quiet. Food preparers were busy. Good clerks and stenographers were in demand. Railway employees were busy, and steamboat hands actively employed. Unskilled labour was in active demand.

KINGSTON, ONT., AND DISTRICT

Mr. W. Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market remained for the most part un-

changed during July, though characterized by more activity in some branches than that of the preceding month or the corresponding period of last year. So far, this has been the best season experienced by the building trades in over twenty years, especially insofar as dwelling houses were concerned. Over fifty new houses are in course of construction. Besides these, there are many extensions and additions being made to old houses. It was estimated that if the new dwellings were placed side by side they would cover a distance of five average street blocks. In addition to the buildings already mentioned two new science buildings at Queen's university, to cost over \$130,000, are yet to be commenced. Several other dwellings are also to be included in the work of this season. It is estimated that the building operations this year, exclusive of erections at the Canadian Locomotive Works, will total the sum of \$350,000. Up to the present time the value of the dwellings being erected totals about \$200,000 in value. Similiar activity prevailed in several other branches. The supply of labour was equal to the demand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very active. Abundant rains fell all over this district, and as a result good crops are anticipated.

Fishing.—This industry was dull.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering, ship-building and woodworking trades reported a very active month. Printers, clothiers, bakers, butchers, ice handlers, cigarmakers, tanners, barbers, broom makers, hotel, restaurant and laundry workers reported an active month.

During the month the city council decided by by-law to impose a license fee of \$50 on all Chinese and other laundries. A strong protest was being entered against this action.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in this city during July were much better than during the same month last year, there being few idle men. Nearly all the local industries were running to full capacity with the exception of the Toronto and Belleville Rolling mills which closed down for two weeks in order to make repairs. Both the big cement works at Point Ann were running night and day. The output from these works is very large as nearly one thousand men are employed. The new stone crushing plant at Point Ann has a large number of men employed, many of whom reside in this city. The local canning factories were busy putting down strawberries, peas and raspberries, giving employment to many men. Coopers had a busy month turning out apple and cheese boxes. A large force of unskilled men was employed on the new forty thousand dollars addition to the county buildings. Nearly all branches of the building trades were well engaged during the month. Wholesale and retail merchants as well as the banks reported business active.

CONDITION OF LOCAL INDUSTRIES.

Agriculturists were busy during the month, all hay being taken in. The crop will be below the average. Other grains look well. The rain came a little too late for the hay.

Fishing.—Was inactive.

Lumbering.—Was brisk in the north of the county.

Manufacturing.—Was active in nearly all branches. The principal industries in this vicinity are the two cement plants, the stone workers, the rolling mills, the furniture factories, the Belleville Hardware Company and the Belleville Brass and Steel works all of which were running full time with the exception of the Rolling Mills which closed down for two weeks for repairs.

CONDITION OF PARTICULAR TRADES.

Nearly every branch of the building trades reported an active month, especially bricklayers, masons, carpenters, painters, decorators, stonecutters, plumbers and builders' labourers.

Iron moulders, iron workers and helpers, machinists, engineers, electrical workers, brass workers, blacksmiths, boiler makers, shipwrights, bicycle workers and horseshoers reported a busy month, all the members working full time.

Wood workers of all kinds, upholsterers, polishers, wood carvers and turners, carriage and wagon makers and coopers had a very active month. The Thompson furniture company moved into larger premises.

Both job and newspaper printers as well as pressmen and bookbinders were all fully employed. A local office installed a new Web press this month, the first of the kind in this city.

Journeymen tailors reported a fairly active month.

Bakers, confectioners, butchers, meat cutters, ice cutters and drivers and cigar makers were all active.

Harness makers had a busy month.

Barbers, clerks, stenographers, delivery employees, hotel, restaurant, theatre and laundry workers were all active. Several theatre employees were steadily employed.

Railway conductors, engineers, firemen, telegraphers, switchmen and trackmen had an active month. Steamboatmen as well as employees of sailing vessels had an unusually active month, cheese, cement and iron being mostly handled by water during the summer months. Cab drivers, hackmen, carters and teamsters were busy.

The supply of unskilled labour was about equal to the demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions during July were steadily

improving. The building trades were very busy. The contract for a new Public Library has been let, a local firm securing it. The price is \$21,887.00. All the large factories were busy, some of them working overtime. The Quaker Oats Company was working to full capacity. The Central Milling Company is installing new machinery and by the 1st of September will be turning out four hundred barrels of flour a day. The Wm. Hamilton Co. was very busy, having received several large contracts lately. The General Electric Works were in some departments working overtime and were busy in all departments. A car load of machinery has arrived for a company which will start boring for gas and oil.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop is rather light. Fall wheat presents a promising appearance, also alsike and clover. The farmers are getting a good price for pork, viz., 8 cents for hogs on the foot, the highest paid in any previous season.

Lumbering.—Lumbermen were busy getting logs to the mills.

Manufacturing.—Industrial establishments were active, and showed some improvement over last month.

Railroad construction.—On account of the increased traffic on the main line of the C.P.R., it has been found necessary to contract a meeting siding east of the city half a mile from the station.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, plasterers have been very busy this month. Painters were also busy. Plumbers have been fairly well employed. Builders' labourers were very busy. Iron moulders and core makers were fairly busy, also machinists and electric workers. Wood workers were all well employed. Printers had all they could do. Tailors also had a good month, and bakers were very busy. Cigar makers reported a slight improvement in business. Among railroad employees conditions have been very good. The traffic on the railway

lines was heavy both in freight and passengers. Steamboat men have had all they could handle. Unskilled labour has been well employed.

DISTRICT NOTES.

Hastings.—The first work on this section of the Trent Valley canal started a few days ago, when a gang of men commenced excavating for the water front just above the locks. A larger force of men will be put on soon, and the river front for some distance up will be completely changed by a concrete and steel pier.

Omeme.—Lake Bros., of Lindsay, have been awarded a contract for the building of three thousand four hundred feet of granolithic walks in the village.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Active conditions prevailed during July, the building trade continuing very busy. Civic contracts provided work for a large number. The prospects of a good harvest have given a stimulus to business, and factories are in many cases increasing their output. The large number of tourists arriving during the latter part of the month has been a noticeable factor in local trade.

Building permits were granted during the month of June to the number of 860, representing an approximate value of \$2,011,545, as compared with 595 permits, representing a value of \$1,055,405, for June, 1908. The total number of permits issued for the first six months of the present year was 2,427, representing an approximate value of \$8,829,375, as compared with 1887 permits, representing an approximate value of \$5,013,245, for the first six months of 1908.

Work has been begun on the new buildings in connection with the Western Hospital, Bathurst Street. The largest is a pavilion 126 feet in length of four

storeys, including basement, which will accommodate 75 patients. The cost of the buildings will be \$75,000.

On the 16th, the city Council voted to sell an area of 22 acres in Ashbridges marsh in the eastern part of the city to the National Iron Works, Ltd., for \$35,000. Five acres of the area is land and the remainder under water. The company agree to fill in the portion covered by water within five years, and to expend at least \$100,000 in buildings within one year. Since the acceptance of the offer an injunction to forbid the sale has been applied for by John Ross Robertson on the ground that the area specified contains nearly 27 acres instead of 22.

The president of the Canadian Northern Railway states that the company will construct a line from Niagara Falls to Toronto, using the Electrical Development Co.'s right of way. Work will be begun in a few weeks. The line will subsequently be extended eastward to connect with existing lines at Hawkesbury.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy harvesting. The crop of fall wheat was an excellent one, and spring wheat, oats and other grain crops were looking well, having been much benefited by heavy rains. The fruit crop is generally good, with the exception of berries, which have suffered from too much moisture. Conditions have been favourable for dairying and feed for stock during winter promises to be abundant.

Manufacturing.—The factories were as a rule busy with increasing orders and a satisfactory outlook for the fall trade. Though normal conditions have hardly been reached as yet, there has been a continuous improvement. The agricultural implement manufacturers have made heavy shipments to the west.

The Toronto Bedding Co. will erect a brick factory to cost \$22,000.

H. Disston & Sons, saw manufacturers, will build a factory to cost \$55,000.

CONDITION OF PARTICULAR TRADES.

All the building trades were busy with prospects of an active fall season.

Boiler makers, blacksmiths, moulders, electrical workers, structural steel workers, sheet metal workers were active. Machinists were fairly well employed. Brass workers had steady work. Jewelers and silversmiths had a good month.

Wood working and furnishing trades were generally active.

Custom tailors were quiet. Garment workers, white wear workers and boot and shoe workers had plenty of employment.

Printers, bookbinders and press men had a fair month.

Bakers and butchers were active. Confectioners found trade quiet. Brewers were quiet. Cigar makers fairly well employed.

Leather workers were well employed.

Hotel and restaurant employees, barbers and laundry workers were actively employed. Clerks and salesmen were active, especially during the latter part of the month.

Railway and street railway employees had steady work. Sailors, longshoremen and others connected with navigation had plenty of work.

Unskilled labour was in good demand, but the supply was equal to local requirements.

DISTRICT NOTES.

North Toronto.—The ratepayers on the 17th adopted by-laws authorizing the expenditure of \$140,000 for a sewerage system and \$30,000 for the opening up of parallel roads east and west of Yonge Street.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

July was a good month in practically every branch of industry in this city, and the same conditions prevailed in the surrounding district. There was more employment than in June and anyone who wanted work could find it.

Commercial conditions were not so satisfactory. Weather conditions were unfavourable for retail trade. Wholesale trade and local freight traffic also showed the effects of this condition.

Sewer and paving works employed a number of men and additional contracts were let.

The price of natural gas was raised to 32 cents per thousand feet, less 2 cents per thousand feet for promptly paid bills.

The Canadian Northern railway will soon commence building a line from Niagara Falls to Toronto and Eastern Ontario. From the Falls to Toronto the right-of-way of the Electrical Development Company will be used. The railway will cross the Niagara river here.

Contracts were let for erecting the transforming stations of the Ontario Hydro-Electric Power Commission. The contractors guarantee completion of the buildings by December. No work has been done on this end of the transmission line.

The Ontario Power Company's seventh generator, of ten thousand horsepower, will be ready for use in August.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Heavy rains interfered with the wheat harvest and some damage was done to that crop. Root and vegetable crops are very large and prospects for late fruits are excellent. Agricultural employment was good.

Manufacturing.—All manufacturing concerns were busy. The large plant of the American Cyanamid Company was being brought into operation as fast as its different sections were completed.

Railroad construction.—Large numbers of men were employed by different railways in re-building and improving tracks. The Michigan Central had two hundred men working on its line from Niagara Falls to Niagara-on-the-Lake. Regular railway employment was better than in June.

Work was temporarily suspended on the Dunnville, Wellandport and Beamsville Electric Railway after five miles of grading had been finished and \$20,000 expended. On July 26th, the town-

ships of Gainsboro and Moulton passed by-laws granting bonuses to the railway and it was announced that work would be resumed at once.

CONDITION OF PARTICULAR TRADES.

The building trades were all busy. Bricklayers and masons found conditions improved; lathers and plasterers had enough work to keep them going; carpenters were busy and good men were in demand; painters were quiet; plumbers and fitters were busy, with stone cutters more active than for some time past, and builders' labourers all employed.

Conditions were very satisfactory in the metal and engineering trades. Linemen and electrical workers were busy.

The printing trades were active.

The clothing trades were generally quiet, though more female hands were employed in the shirt factory.

The food and tobacco trades were generally active, though canning factories were having a slack period between the early and late fruit seasons.

Barbers were active; office employees quiet; salespeople active; hotel, restaurant and laundry workers all busy.

Passenger traffic on all railways was heavy, but with the exception of regular "through" freight, other railway business was quiet. All regular employees had steady employment. Steamboat men were well employed. Electric railway trainmen were very busy. Teamsters were busy, and cab drivers and expressmen active.

Unskilled labour was well employed.

DISTRICT NOTES.

Port Colborne.—A newspaper correspondent writes:—

"Although the new wheat crop is not due at the terminal elevators at Port Arthur and Fort William until well on to the end of September, vessel owners are already getting busy obtaining charters for their boats for the long hauls out of these ports to Montreal, Georgian Bay points and Buffalo. The package freight boats plying between Montreal and Lake Superior ports are handling such grain

as is moving, and, being glad to get a cargo of any kind, are taking it back to Montreal at a rate of three cents a bushel."

Welland.—A by-law granting privileges to another natural gas company to do business in the town was carried by a large majority. A glass manufacturing company was incorporated.

The township of *Thorold* passed a by-law fixing the assessment of certain lands for factory sites.

ST. CATHERINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOR MARKET.

July proved a good month for labour. The conditions of the labour market was active to busy, showing a great improvement over previous months. Civic improvement work was greater in volume than for some years past, giving employment to three large gangs of men. The work yet to be done will furnish employment for the balance of the season. A city garbage disposal system has been inaugurated, which will give employment to a number of teams and drivers. An auto-car service has been started. The plan is to establish the Service between St. Catherines and Queenston and Niagara-on-the-Lake. Two cars are already in commission; each car will carry 18 persons.

The Wednesday mid-summer half-holiday which was enjoyed other seasons by the clerks was granted to them again this season. This affects all the retail trades in the city except druggists

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops are proving all that was anticipated. Fruits, vegetables and grains will all be good to heavy crops, the only exception to the rule being the oat crop, which will be poor. All crops so far have brought good returns and the fruit growers and shippers are looking afield for other markets for their products. Recently the fruit shippers secured better express

and freight rates to facilitate the handling of the crops to distant markets. Recent experiments in shipping tender fruits to the western Provinces has proved a success, and it is believed a permanent market will be established there for Ontario fruits instead of California fruits, which are said to be inferior in flavor. Shippers are now shipping for points in the Maritime Provinces, Quebec and westerly beyond Manitoba, St. Catherines and district alone shipping 6,000 to 9,000 crates of berries, cherries, currants, etc., daily, and 4,000 to 6,000 baskets of tomatoes, beans, peas, etc., daily. The prices realized were, if anything, a little better than for last year. Canning factories are running to their full capacities.

Manufacturing.—The Welland Vale Manufacturing Co. has secured a large rush order for harvest tools and have put on a night shift for three or four weeks.

The building trades had a good month.

All branches of the metal and engineering trades were active.

Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers and coopers were well employed.

The allied printing trades were active.

Journymen tailors and boot and shoe workers were active.

The food and tobacco trades were well employed.

Tanners and curriers, leather workers and saddlers had a good month.

Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees and laundry workers reported a good month.

All lines of transportation were busy.

Unskilled labour was active and had a better month than in June.

DISTRICT NOTES.

Thorold.—The condition of the labour market for July was active, with labour well employed.

Merriton.—All the mills and factories were running full time and report conditions active.

Port Dalhousie.—The favorable conditions continued.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions during the month have realized to some extent the expectations of improvement mentioned last month. A revival of business in the factories was noted, and the number of extensions to manufacturing plants now being arranged for would indicate that the firms interested are confident that the improvement in trade conditions will be progressive. Building permits for the month totaled \$205,475; in July 1908, \$156,250, an increase for this year of \$49,225. Reports from architects and builders indicate that an unusually large amount of building will be done this year. A good deal of this work is still in the preparatory stages, however, with the result that bricklayers and plasterers have experienced a rather dull month, though the other building trades have been fairly well employed. Among new building and extensions in prospect are the following: Thomas C. Watkins, extension to dry goods establishment, \$50,000; I.O.O.F. Temple, \$25,000; Chipman-Holton Knitting Co., \$20,000; D. Morton Soap Works, \$10,000; Tallman Brass and Metal Co., \$10,000; Acme Stamp and Tool Co., \$20,000; Otis-Fenson Elevator Co., two new buildings; Hamilton Bridge and Tool Co., extensive additions; Frost Wire Fence Co., \$10,000; Canada Steel Goods Co., \$5,000; Dowswell Manufacturing Co., \$15,000; Storage and Transfer Co., \$10,000; Hamilton Warehouse and Forwarding Co., \$20,000; Barton Street School, \$40,000; Victoria Avenue School addition, \$50,000; Meriden Britannia Co., \$15,000; St. Joseph's Convent Boys' Orphanage, \$15,000; Bank of Montreal, branch, \$12,000; Bank of Hamilton, branch, \$15,000; All Saints' Church, addition, \$16,000; Hamilton Cotton Co., large addition; Y.M.C.A., new building, boys' department, \$50,000. In addition to this formidable list other extensions to fact-

ories and a number of fine residences are being arranged for which will add about \$100,000 more to the total value of the city's buildings before the year closes.

General labour has been pretty well employed during the month, but a party of workmen who came down from Northern Ontario seeking work found that there were plenty of men already here to supply all demands.

The Street Railway Co. has about completed the relaying of its tracks, and the board of works employees are busy laying down permanent pavements on the streets occupied by the car lines. No labor difficulties occurred during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fruit season has opened auspiciously, and large crops of berries and small fruits were marketed and brought good prices. Vegetables were also plentiful, and of excellent quality. The canning factories are busy, and are receiving large supplies.

Manufacturing.—Nearly all industrial establishments reported improving conditions. The exceptions are the air-brake department of the Westinghouse Co., and the stove foundries. The Westinghouse electric department is extremely busy.

The Tungsten Lamp Co. has been organized, with a capital of \$300,000, to manufacture an improved electric lamp. It has acquired the Ontario Lantern and Lamp Co., and will make extensive additions to the plant. The company is composed of Hamilton men.

Railroad construction.—Evidences accumulate that the city is to be served by several additional railroads before the year closes. Representatives of the Canadian Northern have assured the city authorities that their trains will be running into Hamilton this year. Other roads expected are the Canadian Pacific Guelph Junction Line, the Hamilton, Waterloo and Guelph Electric Railway, and the extension of the Radial Electric Railway from Oakville to Toronto.

CONDITION OF PARTICULAR TRADES.

Improved conditions were the rule in most of the trades. There were fewer

idle men than at any time in the last two years. The moulders in the stove foundries were still on strike, and conditions remain practically the same as last month. Carpenters are working at the 35c an hour rate, but without a signed agreement. They reported a fair amount of work. Bricklayers were not very busy. Plasterers were dull. Lathers were busy. Painters had enough to keep them going. Plumbers had plenty of work. Stonecutters were all working. Builders' labourers were rather slack. Iron moulders in jobbing shops had a pretty good month, stove foundries were dull. Machinists reported conditions good. Many stove-mounters have left the city through lack of work. Metal polishers were all working. Blacksmiths and horseshoers were quiet. Sheet metal workers were busy. Woodworkers were fairly well employed. Pattern makers were fair. The allied printing trades reported business good. Custom tailors were fair. Garment workers active. Boot and shoe workers were very busy. Cigarmakers were all employed, as were tobacco workers. Barbers were all working. Broom makers good. Hotel and restaurant employees had a good month. Railroad and steamboat employees have been very busy. Street railway employees had a good month, and teamsters had all they could do. Unskilled labourers have been well employed, but were able to supply all demands.

DISTRICT NOTES.

Dundas.—On July 23rd, the transformer station of the Cataract Power Co. here was struck by lightning and completely destroyed in the fire resulting. John Hayman, of London, has been awarded the contract for building the transformer station at Dundas by the Hydro-Electric commission. The estimated cost is \$40,000.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market continued to improve. The Iron

trades remained about the same as last month, but the building trades were busier, while the opportunities for the employment of unskilled labour increased.

The Cockshutt Plough Company is building several large additions, and the Brantford Roofing Company has had an especially busy season.

Merchants had a satisfactory month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy. The hay crop in some localities is a little light.

Manufacturing.—The majority of the factories were busy.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers plasterers and painters were busy. Plumbers, gas and steamfitters were active.

Iron moulders and coremakers were active and in some cases busy. Machinists, engineers, electrical workers, linemen, metal polishers and buffers and stove mounters were active. Blacksmiths were busy, with boiler makers active. Sheet metal workers were a little quiet. Horse shoers were active. Carriage and wagon makers, pattern makers and coopers were active.

The printing and allied trades were active, though some branches were not so busy as last month.

Tailors and tailoresses were less active than last month. Bakers, confectioners and butchers were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were fairly busy. Barbers, clerks, delivery employees, hotel and restaurant employees were steadily employed. Laundry workers were busy. Railroad trackmen and freight handlers, street railway employees, teamsters and draymen were busy. Expressmen and cab drivers were active. There were few unskilled labourers unemployed.

DISTRICT NOTES.

Paris.—The fabric mills and factories were fairly busy.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in general was actively employed during July.

In the building trades workmen were well employed with practically no lost time. Manufacturers for the most part continued to run full time, and in some cases were busy. The paving of several of the principal streets has been commenced, and this with the addition of work on the surface drains gave employment to a large force of labourers. The Water Commissioners have completed the new water conduct and the citizens are now enjoying a good supply of pure spring water. The Light and Heat Commissioners have a number of electrical linemen employed getting lines in readiness for Niagara power. Tenders have been called for by the Ontario Government for the new power distributing station. Wholesale and retail merchants reported trade fair. Customs returns for the month of June were \$15,127.32, an increase of \$6,251.48 over June, 1908.

Owing to the advance in the price of flour, bakers have reduced the weight of a ten cent loaf from two and one half to two pounds. No change in rates of wages or hours of labour and no trouble in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy haying, and reported a fair crop. Grain crops are looking well in most localities.

Manufacturing.—Manufacturers had a good month, but a slackness was noticeable in some lines.

CONDITION OF PARTICULAR TRADES.

Bricklayers, builders' labourers and masons had an active month. Carpenters, joiners, lathers and plasterers were busy.

Plumbers had a good month. Stone-cutters were very busy.

Iron moulders had a fair month, and stove plate moulders were busy, as were tube mill workers. Electrical linemen were all well employed.

Carriage makers reported trade slack. Piano and organ workers had a fair month.

Printers were all employed and business was fair.

Journeyman tailors were slack, but female garment workers were busy, Brussels carpet weavers reported a slight improvement over last month.

Teamsters and draymen had a good month.

Unskilled labour was well employed, very few men being idle.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour, both skilled and unskilled, was well employed during the month, employment being more plentiful than in the previous month. As in the corresponding month of last year, the supply of labour was equal to the demand, except in the case of cabinet makers. Finishers and machine hands were needed at the Waterloo School Office and Fixture Company's factory. There were five building permits issued during the month, one being for the Bell Telephone Company's office to cost \$14,000, and the others for residences. The total value of the five permits amounted to \$20,500. Good progress was made on the erection of the Star White Ware Company's building, the J. M. Schneider packing house, and the Kuipfel laundry building. Progress was somewhat slow with the completion of the Chas. A. Ahrens' shoe factory building. The Heahn and Stumpf blocks are ready for the brick. The Bank of Toronto moved into its new building on the first of the month. Transportation was reported active, and bank clearings, wholesale and retail trade satisfactory. Brick-

layers and masons received their increase from 35c to 40c per hour as agreed in June.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy harvesting hay and fall wheat, which are fairly good crops throughout this district, and in marketing produce. Market quotations were as follows:—

Butter per lb., 22c.; eggs per dozen, 20 to 22c.; chickens, each, 40 to 60c.; cherries, per 5 quart pail, 40c.; cherries, small basket, 50 to 60c.; red raspberries, per box, 10c.; black raspberries, per box, 10c.; currants per box, 5c.; green peas, per pint, 5c.; cabbage, per head, 5 to 7c.; cauliflower, per head, 5 to 10c.; other small vegetables, 5c. per bunch; summer sausage, 20c. per lb.; potatoes, 86c. per bag; honey, in jar, 55c.; farmers' cheese, 14 to 16c. per lb.; hay \$9.00 to \$10.00 per ton, and oats, 67c. per bushel.

Manufacturing.—Steady conditions prevailed in manufacturing establishments, with a slight improvement over last month. The Berlin Button Company's factory and the Shantz foundry were running overtime. About fifty workmen were employed overhauling and remodelling the sugar factory.

CONDITIONS OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners were busy. Lathers and plasterers, painters, decorators and paperhangers, plumbers, gas-fitters, steam-fitters, stone cutters and builders' labourers were active. Iron moulders, iron workers and helpers, coremakers, machinists, engineers steam engineers, electrical workers and linemen were busy. Other employees engaged in the iron trades were more or less active, with horseshoers somewhat inactive. Active conditions prevailed in the woodworking trades. Printers, pressmen, electro-typers, and bookbinders reported busy conditions. Journeyman tailors, garment workers, boot and shoe workers were active, with bakers, confectioners, butchers and meat cutters busy. Cigar makers and tobacco workers were reported somewhat inactive. Leather workers, tanners and curriers, saddlers, trunk and bag makers reported a busy month. Rubber workers, button turners, shirt and collar makers also were busy, as were barbers, broom makers, clerks and delivery employees. Busy conditions prevailed in the laundries and among suspender makers. Railway employees re-

ported a busy month. Street railway employees, cab drivers, teamsters and expressmen were reported busy. Unskilled labour was fully employed.

WOODSTOCK, ONT., AND DISTRICT.

Mr. W. McElheran, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market for July was normal. In some manufacturing lines increased activity prevailed, while in others there was a falling off.

In the building trades, and among wagon manufacturers especially there was a marked increase of employment.

A strike which occurred in the earlier part of the month affecting a railroad construction gang on the C.P.R. (previously reported) was of short duration, and did not create any material interruption.

DISTRICT NOTES.

Ingersoll.—Permission was granted by the Town Council to the Tilsonburg, Lake Erie and Pacific Railroad for an extension of their lines through the town of Ingersoll. The proposed extension will connect with the line now in operation to St. Mary's, the present terminus of which is Woodstock.

Negotiations were under way for the purchase by the town of the Ingersoll Electric Light and Power Co.

Building operations were very brisk, several new dwellings and large additions to public buildings being under way.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy. In the earlier part the dry weather caused some alarm for the crops, but timely rain prevented any possibility of poor crops. With the possible exception of the oat crop, the straw of which was rather short, all crops were most promising. Before the end of the month all the wheat was cut and in some localities threshed, and turned out good yields of good quality.

Prices for all kinds of produce remained firm. Live hogs sold for as high as \$8.10 per hundred, butter for 27c., eggs 19 and 20c. per doz. Cheese 11³/₄c. per lb.

Manufacturing.—The lay-off at the furniture factories continued until about the 24th of the month, when full staffs were put on again.

With the favourable weather all outside work was hurried along, giving employment to every available man. Work on the county roads went forward with dispatch. Both the C.P.R. and G.T.R. had construction gangs at work on roadbeds and putting in cement culverts, abutments, etc.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were all employed. Work on the new factory for the Oxford Knitting Co. was completed, and the company was moving into its new quarters.

Carpenters were nearly all employed and there was a brisk demand for men. Lathers and plasterers were active. Painters were very busy. Plumbers were quiet, as were also gas and steamfitters. Stonecutters were all busy. Builders' labourers were active. Stove moulders were not very busy, the chief work being on goods for the western trade, which was brisk. Machinists were busy, there being a demand for good men qualified to take responsible work. Stove mounters were busy. Horseshoers were quiet. Woodworkers had a very quiet month, particularly those employed in the furniture trades. The annual lay off for stock taking purposes continued until about the 24th of the month, when all hands were again taken on. Church organ makers were quiet. Piano and reed organ workers were busy. Wire fence operators were laid off, this being the dull season, but all the men were secured positions in other factories until operations are again commenced in September. Carriage and wagon makers were very busy, these trades assuming their old time activity.

Printers and pressmen were quiet.

Journeyman tailors reported a particularly busy month.

Bakers and confectioners were rushed. Cigar makers were busy.

Barbers and laundry workers were busy. Freight handlers reported unusual activity for the month.

The unskilled labour market was active.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

July proved a good month for labour, general activity prevailing. The work of dredging the river and building the new dam is well under way and has given employment to a large gang of men and a number of teams. The building trades continued active and in the local industries conditions have been very good. The Red Star Brick and Tile Co. started operations with 15 hands at work with prospects of the number being increased to 25. The Grand Trunk shop employees were put on full time of 55 hours a week, an increase of ten hours over the last three months, and the prospects are for continued full time schedule.

Wholesale and retail merchants reported business very good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy and in many cases had to leave the hay to harvest the wheat. Reports so far of the crops are very favourable.

Markets have been well attended. A plentiful supply of produce has been offered and the prices remain the same as last month, though butter and eggs have advanced a few cents.

Manufacturing.—Active conditions prevailed in all lines.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were busy, painters and plumbers were active. Builders' labourers were well employed.

Iron moulders, workers and machinists had a busy month, boilermakers and horseshoers were active.

Woodworkers, upholsterers and polishers reported trade very good. Carriage and wagon makers were busy. Coopers did a good trade.

Printers had a good month.

Journeyman tailors were busy and all engaged in the factories were active.

The bakers have reduced the weight of the loaf from 24 to 20 oz., the price being the same, 5 cents. Butchers are doing a good business. Cigar makers were busy. Ice-handlers were very busy.

Barbers, clerks, and delivery employees were busy. Hotel, restaurant and laundry workers were very busy.

Railroad conductors, engineers and firemen were busy owing to the additional summer service, trackmen and freight handlers were active. Cabdrivers, draymen and teamsters were well employed.

Unskilled labour had plenty of work.

DISTRICT NOTES.

St. Mary's.—The North American Oil and Gas Co., which had drillers put down a well, are now to the depth of 3,050 ft., but did not strike any oil, only had a slight touch of gas, not sufficient to be of any value. They will put another one a few miles north-east of St. Mary's. A \$6,000 wing is to be built to the Collegiate Institute School. The \$6,000 is to be raised on a 30-year debenture loan.

The crops in this district never looked better.

Goderich.—The town council has decided to submit to the rate-payers a by-law to guarantee the bonds of the Canadian Good Roads Machine Co. to the extent of \$40,000 on a security of \$70,000.

The company is a branch of the American Good Roads Machine Co., of Kenneth Square, and is now located at Hamilton.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was employed to its utmost capacity during July. At the

Car Shops they are taking on hands, especially carpenters, and are working full time for the first time this year. In the building trades a lot of small work is in progress, but indications are not very good for later on. On the railroads construction gangs are at work in both directions out of the city, laying new rails and ballasting, and in the factories and foundries work is going along steadily, though not on the scale of three years ago. At Leonard's foundry a two weeks shut down took place for stock taking. A local cigar firm has taken out a permit to build a \$7000 factory on a new site.

June building permits totalled \$127,639 for 117 permits. In 1908, 22 permits were taken out, valued at \$61,800. For the half year ending June 30th the permits were 410 valued at \$557,739.

The bakers of the city have reduced the size of the loaf from $1\frac{1}{4}$ and $1\frac{1}{2}$ to 1 lb, at the same price, 5 cents a loaf.

The city's revenue from the London and Port Stanley Railway, owned by the city and leased to the Pere Marquette Ry., has fallen from \$6,706.21 in 1907, to \$3,397.79 in 1908, caused by the completion of the London and South Western Traction Co.

The Annual Report of the Charities Organization Society has just been issued. This society's wood-cutting scheme did much to solve the problem of the unemployed in this city in the winter of 1908 and 1909. The men were paid at the rate of \$1 a cord, and the work was done in the different woodyards by means of an arrangement made by the society with the proprietors. In the winter of 1908, commencing on Jan. 1, 504 $\frac{1}{2}$ cords were cut, for which \$504.57 was paid in wages to the men. Of this amount 70 cents per cord comes out of the society's funds, the remaining 30 cents being paid by the woodyard proprietors. Work was so scarce that the society commenced the wood-cutting again early in November of 1908, and in November and December 164 $\frac{1}{4}$ cords were cut, and \$164.25 paid in wages. During the remainder of the winter from Jan. 1 to May 31, 1909, 571 cords were cut and \$571.12 paid out in wages. When a man is able to work it is better to give him work than charity, and

one certainly cannot reckon in figures the self-respect and independence of spirit which by this means the men were able to retain, at the same time that they and their families were being assisted over the hard times. In fact, many men were glad to get this work to do, who could not under any circumstances have been prevailed on to accept charity, even though they were in the direst need."

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, lathers, plasterers and painters were all busy. Plumbers reported trade fair. Stonecutters and builders' labourers were busy.

Iron moulders were busy, and iron workers at the rolling mills very busy. Machinists reported trade very good. Metal polishers and stove mounters were busy.

Car builders were busier than at any other time this year. Coopers were busy.

Printers and pressmen reported trade good, and everybody working. Lithographers were busy.

Journeymen tailors reported work slack. Garment workers were busy. Boot and shoe workers were rushed.

Cigar makers were fairly well engaged.

Tanners and curriers were very busy.

Railroad train crews had an exceptionally good month, a large number of special trains were run. Teamsters reported a lot of work on hand.

Unskilled labourers are all working at present, but prospects are not very good for the fall.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of July was an active one for labour in this city and district, and all hands were well employed. The supply was not quite equal to the demand, especially among skilled mechanics. The work done in the building trades was chiefly on residences. Unskilled labour was in demand, and there was no need of

any person being idle. In the local industries, the month was a good average, workmen being steadily employed. The railway employees on the regular list have been making day for day, and spare men have been fairly well employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The continued dry weather has seriously affected the oat crop in this district, and there will not be more than a two-thirds crop. The crop of barley will also be below the average. The wheat crop was exceptionally good, and the hay crop heavy. The potato crop is not above the average. Raspberries will not be plentiful.

CONDITION OF PARTICULAR TRADES.

Building, all hands were well employed. Metal, engineering and shipbuilding workmen were well employed. Wood-working and carriage makers reported an active month.

Printing and allied printers were well employed. Machine men were in demand.

Unskilled labour was well employed.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The conditions of the labour market during July has been fully as active as in the preceding month. While the building permits have not been large, work has not shown any slackening tendency. Factories have been busy. The Gananoque Spring and Axle Co., has acquired a controlling interest in the Dowsley Spring and Axle Works of this city, and will in a short time start operations; this will require more skilled mechanics. The Company expects in a short time to enlarge the entire plant. There have been no disturbances in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had a very busy month. The season being some two

weeks late has been the means of bringing the hay and wheat harvest close together. Threshing commenced the last of the month and some large yields of wheat were reported with the quality excellent. Hay was light in many parts of the district, owing to the long dry spell. Live hogs brought the record price of \$8.25 per hundred, and butter 25cts. a lb., and eggs 25cts. a doz. Wheat brings \$1.00, standard. With present prices farmers expect a good profit for 1909.

Railroad construction.—The C.W. and L. E. Electric R. R. has all the necessary papers signed for the extension of the road to Pain Court, a distance of 3½ miles, in the Township of Dover, and a large number of men will commence work at once.

The town of Blenheim will submit a by-law to the rate-payers of that town on Aug. 22nd to grant a franchise to the Company to extend the line through the town.

CONDITION OF PARTICULAR TRADES

Bricklayers, carpenters and joiners, plasterers, painters, plumbers and builders' labourers had a busy month.

Machinists and engineers had a fairly good month. Electrical workers and line men reported only fair conditions.

Wood-workers, carriage and wagon makers were busy.

Printers, pressmen and book-binders were busy.

Journeymen tailors reported trade somewhat slack, but bakers and confectioners were brisk. Barbers, hotel and restaurant employees were busy.

Unskilled labour was fully employed.

WINDSOR, ONT., AND DISTRICT

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

July has been a busy month in industrial circles, particularly in the building trades. Good men were in demand, and the prospects look good to the end of the season, as there is a lot of work coming out.

A contract has been let for a separate school, costing \$16,000. The C.P.R. Company is building a \$10,000 addition to its round house. Several dwellings have been contracted for. The board of works is building several cement walks and paving a number of streets; this is giving employment to a large number of teams and unskilled labourers. Shield work on the Windsor approach to the Detroit river tunnel has been completed and the force of miners, about 200, has been paid off, though about 150 are still employed building the approach to the tunnel. Wholesale and retail merchants reported the best month's trade of the season.

The C.P.R. Co., has increased the pay of its freight handlers from 20cts to 25cts per hour.

All the building trades and manufacturers stop work at Saturday noon during July and August. Clerks have a half holiday on Thursdays.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy haying. The crop is a heavy one and a good deal better than a year ago.

Manufacturing.—Manufacturers were very busy, especially the planing mills, which were worked to their limit.

CONDITION OF PARTICULAR TRADES.

The building trades on the whole were busy. All branches of the metal engineering and shipbuilding trades were busy. The woodworkers and furnishing trades were working full time and some of them were very busy. Printers, both news and job, had an active month, every member of the trade being employed. Journey-men tailors reported a very active month. Garment workers were very busy. Bakers, butchers and meat cutters had an active month. Ice-dealers were busy and cigar makers active. Harness makers were busy. Barbers, clerks, hotel, restaurant and laundry workers were well employed. Railway employees had a good month. Steamboatmen were busy. Carters and teamsters were active. Unskilled labour was well employed.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General business conditions were fair during July and opportunities for employment good. Tourist trade was about up to the average. The supply and demand of labour were well balanced. The Algoma Steel Company was proceeding with the erection of a blast furnace (making a total of three) and a rolling mill for the manufacture of structural shapes and merchant bar.

Prices of provisions were as follows:—

Beef, boiling.....	7 to 8	cts. per lb.
" stew.....	8 to 10	"
" shoulder roast.....	8 to 12½	"
" rib.....	12½ to 15	"
" steak.....	12½ to 18	"
Pork.....	14 to 17	"
Veal.....	8 to 15	"
Mutton.....	8 to 18	"
Lamb.....	18 to 22	"
Bacon.....	20	"
Ham.....	18	"
Lake trout.....	10	"
White fish.....	12	"
Eggs.....	24	" doz.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fair conditions prevailed but continued dry weather for a good portion of the season has been a somewhat unfavourable feature. Wild berries were plentiful.

Fishing was carried on as usual, mostly by Indians and half breeds.

Lumbering.—Lumbermen were estimating the demand preparatory to going into the woods for the season. Prospects were reported good.

Mining.—Very little was being done in mining in the immediate vicinity, but prospecting was being actively engaged in and rich finds were reported.

CONDITIONS OF PARTICULAR TRADES.

Normal conditions prevailed in the various skilled trades.

PORT ARTHUR AND FORT WILLIAM ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have greatly improved in this district during the last six weeks. All trades are now busy and skilled and unskilled labour is generally fully employed.

Building contracts are in full progress. Many important business premises are being erected, and in the residential portions of these two cities many handsome houses and comfortable cottages are being erected. In Port Arthur the Board of Education has let the contract for the new Collegiate Institute; the work was commenced on the 8th of July. The builder's contract was for \$89,856 while the plumbing, heating and ventilation will cost about \$11,000. The contract is to be completed on July 1st, 1910. Other important blocks both at Fort William and Port Arthur will ensure a busy winter for many building operatives.

The transport trade is getting back to the busier conditions existing prior to the depression of last year.

New industries are being projected and almost every week the city councils have proposals laid before them. The most important of these is the proposition for a dry dock which the people of Port Arthur will vote on early in August.

With the exception of the dispute between the Canada Bridge Co., and the structural iron workers, there has been no friction between employers and employed during July. The dispute between the structural iron workers and the Canada Bridge Co., is on account of the latter employing imported iron workers at from 25 to 40 cents an hour for a ten hour day. The price asked by local iron workers is 50 cents an hour for a nine hour day. Twenty-three of the local iron workers are rate-payers and property owners in Fort William. A deputation from the Trades and Labour Councils of Fort William and Port Arthur waited on the city council in the matter,

and the opportunity was taken at Port Arthur to ask that a fair wage clause be placed in the agreement re the proposed dry dock scheme. The Port Arthur City council has by resolution decided to have a fair wage clause inserted.

The city authorities are doing considerable local improvement. Extensions have been begun on the Street Railway.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Workmen generally are well employed, but there is likely to be a shortage of common labour as soon as harvest operations commence. In the skilled trades, in particular lines, there is a shortage of men.

Negotiations between the cities of St. Boniface and Winnipeg and the representatives of the National Transcontinental Railroad respecting the construction of a joint traffic and railroad bridge over the Red River have been broken off on account of the inability of the two cities to agree as to the distribution of the cost. The representative of the National Transcontinental stated that the bridge would be erected for the railroad alone.

During the month the usual industrial exhibition was held and the attendance was better than usual. In the manufacturers' building the space was wholly taken up. A contest of motors for agricultural purposes was held.

During the month the number of building permits issued was very much in excess of the number for the corresponding month of last year and the activity in building is very exceptional.

The difficulties between the railroad workers and the companies referred to last month have been settled by the Board appointed under the Industrial Disputes Investigation Act.

On July 28th, 175 men employed in the sheet metal working trades went out on strike. The cause of the strike was a refusal of the masters to acquiesce in a

demand for an advance in pay from 39 cents per hour to 42½. A schedule was in force up to April last providing for 39 cents but since that time the men have been trying to arrange a new schedule on the basis of 42½. At the time the strike was declared there was activity in that line of trade.

Bank clearings, traffic returns and reports from wholesale houses all indicate increasing business.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—It is estimated that the number of men that will be required from external points to harvest the crop will be approximately 18,000. At the present time the indications are that the crop will be a heavy one and, though slightly late, is expected to yield over 100,000,000 bushels of wheat alone. Lateness which exposes it to frost is the only danger now anticipated. The weather has been such as to give encouragement to rust but so far none has been reported from the Canadian west. Allowing for losses through frost and rust there will still remain employment for 18,000 more men than is available in the provinces themselves.

For moving the crop the railroad companies are making extensive preparations. The Canadian Pacific Railway expects to have 18,000 box cars in operation, which is about twenty per cent more than last year; the Canadian Northern Railway will have 9,000, the Grand Trunk Pacific 5,000, the Alberta Railway and Irrigation Company, the Midland Railway Company, the Brandon, Saskatchewan and Hudsons' Bay Railway Co., about 3,000, and in all over 700 engines will be employed.

Several new elevator companies are erecting elevators on the new lines just being opened up for traffic. At the beginning of the present season the grain capacity of all elevators west of Winnipeg was about 44,000,000 bushels, made up as follows: C.P.R., 29,041,900; C.N.R., 10,297,500; Alberta Railway & I company, 294,000; G.T.P., 1,374,000; B.S. & H.B. Railway, 435,000, and Midland Railway, 235,000.

Other grains than wheat are looking exceptionally well and the yield from

them will it is anticipated be very much better than the average.

Railroad construction.—In so far as the supply of men is concerned there is already a scarcity. Employment agencies will not however, send out to the camps other than experienced men or those that are physically suitable for the work.

CONDITION OF PARTICULAR TRADES

In the building trades there is activity and all the available men are at work. All the large structures in course of erection are being rushed so as to be roofed before the cold weather sets in. Several new buildings were started during the month, including a large new public school to be erected in the western portion of the city.

Electrical workers and telephone construction hands were all fully employed. The Telephone Commissioners have made a statement to the effect that applications are in their hands for the installation of over 3,000 new phones. Several municipal and private systems are being taken over by the government upon the initiative of the former.

In the printing trades there was some dullness; with the exception of a few houses that devote special attention to the equipment of the grain elevators with stationery, the plants as a rule were slack.

NOTES.

The Government of Manitoba has intimated to the chairman of the provisional committee of the Centennial Exhibition proposal that they will recommend an appropriation of \$250,000 towards the cost of making an exhibit for the province and aiding the project.

The Trades and Labour Council are petitioning the local government with a view to the appointment of a royal commission to enquire into the law respecting compensation for injuries to workmen.

A motorman in the employ of the Electric Street Railway Company has been arrested and charged with manslaughter. He was in charge of a street car which in turning from Logan Avenue on to Main street crushed two men against a car that

was turning on to Logan Ave. from Main at the same time. It is contrary to the Company's regulations for cars to pass each other in turning from one street to another.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been marked improvement in the condition of the Labour Market during the past month. All classes of labour were in fair demand. An ever increasing number of buildings are under way and the majority of the building trades are employed. Advertisements appeared in the local papers for stonemasons and carpenters. Permits for new buildings are issued every day, and already exceed last year's total. Work is well progressed on the new brick factory for Messrs. McDiarmid and Clark. The new Court House being built by the Provincial Government is ready for its second floor. The basement is finished for a new block on Ninth St. Messrs. Trotter and Trotter have announced their intention of building a new brick livery stable and barn. Steel is being laid on the new First Street Bridge, the bridge is expected to be opened in time to assist in handling this year's grain traffic. A company has been formed for the purpose of building a double deck skating rink and work on it is expected to start shortly. Many fine residences are under way, and on the whole a busy fall is expected by the building trades.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crop reports from all over the district have been very encouraging. Some barley has already been cut. The season will be almost as early as last year.

CONDITION OF PARTICULAR TRADES.

Masons, carpenters and joiners, lathers, plasterers and stonecutters were busy, with bricklayers and builders' labourers fairly active.

REGINA, SASK., AND DISTRICT.

Mr. Hugh Peat, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month was very good. The excellent conditions which prevailed last month in the building trade continued, and there has been no falling off in the demand for men in any branch, with the exception of bricklayers, in which branch there has been a slight decrease.

The two industrial disputes which occurred in the months of May and June have been satisfactorily settled, and the present month has been entirely free from industrial unrest.

The Saskatchewan Provincial Exhibition will be held in Regina on July 27th, 28th, 29th and 30th, and the preparations for the same has added considerable to activity in the city. Carpenters and other workmen have been employed for some time past on the necessary construction work.

The International Hod Carriers and Building Labourers' Union, Regina Branch No. 203, was organized on May 30th, 1909, with a roll call of over 200 members. The union is divided into two sections, one comprised of English speaking members, the other consisting of German and other foreign speaking members.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—According to a bulletin recently issued by the Department of Agriculture, wheat seeding was practically completed by the middle of May, while oats and barley were some two weeks later. Although seeding was from one to three weeks later than usual, the weather has been so perfect that by June 10th all crops had practically made up the difference in time, and in some districts were even a week ahead of their condition on the same date in 1908.

Light frosts are reported to have oc-

curred on June 3rd and 4th, but no damage to grain crops could be detected.

The reports of the Department's correspondents in the district indicate that with the continuance of the present weather the crop for 1909 will be a heavy one.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were very active, with the exception of bricklayers.

Electrical workers were very active; painters and decorators, sheetmetal workers, builders' labourers and ordinary labourers were all active.

Printers were very busy, job compositors were in demand, and the general condition of the trade is improving. Bookbinders had a busy month.

Barbers had a fairly busy month; laundry workers were active; cigar makers were quiet.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The heavy rains which fell during the month of July interfered to a considerable extent with building operations and men employed in out-door construction work lost some time. Generally speaking, however, the condition of the labour market during the month was active, comparing very favourably with the same period of the past two years. Bricklayers have been busier this year than for some time past; while electrical workers are also well employed. There has been a scarcity of unskilled labour during the past month, and in consequence work on the new yards of the C.P.R. has been considerably impeded. Owing to the unsettled weather it would seem that several contractors will have considerable difficulty in completing their contracts by the specified time, and the building season is likely to be a long one this year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops in the entire district are reported in excellent condition. Here and there instances are reported of too much moisture having fallen, but on the whole the growing conditions have been splendid. Most of the wheat in this district is well headed out. Harvest operations should begin about the 18th of August. The acreage under crop is considerably greater than in former years.

Unless frost or other unfavourable elements interfere, it is estimated by farmers that fully 50 per cent more labour will be required this year to harvest the crop.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were active, although much time was lost through inclement weather. Bricklayers and carpenters were especially busy. A scarcity of material has rendered many plasterers idle during the last two weeks of the month, but there is a large amount of work waiting and the balance of the season should be very busy in this line. Electrical workers have been very busy and the prospects are bright for the balance of the season. Printers had a busy month. Bakers, confectioners, butchers, hotel employees, barbers, blacksmiths, boiler-makers and engineers were all active.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market continued to improve over the preceding month and the corresponding month of last year, especially in the building trades, which were almost without exception fully employed, notwithstanding a scarcity of building material. The unskilled labour market was active, and labour employment agencies were busy.

The employees of the Canadian Pacific Railway Company's mechanical department were still working short time.

The plumbers who went on strike on the 1st instant, for an increase of wages from 54 to 56½c per hour, compromised with their employers, and returned to work on the 16th instant, with an increase of 1c per hour, making their rate per hour 55c. The stone masons received their increase of 2½c. per hour on July 1st, without any cessation of work; they now receive 62½c per hour.

Work was commenced on the erection of a new fire hall. The new street car service commenced on the 5th instant and there are now four cars running and well patronized.

Wholesale and retail dealers reported a considerable increase in business.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, joiners, plasterers, painters, decorators and paper-hangers were fully employed. Gas and steamfitters were busy, and machinists and engineers fairly employed. Electrical workers, linemen, blacksmiths, sheet metal workers, bicycle workers, tool sharpeners, horseshoers and jewelers, etc., had good employment, but boilermakers and iron ship builders were quiet. Those engaged in the woodworking and furnishing trades had good employment. The same conditions prevailed in the printing clothing, food and tobacco preparation, leather, miscellaneous and transportation trades. Unskilled labour was also well employed.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay district improved considerably in July, owing to the termination of the strike at Hosmer, B.C., and at several Alberta coal mines, all of which resumed work in the early part of the month. Thus the

usual supply of coke is again within sight promising an early resumption of operations by the British Columbia Copper Company, which should bring the labour market to its normal condition in this district.

A rich strike of ore has been made at the Blue Bird mine in the south belt camp at Rossland, B.C.

The fourteenth anniversary of the founding of the Rossland Miners' Union was celebrated on July 16th in Rossland, B.C., the mines shutting down from operations for the day. A parade of nearly 600 men took place, addresses were given and a programme of games carried out. The sum of \$500 was distributed in prizes.

Several new discoveries of rich free-gold have been reported from the Sheep Creek district this month, while the producing mines there are regularly turning out their gold bricks. The Alice mine near Creston, a silver lead producer, has been recently bonded, and operations started. The damage by flood about June 1st, to the Slocan branch of the Canadian Pacific Railway was so unusually severe that up to the present time repairs have only been effected as far as Three Forks, to which point the trains make regular trips, while from there to Sandon wagons and pack trains form the means of transportation until the balance has been repaired.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. D. J. Stewart, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in this district have been satisfactory, no complaints being heard of lack of employment. Conditions in this respect have been better than in the corresponding month of last year. The work in the building trades was not as active as at this period last year, but those who could not obtain employment here have gone to other places and found work. A number of business blocks are well under way, while work has started on others.

The Fraser River Mills Co., one of the largest employers of labour in this district has decided to dispense with Hindu labour, provided it is successful in inducing one hundred French Canadians and their families to emigrate from Quebec to this Coast. An officer of the company is now in the East making the necessary arrangements.

If certain by-laws pass which are to be placed before the ratepayers of this city in the near future, there will be expended in the next twelve months a sum of \$398,000 in a new pipe line to Coquitlam Lake, extensions of the sewer lines, street paving and other important works.

Sockeye nets were thrown out for the first time this season on July 18th. Small catches are reported as the fish have not yet commenced to run, but the season is expected to be a good one, being the fourth year of the cycle when a good catch of fish is assured.

CONDITION OF LOCAL INDUSTRIES.

Conditions on the whole were satisfactory. With the possible exception of hay, the crops will yield a good average. Weather conditions have been excellent.

The following are market quotations:—

Beef hind quarters.....	8 to 8½c. per lb.
Beef fore quarters.....	6 to 7 "
Lamb.....	14 to 15 "
Mutton.....	12 to 13 "
Veal.....	11 to 11½ "
Pork.....	9 to 10c. "
Eggs, retail.....	35c. per dozen.
Butter, retail.....	30c. per lb.
Fowls, per dozen.....	\$7.00 to \$7.50
Ducks, per dozen.....	\$6.00 to \$7.00
Potatoes per sack.....	\$2.25 to \$2.50
Cherries per lb.....	5 to 6c.
Raspberries per crate.....	\$2.00 to \$2.25.

Fishing.—Conditions on the Fraser River are quiet, but this is liable to be changed at any time, the fishermen being ready and waiting for the sockeye salmon to make their appearance in sufficient numbers. From three to four thousand men will find profitable employment in this work for the next six weeks or until the end of August.

Lumbering.—Conditions are very satisfactory and the outlook for the fall trade is bright. A new record has been made by the Fraser River Mills in its cut of lumber during the month of June. The

average heretofore for a month's run of ten hours each day was 360,000 feet B.M., this has been increased to 473,000 feet B.M., for a shift of twelve and one half hours. During that month the Company shipped to all parts of the world 10,771,000 feet of lumber.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters, plumbers, gas and steam fitters were active, with builders' labourers fairly active. Iron moulders, iron workers, machinists, engineers, blacksmiths and boiler-makers were active, as were woodworkers and carriage workers. Car builders (electric) were busy and shingle weavers, printers, bookbinders, journeymen tailors, boot and shoeworkers, bakers, confectioners, butchers and cigar makers were active. Barbers were active with clerks and stenographers quiet, and laundry workers active.

Steamboatmen, and street railway employees were active, with unskilled labour quiet.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market were fair, but there was no demand for unskilled labour. The labour bureaus had no difficulty in procuring men, outside workers in some cases being paid less than in the city. The building trades were well employed. Some friction existed regarding the card system, but it was generally well observed. Outside workmen lost a good deal of time, owing to the unusual amount of rain this season. The weekly half holiday for clerks was not observed, except in a few cases. Building permits, mostly dwellings, issued for the month ending July 15th, numbered 85, valued at \$236,919. A ten story steel office building will be erected on Pender street, costing \$115,000. The half yearly statement of civic finances showed: Revenue, \$1,726,473.01; expenditure, \$1,109,529.41.

The Trades and Labour Council reported that 30 unions were in affiliation and that the city was thoroughly unionized. The transportation companies did a thriving tourist business and will continue to do so until the close of the Seattle-Yukon exhibition in October.

The changes in prices both in the fruit and provision markets were numerous and in the end became lower. The only local fruits on sale were berries of good quality. California peaches and other fruit were plentiful. Provisions sold as follows on July 24th:—

Hams, heavy, 18c.; medium, 18c.; breakfast bacon, 20c.; backs, 16½c.; dry salt, long clear, 14c.; shoulder hams, 14c.; picnic hams, 14c.; cottage hams, 11c.½; local creamery butter, 30c.; Ontario creamery solids, 27½c.; 1-lb. bricks, 28½c.; butter, tub, 20c., 24c.; cheese, 14½c.; 15½c.; fresh ranch eggs, 33c.; Eastern eggs, 28c.; lard, 3's, 5's and 10's, 16½c.; Silve Leaf, 3's, 5's and 10's 17c.; 50's, 16½c.; 80's, 16½c.; Griffin hams, 18c.; Premium hams, 20c.; Griffin boiled hams, 25½c.; Premium boiled hams, 28c.; Griffin lard, 3's, 5's, and 10's, 16c.; bacon, 20c.; Premium bacon, 26½c.; chickens, 22½c.; turkeys, 27c.; geese, 20c.; ducks, 20c.; fowl, 18c.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—It was reported that the crops were three weeks late.

Lumbering.—The market was quiet and the chartering of vessels dull.

Fishing.—The British Columbia Packers annual report showed a net profit of \$100,020.25 for the 1908 pack, and declared a dividend of 3½ per cent. The output was 161,673 cases of salmon and 150 tons of mild cured salmon, besides the quantities of fresh salmon and other fish which were shipped, 750,000 pounds of fresh halibut, being sent east. Twenty two canneries will operate this year. Stock on hand is valued as follows: Salmon, \$66,811.47; frozen fish, \$45,959.93.

Reports from the northern and Fraser river fishermen state that up to July 24th no salmon were running, and in several instances fishermen have left the waters. Seven canneries, taking fish from 317 boats, (2 men to boat), reported an average of 12 fish to the boat. On the other hand the American canneries reported fair catches.

The strike of the 72 halibut fishermen against the New England Fish Company was declared off. At present American halibut fishermen are prohibited from

purchasing bait in British Columbia. It is expected that when the question of jurisdiction over Hecate Strait is discussed between Canada and the United States all grievances will be adjusted.

CONDITION OF PARTICULAR TRADES.

The building trades were active, although wet weather caused some loss of time. Iron moulders, iron workers, core-makers, machinists, engineers and steam engineers were well employed. Blacksmiths, boilermakers and ship workers were busy. There was a fair demand for sheet metal workers, tool sharpeners and horseshoers, but jewellers were quiet. Linemen were active, but inside electric workers reported a number of idle men. The woodworking trades were fair. Quiet conditions were reported in the printing, clothing, food and tobacco preparation, leather trades, barbers, stenographers and clerks were quiet, but hotel, restaurant and laundry employees reported a good volume of business. Activity prevailed among steamboat employees, ship labourers, longshoremen and street railway employees, though there was a surplus of men. Hackmen were quiet, but teamsters were active. Unskilled labour was not much in demand.

DISTRICT NOTES.

Prince Rupert.—The amount of building is becoming greater, and some substantial buildings will be erected. There is no shortage of workmen.

North Vancouver.—The shipyards were busy during the month as were also the saw mills. A new \$15,000 steam laundry was opened giving employment to 20 hands.

Lynn Valley.—Considerable building activity prevailed and real estate increased in price, acreage selling from \$500 to \$1,000 and lots from \$170 to \$500.

Barnet.—The North Pacific Lumber Company will rebuild its mill, which will cost \$400,000 and cut 130,000 feet per day. Business was brisk.

Port Moody.—The British Columbia Refining Company received its first cargo of 25,000 barrels of crude oil. Real estate was active as well as building.

VICTORIA, B.C., AND DISTRICT.

Mr. W. E. Ditchburn, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month all classes of labour were well employed and practically all unemployed found work of some kind. Work in the building trades was exceedingly active, and the prospects are bright for some time to come. The building permits for June, while only about half of those taken out in the previous month, amounted to over \$24,000 more than those for the same month last year. For the first six months of the present year the amount of permits exceeded those for the same period of last year by over \$260,000. The schedule figures are as follows:—

Month.	1909	1908
January.....	\$ 78,080	\$ 54,725
February.....	122,680	72,325
March.....	121,640	110,800
April.....	188,060	129,625
May.....	188,620	79,295
June.....	90,120	74,010
Total, six months.....	\$789,200	\$520,720

Since the inauguration of the system of taking out building permits in the Oak Bay municipality a few months ago, permits to the extent of \$81,250 have been issued by the municipal clerk.

The heavy summer tourist travel has now set in and the boats entering the port are continually bringing large numbers to the city. So great is the travel this year that the hotels are severely taxed to accommodate the guests. In this connection the management of Empress (C.P.R.) Hotel have stated that they will construct a new wing of 100 rooms this fall, costing about \$200,000.

The Bank clearings for June totalled \$6,452,175 compared with \$5,407,566 for May and were \$1,951,363 in excess of June of last year.

Business in the wholesale and retail stores was reported fair.

The strike of the Leather Workers, which started May 3rd, is still unsettled so far as two of the shops affected are

concerned. Of the eleven men who put in a demand for an increase of wages, four are now working under the new schedule, the remaining seven having found other employment.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been kept very busy for many months and the prospects are bright for some time to come. Carpenters, joiners, lathers and plasterers also find that there is plenty of employment to keep them in constant work for many months. Painters, decorators and paper hangers were all working full time, as were also plumbers, stone cutters and building labourers.

Iron moulders, iron workers and helpers have found work about normal, no particularly heavy orders demanding any increase in the regular forces employed. Machinists and engineers have been constantly employed. Electrical workers and linemen were very busy wiring the many new residences and business blocks now under construction. Boiler makers and iron ship builders were not so busy this month, practically only repair work being done in the yards. Shipwrights and caulkers were busy completing the boats that have been building for the Northern rivers, but the rush is now about over, and the men for the balance of the summer will be employed on casual repair jobs. Sheet metal workers have been very busy of late. Horseshoers also found plenty of employment.

Woodworkers and upholsterers found trade rather quiet. Varnishers and polishers were not overcrowded with work. Carriage and wagon makers and pattern makers were working full time.

CONDITION OF PARTICULAR TRADES.

The condition of the printing trade in Victoria is considerably above the normal at present and has been so for the past three months. No idle printers or operators are noted. The various job offices have all been busy and the three newspapers all employ large forces of men. The Government printing office has just

installed another linotype, making the third. The introduction of linotypes in this office has not necessitated the laying off of any of the regular force. Pressmen and bookbinders also were well employed during the month. Photo engravers were kept busy.

Butchers, bakers and confectioners find their calling in a healthy condition. Cigar makers reported trade good.

The leather workers, owing to the strike, which still exists in two of the shops, have only one third of their number employed at the trade, the others seeking employment in different lines.

Barbers, clerks and stenographers found regular employment during the month. Hotel, restaurant and theatre employees, have been kept very busy, now that the summer travel has set in and all the hotels in the city are filled to their capacity. Laundry workers in the three white laundries here were kept constantly employed.

All railroad and steamboat hands were working full time owing to the heavy travel. Ship labourers and longshoremen have been well employed. Street railway employees, hack and automobile drivers have been very busy handling the large number of tourists who are arriving daily in the city. Teamsters and expressmen were active.

Practically all unskilled labourers were employed. The great amount of public improvement now going on keeps over 700 men working for the city at good wages for this class of work.

NANAIMO B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has not shown much change since last month, and although about 100 men have been laid off on the waterworks extension, there are few, if any, idle men around. The Sandstone quarry in this city which has not been doing much of late is starting an engineer and about 12 men at work, having secured

some good contracts. The business men wholesale and retail, reported business steady with a fair outlook ahead. There have been no changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Haying is being seriously delayed by the exceptionally wet weather.

Fishing.—There is no market for fishermen outside of local consumption.

Lumbering.—The logging camps are working full time, the demand being fair. The different saw mills in the district are also working full time, some of them increasing their capacity.

Mining.—The quartz mines in the district are quiet, though some are working steadily. The coal mines are working steadily with the exception of the largest mine in this city which had to lay off for 8 or 9 days for repairs in the shaft and general overhauling of the machinery.

The new South Wellington mine has started shipping at its new wharf having installed a new shipping plant with the latest improvements for handling coal in bulk and sacks. On the West Coast at the north of the Island a company has sent out a force of men with a boring outfit, to find out the extent and quality of the coal there.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported work active. Carpenters and joiners were active, but there was no demand for extra men. Painters, paperhangers and plumbers were active, but builder's labourers were quiet.

Blacksmiths and carriage makers reported work good.

Printers were active.

Teamsters and expressmen have been busy.

Unskilled labour has been fairly well employed. Although about 100 men have been laid off at the waterworks extension, owing to the work being in a fair way to early completion, there are a good many new cement sidewalks in process of construction as well as other outside work going on.

**THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907. PROCEEDINGS
UNDER THE ACT DURING THE MONTH OF JULY, 1909.**

ONE application for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, was received in the Department during the month of July, as follows:—

On the behalf of unskilled labour members of the Saskatoon Federal Labour Union, No. 12801, employed on trench work, sewer work and municipal public utilities in the City of Saskatoon, Sask., the number of employees affected being estimated at 150 directly, and 150 indirectly

Earlier Applications.

Of applications received prior to the beginning of July, proceedings in connection with which remained at that date unfinished, there were the following:—

(1) On behalf of the employees of the Nova Scotia Steel and Coal Company at Sydney No. 3, Florence, Cape Breton, the number of employees affected being estimated at 340 directly and 120 indirectly.

(2) On behalf of employees of the Cumberland Railway and Coal Company Springhill, N.S., the number of employees affected being estimated at 1,550.

(3) On behalf of engineers, firemen, conductors, brakemen, baggagemen and yardmen, members of the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Engineers, the Order of Railway Conductors and the Brotherhood of Railroad Trainmen, employed on the lines of the Grand Trunk Pacific Railway Company, the number of employees affected being estimated at 300 directly and 800 indirectly.

(4) On behalf of the Maintenance of Way employees of the Canadian Northern Railway Company, members of the International Brotherhood of Maintenance of Way Employees, the number of employees affected being estimated at 1,100 directly and 700 indirectly.

(5) On behalf of the Canada West

Coal Company, Limited, of Taber, Alberta, the number of employees affected being 300 directly and upwards of 5,000 indirectly.

Reports Received.

During July the Department received reports in the cases of four Boards established under the Act, as follows:—

(1) That arising out of the application of the Canada West Coal Company, Limited, of Taber, Alberta.

(2) That arising out of the application of the Maintenance of Way employees of the Canadian Northern Railway Company.

(3) That arising out of the application of the employees of the Cumberland Railway and Coal Company, Springhill, Nova Scotia.

(4) That arising out of the application of the employees of the Nova Scotia Steel and Coal Company at Florence, Cape Breton.

Other Proceedings Under the Act.

In the case of the dispute between the Grand Trunk Railway and its engineers firemen, conductors, brakemen, baggagemen and yardmen, members of the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Engineers, the Order of Railroad Conductors and the Brotherhood of Railway Trainmen, to the number of 300, sittings of the Board were held in the City of Winnipeg during the month, but at the end of the month the report had not been received.

The application for the establishment of a Board to investigate alleged grievances of workmen employed in connection with trench work, sewer work and municipal public utilities in Saskatoon, Sask., recited the efforts which were said to have been made to bring about a settlement of these disputes with the civic authorities of Saskatoon. The grievances in question relate to wages, alleged lack of cribbing in deep trenches, employ-

ment of transient instead of resident labour, etc. Mr. Edward J. Stephenson, of Winnipeg, was appointed a member of the Board on the recommendation of the employees, and Mr. Alexander Smith, of Saskatoon, on the recommendation of

the Corporation of that City, and in the absence of any joint recommendation from the foregoing, the Board was completed on August 4th by the appointment by the Minister of Labour, of Mr. E. J. Meilick, of Dundurn, Sask., as Chairman.

I. REPORT OF BOARD IN DISPUTE BETWEEN CANADA WEST COAL COMPANY, LIMITED, AND ITS EMPLOYEES.

THE Minister of Labour received on July 19th, a report signed by the three members of the Board to whom was referred on July 2nd the dispute between the Canada West Coal Company, Limited, of Taber, Alberta, and its employees. The cause of the dispute in question was defined in the Company's application for the establishment of this Board as a failure to agree upon the terms and conditions of a working agreement which expired on March 31st, 1909. The number of employees affected was directly 300 and indirectly more than 5,000.

Mr. Colin MacLeod, of MacLeod, Alberta, was appointed a member of the Board on the recommendation of the Company, and Mr. W. C. Simmons, of Lethbridge, Alberta, on the recommendation of the employees. His Honour, Judge Winter, of Lethbridge, was appointed Chairman on the joint recommendation of the other two members of the Board. The Board, on assembling at Taber, on July 8th, enquired whether the respective parties would agree to be bound by the findings. The report of the Board states that "the representatives of the Company expressed their assent while the representative of the employees stated that they did not care to be bound by the decision."

The questions at issue related to the wages and contract prices and including (a) whether the coal was to be computed at 2240 lbs., or at 2000 lbs., (b) whether coal was to be paid for on the screened weight or unscreened weight. An effort was made to adjust the dispute by conference between the parties, but as no settlement was achieved in this way the Board met on July 9th for the hearing of evidence.

The report states that the employees

of the Canada West Coal Company ceased work on April 22nd and that up to that date the wages were paid on the basis of tonnage of unscreened coal at 2240 lbs. to the ton. The report says: "The Company contended that the coal should be screened and were willing that the ton should be calculated at 2000 lbs., urging that this would be fair to the employees and to themselves, on the grounds that the payment for unscreened coal tended to make the men careless in getting the coal if they were paid by the weight irrespective of whether such coal was made up of saleable coal, or of coal partly saleable, (such as lump coal) and of slack or dust, which passed through the screen and was unsaleable. The employees, on the other hand, claimed that if they were paid on the screened-coal basis they would not be getting paid for all the coal which they produced, as a certain percentage, i.e., in respect of the slack or screenings, would be lost to them."

The Board finds that the appliances for screening coal at the Company's mine are not adequate in their present state to carry out the operation of screening with fairness to the miners, but the Company's representatives stated that it was intended, as soon as practicable, to adopt methods similar to those in use at the Galt mines at Lethbridge to screen the coal. The Board recommends, therefore, that until such change is completed the rates for outside day wages, inside day wages and the contract prices for unscreened coal at 2240 lbs. to the ton, hitherto used, shall apply between the company and its employees, and that so soon as the Company has installed screens of similar construction and equal to the diamond bar $\frac{3}{4}$ " screens now in use at the Galt mines, Lethbridge, that contract prices for screen-

ed coal at 2000 lbs. to the ton set forth in an attached schedule shall be substituted for the rates now in force.

The Board recommends that the employees resume work on the above basis and that the terms hereby recommended be continued until March 31st, 1911.

The Department of Labour was informed on August 7th, by the representative of the employees that negotiations for a settlement were continued after the findings of the Board were communicated to the parties and that an agreement was signed on July 31st, operations in the mines being resumed on the Monday following, August 2nd.

Report of Board.

The text of the findings of the Board is as follows:

In the Matter of the Industrial Disputes Investigation Act 1907 and in the Matter of Differences between the Canada West Coal Company, of Taber, Alta., and its employees.

The Board constituted under the provisions of the above Act attended at Taber on the 8th July, 1909, when the members took the oaths of office before Mr. S. J. Layton, J.P.

Messrs. Valdar S. Kidd, Lewis Stockett and O. E. S. Whiteside appeared as representatives for the Canada West Coal Company.

Messrs. C. Stubbs, H. Evans and D. L. Miller appeared as representatives for the employees.

At the opening of the reference the respective parties were asked whether they would agree to be bound by the decision of the Board. In reply to this enquiry the representatives of the Company expressed their assent, while the representatives of the employees stated "that they did not care to be bound by the decision."

The questions at issue between the parties appeared to consist of the prices to be paid by way of wages and contract prices to the employees, including in such questions (a) whether the Coal was to be computed at 2240 lbs. or at 2000 lbs. (b) whether the coal was to be paid for on the screened weight or unscreened weight of such coal.

In view of the differences being comparatively limited in extent, the representatives were requested to prepare particulars in support of their respective contentions and discuss the matters in difference between them at a conference apart from the Board, to whom they were to report later in the day.

Particulars accordingly were furnished by both parties, but the employees' representatives were unwilling to accept the condition providing for payment on the screened coal basis. A further adjournment was then made in order that the representatives of the employees might confer with the general body of the employees, and obtain full instructions as to making further concessions, and if possible come to an agreement.

On the following morning, 9th July, 1909, the Board met again, all the representatives being present, and it appearing that a solution of the points at issue could not be arrived at, evidence was adduced on behalf of both parties, occupying the whole of that day (9th July, 1909), after which the Board desired to hear evidence relating to the Galt mines at Lethbridge, it being conceded that the general conditions there were similar to those at the mine of the Company at Taber.

Accordingly on the 10th of July, 1909, the Board met at Lethbridge and received further evidence on behalf of both parties, and then adjourned to the 13th July instant for the purpose of making this Report.

The employees of the Canada West Coal Company ceased working at the end of the 22nd day of April, 1909. Up to that date it appeared from the evidence that the wages paid to the employees for coal mined by them was paid on the basis of the tonnage of unscreened coal, the ton being calculated at 2240 lbs. to the ton. The Company contended that the coal should be screened and were willing that the ton should be calculated at 2000 lbs. to the ton urging that this would be fairer to the employees and to themselves on the grounds that the payment for unscreened coal tended to make the men careless in getting the coal, if they were paid by weight irrespective of whether

such weight was made up of saleable coal, or of coal partly saleable, (such as lump coal) and of slack or dust which passed through the screen and was unsaleable. The employees on the other hand claimed that if they were paid on the screened coal basis they would not be getting paid for all the coal which they produced, as a certain percentage, i.e. in respect of slack or screenings would be lost to them.

This point was practically the principal issue between the parties.

The table of rates of wages paid to the miners up to the 22nd April, 1909, when the mines ceased to be worked, is divided under three heads, viz:—

1. Outside day wages.
2. Inside day wages.
3. Contract prices.

As regards the first two heads no dispute arises, but the screening of coal will affect the items included under the third head.

At this time it appears to be beyond question that the appliances for screening coal at the Company's mine are not adequate in their present state to carry out the operation of screening, with fairness to the miners, but the Company's representatives stated that it was intended as soon as practicable to adopt methods similar to those in use at the Galt Mines at Lethbridge, to screen the coal.

The Board therefore recommended that:

(a) Until such change is completed, the rates shown under heads 1, 2 and 3, of the table of rates hitherto used, and which is subjoined shall apply between the Company and its employees, and that so soon as the Company has installed screens of similar construction and equal to the diamond bar $\frac{3}{4}$ " screens now in use at the Galt Mines at Lethbridge, the rates under head No. 4 shall be substituted for those under head No. 3.

(b) That in the event of any work not being included in such Table of rates, the

rates applicable on the 22nd April, 1909, between the same parties shall apply.

(c) That the employees resume work now on the above basis and that the terms hereby recommended be continued until the 31st day of March, 1911.

The Table of rates above referred to is as follows:

1. Outside day wages:		10 Hours
Dumpers.....		\$2.00
Car trimmers.....		2.00
Screen engine tender.....		none.
Box car loader engine.....		3.00
Timberman.....		2.00
Blacksmith.....		3.00
Blacksmith's helper.....	\$2.00 to	2.50
Leading carpenter.....		3.50
Car repairers.....		2.50
Haulage engineer.....		3.00
Leading fireman.....		2.75
Fireman helpers and ash wheelers.....		2.00

2. Inside day wages:		8 Hours.
Bratticemen.....		\$3.00
Bratticemen helpers.....		2.50
Timberman.....		3.00
Timberman helpers.....		2.50
Drivers.....		2.80
Tracklayers.....		3.00
Tracklayer's helpers.....		2.50
Miners.....		3.00
Pumpmen.....		3.00
Pushers.....		2.50
Pick carrier boys.....	\$1.10 to	1.25
Trappers.....		1.10

3. Contract prices—Unscreened Coal—2,240 lbs. to the ton.	
Cutting and scraping in rooms.....	\$.30 per ton
Cutting and scraping narrow work.....	.42½ "
Loading in rooms.....	.50 "
Loading narrow work.....	.82½ "
Loaders square booms, entries.....	.20 per set.
Loaders round booms, entries.....	.50 "

4. Contract prices—Screened Coal—2,000 lbs. to the ton.	
Cutting and scraping in rooms.....	.24 per ton.
Cutting and scraping narrow work.....	.35 "
Loading in rooms.....	.50 "
Loading narrow work.....	.77 "
Loaders square booms, entries.....	.20 per set.
Loaders round booms, entries.....	.50 "

Dated at Lethbridge this 13th day of July, 1909.

(Sgd.) ROLAND WINTER
Chairman,

(Sgd.) COLIN MACLEOD

(Sgd.) W. C. SIMMONS.

II. REPORT OF BOARD IN DISPUTE BETWEEN CANADIAN NORTHERN RAILWAY COMPANY AND ITS MAINTENANCE OF WAY EMPLOYEES.

THE Minister of Labour received on July 21, the report of the Board established in the matter of a dispute be-

tween the Canadian Northern Railway Company and its Maintenance of Way employees, to the number of 1,000, mem-

bers of the International Brotherhood of Maintenance of Way employees; also a minority report in the same matter signed by Mr. W. J. Christie, member of the board appointed on the recommendation of the employers. This Board, which was composed of Mr. W. J. Christie, of Winnipeg, member appointed on the recommendation of the employers, Mr. J. G. O'Donoghue, of Toronto, member appointed on the recommendation of the employees; and His Honour Judge Myers, of Winnipeg, Chairman, appointed by the Minister of Labour, was established on June 14 and assembled in Winnipeg, on July 5.

When the Board met it was learned that several of the questions in dispute had been practically settled and that the Company had submitted a draft agreement leaving unsettled only two matters, viz.: 1. the wages to be paid the sectionmen or permanent labourers on the entire system, and 2. the compensation to be paid pump repairers. This draft agreement was acceptable to the men and the efforts of the Board were accordingly confined to the outstanding matters aforesaid. The permanent labourers had been receiving during the past two years \$1.75 per day from the Canadian Northern. This class of workmen were paid on the Canadian Pacific railroad the sum of \$1.75 at the terminal yards, Fort William, Winnipeg, Brandon and Moose Jaw, and \$1.70 per day at all other places. The Canadian Northern Railway Company desired to reduce the wages of this class of men in their employ to a corresponding or similar rate to that paid by the Canadian Pacific. The Board, however, finds that the wages paid by the Canadian Northern Railway to other classes of Maintenance of Way men are less than the wages paid similar classes in the service of the Canadian Pacific and that, on the whole, the general difference is not appreciable. The representatives of the men, while demanding an increase to \$1.80 per day for these permanent labourers, seemed willing to accept the rate of \$1.75 along with the schedule of wages as proposed for all such other classes. The Board finds that the com-

pany offered little evidence in support of their desire for a reduction of the men's wages and that the Canadian Northern should continue to pay these permanent labourers \$1.75 per day.

In respect of the pump repairers, the Board is of opinion that the wages now paid to them, viz.: \$90 per month, without an allowance for expenses while away from headquarters, should not be disturbed. While the conclusion arrived at with regard to pump repairers does not meet with the approval of Mr. O'Donoghue, yet he has consented to subscribe to this report in order to obtain a settlement of all outstanding differences. -

In his minority report Mr. W. J. Christie declares that "the principal evidence on behalf of the employees was given by Mr. Fljoldal and Mr. Lowe, who both live in a foreign country and could not give evidence from personal experience of the conditions that exist in Western Canada." Mr. Christie, in declining to subscribe to the report of the Board expresses also the opinion that "sufficient effort was not made to bring about a settlement and that settlement could not be justly made without asking for evidence and considering the case of the men employed in every department of the Maintenance-of-Way." The report of the Board, in his judgment, asked the Canadian Northern Railway Company to pay 5 cents a day more for permanent labourers and 6 cents a day more for section foremen than the highest wages paid by any of the railway companies they are competing with. Mr. Christie attached to his report a draft agreement which he desires to make operative from July 1, 1909, to June 30, 1911.

On the conclusion of the enquiry the Department was informed that the employees were willing to accept the award of the Board in this matter. At the end of the month the Department had not been notified whether the award was acceptable to the Canadian Northern Railway Company. In the meantime, however, no cessation of work has taken place on the part of the employees concerned.

Text of Report.

The text of the findings of the board is as follows:—

Winnipeg, Man., July 16, 1909.

The Honourable W. L. Mackenzie King,
Minister of Labour,
Ottawa, Ontario.

In the Matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Northern Railway Company, Employer, and the said Company's Maintenance of Way Men, Employees.

SIR:—

The Board of Conciliation and Investigation appointed herein under the provision of the above named Act and composed as follows: John G. O'Donoghue, of Toronto, Ontario, recommended by the employees, William John Christie, of Winnipeg, Manitoba, recommended by the Company, and His Honour Judge Robert H. Myers, of Winnipeg, Manitoba, appointed by the Minister of Labour as Chairman of the Board, beg to report as follows:—

All the members of the Board attended all the meetings and these meetings were all held in Winnipeg, commencing on Monday the fifth day of July, 1909.

Sessions of the Board were held by mutual agreement in the office of the General Superintendent of the Company, the men being represented by Mr. Lowe and Mr. Fljozdal and the Company by Mr. Cameron and Mr. Warren. Witnesses were examined on behalf of each party and all statements made and evidence tendered were heard. Conferences were also had with the representatives of the men and with General Manager MacLeod and General Superintendent Cameron and diligent efforts made to effect an amicable settlement of the differences during the whole of last week and the three days of this present week.

When the Board first met it was learned that several of the questions in dispute had been practically settled and that the Company had submitted the draft Agreement hereto annexed, leaving unsettled

only two matters, namely (a) the wages to be paid the Section men or permanent labourers on the entire system and (b) the compensation to be paid or allowed pump repairers. This draft Agreement was acceptable to the men and therefore our efforts were limited to the two matters aforesaid.

The permanent labourers had been receiving during the past two years \$1.75 per day from the Canadian Northern. This class of workmen were paid on the Canadian Pacific Railroad the sum of \$1.75 at the terminal yards Fort William, Winnipeg, Brandon and Moose Jaw, and \$1.70 per day at all other places.

The Canadian Northern Railway Company desired to reduce the wages of this class of men in their employ to a corresponding or similar rate to that paid by the Canadian Pacific.

The Board, however, find that the wages paid by the Canadian Northern to other classes of Maintenance of Way men are less than the wages paid similar classes in the service of the Canadian Pacific and on the whole the general difference is not appreciable.

The representatives of the men, while demanding an increase to \$1.80 per day for these permanent labourers, seemed willing to accept the rate of \$1.75 along with the schedule of wages as proposed for all such other classes. The Canadian Northern offered little evidence in support of their desire for a reduction of the men's wages.

The Board considered and discussed all phases of the differences in an endeavor to effect a conciliation but found it impossible to secure an agreement on this one point. The representatives of the Company at the final conference seemed willing to recommend that these permanent labourers be paid \$1.75 per day at the terminal or divisional yards at Port Arthur, Winnipeg, Dauphin and Edmonton (estimated at about 50 men) and \$1.70 per day at all other points (estimated at about five hundred and thirty men) but the representatives of the men refused to accept less than a renewal of the old wage scale, namely, a daily wage of \$1.75 to each permanent labourer without distinction as to place employed.

After hearing and considering all the evidence and arguments and statements advanced the undersigned members of the Board feel especially in view of the cost of living, the wages generally paid to labourers and the importance of the services rendered, that the Canadian Northern should continue to pay these permanent labourers \$1.75 per day and that figures should be inserted in the wage schedule attached to the draft. Agreement where the blank space has been left for the amount fixed upon.

The case for the pump repairers (of whom there are nine) was ably presented to the Board by Mr. Keyes and the above named representatives of the men, but the Board are of the opinion that the wages now being paid to them, namely, \$90.00 per month without an allowance for expenses while they are away from headquarters, should not be disturbed and that this sum be set opposite the pump repairers in the above mentioned wage schedule.

While the conclusion arrived at with regard to the pump repairers does not meet with the approval of Mr. O'Donoghue, yet he has consented to subscribe to this report in order to obtain a settlement of all outstanding differences.

We recommend that both employer and employees accept our decision above stated and unite in completing and concluding the said annexed agreement as above suggested, the date from which same shall be effective to be inserted as the first of July 1909.

Our colleague, Mr. W. J. Christie, takes the view that these permanent labourers should not be paid by the Canadian Northern more than is being paid by its chief competitor, the Canadian Pacific, and will submit a minority report.

All of which is respectfully submitted,

(Sgd.) R. HILL MYERS,
Chairman.

" J. G. O'DONOGHUE.
For the Men.

Agreement between The Canadian Northern Railway Company and its Maintenance of Way Employees.

Section 1. 'By permanent Maintenance of Way employees is meant men employed in the track, bridge and building department, signalmen, pumpmen, and pump repairers on such parts of the line that are open for traffic, and who have been in the Maintenance of Way service continuously for one year or more, or who have had one year's cumulative service during the three years immediately preceding, and the same will hereafter be referred to as "Employees". Labourers in extra gangs, unless practically engaged all the year round, will not be ranked as permanent employees.

Section 2. Ten hours shall constitute a day's work. When required to work in excess of ten hours, time and a half will be allowed for such excess work and for work done on Sundays and Christmas Day.

(a) The hours of track and bridge watchmen, and signalmen, will be twelve hours in each twenty-four. Twelve hours either continuously or intermittingly will constitute a day, but they shall receive at least eight hours continuous rest in each twenty-four.

(b) At regular pumping stations, where the amount of work is such that it is necessary for pumpmen to work continuously for twelve hours in order to keep the supply up, overtime, if worked, will be paid pro rata up to 24 K. and 24 K. and 7 K. at rate of time and a half.

(c) In cases of emergencies employees will not be required to work more than twenty-four hours continuously without a rest of eight hours.

(d) Section foremen and sectionmen travelling on orders of the Company to and from work after regular working hours will be allowed straight time. Members of bridge and building gangs travelling on orders from the Company, to and from work after their regular hours, will be allowed straight time, except when provided with boarding and sleeping cars to carry them to and from work. Members of regular bridge and

building gangs travelling in boarding Cars at the request of the Company on Sunday between 7 a.m. and 6 p.m. will be allowed straight time.

Section 3. Employees taken off their regular sections temporarily to work on snow or tie trains or other work, will be compensated for the boarding and lodging expenses incurred.

(a) Bridge and building employees taken from their places of residence or boarding outfits overnight will be compensated for the extra expense they necessarily incur, such expense not to exceed fifty cents per day.

Section 4. Employees required to attend to and light semaphore or switch lamps, before or after regular working hours will receive therefor \$4.00 per month for six or less lamps, and fifty cents per lamp per month for those in excess of six. When lamps are located beyond the yard limit, they will be attended to during regular working hours.

Section 5. Employees will be promoted hereafter on their respective Superintendent's Divisions in order of seniority provided they are qualified. The several senior qualified employees shall be advised of all vacancies in the position of foremen, and their applications if presented within five days after being notified will be considered. Employees may be transferred from one division to another for extra gang work or on opening of new lines, or when the necessary qualified men for Maintenance of Way work are not obtainable on the Division.

(a) In promoting employees to the position of roadmaster or bridge and building master, men may be taken from any point on the system, according to seniority, if competent.

(b) Employees refusing promotion will become junior to those accepting such promotion.

(c) An employee, who is transferred to another department, or from the bridge and building department to the track department, or vice versa, at his own request, will lose his seniority standing.

(d) Employees unable to read or write English need not be promoted.

(e) A list of all employees will be prepared for each Superintendent's Division,

and such lists will show the seniority standing of each employee. The lists will be revised from time to time to agree with the length of service and promotions made, and a copy will be furnished to the Employees' representative, which will be open for inspection and correction on proper representation.

(f) In the event of a reduction in the number of men employed, those longest in the service shall be given preference of employment.

(g) The position of track and bridge watchmen and signalmen is not one subject to the general rules of promotion, being intended to take care of men in any department who become unfitted for other service.

Section 6. Leave of absence and free transportation will be granted to members of duly appointed committees for the adjustment of matters in dispute between the Company and employees so far as is consistent with good service, within ten (10) days after request in writing has been made on the proper officers.

Section 7. Employees suspended or dismissed, who consider they have been unjustly treated, will receive full and impartial hearing, and will be advised of decisions reached within fifteen days after the time of their suspension or dismissal. Should the investigation show that the suspension or dismissal was unjust, time will be allowed and employee reinstated. Appeals from decisions must be made in writing by the employee through his roadmaster or bridge and building master within fifteen (15) days after being advised of such decision.

(a) Permanent employees, leaving the service of the Company, from any cause whatever, will be furnished with service letter if requested.

Section 8. Employees will be granted leave of absence four times a year. Such free transportation will not extend beyond their Superintendent's Division, and the leave of absence will not exceed two days, and then only when consistent with good service, and provided the Company is not put to any additional expense.

Section 9. Permanent employees will be

granted once per year transportation to any system in favour of themselves and members of their families, dependent upon them for support.

Section 10. The Company will keep all section houses in good repair, the cost of repairs, other than ordinary wear and tear, to be charged to occupants.

Section 11. Where water is transported for use of section gangs, good water will be provided.

Section 12. A member of the household of permanent employees will be furnished with free transportation once a month to and from points where reasonable prices prevail, for the purpose of purchasing supplies. Such transportation may be used by any member of the family only.

Section 13. Free transportation will be granted to nurses, when their services are required by employees in isolated districts from points where they are obtainable, on presentation of a certificate from attending physician.

Section 14. Bridge and building gangs shall be composed of:—

1st. Foremen.

2nd. Carpenters, who shall be skilled Mechanics in house and bench work, and have a proper kit of carpenter's tools.

3rd. Bridgemen, who shall be rough carpenters, expert saw, axe and hammermen, and have a general experience in bridge work.

Rates of Pay for Trackmen.

Yard Foremen:

	Per Day.
Port Arthur, Winnipeg and Edmonton.....	2.75

Yard Foremen:

Atitokan, Rainy River, Portage la Prairie, Dauphin, Kamsack, Humbolt, N. Battleford, Ver- million. Emerson, Belmont, Brandon, Swan River, Prince Albert, Saskatoon, Neepawa, Morris, Fort Francis, Moran- ville and Kipling.....	2.60
---	------

Sectionmen:

Assistant foremen	\$2.50
Section foremen in charge of snow plow or flanger.....	3.20

Foremen in charge of extra
gangs\$2.50 to 3.45

Rates of Pay for Signalmen:

Signalmen at crossings.....	\$1.50
Signalmen at interlocking cross- ings	1.75

Rates of Pay for Bridge and Building Men:

Foremen.....	\$3.20 to 3.45
Carpenters.....	2.80 to 3.00
Bridgemen.....	2.15 to 2.80
Labourers.....	

Rates of Pay for Pumpmen:

	Per Month.
Pumpmen, one pump.....	\$48.00
Pumpmen, two pumps.....	58.00
Pumpmen, three pumps.....	58.00
Pump repairers.....	

These rules will not take away any privileges that are now in effect with employees. They will become effective, and will remain in force until either party desiring a change, gives the other party sixty (60) days' notice.

For Maintenance of Way Employees:

General Chairman.

.....

Vice-Chairman.

For Canadian Northern Railway Co.:

.....

General Superintendent.

Minority Report.

The minority report of Mr. W. J. Christie, member of the Board appointed on the recommendation of the Company, is as follows:—

WINNIPEG, MAN., 15th July, 1909

The Honourable W. L. Mackenzie King,
Minister of Labour,
Ottawa, Canada.

Sir:—

In the matter of dispute between The Maintenance of Way Employees of the Canadian Northern Railway Company and The Canadian Northern Railway Company.

The Board of Conciliation and Investigation appointed by you under the Industrial Disputes and Investigation Act of 1907, being composed of His Honour Judge Robert H. Myers of Winnipeg, Manitoba, Chairman of the Board; J. G. O'Donoghue of Toronto, Ontario, recommended by the employees; and W. J. Christie of Winnipeg, Manitoba, recommended by the Company, beg to report as follows:—

The Board began its sittings on the fifth day of July, 1909, in the Company's Offices which were courteously placed at their disposal. All meetings were attended by the full Board.

The employees were represented by Mr. Lowe and Mr. Fljozdal, both citizens of the United States, and the Company by Mr. Cameron and Mr. Warren of Winnipeg.

The witnesses were not examined under oath.

Besides Mr. Lowe and Mr. Fljozdal only one witness was examined on behalf of the employees. This man was at one time a tank repair employee, but has some time since left the service of the Company, so that practically no evidence was offered from anybody at present employed in the service of the Company.

The principal evidence on behalf of the employees was given by Mr. Fljozdal and Mr. Lowe, who both live in a foreign country and could not give evidence from personal experience of the conditions that exist in Western Canada.

As it was supposed the employees were asking for a change it was only reasonable to think that they would offer some evidence direct from their number.

In opening the case it was suggested that the Company and men differed on wages in only two classes of workmen, that is, the pump repairers and labourers employed on sections who have been in the service of the Company for one year or more. This proved not to be the condition that existed.

On investigation it was found that Mr. Cameron, General Superintendent of the Company, was willing to recommend to the Management a schedule of wages for all classes of workmen employed in the Maintenance of Way, but would not do

so until the full schedule was accepted by the employees. This appeared to be accepted by the men with the exception of wages of the pump repairers and permanent labourers. Mr. Cameron agreed to recommend that the permanent labourers should be paid the same wages as similar men employed by the Canadian Pacific Railway, but when the complete schedule of wages was not accepted by the men the duty of the Board of Conciliation was to open the case, take evidence of the wages of each class of men employed and use our best efforts to bring the men and the Company together, as one can readily realize the hardship a strike means to the families of the employees.

Evidence was only taken as to the wages paid the permanent labourers and those employed in repairing pumps. The evidence submitted was that the permanent labourers were paid by the Canadian Pacific Railway \$1.75 per day in first class yards and \$1.70 per day in second class sections and that the Great Northern Railway and Northern Pacific Railway south of the boundary line east of the Rocky Mountains paid \$1.40 per day for foreign labourers and \$1.50 per day for English speaking labourers. There was no evidence offered to dispute the above facts.

Mr. Cameron agreed to recommend to the Management of the Canadian Northern Railway that permanent labourers be paid the same wages as paid by the Canadian Pacific Railway, which are the highest paid by any of the three Railways mentioned, and all competing for the traffic of this North West Country.

From the evidence it was found that the men employed in repairing pumps and gasoline engines were paid by the Canadian Northern Railway \$90.00 per month flat rate, they have to pay their expenses while away from headquarters. The Canadian Pacific Railway pay similar men \$78.00 per month and 75 cents a day expenses while away from home, and the evidence went to show that they were away at an average of from eighteen to twenty days per month. This would mean that the Canadian Pacific Railway men were paid about \$92.00 per month

and Mr. Cameron of the Canadian Northern Railway agreed to recommend to the Management that they increase their men's wages to \$92.00 per month.

It was strongly urged by one member of the Board that as a large percentage of the men affected by the dispute were either Section Foremen or permanent labourers that evidence should be taken as to the actual condition of the former, but the Chairman refused to take this matter up.

The offer that Mr. Cameron stated he would recommend the Company to make was that they pay \$2.50 per day to section foremen other than those mentioned in the following schedule, and charge them a rental for section houses of \$2.00 per month, which is seven and nine tenths cents per day including house rent and on new lines where they have not had time to build section houses the Company to give them the use of a box car free of charge.

The Canadian Pacific Railway Company are paying similar section foremen \$2.55 per day and charging them \$5.00 per month rent for section houses, which amounts to nineteen and seven-tenths one-hundredths cents per day, making a net wage of \$2.36 per day including house rent, so you can readily see that the offer Mr. Cameron recommended the Canadian Northern Railway to accept was to pay this class of men over six cents per day more than the Canadian Pacific Railway.

As the permanent labourers and sectionmen number about eight hundred and ninety (890) it would be only fair to the Canadian Northern Railway that the permanent labourers be paid \$1.70 per day, section foremen \$2.55 per day, and charged \$5.00 per month for section houses and \$2.00 per month when they occupied box cars, which the Company will make comfortable for them. This would be the highest wages paid by any of the railways that the Canadian Northern have to compete with.

From the evidence taken it is a pleasure to report that the Company have made every effort to provide for the comfort of their employees.

The Chairman submitted a report

which I objected to signing for the following reasons:—

1st. That in my opinion, sufficient effort was not made to bring about a settlement and this settlement could not be justly made without asking for evidence and considering the case of the men employed in every department of the Maintenance of Way.

2nd. That the report is not in accordance with what is asked for in Section Twenty-six of the Act "The Investigation and details of each item of the dispute" and not recommending a period during which proposed settlement should commence and end.

His report asks the Canadian Northern Railway Company to pay five cents a day more for permanent labourers and six cents a day more for section foremen than the highest wages paid by any of the railway companies they are competing with.

It was certainly surprising to me that in a dispute of this kind the employees called in men to settle it who were not residents of Canada but residents of a foreign country, and that the men recommended by them as a member of the Board of Conciliation was not a resident of the district in which the dispute has taken place.

If men that lived in this country and were familiar with the conditions, were called in one would readily suppose that a settlement could be arrived at much better than through men living in a foreign country.

I very much regret that the Board could not arrive at a unanimous decision and recommend settlement on the points in dispute. I would submit settlement upon the basis of the following schedule and that settlement shall commence on the first day of July, 1909, and end on the thirtieth day of June, 1911.

Agreement between The Canadian Northern Railway and its Maintenance of Way Employees.

Section 1. By permanent Maintenance of Way employees is meant men employed in the track, bridge and building department, signalmen, pumpmen and pump repairers on such parts of the line that

are open for traffic, and who have been in the Maintenance of Way service continuously for one year or more, or who have had one year's cumulative service during the three years immediately preceding, and the same will hereafter be referred to as "Employees." Labourers in extra gangs, unless practically engaged all the year round, will not be ranked as permanent employees.

Section 2. Ten hours shall constitute a day's work. When required to work in excess of ten hours, time and a half will be allowed for such excess work and for work done on Sundays and Christmas day.

(a) The hours of track and bridge watchmen, and signalmen, will be twelve hours in each twenty-four. Twelve hours either continuously or intermittingly will constitute a day, but they shall receive at least eight hours continuous rest in each twenty-four.

(b) At regular pumping stations, where the amount of work is such that it is necessary for pumpmen to work continuously for twelve hours in order to keep the supply up, overtime, if worked, will be paid *pro rata* up to 24 K. and between 24 K. and 7 K, at rate of time and a half.

(c) In cases of emergencies employees will not be required to work more than twenty-four hours continuously without a rest of eight hours.

(d) Section foremen and sectionmen travelling on orders of the company to and from work after regular working hours will be allowed straight time. Members of bridge and building gangs travelling on orders from the company, to and from work after their regular hours, will be allowed straight time, except when provided with boarding and sleeping cars to carry them to and from work. Members of regular bridge and building gangs travelling in boarding cars at the request of the company on Sundays between 7 a.m. and 6 p.m. will be allowed straight time.

Section 3. Employees taken off their regular sections temporarily to work on snow or tie trains or other work, will be compensated for the boarding and lodging expenses incurred.

(a) Bridge and building employees taken from their places of residence or boarding outfits over night will be compensated for the extra expense they necessarily incur, such expense not to exceed fifty cents per day.

Section 4. Employees required to attend to and light semaphore, or switch lamps, before or after regular working hours will receive therefor \$4.00 per month for six or less lamps, and fifty cents per lamp per month for those in excess of six. When lamps are located beyond the yard limit, they will be attended to during regular working hours.

Section 5. Employees will be promoted hereafter on their respective Superintendent's divisions in order of seniority, provided they are qualified. The several senior qualified employees shall be advised of all vacancies in the position of foremen, and their applications, if presented within five days after being notified, will be considered. Employees may be transferred from one division to another for extra gang work or on opening of new lines, or when the necessary qualified men for Maintenance of Way work are not obtainable on the Division.

(a) In promoting employees to the position of roadmaster or bridge and building master, men may be taken from any point on the system, according to seniority, if competent.

(b) Employees refusing promotion will become junior to those accepting such promotion.

(c) An employee, who is transferred to another department, or from the bridge and building department to the track department, or vice versa, at his own request, will lose his seniority standing.

(d) Employees unable to read or write English need not be promoted.

(e) A list of all employees will be prepared for each Superintendent's Division, and such lists will show the seniority standing of each employee. The lists will be revised from time to time to agree with the length of service and promotions made, and a copy will be furnished to the employee's representative, which will be open for inspection and correction on proper representation.

(f) In the event of a reduction in the number of men employed, those longest in the service shall be given preference of employment.

(g) The position of track and bridge watchman and signalmen is not one subject to the general rules of promotion, being intended to take care of men in any department who become unfitted for other service.

Section 6. Leave of absence and free transportation will be granted to members of duly appointed committees for the adjustment of matters in dispute between the company and employees so far as is consistent with good service, within ten (10) days after request in writing has been made on the proper officers.

Section 7. Employees suspended or dismissed, who consider they have been unjustly treated, will receive full and impartial hearing, and will be advised of decisions reached within fifteen days after the time of their suspension or dismissal. Should the investigation show that the suspension or dismissal was unjust, time will be allowed and employee re-instated. Appeals from decisions must be made in writing by the employee through his roadmaster or bridge and building master within fifteen (15) days after being advised of such decision.

(a) Permanent employees, leaving the service of the company, from any cause whatever, will be furnished with service letter if requested.

Section 8. Employees will be granted leave of absence four times a year. Such free transportation will not extend beyond their Superintendent's Division, and the leave of absence will not exceed two days, and then only when consistent with good service, and provided the company is not put to any additional expense.

Section 9. Permanent employees will be granted once per year transportation to any system in favour of themselves and members of their families, dependent upon them for support.

Section 10. The company will keep all Section houses in good repair, the cost of

repairs, other than ordinary wear and tear, to be charged to occupants.

Section 11. Where water is transported for use of section gangs, good water will be provided.

Section 12. A member of the household of permanent employees will be furnished with free transportation once a month to and from points where reasonable prices prevail, for the purpose of purchasing supplies. Such transportation may be used by any member of the family only.

Section 13. Free transportation will be granted to nurses, when their services are required by employees in isolated districts from points where they are obtainable, on presentation of a certificate from attending physician.

Section 14. Bridge and building gangs shall be composed of:—

1st. Foremen.

2nd. Carpenters, who shall be skilled mechanics in house and bench work, and have a proper kit of carpenter's tools.

3rd. Bridgemen, who shall be rough carpenters, expert saw, axe and hammermen, and have a general experience in bridge work.

Rates of Pay for Trackmen.

Yard Foremen:

Per Day.

Port Arthur, Winnipeg and
Edmonton..... \$2.75

Yard Foremen:

Atitokan, Rainy River, Portage
la Prairie, Dauphin, Kamsack,
Humbolt, N. Battleford, Ver-
million, Emerson, Belmont,
Brandon, Swan River, Prince
Albert, Saskatoon, Neepawa,
Morris, Fort Francis, Moranville
and Kipling..... 2.60
At all other points..... 2.55

Sectionmen or permanent labourers
on entire system except Port
Arthur, Winnipeg, Dauphin and
Edmonton..... 1.70

At Port Arthur, Winnipeg,
Dauphin and Edmonton..... 1.75
Assistant foremen..... 2.50
Section foremen in charge of snow
plow or flanger..... 3.20

Foremen in charge of extra gangs
\$2.50 to 3.45

Rates of pay for signalmen.

Signalmen at crossings..... 1.50
 Signalmen at Interlocking cross-
 ings..... 1.75

Rates of pay for bridge and building men.
 Per Day.

Foremen.....\$3.20 to \$3.45
 Carpenters..... 2.80 to 3.00
 Bridgemen..... 2.15 to 2.80
 Labourers..... .

Rates of pay for pumpmen.

Per Month.

Pumpmen, one pump.....\$48.00

Pumpmen, two pumps..... 53.00
 Pumpmen, three pumps..... 58.00
 Pump repairers..... 92.00

These rules will not take away any privileges that are now in effect with employees except that a charge of \$5.00 per month rent be made for section houses and \$2.00 per month rent for box cars.

That this schedule will commence on the first day of July, 1909, and end on the thirtieth day of June, 1911.

Respectfully submitted.

(Sgd.) W. J. CHRISTIE.

III. REPORT OF BOARD IN DISPUTE BETWEEN CUMBERLAND RAILWAY AND COAL COMPANY, OF SPRINGHILL, N.S., AND ITS EMPLOYEES.

THE Minister of Labour received on July 23, the report of the Board of Conciliation and Investigation to which was referred for adjustment the differences between the Cumberland Railway and Coal Company, Limited, and certain of its employees members of Local Union No. 469 of the United Mine Workers of America. The Board was composed of the Honourable Mr. Justice Longley, Judge of the Supreme Court of Nova Scotia, Mr. Charles Archibald, Halifax, appointed for the Company, and Mr. E. B. Paul, M.P.P., appointed for the employees. Mr. Archibald was appointed by the Minister in the absence of a recommendation from the Company. The first meeting of the Board was held on June 22, at Springhill, N.S. The employees were represented by Messrs. Seaman Terris, D. C. Matheson and Charles Betts. The company was represented by Messrs. D. Stewart, Assistant General-Manager, W. D. Mathews, Assistant Manager, and C. J. Alboom, Official Measure.

The report is signed by the three members of the Board, but is accompanied by a foot-note signed by Mr. Paul individually, modifying in some degree his acquiescence in the findings. The specific demands contained in the applica-

tion for the board in this matter were as follows, viz.:

1. Recognition of the Union.
2. To determine the standard weight of a box of coal for the purpose of forming a basis from which the rate per ton shall be arrived at.
3. To establish a schedule of prices for all classes of work in and about the mines.
4. To establish a docking system.

The Board remarks "while these are the special and specific matters which are to be considered and adjudicated upon by the board, the circumstances surrounding the whole enquiry seem to require a general statement in order that the position should be fairly understood."

The Board thereupon recites the circumstances under which three separate Boards of Conciliation and Investigation have been appointed during the last two years to enquire into disputes between this company and its employees and enumerates the leading features of the different investigations, dwelling particularly upon the strike of thirteen weeks which occurred in the autumn of 1907, and which was brought to a termination only by the acceptance on the part of the men of the findings of the Board of

Conciliation first established to adjust the differences between the company and its employees.

Taking up first the question of the recognition of the Union, the Board recites the circumstances and sets forth the arguments used by the respective sides to sustain their positions in the negotiations that had taken place.

Recognition of U. M. W. A.

It was claimed before the board by the employees that they have a perfect right to choose for themselves what form of organization they should adopt, and that the constitution and methods of the United Mine Workers were more advantageous to them than association with the Provincial Workmen's Association.

The Company, on its part, stated that it was prepared to receive individuals or committees of the employees on all matters pertaining to employment, and that no man or men had been refused a hearing by the Board of Management unless he or they came as a committee from the local Union of Mine Workers. The Company contended that it should not be required to help support what it regarded as a foreign labour organization, the main body of whose members are working, it says, to produce coal to supplant the Nova Scotia product in Canadian markets; that determined efforts were already being made by American operators to capture the St. Lawrence trade from the Nova Scotia producers, that the cost of producing coal in the United States was only one-third of the cost of putting coal f.o.b. cars in the deep mines of the mainland of Nova Scotia, that if this invasion continues Nova Scotia operators would either have to close down or reduce the cost of production. Objection was taken by the Company to the Constitution of the U.M.W. and it was "claimed that the P.W.A. is under the legislative control of the Province, while the U.M.W. as a body had neither standing nor property in Canada and are not under legislative control."

The Board declares that whilst recognition of the U.M.W. by this Company

might at the moment remove one source of friction between the parties it was by no means clear to the Board "that any right exists on the part of the Department of Labour to enforce upon any company operating a mine or any other industrial enterprise, a compulsion to give official recognition to any labour organization formed among its employees." It does not appear to the Board that recognition of labour organizations is by any means a universal rule in such cases. The Board adds that "certain large employers of labour have refused and continue to refuse to recognize any labour organization, and transact their business with individual employees or committees representing them. In the present instance the Board consider that it ought to be left to the judgment and discretion of the Company as to how far it will officially recognize an organization having its central authority outside the Province and largely under the control of interests that may be at some time in acute competition with the interests of the Company."

With reference to the second point of the reference to the Board regarding the method of determining the standard weight of a box of coal the Board advises that "Section 22 of Chapter 8, of the Nova Scotia Acts of 1908 provides a method by which any existing system of weighing can be changed or modified by arbitration and this act is enforceable by penalties. It seems clear to your Board that this constitutes a much more effective method of remedying any grievance than any mere empty recommendation of a Conciliation Board."

On the question of the employees' claim for a schedule of rates the Board finds that counsel for the employees was not disposed to press this branch of their claim "in as much as it had already been dealt with by the Board presided over by Judge Patterson." The Board is not disposed to differ from the general proposition that a schedule of rates when practicable is eminently desirable, but "nothing," it asserts, "is clearer than that the Company is not now in a position to admit of any increase whatever in the cost of production."

The Board does not think that the docking system is at present working unfairly or resulting in any palpable injustice to the miners. In some few sections of the mine, owing to the character of the chutes the Board says it is possible that the system now in vogue may in some instances work injustice. The most effective remedy, in the judgment of the Board, would be for the miners in those special districts to assume the care of the chutes through which they work. The Board recognizes that it would be extremely difficult to apply to the whole mine the system of fines or docking, which would only be specially applicable to certain parts of the mine, and not applicable to all. Instead of the present system the Board recommends "that when a box contains 50 lbs. of stone, and not exceeding 75 lbs., a fine of 500 lbs. of coal be imposed. When it contains 75 lbs., and not exceeding 100 lbs., a fine of 1,000 lbs. of coal be imposed. When a box contains 100 lbs. or more of stone the box would be docked."

Company's Statement.

During the inquiry the Company submitted a statement relating to its operations during a number of years past, which the Board considers of sufficient importance to embody in full in the report. This statement covers many pages and contains many important statistical calculations. The statement is headed "Losses in Operation" and is intended to show as the opening paragraph indicates "that the Company cannot continue to operate under conditions which have prevailed for the past three years and four months is manifest from the statements which are herewith submitted."

In the Company's statement it was claimed that deficits on its operations since 1906 amounted in the aggregate to \$299,690.17. The statement also sets forth the cost of coal, the selling price and the difference between the same respectively since 1906. For the year 1909 (four months) the cost of coal is herein given as \$2.95 and the selling price \$2.50 per ton, being a net loss of 39 cents. "There is no other operation in Nova

Scotia" the Company observes, "where the cost of production is within 50 to 95 cents per ton of the foregoing figures, and it is plain that this Company is handicapped to such an extent with an abnormally high cost of mining and comparably low average selling price, that to carry on in this untenable position will quickly result in disaster. There is no hope for the property under these adverse terms". The statement also enumerates various accidents and other occurrences as being among its experiences during the past twenty years. "Add to these disasters," comments the Company, "22 strikes, and it must be admitted that in mining each year there are contingencies to provide for, the expense of which cannot be avoided. The contingent account in mining is never closed."

The Board finds that the accuracy of the figures given in this statement was not seriously called into question by counsel for the employees and that indeed it is not likely that they are open to question. The leading purpose, it says, of the cross examination by counsel for the employees was to show, if possible, that some of the losses in the operation of the mine were due to defects in management, but in the judgment of the Board not much that was definite in this regard was elicited, but even if this were so it would not in the Board's view, diminish in the slightest degree the gravity of the situation. "Springhill is a town of some 6,000 or 7,000 people, which has been brought into existence almost entirely as the result of the mining operations of this company and its predecessor. The closing of these mines would mean very largely destruction of valuation at Springhill and a great depopulation of the town. It would mean also a serious loss to the Provincial revenues. Operations in this mine cannot be carried on as economically as in most of the mines in Cape Breton or even those on the mainland."

"Under these circumstances it seems to your Board unreasonable and impracticable that the employees should ask or expect higher rates of remuneration under existing conditions. The price of coal has fallen in large and important

contracts as compared with last year when a net loss resulted. The figures for five months of the present year indicate that the loss for 1908 is likely to be very much greater.

"Under these circumstances your Board cannot help recognizing that the only rational policy to be pursued by all parties concerned is one of conciliation and forbearance in order that this large and important industry may not be compelled to cease operations with most far-reaching and disastrous consequences to all, including the business men of the town. Heavy losses have been already entailed by twenty-two strikes which have exhausted the energies and wasted the resources of the company. In the judgment of the Board the present is not a time to agitate for changes, but rather a time a common effort should be made to improve the situation and secure the permanence of industry."

In what the Board describes as a careful review of the whole situation and all the surrounding circumstances attending the history of the mine during the past twenty-six years during which it has been under the control of the present company, the Board expresses the view that it might tend to allay longstanding friction and secure a better state of feeling between the company and employees if a change could be made in the methods of management.

Management of Company.

"Your Board saw tokens during the somewhat lengthy investigation of the matters in dispute that unpleasant feelings, if not distinct hostility, existed between a large number of employees and the management. It would perhaps, be invidious to attempt to place the responsibility for this, but the board feel it their duty to bring this state of affairs to the attention of the directors of the company in a formal manner by means of this report.

"This Board recommends the directors to make a careful investigation into this unpleasant feature of existing relations with the hope that they may be able to adopt such a policy or make such changes

as will prevent the possibility of the unfortunate conditions prevailing in the future.

"Your Board although conscious of having endeavoured to give their best consideration to all matters touching the welfare of both the company and its employees are yet painfully sensible that small results are likely to flow from any immediate recommendations they make, unless, indeed, it shall result in such a change in existing conditions as will obliterate the unfortunate consequences of long standing differences."

Note by Mr. E. B. Paul.

The foot-note appended to the report and signed by Mr. E. B. Paul is as follows:—

"With most of the facts stated in the above, I concur, but in respect of some of the recommendations made I feel compelled to dissent.

"*First.* I think the recognition of Local Union No. 469 by the company would result in allaying friction and tend generally to a better understanding between the management and the employees. I think the employees should have the right to organize under any conditions and regulations which suit them best. So long as such organization contains no provisions or obligations which conflict with our laws, Provincial or general.

"*Second and Third.* I am not disposed to disagree with the recommendations in respect of these two items submitted to the board. I believe in a schedule of rates, and that operations would be carried on more smoothly and satisfactorily if such were in operation at Springhill, as well as other coal mines in Nova Scotia, though I do not mean by this that higher rates should be imposed than are at present paid."

Report of Board.

The text of the findings of the board is as follows:—

In the matter of the Industrial Disputes Investigation Act and of the Cumberland Railway & Coal Company, Limi-

ted, Employer, and certain employees members of Local Union No. 469 of the United Mine Workers of America, Employees.

The Board composed of,

Mr. E. B. Paul, M.P.P., Representing the Employees,

Mr. Charles Archibald, Appointed by the Minister to represent the Company, and

Mr. Justice Longley, Chairman, met pursuant to Notice at Springhill on the 22nd day of June, 1909.

The Employees, Local Union No. 469, U. M. W., were represented by three men, Seamen Terris, D. C. Matheson and Chesley Betts.

The Company was represented by D. Stewart, Assistant General Manager, D. D. Mathews, Assistant Manager, and C. J. Allbon, Official Measurer.

The usual course was taken of suggesting an amicable adjustment of the difficulties between the parties concerned, but this proved entirely hopeless, the representatives of the Company stating that they were not prepared to accept in any form, any of the propositions propounded by the Employees in their Application for Conciliation.

In making application for this Board of Conciliation four specific demands were made, as follows:

1. Recognition of the Union.
2. To determine the standard weight of a box of coal for the purpose of forming a basis from which the rate per ton shall be arrived at.
3. To establish a schedule of prices for all classes of work in and about the mines.
4. To establish a docking system.

While these are the special and specific matters which are to be considered and adjudicated upon by the Board, the circumstances surrounding the whole enquiry seem to require a general statement in order that the position should be fairly understood.

Within the past two years three Boards of Conciliation have previously been appointed to make and have made investigations as to the difficulties between this Company and their employees, and issues involved in some of the matters now submitted for our consideration

have already been more or less investigated and reported upon by previous Boards, but under circumstances somewhat differing from those now existing. In the case of the Board of which Mr. Justice Graham was Chairman which held enquiries in May and July, 1907, the parties appeared before the Commission without Counsel and consequently without that searching and complete enquiry which could be reached when experienced advocates were employed to prove matters fully. Subsequent to the report made by Mr. Justice Graham and his associates a long strike took place, continuing for thirteen weeks until October, 1907.

During the progress of the strike a Board of Conciliation consisting of Judge Patterson, Mr. P. S. Archibald and Mr. R. R. Murray was appointed, and after making some progress the Company declined to go on with the matter on account of the continuance of the strike, and Mr. Archibald withdrew from the Board. The strike, as far as this Board has been able to gather, resulted in failure on the part of the strikers and they resumed work, and immediately after the Company issued a general order by the General Manager on or about the 26th of October, in the following terms.

"The men may resume work on the distinct understanding that they must abide by the award of the Board of Conciliation and that there cannot by any increases in wages in the district covered by the award now or later. The President and Directors of this Company are firm in their determination as they have been all along that the men must return under exactly the same terms and conditions as existing when they quit on the 31st of July against the ruling of the Board of Conciliation. The Company cannot afford to make and will not make advances on the abnormally high rates now being paid. The cost of production must not be increased. Let this be plainly understood and the men can go back to work."

Shortly after resuming work on November 21st., 1907, the Employees applied for a further Board of Conciliation and Investigation to adjust differences

between the Company and their employees, Judge Patterson, Mr. Hiram Donkin and Mr. R. B. Murray constituting such a Board, which met on the 8th of January and heard evidence and reported on the 18th of January, On this occasion the Company was wholly unrepresented and did not appear before the Board, and a report was sent in by the Board based entirely upon such evidence and representations as were submitted by the Employees.

When this Board met on the 22nd of June, no counsel appeared as has been already represented, and the Employees had declined up to that time to have counsel heard. But after spending some hours in presenting their case and finding the Company present and prepared to go into all the matters now submitted for consideration, the representatives of the Employees concluded that it would be necessary to have counsel in order to properly submit their case and an adjournment for one day was asked in order that counsel might be obtained and instructed. On meeting again on the morning of the 23rd., Mr. C. R. Smith, K. C., of Amherst, appeared on behalf of the Employees and asked for a further adjournment of one week in order that he might have ample opportunity to prepare himself for the due and effective presentation of the case on behalf of the Employees. Mr. H. McInnis, K. C., of Halifax, appeared then as Counsel for the Company, and agreed to this proposition of adjournment. The Board accordingly adjourned until Thursday, the first day of July, when it resumed meeting at 2 o'clock, p.m. The whole case was then thoroughly submitted in ample form. Witnesses were produced on both sides and subjected to thorough cross-examination; and this Board is of the opinion that the matters in dispute between the Employer and Employees, some of which are of long standing, have been more completely and satisfactorily probed than on any of the previous occasions.

(1) *Recognition of the U. M. W. of A.*

The first matter to which the Board had its attention directed was a demand on behalf of Local Union No. 469 to receive

recognition by the Company as a labour organization embracing the greater number of its Employees. The circumstances as submitted to the Board are as follows: Since 1879, Pioneer Lodge of the Provincial Workmen's Association has been in existence at Springhill. Some intimation was made in the course of the evidence that for a period of a year or two this Lodge was not in regularly organized existence, but practically for thirty years this was the recognized Labour Union at the mines. Subsequently, Mechanics' Lodge was also organized at Springhill under the auspices of the P. W. A., and the two lodges containing different classes of men were the recognized labour unions in connection with this mine. The organizations were officially recognized by the Cumberland Railway & Coal Company practically during all the period in which the Company has been operating the mine, for twenty-six years.

In the last days of 1908 the Pioneer and Mechanics' Lodges ceased to exist.

By a referendum vote it was determined by a large majority to cease to work under the P. W. A., and to affiliate with the United Mine Workers of America and immediately after, Local Union No. 469 was organized, and so far as the evidence goes it already embraces 1,000 or 1,200 of the employees of the mines. Upon its formation official notification was sent to the General Manager of the C. R. & C. Company announcing the dissolution of Pioneer and Mechanic' Lodges and the formation of Local Union No. 469, U. M. W., and demanding recognition.

On the 15th of January, 1909, the General Manager in reply intimated that he was advised that litigation had been begun at Sydney by the Grand Council of the P. W. A., in reference to the affairs of Pioneer Lodge and until advised as to the result of the litigation the Company merely acknowledged the receipt of their communication.

In April, 1908, the Local Union made a long representation to the General Manager of the Company asking for a meeting with the Management to discuss the situation and thereby avoiding friction. The General Manager declined to receive

any deputation from the Union, but did receive a delegation from the miners who while really a committee from the Local Union did not declare themselves as such and business was transacted with this delegation.

On behalf of the Employees it was urged that the Constitution and By-Laws of the United Mine Workers was better adapted for the purposes and interests of an organized body of miners than the Provincial Workmen's Association; that its methods of working were more favourable to pleasant relations between the Management and the men, and the sundry advantages were derived from connection with a body having a large membership extending over various portions of the Continent of North America. It was also claimed by the Employees that men employed in any large mining enterprise had a perfect right to choose for themselves what form of organization they should adopt.

To this the Company reply that they are prepared to receive individuals or committees of the Employees in all matters pertaining to the employment, that no man or men have been refused a hearing by the Board of Management unless they came as a committee from the Local Union of Mine Workers.

The Company contends that it should not be required to encourage and help support a foreign labour organization, the main body of whose members are working to produce coal to supplant Nova Scotia product in Canadian markets to the demoralization of its business and possible annihilation of its property. The Company further say that owing to the depression in the United States last year and this a determined effort has been and is being made by American operators to capture the St. Lawrence trade and large quantities of American Coal have been sold to the extent of depriving Nova Scotia Companies of their rights in important Canadian markets. The result of this intrusion is to make local competition in the Provinces keener and depreciate values to such a degree as to either compel Nova Scotia operators to cease producing or force them to make a reduction in wages. The cost

of producing coal in the United States is only one-third of the cost of putting coal f. o. b. cars in the deep mines and heavy pitching seams on the main lands of Nova Scotia, and the result, if this invasion continues, will be that Nova Scotia operators will either close down or the cost of production be reduced.

Objection is also made by the Company to the fact under the Constitution of the U. M. W. all employees of the mine must become members of the same except those having power to hire or discharge men, and under this provision their underground Managers and all other officers in connection with the Management of the Company, including Examiners, will have to belong to the Union, whereas under the provisions of the P. W. A., only those occupying non-official positions in the mines were eligible, the advantage of which latter provision is that the officials being apart from the Union are in a position is necessary to fire the boilers, operate pumps, fans, engines, etc., make necessary repairs, and guard the property of the Company and Crown until work is resumed, in the case of a strike. It is claimed, that the P. W. A., is under the Legislative control of the Province, while the U. M. W., as a body have neither standing nor property in Canada and are not under Legislative control.

The Board have given due consideration to the representations made on both sides in this matter with a view of suggesting such action as will be most mutually advantageous to both parties and to the interests of the industry in general.

It is quite possible that recognition of the Local Union No. 469, U. M. W., by the C. R. & C. Company would at the present moment remove one unpleasant source of friction between the parties. It is however, by no means clear to your Board that any right exists on the part of the Department of Labour to enforce upon any company operating a mine or any other industrial enterprise a compulsion to give official recognition to any labour organization formed among its employees. Uudoubtedly, under certain circumstances such a recognition results in convenience of various kinds in the transaction of the delicate relations which

must always subsist between employer and employees in enterprises involving large numbers of the latter. From all the information which your Board has been able to obtain, however, it does not appear that such recognition is by any means a universal rule in such cases. Certain large employers of labour have refused and continue to refuse to recognize any labour organization and transact their business with individual employees or committee representing them.

Section 26 of the Industrial Disputes Investigation Act provides "that the Board's recommendation shall deal with each item of the dispute and shall state in plain terms, etc., what in the Board's opinion ought or ought not to be done by the respective parties concerned."

In the present instance, this Board does not feel under all the circumstances that it ought to definitely express an opinion that the Company should recognize Local Union 469 of the U. M. W. It may or may not be desirable that the Company should do this, but it seems to your Board that in view of the representations made it would be exceeding the just limits of its functions to express any definite opinion as to what the Company ought to do in this regard. We think it ought to be left to the judgment and discretion of the Company as to how far it will officially recognize an organization having its central authority outside the Province, and largely under the control of interests that may be at some time in acute competition with the interests of the Company.

- (2) *To determine the standard weight of a box of coal for the purpose of forming a basis from which the rate per ton shall be arrived at.*

The Counsel representing the employees intimated that this matter having been dealt with fully and presumably satisfactory to the men in the report of the Board of Conciliation of which Judge Patterson was Chairman in January, 1908 they did not desire to reopen the matter. The Company declined to accept this view, the matter having been raised distinctly by the employees in their request for a Board of Conciliation and the re-

port made by Judge Patterson and his associates having been based entirely upon ex parte testimony which did not fully and fairly present all sides of the question, they desired to avail themselves of the present opportunity of having the matter thoroughly investigated in order that a more just and satisfactory presentation of the case be made to the Department.

The Board deeming it in every way desirable that these long-standing matters of difference between the parties should be subjected to the fullest enquiry concurred in the view, that evidence could not be properly excluded, and therefore they permitted the Company to state its case fully and hear all that could be urged in support of the contentions of the employees as embodied very fully in the report of Judge Patterson and his associates in January, 1908.

The history of the relations between the parties in this regard are fully set forth in the statement made by the Company and attested to under oath by one of its officials. As it seems impossible to condense this statement it is submitted in full. The only additional light thrown by the employees in respect of this statement is that it was not accepted by the members of Pioneer Lodge, although assented to and signed by the Grand Master and Grand Secretary of the P. W. A.

Standard Weight of a Box of Coal.

The agreement existing concerning filling of mine cars or boxes from the 13th of January, 1893, is as follows:—

Memo. of agreement made this 13th day of January, 1893, between the management of the Cumberland Railway & Coal Company and the employed in the Springhill Collieries of said Company, in respect of filling of boxes.

1. That all boxes be properly filled level full at the face.

2. That the Management see that all boxes are properly filled level full at the face.

3. That the "sender" or "senders" of any box or boxes, the contents of which are below six inches of level full on reaching the bank be fined twenty cents for short measure for each box.

4. That the Bankhead Foreman and Checkweighman determine all deductions for short measure.

5. That this agreement be adhered to until scales are placed on the bankheads.

6. That this agreement be registered in the Commissioner of Mines Office, Halifax, N.S.

On behalf of the Management.

(Sgd.) Alex. McInnes, *Manager*.
 C. Hargreaves, *Asst. Manager*.
 A. D. Ferguson, *Underground Manager, No. 1*.
 M. Blue, *Underground Manager No. 2*.
 W. D. Matthews, *Underground Manager, No. 3*.

On behalf of the Employed:

(Sgd.) James Murphy	} Committee of Pioneer Lodge.
John Fletcher	
Matthew McPherson	
John H. McVicar	
Thomas Pigott	

This undertaking refilling of mine cars covers a period of fifteen years.

In accordance with this agreement, on each Underground Examiner's report the following query is to be found:—

"Are all places worked to best advantage for large coal and mine cars filled level full at the faces and chutes?"

Scales.

Pioneer Lodge, No. 1, P.W.A. made a demand, March 2nd, 1907, for scales as follows:—

The above Lodge demands the Weight Scales placed on the banks of No. 2 and 3 slopes of Springhill Collieries, without delay.

(Sgd.) Edward Bradley, *Conv.*
 Wm. Watkins, *Secy.*

To J. R. Cowans, Esq.,
General Manager.

Replied to, *viz.*:—

Springhill, N.S., March 13, 1907.

Wm. Watkins, Esq.,
Secy. Pioneer Lodge No. 1, P.W.A.,
 Springhill, N.S.

Dear Sir:—

Referring to your notice of the 2nd inst., for weigh scales I would advise you that scales will be installed on both bankheads as requested, with as little delay as possible.

Yours very truly,

(Sgd.) J. R. Cowans.

Another communication from Pioneer Lodge, as follows:—

Springhill, N.S., March 16, 1907.

J. R. Cowans, Esq.,
General Manager.

Dear Sir:—

I beg to inform you that the above Lodge demands the scales installed on No. 2 and 3 banks by June 1st, 1907.

Believe me,

Yours faithfully,

(Sgd.) Edward Bradley,
Conv. Management Committee.

Accordingly, weigh scales were installed during the strike of 1907, and duly inspected on the 12th of November, 1907, by Mr. J. J. Chisholm, Assistant Government Inspector of Weights and Measures, and certificates of inspection posted in each weigh house. The Checkweighmen were invited to take their places in the scale house and check the scale weights. For some season or other they failed to do so.

On the 16th November, 1907, the members of Pioneer Lodge were requested *viz.*:—

Springhill, N.S., November 16, 1907.

Wm. Watkins, Esq.,
Secy. Pioneer Lodge, No. 1, P.W.A.,
 Springhill, N.S.

Dear Sir:—

In the matter of Scale.

In order to prevent any possibility of dispute regarding weights if your Checkweighmen do not check scale weights, the Company will put on sworn weighers immediately.

Yours very truly,

(Sgd.) J. R. Cowans.

No notice was taken by Pioneer Lodge or Checkweighmen, and certified sworn weighers were brought from Halifax, to check and certify to a gross and tare weights from the 21st to 30th of November, inclusive.

The members of Pioneer Lodge or miners were particularly requested to come together and agree between themselves to name a date or dates covering the nine days between and including the 21st and 30th of November, to reach the standard average weight of contents of mine cars at each mine, with a notification that if the miners did not interest themselves in the proposed change of their own demand, the Company would take it for granted that the miners were satisfied that the total returns for the nine days above mentioned should be taken to arrive at a standard base weight at each mine.

The gross and tare weights were computed by weighers checked by office staff, rechecked and affirmed on oath by sworn weighers.

Further, in order that there might be no question as to the accuracy of the weights, during the every day practice of nine consecutive days hoisting, an independent audit was made on the weights by competent accountants outside the Company's service altogether, and these returns fixed the base weights rate at No. 2 mine of 1843 lbs., and at No. 3 mine 2,009 lbs., as per following statement of independent audit:—

Weights of coal raised from the Cumberland Railway & Coal Co.'s mines Nos. 2 and 3, from November 21st to 30th inclusive, 1907, exclusive of coal loaded on Company tallies by Company hands.

No. 2 Mine.

 Average Net Weight empty mine car 2,009

We, hereby, certify that we have verified all the figures shown above, and the average net weights are correct.

(Sgd.) E. B. Fairbanks, *Manager Can. Bank of Commerce.*
 J. H. Turner, *Manager Bank of Nova Scotia.*
 F. G. Morehouse, *Principal Public Schoo.s.*

Springhill, N.S.,
 18th December, 1907.

I certify that the attached is a true copy of statement compiled by Messrs. Fairbanks, Turner and Morehouse, of weights of coal raised from Nos. 2 and 3 mine, November 21st to 30th inclusive 1907, and empty mine cars.

(Sgd.) D. Stewart.

Declared before me at Sprighill, in the County of Cumberland, this 19th day of December, A.D., 1907.

(Sgd.) John M. Hunter, J.P.,
 County of Cumberland.

Important notice to miners was posted, viz.:—

Important Notice to Miners.

Commencing to-day the 2nd December, miners of their own demand will fill by the ton instead of by measure.

Please remember that properly filled mine cars will net profitably to the sender on the scales and load accordingly.

Instruct your loaders not to send short filled cars.

By order,

(Sgd.) C. Hargreaves,
Manager.

Springhill, N.S.,
December 2nd, 1907.

To pave the way for an amicable settlement the members of the Lodge were addressed as follows:—

Springhill, N.S., Dec. 2, 1907.

Wm. Watkins, Esq.,

*Secy., Pioneer Lodge, No. 1, P.W.A.,
Springhill, N.S.*

Dear Sir:—

As required by the members of your Lodge, weigh scales were installed on the banks of Nos. 2 and 3 mines, and duly inspected on the 12th of November, 1907, by Mr. J. J. Chisholm, Assistant Government Inspector of Weights and Measures, and certificates of inspection hung up in each weigh house.

On the 16th ult., you were requested, viz.:—

“In order to prevent any possibility of dispute regarding weights, if your Checkweighmen do not check scale weights, the Company will put on sworn weighers immediately.”

As your Checkweighmen did not take their places in the weigh house, Sworn Weighers were put on and have checked and certified to all gross and tare weights from the 21st to 30th of November inclusive.

It is the desire of this Company that the change from payment by measurement to payment by weight be made in actual practice to avoid unnecessary friction, and also to conform with the terms of the Company's ultimatum, under which the men resumed work after the recent strike.

The Company, therefore, asks the miners to agree amongst themselves and name one, two, three or more work days between and including the 21st to the 30th ult. to arrive at a standard basis of the average contents of mine cars. The average net weights of the day or days selected by the miners during the period when sworn checkweighers certified to gross and tare weights to be fixed as a standard at both mines from which to establish base rates to change from payment by measurement to payment by weight.

The Company considers that to make the change in actual practice is the fairest and most liberal treatment that can be accorded its miners in this matter.

If the miners do not consider the question of the change made at their own demand and choose the days for computation by which the results duly certified may be obtained, the Company will take the total returns during the period named and arrive at a standard base weight at each mine certified and affirmed on oath.

It will be necessary for the miners to decide upon dates during the term of sworn inspection, not later than the 6th inst., in order to make up the accounts.

Yours very truly,

(Sgd.) J. R. Cowans.

The matter stood in abeyance for some time, when the Managing Committee of Pioneer Lodge suggested to the Management that a box of coal be tested from each mine.

The Committee was addressed as follows, on this proposal:—

Springhill, N.S., February 20, 1908.

Messrs. McPherson, *et al*,

*Committee, Pioneer Lodge, No. 1, P.W.A
Springhill, N.S.*

Dear Sirs:—

Subject—Scales.

As to your proposal that we test a box of coal from each mine, I would advise that we had an experience in respect to filling of boxes in 1893, and it was far from satisfactory. In the first place the box or car referred to was indifferently

filled. Then the driver made his way to the bottom of the slope with the car at a gait which was calculated to shake the contents down as low as possible in transit. Everybody's hand seemed to have been against this box, with the result that it arrived on bank six inches short of level full. Any practical miner will admit that a box properly loaded level full at the face will not shrink six inches in transit to bank with any kind of fair treatment. We have no intention of making further tests of this sort.

But the matter of scales is not a subject for test but one of practice.

The understanding was when scales were placed on the bankhead at the demand of the men that the change be made without additional cost to the Company. In other words, the Company and miners were to change from payment by measure to payment by weight in the average weight of contents of mine cars *in actual practice*.

The Lodge was asked to send Checkweighmen to check the weights, and its failure to do so compelled the Company to put on sworn weighers.

Nine consecutive working days output was taken and the average return fixed the standard weight at each mine.

The Company considers the subject disposed of fairly and finally, but, in order to show the men that it deals equitably and to disabuse the minds of all concerned of any intention to take an undue advantage in the matter of change from payment by measure to payment by weight, is willing to give the miners another opportunity of selecting days output to arrive at a standard for each mine.

As all coal has been weighed since 21st November to date inclusive, the Company suggests that the miners do respectively entreat His Honour The Lieutenant Governor of Nova Scotia to select for them any number of working days during this term to *compute the average weight of contents of mine cars, both mines*, and thus determine the standard weights, providing of course that such results finally dispose of the question, and that there will be no appeal from the conclusion later.

If the miners do not avail themselves of this opportunity the standard weights fixed by nine consecutive days hoisting under sworn inspection will stand.

The above offer is for immediate acceptance.

Yours very truly,

(Sgd.) J. R. Cowans.

Again, the Company, in its desire to dispose of the matter amicably, suggested that Premier Murray select the dates.

The open letter in the press read as follows:—

The Company says "*Let Premier Murray select the dates.*"

To the Editor of "The Tribune."
Springhill, N.S.

Dear Sir:—

When I was in Halifax last week the officials of the Mines Department made inquiries about standard weights. I went over with them, what they were already familiar with, as to how the official tests had been conducted and further stated to them, a fact of which they were not aware, and that I had made the men the following offer:—

Springhill, N.S., Feb. 20, 1908.

"As all coal has been weighed since the 21st November to date inclusive, the Company suggests that the miners do respectfully entreat His Honour the Lieutenant Governor of Nova Scotia to select for them any number of working days during this term to compute the average weight of contents of mine cars both mines and thus determine the standard weights, providing of course that such results finally dispose of the question and that there will be no appeal from the conclusion later.

If the miners do not avail themselves of the opportunity the standard weight fixed by the nine consecutive days hoisting under sworn inspection will stand."

I pointed out, what is the fact, that clauses 1 and 2 of the agreement of the 13th January, 1893, on file in the Mines Office in reference to the method of fill-

ing boxes had not been changed. The clauses of the agreement are:—

1. *That all boxes be properly filled level full at the face.*

2. *That the Management see that all boxes are properly filled level full at the face.*

We now make this further offer: That the Honourable Mr. Murray, the Premier of the Province, should select on behalf of the men any day or days or the whole of them from the 15th November to date March 26th to arrive at a base weight at each mine. The question is so simple that it should resolve itself. There is so much coal hoisted in so many cars. Divide the number of cars into the total weight of coal, and the result is the average weight of contents of cars—and standard weight for each mine.

The Company pays out the same amount of money distributed over the senders of cars. Miners who load full measure make a gain on each car. Miners who load slack and below the standard show loss. The scales, and not the Company tell the miner how he is loading, is the difference between loading by measure and by weight, and the miner who loads well earns well, as he is paid for all he fills.

(Sgd.) J. R. Cowans,
General Manager.

Cumberland Railway & Coal Co.
Springhill, N. S.

March 30th, 1908.

But all to no purpose, the members of Pioneer Lodge would not consent to change from payment by measure or box to payment by weight in practice, as was understood when the demand for scales was made.

The question remained in *statu quo* until Grand Master McNeil and Grand Secretary Moffatt came to Springhill on behalf of the men to discuss with the Management the possibility of arriving at a standard weight satisfactory to all parties.

Present at meeting Saturday April 4th 1908: John Moffatt, S. B. McNeil, Kent Foster, Daniel Ross, Duncan Blue, Alex. Wilson, Alex. E. McPherson, Samuel D.

Beaton, Grand Officers and Committee, Pioneer Lodge, and J. R. Cowans, C. Hargreaves, W. D. Matthews, W. Lorimer D. McSaveney, C. Allbon, D. Stewart, Company Management.

Mr. Moffatt insisted that the only means of settlement which would satisfy the men was to dump coal from mine cars on bankheads and reload with shovel cars level full and weigh for standard.

The Management contended that the standard weights were determined by sworn weighers and independent audit of weights by competent outside Accountants and fixed.

After a lengthy conference, nothing was settled, but an appointment was made to meet the Grand Officers and Committee again Monday at 10 o'clock. Monday, Grand Officers McNeil and Moffatt and Alex. E. McPherson, Convenor of Committee came down to the office as agreed.

The Management offered and asked that Grand Master McNeil go to the scales on one bankhead for one hour and Grand Secretary Moffatt on the other bankhead, weight contents of mine cars as they passed over the scales and fix a standard each mine themselves, according to the average weights of an hour's run or more each mine at their option. Grand Officers McNeil and Moffatt declined the offer, but were willing to take a number of mine cars loaded level full of dry coal on the bank at each mine for a standard weight as the men desired. This the Management assented to with an earnest desire to dispose of the question to the satisfaction of the men.

On the way to the bankhead Messrs. McNeil and Moffatt were asked to take charge of the proceedings, select any rake or run of coal that they might consider a fair sample of the run of the mine, order the cars stopped, and the contents dumped on the floor reloaded by shovel level full, contents weighed, and cars retaréd, to arrive at standard weight both mines.

On arrival at No. 2 bankhead, Messrs. McNeil and Moffatt after consultation with Checkweighmen, decided to weigh coal of certain tallies, said to be the lightest in the mine. The Management offered no ob-

jections. They stopped two rakes of their own accord set aside the cars containing wet coal, selected 13 cars of dry coal, had contents dumped on the coal floor, cars reloaded by members of Pioneer Lodge, with shovels, level full, and the tops of the cars planed with a straightedge so that no coal would stand above the sides. These cars were then weighed by the Grand Officers and Convenor of Committee, coal dumped, and cars tared by them also. The same method was adopted on No. 3 bankhead.

The Grand Officers and Convenor of Committee took the matter in hand, selected cars containing dry coal only, had coal dumped on the floor, cars refilled with shovels, and every precaution taken that no coal was loaded above the sides of the cars. Took gross and tare weights themselves, and the same afternoon computed weights and fixed standard at No. 2 at 1907 and No. 3. at 1908. Mr. Stewart Asst. to General Manager, checked weights on behalf of the Company.

All the papers in this connection are attached.

Springhill, N. S.

April 4th, 1908.

Meeting, Committee Pioneer Lodge with Grand Officers McNeil and Moffatt and Company Management.

John, Moffatt, S. B. McNeil, Kent Foster, Daniel Ross, Ducan Blue, Alex. Wilson, Alex. E. McPherson, Samuel D. Beaton, Grand Officers and Committee Pioneer Lodge; and J. R. Cowans, C. Hargreaves, W. D. Matthews, W. Lorimer, D. McSaveney, C. Allbon, D. Stewart, Company Management.

Mr. Moffatt: re difficulty Scales and Schedule.

Scales— Dump coal from cars on bank and load cars level full and weigh for standard.

Company: The whole question is we contend and prove by scales that the standard is right. The men contend that cars are overloaded.

The foregoing memos. were made by me at and during time of meeting between Committee of Pioneer Lodge. Messrs. Moffatt and McNeil of the P. W. A. and Officials of Company on Saturday 4th April 1908.

No. 3 Mine.

Alex. E. McPherson, Convenor of Pioneer Lodge Committee, was present when weighing done, also James Matthews as well as Moffatt, McNeil and myself, same procedure as at No. 2.

Scales balanced perfectly at Zero before weighing of loaded and empty cars. Ball on beam at 1000 lbs., to facilitate weighing as dial alone has not capacity to indicate gross weight.

(Sgd.) D. Stewart.

Springhill, N. S.

April 6th, 1908.

Every effort was made by the Company to effect the change fairly and amicably, and to arrive at standard average weight of contents of mine cars in ordinary practice. The Company offered to take the average weight of nine consecutive days hoisting each mine, either one or more of all the days at the men's option from November 21st to 30th inclusive 1907, when all coal was weighed by sworn weighers.

Then the Company suggested to the miners to respectfully ask His Honour, the Lieutenant Governor of Nova Scotia to select any number of working days during the term when sworn weighers

were engaged to average weights of contents of mine cars and determine standard weights.

Then again the Company further offered that Premier Murray be requested by the men to select any day or days from the 15th November 1907 to March 26th 1908, a period of 4 months and 11 days to arrive at the average standard weight of contents of mine cars.

No notice was taken of any of these offers of the Company to the men to dispose of the questions at issue, and it remained for the Grand Officers McNeil and Moffatt to come to Springhill to learn from the men that the only means of settlement which would satisfy them was to dump coal from cars on bank, load same cars level full, weigh contents and average for standard. All, this was done to the satisfaction of the Grand Officers who fixed standard at No. 2 as 1907 and No. 3 at 1908 and these fixed weights have been in effect since April 9th, 1908. This closed the matter definitely. Miners have since accepted their pay without demur.

(3) *Schedule of Rates.*

As already intimated, the Counsel for the employees was not disposed to press this branch of their claim, inasmuch as it had already been dealt with by the Board presided over by Judge Patterson. Evidence, however, was given on behalf of the employees in respect of this Schedule, and this Board deems it necessary to deal with the matter fully.

The arguments put forward on behalf of the employees is that a Schedule of rates is desirable, as it tends to prevent misunderstanding and enables each workman, even though previously inexperienced in respect to the computation of payments, to understand in advance precisely what he is to receive for any given work. Evidence was given that such a schedule of rates is in operation in other mines with satisfactory results. The employees submitted a schedule of rates which they desired the Company to consider, not necessarily to adopt in precise terms the rates set forth in such schedule, but to make it the basis of consideration and discussion with the Company with a

view of agreeing to such rate as would be mutually satisfactory. The schedule submitted was substantially the same as that which had been submitted to Judge Patterson and in the main approved by that Board.

The Company upon being notified of the findings of Judge Patterson's Board promptly declined to accept the same, upon the ground that the adoption of such a schedule would result in a substantial increase of wages which the Company could not accept owing to the fact that it was already losing money and because it was in violation of the terms under which the men resumed work on the 28th of October 1907, which have been already quoted. In the statement of the conditions of re-employment it was emphatically stated, "The Company cannot afford and will not make any advances in the abnormally high rates now being paid."

The Company maintain that there is and has long been in operation a schedule of rates at the Springhill Mines which were in operation on the 28th of October, 1907, and which have been recognized and accepted ever since. It is quite true that this schedule is not absolute nor fixed in all particulars, but it is claimed, by the Company that a fixed schedule of rates in Springhill is unworkable. With thick and thin seams of more or less varying nature, with irregular dips of the measures, local disturbances of faults and heavy superincumbent pressure, it is impossible to arrive at a fixed scale or wages for such variations in the conditions under which the mines are operated. Rates as fixed are entered and appear on the pay-rolls, and every man's rate is given in his monthly statement.

Where conditions are exceptional or appear to be, men make demands on the Company for extra considerations, many which are not always supported by existing conditions. A schedule would leave unsettled so many rates to be covered by local conditions and ability and willingness of the men that it would be almost worthless.

That an absolutely fixed rate would be impracticable is fairly apparent from Clause 55 of the Schedule of rates now

submitted which declares, "change in the state of the coal, faults and other unusual conditions to be dealt with as they arise."

Notwithstanding the fact that a fixed schedule of rates seems under the circumstances to be extremely difficult to obtain the Board are not disposed to differ from the general proposition that a schedule of rates when practicable is eminent desirable, and they would have been glad if the Company could have been induced to consider the scale submitted with a view of so modifying its claims as to make it conform to the condition that there should be no increase in the wages now and hitherto paid, but this the Company did not seem disposed to do.

To adopt the present Schedule seems to this Board to be out of the question, as it was stated openly by the Solicitor for the Company that its adoption would involve an increase of 40 per cent. on wages paid to those working underground and 28 per cent. to those working overground. Nothing is clearer than that the Company is not now in a position to admit of any increase whatever in the costs of production.

(4) *To establish a Docking System.*

The system of fines and docking stone existed in the working of Springhill Mines dating back to 1890. Its introduction led to a strike which lasted nine weeks, at the conclusion of which an agreement was entered into between the Company and a committee of Pioneer Lodge in which the following clause appears: "Respecting the agreement in the matter of stone docking it is agreed that the maximum of stone be twenty-four pounds per box. If over twenty-four pounds, a fine of 20 cents to be imposed, and if over forty-five pounds the box to be forfeited."

This system remained in force for ten years, when at the instance of Pioneer Lodge a rearrangement of rates for docks and fines was submitted to a local Board of Arbitrators formed by mutual agreement between the Company and the Lodge who on September 21st, 1900, determined as follows: "All boxes containing 60 pounds of stone or upwards to be docked. All boxes containing 40 pounds

of stone or upwards to be fined 20 cents." This system has been in operation ever since.

The men now ask and desire a modification of the system upon several grounds. First, that owing to the conditions prevailing in certain parts of the mine, the amount of stone incurring a fine and dockage is too small. Second, that the docking system itself works in some instances injustice. Third, that as the operation in many parts of the mine is conducted through chutes the timbering of which is liable to get out of repair and lead to the falling of stone that men are liable to be docked for stone in the boxes and cars for which they are in no way responsible. Fourth, that the Company's screens have been changed from $\frac{3}{4}$ inch screen to $\frac{1}{2}$ inch mesh, which discovers more small stone.

Evidence was given of some instances in which men were docked for a large proportion of cars sent up within a given period, and their remuneration for their labour thus reduced to an extremely small amount. A table was submitted containing a statement of the docks and fines imposed in No. 2 and No. 3 slopes respectively in the years 1906, 1907, 1908, which is herewith attached.

Docks and fines for 1908 represent approximately 21,000 tons of coal, and after making liberal allowance for the actual weight of stone found in the boxes, the Company will have appropriated some 20,000 tons of coal, which if paid for would represent at least, \$8,500.00 additional wages to the miners, in respect of this coal that they have been compelled to mine for nothing.

Evidence was given that in some of the slopes the timbering was out of repair, and that the split booms which are placed against the roof of the mine are often insufficient in strength and lead to the fall of stone from the roof.

Of course, it is unthinkable that a system should prevail whereby a man was fined or docked for stone in the boxes which had been placed there by means and agencies over which he had no control, and your Board therefore, felt it necessary to go into this matter most thoroughly and exhaustively.

The answer of the Company to these statements may be stated in order.

First, they say, which, of course, is incontrovertible, that it is of the utmost importance to the Company and its employees that coal free from stone and impurities be marketed. Inspection on coal has become so rigid that it is a common occurrence to have coal inspected that is thrown back on the Company's hands. In view of the importance of shipping clean coal the company has expended at both bankheads the sum of \$53,000 on remodelling bankheads and equipping with steel shaking-screens and picking-belts. Forty-five men are employed at both bankheads simply picking stone out of the coal as the coal is carried by the picking-tables from the screens to the railway cars.

The local Board of Conciliation in July, 1907, determined that two cents extra per box had been allowed for removing stone and to compensate miners for separating stone in coal and also in loading in pillar working. In close or narrow work stone is paid for at the rate of five cents per inch with the understanding that the stone be removed in mining or loading and not sent to the bank with the coal. In No. 2 mine where the seam is clean and free from stone the rate per mined car for cutting and loading is 39 cents. Where coal is streaked with bands of stone 42 cents per car is paid. In No. 3 mine where no local stone is encountered 40 cents per car is paid. Where local stone partings are in evidence 43 cents, 46 cents, 48 cents and 52 cents per car is paid for mining and loading and separating the stone from the coal; which goes to show that miners working under the disadvantage of having to handle local stone partings are fully compensated for their trouble in extra price per car to cover the time employed in separating the stone from the coal in mining and loading.

Dealing with the dockage for the five months of 1909, the Company show that out of 222,080 cars, 8,004 were docked and 4,004 subjected to fines, equivalent to 360 docks and 194 fines.

It is claimed by the Company that good wages have been made in what is

called the local stone districts and that in No. 2 Mine where stone exists in the seam the average rate per man per day for the month of April, 1909, was \$3.07. In No. 3 Mine where all the trouble arose over local stone the average rate per man per day for April was \$2.90.

Second, in respect of the claim made by the employees that the slopes get out of repair and cause the falling of stone in the chutes, the Company declare that formerly it was the custom of the miners to repair their own chutes and keep them in order, but of late years in most places they have refused to do this. The Company made contracts with the men that they should repair their own chutes; the Lodge refused to allow the men to do so, though the men were willing and the Company offered to pay extra for it. The Company have therefore been compelled to employ shiftmen to repair the chutes, and it is manifest that as these men cannot always be at all the chutes that they cannot be kept in as good condition as if they were cared for by the cutters themselves. The Company declare that where the miners repair the chutes themselves no trouble in respect of docks occurs.

It is not easy for your Board to appreciate fully the reasons which have induced the Lodge persistently to resist the application of this system of miners repairing their own chutes which would seem to apply a remedy to the complaint now made that these chutes are not unfrequently out of repair and lead to the falling of loose stone.

Third, the Company say that it is compelled to pay for all the stone under 45 pounds which is removed from the picking tables and that this amounts in the aggregate to nearly as much as is gained by the fining and docking process.

Fourth, in certain portions of the mine and in respect of coal sent up by certain miners scarcely any docking occurs. The fining and docking is applied to certain special workings and to certain men. In respect of a single instance where one man had been docked a large percentage of boxes sent up it was shown by the Assistant Manager of the mine that this coal had not been in the

chutes at all, and therefore, not subject to the risk of having loose stone fall from the roof into the chute.

What recommendation should be made by the Board in respect of the fining and docking system is a matter which involves great delicacy and difficulty. In respect to the operation of the mines generally, we do not think that the docking system is at present working unfairly or results in any palpable injustice to the miners. In some few sections of the mine owing to the character of the chutes, it is possible that the system now in vogue may in some instances work injustice. The most effective remedy in the judgment of the Board would be for the miners in those special districts to assume the care of the chutes through which they work.

The employees urge that the docking system entirely cease and that fines only be imposed as a penalty for excessive stone, and they urge that the quantity of stone resulting in a fine be raised to 150 pounds per box.

In view of the necessity of maintaining the standard quality of coal for market the Board feel some reluctance in undertaking to recommend absolutely the abolition of the system of docking, and in any case the raising of the amount to 150 pounds instead of 60 pounds for either docking or fining would, we fear, tend to the depreciation of the coal and lead to greater carelessness in mining. It would be extremely difficult to apply to the whole mine a system of fines or docking which would only be specially applicable to certain parts of the mine and not applicable to all. The Management state that where there is satisfactory evidence that there has been an increase of stone in the box due in anyway to the falling of loose stone from insufficient timbering an allowance is made but the evidence in support of this must be clear.

The only recommendation which the Board can make in this respect is that in view of the additional stone now found in working the mine as compared with that found when the present docking system was established, and also in view of the introduction of the half-inch mesh

screens in place of the three-quarter inch long screens, which retains a larger quantity of stone; that the system be based somewhat on the value of the box, which differs according to the conditions under which it is mined. Instead of the present system, we recommend that when a box contains fifty pounds of stone and not exceeding seventy-five pounds a fine of five hundred pounds of coal be imposed. When it contains seventy-five pounds and not exceeding one hundred pounds a fine of one thousand pounds of coal be imposed. When a box contains one hundred pounds or more of stone the box should be docked.

The Board have now dealt with all the special matters specifically presented to them. They feel, however, that their work would scarcely be done unless they devoted a little attention to certain serious considerations which were elicited by the investigation.

The Company for reasons of its own has taken the responsibility of submitting to the Board in a public manner and for public use a detailed statement of their present financial condition and of the results of the operation of the mine for a period of 15 years. They also embody in this statement the amount of wages paid for mining a given quantity of coal at the present time as compared with its cost 15 years ago. This statement has in the judgment of the Board such an important bearing upon the whole situation at Springhill that we have thought it best to embody it in this Report.

Losses in Operation.

That the Company cannot continue to operate under conditions which have prevailed for the past three years and four months is manifest from the statements which are herewith submitted:

The deficits are as follows:—

1906.....	\$ 77,715.45
1907.....	156,992.17
1908.....	22,004.62
1909 (four months).....	42,977.93
	<hr/>
	\$299,690.17

The cost of coal and selling price and difference in these years are, *viz.*:—

Year.	Cost of Coal.	Selling Price.	Loss.
1906.....	\$2.80	\$2.60	20c.
1907.....	3.17	2.66	51
1908.....	2.91	2.74	17
1909 (four months).....	2.95	2.56	39

Year.	Cost of Coal.	Selling Price.	Difference.	Gain.	Loss.
1894.....	\$1.55	\$1.58	3c.
1895.....	1.64	1.52	12c.
1896.....	1.64	1.63	1
1897.....	1.60	1.51	9
1898.....	1.63	1.56	7
1899.....	1.67	1.72	5
1900.....	2.43	2.44	1
1901.....	2.51	2.60	9
1902.....	2.20	2.43	23
1903.....	2.49	2.62	13
1904.....	2.60	2.45	15
1905.....	2.44	2.50	6
1906.....	2.80	2.60	20.
1907.....	3.17	2.66	51
1908.....	2.91	2.74	17
1909 (4 months).....	2.95	2.56	39

There is no other operation in Nova Scotia where the cost of production is within 50 to 75 cents per ton of the foregoing figures, and it is plain this Company is handicapped to such an extent with an abnormally high cost of mining and comparably low average selling price, that to carry on in this untenable position will quickly result in disaster. There is no hope for the property under these adverse terms.

In presenting these statements it may be said that there was an accident in No. 3 mine in 1906, a strike in 1907, but press into this Company's experience of the past 20 years the following accidents:—

A disastrous explosion in 1891.

Loss of one mine by fire and subsequent flooding of workings.

Destruction of two bankheads and surface plants by fire.

Cob-heating or heating in waste workings No. 2 mine.

Explosion in No. 3 mine or heating in waste workings.

Explosion of boiler in battery No. 2 mine (surface).

Total destruction of hoisting engines No. 2 mine.

Surface fires, and other casualties which affected output.

Add to these disasters 22 strikes, and it must be admitted that in mining each year there are contingencies to provide for, the expense of which cannot be avoided.

The contingent account in mining is never closed.

That the business of coal mining has been unprofitable in Springhill must be admitted from the following memo. *re* cost of coal, selling price, and the differential in profit or loss from 1894 to 1909 (4 months) inclusive:—

There were in the past 15 years and four months 7 years of slight gains and 8 years and four months of heavier losses.

During the period from 1899 to 1903, when there were profits, two small dividends, one of 3 per cent. and another of 2½ per cent. on the capital stock of \$2,000,000, were paid. (And only these two small dividends have been paid in the 26 years of the Company's existence). The earnings were put back into the property to provide better equipment and development of the workings, with an earnest desire to benefit the Company and the employed, and with a degree of expectation of obtaining results in the future, which have certainly not been realized.

Since 1906, no expenditure has been made for betterments. The Company has not had means for improvements or extensions, and has had great difficulty in financing to meet current expenditures, as the figures submitted verify.

Coal Values have Declined

That this Company cannot grant any advance or further concessions in these or any other demands may be determined not only from the fact that the Company has been losing money in its operations for several years, as the statements will show, but that the average selling price of coal has declined to a marked extent this year.

The Intercolonial Railway, one of the Company's largest customers, only awarded this Company 48,000 tons of

coal, one-half the usual supply, at a reduction of 25 cents per ton, f.o.b. cars at Springhill Junction.

The Canadian Pacific Railway forced a deduction of 12 cents per ton, which with increased freight rate for British over Norwegian ships (excluded from carrying coastwise after 1st July) makes a further reduction of 15 cents per ton, and with 5 cents additional cost of discharge, equals a total reduction of 32 cents per ton in all, on this the largest contract which the Company holds.

The foregoing reduced contracts come into effect 1st July, which will still further reduce (bring down) the average selling price and (still further) increase loss in operation.

In the United States, where the bulk of the culm is exported, prices rule so low this year that it was necessary in order to secure part of this business to accept an offer 15 cents per ton under last year's price. The cost of transportation also by British instead of Norwegian register on this coal will still further reduce the net f.o.b. price 15 cents per ton, or a total of 30 cents per ton reduction on export trade to the United States.

If the telegraphic reports in the press are correct as to the joint action of the Senate and Congress, the duty on all coal (including slack or culm) will be fixed at fifty cents a ton. This Company sold the greater part of its culm in the New England States under an existing duty of 15 cents a ton. If this duty is increased under the Payne Tariff Bill to 50 cents a ton on all coal, including culm, our export trade to the United States will be killed, and there is not sufficient market in Canada, accessible to this Company to take the large portion of culm that it produces.

The Government of the United States, at the instance of the Coal Operators, will thus completely debar Nova Scotia coal from the United States market. The United States Coal Operators have captured a large part of the coal orders in Montreal that belong to Nova Scotia products, and now to crown all the United Mine Workers' Association seek to tie to

a United States chariot wheels the employees of every mine in Nova Scotia and thus have the industry more absolutely at the control of the United States Operators and workmen who are now working under agreements.

Is it any wonder that the Operators of Nova Scotia view with alarm this combination of all United States coal interests to control their business and feel it their duty in their own interests, as well as in the interests of the Province, to resist to the utmost such far-reaching and powerful foreign interests united against them.

It is submitted that the Government of Nova Scotia which depends for the maintenance of its public service upon coal duties and every good citizen, who had no personal interest at stake, ought to stand with the Coal Operators in resisting the invasion of this foreign combination.

If the American Government exclude Nova Scotia coal, American Operators set out deliberately to capture the markets which belong to Nova Scotia mines in Canada, and the American unions control our miners, all that will be left to the Operators will be the mines without markets, excluded as they are by tariff from the United States, driven from their own markets in the St. Lawrence by "dumped" coal which is carried by the railways under cost and their workmen subject to be called out on strike (sympathetic or otherwise) at the dictation of their foreign masters.

Every important contract this Company has closed this year has been at a reduction. American coal and American competition is crowding Cape Breton and Pictou coals out of the St. Lawrence and other markets into the home or Provincial markets, which makes local competition all the more aggressive and has the effect of depreciating values.

As this Company was not making but losing money when prices were maintained, it must necessarily go from bad to worse financially now that prices are declining, and it cannot concede any advance or make any concessions whatever, which will tend to increase the cost

of production. It is simply out of the question to consider further demands from the men.

Springhill is a very expensive operation, the most costly in the Province, with its deep mines, average hoist 3,500 feet, seams pitching from 18 degrees to vertical, and over present workings 2,000 feet of superincumbent pressure.

Pumping, as high in spring and fall, as 43-4 tons of water to one of coal, and a costly system of ventilation.

The coal is highly bituminous, cross-fractured, and consequently friable, especially in the steep measures, producing a larger proportion of small than any other coal in the Province. *It is now running half screened and half culm, over 1/2" square mesh openings.*

Culm is exported at a low price to the United States, which reduces the average selling rate so much below the cost of production that the Company has been losing money heavily in its operation for over three years, as the statements will show.

Statement showing marked increases in amount of wages paid annually Mines

Department, and output. from 1895 to 1908 inclusive.

Year.	Wages.	Output.

	3,376	2,942	1,686	842	438	166	9,450

The above table plainly shows that there is in this employ a very marked larger proportion of elder men than in any of the other Companies; and farther that they are looked after.

Absentees.

That high wages are not conducive to

steady work and maintenance of output may be gathered from the following statements of absentees from work, underground and overground, each mine, and on the surface for January, February, March, April and May of the current year, and to 12th June:—

ABSENTEES—JANUARY 1909.

AVERAGE EMPLOYED OFF WORK DAILY.

January.....	139
February.....	146
March.....	174
April.....	148
May.....	171
June 12.....	163

There were, therefore, 20,676 days work lost by employees in this period, or an average of 159 men off work daily, equal to 10 per cent. of the total employed.

The absentees vary from 9 per cent. off work between pay days to 20 per cent. after pay days.

This indifference to work on the part of the employees must be attributed to, too much money, too easily earned. No other class of artisans do or can afford to lose so much time.

This utter neglect of duty on the part of employees falls most heavily on the Company in reduced output, increased cost, and correspondingly poor returns, and is largely responsible for the deplorable results in operation, which have obtained for the last three years and four months.

Advance in Wages.

There were two general advances in wages, one of 10 per cent. on 1st May, 1900, and another of 12 per cent. on 1st January, 1901, 22 per cent. in all conceded all employees.

Besides these two general increases on all earnings since 1899, concessions after concessions have been wrested from the Management at the point of the pistol, till wages have soared in the several Departments to the impossibility of producing results financially under which the Company can exist.

NUMBER DAYS LOST MONTHLY FOR 1909.

	No. 2.	No. 3.	Surface.	Total.
January.....	1,053	1,595	542	3,190

April.....	1,365	1,744	593	3,712
May.....	1,721	1,600	615	3,936
June 12.....	787	707	141	1,635
				20,676

Miners earnings have advanced, 60 to 70%
 Engineers (Stationary) earnings have advanced.....60%
 Firemen (Stationary) earnings have advanced.....50%
 Engineers (Railway) earnings have advanced.....62%
 Firemen (Railway) earnings have advanced.....52%
 Conductors (Railway) earnings have advanced.....51%

Brakemen (Railway) earnings have advanced.....41%
 Machinists & Blacksmiths earnings have advanced.....34%
 Unskilled labour earnings have advanced.....33%
 Stores have advanced.....40%
 Timber has advanced.....40%

And on top of all these advances the cost of screening, picking, and preparation required for the coal to meet the demand, has doubled in recent years.

The question is continually asked, why are the Coal Companies of Nova Scotia not making money? The answer, so far as this Company is concerned, is obvious.

In 1908, the extra amount paid in wages over 1899-1900 to meet the two general advances of 10 per cent. and 12 per cent. to 22 per cent., was \$147,034.23, equivalent to 40.61 100 cents per ton on shipments.

Since May 1st, 1900 this Company has paid 138 employees on the 22 per cent. advance or bonus \$1,184,949.75 besides the many concessions which have been obtained by employees, until to-day the miners are working shorter hours, performing less work, and earning the highest average rates of any miners in the Province.

The cause mainly responsible for the disastrous results of the past few years is the astounding fact of the unprecedented increase in average miners' wages since 1895, and the incredible falling off in the average daily production per man, as follows:—

Year.	Average daily earned by miners per day.	Production of coal per miner per day
1895.....	\$1.83	5.52 tons.
1896.....	1.95	5.40
1897.....	1.83	5.89
1898.....	1.92	5.83
1899.....	1.90	5.30
1900.....	2.27 10% advance	4.80
1901.....	2.51 22 " "	4.16
1902.....	2.63 " "	4.75
1903.....	2.88 " "	4.46
1904.....	2.98 " "	4.26
1905.....	2.97 " "	4.53
1906.....	3.18 " "	4.37
1907.....	3.14 Three months strike.	4.10

1908.....	3.00	Trade dull in summer months due mild open winter and financial and industrial depression.	4.10
1909			
Jan.....	2.81		3.74 tons.
Feb.....	2.96		3.67
March	2.92	Output curtailed by local trouble and irregular work on part of employees.	3.84
April	2.93		3.92
May	2.97	19,041 days work having been lost in these five months.	4.01

Miners' wages have increased no less from lowest to highest average than 74 per cent., while in return for these enhanced wages, miners have of their own design restricted output to the ruinous extent of 38 per cent. per man per day, which is practically a reduction of 60 per cent. in production. Sufficient in itself to drive any Company to the wall.

For \$1.35 average increase in wages daily, miners are giving 2.22 tons less in return in production in the same seams with more superincumbent pressure to assist in mining, improved machinery for handling the coal taken, barring accidents, from miners as it is made.

When the average daily wage was only \$1.83 the production per miner was the highest, viz., 5.89 tons. Now with an average of \$3.00 the average yield is below four tons.

Not only is the Company unable to continue under existing alarming conditions, but the Directors insist that there must either be a re-adjustment of mining rates or a suspension of operations. There is no other alternative. The instructions are definite and will be carried out; due notice of which will be given.

The order reads as follows:—

Montreal, 1st June, 1909.

J. R. Cowans, Esq.,
 General Manager.

Dear Sir:—

At the meeting of the Directors of the Company held in this office on Wednesday, 26th May, the application of the U.M.W. for a Board of Conciliation was

submitted, claiming recognition of the U.M.W., adjustment of the system of weighing coal, to establish a schedule of prices, and to establish a docking system.

I submitted to the meeting statements of the results of the operations of the Company for the years 1906, 1907 and 1908, as well as for the four months of the present year, duly verified by the Auditors, which I now inclose to you.

It was decided that in view of these statements not only was it impossible for the Company to grant any increase involving greater cost in operation, but that if we could not succeed in reducing costs that it would be impossible for the Company to continue business much longer.

This view was materially strengthened by the fact that prices for coal have this year suffered a serious drop from last year's figures, which will inevitably make the position of the Company much more precarious at the end of the year, unless immediate steps are taken to reduce the cost of producing coal; I need not go into details of this, you know that the railway contracts involving over one-half of our sales are lower, I may say much lower, and that small coal is at present a drug in the market, and the prices offered us are ridiculous when the cost of production is considered.

You will see that the Company went behind in those years as follows:—

1906.....	\$ 77,715.45
1907.....	156,992.17
1908.....	22,004.62
1909 (four months).....	42,977.93
Total.....	\$299,690.17

Nothing that I can say can add to the gravity of these figures, any intelligent man can see that no Company however strong can stand such a drain for long.

The Board felt that it was necessary to have these statements laid before the Arbitrators, and the men in our employment, so that they would be no longer in ignorance as to the actual position of the Company, and might be able to be prepared to make such sacrifice as are absolutely essential if the Company is to continue business.

In making such reductions I wish to say that the process will start at the top

(the Board in fact have already decided to accept no further pay till the position has changed for the better) and that the President will be the first to suffer whatever reduction may be necessary and that others will have to follow suit.

As you are aware the Company was only kept going through these years by the shareholders subscribing fresh capital in the shape of bonds, which give them a lien on the property, and should the Company fail to pay the interest, as now seems probable, that it will be in their power to foreclose their mortgage, and take the whole concern away from the shareholders, who in that case will lose everything; that the shareholders are by no means all well off is well known to you.

The Directors, therefore, gave instructions that these statements should be laid before the Board of Arbitrators and the men; that it was utterly beyond their power to increase costs in any way, and that, therefore, no demands could be considered; that costs must be reduced, and if this was not done the Company would have to suspend operations, and that these instructions be transmitted to you with orders that you report in detail what steps you consider must be taken to give effect to them.

The situation is most serious, but I trust that the good senses of our men (and the ability of our staff) once they are put in full possession of the facts, will enable us to pull through.

I do not intend to enter into recriminations, the situation is beyond that point now, but I would point out to you that the constant succession of strikes, and talk of strikes at Springhill have done a great injury, indirect it may be, to Springhill in the eyes of customers and the public generally, and the present situation is the direct result of the demands that have been forced upon us since 1899.

The inevitable end of Springhill as a mine, and Springhill as a town, if this is continued, it needs no prophet to foretell.

Yours truly,

(Sgd.) H. R. Drummond,

President.

The Company's statements certified by Messrs. Macintosh & Hyde, Chartered Accountants, are respectfully submitted to the Board of Conciliation, and the employees of this Company.

The accuracy of the figures given in this statement was not seriously called in question by the counsel for the employees. Indeed, it is not likely that they are open to question. On cross-examination it was shown that the railway which the company operates pays a small annual profit by making an arbitrary allowance of 20 cents a ton for all the company's coal hauled over it to Springhill Junction and Parrsboro, respectively. Without this the road is operated at a loss so far as general public traffic is concerned. These profits counting in the 20 cents a ton paid for the transportation of coal are all taken into account in the operation of the mine. The company is also carrying on some timbering enterprises which have produced a small annual profit, and these too are taken into account in the figures submitted.

The leading purpose of the cross-examination by counsel for the employees was to show if possible that some of the losses in the operation of the mine were due to defects in management. In the judgment of the Board not much that was definite in this regard was elicited, but even if this were so it would not diminish in the slightest degree the gravity of the situation. Springhill is a town of some 6,000 or 7,000 people which has been brought into existence almost entirely as the result of the mining operations of this company and its predecessor. The closing of these mines would mean very largely the destruction of valuations at Springhill and a great depopulation of the town. It would mean also a serious loss to the Provincial revenues.

Operations in this mine cannot be carried on as economically as in most of the mines in Cape Breton or even those on the mainland.

Under these circumstances it seems to your Board unreasonable and impracticable that the employees should ask or expect higher rates of remuneration

under existing conditions. The price of coal has fallen in large and important contracts as compared with last year when a net loss resulted. The figures for five months of the present year indicate that the loss for 1909 is likely to be very much greater.

Under these circumstances your Board cannot help recognizing that the only rational policy to be pursued by all parties concerned is one of conciliation and forbearance in order that this large and important industry may not be compelled to cease operations with most far-reaching and disastrous consequences to all, including the business men of the town. Heavy losses have been already entailed by twenty-two strikes which have exhausted the energies and wasted the resources of the Company. In the judgment of the Board, the present is not a time to agitate for changes, but rather a time a common effort should be made to improve the situation and secure the permanence of the industry.

Your Board fully appreciate that it is not necessary part of their functions to make suggestions outside of the specific matters referred to them. Nevertheless it does not seem inappropriate for a Board appointed to reconcile differences and secure peace and harmony in connection with a large mining industry to seek to ascertain as far as possible the fundamental causes of differences and misunderstandings and to seek if possible to discover a remedy.

The control and management of this corporation is vested in its officers and directors and under the exclusive control of its shareholders, and no one has a right, it is fully conceded, to interfere in any way with its methods of operation; nor would this Board think of making reflections upon its management or call in or question its methods of managing its property. Nevertheless, from a careful review of the whole situation and all the surrounding circumstances attending the history of the mine during the past twenty-six years during which it has been under the control of the present Company, your Board feel that it might tend to allay long-standing friction and secure a better state of feeling between

the Company and employees if a change should be made in the methods of management.

Your Board saw tokens during the somewhat lengthy investigation of the matters in dispute that unpleasant feelings, if not distinct hostility, existed between a large number of employees and the management. It would perhaps be invidious to attempt to place the responsibility for this, but the Board feel it their duty to bring this state of affairs to the attention of the Directors of the Company in a formal manner by means of this report.

This Board recommends the directors to make a careful investigation into this unpleasant feature of existing relations with the hope that they may be able to policy or make such changes as will prevent the possibility of this unfortunate condition prevailing in the future.

Your Board although conscious of having endeavoured to give their best consideration to all matters touching the welfare of both the Company and its employees are yet painfully sensible that small results are likely to flow from any immediate recommendations they make unless, indeed, it shall result in such a change in existing conditions as will obliterate the unfortunate consequences of long standing differences.

(Sgd.) J. W. LONGLEY,
Chairman.

" CHARLES ARCHIBALD,
" E. B. PAUL,
(*subject to foot note*).

Foot Note by Mr. E. B. Paul.

With most of the facts stated in the above, I concur, but in respect of some of the recommendations made I feel compelled to dissent.

First. I think the recognition of Local Union No. 469 by the Company would result in allaying friction and tend generally to a better understanding between the management and the employees. I think the employees should have the right to organize under any conditions and regulations which suit them best. So long as such organization contains no provisions or obligations which conflict with our laws, Provincial or general.

Second and Third.—I am not disposed to disagree with the recommendations in respect of these two items submitted to this Board. I believe in a schedule of rates, and that operations would be carried on more smoothly and satisfactorily if such were in operation at Springhill, as well as other coal mines in Nova Scotia, though I do not mean by this that higher rates should be imposed than are at present paid.

(Sgd.) E. B. PAUL.

IV. REPORT OF BOARD IN DISPUTE BETWEEN THE NOVA SCOTIA STEEL AND COAL COMPANY AND ITS EMPLOYEES.

THE Minister of Labour received on July 23rd the report of the Board of Conciliation and Investigation to which was referred the dispute between the Nova Scotia Steel and Coal Company Limited, and members of the Florence Local 1746, of the United Mine Workers of America, said Union being one of the locals of the district of Nova Scotia, No. 26. The Board consisted of His Honour Judge Chipman of Kentville, N.S., Chairman; His Honour Judge McGillvray of Antigonish, N.S., appointed for the Company; and Mr. Daniel McDougall of Glace Bay, N.S., appointed for the employees. Judge McGillvray was appointed by the Minister

of Labour, the Company having declined to make any recommendation. The report of the Board is signed by Judge Chipman, Chairman, and Judge McGillvray, while a minority report was also received in the Department signed by Mr. D. McDougall. The first session of the Board was held at Florence, N.S., on June 23rd. The employees were represented before the Board by Joseph Belshaw of the District Board of District No. 26 of the U.M.W.A., and by James Knowles, President of the Florence Union, and James B. McLachlin, District Secretary-Treasurer of the U.M.W.A. The Company was represented by Mr. Thomas

J. Brown, General Superintendent. Neither party was represented by Counsel.

The subjects in dispute were as follows, namely: (1) an increase of wages consequent upon the introduction of closed lights (safety lamps) in lieu of open lights, and (2) that since the Company recognize the Provincial Workmen's Association they should also recognize the Union of the United Mine Workers of America, and should grant no preference to one class of their employees.

The Board points out that while the application in the present matter was before the Department, the Company adjusted with the Provincial Workmen's Association an increase of wages to the extent of 2 cents per ton in the following proportion, machine runners $\frac{1}{2}c$, shot firers $\frac{1}{2}c$, loaders 1c and this allowance or increase was added to the wage bill for the month of May last, and paid to each of their employees in these classes, entirely irrespective of their membership in the P.W.A., or U.M.W.A." "The demand made by the employees", adds the Board, "asked for an increase of 2c for shot firers and machine runners, and 5c for loaders, equivalent to 9c per ton."

On the general question of closed lights the Board finds that the introduction of closed lights has doubtless had the effect of causing more inconvenience and a greater disadvantage in mining than other lights, but, on the other hand, the work men who were examined all frankly admitted that both life and property were thereby rendered safer and more secure. "Surely," the Board comments, "if such a result is attained, the workmen should be willing to accept a reasonable increase in their wages, and allow the improved condition of the mine thereby so signally safeguarded, both as to the preservation of their lives and the property in which they procure their livelihood, to weigh in the scale and counterbalance the difference between the extra amount granted by the Company and the demand therein made."

After quoting elaborate statistics prepared by the Company as part of its case with respect to wages paid to workmen in the classes affected by the change, the Board continues as follows: "Such

being the case the Board with a due regard to all the conditions and circumstances appearing from the evidence is of the opinion that it cannot conscientiously recommend and decide otherwise than that the Company has met the men at least half way in the offer it has made for the inconvenience and loss occasioned by the installation of safety lamps in the colliery in question."

Recognition of the U.M.W.A.

On the general question of the recognition of the United Mine Workers of America, the Board quotes the General Superintendent of the Company as follows "The U.M.W.A., is a foreign corporation, the majority of its members residing in the United States, as also do their executive officers. Under its constitution it is quite possible that the members of the Societies of the Province of Nova Scotia might be called out on strike to assist the American members of the Society, which would be a very great detriment to the operators of this country and the province generally. If it should be considered in the interests of the whole body of the U.M.W., to proclaim a strike in Cape Breton, either to assist the U.M.W. or the operators in America who are placing coal in the Canadian markets in direct competition with the mining industries in this Province, the result would be disastrous and we believe this power is too great to place in the hands of any foreign body as it practically means the control of our mining industries. Our Company look upon the Society with a great deal of apprehension and fear, as it is quite natural to assume that a Society governed and controlled in the United States will have its first interests in that country. The Constitution of the U.M.W., states that all employees about the colliery except the Supt. and the Manager of the mine shall be members of the U.M.W.A. This Company will not agree to the Officers of the collieries being members of this or any other labour Society."

The Board then comments thus on the situation:—

"These reasons coupled with the facts and circumstances set forth in the evid-

ence and exhibits seem to be sufficiently cogent for a finding in favour of the Company and such is our mature and deliberate opinion.

"Both the Company and employees have a right in this country to settle their own business, and in such a dispute as we are now investigating it is our duty, failing an agreement, to make such recommendations to the Department as might, if accepted, bring about a settlement.

"The growing sentiment in this country is strongly in favour of managing our industrial and commercial interests without being subject to the dictation or control of our neighbors across the line, and now would seem to be an opportune time for a movement to be made for the establishment of a Labour Union for Canada alone, which shall be incorporated on the lines best calculated to create harmony and peace, and the prevention of strikes, so suicidal and detrimental to both employer and employees, and the Province of Nova Scotia as well.

"In the meantime the two Societies now warring with each other should get together and endeavour to work out the problems before them in a spirit of loyalty to the Country in which they live and are earning their daily bread.

"We cannot close our report without referring to the good feeling which exists between the General Supt. of the Company and its employees. The witnesses testified truthfully and candidly, and the representatives conducted their case with fairness, ability and good judgment.

"Mr. Brown had good reason to compliment both men and representatives, and the board is sure that the feelings he entertains for them are mutual and reciprocal. Few men can have so careful, painstaking and competent an employer and the interests of his men should be, and we believe are, safe in his hands."

Minority Report.

Mr. Daniel McDougall, member of the board appointed on the recommendation of the employees, in a minority report observes that "from the evidence adduced, I cannot say that the 2 cents per ton increase which the company had

given its men was sufficient for the changed conditions and the amount of inconvenience to which the men were subjected." In his judgment, therefore, the demands of the men were not unjustified. He is also of opinion that the increase should be 4 cents per ton, as follows: Machine runner, 1 cent; shot firer, 1 cent; loader, 2 cents. The evidence, he thinks, went to show that men under the present circumstances cannot earn as much as formerly on account of the insufficiency of the light and that they must work longer hours under less favourable conditions than before prevailed. "Another matter of great importance," he adds, "is that the eyesight of the miner using the closed light becomes affected from the overstrain on the optic nerve, and that in time the eye is completely crippled."

On the question of the recognition of the Union, Mr. McDougall states:—

"Regarding recognition for the United Mine Workers of America, that matter has assumed such a character in Nova Scotia, both in numbers and public sympathy, that I feel the board cannot do otherwise but recommend the company to give recognition to this union, as far as committees to wait upon them and arrange meetings to adjust any trouble or grievance that may arise between the men and the company, and also that a Pit Committee from the local should be given the power to make visits to the mine for the purpose of examination, as provided for in the Coal Mines Regulation Act, and many other matters that become necessary for the protection of life and property.

"I wish to point out one very serious occurrence in one of the collieries owned by this company that might have been the cause of great destruction, and the U.M.W. committee could not get an audience with the company to have the matter adjusted, and they accordingly had to go to the Government Inspector of Mines to have the matter investigated. Under that investigation it was clearly shown that practices were in operation that made it hazardous to the life of the miners, and endangered the company's property. This, therefore, goes to show

that the company, failing to treat with our organization, puts the miners who belong to this union in such a position as to make it impossible for them to approach the company in their own interests, and we contend that having at this particular place 95 per cent. of the miners in our society, it is very unfair to treat with the P.W.A. who only represent 5 per cent. of miners at Florence and not treat with the United Mine Workers of America.

"Their chief aim being to educate the working class of all countries, we claim that the United Mine Workers are not an American organization, and that the operators of this country, when the people say so, should meet the union, more particularly when 90 per cent. of their workmen are members of the organization, Canadian or American, from the fact, first, that it is International, and second, that it is already successfully operating in British Columbia and Alberta, and that by having one great Coal Mining Organization of an International character the time will be hastened when industrial peace shall prevail and misunderstandings between employers and employees put right.

At the end of the month the department had not been informed whether the findings of the board were acceptable to the parties concerned, but no cessation of work had occurred in the operation of the mine.

Report of Board.

The text of the findings of the Board is as follows:—

In the matter of the "Industrial Disputes Act 1907" and of a dispute between the Nova Scotia Steel and Coal Company Ltd., and members of the Florence Local 1746 of the United Mine Workers of America, said local being one of the locals of the District of Nova Scotia, No. 26.

The Board composed of Judge McGillivray of Antigonish, Mr. Daniel McDougall of Glace Bay and Judge Chipman of Kentville, N. S., Chairman, pursuant to notice held its first session on Wednesday the 23rd day of June 1909, in the Workmen's Hall, Florence; this locality (No. 3 Colliery of the said Company) being the

locus within which the subject matter of the present proceeding arose.

Before entering upon the duties pertaining to the reference, the members of the Board took the prescribed oath of Office.

The employees were represented by Joseph Belshaw, District Board Member of District No. 26, of the United Mine Workers of America.

James Knowles, President of said Florence local and James B. McLaughlin, District Secretary-Treasurer of the U. M. W.

The Company was not represented. An application was then made for the issue of a subpoena for Thomas J. Brown, General Superintendent of the Company. This application was immediately granted and on advice of the action of the Board in this regard he forthwith advised the Board that he would attend, and thereafter was present and represented the Company.

Neither party desired the presence of Counsel and none attended.

The Board sat at Florence on the 23rd, 24th, and 25th of June, and on this last named date the evidence tendered on behalf of the employees was completed.

In order to obtain a more intelligent and practical knowledge of the work, which the three classes of workmen, viz.: the Machine Runners, Shot Firers and Loaders, actually performed underground, it was decided by the Board and acquiesced in by the parties hereto, that a visit to the Mine should be made.

In due time the necessary preparations were made, and the descent down the slope, a distance of over 5,000 feet, was successfully accomplished. Every assistance was rendered by the officials of the Company and Mr. Belshaw, and the Board were thus privileged to witness an ocular demonstration of the work these men do in the due performance of their duties.

Prior to going down the mine, Mr. Brown on behalf of the Company applied for an adjournment until Monday, the 28th of June, for the presentation of the Company's case. This application was favourably entertained by the Board, and on this date the Company's case was finally

closed and the Board announced that further proceedings would be postponed until Wednesday, July the 14th prox., when the Board would meet at Halifax to deliberate on the evidence and formulate its report for transmission to the Department.

In passing we may say that the Board held two sessions on Saturday, the 26th June, at Glace Bay, examining and considering the evidence then given by the employees.

After sessions at Halifax on the 14th, 15th and 16th of July, weighing and deliberating upon the evidence submitted, and in the preparation of this report, the Board submits the following findings:—

Two issues only are involved in this dispute i. e.

(a) An increase of wages, consequent upon the introduction of closed lights (Safety Lamps) in lieu of open lights," and

(b) That since the Company recognize the Provincial Workmen's Association they should also recognize the Union of the United Mine Workers of America and should grant no preference to one class of their employees."

While the application for this Board was being considered, but before it was granted, the Company adjusted with the P. W. A. an increase of wages to the extent of two cents per ton in the following proportions:—

Machine Runners	½c.
Shot firers	½c.
Loaders	1c.

and this allowance or increase was added to the wage bill for the month of May last and paid to each and every employee in these classes, entirely irrespective of their membership in the P.W.A. or U.M.W.

The demand made by the employees asked for an increase of two cents for Shot Firers and Machine Runners, and five cents for Loaders—equivalent to NINE cents per ton.

The mine was shown to be well equipped and in splendid condition; in fact all of the witnesses, who were asked in reference thereto, admitted that the air and ventilation therein were better than in any

any other mine in which they had previously worked.

The introduction of closed lights has doubtless had the effect of causing more inconvenience and a greater disadvantage in mining than other lights, but on the other hand the workmen who were examined all frankly admitted that both life and property were thereby rendered safer and more secure. Surely if such a result is attained the workmen should be willing to accept a reasonable increase in their wages, and allow the improved condition of the mine thereby so signally safeguarded, both as to the preservation of their lives and the property in which they procure their livelihood, to weigh in the scale and counter balance the difference between the extra amount granted by the Company and the demand herein made.

The Company as part of its case prepared for and handed to the Board tabulated statements of the wages earned and paid to the workmen in the classes mentioned and from these it appears that Loaders received the following average wages per day from September 1908 to May 1909 inclusive: (62 men are classified).

Loaders.

1908—September.....	\$2.16
October.....	2.22
November.....	2.24
December.....	2.41
1909—January.....	2.32
February.....	2.24
March.....	2.09
April.....	2.18
May.....	2.22

Machine Runners.

1908—September.....	\$4.46
October.....	4.29
November.....	4.40
December.....	4.35
1909—January.....	4.10
February.....	4.00
March.....	3.59
April.....	3.67
May.....	3.83

(26 Men classified.)

Shot Firers.

1908—September.....	\$4.44
October.....	4.38
November.....	4.40
December.....	4.38
1909—January.....	4.16
February.....	4.01
March.....	3.90
April.....	3.79
May.....	4.08

The average wages per day for the months of March, April and May are shown to be:

Shot Firers.....	\$3.90
Machine Runners.....	3.70
Loaders.....	2.13

and the average daily production.

Shot Firers.....	29	tons.
Machine Runners.....	27	"
Loaders.....	10	"

The increase granted at $\frac{1}{2}$ c. per ton amounts to $14\frac{1}{2}$ c., $13\frac{1}{2}$ c. and 10c. for the workmen in the order named, and equal to at least \$25.00 to \$40.00 per year and in the same order the demand or claim made would be 58c. 54c. and 50c. per day.

Other tables will be found among the exhibits and in order to place before the Board the possibilities of a wage earner the wages of six of the highest men (same classes) are given for the months of March April and May.

Shot Firers.

Days.	Total Wages.	Average.
March 26.....	\$118.31	\$4.55

The average hours worked per day are considerably less, in the classes above designated, than nine hours.

The introduction of safety lamps, which were first brought into commission on the 8th day of March last (1909) cost the Company \$2,000.00 and their maintenance amounts to \$200.00 per month.

The increase granted has not been added to the wages for May. This increase for the year figures up \$6,000.00 and the claim, if granted would total no less a sum than \$27,000.

The representatives when pressed to make an amicable settlement intimated that they would prefer to leave the adjustment of the wages, as well as other matter for the Board to deal with.

Such being the case, the Board with a due regard to all the conditions and circumstances appearing from the evidence is of the opinion that it cannot conscientiously recommend and decide otherwise than that the Company has met the men at least half way, in the offer it has made for the inconvenience and loss occasioned by the installation of safety lamps in the colliery in question.

The Board desires to thank the witnesses and representatives for courtesies extended and will entertain the hope that the finding now made will be acceptable to them and all concerned.

What shall be said with regard to the second issue and which the Board believes to be the crucial issue for consideration.

The U. M. W. earnestly desire recognition and the Company just as strenuously and persistently refuse to comply therewith. It is certainly a vexed question

and we fear that anything we can say or do will not effect the desired object.

Employees who belong to the U. M. W. claim that they should have the right, whenever they have a grievance requiring redress, to approach the Company through a Committee appointed for this purpose by their Union, and more particularly in the presentation of a grievance which may directly or indirectly endanger the lives of some of their members.

Much of the evidence given in this regard had reference to practices in the mine, which the witnesses considered should be remedied or abolished.

"The Coal Mines Regulation Act" (which is very comprehensive in its terms) provides ways and means by which any violation of the Act may be enquired into and rectified.

The general Supt., Mr. Thos. J. Brown., also has given it to be distinctly understood, and has enjoined upon the men, that he is always ready and willing to receive and confer with the employees or employee who desire to approach him in reference to any grievance that he or they may think should be brought to his notice, providing the interview is sought by them as individuals and not as representatives of the U. M. W.

It would therefore seem that the objections or reasons urged by the employees are fairly well met and that it becomes more a matter of sentiment with them than otherwise when they are seeking recognition.

Mr. Brown in his answer to the Employees' claim for recognition says:

"Dealing with the second part of the matter before the Board I would simply state the position that the Company takes in connection with the recognition of the Society which is claiming recognition and I am stating on behalf of the Company that while the Company had decided to recognize the P.W.A. there has been no case that we know of where any discrimination or harshness has been shown towards the men who have thrown in their lot with the U.M.W. and the Company will find it impracticable to deal with two separate Societies whose contentions and demands may be quite at variance with each other. In other

words the Company considers it impossible to serve two masters.

The U.M.W. is a foreign Corporation, the majority of its members residing in the United States as also do their executive officers. Under its constitution it is quite possible that the members of the Societies of the Province of Nova Scotia might be called out on a strike to assist the American members of the society which would be a very great detriment to the operators of this Country and the Province generally. If it should be considered in the interests of the whole body of the U. M. W. to proclaim a strike in Cape Breton, either to assist the U.M.W. or the operators in America who are placing coal in the Canadian markets in direct competition with the mining industries in this Province, the result would be disastrous, and we believe this power is too great to place in the hands of any foreign body as it practically means the control of our mining industries. Our Company look upon the Society with a great deal of apprehension and fear, as it is quite natural to assume that a Society governed and controlled in the United States will have its first interests in that Country. The Constitution of the U.M. W. states that all employees about the Colliery except the Supt. and Manager of the mine, shall be members of the U. M. W. This Company will not agree to the Officers of the colliers being members of this or any other labour Society."

These reasons, coupled with the facts and circumstances set forth in the evidence and exhibits, seem to be sufficient cogent for a finding in favour of the Company and such is our mature and deliberate opinion.

Both the Company and employees have the right in this country to settle their own business, and in such a dispute as we are now investigating it is our duty, failing an agreement, to make such recommendations to the Department as might if accepted bring about a settlement.

The growing sentiment in this country is strongly in favour of managing our industrial and commercial interests without being subject to the dictation or control of our neighbors across the line, and

now would seem to be an opportune time for a movement to be made for the establishment of a Labour Union for Canada alone, which shall be incorporated on the lines best calculated to create harmony and peace, and the prevention of strikes, so suicidal and detrimental to both employer and employees, and the Province of Nova Scotia as well.

In the meantime the two Societies now warring with each other should get together and endeavour to work out the problems before them in a spirit of loyalty to the country in which they live and are earning their daily bread.

We cannot close our report without referring to the good feeling which exists between the General Supt. of the Company and its employees. The witnesses testified truthfully and candidly and the representatives conducted their case with fairness, ability and good judgment.

Mr. Brown, had good reason to compliment both men and representatives, and the Board is sure that the feelings he entertains for them are mutual and reciprocal. Few men can have so careful, painstaking and competent an Employer and the interests of his men should be, and we believe are, safe in his hands.

Herewith will be found the exhibits tendered with the evidence.

All of which is respectfully submitted.

(Sgd.) J. P. CHIPMAN,
Chairman.

" A. MACGILLIVRAY,
Member of Board.

The Honourable Mackenzie King,
Minister of Labour,
Ottawa.

Minority Report.

The text of the minority report in this matter is as follows:

To the Honourable
The Minister of Labor,
Ottawa, Ont.

In the matter of the dispute between the employees of the Nova Scotia Steel and Coal Company, and the Nova Scotia Steel and Coal Company. I beg leave to submit a minority report, as the board

could not come to a unanimous decision, and my report shall be as follows:

Your Board met in its sessions at Florence, Sydney Mines, the seat of the dispute, and began its hearing on Tuesday, June 23rd, and continued its sitting until June 28th. The final sitting was in Halifax on July 14th-15th, to render a decision of the evidence produced.

I feel pleased to state that the evidence produced by the witnesses was of a high character, and the negotiations were greatly assisted to finish speedily by the fairness of both parties, and their willingness to assist the Board in its investigations.

The Board also found the best of feeling existing between the men and the Company.

The question for the Board's consideration embraced an advance on rates on account of a change from open lights in the mine to closed lights. Your Board to more fully qualify to taken a fair minded view of the situation made a visit underground in the colliery affected, and show the conditions as they existed.

The other question submitted being that the United Mine Workers of America were not accorded the same treatment as the Provincial Workmen's Association.

In regard to those subjects, I must say first,—That upon the Board sitting and after the Board had been granted, the Company gave the men an advance of 2 cents per ton as follows: Machine runners $\frac{1}{2}$ cent, shot firers $\frac{1}{2}$ cent, loaders 1 cent. This made it rather difficult for the Board, but the evidence was heard and gone into very fully, and I as a member of the Board, and from the evidence produced cannot say that 2 cents of an increase for the changed conditions and the amount of inconvenience to the men, is sufficient. I would, therefore, say that in my opinion the increase should be 4 cents, as follows: Machine runner 1 cent, shot firer 1 cent, loader 2 cents. I would further state that the demands made by the men, in my opinion are not unjustified.

The evidence produced goes to show that men under circumstances as now exist cannot earn as much money as

formerly, for the reason that it becomes so much more laborious to do their work on account of the insufficiency of the light produced by the lamp, and they must work longer hours, under less favourable conditions than before.

Another matter of great importance is that the eyesight of the miner using the closed light becomes affected from the over strain on the optic nerve, and after a time the eye is completely crippled. This in itself is one great reason why the miner should receive more compensation.

I made those recommendations from the fact of my knowledge of the difference in change of conditions, and after a careful perusal of the evidence produced, I have come to the decision that no less than 4 cents per ton would in any way give the miners the difference they are entitled to on account of changed conditions.

Regarding recognition for the United Mine Workers of America, that matter has assumed such a character in Nova Scotia, both in numbers and public sympathy, that I feel the Board cannot do otherwise but recommend the Company to give recognition to this Union, as far as Committees to wait upon them and arrange meetings to adjust any trouble or grievance that may arise between the men and the Company, and also that a pit committee from the Local should be given the power to make visits to the mine for the purpose of examination, as provided for in the Coal Mines Regulation Act, and many other matters that become necessary for the protection of life and property.

I wish to point out one very serious occurrence in one of the Collieries owned by this Company, that might have been the cause of great destruction, and the U.M.W. committee could not get an audience with the Company to have the matter adjusted, and they accordingly had to go to the Government Inspector of Mines to have the matter investigated. Under that investigation it was clearly shown that practices were in operation

that made it hazardous to the life of the miners, and endangered the Company's property. This, therefore, goes to show that the Company, failing to treat with our organization, puts the miners who belong to this Union, in such a position as to make it impossible for them to approach the Company in their own interests, and we contend that having at this particular place 95 per cent. of the miners in our Society, it is very unfair to treat with the P.W.A. who only represent 5 per cent. of miners at Florence and not treat with the United Mine Workers of America.

I wish to point out the fact that the objection to the United Mine Workers being an American organization, that the organization is just as much a Canadian organization. We repudiate that statement and say that the organization is an International organization whose aim is to promote the welfare, advance the interests, bless the homes, and bring peace into the country where they locate. Their chief aim being to educate the working class of all countries, therefore, we claim that the United Mine Workers are not an American organization, and that the operators of this country, when the people say so should meet the Union more particularly when 90 per cent. of their workmen are members of the organization, Canadian or American, from the fact, first, that it is International, and second, that it is already successfully operating in British Columbia and Alberta, and that by having one great Coal Mining Organization of an International character, the time will be hastened when industrial peace shall prevail and misunderstandings between employers and employees put right.

Trusting that the efforts of the Board may be successful to bring about peace and harmony.

I have the honour to be,

Your obedient servant,

(Sgd.) DAN McDUGALL,

On behalf of Employees.

THE PREVENTION OF STRIKES IN SOUTH AFRICA—BILL MODELLED ON INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, INTRODUCED IN TRANSVAAL PARLIAMENT.

THE issue of the South African Typographical Journal published at Johannesburg, Transvaal, for the month of June, 1909, contains an interesting editorial article entitled the "Prevention of Strikes," from the text of which it would appear that a bill is now before the Transvaal Parliament modelled somewhat closely on the lines of the Industrial Disputes Investigation Act, 1907. The title of the Transvaal Bill is as follows: "To Prevent Strikes amongst Employees or Lockouts by Employers, and to make Provision for the Settlement of Industrial Disputes by Conciliation after Investigation." The South African Typographical Journal in discussing the Bill remarks: "In comparing the proposed Bill with the Industrial Disputes Investigation Act of Canada it is quite obvious that the latter has been taken as a model, the phraseology of the two being for the greater part identical, but there are differences in provisions which it would be well for all labour bodies to consider, for it is not improbable that the lead set by the Transvaal may at some not far distant future be followed by the other South African Colonies." In the Transvaal Bill it is apparently proposed to confine the application of the Bill to the mining industry "or any undertaking carried on by a local authority, but an extension to other industries may be made by proclamation by the Governor." The Typographical Journal suggests that the Transvaal measure might properly be made applicable to all labour disputes without awaiting the Governor's proclamation, and objected to a further feature of the Bill which limits the application again to cases "where ten or more white persons are employed." The introduction of the colour line, it is pointed out, is "an objectionable deviation from the Canadian pattern," and it is held that it leaves the negro employee with the right to strike without reference to a Board of

Conciliation and Investigation. The Transvaal Bill is somewhat more stringent in its penalty provisions than the Canadian Act. The enactment of the proposed measure is, it would appear, to be made an occasion for the establishment of a Department of Labour. "The Transvaal Government" (remarks the Typographical Journal) "thus evidently intending to synchronize its movements with nearly every other civilized country in the world." The Transvaal Department of Labour, as proposed in this Bill, is to be under the control of the Minister of Mines, whose duties are defined as follows, namely, "1, to receive the applications for the appointment of a conciliation board; 2, to ensure the speedy sitting of the board; 3, to file the reports made; 4, to keep a register and supply information to any party to a dispute; 5, to keep a register of unemployed; 6, to register private registry offices and inspect their books and prescribe scales of fees to be charged; 7, to establish branch labour bureaux for the collection of information as to the conditions of labour; 8, to investigate the causes of lack of employment; 9, to investigate complaints as to treatment; 10, to report on labour movements; 11, to supervise apprenticeship conditions." The Typographical Journal comments as follows on the Bill as a whole: "Although open to amendment, perhaps, in various respects the measure, taken as a whole, is a long way in advance of any labour legislation yet introduced in South Africa, and we welcome it as a trial in the hope that betterment in some of its provisions may be made in its passage through Parliament. We think, however, that the title of the bill is somewhat misleading. The title of the Canadian Act "The Industrial Disputes Investigation Act" is preferable to the Transvaal "Industrial Disputes Prevention Act." They are both clearly only aiding measures, and not preventives."

AGREEMENT ENTERED INTO BETWEEN WESTERN COAL OPERATORS' ASSOCIATION AND ITS EMPLOYEES.

THE new agreement entered into on June 30, between the Western Coal Operators' Association and workmen in its employ, as represented by District 18 of the U.M.W. of A., covers many points not referred to in the agreement between the same parties of 1907, and differs therefrom in certain other respects. In the main the agreements are along substantially similar lines. Four of the coal mining companies who were parties to the old agreement, namely, the Crow's Nest Pass Coal Company, the Pacific Coal Company, the Breckenridge and Lund Coal Company, and the Canadian American Coal and Coke Company, do not appear as signatories to the agreement of June 30, 1909. On the other hand the new agreement contains the names of five companies who had not taken part in the agreement which was entered into between the Western Coal Operators' Association and the U.M.W.A. two years ago, namely, the coal department of the Alberta Railway and Irrigation Company, Royal Collieries, Leitch Collieries, Hillcrest Coal and Coke Company and Hosmer Mines.

In respect of wages no change is made in the scale governing outside wages. The inside scale of wages which governed during the period from March, 1907, to March, 1909, is also continued in effect during the life of the new agreement with the following exception: Machine men to be rated at \$3.50 per shift and machine helpers at \$3.00 per shift. The schedule of the old agreement relating to couplers, pushers, loaders, buckers, locomotives engineers, motormen, switchers and cagers is annulled in the new contract.

No mention is made in the new agreement of the question of discrimination, but by arrangement between the Western Coal Operators' Association and District No. 18, U.M.W.A., a letter was written to the Minister of Labour stating that "the settlement reached was based on the understanding that it is distinctly understood and agreed between

the parties that there is to be no discrimination on the part of the company against union men or on the part of the union against non-union employees, and that it is agreed that the same be published in the *Labour Gazette*."

A clause is embodied in the new agreement declaring that the right to hire and discharge, the management of the mine and the direction of the working forces are vested exclusively in the company, and that the United Mine Workers of America shall not abridge this right.

A clause has also been added enumerating the employees who are not under the jurisdiction of the U.M.W.A., viz.: It is also agreed that all men working on improvements and extensive repairs are not included in the jurisdiction of the U.M.W.A.

Penalties are imposed for absence from work and for stoppage of work. Other clauses of the new agreement not included in the agreement of 1907 deal with the following subjects: Checkweighmen, preference of employment, minimum rate, miners taken to do company work, delivery of timber, loading of coal from chutes, doctor and hospital arrangements, store, holidays, funerals, subcontracting, single shift, wet places, rock miners, brushing, retirement, oil, pay day, definition of schedule rates, turn in cars, back hands, contract prices, local conditions.

Agreement Between District No. 18, United Mine Workers of America and the Western Coal Operators Association.

The text of the agreement is as follows:

Whereas the benefits to be derived from an industrial contract depend altogether upon the fidelity with which it is carried into effect,

And whereas it is our earnest and sincere desire, that any agreement made and executed by and between the representatives of the miners in District No. 18, and the representatives of The

Western Coal Operators' Association, be observed and carried out in its entirety, and that all controversies arising under this agreement shall be agreeably and definitely settled.

It is, therefore, mutually understood and agreed that the following conditions and rates shall govern the parties hereto for a period ending March the thirty-first, 1911, and that the parties hereto will meet in conference thirty (30) days prior to the expiration of this agreement, to discuss a renewal thereof.

MANAGEMENT OF MINE.

The right to hire and discharge, the management of the mine, and the direction of the working forces, are vested exclusively in the Company, and the United Mine Workers of America shall not abridge this right.

SETTLEMENT OF LOCAL AND GENERAL DISPUTES.

(a) In case any disputes or grievances arise under this agreement or any local agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the Company or any person or persons employed, or by the men as a whole, then the parties shall endeavour to settle the matter as hereinafter provided. But before any grievances or disputes shall be submitted to the Pit Committee, the person or persons affected shall endeavour, by personal application to the Pit Boss, Overman or Foreman in charge of the work where the dispute arises, to settle the matter, and in the event of them agreeing their decision shall be final.

(b) In case of any local dispute arising in any mine, and failure to agree between the Pit Boss, Overman or Foreman in charge of the work where the dispute arises and any employee, the Pit Committee and Mine Superintendent or Mine Manager shall endeavour to settle the matter, and if they agree, their decision shall be final.

(c) In the event of the failure of the Pit Committee and the Mine Superintendent or Mine Manager to settle any dis-

pute so referred to them, as well as in the event of other disputes arising, the matter in dispute shall be referred to the General Superintendent or General Manager of the Company and the Officers of District No. 18, United Mine Workers' of America, for settlement, and if they agree their decision shall be final. Should they fail to agree, it shall be referred to a Joint Committee, said Committee to be made up of three Operators appointed by the Western Coal Operators' Association, and three Miners appointed by District No. 18, United Mine Workers' of America, for settlement. If they agree their decision shall be binding upon both parties. A majority of the full Committee must vote in favour of any action before it can be declared carried.

In the event of a failure to agree, the Committee shall endeavour to select an independent Chairman, and failing to agree upon an independent Chairman, the Minister of Labour shall be asked to appoint such Chairman; the decision of the Committee thus constituted shall be binding upon both parties.

The Joint Committee shall meet every three months on the second Tuesday, or at any time on the joint call of the President of the Western Coal Operators' Association and the President of District No. 18, United Mine Workers of America.

(d) In the meantime, and in all cases while disputes are being investigated and settled, the Miners, Mine Labourers and all other parties involved must continue to work pending investigation and until final decision has been reached, but where Miner, Miners, Mine Labourer or Mine Labourers, has or have been discharged by the Company, he or they shall not remain in the employ of the Company while his or their case is being investigated and settled. If a claim be made within five days where a man or men has or have been unjustly discharged, the case shall be dealt with according to this article, and if it is proved that he or they have been unjustly dealt with, he or they shall be re-instated. If claim is made for compensation for time lost, in cases where reinstatement has followed, it shall be left to the Joint Com-

mittee to decide what amount (if any) is to be paid.

(e) Any breach of this agreement by any of the parties hereto is not to void the said agreement, but the same is to continue in full force and effect. It is not intended, however, by this subsection to abridge the right of the men to suspend work after the final settlement as herein provided, if any Operator or Operators refuse to be bound by any decision given against them under this article.

DUTIES OF PIT COMMITTEE.

The Pit Committee shall be a Committee of three in each Colliery or other plant covered by this agreement, selected by the employees working at such Colliery or other plant from among their own number, except one member may be a Chairman or an Officer of the Local Union, not necessarily an employee of the Company. This member must previously have been selected as Checkweighman or Officer from amongst the employees of the aforesaid Colliery or other plant; due notice of such selection properly certified shall be given to the Company.

The duties of the Pit Committee shall be confined to the settlement of disputes between the Pit Boss or Foreman, and any employee working in or around the mines, arising out of this agreement, and all agreements made in connection therewith, the Pit Boss or Foreman and man or men having failed to agree.

The Pit Committee, in discharge of its duties, shall under no circumstances go around the mine for any cause whatever, unless called upon by the Pit Boss or Foreman, or by a Miner or Day Man, who may have a grievance which he has first tried to and cannot settle with the Boss.

Members of the Pit Committee employed as Day Men shall not leave their places of duty during working hours, except by permission of the Pit Boss or Foreman, or in cases involving the stoppage of the mine.

NEW WORK.

Wherever any new work arises, a price for which has not been provided for in this agreement, on the request of the Company or the Miners, the Joint Committee of the Western Coal Operators' Association and District No. 18, of the United Mine Workers of America, shall meet within thirty days after the said request and arrange a price. Meantime, and until such price has been arranged, all men shall be paid upon the day wage scale.

EMPLOYEES NOT UNDER JURISDICTION.

The following employees are not under the jurisdiction of the United Mine Workers of America:—

Mine Manager or Superintendent, Overman or Assistant Overman, Pit Bosses, Fire Bosses, Boss Driver, Stable Boss, Master Mechanic, Electricians, Weighmen, Head Carpenter, Tipple or Breaker Foreman, Loader Boss, Night Watchman, Coke Oven Foreman, Outside Foreman, and all other Foremen, Timekeepers, Coal Inspectors and Head Lampmen.

CONSTRUCTION AND EXTENSIVE REPAIRS.

It is agreed that all men working on improvements and extensive repairs are not included in the jurisdiction of the United Mine Workers of America.

The erection of head frames, tipples, breakers, washers, buildings, coke ovens, scales, machinery, railroad tracks and switches, etc., necessary for the completion of a plant, all being in the nature of construction work, and extensive repairs or rebuilding of the same class of work, are to be considered as improvements and extensive repairs, and the employees thereon are to be excluded as above when employed on such work only.

CHECK-OFF.

The Company will give to the United Mine Workers of America full recogni-

tion, and concede the check-off system, that is to say, upon the individual request in writing of any of the Company's employees, the Company shall deduct such monies from their wages each month as is designated for dues, assessments, fines and initiation fees. In other words, the Company will retain from the wages due employees any sum that they may have given orders upon the Company for in writing, payable to such Officers of the United Mine Workers of America, as may be designated in such orders.

PENALTY FOR ABSENCE FROM WORK.

When any employee absents himself from his work for a period of two days, unless through sickness, or by first having properly arranged with the Pit Boss, or Foreman, and obtained his consent, he may be discharged. All employees whose absence would cause any stoppage of work must before absenting themselves properly arrange with or notify the Pit Boss or Foreman for or of their absences; otherwise they may be discharged. Any employee who habitually, to the extent of five days per month, absents himself from work may be discharged.

PENALTY FOR STOPPAGE OF WORK.

If any employee or employees shall cause a stoppage of work in violation of this agreement, he or they shall be subject to discharge by the Company without recourse.

CHECKWEIGHMEN.

The Company will grant the right to the Miners to employ checkweighers, and will grant the said checkweighers every facility to enable them to render a correct account of all coal weighed, and will allow the cars to be tared from time to time and the machine to be properly tested from time to time, and will deduct from the wages of all contract miners such amounts as may be designated from time to time and will pay over the same to the Secretary of the Local Union for wages of Checkweighers.

PREFERENCE OF EMPLOYMENT.

In case any employee is thrown out of employment, unless discharged, he shall be given preference over new men in other mines in the same camp operated by the same Company.

MINIMUM RATE.

When a miner's working place becomes deficient owing to any abnormal conditions preventing him from earning the minimum wage of \$3.00 per shift, and should the Company desire to continue to work said place or places, the Mine Management and Pit Committee shall examine said place or places and agree upon a rate to be paid the miner for such deficient work. Failing to agree upon such rate, the place, if worked, shall be worked upon the day wage scale for miners.

MINERS TAKEN TO DO COMPANY WORK.

The Company shall pay the sum of Three Dollars (\$3.00) per day for all miners taken from contract work to do Company work.

DELIVERY OF TIMBER.

In accordance with the Coal Mines Regulation Acts of British Columbia and Alberta, the Company shall at all times deliver an adequate supply of suitable timber, rails, ties, planks and sheet iron at the nearest crosscut to the face of all raise workings, and in places where the regular pit cars go to the working face, without being handled by the Miner, they shall be delivered on the cars to the working face; in other places across the pitch, the timber, rails, ties, planks and sheet iron shall be delivered at the mouth of the room.

LOADING OF COAL FROM CHUTES.

In pitching seams, where chutes are used, the Company will handle all coal placed in chutes by the Miners.

DOCTOR AND HOSPITAL ARRANGEMENTS.

The matter of Doctor and hospital arrangements is to be arranged between

the employees and the management, and when so arranged, the Company agrees to make the collection for that purpose; this is subject in British Columbia to the laws of the Province.

In camps where Doctor and hospital arrangements have already been made and are satisfactory, the customs prevailing in such camps shall continue.

The Joint Committee shall at their first meeting provide rules for the mode of procedure for the making of arrangements between the employees and the management.

STORE.

It shall be understood and agreed that the employees shall be at perfect liberty to purchase goods whenever they may choose to do so.

HOLIDAYS.

The following days only shall be observed as holidays: New Year's Day, May first, Victoria Day, Dominion Day, Labor Day, Thanksgiving Day, District and International Election Day and Christmas Day.

FUNERALS.

In the event of an instantaneous death by an accident in the mine, or outside the mine, the miners under ground and all other employees, except in the seam where the accident occurred, shall continue to work till the day of the funeral, when it is optional with them whether they shall work or not.

SUB-CONTRACTING.

No sub-contracting shall be allowed in any mine operated by the Company, but this shall not apply to the employment of backhands.

EMPLOYEES TO CARE FOR MINE.

In case of either local or general suspension of mining, either at the expiration of this agreement, or otherwise, the Engineers, Firemen and Pumpmen,

shall not suspend work, but shall when mining is suspended fully protect all the Company's property under their care, and operate fans and pumps, and lower and hoist such men and supplies as may be required to protect the Company's property, and any and all coal required to keep up steam at the Company's plant, but it is understood and agreed that the Company will not ask them to hoist any coal for sale on the market.

SINGLE SHIFT.

The single shift system in rooms and pillars shall be adhered to as far as practicable.

WET PLACES.

A working place in the mine where water drips from the roof in quantity sufficient to wet a man's clothing, or where standing water is sufficient to wet a man's clothing above his knees, shall be considered a "wet place"; a place where the use of gum boots will keep a man's feet dry shall not be considered a "wet place."

ROCK MINERS.

Where a man is continuously engaged on rock work, where hammer and steel are used, he shall be considered a Rock Miner, and paid Rock Miner's wages.

If an air drill is used the Driller shall be paid Machine Runners' wages, and the Helper paid Machine Runners' Helpers' wages; the other men engaged shall be classed as Miners or Labourers, as may be.

When a man is engaged on work in both rock and coal, if the amount of rock is greater than the amount of coal, he shall be classed as a Rock Miner, and where the amount of coal is greater than the amount of rock, he shall be classed as a Coal Miner.

BRUSHING.

When a man is engaged on continuous Brushing, either top or bottom, using the usual drills and tools, he shall be

classed as a Coal Miner; if the Brushing is done by hammer and steel he shall be classed as a Rock Miner.

Timbermen taking out rock while engaged in retimbering or repairing shall not be classed as Rock Miners.

RETIREMENT.

Where any employee has drawn his time before the regular pay day he thereby severs his connection with the Company, and any alleged grievance he may have, ceases to be a question for consideration under this agreement.

CHINESE LABOUR.

The United Mine Workers of America do not in any way prohibit the employment of Chinese in or around the mines, but where such labour is employed they shall be paid the scale for such work with the following provision, i.e., that where they are now employed at Bankhead and Canmore present rates shall not be interfered with in any way by the United Mine Workers of America during the life of this agreement.

OIL.

Present conditions to prevail.

PAY DAY.

The Companies will pay the regular payrolls at the several mines, for all wages earned during the previous calendar month, on the Fifteenth of each month, if the said Fifteenth be a Saturday, and if not, then on the first Saturday after the Fifteenth, except in case of the Fifteenth falling on a Sunday, when the Companies will pay on the Fourteenth.

Any employee desiring to leave the services of the Company, on his request, be paid all monies due him within two days after his stoppage of work.

MARKET RESTRICTIONS.

It is agreed that District No. 18, of the United Mine Workers of America will

not in any way restrict or interfere with the marketing of coal or coke, to any person, firm or corporation.

DEFINITION OF SCHEDULE RATES.

The schedule rates under this agreement are to be the minimum rates paid, but nothing in this agreement shall be construed to prevent the Companies from paying higher rates should they so desire.

It is also understood that where higher rates have prevailed no reduction shall take place.

TURN OF CARS.

The Companies shall as far as practicable supply each and every miner with an equal turn of cars.

BACKHANDS.

The present practice of working miners, either as partners or with miners and labourers, as it exists in the several camps at the present time shall be adhered to.

With the following provisions: That the clauses in regard to the same in the agreements expiring March 31st, 1909, will remain in effect.

On all Company work the Company shall employ such class of men as the work requires and the rates of wages provided for in this agreement.

OUTSIDE WAGES.

The outside scale of wages, which governed the parties hereto on March 31st, 1909, shall continue in effect during the life of this agreement, as per attached schedules.

INSIDE WAGES.

The inside scale of wages, which governed the parties hereto on March 31st, 1909, shall continue in effect during the life of this agreement, with the following exceptions: Machinemen are to be rated at \$3.50 per shift, and Machine Helpers at \$3.00 per shift, and schedule "D" of the agreement expiring March 31st, 1909 is annulled, as per attached schedules.

CONTRACT PRICES.

The scale of contract prices, which governed the parties hereto on March 31st, 1909, shall continue in effect during the life of this agreement, as per attached schedules; and that the matter of dispute, in regard to the price on the pillars at Hillcrest Mine, be referred to the Joint Committee for settlement, said Committee is to be named at the signing of this agreement, and render a decision thereon, immediately.

LOCAL CONDITIONS.

As per attached schedules.

CONTRACT PRICES:

THE INTERNATIONAL COAL AND COKE CO., LTD.

No. 2 Seam.

Mining rate to be 55 cents per gross ton.
 YARDAGE: Levels to be 10 feet wide, 7 feet high on the low side, and thickness of coal on upper side, \$1.75 per lineal yard.

Parallel Airway to be 6 x 10 feet, \$1.75 per lineal yard.
 Crosscuts between levels, 6 x 8 feet, \$1.50 per lineal yard.

Room Crosscuts to be not less than 8 x 8 feet, not to be driven more than 25 feet from one side, no tracks, \$1.00 per lineal yard.

TIMBERING: Entry timber, maximum to be 12 in. in diameter at butt, and 14 feet in length, \$2.00 per set with lagging.

Room timber, maximum to be 10 inches in diameter at butt, and 16 feet in length, \$1.00 per set. If required to set timber of larger dimensions, to be paid for in proportion, or be set by the Company.

PROPS: All props, exclusive of those used to set brattice or chutes, 5 cents per lineal foot.

TRACK LAYING: All tracks to be laid by the Company, except a pair of temporary rails to the face, which should be laid by the miner without charge.

CHUTES: 30 cents per lineal yard, 5 planks 2 x 12 inches, two posts every 8 feet with cross pieces. This includes sheet iron.

BRATTICE: 5 cents per lineal yard for each foot in height.

BRUSHING: 6 feet wide, 5 cents per inch per lineal yard; 12 feet wide, 10 cents per inch per lineal yard.

No. 4 Seam.

No Powder.
 Mining rate to be 50 cents per gross ton.

YARDAGE: Levels not less than 12 feet wide, by thickness of seam, \$1.00 per lineal yard.

PARALLELS: Thickness of seam not less than 10 feet wide, \$1.00 per lineal yard.

CROSSCUTS (between levels): Thickness of seam not less than 8 feet wide, \$1.00 per lineal yard.

CROSSCUTS (between room): Thickness of seam not less than 8 feet wide, not to be driven more than 25 feet from one side, \$1.00 per lineal yard.

TIMBERING: Same as No. 2 seam.

PROPS: Same as No 2 seam.

TRACKLAYING: Same as No. 2 seam.

CHUTES: Same as No. 2 seam.

BRATTICE: Same as No. 2 seam.

BRUSHING: Same as No. 2 seam.

WEST CANADIAN COLLIERIES, LIMITED.

Lille Mine in No. 1 Seam.

Gangway to be driven by special contract.
 Breasts "Up the Pitch," 20 feet wide.

For mining coal, \$5.70 per lineal yard.
 Building brattice, 30 cents per lineal yard.

Building chutes 30 cents per lineal yard.
 Brattice of 1-inch boards built air-tight from floor to roof.

Chute building to include laying of sheet iron.
 Work "Across the pitch" including handling coal, laying track and building brattice.

Breasts, 20 feet wide, \$6.00 per lineal yard.
 Pillars, 30 feet wide, \$7.50 per lineal yard.

Tracks in pillars to be laid by Company.

Bellevue Mine, No. 2 Seam.

Gangway to be driven 11 foot collar, 14 foot spread, 7 feet clear above rail, \$14.00 per lineal yard.

Chutes to be driven 7 x 10, \$5.50 per lineal yard.
 First length of chute and battery, \$5.00 if not built by Company.

Monkey Gangway: To be driven 6 x 6 from outside end, by car, \$3.50 per lineal yard.

CROSSCUTS: To be driven 6 x 6 both sides, \$3.00 per lineal yard.

BREASTS: To be driven 9 x 20, "Up the Pitch" including timbering, chute and air-tight brattice, \$10.00 per lineal yard.

Breasts of greater dimensions to be paid for in proportion.

No. 1 Seam, Bellevue.

The mining price on pillars "Up the Pitch," including setting of 5 rows of props, where necessary, 45 cents per cubic yard.

SUPPLEMENTARY CONTRACT: As approved by Joint Committee, July 8th, 1908. Other contracts now in force between the Company and Dist. 18, U.M.W. of A.

THE H. W. MCNEILL CO., LIMITED.

No. 1 Seam.

BREASTS: 20 feet wide, 4 feet high, \$5.77½ per lineal yard.

PILLARS: 30 feet wide, 4 feet high, \$6.30 per lineal yard, increasing or decreasing thickness of seam, to be paid for proportionately at 75 cents per lineal yard per foot, down to a minimum thickness of 3 feet, including dirt or rock.

SKIPS: \$2.62½ per lineal yard, 10 feet wide, 4 feet high, increasing or decreasing thickness of seam, to be paid at rate of 25c. per foot per lineal yard, down to a minimum thickness of 3 feet, including dirt or rock.

No. 2 Seam.

BREASTS: 20 feet wide, coal to be paid in proportion at \$1.05 per foot per lineal yard, for each foot in thickness.

PILLARS: 30 feet wide, coal to be paid for in proportion, at \$1.31¼ per foot per lineal yard, for each foot in thickness.

SKIPS: 10 feet wide, coal to be paid for in proportion at 52½ cents per foot, per lineal yard, for each foot in thickness. Rock in this seam to be paid for at 10 cents per inch per lineal yard.

No. 3 Seam.

Prices to be the same as No. 1 seam. The basis of measurement to be a maximum thickness of seam at 5 feet, instead of 4 feet as in No. 1 seam.

No. 4 Seam.

BREASTS: 20 feet wide, \$6.30 per lineal yard; 4 ft. thickness increasing or decreasing thickness of seam to be paid proportionately at 75 cents per foot per lineal yard.

PILLARS: 30 feet wide, 4 feet thickness, \$6.30 per lineal yard; increasing or decreasing thickness of seam to be paid proportionately at 75 cents per foot per lineal yard, down to a minimum thickness of 3 feet, including dirt or rock.

SKIPS: 10 feet wide, 4 feet thickness, \$3.15 per lineal yard, increasing or decreasing thickness to be paid proportionately at 25 cents per foot per lineal yard.

The following prices to prevail in all seams:—

Chute building, 50c. per lineal yard, to be built according to present practice, 4 feet wide, unless otherwise ordered by the Pit Boss. First length of chute, 16 feet, \$2.50.

Bulkheads, according to present practice, \$2.50. All re-timbering and replacing broken timbers in breasts to be done by contract work, 8-inch or 10-inch timber at 5 cents per foot.

Gob or brattice building in breasts, 30 cents per lineal yard.

All horizontal breasts driven over 200 feet, to be paid 50 cents per yard extra, up to 300 feet.

Chutes to be driven 12 feet wide at present rates.

Gangways to be driven by special contract.

Carey Seam.

GANGWAY: 6 ft. collar, 10 ft. spread, 6 feet 6 inches high in the clear, as driven at present, and including coal, rock, timbering and laying of track, per lineal yard, \$12.50.

BREASTS (up the pitch): 12 feet wide and 7 feet thickness of coal, including timbering, chute and stairway, and brattice building, per lineal yard, \$6.75.

BREASTS (across the pitch): 12 ft. wide and 7 ft. thickness of coal, including timbering, brattice, track-laying and handling of coal, per lineal yard, \$6.25.

PILLARS: 30 ft. wide and 7 ft. thickness of coal, including timbering and handling of coal, per lineal yard, \$10.00.

These prices are based upon the present system of working. If seam is more than 7 ft. or less than 7 ft. to be paid for proportionately.

THE BANKHEAD MINES, LIMITED.

No. 2 Seam.

GANGWAYS: 7 ft. collars, \$5.50 per lineal yard, which ludes single timber, and \$1.00 per set for square sets,

of three pieces lagged. All coal to be forked, and the slack and other refuse to be loaded in separate cars from the coal.

COUNTER GANGWAYS: \$5.00 per lineal yard, which includes single timber, 50 cents per set of two pieces lagged; \$1.00 per set of three pieces lagged. All coal to be forked, and the slack and rock to be loaded separately from the coal.

BREASTS (up the pitch): 30 feet wide, with airway on each rib and coal chute and gob. All coal, when required to be forked, and the slack and other refuse gobbled, and coal put into coal chute, \$8.00 per yard, and 50 cents per yard for building chutes, when vein is from 8 to 10 feet thick. If less than 8 feet or more than 10 feet, to be paid proportionately.

PILLARS: 30 feet wide. All coal to be forked and slack and other refuse gobbled, by working pillars on a slant, and gobbing slack and other refuse behind wing boards, wherever practicable. Price \$6.50 per yard, where vein is from 8 to 10 feet thick; if less than 8 feet or more than 10 feet, to be paid proportionately.

CHUTES: 12 ft. wide, \$4.50 per lineal yard; building chute and stairway, 50 cents per lineal yard; and placing of bulkheads, \$2.50.

CROSSCUTS: Between breasts, 6 feet wide, and the height of the vein, including single timber, \$4.50 per lineal yard.

No. 4 Seam.

MAIN GANGWAY ("A" Level): 12 feet wide, which includes single timber lagged. All coal to be forked, and the slack and other refuse to be loaded in separate cars from the coal, \$8.50 per lineal yard.

MAIN GANGWAY ("B" Level): 10 feet wide, which includes single timber lagged. All coal to be forked, and the slack and other refuse to be gobbled, or loaded in separate cars from the coal, as required, \$7.00 per lineal yard.

COUNTER GANGWAYS: 10 feet wide, which includes single timber lagged. All coal to be forked, and the slack and other refuse gobbled or loaded in separate cars from the coal, as required, \$6.00 per lineal yard.

CHUTES: 10 feet wide, \$4.50 per lineal yard; building chutes and stairway, 50 cents per lineal yard; building bulkheads, \$2.50.

BREASTS (up the pitch): 30 feet wide, including timbering, chute, air-tight brattice, and stairway. All coal to be forked, and the slack and other refuse to be gobbled in front of wing boards, and the coal to be put into chute, \$9.00 per lineal yard for the coal and timbering, and 50 cents per lineal yard for the building of the chute and stairway.

CROSSCUTS (between breasts): 6 feet wide, and the height of the vein, including single timber lagged, \$5.00 per lineal yard.

PILLARS: 30 feet wide, including necessary timber. All coal to be forked, and slack and other refuse gobbled behind wing boards, and the coal put into the chute, \$ per lineal yard.

The above prices are based on the seam being 9 feet thick; if more or less than 9 feet, to be paid for proportionately.

No. 5 Seam.

MAIN GANGWAY ("A" Level): 10 feet wide, including single timber lagged. All coal to be forked, and the slack and other refuse to be loaded in separate cars from the coal, \$6.00 per lineal yard for the coal. Brushing, \$3.50 per lineal yard; taking down cap rock, when same exists, 50 cents per lineal yard.

MAIN GANGWAY ("B" Level): 10 feet wide, including single timber lagged. All coal to be forked, and the slack and other refuse to be gobbled, or loaded in separate cars from the coal, as required, \$6.00 per lineal yard for the coal; taking down cap rock, when same exists, 50 cents per lineal yard.

COUNTER GANGWAYS: 10 feet wide, which includes single timber lagged, \$6.00 per lineal yard. All coal to

be forked, and the slack and other refuse to be gobbled, or loaded in separate cars from the coal as required.

CHUTES: 12 feet wide, \$4.50 per lineal yard; building chute and stairway, 50 cents per lineal yard; building bulkhead, \$2.50.

BREASTS (up the pitch): 30 feet wide, including timbering, chute, air tight brattice, stairway, and the cap rock; all coal to be forked and the slack and other refuse to be gobbled in front of wing boards, and the coal to be put into the chute, \$9.00 per lineal yard for the coal and the rock, and 50 cents per lineal yard for the building of the chute and stairway.

CROSSCUTS (between the breasts): 8 feet wide and the height of the vein, including single timber, lagged, \$4.50 per lineal yard.

PILLARS: 30 feet wide, including necessary timber, building of chute, and taking up of old chute in breast, all coal to be forked, and slack and other refuse, gobbled bed in wing boards, and the coal put in the chute, \$8.00 per lineal yard, based on the seam, including the cap rock, where necessary to be taken down, being 8 feet thick; if more or less than 8 feet thick, to be paid for proportionately, and if pillars are more or less than 30 feet wide, to be paid for proportionately.

The above prices are based on the seam, including the cap rock, being 8 feet thick, if more or less than 8 feet to be paid for proportionately.

No. 6 Seam.

GANGWAYS: 12 feet wide, including single timber lagged, all coal to be forked, and the slack and other refuse to be loaded in separate cars from the coal, \$8.00 per lineal yard.

COUNTER GANGWAYS: 10 feet wide, including single timber lagged, all coal to be forked and the slack and other refuse to be gobbled or loaded in separate cars, as required, \$6.00 per lineal yard.

CHUTES: 10 feet wide, \$4.50 per lineal yard; building chute and stairway, 50 cents per lineal yard; building bulkhead, \$2.50. Where the chute is built above the bottom of the seam, except for the first length, 50 cents per yard for the extra work of lifting the coal up into the chute.

BREASTS: 30 feet wide, including timbering chute, air-tight brattice and stairway; all coal to be forked, and the slack and other refuse to be gobbled, and the coal put into the chute. \$9.00 per lineal yard for the coal, and 50 cents per lineal yard for the building of the chute and stairway.

CROSSCUTS (between breasts): 8 feet wide, and the height of the seam, including single timber lagged, \$4.50 per lineal yard.

The above prices are based on the seam being 8 feet thick; if more or less than 8 feet to be paid for proportionately.

ALL SEAMS: Pushing and dumping coal over 200 feet and up to 300 feet, 50 cents per lineal yard.

It is understood that the coal, in all places, is to be mined with the use of as little powder as possible.

Gangways in faults to be driven by special contract.

The tunnels are to be driven continuously, with three shifts of eight hours each, seven days per week, except the shift from Midnight Saturday to 8 a.m. Sunday, which will be discontinued for the purpose of changing shifts. The shifts to commence at 8 a.m., 4 p.m., and Midnight.

COAL DEPARTMENT OF THE ALBERTA RAILWAY AND IRRIGATION COMPANY.

All coal to be paid for on screened basis, one ton being considered 2,000 pounds.

PICK MINING:

Pillars and stumps, 66 cents per ton.

MACHINE MINING:

Runners (rooms), 13 cents per ton.

Runners (narrow work), 19 cents per ton.

Scrapers, (rooms), 9 cents per ton.

Scrapers (narrow work), 14 cents per ton.

Loaders (rooms), 50 cents per ton.

Loaders (narrow work), 77 cents per ton.

Loaders, bone coal over four inches thick, 42 cents per running yard in entries and rooms.

Loaders, square booms in entries, 20 cents per set.

Loaders, round booms in entries, 40 cents per set.

Loaders, room crosscuts, \$1.50 per lineal yard.

Loaders, lifting bottom, 75 cents per lineal yard, for each foot in depth.

Loaders, laying rails in entries, 50 cents per pair.

Loaders, cutting through faults, entry width and height, 77 cents per lineal foot.

Loaders, unweighed coal, entry width and height, 77 cents per lineal foot. Loaders, room necks, each \$4.00.

Loaders, entries, where necessary to use dynamite, on account of water, the Company to furnish dynamite free, 10 cents per ton extra.

Machine runners, cutting through faults, entry width and height, 19 cents per lineal foot.

Machine runners, unweighed coal, entry width and height, 19 cents per lineal foot.

Machine scrapers, cutting through faults, entry width and height, 14 cents per lineal foot.

Machine scrapers, unweighed coal, entry width and height, 14 cents per lineal foot.

Other prices and conditions to remain as existing March 31st, 1909.

THE HILLCREST COAL AND COKE CO., LTD.

Mining rate to be 50 cents per gross ton.

YARDAGE: Levels to be 10 feet wide, 7 feet high on low side, and thickness of coal on upper side, \$1.75 per lineal yard.

PARALLEL AIRWAYS: To be 6 feet by 10 feet, \$1.75 per lineal yard.

CROSSCUTS (between levels): To be 6 x 8 feet, \$1.50 per lineal yard.

ROOM CROSSCUTS: To be no less than 8 x 8 feet, not to be driven more than 25 feet from one side, no tracks, \$1.00 per lineal yard.

TIMBERING: Room timber, maximum to be 10 inches in diameter at butt, and 16 feet in length, \$1.00 per set. If required to set timbers of larger dimensions, to be paid for in proportion, or be set by the Company.

ENTRY TIMBER: Maximum to be 12 inches in diameter at butt, and 14 feet in length, \$2.00 per set with lagging; if required to set timber of larger dimensions, to be paid for in proportion, or set by the Company.

PROPS: All props, exclusive of those used to set brattice, or chutes, 5 cents per lineal foot.

TRACK LAYING: All track to be laid by the Company, except a pair of temporary rails to the face, which shall be laid by the miner without charge.

CHUTES: 30 cents per lineal yard, 5 planks, 2 inches by 12 inches, 2 posts every 8 feet with cross pieces. This includes sheet iron.

BRATTICE: 5 cents per lineal yard for each foot in height.

BRUSHING: 6 feet wide, 5 cents per inch per lineal yard; 12 feet wide, 10 cents per inch per lineal yard.

The above prices are based upon the present method of working.

INTERNATIONAL COAL AND COKE CO., LTD.

Local Conditions.

Dockage for loading rock in coal.

All conditions to remain as at present.

The Company will deliver workmen's house coal at \$2.50 per ton.

BRUSHING: Present prices paid, and conditions at Coleman, to remain during this agreement.

WEST CANADIAN COLLIERIES.

Lille and Bellevue Mines.

Local Conditions.

The Company will deliver to their workmen, run of mine coal at \$2.50 per ton, and screened coal at \$3.00 per ton.

The Company will sell to its employees, 40 per cent. dynamite at \$10.00 per box (50 lbs.), and Monobel powder at \$15.00 per box (50 lbs.)

Fuse, caps, and other supplies to be at present rates.

DOCKAGE: All miners agree to deliver their coal as free from rock as possible. Serious or repeated contravention to this clause shall be taken up with the Pit Committee, and if found to be through the negligence of the miner, he may be discharged.

All other local conditions to remain as at present.

THE H. W. MCNEILL COMPANY, LTD.

Local Conditions.

Mine run coal, \$2.50 per ton.

Dynamite, 25 cents per pound.

Monobel, 30 cents per pound.

Other conditions to remain as under the agreement ending March 31st, 1909.

BANKHEAD MINES, LIMITED.

Local Conditions.

Penalties for Loading Impurities.

The men are to deliver their coal as free from slack and rock, or other impurities, as it is practicable, and in case of a miner failing to do so, he shall be warned for the first and second offences, for the third offence he shall be fined one dollar, for the fourth offence he shall be fined two dollars, and for continued and aggravated cases, it shall be taken up with the Pit Committee, and if found to be through the negligence of the miner, he may be discharged.

Supplies, etc.

The Company will deliver coal to their employees residing at Bankhead, at the following prices:

Nut coal, \$3.00 per ton.

Stove or Egg coal, \$4.00 per ton.

Briquettes, \$4.00 per ton.

House rents to remain as at present.

Electric light, 50 cents per 16 c.p. light per month.

30 per cent. dynamite, 25 cents per pound.

Monobel powder, 30 cents per pound.

Caps, to remain as at present.

Fuse, to remain as at present.

Wash house, \$1.00 per month.

Company men to furnish their own tools, which the Company agrees to take back when they leave.

All other conditions to remain as at present.

THE HOSMER MINES, LTD.

Local Conditions.

House rents to remain as at present.

Mine run coal, \$2.50 per ton delivered.

Screened coal, \$3.00 per ton delivered.

Water (outside tap), \$1.00 per month.

Water (inside tap), \$1.50 per month.

Electric lights, 50 cents per 16 c.p. light per month.

Sanitation \$1.00 per month for each house.

Wash house, \$1.00 per month.

COAL DEPARTMENT OF THE ALBERTA RAILWAY AND IRRIGATION CO.

Local Conditions.

DOCKAGE: A loader will be fined 25c. for each offence for sending out dirty coal, and after the third offence he may be discharged. When fined, his number will be placed on the dock board on the bankhead. The placing of his number on the dock board will, be considered as due warning.

ABNORMAL CONDITIONS: An abnormal condition shall be considered as a condition where the seam is faulty, or thins out to a point less than forty-eight inches in thickness.

INSIDE DAY WAGES: To be computed from the time at which the first workman in the shift leaves the surface, to the time the first workman in the shift returns to the surface.

THE HILLCREST COAL AND COKE CO., LTD.

Local Conditions.

The Company will deliver coal to miners living within the limits of the townsite of Hillcrest Mines, at \$2.50 per ton for run of mine coal, and screened coal, when possible, at \$3.00 per ton.

The Company will sell to its employees, 40 per cent. dynamite at 25 cents per pound. Monobel powder at 30 cents per pound. Fuse, caps, and other supplies as at present rates.

DOCKAGE: Same dockage clause as at Coleman mine.

House rents to remain as at present.

All other conditions to remain as at present.

In witness whereof, the parties hereto, have hereunto set the hands of their proper Officers, this Thirtieth day of June, 1909.

Arbitration of Difficulty at Hillcrest.

Under the clause of the above agreement requiring that difficulties between the operators and the men be submitted to a joint committee, the following award was given out in the matter of the differential on pillars at the Hillcrest Coal and Coke Company's mine at Hillcrest:

To the Joint Committee,—

Representing the Western Coal
Operators' Association and District
18, United Mine Workers of America.

Gentlemen:

In the matter of the Differential on Pillars at the Hillcrest Coal and Coke Company's mine at Hillcrest, Alta., heard before your committee at MacLeod, July 6th, 1909, as chairman of the above committee, I have the honour to report as follows:—

During the sitting of the board, I examined the mine at Hillcrest, and being somewhat familiar with mining, it seems to me the mine was in remarkably good condition after two months idleness. It ought to be so far as mines go, a most desirable one in which to work. The evidence shows that there have been no fatal accidents in it. In his evidence before the committee, Mr. Hill has shown that up to the present owing to conditions of cost of mining he has not had adequate returns on his operations. These profits he expected from his pillars, but when he experimented in December he found that pillar coal cost more than room coal. Before the committee he made it plain that he did not desire to grind labour; and he made an appeal for justice, so that he, as well as his em-

ployees, might have a just return for his outlay. We must remember that money is put into coal mines for profits, and unless profits are the outcome of operations, money will seek some other channel in which it may adequately get its increase. When we view outside conditions at Hillcrest we find that it requires a large outlay to put the coal in the cars and on the C.P.R. track. This acts as a handicap in competition in open market with other mines in the same competitive field, and these embrace not only local mines, but also eastern ones that enter into competition in the western market with our local mines. I believe the employes, if they look at the matter squarely and justly will see that they ought to help the Hillcrest Company overcome the handicap they are under in the costly handling of their coal after it is mined. I believe they can give a reduction on the pillars without materially decreasing their earnings. And, at least, they will have the satisfaction of knowing they will be saving an industry that has been good to them in the past and which will in the future even under a reduction give them very satisfactory returns for their labour.

Taking these things into consideration and after carefully weighing the interests of both parties my decision is, that the price of pillar work at Hillcrest Mines should be 40 cents per ton for mining coal, and that props should be paid for at the rate of 4 cents per lineal foot.

Yours truly,

(Sgd.) H. R. GRANT,
Chairman of Joint Committee.

ALBERTA LEGISLATION AFFECTING LABOUR, 1909.

THE fourth session of the first legislative assembly of the province of Alberta was begun at Edmonton on January 14, and closed on the 25th day of the ensuing month. A copy of the various statutes passed by the assembly in the form in which they received the royal assent was

received by the department, by courtesy of the Government Printer of Alberta, during the past month. The following is a brief review of the legislation of the session of importance to industry and labour.

Neglected and Dependent Children.

A comprehensive act was passed for the protection of neglected and dependent children, the term *child* being defined as meaning a boy or girl actually or apparently under 16 years of age. The act provides for the appointment of a superintendent of neglected and dependent children to encourage and assist in the establishment of children's aid societies, to advise these societies as to their duties, to see that a record is kept of children placed in foster homes and visited, etc. For the better protection of neglected children the corporation of any city or town, having a population of 10,000 or over, is required to provide one or more temporary homes or shelters, separate from any penal or pauper institution, designed for the temporary protection of neglected children only for so long a time as shall be absolutely necessary for placing them in foster homes, in no case to exceed three months. On the application of a children's aid society, to whose custody a child has been committed, a judge may order the municipality to which the child belongs, to pay a reasonable sum, not less than \$1.00 weekly, towards its maintenance, the municipality being empowered to recover the amount from the parent of the child. The act contains full provisions with reference to the apprehension of neglected children, the selection of foster homes, the surrender of children, the right of inspection, the transportation of children to institutions, the imposing of penalties for ill-treatment or for causing children to be neglected, the power of search, etc. Municipal councils may pass by-laws regulating the time after which children are not to be allowed in a public place at night without proper guardianship. A parent for permitting his child to violate such a by-law may be summoned and fined. The act also provides for the separate custody of juvenile offenders and for the establishment of children's courts.¹

Mechanics' Lien.

The provisions of the Mechanics' Lien Act of 1906 with reference to the en-

forcement of liens are amended in three sections relating to proceedings to enforce a lien. Such proceedings may be taken in a summary way by originating summons. The judge may thereupon either proceed to make the necessary inquiries or he may try to direct the trial of any issue that may be thought necessary. In default of the payment of any amount found due, the sale of the estate or interest charged may be directed, all proceedings to be as nearly as possible according to usual practice and procedure. Proceedings to enforce a lien may also be taken by suit in the ordinary way, providing that the court may take into consideration any difference in cost involved. An appeal to the Supreme Court *en banc* is allowed where the amount is \$200 or over. Where the total claim, however, is less than that amount the decision of the court or judge of the first instance is final. Under the law as previously, the enforcement of all claims over \$200, was under the Supreme Court, and no appeal was allowed from the lower court to which the adjudication of cases involving less than \$200 was referred.²

Steam Boilers' Act Amendment.

In 1907 hydrostatic tests of steam boilers were required to be not less than 50 per cent. above the working steam pressure according to the type of the boiler. This provision is now repealed. The regulation as to the fire line in boilers is also changed, as is also the regulation with regard to the construction of steam domes. The section of the Act of 1906 requiring inspectors, when subjecting boilers to hydrostatic pressure to assume 110 pounds to the square inch as maximum pressure in new boilers 42 inches in diameter made of plate $\frac{1}{4}$ of an inch thick, is repealed. The provision of the old act with reference to the working pressure is also repealed.³

Bartenders' Licences.

The Liquor License Ordinance is amended by the addition of a section requiring

¹ Alberta statutes, 1909, chap. 12.

² Alberta statutes, 1909, chap. 4, sec. 10.

³ Alberta statutes, 1909, chap. 5, sec. 8.

the licensing of bartenders and prohibiting the employment of unlicensed bartenders under a penalty of a minimum fine of \$10 per day. A licensed bartender is made liable to a penalty of \$50 for a violation of the law. Licenses are not to be issued to females or to any one who is not of the full age of 21 years, and of good character. Unlicensed persons may be employed by bartenders in cases of temporary emergency, but not for a period of more than two days in any one calendar month.⁴

Sunday Cars.

The section of the Railway Act prohibiting the operation of street or electric railways on Sundays is not to apply to the cities of Calgary, Edmonton and Strathcona upon the majority of the rate-payers voting upon a plebiscite that they are desirous of having their street railway systems operated on Sundays.⁵

Railway Legislation.

Three separate acts were passed guaranteeing certain securities of the Canadian Northern Railway Company, the Grand Trunk Pacific Branch Lines Company, and the Alberta and Great Waterways Railway Company.⁶

By an amendment of the supplementary revenues act no tax is to be payable under the act with respect to any portion of a line of railway aided by a guarantee of bonds, debenture stock or other securities for a period of 15 years from the date of the commencement of the operation of the portion of the line which was aided. Thereafter during the currency of the guarantee the amount of taxation payable is not to exceed \$30 per mile. The periods provided for is not to exceed altogether the full period of 30 years.⁷

The following acts were passed incorporating or otherwise relating to railway companies:—

An Act to incorporate the Royal Collieries Railway Company.

An Act to incorporate the Pincher Creek & Southern Railway Company.

An Act to amend Chapter 29 of the statutes of Alberta, 7 Edward VII, incorporating the Red Deer Railway Company.

An Act to incorporate the Southern Alberta Railway Company.

An Act respecting the Calgary and Knee Hill Railway Company.

An Act to incorporate the Strathcona Central Railway Company.

An Act to incorporate the Kootenay and Alberta Railway Company.

An Act to incorporate the Alberta Midland Railway Company.

An Act to incorporate the Alberta and Great Waterways Railway Company.

An Act to further amend Chapter 53 of the statutes of 1906, Alberta, being an Act to incorporate the Alberta North Western Railway Company, as amended by chapter 29 of the statutes of 1908.

An Act to incorporate Lacombe and Blindman Valley Electric Railway Company.

An Act to incorporate the Lacombe, Bullockville and Alix Electric Railway Company.

An Act to amend Chapter 48 of the statutes of 1906 of the province of Alberta, being an Act to incorporate the Alberta Oil, Coal and Wheat Railway Company.

Miscellaneous.

An Act respecting constables was passed.⁸

The hail insurance ordinance is amended, an option being allowed in the amount of insurance taken out. Rye is now included among crops which may be insured.⁹

The ordinance respecting masters and servants is amended in the section relating to counter claims by employers. Previously such claims were required to be submitted to the Supreme Court; the law now requires them to be submitted to the District Court.¹⁰

Certain amendments to the stray animals ordinance are enacted. The law now provides for the appointment of brand readers, to be paid by a fee of

⁴ Alberta statutes, 1909, chap. 5, sec. 3.

⁵ Alberta statutes, 1909, chap. 4, sec. 16.

⁶ Alberta statutes, 1909, chap. 14, 15 and 16.

⁷ Alberta statutes, 1909, chap. 5, sec. 10.

⁸ Alberta statutes, 1909, chap. 7.

⁹ Alberta statutes, 1909, chap. 5, sec. 5.

¹⁰ Alberta statutes, 1909, chap. 4, sec. 4.

\$2.00 and mileage in each case, payment to be made by the finder who is to be reimbursed by the owner or out of the proceeds of the sale of the animal¹¹.

An act authorizing the payment of a bounty on timber wolves of \$10 a head and a bounty on prairie wolves and wolf pups of \$1.00 a head was passed. Any person making a claim for bounty on a wolf killed elsewhere than in the prov-

ince of Alberta is to be liable to a penalty of \$100 and costs¹².

Among the estimates brought down by the government during the session was an item of \$50,000 for the establishment of a government packing industry and to provide for cold storage facilities. A revision of the Consolidated Municipal Act was tabled in the legislature but was held over for more complete discussion throughout the province.

¹¹ Alberta statutes, 1909 chap. 5, sec. 18.

¹² Alberta statutes, 1909, chap. 13.

THE PEAT FUEL INDUSTRY IN CANADA.

THE importance of the peat fuel industry to the central portion of Canada, where coal fuel is non-existent and its importation so comparatively costly, requires no demonstration.

The Mines Branch of the Department of Mines, Ottawa issued a year ago a report on "Peat and Lignite, their Manufacture and Uses in Europe," with the object of giving to Canadians as complete a review as possible of this industry in those countries in which it has been most successfully carried on.

This report is now followed by a bulletin entitled "The Investigation of the Peat Bogs and Peat Industry of Canada during the season of 1908-09, by Erik Nystrom, M. E., Peat Expert. This Bulletin comprises 25 pages of text, and includes 6 large scale maps of the following peat bogs:—

1. Mer Bleue, near Ottawa.
2. The Alford Peat Bog, about 40 miles from Ottawa.
3. The Welland peat bog, about 6 miles north of Welland.

4. The Newington Bog, on the New York & Ottawa Ry., and about 40 miles from Ottawa.

5. The Perth Bog, a mile and a half from Perth.

6. The Victoria Road Bog, about a mile from Victoria Road station on the Midland division of the Grand Trunk Ry.

The Bulletin contains a descriptive report of each bog showing the location, area and structure, and giving an estimate of the available supply of peat fuel with records of analysis, calorific values, etc., and should be of particular interest to those engaged in, or connected with, the development of Canadian peat resources.

A fuel testing plant is now being erected at Ottawa, in which the value of peat for the production of power gas will be demonstrated, and the Department proposes to carry on a very thorough investigation of this subject.

Copies of the above Bulletin and Report on Peat may be had on application to Dr. Haanel, Director of Mines, Ottawa.

THE IRON ORES OF NOVA SCOTIA.

THE Mines Branch of the Department of Mines, Ottawa which was organized for the purpose of devoting special attention to the economic features of Canada's mineral resources, has just issued a comprehensive report on the iron deposits of Nova Scotia, prepared by Dr. J. E. Woodman, until recently Pro-

fessor of Geology at Dalhousie University, Halifax.

This report, which covers very thoroughly the more important iron deposits of the province, consists of 222 pages of text, 63 illustrative photographs, diagrams and maps, and a copious index. The scope and economic importance of

the work may be judged from the detailed instructions given to the author who was requested to give special attention to:—

1. Localities of iron ore deposits so far discovered and names and addresses of owners.

2. History of development of mines and companies (if any).

3. Geological description.

4. Analysis of ores.

5. In cases of mines which have been worked, output and statistics.

6. Transportation facilities.

7. Limestone in neighborhood of deposits.

8. State in general terms character of forest in neighborhood, i. e., whether the supply is sufficient for mining purposes and for the production of charcoal in the event of the introduction of electric smelting.

9. Maps of mines (and drill holes, if any).

The Report itself is divided into two main parts:

Part I, deals with the geographic relations of the deposits, their mineralogy

and geology, and questions relating to mining policy, bounties and mining laws.

Part II, is entitled "Details of Iron Districts," and covers more particularly the ores of the Clementsport basin, the Nictaux-Torbrook field, the deposits of Hants and Colchester counties, the ores of the Western Cobequid mountains and of Arisaig, and the ores of Cape Breton and is replete with analysis of ores, records of bore holes and geological sections, and other statistical data.

A second volume covering iron ore deposits not referred to in Volume I, and devoting special attention to limestones of value for metallurgical purposes will shortly be issued.

In view of the present condition of the iron ore industry of Canada and particularly Nova Scotia, where so much imported iron ore is being used, this report should be of special value to mining engineers, investors and others interested in the development of the iron resources of this province.

Copies may be obtained on application to Dr. Haanel, Director of Mines, Ottawa.

THE MONTREAL STREET RAILWAY COMPANY'S MUTUAL BENEFIT ASSOCIATION.

THE annual report of the Montreal Street Railway Mutual Benefit Association for the year ended April 30, 1909, shows that 554 members were disabled through sickness or injury, to whom \$9,457.40 was paid. Of this amount, \$6,566.67 was paid for death and burial insurance. Since the organization of the Association, \$27,192.72 has been paid for death and burial insurance, and \$44,511.45 for sickness and injury benefits. The 5th annual picnic realized a net profit of \$7,325.35. During the year, \$15,509.25 was invested, which with the sum previously invested amounts

to \$48,725.50. The securities are held by the Royal Trust Co., for safe keeping. The committee of management acknowledged a special Christmas donation received from the Montreal Street Railway, making the total contributions received from the company \$13,910.27. This amount, added to the fees and dues received from the members, \$13,008.50, the proceeds of the picnic, and interest on investments and bank deposits, makes a total revenue for the year of \$37,314.46. The expenses were \$24,400.76, leaving a surplus of \$12,913.70.

ST. JOHN, N.B., SHIPPING STATISTICS.

THE St. John, N.B., Board of Trade has issued a pamphlet giving a record of the shipments from the port during the 1908-09 winter season and a

comparative table of exports for the past 12 years. The summary for the 1908-09 season is as follows:—

	VALUES.
Wheat, 6,806,485 bush	} \$8,345,343
Barley, 527,998 bush	
Oats, 341 bush	
Peas, 10,893 bush	
Hay, 12,068 tons	150,338
Flour and meal, 678,754 packages	2,034,346
Cheese, 90,022 packages	957,084
Butter, 2,551 packages	23,985
Eggs, 1,228 packages	8,924
Meat, 80,327 packages	4,278,117
Cattle, 22,923	1,684,160
Sheep, 149	745
Horses, 63	15,400
Lumber, 21,169 stds	641,385
Other lumber, 3,583 tons	352,329
Apples, 78,934 barrels	236,927
Lard, 222,554 packages	1,339,239
Manufactures, 285,274 packages	2,873,046
Miscellaneous, 84,393 packages	1,023,467
Furs estimated	600,000
	\$24,564,840

During the past season the number of sailings was 108, showing a total registered tonnage of 474,620 tons, against 111 sailings and 473,934 tons for the previous season. In 1895-96, there were 22 sailings from the port with a register tonnage of 50,892, and the increase has been gradual each year since. The record season was that of 1906-07 when there were 116 sailings with a register tonnage of 482,895. It is interesting to notice the average tonnage per vessel, which in the first mentioned season was approximately 2,315 tons, in 1906-07 the record season, 4,165 tons, and in the 1908-09 season 4,395 tons. For the season 1897-98 the number of sailings was 58, with a register tonnage of 102,316 tons, and cargo value, \$4,848,768; so that the past season shows an increase of approximately 100% in the number of sailings, 365 % increase in the register tonnage, and 410 % in the cargo value.

**INTERNATIONAL ARRANGEMENTS RE PACIFIC COAST DEEP-SEA FISHERIES—
PURCHASE OF BAIT BY U.S. FISHING VESSELS FORBIDDEN.**

UNDER the Treaty of 1818, which defines the privileges of United States fishing vessels in Canadian waters, such vessels are allowed to enter Canadian territorial waters on the Pacific coast for the following four purposes only, viz.: for wood, water, shelter and repairs.

For some years previous to 1898 the New England Fish Company, a United States concern, did a considerable business in shipping fish to United States markets through the port of Vancouver, the fish being brought to that port in Canadian bottoms and shipped over the Canadian Pacific Railway to eastern markets in the United States, thus having to pay duty on entering that country as Canadian fish. Though representations had been made previously to the Canadian Government to allow such fish to be brought in in American bottoms and shipped in bond, such concession was refused.

In 1897, however, the duty on fresh fish entering the United States was raised from one-half cent to one cent per pound, and it was represented that unless the Company in question were allowed to use American bottoms and thus be in a position to ship the fish in bond to United States markets it would be impossible to continue to carry on the business from Vancouver, and thus the business done in that city, involving very considerable expenditures, would be lost to it, and the fish instead of being carried over a Canadian railway would be transferred to a United States road.

After full consideration of the matter an Order-in-Council was adopted for the season of 1898, which allowed foreigners or foreign corporations to land fish in American bottoms, and ship the same, in bond, to the United States, and such vessels as took advantage of the bonding privilege were also allowed to purchase supplies at any port in British Columbia.

The privileges conveyed by this Order-in-Council have been renewed from year to year since that time. The Order-in-Council at present conveying the privileges expires on the 31st December next.

It appears, however, that in the past United States fishing vessels which were not availing themselves of the bonding privileges, and were consequently not entitled to enter Canadian waters for any other than the four purposes mentioned

above, were allowed to come into British Columbia ports and purchase supplies of bait; but as such practice was neither covered by the Treaty nor the Order-in-Council steps have been taken by the Customs Department, Canada, to confine in the future the privilege of obtaining bait by United States fishing vessels to such vessels as entitle themselves thereto, viz., to those which bond their fish from Canadian ports.

ANNOUNCEMENT OF OGILVIE FLOUR MILLS COMPANY TO EMPLOYEES REGARDING JOINING THE MILITIA.

THE following circular was issued during July by the Vice-President of the Ogilvie Flour Mills Company to its employees regarding the latter joining the Canadian Militia:

“As an incentive for the members of our permanent staff to join the Canadian Militia, the management have decided to grant to those joining any Militia

Corps one week’s extra holiday each year during their Militia service, and in the event of any of them being called out on active duty, their position with the company will be held open for them and without prejudice to their promotion until they are relieved from such active service. This order to become effective at once.”

WAGES AT SYDNEY, N.S.

THE city council of Sydney, N.S., adopted during July, the following schedule of wages to be paid on work done for the city:

Trade or Class of Labour.	Rate of Wages, Per Hour, Not less than:
Bricklayers.....	\$. 45
Masons.....	.40
Stonecutters.....	.45
Carpenters.....	.27½
Plumbers.....	.30

Painters.....	.25
Tinsmiths.....	.27½
Building labourers.....	.22½
Ordinary labourers.....	.17½
Excavators.....	.17½
Blacksmiths.....	.27½
Moulders.....	.27½
Machinists.....	.27½
Pattern makers.....	.27½
Tailors.....	.27½
	Per Day.
One horse and driver.....	2. 50
Double team.....	4. 00

A day shall consist of not more than nine hours.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

THE following table gives a detailed return of immigrant arrivals during the months of April and May, 1909, compared with the corresponding months of 1908:

TOTAL IMMIGRATION TO CANADA DURING APRIL AND MAY, 1909, COMPARED WITH THE CORRESPONDING MONTHS OF 1908, SHOWING OCEAN PORTS AND U.S.A. IMMIGRATION SEPARATELY.

	1909.						1908.						Increase or Decrease.		Percentage of Increase or Decrease.

Homestead Entries During June.

The following statement shows the number of homestead entries made during the month of June, 1909, as compared with June, 1908.

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF JUNE, 1909, AS COMPARED WITH JUNE, 1908.

Agency.	1909	1908	Increase.	Decrease.
Battleford.....	171	436		265
Brandon.....	13	12	1	
Calgary.....	710	145	565	
Dauphin.....	98	56	42	
Edmonton.....	374	472		98
Estevan.....	126	44	82	
Humboldt.....	138	194		56
Kamloops.....	19	52		33
Lethbridge.....	291	294		3
Moose Jaw.....	1,115	852	263	
Saskatoon.....	473	473		
New Westminster..	2	3		
Prince Albert.....	128	173		45
Regina.....	75	103		28
Red Deer.....	194	254		60
Winnipeg.....	157	52	105	
Yorkton.....	121	105	16	
Total.....	4,205	3,247	1,547	589

It will be seen that there has been a net increase for June, 1909, of 958 in the number of entries made.

A statement of the entries made during the first six months of the calendar year, 1909, compared with the corresponding months of 1908, is as follows:—

STATEMENT OF HOMESTEAD ENTRIES JANUARY-JUNE, 1908-1909.

Month.	1909	1908	Increase	Decrease
January.....	1,308	1,453		145
February.....	1,364	1,420		56
March.....	2,592	1,869	723	
April.....	4,602	2,987	1,615	
May.....	3,243	2,773	470	
June.....	4,205	3,247	958	
Total.....	17,314	13,749	3,766	201

It will be observed that there has been a net increase of 3,565 in the number of homestead entries made during the first six months of 1909, as compared with the same months of 1908.

Nationalities of Homesteaders.

The nationalities of the homesteaders during the month of June, 1909, as

reported by the several agencies of the department in Manitoba, Saskatchewan, Alberta and British Columbia were as follows:—

Nationalities.	No. of Entries.
Canadians from Ontario.....	428
" Quebec.....	64
" Nova Scotia.....	20
" New Brunswick.....	19
" Prince Edward Island.....	8
" Manitoba.....	160
" Saskatchewan.....	402
" Alberta.....	125
" British Columbia.....	24
Persons who had previous entry.....	251
Newfoundlanders.....	95
Canadians returned from the United States.....	95
Americans.....	1,306
English.....	508
Scotch.....	140
Irish.....	55
French.....	46
Belgians.....	8
Swiss.....	6
Italians.....	3
Roumanians.....	3
Syrians.....	7
Germans.....	52
Austro-Hungarians.....	198
Hollanders.....	9
Danes (other than Icelanders).....	15
Icelanders.....	10
Swedes.....	68
Norwegians.....	80
Russians other than Mennonites and Doukhobors.....	93
Mennonites.....	1
Doukhobors.....	
Chinese.....	
Japanese.....	
Persians.....	
Australians.....	
New Zealanders.....	1
Total.....	4,205

Representing 10,184 souls.

Of a total of 1,401 entries made in June, 1909, by persons coming from the United States, there were 647 from North Dakota, 256 from Minnesota, 68 from South Dakota, 55 each from Washington and Michigan, 49 from Wisconsin, 33 from Iowa, 29 from Illinois, 26 from Idaho and 22 from Montana.

Lands Patented During June, 1909.

An abstract of Letters Patent covering Dominion lands situate in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory issued from the Department of the Interior during the month of June, 1909, as compared with June, 1908, is as follows:—

LANDS PATENTED DURING JUNE, 1909.

Nature of Grant.	June, 1909.	
	No. of Patents.	No. of Acres.
Alberta Ry. and Irrigation Co.'s sales.....	13	6,897.00
British Columbia homesteads.....	7	854.25
British Columbia sales.....	4	2.31
Coal lands sales.....	2	154.87
Commutation grants.....		
Homesteads.....	1,432	226,423.54
Leases.....		
License of occupation.....		
Manitoba Act grants.....	1	63.45
Military homesteads.....	1	297.50
Mineral rights (271.25 acres).....	3	
North West half-breed grants.....	28	4,881.15
Parish sales.....	4	872.32
Quit (claim, special grants (480 acres).....	3	
<i>Railways:</i>		
Calgary and Edmonton Ry.....		
Canadian Northern Ry.....	4	24.60
Can. Pac. Ry. grants.....		
Can. Pac. Ry. grants, Souris Branch.....	1	640.00
Grand Trunk Pacific Ry.....	1	11.25
Man. South Western Col. Ry	1	6.20
Qu'Appelle Long Lake and Sask. Rd. and S. Co.....		
Sales.....	62	6,200.25
School lands sales.....	29	3,172.57
Special grants.....	39	713.96
Yukon Territory sales.....	1	10.90
Total.....	1,636	251,226.12

In June, 1908, the number of patents issued was 1,911 covering an area of 405,075.22, showing a decrease for the month of June, 1909, of 275 in the number of patents issued and of 153,849.10 acres in the area patented.

Land Sales.

The following is a statement of the farm land sales made by the Canada Northwest Land Company, Limited, during the month of June, 1909, compared with the corresponding month of 1908.

LAND SALES OF CANADA NORTHWEST LAND COMPANY.

	Acres.	Prices obtained.
June, 1909.....	1,519.53	\$16,965.76
June, 1908.....	646.75	7,107.50
Increase, June, 1909.....	872.78	\$9,858.26
From Jan. 1 to June 30, 1909.....	7,157.88	\$81,645.65
From Jan. 1 to June 30, 1908.....	4,067.76	45,195.44
Increase, 1909.....	3,090.12	\$36,450.21

It is estimated that upward of 70,000 settlers will enter the Canadian west this year from the United States. The opening for homestead entry of twelve sec-

tions, near Bow Island and Burdette, and two townships in Bad Water Lake district, Alta., was the occasion of keen competition during July.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JULY, 1909.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the Province of Ontario, the Ontario Railway and Municipal Board and to the Department of Railways and Canals for their kind assistance of furnishing the Department with the statements of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 358 individual work people in Canada during the month of July, 1909, were reported to the Department of Labour. Of these, 100 were fatal and 258 resulted in serious injuries. In addition, 1 fatal accident was reported as having taken place prior to the beginning of the month, information not having been received by the Department before July, 1909.

In the preceding month there were 129 fatal and 292 non-fatal accidents reported, a total of 421, and in July, 1908, there were 92 fatal and 191 non-fatal accidents, a total of 283. The number of fatal accidents reported in July, 1909, is, therefore, 29 less than in the preceding month and 8 more than in July, 1908. The number of non-fatal accidents reported in July, 1909, was 34 less than in the preceding month and 67 more than in July, 1908. Altogether there were 63 less industrial accidents reported in July, 1909, than in the preceding month and 75 more than in the same month of the preceding year.

Of 187 returns received during the month giving the ages of the victims of industrial accidents, 31 referred to persons under twenty-one years of age, 66 to persons between twenty-one and forty-five, and 16 to persons over 45. Seventy-four persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING JULY, 1909,
BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured	Total.
Agriculture.....	22	33	55
Lumbering.....	5	13	18
Mining.....	6	23	29
Building trades.....	6	24	30

Woodworking trades.....	2	10	12
Printing trades.....		3	3
Clothing trades.....		1	1
Textile trades.....		4	4
Food and tobacco preparation.....		9	9
Leather trades.....		1	1
Railway service.....	29	25	54
Navigation.....	5	8	13
General transport.....	3	19	22
Civic employees.....	2	1	3
Miscellaneous.....	5	10	15
Unskilled labour.....	9	10	19
Total.....	100	258	358

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman, were, the deaths of three settlers in a cyclone which swept over Southern Saskatchewan; the killing by lightning of two cottage builders at Penetanguishene, Ont.; the death of a locomotive engineer and his fireman in a railway wreck caused by a rock slide at Bear Creek, B.C.; and the killing of two trackmen in a rock slide at Grand Forks, B.C.

Cyclone in Southern Saskatchewan.

In the opening days of July a violent windstorm swept over Southern Saskatchewan, causing the death of three settlers in the Gainsboro District, and injuring about 50 others. Several buildings were demolished.

Derailment at Bear Creek, near Glacier, B.C.

On July 13, a train of eight empty passenger coaches was wrecked and destroyed at Bear Creek, near Glacier, B.C., by a rock in the track causing a derailment over an embankment. The engineer and fireman of the train were both killed.

Rock Slide near Grand Forks, B.C.

On July 22, while a gang of railway trackmen were clearing the track a few miles east of Grand Forks, B.C., a rock slide occurred, instantly killing two of the workers and injuring another.

Two Workmen killed by Lightning near Penetanguishene.

On July 10, while some workmen were building a cottage on a small island off Penetanguishene, Ont., an electric storm arose. The workmen sought refuge under a verandah. Lightning struck the building killing two of the workmen and injuring another.

Record by Industries and Trades.

Agriculture.—In this industry there were during July, 1909, 22 fatal and 33 non-fatal accidents, compared with 29 killed and 27 injured in June, and 16 killed and 45 injured in July, 1908. Five farmers were killed by falls and by being run over, respectively, 4 by exposure, 2 by electric shock and 1 each by falling material, by tools, by drowning, by machinery, by live stock, and by a runaway. Of the serious accidents, 9 were caused by live stock, 8 each by runaways and by machinery, 5 by falls and 3 by tools.

Lumbering.—Five workmen met death by accident during July, 1909, and 13 were injured. The record for the previous month was 23 killed and 26 injured, and in July, 1908, 7 killed and 5 injured. Three of the fatalities were due to machinery, and 1 each to a fall and to an explosion. Five of the injuries were due to machinery, 3 to ex-

plosions, 2 each to falling material and to falls, and 1 to a tool.

Mining.—Six mine workers were killed and 23 injured during July, compared with 16 killed and 18 injured in June, and 7 killed and 14 injured in July of last year. Two each of the deaths were caused by falls and explosions of dynamite, and 1 each by machinery and asphyxiation by gas. Of the other accidents, 9 were caused by asphyxiation, 4 by falls, and 2 each by explosions of dynamite, by falling material, by cars, by machinery and by explosions of powder.

Building trades.—In this group there were 6 fatal and 24 non-fatal accidents in July, 1909, compared with 4 fatal and 39 non-fatal accidents in the previous month, and 3 fatal and 34 non-fatal accidents in July, 1908. Three each of the fatalities were due to electric shock and to falls. Of the minor accidents, 20 were due to falls, 2 to falling material and 1 each to a runaway and to machinery.

Metal, engineering and shipbuilding trades.—During July, 1909, there were 6 fatalities and 64 accidents among these workers, compared with 6 killed and 39 injured in the previous month and 9 killed and 15 injured in July of last year. Electric shock caused 4 of the deaths and flying material and falling material 1 each. Machinery caused 23 of the accidents, falling material 14, explosions 8, molten metal 7, flying material 5, elevators and electric shock 2 each, and falls 3.

Woodworking trades.—In July, 1909, 2 woodworkers were killed and 10 injured accidentally, compared with 1 killed and 28 injured in the month before and 1 killed and 8 injured in July a year ago. One of the deaths was due to an explosion of steam and the other to a fall. Of the injuries, 7 were due to machinery and 1 each to a fall, to falling material, and to flying material.

Printing and allied trades.—Machinery injured 2 workers in this group during July, 1909, and falling material 1. In the previous month there was 1 accident, and there was also 1 in July, 1908.

Clothing trades.—In July, 1 worker

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE SERIES, F. No. 69.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF JULY, 1909.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Lethbridge, Alta.....	July 1	1	In a runaway.
"	Napanee, Ont.....	" 2	1	Beam fell on head.
"	Carievale, Sask.....	" 3	1	In a cyclone.
"	Gravelburg, Sask.....	" 3	1	In a cyclone.
"	Palestine, Ont.....	" 10	1	Struck by lightning.
"	Clarkson, Ont.....	" 12	1	Run over by train.
"	Dunn Tp., Ont.....	" 15	1	Impaled on hay fork.
"	Wicklow, Ont.....	" 17	1	By fall from load.
"	Winnipeg, Man.....	" 8	1	Head crushed by door of box car.
"	St. Aubert, Que.....	" 27	1	Struck by lightning.
"	Falkland, Ont.....	" 23	1	Found drowned in river on his farm.
"	Rosthern, Sask.....	" 24	1	Fell 18 feet in barn.
"	Shelburne, Ont.....	" 29	1	Struck by fork of hay loader.
Farmer's son.....	Inverary, Ont.....	" 5	1	Run over by load.
"	St. Antonio, Sask.....	" 3	1	In a cyclone.
"	Port Colborne, Ont.....	" 19	1	Fell down hay chute in barn.
Farmer's wife.....	Carievale, Sask.....	" 3	1	In a cyclone.
"	Barrie, Ont.....	" 26	1	Struck by train at crossing.

Labourer	Fort William, Ont	"	1	1	Crushed to death in elevator.
"	Windsor, Ont	"	4	1	Drowned, fell out of boat.
"	Montreal, Que	"	11	1	Brick fell on head.
"	Toronto, Ont	"	14	1	Run over by train.
"	Vancouver, B.C.	"	12	1	Electrocuted.
"	Kingston, Ont	"	14	1	Run over by train.
"	Longue Pointe, Que	"	12	1	Run over by train.
"	New Westminster, B.C.	"	1	1	Drowned, fell from bridge while wheeling cement.
"	Fort William, Ont	"	21	1	Run over by train.

FATAL ACCIDENTS HAPPENING IN PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN JULY.

Logger	Rock Bay, B.C.	June	28	1	Log rolled on him.
--------	----------------	------	----	---	--------------------

was injured by machinery. There were no accidents in June, and only 1 in July, 1908.

Textile trades.—Machinery seriously injured 4 textile workers in July, 1909. In the previous month 2 were injured, and in July, 1908, 2.

Leather trades.—There was 1 serious injury caused by an elevator in July, 1909. There were no injuries either in June last or in July a year ago.

Food and tobacco preparation.—Nine workmen were injured during July, 3 each by elevators and by falls, and 1 each by machinery, by electric shock, and by an explosion of powder. In June, the record was 1 killed and 9 injured, and in July, 1908, 3 injured.

Railway service.—Twenty-nine railway employees were accidentally killed, and 25 seriously injured during July, 1909, compared with 23 killed and 26 injured in June last and 20 killed and 22 injured in July, 1908. Fifteen of the fatalities were due to the victims being run over, 4 each to derailments and to falls, 3 to falling material, 2 to collisions and 1 to being struck by an engine. Five of the injuries were due to falls, 4 to falling material, 6 to being run over, 3 to derailments, 2 each to machinery and to being caught between cars, and 1 each to an explosion of dynamite, to a collision and to a boiler explosion.

Navigation.—There were 5 killed and 8 injured during July, compared with 5 killed and 32 injured in the preceding month, and 9 killed and 13 injured in July, 1908. Drowning caused 4 of the deaths, and a fall the other. Falls

caused 4 of the injuries, explosions of gasoline 3, and flying material 1.

General transport.—During July, there were 3 killed and 19 injured, as against 7 killed and 19 injured in June last, and 9 killed and 13 injured in July a year ago. Two of the deaths were due to falls, and 1 to a collision. Eleven of the injuries were due to falls, 3 to being run over, 2 each to machinery and to collisions, and 1 to a runaway.

Civic employees.—Blood poisoning caused by the victim stepping on a rusty nail and a fall were each the cause of one death among civic employees. Another was injured by a fall. In June the record was 2 killed and 8 injured, and in July of last year 6 injured.

Miscellaneous.—In this group the record for July, 1909, was 5 killed and 10 injured, compared with 6 killed and 14 injured in the previous month, and 1 killed and 9 injured in July, 1908. Two each of the fatalities were due to machinery and to electricity, and 1 to being run over. Four of the injuries were due to machinery, 3 to derailments and 1 each to an elevator, to flying material and to an explosion.

Unskilled labour.—Nine labourers were killed and 10 injured in July, 1909, compared with 4 killed and 4 injured in the preceding month, and 10 killed and 9 injured in July, 1908. Four labourers were killed by being run over, 2 by drowning, and 1 each by an elevator, by falling material and by electricity. Of the injuries 4 were caused by falls, 2 each by tools and by falling material, and 1 each by machinery and by an explosion.

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF JULY.

The following is a list of contracts awarded by the Department of Public Works, the Department of Railways and Canals, and the Department of Marine and Fisheries which have received the signatures of both parties, together with the fair wages' schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

VENTILATION SYSTEM, VICTORIA MEMORIAL MUSEUM, OTTAWA.

Ventilation system for Victoria Memorial Museum, Ottawa, Ont; name of contractor, George Goodwin, Ottawa,

date of contract, July 12, 1909; amount of contract, \$27,460.00.

WHARF EXTENSION. PINK ROCK, N. B.

Wharf extension and breakwater at Pink Rock., N. B., name of contractor, Thos. P. Charleson, Ottawa, Ont.; date of contract, July 22, 1909; amount of contract, \$10,440.00.

Labourers.....	1.50

**INTERLOCKING SWITCH AND SIGNAL PLANT
AT BUCTOUCHE JUNCTION.**

Installation of Mechanical Interlocking Switch and Signal Plant with Electric Lock on Machine, at Buctouche Junction, on the Intercolonial railway. Date of contract, July 22nd., 1909. Amount of contract \$5,800.00. Contractors Montreal Steel Works, Limited of Montreal Que.

Trade or Class of Labour.	Rate of Wages,
---------------------------	----------------

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefore is filed in the office of the Minister of Labour and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

**EXTENSION TO WHARF—CHARLOTTETOWN
P. E. I.**

Erection of extension to wharf at Charlottetown, on the line of the Prince Edward Island Railway. Date of con-

tract, July 23rd., 1909. Amount of contract \$2,714.55. Contractors, Thomas Campbell, of Charlottetown, P. E. I.

Supplying stamping material and wooden boxes, and repairing stamping pads.....	1,047.19
Supplying mail bags.....	1,352.26
Repairing mail bags.....	1,582.57
Repairing Post Office scales.....	45.00
Making and repairing mail locks and supply; ing mail bag fittings.....	176.79
Supplying street letter boxes and parcel receptacles, and repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes, parcel receptacles and street letter boxes.....	6,374.46
Making and repairing miscellaneous articles of postal stores.....	62.60
Making and supplying articles of official uniform.....	13,103.25

**STRIKE OF EMPLOYEES OF THE DOMINION COAL COMPANY AT GLACE BAY,
N.S.**

ON July 6, a strike was declared by the United Mine Workers of America at Glace Bay, N.S., against the

Dominion Coal Company, on account of the refusal of the Company to recognize the Union. The matters in dispute had

already been dealt with by a Board of Conciliation under the Industrial Disputes Investigation Act. The report of the Board, which was presented on April 16, was, however, not accepted by the employees concerned.¹

On June 5, a mass meeting of the coal miners at Glace Bay was addressed by Mr. T. L. Lewis, International President of the United Mine Workers of America, who had come to Nova Scotia for the purpose of making a personal investigation of existing conditions.

A district convention of the United Mine Workers was held at Glace Bay, on July 2, to consider the situation, after which the following letter was addressed to Mr. G. H. Duggan, General Manager of the Company:

Dear Sir:—

So far we have been unable to arrange a meeting between your company and our executive. We are now addressing this last request to you that you meet us on Monday the 5th instant to discuss the matters of difference between your company and ourselves and try if possible to reach some permanent understanding.

We are anxious that you should comply with our request in order that trouble may be averted, and we shall be glad to meet your convenience in regard to place and hour of meeting.

We shall be obliged, however, to act on the instructions given at our convention yesterday, and unless you agree to meet us before 2 o'clock, Monday afternoon, the inevitable result will follow that our members will cease work on the 6th day of July, A.D., 1909.

Trusting this latter course may be avoided, we remain,

Yours truly,

District No. 26, U.M.W. of A.

(Sgd.) per DAN McDougall,

District-President.

On July 5, the following proclamation was issued by the General Manager of the Company:

“Notice to employees:—Whereas Mr. Daniel McDougall, district president of

the U.M.W., has made a public statement through the press that if the coal company's representatives do not meet the executive of the U.M.W. of A. on Monday, and accede to certain demands a strike will be called on Tuesday morning the 6th instant.

“These demands are stated to be the question of higher wages, shorter hours, and better conditions generally, and recognition.

“The Dominion Coal Co. is determined that it will not recognize the U.M.W. of America, and

“Whereas this company has an agreement with its workmen through the Provincial Workmen's Association to continue the rates and conditions now in existence until the 31st December, 1909.

“Therefore, this company will not accede to any demands of the U.M.W., and it is the intention of the company to mine and ship coal with the aid of those who are loyal to their undertaking. In order that this may be done, this company will extend all the protection in their power to the persons and families of the men who continue to work, and, in addition, has called upon the civil authorities to afford full protection.

“The company gives notice to all its employees that under the Industrial Disputes Investigation Act, 1907, it is illegal for men to go on strike without 30 days' notice of demand for a change in wages and hours; every man going on strike in contravention of this act is subject to a fine of from \$10 to \$50 for each day he is on strike. The company will proceed at once to fill the places of men refusing to work or absenting themselves without proper cause; and loyal men remaining at work will have first consideration in the allotment of places. When the strike is declared off a man at work will not lose his place to a man who has been on strike. Men who intend to strike must bring their tools out of the pit the night before a strike, or the value of such tools will be deducted from any wages that may be due them. Men on strike will be treated as no longer in the employ of the company as regards houses, coal or any other privileges they

¹ See *Labour Gazette* for May, page 1225.

may now enjoy. The company also gives notice to its employees that any man who does not report for work on Tuesday morning, the 6th July, is liable to be regarded as a striker, and treated as such.

(Sgd.) G. H. DUGGAN,

Second Vice-President & General Manager.

Progress of the strike.

On the second day of the strike, a disturbance took place at Dominion, No. 2 mine. The Riot Act was read and a number of arrests were made. The manager then applied to the Mayor of Glace Bay to call out the Militia, but the latter refused to do so, and offered instead to provide 500 special constables. Upon the Mayor's refusal a requisition for troops was signed by Mr. Justice Finlayson of Sydney, and forwarded to Halifax. Early on July 8, a force of 510 men and 24 officers proceeded to the scene of the trouble, and remained at Glace Bay during the rest of the month.

It is difficult to estimate the magnitude of the strike, as conditions changed from day to-day. The mines were in partial operation throughout the strike, some of the employees remaining at work, while a few of those who had gone out returned. Others who had been working joined the strikers, and the Company brought a number of men from outside

points from time to time to take the places of the strikers. Many of the strikers also procured employment elsewhere. It was stated by the Company on July 14, that their pay-roll showed 6,500 workmen, and that they had working in the mine 1,339 men; on the surface as special police, 600 men; on the bank, piers, railway and in the shops, 1,500 men, leaving about 2,561 men on strike.

In a communication from the manager of the Company dated July 22, he said: "There are about 2,400 men idle, but a very large number of these have no interest in the dispute and are not on strike, but merely not working because they do not wish to risk any trouble:

"I may say that we have to-day about four thousand men who have remained at work and are not affected by the strike. This includes the men employed in and about our mines, on the railway, piers, banking station and other subsidiary operations in Cap Breton."

In the press it was reported that the output at the end of the month was in the neighborhood of 10,000 tons daily of which a considerable portion was being drawn from the banks.

As the Company had a large quantity of coal on the banks and as its principal customers were reported to have an abundant supply in stock, the direct effects of the dispute had not begun to be of a serious nature beyond Glace Bay.

TRADE DISPUTES DURING THE MONTH OF JULY.

THE month of July was marked by the commencement of two large strikes of coal miners in Nova Scotia, and the continuance of a strike of coal miners in Alberta. In Edmonton, Alta., the building trades were seriously affected by a general strike of carpenters. The other disputes of the month were of much less consequence.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The number of trade disputes reported to have been in existence in Canada during July was 15, an increase of 1 compared with the

previous month, and an increase of 5 compared with July, 1908. About 73 firms and 4,398 employees were directly affected by these disputes, of which number 31 firms and 3,119 employees were affected by new disputes.

Loss of time in working days.—The loss of time to employees through trade disputes during July was approximately 118,740 working days, compared with a loss of 86,806 days in June, and 21,000 in July, 1908.

Trades affected by new disputes.—The following table shows the trades affected by the new disputes and the number of workers in each group of trades.

Trades.	No. of disputes.	No. of workers.
Mining.....	2	3,026
Building.....	1	30
Metal trades.....	1	160
Clothing trades.....	1	60
Food and tobacco preparation	1	40
General transport.....	1	40
Unskilled labour.....	2	63
Total.....	9	3,419

Localities Affected by new disputes. The new disputes of the month occurred in the following provinces of the Dominion:—

Province.	No. of disputes.
Nova Scotia.....	2
Quebec.....	4
Ontario.....	2
Alberta.....	1
Total.....	9

Causes of disputes.—The following were the causes of the new disputes of the month:—

Cause.	No. of disputes.
For increase in wages.....	5
For shorter hours.....	1
Against new method of payment.....	1
For recognition of Union.....	2
Total.....	9

Methods of settlement.—Of the 15 disputes in existence in July, 10 were terminated during the month, leaving 5 still unsettled, four were settled by negotiations between the parties concerned, and the remaining six were terminated without any negotiations, in three cases work was resumed, in one the places of the strikers were filled, and in two the strikers sought work elsewhere.

Results of disputes.—The employers were successful in 5 of the disputes which were terminated during the month, compromises were reached in 3, in one the employees were partially successful, and in one the result was indefinite.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes of July which were in existence before the beginning of the

month comprised strikes of coal miners at Taber, Alta., fishermen at Vancouver, B.C., carpenters at Edmonton, Alta., iron moulders at Hamilton, Ont., garment workers at Stratford, Ont., and harness makers at Victoria, B.C.

Strike of Coal Miners at Taber, Alta.

On April 23, about 300 coal miners employed by the Canada West Coal Company declared a strike owing to the failure of the two parties to reach a new agreement to replace one which expired on March 31. Upon an application from the Company, a Board of Conciliation was constituted on July 3, under the Industrial Disputes Investigation Act, to deal with the matters in dispute.¹ On July 13, the Board presented its report, and on July 31, a new agreement was signed by the parties and work was resumed on August 2.

Strike of Carpenters at Edmonton, Alta.

A strike of carpenters which took place on June 8, at Edmonton, Alta., continued throughout July. The cause of the dispute was the refusal of the employers to grant an advance in minimum wages from \$3.36 to \$3.75 per day of eight hours. According to the employers 400 men were involved in this dispute. According to the employees, 33 firms and 250 men were directly affected by the dispute and 68 firms and 400 men were indirectly affected.

Strike of Garment Makers at Stratford, Ont.

On June 28, a strike of garment makers took place at Stratford, Ont., on account of the refusal of the employer to sign an agreement presented to him by his foreman. According to the employer about 7 males and 23 females employees were affected by this strike. No settlement of the dispute was reported during the month but the employer stated on July 15 that he had begun work again with two hands and was adding to them as quickly as possible.

¹ See article on "The Industrial Disputes' Investigation Act, 1907, Proceedings under the Act," on another page of this issue.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE SERIES C., No. 106.

TABLE OF TRADE DISPUTES DURING THE MONTH OF JULY.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.			Date of commencement.	Date of termination.	Result.
			Directly.	Indirectly.	Directly.	Indirectly.	Indirectly.			
			Di-rectly.	Indi-rectly.	Fe-males.	Males.	Fe-males.			
<i>Mining</i> — Coal miners.....	Taber, Alta.....	Failure to reach new agreement as to wages and conditions of labour.....	1		300			April 23	July 31	A new agreement was signed. Work resumed August 2.
Fishermen.....	Vancouver, B.C.....	Against employment of non-unionists.....	1		72			June 21	July	Strike was declared off.
<i>Building Trades</i> — Carpenters.....	Edmonton, Alta.....	For increase in wages.....	33	68	400			" 8		No settlement reported at end of month.
<i>Metal Trades</i> — Iron moulders.....	Hamilton, Ont.....	Against a reduction of 20 per cent. in wages.....	4	8	170			Feb. 22		No settlement reported at end of month.
<i>Clothing Trades</i> — Garment workers.....	Stratford, Ont.....	Refusal of employer to sign an agreement.....	1		7	23		June 28		No settlement reported, but places of many strikers were filled.
<i>Leather Trades</i> — Harness makers.....	Victoria, B.C.....	For increase in wages and shorter hours.....	2		7			May 3		No settlement reported, but strikers sought other employment, demands of four men had been granted.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.

DISPUTES WHICH BEGAN DURING THE MONTH.

<i>Mining</i> Coal miners.....	Glace Bay, N.S.	For recognition of the United Mine Workers of America.....	1	2,500	July	6	No settlement reported at end of month, but company had filled the places of many strikers.
"	Inverness, N.S.	For recognition of the United Mine Workers of America.....	1	526	"	9	No settlement reported at end of month, but many strikers returned to work and conditions ceased to be affected.
<i>Building Trades</i> Plumbers.....	Calgary, Alta.....	For increase in wages from 54 to 56½ cents per hour.....	20	30	"	1 July	16 Work resumed at 55 cents an hour.
<i>Metal Trades</i> Boilermakers, black smiths and steam-fitters.....	Longue Pointe, Que.	Against new system of payment of wages.....	1	160	"	1 July	27 Work resumed under new system, but increase in wages granted.
<i>Clothing Trades</i> Cloakmakers.....	Montreal, Que.....	For increase in wages.....	1	60	"	22	No settlement reported at end of month.
<i>Food and tobacco preparation</i> Jewish bakers.....	Montreal, Que.....	For shorter hours.....	4	40	"	23	No settlement reported at end of month.
<i>General Transport</i> Longshoremen.....	Hamilton, Ont.	For increase in wages from 25 to 37½ cents an hour.....	1	40	"	6	No settlement reported, but strikers sought work elsewhere.
<i>Unskilled Labour</i> Labourers.....	Woodstock, Ont.....	For increase in wages from \$1.35 to \$1.75 per day.....	1	28	"	7 July	10 Strikers accepted old rate.
"	Quebec, Que.....	For increase in wages from \$1.50 to \$1.75 per day.....	1	35	"	6	7 Increase granted to some of the strikers.

* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon, the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

Strike of Harnessmakers at Victoria, B.C.

A strike of harness makers at Victoria, B.C., which began on May 3 continued throughout the month. The cause of the dispute was the refusal of the employer to grant a demand for an increase in wages. Of the 11 men who were originally involved, 4 returned to work under the new schedule of wages which they had demanded and the remaining 7 found other employment. Two shops were affected by this dispute during July.

Strike of Copper Miners at Greenwood, B.C.

On June 26, a strike of copper miners employed by the British Columbia Copper Company was declared at Greenwood, B.C., after a failure to arrive at a settlement through a Board of Conciliation under the Industrial Disputes Investigation Act.² According to a report received from Greenwood Miners' Union, Western Federation of Miners, the dispute arose from a demand on the part of the men for recognition of their union, and on account of alleged discrimination against its members by the Company. It was stated in this report that about 410 employees were affected, and that the dispute continued until July 24, when after negotiations a settlement was reached in favour of the Union. Another subject of dispute was with regard to medical attendance, the Union asking for the free choice of a doctor, as guaranteed by the laws of British Columbia. In their final reply to this demand, the Company insisted only on the one point that the work should be handled by one physician, who should have one or more assistants.

In a communication received from the company, it was stated that the local union declared the strike off as soon as the first shipment of coke arrived in Greenwood from the Crow's Nest Pass coal fields. The strike had been called when there were no men at work, the properties of the company being closed

down on account of a strike of coal miners in the Crow's Nest Pass.

Strike of Coal Miners at Glace Bay, N.S.

On July 6, a strike of coal miners was declared at Grace Bay, N.S., on account of the refusal of the Dominion Coal Company to recognize the United Mine Workers of America. It is claimed by the Company that it had an agreement with its workmen through the Provincial Workmen's Association, which would continue in force until March 31, 1909. About 2,500 men were involved in this dispute, which continued throughout the month. The mines of the Company were continued in operation with a diminished force of men, and at the close of the month the output was reported in the press to be about 10,000 tons per day; of which a portion was taken from the banks.

Strike of Coal Miners at Inverness, N.S.

On July 9, a strike of about 418 employees of the Inverness Railway and Coal Company took place at Inverness, N.S., and continued throughout the month. It was stated by the Company that in March, 1906, they had entered into an agreement with the Provincial Workmen's Association, which is still in force, and by which the Company agreed not to engage any man to work underground unless he was a member of the association. In consideration of this the Association agreed that steps would be taken by them to ensure the coal being properly cleaned, and that offenders would be dealt with by them as well as by the Company. On April 28, 1909, a local branch of the United Mine Workers of America was organized at Inverness, and 526 out of 618 men, employed in and about the coal mines, joined the union. The Company continued to collect dues from these men for the benefit of the Provincial Workmen's Association holding that all underground employees were members of the P.W.A., as otherwise, under the existing agreement, they

² See *Labour Gazette* for June, page 1327, and for July, page 52.

¹ An account of this dispute is given in a special article which appears on another page of this issue.

could not be employed. The strike was declared on account of an objection on the part of the members of the United Mine Workers to the collection of these dues. No settlement of the dispute was reported during the month, but a large number of the strikers had returned to work and normal conditions had been practically resumed.

Strike of Boilermakers, Blacksmiths, and Machinists at Longue Pointe, Que.

On July 1, boilermakers employed by the Montreal Locomotive Works at Longue Pointe, Que., went on strike on account of the objection to the standard time or bonus system which had been introduced by the company. Under this plan each job assigned to an employee is supposed to occupy a certain length of time. If it is completed in this time, the workman receives a bonus of two hours, but, on the other hand, if he takes 10 hours to do work supposed to occupy him 8 hours, he only gets 8 hours pay. On July 12, the blacksmiths also stopped work. According to the men, about 160 employees were involved in this dispute but, according to the company, about 300 employees were affected. On July 27, work was resumed under the new system, but an increased rate of wages was conceded by the company.

Strike of Sheet Metal Workers at Winnipeg.

On July 28, a strike of about 150 sheet metal workers was reported to have been declared in Winnipeg, Man. The cause of the dispute was a demand for an increase of wages from 39 to 42½ cents per hour. No settlement of this strike was reported during the month.

Strike of Plumbers at Calgary, Alta.

On July 1, a strike of plumbers took place at Calgary, Alta., in which 20 firms and 30 men were involved. The cause of the dispute was a demand for an increase in wages from 54 to 56½ cents per hour. The employers offered a compromise of 55 cents per hour, which was

finally accepted, and work was resumed on July 16. The strike affected all the plumbers' shops in Calgary.

Strike of Jewish Bakers at Montreal.

On July 23, a strike of Jewish bakers took place at Montreal, in which about 45 employees and 7 establishments were involved. The cause of the dispute according to the men was a demand for a ten-hour day and six days a week. It was stated by one of the employers that the men had been offered and had refused wages on a parity with Christian bakers, and they wished to exact terms beyond the earning power of the business.

Strike of Longshoremen at Hamilton, Ont.

On July 6, about 40 longshoremen employed by the Mutual Steamship Company declared a strike on account of the refusal of the employers to grant a demand for an increase in wages from 25 to 37½ cents per hour. No settlement of this dispute was reported but it was stated that the strikers sought work on other docks at the 25 cent rate. The strikers were not members of any union but were among those who took the place of union men last October when the latter went on strike for an advance from 25 to 30 cents an hour.

Strike of Labourers at Quebec, Que.

On July 6, about 35 labourers engaged on the repairing of a street declared a strike at Quebec on account of the refusal of the employer to grant a demand for an increase in wages from \$1.50 to \$1.75 per day. Only five of the strikers were over twenty-one years of age. On July 7, work was resumed, the increase in wages having been granted to the men, the wages of the boys remaining the same as before the strike.

Strike of Labourers at Woodstock, Ont.

On July 7 about 28 labourers working on the line of the Canadian Pacific Rail-

way near Woodstock, Ont., declared a strike. It was reported that these men with 20 others had signed a contract with the company in Montreal early in June to do railway construction work for \$1.35 per day. After working for five weeks they demanded \$1.75 claiming that this price was paid by the company in other localities. The men were offered for immediate settlement \$1.40 per day which they refused. After further consideration the men decided to accept this offer, but were told that it had been withdrawn. The men finally accepted the rate of \$1.35 per day which they had been receiving before the strike, less \$4.50 deducted for fare from Montreal. The contracts provided for

free transportation if they were adhered to for four months.

Strike of Cloakmakers at Montreal, Que.

On July 22, about 60 cloakmakers were reported to have declared a strike at Montreal, Que., on account of the refusal of the employer to grant a demand for an increase of 15 per cent., in piece-work. No settlement of this dispute was reported during the month.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of July, and which have been reported to the department.

THE YEAR BOOK, 1909, OF THE BUILDERS' EXCHANGE OF MONTREAL.

THE annual year book of the Builders' Exchange of Montreal, Que., for the year 1909, was issued during the opening week of July, and a copy was received at the department through the courtesy of the secretary of the Exchange. The book contains the constitution, by-laws and business classification of the members of the Builders' Exchange of Montreal, together with a large amount of legal and practical information for all engaged in the building

industry. Among the subjects treated in separate articles are the following:—Architect's privileges, room rules, a synopsis of the commercial law of the province of Quebec legal information for contractors, rules for painters measurements, and a code of practice for sub-estimating and sub-contracting. The book also contains an advisory programme to be followed in dealing with labour disputes. A useful index is appended.

STRIKES, LOCKOUTS AND CONCILIATION BOARDS IN GREAT BRITAIN.*

IN the report of the British Board of Trade on strikes and lockouts in the United Kingdom during 1908, it is stated that although the number of disputes was below the average of the nine previous years the amount of working time lost in 1908 was greater than any year since 1898. The great loss of time was due to a dispute in the engineering, shipbuilding and cotton industries, which accounted for 166,000 work people and the loss of 8,250,000 working days. There were in all 399 disputes which began in 1908 compared with 601 in 1907. The number of work people involved at the beginning of 1908 was 223,969 compared with 100,728 the previous year. The

loss of time in working days in 1908 was 10,632,638 days compared with 1,878,679 in the previous year. Out of the total number of workpeople directly involved in disputes during 1908, 8.5 per cent. were successful, 25.2 per cent. were involved in disputes settled in favour of the employers, and 65.6 per cent. of the work people accepted compromises. Out of the 399 disputes of 1908, 247 were settled by negotiations between the parties concerned, 24 by arbitration, 33 by conciliation, 40 by returning to work on the

* Report of strikes and lockouts and on conciliation and arbitration boards in the United Kingdom in 1908. London: Wyman & Sons, Ltd., 1909. Page, 175. Price 8½d.

employers terms and 43 by the replacement of the employees. The number of disputes settled by arbitration was higher than for any of the six previous years, and the number of employees involved in these disputes was the highest of the ten years with the exception of 1903.

An account is given in the report of the work of the Conciliation and Arbitration Boards during the year. It is stated that in many of the important industries of the United Kingdom Boards of Conciliation and Arbitration, called Trade Boards, have been formed with a view to adjusting disputes in particular industries. The most important type of these are called Trade Boards, but there are also a number of district boards constituted for settling disputes in particular localities. In the building trades the principal agency of conciliation is afforded by the scheme of conciliation which came into operation in October, 1905. Under this scheme 56 local boards and committees, and 4 center boards were formed. In the coal mining industry there are three distinct classes of agencies for conciliation and arbitration:—

1. Boards which deal only with the general level of wages over a large area;
2. Boards which not only settle general

changes of wages but also deal with disputes of a general or local character;

3. Boards and joint committees which deal only with disputes not involving a general rise or fall in wages.

In the textile trades the principal agencies for conciliation are in the cotton industry. In the Brookland's Agreement, signed in 1893, it is provided that disputed questions shall be settled by the secretaries of the local employers' and operatives organizations or by a joint committee of these organizations appointed *ad hoc*; failing a settlement, the question is referred to a joint committee of the employers' federation and operatives' amalgamations. No stoppage of work is permissible until the above procedure has been carried out. In 1908, 338 cases were settled locally under this agreement, and 21 by the joint committee in Manchester. In the weaving branch a joint committee has been established in North Lancashire to consider all trade disputes in their preliminary stages. In 1908, six cases were brought before this committee. The only other boards in these trades have been formed for the Nottingham lace trade and for dyers at Bradford and Leicester.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureau were received at the Department of Labour, Ottawa, during June and July, 1909.

DOMINION REPORTS.

The Mines Branch.

Summary Report of the Mines Branch for the nine months ending December 31, 1908. Ottawa: King's Printer, 1909. Page, 96. Price, 10 cents.

In the summary report of the Mines Branch for the nine months ending December 31, 1908, the mineral production in Canada during 1908, is estimated to have amounted in value to \$87,323,849, compared with \$86,842,765 in 1907. There would have been an increase of over \$8,000,000, had there not been a large decrease in the prices received for the metals. The principal features were

an increase in the gold output for the first time in nine years, the increase amounting to \$450,000 in the Yukon, and \$726,494 in other parts of the Dominion. There was also a large increase in the production of silver, the output in 1908 having been 22,070,212 ounces, compared with 12,779,799 ounces in 1907.

The report contains an account of the investigation of a new electric high-furnace in Sweden, producer gas plants in Germany, and an experimental peat fuel plant. Tests of New Brunswick oil shale were made in Scotland for the Mines Branch, with a view of ascertaining its economic value. The preliminary report of these tests was very satisfactory, but it is pointed out that great care is needed in this industry, on account of the competition of the United States.

Insurance Statistics.

Abstract of Statements of Insurance Companies in Canada for the year ended December 31, 1908. (Subject to correction). Ottawa: King's Printer, 1909. Page, 80.

The statistics of fire insurance in Canada during 1908, show that the cash received for premiums by Canadian companies amounted to \$3,829,427, compared with \$3,681,335 in 1907. The premiums received by British companies were \$9,919,403 in 1908, and \$9,302,906 in 1907, and the premiums of American companies amounted to \$3,288,499 in 1908 and \$3,130,234 in 1907. The net amount at risk was \$1,700,683,514 in 1908, compared with \$1,614,703,536 in 1907.

The premiums for life insurance in 1908, amounted to \$16,081,504 received by Canadian companies, an increase of \$1,117,790; \$1,546,275 received by British companies, a decrease of \$21,676, and \$7,066,866 received by American companies, an increase of \$454,659 compared with the previous year. Two Canadian companies and one American company issued industrial insurance policies, in addition to the ordinary kind. A total of 81,021 policies of this nature were issued by the Canadian companies, and 90,852 by the American company. The total life insurance in force in Canada during 1906 amounted to \$719,513,913, an increase of \$33,990,428 over 1907.

Iron Ore Deposits of Nova Scotia.

Department of Mines, Mine's Branch. Report on the Iron Ore Deposits of Nova Scotia. (Part I). By J. E. Woodman, A.M., Sc. D., F.G.S.A., M.A.I.M.E., Ottawa: Government Printing Bureau, 1909. Page, 253.

An important report on the iron ore deposits of Nova Scotia by Professor J. E. Woodman of Dalhousie University, has recently been issued by the Department of Mines, in which the subject is treated in its bearing upon the development of the iron industry. The report is based on a survey undertaken during 1906, and is fully illustrated with maps and plates. It is stated that the iron ores are widely distributed over the province, except in the southern part. A few important ore bodies are known, but there are many that can never be

more than of academic interest. The largest known deposits are within easy reach of transportation, and are not too remote from fuel and limestone to make smelting possible under favourable conditions. The isolated situation of the province makes possible the production of iron and steel in the absence of competition.

The cost of labour in 1906 in the iron mines of Nova Scotia is given as follows:

Quarryman or underground miner per day	\$1.40-\$1.50
Drillman, per day	1.75
Ordinary fireman, per day	2.00
Foreman, per month	65.00
Expert engine man and mechanic, per month	75.00

The Peat Industry.

Department of Mines, Mines Branch, Bulletin No. 1. Investigation of the Peat Bogs and Peat Industry of Canada during the season 1908-9, by Erik Nystrohm and S. A. Anrep, M. E. Ottawa: Government Printing Bureau. Page, 25.

In a report upon the Peat Industry in Canada, issued by the Department of Mines, it is stated that during 1908, only one small peat plant was in operation, and only a few hundred tons of peat fuel were produced for the local consumers. This plant was situated near Welland, Ont. At Beaverton, Ont., there is a plant which in recent seasons has been producing peat mull which is used as a filler in the manufacture of fertilizers. No fuel, however, has lately been produced there. Other plants are situated at Victoria road, Guelph, Farnham and Lac du Bonnet. An analysis is given in the report of peat bogs situated at Mer Bleu, Alfred, Welland, Newington, Perth and Victoria Road.

ONTARIO REPORTS.

The Silver Areas of Gowganda and South Lorrain, Eighteenth Annual Report of the Bureau of Mines, 1908 Vol' XVIII, Part 2, Toronto: King's Printer, 1909 Page 31.

A report has been issued by the Ontario Bureau of Mines dealing with the new mineral districts of Gowganda and Miller Lakes and South Lorrain. The report contains numerous maps and illustrations. An account is given of the means of access to these regions, the geological formation and an account of the development work which has been

carried on. In reference to Gowganda it is stated "Considering the number of claims on which high grade silver ore is to be seen, one must admit that this new area has its possibilities. Up to the present time, however, there has not been sufficient development work for one to make any definite statements as to the future. The deepest shafts are not down over fifty feet, and no drifting on the veins has been done. Any statements must be confined to the appearance of the shafts.

At several of the properties, high grade ore is seen in the shafts or pits. The veins are usually narrow, but widen in places to several inches, and in several instances were seen to pinch out in a few feet in depth or in horizontal extension. There is also a tendency for the high grade ore to be segregated in bunches over a few feet. This will necessitate considerable dead work in following tight cracks and lean portions of veins to other rich bunches or shoots.

Costs per ton of ore will be much higher than in the Cobalt camp, and it will take some months' work to prove what profit can be made in working the veins so far discovered.

UNITED STATES REPORTS.

Industrial Accidents in Wisconsin.

Fourteenth Biennial Report of the Bureau of Labour and Industrial Statistics (Second Report), Madison, Wis. State Printer, 1909. Page, 72.

According to the returns made by physicians to the Bureau of Vital Statistics, Wisconsin, the number of industrial accidents to employees in the year ending October, 1908, was 5,003 compared with 7,186 in the previous year. The cause of this decrease is attributable to the trade depression causing a decrease in the number of employees and less overtime and pressure of work. It is also stated that a large number of accidents are not reported.

A summary is given of two British Reports on industrial diseases, and the plans of two new Mutual Benefit schemes instituted by the International Harvesters Company and the J. I. Case Threshing Machine Company are des-

cribed, which insure against sickness, accident and death. A summary is also given of the legislation in the United States and foreign countries relating to the prevention of industrial accidents to workmen, compensation, sickness and accident insurance.

Industrial Conditions of New York.

Report of the New York State Department of Labour, Vols. I and II. Albany: State Department of Labour, 1908. Pages, 1157, 1030.

The report of the New York State Department of Labour for 1907, contains in Volume I Reports of the Commissioner of Labour, the Bureau of Factory Inspection and the Bureau of Mediation and Arbitration, and in Volume II, the report of the Bureau of Labour Statistics. The report of the Commissioner of Labour deals with a wide variety of subjects, among which may be mentioned labour laws, child labour, hours of labour of women and tenement work. The report of the Bureau of Labour Statistics deals with the economic condition of labour, trade and labour unions, union dues and initiation fees, monthly returns of representative unions regarding the state of employment, and quarterly returns from all unions respecting employment and earnings.

Arbitration in Massachusetts.

Annual Report of the State Board of Conciliation and Arbitration. For the year ending December 31, 1908. Boston: State Printers, 1909. Page, 127.

During 1908, applications for the adjustment of 140 industrial controversies were received by the Massachusetts State Board of Conciliation and Arbitration.

These were considered with 15 which were still pending at the end of the previous year. Awards were made by the board in 122 disputes, in 13 cases matters were adjusted by the parties concerned, and 20 disputes were pending at the end of the year. The number of arbitrations by the board were greater in 1908 than in any previous year.

OTHER REPORTS RECEIVED.

Canada.—Report of the veterinary director general and live stock com-

missioner, for the two years ending March 31, 1908.

Ontario.—Loan corporations' statements, being financial statements made by building societies, loan companies, loaning land companies and trusts companies for the year ending 31st December, 1908.

Great Britain.—Departmental committee on humidity and ventilation in cotton weaving sheds. Minutes of evidence and appendices.

Report to His Majesty's Secretary of State for the Home Department on the draft regulations proposed to be made for factories and workshops in which tinning of metal articles is carried on, by Edward Thornton Hill Lawes.

New Zealand.—Awards, recommendations and decisions under the Industrial

Conciliation and Arbitration Act, Vol. IX, Vol. X, Part 1.

United States.—Thirteenth biennial report of the Bureau of Labour and Industrial Statistics of Wisconsin, Part VII. Women Workers in Milwaukee Tanneries.

Fourteenth biennial report of the Bureau of Labour and Industrial Statistics of Wisconsin. Part 1, Housing conditions in Superior, Racine, La Crosse, Oshkosh and Eau Claire.

Proceedings of the second annual meeting of the American Association for Labour Legislation.

Argentine Republic.—Estadísticas Comerciales y Monetarias de los años 1905, 1906, 1907.

Spain.—Instituto de Reformas Sociales. Memoria del Servicio de Inspeccion en 1907.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NOVA SCOTIA CASE.

Employer's Liability Act.

UNDER the system of operating the defendant company's coal mine, coal was brought to the surface by means of box cars, and, at intervals, what was termed a "rake of cars" was sent down to bring up men. In the latter case the rules of the company required the man in charge of the rake to give four raps upon the rope connecting the cars with the hoisting engine at the surface as a signal that men were on board, in which case the cars were raised at a much slower rate of speed than that employed in raising coal. In this case the man in charge of the rake, in violation of the rules, gave only one rap upon the rope (the signal used where coal was being raised), and the cars being brought up at a great speed ran off the track, resulting in the death of one man and serious injury to another.

In an action under the Employers' Liability Act, R.S.N.S., 1900, c. 179,

the Supreme Court of Nova Scotia held, affirming the judgment of the trial judge: 1st, that the case was within section 3, sub. sec. (e) of the Act relating to the negligence of persons in the service of the employer, and having "charge or control of any points, signal, upon a railway, etc"; 2nd, that there was no such contributory negligence on the part of plaintiff in remaining upon the cars (there having been an opportunity of getting off at a stopping place) as would disentitle him to recover; and 3rd, that the principle *volenti non fit injuria*, namely, that no injustice can be done to a consenting person, could not be invoked on behalf of the defendant Company.

Bell v. Inverness Railway & Coal Co., 42 Sup. Ct. Repts., 265.

NEW BRUNSWICK CASE.

Workmen's Compensation Act.

A declaration by executrices, under Lord Campbell's Act, C.S.N.B., 1903, c. 79, claiming damages for negligence causing death and for expenses incurred and pecuniary loss sustained by deceased prior to his death, and stating

that the action is brought for the benefit of deceased's sisters is demurrable and bad in law, sisters not being beneficiaries under the Act.

The provisions of the Workmen's Compensation for Injuries Act, C.S.N.B., 1903, c. 146, place a workman who has been killed by the negligence of his employer in the same position as a stranger, but give his personal representatives no other or better right than they would have if he was a stranger.

(Murray et al. Executrices, etc., v. Miramichi Pulp and Paper Co., 39 Sup. Ct. Repts. 44.)

QUEBEC CASE.

Action Against the Crown.

The suppliant (plaintiff) was employed as a stoker on board the Dominion Steamer "Montcalm". Instructions had been given by the chief engineer of the ship, and communicated to the suppliant, that "no employee on board, including stoker or "graisseur", was to touch the machinery without a special order from the chief-engineer". On the evening before the accident to the suppliant, one of the engineers, who was ill, asked him if he was competent to start the machinery. The suppliant replied that he was, and the same engineer asked him to start the machinery for him early the following morning. To oblige the engineer, the suppliant undertook to do this. The machinery was in perfect order, but, owing to the negligence or unskillfulness of the suppliant in handling a steam pump, an accident happened by which he lost three fingers of his left hand. The Court of Exchequer (Cassels, J.) held that upon the facts, the Crown was not liable under R. S. C. 1906, c. 140, s. 20 (c.)

(Lamontagne v. The King.)

ONTARIO CASES.

Master and Servant.

An action for wrongful dismissal of plaintiff from the service of defendants as master bakers, the trial judge (Falconbrige, C. J.) found that owing to the negligence or incompetence (or both) of plaintiff, the premises,

machinery and plant of defendants were permitted to get into a condition of filth and disrepair which injured defendants' business and was a menace to the public health. A bakery and its adjuncts ought to be kept scrupulously clean. The president of the defendant company, who had been absent in Europe, found on his return the condition of affairs above mentioned, and was therefore justified in dismissing plaintiff, who had no claim on defendants. Action dismissed with costs.

(French v. Morton, 14 Ont. Weekly Reporter, 243.)

Mechanic's Lien Case.

In an appeal, in a Mechanic's lien case, from the judgment of the trial judge the question was, whether a sub-contractor is entitled to recover for the value of material sold to the contractor, but which was not actually placed in the building or upon the land upon which the building was being erected? In other words, is the sub-contractor entitled to his lien as soon as he delivers the material to the contractor, no matter whether it be placed upon the land or incorporated in the building or not? Clute, J., for the full Divisional Court, (after referring to The Mechanics' Lien Act, R. S. O., 1897, c. 153, secs. 4, 16 and 22,) was of opinion that this was not the meaning of the Act. The true meaning, in his opinion, was, that where the owner of the land receives the benefit of the labour or material a lien attaches, not to the material furnished, but to the land because the owner is benefited thereby, and it may be that such lien attaches if the material is furnished upon the land to which the lien may attach, even although not incorporated within the building, if the same is under the control of the owner. A great mischief would follow any other view of the statute. If the lien attaches to the land as soon as the delivery takes place by the sub-contractor to his contractor, it would follow that what would practically be a mortgage upon land might be created by goods being delivered to the contractor at a distance, or even in a foreign country. It seems absurd to say that there can be a lien upon land where the material for

which the lien is created has never become incorporated with the land or been placed upon it. He thought that the wording of sec. 4 and 22 shew that the material must at least be placed upon the lands. The person furnishing the material has a lien for the price upon the land "upon which such materials are placed or furnished to be sued". Sub-section 2 of sec. 22 provides for the registration of the lien within 30 days after the furnishing or placing of the last material so furnished and placed. It is essential, before the lien can arise, that the material should be furnished and placed upon the land upon which the lien is claimed. In the present case it was conceded that the last of the material sold to the contractor was never used upon the building, or even placed upon the land, and that more than 30 days elapsed between the time any material furnished by the plaintiff was placed upon the land or used in the construction of the building. The Court was, therefore of opinion that no lien attached. Appeal allowed, and judgment of the trial judge, so far as it created a lien upon the land, reversed, with costs to the defendants of the trial court and of this appeal. Judgment directed to be entered for the defendant with a declaration that the plaintiffs are not entitled to a lien upon the lands in question.

Ludlow-Ainslie Lumber Co., v. Fallis, 14 Ont. Weekly Reporter, 273.

Railway Accident Case.

An appeal to the Ontario Court of Appeal from the findings of a jury in favour of the plaintiff, the widow and administratrix of J. B. M., in an action to recover damages for his death resulting from the alleged negligence of the defendants. The deceased, aged about 45, had been employed by defendants as yard foreman at Allandale, near Barrie, and on the night of 28th of July, 1907, was struck and killed by an engine shunting in the yard under his directions. The negligence complained of was that the engine, in charge of one E., the engineer, had been moved forward without warning of any kind, and without having received the proper signal and that there was a defective system of carrying on shunting oper-

ations at the yard. The jury found that the defendants were guilty of negligence causing the accident, in that the all-night hand signal was not observed, and also in not ringing the bell and blowing the whistle; that there was no contributory negligence on the part of the deceased, who lost his life through the negligence of the engineer in charge of the engine; that the system of moving trains by the yard engine was negligent, by moving trains around the "ducket" (the signal cabin) without proper signals, and for not ringing the bell and blowing the whistle. Damages assessed at \$2,000 at common law and at \$1,800 under the statute.

The night was dark. The only persons who could have seen what occurred were B. the signalman, E. the engineer, W. the fireman, and H. the helper. E. died before the trial; W. was busy firing and knew little or nothing about the matter; H., who apparently was in the best position to observe what happened, was not called; so that plaintiff's case rested almost entirely on B's evidence. Defendants called no witnesses. In a careful analysis of the evidence (too lengthy for publication here) Garrow, J. A., for the Court, was of opinion that there was no evidence reasonably to justify a finding of negligence against the defendants. The Company's rule 190 states that: "the engine bell must be rung before an engine is moved". The Court was of opinion that this rule was not intended to apply to what may be called, as this was, a continuous operation. "Why should the bell be rung in the middle of a shunt to inform the man in charge of the operation, as deceased was, that the engine is about to advance as directed by himself? He had evidently given all the directions he had intended to give; he had opened and left the switch when B. saw him turning his back upon the train and moving off diagonally across the track towards the place of ultimate destination. In the circumstances the only possible interference is, that he knew the train was about to advance, that he intended it to advance, and that he was in no way misled or deceived by the bell not having been rung or the whistle sounded, both things he knew it was not customary to do at such a stage

in such an operation. Nor had the printed instructions as to the hand-signal anything to do with the matter." B's interpretation of such instructions, understood by everyone, seemed reasonable, and was no doubt the one intended by defendants. Appeal allowed and action dismissed with costs.

(McDonald v. Grand Trunk R. W. Co., 14 Ont. Weekly Reporter, 303.

Damages not Excessive.

An appeal by an electric railway company to the Ontario Court of Appeal, from the findings of a jury awarding \$30,000 to the plaintiff for personal injuries sustained by him owing to defendants' negligence, was dismissed with costs. The injuries were received by plaintiff while riding as a passenger in a street car belonging to defendants. Liability was admitted at the trial, and the only matter submitted to the jury was the amount of damages. At the time of the accident, plaintiff was in the employ of an association largely interested in Klondyke gold properties at a salary of \$6,000 per annum. He was 37 years of age, physically strong, healthy and active. By his work and experience in mining occupations in South Africa, Australia and the Yukon, he had specially qualified himself as a prospector, a judge of gold-bearing soil, and an expert in examining and testing mining locations in and about the Klondyke and Yukon districts. The work he was engaged in required superior knowledge and skill of an exceptional kind, and undoubted probity of character. His employers, having the fullest confidence in him, relied and acted upon his reports in dealings with mining properties. His value to his employers was increasing every year, and was far higher than that of the ordinary mining engineer. He had developed, was sure to have his salary of \$6,000 increased, and was certain to be wanted by his employers for at least five years for the same kind of work. His prospects for the future were very bright, but they had been hopelessly blighted by the accident; he was discharged from his employment and seemed wholly unqualified for any other kind of remunerative work, and was without

employment or hope of any. Plaintiff had also endured much pain and suffering, had incurred \$1,200 expenses at least, and would likely incur more. For these reasons, and other reasons based on the law of the case, the Court (per Moss, C. J. O.) thought the damages not excessive.

(Bradenburg v. Ottawa Electric R. W. Co. 14 Ont. Weekly Reporter, 318.

Master and Servant.

Plaintiff made two claims for damages against defendants while in their employ, one for injuries received from a fall in a tunnel which was being constructed by defendants, the other for damages from an injury to the eye caused by a piece of steel while he and his fellow-workman were cutting a bar. With respect to the first claim it appeared that a substantial platform had been erected within the tunnel about eight feet from the floor. Along this platform were three narrow-gauged tracks used for the purpose of extending the tunnel. The tracks were planked, the outside track having two planks between the rails, and between the outer rail and the wall there was one plank leaving a space of eighteen inches or two feet between the plank and the wall. The men usually used the walk between the rails, and when a car was coming, stepped upon the single plank to allow the car to pass. On the day in question plaintiff was proceeding along the single plank instead of taking the way usually taken by the men between the rails. He observed ahead of him that one of the planks on the single plank walk was out, and suddenly the electric light went out, and, having his foot ready for the next step, he fell through the opening to the floor below and was injured. The electric light was furnished by a Power Company to the defendants, and it did not appear that defendants were guilty of negligence in regard to the light going out. But, even if they were, it did not appear to the Court that this was the proximate cause of the accident.

The proximate cause was plaintiff's falling through the open space, and the question was, whether or not defendants were guilty of negligence by permitting

a plank to be out of position. The Court thought they were not. Plaintiff chose to walk on this single plank, which was less safe than the way provided, and in so doing he was solely responsible. There was no necessity for his taking the way which he did take; it was not the usual way; the single plank was not there for the purpose of the men going in and out, but to enable them to step to one side when a car was approaching. The way, moreover, which plaintiff might have taken was not defective. The Court therefore found no breach of duty rendering defendants liable on this branch of the case.

With reference to the second claim the facts were, that plaintiff and another workman were cutting steel forms with a chisel and hammer, when the master mechanic directed plaintiff to get a diamond point chisel and a sledge in order to do the work more rapidly. At first plaintiff was holding the chisel; then a change was made, and plaintiff took the sledge. Then, as he said, he had hit two or three blows, which cut off a piece of the steel and iron, and this struck an angleiron and flew back and struck him in the eye. The evidence did not suggest that this occurred from any defect in the tools used, and it was not shown that it is usual in work of this kind to protect the workman from danger by screening the eye. The Court were of opinion that there was no negligence on the part of the defendants, and that it was a case of pure accident. Appeal from the trial judge to the Divisional Court, in respect of both claims for damages, dismissed without costs.

(Hogan v. Butler Bros. Hoff Co., 14 Ont. Weekly Reporter, 341.)

Master and Servant.

In an appeal by plaintiff from a judgment of the trial judge dismissing an action brought by the widow of deceased to recover damages for his death, caused, as alleged, by defendants' negligence, the appeal was dismissed. Deceased was in the employ of defendants, engineers and contractors, who had a sub-contract in the construction of the railway tunnel now being driven under the Detroit river near Windsor. On September 15th,

1908, a fire took place upon defendants works; the deceased came to the place of the fire and was suffocated. The trial judge dismissed the action subject to the question of contributory negligence. If a Divisional Court should be of opinion that there was no evidence of such negligence for the jury, plaintiff should have judgment for \$4,000.00 and costs; but if that court should be of opinion that deceased was guilty of such contributory negligence as to disentitle plaintiff to recover, the dismissal of the action might be confirmed. It appeared from the evidence that deceased was in the employment of defendants, but at a point nearly half a mile away. He had no duty at the place where the fire occurred, and he came there without any request or command, and went down into the burning cavity with one S. Deceased went down and came back several times for different purposes, and finally, when called upon to come out, cried—"All right I will be there in a minute." He did not come and was afterwards found in a position indicating that he was trying too late to get out when 'overcome. After he came out the first time he was warned by one Dr. W. not to go down, and it appeared that he would have been saved had he come out when called by S., who was the foreman in charge of No. 4, where the fire took place. The Court held that deceased, having deliberately gone down into the cavity and having no duty which called him there should himself be held in law to be the author of his own misfortune, and that his action was not bettered even if he was desiring to save his life, however noble and courageous such conduct would be. The action would also fail on the ground that deceased did not obey the person in charge of the work for the defendants, and that he remained in a place of danger after having been commanded to come away. Appeal dismissed without costs.

(Kimball v. Butler, 14 Ont. Weekly Reporter, 360.)

Mechanic's Lien Case.

An appeal by defendants, the owners, from a judgment of an Official Referee in an action to enforce a mechanics' lien. The Referee declared that plaintiff was

entitled, under a contract with defendant J. M. to a lien upon the lands in question for \$1,072.98, and was also entitled to a personal judgment against J. M. for that amount. The question in dispute turned upon the meaning of the Mechanics' Lien Act, and principally on sections 4 and 22. The Divisional Court (per Clute J.,) were of opinion that, with respect to the material delivered under the contract, plaintiff, by reason of not having registered alien within 30 days from the last delivery, was not entitled to a lien, and that in that respect the ruling of the Referee was wrong and should be set aside; but that plaintiff was entitled, under the decisions, to a lien for \$75. for the deliveries under the last two orders on the 16th September and 8th October, 1908, respectively. The judgment, therefore, was to be modified accordingly. Section 47 of the Act provides, that all judgments in favour of the lien-holders shall adjudge that the person or persons personally liable for the amount of the judgment shall pay any deficiency which shall remain after the sale of the property adjudged to be sold, and the same may be recovered by execution against the property of such person or persons. The judgment for plaintiff against the owners was directed to be modified to conform to the terms of this section. Plaintiff declared entitled to costs of proceedings before Official Referee, and the costs of the appellants, in so far as they were increased by reason of claim to a lien for the full amount, to be set off against plaintiff's costs. Defendants entitled to costs of appeal.

(Rathbone vs. Michael, 14 Ont. Weekly Reporter, 389.)

ALBERTA CASE.

Negligence of Employer.

The plaintiff in a recent appeal case received injuries in the defendant's coal mine for which he claimed \$5,000 damages. The jury found that the accident was due to the defendant's negligence and assessed the damages at \$3,152.80. A new trial was asked for on the ground that these damages were excessive. The appeal court found that the disability was only partial and that the plaintiff's

earning power could not have been decreased by more than one-half at the utmost. As the plaintiff's expectation of life was held to be only, a reduction in the amount of damages to \$652.80 was ordered with a new trial for the assessment of the damages on account of permanent injuries.

(Tinsley v.s. Canada West Coal Company, Full Court of Appeal, December 5, 1908).

SASKATCHEWAN CASE.

Master and Servant.

The hiring of a municipal servant "at the pleasure of the Council at \$75 per month", is a monthly hiring at the pleasure of the municipality, and the employee cannot, upon leaving his employment in the course of any month, recover any salary in respect of that part of the month which has elapsed.

Sheddon v. City of Regina. 6 Terr. L. R. 290.

BRITISH CASES.

An action was brought against a trade union by a member for a declaration that he had not broken the rules, and to recover the sum of 2s., 6d., claimed to have been improperly withheld from him by defendants. Plaintiff was in receipt of sick pay, and was subjected to a deduction of 2s., 6d., for breach of the rules. The union was registered as a trade union. Its rules provided for the payment of sick pay to members, and for payment of "strike pay" in case of strikes. The trial judge thought that some of the objects of the union were in restraint of trade, and that under the Trade Union Act, 1871, sec. 4, he had no jurisdiction. This view was affirmed by the Divisional Court; but the Court of Appeal came to a different conclusion. They were of opinion that a trade union in itself may be lawful apart from the Trade Union Act, and that the union in question was of that character; that it was in the nature of a friendly society so far as the sick benefits were concerned; and, therefore, that plaintiff was entitled to relief. The fact that the rules provided for "strike pay" involved no illegality, a strike not being of itself un-

lawful, although it might be so in some cases such as breach of contract and intimidation. One of the appeal judges seems to be of opinion that, but for the amendment 39-40 Vict., c. 22, 3s. 6, in the definition of a trade union, the action would not be maintainable. This amendment has not been adopted in Canada.

(Gozery v. Bristol Trade and P. Society, 1909, 1 K.B. 901).

Compensation for Injury.

In an action by a workman against his employers to recover compensation for an injury sustained in the course of his employment, no notice in writing of the accident had been given to the defendants who set up this as a defence. The trial judge gave judgment for the plaintiff, but the Court of Appeal reversed his decision. They held that plaintiff was required to show that defendants had not been prejudiced by the neglect to give notice, and that not having done this plaintiff could not succeed.

(Hughes v. The Coedalon Colliery Co, 1910, 1 K.B., 957).

Accident happening during, but not arising out of, Employment.

The applicant, a sewing-maid in the service of the respondent, was sewing at night by an open window in the respondent's house. A cockchafer flew into the room, and the applicant in throwing up her hand to drive it away hit and injured her eye so seriously that permanent defective vision resulted.

Held, that though the accident happened in the course of the employment, it did not arise out of the employment, and therefore, that the applicant was not entitled to compensation under the Workmen's Compensation Act, 1906.

(Craske v. Wegan, Court of Appeal, May 28, 1909.)

Death under Anæsthetic following Accident.

A workman received an injury in the course of his employment which necessitated the amputation of one of his fingers. He was put under anæsthetics and the finger was amputated. As he

was recovering from the effects of the anæsthetic the surgeons decided to remove a bad tooth of which the workman had complained; further anæsthetics were administered, and an unsuccessful attempt was made to remove the tooth. The workman was then removed to a ward, and shortly afterwards he died. In a claim for compensation by his widow the County Court Judge held on the evidence that the workman died from failure of respiration caused by the administration of an anæsthetic, that it was at least as probable that his death resulted solely from a spasm induced by an attempt to swallow oozing blood in his mouth at that it resulted from the anæsthetic administered for the first operation, and consequently that the widow had not discharged the onus which rested upon her of proving that the workman's death resulted from his injury by the accident. He, therefore, refused to award compensation under the Workmen's Compensation Act, 1907. The widow appealed.

Held, dismissing the appeal, that the County Court Judge had arrived at a right conclusion.

(Charles v. Walker, Ltd., Court of Appeal, May 24, 1909.)

Workman's Compensation.

The applicant was employed by the respondents in their colliery. Owing to some accident to the machinery, the applicant and other workmen were told to ascend the pit earlier than usual. The applicant did ascend, and, his work for the day being over, he prepared to go home. There were three ways by which he could go home; one was by a bridge over railway lines; the second, which was considerably longer, led over the colliery premises on to the high road; the third, which was the shortest for the applicant, led over certain parts of the colliery premises and across some lines which were under the control of the respondents. During the time the applicant was in the respondent's employment this third way was his usual way home, and it was found that it was so used by him and others with the knowledge of the respondents. On the day in

question the applicant went by this third way. In order to cross the line he got under some trucks, and while he was so doing, the trucks were moved and some of them went over his legs, crushing them, and necessitating their amputation.

Held, that the accident arose out of and in the course of the employment and that the applicant was entitled to compensation under the Workmen's Compensation Act, 1906.

Bane vs. Rostan Hill Colliery Co. Court of Appeal, June 9, 1909.)

THE LABOUR GAZETTE

SEPTEMBER, 1909.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF AUGUST, 1909.

I.—GENERAL SUMMARY.

GENERAL employment was considerably more active throughout Canada during August both as compared with July and with the corresponding month of 1908. At the same time the general industrial outlook improved, and the continuance of busy conditions during the autumn season was regarded as assured. These conditions resulted from the large number of men required to assist in the harvest, and from the uniformly favourable reports that were received with respect to the extent and quality of the agricultural yield. The western crop, notwithstanding a considerable scarcity of labour for the harvest, has been saved without damage, and the return is expected to exceed that of 1908, while the quality is better than in several years past. In the other agricultural provinces, likewise, the crop return is expected to equal or exceed that of last year. The immediate effect of this intelligence was to stimulate trade and manufacturing throughout Canada. For the first time in many months past a tendency towards the expansion and improvement of factories has been manifested. Railway construction continued during August on an increasingly extensive scale, and additional labour was in demand in many sections of the western provinces owing to the large numbers withdrawn for the harvest fields. Wages for this class and for unskilled labour generally, were upward in tendency.

Another important incident of the month was the sock-eye run in British Columbia, which gave employment to several thousands of men, though the catch will probably be less than in 1905, the last "big" year. In the mining industry, labour disturbances created dullness in the Nova Scotia collieries, but the collieries of Alberta and British Columbia had a good month, while mica mining in Quebec and metalliferous mining in British Columbia showed a pronounced revival in activity. Transportation employees had a good month, especially on passenger traffic, and the volume of freight moving was steadily increasing in the latter half of the month. The arrangements made by the railway companies for the moving of the 1909 crops, and by the banks for financing the movement, were stated to be making favourable progress. Building operations continued to expand; the number of permits issued and the value of the buildings represented thereby had already exceeded at many points the record for the entire year of 1908. At the close of the month the outlook was for the continuance of industrial activity throughout the rest of the season.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concern-

ing which was received at the Department of Labour during August 1909:

Building trades.—A number of carpenters at Winnipeg, Man., obtained an advance of ten cents per hour. The advance did not apply to the whole of the trade. (1)

Metal trades.—Stove plate moulders at Woodstock, Ont., had their piece work prices reduced. Telephone, electric light linemen and cablemen to the number of 85 at Winnipeg, Man., received an increase in wages from 30 to 32½-35 cents per hour, and had their hours reduced from 10 to 9 hours per day.

Clothing trades.—One hundred and ten cloak makers at Montreal, Que., obtained an increase of approximately ten per cent. in wages.

Railway employees.—A new agreement was signed between the Canadian Northern Railway Company and its maintenance of way employees by which advances ranging from 10 to 15 cents per day, except in the case of labourers, were granted. The agreement was signed after a reference of the wages question to a Board under the Industrial Disputes Investigation Act. (2)

Miscellaneous trades.—At Ottawa, Ont., a large departmental store introduced an early closing arrangement affecting approximately 300 hands to the extent of 12 hours per week. (3)

Railway construction employees and unskilled labour.—There has been a considerable increase throughout Western Canada in the wages paid to labour employed on railway construction and at unskilled employment. The number of men affected was estimated at 12,000 and the advances ranged from 25 to 50 cents per day. (4)

Cost of Living—Prices.

Grain and fodder prices were downward, and flour decreased 40 cents per barrel. Bread remained on previous high levels. Other farm products remained high in price, butter and eggs being very firm. The autumn and winter

schedule of milk prices was announced on September 1 and October 1; the in several localities, to go into effect prices prevailing last winter were announced in most localities. Meats remained high, though with a slight downward tendency towards the close of the month. New fruits and vegetables, though abundant, commanded high prices. Wool prices were somewhat more buoyant, the mills buying more freely on promising crop reports. Lumber prices increased in Ontario and on a few lines in British Columbia. The primary metal markets remained with little change. Real estate values were strong.

Interruptions to Industry.

The number of trade disputes in existence during August was the same as in July, but there was a decrease of about 12,015 in the number of working days lost. Compared with August, 1908, there was an increase of 7 in the number of disputes, but a decrease of approximately 85,875 in the number of working days lost.

Among industrial and other establishments and buildings destroyed by fire or other cause during August, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Wireless telegraph station at Glace Bay, loss, \$8,000; coal sheds, coal and 15 box cars at Halifax, loss, \$40,000; blacksmith shop, grocery store and two residences at Milton; church and residence at Weymouth, loss, \$4,000.

Heavy gales on the Bay of Fundy did considerable damage to grain and fruit crops in the vicinity. During these gales the schooner *Myrtle* went ashore off Lingan and became a wreck.

New Brunswick.—General store at Edmunston, loss, \$15,000.

Quebec.—Sawmill at Barnston, loss, \$1,000; two summer houses at Charlemagne, loss, \$5,000; Intercolonial railway station at Gauvreau's yard; business block at Grenville, loss, \$20,000; outbuildings and six horses at Longue Pointe, loss, \$10,000; general store at Longueuil. At Montreal, paint shop, loss, \$2,000; iron works, barge *Glengarry* and 20,000 bushels of wheat in Lachine canal, loss, \$30,000; six empty box cars; storehouse, loss, \$1,000; the steamer *Prescott* burned to the water's edge, loss, \$40,000. Saw-mill at St. Bruno, loss, \$5,500; hardware store at St. Johns, loss, \$20,000; stable and outbuildings at Stanbridge; 240,000 feet of lumber and two residences at Robertson station, loss, \$8,000; tenement house at Viauville.

Barns at Cranberry and Ste. Agathe.

Ontario.—Outbuildings and contents at Camden, loss, \$3,000; farm buildings and contents at Caradoc, loss, \$4,000; furniture factory at Belleville, loss, \$1,000; mine buildings at Cobalt; business block at Cobourg, loss, \$45,000; cheese factory at Collins' Bay; church and newspaper building at Elk Lake loss, \$2,000; general store at Frankville, loss, \$2,000; four business blocks at

Glencoe, loss, \$60,000; outbuildings in Hamilton township, loss, \$2,000; blast furnace blown out at Hamilton, loss, \$50,000; amusement buildings at Hanlan's Point, loss, \$200,000; general store at Hawkesbury, loss, \$25,000; outbuildings and contents at Hawthorne Ridge, loss, \$4,000; eight business houses at Little Britain, loss, \$30,000; freightsheds, livery stables, laundry and storehouse, at London, loss, \$1,000. Bakery at Kingston, loss, \$2,000; boot and shoe warehouse at Milton, loss, \$24,000; outbuildings at Mather's scorners, (partial); loss, \$2,000. At Niagara Falls, fertilizer plant tailor shop, loss, \$2,500. Hotel at Niagara-on-the-Lake, loss, \$50,000; flour mills at Norwich, loss, \$15,000; carriage factory at Orillia, loss, \$500,000; brickyard buildings at Ottawa East, loss, \$3,000; coal sheds, stables and 8 horses at Ottawa, loss, \$3,000; sawmill at Parry Sound; laundry at St. Thomas, loss, \$3,000; business block at Stratford, loss, \$5,000; farm buildings and contents at Thorold, loss, \$5,000. At Toronto, Parliament buildings, loss, \$675,000; biscuit factory, loss, \$2,000; rubber tire factory, loss, \$2,000; clothing store, loss, \$1,700. Business block at Vankleek Hill, loss, \$5,000; stables outbuildings and contents at Woodstock, loss, \$4,000.

The steamer *Collingwood* came into collision with a freighter off Sandwich and sank, loss, \$346,000; the steamer *Gilphie* was burnt to the water's edge near Owen Sound; on August 2nd the steamer *Glenallah* ran on to the breakwater at Port Colborne and was damaged to the extent of \$20,000.

Barns at Belmont, Petrolea, Port Credit, London township, Simcoe and Westminster.

Manitoba.—Elevator at Gretina; skating rink at Portage la Prairie, loss, \$12,000; business block at Shoal Lake, loss, \$14,000. At Winnipeg, the bleachers at Happyland park; McClary manufacturing plant, loss, \$200,000.

Alberta.—Washhouse at mine at Frank, loss, \$8,000; commercial portion of town of Lacombe, loss, \$35,000.

British Columbia.—Boarding house, hotel and meat market at Grand Forks, loss, \$9,000; business portion of Coal Creek, loss, \$150,000. At Nelson, car repair shops, loss, \$10,000; head works of mine loss, \$15,000. Lumber mills and building contractor's plant at Vancouver, loss, \$130,000; hotel at Vernon, loss, \$25,000.

Forest fires in Southern British Columbia caused considerable damage.

Agriculture.

The condition of the western grain crops and the progress with the harvest throughout Canada were the features of the month which dominated the general industrial situation. Reports in this connection up to the close of the month were exceptionally favourable. In the Northwest provinces the danger from frost, which was feared owing to the prevailing late date at which the crops were planted this year, has been avoided, and the grain has been garnered in good condition notwithstanding the scarcity of help which was experienced in several localities. It is generally estimated that the crop will considerably exceed in quantity that of 1908, estimates of the wheat crop ranging from 108,000,000 to 118,000,000 bushels. The average wages paid were \$2.50 per day with board, but

experienced help obtained considerably higher rates. It was estimated that approximately 16,000 harvesters from Eastern Canada had been distributed up to the closing week of August. An effort was made this year to limit the number of those taking advantage of the harvesting excursions to able-bodied workmen capable of labouring in the harvest fields. Tests made of the quality of the new crop showed it to be the best in several years, both in regard to strength and colour.* According to statistics compiled by the Ontario government, crops in Ontario will average well. The following is the official estimate:—

	Acres.	Yield.	Ave.
Fall wheat.....	663,375	15,996,562	24.1
Spring wheat.....	135,161	2,215,314	16.4
Barley.....	695,262	18,273,285	26.3
Oats.....	2,695,585	87,966,553	32.6
Peas.....	381,609	7,842,927	20.6
Beans.....	45,029	857,663	19.0
Rye.....	94,661	1,594,868	18.8
Hay and clover.....	3,228,445	3,885,145	1.20

¹Tons.

From Quebec and the Eastern Provinces the reports received were uniformly favourable, and the crop yield will be heavier than in 1908. The annual crop report issued by the Secretary of Agriculture for Nova Scotia showed that 5 per cent. more land was under cultivation than in 1908 in oats, barley and wheat; 6 per cent. more in potatoes, 10 per cent. more in turnips and 5 per cent. less in mangolds. Dairy cattle have increased about 5 per cent. and horses about 3 per cent. Stock of all kinds was in good condition, pastures having become luxuriant.

The condition of the fruit, root and vegetable crops was very promising throughout Canada. The quantity of fruit in sight is larger than in 1908 and the quality superior. Apples in particular are expected to yield heavily. The grape crop of the Niagara peninsula is expected to be exceptionally large and clean.

Returns with regard to the wool clip from the Alberta ranches show a falling off in the fleece compared with last year, as a result of the dry autumn and the

* For a detailed statement with regard to the labour situation in western Canada and the estimated yield of wheat see report of the Winnipeg correspondent.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has references only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

late spring. The price this year is two cents higher than last year. The total clip is expected to be in the neighbourhood of 400,000 pounds.

Fishing.

The month was quiet in the Maritime provinces. Since the close of the lobster season, cod-fishing increased in activity, but a number of fishermen in Prince Edward Island will remain with only partial employment until the opening of the oyster season. Some good runs of sardine herrings occurred in New Brunswick. Ice off the Labrador coast has caused serious interruption to fishing operations this year, and catches have been very light.

The incident of chief importance during the month was the sock-eye run in British Columbia. Large numbers of men were given employment, the run being that of the "big" year, which occurs every fourth season. In the opening week of the month some exceptionally heavy catches were taken by the traps and boat fishermen; later the number of fish showed a decrease. No official report of the catch was available up to the close of the month, but it was expected that the total pack would be somewhat less than that of 1905. Humpbacks were appearing in the closing days of the month.

Lumbering.*

The lumber trade showed little change in Eastern Canada during the first half of the month, conditions being generally quiet. The demand for lath and shingles showed a falling off. Mills, however were running to full capacity under favourable conditions, and there was a good demand for spruce deals in the Maritime Provinces for the British market. Later in the month, prices advanced 10 per cent. on the upper grades of pine, on account of heavy orders from Western Canada. A number of gangs have been already sent into the woods, and the hir-

ing of men for the winter was active during the closing days of the month. Wages offered were the same as last year with an upward tendency.

A delegation representing the paper makers of the Province of Quebec waited upon the Honourable the Premier and the Honourable the Minister of Crown Lands for Quebec to request the Government to suspend its tax of 25 cents per cord on pulp wood exported from the Province in order to give time to Canadian manufacturers to meet conditions created by the United States tariff.

In British Columbia the lumber trade for some time past has been gradually resuming activity. Fir logs remained cheap during August. The mills were fairly active, especially in the coast district.

The British Columbia Forestry Commission held sessions at Nanaimo, Victoria and Vancouver, during August. The commission will later proceed to New Westminster, Revelstoke, Golden, Vernon, Cranbrook, Nelson, Fernie and Grand Forks.

The semi-annual meeting of the Mountain Lumbermen's Association was held at Nelson, B.C. An improvement in prices was reported. The meeting took into consideration the evidence to be presented by the Association before the Provincial Lumber Commission.

The Canadian Forestry Association will hold a special meeting at Regina, Sask., September 3-4, for the discussion of problems relating to forestry in Western Canada.

Mining.

The leading features of the month were, the dullness prevailing in the Nova Scotia coal fields caused by the labour disputes at Springhill and at the Dominion Coal Company's collieries; the revival of the mica mining industry in Quebec; and the pronounced increase in activity which took place in the metalliferous camps of British Columbia, following the cessation of labour disturbances in the collieries of Alberta and the Kootenay district. The disputes in Nova Scotia caused a considerable depression in general trade in the districts affected, as well as heavy

*A special bulletin issued in August by the Forestry Branch of the Department of the Interior, Canada, dealing with forest fires in Canada during 1908 is reviewed in a special article elsewhere in the present issue.

financial loss to the parties concerned. In Quebec the asbestos mines were producing steadily. The organization of the Black Lake Consolidated Asbestos Company, Limited, made up of four properties located in the serpentine belt of the Black Lake and Thetford mines district, was reported. The revival in the mica trade gave employment to several hundreds of hands at Hull and other points in the Ottawa Valley. Production continued steady at the Cobalt camp; conditions in the other mining districts of Ontario remained with little change from the preceding month, prospecting and development work at Gowganda and in other new camps being actively under way. The collieries of Alberta and British Columbia were active. The Crow's Nest Pass Coal Company was producing about 3,000 tons a day, and the Vancouver Island collieries were considerably more active than at the same period in 1908. An oversupply of labour was reported at Dawson, Y.T.

During the year ended June 30, 1909, the smelter of the Consolidated Mining and Smelting Company at Trail, B.C., produced metals to the value of \$5,506,000, a larger return than in any previous year, notwithstanding that metal prices were unusually low in price. A number of important improvements, including several new blast furnaces, were completed during the year.

Manufacturing.

The manufacturing industry showed further steady improvement during August. In nearly all of the important industrial centres full staffs were employed and full time was worked. Establishments engaged in the manufacture of iron, steel and other structural materials were especially active, in view of the large amount of building and railway construction in progress. Manufacturers of food stuffs and clothing had a good month. Another feature of the month was the increasing activity of machinery plants and boiler factories, reflecting an increasing attention on the part of manufacturers generally, to the condition of their plants. In view of the favourable reports concerning the grain crops, it is

expected that the coming autumn and winter season will be active in the leading branches of the industry.

A merger of the principal cement manufacturing establishments in Canada was completed during August. The new company will be known as the Canadian Consolidated Cement Company, with a capital of \$30,000,000.†

The fruit and vegetable canning factories of Ontario were very active during the second half of August and anticipate a busy autumn trade. The supply of vegetables was abundant and the outlook for fruit was favourable. The acreage under production for these factories has increased from 800 acres in 1890, to over 8,000 in 1908, and the price paid the grower from \$26,400 to \$386,000. During the past five years the number of factories packing tomatoes has increased from 27 to 53, The average price paid the grower by the factory is 27½ cents per bushel.

Railway Construction.

Work continued very active on the various large contracts in progress, especially in connection with the construction of the National Transcontinental line. The demand for labour for the construction camps was greater than the supply in the Prairie Provinces during August owing to the large number of labourers required to assist in the harvest. Wages showed a considerable advance. Good progress, however, was reported in New Brunswick, Northern Ontario and Western Alberta. West of Edmonton steel has been laid for 40 miles and it is expected that 60 miles will be laid by September 15. Twenty-three stations are being erected on this section and several new town sites have been placed on the market. Upward of 5,000 town lots have been sold by the Grand Trunk Pacific Railway Company during the past year. Good progress was also reported on the several branch lines of the Grand Trunk Pacific, Canadian Pacific and Canadian Northern

†For statement with reference to the Cement industry of Canada, see the Labour Gazette for December, 1908, page 608.

Railways, under construction in the Northwest provinces.

An important event of the month was the awarding of a contract to Messrs. Foley, Welch and Stewart for the construction of the second section of the Grand Trunk Pacific Railway from the coast eastward in British Columbia. Grading on the first section of the road from Prince Rupert to Copper River, a distance of about 107 miles, will be completed this year. The second section extends from Copper River to Aldermere, B.C., a distance of 140 miles up the Skeena river. Approximately \$10,000,000 will be expended on the section as the construction of several tunnels is involved.

The telephone system of the Temiscaming and Northern Ontario Railway between North Bay and New Liskeard is being reconstructed. The new system will be equipped with all modern improvements and will place an efficient service at the disposal of the miners and settlers of the district.

General Transport.

Transportation employees of nearly all classes had a very active month. The volume of traffic on the railways was heavy, especially passenger traffic, the tourist and convention season having been a very active one. The volume of general freight moving was also well maintained. As an indication of the business revival in progress, there has been a steady diminution since the spring months in the number of unemployed railway cars.

A feature of the month was the preparations being made by the railways to handle the Western crop of the present year. It was stated that the Grand Trunk Pacific Railway would be able to move approximately 10,000,000 bushels this year, about 5,000 freight cars and 175 locomotives being available for the traffic; last year the company handled about 2,000,000 bushels. Officials of the Canadian Pacific and Canadian Northern Railway Companies stated that the arrangements for the moving of the crop were progressing very favourably and that there was every indication

that the grain would be moved out rapidly. The former Company has added about 3,000 cars and 75 locomotives to its equipment in this connection during the past year.

The volume of traffic on the canals has shown a considerable decrease compared with last year. The decrease was in nearly all lines of freight and was noted in the returns from the Sault Ste. Marie, Welland, St. Lawrence and Ottawa canals; the Rideau and Trent canals showed an increase. During August, however, the volume of traffic increased very materially as compared with the preceding months, and the Lachine and other canals showed an increase as compared with the corresponding period of 1908. Traffic through the Sault Ste. Marie canals during July was as follows:—

	U. S. Canal.	Canada Canal.	Total.
Vessel passages, No.	1,910	993	2,903
Registered tonnage, Net.	4,260,842	2,881,999	7,142,841
<i>Freight—</i>			
East bound, Net tons	2,924,884	3,954,326	6,879,210
West bound, Net tons	1,168,038	659,418	1,827,456
Total freight, Net tons	4,092,922	4,613,744	8,706,666

Longshoremen at Montreal, Que., have been less active than in 1908, outward cargoes having shown a decrease.

According to a preliminary statement issued during August, the Canadian Pacific Railway Company during the year ended June 30, 1909, earned \$76,313,000, showing net profits of \$22,955,000, an increase in net profits over the previous year of \$1,163,266. The following statement shows the income and profits of this enterprise since the year 1900:—

Year ending June 30th.	Gross Earnings.	Net Profits.
1909.	\$76,313,321	\$22,955,573
1908.	71,384,173	21,792,366
1907.	72,217,527	25,303,308
1906.	61,669,758	22,973,312
1905.	50,481,822	15,475,088
1904.	46,469,132	14,213,105
1903.	43,957,373	15,836,845
1902.	37,503,053	14,085,912
1901.	30,855,203	12,109,375

It will be seen that the gross earnings have more than doubled and that the

net earnings have increased by approximately 90 per cent. during the eight years' period.

For the first six months of the present year the total net receipts from the Temiscaming and Northern Ontario Railway were \$377,529 compared with \$55,113 in the corresponding period of 1908. Some unexpected expenses were incurred during the early part of last year, but there has been a very large increase in business during the present season. During June, net earnings were \$55,202, compared with \$38,573 in June 1908.

The Canadian Northern Railway Company inaugurated a train service between Quebec and Montreal during August.

By order of the Board of Railway Commissioners a uniform bill of lading will take effect on October 1. The board announced during August the dates for its sittings during its western circuit this autumn.

The Canadian Brotherhood of Railway Employees held its first annual session at Moncton, N. B., on August 24-26. About 50 delegates were present. The membership has grown rapidly since the organization of the Brotherhood in October 1908.* Since the beginning of the year divisions have been organized at Springhill, Stellarton, Amherst, Newcastle, Charlottetown and Bridgewater. The financial statement of the Brotherhood was satisfactory. The convention dealt chiefly with the revision of the constitution and the completion of arrangements for perfecting the organization of the Order.

The Trades.

Building.—Employment continued very active. The steady increase in the amount of building in progress noted in the earlier months of the season, as compared with the corresponding months of 1908, continued. In nearly all of the larger centres the number of building permits issued during August was larger than in August, 1908. At Toronto, for example, the value of buildings for which permits have been taken out to

September 1, was upwards of \$12,000,000; at the corresponding date in 1908 the value represented by permits issued was approximately \$8,000,000. While all of the branches were very active there was a particularly keen demand for carpenters at several points.

Metal and woodworking.—The several branches of these trades were becoming increasingly active with the general expansion of the manufacturing industry. Especially active were the employees of sash and door factories and of other establishments for the manufacture of structural material. Coopers were very busy.

Printing.—The allied trades had a good month in most localities.

Clothing.—Journeymen tailors were only fairly active, but garment workers were busy. Boot and shoe workers were more active than in the preceding month.

Textile.—Conditions showed some improvement compared with the earlier months of the season.

Food and tobacco preparation.—Bakers had a good month, and confectioners were becoming busy. Tobacco workers were active. Cigarmakers had a fair month.

Miscellaneous.—The tourist and convention season has been an active one and hotel and restaurant employees, barbers and laundry workers had a busy month. Preparations for the opening of the various fall exhibitions gave employment to large numbers.

Unskilled labour.—The month was a very busy one, and men were in active demand in nearly all of the large centres. In Western Canada especially, the supply of general labour fell below the demand during harvesting operations and in view of the extensive railway construction in progress. Civic improvement work has also been on a large scale, and the outlook is for busy conditions until the close of the season.

Canadian Trade and Revenue.

Foreign trade.—During July, 1909, the total value of imports entered for consumption was \$30,046,443 compared with \$22,967,094 in July, 1908. For the

*For a statement re the circumstances under which the Brotherhood was organized see the *Labour Gazette* for February, 1909, page 957.

first four months of the fiscal year ending July 31, 1909, the total value of imports entered for consumption was \$112,148,633, compared with \$91,888,201 in the corresponding period of last year. The total value of domestic exports during July was \$24,071,591, compared with \$23,116,234 in July, 1908. The total value of domestic exports during the first four months of the fiscal year ending July 31, 1909, was \$73,398,595, compared with \$67,205,010 in the corresponding period of last year. During July there was an increase in exports of the forest products, animals and their produce and agricultural products, and a decrease in exports of products of the mine, the fisheries and manufactures. The grand total of Canadian trade for July, 1909, amounted to \$56,351,513 compared with \$48,680,057 in July, 1908. For the first four months of the present fiscal year, total Canadian trade was \$191,919,304 compared with \$163,551,024 in the same months of 1908.

A good market for Canadian condensed milk was reported in Japan by the commercial agents of the Department of Trade and Commerce. The organization of a large Anglo-Japanese Hydro-electric Power Company in Canada was mentioned; Canada was preferred by the intending organizers of this company owing to its laws regarding registration fees, etc., being less onerous than those of Great Britain. Canadian potatoes were stated to be in favour in Cuba. A good market for dairy products was reported in China.

Imperial trade.—A good demand for Canadian bacon, apples, turkeys and eggs was reported in Great Britain. The trade in Canadian lumber with the West Indies is said to have greatly increased. A serious effort on the part of Canadian exporters to secure the West Indian market for birch to be used in the place of oak from the United States for the manufacture of barrel staves was urged. In Newfoundland, increases were reported in the imports of Canadian hay and jewellery; a good opening for Canadian hardware was said to exist in this market.

Domestic trade.—Wholesale and retail trade was dull from seasonal causes during the first three weeks of the month,

though the sorting business was fairly active. Country trade, as usual, was very quiet during the harvest, though the trade in builders' hardware has been generally active as a result of the large amount of building in progress. In the closing week of the month, however, with the end of the holiday season approaching, a recovery was reported. Travellers returned to their routes and city retail trade revived. The prevailing expectation with regard to fall trade was very hopeful, in view of the agricultural yields anticipated. Bank clearings showed a heavy increase compared with last year. For the first six months of the year the increase over the corresponding period of 1908 was approximately 29 per cent. The Canadian security market was quiet. Financial arrangements in connection with the moving of the crops of the present year were reported as being in a satisfactory condition.

The July bank statement was very favourable as compared both with that of the preceding month and of the corresponding month of 1908. Compared with the latter, deposits, current loans, call loans and circulation have shown considerable gains.

The Northern Crown Bank statement for the half year ended June 30, 1909, reflected the improvement in general trade conditions prevailing throughout the country. Profits were approximately nine per cent. larger than during the corresponding period of 1908.

Canadian revenue.—Canadian revenues for the month of August, 1909, amounted to \$8,469,848.51, compared with \$7,942,272.55 in August, 1908. For the first five months of the fiscal year 1909-10, to August 31, 1909, the total revenue was \$38,500,160.42, as against \$33,444,571.81 in the same months of the preceding fiscal year. The total expenditure on capital account during August, 1909, amounted to \$2,816,520.65, compared with \$3,968,783.80 in the same month of 1908. The leading items of expenditure during August, 1909, were, public works, railways and canals, \$2,453,858.76; bounties, \$208,820.92; and Dominion lands, \$108,056.32.

Notes.

The 79th annual meeting of the *British Association for the Advancement of Science* was held at Winnipeg, Man., August, 25-31.

The *Ontario Vegetable Growers' Association* held its annual convention at Guelph, Ont.

Trappers arriving at Edmonton reported the *fur catch* light, though better than had been anticipated earlier in the year.

The superintendent of education for Ontario has been sent to Europe to investigate *technical education* systems in Great Britain, France, Germany and other countries.

At Toronto, Ont., and New Westminster, B.C., convictions were recently made under the Anti-Opium law of the past session of Parliament. Fines of \$100 were imposed.

The *Bell Telephone Company of Canada* has issued its annual report for the year ending December 31, 1908. An increase of \$256,683 in total surplus was announced. Net earnings were \$1,424,274.

The first annual convention and tournament of the *Provincial Firemen's Association of Alberta* was held at Calgary, Alta., August 4. A paper on fire prevention was read by the chief of the Calgary fire brigade. A number of hose and ladder contests were held.

Mr. Thomas M. Molloy, Saskatchewan has been appointed *Fair Wages Officer* for the province of Saskatchewan. Mr. Molloy will not be required to give his entire time to the duties of his office, but will be paid a small salary with an additional allowance for each fair wages schedule prepared.

The second annual convention of the *Canadian Pharmaceutical Association* was held at Banff, B. C. Representatives were present from the various Provinces of the Dominion. It was decided to encourage the establishment of a correspondence course in pharmacy to assist students requiring pharmaceutical knowledge where colleges are not established. The next convention will be held at Halifax, N.S.

The call of the first convention of the *Canadian Federation of Labour*, to take place at Ottawa, Ont., on September 28th, and following days, was issued under date of August 14. Among the subjects mentioned for discussion by the convention are the following; the status of foreign organizations; Imperial defence; immigration; the methods of enforcement of the Alien Labour Law of the United States; and amendments of the constitution.

Since the disastrous fire which almost totally destroyed the town of *Fernie*, B. C., during the month of August, 1908, upwards of 1,400 residences have been rebuilt at a cost estimated to exceed \$1,000,000. About \$750,000 have been expended on fire proof structures, and similar buildings to the value of \$300,000 are under contract. A large number of business blocks, hotels, warehouses and public building have also been erected. The population of the town is considerably larger than at the time of the fire.

The Canadian union meeting of the *Brotherhood of Locomotive Firemen and Enginemen* was held at Winnipeg, Man. Delegates were present from various provinces and states and a variety of subjects were discussed, among others, the Industrial Disputes Investigation Act, and the provisions of the law with regard to the liability of railway employees for accidents. A resolution was passed requesting the Parliament of Canada to amend the law so as to place it beyond the power of a judge to sentence men to the payment of fines or imprisonment except for offences proven to have been wilfully committed.

The first annual convention of the *Southern Counties Telephone Association* was recently held at St. Thomas, Ont. The president, in his annual address, stated that the independent telephone movement had grown during the past year. A paper on "reasonable construction for small companies", was read by Myron A. Gee, Selkirk, Ont; and one on "accounting and collecting for small companies," by C. D. Adams, secretary treasurer of the Harrietsville Telephone Company. Resolutions were passed favouring public

ownership of trunk and long distance telephone lines; expressing appreciation of the action of the railway commission re the installation of rural telephones in railway stations; urging more complete organization by the Canadian independent telephone associations; expressing disapproval of the granting of exclusive franchise, and recommending the appointment of a legislative committee to watch legislation with reference to independent telephone companies and to suggest the introduction of legislation. Mr. T. L. Mayberry, M. L. A., was elected president, and Mr. W. C. Lunay, secretary treasurer.

The *Guelph Co-operative Association Limited*, held its first half-yearly meeting for 1909 on August 12. The total sales of the Association amounted to \$29,795, an advance of \$2,815 over the preceding half year. Profits amounted to \$1,043, after paying interest on loans. A dividend of five per cent. to shareholders, and of two and a half per cent. to non-shareholders, was paid. Profits were reduced by the fact that meat cost $2\frac{1}{2}$ cents per pound more than when the butchery department was started, the selling price not having been advanced. The net profit on share capital was 56 per cent. The Association has added coal to the commodities dealt with, the price charged being \$6.20 per ton. The city bought its coal this year from the society. The Association is also starting two new departments, namely, granite wear and crockery. In less than $2\frac{1}{2}$ years the society has paid in dividends and interests on shares over \$4,700 on a share capital of \$3,690. The society has a reserve fund of \$2,000 and a surplus of \$457 at profit and loss.

A number of German manufacturers and merchants interested in Canadian trade established at the end of 1908, under the presidency of Dr. G. Stresemann, a member of the Reichstag, a German-Canadian Economic Association. The general purpose of the Association is to further the economic relations between Germany and Canada. The efforts of the Association will be directed in the first place, towards improving commercial conditions between the two countries; be-

yond this it will develop and direct into new ways the business and cultural relations of the two people. The Association has already frequently succeeded in bringing German and Canadian business houses into closer and more favourable relations. The association includes in its membership a number of prominent business houses, manufacturers, importers, exporters, and economic bodies. Its efforts are encouraged by important transportation interests, for example, the Canadian Pacific Railway Co., the Hamburg-American Co., as well as by several banking institutions. The Association is desirous of bringing its existence to the notice of Canadian business and economic circles, and to invite them to consider the advisability of taking part in a common effort towards the fulfilment of the objects above set forth. The secretary is Dr. E. J. Neisser, Berlin-Charlottenburg, Germany.

The fifteenth annual meeting of the *Maritime Board of Trade* was held at Charlottetown, P.E.I., August, 18-20. The report of the secretary showed that the past year had been an active one. A new Board has been formed at Mahone Bay. In the address of the president, reference was made to the proposed formation of a Canadian Atlantic Fishery Board, the importance of the tourist trade, the encouragement of immigration, and Maritime union. With reference to trade disputes in Nova Scotia, a resolution was passed calling upon the government to amend the law so that parties to an industrial dispute should be bound by the decision of a regularly appointed board of arbitration. The acquiring of branch lines by the Intercolonial Railway was recommended. It was decided to memorialize the Dominion government to run its ferry across the Northumberland Straits the whole year instead of during the winter months only, as at present. Other subjects discussed were, the encouragement of agricultural exhibitions, the providing of continuous communications between Prince Edward Island and the mainland, the regulation of telephone rates, the exportation of pulp wood and the union of the Maritime Provinces. It was resolved that the Gov-

ernments of each of the three Provinces should be requested to appoint a committee to consider the conditions upon which union can be consummated. Mr. W. B. Snowball was elected president of the Board for the ensuing year.

In accordance with the Act of Parliament passed at the last session, the Government of Canada announced on August 31st., the personnel of the *Commission for the Conservation of the Natural Resources of Canada*. The Hon. Clifford Sifton was named chairman of the commission. The other members are, Hon. Sydney Fisher, Hon. Frank Oliver, Hon. Wm. Templeman, Premier Hassard of Prince Edward Island, Attorney-General Pipes of Nova Scotia, Surveyor-General Grimmer of New Brunswick, Hon. Jules Allard of Quebec, Hon. Frank Cochrane of Ontario, Hon. Hugh Armstrong of Manitoba, Hon. J. A. Calder of Saskatchewan, Premier Rutherford of Alberta and Hon. F. G. Fulton, of British Columbia, all appointed ex-officio, and the following members selected by the Governor-in-council: Hon. Benjamin Rogers of Alberton, P.E.I., Prof. Howard Murray of Dalhousie University, Halifax; Messrs. Frank Davison

of Bridgewater, N.S.; Cecil C. Jones, Ph. D., Chancellor of the University of New Brunswick; Wm. B. Snowball, lumber merchant, of Chatham, N.B.; Dr. Henri S. Beland, M.P.; F. D. Monk, M.P.; Dr. J. W. Robertson, Head of the MacDonald college, Ste. Anne de Bellevue; Monseigneur J. C. K. Laflamme, superior of the University of Laval; Sir Sanford Fleming, Senator W. C. Edwards; E. B. Osler, M. P.; C. A. MacCool, ex-M.P.; J. F. MacKay, Business Manager of the Globe, Toronto; Prof. Fernow, of the University of Toronto; Rev. Dr. Geo. Bryce, of the University of Manitoba; Dr. W. J. Rutherford, deputy minister of Agriculture, and member of the faculty of the University of Saskatchewan; Prof. M. M. Tory, president of the University of Alberta, and John Hendrick, lumber merchant, of Vancouver. The Commission has been selected with a view to securing the very best body of men available fitted to deal authoritatively with questions fraught with the greatest importance to the industrial and commercial prosperity of the country.*

* For a detailed statement as to the powers and duties of the Commission see the *Labour Gazette* for June, 1909, page 1337.

II REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N. S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

LABOUR conditions were less active than usual owing to the strike at the Dominion and Inverness Collieries, but compared with the last two weeks of July, conditions in these districts had improved. The steel industry has held its own, and the usual activity pervades every department both at Sydney and Sydney Mines. The building trades have suffered most in the colliery districts, and work in this line will continue suspended until labour conditions become more settled. The electric tramways

and shipping have also been affected by strike conditions. Business generally has been very quiet. A large number have come into the district to work in the coal mines, a majority of whom are unskilled labourers. This has tended to increase the outputs.

The coal output of the Nova Scotia Steel Co., for July was 74,613 tons, being an increase over July, 1908, of 24,000 tons. The coal outputs of this Company have been largely increased during the summer months owing to the opening up of new collieries. Work in the iron and steel departments of this Company continued active.

The Sydney Steel Works had a busy month, every department being active. Excavation work on the foundations of the coke-ovens and blast furnace is being carried on as rapidly as possible.

Owing to the strike at the Dominion Collieries the Steel Company imported six cargoes of coal during August.

The woodworking factories reported business in the colliery districts much curtailed. The foundries have been unaffected by labour unrest.

Wholesale and retail trade was quiet.

CONDITION OF LOCAL INDUSTRIES,

Agriculture.—The hay crop owing to the long drought before cutting was not as heavy as was expected, and was therefore not a good average. Abundance of rain lately has tended to improve the other crops.

Fishing.—Fish were not plentiful during August. Lobsters were not up to the average this season and fishermen reported cod scarce except in deep waters.

CONDITION OF PARTICULAR TRADES.

The building trades were dull, but other skilled workmen were active, with unskilled labour in demand.

WESTVILLE, N. S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during July was very brisk; nearly all departments of industry were fully employed. The coal production in this district showed an increase over the preceding month of about 12,000 tons. The Acadia collieries reported an increase of some 4,000 tons, and the Drummond an increase of about 8,000 tons. General activity was the rule in all industries in the district, but owing to the strike in other counties the outlook is by no means bright for any increase in the coal output of the Province as a whole.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in the town and district have harvested a fair hay

crop, and the grain and root crops look very good. Copious rains fell during July and August.

Lumbering.—The lumbering industry was quiet, but a fair amount of work was provided in getting out supplies of pit timber to the collieries. The local sawmill was fairly active.

Manufacturing.—Reports from the manufacturers were favourable.

Mining.—This industry was active. The collieries in Westville worked 25 days during August. The supply of labour was about equal to the demand. A notice was posted at the Allan shaft, Stellarton, asking for miners and loaders. Fifty-one tons of fire-clay were produced at the Drummond Colliery during July.

CONDITION OF PARTICULAR TRADES.

Activity prevailed in the metal and engineering trades. Horseshoers were fairly well employed, journeymen tailors, boot and shoe workers found trade fair. Bakers, confectioners, butchers, meat-cutters, and ice-handlers were active. Street railway employees were busy, and teamsters were well employed.

HALIFAX, N. S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market in August was favourable. All engaged in the building trades have been well employed, with the exception of stonecutters. The value of repairing and building permits showed a falling off, being but \$23,827.50 from July 27 to August 27, while the figures for August, 1907, were \$45,396 and for August, 1908, \$159,007. Nevertheless good progress was made on the new public schools, the cathedral and other structures. The railway round house will be completed on September 1st. The structure will then be ready for occupancy by the I.C. R., as soon as some interior plant has been placed in position. Much progress has been made on the Post-Office repairs;

concrete floors are now being put in and tenders have been called for for the installing of the heating apparatus.

The Silliker Car Company, which has already constructed cars for the Canadian Northern Railway Company, has recently completed two combination baggage and passenger cars for the same Company. The Company is also constructing box cars for the Anglo-Newfoundland Development Co., and has about completed a combination sleeper and first-class passenger coach, which will be used as an official car, and is to be forwarded September 10. It will also construct two "pay-as-you-enter-cars" for the Halifax Electric Tramway Co., to be delivered during the autumn.

Work along the waterfront has been of a varied nature during August. The export trade to the West Indies has been dull, several vessels returning with empty bottoms. On the other hand importations from Great Britain, notably from Glasgow, have been above the average, and have shown a gain over 1908. The Allan Liner *Mongolian* arrived on the 24th inst., with over 1,800 tons, the largest cargo for two years, being made up partly by 8,000 packages of Scotch sugar, 140 tons boiler plate, 60,000 fire-brick, and miscellaneous cargo. The export trade during the coming months is expected to be active, and in anticipation the Furness-Withy line is contemplating the placing of two more steamers on the route between Halifax and Great Britain.

Work on city improvements during the month has been above the average, the fortnightly wages paid out August 11, being \$5,714.05 on streets and \$1,665.35 in water dept., a total of 7,379.40, the largest of the year.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Has been comparatively quiet among local fishermen for the month and while herring and mackerel have been reported east and west, there have been no large catches, with the result that prices have advanced. The presence of sword fish in our waters also accounts for the prevalent scarcity, but there have

been many catches of these fish, which are being sold in local markets. Halibut, haddock and codfish were taken in small quantities, by shore fishermen, while local bankers are reported doing fairly well.

Manufacturing.—Has been up to the average.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy. Carpenters and joiners were better employed than in July. Painters had a fair month, but not as good as July. Plumbers had a busy month. Stonecutters were decidedly dull. Builders' labourers were busy.

Machinists and engineers were dull; this was caused mainly by the laying off of I.C.R., hands. Electrical workers were busy, boilermakers had a dull month, shipwrights and caulkers had a fair month, other lines were normal.

Printers, pressmen and bookbinders had a fair month, but there were more idle hands among the former than in July.

Tailors had the usual dullness of August, though ready-made workers were up to the average.

Butchers, meat-cutters, ice cutters, and drivers, barbers and delivery employees were busy.

Freight handlers had a fair month. Maintenance of way men were up to the average, as were railway clerks. Street-railway men were well employed. Long-shoremen had a fair month, while unskilled labour had above the average amount of employment.

AMHERST, N. S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market remained the same as during the two preceding months. The main industries reported conditions improving, but the closing down of the box car department of the Rhodes-Curry Company threw approximately 400 workmen out

of employment, and from present indications this department will not be opened again until near the end of the year. The Malleable Iron Company's plant, which has been closed for the past eighteen months, will resume operations about the first of September, with fifty workmen, which number will be gradually added to. Building was somewhat slack. Extensions were being made to the Maritime Winter Fair buildings at a cost of \$5,300, and several dwelling houses were in course of erection. There has been a marked decrease in building compared with any year of the past decade.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather was excellent for haying, and the crop was gathered in good condition. Other crops promise well, even better than last year.

Lumbering.—Shipments of lumber continued active; over 12,000,000 feet of lumber were shipped from Pugwash alone this season to the European markets.

Manufacturing.—Manufacturing industries were active, except the box car department of the Rhodes-Curry Company, which was completely closed down and between 300 and 400 workmen out of employment; it is doubtful if operations will be resumed before the end of the present year.

Mining.—The strike of coal miners at Springhill caused a pronounced business depression and much loss of employment.* The Maritime Gypsum Company's plant after being idle for two years is now working, the Company having spent \$30,000 in new equipment and expecting to commence shipping to the American markets in September.

CONDITION OF PARTICULAR TRADES.

Bricklayers had little local work, but outside contracts provided them with considerable employment. Carpenters and joiners, and plumbers were fairly well employed. Stone cutters were dull, having less work than at any time during the past three years. An improvement

was noticeable in the engineering and metal trades. Woodworkers were fairly active, and carriage and wagon makers busy. Car builders were very dull, some 300 to 400 being out of employment. The printing and allied trades were rather dull, with no demand for additional help. Journeymen tailors were well employed and garment workers fairly busy, while boot and shoe workers were busy. Bakers and confectioners were also busy, trunk and bag makers steadily employed, and furriers busy preparing for the fall trade. There were large numbers of unskilled labourers unemployed.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during August differed little from that of July, the chief feature being the departure of about 500 harvesters for the Canadian West. The weather was fine for outdoor work, which was carried on briskly. In the city, good progress was made on the new Canadian Bank of Commerce building and several other lesser contracts. Both wholesale and retail merchants reported a good month. The tourist traffic was heavy, increasing hotel and other business.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of the month found harvesting starting in several sections of the Province, the hay crop having been saved in good condition. The crop this year was better than the average. The outlook for wheat, oats, barley, etc., is unusually good. The harvest excursion to the North-West took away about 500 persons, only about half of the number that went last year. There is a scarcity of farm help in consequence.

Fishing.—Since the close of the lobster season in July, a number of the

*For statement in detail with regard to this disturbance see article on Trade Disputes during the month of August

fishermen have been engaged in cod fishing and other branches of the industry, but a number will be idle until the oyster season opens in October.

Mining.—Boring for coal, oil and gas was carried on near Woods' Islands and a depth of 1,800 feet reached without any minerals being met.

Railroad construction and employment.—The various works were continued and the contract let for the erection of a new engine house in Charlottetown. Work on the latter will start at once.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, lathers and plasterers, plumbers, stonecutters, and builders' laborers were active. Carpenters and joiners, painters and paper hangers were busy.

Iron moulders, workers and helpers, machinists and engineers, steam engineers, electrical workers, linemen and sheet metal workers were active. Bicycle workers were busy.

Woodworkers, upholsterers, carriage and wagon builder's and car builders were active.

The printing, clothing, leather, food and tobacco preparation and transportation branches were active. There was a fair demand for unskilled labour.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during August has been fairly active in most lines. The call for skilled and unskilled workmen has been good, but as heretofore the supply has been equal to the demand. A comparison with August, 1908, is favourable, though owing to the extensive public operations then in progress much outside labour was required, and a larger amount of money was paid out to workmen. Building operations have been fairly active, several houses and two large brick blocks being under construction, and carpenters and bricklayers

were busy. The indications point to quieter times in the building trades. Houses seem to be more plentiful and rents will probably weaken. Local manufacturing concerns reported a very good month with normal conditions. The Provincial Bank of Canada is opening a branch office here; a large three storey block is being constructed. Retail trade has been satisfactory and wholesale trade good. Real estate was quiet and firm. J. D. Creighton & Co., have allowed their staff a Wednesday half-holiday during August. No material changes in hours of labour or rates of wages have been noticed and relations between employers and employees have been harmonious.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very active. Upland haymaking is about over and marsh haying is fairly along. A little grain harvesting has been done. Hay is a very good crop, slightly under that of last season which was an unusually large one. Grain crops promise to exceed those of last year, and root crops are excellent. Fruit is average. Farm help and domestic servants are still in demand. The Provincial Immigration Department has already brought out a number of Scottish farm labourers and domestics, and has readily found places for them. The Western Harvest Excursions on August 11th took fewer labourers away than in previous seasons.

Railroad construction and employment.—The double tracking of the I.C. R., between Moncton and Painsec Jct., has been completed and trains are now running over it.

The estimates of the construction of the Transcontinental Railway for July, in New Brunswick, reached the highest figures for any month since work started, amounting to \$646,970. As the most expensive parts of the construction are nearly completed the figures in future will probably show a falling off.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and carpenters were busy, painters and plumbers active, and builders' labourers in fair demand.

Steady conditions prevailed in the various metal trades.

Employees in the woodworking factories have been active throughout the month. The barrel factory was active.

Printers and pressmen reported conditions active.

Journeymen tailors, garment workers and milliners were active.

Bakers and butchers were active.

Quietness prevailed in the leather trades.

Barbers were active, clerks and stenographers steady, hotel, restaurant and theatre employees and laundry workers active.

Passenger traffic has been heavy and freight traffic average. There was a good demand for train crews and fair time was made by many of the men.

For unskilled labour, there was a fair demand at \$1.50 per day. The local supply was equal to the demand and few unemployed were noticed.

DISTRICT NOTES

Bathurst.—Considerable building is in progress. Three large sawmills are running with both day and night shifts. Work on the spur line from Bathurst to the Drummond mine is being rapidly pushed ahead. The dredging of the channel to the wharf is in progress.

ST. JOHN, N. B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market during the month of August were very favourable, and nearly all were well employed. Building operations were carried on vigorously. Bank clearings for the five weeks ending August 26, were \$7,153,623, and for the corresponding period last year \$6,654,428, being \$499,195 greater in 1909 than in 1908, and \$1,278,108 in excess of the four weeks ending July 22, of the current year.

The following were the prices quoted for provisions on the 28th., Lamb, 11 to 14 cents per lb. by the quarter; beef,

10 to 20 cents per lb., chickens, 75 cents to \$1.50 per pair; turkeys, 25 cents per lb.; pork, 14 to 15 cents per lb.; veal, 12 to 16 cents per lb.; corn, 12 to 14 cents per dozen; squash, 3 cents per lb.; tomatoes, 8 cents per lb.; potatoes, 65 cents per bushel; carrots, 3 cents a bunch; beets, 3 cents a bunch; parsnips, 4 cents a bunch; celery 8 to 10 cents a bunch; lettuce, 3 cents a bunch; cucumbers, 15 cents per dozen; cauliflower, 10 to 20 cents each; onions, 5 cents per lb.

A meeting of the Maritime Grocers' Guild was held on the 25th of August.

The city cashier paid out to civic employees and labourers the sum of \$20,-842.85 for the four weeks ending August 20.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Advices from Hartland and vicinity state that the grain and potatoes are in excellent state. Oats and wheat are well developed, and only need warm sunshine to make them fit for the reaper. DeWitt Brothers, produce dealers, of Hartland and Fairville, will open the potato market shortly, and will pay 90 cents to \$1. per barrel at the outset. New oats have appeared in the market, bringing 45 to 50 cents per bushel.

CONDITION OF PARTICULAR TRADES.

The building trades were active, with the exception of plumbers and steamfitters who were quiet. Sheet metal workers were dull, but other metal trades were from active to busy. The woodworking, printing, clothing, food and tobacco preparation, and miscellaneous trades were well employed. Railway employees, steamboatmen, etc., were busy. Unskilled labour was active.

DISTRICT NOTES.

New River.—A sawmill is to be erected and put in operation this fall near the bridge, on the Grand Southern Railway. L. B. Knight, of Musquash, will have supervision over the work in the interest of the Inglewood Pulp Company.

NEWCASTLE, N. B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of July has not shown much improvement compared with the previous month. Business was somewhat quiet and money scarce, compared with preceding seasons, though no failures were reported. The weather has been all that could be desired for harvesting the hay crop, and for the ripening of the grain and root crops.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busily employed the past two week harvesting the hay crop, which averaged about one-third of that of last season, but which was of excellent quality. The wheat and oat crops will be much better than those of last season, and to some extent will make up for deficiency in the hay crop. The root crop is also expected to be a good one.

Lumbering.—The lumber mills were all running full time and the product bringing fair prices. The lumbermen will soon commence operations in the woods. Sinclair Brothers have made arrangements to commence operations, and have purchased fifty horses, mostly draft horses. This firm did not operate last winter.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were fairly busy at good wages. Carpenters, joiners, lathers and plasterers were quiet. Building mechanics were receiving from \$2.50 to \$3.50 per day of ten hours, and helpers from \$1.75 to \$2.00 per day.

DISTRICT NOTES.

In the parish of *Derby* employment is slightly more plentiful than here, a large Roman Catholic church and several tenement houses being under construction.

Carriage and wagon makers were nearly all unemployed; business in this line has been almost unprecedentedly quiet, chiefly owing to the scarcity of money.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been quiet and though the building and shoe trades showed some improvement, there was a surplus of men in most branches.

A strike took place in the planing mills and box factory of A. Gravel and Company at Etchemin, on August 2nd. About 200 men were affected.*

Another foundation crib for the west wall of the breakwater extension was placed in position early in August.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—An excellent hay crop has been gathered, the yield being heavier than last year. Roots promise to be abundant. The harvesting of the other crops was in progress, and good yields were reported, notwithstanding the late date of sowing. Ploughing was commenced in the surrounding parishes about the middle of the month.

Railway construction.—The Canadian Northern Railway began the operation of its new branch from Quebec to Harvey Junction. The approaches to Quebec of the Transcontinental Railway are about to be started anew and pushed through from Sillery to Quebec. These works have been suspended since the collapse of the bridge. The work will proceed from the Sillery end only, as the actual terminus has not yet been decided upon by the municipal and railway authorities.

Lumbering. None of the big mills have as yet finished their cut and the majority will be kept busy until the frost. Several gangs have been already sent into the woods and the indications are for a heavy cut.

CONDITION OF PARTICULAR TRADES.

The building trades were generally active, though stonecutters were quiet. The metal trades were active with the exception of boilermakers who were quiet. Printers were active, boot and shoe workers on the whole were quiet, as were also cigarmakers. The leather trades were quiet. Miscellaneous employees, including hotel, restaurant and theatre employees, and laundry workers, were busy. Railway employees had a good month, but ship labourers and longshoremen were somewhat quiet. The supply of unskilled labour was in excess of the demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions compared favourably with those of the corresponding month of last year, especially in the building trades. Factories and lumber mills were working full time, and the corporation was employing a number of men on the streets. Commercial activity has increased compared with the same month of last year. Both wholesale and retail merchants reported a good month. Rates of wages and hours of labour were the same as usual. There were no report of strikes or lockouts.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Hay was a very heavy crop. The grain and root crops promised well. There was rather a scarcity of farm help.

Lumbering.—There was marked activity in the lumber business.

Manufacturing.—Factories were all kept busy.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were well employed this month, as was every one in the

(*) See article dealing with trade disputes during the month of August.

building trades, fine weather helping. The metal, engineering and shipbuilding trades were fairly well employed. Woodworkers of all classes were well employed. There was marked activity in the printing trades. Journeymen tailors were fairly busy, glove makers were active, and boot and shoe workers had steady employment. Bakers and confectioners were kept busy, as were butchers and meat cutters, ice drivers, cigar makers and tobacco workers. Tanners and curriers were quiet. Barbers were well employed, also clerks, stenographers, delivery employees, hotel and restaurant employees. Transportation was fairly active this month. There was a good demand for unskilled labour; the supply was about equal.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have been very active during the month. All branches of industry have been busy, and an improvement was noted in the machine shops. Several heavy orders have been secured by the Jenckes Co., and the other shops have work ahead. The Canadian Pacific Railway Company has let the contract for the new station, and other buildings which they will erect here in connection with making Sherbrooke a divisional point. In addition to this work about 150 men are employed putting in new rails and extending the yard.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting was general towards the latter part of the month. There was a heavy demand for help. The hay crop is below the average, and in many places is only about a two-thirds yield. The quality however, is good.

Manufacturing.—All branches of manufacture were busy, and in the Paton mills help is being advertised for. This company has also started up a knitting

plant, which will give employment to a number of hands.

Railroad construction.—The C.P.R. Co., is giving employment to a number of hands in connection with improvements at the Sherbooke yard.

CONDITION OF PARTICULAR TRADES.

The building and allied trades were busy. Moulders and iron workers were active. Electrical men and linemen were busy, with blacksmiths active. The woodworking trades were busy. The printing trade was active. Journeymen tailors and garment workers were somewhat quiet. Bakers and confectioners were busy; butchers quiet, while there was more activity in the cigar trade. Barbers, clerks, hotel employees, etc., were very busy. This was due to the fact that the Exhibition was being held for a week. Railwaymen have had rather a quiet month, while street railway employees have been busy. Unskilled labour was very busy.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. V. Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During August the condition of the labour market was more active than in the corresponding period of 1908. The building trades were active, considerable building operations having been commenced, but there was no demand for extra hands. Sash and door factories were active. Civic improvements gave employment to a large number of men. Quietness prevailed in the metal branches, but pronounced activity was reported in the leather industry, as well as in musical instrument factories. The Ames-Holden boot and shoe factory was quieter than in August last year, but the Coté establishment had a very active month. The additions being made by the latter company to its plant advanced rapidly; when they are completed a larger number of employees will be required in the factory. At the city hall there was collected

during the month the sum of \$6,850.78; the expenditure was \$4,018.42. In the water works department the receipts were \$4,100.29, and expenditure \$1,926.26. The sum of \$5,856.52 in arrears were collected, giving an increase of \$2,647.02 as compared with the corresponding period of last year. In the month of July there was collected \$3,942.47 more than in July, 1908. Wholesale and retail trade was fairly active. The banks reported a good month. There were no labour difficulties and no changes in wages or hours.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions continued active, the weather being propitious. Farm labour was in demand in the district. Farm produce continued to bring high prices.

CONDITION OF PARTICULAR TRADES.

The building trades were on the whole, well employed. Iron moulders and core-makers were quiet, but the other metal trades were fairly active. Woodworkers reported an active month. Printers were fairly busy. Journeymen tailors and garment workers were active, and boot and shoe employees were busy. Bakers, butchers and ice handlers were busy, as were also the leather trades. Active conditions were reported in the miscellaneous trades. Unskilled labour had a good month.

DISTRICT NOTES.

Sorel.—Great activity prevailed in the shipyards at St. Joseph, where besides the repairing of the dredging fleet a large steel vessel was being built. This vessel is 222 feet long by 34 feet 6 inches in width and 22 feet in depth. She will have three decks made of steel. The hull is to be divided into water tight compartments. This vessel will have twin screws, will cover 11½ knots per hour, and will be furnished with a wireless telegraph system. Two boilers of the marine return tube type, 14 feet in diameter and 10 feet long, will supply the steam to the

engines which will be of the triple expansion type.

The Duhamel Brothers boot and shoe factory of Sorel was in full operation and new hands were being taken on. The tannery owned by the same firm was also very busy.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was more active than in the preceding month or in the corresponding month of last year. Notwithstanding the large number of carpenters and joiners at work on repairs to the convent of the Notre Dame nuns, extra hands from outside of St. Johns had to be sought. The Windsor canning factory was erecting an addition, and will give work to a larger number of employees. Activity prevails on the Government wharves; the work will not be terminated this season. Manufactories who in July laid off a number of hands have taken them on again. Wholesale trade was very active, but there was a slackening off in retail trade. Banks reported satisfactory conditions. Owing to inability to secure broken stone the corporation was compelled to abandon its cement work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers stated that the hay crop on the whole, was slightly better than last year, but did not exceed the average. On the other hand the grain crop is much superior to last year's and will be above the average. There was a good demand for farm hands.

CONDITION OF PARTICULAR TRADES.

The building trades were well employed; there was a large increase in building activity. The metal trades were fairly busy, but without exceptional prospects. The woodworking and printing trades

reported an active month. Dullness prevailed in the clothing trades. Bakers and confectioners were very busy, as well as hotel and restaurant employees, owing to the large number of tourists. Laundry workers were obliged to put in extra time. Navigation was very active, passports being granted by the Customs Department to 839 vessels coming from the the United States or ascending the Richelieu river during the month of July.

DISTRICT NOTES.

St. Lambert.—Factories were in full operation and building was very active. The Sutton County Electric Railway under construction will help this town very considerably.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Last year very few classes of workmen were well employed during August, whereas this year all, with few exceptions, were active, and there was a keen demand for certain classes, especially in the building trades. Seventy-two building permits were granted during the month in the district of Maisonneuve, valued at \$155,500, besides permits for repairs aggregating in value over \$44,000. This activity has had the effect of slightly increasing wages, and those who last year were obliged to suffer a reduction returned to their former enhanced rates. There were no labour difficulties.

CONDITION OF PARTICULAR TRADES.

Bricklayers were very active; the other building trades were busy. With the exception of iron ship builders, caulkers and bicycle workers, who were quiet, metal workers had a fair month. Woodworkers had good month. Busy conditions were reported in the printing and clothing trades. Cigarmakers were quiet, but butchers, bakers and ice handlers

were busy. The leather trades had a fair month. Ship labourers and long-shoremen had a fair month, with prospects for good fall trade.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of August has been a very active one in nearly all branches of the skilled trades, and the prospects are for a busy fall and winter season. The month, however, has been more or less uncertain for corporation labourers and unskilled labour, owing to differences between the members of the street and road committee at the city hall, preventing the necessary funds being voted for civic improvements. In consequence about 1,500 labourers have been deprived of work.

There passed through the Lachine canal during July, 1,512,814 bushels of wheat, 22,000 bushels of corn, 117,226 bushels of oats, 43,357 bushels of barley, 81,959 bushels of linseed, 1,870 boxes of eggs, 465 boxes of butter, and 59,936 boxes of cheese. This was a considerably heavier return than last year. The canal also reported 656 steamers and 500 barges of a total of 464,861 tons. The number of passengers was 24,903.

There were granted 181 building permits in July, 1909, of a value of \$562,156, compared with 131 in July, 1908, of a value of \$391,620, or an increase of 50 permits and a value of \$170,536 in the present year. There were 76 repair permits, of a value of \$147,970 granted in July, compared with 46 permits of a value of \$41,785 in July 1908.

According to the valuation roll, the taxable property of Montreal has increased \$17,000,000 as compared with last year. The total value of real estate has increased from \$300,000,000 in 1907, to \$320,000,000 during 1909. This increase was not due to the annexation of the surrounding towns but to increasing values within the city.

The monthly report of the Montreal clearing house for July showed an increase of 36 per cent as compared with July, 1908, and of 20 per cent compared with July, 1907. For the six months ending July 31, 1909, the total clearings were \$1,003,808,738.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Business in farm products and in fish was active.

Manufacturing.—Conditions in this industry were good. The rubber factory reopened its doors after being closed for nearly a month and a half.

Railway construction.—The Montreal Street Railway Company was active on construction during the month.

CONDITION OF PARTICULAR TRADES.

The building trades were active. Metal polishers, buffers, platers, boiler-makers and horseshoers were busy, the other branches of the metal trades were active. Activity was reported in the woodworking, printing, leather and transport trades. Journeymen tailors and garment workers had a good month, as also had boot and shoe workers. Butchers, bakers and ice-handlers were active. Cigarmakers and tobacco workers were well employed. Hotel, restaurant, theatre and laundry employees were active. Unskilled labour was quiet.

HULL, QUE., AND DISTRICT.

Mr. Rod. Laferrière, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions of employment in August were very favourable, the market for labour being busier than in the previous month. The activity displayed in every branch in town made men scarce for the harvest and lumber woods. The unprecedented price of \$35 per month and board was offered for farm hands, but as it was for temporary work only, few engagements were made. Lumbermen

are also refusing to hire for less than \$26 per month. So far, a few gangs have been sent up at last winter's wages of \$18-\$26, but their number was limited, and agents were sent down to Montreal where they were no more successful, men refusing to go up for last year's pay.

A welcome renewal of activity in the mica industry is announced for the near future. This business which has been dormant for the last three years, and the failure of which threw many hundred men and girls out of employment, will, it is asserted, resume its past activity. Mica manufacturers have started buying the sizes of mica which they refused previously. It will be remembered that large stocks of that mineral were left in the hands of the mine owners, the manufacturers refusing to buy large and small sizes alike, and the former preferring to close down their mines rather than run the risk of losing more than half their production. It appears the manufacturers are now willing to buy all the mica, and it is expected that mines and local trimming houses will soon start operations. This would mean work for about 500 Hull men and girls. As a start the Cincinnati Mica Company has opened up a trimming shop at Gatineau Point, and employs 40 girls. A local firm has kept in store for the past three years fully \$25,000 worth of mica which it would not sell on the large size basis.

The price of lumber has gone up in the last fortnight \$2 and \$3 per thousand on the higher grades. Shipments are very brisk owing to renewed activity in the United States. Pulp manufacturers asked the Quebec Government for the removal of the 25 cents duty on pulp exported to the United States.

The prosperity of the town is evidenced by the report of the assessor for the current year. The population has increased by 1,000 and is now 16,000, and the increased assessment is \$400,000, mostly all made up of new constructions or improvements to old buildings.

The customary holiday season granted to the match shop girls at Eddy's was brought to an end in the course of the month. It was about a fortnight shorter

than usual, owing to the abundance of orders ahead.

On Monday the 30th, four municipal by-laws involving a loan of \$115,000 were voted on and carried by the rate-payers of Hull. The main object of the loan is to build a trunk sewer for the drainage of the city.

Mr. Bourque, a contractor of Hull, has secured the contract for the completion of the Roman Catholic church at Rockland for \$40,000. Mr. Bourque has his shops in Hull. Another local firm of contractors, Messrs. Caron and Pepin, have secured about \$100,000 worth of new constructions in Ottawa and the suburbs. The new Normal school will be ready next week. It was built at a cost of \$75,000 including site, by Messrs. Caron and Pépin. The construction of Hull's new playhouse has started and the undertaking is being financed by a local firm to the extent of \$30,000. The theatre will be ready by next January.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The hiring of common labourers was brisk in nearly every industry during August. The demand for harvest hands in the west took away 1,600 men from Ottawa and vicinity, a greater number than was taken a year ago. Wages were about \$45 a month and board. The lumber, pulp, paper and carbide industries depending on Chaudiere water power were not hampered as last year, when many men were thrown idle from low water. Hiring for the lumber camps was more active than in 1908, also, on account of a stimulus to the lumber trade following the settlement of the United States tariff. This improvement in lumber trade is not so much due to the reduction of the tariff on Canadian lumber as to the greater demand consequent upon the betterment of other industries. Municipal work is on an unusually extensive scale, the weekly pay roll amount-

ing to \$8,000. The labourers on the Grand Trunk hotel numbering 100 were idle for a fortnight pending arrangements for proceeding with the work. The building trades were busy on large contracts for apartment houses, dwelling and business blocks. Permits issued in July totalled \$760,100 in value, compared with \$265,100 in the month of July last year. The permit for the new Grand Trunk station was issued in July last, the amount being over \$400,000. Carpenters have been very scarce.

The early closing movement was furthered in the beginning of the month by the change of management of the T. Lindsay, Limited, establishment, which resulted in an order closing the store at 5 o'clock the first five days of the week the year round and 6 o'clock on Saturday, instead of 6 during the week and 9 on Saturday. The store will open at 8 a.m. instead of at 7.30. Subsequently a change was made in the hour of closing from 5 o'clock to 5.30 on the first five working days of each week. About 150 clerks benefit by the change. The C. Ross Co. adopted noon closing on Saturday during August. Previously, Murphy-Gamble Company, Henry Birks and Sons., A. Rosenthal and Sons and some smaller stores practiced noon closing during July and August, giving in all about 400 clerks the half-holiday in Ottawa. One of the largest stores still adheres to the limit of the city by-law and remains open till 6 o'clock, five days, and 9 o'clock on Saturday. Another big store closes at 6 o'clock the year round. The International and National Labour Councils of Ottawa passed resolutions of appreciation of the action of the Lindsay Company, in allowing its employees the extra hours and is advocating a wider application of the rule.

The plentifulness of employment in the Ottawa district is shown by the reports of the Rescue Mission whose inmates have dropped from an average of fifty to twenty. The management of the Mission has decided to purchase a farm where the men under its charge can find suitable employment.

An increase of from six to seven cents

a quart in the price of milk affected the cost of living on September 1st. Potatoes dropped from \$1.25 per bag to 75 cents; other vegetables were correspondingly cheap at the end of the month compared with the beginning. Eggs and butter advanced 10 per cent.

The building contractors signed an agreement with the Bricklayers' and Stonemasons' International Unions providing a wage of 50 cents an hour for five years. This rate has been in force for the last two years, the agreement declaring it having expired. In the new agreement it is provided that the present 9-hour day shall remain in force until May 1st, 1911 and after that the day shall be 8 hours. Three hundred tradesmen are affected and about 50 employees.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in the Ottawa Valley benefited greatly by rainfall in the month of August. The hay yield was only ordinary, but grain and roots promise to be an excellent yield. The fruit crop was heavy. Forty-five hogs were ordered to be slaughtered on farms near Ottawa owing to an outbreak of disease resembling cholera.

Manufacturing.—Manufacture of clothing and similar wares was brisk. The Ottawa Car Company, which turned out eight cars for Calgary, has orders for four cars for Vancouver, and for eight for Montreal.

Lumbering.—Lumber prices have advanced 10 per cent. in the upper grades of pine on account of orders from Chicago and the Canadian West. The box lumber and shipping cull pine which was slow on the market is firm in price for the first time this season and promises to rise. The production of lumber has been large. The Upper Ottawa Improvement Company reports the drive on the Ottawa well advanced and sawmills have had a better supply of logs all summer than for many seasons past. Several gangs of river drivers were released during the month, but were immediately employed as shanty hands at from \$26 to \$30 month.

CONDITION OF PARTICULAR TRADES.

The building trades were busy. Iron workers, electrical workers, linemen, blacksmiths, car builders and garment workers were very active. Printers were busy, and the clothing trades were active, but the food and leather trades were quiet. Delivery and transportation employees were busy and unskilled labour very busy.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Unprecedented activity characterized the labour market in Kingston during August. This was particularly the case in the building trades. The waterworks committee called for tenders for painting the water tower, but did not receive a reply, painters being very busy. On the 6th of August the recently constructed subway at the outer Grand Trunk Railway station was completed and thrown open to the public. During the month seven blocks of macadam pavement were completed. Some difficulty was experienced in letting the contracts for the excavation for the two new buildings at Queen's University, it was left in the hands of a special committee and the work of excavating was begun. The adding of an addition to the Hotel Dieu was commenced; also the construction of several small buildings. Tourist traffic was very heavy during the month. Merchants reported receipts satisfactory. The earnings of the steamer "Wolfe Island" (the local ferry between the city and Wolfe Island) for the first month was \$1,407, with an additional \$95.00 for special trips. Telephone service to the Island will soon be completed. The question of adding fifteen more arc lights to the civic plant is being considered. The local import duties for the month of July amounted to \$12,674.17. There were no strikes, and no changes in the rates of wages or hours of labour reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.— Farmers had an active month. Crops of all kinds are above the average.

Lumbering, manufacturing, mining, railroad construction and other industries were active.

CONDITION OF PARTICULAR TRADES.

Activity prevailed in all the skilled trades.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during July were much more active than during the corresponding month last year. There were very few unemployed men in the district as all industries were in full operation. Good wages prevailed in all trades, while the supply of labour was about equal to the demand. The two cement plants were running night and day, with over 1,000 men employed. The new stone crushing industry operated by a Toronto firm of contractors at St. Ann, gives employment to many workmen, a number of whom are residents of this city. The rolling mills were running to full capacity with a full complement of skilled men, and were busy keeping up with orders for bar iron and steel horse shoes. This is the leading industry of the city, with the Belleville Hardware Company, and the Brass and Steel Works Company good seconds. The two large foundries also reported a very busy month, and the same conditions prevailed in the furniture and woodworking factories. The canning factories were very active, canning tomatoes, corn, and pears, the yields of which are heavy this year. Merchants reported business satisfactory despite the fact that the farmers are busy harvesting their crops. Banks reported money plentiful. Many skilled workmen were engaged on the erection of the new court house addition and

other buildings. There were no changes in wages or hours of labour and no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy harvesting their crops. Oats and hay were a splendid crop, and grain and roots looked well, as did pasture. Cheese factories and creameries had a busy month; cheese averaged $11\frac{1}{2}$ cents in price.

Lumbering.—In North Hastings lumbering was active.

Manufacturing.—Activity prevailed in all branches.

Mining.—Many men were being employed in the mining industry, which was very active.

CONDITION OF PARTICULAR TRADES.

The building trades were active, especially bricklayers, masons, carpenters, painters, lathers and plasterers, plumbers, stone cutters and builders' labourers. A great deal of building was under way both in the city and district. Iron moulders and helpers, machinists, electrical workers, blacksmiths, boiler-makers, shipwrights and horseshoers were all active. All those employed in the woodworking trades had a busy month. Coopers were all employed, cheese boxes and apple barrels being their chief output. Cabinet makers were busy. Both newspaper and job printers were very busy getting out the usual fall fair prize lists. Machine operators and pressmen were all employed, and bookbinders reported a busy month. Journeymen tailors were active with no men unemployed. Bakers and confectioners, butchers and meat-cutters, ice-handlers, and cigar-makers were active. Harness makers were all employed full time. Barbers, stenographers, clerks, delivery, hotel, restaurant and laundry employees were active, and four small theatres gave employment to a number, but the regular theatrical season will not commence until September. Railway employees generally were active, with steamboat employees and longshoremen busy. Cab-

drivers, teamsters and expressmen were active. Unskilled labour was in good demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Active conditions prevailed in the labour market during August, the building trades being as brisk as last month. The Peterborough Lumber Company is building a new sawmill in place of the one destroyed last month by fire; it will cost about \$25,000. The city is about to build a bridge across the Otonabee river at Smith Street. Work on the erection of the waterworks dam has been commenced; a large number of men are at work installing machinery for handling the concrete. Mr. Jas. Bogue has received the contract for grading and sodding the Peterborough drill hall. W. Hickey and Sons are building a new steamer at No. 6 lock, for use at Fenelon Falls. The factories were all busy; the Canadian Electric Company was working some of the departments until ten o'clock at night. Merchants reported business very good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The condition of all crops is very promising, and prospects are bright for an abundant harvest. With very few exceptions the farmers were well supplied with help.

Lumbering.—The lumber mills were very busy, and big cuts are expected. The Peterborough Lumber Company expects to be running night and day as soon as it gets its new machinery properly installed.

Manufacturing.—All branches were very busy.

CONDITION OF PARTICULAR TRADES.

The building trades were all busy. Moulders and coremakers had a good

month, and machinists were busy, with woodworkers active. Pattern makers also had a good month. Printers and tailors had a good month, and bakers and confectioners reported business very good. Cigarmakers reported a slight improvement over last month, but on the whole trade was not good. Railroad employees were very busy, also steamboatmen, teamsters and expressmen. Unskilled labour was very active.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions during August continued to improve under the influence of favorable crop reports and an increasing volume of orders for the fall trade. The activity in the building trade was well maintained and the large amount of tourist travel contributed heavily to the retail trade. Skilled and unskilled labourers were generally well employed, and relations between employers and workers harmonious. The opening of the Toronto Industrial Exhibition enabled a large number to secure temporary employment.

Building permits to the number of 707, representing an approximate value of \$1,754,105 were issued in July, as compared with 506 permits representing \$1,221,000 for July 1908.

The work of laying the conduits for the transmission of electric power in connection with the city's electrical distribution plant was begun on the 23rd. The contract provides for conduits extending from Dufferin St. to the Don River at a cost of \$65,000.

The buildings at Hanlans' Point, on Toronto Island, a favorite recreation resort, were destroyed by fire on the 10th, with the loss of one life. The loss is about \$125,000, about half covered by insurance.

The Robert Simpson Co., Ltd., is putting up another addition to its department store at a cost of \$40,000.

The sale of a site in Ashbridge's Marsh by the city to the National Iron Works, Ltd., has been finally concluded, the original agreement being revised, as the area was found to be four acres larger than at first supposed. The Company paid for the additional acreage, obtaining $26\frac{1}{2}$ acres for \$37,400.

The Dominion Railway Commission has ordered the construction of a steel bridge 25 ft., higher than the present structure at the Queen Street crossing of the Don River. The cost which is estimated at \$200,000, will be paid by the railroads, except 15-per cent. contributed by the city.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy harvesting, nearly all the grain being secured in excellent condition. The yield was generally good and the grain plump. Corn was a very good crop, and the yield of potatoes promises to be large. Dairying prospects are encouraging and feed for the winter will be plentiful.

The Farmers' Dairy, recently organized with \$60,000 capital, has secured a site at 367 Queen St. West, and is installing machinery, expecting to begin operations in September.

Manufacturing.—Activity prevailed in all lines. The iron and steel industries show steady improvement, an encouraging feature being the increased demand for boilers, indicating that manufacturers are renewing or extending their plants. The activity of the building trades maintained a steady demand for hardware and structural steel. The stove trade was brisk. The new American tariff on scrap iron and steel, the duty on which is reduced from \$4. to \$1. per ton, is likely to result in an increase in price to Canadian mills, owing to the opening of a market for scrap across the border. The trade had anticipated the change by buying heavily in advance of requirements and recent contracts have been made at increased prices.

CONDITION OF PARTICULAR TRADES.

In the building trades all classes were busy.

Iron and steel workers were generally active especially boilermakers, blacksmiths, moulders and structural steel workers. Machinists were fairly well employed. Brass workers were busy. Jewelers and silversmiths had a good month.

Furniture workers, cabinet makers and upholsterers had plenty of work. Wagon makers and coopers were steadily employed.

Custom tailors and garment workers were slack. Boot and shoe workers were fairly active.

Printers, bookbinders and allied trades were active.

Butchers, bakers and confectioners had steady work. Brewery workers had a quiet month. Cigarmakers found trade fair.

Leather workers were actively employed.

Barbers, hotel and restaurant employees, laundry workers, stenographers, clerks and salesmen were busy, especially toward the end of the month when a good deal of extra help was required in consequence of the opening of the Toronto Industrial Exhibition.

Railway and street railway employees, sailors, longshoremen, teamsters and expressmen were well employed.

Unskilled labour was generally in good demand, with comparatively few out of work.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The generally favourable condition of industry continued throughout August. The only apparent changes were a decline in activity in the building trades and an improvement in transportation at the end of the month.

The contractor for the erection of the Hydro-Electric Power Commission's transforming station commenced work with a considerable force of men. It was announced that work on the transmission

line would be rushed and that power would be delivered in Toronto in five months from August 1st. Contractors on the transmission line employed many additional men. The International Acheson Graphite Company was increasing its plant and will use an additional thousand electric horsepower. The Corrogated Paper Company's new plant was nearly completed and the company contemplates doubling its size soon. Trade was somewhat brighter and the outlook for autumn was considered good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy harvesting and threshing. The yield was generally good. Fruit growers are assured of heavy crops of practically every kind of autumn fruit.

Railroad construction.—The railways have completed their extensive repair works and employment in that line is much less. General railway employment was slightly below normal.

Manufacturing.—Factories of all kinds were busy. The American Cyanamid Company further increased its staff. The Sanitary Can Company was running overtime. The Shredded Wheat Company was very busy.

CONDITION OF PARTICULAR TRADES.

The building trades were less active. Bricklayers and masons were fairly active. Carpenters were dull. Builders are importing much finishing lumber ready dressed and there is less shop and bench work than heretofore. All other building trades were quiet.

The metal and engineering trades were in a normal condition, all local men working.

Printers were active, but tailors were quiet.

Bakers and butchers were active. The half-dozen large fruit and vegetable canning plants in the city and district were commencing their busiest season and engaging many additional male and female employees in order to run at full capacity for six weeks or two months.

Barbers had a good season. The outlook for salespeople seemed dull. Hotel

and restaurant employees had a busy season, but September will bring quietness.

Railwaymen were expecting increased traffic early in the autumn. Steamboats on passenger service were busy; freight carriers were still dull. Electric railwaymen were busy. Cabmen were dull, and carters and teamsters active.

Unskilled labour was well employed.

DISTRICT NOTES.

Bridgeburg.—The Michigan Central Railway Company has erected a large new roundhouse, and improved and enlarged its yards.

Chippewa.—A large steel-working plant will probably be erected here. The municipality will give fixed assessment, wharfage privileges and other concessions. The rebuilt smelting plant was in full operation.

Niagara-on-the-Lake.—One of the summer hotels was burned. Many persons were employed in the canning factory and in orchards and farm work during the fruit season. A government dredge removed a shoal from the mouth of the Niagara river.

Port Colborne.—Work will be commenced on the new flour mill at once. The main building will be 270 x 70 feet in size.

Welland.—A hundred men were engaged in the erection of the steel tube works. The foundry, 150 x 75 feet in size, was enclosed and two more buildings will be added. The plant will be running in January. Sixty men were engaged in building the Dain Agricultural Machinery Factory. It will be running in November. The collapse of a furnace at the Ontario Iron and Steel works threw a hundred men out of work for a short time. The town tax rate for the year is 25 mills on the dollar. A paving by-law will be voted upon.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

August was a good month for labour, all branches of industry being active to

busy, and labour generally better employed than for any previous month of the season. Civic improvement work, permanent street pavement, sewer construction, etc., continued to give employment to large gangs of men. On the night of July 31st, fire destroyed the plant of the Pure Food Canning Company, Limited, causing a loss estimated at \$80,000, and throwing out of employment temporarily, a large number of employees. The company will resume operations at the earliest possible date.

Wednesday, August 25, was the last mid-summer weekly half-day for the clerks this season. Practically all the clerks employed in the retail trades had the benefit of these half-day holidays during July and August. About 60 clerks had the holiday during June, July and August.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fruit crops look very promising. The growers by improved methods of packing and shipping are endeavouring to reach distant markets. Many meetings and conventions have recently been held in this vicinity with the above mentioned object. The results of shipments made this season have been very encouraging. About 100 persons have left the district for the North-West harvest fields, others preferring to remain here as employment was remunerative and demand for labour keen. Canneries were very busy, some working overtime.

CONDITION OF PARTICULAR TRADES.

The building trades reported employment good, and all branches of the engineering and metal trades were active, with woodworkers, upholsterers, varnishers, and polishers, wood carvers, carriage and wagon makers, and coopers also active. The allied printing trades were active, also journeymen tailors and boot and shoe workers. Bakers and confectioners, butchers and meat cutters, ice-handlers, cigarmakers and tobacco workers reported fair conditions. Leather workers and saddlers, trunk and bag

makers, barbers, clerks, stenographers, delivery employees, hotel and restaurant, and laundry employees were active. All branches of transportation were from active to busy. Unskilled labour was active, with supply and demand about balanced.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed.

Merritton.—Employment was good. Work on the new addition to the Lybster mills is progressing satisfactorily and giving employment to a number of workmen.

Thorold.—Favourable conditions prevailed in the labour market.

Ridgeville.—A new electric light and power company has been formed for the purpose of distributing power and light to Ridgeville, Fonthill, Fenwick and other places in the townships of Thorold, Pelham and Gainsborough. The company will be known as The Ridgeville Light and Power Company, Limited, capitalized at \$40,000. The charter provides also for a telephone system.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been a fairly busy one in nearly every line of industry, showing a general improvement over July. Increased activity was noted in the works of the International Harvester Company and the Sawyer and Massey Company, the demand for agricultural machinery in the western district showing large gains as a result of the prosperous conditions in that section. The iron and steel manufacturing plants had also orders ahead. The Hamilton Steel and Iron Company has been handicapped by the blowing out of its newest and most important furnace during the month, but repairs are being rapidly made, and the works will soon be running to full capacity again. Building operations have been steady, and abundance of

work is in sight. The building permits show a decrease from those of the same month last year, the figures being: 1909, \$100,250; 1908, \$117,400, but a couple of permits for large buildings have been delayed for the plans, which would have almost doubled the total for the month. The canning factories are working to full capacity, providing considerable employment. The many extensions to manufactories under way or in preparation indicate confidence in a revival of busy conditions. Two of the large dry-goods firms are also making extensions to their premises that will about double their present floor space.

The labour situation has been free from unrest. The union moulders in the stove foundries are still out, and matters have undergone no change during the month. The foundries are being operated with non-union labour, of which there seems to be an adequate supply for present needs. It was reported early in the month that the strikers were starting a foundry. A new foundry is being established but the promoters deny the strike situation is responsible, although some union moulders are interested in the company.

Superintendent McKinstry, of the International Harvester Company, reports that the stock allotted by the company for subscription by employees has all been taken up. About 625 shares, representing about \$60,000, of common and preference stock, in about equal proportions, have been applied for by employees. The stock is being sold to them at 75 for common, and 115 for preference, on easy terms of payment.

The 16-ounce loaf of bread is now general here. Bakers made an effort during the month to raise the price of cakes, but owing to opposition on the part of some of them to the increase, the attempt has been deferred for the present.

The equipment of the new technical school is nearly all in place, and the institution will be opened on September 7.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The offerings on the city market would indicate that gardener

and fruit growers have a prosperous season. Berries and currants were abundant. The early varieties of peaches were abundant and sold at from 20 cents to 60 cents per basket. The later varieties, Crawfords and other freestone fruit, are also reported to be a big crop. The canning companies are said to be offering 60 cents per basket for these, which means that citizens will be able to get first quality peaches for about 75 cents. Plums are also very plentiful at about 30 cents per basket. Apples will be a fair yield. The hot weather of the first part of the month threatened the tomato crop, as the vines were drying up, but cooler weather and rains have relieved the anxiety. San Jose scale is reported to be very prevalent in the fruit district, and to be attacking all sorts of fruit trees. A severe wind storm about the middle of the month did considerable damage to fruit trees.

Manufacturing. — The International Harvester Company is very busy. The works sent out about 80 car loads of machinery to western points during July. Stock-taking interfered with operations early this month but the company was running to full capacity about the middle of the month, and expects to keep its 1,600 employees on full time during the fall and winter months.

The Sawyer and Massey Agricultural works are also sharing in the prosperity of the western farmers, being busy on orders for that district, with good prospects ahead.

The Otis-Fensom Elevator Company is to add two more buildings to its works, one 100 by 160 feet, and the other 100 by 198 feet, the first-mentioned as a machine shop, and the latter as a foundry.

The Hamilton Cotton Company will re-build its dye-house; the new structure will be three stories, and have all modern appliances.

The Tuckett Cigar Company in concentrating its manufacturing in this city, finds itself still cramped for room, in spite of a recent enlargement, and will build a large auxiliary factory building.

The W. E. Sanford Manufacturing Company has acquired the Burton-Baldwin premises on Main and Jackson streets,

which have a frontage of 150 feet on Main, 150 feet on Jackson and 300 feet on Catherine. A building will be erected to accommodate the above clothing company's sub-contractors.

CONDITION OF PARTICULAR TRADES.

The building trades have been very active during the month, and prospects are good for the remainder of the season. No change in the strike of moulders in the stove foundries has developed during the month. The shops seem to have as many men at work as the condition of the trade requires. Other iron workers have had a good month. Metal polishers were all employed. A number of stove-mounters have left the city, some have secured other employment, and a few are working in the foundries. Blacksmiths reported conditions fair. Sheet metal workers were very busy. Horse-shoers were all employed. Woodworkers and upholsterers were busy. Pattern makers were quiet. The printing trades have had a fair month, with trade improving. Boot and shoe workers were busy. Cigarmakers and tobacco workers were all employed. Bakers and confectionery workers reported business fair. Barbers were all working. Hotel, restaurant and theatrical employees reported the usual dullness of this season of the year. Railroad employees have had a very busy month, and freight handlers have had more to do. Steamboat and street railway employees had a very active month, with some extra time worked. Unskilled labour has been pretty generally employed, the number of unemployed being very small. A number of foreign labourers left the city to take work on construction operations at outside points, which relieved the local situation materially.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in general was well employed during the month, which compared

favorably with July and was better than August of last year.

The building trades were active and the iron trades in most cases busy, with prospects very encouraging. There was a large amount of unskilled labour employed in the construction of sanitary and storm sewers, sidewalks and pavement, but the local supply was fully equal to the demand. The city pays from 15c to 20c. per hour for 9 hours. Those on the paving work receive 17½c. per hour for 10 hours. The street railway company pays 15c. to 16c. per hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy. Timely rains improved the root crops.

Manufacturing.—The majority of manufacturing establishments reported improving conditions, The Brantford Emery Wheel Co., Ltd., is erecting a new factory 90 x 36 ft., with an ell 36 x 36 ft., The larger building will be one storey high and the smaller one two storeys high. It is expected the new premises will be ready by October 1st.

Railroad construction.—The street railway Company is relaying tracks in the central portion of the city.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers plasterers, painters and decorators were busy. Plumbers were active and in some cases busy.

Iron moulders were a little busier than the previous month. Core makers, machinists, engineers, electrical workers and linemen were busy. Metal polishers, buffers and platers, and stove mounters were active, with blacksmiths busy and boiler makers active. Sheet metal workers were more active than during the previous month. Horseshoers had an average month, all local men being employed.

Carriage and wagon makers were active, as were pattern makers and coopers.

The printing and allied trades were busier than last month.

Tailors and tailoresses found trade better toward the close of the month.

Bakers and confectioners were busy. Cigarmakers and tobacco workers were active.

Leather workers and saddlers were fully employed.

Barbers, clerks, delivery employees, hotel and restaurant employees were active. Laundry workers were busy.

Railroad trackmen and freight-handlers were busy. Street railway employees were steadily employed. Teamsters and draymen were busy. Cab drivers and hackmen were active.

There were a few unskilled labourers unemployed.

DISTRICT NOTES.

Paris.—The new screen, sash and refrigerator factory is being pushed to completion. The building trades were active. There were few unemployed during the month.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During August, outdoor labour had steady employment and factory workers, with a few exceptions, were active. In the building trades there was a falling off in the amount of new work started, which affected bricklayers, but the other trades were well employed.

The city council is asking for tenders for three cement bridges to be completed this season. This means additional work for outdoor labourers. The contracts have been let for the new Hydro-Electric Power station, the contract price of which is \$18,700.

The Guelph Co-operative Association held their half-yearly meeting during the month and reported business transacted, amounting to \$29,795.43, being an advance of \$2,815.32 over the preceding six months and declared a dividend of 5 per cent. to shareholders.*

* See also opening article of present issue under heading "Notes".

Wholesale and retail merchants had a fair month.

There were no changes in rates of wages and no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very busy harvesting and reported crops very good.

Manufacturing.—Activity prevailed in nearly all lines. The sash and door factories were especially busy, having secured several large Western contracts.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported a fair month. Carpenters, lathers and plasterers had a very active month, with painters well employed. Plumbers and gas-fitters were busy. Stone cutters were well employed. Moulders had a fair month, tube mill workers were very busy. Electrical workers and linemen had an active month. Woodworkers in sash and door factories reported a good month, while carriage and wagon makers were slack. Piano and organ workers reported a slight improvement over last month. The printers and allied trades had a fair month, also journeymen tailors. Brussels carpet weavers had a good month. Bakers and confectioners had a busy month. Barbers, clerks, and delivery employees were well employed. Teamsters and carters were busy. Unskilled labour was well employed owing to the large amount of civic work in connection with street paving. The supply, however, was equal to the demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Both skilled and unskilled labour was well employed. The general activity in the labour market exceeded that of the corresponding month of last year. The supply of labour, however, was equal to the demand. Four building permits

were issued during the month, representing a value of \$13,000. Good progress was made on the erection of Chas. A. Ahrens and Company's shoe factory, the Hearn and Stumpf blocks and the addition to St. Jerome College. The building of the Star White Wear Company is nearing completion. The remodelling of the Simpson factory, situated on King Street, has been completed; the ground floor has been fitted for several stores. Mr. J. M. Schneides is completing a new block for a branch butcher's shop. Premises are being fitted up for the Canadian Express Company. Many business men have recently changed their places of business.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy harvesting the grain crops, which will be completed towards the close of the month. Some have begun threshing and ploughing for fall seeding.

Manufacturing.—About the same conditions prevailed as during last month.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners, lathers, plasterers, painters, decorators and paperhangers were busy, with plumbers, gas and steamfitters, stone cutters and builders' labourers active. Iron moulders, iron workers and helpers, coremakers, machinists and engineers, electrical workers and linemen were busy; other employees of the metal trades were active, except horseshoers who were quiet. Active conditions prevailed in the various branches of the woodworking trades, printers, pressmen, electrotypers and bookbinders reported a busy month, journeymen tailors, garment workers, boot and shoe workers an active one, and bakers, confectioners, butchers and meat cutters a busy month. Cigarmakers and tobacco workers reported conditions improving. Trunk and bag makers, tanners and curriers, and saddlers were active. Rubber, button, shirt and collar makers were busy, also barbers, broom makers, clerks, stenographers, and delivery employees. Active conditions prevailed in the laundries and among suspender

makers. Busy conditions were reported among transportation employees. Unskilled labour was fully employed.

DISTRICT NOTES.

Galt.—Labour was well employed. Steady conditions prevailed in manufacturing establishments, with a slight improvement over last month. The branch factory of Shimer and Company has ten men employed.

WOODSTOCK, ONT., AND DISTRICT.

Mr. W. N. McElheran, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly well employed during August. Tradesmen in the several factories reported orders on the increase. Outside workers, particularly masons and bricklayers, were slack, very little building being under way. There was a considerable movement from this district of farm labourers for the West, but not so many left as during the same month last year. It was definitely announced that the Tobin Arms Co., of Norwich, Conn. would locate in Woodstock. By the end of the month a carload of machinery was received and stored pending the erection of a new building. A site has been decided upon in the northwestern part of the city, and lumber for the building has been received at the local freight yards. The factory will be up-to-date, and in the start will employ probably 50 or 60 men. The Company will make firearms as well as other iron manufactures.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were well employed all through the month. The crops generally, were above the average. Wheat threshed out well, and in many instances was teamed from the thresher to the mill, selling at from \$1.05 to \$1.15 per bushel, uncleaned. The oat crop though short of straw, turned out well.

Roots give excellent promise, though somewhat retarded by drouth during the later part of the month. This also affected the pastures, causing a shortage of the milk supply. The prices of all produce remained firm, there being no natural change in the quotations since last month. The fruit crop promises well, though a blight seemed to be affecting the pear trees in some localities. This is an off year for plums in this district.

Railroad construction.—The C.P.R. Co., is replacing the rails on the Port Burwell to Woodstock branch with heavier steel, the work being nearly completed.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported a very slack month, the bulk of the work in hand being on repairs and additions. The brick work on the large addition to the E. J. Cobs departmental store was all completed and interior work was being rushed along. Carpenters and joiners were busy in the factories and planing mills, but outside work was quiet. Lathers and plasterers were all employed, though some had to seek work elsewhere, a few going to Welland to work on the new post office being built there. Painters and inside decorators were busy. Plumbers and gasfitters were all well employed, as were stone cutters. Builders' labourers were quiet. Stove moulders reported increased activity. An agreement mutually satisfactory, was arranged between employers and employees as a result of the readjustment of the percentages. It is understood that a reduction of 15 per cent was agreed upon. Machinists were active for the season of the year. Wire fence looms were all standing, this being the quiet part of the year. Stocks were being reduced by the steady receipt of orders. Stove mounters were busy. Horseshoers were active. The woodworking and furnishing trades in all branches were busy. Furniture factory employees were working full time and business was increasing. Upholsterers were very busy. Carriage and wagon makers were very busy, the sleigh trade showing increased activity, piano and organ makers were also

busy, orders coming in from both foreign and domestic firms. Church organ makers were very busy. Printers and pressmen were normal, with indications of a good fall. Knitting factory employees were very busy with orders ahead for some time. The machinery and general equipment was all in place in the new factory of the Oxford Knitting Company and the full staff was being added to. Journeymen tailors reported a very busy month. Bakers, confectioners and candy makers reported an extra busy month. Cigarmakers were all busily employed. Tanners and leather workers were active, while barbers reported business in the increase. Hotel employees reported a falling off of business, and a few found themselves out of employment. Freight-handlers reported increasing activity, both the passenger and freight traffic was good. Unskilled labourers were all employed.

DISTRICT NOTES.

Ingersoll.—All classes of labour found steady employment during the month. Carpenters and builders were busy and the factories were steadily increasing their outputs. The unskilled labour supply was well absorbed, everybody who wished work being able to get it.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in general, was actively employed during the month. Building operations were going forward briskly, several residences being nearly completed. The brick work on the tower of St. James church is finished, and the chimes will be put in shortly. Real estate was decidedly active, several properties having changed hands. The staff of workers employed dredging the river and building the dam has been increased this month. The board of works is building several cement walks which give employment to a number of men and teams.

The Customs returns for the month just passed amounted to \$10,482 and the Excise returns \$5,470.96. This is a decrease of \$106.16 from the preceding month.

Wholesale and retail merchants reported trade active.

No changes in the rate of wages and no trouble in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are busy threshing and report the yield very good.

Market prices were:—

Butter 22 to 23 cents per pound.
Eggs 20 to 22 cents a dozen.
Chickens 40 to 50 cents each.
Potatoes 25 cents a peck.
Apples 25 cents a peck.
Corn on the cob, 10 to 12 cents a dozen.
Wheat 95 cents a bushel.
Oats (new) 34 cents a bushel.
Oats (old) 50 cents a bushel.
Barley 48 cents a bushel.
Peas 70 cents a bushel.
Bran \$20 a ton.
Shorts \$25 a ton.
Live hogs \$7.50 to \$7.60 a cwt.

Manufacturing.—All industrial establishments reported conditions active.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters, plumbers and builders' labourers were very active.

Iron moulders, iron workers, machinists and blacksmiths had a very good month. Boiler makers, horseshoers and general blacksmiths were very busy.

Woodworkers, upholsters, carriage and wagon makers were active — Coopers and stave workers were busy.

Printers report trade very good.

Journeymen tailors, tailoresses and garment workers were working full time.

Bakers, confectioners and butchers had a good trade, cigarmakers were fully employed.

Barbers, clerks and delivery employees were busy, -hotel, restaurant and laundry workers were very busy.

Railroad conductors, engineers, firemen and trackmen reported work very good. Cab drivers, draymen and teamsters were busy.

Unskilled labour was well employed.

DISTRICT NOTES.

Mitchell.—The bridge works are giving employment to a number of men. A few buildings are in course of erection; the brickwork on the new Carnegie Library is nearly finished.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Wootton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The feeling prevails here that from now on conditions will be better than for the past two years. The city passed a by-law involving the expenditure of \$123,000 in the construction of Artesian wells and water mains to supply water for domestic purposes. The Hydro-Electric Commission awarded a contract for the erection of the transformer station to a London firm; it will cost \$23,000. The city also let a contract for the supplying of \$25,000 worth of materials for the construction of work in connection with the distribution of Niagara power within the city. A joint electric distribution building and waterworks plant is to be erected. The Bell Telephone Company had a gang of workmen laying its wires underground on certain streets where the weight of the cables was too great for the poles. At the Grand Trunk Railway Company's shops the men are working full time, which they have not done for two years. Railway traffic has been very heavy. At the McClary foundry two cupolas are being operated in the moulding shop, only one having been in operation for a long time. A statistical table, recently compiled, shows the number of people employed by the city to be 730, at a salary outlay of \$319,000 per annum, school salaries alone amounting to \$152,000 of the above amount.

CONDITION OF PARTICULAR TRADES.

The building trades were busy. Iron moulders were exceptionally active, some shops being short handed. Machinists, metal polishers and stove mounters were

also busy. At White's boiler works the woodworkers were working overtime. Car builders were very busy, a number of extra hands having been taken on. Coopers were also very busy. Printers and pressmen reported a slack time, with some members of their craft laying off turn about. Journeymen tailors were in their slack season, but garment workers were busy and shoe workers very busy. Cigarmakers reported trade fair, but the outlook not very hopeful. Tanners and curriers, and leather workers were very busy. Train crews reported a very busy month. Unskilled labour reported a good month, with very few out of employment.

DISTRICT NOTES.

Sarnia.—The Standard Chain works have been closed. A bonus of \$12,000 granted by the town will be returned.

London.—Mr. John Hyman, of London, has secured contracts from the Hydro-Electric Commission for the erection of stations at Preston, Paris, Woodstock and St. Thomas, amounting to \$19,850 for each station.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Mechanics and labourers in the building trades were well employed during August. The demand for skilled workers was greater than the supply, a number of contracts having to be held over on this account. The season's work consists chiefly of residential erections and repair work. Considerable progress has been made on the Ross Street subway. The Street Railway Company is erecting poles for the extension of its lines through the subway connecting with the lines at Wellington and Talbot Streets. The most important change to be recorded during the month was an order restoring the 55 hour per week schedule in the M.C.R., shops. On the railways the men were well em-

ployed. The Wednesday half-holiday, in effect during July and August, will be abolished after September 1st. Merchants reported trade fair during the month. The demand for unskilled labourers has been greater than the supply.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Wheat has been a large yield; barley, poor; oats, generally not a good crop; hay a good crop; corn, is a little below the average; potatoes, below the average; clover, looking well; roots coming along nicely and with sufficient moisture will do well; peaches, scarce; plums, a fair crop. The local markets have been well patronized.

Manufacturing.—The Canadian Corporation Company report this month quieter than the preceding month. Thomas Bros. report the month a good average, with a good supply of orders on hand. The local planing mills have had a busy month.

Railway shop employees have been busy.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were well employed during the month. Machinists, railway blacksmiths and other mechanics were well employed. Printers were busy. Tailors were quiet. Teamsters, hackmen and expressmen were busy. Unskilled labour had a busy month, considerable civic and railway construction work being done.

DISTRICT NOTES.

Port Stanley.—The season just closed has been one of the most prosperous in the history of Port Stanley. The attendance of tourists and summer boarders was large.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All branches of trade were active during the month, with the prospect for a

good fall. The carriage and wagon trades were very busy and reported large orders ahead. Planing mills have experienced a very brisk month, and have on hand a large number of orders for interior hard wood finishing which will furnish employment for skilled workmen for some time. Building permits issued were fair during the month. The canning factories were running to their full capacity, employing a large number of hands.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers were busy. Painters were somewhat quiet. Plumbers had a busy month. Builders' labourers were steadily engaged.

Iron moulders and iron helpers, machinists and electrical workers were quiet. Sheet metal workers were busy. Woodworkers in all branches were busy.

Printers and pressmen and bookbinders were fairly busy.

Journeymen tailors and garment workers reported trade improving.

Bakers and confectioners, cigarmakers and tobacco workers were busy.

Street railway employees were very busy.

Unskilled labour was in demand the latter part of the month.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the past month has been very active in all branches, especially in the building trade.

The contract was awarded for the erection of the Postum Cereal Company's plant, which will include five buildings costing \$52,000, and will be completed by January 1, next. This gave employment to a large number of men.

Wholesale and retail merchants reported trade good.

CONDITION OF PARTICULAR TRADES.

The building trades were very active, and skilled labour generally, was in demand. A great improvement, was reported in the metal trades during August. Woodworkers were very busy, especially in the planing mills, which were in arrears with orders. Printers and pressmen reported plenty of work. Journeymen tailors and garment workers were very busy. Bakers, butchers and ice handlers were busy. Barbers reported trade good. Hotel and laundry workers were very busy. Transportation employees were fully employed. Unskilled labour was in demand.

DISTRICT NOTES.

Sandwich.—The Kent canning factory started, and gave employment to a large number of hands.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fully employed during August, a scarcity being apparent in some lines, though generally the supply was equal to the demand. Considerable new building was being done. Travel by boat during the month was heavy, showing a large increase over last year. Freights by boat, however, were less satisfactory.

Market quotations were as follows:—Beef, 7 to 18 cents per lb.; pork, 14 to 20 cents per lb.; mutton, 7 to 16 cents per lb.; lamb, 12½ to 18 cents per lb.; veal, 7 to 18 cents per lb.; fowl, 17 cents per lb.; spring chicken, 22 cents per lb.; fish, (trout) 10 cents per lb.; fish (white), 12½ cents per lb.; butter (dairy), 22 to 24 cents per lb.; butter (creamery), 30 cents per lb.; eggs, 25 to 30 cents per dozen; and flour, \$3.25 per bag.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Local lumbermen were sending men into the woods and were

anticipating larger operations than last year. Men were scarce at \$24.00 to \$30.00 per month.

Manufacturing.—The different establishments were running full time with good prospects.

CONDITION OF PARTICULAR TRADES.

The building trades generally, were busy. Normal conditions prevailed in other trades, except that of hotel, restaurant and theatre employees. Those engaged in transportation, and unskilled labour, were more or less busy. There was an active demand for lumbermen.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fully employed during August excepting in one or two trades, as mentioned below. Conditions of employment generally, were busier than in the preceding month, and very much more active than in the corresponding month of last year. A number of business blocks, public buildings, residences and alterations were under way. Transportation was very active prior to the freight handlers' strike at Fort William.* Wholesale and retail trade was busy; wholesalers were receiving large shipments for the West.

There was no unrest among organized labour, except the freight-handlers' strike and the dispute between the Canadian Bridge Company and its structural iron workers. Rates of pay for this district are 50 cents an hour with a 9-hour day for structural iron workers. All other organized trades were working at schedule rates.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The fishing industry was slack.

* For statement re this dispute see article under the heading "Industrial Disputes Investigation Act—Proceedings during August" elsewhere in present issue.

Lumbering.—The lumber yards have been kept busy and mills were running full manned. About 150 men are employed in the local yards and mills of the two cities. Many carloads of lumber have been brought from mills along the line during the summer, which has kept the price of lumber down and enabled many small builders to go ahead with improvements and the erection of small houses.

CONDITION OF PARTICULAR TRADES.

The building trades were busy. Owing to the number of high class buildings in course of erection, the stone cutters were very busy. Machinists and engineers, steam engineers and electrical workers were all busy, also boat and ship repairers around the docks; this class of work will be materially increased with the facilities of a dry-dock. The printing and allied trades had a fair month, but the clothing trades were comparatively inactive. Bakers, confectioners, butchers and ice-handlers had a good month. Barbers were fairly busy and clerks and stenographers were well employed. Quiet conditions prevailed with furriers and delivery employees. Laundry, hotel, and restaurant employees were all working. Ship labourers, longshoremen and street railwaymen were all working at the close of the month. Teamsters and expressmen were fairly busy. Unskilled labour was busy in both cities, Fort William especially employing many men on street improvement.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is a general demand for labour of almost every class at the present time. The dearth is caused by the heavy demand for labourers for harvesting purposes. Opportunities of employment present themselves in almost every vocation, except on indoor work. Since

July the demand for labour has very materially increased.

During the month it has been announced that a new tanning factory will be commenced very shortly, to employ about fifty men. It is intended to treat cow hides so as to make them suitable for making winter coats.

Exceptional activity continues in the building trades, although progress has been interrupted by strikes.

Bank clearings continue to range higher than for the corresponding period of last year, and in volume are approximately that of the corresponding periods of 1907, when they attained to the highest point on record in Winnipeg. All the transportation companies were extremely busy.

Wholesale traders reported increased business as a result of the crop reports to the effect that the crop is safe from frost and that most of the wheat is cut and in stook.

There has been a considerable advance in wages during the month of August and towards the close of July. All classes of common labour employed on railroad contract work and on the maintenance of way department's special work obtained a rise of 25 cents per day commencing about the middle of July. This advance would apply to approximately 10,000 men. In the early part of the year the men were engaged at \$1.50 per day out of which \$4.15 was deducted for board. Since the advance at the close of July another advance took place about the middle of August to the extent of another 25 cents per day, and now the employers cannot get men enough at the advanced rate of \$2.00 per day, though board remains at the same rate, \$4.15 per week.

The cause of the advance is the demand for men to work in the harvest field. It was estimated that fully 20,000 men were needed to help take off the crop, but so far the actual number that have arrived for that work numbers less than 15,000. The average wage being paid is \$2.50 per day and board, and in some cases as high as \$3.50 is being paid for men experienced in handling harvesting machinery and horses. The second advance of 25 cents per day would apply to more than the

first advance (that of July) as railroad contractors found it necessary to hold their men, and their operations were on a more extensive scale towards the close of August than in the middle of July. The estimated number to which the second advance would apply would be at least 12,000 men. This estimate is based upon estimates made by employment agents making a specialty of supplying labour to contractors. The price of board for labourers is 15 cents per week less than the average price of board for the same period of last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvest will produce, according to an estimate prepared by the Winnipeg Free Press, 118,109,000 bushels of wheat, 163,998,752 bushels of oats and 30,542,000 bushels of barley, distributed as follows:—

	Wheat.	Oats.	Barley.
Manitoba.....	38,130,000	43,798,752	18,000,000
Saskatchewan...	70,130,000	87,600,000	6,900,000
Alberta—winter	2,349,000		
" spring....	7,500,000	32,600,000	5,642,000
Totals.....	118,109,000	163,998,752	30,542,000

The Manitoba Grain Growers' Association estimate the wheat yield at 107,000,000 bushels, and Mr. John Aird, of the Bank of Commerce is of the opinion that the yield of wheat will be between 115,000,000 and 120,000,000 bushels.

So far, the harvesting season has been excellent and the fears of frost on account of the crop being some days later than usual have not been realized. From some points very slight frosts were reported, but no damage has resulted up to the end of the month of August.

Railroad construction.—The chief obstacle in the work of railroad construction is the difficulty of getting enough men. At the present time the conditions are most favorable to making rapid progress, but men cannot be had.

Building Trades.—Progress has been impeded by the prevalence of strikes which have taken place amongst the carpenters, the sheet metal workers and the electrical workers. On August 25, about 1,200 carpenters went on strike demanding 45 cents an hour, as against a

prevailing rate of 35 cents per hour. On the 30th of August representatives of the men stated that 48 contractors had signed the new agreement submitted to them providing for an advance of ten cents per hour, but these did not represent those who employ a very large percentage of the men employed as carpenters. No settlement of either the sheet metal workers' strike or that of the electrical workers has taken place.

The following is a statement of the building returns for the city of Winnipeg up to and including August 31, also for the same period of 1908:

	Per- mits.	Build- ings.	Cost.
August, 1908.....	192	214	\$ 602,000
" 1909.....	270	322	1,133,850
Eight months, '08.....	1,075	1,236	4,241,500
Eight months, '09.....	1,832	2,166	7,547,700

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was considerably more active than at the corresponding period of last year, all classes of labour being in good demand. The demand for unskilled labour exceeded the supply, in consequence better wages were paid than heretofore. Advertisements appeared in the local newspapers for bricklayers and carpenters, and both local unions reported everybody working. Many harvester excursions have passed through the city, the majority of the men preferring to go further west. Several blocks and many residences have been erected this year. Work is progressing satisfactorily with the erection of the court house, and the new bridge. The Brandon Construction Company has been awarded the contract for the erection of the new church for the West End Methodists, and the work has been commenced. The number of building permits issued so far exceed that of the corresponding date last year. On the whole a busy season is being experienced.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—From every section of the district good reports of the crops were received. The larger portion of the crops are now in stook and some have been threshed. Very little damage was done, and none by frosts.

CONDITION OF PARTICULAR TRADES.

Bricklayers, stonecutters and carpenters were very busy, with masons and plasterers fairly active. Other skilled trades had a good month.

REGINA, SASK., AND DISTRICT.

Mr. Hugh Peat, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month was good. There was a steady demand for all classes of labour in the building trade, with the exception of bricklayers in which branch the supply exceeded the demand.

There has been a keen demand for workers in the harvest fields, and in some places where help has been urgently needed it is reported that as much as \$3.50 a day* has been paid. This demand for harvest help has been felt to some extent in the city and has resulted in a curtailment of the supply of labourers for work in the city. The situation, however, is not abnormal, and with the steady stream of excursionists pouring in, coupled with a proper system of distribution, the demand for labour ought to be well provided for.

Generally speaking the month has been a quiet one for retailers, but it compared favourably with the corresponding period of last year.

During the month the Provincial Government appointed a Fair Wage Officer for the Province, Mr. T. M. Molloy, a member of the Regina Trades and Labour Council, receiving the appointment.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting was in full progress throughout the district, and although it is too early to give any definite information regarding the yield, it is confidently expected that it will be above the average.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were very busy with the exception of bricklayers. Painters and decorators reported conditions very good. In the printing and allied trades, trade conditions were good. Bookbinders had a busy month. Cigarmakers were fairly active.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Workmen generally, have been fully employed during the past month. There has been a shortage both in common labour and in certain skilled trades. Building continued in full progress, and there is every prospect of the present year furnishing a new record for building activity. Many important business premises are being erected, and in all parts of the city large houses and comfortable cottages are being built.

Several new industries have been projected during the past month. The Erey-Campbell Co., Limited, a local company taking over the distributing business for the west of two large eastern firms, has been launched with a capital of \$100,000. Several proposals for the establishment of wholesale grocery houses have been dealt with by the city council. The usual summer fair was held, and in point of attendance and number of exhibits was the most successful ever held in the city.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crop reports from all over the district are of a most encourag-

ing nature. Eighty per cent. of the wheat has been cut, and with a continuation of the fine weather, cutting will be completed by about the 2nd or 3rd of September. Harvest help has been somewhat scarce this year, but no very serious inconvenience has been felt so far. Unless frost or other unfavourable elements interfere, the harvest in this district will be a heavy one, with an average yield of from 25 to 30 bushels to the acre.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were very active. Bricklayers and carpenters were especially busy. Electrical workers were active; also painters and decorators, builders' labourers and common labourers. Printers were fairly busy. Bakers, confectioners, barbers, butchers, blacksmiths, boiler-makers and engineers were all active. There has been a shortage of common labour during the month. Carpenters also have been somewhat scarce.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was a marked improvement in the condition of the labour market and all classes of labour were in demand. A large number of buildings were in course of erection, notably a warehouse for the International Harvester Company to cost \$45,000, a terrace for G. C. King, costing \$15,000, and a planing mill for the Riverside Lumber Company to cost \$10,000. Nine street cars are now running on the car line and the receipts for the twenty-seven days it has been in operation amounted to \$8,714.75, or an average of over \$300.00 per day. Wholesale and retail trade was reported very active, very much more so than during the corresponding period of last year. During the month there were 786 entries made at the Dominion Lands' office in Calgary, compared with 115 in August 1908, being

an increase of 583 per cent. There was also 183 homestead entries, and 289 homestead and pre-emption entries made. The Customs' receipts for August amounted to \$54,000, against \$37,367.37 for August last year. Bank clearings amounted to \$8,259,314, compared with \$5,226,567 for August, 1908.

CONDITION OF PARTICULAR TRADES.

The building trades were well employed, except plumbers, who had six of their members unemployed, and a number of stone cutters, in consequence of a shortage of stone. The iron trades were fairly well employed, except boiler-makers who were somewhat quiet. Employment was good in all the remaining trades.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The Carpenters' Union having come to an agreement with the contractors after an eight weeks' strike has greatly improved the condition of the labour market. On the 9th instant, the District Council of Carpenters signed an agreement to cover a period of two years from May 1st, 1910.¹

According to the building inspector's report, the value of the building permits issued for June, 1909, amounted to \$201,790, as compared with \$97,645 in June, 1908, and \$274,555 in July, 1909, compared with \$55,775 in July, 1908. During the month of July, 1909, 89 permits were issued. Had the carpenters' strike not been on at the time the record would probably have been much larger, as many were postponed.

The Edmonton Foundry Company having completed its new \$35,000 building is now in a position to employ three hundred workmen.

¹ The terms of this agreement are given in full in the article on "Trade Disputes during August" published in the present issue.

Bank clearings for July totalled \$4,183,286.99; the total in July, 1908, was \$2,955,201.91.

The growth of the Municipal Street Railway system is shown by a comparison of its earnings for the two past months of the present year. In June the number of passengers carried was 182,806, compared with 204,546 in July; the receipts for June were \$7,977.75; in July they amounted to \$8,721.61.

The property assessment for the city amounted to \$23,569,470; compared with last year this is an increase of \$1,025,750.

Wholesale and retail trade was more active than in the previous month.

In railway circles it is reported that every effort is being made to handle the traffic which will be offered when the crops begin to move. A much larger number of cars are available than last year, and distribution has already been effected so that export grain may be handled most effectively.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting is now well under way and the quality of the crop promises to be excellent. No damage by frost has been reported.

Railroad construction and employment.—The contract for the erection of the Grand Trunk Pacific Railway Company's roundhouse and shops has been let; they will cost from \$125,000 to \$150,000. Contractors reported that they will have the Grand Trunk Pacific Railway steel laid sixty miles west of Edmonton by September 15. Fifty miles of the Tofield to Calgary branch of the same Company will be graded this year. The Vegreville to Calgary line of the Canadian Northern Railway is expected to be completed as far as Canmore by September 1.

Other industries.—Fur traders from the north reported the fur catch fair, while others reported the catch small compared with that of other years.

CONDITION OF PARTICULAR TRADES.

All classes of building tradesmen were busy. The supply of unskilled labour was equal to the demand.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay district during August was fairly active, this being the first month during the present year in which the demand for experienced miners slightly exceeded the supply. This condition was brought about chiefly by the cessation of the strike of the coal miners in the preceding month, which allowed a resumption of work by the British Columbia Copper Company's mines and smelter. In all other lines the supply of labour slightly exceeded the demand.

The Athabaska mine which has been idle for some years has been taken over by a syndicate and operations resumed. It is reported that about 25 men will be employed at the mine and mill.

The Canadian Pacific Railway Company has by agreement with the city of Nelson taken over the old city wharf, which has been replanked. The company will enlarge and reconstruct the wharf making it a combined railway and passenger wharf as soon as the water is low enough to proceed with the work. The repair shops of the Company at Nelson were burned down on August 7; the loss was reported at about \$10,000, fairly covered with insurance.

The compressor plant, electric equipment and blacksmith shop at the Silver King mine were destroyed by fire on August 19, causing a suspension of operations at that mine and entailing loss of employment to about 30 men.

Along the line of the Crow's Nest branch of the Canadian Pacific Railway, at intervals between Moyie Lake, and Morrisey, bush fires caused considerable damage to timber. Fires also occurred along the line of the Eastern British Columbia Railway about four miles from Corbin, B.C. It is supposed that in both cases the fires were started by locomotives.

The Corbin coal mines situated at Corbin, B.C., have a force of about 200 men employed and are making good progress, the present output of coal being shipped chiefly to Spokane, Wash. This mine has a well-built wood tipple and the concrete foundations are built for a large power house. The town of Corbin has a large general store, post office, hospital, two doctors, a sawmill and over a hundred residences.

The municipality of Nelson is building several concrete sidewalks this summer, about 60 men being employed at the work. Harmony existed between employers and employees throughout the Kootenay district.

NEW WESTMINSTER, B. C., AND DISTRICT.

Mr. D. J. Stewart, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Favourable conditions prevailed in the labour market in this district, there being no lack of employment. Conditions were much better than in the corresponding month of last year. A large number of labouring men are being employed in sewer work by the city, while a still greater number is being employed on the electric railway between this city and Chilliwack, on the first forty miles of which steel is now being laid. The building trades have also been fairly well employed, it being estimated that since the beginning of the year buildings to a value of from \$150,000 to \$200,000 have been completed, while more are underway and others are contemplated.

The construction of new business blocks will fill a long felt want in this respect.

A meat packing plant will be erected in the outskirts of the city, the site having already been secured. It is expected to give steady employment to at least fifty men, besides being the means of distributing a large amount of money to the farmers of the district.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop is now safely harvested, and the grain crop is receiving attention. The root crops this season are excellent and the yield of potatoes will probably be the largest in the history of the province.

Fishing.—Fishing for sockeye salmon on the Fraser River is now in full progress, but up to the time of writing the pack for the season has not been up to the average of former years.

Lumbering.—Conditions have been very satisfactory and many of the saw-mills find it necessary to run overtime in order to cope with the demand from the Prairie Provinces. In addition, a large amount of lumber is being shipped to foreign ports, several vessels having called here during the month for cargoes. During the latter part of July two lumber mills in this district were destroyed by fire, but they are being rebuilt.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, lathers, plasterers, painters, plumbers, builders' labourers, iron moulders, machinists, engineers, blacksmiths, woodworkers, car builders (electric) and shingle weavers were active. Printers, pressmen, bookbinders, journeymen tailors, boot and shoe workers, bakers and confectioners, were also active, but butchers were quiet. Cigarmakers, and barbers were active, with clerks and stenographers quiet. Steamboatmen, street railway employees, teamsters and expressmen were active. Unskilled labour also was well employed.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was generally well employed during August but was no more active than in July. The cigarmakers numbered the most unemployed, *pro rata*. The volume of work in hand exceeded that

of the similar period last year. Wholesale and retail markets remained steady during the month. A brisk trade was done in hardware, owing to the closing of through billing to interior points of Yukon. Prices in the grain market continued high. Real estate in the business district continued strong.

The location of sub-libraries in different parts of the city was discussed by the civic library board.

The Cariboo Navigation Company was incorporated with a capital of \$500,000; also the Canada Dredging Company, with a capital of \$2,500,000 to engage in mining on the Fraser river.

Tenders were called for the construction of a suspension bridge at Lillooet.

The British Columbia Association of Stationary Engineers has raised the qualifications of steam engineers; this has been the means of increasing their remuneration and improving their condition.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crop in the delta did not come up to expectations owing to the lateness of the season; hay, however, was an abundant crop.

Lumbering.—The Commission appointed by the Provincial Government to inquire into forestry conditions held sessions in Vancouver. The lumber trade, which has been in a depressed condition for some time has begun to assume its normal condition.

CONDITION OF PARTICULAR TRADES.

The building trades were fairly active, though some unemployed were reported. Iron workers, helpers and coremakers, reported trade active, but prospects uncertain. Machinists, and engineers reported a few of their craft unemployed. Electrical workers were somewhat inactive. Linemen had good employment. Active conditions prevailed with ship-builders, shipwrights, caulkers, blacksmiths and horseshoers. Woodworkers were active. Upholsterers were quiet. Varnishers, polishers and carvers had fair employment. Carriage makers were active, especially on repairing, but shingle weavers were quiet. Printers on news-

paper work were well employed, but job printers were somewhat quiet. Bookbinders were active and pressmen found employment normal. Journeymen tailors and garment workers reported trade very quiet owing to Chinese and Japanese competition. Bakers and confectioners had fair employment, while butchers and meat cutters were very busy, with cigar-makers very quiet. Leather workers were quiet. Barbers reported trade fair, with a number out of employment. Hotel, restaurant and theatres reported business brisk, but a number unemployed. Transportation both on railways and boats was active, but hackmen were very quiet, owing to automobile competition. A larger number of unskilled labourers were employed than usual, but many were unemployed.

DISTRICT NOTES.

Steveston.—The catch of sockeye salmon on the Fraser river was about 180,000 cases. The total British Columbia pack to date is about 400,000 cases. Preparations were made for a catch of 700,000 cases. As high as 25 cents was paid for fish, the canneries in the beginning of the season paying only 15 cents. The residential population of Steveston is about 800; during the present fishing season this approximated 4,000 Japanese, 2,000 Indians, and 1,400 Chinese, Scandinavians, Hindus, etc., totalling about 10,000.

Prince Rupert.—A weekly steamship service is likely to be arranged between Prince Rupert and Queen Charlotte Island. The building of a Customs House and Post Office is contemplated. Railway construction was very active.

VICTORIA, B. C., AND DISTRICT.

Mr. W. E. Ditchburn, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the latter part of July and up to August 20 the condition of the labour market was satisfactory with very few unemployed. The building trades still find it hard to keep up with the demand for labour. The building permits issued

during the month of July amounted in value to \$372,120, bringing the total for the past seven months of the year to \$1,161,320, compared with \$626,650 for the same period of 1908. It will take all the forces available to get all the building now under construction completed before the wet season begins. Large numbers of unskilled workmen have found employment during the summer and many are now employed building a new reservoir at Goldstream, a few miles outside the city. The fishing season is in full progress and provides employment for large numbers of men at the traps and canneries. The local industries, such as shipbuilding, machine shops, sash and door factories, lumber mills, etc., have kept large forces of workmen constantly employed. The large number of tourists visiting the city has caused plenty of work at the hotels and restaurants. The statement has been given out by the Canadian Pacific Railway officials that no less than 250,000 visitors have been brought to Victoria during the past four months. The British Columbia Electric Railway Company carried 517,267 passengers this month compared with 449,776 the corresponding month of last year. Wholesale and retail business was reported good.

The Sunday Closing By-law recently passed by the city council has been proved inoperative as it has been shown in court that the city council has no power to attach conditions to trade license under the provisions of the Municipal Act. Consequently cigar stores, news stands, fruit and ice cream stores may remain open on Sundays.

The increased pay demanded by the leather workers on May 3, is being paid by only two firms, the other shops running with reduced staffs. One shop has put on two non-unionists.

The following are the Oriental immigration returns for the months of May, June, and July, 1909:—

Japanese entering for first time:

	Males.	Females.	Total.
May.....	12	26	34
June.....	2	18	20
July.....	5	14	19
			73

Chinese entering for first time:

	Males.
May.....	95
June.....	101
July.....	152
	348

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—In reference to damage to fruit by recent frosts the Commission appointed by the Department of Agriculture to enquire into the matter reported as follows: "On the lower mainland and Vancouver Island, except in a few individual cases, very little damage has been done. Where loss has occurred it has been owing to local conditions, and to treatment of the trees".

Fishing.—The traps and canneries are employing large numbers of hands. At present it is impossible to say what the total pack will be as reports are contradictory, though it is generally conceded that the pack will be slightly less than what it was four years ago.

Railroad construction and employment.—The Esquimalt and Nanaimo Railway Company has a large force of men employed doing preparatory work in connection with the placing of the wooden bridge over the Arbutus Canyon by a steel structure. It is also intended to place a steel bridge over the Niagara Canyon, a few miles out of this city.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Unskilled labour was not as well employed as during the previous month, but general conditions have been fairly active, although the supply of labour was slightly in excess of the demand. Wholesale and retail business men reported trade fairly satisfactory. There have been no changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers had difficulty harvesting their crops, owing to the exceptionally heavy rainfall.

Fishing.—Outside of the local market, there was little demand.

Lumbering.—The sawmills were working steadily, and the demand for lumber, while not active, was fair. Activity prevailed in the logging camps.

Mining.—There was not much activity in the quartz mining camps of the district. The coal mines were running full time and the coal trade for the season of the year is better than it has been for a long time. One of the new mines has got on a shipping basis, having docks and railroad in operation, and another is getting into shape for general work, having proved the coal measures which it owns. There was some work going on at the quarry, but not extensive.

Other industries.—The extension to the

municipal waterworks is nearing completion; about half the number of men previously employed are now at work.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported work quiet for the month. Carpenters have not done as well as earlier in the season. The new buildings started have been finished or are nearly so. Painters and paperhangers and plumbers reported work active, but builders' labourers were quiet. Blacksmiths had fair employment. Printers were fairly active. Teamsters and expressmen were fairly well employed. Unskilled labour, while not as active as last month, has done fairly well.

INVESTIGATIONS BY FAIR WAGES OFFICERS OF COMPLAINTS RESPECTING RATES OF WAGES PAID TO CERTAIN WORKMEN.

DURING the month of August, reports were received in the Department of Labour of an investigation which had been made by the Fair Wages Officers of the Department into complaints of alleged violation of the Fair Wages schedule in the contract of the Department of Works with Messrs. Peter Lyall & Sons of Montreal, for the construction of an addition to the Montreal Post Office, in the wages paid to certain workmen employed therein, and also of an investigation into alleged violations of the Fair Wages clause of the Grand Trunk Pacific Railway Company's contract with Messrs. Foley, Welch and Stewart for the construction of 100 miles of the Grand Trunk Pacific Railway easterly from Prince Rupert, British Columbia, in the rates of wages paid to workmen by the contractors and sub-contractors in charge of this work.

On July 6, a communication was received in the Department of Labour from the Department of Public Works, asking that investigation should be made into a complaint presented on behalf of Theophile Rochon of Verdun, Jos. Lanctot, of Lachine, J. Hector Fauteux, of Verdun and Jos. Boutin, of Montreal, carpenters, who alleged that whilst in the employ of

Messrs P. Lyall and Sons, in connection with the construction of the addition to the Montreal Post Office, they had been paid at the rate of 25 cents (25c.) per hour instead of at the rate of thirty cents (30c.) per hour, provided for in the Fair Wages schedule attached to this contract. Investigation was accordingly made by one of the Fair Wages Officers of the Department of Labour who visited Montreal for this purpose. In the meantime, before this investigation was entered upon, the Department communicated with Messrs. P. Lyall & Sons in respect of the claims in question and received on August 7, a letter from that firm enclosing a cheque for \$286.55 payable to the order of the Department, with the request that the Department should see that payment was made to the proper parties.

In his report to the Department the Fair Wages officer recommends that payment be made to the workmen concerned from the cheque for \$286.55 furnished by the contractor, and that this payment be considered as the termination of this dispute. The report of the Fair Wages officer contained also a statement of the number of hours worked by each of the claimants, together with the amount due to each, as follows:—

Theophile Rochon, a difference of five cents per hour during 1,649½ hours.....	\$82.47
Joseph Boutin, a difference of five cents per hour during 1,255½ hours.....	62.77
Joseph Lanctot, a difference of five cents per hour during 1,395 hours	69.75
J. Hector Fauteux, a difference of five cents per hour during 1,431½ hours.....	71.57

Wages on construction of Grand Trunk Pacific R'y

During the month of July an investigation was made by one of the Fair Wages Officers of the Department of Labour, into the rates of wages paid to workmen employed on that portion of the Grand Trunk Pacific Railway one hundred miles easterly from Prince Rupert, British Columbia, which is under construction by the firm of Messrs. Foley, Welch and Stewart.

The complaints to which the enquiry related were set forth in communications on behalf of the Prince Rupert Workmen's Association addressed to the Department of Labour, to the effect that the rates of wages paid by the contractors and sub-contractors to common labourers and other workmen employed on the construction of that portion of the railway were less than the current rates of the district for such classes of labour, and that an infringement had therefore occurred of the Fair Wages clause forming part of Messrs. Foley, Welch and Stewart's contract. In these communications it was asserted that the current rate of the district which Messrs. Foley, Welch & Stewart should be compelled to pay common labourers was \$3.00 per day. The Fair Wages clause in question which has been embodied in the contract is as follows:—

“All mechanics, labourers or other persons who perform labour in the construction of the works hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and, if there is no current rate in such district, then a

fair and reasonable rate, and, in the event of a dispute arising as to what is the current or a fair and reasonable rate, it shall be determined by the Minister of Labour, whose decision shall be final.”

The Fair Wages Officer arrived at Prince Rupert on the evening of July 12, and during his stay there had many interviews with Mr. Patrick Daly, Secretary of the Prince Rupert Workmen's Association, and other members of that organization. From Mr. Daly and from individual workmen he heard a great number of complaints, many of them outside the scope of the enquiry which he was commissioned to make, and relating principally to various forms of alleged ill-treatment to which stationmen had been subjected. The Fair Wages Officer informed Mr. Daly and other complainants that many of these questions were such as could only be dealt with by the courts.

The Fair Wages Officer had interviews also with representatives and officials of the firm of Foley, Welch and Stewart and also with many prominent residents of Prince Rupert.

As regards the alleged non-payment of current or fair and reasonable rates of wages to workmen, Mr. Daly informed the Fair Wages Officer that at the time the complaint of the Prince Rupert Workmen's Association was forwarded to the Department the firm of Foley, Welch & Stewart and their sub-contractors were not paying the rates current in Prince Rupert and the Skeena District, but that he had reason to believe that more favourable rates are now being paid. This being the point which the Fair Wages Officer was commissioned to investigate, he called at the office of Foley, Welch & Stewart, and through the courtesy of Mr. Smith, paymaster for the firm, was given free access to the pay rolls for the months of May and June, 1909.

The following statements showing the rates of wages paid by the contractors and sub-contractors, together with the number of men employed at each rate, were taken from the pay rolls for the months of May and June, 1909, at the office of Foley, Welch & Stewart, Prince Rupert:

	May.	June.
At \$1.30 per day, and board.....	10	
At \$1.75 "		2
At \$2.00 "	5	1
At \$2.25 "	4	1
At \$2.50 "	618	658
At \$2.75 "	1,324	1,558
At \$3.00 "	980	835
At \$3.25 "	30	71
At \$3.50 "	53	66
At \$3.75 "		6
At \$4.00 "	13	12
At \$4.50 "		1
At \$5.00 "	2	1
At \$5.50 "	5	
At \$6.00 "		1

Those receiving from \$1.30 and board to \$2.25 in May, and from \$1.75 to \$2.25 in June are water boys and a few inferior workmen.

Those receiving \$2.50, \$2.75 and \$3.00 are ordinary labourers, and represent the bulk of the workmen.

Those receiving from \$3.25 to \$4.00 are under-ground men, handymen, axemen, etc.

Team drill men receive from \$4.50 to \$5.50, and one man, who handles powder, receives a rate of \$6.00 per day while engaged at that work.

The rate charged for board is 25 cents per meal, or \$5.25 per week. Bunk houses are provided for the men free of charge, but they are required to provide their own blankets and bedding.

	May.	June.
At \$35 per month.....	63	26
At \$40 "	129	132
At \$45 "	60	59
At \$50 "	40	49
At \$55 "	4	3
At \$60 "	12	12
At \$65 "	11	12
At \$70 "	3	9
At \$75 "	152	146
At \$80 "	16	26
At \$85 "	41	41
At \$90 "	53	60
At \$95 "	1	
At \$100 "	33	45
At \$110 "	8	5
At \$125 "	6	5
At \$150 "	4	5
At \$175 "	2	3

The rates given in the statement of monthly wages include board in all cases.

Those receiving \$35, \$40. and \$45. are flunkeys, teamsters, bull cooks, etc.

Those receiving \$50. to \$60. are storekeepers, night watchmen, firemen, etc.

Those receiving \$65. to \$70. are assistant cooks, steam shovel firemen, boatmen on gasoline launches carrying supplies, etc.

Those receiving from \$75. to \$110 are ordinary foremen, timekeepers, cooks, dinky locomotive engineers, steam derrick engineers, cranemen, etc.

Camp foremen and steam shovel engineers receive rates varying from \$100 to \$175.

While the pay roll for May shows 3,700 names and that for June 3,872, the actual number of men employed is slightly over 3,000. This difference is accounted for by the fact that a considerable number of men shift from one camp to another during the month and their names appear on the roll twice, while others leave the employ of the Company and their places are filled by newcomers.

Regarding a complaint made by the Prince Rupert Workingmens' Association that workmen are not being paid their wages the representative of the Department was unable to find a specific case of any real grievance of this nature. He reported that he had reason to believe all workmen engaged by the day or month have been promptly paid on presentation of time checks at the office of Foley, Welch & Stewart at Prince Rupert.

During the progress of investigation a visit was made to a number of the camps on the line of construction with the object of getting in close touch with the workmen and learning from themselves the conditions under which they worked and the treatment accorded them by their employers. A large number of the men are foreign born and unable to speak English in such a manner as to make themselves understood, but in conversation with those who could speak English, it was found that some had trivial complaints to make, but that on the whole the men seemed perfectly satisfied and contented. In regard to wages, but very few complaints were heard, and these were made by ordinary labourers receiving \$2.75 and \$3.00 per day. The camps visited were those of D. A. Rankin, A.

Stewart, one of Foley, Welch & Stewart's R. M. Nicholson, McDougall & Rankin, A. Stino and McInnis & McGillivray.

It was ascertained that the rate of wages paid by the Government of British Columbia to common labourers engaged in the construction of sewers within the limits of Prince Rupert is \$3.00 per day, while the lowest rate at which board can be obtained there is \$1.00 per day or \$7.00 per week. The Government of British Columbia also pays \$3.00 per day for the building of wagon roads and trails in Skeena District. Mining companies in the Skeena District pay from \$3.00 to \$3.50 per day, and the lowest rate paid for board by those engaged in this class of enterprise is \$1.00 per day. It might be mentioned, here the Fair Wages Officer observes, that the class of labour generally employed about metalliferous mines is much superior to that usually found on railway construction.

Concerning this matter the Prince Rupert Board of Trade is on record as follows:

At a meeting of the Board held April 2, 1909, a committee was appointed to look into the matter of wages in and around Prince Rupert. At the general meeting of the Board held April 12 the committee reported that from information received from contractors and labourers who had been in the vicinity of Prince Rupert for two years or more, they believed \$3.00 to \$3.50 had always been paid for common labour, and since the cost of living had not decreased in the past year the committee favours the Board recommending \$3.00 per day as a fair wage for unskilled labour. The report of the committee was adopted.

The matter was again taken up at a meeting of the Council of the Board of Trade held July 19, when it was moved "that the resolution passed on April 12, be again endorsed." There being no seconder to the resolution, the mover challenged any member of the Council to move that it be rescinded, when it was promptly moved and seconded:—

"That the Council recommend to the Board that the resolution of April 12,

1909, re wages for unskilled labour, be rescinded." This resolution was carried.

Enquiry showed that the rates of wages paid by contractors to ordinary labourers on railway construction in the Rocky Mountains and West to Vancouver are \$2.25 and \$2.50 per day, while the rate charged for board is the same as that charged by Messrs. Foley, Welch & Stewart. From the Rocky Mountains East to Fort William the rates are \$1.75 and \$2.00 per day. The rates for board are \$4.50 in the East and Middle West and \$5.25 in the extreme west. In the States of North Dakota, Montana and Washington the rates paid to ordinary labourers on railway construction range from \$1.75 to \$2.25 per day.

On the section of the Grand Trunk Pacific Railway easterly from Prince Rupert, Messrs. Foley, Welch & Stewart and sub-contractors pay ordinary labourers \$2.50, \$2.75 and \$3.00 per day. Rate for board, \$5.25 per week.

The report concludes as follows:—

"While the rate of wages paid by the Government of British Columbia for sewer construction in Prince Rupert, and by mining companies in the interior of the Province, may be slightly higher than that paid by Foley, Welch & Stewart, I consider that the difference is fully offset by the rates the men are required to pay for board.

"Taking into consideration the large number of men required by the contractors in the execution of this work, and as the supply of labour is not equal to the demand they must needs accept all kinds—good, bad and indifferent—I am of the opinion that some latitude should be allowed in the fixing of a minimum rate.

"I am therefore of the opinion that the rates paid to labourers employed on that portion of the Grand Trunk Railway, one hundred miles easterly from Prince Rupert, under construction by the firm of Messrs. Foley, Welch & Stewart, are fair and reasonable and should not be interfered with.

"I would therefore recommend that no action be taken."

THE CANADIAN ASSOCIATION OF STATIONARY ENGINEERS—ANNUAL CONVENTION AT LONDON, ONT.

THE twentieth annual convention of the Canadian Association of Stationary Engineers was held at London, Ont., July 27-30, 1909 (*). The convention was one of the most successful in the history of the organization, owing in part to the exhibition made by a number of supply houses of their product, in connection with the meetings. The Exhibitors' Association was given the privilege of using the title of the Association during the course of the year.

Three new branches of the Association were organized during the past year, namely, at Brockville, North Bay and Brampton. The finances of the Association were reported in a healthy condition.

Recommendations.

The following resolutions looking to the betterment of the Association were adopted—:

1. That the Government be requested to grant or endorse graded certificates, the same not to be compulsory but optional with engineers.
2. That the sum of \$50. be placed to the

(*) A brief reference to the meeting was published in the August issue of the *Labour Gazette*. The accompanying more detailed report is based on information supplied by courtesy of the secretary of the association.

credit of the executive secretary for the organization of a ladies' auxiliary.

3. Endorsing the principle of uniform boiler construction and inspection laws.

4. That a standard set of examining questions for candidates to subordinate lodges be drafted by the executive board; also that a set of rules for the guidance of the examiners be adopted.

Reference was made to the placing in operation of the License Law and the appointment of Mr. W. C. McGhie as the chairman of the board of examiners.

During the convention a paper on uniform construction and inspection of steam boilers was read by Mr. F. E. Leonard of London, Ont.

An important feature of the convention was the appointment of a joint committee representing the Engineers and the Exhibitors to discuss the setting aside of an afternoon or evening to the reading and discussion of educational papers.

Officers.

Officers were elected as follows:—

President, Mr. C. Kelly, Chatham, Ont.

Vice president, Mr. J. J. Heeg, Guelph, Ont.

Secretary, Mr. W. R. Crockett, Mount Hamilton, Ont.

Treasurer, Mr. A. M. Wickens, Toronto, Ont.

FOREST FIRES IN CANADA DURING 1908.

IN a bulletin recently issued by the Department of the Interior, Canada, an estimate is made of the damage caused by forest fires throughout the Dominion during the season of 1908, with a view of attracting public attention to the seriousness of the loss occasioned in this way. Altogether over \$25,000,000

worth of timber and improvements were destroyed and 22 lives lost from this cause, while the private and public expenditure entailed by forest fires was approximately \$275,000. The following table gives a classified list of the losses according to the jurisdiction within which the devastated areas were situated:—

TABLE SHOWING THE DESTRUCTION CAUSED BY FOREST FIRES IN 1908.

Jurisdiction.	Number of fires.	Area burned over.	Feet of Timber damaged or destroyed.	Value of timber and Improvements destroyed.	Lives lost.	Men employed.	Private expense.	Public expense.
		Acres.		\$ cts.			\$ cts.	\$ cts.
Dominion Government—								
British Columbia..	100	?	10,270,000	5,135.00		464		21,757.48
Alberta.....	57	7,540	4,000,000	3,180.00		46		13,086.60

Nova Scotia.....	56	830		975.00				6,089.00
Totals.....	835	188,390	56,290,000	\$25,533,550.00	22	2,404	\$89,121.45	\$284,098.22

Nova Scotia employed 1,000 days' labour in fire fighting.

The above returns do not take into account the loss occasioned by the destruction of soil by forest fires and the fact that reforestation in burned over areas is the most expensive branch of forestry. The main causes of forest fires are sparks from locomotives, bush

burning by settlers and the carelessness of travellers and sportsmen. The bulletin adds that forest fires are unnecessary and can be successfully controlled, as is shown by the experience of several countries where an efficient fire protection organization has been developed.

ONTARIO LEGISLATION AFFECTING LABOUR, 1909.

THE first session of the twelfth legislature of Ontario was begun at Toronto, February 16, 1909, and was prorogued during the second week in April. A copy of the statutes assented to was received at the Department during August by courtesy of the King's Printer of the province. A review of the more important measures contained therein, of interest to industry and labour, is given below. Though the session lasted less than eight weeks a total of 241 measures came before the Legislature, and of these 165 were passed.

Safety in Mines.

A number of additions are made to the Mining Act of Ontario with a view to the further protection of employees. Inspectors are now specifically given the right to examine witnesses at any inquest held concerning a death caused by an accident in a mine. If the inspector or some one on his behalf is not

present, the coroner is required to adjourn the inquest, giving the Deputy Minister of Mines not less than 46 hours' notice of the time and place on which the evidence is to be taken. The section requiring a thorough daily inspection of the condition of explosives in a mine, and the reporting of all cases of carelessness immediately to the official in charge of the mine, is amended by the addition of a provision requiring the official in turn to report the offence to the inspector or to the crown attorney of the district. No drilling in future may be done in any hole that has been blasted, nor may any metal tool be introduced in the bottom of such hole. With respect to the safeguarding of machinery used to lower or hoist men in a mine, the provision forbidding the use of buckets skips or tubs in this connection is amended so as to allow men employed in shaft sinking to ascend and descend to and from the nearest level by means of the bucket used for hoisting material, but there

must always be a suitable ladder in the shaft to provide an auxiliary means of escape. Cross heads must in future be supplied with safety appliances. A record is also to be kept of all scaling operations. The penalty imposed on owners or agents guilty of offences against part 9 of the act, that is, the part relating to the operation of mines, is increased from \$50 to \$100, with a maximum of \$1,000. The maximum liability of employees for offences against part 9 is increased from \$10 to \$100, while the penalty for continuing offences is raised from \$5 to \$100. Where the offence is one which is calculated to endanger the safety of those employed in or about a mine, or to cause serious personal injury or dangerous accident, and where it is committed wilfully or negligently, the owner or employee may, in addition to or in substitution for any pecuniary penalty, be held liable to imprisonment with or without hard labour for a period not exceeding three months. ¹

Child Labour.

A Truancy Act which was passed during the session is of importance in this review because of its bearing on the subject of child labour. A child between 8 and 14 years of age is required to attend school for the full term during which the school in the section or municipality in which he resides, is open each year, unless he is excused for certain reasons which are defined. No child under the age of 14 may be employed by any person during school hours while the public school of the section in which the child resides is in session. A penalty not exceeding \$20 for each offence is imposed for violation of this section. Where, however, in the opinion of a justice of the peace or of the principal of the school, the services of such child are required in husbandry, or in urgent or necessary household duties, or for the necessary maintenance either of the child or of some person dependent upon him, the justice or principal may by certificate setting forth the reasons therefor, relieve the child from attending school for any period not ex-

ceeding six weeks during each public school term. ²

Protection of Wages.

An amendment of the Division Courts' Act contains some important provisions with reference to the protection of wages. Any action for wages of a woodman may be entered and tried in the court for the division in which the contract to hire was made, notwithstanding any stipulation in the contract of employment or otherwise. The term woodman in this connection means a person performing service or labour in connection with any logs or timber, including cooks, blacksmiths, artisans, etc. The law with regard to garnishment of wages is also amended. Where the debt sought to be garnished is for wages or salary an affidavit must be filed showing the residence of the primary debtor and the nature of his occupation at the time of the issue of the summons, and stating whether the debt was or was not incurred for board or lodging. A memorandum of the latter fact must also be endorsed upon or annexed to the summons served on the garnishee. In the absence of such affidavit or memorandum, the debt may be deemed not to have been incurred for board or lodging. If the primary debtor is an unmarried person having no family dependent on him for support a verifying statement to that effect must be filed with the clerk and endorsed upon or annexed to the summons served on the garnishee. In the absence of such affidavit or statement the person may be deemed by the garnishee to have no family dependent on him for support. ³

Woodmen's Liens.

By an amendment of the Woodmen's Lien for Wages Act, cordwood is included among the products to which a lien may attach. The Act is now made applicable to the provisional county of Haliburton and to provisional judicial districts. It was previously applicable to the districts of Muskoka, Parry Sound, Nipissing, Algoma, Manitoulin, Thunder Bay and

¹ Ontario statutes, 1909, chap. 17.

² Ontario statutes, 1909, chap. 92.

³ Ontario statutes, 1909, chap. 33.

Rainy River, and to the provisional county of Haliburton. ⁴

Protection of Minors.

A comprehensive amendment of the Liquor License Act was one of the most important measures of the session. The privilege of a license will in future carry with it a legal obligation, enforced by a rigid inspection system, to provide accommodation for those occupying the hotel as guests. Another new provision is that a person under 21 years of age is compellable to disclose the name of the person who sold liquor to him and the date of the sale. For refusing to answer he may be imprisoned for three months, unless he discloses the information and pays the cost of his committal. ⁵

Public Safety.

By an Act regulating the means of egress from public buildings doors, are required to open outwards in all churches, theatres, or other public buildings or amusement halls, and in school houses of more than one storey in height. The gates of outer fences must also open outwards or must be kept open while such buildings are being publicly used, in order to facilitate egress in case of an alarm from fire or other cause. Moving picture shows must be licensed under a penalty of not less than \$50 nor more than \$200, with cost and a further fine of \$25 per diem during the time after conviction that the offence continues. Where any breach of this provision results directly or indirectly in loss of life or bodily injury imprisonment in addition to a fine, may be imposed. The inspection of moving picture machines by the provincial police is provided for. ⁶

The Act for the prevention of accidents by fire in hotels and other like public buildings now requires every hotelkeeper to provide fire escapes in all bedrooms. Previously this section only applied to hotels of more than two storeys in height. ⁷

Regulation of the Dairying Industry.

On or before January 1, 1901, all creameries, cheese factories and other establishments for the manufacture of milk products must register with the provincial Department of Agriculture, and thereafter unregistered places may not be conducted without the permission of the Minister. Refusal on the part of the Minister may be based upon lack of proper equipment or unsanitary conditions. Upon the report of an inspector that any establishment of the kind is not in a satisfactory condition or is inadequately equipped, the Minister may order the same closed. After January 1, 1911, cheese makers in any creamery or cheese factory must hold a certificate of qualification from the Dairy School of the Ontario Agricultural College or from the Eastern Dairy School. In lieu of this certificate a special permit may be issued on the recommendation of an inspector on the general ground of experience and competency. ⁸

Sunday Cars.

During the past few years a considerable number of petitions have been addressed to the government by municipalities or corporations desiring the privilege of operating street cars on Sunday. In order to establish a fixed line of action on this point the Ontario Railway Act is amended by the addition of a number of sections. In cities having a population of over 50,000, street railways may be operated on Sundays if a majority of the voters have voted in favour thereof. The question may be submitted at the annual municipal election and notice must have been given on or before December 15, preceding. No employee, however, shall be required or permitted to work in this connection for more than six days of ten hours each in any one week or upon any Sunday when he worked on the previous Sunday. The penalty for violation of this provision is placed at not less than \$25 and is not to exceed \$100. Existing agreements between municipal corporations and

⁷ Ontario statutes, 1909, chap. 26, sec. 20.

⁸ Ontario statutes, 1909, chap. 86.

street railway companies are not to be affected by this legislation. ⁹

Regulation of Motor Vehicles.

The Act to regulate the speed and operation of motor vehicles on highways is made considerably more stringent. Licenses must be produced on the demand of a peace officer. Motor vehicles must not pass a street car stopped for passengers at a greater speed than four miles an hour. Penalties are considerably increased. Where the employer of a person driving a motor vehicle for hire is present in the vehicle at the time of an offence against the act, he as well as the driver is liable to conviction. ¹⁰

Instruction in Agriculture, Manual Training and Household Science.

The Public Schools' Act of the Province was consolidated and amended during the session. Two sections of the act give power to township councils to engage an instructor in agriculture, manual training and household science, the courses of instruction to be open to all residents of the school section or municipality. High school, public school and separate school boards in cities, towns or villages may also carry on classes for similar instruction and may appoint a committee to control the classes and the buildings and apparatus used in connection therewith. ¹¹

Public Utilities—Hydro-Electric Power Commission.

Under an Act respecting certain municipal by-laws and agreements the term "public utility" is defined as meaning and including "water works, gas works, electric light, heat or power works or similar works operated under any general or special act or under letters patent of the province of Ontario". Municipal councils are not to grant franchises for public utilities without the approval of the electors. ¹²

A special Act was passed validating all the contracts for power made by municipalities with the hydro-electric power commission and consequently removing certain litigation which threatened to hamper the commission in constructing its transmission line. Authority was also given to issue a loan of \$3,500,000 to finance the construction. ¹³

The Municipal Light and Heat Act is amended so as to allow municipalities to purchase and supply steam and hot water for heating. A municipal board of commissioners may also be entrusted with the distribution of power supplied by the hydro-electric power commission. ¹⁴

Legislation with Reference to Transportation.

The following is a statement of the various Acts which were passed dealing with transportation interests:—

One of the most widely discussed Acts of the session was the measure granting two million acres of land to the Canadian Northern Ontario Railway Company in return for the immediate construction of a railway from Sellwood junction to Port Arthur (500 miles). The road is to form a connecting link in a coming transcontinental system and from the point in view of the province is a colonization road opening up about 16,000,000 acres of clay lands for settlement. The government holds for the Crown the minerals and white pine, and reserves the right of fixing the time and price at which the land may be sold.

The Temiscaming and Northern Railway Commission is authorized to construct and operate an extension into the Gowganda mining field.

Other interests dealt with by legislation are:—

Algoma Central and Hudson Bay Ry.—Affecting the land grant.

Belleville Radial Ry.—Act of incorporation.

Burlington Beach Ry.—Amending Acts relating thereto.

Canada Central Ry.—Extending time for construction.

⁹ Ontario statutes, 1909, chap. 68.

¹⁰ Ontario statutes, 1909, chap. 81.

¹¹ Ontario statutes, 1909, chap. 89, secs. 110, 111.

¹² Ontario statutes, 1909, chap. 75.

¹³ Ontario statutes, 1909, chap. 19.

¹⁴ Ontario statutes, 1909, chap. 79.

Cobourg, Port Hope and Havelock Electric Ry.—Act of incorporation.

Cobourg Radial Ry.—Act of incorporation.

Collingwood.—Confirming agreement with regard to shipbuilding.

Dunnville, Wellandport and Beamsville Electric Ry.—Extending time for construction.

Eastern Ontario Electric Ry.—Act of incorporation.

Farrar Transportation Co.—Respecting finances.

Ferries.—Act respecting ferries.

Fort William.—Act affecting city and street railway etc.

Hamilton.—Act respecting city and its relation to, among other things, the street railway.

Lake Superior and Northern Ry. and Transportation Co.—Act of incorporation.

Manitoulin and North Shore Ry.—Respecting the land grant.

Midland.—Respecting the town of Midland.

Morrisburg Electric Ry.—Amending act of incorporation.

Niagara Peninsular Ry.—Authorizing extension of line.

Ontario Interurban Ry.—Act respecting the Company.

Ontario West Shore Electric Ry.—Granting additional powers.

Ottawa and St. Lawrence Electric Ry.—Act of incorporation.

People's Ry.—Act of incorporation.

Peterboro Radial Ry.—Extending time for construction.

Port Arthur.—Act respecting the city and the street railway.

Sault Ste. Marie.—Confirming an agreement with reference to bonus for dry dock.

Sault Ste. Marie and St. Joseph Island Ry.—Act of incorporation.

Simcoe Ry. and Power Co.—Act of incorporation.

Southwestern Traction Co.—Granting additional bonding power.

Stratford and St. Joseph Radial Ry.—Granting extension of time for construction.

Tillsonburg and Southern Counties Radial Ry.—Act of incorporation.

Toronto.—Respecting the city and its relation to the street railway.

Toronto Suburban Ry.—Extending time for construction.

A grant of \$50,000 was made for the construction of a summer wagon road to Gowganda.

Miscellaneous.

The *statute labour act* is amended so as to cover conditions in unorganized townships.¹⁵

Incorporation was granted to the *Civil Service Savings and Loan Society*, an organization formed to carry on a loan business on a co-operative basis.¹⁶

The *free grants and homesteads act* is amended by an addition permitting the government in certain cases, to release lands from reservations of timber.¹⁷

The law relating to the payment of *succession duty* was consolidated and the rates increased.¹⁸

Provincial and Dominion detectives and constables are to have free access to all *circuses and travelling shows* during the hours in which the public are admitted to the same.¹⁹

The *stationary engineers' act* is amended by an addition providing that no person shall be eligible for examination unless he is a British subject or has resided in Canada for at least three years.²⁰

By a *millers' act* of the session it is forbidden to levy a toll of more than one-twelfth for grinding and bolting grain. Grain bags are required to be marked in order to guard against lossess.²¹

Under the consolidated *public schools' act* of the session the clerk of every county, city or town is required to make a return annually showing the *population* of such city, county or town as shown by the assessment rolls for the previous year.²²

By an amendment to the *forest reserve act* certain lands are withdrawn from the Temiscaming forest reserve. The government is also given power to with-

¹⁵ Ontario statutes, 1909, chap. 77.

draw lands for town site purposes from forest reserves when deemed expedient.²³

A comprehensive measure of *law reform* was passed. The act increases the jurisdiction of the county and district courts and lessens the cost of and improves the facilities for litigation. The divisional court is dropped as a court of appeal.²⁴ By an amendment of the *judicature act* it is now impossible for judgments to be held back for longer than six months.²⁵

The Temiscaming and Northern railway commissioners are given authority to establish a *land department*, to administer town sites and other similar work. The department is to be in charge of one of the commissioners who is to receive an additional salary of \$1,500 per year. The rights of the commission in the matter of expropriation are also further defined.²⁶

In the list of chattels declared under the execution act passed during the session to be *exempt from seizure*, tools and implements to the value of \$100 are mentioned, also one cow, six sheep, 4 hogs and 12 hens, in all not exceeding the value of \$100 and feed therefor for 30 days, and one dog, also 15 hives of bees.²⁷

The Ontario *public service* act is amended in the matter of the employment of extra temporary clerks. In future such clerks cannot be employed for longer than three months or at a higher rate than two dollars per day. On a report of the head of the department the term of service may be extended to six months and the extra clerk may be re-appointed

for a further period not to exceed six months and so from time to time. The rate of two dollars also may be increased where such clerk is a person of special attainments and is employed as such.²⁸

Among the persons declared to be exempt from *servicing on juries* the following are included: Officers and servants of the Dominion and provincial governments; sheriffs, coroners, gaolers and keepers of houses of correction; sheriffs' officers and constables; pilots and seamen engaged in the pursuit of their calling; municipal treasurers, clerks, collectors, assessment commissioners, assessors and officers; editors, reporters and printers of public newspapers or journals; railway and street railway employees; telegraph and telephone operators; millers and certificated city firemen. The last mentioned are not exempt unless the captain of the fire department has notified to the clerk of the municipality the names of the firemen belonging to his department at least five days before the time for the selection of jurymen.²⁹

Among the Acts introduced during the session but which did not become law was one entitled the "fair wages and hours of labour regulation act", which proposed to establish eight hours as a legal day's work and 20 cents per hour as a minimum wage. The act was not to apply to domestic or farm labourers, or where the employees are members of the employers' family. A bill was also introduced to provide compensation for train hands killed or injured in the discharge of their duty. An act to permit the city of Toronto to stipulate as to wages and hours of work when calling for tenders was also introduced but was not passed.

NOVA SCOTIA LEGISLATION AFFECTING LABOUR, 1909.

A copy of the public statutes of Nova Scotia passed during the third session of the thirty-fourth legislative assembly of Nova Scotia was received during August at the Department of

Labour, by courtesy of the King's Printer of Nova Scotia. The Legislature convened on February 18 and was prorogued on April 23, 1909, assent being given to 189 acts. Of the legislation passed,

the following is the most important from the standpoint of industry and labour. ¹

Child and Female Labour in Factories.

Henceforward no young person (that is, no boy under the age of 14 and no girl under the age of 16, not including drivers of delivery wagons) may be employed in or about a shop for longer than eight hours a day exclusive of meal time, or longer than four hours on any Saturday. One hour is to be allowed for the noon-day meal on every day on which the young person is employed for more than four hours. The law previously limited the employment of this class to 72 hours per week and to 14 hours on Saturday, with an allowance of one hour for the noonday meal and 45 minutes for another later meal.

By an amendment of the Factories' Act, the maximum hours of employment per day for young girls and women is reduced from ten to nine hours. The maximum for boys or girls under the age of 16 is reduced from ten to eight hours per day and to four in the case of Saturdays. Children under the age of 14 may, by a special provision of the old law, be employed during the months of July, August, September and October in the gathering and preparation of fruits and vegetables for canning purposes. The amendment of the past season, however, provides that this employment shall be limited to eight hours per day ordinarily and to four hours on Saturdays.²

Neglected Children—Protection of Immigrant Children.

An addition is made to the Children's Protection Act of 1906, with special reference to the presence of children after eight o'clock at moving picture, vaudeville or other theatres, when unaccompanied by their parents or guardians. The proprietor or manager of such a theatre who knowingly admits a child thereto, or permits him to remain therein after eight o'clock at night is made liable to a penalty of not less than \$10 and not

more than \$100, or to imprisonment in default, for a term of not less than 30 days nor more than 90 days. The Act is also amended by the addition of several sections relating to the apprehension and care of neglected children.³ The Act relating to the transfer of immigrant or orphan children is considerably extended and amended. The Act now specifically includes within its provisions all immigrant children in any charitable institution, refuge or home approved of by the Governor-in-Council. Several sections are added defining the duties of charitable institutions engaged in settling immigrant children in the province, with particular reference to the binding-out of such children. For taking away from, or inducing a child thus bound-out to leave, his employment, a fine of \$40. may be imposed.⁴

Deductions From Wages For Medical Attendance.

Under the Companies' Doctors' Act, employers were previously required to furnish to a medical practitioner a list of the employees from whose wages a monthly deduction is made on account of regular medical attendance. By an amendment of the past session, the list is only to include those who have specified the medical practitioner in question as their attendant under the provisions of the act.⁵

Industrial and Labour Statistics.

The Act of 1907, providing for the appointment of a Secretary of Industries and Immigration, apart of whose duties is the collection and arrangement of industrial statistics, is amended by the addition of several sections which further set forth the duties of that officer. He is now required to distribute schedules and instructions as prescribed by the Governor-in-Council for the collection of statistics relating to the agricultural, fishing, lumbering, mining, quarrying, milling, manufacturing and other industries and resources of the province, show-

¹ The review contains no reference to private acts which have not yet been issued in final form.

³ Statutes of Nova Scotia, 1909, chap. 44.

⁴ Statutes of Nova Scotia, 1909, chap. 35.

⁵ Statutes of Nova Scotia, 1909, chap. 34.

ing among other things the value of product, the number of persons employed and wages paid. The owner or manager of such industries is required to fill in and return the schedules under a penalty not exceeding \$100 and not less than \$10. The Secretary of Industries and Immigration is also to have access to provincial, municipal or other public records for the purpose of obtaining information. An officer employed in the execution of the act may, when specially directed by the Provincial Secretary, make inquiry under oath, on any matter connected with the collection of statistics, in which connection he is to have all the powers conferred by the statute "of inquiries concerning public matters."⁶

The Metalliferous Mines Regulations Act is amended by the addition of a section requiring a detailed return of production to be made to the Commissioner of Mines for the province, together with an estimate of product, number of employees, number of days worked and nature of mining operations during the preceding quarter, by every owner, agent or manager of a metalliferous mine, on or before the tenth day of January, April, July and October in each year.⁷

Reporting of Accidents in Metalliferous Mines.

Under the Metalliferous Mines Regulation Act of the Revised Statutes, the owner, agent or manager of a mine was required to send a written notice to the Commissioner of Mines of any explosion or accident involving loss of life or serious personal injury to any person employed in or about the mine, within 24 hours after the occurrence of the explosion or accident. This provision is now amended so as to require the notice to be given by telephone or telegraph or other quickest mode of communication within eight hours after the explosion or accident.⁸

Mechanics' Liens.

The section of the Mechanics' Lien Act relating to costs is considerably enlarged.

The costs of any action under the Act, not otherwise provided for, was previously at the discretion of the court or judge. It is now provided that the costs of an action successful to the lien holders shall not exceed in the aggregate an amount equal to 25 per cent. of the amount of the judgment, besides actual disbursements, and shall be in addition to the amount of the judgment, to be apportioned and borne in such proportion as the person trying the case may decide. Where the costs are awarded against the person or persons claiming the lien they are also not to exceed 25 per cent. of the claim besides actual disbursements. In no case must the costs exceed what would have been incurred had the least expensive course been taken. Where a lien is discharged or vacated, the judge may allow a reasonable amount for drawing, registering or vacating the lien. Costs not otherwise provided for, remain in the discretion of the judge or officer to or by whom an application or order under the Act is made.⁹

Public Utilities Commission.

A very important Act of the session was one establishing a Board of Public Utility Commissioners for the Province. The Board is to consist of three members and is to have a clerk or secretary. Its general duty is to exercise supervision of all public utilities throughout the province. "Public utility" is defined as including every corporation, company, or person, holding, operating or controlling any plant or equipment for the conveyance of telephone messages, or for the production, transmission or furnishing of heat, light, water or power either directly or indirectly to or for the public. Every such utility is required to furnish a reasonably adequate service and facilities and to make just and reasonable charges. It must make an annual return to the board showing the amount of capital, liability, assets, receipts, expenditures, dividends, etc. Schedules of rates must be filed with the board, and must not be changed without notice. Provision is made against the granting

⁷ Nova Scotia statutes, 1909, chap. 12.

⁸ Nova Scotia statutes, 1909, chap. 13.

⁹ Nova Scotia statutes, 1909, chap. 40.

of any rebate by a public utility. The powers and procedure of the board in matters of complaints, penalties, etc., are set forth in detail. The Board may take evidence under oath and may direct inquiries. It may also make rules and regulations which when approved by the Governor-in-Council are to have the force of law. The right of appeal to the Governor-in-Council from a decision of the Board is granted. The Act is not to affect any right which any public utility may now have under its charter or act of incorporation.¹⁰

Encouragement of Gold Mining.

The Governor-in-Council is authorized by a special act to assist the further development of the gold mines of the Province by giving reasonable assistance for crosscutting and driving levels at such depths and for such distances as may be approved by the inspector of mines or by an engineer selected by the Department of Mines. Aid may also be given for the purpose of utilizing water powers in order to reduce the cost of gold mining. The location of shafts, winzes, crosscuts and levels is to be subject to the approval of the Department. Companies or individuals receiving assistance under the act are required to pay a royalty of three per cent. on any gold won from the property, such rate to be continued until the full advance made by the Government is repaid. Any loan made or assistance given, however, is not be a charge against the property or company, but against the gold won from the property receiving assistance under the Act.¹¹

Miscellaneous.

A consolidation of the Election Act was passed.¹²

¹⁰ Nova Scotia statutes, 1909, chap. 1.

¹¹ Nova Scotia statutes, 1909 chap. 5.

¹² Nova Scotia statutes, 1909, chap. 6.

An Act was passed providing for compensation to farmers and others whose lands have been damaged in the course of railway construction work in Caledonia, Queens' County.¹³

Some amendments were made in the provisions of the Act for the protection of woods against fire. The amendments relate to the reports and duties of rangers.¹⁴

The Public Health Act is amended with special reference to the establishment of sanatoria for the treatment of tuberculosis and the further protection of the public from infection from that disease.¹⁵

The Public Highways' Act is amended by a section permitting a municipality to close up a thoroughfare that has not been in use for 20 years.¹⁶ The Act relating to the expenditure of Provincial road bridge grants is also amended.¹⁷

Onstreams on which any hydraulic power company has established dams for the storage of water, log drivers are not to have the right to use more than the natural flow of the river except with the consent in writing, of the company.¹⁸

An Act to provide for the appointment of a commissioner for municipal sinking funds was passed. The duties of the officer will be to inspect the credit of towns and municipalities seeking borrowing powers, and to see that sinking funds are properly provided for. He is also to examine municipal legislation in such cases and to certify to the legality of the issues. The Act will further safeguard the interest of those buying the municipal securities of the Province.¹⁹

NEW BRUNSWICK LEGISLATION AFFECTING LABOUR, 1909.

THE legislative assembly of the province of New Brunswick met for the session of 1909 on March 28 and prorogued

during April. The session was the second of the fifth assembly of the province. The following is a review of the more

important legislation, of interest to industry and labour, based upon the volume of the statutes issued during August.

Factory Inspection.

A clause is added to the factories' act whereby no person is to hold or be continued in the position of inspector after he has reached the age of 70 years.

The provision of the act relating to the annual or other reports of inspection is considerably enlarged. Previously it was required merely that such reports should be laid before the legislative assembly. It is now enjoined that the inspector shall report to the provincial secretary, or to such other head of his department as may have been designated under the act "to provide for a bureau of labour," on the first days of March and September in each year. This report must give the names and locations of all factories where the conditions are not according to law, or where accidents have occurred during the previous six months. A brief account of the accidents and illegal conditions and the causes thereof must be added, together with any other matter that may seem necessary or desirable. Such report or reports must be laid by the Head of the Department before the legislative assembly as soon as possible after the opening of each session. ¹

Immigrant Children.

A number of sections are added to the act "relating to immigrant children". The additions define more clearly the powers and responsibilities of charitable institutions, refuges, and homes, engaged in settling immigrant children in the province. The guardianship of such institution over the children is to last in the case of males until they attain the age of 21 years and in the case of females until they reach the age of 21 years unless sooner married. Institutions may bind out children, but they must retain their powers of supervision over them. A penalty of \$40 is prescribed for taking away or inducing a child thus bound out to leave his employment without the consent in writing both of

the person to whom he has been bound and of the institution by which he has been placed. ²

Commission on Tuberculosis.

By an act "to assist in the prevention and cure of tuberculosis" the government is empowered to appoint a commission, to consist of not more than seven persons who are to serve without remuneration (except payment of expenses) for the purpose of enquiring into and reporting upon the best methods of preventing and curing tuberculosis. The sum of \$15,000 is set aside for defraying the cost of carrying into effect the recommendations of the commission. In the preamble to the act it is recited that there are at present in the Dominion of Canada consumptive invalids numbering at least 40,000 of whom 8,000 die annually involving a financial loss estimated at over \$8,000,000. ³

Encouragement of the Iron Industry.

In order to encourage the development of the extensive and valuable deposits of iron recently located near the grand falls of the Nepisiguit river in the county of Gloucester, the government by special act has guaranteed the principal and interest of the bonds of the "Northern New Brunswick and Seaboard Railway Company" for the purpose of building and operating a line of railway from the mines to a point on the Intercolonial Railway and beyond. The guarantee is not to exceed the sum of \$15,000 per mile, nor to be for more than 26 miles, and the rate of interest is not to exceed four per cent. It is estimated that when the works above mentioned are in full operation the annual pay-roll at the mines and resulting industries will not be less than \$1,000,000. The mining company involved, namely, the Drummond Mines, Limited, agrees to pay a royalty of five cents per gross ton on a minimum output of 1,000 tons per day, for a season of not less than 150 days. A smelter is to be erected at the port of shipment of the railroad. ⁴

² New Brunswick statutes, chap. 41.

³ New Brunswick statutes, chap. 49.

⁴ New Brunswick statutes, 1909, chap. 48.

¹ New Brunswick statutes, 1909, chap. 42.

Prison Labour.

Police magistrates are given power when convicting to imprisonment, whether or not the conviction imposes hard labour, to direct in the warrant of committment issued on the conviction that the person convicted shall perform hard labour within the limits of the city or town. City and town councils are empowered to make by-laws and regulations for the proper enforcement of hard labour sentences within their limits. ⁵

Legislation re Transportation.

The following acts were passed affecting transportation companies and interests:

Canadian Terminal Ry.—Extending time for construction.

Maritime Steamship Co.—Authorizing exemption from taxation in County of Charlotte.

Moncton Electric Tramway Co.—Amending act of incorporation and extending time for construction.

New Brunswick Coal and Ry. Co.—Authorizing granting of loan by the Government for betterment of railway.

New Brunswick Docks and Terminals Co.—Incorporation.

St. John City.—Authorizing city to transfer harbor property and privileges to harbor commission.

⁵ New Brunswick statutes, 1909, chap. 28.

St. John Valley Ry. Co.—Incorporation.

Tobique and Campbellton Ry.—Extending time for construction.

Twin Tree Mines Ry.—Amending act of incorporation, altering location of terminals and changing name to Northern New Brunswick and Seaboard Ry. Co.

Miscellaneous.

A consolidation of the *Game Act* was passed. ⁶

The act respecting the protection of sheep from dogs was made more stringent ⁷

The government is authorized to make a grant not to exceed \$500 to any person or company providing and operating a satisfactory *mussle-mud digger* capable of digging not less than 100 tons per day, to supply the mud to those requiring it for fertilizing purposes. ⁷

By an amendment to the general *Mines Act*, leases or licensees are required to take out an additional lease or license when other minerals are discovered than those contained in the existing lease or license. ⁸

An amendment of the liquor license act contains a clause relating to *Sunday selling*. ⁹

CANADIAN GOVERNMENT ANNUITIES—BOOKLET ISSUED BY SUPERINTENDENT—INSURANCE OF EMPLOYEES BY EMPLOYERS.

AN interesting and instructive booklet has been issued under the authority of the Rt. Hon. the Minister of Trade and Commerce by the Superintendent of Government Annuities, Mr. S. J. Bastedo, descriptive of the provisions of the Government Annuities Act, 1908,⁽¹⁾ and of the terms under which annuities are issued by the Annuities Branch to the Canadian public. The booklet is entitled, "Comfort and Happiness in Old Age." It constitutes throughout

a strong appeal and argument for the inculcation of habits of thrift and economy, in the practice of which the purchase of an annuity affords such effective assistance. The various plans on which payment may be made are described in detail, and the advantages of each and of the system as a whole are explained in full (?). In brief the leading feature of the system is that it offers to all a definite plan for saving for old age with a minimum of effort and self denial, on unimpeachable security, and on exceedingly liberal terms.

¹ A review of this legislation was published in the *Labour Gazette* for September, 1908, page 301. An amendment to the Act passed at the session of 1909, was reviewed in the *Labour Gazette* for June, 1909, page 1338.

² See the *Labour Gazette* for December, 1908, page 612

Social and Economic Advantages.

Referring to the social and economic objects of the system, the booklet states;

“Much of the extreme poverty and destitution in Great Britain, which has been shown by the recent Pension Act to exist, would have been impossible had there been a general adoption of a scheme like the Canadian scheme in England half a century ago. The men and women who are now on the pauperising pension roll could have preserved their self-respect and independence, and the enormous annual drain on the public treasury, which amounts to nearly \$50,000,000 would probably have been avoided. If Canada is not ultimately to face the same conditions as exist in England and many other European countries, the people of small income must make definite provision for their old age, and it is quite within the bounds of fact to say that in this fair Canada of ours there are to-day for each man, woman and child who has an assured income for life, and who can for that reason contemplate the approach of old age with serenity and equanimity, thousands who, as the thought is forced upon them, can only have feelings of sad misgivings as they ponder upon the subject of what the future may have in store for them. Let every man, woman and child therefore remember that a payment of a few cents a week will provide with absolute certainty for an eventide of comfort and happiness. Experience proves, however, that they will not lay aside that “something” for the “rainy days” unless an obligation to do so is created.

“There is an additional field of usefulness for the press and the pulpit in the dissemination of information on this vitally important subject. The press has already done much, the pulpit may properly be expected to do more. So soon as men and women are educated up to the standard of saving and economy and the rising generation to be thrifty and economical, just so soon will the moral tone of the people become higher and purer, the whole community more prosperous, and want and poverty unknown; and the moral effect of having

this sure and positive plan of investment as a means of providing for old age must be to stimulate thrift and economy.”

An Interesting Comparison.

By way of illustrating how slight an effort towards self-help is required, when directed into the proper channel, to secure an allowance similar to that provided by the old Age Pension scheme of Great Britain, a single example will suffice. The Imperial Government scheme provides an allowance of \$1.25 per week (\$65 a year) at the age of 70. To purchase the same allowance under the Canadian system the following trifling payments are required:

At Age.	Amounts payable annually.	Annuity.
20	\$2.50	\$65.00
25	3.25	65.00
30	4.25	65.00
35	5.70	65.00
40	7.65	65.00
45	10.55	65.00
50	15.00	65.00

In addition it must be remembered that under the Canadian plan, in case of death before 70 all payments go back to heirs with compound interest at 3 per cent.

Progress of the Branch.

Since the inception of the work the branch has taken in about \$250,000 in premiums. During the seven months ended July, 31, 1909, contracts for annuities were issued as follows:

44 Immediate Annuities (Single and Last Survivor), totalling \$11,121.80 at a cost of \$108,923.80.

244 Deferred Annuities amounting to \$53,901.00 on which \$97,486.35 have been received in premiums.

The total number of Annuity Contracts issued to the 31st of July, 1909. (Immediate and Deferred) was 288, aggregating \$65,022.80, and the purchase money received on account thereof was \$206,410.15.

It may be explained that deferred annuities are issued under two plans,

viz., plans "A" and "B". On plan "A" it is provided that in case of the death of the annuitant before the annuity begins the purchase money with compound interest thereon at three per cent. per annum will be returned to the legal representatives of the annuitant. On plan "B" where the same annuity may be obtained for smaller payments, there would be no return of any portion of the purchase money.

On plan "A", 204 contracts have been issued; and on plan "B", 40.

Payments may be made to the Department direct, or through the Postmaster or any money order office, and by him remitted to the Department. The postmaster is allowed a commission of one-third of one per cent. on all amounts paid to him. An annuity may be purchased by or for any person between the ages of 5 and 85, but no annuity may be received before the age of 55.

The rights of an annuitant are not saleable or transferable, except that the statute provides that the purchaser of an annuity may have a portion of it (not exceeding one-half) made payable to his wife. In the case of the purchasers of deferred annuities this is considered to be a most valuable privilege.

Insurance of Employees by Employers.

Of special interest from the standpoint of industry and labour are the facilities offered by the system for the insurance of employees by employers. In other words the system affords to every employer convenient and trustworthy machinery for the establishment of a pension fund whereby old or disabled employees may be retired without suffering to themselves or imposing a heavy financial burden on the employer. With the view of bringing this feature more prominently to the attention of employers and workmen the following circular, which is self-explanatory, was sent out under date of August 3, 1909, to manufacturers and employers of labour throughout Canada:

OTTAWA, Aug. 3, 1909.

DEAR SIR,—A number of manufacturers and employers of labour throughout

the Dominion of Canada have been asking for information as to the cost of Government Annuities, with a view to considering some plan by which they may assist their employees to make provision for their old age. I have, therefore prepared, as an example, a table showing the cost of an Annuity of \$250 at 60 to men starting to pay in between the ages of 21 and 50, where the employer contributes \$10. a year for each man irrespective of age. The employer could, if desired, vary the amount of his contribution, and some employers will be disposed to make larger contributions in respect of men who have been a long time in their service than of those who have been in but a short time. It will be seen that where the men are over the age of 35 a contribution of \$10 represents but a small portion of the purchase money necessary to secure the Annuity of \$250. The employer may make a selection from his men and contribute for a certain number only if unable for any reason to bring in the whole staff. I send you two copies of this table, and shall be glad to supply you with any number of additional copies required. I have shown the amount that the employer's \$10 will buy at each age on Plan "B", under which plan there would be no return of any portion of the purchase money either to the employer or to the employee should the employee die before the age of 60. If the employee leaves the service of his employer he will, of course, lose the benefit of his employer's contribution from that date. A separate contract would issue to each employee.

Any further information which you may require on the subject will be gladly sent, and if you should desire a personal interview with me you have only to command me and I will wait upon you at any time or place you may suggest.

I should be glad to have a line from you stating whether you would be disposed to co-operate with your employees for the purpose suggested if it should be their desire to take advantage of the scheme.

Yours faithfully,

S. T. BASTEDO,
Supt. Canadian Gov't. Annuities.

The table accompanying the above is as follows:—

Commencing Age.	1-B.	2.	3-A.	4-B.
21.....	\$128.20	\$121.80	\$12.85	\$ 9.50
22.....	121.21	128.79	14.32	10.63
23.....	114.41	135.59	15.92	11.85

1. Column 1 shows amount of Annuity which a payment by the employer of \$10 a year from commencing age to age 60

would purchase on plan "B," under which plan there would be no return of any portion of purchase money should Annuitant die before 60.

2. Column 2 shows the amount remaining to be purchased by the employee to bring annuity to \$250.

3. Columns 3 and 4 show the annual rate to be paid on plan "A" or "B" to purchase amount of annuity in column 2. (On plan "A" should Annuitant die before 60, all payments made with three per cent. compound interest be returned to the purchaser or his legal representatives.)

Replies have already been received from a considerable number of employers indicating a willingness to avail themselves of the facilities offered and to cooperate with their employees in establishing a system of retiring allowances. The Superintendent has also been in personal communication with a number of manufacturers in order still further to demonstrate the practicability and desirability of the arrangement. The Superintendent will also endeavour during the coming month and later to bring the system personally to the attention of the central labour organizations of the Dominion.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF AUGUST, 1909.

TWO applications for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, were received in the Department during the month of August, as follows:—

On behalf of freight-handlers employed by the Canadian Pacific Railway Company at Fort William, Ont., the number of employees affected being estimated at about 700.

On behalf of Roundhouse Employees, members of the Brotherhood of Railroad Employees, Division No. 15, in the employ of the Intercolonial Railway at Halifax, N. S., the number of employees affected being estimated at 20 directly and 1,000 indirectly.

Earlier Applications.

Of applications received prior to the beginning of August, proceedings in connection with which remained at that date unfinished, there were the following:

(1) On behalf of engineers, firemen, conductors, brakemen, baggagemen and yardmen, members of the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Engineers, the Order of Railway Conductors and the Brotherhood of Railroad Trainmen, employed on the lines of the Grand Trunk Pacific Railway Company, the number of employees affected being estimated at 300 directly and 800 indirectly.

(2) On behalf of unskilled labourers

members of the Saskatoon Federal Labour Union, No. 12,801, employed on trench work, sewer work and municipal public utilities in the city of Saskatoon, Sask., the number of employees affected being estimated at 150 directly, and 150 indirectly.

Reports Received.

During August, the Department received reports in the cases of two Boards established under the Act as follows:—

(1) That arising out of the application of freight-handlers employed by the Canadian Pacific Railway Company at Fort William Ont.

(2) That arising out of the application of engineers, firemen, conductors, brakemen, baggagemen and yardmen employed by the Grand Trunk Pacific Railway Company.

Other Proceedings Under Act.

In the case of the dispute between the corporation of the city of Saskatoon and

certain labourers employed on trench work, sewer work and municipal public utilities in that place, various sittings were held during August of the Board of Conciliation and Investigation which had been constituted on August 4, but at the end of the month the report of the Board had not yet reached the Department.

In the application of certain round-house employees, of the Intercolonial Railway at Halifax, N. S., members of the Canadian Brotherhood of Railroad Employees, Division No. 15, for the establishment of a Board of Conciliation and Investigation, it was claimed that members of this organization had been unjustly discriminated against on account of their being active members of the Brotherhood. Correspondence was exchanged on this subject during the month of August, but on account of the absence from the city of both the Minister and Deputy Minister of Railways, action in regard to the application was delayed until September 11 when the Board was formally established.

I. REPORT OF BOARD IN DISPUTE BETWEEN CANADIAN PACIFIC RAILWAY COMPANY AND ITS FREIGHT-HANDLERS AT FORT WILLIAM, ONT.

ON August 12, the Minister of Labour having been apprised of the occurrence of a strike on the part of freight-handlers to the number of 700 employed by the Canadian Pacific Railway Company at Fort William, Ont., opened communication through His Worship, Mayor Peltier of Fort William with the parties concerned, as a result of which Mr. F. A. Acland, Deputy Minister of Labour, was commissioned on August 15, to proceed to Fort William to lend the good offices of the Department towards effecting, if possible, an adjustment of the dispute. The differences in question related to the demands of the freight handlers for increased rates of pay and for the discontinuance of a bonus system by which one cent per hour of their wages was held by the Company until the completion of the season's work.

On August 18, the Deputy Minister informed the Minister of Labour from Fort William that formal application

had been made by the employees for the establishment of a Board under the Industrial Disputes Investigation Act. In this message the Deputy Minister also announced that the strikers had all returned to work and that troops which had been called out for the preservation of order had been withdrawn. A Board was accordingly established without delay composed of Mr. W. J. Christie of Winnipeg, Mr. W. T. Rankin, of Fort William, and Mr. S. C. Young, of Fort William, the latter being appointed Chairman on the joint recommendation of Messrs. Christie and Rankin. On August 24, six days after the application had been transmitted to the Department, a unanimous report was made by the Board in terms which were understood to be acceptable to both parties to the dispute.

Report of the Deputy Minister.

A full account of the circumstances attending this dispute and of the means adopted to effect a settlement is contained in a report of the Deputy Minister of Labour to the Minister of Labour in the following terms:—

OTTAWA, August 26, 1909.

To the Honourable
The Minister of Labour,
Ottawa, Ont.

Sir:—

I have the honour to present a report relating to the differences between the Canadian Pacific Railway Company and the longshoremen in its employ at the port of Fort William, Ont., and to the action of the Department with regard thereto.

On Sunday, the 15th instant, I received from you verbal instructions, subsequently confirmed by writing, to proceed to Fort William, Ont., and to lend the good offices of the Department in promoting a settlement of the differences above mentioned, and on the following day I left for the scene of the dispute, arriving there on the evening of Tuesday the 17th instant.

The following telegrams show more precisely the nature of the mission:

1. From Mr. Frederick Urry, correspondent of the *Labour Gazette* at Port Arthur and Secretary of the Trades and Labour Council at Port Arthur, to Hon. W. L. Mackenzie King, Minister of Labour, dated Port Arthur, August 14:—
“Strike Committee of freight-handlers Fort William request your presence here to hear their grievances and effect settlement. Wire reply.”

2. From Hon. W. L. Mackenzie King, Minister of Labour, to Mr. Frederick Urry, Port Arthur, Ont., dated Ottawa, August 15: “Your telegram of last night received this morning. The Deputy Minister, Mr. F. A. Acland, will leave for Fort William immediately to lend the good offices of the Department towards effecting a settlement of the Fort William dispute. Mr. Acland was instrumental in effecting, under similar

circumstances, a settlement of a longshoremen’s dispute at Montreal two years ago and I bespeak for him the confidence of each of the parties.”

Origin of the Dispute.

It will be well to set down briefly the leading features of the dispute up to the exchange of telegrams, leading to the intervention of the Department. My statements on these points are necessarily based on enquires made after my arrival at Fort William and not on personal observation, but I am satisfied of their substantial accuracy.

There are about 700 men receiving employment to a varying degree as freight-handlers at the freight sheds of the Canadian Pacific Railway Company at Fort William, Ont. These men are of numerous nationalities, the prevailing races being Russians, Hungarians, Austrians, Greeks, Italians and Ruthenians, with a sprinkling of English-speaking men. The rate of wages paid during the present season up to the time of the dispute has been 17½ cents per hour for day work and 20 cents per hour for night work, with an additional cent for each hour worked, given as a bonus at the end of the season to the men who remain on duty until that time arrives. The object of the bonus is obviously to induce the men to hold themselves available for duty to a later date than they might otherwise be disposed to regard as desirable. The system is identical with that adopted in the case of the Montreal longshoremen three years ago on the recommendation of the Board of Conciliation and Investigation then established to adjust the dispute between the longshoremen and the Shipping Federation of Canada, but the amount of the bonus paid at Montreal is 2½ cents on each hour worked. It is not within the scope of the present mission to pronounce in any way upon the question of the adequacy of the rate of wages that had prevailed at Fort William from the beginning of the season or on the effectiveness or desirability of the bonus system, but it may be remarked generally that the rate of wages paid to freight-handlers and longshoremen appears to depend to a considerable extent upon the

degree of permanence afforded by the work at the respective ports. Where the work is most irregular, there, usually, the wages rule highest, the transportation companies concerned could not otherwise secure men for prompt service when occasion requires. The rate payable is of course again affected by the prevailing local rate for ordinary labour. The question of the degree of hardship imposed on the men by a bonus system which holds them to the employing company until the end of the season regardless of the amount of work received, unless the extra remuneration involved be sacrificed, similarly depends largely on local conditions and on the character of the men employed, and is not one concerning which any general pronouncement may be made with advantage.

During the present season work appears to have proceeded quietly enough at the rate mentioned above until Saturday August 7. The officials of the Company report that no representations were made to them concerning grievances, nor do the men claim that any such representations were made, save, as it was subsequently stated, on behalf of the men (though denied by the Company) in the case of some individual employees who had objected to certain of the foremen that the rate of pay was inadequate to the work. The employing Company appears, therefore, to have been taken completely by surprise when on Monday August 9, the men suddenly and without any formal warning to the Company ceased work, and it is quite certain that the community of Fort William generally was unprepared for such conditions. The result of the refusal of the men to work was to derange the shipping facilities of Fort William and to threaten a tie-up of steamers that might be in port or might come to port.

Application of Industrial Disputes Investigation Act.

The industry involved being one involving transportation facilities brought the dispute within the province of the Industrial Disputes Investigation Act, 1907, and the men were not complying with the terms of the Act in ceasing work

before the differences between them and their employers had been referred for investigation to a Board of Conciliation and Investigation. The men involved were, as has been already pointed out, very generally foreigners, and with perhaps few exceptions without more than the rudiments of education. It does not appear that they were as a rule new arrivals, and many of them had lived for some years at Fort William and had been engaged for several seasons in the work of freight handling. There seems good ground for accepting, however, the claim subsequently advanced by the leaders of the men that they had been unaware of the existence of the Industrial Disputes Investigation Act, and that had they known the requirements of this act they would not have ceased work without their grievance having been first investigated.

Progress of the Dispute.

During the two or three days following immediately after the strike, more or less informal conferences took place between the representatives of the men and the officials of the Company. The Company is represented locally by Supt. J. Graham, but Mr. J. T. Arundel, General Superintendent of the Central Division of the Canadian Pacific Railway reached Fort William on Tuesday, August 10, and Assistant General Manager Bury came to the scene of the dispute a day later. The higher officials assumed the direction of affairs, so far as the Company was concerned, during their stay in Fort William. The demands of the men as formulated were briefly as follows:—

1. An increase of pay; 2. an abolition of the bonus system; 3. better treatment from the foremen.

The strikers carefully picketed the approaches to the C.P.R., sheds from day to day, and it being reported that some of the strikers were carrying firearms, a search was made by the city police, one man, on whom was found a Colts' revolver, being arrested. Mr. L. L. Peltier, Mayor of Fort William, received a deputation of the strikers on Tuesday morning, August 10, at the City Hall, several hundred men being present.

Bosco Dominico, an Italian, acted as interpreter, and set forth the demands of the men, and the mayor in reply, as reported in the local press, promised to do all that lay in his power to promote an understanding. He strongly condemned the carrying of firearms and urged that the men go back to work and leave the dispute to be discussed by a conciliation committee of which he was quite willing to be one. If this committee failed, the Mayor recommended that the dispute should be referred for adjustment under the Industrial Disputes Investigation Act, the nature of which he explained.

The Mayor appears to have immediately commenced negotiations with the Company, and the differences were in a fair way to settlement without a reference to the Industrial Disputes Investigation Act, when on Thursday morning, August 12, an unfortunate incident occurred. About 30 special constables had been brought down from Winnipeg by the C.P.R. management for the purpose of protecting the property of the Company. The constables were sworn in on Thursday morning before Magistrate Palling of Fort William, and taken to the Company's boarding house near the freight sheds. The arrival of the special constables appears to have had an irritating effect on the strikers, some of whom believed or professed to believe that the new arrivals were strike breakers and not constables.

Collision between Strikers and Constables.

The Company seems to have followed the customary procedure in this matter, and it has not been seriously suggested that the powers conferred upon them under such conditions by the Provincial law were in any way exceeded. It would seem possible, however, that a less prominent display of force would have been dictated by prudence and might have helped to avert the calamity that followed, and it is at least arguable whether the public interests do not demand such an amendment of the law as would require that the consent of the public officers responsible for the peace of the community should be procured before so large a body of armed men is brought within

the limits of the municipality concerned.

While the C.P.R., special constables were breakfasting, the strikers gathered around in considerable force and on the emergence of the constables an altercation ensued, which developed quickly into the active use of firearms with the result that many persons were severely injured. Eleven constables were wounded and taken to the hospital, and several of the strikers are believed also to have been wounded and taken away by their comrades; no wounded strikers were taken to the hospital. Mayor Peltier, when the news of the shooting reached him, was in the act of negotiating a settlement with the C.P.R., officials enabling the men to return to work immediately on improved terms, with a reference to the Industrial Disputes Investigation Act in the event of further grievances developing. The Mayor immediately proceeded to the scene of the outbreak and read the riot act and issued then the call for the militia, the magistrates signing the requisition with him being Messrs. Peter McKellar and G. W. Brown. A detachment 150 strong of the 96th regiment located in Fort William and Port Arthur were soon on duty and order was restored. Col. Steele, D.O.C., who was in Port Arthur at the time of the affray, assumed command, and also brought down from Winnipeg seventy-five members of the Canadian Mounted Rifles.

Exchange of Telegrams between the Minister of Labour and the Mayor of Fort William.

The presence of the Militia had a quieting effect and no further untoward incident occurred. The strike continued and on Friday morning over a hundred men were brought in by the Company from the East and work was partially resumed at the freight sheds. Picketing was continued by the strikers, but without disorder. The bearing of the Militia is on all hands reported to have been excellent. Mayor Peltier resumed negotiations looking to a settlement and at a meeting of the men on Friday, August 13, read the following telegrams exchanged between the Minister of Labour and himself:

OTTAWA, August 12, 1909.

MAYOR PELTIER,
Fort William, Ont.

"Press despatches mention you have been endeavouring to arrange settlement of longshoremen's strike. Possibly, parties are not aware that Industrial Disputes Investigation Act is applicable to this dispute and that persons violating provisions of Act are liable to prescribed penalties. Two years ago longshoremen at Montreal and Halifax, having struck without knowledge of provisions of Act, returned to work and had difficulties referred under its provisions once the same were brought to their attention. Satisfactory settlements followed. Possibly strikers at Fort William will see the wisdom of adopting a similar course. I will be pleased to establish a Board of Conciliation and Investigation forthwith if so requested. Copies of Act mailed yesterday to W. Houston, secretary Longshoremen's Union.

(Sgd.) W. L. MACKENZIE KING,
Minister of Labour".

FORT WILLIAM, August 13, 1909.

W. L. MACKENZIE KING,
Minister of Labour,
Ottawa.

"On August eleventh by authority of Canadian Pacific Railway and over my signature and corporation seal I made the following proposition to strikers,— If men returned to work to-day the Company's Superintendent and General Supt. will meet representatives of the men to-night to endeavour to adjust any grievances and settle wage question and if men dissatisfied they will remain working and invoke Lemieux Act. This was not accepted. Situation well in hand. May use Act, yet.

(Sgd.) L. L. PELTIER, Mayor."

The Mayor on Saturday, August 14, regarded normal conditions as restored and requested the withdrawal of military protection. The regulars and Militia were accordingly withdrawn on Saturday night. During the day the city police had arrested a number of men believed to have been implicated in the

affair of the 12th instant and the men arrested were taken to Port Arthur for trial.

Dispute Referred under Industrial Disputes Investigation Act.

As a result jointly of the efforts of the Mayor and of the knowledge obtained by the strikers of the nature of the Industrial Disputes Investigation Act, an understanding was now reached to have the dispute referred for investigation under its provisions, and in virtue of this understanding on Monday morning, August 16, the men accordingly resumed work. On my arrival in the city on the evening of the 17th, as stated above, there was no outward evidence of the recent disturbance, but there was indication of a tense and excitable condition of feeling being still abroad and I received many assurances of the necessity for prompt action in bringing the whole matter before a Board for full enquiry and final adjustment. I communicated immediately on my arrival with the Mayor and with Mr. F. Urry, by whom had been transmitted to the Minister the communication on behalf of the strikers, and it was arranged that I should on the following morning meet the members of the committee representing the strikers and obtain from them the formal application for a Board of Conciliation and Investigation which it was believed they were now desirous of presenting.

Negotiations Begun—Board Appointed.

The committee met at the City Hall at 11 a.m., on Wednesday, August 18, Mayor Peltier and Mr. F. Urry being present and rendering valuable assistance. With one exception the committee was composed of non-English speaking persons and the services of translators in several languages were necessary. The application was formally drawn, signed before Magistrate Palling by Messrs. C. R. Spooner and Piro Pathakoes, respectively, as representing the committee, and formally handed to myself as Registrar of Boards of Conciliation and Investigation. Mr. F. Urry was recommended by the men for appointment to the Board. The Minister had already

expressed determination to establish a Board if an application was received in due form, and as I received a notification during the day from the employing Company that the Company had recommended Mr. W. J. Christie, of Winnipeg, for appointment, I communicated to the Minister the names of the persons respectively recommended and the Minister was pleased to appoint them forthwith. I represented to Messrs. Christie and Urry, by telegraphic messages to Winnipeg and Port Arthur, respectively, the desirability of expediting the enquiry as far as was possible and suggested, by the Minister's direction, that they should endeavor as speedily as possible to agree on a recommendation for the third member of the Board and that if they could not come to such agreement speedily, they should consider the advisability of waiving their full rights of deliberation in this matter and refer the appointment to the Minister in the manner provided by the Act, when the appointment would be made forthwith. I received a message in reply from Mr. Christie stating that he would reach Fort William on Friday evening, August 20. On Thursday, August 19, I received a letter from Mr. Urry stating that on reconsidering the situation he had decided to tender his resignation as a member of the Board. Mr. Urry's note was as follows:—

"PORT ARTHUR, Ont., Aug. 19, 1909.

MR. F. A. ACLAND,

Deputy Minister of Labour.

DEAR SIR,—It was a surprise to me yesterday when the members of the strike committee asked me to act for them. Without having time to consider the matter fully, I consented.

I have since come to the conclusion that in the interests of the labour movement of these two cities it will be best that I decline the position.

Thanking you and also the Minister of Labour for your confidence in me to act on behalf of the men by confirming their choice,

I remain,

Yours faithfully.

(Sgd.) FREDERICK URRY."

It became necessary accordingly to reconvene the Strike Committee and as the members were now at work during the day, it was impossible to secure such meeting until evening at 7 p.m. On Thursday, August 19, therefore, the committee reconvened and after some deliberation decided to recommend Ald. W. T. Rankin for appointment to the Board. The Mayor was present at this second meeting of the committee and again lent his services for the adjustment of the difficulty.

Resolution by men with respect to action of the Department.

At this same meeting of the committee, the following resolution was passed relating to the action of the Department and setting forth the attitude of the employees towards the Industrial Disputes Investigation Act:—

"FORT WILLIAM, August 18, 1909.

We, the committee representing the freight shed men employed by the Canadian Pacific Railway Company at Fort William, appreciate the promptness with which the Department of Labour dealt with our request for the appointment of a Board to deal with our grievances, and had we known of the existence of the Lemieux Act, we would not have ceased work until we had invoked the good offices of the Minister of Labour."

Enquiry by Board.

The Minister appointed Mr. Rankin to the Board in place of Mr. Urry, and on Friday, August 20, Messrs. Christie & Rankin met to confer regarding the question of a Chairman with the result that during the day they agreed on the nomination of Mr. S. C. Young, a leading citizen of Fort William, and this recommendation was duly confirmed by the Minister. The members of the Board were sworn in on Saturday morning, August 21, and began immediately the official enquiry into the dispute. The proceedings of the Board lasted throughout Saturday, considerable evidence being taken as to the cost of living at Fort William as compared with other

places, and as to the bearing of this on the wage question. Evidence was also taken on some other questions. Many of the men were present throughout the day and the proceedings were apparently an object lesson of considerable value to them, as well as to different leading citizens who were present during the day as witnesses or spectators. In the evening the Board met in private for the purpose of endeavoring to agree on a report, but finding it impossible as yet to make a unanimous report, it was decided to take further evidence on Monday, August 23. The proceedings were resumed on Monday and additional evidence was taken. On Monday evening the Board again went into private session which continued until between five and six o'clock in the morning of Tuesday, August 24, in an endeavor to formulate a unanimous recommendation. Some details were left for final adjustment, and a copy of the text of the finding of the Board, to which then or subsequently were attached the names of the three members of the Board, was handed me by the Chairman on Tuesday evening. This finding was understood to be satisfactory to both parties concerned. The whole proceedings from the day on which the formal application was received had lasted during six working days only, showing with what expedition the machinery of the Act may be worked when there is a special urgency for the same.

Findings of Board.

The finding of the Board recommended (1) the payment of the rate of 20½ cents per hour by day and 23½ cents per hour by night, a substantial advance over the figures formerly paid, dating from August 16, when the men resumed work; (2) the abolition of the bonus system for the future, and the payment immediately of the bonus earned up to date. Concerning the question of ill-treatment the Board did not find that any evidence supporting this contention had been submitted, but the Company's officers had, it was stated, given satisfactory assurances on the subject. This report was understood to be acceptable to both

parties to the dispute. A formal report of the finding of the Board was duly forwarded to the Minister at Ottawa. 'E

Recapitulation of Proceedings—Effect of the Act.

It will be seen that the employees ceased work on August 9, requested the aid of the Minister of Labour on August 15, returned to work on August 16, and made formal application for a Board of Conciliation and Investigation on August 18, the Board holding official enquiry on August 21 and 23, and reaching a conclusion on August 24, fifteen days from the time of the strike, and six days, as noted, from the date of the formal application for a Board.

The financial loss suffered by both parties to the dispute would have been, no doubt, entirely avoided and the unfortunate affray between the special constables and the strikers necessarily eliminated had the differences been referred for adjustment under the terms of the Industrial Disputes Investigation Act in the first place, a course clearly dictated, moreover, by ordinary prudence as well as by the laws of the land. As previously stated, however, the men claim to have been wholly ignorant of the existence of any special law bearing on the question of trade disputes. This was stated in concise terms in the application forwarded to the Minister, and also in the resolution passed by the committee of strikers quoted above.

In the application for the establishment of the Board it was stated on behalf of the freight-handlers concerned that "in ceasing work, the employees, the great majority of whom are foreigners, acted in good faith, and as they would have acted in their own respective countries, being unaware of the existence in Canada of any Act of Parliament requiring that before a strike was called there shall be an inquiry into the grievances before a Board established by the Minister of Labour."

I desire in closing this report to draw the Minister's attention to the excellent public service rendered by His Worship Mayor Peltier throughout the difficulty, and the substantial aid which I received

from the Mayor and from Mr. F. Urry, Secretary of the Trades and Labour Council of Port Arthur, and correspondent of *The Labour Gazette* for Port Arthur, in expediting the procedure for the establishment of the Board. I desire also to acknowledge the cordial and courteous co-operation of the officials of the Canadian Pacific Railway Company to the same end.

I have the honour to be,

Sir,

Your obedient servant,

(Signed) F. A. ACLAND,
Deputy Minister of Labour.

Text of Report of Board.

The text of the findings of the Board of Conciliation and Investigation established in this matter is as follows:—

FORT WILLIAM, ONT., Aug. 24, 1909.

To the Honourable
The Minister of Labour,
Ottawa, Ont.

Sir:—

In the matter of the Industrial Disputes Investigation Act 1907, and of the dispute between the Canadian Pacific Railway Company, employers, and the freight-handlers of that Company, at Fort William, Ont., employees: we the duly appointed Board of Conciliation and Investigation consisting of Samuel C. Young, Chairman, of the city of Fort William, Ont.; William J. Christie of the city of Winnipeg, Man.; William T. Rankin of the city of Fort William, Ont. beg to report as follows:—

The Board met in the Council Chamber of the City Hall, Fort William, Ont., Saturday, August 21st, 1909.

The grievances set forth in Statement A of Employees were first taken up. Briefly, they were as follows:

1. A raise of wages from 18½ cents to 22½ cents per hour for day work and from 21 cents to 25 cents per hour for night work;

2. The employees complained that the cost of living in the city of Fort William warranted them in asking for the increase;

3. That some of the men had been unjustly or harshly dealt with by some of the company's foremen, in pursuance of their work;

4. They wished the discontinuance of the bonus system now in force whereby 1 cent per hour of their wages is held by the Company until completion of the season's work.

Taking the questions up in order named, we went exhaustively into the matter of wages paid for ordinary labour in this city and district and find that ordinary, unskilled labour, such as is affected in this case, commands about 20 cents per hour and we, therefore, recommend:

First.—That the wages to be paid to the complainants, *i.e.*, the labourers in the Canadian Pacific Railway Company's freight sheds at Fort William, Ont., shall be 20½ cents per hour for day work and 23½ cents per hour for night work and that these rates shall apply from August 16th, 1909;

Second.—We find that, after very careful investigation, considering transportation charges on commodities, the cost of living in the city of Fort William, Ont., compares favourably with other cities, both East and West;

Third.—In the matter of complaint of employees as to harsh treatment by some of the foremen in the employ of the Company, we could not get any direct evidence in support of their complaint. We have the assurances of officials of the Company that they will not tolerate any unwarranted treatment of the men, if same is brought to their attention. We have advised the representatives of the men to make complaint in writing to the proper authorities, should anything of this nature occur in the future;

Fourth.—We strongly recommend that the bonus system be discontinued at once, and that bonuses earned to August 16th, 1909, be paid in full within one week. We have the Company's consent to this proposal.

In looking into the matters which brought about the trouble between the employees and the Canadian Pacific Railway Company, we find that no proper demands were made by the men. The men left their work without notice which

seriously affected the freight handling business at this port, causing great loss to shipping and mercantile interests of the country.

We have tried to impress upon the men the seriousness of their action in this respect and we are pleased to note in their statement referred to that they realize this and that they will not participate in such action in the future.

(Sgd.) S. C. YOUNG,
Chairman.

(Sgd.) W. T. RANKIN,
For Employees.

(Sgd.) W. J. CHRISTIE,
For C.P.Ry. Co.

Dated at Fort William, Ont.,
24th Day of August, 1909.

II REPORT OF BOARD IN DISPUTE BETWEEN GRAND TRUNK PACIFIC RAILWAY COMPANY AND ITS EMPLOYEES.

THE Minister of Labour received on August 14, the unanimous report of the Board established in the matter of a dispute between the Grand Trunk Pacific Railway and its engineers, firemen, conductors, brakemen, baggagemen, and yardmen, members of the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Enginemen, the Order of Railway Conductors, and the Brotherhood of Railroad Trainmen.

In the application which was made on May 29, for the establishment of a Board in this matter, it was stated by the Employees concerned that the differences related to "the consideration and adoption of schedules of rates of pay and rules governing the service and working conditions of engineers, firemen, conductors, brakemen, baggagemen and yardmen, including provision therein as to the dismissal and promotion of employees; the investigation of the dismissal of employees who, it is submitted, have been wrongfully dismissed; the consideration of the sufficiency of sleeping and eating accommodation furnished to employees, the same being, it is submitted, unclean and improper; the quality of the food provided." The number of employees affected was stated to be 300 directly and 800 indirectly. Mr. F. H. McGuigan, of Toronto, and Mr. J. G. O'Donoghue, of Toronto, were appointed members of this Board on the recommendation of the Company and of the employees respectively, and on the joint recommendation of Messrs. McGuigan and O'Donoghue, the Board was completed on June 24, by the

appointment of Honourable R. F. Sutherland, M.P., of Windsor, Ont., as Chairman.

In the report of the Board it is stated that a very fair, friendly and conciliatory disposition was displayed on all hands and that the representatives of the employees expressed reasonable confidence in the present officials of the Company and were disposed to concede that the conditions of their service as regards a number of the matters in dispute have recently been somewhat improved. The Company's officers laid much stress on the fact that as yet the road is in but the constructive stage with the usual accompanying difficulties as to wages, supplies, and general conditions and that in consequence some of the claims made on behalf of the employees were premature. The report continues: "After a full hearing and consideration, the matters in dispute were amicably adjusted with the exception of the claim of the employees that 'engineermen detained on their engines, at terminals, two hours or more before commencement or after completion of trip will be paid for same at schedule rates, such detention to be paid for in addition to mileage run but to be deducted when computing overtime, in respect to which a majority of the Board was disposed to agree with the contention of the employees.

"While it appeared that in some cases the food supplied to the employees, the method of serving same, the sleeping accommodations provided, and the general sanitary conditions may not have been entirely satisfactory it also appeared that

in a general way these were similar to and on the whole as good as those usually provided in the early stages of railway construction. The Board is of the opinion, however, and would recommend that a regular inspection and report of all conditions of the construction camps, buildings and conveniences of the Company be made by its physicians with a view to better the condition of the employees and secure, if possible, that these be satisfactory in so far as food, lodgings and sanitation are concerned.

"The Board is of opinion that the cases of certain of the men whose alleged grievances were the subject of investigation and discussion might well be reconsidered by the officers of the Company with a view to their restoration to its service.

"Your Board is glad to report an adjustment of the matters in dispute and its unanimous agreement upon the basis of the attached schedules to remain in force for one year from August 15, 1909, and thereafter subject to the termination on thirty days' notice by either party."

Attached to the findings of the Board in this matter is a schedule of rates of pay and rules governing the service of engineers, firemen and hostlers on all owned, leased and operated lines of the Grand Trunk Pacific Railway west of Fort William, also a schedule of rates of pay and rules for conductors, baggage-men, brakemen and yardmen on the lines of the Grand Trunk Pacific Railway west of Fort William.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

TORONTO, April 11th, 1909.

To the Honourable,
W. L. Mackenzie King,
Minister of Labour,

In the Matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Grand Trunk Pacific Railway Company, and its employees.

The members of the Board of Conciliation and Investigation established by the Minister of Labour under the above Act, on the 24th day of June, 1909, and to which the dispute herein was referred under the provisions thereof, beg to report as follows:—

1. The first meeting of the Board was held in Winnipeg on the 17th of July and its meetings thereafter continued in the office of the General Superintendent of the Company in the Somerset Block on Portage Avenue until the 24th of July, 1909, when its work was completed.

2. The matters in dispute were at first complicated by the fact that the Company having issued bulletins in general terms which it claimed provided for the matters in dispute, was not disposed to consent to the framing of schedules. On the other hand the employees had prepared and presented to the Board for its consideration detailed and somewhat complicated schedules.

3. Taking the bulletins referred to and the Grand Trunk Railway System operation rules, which the officers of the Company alleged to have been in use in a general way as a starting point, the matters in dispute, and as particularly set out in the said schedules prepared by the employees, were fully investigated and considered.

4. A very fair, friendly and conciliatory disposition was displayed on all hands.

5. The Representatives of the Employees expressed reasonable confidence in the present officials of the Company and were disposed to concede that the conditions of their service as regards a number of the matters in dispute had recently been somewhat improved.

6. The Company's Officers laid much stress on the fact that as yet the road is in but the construction stage with the usual accompanying difficulties as to wages, supplies and general conditions, and that in consequence some of the claims made on behalf of its employees were premature.

7. After a full hearing and consideration, the matters in dispute were amicably adjusted with the exception of the claim of the employees that "Engine-men detained on their engines at ter-

minals two hours or more before commencement or after completion of trip will be paid for same at schedule rates, such detention to be paid for in addition to mileage run, but to be deducted when computing overtime," in respect to which a majority of the Board was disposed to agree with the contention of the Employees.

8. While it appeared that in some cases the food supplied to the employees, the method of serving same, the sleeping accommodations provided and the general sanitary conditions may not have been entirely satisfactory, it also appeared that in a general way these were similar to and on the whole as good as those usually provided in the early stages of railway construction. The Board is of opinion, however, and would recommend that a regular inspection and report of all conditions of the construction camps, buildings and conveniences of the Company be made by its physicians with a view to better the conditions of employees and secure, if possible, that these be satisfactory in so far as food, lodgings and sanitation are concerned.

9. The Board is of opinion that the cases of certain of the men whose alleged grievances were the subject of investigation and discussion might well be reconsidered by the officers of the Company with a view to their restoration to its service.

Your Board is glad to report an adjustment of the matters in dispute and its unanimous agreement upon the basis of the attached schedules to remain in force for one year from August 15th, 1909, and thereafter subject to termination on thirty day's notice by either party.

(Sgd) R. F. SUTHERLAND,
Chairman.

" F. H. MCGUIGAN,
Representing the Company.

" J. G. O'DONOGHUE,
Representing the Employees.

Schedule.

Schedule of rates of pay and rules governing the service of engineers, firemen and hostlers on all owned, leased

and operated lines west of Fort William, Ontario.

Article 1.

Engineers. Firemen

<i>Passenger trains, per mile,</i>	\$ c.	\$ c.
Engines 50 to 100 and 300	4.00	2.50
Engines 1 to 26.....	4.10	2.70
Engines 200 to 225.....	4.25	2.90
Engines 500 to 509.....	4.50	3.05

<i>Freight service, per mile,</i>		
Engines 50 to 100 and 300	4.40	2.60
Engines 1 to 26.....	4.50	2.80
Engines 200 to 225.....	4.65	3.00
Engines 500 to 509.....	4.90	3.25

Construction and other work

<i>Trains, per hour,</i>		
Engines 50 to 100 and 300	.40	.23½
Engines 1 to 26.....	.41	.25½
Engines 200 to 225.....	.42½	.27½
Engines 500 to 509.....	.45	.30

*Light running and piloting,
paid for class of service
performed.*

Operating rotary plow.....	4.90	3.25
Switching rates, per hour..	.37½	.22½
Watching and caring for engines, per hour.....	.40	.25

Article II.

On regularly assigned way-freight runs twenty-five cents (25 cents) to engineers, and fifteen cents (15 cents) to firemen will be allowed in addition to through freight rates for each one hundred (100) miles and *pro rata* for any fraction thereof.

DETENTION.

Article III.

(1) On all passenger trains not otherwise specified detention will be paid for the time used in making the trip in excess of the time necessary to complete the trip at an average speed of fifteen (15) miles per hour.

(2) On all way-freight, through and mixed trains, not otherwise specified, detention will be paid for the time used in

making the trip in excess of the time necessary to complete the trip at an average speed of eleven (11) miles per hour.

(3) Detention will be computed from the time crew is called to go to work until it is registered in at the arriving terminal. Time of work trains will commence thirty (30) minutes before leaving-time of train.

(4) Fractions of an hour less than thirty (30) minutes will be counted; fractions of an hour over thirty (30) minutes will be counted one hour.

(5) Terminal delays in road service before departure will be reported on separate ticket and will be paid for at detention rates. Delays of less than one hour and thirty minute, (1 hr. 30 min.) will not be counted. The time so made will be deducted from any detention earned on the trip.

(6) Terminal delays in road service after arrival to be reported on separate ticket and will be paid for at detention rates. Delays of less than forty-five (45) minutes will not be counted. Delays over one hour and thirty minutes (1hr. 30 min.) to count two hours.

Terminal delays will begin when train is registered in arriving terminal and end when engine is delivered in engine house yard.

(7) Detention will be paid at mileage rates for the class of service performed, based on detention speed limits. Enginemen shall be promptly notified and reason given when time shown on time tickets is not allowed.

Article IV.

MISCELLANEOUS SERVICE RATES.

(1) Enginemen acting as pilots will receive the Engineer's rate for the class of service performed.

(2) Authorized dead-heading on Company business, two hundred (200) miles or less, will be paid minimum passenger rates for actual miles. Distances in excess of two hundred (200) miles, half minimum passenger rates.

(3) Engineers assigned to specified runs will be paid extra for work done outside of the regular run and work per-

formed either before or after time card hours at the rates effective for the class of service performed, and failing to, make a full month will be paid *pro rata* for the service performed.

(4) Shop time, including time acting as hostlers, will be computed at the rate of three dollars (\$3.00) for each day of ten (10) hours; five (5) hours or less will be paid half day, over five (5) hours and less than ten (10) hours, one day.

Article V.

Enginemen in freight or passenger service will be paid mileage from the track where they take the engine to track where they deliver it. Round trips 100 miles or more one way will be paid for as separate runs.

Article VI.

Road enginemen called and cancelled within three (3) hours, having made no mileage, will be paid for three (3) hours and stand first out. For less than five (5) hours or fifty miles pay for five (5) hours or fifty (50) miles will be allowed. When over five (5) hours or fifty (50) miles pay for ten (10) hours or one hundred (100) miles will be allowed.

SWITCH ENGINEERS.

Enginemen on switch engines will be paid five (5) hours for five (5) hours or less; over five (5) hours, actual time.

Article VII.

Engineers held under orders for train or other service or attending court or coroner's inquests on legal cases for the Company will be allowed four dollars (\$4.00) for each twenty-four (24) hours' or portion thereof, detention from duty. Firemen will be allowed two dollars and fifty cents (\$2.50) for each twenty-four hours' or portion thereof, detention from duty. When such service is done on a day upon which regular work is also performed payment will be made *pro rata* for the time so occupied. When such service is done on a lay-off day the full rate will be allowed. Expenses will be allowed at the rate of

two dollars (\$2.00) each for each twenty-four (24) hours away from home station. The court witness fees and mileage will be assigned to the Company.

Article VIII.

Enginemen in charge of dead engines will be paid enginemen's minimum freight rates and overtime, if made.

Article IX.

Enginemen on snow plow trains will be allowed actual mileage including sidings plowed.

Article X.

Enginemen on work trains will be allowed pay for making repairs to engines before or after hours at pits or other work train points where there is no locomotive staff. Such work to be reported on a separate ticket.

Enginemen in work train service, if not required on Sunday, will be furnished passes and allowed to go home when such leave will not interfere with the service.

An assigned work crew running thirty (30) miles or more to or from work, mileage so run will be paid for at through freight rates; time so occupied not to be included in time paid for at work train rates.

Work train crews will be given opportunity for meals at reasonable hours and provided with reasonable sleeping accommodation

Article XI.

When an engineman in regular service is called upon temporarily to perform duties other than his own, except that of hostler, he will receive not less than his own rate of pay. This not to apply to extra men.

Article XII.

Enginemen will not ordinarily be required to back up or run tender first in inclement weather or after dark except with work or construction trains or in case of emergency.

Article XIII.

The engineer in charge of an engine ordered over any section or branch with which he is not familiar will, when necessary, be furnished with a competent pilot.

Article XIV.

The handling of freight crews in the movement of traffic under normal conditions will, so far as practicable, be so arranged by the Company as to avoid excessive lay-over at other than home terminals.

Article XV.

Enginemen taking engines from one terminal or division to another will be furnished passes to return home and will not be required to run out of any other than their home terminal unless agreeable to them or in case of emergency.

Article XVI.

Engines running through terminals where roundhouse staff is employed, whether on round trip or over more than one section, will, where convenient, have coal shoveled ahead and fire and ash pan cleaned by roundhouse staff.

Article XVII.

Engine cabs will be furnished with the usual seats and boxes suitable for storing clothes.

Engines should be so maintained that excessive and unnecessary steam blowing from any part will be avoided.

During cold weather the engine will be equipped with frost glasses on front cab window, side and back curtains, and back boards, and all openings about the cab, in running board and around the reverse lever, will be kept closed.

Article XVIII.

When an engineman is discharged or resigns he will, as soon as practicable, be paid and given a certificate stating term

of service and in what capacity he was employed.

Article XIX.

If an engineman be taken off his run for any cause he shall, if he so desires, be given a hearing at which he shall have the right to have another engineman of his own selection appear and speak for him and shall have the right to appeal from the decision of the Local or the General Officers of the Company. Should no decision be rendered within fifteen (15) days he shall receive pay until decision is rendered and if proved innocent be reinstated and receive compensation for time lost.

Article XX.

A revised seniority list of enginemen shall be posted at each roundhouse on the first of January each year.

Article XXI.

Enginemen's seniority will date from day of commencing work.

Article XXII.

Firemen will, conditions permitting, be called upon to pass examination for promotion in seniority turn and will be notified in writing within thirty (30) days thereafter of the results of such examination.

When conditions will not permit of a fireman taking his examination he will forfeit no rights thereby.

In the event of a fireman refusing to take or failing to pass the required examination he may be called upon again within six (6) months to pass a second examination. Firemen refusing to take or failing to pass a second examination will be placed at the foot of the eligible list or their services dispensed with, at the option of the Company.

Article XXIII.

When necessary to transfer an engineman from one district or division to

another, junior men will be transferred. If necessary for them to remain one year they will be classed as permanent men and retain seniority.

Promoted engineers put back firing will have priority over hired engineers and choice of runs, according to seniority.

Article XXIV.

Enginemen taken over with another road will hold their seniority on the lines acquired.

Enginemen assigned by the Company to contractors' service will retain their seniority.

Article XXV.

Senior enginemen will have precedence in promotion and runs, dependent upon their general good conduct, faithful discharge of duty, and ability to assume increased responsibility, the Master Mechanic to be the judge.

Article XXVI.

Any enginemen refusing a run to which he is assigned will forfeit his rights to the man accepting it.

Article XXVII.

If an engine assigned to a regular run is taken off such run, the engineman assigned to such run will be furnished with another engine.

Article XXVIII.

If a regular run be vacant for thirty (30) days or less the senior extra engineman available will be used. If vacant for more than thirty (30) days the senior engineman desiring the run will be used.

Article XXIX.

The number of crews on a district shall be regulated so far as possible as to enable the men to make at least twenty-six hundred (2,600) miles or twenty-six (26) days per month.

Article XXX.

Should enginemen through sickness or injury become incapacitated for performing their work they may be assigned to such other service as they are capable of performing.

Article XXXI.

Regularly appointed members of the Adjustment Committee of the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen will, when required to do committee work, be relieved from duty and furnished necessary transportation.

Article XXXII.

At stations where no regular force is provided Enginemen will be paid..... for turning and properly housing each locomotive, day and night.

Article XXXIII.

When enginemen whose compensation is on a mileage basis are obliged to double grades on account of train tonnage exceeding rated capacity of locomotive, or to run for supply of coal or water, such mileage will be paid for at rate specified for district. The time so made will be deducted from any detention earned. In other words the Company shall not be required to pay twice for the same service.

Article XXXIV.

Throughfreight locomotives and enginemen not assigned to preferred freight runs will be run first in, first out on the district to which they belong, as far as practicable, in the service to which they are assigned.

Article XXXV.

The spare list will be posted, it being the duty of spare men to give continual attention to it and be prepared for duty at any time, unless they shall have received permission to be absent.

Article XXXVI.

Spare men not appearing when called will lose their turn and fall to the bottom of the list.

Article XXXVII.

Enginemen must respond promptly to the call of duty. A grievance, real or imaginary, should take the form of a complaint to be enquired into and dealt with at the proper time. It does not justify refusal to comply with instructions.

Article XXXVIII.

A caller will be kept at stations, where necessary, to call enginemen.

Article XXXIX.

Men will be called at their regular registered residences and as near as possible two (2) hours before leaving-time of train.

Each man when called must sign a call book which will show the time called and the departure time of the train called for.

Article XL.

Enginemen who are assigned to regular runs will not be called for trains leaving between the hours of 8 a.m. and 9 p.m.

Article XLI.

Enginemen after continuous service of fifteen (15) hours or more shall have eight (8) hours rest before they are again called for service, except in case of emergency.

Article XLII.

Leave of absence must be obtained from the foremen in charge in the event of illness. Notice must be immediately given so that a substitute may be provided.

Article XLIII.

Frequenting saloons, the use of intoxicating liquors or insubordination will be sufficient cause for dismissal.

Article XLIV.

GENERAL DUTIES.

(1) To economically handle and use the oil, coal, sand, water, waste and other supplies;

(2) To report for duty and register out forty-five (45) minutes previous to the time called to leave and to be on hand and have the locomotive in readiness to start with train at the time called to leave;

(3) To examine bulletin books and notice boards before leaving a terminal.

(4) To enter rest required immediately on arrival at terminal in book provided for that purpose. If leave of absence on account of sickness or for any reason other than for rest is desired, to report personally to the foreman or his substitute.

(5) To assist in every manner possible, in the event of a locomotive failure or casualty, to avoid delay to the train and to clear the main line.

(6) To make the light repairs which may be necessary to keep the locomotives in good condition for service until they can be taken to the roundhouse or terminal.

DUTIES AT ROUNDHOUSE TERMINALS.

Engineers.

(1) To make the usual hammer test inspection of the locomotive both before and after leaving terminal, and engineers will be held responsible for any defects found inside the frame of engines except where they have booked inspection to be made, which must be only at points where and at times when there are no means of making inspection.

(2) To see that the locomotive has its proper equipment and a full supply of oil, sand, water, coal and other supplies before leaving the roundhouse to go out on a run. In the case of locomotives requiring to be equipped with tools before going into service such work will be attended to by the shop staff.

(3) To test the air pump, both injectors, lubricators and steam heating equipment and to know that they are in proper

working order previous to leaving roundhouse to go out on run.

(4) To personally test the air brake and signal whistle equipment by operating the engineer's brake valve and the angle cocks at the rear end of the tender, and to see that this equipment is in good working order, previous to leaving roundhouse tracks to go out on a run.

(5) To adjust the feeds of all oilcups and to close the feeds immediately on arrival at a terminal.

(6) To see that the automatic coupler knuckles are closed and that the air and steam hose are coupled to their respective fastenings, before the locomotive is delivered at a terminal.

(7) To see that heaters are applied during severe weather to all pipes requiring such and before locomotives are delivered at a terminal.

(8) To drain the water of condensation from the main and auxiliary reservoirs, triple valves, drain cups, and all other portions of the air brake equipment, to prevent its accumulation, and in addition to see that the engine and tender and air appliances that are liable to damage by frost are properly drained when an engine becomes disabled for service.

(9) To see that a judicious amount of water is left in the boilers of locomotives before they are delivered at a roundhouse after arriving at a terminal.

(10) To register in immediately on arrival at a terminal and to make out the trip tickets and the forms used in reporting train detention, casualties, personal injuries, stock struck, fires, etc., when such reports are necessary, before leaving the company's premises.

(11) To make, immediately on arrival at a terminal, a complete written report of all work necessary to be done by the roundhouse force on the assigned locomotive.

(12) To keep in adjustment the travel of the driver and engine truck brake cylinder pistons, when the same can be reached from the outside, and to test the air brake equipment, and to remedy or make prompt report of all irregularities.

(13) To care for the trimming of the eccentric straps, also for the trimming of

the top of the driver boxes where they can be conveniently got at. When this work is reported it will be attended to by shop staff.

(14) To pack the steam and air stuffing boxes on the boiler head and other steam throttles when it can be done with steam in the boiler and can be conveniently reached. This work to be done by the shop staff when reported.

(15) To pack the steam and air end stuffing boxes of the air pump piston rod.

(16) To apply swabs to the valve stem, piston rod and air pump piston rod glands.

(17) To pack the valve stem and piston rod stuffing boxes of locomotives not equipped with metallic packing.

(18) To clean and care for the head lamp, reflector, burner, chimney and the glass to the cage.

(19) To care for the locomotive equipment.

(20) To care for the air pump and see that it is kept in a clean condition and properly lubricated.

(21) To make a complete and intelligent report of work necessary to be done on locomotives going to the shops for repairs.

DUTIES IN SERVICE ON THE ROAD.

Engineers.

(1) To make as many intermediate inspections of the locomotives as opportunity may afford.

(2) To renew the water gauge and lubricate glasses.

(3) To tighten the nuts of all bolts found to be loose.

(4) To close the feeds of all lubricators and oil cups when lying at stations or on side tracks for over five minutes.

(5) To see that the heaters are applied properly to all injectors, steam heat, rail cleaner and other pipes requiring such heaters during severe weather.

(6) To be responsible for the steam pressure and water in the boiler and the steam heat line, and the air pressure in the train and signal lines being maintained and not increased.

(7) To prevent such firing of a boiler as will produce black smoke and cause the steam to be relieved through the pop

valves; all the surplus steam to be blown into the tender feed water.

(8) To see that the firemen attend to the duties assigned to them and that they comply with the instructions in effect.

(9) To handle the locomotive in such a manner as will give the best result, both as regards economy and efficiency; to make up all the time possible with trains that may be late or important and to handle the air brake and steam heat equipment in accordance with instructions, and to render the best of service.

(10) To make a telegraphic report to the Master Mechanic of slid or flat wheels under locomotives, and of accidents which result in damage to machinery or personal injury, and of causes for unusual delays to trains which may be chargeable to the Motive Power Department.

(11) To immediately notify the conductor in the event of a locomotive becoming disabled on the road so as to cause delay to trains, as to the reason of the failure, how soon the locomotive will be ready to proceed and with what portion of the train, so that the trainmaster can be advised and issue the necessary instructions.

DUTIES OF FIREMEN AT ROUNDHOUSE TERMINALS.

Firemen.

(1) To draw the necessary supply of oil, waste and stores immediately on arrival at the roundhouse or previous to going out on a run.

(2) To fill the lubricator and the headlamp oil reservoir also the cab blizzard and hand signal lamp reservoirs on arrival at the terminal.

(3) To care for all lamps but the headlamp, and to clean the cage of the latter.

(4) To assist the engineer in caring for the locomotive equipment.

(5) To shovel the coal from the rear end of the tender at least once during each week, and to trim the coal from the sides of the tender at all terminals or immediate coal stations.

(6) To keep the rear end tender deck around the water hole clean at all times, and the drains open.

(7) At points where no shop staff is employed, if required before or after hours, to clean the fires of pilot, pusher or switch locomotives, and to wipe the running gear and the tenders of such pilot, pusher or switch locomotives, they shall be paid at regular rates for such services.

(8) To keep all tender tool and equipment boxes and the equipment contained therein in a clean and orderly condition.

DUTIES IN SERVICE ON THE ROAD.

(1) To be subordinate to the engineer.

(2) To be held strictly responsible to the engineer for the condition of the grates, ashpan and dampers, and all the rigging pertaining thereto, and to know that the necessary firing tools are on the locomotive previous to leaving the roundhouse tracks to go out on a run.

(3) To comply with the instructions in effect in regard to the economical firing of locomotives and the use of surplus steam.

(4) To be on the lookout for and to receive all the signals which may be given or located on the left side of the locomotives, and to transmit them promptly and correctly to the engineer.

(5) To be on the lookout for and to report to the engineer promptly all irregularities which may be detected in the operation of the locomotive.

(6) To have the fire in readiness for the run, and the full pressure of steam in the boiler at the time the locomotive is coupled to the train and the latter is ready to leave.

(7) To keep on the locomotive one red and one white lantern, lighted and in readiness for immediate service from sunset to sunrise. Four torpedoes must be attached to the frame of the red lantern.

(8) To keep the cab foot plate clean and dampened, and the coal wetted down and well raked in from the sides of the gangway during the trip over the road.

(9) To leave the locomotive at the end of the trip or day's work with a bright fire on the grates, and especially next to the tube sheet.

(10) To remove from the locomotive all the train signal flags and lights imme-

diately on arrival at the roundhouse terminal.

(11) Road firemen will be relieved from all brass scouring and all cleaning outside the cab while the engine is in service, but will clean the cab interior and sweep the cab and deck, provided such parts are in a cleanly condition when the engine is turned out for service.

For the Employees.

Schedule.

Schedule of rates of pay and rules for Conductors, Brakemen, Brakemen and Yardmen, Grand Trunk Pacific Lines West of Fort William.

Passenger trains, for average monthly mileage of 5,000 miles or less:

	Per Month.
Conductors will be paid	\$ 135.00
Brakemen will be paid.....	72.75
All mileage in excess of 5,000 miles per month will be paid pro rata.	

	<i>Conductors Brakemen</i>	
Through freight trains		
per 100 mile.....	\$3.80	\$2.60
Way-freight and mixed		
trains per 100 mile	4.18	2.86
Work train, helper or		
pusher, per hour.....	38	26

RULES FOR TRAINMEN.

Article 1.

Light running and piloting will be paid for at rates for class of service performed.

The mixed trains as at present run, and similar runs added, will be classed and paid as way-freight runs.

Article II.

Snow plow and flanger trains will be paid for at through freight rates. Trainmen will not be required, except in case of emergency, to ride in plow, but will be

supplied with a caboose or other suitable car.

Article III.

Trainmen deadheading or travelling passenger on Company's instructions will be paid at the same rate as the corresponding men running the train on which they travel.

The crew standing second out will dead head and will stand first out of the distant terminal.

(b) Trainmen dead heading on passenger trains at the instance of the Company, 200 miles or more, will be paid one-half passenger rates; otherwise they will be paid as per Clause (a).

Article IV.

Through freight trainmen regularly required to load or unload way-freight en route will be paid at way-freight rates for the time so occupied, but not in excess of way-freight rates for the full trip, such time to be deducted in computing overtime.

Article V.

When a passenger train averages less than fifteen miles per hour, and any other train less than eleven miles per hour, overtime will be paid *pro rata* for time consumed in excess of these respective averages from the time crew is called to leave terminal until booked off duty at the arriving terminal—less than thirty minutes not to count, thirty minutes or over to be counted one hour. In work train service time will be computed beginning thirty minutes before leaving time, except spotting crews.

Article VI.

When obliged to double grades on account of train tonnage exceeding rated capacity of locomotive, or to run for coal or water, such mileage will be paid for at rate specified for the District. The time so made will be deducted from any overtime earned.

Article VII.

Trainmen called and cancelled within three hours, having made no mileage, will be paid for three hours and stand first out. For less than five hours or fifty miles, pay for five hours or fifty miles will be allowed. For over five hours or fifty miles, pay for ten hours or one hundred miles will be allowed.

Article VIII.

(a) Trainmen on wrecking trains will be allowed actual mileage to and from working limits, and work train rates while at work.

(b) Trainmen will be furnished passes and allowed to go home for Sunday if the train service will permit and it will not interfere with the work service.

(c) Unassigned freight crews will, when practicable, be selected for work train service, seniority to govern.

Article IX

Trainmen held under orders for train or other service will be paid ten miles per hour at through freight rates for the last ten hours or portion thereof in every twenty-four hours so held, less any mileage or time otherwise paid them during the said twenty-four hours. When attending Court away from home on Company's instructions will also be allowed \$2.00 per day expenses. Witness fees and mileage shall be assigned to the Company.

Article X.

Trainmen required to coal engines en route will be paid at the rate of thirty-three cents per hour for the time so occupied, and this time will be deducted in computing overtime,

Article XI.

Trainmen shall be promptly notified and reason given when time shown on Time Tickets is not allowed.

Article XII.

When the business of the Company requires temporary transfer of men from one District or Division to another, the competent junior men in service shall be transferred and hold their seniority on the Districts to which they belong. Promoted conductors put back braking will have priority over hired conductors and choice of runs according to seniority.

Article XIII.

Trainmen who have been on duty twelve hours or more will not be called again for immediate duty if they require rest, the men to be judge of their own condition, but eight hours' rest is to be considered sufficient, except in extreme cases. The required rest must be booked on arrival.

Article XIV.

Freight trainmen living within one mile of yard office and passenger trainmen living within one mile of the passenger station, will be called as nearly as possible in time to be on duty forty-five minutes and thirty minutes respectively before leaving time of train. Caller will be furnished with a book in which the time the train is to leave will be registered and in which trainmen will sign their names. Regular men assigned to trains leaving between 8.00 A.M. and 9 P.M. will not be called.

Article XV.

Trainmen assigned to regular runs will not be required to remain in caboose at terminal points, and unless notified that they will be required before their regular runs will not be considered absent from duty, if address is given where they can be called if required, and crews so advised will be given their turn out with unassigned crews.

Article XVI.

Unassigned crews in freight service will be run first, in first out of terminals.

Article XVII.

The number of crews on any district shall be regulated so far as possible, to enable the men to make at least 2,600 miles, or 26 days per month.

Article XVIII.

If a trainman be taken off his run for any cause, he shall, if he so desires, be given a hearing at which he shall have the right to have another trainman of his own selection appear and speak for him, and shall have the right to appeal from the decision of the Local to the General Officers of the Company. Should no decision be rendered within fifteen days, he shall receive pay until decision is arrived at, and if proved innocent shall be reinstated and receive compensation for the time lost.

Article XIX.

When a trainman is discharged or resigns he will, as soon as practicable, be paid and given a certificate stating term of service and capacity employed.

Article XX.

Senior trainmen will have precedence in promotion and runs, dependent upon their general good conduct, faithful discharge of their duty and ability to assume increased responsibility, the Superintendent to be the judge.

A revised seniority list of trainmen shall be posted at each terminal on the first of January each year.

Article XXI.

Trainmen will not, if avoidable, be compelled to handle, in trains, cars, the draft gear of which is defective and requires to be chained, beyond next terminal.

Article XXII.

Members of adjustment committees regularly appointed shall be relieved when required to do committee work, and furnished necessary transportation,

sufficient notice to be given Superintendent so that service will not suffer.

Article XXIII.

Crews assigned to regular runs will not be called upon to do other work when it can reasonably be avoided.

Article XXIV.

Trainmen running snowplows will be allowed actual mileage, including sidings plowed.

Article XXV.

Should trainmen through sickness or injury become incapacitated for performing their work they may be assigned to such other service as they are capable of performing.

Article XXVI.

Trainmen will, conditions permitting, be called upon to pass their examinations for promotions in seniority turn and will be notified in writing within thirty (30) days thereof of the results of such examinations.

When conditions will not permit a trainman taking his examinations, he shall forfeit no rights thereby.

In the event of a trainman refusing to take, or failing to pass the required examination he may be called upon again within six (6) months to pass a second examination. Trainmen refusing to take, or failing to pass, a second examination, will be placed at the foot of the eligible list or their services dispensed with, at the option of the company.

Article XXVII.

Trainmen taken over with another road will hold their seniority on the lines acquired.

Trainmen assigned by the company to contractors' service will retain their seniority.

Article XXVIII.

Any trainman refusing a run to which he is assigned will forfeit his rights to the man accepting it.

Article XXIX.

If a trainman assigned to a regular run is taken off such run the trainman assigned to such run will be furnished with another run.

Article XXX.

If a regular run be vacant for thirty (30) days or less the senior extra trainman available shall be used; if vacant for more than thirty (30) days the senior trainmen desiring the run shall be used.

Article XXXI.

A revised seniority list of trainmen shall be bulletined on the 1st of January of each year.

Trainmen's seniority will date from the day of commencing work.

Article XXXII.

Unassigned trainmen running work trains thirty (30) miles or more to or from work, the mileage so run will be paid for at through freight rates, the time so occupied not being included in time paid for at work train rates.

Article XXXIII.

Trainmen will be given opportunity for meals at reasonable hours.

Article XXXIV.

The handling of freight crews in the movement of traffic under normal conditions will, so far as practicable, be so arranged by the company as to avoid excessive lay over at other than home terminals.

RULES AND RATES FOR YARDMEN.

<i>Rates:</i>	<i>Day</i>	<i>Night.</i>
Yard foremen, per hour	\$.35	\$.37
Yardmen per hour32	.34
Ten hours will constitute a day's work.		

Article I.

Articles 11, 20 and 27 in Trainmen's Schedule will apply to Yardmen.

Article II.

When held off duty on company's instructions, yardmen will be paid schedule rates for time so lost and will receive \$2.00 a day for expenses while away from home.

Article III.

Overtime will be paid *pro rata* on basis of one-tenth of one hour for every six minutes worked, less than three minutes not to count, three to six minutes to count as one-tenth of an hour.

Article IV.

Yardmen when possible will be allowed one hour for meals between the

fifth and seventh hour after coming on duty. Failing this they will be paid for meal hour and allowed twenty minutes for lunch.

Article V.

Except in case of emergency, yardmen will not be compelled to work with an engine not properly equipped with foot boards, grab irons and automatic couplers.

ADJUSTMENT OF DISPUTE BETWEEN THE CANADIAN NORTHERN RAILWAY COMPANY AND ITS MAINTENANCE-OF-WAY EMPLOYEES.

UPON receipt in the Department of Labour on July 21, of the findings of the Board of Conciliation and Investigation which was appointed to conduct an enquiry into differences between the Canadian Northern Railway Company and its Maintenance-of-Way Employees, enquiry was made by the Minister of Labour to ascertain whether the findings of the Board in this matter were acceptable to the parties as an adjustment of the dispute. A letter was received under date of July 17, from Mr. A. B. Lowe, President of the International Brotherhood of Maintenance-of-Way Employees, in which it was stated that the employees concerned had accepted the findings of the Board in this matter. On August 13 the Minister of Labour was informed by the Canadian Northern Railway Company that a settlement had been arrived at between the company and its Maintenance-of-Way Employees. On August 17, a letter was received from Mr. A. B. Lowe, President of the International Brotherhood of Maintenance-of-Way Employees, in which it was stated that the whole matter was happily settled by the acceptance of the award by the Company and the signing-up by the men's representative and by the Manager of a

schedule based upon the Board's award. In a circular addressed by President Lowe to members of the International Brotherhood of Maintenance-of-Way Employees on the Canadian Northern Railway System it was stated that "In my last circular I told you of the deadlock between your committee and the management over the revision of your schedule which had been in operation for about two years. You are also aware that the whole matter of rules and rates was referred to arbitration under the Lemieux Act. The award, I am glad to say, was generally favourable to you, but was not regarded by the Company as being quite fair to them. Both, however, accepted the award, but in the adjustment of your schedule to the award by the Management and your Joint Protective Board, some slight changes were mutually agreed to, so that while the schedule is not in the exact terms of the award, it was satisfactory both to the Management and your Joint Protective Board, and meets with my very hearty approval.

"The permanent sectionmen retain their \$1.75 per day, the pump repairers who were not on the schedule before, are now upon it and receive \$3.00 per month

more than the award gave them. All section foremen, bridge and building and water service men receive an increase,

and no less than eight sections have been given yard rates, an increase of 20 cents per day to each."

ADJUSTMENT OF DISPUTE BETWEEN CANADIAN NORTHERN ONTARIO, CANADIAN NORTHERN QUEBEC AND LAKE ST. JOHN RAILWAYS AND THE BROTHERHOOD OF LOCOMOTIVE ENGINEERS.

THE Department of Labour was informed on September 8 of the settlement of a dispute between the Canadian Northern Ontario, the Canadian Northern Quebec, and the Lake St. John Railway Companies, and locomotive engineers in their employ, arising out of the interpretation to be placed upon a schedule which was attached to the report of a Board under the Industrial Disputes Investigation Act, which had reported upon a dispute between the parties in question in the month of November 1908.

The question of interpretation was raised in a letter which was addressed to the Department of Labour on June 23 by the General Committee of Adjustment of the Brotherhood of Locomotive Engineers on the Canadian Northern Railway system. In this letter it was claimed

that the Company was not carrying out the terms of the agreement which had been made upon the report of the Board of Conciliation and Investigation in this matter. Correspondence ensued between the Department of Labour and the parties concerned, in which an effort was made by the Department to bring about an adjustment of these questions, with the result already indicated. In a letter to the Department on September 8, Mr. W. B. Best, General Chairman of the General Committee of Adjustment of the Brotherhood of Locomotive Engineers on the Canadian Northern Railway system thanks the Department for the steps which it had taken in this matter, and accords to the Department credit for having done much to bring about a settlement of the dispute.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE FIRST HALF OF 1909.

WAGES during the first six months of 1909 were for the most part stationary throughout Canada. During the winter months there was a tendency in certain branches towards lower levels, but the rates of the preceding winter were on the whole well maintained. Building employees were on somewhat lower schedules than in 1908, but general labour obtained about the same rates. On the opening of activity in the spring, the schedules of 1908 for skilled labour were for the most part renewed, and later an upward tendency was manifested. Unskilled labour, however, in the railway construction camps in Western Canada started on a lower rate than that of the fall of 1908. River drivers in the Ottawa Valley obtained an increase compared with the

preceding year. Among printers and civic employees, also, some important increases took effect. Especially noteworthy was the increase granted by the Dominion Government to letter carriers and post office clerks, the number benefitted thereby reaching approximately 1,400 employees. A detailed statement with regard to these and other changes of the period is as follows:

Changes by Industries and Groups of Trades.

Agriculture.—Wages in this industry up to the close of June remained on about the same level as in 1908. Experienced farm help was scarce and commanded exceptionally high wages on summer engagements.

Fishing.—Lobster fishermen at several points in the Maritime Provinces received a lower price than last year, \$2.25 per cwt being paid by the packers in Cape Breton, a reduction of 50 cents on last year's prices.* In British Columbia, the prices offered for springs and steel heads on the Fraser River were reduced during April, red springs being reduced from 8c. to 6c. per lb., white springs from 6c. to 3c. per lb., and steelheads from 5c. to 4c. per lb.

Lumbering.—Wages in connection with the drives were upward as compared with 1908 in the Ottawa Valley. Gangs recruited at Hull, Que., obtained a rate of \$2.-\$2.25; last year the average rate was \$1.75. In the mills rates were for the most part unchanged from last year.

Wages of pulp mill and paper hands working for the E. B. Eddy Company at Hull, Que., were as follows:—

Pulp Mill.

	per day.
Foremen.....	\$4.00
Sub-foremen.....	2.00
Barkers.....	1.65
Screen men.....	1.46 2-3
Grinders.....	1.60
Barkers' helpers.....	1.55 5-6
Greasers.....	1.65

Paper Mill.

Boss machine tenders.....	\$ 4.50
Machine tenders.....	3.83
Bag tenders.....	2.47½
Third hand.....	1.92½
Fourth land.....	1.46 2-3
Greasers.....	1.65
Broke hustlers.....	1.65
Paper Engineer.....	2.20
Paper man.....	1.46 2-3
Assistant engineer.....	1.65
Boss finisher.....	1.92½
Finishers.....	1.48½
Labourers.....	1.65

Common labourers are paid from \$1.37½ to 1.50 per day.

Mining.—Two important agreements affecting wages in the coal mining industry were signed during the half year period. An agreement concluded in 1907, between the Western Coal Operators' Association and the United Mine Workers of America, covering the majority of the mines in Eastern British Columbia and Alberta, came to an end on March 31, 1909. During the negotia-

tions arising out of a renewal of this agreement, the Crow's Nest Pass Coal Company withdrew from the Operators' Association and signed a separate agreement with its employees, under which working conditions were rendered more advantageous to the men, enabling them to make larger earnings than under former conditions. The employees of the remaining operators went on strike, but after a reference of the dispute under the Industrial Disputes Investigation Act, an agreement similar in the main to that which previously prevailed was signed on June 30, 1909. In respect of wages no change was made in the scale covering outside wages; the inside scale was also continued in effect, except in the case of machine men and their helpers who were granted a rate of \$3.50 and \$3.00 respectively per shift. The rates were previously from \$3.15 up and \$2.62½ respectively.¹

Railway construction.—On the resumption of activity in the railway construction camps of Western Canada the wages at first offered were considerably lower than during the autumn of 1908. During the month of May most of the men were being paid \$1.50 per day, and \$4.15 per week was charged for board. Last year, the rate was \$1.75 per day, and board was charged for at \$4.50 per week. As the season advanced, however, and the activity of the camps increased, wages were upward in tendency.

A reduction in wages from \$100 to \$75 per month among transit men engaged in surveying the town site of Prince Rupert and a reduction from \$45 to \$35 per month for chainmen at the same point was followed by a cessation of work early in the year. Approximately 100 men were affected.

Workmen to the number of 150 employed on the construction of the tunnel under the Detroit river at Windsor, Ont., had their wages increased from 27 to 30 cents per hour.

Italian labourers (250) employed on

¹ For detailed statements with reference to the circumstances attending the signing of this agreement see the *Labour Gazette* for April, 1909, page 1,107; for May, 1909, page 1,260; for July, 1909, page 78, and for August, 1909, page 227.

* See the *Labour Gazette* for June, 1909, p. 1374.

track laying by the Hamilton Street Railway Company received an advance in wages of from 15 to 17 cents per hour.

The building trades.—During the winter months, as a result of the comparatively less active conditions prevailing in the building trades, as compared with the two previous years, wages had a tendency to seek lower levels in certain localities. Carpenters, bricklayers, builders' labourers and stonecutters in Montreal, Que., and carpenters in Amherst, N. S., and Ottawa, Ont., for example, were working for a time on lower schedules. The reduction, however, was not based on any definite arrangement. As the season advanced, and in connection with the renewal of agreements for the current year, a number of increases took effect; among the more important being the following: Stonecutters at Calgary, Alta., (180) had their wages increased from 60 to 62½ cents per hour. Stone masons (45) in the same locality received a similar advance dating from June 30. Bricklayers at Brantford, Ont., received an increase in wages from 42 to 45 cents per hour, and had their hours decreased from nine to eight per day. Among carpenters, wages were steady on the renewal of agreements on May 1, with an upward tendency in some localities. At Regina, Sask., a rate of 35 cents per hour was established. At Vancouver, B. C., wages in this class were advanced from \$3.50 to \$4.00 per day. Lathers at Ottawa, Ont., had their wages advanced 25 cents per 1,000. Painters at Quebec, Que., were increased from 22½ to 25 cents per hour. Plumbers and steamfitters at Hull, Que., had their wages increased from 33 to 35 cents and 38 to 40 cents per hour respectively. Builders' labourers (150) at Regina, Sask., obtained an advance in wages from 17½ to 22½ per hour from May 26. (*)

The metal, engineering and shipbuilding trades.—Sheet metal workers at Ottawa, Ont., had their scale advanced from 25 to 30 cents per hour. Moulders' wages at Hamilton, Ont., were reduced 20 per cent. in February. The previous rate for day work was \$3.75 per day. The reduction was followed by a strike.

Subsequently, operations were resumed on a partial scale with non-union workmen.

Woodworking trades.—The employees of a furniture company and of a planing mill company at Berlin, Ont., had their wages advanced by \$1.88 per week, dating from May 1.

Printing and allied trades.—Important changes went into effect at Ottawa, Toronto, Hamilton, Ont., and Regina Sask. At Ottawa, new agreements dating from June 1, and governing both newspaper and job offices, were signed. In the former some 60 employees received an advance of \$1.00 a week, while in the job offices some 38 hands received an advance of 50 cents per week.² At Toronto, Ont., an increase of \$1.00 per week took effect from January 1 in virtue of a five years' agreement concluded May 22, 1907. Twelve hundred hands were affected.³ The scale is now as follows:—

Class.	Weekly earnings.
Compositors.....	\$16.00
Bookbinders.....	16.00
Pressmen.....	17.50
Press feeders.....	11.50
Bindery women.....	6.25
Stereotypers.....	16.00 to \$21.00
Electrotypers.....	16.00 to 21.00
Mailers.....	16.00
Platin pressmen.....	12.00

At Hamilton, Ont., also, from January 1, an increase of wages went into effect for compositors, pressmen, etc.⁴ The increase affected 261 employees and ranged from \$1.00 to \$2.00 per week. Operators were required to give an additional output of type, which leaves the scale on a piece work basis practically unchanged. At Regina, Sask., a new agreement involving an increase after the first year was signed during April, 1909.

The clothing trades.—Employees of the John Ritchie Company, boot and shoe manufacturers, Quebec, Que., obtained an agreement during February, after a reference under the Industrial Disputes Investigation Act of certain differences between the Company and its Employees,

with regard to prices to be paid for various classes of labour. An agreement was signed on the recommendation of the Board.⁵ At Toronto, Ont., an agreement dating from March 1, was signed between the merchant tailors of the city and the Journeymen Tailors' Union. The agreement is to last for three years. Conditions as to hours of labour were left unchanged, but a partial revision of piece work prices was made, involving a small advance on certain classes of work. About 250 employees were affected.

Brewery workers.—Sixty workmen employed at the breweries of C. N. Huethes, Berlin, Ont., and L. Kuntz, Waterloo, Ont., were granted an increase in wages of approximately \$2.00 per week from March 1. At the same time it was agreed that the work-day would be nine hours from November to April inclusive, the ten-hour day to prevail during the rest of the year. The exact nature of the increases granted will be seen from the following:

Class.	Old rate. per week	New rate. per week
Washers.....	\$ 9.90	\$ 11.50
Malters.....	9.50	10.50
Drivers.....	10.00	13.00
Drivers helpers.....	9.50	10.50
Single drivers.....	10.00	11.00
Cellar men.....	10.50	13.00
Kettle men.....	10.00	12.00
Stablemen.....	10.00	11.00
Engineers.....	18.00	20.00
Firemen.....	10.80	13.50
Malsters.....	9.50	12.00

Railway employees.—Telegraph operators to the number of 19 employed by the Kingston and Pembroke Railway Company were granted increases aggregating \$540 per year from January 1, 1909. The differences between the Company and the Employees in question were referred to a Board appointed under the Industrial Disputes Investigation Act findings of which were to the above effect.⁶

Post Office Department employees.—Letter carriers to the number of 1,160 were granted an increase by an amend-

ment of the Post Office Act, to date from April 1, 1909. The increase amounted to 50 cents per day. Other post office employees, to the number of 230, were granted increases in salaries involving an additional expenditure of approximately \$16,400 per annum.⁷

General transport.—Longshoremen at Owen Sound, Ont., received a new scale of wages during June by an award made by a Board appointed under the Industrial Disputes Investigation Act.⁸

Provincial Government employees.—Prison guards employed at Montreal, Que., had their salaries increased as follows:—

Class.	Old rate, per day.	New rate, per month.
Sergeants.....	\$1.75	\$60.00
Storekeeper.....		
Shop keepers, stableman, gate keepers, court house cell keeper.....	1.50	55.00
Gaol guards, turnkeys and keepers.....	1.50	50.00

Under an Act "Respecting the Office of Sheriff" passed by the Ontario Legislature in April, 1909, the minimum income of a sheriff was placed at \$1,200.

Civic employees.—At Ottawa, Ont., a number of increases were granted to civic employees to take effect from January 1.⁹ During March, 25 additional civic employees received increases of \$50 per year. Altogether the aggregate of the increases amounted to \$2,500 year year, an additional \$2,000 to be granted from January 1, 1910. The indemnity of the controllers was increased from \$400 to \$1,000 per annum adding \$2,400 to the cost of administration. Forty teamsters employed by the corporation of Ottawa received an increase from \$3.85 to \$4.23 per day from June 15. At Quebec, Que., 82 policemen and 72 firemen were granted an increase of 10 cents per day. Police sergeants and guardians of fire stations received a similar increase.

⁷ For detailed statement with regard to the nature of this increase see the *Labour Gazette* for May, 1909, page 1162, and the *Labour Gazette* for June, 1909, page 1338.

⁸ For detailed statement with regard to the circumstances under which the increase was granted and the nature of the increase, see the *Labour Gazette* for July 1909, page 90.

⁹ See the *Labour Gazette* for January, 1909, page 669.

⁵ See the *Labour Gazette* for March, 1909, page 970.

⁶ For full text of the report of the Board see the *Labour Gazette* for May, 1909, page 1234.

At Toronto, Ont., the following salary increases were granted by the city council during March:—

Assessment Commissioner.....	\$4,000 to \$4,500
City solicitor.....	3,500 to 4,000
City Clerk.....	3,000 to 3,500
City Engineer.....	4,750 to 5,000
Property Commissioner.....	2,500 to 2,750
City Architect.....	3,750 to 4,000
Fire Chief.....	3,000 to 3,500

It was also decided that a graded schedule for all departments, providing for an increase of \$50 per year for each officer, except in a few cases where an increase of \$100 was provided, would take effect from January 1, 1909. A new scale for firemen's salaries commences at \$500 per year proceeding by annual increases until a maximum of \$900 is reached. Civic employees and firemen at St. Thomas had their salaries advanced as follows:—

Officer.	Old rate. per year.	New rate. per year.
City treasurer.....	\$1,625.00	\$1,725.00
City auditor.....	600.00	700.00
Fire chief.....	720.00	780.00
Fire driver.....	612.50	660.00
".....	600.00	650.00

The employees of the civic light, heat and power department at St. Thomas received increases as follows:—

Officer.	Old rate. per year.	New rate. per year.
Manager.....	\$1,440.00	\$1,470.00
	per week.	per week.

Superintendent of plant.....	\$17.70	\$18.50
First engineer.....	14.56	15.50
Second engineer.....	12.56	13.50
Third engineer.....	11.56	12.50
Foreman, gas plant.....	12.56	13.50
Stokers, (12).....	11.56	12.00
Lamplighters, (2).....	6.25	6.50
Labourers and pipe fitters, (12)	10.20	10.50
Street foremen.....	11.10	12.00

Corporation labourers (10) at Sault Ste. Marie, Ont., received an increase from \$1.75 to \$2.00 per day.

County employees.—From Jan. 1, 1909, the following increases took effect for employees of the County of Huron, Ont.:

Officer.	Old rate.	New rate.
Treasurer.....	\$1,350	\$1,400
Clerk.....	1,000	1,050
Engineer.....	800	1,000
Turnkey.....	575	600
Keeper, house of refuge.....	300	500
Matron ".....	250	300

Early closing.

Early closing arrangements went into effect in a large number of localities during the summer months, and especially during July and August. The classes chiefly affected were retail clerks and barbers. In manufacturing establishments the arrangements were on a less extensive scale than in 1907 or 1908.

INTERSTATE CONFERENCE ON INDUSTRIAL ACCIDENTS HELD AT ATLANTIC CITY, N. J.

ON July 29-31 a conference was held at Atlantic City, N. J., of various state and government officials and others in the United States interested in the subject of the compensation of workmen injured in the course of their employment. More particularly, the subject under discussion was the advisability of legislation changing the basis of recovery for injuries received in the course of employment, from that of negligence or fault of the employers, to that of risk in the in-

dustry, or insurance. The conference was called together by the Minnesota Employees' Compensation Commission, on the initiative of its chairman Mr. H. V. Mercer, of Minneapolis. Its purpose was to enable the members of the Commission and representatives of the Wisconsin Joint Committee on Industrial Insurance, the New York State Commission on Employers' Liability and Unemployment, and other interested organizations, to come together to discuss re-

medies for the present inadequate methods of providing for the victims of industrial accidents.

There was complete unanimity of opinion among those present as to the need of changing the basis of recovery for injuries to that of risk involved in the industry. All concurred in approving a system under which injured workmen, or those dependant on them, should be entitled to compensation on a definite scale, irrespective of the question of the employers' negligence. Another important subject discussed was the possibility of a federal system of workmen's compensation or insurance in the United States. It was argued that a reasonable system of this nature should be justified as a legitimate exercise of the police power and would therefore be constitutional in the several states. It was resolved to obtain the opinions of the best lawyers on the question and compare them. As to whether public opinion could be brought to demand such a law there was a considerable difference of opinion. Workmen seeking compensation, it was thought, would not be willing to surrender altogether their common law right to sue the employer. On the other hand it was held that the employers would oppose any general compensation arrangement which did not at the same time relieve them of their common law liability. As a possible compromise it was suggested that the definition of criminal negligence might be made more sweeping and that insurance companies could be relied upon to penalize a criminal employer. On the whole the difficulties were not regarded by the conference as insurmountable.

The conference discussed exhaustively the practical aspects of the question, reviewing the British, German, Austrian, Swedish, Dutch and French systems. It was thought that a system involving certain improvements on these could be devised for the United States. The substitution of periodical stipends during the period of disability for lump-sum payments was advocated. The necessity of flexibility in the machinery which the employers should be allowed to devise for meeting their liability, and the pro-

viding through the state of protection for employees the satisfaction of whose claims might be balked by the insolvency either of the employer or of the insurance company on which he depended, was dealt with. The need also of measures calculated to reduce the number and seriousness of accidents was pointed out.

At the close of the conference it was thrown out as a suggestion by the chairman that a system of state insurance supported by the taxation of the employers whose employees are to be benefited might be the best solution of the question.

Arrangements were completed to hold a further conference during the coming winter to which the governors of all the states would be asked to send representatives. Mr. Charles P. Neill, Chief of the Department of Commerce and Labour, Washington, D. C., was elected chairman and Mr. H. V. Mercer, secretary of the conference.

THE NEW WESTMINSTER CO-OPERATIVE ASSOCIATION, LIMITED.—FIRST SEMI-ANNUAL MEETING.

THE first semi-annual meeting of the New Westminster Co-operative Association, Limited, covering the period from December 31, 1908, to June 30, 1909, was issued during July, a copy being received at the Department of Labour during August by courtesy of the secretary.

The membership of this Association has increased by 76 during the six months period, 78 new members having been enrolled and 2 members having withdrawn. The total paid up membership now numbers 194. The share capital of the Association on June 30 was \$3,078 an increase of \$1,208 since January. Cash sales amounted to \$16,190.66. Coupons were returned on \$11,541.11 of members purchases, on which a dividend at the rate of four per cent. was paid; the rate allowed on non-members' purchases was one and one-third per cent. A balance of \$44.25 was carried forward. Interest at the rate of five per cent. was paid on the share capital, and three per cent. of the profits were transferred to reserve fund. Incorporation expenses,

which amounted to about \$178 were written off to the extent of five per cent.

By-laws.

In the by-laws of the Association its leading object is defined as "to carry on a wholesale or retail grocery business, or any labour, trade, or business, or several labours, trades or business, whether wholesale or retail." It is authorized to operate branches in other parts of the province. Membership is limited to persons of the full age of 16 years. The shares are valued at \$5.00 and an enrollment fee of \$1.00 is charged. The capital is unlimited. Members are not permitted to hold more than 50 shares, on which interest of not more than five per cent. per annum is to be paid. The business

is to be conducted on a strictly cash basis, but a member who has dividends to his credit may procure goods to the value of the accrued dividends, or may deposit cash in advance and receive goods until the deposit has been absorbed. Profits are determined semi-annually and are divided among the members and purchasers according to the amount of goods purchased by them. The reserve fund is made up of three per cent. of net profits and the enrollment fees. No member is to receive any remuneration for services except the store manager and his sub-employees. The constitution also deals in full with such questions as dividends, withdrawals, officers, elections, meetings etc. The Association is registered under the Co-operative Associations Act of British Columbia.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

THE following table gives a detailed return relating to immigrant arrivals in Canada during April, May and June of the present year. It will be seen that the number of arrivals shows an increase of 7 per cent. compared with the

number arriving during the corresponding months of 1908. Especially pronounced has been the increase in arrivals from the United States, viz; approximately 60 per cent. Arrivals from Great Britain having declined by approximately 15 per cent. It is estimated that arrivals from the United States will total 75,000 this year, compared with about 60,000 last year.

WESTERN CANADA IRRIGATION CONVENTION—THIRD ANNUAL CONVENTION.

THE third annual meeting of the Western Canada Irrigation Convention was held at Lethbridge, Alta., August, 5-6. About 50 delegates were present from different points in Western

Canada. In the annual address of the president the law relating to the use of water in Alberta and British Columbia was dealt with at some length. The aim of the convention was defined as the

work of acting as medium between the people and the various provincial governments. The chief of the Forestry Branch of the Department of the Interior, Canada, also addressed the convention, on the relation between irrigation and forestry. A permanent secretary to the convention was appointed. Among the resolutions passed were the following:—urging that the responsibility for noxious weeds along irrigation ditches should be placed upon those responsible for the maintenance of the ditches; asking the Government to set aside the whole eastern slope of the Rocky Mountains as a forest

reserve in order to save the rivers of Alberta; requesting that the Government and irrigation companies come to a fair working arrangement for the construction of bridges over the ditches; requesting that the Agricultural College of Alberta be located at a point where an area of irrigable land can be included in the college farm, so that the students may be given instruction in the practice and theory of the regular application of water crops; and requesting the British Columbia Government to establish an agricultural college.

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF AUGUST, 1909.

The following is a list of contracts awarded by the Department of Railways and Canals and the Department of Marine and Fisheries which have received the signatures of both parties, together with the fair wages' schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Railways and Canals.

IMPROVEMENTS TO LOCK 27—GALOPS CANAL.

REMOVAL of old wooden piers and bridges above and below Lock No. 27 of the Galops Canal, and rebuilding of same with concrete and steel, Date of contract, August 6th, 1909. Amount of contract, schedule rates. Contractors, "McCoy and Wilford, Limited," of Lindsay, Ont.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter.....	\$3.00
Stationary engineer.....	3.00

Driver, 2 horses and wagon	3.00

*Not included in last month's report.

Department of Marine and Fisheries.

WOODEN LIGHTHOUSE TOWER, MCNEIL'S
BEACH, N. S.

The construction of a wooden light-house tower at McNeil's Beach, County of Victoria, N. S. Date of contract, May

17th, 1909; name of contractor, Mr. Lawrence Mury, West Arichat, N. S. amount of contract, \$780.00.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenters.....	\$2.25
Painters.....	2.25
Bricklayers.....	4.00
Labourers.....	1.50

Post Office Department.

During the month of August, orders were given by the Post Office Department for the supplies below mentioned subject to the regulations for the suppression of the *sweating* system and the securing of payment of the workingmen and working women of fair wages and the performance of the work under proper sanitary conditions.

Nature of Order.	Amount of Order.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$465.35
Making and repairing rubber dating stamps and type, also other stamps....	26.65
Supplying stamping material and wooden boxes, and repairing stamping pads...	771.55
Supplying mail bags.....	2,775.55
Repairing mail bags.....	1,238.69
Repairing Post Office scales.....	4.00
Making and repairing mail locks and supplying mail bag fittings.....	6,645.95
Supplying portable steel letter boxes, and repairing portable tin letter boxes, Railway Mail Clerks' tin travelling boxes and parcel receptacles.....	125.45
Making and repairing miscellaneous articles of Postal Stores.....	56.50
Making and supplying articles of official uniform.....	1,891.70

INDUSTRIAL ACCIDENTS DURING THE MONTH OF AUGUST, 1909.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the Province of Ontario, the Ontario Railway and Municipal Board and to the Department of Railways and Canals for their kind assistance of furnishing the Department with the statements of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 390 individual work-people in Canada during the month of August 1909, were reported to the Department of Labour. Of these, 126 were fatal and 264 resulted in serious injuries. In addition, 5 fatal accidents were reported as having taken place prior to the beginning of the month, information not

having been received by the Department before August, 1909.

In the preceding month there were 100 fatal and 258 non-fatal accidents reported, a total of 358, and in August, 1908, there were 115 fatal and 205 non-fatal accidents, a total of 320. The number of fatal accidents reported in August, 1909, was, therefore, 26 more than in the preceding month and 11 more than in August, 1908. The number of non-fatal accidents reported in August, 1909, was 6 more than in the preceding month and 59 more than in August, 1908. Altogether there were 32 more industrial accidents reported in August, 1909, than in the preceding month, and 70 more than in the same month of the preceding year.

Of 167 returns received during the month giving the ages of the victims of industrial accidents, 25 referred to persons under twenty-one years of age, 40 to persons between twenty-one and forty-five, and 6 to persons over 45. Ninety-six persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING AUGUST, 1909, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	45	39	84
Fishing and hunting.....	5	5
Lumbering.....	3	16	19
Mining.....	12	18	30

Woodworking trades.....	1	15	16
Printing trades.....	4	4
Clothing trades.....	2	2
Textile trades.....	1	1
Food and tobacco preparation.....	5	5
Railway service.....	11	22	33
Navigation.....	6	3	9
General transport.....	11	25	36
Civic employees.....	1	7	8
Miscellaneous.....	12	16	28
Unskilled labour.....	11	29	40
Total.....	126	264	390

Nature of Fatalities and Accidents.

The chief disasters of the month, causing in each case the death of more than

one workmen, were, the killing of five workmen by an explosion of dynamite at Tunstall Bay, Bowen Island, B.C.; the the drowning of four fishermen at Charlottetown, P.E.I.; the killing of two workmen by a cave-in on Anvil Island, B.C.; the drowning of two prospectors near Athabasca Landing, Alta.; the death of the wives of two farmers near Methven, Man., in a runaway and collision with a railway train; the drowning of two formers' sons at St. Eugene, Ont.; the killing of two miners in a rock slide at Black Lake, Que.; and the death of two workmen in a cave-in at Huntsville, Ont.

Dynamite Explosion at Tunstall Bay, B.C.

On August 15, five workmen, employees of the Western Explosives Company at Tunstall Bay, Bowen Island, B.C., were instantly killed by an explosion in the dynamite house of that company.

Drowning of Four Fishermen near Charlottetown, P.E.I.

On August 5, six fishermen left their lobster boat in a punt to go to Rocky Point near Charlottetown, P.E.I. While on their journey the punt foundered and four of the party, being unable to swim, were drowned.

Cave-in on Anvil Island, B.C.

Two workmen were killed at Anvil Island, B.C., on August 2, by the cave-in of a brick kiln at which they were working.

Drowning of Prospectors near Athabasca Landing, Alta.

On August 3, while running the Grand Rapids near Athabasca Landing, Alta., a boat containing a party of prospectors was destroyed and two of the number were drowned.

Level Crossing Disaster near Methven, Man.

On the night of August 3rd, while the wives of two farmers were on their way home from market their horse became

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF AUGUST, 1909.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Greenock, Ont.....	Aug. 3	1	In a runaway.
".....	Portage la Prairie, Man.....	" 3	1	Struck by lightning.
".....	Mascouche, Que.....	" 2	1	Run over by train.
".....	Morinville, Alta.....	" 4	1	Suffocated by gas in a well.
".....	Lethbridge, Alta.....	" 6	1	A large boulder fell on him.
".....	Drinkwater, Sask.....	" 5	1	Fell 40 feet in a well.
".....	Guelph, Ont.....	" 3	1	Fell from load of hay.
".....	New Mexico, Que.....	" 8	1	Fell 42 feet in barn.
".....	Glanford, Ont.....	" 10	1	Sunstroke.
".....	Pelham, Ont.....	" 10	1	Run over by traction engine.
".....	Brampton, Ont.....	" 11	1	Kicked by a horse.
".....	Alvinston, Ont.....	" 11	1	Caught in reaper.
".....	Goderich Tp., Ont.....	" 15	1	Fell from a bridge.
".....	Huntsville, Ont.....	" 14	2	By cave in of gravel.
".....	Russell, Man.....	" 18	2	In a runaway.
".....	St. Catharines, Ont.....	" 19	1	Trampled to death by a cow.
".....	Verchères, Que.....	" 16	1	Drowned, fell into well.
".....	North Bay, Ont.....	" 17	1	Found dead in bush.
".....	Landis, Sask.....	" 19	1	Fell 40 feet in a well.
".....	near Rimouski, Que.....	" 24	1	Gored by a bull.
".....	Plaster Rock, N.B.....	" 23	1	Struck by lightning.
".....	Georgetown, Ont.....	" 19	1	Kicked by a horse.
".....	Scotstown, Que.....	" 27	1	Drowned; fell from boat laden with hay.
".....	Tilbury, Ont.....	" 31	1	Drowned; fell into well.
Farmer's wife.....	London Tp.....	" 2	1	Kicked by a horse.
".....	Wawanesa, Man.....	" 3	2	Runover by train at crossing.
".....	Granby, Que.....	" 18	1	In a runaway.
".....	Ninette, Man.....	" 23	1	In a runaway.
Farmer's son.....	Underwood, Ont.....	" 18	1	In a runaway.
".....	Markestay, Ont.....	" 14	1	In a runaway.
".....	Deschambault, Que.....	" 15	1	In a runaway.
".....	St. Eugene, Ont.....	" 6	2	Drowned thrown over bridge from load of hay.
".....	Vanessa, Ont.....	" 5	1	Run over by a thresher.
Farm hand.....	St. Lambert, Que.....	" 3	1	Impaled on hay-fork.
".....	Hamilton, Ont.....	" 8	1	Struck by a locomotive.
".....	Dawn Tp., Ont.....	" 18	1	Kicked by a horse.
".....	Chatham, Ont.....	" 17	1	Kicked by a horse.
".....	Oakville, Ont.....	" 15	1	Run over by a train.
".....	North Bay, Ont.....	" 25	1	Run over by a train.
".....	Ridout, Ont.....	" 26	1	Fell from train.
".....	Saskatoon, Sask.....	" 24	1	Caught in binder.
<i>Fishing and hunting—</i>				
Fishermen.....	Charlottetown, P.E.I.....	" 6	4	Drowned; boat foundered.
".....	Steveston, B.C.....	" 7	1	Drowned; fell overboard.
<i>Lumbering—</i>				
Logger.....	Vancouver, B.C.....	" 12	1	Run over by train.
".....	Dog River, Ont.....	" 23	1	Drowned.
".....	St. Maurice, River.....	" 9	1	Drowned while driving logs.
<i>Mining—</i>				
Prospectors.....	Athabasca Landing, Alta.....	" 3	2	Drowned; in a rapid, boat capsized.
".....	Searchmont, Ont.....	" 6	1	Drowned.
Miner.....	Sydney, N.S.....	" 4	1	Run over by coal train.
".....	Cobalt, Ont.....	" 9	1	By a fall of stone.
".....	Black Lake, Que.....	" 12	2	By a rock slide.
".....	Michel, B.C.....	" 23	1	By a rock slide.
" (mine carpenter).....	Phoenix, B.C.....	" 8	1	Derrick fell on him
".....	Greenwood, B.C.....	" 18	1	By fall of rock.
Quarry laborer.....	Port Colborne, Ont.....	" 17	1	Run over by travelling crane.
".....	South Vancouver, B.C.....	" 21	1	By an explosion of powder.
<i>Building trades—</i>				
Bricklayer.....	Montreal, Que.....	" 29	1	Fell 25 feet; scaffolding gave way.
Carpenter.....	Ottawa, Ont.....	" 9	1	Fell 50 feet from beam.
".....	Spyhill, Man.....	" 5	1	Fell from scaffolding.

Car shop worker.....	Port Hope, Ont.....	"	31	1	Caught in machinery.

frightened and dashed into a train about two miles from Methven, Man., killing both instantly.

Drowning Disaster at St. Eugene, Ont.

On August 6, while two farm hands were driving on a load of hay at St. Eugene, Ont., the load upset while crossing a bridge and they were thrown from the top of the load and drowned in the creek below.

Rock Slide at Black Lake, Que.

On August 10, a rock slide into one of the mines of the Amalgamated Asbestos Corporation, Limited, at Black Lake, Que., instantly killed two miners and injured four others.

Cave-in at Huntsville, Ont.

On August 14, a cave-in in a gravel pit at Huntsville, Ont., killed two workers.

Record by Industries and Trades.

Agriculture.—In this group there were 45 killed and 39 injured in August, 1909,

compared with 22 killed and 33 injured in July, 1909, and 33 killed and 35 injured in August, 1908. Eight each of the fatalities were caused by runaways and by being run over, 7 by live stock, 6 by falls, 5 by drowning, 3 by falling material, 2 each by electricity and by machinery, and 1 each by asphyxiation, by sun-stroke, and by tools. Nine of the non-fatal accidents were caused by falls, 8 by runaways, 6 by live stock, 5 by being run over, 4 by machinery, 3 by falling material, 2 by tools and 1 each by explosions and by a collision.

Fishing and hunting.—Five fishermen were drowned during August; in the previous month and in the corresponding month of 1908, there were no accidents.

Lumbering.—Three workers were killed and 16 were injured in August, 1909, as against 5 killed and 13 injured in July last, and 9 killed and 13 injured in August, 1908. Drowning was responsible for 2 of the deaths, and being run over for the other. Machinery caused 11 of the accidents, falls and tools 2 each, and falling material 1.

Mining.—Twelve miners met death through accident during August, and 18 were injured, compared with 6 killed and

23 injured in the preceding month, and 9 killed and 14 injured in August of last year. Six of the fatalities were due to falling material, 3 to drowning, 2 to being run over, and 1 to an explosion. Ten of the accidents were due to falling material, 3 to falls, 2 each to machinery and to explosions, and 1 to being struck by cars.

Building.—During August, there were 3 workers killed and 26 injured, compared with 6 killed and 24 injured in July last, and 9 killed and 21 injured in August, 1908. The 3 fatalities were caused by falls. Twenty of the minor accidents were caused by falls, 3 by falling material, 2 by tools and 1 by being burnt.

Metal, engineering and shipbuilding.—There were 5 fatalities and 36 accidents in these trades during August, 1909. The record for the previous month was 6 killed and 64 injured, and for August, 1908, 10 killed and 31 injured. Three of the deaths were due to electric shock, and 1 each to falling material and to being run over. Ten of the non-fatal accidents were due to falling material, 9 each to molten metal and to machinery, 4 to falls, and 2 each to being scalded by steam and to explosions.

Woodworking.—One woodworker was killed and 15 injured during August, compared with 2 killed and 10 injured, the month before and 4 injured in August of last year. Machinery was the cause of the fatality, as well as of 11 of the accidents. Flying material caused 2 of the other accidents and a fall and falling material 1 each.

Printing.—Four workers were injured by machinery in August, 1909. Two workers were injured in the preceding month, and 2 in August 1908.

Clothing.—Machinery caused 2 accidents in August, compared with 1 non-fatal accident in the month before, and 1 in August of last year.

Textile.—There was 1 accident due to machinery, against 4 in the previous month and none in August of last year.

Food and tobacco preparation.—Five accidents, caused each by machinery, by a fall, by live stock, by falling material and by being burnt, occurred during August, 1909, compared with 9 acci-

dents in July last, and 6 accidents in August, 1908.

Railway service.—Eleven of these employees were killed by accident and 22 were injured during August, 1909, a return identical with that of the month of August, 1908. In July last, the record was 29 killed and 25 injured. Four of the fatalities were caused by the victims being run over, 3 by derailments, and 1 each by being caught between cars, by a fall, by drowning and by sunstroke. Five of the accidents were caused by falls, 4 each by derailments and by falling material, 3 by being run over, 2 by an explosion of powder, and 1 each by tools, by being caught between cars, by a collision and by being assaulted in a railway yard by tramps.

Navigation.—The record in this group for August, 1909, was 6 killed and 3 injured, as against 5 killed and 8 injured in July, and 23 killed and 3 injured in August a year ago. Five of the deaths were due to drowning and 1 to being caught between a boat and a wharf. Two of the accidents were due to falls and 1 to flying material.

General transport.—There were 11 killed and 25 injured during August, 1909, compared with 3 killed and 19 injured in the preceding month, and 3 killed and 10 injured in August, 1908. Three of the fatalities were caused by runaways, 2 each by collision, by falling material and by falls, and 1 each by being struck by a train and by live stock. Eight of the accidents were caused by falls, 4 each by runaways and by collisions, 3 each by falling material and by live stock, 2 by being run over, and 1 by flying material.

Civic employees.—One of these employees was killed during August by an explosion of powder and 7 others were injured, 5 by falls and 2 by falling material. In the previous month there were 2 fatalities and 1 accident, and in August of last year, 4 fatalities and 4 accidents.

Miscellaneous.—During August, 12 of these workers met death by accident and 16 were injured. In the preceding month there were 5 killed and 10 injured and in August, 1908, 3 killed and 27 injured. Of the fatalities 7 were due to explosions, 3 to falls and 1 each to live stock and to

being burned to death. Four each of the accidents were due to explosions, to machinery and to falls and 1 each to being struck by a car, to a warden being assaulted by his prisoners, to falling material, and to an elevator.

Unskilled labour.—During August, 11 labourers were killed and 29 injured, compared with 9 killed and 10 injured in July last, and 1 killed and 12 injured

in August, 1908. Four of the fatalities were caused by the victim being run over, 2 each by falls and by falling material and 1 each by electric shock, by drowning and by tetanus resulting from a broken thumb. Of the accidents 17 were caused by falling material, 7 by falls, 2 by explosions and 1 each by live stock, by an elevator and by being run over.

TRADE DISPUTES DURING THE MONTH OF AUGUST, 1909.

DURING the month of August, the principal industrial disturbances in Canada were in the coal mining industry in Nova Scotia, and in the building trades at Winnipeg, Man. Building operations were also impeded during the first week of the month at Edmonton, Alta., through a strike of carpenters. The only other serious dispute of the month was a strike of freight-handlers at Fort William, Ont., which lasted one week.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The number of trade disputes reported to have been in existence in Canada during August was 16, one more than in the previous month, and 8 more than in August, 1908. About 211 firms and 6,810 employees were affected by these disputes, about 71 firms and 4,187 being affected by new disputes.

Loss of time in working days.—The loss of time to employees through trade disputes during August was approximately 108,925 working days, compared with a loss of 118,740 days in July, and 192,600 in August, 1908.

Trades affected by new disputes.—The following table shows the number of new disputes of the month in each group of trades, and the number of workers affected.

Trades.	No. of disputes.	No. of workers.
Lumbering.....	1	200
Mining.....	1	1,700
Building trades.....	3	1,307
General transport.....	2	900
Unskilled labour.....	2	80
Total.....	9	4,187

Localities affected by new disputes.—The new disputes of the month occurred in the following provinces of the Dominion.

Province.	No. of disputes.
Nova Scotia.....	1
Quebec.....	1
Ontario.....	5
Manitoba.....	2
Total.....	9

Causes of disputes.—The following were the causes of the new disputes of the month.

Cause.	No. of disputes.
For higher wages.....	1
For higher wages and other changes.....	4
Against reduction in wages.....	2
For decrease in hours.....	1
Against employment of a non-unionist.....	1
Total.....	9

Methods of settlement.—Of the 16 disputes in existence during August, 9 were terminated, leaving 7 still unsettled at the end of the month. Of the disputes that were terminated, 2 were settled through negotiations between the parties concerned, 1 by conciliation under the Industrial Disputes Investigation and Conciliation Act. In 3 cases the places of strikers were filled, in 1, work was resumed on the employer's terms, in 1 the demands of the strikers were granted without negotiations, and in 1 the men returned to work, the employer not being directly concerned in the dispute.

Results of disputes.—The employers were successful in 4 of the disputes that were terminated, the employees were successful in 1, compromises were effected in 3 disputes, and in 1, work was resumed, the employer not being immediately involved.

Disputes which commenced Prior to the Beginning of the Month.

The trade disputes in existence during August, which began in previous month comprised strikes of coal miners at Glace Bay, N. S., carpenters at Edmonton, Alta., sheet metal workers at Winnipeg, Man., iron moulders at Hamilton, Ont., Jewish bakers and cloak-makers at Montreal, Que., and garment workers at Stratford, Ont.

Strikes of Coal Miners in Nova Scotia.

A strike of coal miners of the Dominion Coal Company, which began at Glace Bay, N. S., on July 6, on account of the refusal of the Company to recognize the United Mine Workers of America, continued throughout August. There were originally about 2,500 men affected by this dispute, but during August about one-quarter of the strikers sought work elsewhere at harvesting, and the Company secured a number of men to take their places. Mining operations were carried on by the Company during the whole of August, and at the end of the month, the output, according to the Company's figures, was about half the normal quantity. The Company claimed that about 4,000 of their employees had remained at work and were not affected by the strike.

A strike of about 526 coal miners had also taken place at Inverness, N. S., on July 9, growing out of a dispute with the Company regarding the alleged collection by the Inverness Coal and Railway Company, from certain employees who were members of the United Mine Workers of America, of \$1.05 per quarter for dues and assessments in the Provincial Workmen's Association. It was reported in the press that the strike was practically over by the beginning of August, most of the miners having returned to work.

The third strike, an account of which is given below, was declared at Springhill, N. S., on August 10.

On Monday, Aug. 30, Mr. F. A. Acland, Deputy Minister of Labour, acting under instructions of the Honourable the Minister of Labour, proceeded to Nova Scotia with the view of reporting fully on the industrial situation with reference to the coal strikes in existence there.

Strike of Carpenters at Edmonton, Alta.

A strike of carpenters which took place at Edmonton, Alta., on June 8 was settled on August, 9, when an agreement was signed by representatives of the Builders' Exchange and the United Brotherhood of Carpenters and Joiners and the Almagamated Society of Carpenters. The cause of the dispute was the refusal of the employers to grant a demand for an increase of the minimum wages from \$3.36 to \$3.75 per day of eight hours. About 33 firms and 200 men were directly affected by this dispute, and 68 firms and 400 men were indirectly affected. The terms of the agreement upon which work was resumed were as follows:—

“The carpenters agree to work at the present rate of 42 cents per hour and open shop until May 1, 1910; from May 1, 1910, to May 1, 1911, the wages will be 43 3-4 cents per hour, and from May 1, 1911, to May 1, 1912, 45 cents per hour. The Builders' Exchange agrees not to employ any carpenter after it has been notified that said carpenter has been refused or is ineligible to join the union. The Builders' Exchange also agrees that the authorized agent of the unions will be allowed on their work at any time to solicit applications or settle any difficulty that may arise. The union men will not take any contracts amounting to more than \$75.00. All disputes to be settled by arbitration within forty-eight hours.”

Strike of Sheet Metal Workers at Winnipeg, Man.

On July 27, a strike of sheet metal workers took place at Winnipeg, Man., on account of the refusal of the employ-

DEPARTMENT OF LABOUR, CANADA,

TABLE OF TRADE DISPUTES DURING THE MONTH OF AUGUST.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.				Date of commencement.	Date of termination.	Result.	
			Directly.	Indirectly.	Directly.		Indirectly.					
					Fe-males.	Ma-les.	Fe-males.	Ma-les.				
<i>Mining</i> Coal miners.....	Glace Bay, N.S.....	For recognition of the United Mine Workers of America....	1	1,875	July 6	No settlement reported at end of month, but places of many strikers were filled.	
<i>Building trades</i> Carpenters.....	Edmonton, Alta.....	For increase in wages.....	33	68	400	June 8	Aug. 9	Agreement signed; a compromise.	
<i>Metal trades</i> Iron moulders.....	Hamilton, Ont.....	Against a reduction of 20 per cent. in wages.....	4	8	170	Feb. 22	No settlement reported, but places of strikers were filled and conditions ceased to be affected.	
Sheet metal workers	Winnipeg, Man.....	For increase in minimum wages from 39 to 42½ cts. per hour..	14	83	July 27	No settlement reported at end of month.	
<i>Clothing trades</i> Garment workers	Stratford, Ont.....	Refusal of employer to sign an agreement.....	1	7	23	June 28	No settlement reported, but places of strikers were filled.	
Cloakmakers	Montreal, Que.....	For increase in wages.....	2	108	July 22	Aug. 14	Increase of 10 per cent. in wages granted; a compromise.	
<i>Food and tobacco preparation</i> Jewish bakers.....	Montreal, Que.....	For shorter hours, and improvement in conditions of labour.....	4	65	"	23	No settlement reported, but 3 firms had granted the demands of the men.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.

ers to sign a new agreement providing for an increase in the minimum wages to be paid to journeymen from 39 cents to 42½ cents an hour. According to a report received from the Sheet Metal Workers' Union, about 14 firms and 83 men were involved. No settlement of the dispute had been reached by the end of August.

Strike of Iron Moulders at Hamilton, Ont.

No settlement was reported in the case of the strike of about 170 iron moulders at Hamilton, Ont., who went out on February 22, on account of a reduction of 20 per cent. in their wages. It was reported that the stove foundries were being operated with non-union labour and were no longer affected by the dispute.

Strike of Jewish Bakers at Montreal.

No settlement was reported in the case of the strike of Jewish Bakers at Montreal, Que., which began on July 23. The causes of the dispute were a demand for recognition of their union, and for terms which were beyond the power of the employers to grant. According to the men, causes of the disputes were the refusal of the employers to grant them a holiday on Saturday and to reduce the hours of labour from 17 or 18 to 10 per day. They also demanded a higher salary and better conditions of employment. It was stated by one of the employers that 4 firms were involved in this dispute, 3 bakeries having yielded to the demands of the men. According to the employees there were 65 strikers involved.

Strike of Cloakmakers at Montreal, Que.

A strike of cloakmakers involving 2 firms and about 108 employees, which took place in Montreal, Que., on July 22, was reported in the press to have been settled on August 14. The cause of the dispute was the refusal of the employers to grant a demand for an increase of 15 per cent. in piece work prices. According to the terms of the settlement, an increase of 10 per cent. in wages was granted.

Strike of Garment Workers at Stratford, Ont.

No settlement was reported with regard to a strike of thirty garment workers at Stratford, Ont., which took place on on June 28, but the places of the strikers were filled and conditions ceased to be affected.

New Disputes.

Strike of Coal Miners at Springhill, N.S.

On August 10 a strike of coal miners employed by the Cumberland Railway and Coal Company took place at Springhill, N. S., in which about 1,700 men were involved according to the report from the President of the District Union. The cause of the dispute was dissatisfaction on account of wages and conditions in and about the mine. The matters in dispute have been dealt with by a Conciliation Board under the Industrial Disputes Investigation Act, which presented its report on July 23, but the findings of the Board were not acceptable to the employees.* No settlement of this dispute took place during the month, and the mines of the Company were closed down.

Strike of Electrical Workers at Winnipeg, Man.

On August 5 a strike of electrical workers took place at Winnipeg, Man., in which about 8 firms and 100 employees were affected. According to a report received from one of the employers, the cause of the dispute was the failure to arrive at an agreement to take the place of one which had expired. According to the old agreement the scale of wages was from 30 to 40 cents an hour. The Electrical Workers' Union prepared a scale of 50 cents an hour. The employers offered a scale of from 35 to 45 cents, and later amended their offer to 40 cents straight, with a clause making the agreement to expire on February 1, 1910. The Union rejected this agreement be-

* See *Labour Gazette* for August, page 190.

cause they wished it to expire on August 1. This date was unsatisfactory to the employers as they claimed that all their work was figured in the early spring. It was further stated by the employers that the union refused to include a clause prohibiting a sympathetic strike, and that the employees would not make any agreement to that effect. The strikers were inside workmen and the employers were affiliated with the Winnipeg Builders' Exchange. No settlement of this strike was reported during the month.

Strike of Freight-Handlers at Fort William, Ont.

On August 9 about 700 freight handlers employed by the Canadian Pacific Railway Company stopped work at Fort William, Ont., and on the following day they made a demand for an increase in wages from 17½ cents to 22½ cents per hour for day labour, and from 20 to 25 cents per hour for night work. They also demanded the abolition of the bonus system, and alleged that they had been subjected to abuse by foremen and overseers. Work was resumed on August 16 and steps were immediately taken to form a Board of Conciliation and Investigation under the Act. The report of the Board was presented on August 24, and was understood to be acceptable to the parties concerned as an adjustment of the dispute.*

Strike of Carpenters at Winnipeg, Man.

On August 25, a strike of carpenters was declared at Winnipeg, Man., on account of the refusal of the employers to sign an agreement providing for an increase in wages from 35 to 45 cents an hour, and a new code of working rules. According to a report received from the men, about 1,200 employees were involved. No general settlement of the dispute was reached during the month, but on August 30, it was stated by representatives of the strikers, that 48 contractors had signed the new agreement.

* A full account of this dispute and of the action of the Department with regard to it is given in the article "Proceedings under the Industrial Disputes Investigation Act" on another page of the present issue.

These contractors, however, did not employ a large percentage of the men, and building operations in Winnipeg continued to be seriously hampered. Both the United Brotherhood of Carpenters and Joiners, and the Amalgamated Society of Carpenters and Joiners were concerned in this dispute.

Strike of Teamsters at Toronto, Ont.

On August 6, a strike of teamsters employed by a number of paving contractors took place at Toronto, Ont. In a report received from one of the employers it was stated that from 5 to 7 firms and 100 men were directly involved, and 5 or 6 firms and 100 men were indirectly affected. According to this report, it was claimed that the teamsters raised the price of teams from \$4.50 to \$5 per day without warning. On August 6, when work became slack, put the rate back to \$4.50 per day of nine hours. The teamsters refused to accept this reduction, and on August 19, the contractors restored the rate of \$5 per day, and work was resumed.

Strike of Painters at Kingston, Ont.

On August 16, about seven painters stopped work in a shop at Kingston, Ont., on account of the refusal of new employee to join the local union of painters on the usual terms. It was claimed by the employers that the strike was settled on the following day, all the men being anxious to work. According to the report received from the local correspondent of the *Labour Gazette*, the painter who had refused to join the union paid the initiation fee and became a member, whereupon the other painters resumed work after being out for one day.

Strike of Planing Mill Hands at Etchemin, Que.

On Aug. 2, a strike of planing mill hands employed by the firm of A. Gravel & Co., took place at Etchemin, Que., in which about 200 men were affected. It was stated by the firm that the men went out without giving any notice or making any demand. On the other hand, it was stated by the employees that the strike

was declared because a reduction of ten cents per day in their wages was proposed. The Company claimed that a reduction in wages was necessary, and that the men, instead of accepting it, wanted an increase of ten cents per day, which the employers could not grant. No settlement of the dispute was reported during the month.

Strike of Labourers in Brantford, Ont.

On August 4 about 30 drain diggers employed at Brantford, Ont., declared a strike on account of the refusal of the employers to grant a demand for an increase in wages, and the following day the men returned to work on the conditions prevailing before the strike.

Strike of Labourers at Sandwich, Ont.

On August 18, about 50 labourers in Sandwich, Ont., declared a strike on refusal of the employers to reduce their hours of labour from 10 to 9 per day, with no reduction in wages. Two days later the places of the strikers were filled. The men who had been employed in digging drains were receiving \$2.10 to \$2.25 a day.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of August and which have been reported to the Department.

RECENT INDUSTRIAL AGREEMENT.

Agreement between the Masons Builder Association and Bricklayers' and Stone Masons' Unions, of Ottawa, Ontario.

DURING the month of August, the following agreement was signed between the employing contractors of Ottawa, Ont., and the local Bricklayers and Masons Unions:

It is mutually agreed to by the Masons Builder Association of Ottawa and Bricklayers' Union (No. 7) and Stone Masons' Union (No. 14) of Ottawa, affiliated with the Bricklayers' and Masons' International Union of America as follows:—

ARTICLE 1. SECTION 1.—The rate of wages during the terms of this Agreement shall be; fifty cents (50c.) per hour from date of this agreement and until April 30th, 1911, and fifty two cents (52c.) per hour from May 1st, 1911 to April 30th, 1913, and fifty-five cents (55c.) per hour from May 1st, 1913 to April 30th, 1915.

SECTION 2.—Nine (9) hours shall constitute a day's work from the date of this agreement and until April 30th, 1911 for the first five (5) days in the week and five (5) hours on Saturday except from November 1st, 1909, to February 28th, 1910, and from 1st November, 1910, to February 28th, 1911, when nine (9) hours shall be worked on a Saturday.

SECTION 3.—From May 30th, 1911, to April 30th, 1915 eight (8) hours shall constitute a day's work for the first five (5) days in the weeks and four (4) hours on Saturday except for the months of November, December, January and February of each year, when eight (8) hours shall be worked on a Saturday.

SECTION 4.—Except in cases of emergency no work shall be done before the hour of 7 a.m. nor after the hour of 5 p.m. from the date of this Agreement and until April 30th, 1911, nor before the hour of 8 a.m. nor after the hour of 5 p.m. from May 1st, 1911, to April 30th, 1915.

SECTION 5.—Emergency work shall be paid at the rate of time and one-half. The shop steward and employer shall determine what constitutes emergency work.

SECTION 6.—All work done after 12 o'clock noon Saturday and up to 7 o'clock Monday morning from the date of this Agreement until April 30th, 1911, and from May 1st, 1911, to April 30th, 1915, all work done from 12 o'clock noon Saturday and up to 8 o'clock Monday morning except for the months of November, December, January and February of each year, it shall be 5 o'clock Saturday also Christmas, New Years, and Labor Day shall be paid for at the rate of double time.

SECTION 7.—Pay day, all wages shall be paid on or before 12 o'clock on Saturday

day, time to close night before pay day; all waiting time to be paid at the rate of double time.

SECTION 8.—When any member or members of Union No. 7 or 14 is discharged they shall be paid at once—any violation of this rule entitles said member or members to waiting time at the regular rate of wages for every hour he has to wait for his money, providing he waits at the job and leaves as soon as he is paid.

ARTICLE 2. SECTION 1.—The Bricklayers and Masons of No. 7 and 14, as a whole, shall not order any strike against any member or members of the Builders' Exchange.

SECTION 2.—Nor shall any number of the Union men leave the work of a member of said Exchange before the matter in dispute is brought before the Joint Arbitration Committee for settlement, provided the same is called within fortyeight (48) hours of such dispute after a full investigation their decision shall be final.

SECTION 3.—If any trouble shall arise with any other mechanics or laborers on a job or building, the bricklayers or masons shall not be withdrawn from their work.

SECTION 4.—When there is any dispute between a member of the Builder Exchange and a proprietor no member of No. 7 and 14, when officially notified shall continue to work on the job in dispute until otherwise instructed by order of the Joint Arbitration Committee.

SECTION 5.—That the shop steward or Business Agent of No. 7 or 14, be allowed upon the works to examine the working cards. He shall not be discharged for examining his fellow-workmen's cards.

ARTICLE 3. SECTION 1.—Members of the Masons Builder Association agree in the employment of workmen to give preference to members of the B.M.I.U. and members of Unions No. 7 and 14 shall work only for contractors who recognize the terms of this agreement.

SECTION 2.—Firms comprising more than two members. It is agreed that not more than two members of such firms shall be allowed to work at the Trade.

SECTION 3.—That any firm having been established in the City of Ottawa for

two year or more and employing two or more bricklayers or masons during the whole of the second season, may have an apprentice. If established four years and employing five or more bricklayers and masons, they may have two apprentices, who must serve four years under Indentures.

ARTICLE 4. SECTION 1.—That Unions No. 7 and 14 agree that none of its members shall be allowed to contract or sub-contract any work.

SECTION 2.—Any member of Unions No. 7 and 14 taking out a withdrawal card for the purpose of contracting shall be entitled to membership again by paying full initiation fee.

ARTICLE 5. SECTION 1.—The members of Unions No. 7 and 14 agree to charge ten cents (10c.) per hour extra for all repair job work done by owners. This shall not apply to mills or factories or Government or city work.

SECTION 2.—That the members of Unions No. 7 and 14 agree to bind themselves to at all times pay strict attention to contemplative builders and use every means and influence to have the same constructed by contractors who recognize the terms of the Agreement.

SECTION 3.—Such masonry work as specified in the constitution of the B.M.I. U. shall be considered bricklayers and masons' work.

SECTION 4.—No member or members of Union No. 7 shall be allowed to lay any brick for any person or contractor or company who employs non-union stonemasons, and no member or members of Union No. 14 shall be allowed to cut or lay stone for any person or contractor or company who employs non-union bricklayers.

SECTION 5.—That the working code between No. 7 and 14 shall be strictly enforced.

SECTION 6.—The Builder's Exchange and the members of Unions No. 7 and 14 shall be furnished with a copy of the by-laws of the Unions and a copy of the constitution of the B. M. I. U. and this agreement.

ARTICLE 6.—It is hereby understood and agreed that any and all parties of this Agreement shall report to their respective

bodies any known violation of any provision or provisions of this Agreement.

ARTICLE 7.—This Agreement shall stand in full force and effect until April 30, 1915. If any change is desired by either

party notice thereof in writing shall be given three months previous to the date of its expiration.

Signed this 16th day of August, 1909, by the Joint Arbitration Committee.

POOR RELIEF IN GREAT BRITAIN.

IN compliance with the recommendation of the Royal Commission on the Poor Laws, the Local Government Board of Great Britain has issued in a separate volume the Poor Law section of their annual report dealing with the administration of the Poor Law, the Unemployed Workmen Act, and the Old Age Pensions Act, all of which fall under the jurisdiction of the Local Government Board.

Poor Law Administration.

The statistics of pauperism show that there was an increase in the number of persons receiving relief during each month of 1908, compared with the corresponding months of 1906 and 1907. In January, 1908, there were in England and Wales, 823,843 paupers, which would be 13,896 more than in January, 1907, and a rate of 23.6 per thousand of the population. The number declined in the succeeding months until July, when there were 767,035. The numbers in the following months showed an upward tendency to December when there were 825,068, being 34,967 more than in the corresponding month of the previous year. During the next six months of 1908, the number of indoor paupers increased by 41,572 or 16.1 per cent., and outdoor paupers by 35,422 or 6.6 per cent. During the corresponding six months of the previous year, the increase in the number of outdoor paupers amounted to 4.4 per cent. The classification of the ordinarily able-bodied men according to the causes of their poverty, shows that on account of their own sickness, accident, or infirmity, relief was given to 9,715 men; on account of the sickness, accident, or infirmity, of some member of the family, or on account of a funeral, 3,765; on account of sudden or

urgent necessity, 1,504; on account of want of work or other causes not mentioned above, 6,374. The rate of pauperism to population on January 1, 1909, was 27.2 per thousand, a slight increase as compared with 26.6 on January 1, 1908. This was in excess of any of the rates shown for the corresponding dates in the past 10 years with the exception of 1905. On January 1, 1909, there were 253,775 pauper children in receipt of relief. Of these two-thirds in England and Wales and five-sixths in London were relieved in institutions other than the workhouse and infirmaries.

Thirty-eighth annual report of the Local Government Board, 1908-1909.—Part 1.—Administration of the Poor Law, the Unemployed Workmen Act, and The Old Age Pensions' Act. London: Wyman & Sons, 1909. Price, 1s., 4d.

During the year nine new committees were authorized for the purpose of finding homes for orphan or deserted pauper children. The total number of children of school age in poor law establishments on the 1st of January was 42,729. Of these, 37,933 were receiving school instruction; 21,012 attending public elementary schools, 3,658 district schools and 10,829 separate schools. The Boards of Guardians were authorized to send 391 orphan or deserted pauper children to Canada. These children are placed in homes by Immigration Agencies that are inspected by Dominion Immigration Officers, and the agencies are required by Provincial Immigration Acts to maintain supervision over them.

The Unemployed Workmen Act.

During the year ended March 31, 1909, there were 196,757 applications from unemployed workmen for assistance, an increase of 106,700 compared with the previous year. Of these 36,589 were found qualified for assistance under

the Unemployed Workmen Act, also 37,604 dependents of applicants. Work was provided for 88,190 persons and 1,547 were assisted to emigrate or to remove to other areas in England and Wales. The more important schemes of work provided for the unemployed of London were the maintenance of a farm colony for the unemployed at Hollesley Bay, work in the parks, and the maintenance of workrooms for unemployed women, established by the Central (Unemployed) body. In other parts, other work was provided in afforestation of land, maintenance of farm colonies, women's workrooms, and the construction of various public works, such as the extension of a sea wall, the construction and widening of roads, excavation of ponds and drainage of land for extension of cemeteries.

Old Age Pensions.

The Old Age Pensions Act became law on August 1, 1908. Regulations governing its administration were issued in final form on October 15, and the payment of pensions began on January 1, 1909. The Act confers a right to an Old Age Pension on each man or woman who fulfils the statutory conditions. These conditions require that the applicant for a pension must have been a British subject, resident in the United Kingdom for at least 20 years, and must have attained the age of 70 years, and not possess any means exceeding £31. 10s. Soldiers and sailors are exempted from the rule of permanent residence provided that any absences from the United Kingdom within the preceding 20 years do not exceed 8 years. The pension payable varies according to the yearly means of the pensioner from 1s. a week to those having yearly means of £28 17s. 6d., to 5s. a week for those whose means do not exceed £21. Idlers, lunatics, criminals and inebriates are disqualified from receiving pensions, and also persons who are in receipt of poor relief, unless such relief be in the form of medical or surgical assistance, or the maintenance of a dependent in any asylum or hospital, or any other relief which does not disqualify the applicant from

registration as a Parliamentary elector.

For the administration of the Act, three classes of pension authorities were established for England and Wales: The Central authority, pension committees and pension officers. The central authority is composed of the members of the Local Government Board, and its main function is the hearing and deciding of appeals against decisions of the pension committees. The local pension committees are appointed by the councils of boroughs, districts or counties, a committee being appointed for each borough and urban district with a population of 20,000 or over. There must be not less than seven members of the committee, nor more than the number of the appointing council. A clerk is appointed and assigned a salary by each local pension committee, whose duty is to keep a register of a prescribed form, containing particulars of all claims and questions in respect of which a report is sent to the committee by the pension officer and of the decision of the committee thereon. The pension officers are appointed by the treasurer and each one acts for a specified station under a supervisor. The pension officer and supervisor are subject to the control of the Board of Customs and Excise.

An applicant for a pension may obtain a form of claim at any post office, in which he is to enter his name, address, occupation, sex, whether married, single, widower or widow, age, date and place of birth, whether the claimant is a British subject, resident for the last 20 years in the United Kingdom, and certain particulars as to means. The claim may be handed in at the post office for transmittal to the pension officer or to the pension committee of the district, who transmits it to the pension officer. On receiving the claim the pension officer investigates the statements made therein by personal enquiry of the claimant and in other ways, and then sends the claim with his report to the pension committee. The claim is considered by the committee not later than seven days after receipt of the pension officer's report. The committee then proceed to allow or disallow the claim, but if their decision is adverse, the

claimant is given an opportunity of being heard, unless a previous claim has been disallowed within the previous four months, or the claim itself discloses that the statutory conditions are not fulfilled. An appeal may be made to the central authority against a decision of a pension committee. Any person who considers himself aggrieved by the refusal or neglect of a pension committee may also appeal to the central authority. The number of local committees appointed to carry out the act is 281, of whom 63 were for administrative counties and 218 for

boroughs and urban districts. Sub-committees to the number of 1,209 were also appointed by local pension committees.

The first appeals were received by the central authority at the end of October, and they rapidly increased in number until by the end of the year over 5,000 had been received. Up to March 27, 1909, 10,068 appeals were received and decisions were made on 8,273. The number of pensions payable on March 26, 1909, were 369,037 in England and 246,663 in Wales.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of Departments and Bureaus were received at the Department of Labour, Ottawa, during August, 1909.

DOMINION REPORTS.

Topographical Surveys.

The Department of the Interior, annual report of the Topographical Survey's Branch, 1907-08, Ottawa; King's Printer, 1909. Pages, 366. Price 30 c.

THE rapid settlement of Western Canada has necessitated extensive surveys of Dominion Lands by the Topographical Survey's Branch. In the report of the last fiscal year it is stated that in the year ended March 31, 1908, the land surveyed amounted to 21,494 miles compared with 17,064 miles in the previous year. In the country lying south of the North Saskatchewan river the sub-division surveys are practically completed, and extend for some distance north of the river. The homesteads within this area are being rapidly taken up and newcomers will soon have to look elsewhere for free lands. The cost of the surveys varies from \$79 to \$218 per mile; averaging \$140. The difficulties of transportation and the fact that the lines run through dense woods and extensive marshes render the progress of the work slow and the cost very great. During the year a complete sub-division was made of 223 whole and 18 fractional townships, while a partial sub-division was made of 126 other townships. In addition, a complete re-survey was made of 32 whole townships and 1 fractional,

as well as a partial re-survey of 131 others. Sixty-three survey parties were employed, 57 of which were engaged on township work and 6 on miscellaneous surveys.

A preliminary investigation was made of the water-power on the Winnipeg river from the eastern boundary of Manitoba to Lake Winnipeg. It was found that there is a large amount of spruce and poplar in this district suitable for the manufacture of pulp, and the falls along the Winnipeg river furnish an unlimited amount of power for the development of the pulp wood industry. The water power on the Winnipeg river is estimated to be about 43 per cent. of that available from the Canadian Falls of Niagara, but is distributed over a very large area. The country along the line of the Grand Trunk Pacific Railway west of the sub-divided townships was also explored. The country generally is rolling, partly open and partly timbered with poplar spruce and jack pine. The land is sandy on the hills and clay loam in the valleys. The amount of timber in the townships explored was estimated at between two hundred and thirty, and two hundred and forty million feet.

Grain Statistics.

Special Grain Report of the Department of Trade and Commerce, Canada, 1909. Ottawa: Government Printing Bureau. Pages, 54.

An interesting account of agricultural development in Canada is given in sta-

tistical form in a special grain report issued by the Department of Trade and Commerce. The report contains thirty-four tables showing the amount of grain weighed and shipped, the number and capacity of elevators and warehouses, the rates charged for shipment of grain on railways and vessels and for storage in elevators, the acreage under crop in Manitoba, Saskatchewan and Alberta, and the world's production of wheat, oats, and barley. The growth of the agricultural industry is shown by comparative statistics for preceding years.

The number of elevators in the western grain inspection division, in 1908, was 1,318, and the number of grain warehouses, 16, with a total capacity of 58,535,700 bushels. During the past eight years there has been a steady increase, there having been, in 1900-1, 426 elevators and 97 warehouses with a storage capacity of 18,879,352 bushels. In the eastern division there were 39 elevators in 1908, with a capacity of 20,871,000 bushels. The amount of grain of various kinds shipped from Fort William and Port Arthur increased from 6,468,511 bushels in the year ended August 31, 1901 to 70,195,879 in the year 1906-7. In the following year there was a decline of slightly more than 8,000,000 bushels. The estimated grain production in Canada during 1908, was 474,575,855 bushels, the Eastern Provinces producing 234,580,273 bushels and the four Western Provinces, 239,995,582 bushels.

In the years 1906 and 1907 Canada ranked tenth among the wheat producing countries. The average yield per acre is about 14 bushels for all Europe, 12 for the United States, while for Canada it was 19 bushels in 1906 and 16 in 1908.

ONTARIO REPORTS.

Fisheries of Ontario.

Second annual report of the Game and Fisheries Department, 1908. Toronto, King's Printer, 1909. Pages 120.

According to the report of the Ontario Game and Fisheries Department the total yield of the fisheries of the Province during 1908 amounted, 27,610,495 lbs.; an increase of 3,758,071 lbs., over the pre-

vious year. The total value of the fish caught amounted to \$2,100,078.63 compared with \$1,935,024 in 1907. In this industry there were employed 145 tugs, containing 668 men; 1,439 boats with 2,595 men; 2,265 hooks on set lines; 5,647,175 yards of Gill net; 518 hook nets; 227 dip nets. There were 106,359,000 fry distributed in the waters of the Province by the Federal Government from Dominion Hatcheries.

Statistics of Common Gaols.

Forty-first annual report of the Inspector of Prisons and Public Charities upon the Common Gaols of the Province of Ontario for the year ending September 30, 1908. Toronto: King's Printer, 1909. Pages, 56.

In the report on the gaols and lock-ups of Ontario it is stated that the expenditures for gaol maintenance in Ontario during 1908 was \$175,829.20, an increase of \$10,976.81 over the previous year. The number of persons committed to gaols and lock-ups was 13,083 in 1908, compared with 11,804 in the previous year. The average cost per day for each prisoner was 27 cents in 1907 and 23 cents in 1908. A revenue of \$93.12 was derived from gaol labour during the year and was earned at the Perth and Port Arthur gaols. In 1908, there were 874 commitments for crime against the person, an increase of 6 over 1907, and there were 3,546 commitments for crime against property, an increase of 610. There were 266 insane persons committed to gaols, compared with 258 in 1907. Of the persons committed, 4,729 were married, and 8,354 were single. In 1907, out of 11,804 persons committed to gaols, 2,889, or 24.48 per cent. were temperate. In 1908, 26.56 were temperate. Less than 15 per cent. of the prisoners were illiterate. Recommendations are made by the inspector of prisons for the adoption of the system of indeterminate sentence and probation, and for the establishment of industrial farms. It is also stated by him that work should be provided for prisoners as a lack of occupation is harmful in the extreme. It is suggested that all prisoners while in custody in gaols might be profitably kept employed in making material for roads.

Public Works of Ontario.

Report of the Minister of Public Works of the Province of Ontario for the year, 1908. Toronto: King's Printer, 1909. Pages, 157.

During the year 1908, 33 new bridges were constructed by the Ontario Department of Public Works, and improvements were made for the safer navigation of the Muskoka Lakes, Mary's and Fairy Lakes, Peninsula Lake and the Magnetawan river. During 1908, there were completed and open for traffic 679.85 miles of new railways making a total of 8,399.19 of steel railways in the Province. There are 34 electric railways having a total length of 672.42 miles. Colonization and road construction was actively carried on. This work comprised the opening of 293 miles of new road and the improvement and repair of 1,090 miles of road previously opened.

BRITISH REPORTS.

Hours of Labour on Railways.

Report by the Board of Trade respecting their Proceedings under The Railway Regulation Act, 1893, during the year ended 27th July, 1909. London: Wyman & Sons. Page 4. Price 1d.

In the report of the Board of Trade under the Railway Regulation Act, 1893, by which they were authorized to inquire into complaints made by, or on behalf of railway servants against too long hours of labour, it is stated that during the year ended July 27, 1909, there were 10 cases of long hours inquired into. This number being smaller than any previous year since the passing of the Act. Upon enquiry being instituted, the hours of labour were reduced in three cases; in three cases action by the Board of Trade was considered unnecessary, whilst in two cases the long hours were found to be due to exceptional circumstances and in two cases the Board were still in communication with the companies with reference to revised schedule at the close of the year. Since 1894, there have been 898 cases inquired into by the Board, the largest number having been in 1895, when there were 156. In 1906, there were 57 cases investigated; in 1907, 51; in 1908, 14, showing that there has

been a steady reduction in the number of complaints against long hours. Under an agreement of November 6, 1907, questions relating to the hours of labour of any class of employment engaged in transportation may be dealt with by conciliation boards and, failing settlement by such boards, may be referred to arbitration. Arbitrations have already taken place upon four railways, and two others decided to refer certain matters to arbitrators. In a number of other cases questions affecting hours of labour of classes of men in the employ of a particular company have been settled by conciliation boards.

Statistics of Mines and Quarries.

Mines and Quarries, general report with statistics for 1908, by Chief Inspector of Mines, Part 1. District Statistics. London: Wyman & Sons. Pages, 50. Price 6d.

In the report of the Chief Inspector of Mines of Great Britain for 1908, it is stated that the total number of persons employed in and about the mines of the United Kingdom was 1,017,740, of whom 987,813 worked at the 3,338 coal mines and 29,927 at 721 metalliferous mines. Compared with 1907, there was an increase of 47,195 persons at the mines under the Coal Mines Act, and a decrease of 1,675 persons at the mines under the Metalliferous Mines Act. There was an increase of 364 females in coal mines compared with 1907. 49,296 or 6.2 per cent. of the underground workers were under 16 years of age. The total output of minerals at the mines under the Coal Mines Act was 275,540,746 tons, of which 261,512,214 were coal, 2,814,411 fireclay, 7,890,814 ironstone, 2,891,564 oil shale, and 431,743 sundry minerals. There is a decrease of 6,302,167 tons of coal mined compared with the previous year. At the mines under the Coal Mines Act there were 1,138 separate fatal accidents, causing 1,308 deaths. Compared with 1907 there is a decrease of 24 in the number of accidents and an increase of 63 in the number of deaths. At the mines under the Metalliferous Mines Act there were 36 fatal accidents which caused 37 deaths, an increase of three compared with 1907. At the

quarries there were 90 fatal accidents which resulted in 92 deaths. The death rate of underground workers at the mines under the Coal Mines Act was 1.46 per thousand and of the surface workers it was .76 per thousand. At the mines under the Metalliferous Mines Act the death rate of the underground is 1.84 per thousand, and of the surface workers .40 per thousand.

Colonial and Foreign Statistics of Mines and Quarries.

Mines and Quarries, general report and statistics for 1907. Part IV.—Colonial and Foreign Statistics Wyman & Sons, Ltd., 1909. Pages, 202. Price, 1s., 8d.

Part IV of the General Foreign Statistics of Mines and Quarries for 1907 issued by the Home Office of the United Kingdom contains statistics relating to persons employed, the output and accidents at mines and quarries in the British Colonies and in Foreign Countries. The statistics of the world are not quite complete as none are published by the Countries of Bolivia, Brazil, China, Persia and Turkey and no statistics are published for ore mines and quarries of the United States. In this account of other mining countries it is stated that the number of persons engaged in mining and quarrying in 1907 exceeded 5 2-3 millions. More than half the total number were engaged in coal mining; Great Britain employing over 925,000 the United States 680,000 Germany, 611,000 and France 183,000. The total output of coal was 1,117 million tons, the value of which is estimated at more than 418 million pounds sterling. Compared with 1906, there is an increase of 104 million tons and 74 million pounds sterling. The output of Gold amounted to 614,732 kilograms (that is 19,764,078 ounces) valued at nearly 84 million sterling. This was an increase of 16,096 kilograms over the previous year. The British Empire supplied nearly 61 per cent. of the total output and the United States 22 per cent. In the case of iron the United States led with an output of 26 million tons followed by the German Empire with 704 million tons, Great Britain nearly 5½ million tons and Spain with nearly 4 3-4 million tons. The loss of life from accidents in coal

mines per thousand persons employed was 1.31 in the United Kingdom, 1.33 in the British Empire, 2.55 in Germany and 4.66 in the United States. The death rate for foreign countries generally was 3.04. The death-rate in gold mines in the British Empire decreased from 3.83 in 1906 to 3.66 in 1907.

Trade Returns of the United Kingdom.

Annual Statement of the Trade of the United Kingdom with foreign countries and British possessions, 1908, compared with four preceding years. Vol. II. London: Wyman & Sons, Pages, 427. Price 3s., 5d.

In Volume II of the Report of the Customs Department of Great Britain for 1908, it is stated that the total imports of merchandise into the United Kingdom amounted to £592,953,487 compared with £645,807,942 in 1907. The exports amounted to £456,727,521 compared with £517,977,167 in the preceding year. The imports from the British possessions declined from £157,137,054 in 1907 to £127,828,058 in 1908, and the exports to British possessions declined from £147,474,081 in 1907 to £135,666,667. Australian trade in 1908 amounted to £2,974,012 imports and £25,661,023 exports. The Canadian trade amounted to £26,287,668 of imports and £14,212,447 exports.

AUSTRALIAN REPORTS.

Statistics of Transport and Communication

Official Statistics, Commonwealth of Australia, Commonwealth Bureau of Census and Statistics. Transport and Communication, Bulletin No. 2. Summary of Commonwealth Statistics of Transport and Communication for the years 1901 to 1908. Commonwealth Statistician. Government Printer, Melbourne. Pages, 38.

The statistics of transport of Australia prepared by the Commonwealth Statistician show that in 1908, there were 14,658 miles of Government Railways in Australia compared with 14,190 in the previous year. The total cost of construction and equipment of these railways amounted to £139,988,015 up to June, 1908, being an average cost of £9,550 per mile. The total revenue of these railways amounted to £14,303,635, compared with £13,936,662 in 1906-07. The total working expenses for 1907-08

amounted to £8,397,733. The net earnings amounted to £5,905,902 for that year. The interest payable on expenditure from loans for railways amounted to £5,098,117, leaving a net profit of £807,725 after deducting the payment of working expenses and interest in loans. The private railways of the commonwealth had 1,554 miles in operation.

Population and Vital Statistics.

Commonwealth Bureau of Census and Statistics. Population and Vital Statistics. Bulletin No. 14. Vital Statistics of the Commonwealth for the year 1908. Melbourne, G. H. Knibbs, Commonwealth Statistician, 1909. Pages, 158.

In a bulletin published by the statistician of Australia giving the vital statistics of the commonwealth for the year 1908, it is stated that the estimated population of Australia on December 31, 1908, was 4,275,306 persons, of whom 2,252,027 were males and 2,023,279 were females. During the year the total number of registered births was 111,545, which is the highest number ever attained. The birth rate was 26.35 per thousand compared with 26.55 in 1907, showing a slight decrease.

The total number of marriages was 32,557 equivalent to a rate of 7.69 per thousand of the mean population. The number of marriages was in excess of that of any previous year, and the rate was the highest since 1888 with the exception of the year 1907.

The registered deaths during the year numbered 46,426 which was equivalent to a rate of 10.97 per thousand. The male death rate varied from 9.96 per thousand in South Australia to 14.04 in Victoria and the female death rate from 8.72 in Queensland to 11.51 in Tasmania.

With regard to the causes of deaths, there were 3,966 from tubercular diseases, 2,921 from cancer and other malignant tumors, and 1,864 from Nephritis and Bright's Disease. There were 497 suicides; 413 of males and 84 of females. Violent deaths, exclusive of suicides, numbered 2,922.

UNITED STATES REPORTS.

Free Employment Offices of Illinois, 1908.

Tenth annual report of the Bureau of Labour Statistics of the Illinois Free Employment Offices for the year ending September 30, 1908. Springfield, Ill. State Printers, 1909. Pages 115.

In the report of the Illinois Free Employment Offices for 1908 it is stated that since the opening of these offices ten years ago, 411,100 have applied for employment of which number 237,395 males and 118,816 females obtained work. It is noted that the proportion of men to women who applied at the State Employment Offices of Illinois is greater than elsewhere. It was found in the State of New York that they were being used almost entirely by applicants for domestic service, and as a mere convenience for house wives, and were consequently abandoned in that State. The law imposes upon the Free Employment Commissioners of Illinois the duty of licensing and supervising private employment agencies of which there are 242 in Chicago and 18 in other cities of the State.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NOVA SCOTIA CASES.

[Damages for Negligence in Operating tramway.

UPON seeing a child (aged one year and eleven months) approaching the tracks of a tramway, the motorman sounded the whistle of the car he was driving; the child stopped for a moment and looked towards the car; the motorman then applied full speed without waiting to see whether the child retreated, and without making any effort to remove the child from its dangerous position; the child moved quickly towards the tracks, was struck by the car and received the injuries for which damages were claimed in the action by the father of the child. It was held by the Supreme Court of Canada that the conduct of the tramway company's motorman was recklessness for which the company was liable; that failure to take proper precautions to avert injury to the child was not to be excused by the alleged necessity of complying with the time-table and preventing delay to passengers; and that the failure of the company to provide the car with a fender was evidence of negligence. The Court dismissed the defendant company's appeal with costs.

(Lott v. Sydney and Glace Bay Ry., Co., 42 Sup. Ct. Repts. 220.)

Strikers' Eviction Case.

In an action or proceeding which was taken by the Dominion Coal Company against one of their workmen, who had joined the strikers at Sydney, for the

purpose of evicting him from the premises owned by the Company and occupied by the defendant as a tenant, Judge Finlayson, before whom the case was tried, has given the following decision:

"This application is opposed on two principal grounds. First, that the tenant being illiterate, was not aware that he was signing a lease with conditions; the document was not read to him, and that, therefore, these conditions are not binding on him; and Second, that the landlord, by accepting rent after the alleged breach of condition under which he claims the right of entry, waived the forfeiture so created by such acceptance of rent.

"I have been asked to decide this second question on the grounds that it might settle many of the other cases. I have, however, concluded that as a decision of this question is not necessary for the determination of the case under review, and as other questions may arise in the other cases which might render a determination of this question, which I consider rather difficult, unnecessary. I have decided to leave it alone, until I am forced to meet it squarely.

"The tenant swears positively that when he made his mark to what purports to be the lease under which he holds, he understood it was an agreement to pay rent monthly for the house assigned him by the landlord. He acknowledged that he was satisfied with the conditions which he understood to be the payment of \$3.50 per month, and nothing more. The lease, he says, was not read to him before signing, nor was any of its conditions explained to him.

"I am fully aware that in ordinary cases it is the duty of the person signing a document to make himself aware of its contents,

and this is true, whether he is literate or illiterate. In this case, however, I do not think the tenant should be bound. There was nothing in the document signed to indicate that it was a formal lease; nothing to put the ordinary man on his enquiry; that it was anything more than what he took it for at the beginning, an agreement to pay monthly for his house. I do not think he can be held to conditions which he never agreed to, and that he is really holding under a monthly agreement, without any conditions. He is a tenant from month to month, and is entitled to the statutory right to determine his tenancy, which has not been given him. For that reason I dismiss this application."

QUEBEC CASES.

Alleged Negligence of Contractors.— New Trial.

In an action for damages for alleged negligence causing the death of the husband of the plaintiff, the following were the facts: The plaintiff's husband witnessed an accident which happened to an employee of the defendants, engaged in building operations on one of the public streets of Montreal. A wire cable used on a derrick coming in contact with high voltage wires of the Montreal Light, Heat and Power Co., the employee received an electric shock and was being assisted by the foreman of the contractors. The plaintiff's husband rushed to their assistance, and, in trying to extricate the employee, both were killed by electricity passing through the cable. The plaintiff brought an action, on behalf of herself and her children, against the contractors and the Montreal Light, Heat and Power Co., for damages, and charged the contractors with negligence in placing and operating the derrick in dangerous proximity to the live wires. The jury at the trial exonerated the plaintiff's husband from blame in voluntarily going to the rescue of the men who were in contact with the electric current, and found the company at fault for neglecting to protect their live wires, but found, also that the contractors were not to blame for the accident. On these findings in regard to

the contractors, the case was referred by the trial judge to the Court of Review which dismissed the action against the contractors with cost. This decision was sustained by the judgment of the King's Bench, Trenholm, J., dissenting. Plaintiff now appealed to the Supreme Court of Canada which allowed the appeal with costs in the Supreme Court and in the Court of King's Bench, and ordered a new trial, the costs of the first trial in the Superior Court, Montreal, to abide the result of the new trial.

(*Dumphy v. Martineau et al.* 42 Sup. Ct. Repts. 224.)

Damages for Drowning of Sailors.

Two actions were brought against the owner of the tug "Mersey" which was wrecked near Pointe Outarde, on the Lower St. Lawrence, in August, 1903, to recover damages in consequence of the drowning of two of her crew. At the formal investigation into the causes of the foundering of the ship, the Wreck Commissioner, assisted by two nautical assessors, reported that the ship was seaworthy when she left Quebec on her last voyage; that her lifeboat and appliances were sufficient to have saved all lives on board had the master made proper use of them; and that the evidence did not explain the cause of the casualty by which these sailors' lives were lost. It was also found that the master and mate had been guilty of cowardice and desertion of the ship, and their certificates were cancelled. The actions were first brought in the District of Quebec, but the court declared itself incompetent and referred the case to the Superior Court for the District of Montreal. In the latter court the defendant pleaded that the actions were not brought within the proper time, a year having elapsed before the actions came before a court of competent jurisdiction; that deceased were not passengers, but were engaged as part of the ship's crew; that the ship was seaworthy; and that the disaster was due to the perils of the sea. At the trials of the actions, by the Superior Court, District of Montreal, the plea that the actions were not brought within the proper time was dismissed, and judgments were entered in favour of the respective

plaintiffs with costs. These judgments were affirmed by the Superior Court, sitting in review at Montreal. Upon appeal by defendants from the judgments of the Court last named to the Supreme Court of Canada, where the same questions were raised, the appeals were dismissed with costs.

(Grenier v. Connelly, 42 Sup. Ct. Repts. 242.)

ONTARIO CASES.

Workmen's Compensation Act.—Protection to Unskilled Labour.

The defendants, who were contractors for the erection of an eight-story building, used an outside hoist for the purpose of raising the materials required in the construction of the different floors. The hoist stood close against the building, and was made in sections, a new section being added as each floor was reached. It was necessary for the workmen to work upon a platform 8 feet square, to the corners of which uprights were fixed and secured on the outside by braces. When the last or roof section of the hoist was being erected the plaintiff's husband, an ordinary labourer, employed by the defendants to assist the skilled carpenters whose duty it was to construct the hoist, in stepping forward quickly, stumbled and fell off the platform, receiving injuries from which he died on the following day. There was some evidence that the planks forming the platform were rough and of unequal thickness. The jury found that the accident was caused by the negligence of the defendants, by not having a guard on the inside of the uprights, and by the unevenness of the platform; that the deceased could not have avoided the accident by the exercise of reasonable care; and that he was not aware of the condition of the hoist. Upon these findings judgment was entered for the plaintiff, the deceased's widow, for \$1,600 and costs. Upon an appeal, to the Court of Appeal it was held, that, even although it should be considered that there was no evidence that the floor was in fact uneven, or of how the deceased came to fall, the plaintiff was entitled to succeed under the Workmen's Compensation for

Injuries Act, (R.S.O. 1897, ch. 160, sec. 3, clause 1, as qualified by sec. 6, clause 1,) inasmuch as the death of her husband was found to be caused by a "defect in the condition or arrangement of the ways works, machinery, plant, buildings, or premises connected with, intended for, or used, in, the business of the employer", and the defect "had not been discovered or remedied owing to the negligence.....of some person entrusted (by the employer) with the duty of seeing" that the condition or arrangement of the same was proper. The position of an ordinary labourer, like the deceased, was different from that of the skilled workmen who had undertaken the construction of the hoist, and he was entitled to every reasonable safeguard in the performance of so hazardous a duty.

(Linden v. Trussed Concrete Steel Co., (1909) 18, O.L.R. 540.)

Damages Under Accident Insurance Policy.

The plaintiff, as the widow and beneficiary of C. F. S., sued an accident insurance company on an accident policy issued to her deceased husband. The policy described the insured as a commercial traveller and contained a condition that, if he met with an accident while "temporarily or permanently engaged in any occupation classed by the company as more hazardous than that in which he is insured", the amount payable should be what the premiums paid by him would entitle him to be insured for under such more dangerous classification. The insured applied for employment as a railway brakeman, and while taking the usual trial trip prior to engagement (in which, however, he worked gratuitously as a brakesman), he was killed, apparently by being run over by a train. The action was tried by a judge, without a jury, and he, being of opinion that the case fell within the authority of *McNevin v. Canadian Railway Accident Insurance Co.*, (O.R., 2 O.L.R., 531, 32 S. C.R. 194) gave judgment for the full amount of the policy with costs. Upon appeal to the Court of Appeal this judgment was re-

versed. The Court (per Garrow, J. A.) held, that the present case was distinguishable from the McNevin case; that it came within the above condition; and that the amount payable under the policy must be limited accordingly. This amount (\$337.35) had been paid into Court by the defendant company. The appeal was allowed with costs, as to the sum claimed in excess of that amount, plaintiff to pay the costs of the action subsequent to the payment into Court.

(Stanford v. Imperial Guarantee and Accident Insurance Co., (1909) 18 O.L.R. 562.)

Services for Staking out Mining Claims.— Husband's Agency for Wife.

In an action to recover \$212.50 for work and labour and services rendered and money disbursed by plaintiff for defendant, the trial Judge (MacMahon, J.) held, that when plaintiff staked out two mining claims for defendant, on instructions from her husband, and paid the recording fees, the husband had authority to act for defendant and she must pay the plaintiff's claim. He gave judgment for the above amount claimed with interest and costs.

(Rasch v. Heckler, 14 Ont. Weekly Reporter, 441.)

Master and Servant.—Wages Assigned.

A plaintiff storekeeper supplied wage-earners with goods or verbal agreements that he should be paid, by their employers, out of their wages, and the employers consented to those agreements. The trial judge (Teetzel, J.) held that the plaintiff had an equitable assignment of sufficient of their wages, which might be owing them, to satisfy his accounts, and could sue their employers without joining the several wage earners.

(Lee v. Friedman *et al.* 14 Ont. Weekly Reporter, 347.)

MANITOBA CASES.

Railway Accident Case.

Plaintiff being a brakeman in the employment of defendants at Winnipeg, was called for a run from Winnipeg to Portage la Prairie. When he arrived at the yards, pursuant to the orders

of the conductor, he, with the assistance of the other members of the train crews, consisting of an engine-driver, fireman and another brakeman, went with the engine to get out the caboose, which was standing upon a side track, and which was to be used for the trip. After getting out his own caboose and placing it upon the lead, he proceeded to replace the other cabooses upon the siding, and, in doing so, signalled the engine-driver to back up the train. Plaintiff was walking along in an easterly direction on the South side of the train, and the uncoupling was to be made from the tender. He took the lever on the tender of the engine first with one hand and then with both, and made several ineffectual attempts to lift the coupling pin. He then reached in between the cars to get the pin on the caboose side of the coupler, and either tripped or was knocked down, and had his left arm cut off by the wheels of the tender. There was no lever on the caboose or van. In an action for damages, the trial judge held that there was no evidence of negligence on the part of defendants to go to the jury, and he directed a non-suit. The Court of Appeal granted a new trial, the costs of the former trial and of this appeal to be costs to the plaintiff in any event of the cause. The Court held, that in view of the requirement in subsection (c) of sec. 264 of the Railway Act, R.S.C. 1906, ch. 37, that all cars should be equipped with apparatus which shall prevent the necessity of brakemen going in between the ends of the cars to uncouple, the plaintiff had made out a *prima facie* case of negligence.

(Scott v. Canadian Pacific Ry., Co., 11 Western L. R. 120.)

Master and Servant or Partners.

The plaintiff and defendants were proprietors of two theatres in Portage la Prairie. On the 26th December, 1908, they made an agreement by which one theatre was to be closed and the plaintiff was to assume the management of the other—which was done. Plaintiff continued his management until 1st May, 1909, when defendants assumed to cancel the agreement and expel him from the man-

agement on account of his habitual intoxication. Plaintiff's contention was, that under the agreement he was a partner in the theatre which he managed. Defendants' contention was, that the agreement only created a relationship of master and servant. The trial judge (Mathers, J.) was of opinion that, although the agreement was by no means clear, the relationship was that of partners and not of master and servant, and that plaintiff being a partner, defendants had no right to expel him. There is no method, except a dissolution of partnership by which one partner can be got rid of against his will, in the absence of express agreement. The learned judge held that plaintiff was entitled to his share of the profits of the theatre during the time he was excluded from the management; that defendants should be enjoined from excluding plaintiff from continuing the management, and from preventing plaintiff from carrying out the terms of the agreement; and that the sum of \$2. paid into court by defendants as damages for an assault on plaintiff in his removal from the theatre was sufficient. Plaintiff was to have the costs of the action, injunction motion included, except the costs of the issues on which defendants succeeded, defendants to have such costs.

(Hemming v. Lemarquand, 11 Western L. R. 280.)

Plumbers' Picketing Case.

In the case of Cotter v. Osborne, which was tried before Mr. Justice Mathers some time ago, and which has been appealed to the Privy Council, judgment was given for \$3,000 damages and costs (the latter amounting to \$1,000 or thereabouts) against the defendant workmen, members of a local union, for the picketing, during a strike, of the premises of the plaintiffs who are master plumbers. No stay of proceedings was granted, and the plaintiffs so far have been unable to collect the amount of their judgment. On the 19th of August last, their counsel went before Mr. Justice Metcalf and applied for the appointment of a receiver to receive and hold all dues payable to the Union for the purpose of satisfying plaintiffs' judgment. The application was

granted. The effect of the order is to require the members of the Union to hand over their monthly dues and tolls to a representative of the Court, who will in turn hand them over to the plaintiffs.

SASKATCHEWAN CASES.

Proper Court for Trial of Mechanics' Liens.

In an action to enforce a mechanic's lien which came before Chief Justice Wetmore, and which involved purely questions of fact, the learned Chief Justice points out that the action was improperly brought in the Supreme Court, although, that question not having been raised, he did not intend to hold that the Court had no jurisdiction to try the action. At the same time he was inclined to the opinion that the Supreme Court had jurisdiction, notwithstanding the Mechanics' Lien Act (ch. 21, 1907). section 30 of the Act provides that "all actions to realize under a lien irrespective of the amount involved, or that the title to land is called into question, shall be brought, tried and determined in the District Court, in the same manner and subject to the same right of appeal as ordinary actions in the Court." In the present case all the work done and materials furnished were done and furnished subsequent to 3rd April, 1907, when the Mechanics' Lien Act was passed. Therefore, the action should have been brought in the District Court as provided in that Act, and the costs awarded must be District Court costs and must be so taxed by the local registrar.

(McKenzie v. Murray, 11 Western L. R. 123.)

The Regina Peddlers By-law.

Under by-law 400 of the city of Regina it is provided, that a license shall be taken out for or by "all hawkers, petty shopmen, peddlers, and other persons carrying on petty trades, or who go from place to place, or to other men's houses, on foot, or with any animal bearing or drawing any goods, wares, or merchandise for sale". One S. P. was summoned before the Police Magistrate of Regina

for violation of the by-law in peddling in the city fish purchased from a person who caught them in Lost Mountain Lake. After citing some authorities the Magistrate held that fish peddled by defendant were not merchandise simply because they had been bought from the fisherman; that "goods, wares, and merchandise" does not include fish; that, although the City Council might include in its by-law provisions that a license shall be necessary lawfully to peddle fish, they had not done so; and that wherever it is sought to extend the phrase "goods, wares, and merchandise" so as to cover commodities not at present included therein, such commodities must be specifically named. He dismissed the case.

(Rex. v. Posterman, 11 Western L. R. 141.)

BRITISH COLUMBIA CASES.

By-laws Regulating a Trade.

Where a municipal by-law was passed prohibiting hawkers and peddlers of vegetables and similar products from pursuing their calling throughout the municipality on market days, it was held by the Court of Appeal, that statutory power to pass by-laws regulating a trade does not authorize the prohibition of such trade, or the making it unlawful to carry on a lawful in a lawful manner.

(Rex v. Sung Chong, 45 Canada L. J. 492.)

Workmen's Compensation Act.—Procedure for Setting Aside Award.

The Court of Appeal held, that proceedings to set aside an award under the Workmen's Compensation Act, 1902, registered in the County Court, may be taken by way of an ordinary motion, and it is not necessary to apply for a writ of prohibition which is more expensive proceeding. Where there is a doubt as to what is the procedure to be followed, the Court in its discretion will not order costs to the successful party.

(Disourdi v. Sullivan Group mining Co., 45 Canada L. J. 493.)

The Supreme Court has held, that there must be an admission of liability on the part of the insurer, or a finding of liability by a competent tribunal, before the provisions of section 6 of the Workmen's Compensation Act, 1902, as to payment into court, can be invoked.

(Disourdi v. Maryland Casualty Co., 45 Canada L. J. 494.)

With respect to the above two cases it should be explained, that the applicant, Disourdi, was injured in the employment of the defendant Mining Company, which, during the proceedings to establish his claim against them, went into liquidation. He was awarded compensation in \$1,500. The insurance company disputed the award, and the applicant applied under section 6 of the Act for an order that the mining company and the insurers proceed to the trial with him of the question in dispute. It was held (1) that any right which the applicant might have against the insurers under section 6 must be decided in an action commenced in the ordinary way; and (2) that the rules made under section 6 of the Act are illegal.

YUKON TERRITORY CASE.

Master and Servant.

In an action for wages or compensation for extra services which were volunteered by plaintiff, and of which defendant received the benefit, it was contended that the plaintiff was entitled to something, and that the amount should be fixed by the Court. Craig, J., was of opinion that to establish the right to recover there must be a contract, express or implied, to pay something for the services, and that no such action can be based upon volunteer services, or extra work rendered by a volunteer already in the employ of a person, as in this case. There was no intention or request, on the part of any one, that the services sued for should be performed or paid for. Plaintiff was a pure volunteer. The action was dismissed with costs.

(Fabris v. Sala, 11 Western L. R. 269.)

THE LABOUR GAZETTE

OCTOBER, 1909.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF SEPTEMBER, 1909.

I.—GENERAL SUMMARY.

THE exceptionally favourable conditions under which the western crop has been harvested and the heavy movement of the grain to the Eastern markets were the most important features of the month. In view of the comparatively late date at which seeding was completed, unfavourable weather during September would have been attended with heavy loss to Western agriculture. This was almost entirely avoided. The quality of the crop has been pronounced by experts to be materially better than in several years past. The extent of the yield, also, is held to exceed that of any previous year, though final estimates were as yet impossible. Elsewhere throughout Canada, favourable returns were received with regard to the agricultural yield, and with the prevailing high prices for farm products, the year will prove a most prosperous one for the industry. The confirmation, during September, of previous anticipations to this effect acted as a further stimulus to general industrial activity. Manufacturing, throughout Canada, is now very active in almost every branch and locality; the building trades have every prospect of a very active autumn and winter season; while general trade has shown a marked revival as the crop proceeds began to reach the hands of the producers. The lumbering and mining industries are both anticipating increased outputs and will furnish consi-

derable additional employment, as compared with the autumn of 1908. For men to work in the railway construction camps of Western Canada there was a keen demand, a demand which was not fully satisfied in several sections of the country. Unskilled labour generally had a very active month and was in demand in several localities. The fishing industry generally and the coal mining industry in Nova Scotia were somewhat quiet, the former largely from seasonal causes and the latter owing to the continuance of labour troubles.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour, during September, 1909:

Lumbering.—Some further advances were paid by lumbermen in the Ottawa Valley and elsewhere in Eastern Canada in engaging crews for the winter camps. (*)

Building trades.—At Ottawa, Ont., builders' labourers (50) employed by the city corporation had their wages advanced by from five to ten cents per day and hours of labour reduced one hour. The same number of carpenters had their

*See reports of Hull, Ottawa and Sault Ste. Marie, correspondents.

hours reduced by one per day. Iron workers (15) and foremen (9) in the same employment also received the same reduction in hours.

Railway employees.—By agreement between the Temiscaming and Northern Ontario Railway Company and its maintenance-of-way employees, a rate of of \$2.30-\$2.55 per day for yard and section foremen and of \$1.65 per day for sectionmen has been agreed upon.

Unskilled labour.—Wages were upward in tendency in view of the prevailing demand.

Cost of Living.—Prices.

Wheat, flour and cattle prices were somewhat easier than in August, but hogs were very high, while butter and eggs were upward. Potatoes and other vegetables were down in price. Bread also declined in price. The Canadian wool market was dull, but firm. The hide market was strong, and leather prices were steady to strong. Prices of footwear were upward. An advance in rubber footwear was also announced following on the exceptionally high price of raw rubber. Metals were weak though business continued fair. Cement was upward.

Interruptions to Industry.

Among industrial and other establishments and buildings destroyed by fire or other cause during September, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Smoke house and contents at Dartmouth, loss, \$3,000; factory and hotel at Middleton; lumber mill at Weymouth, loss, \$16,000; sawmill at Windsor Junction, loss, \$8,000.

Barn at McKay's Corner.

On September 2, the schooner *Havelock* foundered at sea and the schooner *Fanny* was wrecked off Lingan.

Prince Edward Island.—On September 2, a severe storm visited the coasts of Prince Edward Island and Nova Scotia, and caused much damage to shipping. During its progress the schooner *Laura C. Zwicker* went ashore on the East coast of Prince Edward Island, and became a wreck.

New Brunswick.—Woollen mill at Moncton, loss, \$4,000; farm buildings at Quispamsis; farm buildings at Waasis station, loss, \$1,400.

Quebec.—Sawmill and lumber at Boscobel; sawmill at Lennoxville. At Montreal, business block, loss, \$15,000; hardware store, loss, \$4,000; plumber's establishment, loss, \$8,000; clothing store, loss, \$3,000; Witness publishing office, loss, \$75,000. Grocery ware-

house at Quebec, loss, \$5,000; business block and factory at Richmond, loss, \$7,000; store and bank at Rigaud, loss, \$40,000; woollen mill (partial) at St. Hyacinthe, loss, \$1,500; station and storehouse at Ste. Marguerite, loss, \$10,000; two stores at Sherbrooke; business portion of village of Yamaska West, loss, \$60,000.

Barn at Fulford.

Heavy rains at the close of the month stopped work at Thetford mines.

Ontario.—Business section of town of Almonte, loss, \$100,000; outbuildings and contents at Brantford, loss, \$3,000; outbuildings and contents at Cornwall, loss, \$4,000; hotel at Dorchester, loss, \$5,000; hardware store at East Toronto, loss, \$4,000; hotel at Hepworth. At Hamilton, plumbing shop and sheds, loss, \$2,500; and theatre, loss, \$30,000. Mattress factory at Kingston; livery stable, laundry and twelve horses at London, loss, \$50,000; steamer *Islander* near Kingston, loss, \$20,000; 15,000,000 feet of lumber at Midland, loss, \$250,000; sheds at North Hamilton, loss, \$2,500; business block at Metcalfe, loss, \$5,000. At Niagara Falls, planing mill, loss, \$10,000; planing mill, loss, \$3,000; produce market and stock, loss, \$1,000. At Ottawa, foundry, loss, \$2,000; tenements, loss, \$3,500. Business block at Picton; hotel at Port Stanley, loss, \$1,000; grain elevator at Schomberg; pulp mill at Tamworth, loss, \$20,000; outbuildings and contents at Toronto Gore, loss, \$6,500. At Toronto; garage, loss, \$3,000; cartage stables, loss, \$12,000. Storehouses at Tilbury, loss, \$4,900; at Wyoming, livery barn, loss, \$2,500; cheese and butter factory, loss, \$3,500.

Barns at Brampton, Claremont, Merivale, Verulam and Westminster township.

On September 2, the steamer *Kathleen* was struck by lightning at Sturgeon Point and was burned to the water's edge, loss, \$3,500. The schooner *Sir C. T. Van Straubenzie* was struck by the *City of Erie* off Dunkirk, Lake Erie, and foundered, three of her crew going down with her.

Manitoba.—Two thousand bushels of grain at Burnside; grain separator at McGregor; apartment house at Winnipeg, loss, \$15,000.

Saskatchewan.—Outbuildings and nine horses at Halbrite, loss, \$3,000; tailor shop at Prince Albert, loss, \$2,000; business block at Saskatoon, loss, \$30,000; threshing outfit, two stables and 4,000 bushels of grain at Yorkton.

Forest fires caused heavy damage at the close of the month near Elk Park.

Alberta.—Stables and twelve horses at Lethbridge; hotel at Wostock.

British Columbia.—Outbuildings and contents at East Wellington, loss, \$10,000; shingle and planing mills at Vancouver, loss, \$100,000; biscuit factory at Victoria, loss, \$50,000.

Conditions in the Industries and Trades.

Conditions of employment during September in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of the *Labour Gazette* and by information received at the Department of Labour from other sources, may be briefly summarized as follows:

Agriculture.

The end of September saw the Western harvest, one of the best ever recorded, saved in excellent condition, and a large

portion of it threshed and on its way to market. Weather conditions were exceptionally favourable, little or no damage from frosts or rainfall being recorded. The quality of the grain is better than for some years past. During the opening weeks of the month, a scarcity of harvesters and threshers was reported in several districts in Western Canada and several train loads of these workmen were distributed during the second week of the month. Later, however, a large number of men employed at harvesting and threshing were released for other occupations. In the second half of the month, ploughing had been begun in many localities and very good progress was reported in the North-west Provinces, Ontario and the Eastern Provinces.

High prices for grains and produce prevailed. In the dairying branch, the copious rains of September, by freshening pastures, increased the flow of milk, and creameries had a busy month, though in some sections preparations were under way to change to butter making. Live stock was reported as doing well throughout Canada.

The leading fruit crops of Ontario have been exceptionally heavy, with the exception of apples which are light through drought in August. Peaches have been a very heavy yield. Fruit canning establishments as a result were busy, though a shortage of corn and tomatoes was reported by some of the canneries.

Among official or other crop estimates issued during September, mention may be made of the following:—

The *Census and Statistics Monthly* for September issued by the Department of Agriculture, Canada, stated as follows:—

For the whole of Canada the estimates of production based on the reports of a large staff of correspondents, show for fall wheat a yield of 16,700,000 bushels and for spring wheat 151,686,000 bushels, being 25.22 and 21.39 bushels per acre respectively. The total yield is 168,386,000 bushels or 21.73 bushels per acre as against 124,690,000 bushels at the same date last year. Oats with an average of 38.15 bushels per acre gives an aggregate of 354,919,000 bushels, and barley with an average of 30.55 bushels gives an aggregate of 56,975,000 bushels. At the same date last year, the estimate was 269,944,000 bushels for oats and 49,488,000 bushels for barley. Other crops compared with last year show 8,184,000 bushels peas against 7,667,000, beans 1,311,000 against 1,282,000, buckwheat 7,794,000 against 7,727,000, mixed grains 19,524,000 against 19,380,000, rye 1,708,000 against 1,711,000 bushels, and hay and clover 10,246,300

tons against 11,128,000 tons. All field crops except hay and clover show higher averages per acre than at the same date last year.

Manitoba, Saskatchewan and Alberta show as compared with the same time last year, 149,285,000 bushels of wheat, against 104,054,000 bushels; 187,802,000 bushels of oats, against 107,860,000 and 33,893,000 bushels of barley, against 25,951,000.

An official report of the Department of Agriculture, Saskatchewan, places the year's crop in that Province at approximately 200,000,000 bushels divided as follows: wheat, 86,868,692 bushels; oats, 100,521,250 bushels; barley, 7,945,494 bushels; flax, 4,155,540 bushels.

The fifth annual estimate for the western Provinces made by the *Manitoba Free Press* was as follows:—wheat, 118,270,000 bushels; oats, 163,998,000 bushels; barley, 30,542,000 bushels.

In the Maritime Provinces, crops are reported up to or above the average. Hay has been a good crop; potatoes are large but few in number, having been injured in some localities by wet weather.

Sixteen additional country elevators have been erected by the Ogilvie Flour Mills Company this year. The total number of elevators now owned by the Company in North-western Canada is 116.

It was announced in the closing days of the month that henceforth all wheat shipped by farmers in Western Canada will be sampled and graded by the Manitoba Grain Growers' Association in the Winnipeg railway yards. The object of this action is to ensure that Western farmers secure the full value of their grain, and to furnish an additional check on the Government grading certificates.

Fishing.

Herring in fair quantities were taken off the Nova Scotia coast, and a few sword-fish were captured. Mackerel takings have been light. The summer fishing season ended about the middle of September. The Lunenburg fleet reported the most successful year in its history; eighty-four vessels reporting an average catch of 1,486 quintals⁽¹⁾. The oyster season, which opens in Prince Edward Island on October 1, will furnish employment for a large number who have been quiet since the close of the lobster

(1) See report of Halifax, N.S., correspondent.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has references only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

season. An investigation into the latter fishery, under the auspices of the Department of Marine and Fisheries, Canada, was in progress in Nova Scotia.

At Fox River and other points in the County of Gaspé, Que., a disagreement arose between the fishermen and the merchants with regard to the prices to be paid for the season's catch of codfish. Rioting took place among the fishermen, and the Government cruiser *Canada* was despatched with a military crew to the scene of the disturbance. Several arrests were subsequently made.

Catches on the great lakes were very light. In British Columbia, some spring salmon were being taken. The Fraser river pack for the year is estimated at 420,000 cases (?). Fifteen cents per fish was paid by the canners for late sockeyes and cohoes, of which the run after September 15 was heavy. Employment was very active in and about the canneries. The hatcheries of the Fraser river and tributary waters have been successful in gathering large quantities of salmon spawn.

Lumbering.

The lumbering industry showed further improvement compared with the preceding month. Mills in Ontario and the Eastern Provinces continued to run to full capacity, the water in the streams being exceptionally high, whereas a year ago many of the mills were idle through lack of water and others were running to only half their capacity. Pine and spruce prices were stronger at Ottawa Valley points. Some additional gangs were sent into the woods; crews are being made larger than last year in expectation of a larger cut. Men for this employment were somewhat scarce and wages were upward in tendency. (*) In British Columbia logging camps on the coast were working steadily, and sawmills were fairly busy. There was a further improvement also among the mountain mills; a car shortage was complained of by lumbermen in this section, following upon the diversion of rolling stock to assist in the western crop movement.

The Canadian Forestry Association held a special convention at Regina Sask., beginning September 3, under the chairmanship of Hon. W. T. Pipes, Commissioner of Crown Lands for Nova Scotia. The convention was attended by a number of Forestry inspectors as well as by representatives of various provincial governments and of the lumbering, farming, transportation and commercial interests of the Dominion. The subjects dealt with referred particularly to conditions in the Prairie Provinces. Papers were read as follows:—"Tree Planting on the Prairies, Eastern Section," by Mr. Angus Mackay, Superintendent of the Dominion Experimental Farm at Indian Head; "Tree Planting on the Prairies, Western Section," by Mr. A. Mitchell, Assistant in Tree Planting Division; "Dominion Forest Reserves" by Professor H. D. Ross, Toronto University; "Forest Reserves in Relation to Game Protection", by Mr. J. P. Turner, Secretary of the Manitoba Game Protection Association. Before adjournment resolutions were adopted asking:

- (1) That laws and regulations for the prevention of fire be strictly enforced; that the matter of fire guards be carefully regulated; that patrol of fire ranges be extended to all forest districts, and that railroads through a forested districts, be forced to clear debris.
- (2) The formation of a game protective branch of the association:
- (3) The setting aside of land as game refuge;
- (4) The establishment of forest preserves on water sheds and lands unsuitable for agriculture.
- (5) That the association tender its appreciation of the work being done in tree planting and horticulture by the Canadian Pacific Railway Company at its station grounds in various places and the experiments being made in tree planting in those parts of the west, where it is most needed.

The Timber and Forestry Commission of British Columbia comprising the Hon. J. Fulton, Chairman, Mr. A. C. Blumenfelt, Victoria, and Mr. A. S. Goodeve, M.P., Rossland, B. C., continued its inquiry during September. The objects of the Commission are officially set forth as follows:—"To cause inquiry to be made into and concerning the Timber Resources of the Province, the Preservation of Forests, the Prevention of Forest Fires, the Utilization of Timber Areas, Afforestation, and the Diversification of Tree Growing, and generally all matters connected with the Timber Resources of the Province." The Commission has held sess-

(?) See report of New Westminster, B.C., correspondent.

*See report of Hull and Ottawa correspondents.

ions at the following places:—Victoria, Nanaimo, Vancouver, Seattle, Kamloops, Vernon, Revelstoke, Nelson, Cranbrook, Fernie and Grand Forks. The Commission also attended the meetings of the First National Conservation Congress of the United States held at Seattle, Wash., in August.

Mining.

In the mining industry, the general tendency towards more active trade conditions, noted during August, was continued throughout September. The coal trade of Nova Scotia was still suffering severely from labour disturbances, though outputs were larger than in the preceding month. Elsewhere throughout Canada marked activity prevailed. In New Brunswick the outlook is for a resumption of activity in iron and copper production. In Quebec the asbestos mines were producing steadily, and the mica mining industry of the Ottawa Valley continued to improve. Mining in Hastings and Frontenac counties in Ontario was active. The Cobalt camp was very active; the result of the sale of 349 acres of mining land on the Gillies limit was that sixteen lots brought \$225,004.50. The oil regions of Ontario and Alberta were producing steadily. The coal mines of Alberta and of the Kootenay district of British Columbia were very busy, while those on Vancouver Island were working steadily. Notwithstanding the loss of time occasioned by labour disputes earlier in the season, no scarcity of fuel is anticipated in the prairie provinces during the coming winter. In the metalliferous camps of British Columbia, activity was the prevailing condition, though the supply of labour has overtaken the demand, whereas a month ago experienced miners were scarce. Forces have been steadily increased in the mines and smelters at Rossland and in the Boundary district.

In the last quarterly bulletin of the Canadian Mining Institute, the following table is given, showing the value of the output from the Atlin Mining Division of British Columbia during the decade, 1898-1908.

Year.	Amount
1898.....	\$ 75,000
1899.....	800,000
1900.....	450,000
1901.....	300,000
1902.....	400,000
1903.....	440,000
1904.....	530,000
1905.....	475,000
1906.....	455,000
1907.....	408,000
1908.....	200,000
Total.....	\$4,533,000

The total value of the output of the mines of Ontario for the first six months of the year was \$10,649,923, according to returns made to the Provincial Bureau of Mines.

Manufacturing.

The favourable conditions noted during July and August were continued during September, with a tendency in the direction of further activity and expansion in the industry. Nearly all of the industrial centres of Ontario and Quebec reported increasing activity in manufacturing establishments. The establishments affected by these conditions included carriage and wagon factories, furniture factories, musical instrument factories and especially sash and door factories, in the woodworking branches; agricultural implement, stove and hardware establishments generally and establishments manufacturing builders' hardware and other building material, in the metal working branches; and garment making and hat and cap establishments. Boot and shoe factories were somewhat quiet from seasonal causes having nearly completed fall orders and being engaged in getting spring samples out. Confectionery and cigar factories had a busy month. The unusually high water in the streams assisted establishments dependent on water power. Iron and steel manufacturing plants reported the general trade outlook as exceptionally favourable; the Sydney plants, however, experienced a shortage of coal during September, while the plant at Sault Ste. Marie was closed down for a period for repairs and extensions.

The annual meeting of the Dominion Millers' Association was held at Toronto,

Ont., September 2. About 100 millers were present from different parts of the Dominion. A resolution was passed requesting that terminal elevators at Fort William and Port Arthur, Ont., be placed under Government control. Papers were read on milling in the Prairie Provinces and the artificial bleaching and ageing of flour. Mr. H. L. Rice, St. Mary's Ont., was elected president and Mr. C. B. Watts, Toronto, Secretary.

The Independent Portland Cement Company, Limited, with a capital stock of \$10,000,000, being a merger of cement companies in operation in Western Ontario and drawing their raw material from marl beds, was organized at Toronto, Ont.

The Rhodes Curry Company, Limited, has been incorporated for the purpose of securing the properties and business of the Rhodes Curry and Company, Limited, car builders, Amherst, N.S. The authorized capital of the Company is \$3,000,000.

A merger of cast iron, porcelain and enamel manufacturers was announced.

The commissioners of Queen Victoria Niagara Falls Park gave permission for the construction by the Ontario Power Company of a new pipe of reinforced concrete at an estimated cost of \$1,000,000. The work will give employment to 500 men for at least six months.

Arrangements are being made for the establishment of an electric smelting plant in connection with the Sault Ste. Marie iron and steel industries.

Railway Construction.

With the completion of contracts in New Brunswick, there was a decrease in the amount of employment available on railway construction in that Province. Elsewhere in Canada, the work previously under way was prosecuted with increasing vigour, and at many points, especially in Western Canada, was limited only by the number of employees available. Notwithstanding that the completion of the harvest released large numbers of workmen, additional men for railway construction could have found employment with many of the contractors during the past month at wages considerably

higher than those prevailing in the opening months of the season. Some large forces of bridge builders were engaged for the sections of the Grand Trunk Pacific Railway lying west of Edmonton. Engineering parties representing the Canadian Northern and Grand Trunk Pacific Railway Companies were actively at work locating routes over the summit of the Rocky mountains between the North Thompson and South Fraser rivers; conditions for securing a minimum grade were reported excellent, the altitude at the summit being approximately 2,880 feet.

The last party of engineers engaged on the surveys being made for the Government of Canada, to enable the Government to decide on the feasibility of constructing a railway to Hudson Bay, recently returned to Winnipeg. It was reported that a route had been located from Split Lake to Fort Churchill, a distance of about 200 miles, upon which no serious difficulties in the way of construction would be encountered.

The Canadian Northern Railway Company had a large construction gang at work in the vicinity of Ottawa. The projected line between Toronto and Ottawa is estimated to cost in the neighbourhood of \$10,000,000. Tenders were called for the first section of the line during September. Communication between Ottawa, Montreal and Quebec will be established as rapidly as the steel can be laid.

The last section of the Michigan Central Railway tunnel has been paid at Windsor, Ont., and a reduction of the force of men employed on the work has been made. It is expected that the tunnel will be ready for use in January, 1910.

General Transport.

The feature of the month, among transportation employees, was the beginning of the movement of the 1909 western crop. The movement began somewhat earlier than last year and the volume of the traffic up to the close of the month was estimated to have been nearly double that of the corresponding period of 1908. It was stated also that fifty per cent. of the grain graded better than last year.

The supply of cars was larger than ever before, and the extension of lines throughout the Western provinces is proving an important factor in assisting the movement. The outlook at the close of the month was that the crop, notwithstanding its increased volume, would be handled more expeditiously than in any previous year.

There was an active demand for grain carriers at the head of the lakes. The following is a statement showing shipments of grain from Fort William and Port Arthur during September, compared with the corresponding period of 1908:

Destination.	Wheat.	Oats.	Barley.	Flax.
26 Buffalo.....	1,104,047—40			
56 Chicago.....	56,988—30	Segs.

Another feature of the past few weeks has been the exceptionally heavy passenger traffic reported by the various railway companies. As a result, Canadian railway earnings have recently showed very considerable increases, as compared with the earnings during the corresponding period of previous years. For the third week of September Canadian Pacific Railway traffic earnings were \$1,885,000 and Grand Trunk earnings \$933,213, an increase of \$414,000 and \$78,021 over the same week of 1908, respectively.

The sixth general meeting of the directors and shareholders of the Grand Trunk Pacific Railway, Company was held at Toronto, Ont.

The tri-weekly passenger train service of the Grand Trunk Pacific Railway which was previously operated only as far west from Winnipeg as Scott, Sask., has been extended to Wainwright, Alta., 100 miles further west.

Railway car shops reported a considerable increase in activity during September.

A number of steamboat men, engaged in passenger traffic, were laid off for the season in the closing weeks of the month. Owing to cool weather in the early part of the summer, the gross earnings of com-

panies engaged in this traffic have been lower than last year. Longshoremen and ship labourers, however, remained active.

Recent returns of port revenues, at Montreal, show an increase; import and export trade at this port have shewn a falling off, but local inland traffic has shewn a large increase.

Traffic through the Sault Ste. Marie canals during August was as follows:—

	U.S. Canal.	Canada Canals.	Total.
Vessel passages No....	1,893	1,008	2,901
Registered Tonnage..			
Net... 4,128,687	2,942,614	7,071,301

West Bound, Net tons	1,330,509	529,804	1,860,313
Total Frgt., Net tons.	3,978,755	5,009,468	8,988,223

Street railway companies reported a busy month.

The Board of Railway Commissioners recently passed its first order under the legislation of last session, establishing a railway level crossing fund. The crossing in question was at Renfrew, Ont. (*). By an order of the Board, dated September 14, Canadian railway companies

*For a review of this legislation see the *Labour Gazette* for June, 1909, page 1,339.

must equip, before April 1, 1910, all freight vans with coupler-operating levers and the cupolas of its cabooses with air gauges and air-controlling valves.

It is expected that the coming winter season will be a very busy one at the Port of St. John, N.B.; about 130 sailings of steamships in the Trans-Atlantic trade have been arranged for.

The Trades.

Building.—Nothing has occurred to check the pronounced activity reported during the two preceding months. In nearly all the larger centres, the amount of buildings contracted for is already in excess of the total for the entire season of 1908. Employees in the several branches had a very active month; for carpenters and other inside workers there was a demand for additional men in some localities. The outlook is for a busy autumn season and for favourable conditions of indoor employment during the winter months.

Metal and woodworking.—Iron workers, moulders, machinists, engineers and woodworkers in industrial establishments had an active month, with promise of steady employment for some time. Coopers were very busy on fruit barrels and boxes.

Printing.—The allied trades were generally well employed.

Clothing.—Journeymen tailors were becoming busy on fall orders. Employees of garment-making establishments of all kinds, had an active month, though boot and shoe workers were only fairly well employed.

Textile.—Textile employees were becoming more active.

Food and tobacco preparation.—Bakers were more active, following the end of the holiday season. Confectionery establishments were very busy. Cigar-makers had a good month and tobacco workers were active; the trade in the cheaper line of cigars has been curtailed by the passing of local option by-laws in several districts of Ontario.

Leather.—Tanners and curriers were still somewhat quiet, but leather workers were generally well employed.

Miscellaneous.—With the falling off in tourist traffic, hotel and restaurant employees were correspondingly affected. Retail clerks, barbers and laundry workers had a good month.

Unskilled labour.—The month was a busy one for common labour, though the completion of harvesting released large numbers of men for other employment. There was an increasing demand in the railway construction camps and in connection with the extensive civic improvement work in progress. The recruiting of crews for the lumber camps also affected the general labour market over a considerable area. In most of the cities, the labour supply was completely absorbed and in Western Canada additional men were required.

Canadian Trade and Revenue.

Foreign trade.—During August, 1909, the total value of imports entered for consumption was \$30,605,360, compared with \$23,656,147, in August 1909. For the first five months of the fiscal year ending August 31st, 1909, the total value of imports entered for consumption was \$142,753,993 compared with \$115,544,348, in the corresponding period of last year. The total value of domestic exports during August, 1909, was \$23,537,330, compared with \$22,910,611, in August, 1908. The total value of domestic exports during the first five months of the fiscal year ending August 31, 1909, was \$96,935,925 compared with \$90,115,621 in the corresponding period of last year. During August, there was an increase in exports of products of the mine, the forest and a decrease in exports of products of animals and their produce, agriculture and manufactures. The grand total of Canadian trade for August, 1909, was \$55,869,031, compared with \$48,107,059, in August, 1908. For the first five months of the present fiscal year, total Canadian trade was \$247,788,335, as against \$211,658,083, in the same period of 1908.

A demand for rubber goods was reported from Paraguay; for wheat and flour from Japan, for wood pulp from Sweden and Norway, for agricultural implements from Russia, and for smallwares from Mexico.

Imperial trade.—Favourable markets for Canadian goods were reported by agents of the Department of Trade and Commerce in Great Britain and the various dominions of the Empire as follows: Great Britain: flour, hay, wood rims, washboards and maple flooring; South Africa: wheat, flour, canned goods and condensed milk; Australasia: calcium carbide, butter and cheese; West Indies: flour, fresh meat, biscuits and soap; India: agricultural machinery; Newfoundland: agricultural and other machinery, furniture and cement.

Domestic trade.—The movement of general trade was of a satisfactory nature and manufacturers and wholesalers reported excellent prospects for the continuation of good business. Dry-goods lines held firm, and good orders for spring were coming forward. Grocers reported a good normal trade. The hardware trade had a good tone. Remittances from the country showed an improvement, and the volume of goods moving is expected to increase as the proceeds from the 1909 crop reach the producers' hands.

Thirty-four new branch banks were opened and six closed during August, the largest monthly increase recorded in Canada. Bank clearings continued to show heavy increases compared with the corresponding period of 1908. There was an abundant supply of currency available for the crop movement.

Notes.

A *Board of Trade* was organized at Bowmanville, Ont.

The thirteenth annual convention of the *League of American Municipalities* was held at Montreal, Que.

The National Association of *Master Plumbers* of Canada held its annual convention at Montreal, Sept. 16 and 17.

The sixth annual convention of the Alberta and Eastern British Columbia *Press Association* met at Edmonton, Alta., September 9 and 10.

Mr. John Kenny has been appointed *Factory Inspector* for the Province of New Brunswick in the place of Mr. John McMulkin.

The fire chiefs of Ontario, met at Toronto during September and organized the *Provincial Fire Chiefs' Association of Ontario*. The object is for mutual benefit in the cause of fire-fighting. The meeting elected W. B. Ten Eyck of Hamilton president, and W. A. Howard, Peterboro, secretary-treasurer.

Under date of September 23, the Hon. Adam Beck, chairman of the *Hydro-Electric Commission* addressed a letter to the mayors of the thirteen towns which have signed contracts with the Commission, suggesting a meeting at Toronto for the purpose of discussing the scheme as a whole and the needs of each municipality in relation thereto, with a view to securing complete co-operation and a standardization of specifications.

An international commission composed of seven representatives from the United States and five from Canada under the chairmanship of Dr. J. G. Rutherford, Live Stock Commissioner and Veterinary Dictator General for Canada, has been established, to consider means for securing the control and eradication of *bovine tuberculosis* in Canada and the United States. The commission, which will co-operate with the government of each country, is the outcome of a suggestion made at the annual meeting of the American Veterinary Association in Chicago recently.

By an order-in-council of the Alberta government, a change has been made in the method by which *liquor licenses* are to be granted in this province. Hitherto there have been twelve boards of license commissioners with jurisdiction over the same number of districts. These boards are to be superceded by a central license board, composed of three commissioners, who will adjudicate on applicants for licenses throughout the province. The Board will direct the regulation of the liquor laws in the province and will deal with all questions regarding the license system of controlling the liquor traffic.

The *Ontario Municipal Association* held its annual meeting in Toronto, September 1-2, some 40 municipalities being represented. Resolutions were

passed urging the Legislature to give municipalities power to elect that their affairs be conducted by a commission appointed by the people for three years and capable of initiating legislation for the people. Certain amendments of the Registry Act and the Municipal Act were also requested. Mr. Geo. Geddes, Mayor of St. Thomas, Ont., was elected president and Mr. M. W. McKay, clerk of the County of Elgin, St. Thomas, secretary-treasurer.

The *Union of Nova Scotia Municipalities* held a meeting at Yarmouth, N.S., on September 2. Resolutions were adopted recommending that the vote of ratepayers in incorporated towns on extraordinary expenditures should be by ballot, and that suggestions as to improvements in the administration of justice should be referred to the incoming executive. The meeting also recommended that municipalities be given full control over the taxation of peddlers within their limits. A number of interesting papers were read. Mr. A. E. McMahon, Kings' County, was elected president and Mr. A. Roberts, Bridgewater, N.S., secretary.

The fifth annual convention of the Dominion Board of the *Retail Merchants' Association of Canada* opened at Montreal, September 28. Among the resolutions passed was one deprecating restrictions on the admittance into Canada of any person able and willing to work, except those of unsound mind, diseased body or criminals. The *British Columbia Retail Grocers' Association* held its annual meeting at Victoria B. C.

The *Ontario Postmasters' Association* held its annual convention at Toronto. The membership now exceeds 1,300 and the finances are in a healthy condition.

The *Victoria Rochdale Co-operative Association* organized at Victoria, B.C., in 1905, has recently gone out of business. The failure of the association is attributed to lack of capital and lack of support by members. The conducting of the business on a cash basis also proved difficult.

The New Brunswick, Prince Edward Island, and Nova Scotia Press Associations decided to amalgamate and on September 10th., met at Amherst and

formed the *Maritime Press Association* with the following officers:—

J. R. COFFIN, *President*.

C. McDONALD, *Vice-President* for Nova Scotia.

J. L. STEWART, *Vice-President*, for New Brunswick.

J. McISAAC, *Vice-President*, for Prince Edward Island.

FRED E. COX, *Secretary-Treasurer*.

A Commission, consisting of Judge Locke of Morden, Man., (chairman), Alexander Puttee and T. R. Deacon, was appointed by the Government of Manitoba during the opening days of September to enquire unto the operation of the *Workmen's Compensation Act* of that Province. During the 1909 session of the Manitoba legislature, new legislation on the subject was introduced but final action was not taken, with the understanding that the matter would be referred to a commission to make a full investigation and report.

On Aug. 24-26 the first annual session of the *Canadian Brotherhood of Railway Employees* was held in the City of Moncton with about fifty delegates present. Many important resolutions effecting amendments and alterations in the constitution of the order and perfecting the organization were adopted and the following officers were elected:

Grand President, A. R. MOSHER, Halifax.

Grand Vice-President, G. N. PALMER, Moncton.

Grand Sec'y-Treasurer, M. M. McLEAN, Halifax.

Vice-President for Quebec, J. A. LAMMTUQUE.

Vice-President for New Brunswick, S. C. ALWARD.

Vice-President for Nova Scotia, N. MCKINNON.

Vice-President for P. E. Island, G. A. ROBERTSON.

The Brotherhood was organized October, 1908, with a membership of 500. It has now over 2,000 members enrolled and includes divisions along the entire route of the I.C.R. The order was duly registered and incorporated under the Trade Union Act, Canada, July 7, 1909.

The Honourable Dr. Pyne, Minister of Education for Ontario, has despatched Dr. John Seath, Superintendent of Education, to Europe for the purpose of enquiring into *technical education* there. He will visit several countries, especially Germany, with a view to seeing how far it is possible to bring the different kinds of technical training to public school children in Ontario, so that the masses of the people may be reached by this kind of instruction. Some years ago, Dr. Seath reported upon the technical schools of

the United States and his knowledge of the school system of Ontario is extensive. He is to report to the Government on the results of his mission.

The fourth annual convention of the *Union of Municipalities of Saskatchewan* met at Regina with ex-mayor Begne, of Moose Jaw, president in the chair. The proceedings were opened by the Lieutenant-governor of the Province. Among subjects discussed were, water filtration, sewage disposal and the milk supply. Resolutions were passed relating to hospital fees, assessment, qualification of voters and contributing \$50 to the Union of Canadian Municipalities. Officers were elected as follows: President, Mayor Hopkins, Saskatoon; vice-president, J. M. Clarke, Yorkton; secretary-treasurer, J. Kelso Hunter, Regina.

The *Canadian Independent Telephone Association* held its third annual convention, at Toronto, Ont., September 7-8. The following resolutions were carried: That no member of the association should arrange any interchange of service over the lines of the Bell Telephone Company; that a committee should be appointed to watch legislation; and that efforts should be made to bring about Provincial Government ownership of all long-distance telephone lines. Officers were elected as follows:—President, Dr. W. Doan, Harrietsville; Vice-President, Mr. C. Skinner, Sherbrooke, Que.; Secretary-Treasurer (temporarily), Mr. F. Page Wilson, Toronto; Executive Committee, Messrs. F. Dagger, Toronto; Dr. Demers, Levis, Que.; G. W. Jones, Clark, Ont.; T. W. Ralph, North Augusta; A. Hoover, Green River; S. L. Squires, Waterford; M. House, Bridgeburg; Levi Moyer, Beamsville, and T. R. Mayberry, M.P.P., Ingersoll.

The annual meeting of the I.C.R. Employees' Relief and Insurance Association will be held in Moncton on October 13th. The twentieth annual report of the association, given out in anticipation of the meeting, shows total receipts for the year from all sources of \$66,-861.62. Adding the credit balance on the 30th June, 1908, \$16,343.14, the total receipts were \$83,204.76; the total expenditures were \$65,583.02, leaving a

credit balance of \$17,621.74, less estimated outstanding liabilities \$4,000; leaving a net surplus, 30th June, 1909, of \$13,621.74. The expenditures in the Sick and Accident Fund are shown to have been about \$2,000 less than last year. The expenditures in the Temporary Employees' Accident Fund, have exceeded its income by \$1,915.10 and the surplus is now reduced to \$8,084.90. The statement of the Death and Total Disability Fund shows that fifty-five death and total disability claims were assessed and paid during the year; forty-one death claims due to natural causes, aggregating \$18,000; six death claims due to accidental injuries, aggregating \$1,250; total \$19,250; eight total disability claims, aggregating \$2,500; total \$21,750. The amount paid last year from this fund was \$29,500. The statements showing the amount credited to the Intercolonial Railway Employees' Relief and Insurance Association, by the Intercolonial Railway, during the year ended 30th June, 1909, gives the amount of premiums collected from the railway pay rolls as \$54,017.43; premiums collected from railway vouchers \$328.83; annual contribution from the Intercolonial Railway \$8,000; railway fines, \$1,405.12; cash premiums, \$46.76; total \$63,798.14.

The first issue of *The Canadian Co-operator*, "a Magazine of Social and Economic Progress," was published during September. The magazine, which is to appear monthly, is intended to serve the interests of the co-operative movement in Canada, and is issued under the immediate auspices of the Co-operative Union of Canada. A circulation has been organized among the societies constituting the union of 3,250 in Ontario, 1,250 in Nova Scotia, 1,000 in British Columbia, and 250 in Quebec. The subscription price is 50 cents per annum. The journal being published for propaganda purposes and not for profit, and the business and editorial management being given gratis, supplies in bulk will be furnished at the cost of printing to persons engaged in the formation of co-operative societies on the principles defined by the union. The opening issue contains a very interesting series of notes and comments on topics

of interest to co-operators in Canada, chiefly with reference to disabilities of legislation, together with articles on the Co-operative Movement in Canada, the Co-operative Bill of 1907, and the Canadian Farmer and the Co-operative Store, ending with a comprehensive résumé of business statements recently issued by various co-operative concerns in Canada. The magazine should prove of very practical assistance to the cause it is designed to demonstrate and promote.

His Majesty the King has been pleased, during September, to approve of the appointment of the Right Honourable Lord Balfour of Burleigh, K.T., the Honourable William Stevens Fielding, Minister of Finance, and the Honourable William Paterson, Minister of Customs, in the

Dominion of Canada, Sir John Poynder Dickson Poynder, Bart., D.S.O., M.P., and Sir Daniel Morris, K.C.M.G., D.C.L., D.Sc., to be Commissioners to investigate and report upon the measures that may be taken for the promotion of closer trade relations and for the development of mutual trading facilities between the Dominion of Canada and the British West Indian Colonies. His Majesty has also been pleased to approve of the appointment of Mr. H. R. Cowell, of the Colonial Office, to be secretary to the Commission. The Commission convened for the taking of evidence and held several days' sittings at Toronto, Ont., during September. Later, the Commission removed to Halifax, N. S.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

LABOUR conditions were less active in September than in August. This was owing largely to the effect of the coal miners' strike on the steel industry of Sydney, and the allied trades of the Glace Bay districts. The coal output increased during the month in the Dominion and Inverness collieries. Prospects for a busy winter in the coal trade are favourable. Besides shipping, the larger collieries will place exceptional quantities in the coal heaps.

The Nova Scotia Coal Company was very busy in September, and outputs in both the steel and coal departments were large.

The Sydney steel works, owing to the lack of a steady supply of coal, were considerably affected. Nearly all departments suffered, and a number of men were temporarily thrown idle. Supplies of coal have been brought in from the United States, but it is stated that the price per ton is too high to warrant profits. The improvement in the output of

the Dominion collieries will soon relieve the steel works.

At Inverness colliery, the mine is producing its normal output.

The electric tramway was effected by the strike in the Glace Bay district, and its returns were much lower than in September a year ago.

The factories and other works at Sydney have been affected by the strike only to the extent of their trade in the mining districts.

The building trades, apart from Sydney where there are twenty-six buildings going up, have not been brisk.

Transportation by water and rail was fairly active.

Wholesale and retail trade in Sydney was normal.

The fisheries were quiet. Farmers were busy getting in the grain and root crops. Skilled labour generally was active. Unskilled labour was abundant.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market continued good, the collieries and

other industries working full time with a favourable outlook. The shipments from the coal mines show an increase over the corresponding month of 1908. The Acadia Coal Company shows an increase of about 3,000 tons, and the Intercolonial Coal Company a slight increase. The slack coal that had been accumulating of late, on the banks at the different collieries, is at the present time being loaded into cars for shipment.

Activity prevailed in the other industries, and general trade was reported very good.

The workmen at the different collieries here were working steadily.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busily engaged garnering a bountiful grain crop. The root crop throughout the county looks very well.

Lumbering.—Business has been quiet, but lumbermen expect a busy time this winter. Press reports state that there has been 20,000,000 feet of lumber shipped from Pugwash and vicinity this year.

Manufacturing.—This industry has been very active.

Mining.—The mining industry continued steady, most men working full time. Shipments for August from this county were about 47,000 tons. The strike still continues at Spring Hill, and there are some men still out on strike at Inverness, C.B., chiefly Belgians.

CONDITION OF PARTICULAR TRADES.

The skilled trades were generally well employed. Unskilled labour in Westville was active, but in other districts the coal miners' strike has flooded the labour market with idle workmen.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month has been

fair, though as the month advanced a falling off was indicated. Operations in many lines were of the finishing order, while the opening up of new work was below the average. The children's hospital and the Sacred Heart convent addition were both advanced several stages, while the Technical-college and round-house are both ready for occupation. The post office repairs and the construction of the new cathedral made good progress, as did the work on the new school house. Work along the waterfront has been fully up to the September average; there have been fair shipments of deals and miscellaneous cargoes, while shippers of fruits, particularly apples, anticipate some large exportations during the remaining three months of 1909. With the advent of fortnightly boats, a good average for 1910 is anticipated.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were fully up to the average. Large cheeses sold at 12½c.; twins at 13 to 13½c.; and eggs at 21 to 22c. The amount of cheese received so far this season is 51,000 boxes in excess of 1908, for a similar period. In meats, fore quarters of beef sold at 6 to 8c.; hind quarters at 9 to 11c.; lamb at 8 to 10c.; pork at 9 to 11c.; veal at 7c.; turkey at 15 to 17c.; geese, each, at 75c. to \$1; ducks at 50c. to \$1 each. In fruits, N.S. apples were \$1.50 to \$3.50; pears, California, boxes, \$5; grapes, Malaga, \$2.50; peaches, California, \$2.50 to \$3 basket. Vegetables were: N.S. potatoes, \$1.20 per barrel; turnips, \$1.25 per bag. All of the above prices are wholesale.

Fishing.—The local fishermen made but small catches. At times small quantities of herring were taken. The month was a dull one.

Manufacturing was fair, and other lines about normal.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and carpenters had a fair month. Painters and decorators reported a falling off from August. Plumbers and gasfitters had a fair month.

Stonecutters had a much better month than August, but were not up to the average. Builders' labourers were fairly active. Iron moulders were fairly well employed. Machinists, engineers and boilermakers were dull. Electrical workers reported an improvement. Shipwrights and caulkers were dull. Printers, pressmen and bookbinders had a fair month. Tailors experienced dullness early in the month, but an improvement was indicated towards the end. Barbers were busy. Butchers and meat cutters were well employed. Carmen, maintenance and way employees and freight clerks were fairly busy. Street railway men were very busy. Unskilled labour was fairly active, with other lines normal.

DISTRICT NOTES.

Lunenburg.—The fishing season ended for the most part about the middle of September. Up to that date, 84 vessels had reported at the Custom House. The average catch per vessel was 1,486 quintals, a total of 124,875 quintals for the season. This catch was supplemented, on the 24th September, by the schooner *Alexandra*, which arrived with 1,500 as a result of four weeks' fishing. This was this vessel's third trip, the total catch being 4,300 quintals, probably the largest catch ever made by any one vessel in Nova Scotia.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

In an industrial centre of this kind it is not always easy in a general way to describe actual labour conditions. The town has half a dozen large manufacturing concerns, all of which report conditions improved when compared with the past two years. The Rhodes Curry Co., however, is the largest industry usually employing about 1,200 men, and lack of orders has compelled it to reduce staffs to about 300. Some of the younger men thrown out of em-

ployment, went west, others were absorbed by the other manufacturing plants and many are idle without prospect of work. With this exception general labour conditions are steadily improving. The Malleable Iron Company, which has been closed for nearly two years, opened this month with a few hands, but before winter, expects to augment the working staff. The Oxford Worsted Company decided to move its plant to Amherst this month. The capital is being increased. A building has been secured and before the middle of October it will be in operation here. Cheap electric power is one of the incentives that led to the change. A milling company was organized this month with a capital of \$25,000, and is preparing to build at once. These are all indicative of a change for the better. The Amherst Foundry Company merged its interests with the Standard Ideal Company of Port Hope, Ontario. The capital of the new concern is to be increased. The strike at Springhill continues, but the best of order prevails. In the six weeks of the strike there has not been a single arrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay and grain crops have been harvested in splendid shape, with more than an average yield. Prices continue good and the farmers are well satisfied with the season. Root crops also are promising.

Lumbering.—Lumbering continued very active. The market is good. Heavy shipments are being made and extensive preparations for a big cut this winter. Many transfers of valuable properties have been made, and there will be a demand for experienced wood choppers.

Manufacturing.—Manufacturing continued fairly active. There is a marked improvement over last fall. The woollen mills, the shoe factory and all the other industries report conditions better than last year.

Mining.—Conditions at Springhill remained the same. The strike is still on with no word of a settlement. The other collieries have been more than ac-

tive. The outputs are increasing and everything points to a good winter. The Maritime Railway, Coal and Power Company has installed an endless haulage system at the Joggins mine, and when this gets into proper operation expects to increase the output from 500 to 1,000 tons per day.

CONDITION OF PARTICULAR TRADES.

Locally there was little employment for bricklayers and masons, but outside contracts have absorbed workmen of this class, those remaining being employed at small jobs. Carpenters and joiners were only fairly well employed. Lathers and plasterers, painters and decorators were fairly well employed. Plumbers busy and stonecutters had little employment.

Moulders in some of the shops were very busy. In others they were dull. Machinists and engineers reported a general improvement. Boilermakers were busy.

Woodworkers were fairly active. Nearly all car builders were out of employment, with little prospect of work for some months. Carriage builders were busy.

Printers reported a fairly active month.

Journeyman tailors were busy, and boot and shoe makers very active.

Bakers and confectioners were very busy.

Trunk and bag makers and furriers were busy.

Laundry workers were well employed.

Unskilled labour was only fairly well employed. The supply fully met the demand.

DISTRICT NOTES.

The Maritime Coal, Railway and Power Company, which has an electric power station at the mouth of its pit at Chignecto, is duplicating its power limit, and is erecting power and lighting wires to transmit the power and light to the Joggins mines and river Hebert, a distance of sixteen miles. The machinery of the Joggins mines will be run by the transmitted power, and the farmers in the intervening district will light their houses largely by electric light.

CHARLOTTETOWN, P. E. I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during September differed little from that of August, the weather being fine for outdoor work the greater part of the month. The harvest was saved in good condition, and shipping of some of the earlier products had begun. The annual Agricultural Exhibition, held from the 21st to the 24th inclusive, was favored with fine weather, making a busy and profitable week for the merchants and hotel keepers. The good crops gave an optimistic tone to business, and collections were reported good. In wholesale and retail trade there was little ground for complaint.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of the month found harvesting completed in almost every section of the province, with the crop, on the whole, better than the average.

Fishing.—Since the close of the lobster season, in July, a number of the fishermen have been engaged in cod fishing and other branches of the industry. The oyster season which opens on October 1st, will furnish a source of employment to a large number of men.

Mining.—Boring for coal, oil and gas, which has been carried on near Wood Islands during the summer, has been completed without any indication of mineral being met with. The boring plant will be transferred to Miminigash in the western part of the island.

Railroad Construction and Employment.—The construction of the new engine house for the railway in Charlottetown, and the work at the new freight shed on the wharf, were sources of continuous employment for a large force of men.

CONDITION OF PARTICULAR TRADES.

There was a fair demand for unskilled labour. The skilled trades were all active.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in general was fairly well employed throughout September. Conditions during the past summer have differed very materially from those of the two preceding seasons. The heavy capital expenditure entailed by the construction of the I. C. R. shops, the building of the National Transcontinental Railway and the extensive double tracking operations of the I. C. R., employing for a lengthened time over 1,000 mechanics and labourers, created an abnormal state of affairs in labour and commercial circles. During the past season, there has been a return to normal conditions. The policy of retrenchment on the I. C. R., also had a quieting effect upon labour and trade. Despite these changed conditions, wages in nearly all lines have been firm, and merchants and manufacturers report a fairly prosperous season. Transient labour has departed, and the local supply and demand seem fairly well balanced with but few instances of unemployed. The building trades have been especially active, and the amount of building is in excess of any previous season. Eighty-six permits within the city have been issued, valued at \$215,000, while in outlying suburbs forty new dwellings have been constructed. As a consequence, rents are weakening and houses to let are more available. This particularly affects the \$15 to \$25 per month class. There is still a dearth of houses at \$10 to \$14 per month. Manufacturers report an active month and with a good outlook. The Record Foundry Company have been advertising for moulders. A branch of the Provincial Bank of Canada was opened on September 1st. Customs returns for August, showed a slight decrease from those of last year. The Moncton-Buctouche Railway discontinued its double summer service on the 7th instant.

Upon the I. C. R. the winter time table which shows few changes, comes into effect October 17th. On September 7th, The Fredericton Herald, a semi-weekly paper, ceased publication. The closing of several night telegraph offices on the northern and eastern divisions of the I. C. R., reduced in rank a number of operators. Reductions on the permanent staff of the mechanical department of the I. C. R., to the number of about 50, made in July leaves the total of permanent employees in that department at 925, with about 100 on the transient staff. It is understood that no further reductions are contemplated. Wholesale and retail trade have both been satisfactory. Real estate is firm but quiet. No material changes in hours of labour or rates of wages were noted, and no unrest among employees.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were active harvesting and haying, both of which are well advanced. The grain crop is considerably above that of last year, and hay is average. Potato digging has commenced, with the yield not up to expectations, rot being reported from various parts of the province. A second western harvest excursion, September 10th, carried about 740 persons from the Maritime provinces, a number much below that of last season. Farm and domestic help are both scarce. Several immigrants of these classes brought out under the auspices of the Provincial Government Immigration Department, readily secured places. Potatoes sold at \$1.00 per bbl.; oats, 55c. per bus.; butter, dairy, 25c.; and creamery, 27c. per lb.; eggs, 24c. per doz.

Lumbering.—Many shipments of lumber were made from North Shore ports during the month. The Furness liner *Appenine*, which cleared from Dalhousie alone carrying over four million feet. The Adam Burns Mills at Bathurst, with about 400 square miles of timber limits, have been sold to the Nepisiguit Lumber Company. The Swedish Canadian Lumber Company, Ltd., has purchased the McLeod mills and Vaughan limits of about 93 square miles in Kent county for

\$50,000, and will manufacture lumber for the French and German markets.

Manufacturing.—Incorporation is being asked for by the New Brunswick Tar and Turpentine Company, with a capital of \$1,000,000, for the erection of a plant for the extraction of tar, turpentine, creosote and alcohol from pine stumps and tree tops. A considerable testing plant has been in operation at Doaktown during the summer, and results have been reported satisfactory.

Mining.—The Maritime Oil Fields Company, operating near Hillsboro at a depth of 1,000 feet struck a large deposit of natural gas. A second well in the same locality showed the field to be an extensive one. The Canada Antimony Company, operating at Lake George, York county, exposed a vein on the second level carrying 50% of antimony. Work is being actively prosecuted, 60 men being employed on day and night shifts. The Maritime Exploration Company has sold its copper mine at Dorchester to a New York syndicate, which will erect an extensive and modern plant. The silicia deposits at Mechanic lake are also being developed and shipments made to New York, where the silicia is used in concrete work.

Railroad Construction.—The estimated expenditure on the National Transcontinental Railway in New Brunswick for the month of August amounted to \$515,768, a falling off of 25% as compared with July. This is owing to the advanced stages of the different contracts. The Rigby-Hyland contract of 12 miles west from McGivney's Jet., is completed. On the International Railway eight more miles remain to be completed, and trains are expected to run over this line by October 31st. The terminus work at Campbellton is being pushed and a new station, car shed, roundhouse and turntable are in course of construction. Track laying on the Bathurst Drummond line is well advanced. On the Intercolonial Railway work has been confined chiefly to roadbed repair work.

CONDITION OF PARTICULAR TRADES.

Activity in the building trades continued. Carpenters were busy at wages

of \$1.75, for ordinary, to \$2.50, for skilled men and foremen. Masons and bricklayers were active, with wages \$3.00 to \$3.50. Plumbers were active, and builders' labourers were in good demand.

Iron moulders were in demand. Electrical workers and linemen were active. Machinists, blacksmiths and horseshoers were busy.

Fairly active conditions prevailed in the woodworking trades.

Printers, pressmen and bookbinders had a fairly active month.

Active conditions prevailed in all the clothing trades.

In the food and tobacco preparation branches active conditions prevailed.

Shoemakers and harnessmakers were busy.

Barbers were busy, as were hotel, restaurant and theatre employees and laundry workers.

Passenger traffic throughout the month was heavy, and freight traffic average. There was a fair demand for train crews.

For unskilled labour, the local supply and demand was fairly well balanced, and few idle men were found. The large number of transients here last season have left and the supply is now dependent upon local sources. Wages range from \$1.50 to \$1.60 per day.

DISTRICT NOTES.

Sackville manufacturers reported the volume of work and commerce in excess of that of last season. The building trades were particularly active, over \$100,000 worth of buildings being in course of construction here.

Shediac.—Considerable building is in progress and shipping is active. An electric light system is being installed.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active, although some of the trades reported business dull, notably painters. The city

treasurer paid out the sum of \$9,112.74 to civic employees for the four weeks ending September 20, as follows: Police, \$2,728.75; officials, \$2,311.58; market, \$200.80; fire and salvage corps \$1,849.99; public works, \$2,021.62. The deposits in the Government Savings' Bank during August amounted to \$50,359.83, and the withdrawals were \$53,999.44. Bank clearings for the four weeks ending September 23 were \$5,653,884, and for the corresponding period of last year \$5,559,449, being \$94,435 greater in 1909 than in 1908, and \$1,499,739 less than for the five weeks ending August 26 of the current year. Messrs. Haley Bros. have been shipping large quantities of dry lumber to the West Indies, and 5,000 barrels of potatoes were shipped from Carleton County to Cuba.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The recent heavy rains have done considerable damage to crops throughout the province.

Mining.—The Westmoreland mine at Dorchester, one of the richest copper mines in the province, has been sold to L. Vagelstein & Co., of New York, and development work on a more vigorous scale is anticipated.

Railroad construction.—Messrs Rigby and Hyland have completed their contract for twelve miles of construction work on the National Transcontinental, west of McGivney's Junction, and have shipped their horses and machinery to Winnipeg, where they have another contract for construction.

CONDITION OF PARTICULAR TRADES.

The building, metal and woodworking trades were from active to busy, with the exception of painters who were dull. The printing, clothing and food and tobacco preparation branches had a very good month. Railway employees and other transportation branches were busy, but ship labourers were somewhat inactive. Unskilled labour was quiet.

DISTRICT NOTES.

Hartland.—A company has been formed for the purpose of making con-

crete building blocks, tile and culverts. The company is applying for incorporation, and will be known as the Hartland Concrete Block Company, Limited.

Sackville.—The A. E. Wry Company, Limited, recently organized for the manufacture of boots, shoes, and harness, has let a contract for a large brick building to contain workshops, store rooms, offices, etc.

St. Stephen.—Ganong Brothers are preparing for the erection of a large brick addition to their confectionery factory, and the St. Croix Soap Manufacturing Company intends to build a large addition to its soap factory. The latter company has petitioned the town council for an assessment valuation for twenty years.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been active, the mills all running full time and there being considerable work in other branches. The Drummond Mining Company has a number of men and horses employed building a branch line from the I.C.R. to the docks in Newcastle when the ore will be shipped. Surveys are being made of the river so as to have the shoals dredged in order that large steamers may come to the docks at low tide. There have been no strikes or disputes of any kind.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops are about all harvested. Wheat and oats are good yields, and farmers are busy threshing. The yield is considerable, being ahead of last year. The potato crop, while good, is not quite what was expected. The potatoes are large, but not numerous. Turnips are looking well. Some fall ploughing is being done.

Lumbering.—Lumbermen are now preparing for the winter. The horses

are nearly all in the woods and the men are going in.

CONDITION OF PARTICULAR TRADES.

The building trades have been brisk; a number of new buildings are in course of erection, and repairs on the Presbyterian Church are now complete.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and E. Little, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions were favourable for labour during September. The building trades were more active than in any previous month of the year, though principally on repairs and extensions. A feature of the month was the holding of the annual meeting of the Trades and Labour Congress of Canada, which was attended by over 120 delegates.* A railway car service was recently inaugurated by the Quebec and Levis Ferry Company. Over 400 cars have been handled since the beginning of the service. The company has recently purchased and has refitted a floating dock.

Several moving picture theatres were fined \$40 in the Court of Sessions for violation of the Sunday Observance by-law. A number of coal miners arrived from Great Britain en route for Sydney, N.S.

An additional foundation crib for the breakwater was sunk on September 9.

A dispute has arisen between the fish merchants and fishermen near Gaspé, the latter claiming that prices have been depressed by the former, while exorbitant prices are charged for supplies. Rioting occurred at Fox River during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are taking off exceptionally good crops. Potatoes have been plentiful selling at 45-50 cents

*A detailed report of the proceedings of this meeting is published as a special article elsewhere in the present issue.

per bag. Weather conditions were favourable.

Lumbering.—Some small gangs were sent into the camps. Wages were upward in tendency.

CONDITION OF PARTICULAR TRADES.

In the building trades most branches were active, though lathers, plasterers and painters were quiet. The metal trades were active with the exception of boilermakers and shipbuilders who were dull. In the woodworking, printing and food and tobacco preparation branches activity prevailed. Journeymen tailors and garment workers were also active, but boot and shoe workers were quiet, as were also tanners and curriers. Hotel, restaurant and theatre employees continued active with laundry workers busy. Railway employees were active, but a number of steamboatmen were laid off. Ship labourers and longshoremen were quiet. Unskilled labour was in excess of the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during the month and indications are that it will continue so for some time. All the industries were running full time. In the machine shops, the outlook is brighter, and it is expected that there will be no short time this winter as there was last. Work is still being rushed in connection with the C.P.R. Company's extensions. There are about 150 labourers engaged in making a new yard, besides those engaged on the new buildings. A large new hotel has been started near the site of the new C.P.R. station.

Wholesale and retail trade was active. The travellers of the garment establishment report good business in the Maritime Provinces and in the West.

A proposition has been laid before the city by the Street Railway Company. The

latter has not enough power, and as it is intended to extend the system by about eight miles, the company wants to secure the power belonging to the city at Westbury, and to hand over 1,000 horse power at \$15.00.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have finished harvesting and report a very good crop of grain. Potatoes are also a good yield. Many farmers are selling stock owing to the shortage of the hay crop. While they are selling milch cows at a low figure those owning beef cattle are getting good prices. The price of creamery butter is steadily rising. At the last board meeting in the month, the price ranged from 24 to 25 cents. Many creameries have stopped making butter as they are getting a larger price for the cream which is in demand by the creameries across the line.

Lumbering.—Lumbering has been somewhat quiet. The work going on has been that of peeling pulpwood.

Manufacturing.—All branches are running full time, and will do so for some time as orders are heavy.

Mining.—Considerable activity prevailed in the asbestos district and on the new copper properties.

Railway construction.—The only railroad construction in progress in this district is that in connection with the extension of the C.P.R. yards. About 150 men are employed.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were busy, and will be so until the end of the season.

The metal and engineering trades were active; there has been no laying off of hands for some time past.

The woodworking trades were busy, though pattern makers were quiet. Carriage makers were busy.

The printing trade was quiet.

Journeyman tailors and garment workers were active.

Bakers and confectioners were busy, with cigarmakers active.

Miscellaneous trades were busy.

Railroad men were active, and street railway employees, cabmen, expressmen and carters busy.

Unskilled labour was in good demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of September has been a very active month in nearly all branches, and the prospects are for a busy fall.

The Canadian Iron Corporation is enlarging its plant. The C.P.R. Company is building a reinforced concrete engine house as the present one is not sufficiently large. The Cotton Company also intends to enlarge its plant to double the present capacity in the near future. Building is still active and there was general activity in all other branches. Wholesalers and retailers have been busy.

Rates of wages and hours of labour remained the same, with the best of understandings between employers and employees.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The condition of all crops is better than in several years past.

Fishing was dull.

Lumbering.—The mills were very busy, and large cuts are expected.

Very little *railroad construction* was done in this district.

Manufacturing.—All branches were busy, especially the Wabasso Cotton Company and the sash and doors factories.

CONDITION OF PARTICULAR TRADES.

All employed in the building trades were kept busy. The activity of these trades maintained a steady demand for hardware and building materials.

Iron and steel workers were generally active. The Bell Telephone Company is employing a number of men laying

wires in the ground in the commercial part of the city.

Woodworkers were very active, and there are good prospects for the fall and winter.

The printing and allied trades were well employed.

The clothing trades were somewhat quiet, except glove makers who were active.

Bakers and confectioners had plenty to do, also butchers and meat cutters. Ice drivers were quiet, but tobacco workers were very busy.

The leather trades were fairly active.

Barbers were active, also clerks, stenographers, delivery employees, hotel, restaurant and theatre employees.

Railroad men were fairly busy, also steamboat men. The month was a good one for freight-handlers, cab drivers, hackmen and carters.

Unskilled labour was in good demand, but the supply was equal.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. V. Phaneuf, correspondent, reported as follows:

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during September was better than in the corresponding month of last year. Building was more active than in the preceding month. Sash and door factories and boot and shoe factories were active, overtime being necessary in the latter to meet orders. The tanneries were very active. The Penman factory had a good month, although some delay was occasioned through a fire which caused damage to the extent of about \$1,800. The musical instrument factory was in full operation. The iron industry was fairly active. Confectionery and other factories had a busy month. Civic improvements gave employment to a large number of men. Wholesale trade was good. For retailers, the volume of trade was satisfactory. Collections were comparatively easy and cordial relations existed between employers and em-

ployees. There were no changes in wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The month was very active. A large number of men found work gathering the crops. Farm products were abundant and commanded remunerative prices. Meat prices were very high; pork advanced to fifteen cents per pound, and other provisions accordingly.

CONDITION OF PARTICULAR TRADES.

The building trades reported an active month, particularly bricklayers, masons, carpenters, painters, stonecutters, plumbers and builders' labourers. A busy month was reported by the iron trades, and an active one by woodworkers. The printing and allied trades had a busy month, as had also boot and shoe workers, while journeymen-tailors were active. The food and tobacco preparation, leather, miscellaneous and transport trades were very busy. Unskilled labour had a good month, demand and supply being about equal.

DISTRICT NOTES.

Sorel.—A new dredge was placed under construction at the Marine Department's shipyard at St. Joseph de Sorel. The Pontbriand Company has just completed a large steamer for the Department of Public Works. The vessel is built of steel, is 97 feet in length by 23 x 2 feet in depth, and has a double expansion engine of 300 horse power. Activity prevailed in the different trades and industries in Sorel.

ST. JOHNS, IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was more active than in the preceding month

or the corresponding month of 1908. Day labourers were in active demand. Government work was being pushed ahead actively, and a large number were employed by the contractor for the break-water. The corporation began the building of cement sidewalks. The St. Johns Foundries, Limited, which was burnt down last February, has rebuilt its plant and commenced operations. The straw hat factory which was destroyed by fire in March last has also reopened. The latter company has started in a new building, and fifty hands are already at work. The new factory of the Corrugated Steel Pipe Company has resumed operations, although on a small scale. The agricultural implement factory, which discharged a greater portion of its staff, last spring, has resumed operations with a full complement of workmen. The boot and shoe factory, which had asked and been granted under certain conditions, a bonus of \$30,000 from the city, has suspended work. The Windsor Canning Company was working to full capacity. The G. C. Poulin sash and door factory, which closed its doors in June last, has reopened them under the firm name of Alex. Latour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy gathering their crops, and the demand for farm labour was very active. Grain, vegetable and root crops are abundant.

Manufacturing.—All factories were running to full capacity except the Singer Sewing Machine Company, which now employs 200 hands where it employed 700 before. It was thought that the factory would be more active after the summer holidays.

CONDITION OF PARTICULAR TRADES.

The month was active for stonecutters, but stonemasons and bricklayers were dull. The other building trades had from a fair to a good month. Moulders, iron workers and assistants, and machinists were very busy. Electrical workers had a good month. Shipbuilders, shipwrights and caulkers had a fair month,

but tinsmiths were dull. Woodworkers were well employed, as were also printers, pressmen and the allied trades. Garment workers were in part idle, as were journeymen-tailors. Hat and glove makers were dull. Butchers and confectioners had a fair month. The miscellaneous trades were comparatively quiet owing to the large number of people spending their summer in the country. The transport trades were busy, with hack drivers and carters very active.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Compared with the corresponding month of last year, the condition of the labour market was greatly improved, and opportunities of employment much more numerous. All the industries were active, especially the building trades, which seemed to be growing increasingly active. Wholesale and retail merchants were doing a good business. During the months of June, July and August, building permits to the value of \$350,000 were granted, as against \$79,000 worth in the same period last year. The above figures were for the town of Maisonneuve alone. The value of real estate in that town will soon reach \$13,000,000. This amount can be doubled for the county, as Maisonneuve does not quite represent one-third of the county.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were well satisfied, as the crop has been abundant and remunerative prices are offered.

Manufacturing.—Conditions continued very fair in manufacturing establishments. Prospects are for a good winter's work.

CONDITION OF PARTICULAR TRADES.

Great activity prevailed in all the building trades, and plasterers and build-

ers' labourers were in demand. In the metal trades satisfactory conditions were reported. Electrical workers, tinsmiths, blacksmiths and their helpers were in demand. Woodworkers had a busy month, as had the printing trades. Journeymen tailors and garment workers were well employed, and a maintenance of this condition is looked forward to during the winter. Food and tobacco preparation branches were busy with the exception of cigarmakers, who were quiet. The leather trades reported fair conditions. Barbers were in demand; the other miscellaneous trades were busy. There was a good demand for unskilled labourers.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The revenues of the port of Montreal during August showed a general increase over the corresponding month of 1908. The increase has been marked in tolls on local traffic, which amounted to \$43,482.77 in 1908 compared with \$48,769.20 in 1909. The registered amount of receipts since the opening of navigation was \$184,842.90 in 1908, and \$190,897.75 in 1909, an increase for 1909 of \$6,054.85.

CONDITION OF PARTICULAR TRADES.

The building trades were very active. The metal trades ranged from busy to active. Carriage makers and car builders were active; other woodworkers also had a good month. The printing and transport trades were active. Journeymen tailors and garment workers were busy. Cigarmakers had a fair month; the other food and tobacco preparation trades were active. Trunk and bag makers, and other leather trades had a good month. Hotel, restaurant and theatre employees were active, as were also barbers. Furriers had a good month. Unskilled labour had a good month.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in September in and about Hull was busy as in the two preceding months. Everything points to the continuation of the same conditions for the coming month, with an improvement as the season advances, owing to the numerous and extensive works about to be undertaken in this vicinity. Labour has been plentiful; men are about sufficient in number to answer the present demand, but will become scarce as engagements for lumbering operations are made. Probabilities for an active fall and winter season are so encouraging that the men will not hire for the lumber camps unless with a proviso that their wages will increase in the coming months proportionately with city rates. Conditions both from the employers' and the employees' point of view have seldom been more encouraging. The Eddy firm which does not depend on the export market is benefitted both by the new decision of the Quebec government and by the American custom law. The abundance of water and raw material ensure permanency in the present healthy conditions of the market.

Mica producers state that they are favourably affected by the American tariff. Enquiries are daily received by them from buyers in the United States. Manufacturers of mica have been working for the past two years on the refuse of the mines, a product so far considered useless. This refuse being exhausted, and the tariff being more favourable, the industry is expected to resume its former activity.

The first of a series of large contracts was awarded by the City Council of Hull to Carrière and Wilson. It amounts to about \$25,000, and is for waterworks extensions. Operations were started this morning with about 30 men, who are paid \$2 and \$2.25 per day. These wages are

the highest ever paid here for common labour. Other contracts for nearly one hundred thousand dollars will soon be awarded by the corporation.

The C. P. R. Company is rushing the completion of its electric line around the city of Hull, which has been under construction since early spring. It is estimated that the line has entailed an expenditure of \$100,000 so far. A spur line towards the cement works about one mile in length was contracted to be finished this fall at the same time as the loop line, but unforeseen obstacles in the way of expropriations have made this impossible. There has been no change in wages in factories or mills. Common labour and lumbermen alone have benefitted in rates by the prosperity.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The active demand for labour continued throughout September. All changes in wages were increases, but variations affected only unskilled labour. The hiring of shantymen was the chief feature of the labour market. Most of the lumbermen paid from \$26 to \$28 per month, and some \$30. There has been an all round advance of from \$2 to \$4 compared with a year ago. Similar labor employed for railway construction is paid a daily wage equal to \$34 or \$35 per month and board. Since the harvest rush there are plenty of men available so that the continuance of good wages is an evidence of widespread industrial activity. The building industry showed signs of slackening. The August permits compiled early in the month showed a total value of \$317,200 compared with \$105,000 last year, but a drop of 50 per cent., compared with the previous month. Sewing machine girls were in active demand on account of heavy orders for clothing. Bank clearings for the last full week of September were \$3,536,015, or half a million more than for the corresponding week of last year. Transportation was brisk on steam

railways on exhibition traffic and general business. The Ottawa Electric Railway carried half a million passengers during the week of the Central Canada Exhibition, or 50,000 more than in any other week of its history. The ordinary day's traffic is between 45,000 and 50,000 people. The receipts of the Ottawa Fair were \$30,000, or \$7,000 more than last year.

Relations between workers and employers continued cordial. The six hands of Louis Green, tailor, of Bank street, who went on strike August 24th for an increase of wages ranging from 10 to 50 per cent. for individual workers, took away their tools on September 23rd, their places having been filled.

The Metropolitan Electrical Company of Britannia has applied to the city for an extension of 14 years to its franchise, which would expire in 1923. The company proposes to develop 10,000 horse power at an estimated cost of half a million dollars and sell 3,000 horse power to the city at \$15 per horse power. Owing to the fact that the city has an electric plant in which \$350,000 is invested, the city treasurer who is a member of the municipal electric commission, has advised against extending the privilege of another company which might do a rival business.

A controller of the city has moved to have the corporation maintain all the boulevards instead of leaving the work to private individuals, many of whom neglect it. The city has made a successful experiment with oil sprinkling of streets.

As a result of the killing of a workman of the Ottawa Electric Company by the breaking of an electric light pole, a coroner's jury recommended that the company establish a system for the inspection of such poles. The International Allied Trades and Labour Association made a similar request asking that the civic corporation have all such poles inspected. The Ottawa Electric Company reported that its present inspection is thorough.

The County of Carleton has decided to improve 210 miles of the county roads at a cost of \$300,000, of which the provincial government will pay one-third.

There has also been a rigid inspection of many of the toll roads of Carleton, and on some of them no more tolls will be collected till they are improved.

The price of flour was lowered by 20 cents a barrel, but the price of the loaf of bread remains the same. Eggs advanced from 26 to 30 cents a dozen, and the best butter from 25 to 28 cents a pound. Apples dropped from 15 to 10 cents a gallon, and potatoes are 75 cents a bag, instead of 85 in the beginning of the month. The price of brooms is reported to be advancing.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The grain crop was harvested late, but the yield promises to be equal to the average and better than that of last season. The rains of the early part of the month helped the pastures. Butchers' cattle were reported well bought up and prices firm.

Lumbering.—The lumbering industry had the advantage of high water, ensuring no cessation of sawing operations. A year ago the Ottawa valley mills were running only to half their capacity. The water in the Ottawa at the foot of the Rideau locks is ten feet deep compared with five feet a year ago. The lumbermen are sending away larger crews than in 1908.

Railroad Construction.—The Canadian Northern Railway is about ready to enter the city, and a large construction gang is employed. The Ottawa Electric Railway Company has steel in the city ready to lay a new track on its Sparks street line, but the corporation requires a delay till spring when a new pavement will also be laid.

Manufacturing in men's clothing, paper, and lumber was brisk.

CONDITION OF PARTICULAR TRADES.

The building trades were very active. Electrical linemen, engineers and moulders were busy. Woodworkers and car builders also were busy. Blacksmiths were quiet. The printing trades, milliners, women's garment makers and tailors were busy. Food preparation

branches and barbers were quiet, but furriers, clerks and stenographers were active. All railway employees were busily employed. Unskilled labourers were nearly all employed.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Unceasing activity prevailed in all departments of the labour market. Opportunities for employment were as numerous as during the preceding month and in excess of the corresponding period last year. Contracts were awarded for the erection of a new wing to the Hotel Dieu hospital, and work was commenced. The addition will be of stone with cut stone trimmings, and will be 86 x 40 feet, and 5 storeys high when completed the addition will cost \$40,000. Work will proceed this fall as far as weather conditions permit, and it is expected that the building will be completed within a year. It was confidently expected that over half a million bushels of grain would have arrived at this port before the end of September. The grain trade was rather quiet during the early part of the season, but with the harvesting of the new crop a revival has set in, and it is expected there will now be a rush until the end of the season. The department of public works is calling for tenders for the lease of the Kingston graving dock for a period of twenty-one years. Tenders are to be in on October 11th. Complaints have been made by vessel owners and the Marine Underwriters' Association that the Kingston dock, has not the necessary facilities to make repairs. In view of these complaints the public works department has been led to offer the government dry-dock for lease.

During the month 15,061 gallons of oil were received here to be used in oiling the principal streets of the city. Last year it cost \$3,066.60 to water the streets, although the rate charged is very low. If oiling the streets proves satisfactory

it is expected \$1,000 per year will be saved to the city.

Wholesale and retail trade generally was reported active.

With the beginning of the month the early closing of stores came to an end until next season. A movement is on foot to make the early closing movement permanent and general.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers continued active. The various township and other agricultural fairs were held, and were uniformly successful, exhibits of stock, vegetables, grains, etc., being above the average.

Fishing was dull.

Lumbering was quiet.

Mining was active.

Railroad construction and employment continued active.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering, ship-building and woodworking trades reported an active month in all departments. Printers, clothiers, bakers, butchers, icemen, cigarmakers, tanners, barbers, broom makers, clerks, delivery employees, furriers, hotel restaurant and laundry workers also reported an active month.

All branches of the transport trade and unskilled labour were active.

DISTRICT NOTES.

Sydenham.—The season has been most active here. A large amount of building has been carried on. Nearly a dozen two-storey buildings were erected and several received additions and repairs. A warehouse for all kinds of vehicles and farm implements was built. Several important real estate transfers were completed. The village, with its mining fishing, educational, and other advantages, is becoming a popular summer resort.

Amherst Island.—Two small cheese factories produced \$38,000 worth of cheese last year, an increase over the

previous year of \$4,000. In former years Amherst Island produced principally barley, which was exported to the United States in large quantities but since the adoption of the United States tariff of thirty cents a bushel on barley, the farmers of the island have turned their attention to raising cattle. The result is that the production of cheese is greater in value than that of barley thirty years ago.

Picton.—The canners of this district report that unless conditions change rapidly the output of corn and tomatoes will be less than one-third of that of last year. Backward spring weather was the cause. The crop outlook for canning factory products of Prince Edward County will have a far-reaching effect on the general outlook. This county has nearly a third of the canning factories of the province, and these the most important.

Tamworth.—The grist-mill which was recently converted into a pulp mill and was doing a good business, was, on the first of the month damaged to the extent of \$20,000 by fire. Several hands were thrown out of employment, and Tamworth loses its leading industry.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

No better evidence of the prosperity of the labour market could be shown than the scarcity of idle men, very few of them being seen during September in either the city or district. This applied to all classes of labour. High wages were the rule, unskilled labour receiving from \$1.50 to \$1.75 a day. The cement plants could not secure enough men, while all who desired work could get it on the Trent Valley Canal. All the local industries were running to full capacity, many of them working overtime to keep up with orders. The Rolling Mills and horseshoe factory sent out heavy shipments each week, a cargo of over 500 kegs of horseshoes going to Winnipeg. The Belleville Hardware Company also had a very active month and was con-

tinually adding to their staff. Building operations were very brisk, many skilled and unskilled men being employed. Canning factories were especially busy on corn and tomatoes, there being a large crop. Hundreds of men and women were employed at this work. Banks reported money plentiful, while wholesale and retail merchants had an active month. There were no changes in rates of wages or hours of labour.

During the last week of September the thirteen teamsters employed by the city went out on strike demanding \$3.50 per day. They had been formerly receiving \$3. per day. As most of the civic improvements were almost completed the council has taken no action.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—All grain was harvested this month and good crops were the rule. Hay and oats were especially plentiful. Much fall ploughing was done.

Fishing.—Rough fishing was active.

Lumbering was active in the northern part of the county.

Manufacturing was very active in all branches.

Mining was especially active, many men being employed.

Railroad construction was dull, very little being done here.

CONDITION OF PARTICULAR TRADES.

Bricklayers, stonemasons, carpenters, joiners, lathers and plasterers, painters, plumbers, stonecutters and builders' labourers were all busy at good wages.

Iron moulders, iron workers and helpers, machinists, engineers, steam engineers, electrical workers, brass workers, blacksmiths, boiler makers, bicycle makers and horseshoers, all reported a very active month. A few shipbuilders were employed part of the month.

All branches of the woodworking and furnishing trades were busy, many shipments of furniture to outside points being made. Coopers were all employed on cheese boxes and apple barrels.

Job and news printers, as well as machine operators, were fully well em-

ployed, as were pressmen and bookbinders on fall fair work.

Journeymen tailors had a busy month.

Bakers, confectioners, butchers and meat cutters, and ice drivers had an active month. Cigarmakers were all busy.

Harness makers were all employed in the various shops.

Barbers, clerks, stenographers, delivery employees and furriers had a busy month. Hotel, restaurant and theatre employees and laundry workers were active.

Both railway and steamboat traffic was very heavy, many vessels being engaged in carrying cement and cheese. Freight handlers were busy. Longshoremen were fairly active. Cab drivers, hackmen, carters, teamsters and expressmen were all active.

Unskilled labour was in active demand at excellent wages.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Active conditions prevailed during September. The City Council have closed a contract with Conway Bros., to build a reinforced cement bridge on Smith street to be completed by Aug. 31st, 1910. The cost will be about \$30,000. The council is also advertising for tenders to erect an isolation hospital. It was decided to accept the offer of the Ontario Power Company to supply power to the City from Burleigh Falls at \$11.60 per horse power. The Bradburn Homestead with two acres of land has been purchased by a Roman Catholic corporation and will be used for an orphanage. Excavations for a new Presbyterian church started on the 14th of this month, the work will be done by day labour, the foundation to be complete this fall. The rest of the building will not be undertaken until spring. The Quaker Oats Company has completed an improved fire fighting equipment which will enable the company to handle

any kind of a fire with its own apparatus. The Peterboro Industrial Exhibition was a success and will have a surplus. Insurance rates have been reduced; residence insurance has been changed from "B" to "A" and Mercantile risks substantially reduced by the Underwriters' Association. Building permits for August show an increase of \$11,395 over those of August 1908.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvest is about finished and threshing is now general. The grain is reported as turning out well.

Lumbering has been very active.

Manufacturing.—The factories as a rule were busy. There has been a slight improvement since spring in all lines. The Peterborough Lumber Company will start its mill at once and expects to run night and day for the rest of the season.

CONDITION OF PARTICULAR TRADES.

The building trades were all busy and expect to remain so for the rest of the season.

Iron moulders and core makers had steady work. Machinists had plenty of work and reported an improvement. Electrical workers and linemen were active and brass workers were busy.

Blacksmiths also were busy. Boiler makers reported very little work.

Woodworkers were all well employed.

Printers had all they could do, pressmen and bookbinders had a good month.

Tailors and garment makers had fair employment, and were busy during the latter part of month.

Bakers and confectioners had a good month. Butchers and meat cutters were busy. Cigarmakers reported no improvement.

Leather workers had a good month.

Railroad workers and steamboat men have been busy.

Street railway men had steady employment. Teamsters and expressmen have had all they could do.

There was a good demand for unskilled labour, but the supply was equal to requirements.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is little change to note in conditions during September, which were about the same as those of the preceding month. The building trades continued brisk and nearly all lines of the manufacturing industry were active. Labour both skilled and unskilled was probably better employed during the month than at any time since the depression, and for some time there has been a noteworthy absence of strikes or important labour disputes. The holding of the Toronto Industrial Exhibition gave a great stimulus to the local retail trade, the attendance, which has about 750,000, exceeding that of any previous year.

The revenue of the Toronto Railway Co. for the year ending August 31st, was \$3,775,018, of which the city received \$495,003 for percentage and \$81,622 for mileage rental. The average mileage in operation during the year was 102.16 miles. The receipts for the month of August were \$343,558 as against \$305,096 for August, 1908.

The Hydro-Electric Power Commission has obtained a permit for the erection of the proposed transformer station on Strachan Ave. The building will be erected at a cost of \$37,000. The branches of the line between Niagara Falls and Dundas, and Dundas and Toronto will be completed by the close of the year. Three gangs were at work on the line between Dundas and Toronto.

The Dominion Government will establish a life-saving station at the new western gap and tenders for its construction have been called for. It will have a permanent trained crew and a life-boat with modern life-saving apparatus.

The Melrose Co., composed of Toronto and British capitalists, has purchased several farm properties on the west side of Yonge Street, extending northward to York Mills, at a price of about \$350,000

and will lay out the property as a first class residential district.

The new branch Carnegie library in ward seven, erected at a cost of \$20,000, was formally opened on the 27th.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busily engaged in threshing and harvesting fruit and root crops. The copious rains during the latter part of the month have been favourable to roots and pasturage. Good prices were obtained for all produce, and stock was generally in excellent condition.

Manufacturing.—Activity was general in the leading lines of industry, and the outlook for an active winter season decidedly encouraging, as orders came in freely. The bountiful harvest has resulted in a general feeling of confidence.

The Standard Sanitary Company of Pittsburg, Pa., manufacturers of bathtubs and enamelled sanitary goods, is establishing a branch in Toronto and has obtained a site of $7\frac{3}{4}$ acres on Lansdowne Avenue in the North Western part of the city. The company will employ about 500 men.

An addition is being made to the Dunlop Rubber Works on Booth Ave., which will be devoted to the manufacture of automobile tires and mechanical rubber goods.

Railroad construction.—The Canadian Northern Railway Company has let contracts for the construction of the section of their eastern extension between Toronto and Trenton, a distance of 104 miles. The contracts are let subject to alteration of the route, which as at present laid out carries a grade of only 0.5 per cent. An attempt is being made to induce the company to change the plan so that the road will run through some of the important towns on the lakefront including Bowmanville and Oshawa.

CONDITION OF PARTICULAR TRADES.

Carpenters, bricklayers, stone masons, builders' labourers, lathers, plasterers, painters, plumbers and steam and gas fitters had all plenty of work, a condition

which is likely to continue as long as the season permits.

Most classes of iron workers had steady work, structural steel workers, sheet metal workers and electricians being especially busy. Shipbuilders were quiet. Brass workers had a good month. Jewelers and silversmiths were active.

Furniture workers and cabinet makers, upholsterers, carriage and wagon workers were well employed. Piano makers were active.

Custom tailors found trade good. Garment workers, boot and shoe workers and hat and cap workers had steady employment. Furriers were beginning to get active.

Printers, bookbinders and pressmen had an active month.

Bakers, confectioners and butchers had continuous employment. Brewers were better employed than in August. Fruit-handlers were very busy. Cigarmakers were fairly well employed.

Leather workers had plenty of work.

Barbers, hotel and restaurant employees laundry workers, salesmen, clerks and stenographers were busy, especially during the earlier part of the month, slackening off toward the close.

Railway and street railway employees, teamsters, expressmen, sailors, long-shoremen and others engaged in connection with navigation had an active month.

Unskilled labour was generally well employed.

DISTRICT NOTES.

Weston.—On the 4th of September, the rate payers of Weston voted to expend \$57,000 on a water works system with the Humber River as a source of supply.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

While industrial conditions were somewhat quieter in September than in August, the outlook at the end of the month

was better than for some time past. This was due chiefly to the commencement of work on the enlargement of the Ontario Power Company's generating plant. This company obtained permission from the Provincial Park Commissioners to lay a new underground conduit to supply water to its enlarged power-house. The pipe will be eighteen feet in diameter, nearly a mile long and concrete will be the chief material used in its construction. About five hundred men, chiefly labourers, will be employed. The whole expenditure of the company on the enlargement of its plant will be about a million dollars. Excavation was commenced on September 20th.

Work went forward rapidly on the local transforming station of the Ontario Government power transmission system, employing a number of men. The building is to be 56 x 160 feet in size. Work was also rushed on the transmission and telephone lines, in the assembling and erection of towers and stringing of lines. About three hundred men were working between Niagara Falls and Toronto. Municipal works gave considerable employment. General business, both wholesale and retail was quiet but a decided improvement was expected.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit-growers were still very busy. Crops were good, and throughout the district there was a demand for agricultural labour. This condition will change in October, when many now employed will be discharged.

Manufacturing.—Conditions in factories of all classes were excellent. The two silver-plating and cutlery factories, the chain and trap factory, the shredded wheat factory, the corset factory, the railway switch works and local foundry and machine shop were all busy, employing full staffs. The fruit canneries and suspender and neckwear factories were calling for more female help. The cyanamid factory was employing still more hands and the corrugated paper factory was nearing completion. Two planing mills were destroyed by fire.

Railroad construction.—Work on the construction of the Dunnville-Beamsville electric road was resumed. On all roads both freight and passenger traffic were light and fewer men were employed than during the previous months.

CONDITION OF PARTICULAR TRADES.

The building trades were rather more active than in August. Bricklayers, masons, lathers and plasterers were active, but carpenters, painters, plumbers and gas fitters and builders' labourers were quiet. Stonecutters had no work.

The metal and engineering trades were in good condition. Linemen were quieter than for some time.

The clothing trades were more active than during the summer months.

The food and tobacco trades were quiet except in the canning industry, in which there was an unsatisfied demand for female help.

Barbers, salespeople and office workers were quiet. Hotels and restaurants laid off large numbers of employees during the month.

On steam railways traffic was light, but the usual number of men were employed. Some passenger steamboats ceased running for the season, and crews were laid off. Electric railways were running fewer cars, and many trainmen were idle. Cab drivers were quiet, but teamsters were usually busy.

Unskilled labour was well employed, and the commencement of the enlargement of the power plants will give work to a large force of men of this class.

DISTRICT NOTES.

Chippawa.—A by-law to grant certain concessions to the company which will build an electric steel plant here was carried unanimously at a special election. The company made further purchases of land.

Bridgeburg.—A varnish factory is to be erected at once.

Port Colborne.—There was a heavy rush of western wheat through the Welland canal. Elevators were working to full capacity, but, as practically all the

grain is carried in steam vessels, no work for towing tugs was provided, and business in that line was very dull. Local railway yards were improved and enlarged and new sidings laid at the cement works.

Humberstone.—An improvement to the banks of the Welland canal which has given employment to fifty men for some time, was completed.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was satisfactory, being from active to busy. With the exception of a few branches of the building trades which experienced a lull, labour was well employed. The large quantities of fruits shipped from this district made transportation busy. Civic improvements proved an important factor in the employment of labour; large gangs of men were kept busy on this work, and there is much ahead to be done this season. Business, wholesale and retail, was reported good, with an increased volume over last month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers were very busy. The fruit yield this year exceeds that of any previous year. As high as 12,000 to 20,000 baskets of fruits are being shipped daily from this vicinity alone, besides the large quantities which go to the canning factories. So long as shipping facilities remained good, no difficulty has been met with in marketing the fruits at good prices to the growers. Recently, the fruit shippers secured through the railway commission the restoration of former favourable shipping rates, which has materially facilitated in the marketing of the fruits.

CONDITION OF PARTICULAR TRADES.

In most branches of the allied building trades employment was active. A few

branches, namely carpenters and joiners, experienced a lull in activity; it is expected to be temporary.

All branches of the metal and engineering trades were active.

The woodworking and furnishing trades reported conditions favourable.

The printing and allied trades were active.

Journeymen tailors were busy, as were boot and shoe workers.

Bakers and confectioners, butchers and meat cutters, ice cutters and drivers, cigarmakers and tobacco workers, were active. Tanners and curriers, leather workers, saddlers, trunk and bag makers had a good month's employment.

Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees and laundry workers were well employed.

All lines of transportation were busy with an increased volume of trade over last month.

Unskilled labour was active to busy, with conditions of employment good.

DISTRICT NOTES.

Thorold.—Labour was well employed and business was reported good.

Merritton.—The mills and factories were running full time and reported trade good. Labour generally found employment active.

Port Dalhousie.—The favourable conditions for employment reported last month, continued.

St. Ann's and Wellandport.—Work on the D.W. and B. Electric Railway was begun at both St. Ann's and Wellandport, and is being rushed, with a view to completing the line this fall.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

While there has been no unusual rush in any department during the month, the situation was steady. In nearly every

line of manufacturing and building, work has been proceeding regularly, conditions being improved over those of 1908. In the building trades, the rush foreshadowed by reports given out by architects and builders a few months ago of the large list of buildings to be erected this year, has not all materialized, though enough have been started to keep the workers fairly well employed, and others are now in sight that promise well for the remainder of the season. Building permits for the month totalled in value \$181,350, an increase over September, 1908, of about \$76,000. The total value of permits issued so far this year is \$1,300,000, which is within about \$30,000 of the total for the whole of 1908. With three months yet to go, it is safe to say the total for the year will far exceed that of last year.

Among the manufacturers now making large additions are: The Hamilton Cotton Co., the Burton Baldwin Co., the McPherson Shoe Co., the B. Greening Wire Works Co., the Banwell Hoxie Wire Goods Co. and others. The Thomas C. Watkins Dry Goods Co. is adding a large annex to its present building. The Public Library Board has acquired a site for its new library building for \$25,000, on which a \$75,000 building will be erected. Other contracts now being let are those for the Y.M.C.A. Boys' building to cost \$40,000, and St. Paul's church alterations to cost about the same. While the factories have been running fairly steadily, no difficulty has been experienced in getting all the help required.

A decided improvement has been experienced in railway and steamboat traffic. The heavy crops of fruit have provided extra work in the orchards and kept the express companies and railroads busy handling shipments to outside points.

Unskilled labour has been fairly well employed, but a slackening off is anticipated as weather conditions become less favourable. The month has been free from labour disputes. Real estate transactions continued active. Coal dealers have announced an advance of 50 cents per ton in the price of anthracite, which will make it \$6.75 per ton.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The largest markets in the city's history have been those of the present month. Heavy crops of all kinds of fruit and vegetables were the rule, and prices have been reasonable. Plums are so plentiful that it hardly pays to bring them to market. Fruit quotations for Saturday September 25, were as follows:

Apples, basket.....	15 to 25c.
Grapes, basket.....	15 to 25c.
Huckleberries, quart.....	15 to 00c.
Peaches, Crawford.....	20 to 50c.
Peaches, Albertas.....	60 to 75c.
Melons, basket.....	20 to 30c.
Melons, each.....	3 to 10c.
Plums, basket.....	15 to 25c.
Pears, basket.....	15 to 35c.
Watermelons, each.....	5 to 15c.
Elderberries, basket.....	40 to 60c.

Manufacturing.—The Canadian Westinghouse Co. is exceptionally busy in its general electric department, a great deal of extra time being worked by employees. The repairs to the furnace of the Hamilton Iron and Steel Co., (which blew out about a month ago) are about completed, and it is expected to be in operation during the first week of October. The company has been buying more property near its plant.

Railroad construction.—There are no new developments in the situation regarding the railroads seeking entrance to the city. The fact that the T.H. & B. is leasing some of the property it recently acquired, in the vicinity of its station, would indicate that the union station project will not be a feature of this year's local railroad history.

CONDITION OF PARTICULAR TRADES.

Steadiness is the dominant feature of the situation in the trades. No change has occurred in the moulders' strike, except that the foundries are getting busier. About 95 members of the union are still on the strike roll. The building trades have been fairly active. Machinists, steam engineers, electrical workers were steady. Metal polishers were busy, as were also stove mounters. Blacksmiths and horseshoers reported work fair. Sheet metal workers were busy. Woodworkers and upholsterers, and carriage

and wagon makers had enough to do. The allied printing trades were busier than last month. Tailors and garment workers were steady. Boot and shoe workers have been busy, but are slackening off, as is usual at this season. Bakers and confectionery workers were all employed. Cigarmakers in some shops were idle part of the month through stock-taking and alterations being made in factory buildings. Tobacco workers were working steadily. Barbers were busy. Broom makers were affected by shortage of material. The retail price of brooms has been advanced 10 cents in consequence. Hotel and restaurant employees were rather quiet, the last half of the month. Railroad employees were busy. Street railway employees had a good month, but are slackening off. Teamsters and expressmen have had all they could do. Unskilled labour has been well employed, but there is not much in prospect for the ensuing month. The sewers committee of the city council has announced that about \$200,000 will be needed to supply sewer accommodation for the west end of the city, which will have to be provided in the near future.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during September, which compared favorably with the preceding month and was better than the corresponding month of last year. The building and iron trades were busy, and some of the departments in several factories worked overtime. Street paving and sewer and sidewalk construction work continued to give employment to a large force of men. Building permits issued by the city engineer's department showed a decided increase over last year, and there are indications which point to a busy fall and winter, if weather conditions are favorable. The mid-week half holiday for clerks and barbers ceased with the end of August.

The report of the assessors shows an increase in taxable property of \$330,050, the total assessment of the city being \$13,810,305. The population is 20,711, a slight increase over last year.

Local customs collections for September were \$31,990.14, an increase of \$6,537.92 over September of last year.

The city relief officer reports that \$750.95 was spent during the past nine months, a decrease from last year.

The price of flour has dropped 20 cents per barrel.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Exceptionally dry weather has interfered with farm work, especially ploughing.

Manufacturing.—Generally speaking, factories were busy, several working overtime. The large additions to the warehouse of the Massey-Harris Company are completed; the Cockshutt Plough Company is also using the two large additions to the blacksmith shop and grinding room put up this year.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters, decorators, plumbers, gas and steam fitters were busy.

Iron moulders, engineers, stove mounters and core makers were active, machinists in many cases were busy. Linemen and electrical workers were busy. Metal polishers, buffers and platers were busy in most cases.

Blacksmiths were busy, and in one factory were working overtime. Boiler makers sheet metal workers and horse-shoers were active.

Woodworkers generally were busy. Carriage and wagon makers and coopers were busy. Pattern makers were active.

The printing and allied trades were busy.

Tailors and tailoresses were busier than during August.

Bakers and confectioners were busy. Cigarmakers and tobacco workers were from active to busy.

Leather workers and saddlers were active.

Barbers, clerks, delivery employees hotel and restaurant employees were steadily employed. Laundry workers were busy.

Railroad trackmen and freight handlers were busy. Street railway employees were fully employed. Teamsters and draymen were busy. Cab drivers and hackmen were active.

Unskilled labour was fully employed.

DISTRICT NOTES.

Paris.—The Fabric Mills were busy and were putting on a few more operatives. There were few or none out of work.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The generally favourable condition of labour continued throughout September, all branches of industry being well employed. The only apparent changes were a decline in activity in the building trades and an improvement in manufacturing. Civic improvement work on street pavements, sewers and cement bridges continued to give employment to large gangs of men. Good progress is being made on the New Winter Fair building and the contractor for the erection of the Hydro-Electric Power Commission's transforming station commenced work with a considerable force of men.

On the opening of the Ontario Agricultural College, a marked increase in attendance was shown. There are 220 new students in residence and 70 boarding out. The women students at the MacDonald Institute number 117 in residence and 15 boarding out, while for 37 it has been impossible to find accommodation in the class rooms. There are 50 men in the third year while the previous record was 53. The situation is a serious one for the management and faculty and they hope to secure additions and extensions.

Customs returns for the month of August were \$13,345,14, a increase of

\$2,509.14 over the corresponding month, last year. Wholesale and retail merchants reported an active month.

The labour market was free from unrest or change except in the case of a number of men, who are thrown out of employment by the Morlock-Clim Furniture Company going into liquidation.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a very active month, filling, silos, fall plowing and threshing employing them fully. The yield generally is reported good. Root crops and pastures are suffering for lack of rain.

Manufacturing.—The majority of manufacturing establishments reported improving conditions, in some cases additional men being taken on. At the Bell Piano and Organ Company's shops the men were working full time for the first time in two years.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a fair month. Carpenters, lathers and plasterers were busy. Painters and decorators were active. Gas and steam fitters reported trade fair.

Iron moulders and helpers, also tube mill workers, were busy. Electrical workers and linemen were active.

Woodworkers had a fair month, though carriage makers were slack. Pattern makers and coopers were busy.

Printers and allied trades men had a good month.

Journeyman tailors had a fair month with garment workers very busy.

Bakers and butchers were active.

Teamsters, draymen and carters were well employed.

Unskilled labourers had a good month.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour, skilled and unskilled, was well employed during the month, employ-

ment being more plentiful than in the previous month or in the corresponding month of last year. The supply of labour, however, was equal to the demand, except among cabinet makers, who were scarce. Four buildings permits were issued during the month, one being for the rebuilding of the J. Y. Shantz button factory. The value of the permits amounted to \$24,000. Good progress was made on the erection of the Bell Telephone Office Building. The Knippel Laundry was completed towards the close of the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy, fall seeding and harvesting the potato crops. The latter are a good yield.

Manufacturing.—Busy conditions prevailed. Sash factories were working overtime, as were the L. MacBrein Trunk and Valise Company, the Berlin Interior Hardwood Company, the Walker Binn Company, the Berlin Table Company and the Oberhaltzer Shoe Company.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners, lathers and plasterers, painters, plumbers, stonecutters and builders' labourers were busy.

Iron moulders, iron workers and helpers. Core makers, machinists and engineers, steam engineers, electrical workers and linemen were busy. Metal polishers, buffers, plasterers and brass workers, stove mounters, blacksmiths and boiler makers were active.

Sheet metal workers, bicycle workers, tool sharpeners and horseshoers were busy.

Woodworkers, upholsterers, varnishers, polishers and woodcarvers were busy. Carriage and wagon makers, car builders, pattern makers and coopers were active.

Printers, pressmen, bookbinders, steel and copper plate printers and photo engravers, were active.

Journeyman tailors, garment workers, glove makers and boot and shoe workers were busy.

Bakers and confectioners, butchers and meat cutters were busy, with cigarmakers and tobacco workers active.

Tanners and curriers, leather workers and saddlers were active, with trunk and bag makers busy.

Barbers, broom makers, clerks and delivery employees were active.

Busy conditions were reported among transportation employees.

Unskilled labour was fully employed.

WOODSTOCK, ONT., AND DISTRICT.

Mr. W. N. McEltheran, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

September showed a decided improvement in labour circles over the corresponding month last year. All branches were active, while in some trades extraordinary activity prevailed. The continued wet weather towards the end of the month retarded fall ploughing, and interfered to some extent with the attendance at the county fairs. In the county of Oxford are held every fall from ten to twelve fall exhibitions, each lasting from one to three days. All these create a demand for extra help in the way of carpenters, caretakers, and extra police, and also cause money to circulate, thus benefiting retail merchants, etc. Contracts were let for the Tobin Arms Company's new building in Woodstock, and for the Carnegie Library Building in Ingersoll. Work on both jobs will be proceeded with as fast as possible.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were getting as much of the fall plowing done as the wet weather permitted. Apple picking was becoming pretty general towards the close of the month. This crop gives promise of being an average one. Cheese factories were busy, but were getting ready in some instances to change to butter-making. Prices for produce remained firm. Butter ranged from 25 to 28 cents per pound for the best creamery. Eggs sold at from 19 to 25 cents per dozen, the latter price ruling near the close of the month. Best chickens could be bought

for from 25 to 50 cents a piece, while dressed ducks cost from 50 to 65 cents. Potatoes brought from 90 to \$1.10 per bag, the quality being first-class. Live hogs ranged from \$7.50 to \$8.10 per 100 pounds; live lambs brought from \$4 to \$4.25 each.

Manufacturing.—All lines of manufacturing showed a decided improvement. Prospects for the coming winter are encouraging.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a quiet month. Towards the end, a slight improvement was noticed, which gave promise of extending throughout October. Work was commenced on the excavations for the new factory for the Tobin Arms Company, and the building will be rushed with all possible speed. This company has dismantled its factory at Norwich, Conn., and will erect in Woodstock an entirely new factory, to supply the Canadian trade. Men at high wages will be employed in the manufacture of the Tobin Simplex Guns and other iron manufactures. Carpenters were fairly active, especially in the planing mills. Mr. Geaking commenced the manufacture in Woodstock of the Gem Merry-go-Round, in a size suitable for private use, and has applied for patents covering the same. This is the only industry of its kind in Canada. Lathers and plasterers were quiet; painters were very busy, mostly on interior decorations. Plumbers were active, as were steam and gas fitters.

Stove moulders were very busy, working full time, and new men were being put on. Machinists were rushed, increasing activity being reported. Stove mounters were busy.

Woodworking tradesmen were very busy. Wagon makers were working overtime three nights a week. Furniture factory employees reported increasing activity. The optimistic reports of the western wheat crops having the effect of stimulating orders, both west and east. Piano case makers and action makers reported a very busy month. Church and Reed organ workers were very busy. Upholsterers could hardly keep up with

the orders, while varnishers and polishers were all fully employed.

Wire fence weavers were still quiet.

Knitting factory employees reported great activity, with big orders still ahead for some time to come.

Printers and pressmen were all busy, the Saturday half holiday ending with the month of September.

Journeyman tailors reported a very busy month, the orders being more numerous and for better qualities than formerly.

Bakers and confectioners were active, and cigarmakers busy.

Tanners and curriers were quiet.

Unskilled labour was all absorbed, many of the class having taken advantage of the cheap western excursions, and gone to help on the harvest fields.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Active conditions prevailed in the labour market during September, the building trades being as brisk as last month. The laying of concrete walks in the city has given work to a number of men, and is progressing rapidly. The Westrumite Company has gangs of men employed on the John Street pavement, which is nearly finished. A large number of men and teams are still working on the lake and dam, nearly \$15,000 having been spent so far. The outlook is that the dam will be finished before the cold weather. The city has accepted the tender of the Stratford Bridge and Iron Works to erect a steel straight girder bridge over Victoria Lake on Waterloo Street costing, \$6,378.

Wholesale and retail merchants reported trade very good.

No changes in rates of wages or hours of labour, and no disputes in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy threshing and ploughing. Market prices were:—

Eggs, 23cts. per doz.
 Butter, 25 cts. per lb.
 Chickens, 60c. to \$1.00 a pair.
 Ducks, 50c., each.
 Potatoes, 95c. a bag.
 Apples, 60c. a bag.
 Wheat, 98cts. a bushel.
 Oats (old) 47 cts. a bushel.
 Oats (new) 34cts. a bushel.
 Barley, 48 cts. a bushel.
 Peas, 70 cts. a bushel.
 Live hogs, \$8.00 a cwt.

Manufacturing.—Industrial establishments were active, with prospects good for the winter.

Railroad construction.—The usual number of men are engaged in keeping the G.T.R. tracks in repair.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were busy, painters were active plumbers and builders' labourers were busy.

Iron moulders, workers, helpers and machinists report being busy; blacksmiths and boilermakers were active.

Jewellers report business very good.

Woodworkers and carriage and wagon makers had a busy month. Coopers reported trade very active, especially in the stave factory.

Printers were very busy, especially ad. setters.

Journeymen tailors and clothing factory workers had an active month.

Bakers, butchers and cigarmakers were busy.

Harness makers reported trade fairly active.

Barbers reported trade rather dull. Clerks and delivery employees were busy. Hotel, restaurant and laundry workers were active.

Railroad conductors, engineers, firemen and freight handlers were very busy. Cab drivers, draymen and teamsters had a good month.

Unskilled labour was well employed, with very few out of work.

DISTRICT NOTES.

Goderich.—Contracts have been awarded for the building of the new Goderich Public School at a total cost of \$22,130.

St. Marys.—The Canadian Smallwares factory was sold for the sum of \$2,100.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A very decided improvement has taken place in the labour market in this locality during the past month, and business in all lines has been good. In the early part of the month the Western Fair brought at least 60,000 visitors to the city, which resulted in a large amount of extra business for the wholesale and retail houses. The railroads reported traffic exceptionally heavy, and manufacturing concerns are enjoying an appreciable increase in business in all lines. In the building trades, there are no large contracts in progress, but a large number of residences are being erected.

The harvest excursions, as usual, took a large number of young workmen from this district, especially farmers' sons.

At the G.T.R. car shops a large number of freight cars, which have been laying idle on the sidings throughout the district, during the summer, are now being brought in to be repaired and put into commission. Extra help is being taken on for this work, and summer hours are being worked.

Work has commenced on the combined building for a Hydro-Electric Power Station and Waterworks plant for the artesian wells system that has been adopted by this city. Material is arriving for the overhead work throughout the city.

The Civic Federation, for the discussing of matters relating to capital and labour, is arranging for speakers to appear here during the winter months.

Coal prices took their usual rise on September 1st from \$7 to \$7.50 per ton.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fruit crop is exceptionally heavy this fall, and the prices

are correspondingly cheap. Pears, peaches, grapes, apples and plums are being sold here in abundance. The price of hogs and dressed pork is still going up, live hogs bringing \$8.15 per cwt.; while dressed pork is bringing the phenomenal price of \$11.00 per cwt.; other prices are:—

Eggs, 25 cts. per dozen.
 Butter, 24 cts. per lb.
 Tomatoes, 15 cts. a basket.
 Peaches (Crawfords) 55 cts. basket.
 Grapes, 25 cts. a basket.
 Hay, \$15.00 per ton.
 Potatoes, 80 cts. bushel.
 Apples, 40 cts. bushel.
 Pears, 80 cts. bushel.
 Beef steak, 18 cts. per lb.
 Roast beef, 15 cts. per lb.
 Bacon, 22 cts. per lb.
 Pork chops, 15 cts. per lb.
 Lamb chops, 15 cts. per lb.
 Veal, 12½ cts. per lb.

CONDITION OF PARTICULAR TRADES.

All classes in the building trades have been working steadily all summer, although there has been no exceptional rush and indications are not of the best.

Iron moulders have been very busy, as were all workers in the iron industries.

Carriage and wagon workers were very busy. Car builders were busier than for years past; they are taking on a large number of carpenters at the G.T.R. car shops.

Compositors and pressmen were all busy. The Advertiser Co. has the contracts for the city printing and for the printing of the city directory.

Journeyman tailors reported fall trade commencing, and work getting brisker. Garment workers were very busy, and were working overtime. Boot and shoe workers were very busy. The Murray Shoe Co. is moving into a new building.

The two candy and biscuit factories were very busy. Cigarmakers were busy on 10 cent lines, but local option has caused a great falling off on 5 cent lines.

Tanners and curriers were very busy.

Railroad train crews had an extra good month; several special trains were run, and all were very busy.

The demand for unskilled labour continued good, and very few men were idle.

DISTRICT NOTES.

The different canning factories in the district were very busy, large forces having been put on to get the work done.

Port Stanley.—The fishermen here have removed their nets from the lake for a few weeks owing to poor results; they will commence again early in October. In consequence about 30 men are idle.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during September was decidedly favourable to all classes. There was no cessation in building activity, all mechanics being well employed. Considerable civic work has been done, and the prospects are that this work will continue until the cold weather. There has been, in consequence, plenty of work for the unskilled classes. On the railways, the different departments reported the month an active one. In the railway shops, working forces have been increased, and there is a demand for skilled workers. It will be necessary to put the rolling stock in good repair for the winter rush after the close of navigation.

The Sutherland and Innes stave factory was obliged to close down Sept. 1, on account of a scarcity of timber. About twenty-five men were affected by the shut-down. It may be a month or six weeks before this factory will resume work, but as the men are mostly skilled workers, employment will be found in other places. Other local industries report the month a good average for late summer business. Business with the merchants has somewhat improved over the previous month, and prospects for fall business are good. Local markets have been well attended, and produce brought good prices. There have been no changes in rates of wages or hours of labour.

A committee of railway trainmen, employed on the M. C. R. System has been in Detroit in conference with the officials,

relative to having their schedule of wages changed, but no information has been given out as to the outcome of the conference.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy in this district threshing. The markets have been well attended and good prices prevailed.

Manufacturing.—September has been a good month. There was a demand for machinists.

CONDITION OF PARTICULAR TRADES.

Mechanics in the building trades have had a busy month. There has been a scarcity of carpenters. Blacksmiths, boilermakers, machinists and other metal workers have had a busy month. Upholsterers were quiet. Tailors were busy. Employees on the railways had an active month. Spare men have done fairly well. There has been plenty of work for the unskilled classes.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in general was very active during September, several large contracts being rushed to completion. There were no large building contracts let during the month, but all mechanics were busy. Planing mills were exceedingly busy, some running overtime. Carriage and wagon factories were running to their full capacity. The Canadian Wolverine Brass Company has enlarged its plant. The Defiance Iron Company has been unable to carry out its agreement with the city and was trying to arrange for another firm to take over its plant. If successful, a large number of hands will be employed. There has been no strikes. Labourers have received steady employment and in a number of instances, were in demand.

The evaporating factories commenced the last of the month and will continue

to run night and day as long as fruit lasts, employing a large number of hands.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy fall seeding. A large acreage of fall wheat was sown. The corn crop will be above the average, though the heavy frost, the last of the month did damage to the late corn. With the exception of plums which are a failure in this district, there is abundance of all kinds of fruits. Farmers who have hogs to sell are receiving record prices throughout the district. In the town of Blenheim the sum of \$500,000 alone was distributed among the farmers for hogs.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported contracts closing up, and carpenters and plasterers were active. Painters and paper-hangers had a quiet month, but plumbers and steam fitters were busy. Builders' labourers had steady employment.

Machinists, electrical workers and linemen were busy.

Woodworkers, carriage and wagon makers were busy.

Printers, pressmen, bookbinders and steel and copper plate printers were fairly busy.

Journeyman tailors, garment workers and boot and shoe workers reported trade improving.

Bakers and confectioners reported a steady trade.

Barbers, clerks, stenographers and delivery employees were busy.

Street railway employees have been busy.

Unskilled labour had an excellent month.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was never, in the history of the city a more active demand for labour

than in the past month, and prospects look good for some time to come. The demand was for all kinds of labour, skilled and unskilled, and male and female. This has been the greatest building year Windsor has seen, though last year the aggregate value reached \$298,000. This has been exceeded this year already. Up to Sept. 1st. the building permits recorded with the city engineer totalled \$318,000; the figures also show that Windsor is advancing rapidly as a factory city. The Postum Cereal Company of Battle Creek is erecting a Canadian branch here that will cost \$50,000. The Lupkin Rule Company is erecting a \$10,000 building, and the Seely Manufacturing Company is building a new laboratory costing \$14,000, while plans are out for another one to be built at an early date. These are all United States firms. The Windsor City Gas Company has a large gang of men at work laying pipes for natural gas which it expects to have here by the 1st of November from Tilbury. The price in the franchise is 25 cents a thousand from Nov. 1st to April 30th and 30 cents a thousand the rest of the year, which means cheap fuel to consumers as long as the gas lasts.

The last section of the Michigan Central tunnel on the Canadian side of the Detroit river has been laid, and two huge circular openings of steel and concrete connect the shores of the Detroit river. Work on the tunnel is rapidly approaching completion; they have reduced forces to about 180 men and expect to have trains running through by the first of the new year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fruit growers around Kingsville, Leamington and Olinda, which comprise the peach belt of this district, are congratulating themselves on the promising outlook for the crop. It is estimated that the yield of peaches this year will be half as much again as last year, and the crop last year was considered very fair.

CONDITION OF PARTICULAR TRADES.

Printers and pressmen had plenty of work.

Journeyman tailors and garment workers were very busy.

Bakers, butchers, ice drivers, cigar and tobacco workers were fully employed.

Leather workers were busy.

Barbers reported all employees working. Clerks and delivery employees were in demand.

Transportation workers were all fully employed.

Teamsters and unskilled labour were in demand.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month, both from a trade and an industrial standpoint, was a good one. Unskilled labour was scarce at \$2.00 per day. Retail trade, however, fell off slightly towards the end of the month. Weather conditions were responsible for this, as it was dull and cool.

The Algoma Steel Company's plant shut down for necessary repairs, relining of furnaces, etc. The shut-down was for about ten days. Notices are posted stating that all departments will commence operations on Monday, October 4th. The company is pushing the construction of a blast furnace, and of a structural and merchant bar rolling mill.

The Sault Ste. Marie Pulp and Paper Company reported business brisk, the demand being better than for some time past.

Lumbering operations are progressing briskly. Men are scarce at \$28.00 to \$30.00 per month.

The display of vegetables and roots at the annual fall fair showed what excellent results can be achieved here in agriculture. Additional experienced farmers are required.

The building trades were all brisk, and contractors reported it difficult to procure men. Other lines were well employed.

Local butchers reported a reduction in prices of meat, except in the case of

pork, which remained exceptionally high. Prices now are as follows:—

Roast beef, 8 to 15 cts. per lb.
 Beef steak, 10 to 15 cts. per lb.
 Boiled beef, 5 to 8 cts. per lb.
 Lamb, 9 to 16 cts. per lb.
 Mutton, 7 to 15 cts. per lb.
 Pork, 15 to 18 cts. per lb.
 Poultry and fowl, 15 cts. per lb.
 Chicken, 17 cts. per lb.
 Veal, 9 to 16 cts. per lb.
 Plates of beef, 5 cts.
 Fish, 10 cts.
 Liver, 5 cts. per lb.
 Eggs, 30 cts. per dozen.
 Dairy butter, 24 cts. per lb.
 Creamery butter, 30 cts. per lb.
 Flour, \$3.15 per bag.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. Fred. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

September has been a busy month for all workers in this district, and compared favourably with the preceding month, which was the busiest of the year. No new industries have been started, but established industries were fully employed. The building trade was particularly active, many new buildings being under way; as a consequence, all the workers in this branch were fully employed. Wholesale and retail trade was generally good throughout the district. An important increase in the rates of wages paid to the freight handlers of Fort William was granted after an investigation held under the "Industrial Disputes Investigation Act," whereby the men were awarded 20½ cents an hour for day work and 23½ cents an hour for night work, with a discontinuance of the bonus system. These men formerly received 17½ and 20 cents respectively for day and night work, with one cent an hour bonus if they remained at work until the end of the season. Freight handlers on the Canadian Northern Railway at Port Arthur, who remained at work on the promise that they should receive whatever the Fort William men were awarded, have also received the same increase, the new rate going into effect on August 16th.

In both cities extensive street improvements are being carried out, employing some hundreds of men. The street railway at Port Arthur is being extended along Arthur street, past the new Collegiate Institute now in course of erection, and along the Dawson road about one and a-half miles, employing about 120 men. The two new elevators which have been in course of erection are nearing completion.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—This industry was quiet.

Lumbering, manufacturing, and mining were active.

Railroad construction.—Busy conditions prevailed. Many men are engaged at this point for constructional work along the line of the Grand Trunk Pacific Railway.

CONDITION OF PARTICULAR TRADES.

The building trades were fully employed, especially stonecutters, there being many stone buildings under construction. Local iron workers have been busy, as were electrical workers, but there were enough men in the latter to meet all demands. Blacksmiths were busy. Sheet metal workers were fully employed, with plenty of work in prospect. Printers and pressmen had a busy month. Journeymen tailors were a little more active than last month. Transportation employees have had a busy month. There was a good demand for unskilled labour at wages from \$2.00 to \$2.50 a day.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GÉNÉRAL CONDITION OF THE LABOUR MARKET.

A dearth of labour existed during September. The supply, however, at the close of the month, is rapidly increasing in volume. The harvest in North Dakota has been gathered in and the labour employed there is returning to Manitoba. Towards the end of August,

a large number of non-English speaking labourers from Winnipeg and settlements within a short distance migrate to Minnesota and North Dakota where high wages are paid for harvest help. When wages in the farming districts between Winnipeg and the international boundary are on an average \$2.00 per day, rates on the other side of the line are \$2.50 and \$2.75. It is quite common for groups of men to walk the distance of a little over a hundred miles to harvesting points close to the international boundary line. This labour is now returning to Manitoba and is seeking re-employment. In every other class of employment, the demand for help is very strong—more so, comparatively speaking, than in any recent year.

Considerable progress was reported upon the construction of a manufacturing plant at Beausejour for the production of articles made of glass and glass itself.

Mr. F. W. Thompson, president of the Ogilvie Milling Company, has made an announcement to the effect that the mill owned by that company in Winnipeg will be doubled in capacity. The present capacity of the Winnipeg mill is 4,000 barrels per day. Mr. Thompson also announced that another large mill would be erected at some point further west than Winnipeg.

Exceptional building activity still continued in Winnipeg, and many new buildings of unusual size are reported as being about to be erected.

More than the usual amount of currency is being sent out to country points by the various banks for crop moving purposes, and the heavy transactions in wheat upon the Winnipeg Grain Exchange are causing the bank clearings to reach proportions much greater than have hitherto been recorded. For the months of September, respectively of 1907, 1908 and 1909, the bank clearings at Winnipeg were as follows: \$44,276,318; \$47,478,426; \$60,827,428.

Reports from wholesale as well as retail traders indicate a steadily increasing business, which is swelling proportionately as the farmers receive the proceeds of their wheat sales.

There has been no change of a general character in rates of wages.

The Western Canada Flour Mills during the month reduced the price of flour 20 cents per barrel. The lowest grade sells at \$1.55 and the highest, \$3.05. The present price of bread is 18 loaves for \$1.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The receipts of wheat at Winnipeg have been exceptionally heavy and the quality is averaging much higher than crop of recent years. For the month of September the cars inspected were as follows:—

Wheat—	Cars.
One hard.....	160
One northern.....	7,580
Two northern.....	6,216
Three northern.....	1,139
No. 4.....	72
Rejected, 1.....	328
Rejected, 2.....	121
No. grade.....	84
Rejected.....	531
No. 5.....	11
No. 6.....	2
	<hr/>
	15,154

Winter wheat—	
No. 1 Alberta red.....	15
No. 2 Alberta red.....	32
No. 3 Alberta red.....	21
No. 4.....	8
No. 5.....	16
	<hr/>
	92

For all classes of grains, the inspections for the month of September, 1909, and for the corresponding month of last year, were as follows:—

Totals—	1909	1908
Wheat.....	1,5246	9,847
Oats.....	1,285	595
Barley.....	775	544
Flax.....	58	32
Rye.....	1	..
	<hr/>	<hr/>
	17,365	11,018

Harvesting operations are still progressing satisfactorily, and are being aided by exceptionally fine weather. The yield of wheat, judging by actual threshing returns, is quite as good per acre as the estimators based their calculations upon. In Southern Manitoba the yield is an average one, about 14 bushels to the acre. but elsewhere, the average will be approximately 19 or 20 bushels to the acre. In a number of cases yields are reported as high as forty bushels and over per acre.

Railroad construction.—Men are still needed for this class of work, and contractors complain of being unable to get more men despite the fact that wages have been raised, as reported in September.

CONDITION OF PARTICULAR TRADES.

There has been no settlement of the various disputes in the building trades during the month of September. The Sheet Metal Workers' Union members, those of the Electrical Workers' Union, and of the carpenters', are on strike as against employers who have not signed agreements in accordance with the demands made by the men. In some cases the members of the Bricklayers' Union have refused to work on the same building with other classes of mechanics who are eligible but are not members of the unions whose members are on strike. Meanwhile all building appears to be going on that the supply of labour will permit. The wages being paid generally by the contractors are as follows: bricklayers, 60 cents per hour; carpenters, 40c.; plasterers, 50c.; plumbers, 50c.; stonecutters, 60c.; builders' labourers, 20 to 25c.; unskilled labour, 20c.

The following is a statement of the building returns for the city of Winnipeg up to and including September, also for the same period of 1908: for September, 1908, the permits were 202, the buildings 236 and the cost \$481,200. For September, 1909, the permits were 280, the buildings 321 and the cost \$801,050. For the nine months of 1908, permits were for 1,277, 1,472 buildings, and the cost \$4,722,700. For the nine months of 1909, permits were 2,112, buildings 2,487, and the cost \$8,348,750.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during September was active. There was a steady demand for harvesters and threshers, and in consequence,

all unskilled labour received better wages than for the past two years. The building trades, with the exception of bricklayers, were very busy. Advertisements appeared in local papers for carpenters and joiners. Work is progressing satisfactorily with the new bridge, and it is expected that the formal opening will take place next month. The City Engineer is preparing plans for a bridge over the Great Northern and C.P.R. tracks at Eighteenth Street. Work has commenced on the new freight sheds for the C.N.R., and the site for the new depot has been cleared in readiness for excavation. The addition to the C.P.R. depot is almost completed, and work has been started on a new boiler house. The stonework of the West End Methodist Church is completed, and the brickwork will be rushed, as the church has to be ready by January 1st. Several permits have been taken out during the past month, and the total number of permits far exceeds that of last year. Tenders are being called for the basement walls of a new building for the Sisters of St. Michael's Convent.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—From every section of the district, good crop reports have been sent in. Most of the crop is now threshed. There has been no damage by bad weather or frosts.

Manufacturing.—The Hanbury Manufacturing Company has been working overtime for a considerable period.

Bricklayers were dull, but masons were active. Carpenters and joiners were very busy. Lathers and plasterers were busy. Stonecutters were busy, and builders' labourers very busy.

REGINA, SASK., AND DISTRICT

Mr. Hugh Peat, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month was good. The building trades continued with the

same degree of activity that existed throughout July and August, and there was a steady demand for carpenters and labourers. Altogether, the month was a very good one for the trade and was a decided improvement over the corresponding period of last year. Bricklayers were the only artisans not in demand.

The Duncan and Willoughby block on Scarth Street is rapidly nearing completion, and it is anticipated that some of the stores will be ready for occupation by November 1st. The new Darke block is also completed and occupied. A number of substantial residences have been built during the summer in all parts of the city, and there are many still in course of construction.

The Journeymen Barbers' International Union of America, Local No. 591, was organized on August 24th, and the following officers elected for the current year: President, Allen Fleming; Vice-President, James B. Cram; Corresponding and Financial Secretary, H. S. Davis; Treasurer, A. Shaddick.

The corner stone of the New Parliament Buildings will be laid on October 4, by His Excellency, Earl Grey. Extensive preparations are being made to celebrate the event in a fitting manner, and the day will be made a public holiday.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—According to a bulletin recently issued by the Department of Agriculture, harvesting became general throughout the province as follows:

Wheat, August 23; oats, August, 24; barley, August 17; flax, August 29. Haying was retarded somewhat on account of water in the sloughs, but reports indicate that this hay will be made at a later date, the first two weeks of August having been splendid weather.

Threshing is in progress throughout the province but it is too early to give reliable figures regarding the yield.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were very active, with the exception of brick-

layers, for whom there was little demand. Electrical workers were very active; and painters and decorators, sheet metal workers, builders' labourers and ordinary labourers were all active. There was a good demand for the latter class of workmen.

Printers were quiet early in the month, but conditions improved considerably later. Bookbinders had a busy month.

Barbers and laundry workers were active. Cigarmakers were fairly active.

CALGARY, ALTA., AND DISTRICT.

Mr. Geo. Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued to improve. In the building trades, workmen were well employed, the demand exceeding the supply. The city council is continuing the paving of the avenues and streets. Excavations have been commenced for the new city library. Bank returns show a very large increase; the total clearings for the month were \$9,175,036 as against \$5,579,422 for September, 1908. Homestead entries were 874 as against 789 in August, 1909. 700 weight tickets were issued during the month by the market clerk, an increase of over 100 over last year. Customs returns were \$58,000 as against \$43,894.46 last year. Building permits for the month were for a total of \$280,737. Wholesalers and retailers reported increased business, also considerable improvement as compared with September of last year. There is every evidence of a continuance of activity until the end of the year.

CONDITION OF PARTICULAR TRADES.

The building trades were all fully employed, carpenters, bricklayers and stonecutters being especially in demand. The metal, woodworking, printing, clothing and other skilled trades were active, with additional unskilled labour in demand.

EDMONTON, ALTA., AND DISTRICT.

CONDITION OF PARTICULAR TRADES.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during the month was well employed, nearly all lines being active, both skilled and unskilled. The building trades were much better employed than in the previous month. A noticeable feature is the large number of business blocks under construction. During August, the number of building permits issued was 89, representing a value of \$208,707, compared with \$103,352 for August, 1908. Work is well under way on the roundhouse and machine shop of the Grand Trunk Pacific Railway Company. It is expected that the roundhouse will be completed early in the year.

On the 19th inst. the ratepayers refused to sanction the expenditure of an additional \$150,000 for street paving. The city owns extensive gravel beds which will be opened up next spring by an extension of the street car line, when cheap gravel can be procured and the cost of street paving greatly reduced.

Bank clearings for the month of August were \$4,500,161.37; in August, 1908, the total was \$4,003,995.16; Customs returns for August were \$25,779.23 and for the corresponding month of last year \$18,008.24.

Wholesale and retail trade was reported fair. There were no changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of the month saw the harvest, one of the best on record, saved in good condition.

Railroad construction.—The contractors are forwarding men and teams to their work on the McLeod and Wolf Creek bridges on the Grand Trunk Pacific. A large force of men are now at work putting up material and it is the intention of the Company to put every man and team possible on the work in order to rush its completion.

Mechanics in the building trades were well employed. Iron workers and helpers, machinists and engineers, steam engineers, electrical workers and linemen were busy. Blacksmiths and horse-shoers reported trade fair. Printers were busy and tailors very busy. Bakers and confectioners, meat cutters and butchers were busy and cigarmakers were very busy. Railroad employees reported traffic heavy. The supply of unskilled labour was equal to the demand.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay district during September was quiet, the supply of experienced miners again exceeding the demand, last month being the only exception to that condition for nearly two years past. The supply of both skilled and unskilled labour now slightly exceeds the requirements.

The City of Nelson still has a considerable force of workmen laying cement sidewalks, which work will be suspended when the fall rains set in.

The contract for the construction of the Y. M. C. A. building has been let to the firm of Thomas H. Waters and W. Pascoe at \$22,900.00, to be completed by 1st April 1910. The contractors have a force of men on the foundation.

Quartz mining generally is enjoying normal prosperity, about 600 men being employed at Rossland, about 500 at Moyie and about 500 at the Trail Smelter. The Sheep Creek Gold Mines are regular producers of gold bricks, with adjacent prospects in that territory gradually developing into paying mines.

The "Lucky Jim" mine of the Slocan district, a zinc with some silver and lead producer, is paying good dividends to its owners this year, having shipped previous to August 20th, 30 carloads of ore. The

net returns to the Mining Company after paying transportation charges amounted to \$26,258.29, or a little over \$875.00 per car.

The Canadian Pacific Railway Company has a force of men engaged in repairing the railway line from Three Forks to Sandon which has been out of use since last spring owing to damage done by freshets.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. D. J. Stewart, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been no lack of employment in this district and this condition is likely to continue until the wet weather sets in. The passing of certain by-laws has made it possible for the city to undertake some very necessary and important works in connection with extensions of the sewer system and improvements to roads. A contract for 75,000 feet of steel water pipe was given to a contractor who has agreed to move his plant to this city; this will be the means of providing employment for about 40 men all year, it being expected that other work of this nature will be secured from outside points. About 75 men are being employed in painting the steel bridge which crosses the Fraser River at this point; several tons of paint will be required for this work which will not be completed before next year. The Canadian Mexican line of steamers will make this city a port of call, provided wharfage accommodation can be secured, and arrangements are being made to supply this. The electric road between this city and Eburne is now completed and in operation; this will be the means of opening up some of the best agricultural lands in this province, and will make possible the success of small fruit, vegetable, and poultry farms, providing as it will a market in the city of Vancouver. The annual Provincial exhibition, which opens here on the 12th

proximo promises to exceed all previous records particularly in the number of district exhibits, competition being keen for the first prize in this class.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural conditions were active and will likely continue so until the crops are harvested. The hay crop, which gave poor promise in the early part of the season, has proved to be much better than expected, while the grain crops are better in some localities than for some years past. Root crops are also better this year so that the farmer generally speaking will reap good results from his labours. The following are market quotations:

Beef hind quarters, 8 to 9 cts. per lb.
 Beef fore quarters, 5 to 6 cts. per lb.
 Lamb, 14 to 15 cts. per lb.
 Mutton, 11 to 12 cts. per lb.
 Veal, 10 to 12 cts. per lb.
 Pork, 11 to 12 cts. per lb.
 Eggs, retail, 45 cts. per dozen.
 Butter, retail, 30 cts. per lb.
 Fowl, \$6.50 to \$7.50 per dozen.
 Ducks, \$9 to \$10 per dozen.
 Potatoes, \$12 to \$14.00 per ton.
 Apples, \$1.00 to \$5.50 per box.

Fishing.—The fishing season which closed for sockeye salmon on the 25th ult., was not as successful as anticipated, and the close found the canners with a large quantity of empty cans on hand. The total pack for the Fraser River is expected to be about 420,000 cases and for the whole Province about 625,000 cases. The season for coho salmon which opened on the 21st inst., has proved that the same date can not be safely set each year for the taking of sockeye salmon, it being reported that the nets thrown out for cohoes are finding many sockeye salmon also.

Lumbering.—Conditions are flourishing and some of the mills are finding it necessary to work overtime in order to keep pace with orders. One mill on the Fraser River shipped, during the month of August last, 250 cars of lumber to Eastern points some going east as far as the Great Lakes; the same mill produced during the month 10,987,404 feet B. M. of lumber, cutting in one day of 10 hours 410,700 feet B. M.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, plumbers, gas and steam fitters, builders, labourers, iron workers, iron moulders, machinists, engineers, and blacksmiths were active. Car builders (electric) were busy, with shingle weavers active. Printers, pressmen, journeymen tailors, boot and shoe workers. Bakers and confectioners were active with butchers quiet. Cigarmakers were active. Clerks and stenographers, were quiet with laundry workers active. Steamboat men, and street railway men were active, also unskilled labourers.

VANCOUVER, B.C., AN DISTRICT.

Mr. George Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During September, markets maintained firmness and prices remained high. Oats, however, became slightly cheaper as the new crop arrived. The autumn fruits made their appearance.

The labour market maintained a normal condition in the skilled trades, but owing to a poor fishing season and the unsettled condition of labour affairs in the north, the number of unskilled workers exceeded the demand.

There was a heavy demand for bricks. At present they are imported from England and the United States. In consequence the Pacific Pressed Brick Company, limited, was organized, and will manufacture brick by the Steger system.

The B. C. Power Company called for tenders for the erection of five large sub-stations. The buildings are to be of concrete.

The Board of Trade passed a strong resolution in favor of the city controlling the waterfront on False Creek, the proposed terminal of the Great Northern Railway, Northern Pacific Railway and the Grand Trunk Pacific Railway.

The O'Brien block, corner Hastings and Homer streets was sold for \$175,000. The site is 52 x 120 feet. The N. E. corner of Granville and Helmcken streets

75 x 120 feet, was sold for \$75,000. On Hastings street east a two-storey building and lot was sold for \$65,000.

The Summer Iron Works Company of Everett, Wash., will erect a plant, one mile east of the city, on the G. N. R. to cost \$300,000.

On Oct. 23rd, the ratepayers will vote on by-laws to approve expenditures of over \$1,000,000 for civic enterprises.

The Fruit Magazine Publishing Company was organized with a capital of \$15,000.

Freight traffic was very heavy for the north.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were active and good prices prevailed.

Fishing.—River or fresh water fishing was very quiet. Deep sea fishing, however, was very active.

Lumbering.—The demand for lumber improved.

CONDITIONS OF PARTICULAR TRADES.

Carpenters were fairly well employed as a result of a large number of new dwelling houses being erected in the city and vicinity. The large amount of building being done will give steady employment, weather permitting, for the balance of the season.

The iron trades were busier than this time a year ago. Some large orders are nearing completion, and prospects are uncertain.

The planing mills and sash and door factories were busy. On the 24th, a \$100,000 fire loss was sustained by the Huntling sawmill.

Woodworkers were well employed, though there were a number of idle new arrivals. Printers were inactive, tailors and cigarmakers were very quiet. The leather trades were fair. Steamboat men, street railway men, teamsters and expressmen were active.

DISTRICT NOTES.

North Vancouver.—The Seymour Lumber Company was incorporated with a capital of \$100,000.

The first ocean liner to discharge cargo at this port was the *Lonsdale* of the Canadian Mexican line. On the 19th, she left here with a large shipment of machinery for Dawson. The shipyards were very active. House building was also active.

Queen Charlotte Islands, Jedway.—Prospectors report the topographical features of the mining districts very rough and that incessant rains prevailed this year.

A trail, 30 miles inland from Honna Creek, was cleared. A large amount of work is going on the quartz claims and a number of settlers have located on Graham Island.

Prince Rupert.—Over 3,000 tons of steel rails arrived for the G. T. P. from Sydney, C. B.,

A contract to extend the G. T. P. in front of the townsite $3\frac{1}{2}$ miles has been let for \$500,000. If double tracked it will cost about \$1,000,000.

Eight miles of water mains will be put in at once, the cost of which will be \$5.00 a yard for rock and 55 cents for earth.

There was a good demand for labourers, but not in the skilled trades.

During the first week of September over \$230,000 worth of the railway company's property was sold, bringing the total sales of the company's lots to over \$1,250,000. This with the governments sales totalled over \$2,000,000.

Anville Island.—The brick yards are very busy. Orders are in for a year ahead. In January next, the yards will be equipped with a new plant, giving work to about 150 men.

VICTORIA, B.C., AND DISTRICT.

Mr. W. E. Ditchburn, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour of all classes was well employed during the past month, more particularly in the building trades, building still keeping up with unabated activity. During August there were forty-three buildings permits issued, entailing an expenditure of \$141,040 as against fifty-

three permits issued in the same month of last year representing an expenditure of \$134,750. Contractors express the opinion that this will be the largest year in the history of Victoria as far as building is concerned. To date, the permits issued amount to \$1,302,360 overlapping the same period of last year by over half a million dollars. The figures for the first eight months of last year were \$761,620. The monthly figures for this year to September 1, compared with those of last year, are as follows:—

Month.	1909.	1908.
January.....	\$4,235,476	\$4,391,096
February.....	4,321,379	4,271,712
March.....	4,940,269	4,290,782
April.....	5,529,870	4,634,079
May.....	5,407,596	4,695,269
June.....	6,452,155	4,500,812
July.....	6,051,953	4,940,811
August.....	5,718,680	4,259,231

Eight months.....\$ 42,657,374 \$35,600,564

The business of the city is in a very healthy state. The bank clearings for the month of August, amounted to \$5,718,680, as against \$4,259,231 for the same month of last year. The aggregate for the eight months of this year show an increase over the corresponding period of last year of \$7,056,814.

Another slight increase in the customs shows that trade is brisk. The customs returns for August were one thousand dollars in excess of the July returns. There was also a considerable increase in the revenue from Chinese. The returns for July and August are as follows:

	July.	August.
Duty.....	\$94,788.25	\$95,707.92
Chinese.....	51,082.00	65,594.00
Other revenues.....	111.03	13.10

\$ 145,981.28\$ 161,315.02

The total for the month of August of last year was \$126,385.15 or about \$35,500 less than the month of August of the present year.

With the increase of business some commodities have risen in price. Fresh eggs are now 45 cents per dozen and Island and Mainland creamery butter is 50 cents a pound. Potatoes have dropped to \$1.00 per peck, while the wholesale price of flour has decreased 40 cents per barrel, the retail price still remains unchanged.

There were no trade disputes during the month. The condition prevailing in the leather trade is still as reported last month, none of the shops with the exception of the B. C. Saddlery Company granting the increase demanded by the men.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting is about completed in this section of the county and reports are that the crops will be above the average. It is claimed that the fruit crop will not be quite up to the average on account of damage by early frosts, and owing to the backward summer.

Fishing.—With the exception of the catching of spring salmon, which are cured and shipped to Europe, the salmon fishing season is over for the present year.

Whaling.—A new Whaling Company, has been floated and the site for a station located at Huff Harbor at the South of the Queen Charlotte Islands. Machinery has been ordered and it is anticipated that the stations will be in operation within a few months.

Lumbering.—All the mills and logging camps are endeavouring to keep up with orders. The lumbering industry may be reported in good condition.

Other industries.—A new cement factory is to be established in Esquimalt Harbour, a company having been formed financed by local and British capital, to the extent of half a million dollars for the purpose of manufacturing Portland cement, when the works are completed, which will be in the near future, they will give employment to a large number of hands.

Road construction. The provincial government has just let a contract for the mountain section of what is known as the Mill Bay wagon road. This section will be ten miles long, and the amount of the contract is \$130,000, the work will give employment to a large number of rock men, labourers, drivers and tool sharpeners.

Smelting.—The Irondale Steel and Smelting Company of Irondale, Washington, is in communication with the city coun-

cil, with reference to the amount of assistance the city would give as an inducement to make Victoria the headquarters of a smelting and steel industry in British Columbia. The company has large holdings of iron on this island.

CONDITION OF PARTICULAR TRADES.

All classes in the building trades report a very busy month, and the prospects are bright for months to come.

Moulders and iron workers and helpers reported trades in a normal condition. Machinists, steam engineers and electrical workers were all working full time. Blacksmith and tool sharpeners reported conditions favourable. Shipwrights and caulkers were not very busy, being principally on repair work. Boiler makers and iron ship builders were somewhat quiet.

Employment at the furniture factory was normal no extra help being employed.

Newspaper printing was still active, the Colonist is installing another linotype in the news room. Book and job printing has fallen off to a slight extent during the past month. There are now ten job printing offices here. Bookbinding is considered normal.

Journeymen tailors and garment workers reported trade good.

Cigarmakers were all working full time.

Barbers, clerks, delivery employees, hotel and restaurant employees were very brisk.

Owing to the heavy travel to this city during the summer months all employed by the transportation companies have found plenty of work.

Very few unskilled workmen were noted during the month. The city hall pay roll now amounts to about \$50,000 per month and the bulk of this goes to unskilled labour.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has been good, there being fewer men

idle than during the latter part of August or during the same time last year. Outside labour has been very well employed. A branch of the Merchants Bank was opened in this city on September 27.

Wholesale and retail dealers reported business good.

The contract between the Western Fuel Company and its employees expired Sept. 30. The men formed a committee which met the Company and a new contract has been signed for the term of two years, the company agreeing to pay the same scale of wages as under the old contract.

The city waterworks extension is nearly completed and the new supply has been turned on.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Work in the logging camps has been steady, there being a good demand for good logs. The sawmills in the district were also running steadily, some of them working night and day.

Railroad construction.—The contract for the grading and bridging of the Alberni extension of the railway will be

let in a few days. The C. P. R. Company has let a new contract to clear 1,000 acres of land for settlement.

Mines.—There was very little activity among the Quartz mines. The local coal mines were working steadily, not having lost a day this month. The coal mines at Cumberland were not as active, but the other mines in the district were working full time and there were few idle men around the mines.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet, but carpenters and joiners were very busy, as there is a lot of work to be finished before the wet season sets in. Painters and paperhangers were busy.

Plumbers reported work active. Builders' labourers were in fair demand.

Blacksmiths and carriage makers reported work active.

Printers have been fairly active.

Teamsters and expressmen have been busy.

Unskilled labour has been in fair demand, but there are a few men looking for work now.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF SEPTEMBER, 1909.

DURING the month of September the Department received one application for the establishment of a Board of Conciliation and Investigation, namely, on behalf of roundhouse employees of the Intercolonial Railway, members of the Canadian Brotherhood of Railroad Employees, Division No. 15, Halifax, the dispute affecting, it is alleged, 20 employees directly and 1,000 indirectly.

Report Received.

During September, the Department received the report of the Board of Conciliation and Investigation to which had been referred certain differences between the Corporation of the City of Saskatoon, Sask., and unskilled labourers, members of Saskatoon Federal Labour Union, No.

12,801, employed on trench work, sewer work and municipal public utilities in the City of Saskatoon.

Other Proceedings under the Act.

In the case of the dispute between the Intercolonial Railway and certain of its roundhouse employees at Halifax, N.S., members of the Canadian Brotherhood of Railroad Employees, Division No. 15, it was alleged that members of this organization had been unjustly discriminated against on account of their being active members of the Brotherhood. Mr. Aaron A. R. Mosher, of Halifax, N.S., and Mr. James H. Gilmour, of Brockville, Ont., were appointed members of this Board on the recommendation respectively of the employees and of the Government Railways Managing Board, and in the

absence of any joint recommendation from the foregoing, the Board was completed on September 25 by the appoint-

ment by the Minister of Labour of Sir George N. Garneau, Knt., Mayor of Quebec, as Chairman.

1. REPORT OF BOARD IN DISPUTE BETWEEN THE CORPORATION OF THE CITY OF SASKATOON, SASK., AND CERTAIN LABOURERS.

ON September 9, the Minister of Labour received the report of the Board established in the matter of a dispute between the Corporation of the City of Saskatoon, Sask., and certain labourers, members of the Saskatoon Federal Labour Union No. 12,801. The report as received was signed by Mr. E. J. Meilicke, of Dundurn, Sask., Chairman, and by Mr. Alexander Smith, of Saskatoon, Sask., member appointed on the recommendation of the city. The name of Mr. E. J. Stephenson, member appointed on the recommendation of the employees, was not appended to the report, but at the close of the month, no dissenting report had been received from Mr. Stephenson.

The differences referred for investigation were set forth in the report of the Board as follows, namely:—

1. That twenty-five cents per hour be the minimum rate of pay for all unskilled labour;

2. That all contractors or corporations conducting public works shall furnish adequate cribbing after a depth of six feet; also that the Board of Works shall acquaint the above mentioned contractor or corporation with the Saskatchewan Workmen's Compensation Act;

3. That it be mentioned in all contracts that residents be employed as far as possible;

4. That all public works shall provide proper sanitary arrangements for employees;

5. That all contractors and corporations shall pay employees fortnightly and not keep more than one day's pay on hand. Also that the aforementioned pay shall be in cash, and not in the form of cheques.

The number of employees affected by this dispute was 150 directly and 150 indirectly. Mr. Edward J. Stephenson, of Winnipeg, Man., and Mr. Alexander Smith, of Saskatoon, Sask., were appoint-

ed members of the Board on the recommendation respectively of the employees concerned and of the civic authorities of Saskatoon, and in the absence of a joint recommendation from the foregoing, the Board was completed, on August 4, by the appointment by the Minister of Labour of Mr. E. J. Meilicke, of Dundurn, Sask., as Chairman. The Board held fifteen sessions in all, and heard twenty-three witnesses in support of the employees' complaints, and nine on behalf of the City of Saskatoon, the points in dispute being taken up in turn until all were disposed of as far as possible. In the report of the Board it is stated that "the parties to the dispute reached an agreement on all the differences except the minimum wage scale and recognition of the Federal Labour Union."

At the end of the month the Department had not been informed whether the findings of the Board were acceptable to the parties concerned, but it was understood that no cessation of work had taken place.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

SASKATOON, SASK., Sept. 4, 1909.

To the

HONOURABLE MACKENZIE KING,
Minister of Labour,
Ottawa.

Sir:—On the third of July, 1909, an application was made for the appointment of a Board of Conciliation and Investigation to adjust differences between the members of the Saskatoon Federal Labour Union No. 12,801, and the Corporation of the City of Saskatoon, Saskatchewan. The application was made on behalf of

the employees and signed by Alfred J. Sibley and Albert E. Edjington, both of the City of Saskatoon.

The Board, which was duly constituted on August 13th, 1909, consisted of E. Stephenson, Winnipeg, recommended by the employees, Alexander Smith, of Saskatoon, recommended by the Corporation of the City of Saskatoon, and E. J. Meilicke, of Dundurn, appointed by the Minister of Labour. Honore Jaxon, A. J. Sibley and Francis Kuntz, President of the Federal Labour Union, appeared on behalf of the labourers, and Mayor Hopkins and Alderman McIntosh, Chairman of the Board of Works, appeared on behalf of the City.

The Board held its first session in the Court House, Saskatoon, on August 13th, 1909, at the hour of ten o'clock a.m., having been furnished with approved copies from the Minister of Labour of the claims of the Labour Union and replies thereto from the Corporation of the City of Saskatoon.

The differences referred for investigation were demands on the part of the employees, as follows, viz.:—

1. That twenty-five cents per hour be the minimum rate of pay for all unskilled labour.

2. That all contractors or corporations conducting public works shall furnish adequate cribbing after a depth of six feet; also that the Board of Works shall acquaint the above mentioned contractor or corporation with the Saskatchewan Workmen's Compensation Act.

3. That it be mentioned in all contracts that residents be employed as far as possible.

4. That all public works shall provide proper sanitary arrangements for employees.

5. That all contractors and corporations shall pay employees fortnightly and not keep more than one day's pay on hand. Also that the aforementioned pay shall be in cash, and not in the form of cheques.

The City's replies to the complaints are as follows, viz.:—

1. The Corporation pays twenty cents per hour for unskilled labour. This is the full value of such labour in Saskatoon.

2. All trench work done by it is substantially and carefully protected with cribbing.

3. It employs resident labourers as far as possible.

4. No complaint has ever been made to the City Engineer of lack of sanitary arrangements.

5. Wages were paid regularly every fortnight.

6. Employees are never discharged without a satisfactory reason.

7. The civic works are properly inspected, and due care taken of the life, limb and health of the employees.

8. The accident mentioned in the application, by the caving in of trenches, did not happen upon works carried on by the Corporation.

9. The proposal that the Board of Works shall acquaint contractors with the provisions of the law is quite unreasonable. Firms and corporations can acquaint themselves with the public Statutes, and the workmen's unions may do so in case they think their interests require it.

10. A clause is inserted in all Corporation contracts requiring resident labourers to be employed as far as possible.

After several exchanges of ideas as to how to proceed, it was decided that each party to the dispute be heard, and evidence submitted under oath dealing with the several points in dispute.

The representatives of the Labour Unions subpoenaed several witnesses in support of their contentions, and were in turn submitted to a cross-examination by the representatives of the City. Before the Board rose at twelve o'clock noon, it was suggested by the Board that the parties to the dispute get together and try to agree on the points, in which, to the mind of the Board, there did not seem to be any great difference; and if such agreement could be reached it would dispose of those issues, thus expediting the proceedings of the Board, and would obviate references to them when dealing with further witnesses.

This suggestion was not agreed to, but insistence made that the whole evidence must be placed before the Board. At

this point, the Board was asked, owing to the complicated nature of the case, to ask permission of the Minister of Labour to employ a stenographer to take report of all the proceedings. This request was entertained by the Board, and a message to that effect sent to the Department. The Board adjourned to meet at three o'clock p.m., anticipating a reply from the Department of Labour to their telegram. At the hour set for the adjourned meeting the Board resumed its sittings, when shortly after the reply came from the Department setting forth that experience has shown that proceedings of Boards have been, on the whole, more satisfactory where evidence taken informally and no verbatim reports obtained, which view was concurred in by the majority of the Board.

The Board decided that morning sessions should begin at nine o'clock a.m., and end at twelve o'clock noon; and afternoon sessions should begin at two o'clock p.m. and continue until half past five p.m., adjourning from time to time to give the fullest opportunity of presenting all the evidence available, and for the purpose of getting the parties to the dispute together with the object of effecting a settlement.

The Board held fifteen sessions in all, and heard twenty-three witnesses in support of the Federal Labour Union's complaints and nine on behalf of the City of Saskatoon.

The different points of the dispute were taken up seriatim until all were disposed of as far as possible, and on such the Board beg leave to report as follows:—

The most vital point submitted to the Board for investigation was the question of wages; the labourers asking an advance of 25% on the minimum wage paid by the City.

Complaint 1.—In support of this complaint, much evidence was submitted as to the cost of living, for the purpose of showing that for the support of the labourer 25c. per hour as a minimum is necessary; also a letter from the Vancouver Civic Employee's Union No. 1, setting forth that 30c. is paid there. The City on the other hand produced evidence setting forth that 20c. per hour as a minimum

wage is as high as is paid in any city in the west for unskilled labour, and that a labourer can live on that wage in Saskatoon. The following cities were put in as evidence.

Prince Albert, 20c.	Moose Jaw, 20c.
Regina, 20c.	Winnipeg, 20c.
Brandon, 17c.	

At the present time the City of Saskatoon is paying 22½c. and 25c. per hour for unskilled labour. Every effort has been expended by the Board to bring the two parties together on this point.

It was suggested by the Chairman, and agreed to by the representative of the City, that an offer of 20c. per hour as the minimum wage for unskilled labour be made to the employees, with the exception of the months of August, September and October, when the minimum wage would be 22½c., but the Board could not prevail on either party to recede from its position.

Complaint 2.—The latter part of the complaint referring to the Saskatchewan Workmen's Compensation Act was withdrawn by the Labour Union. The former part is embodied in all the Corporation's and Contractors' contracts.

In order to eliminate and reduce as much as possible the element of danger to which labourers are more or less exposed while engaged at their work in the trench, the Board made a personal examination of the works and consulted with one of the most eminent engineers in the the Dominion of Canada, and as a result of that consultation, recommended that the following be added to the paragraph as already in the contract, and which was unhesitatingly assented to by the City, viz.:—

“That all lumber used as uprights in cribbing should be commercial or reputed two-inch plank. In cases where quicksand is evident, then one-inch lumber to be used in such a way as to be doubled, at the same time overlapping the cracks. Width from six inches upwards, to be free from shakes, loose knots or rot. Wallings to be of sound plank 2" x 10" or 3" x 8a”

“Struts to be used of red pine, spruce or tamarack. No sawn lumber to be used.

The minimum diameter of struts to be 3" for trenches three feet wide between the dirt; one inch additional in diameter for each additional foot of length of strut. No poplar wood to be used, but any other wood approved of by the engineer may be used."

It was brought out in evidence that it is the desire of the City that workmen be protected from accidents as far as it can be made possible; inspectors continually looking after the works. As evidence that they have been fairly successful, it is known that up to the present time no accident of a serious nature occurred on the Corporation works.

Complaint 3.—A clause such as is asked for is already in all Corporation contracts. The Board recommended that the following be added to the above contract clause:—

"The contractors must see that they are in possession of that information which will enable them to adhere closely to the clause. Workmen not to be imported directly or indirectly except when necessary in the public interests to carry on the work in progress or in contemplation expeditiously."

The representative of the Labour Union on the Board uncompromisingly insisted that to make this clause operative to his satisfaction the Federal Labour Union as a Union must be recognized. This position was interjected after all the evidence had been submitted, and while the Board was engaged in making out report; the other members of the Board taking the stand that as recognition of the Union was not made in the Schedule of Complaints or demands, it could not be now entertained or considered by the Board.

The City maintains that as the City of Saskatoon is peculiarly situated as being the centre of a very large newly developing agricultural district, and to a very large extent at present depends on the progress of agriculture for its prosperity—this district being newly settled to a large extent by homesteaders, many of whom are men of small means who from force of circumstances at certain seasons of the year are obliged to earn by their labour that ready cash which will enable them

to subsist and make the necessary improvements on their homesteads until such time as they receive returns from the product of the soil—in view of this fact, the City is averse to having any conditions imposed upon the willing worker by recognizing the claims of the Union that "none but Union men be employed as long as available." The City claims that the progress which has characterized the City would be jeopardized, and the Country's development as a whole would suffer in consequence.

Complaint 4.—On representation being made to the City by the labourers as to the necessity of providing sanitary arrangements for their use while on works, the same were provided by the different contractors as per instructions from the Board of Works of the City, and were in use before the first sitting of the Board. Assurance was given that in future such sanitary arrangements would be provided.

Complaint 5.—The City Act of the Province of Saskatchewan, page 11, section 51, reads as follows:—

"The Treasurer shall daily or as often as the Council may direct deposit in the name of the City in some chartered bank designated by resolution of the Council, all moneys received by him in excess of \$100.00, and he shall jointly with the Mayor sign all necessary cheques," thus preventing the City from complying with the demands set forth in this complaint. The City agrees to have the demand as in Clause 5 inserted in its entirety in all future contracts, except the words "or Corporation."

Complaint—"Discharge of Employees without a reason being given."

It was agreed that a reason be given when an employee was discharged, and if such reason be asked in writing that it be made in duplicate; one copy to be given to the employee, the other to be filed with the chairman of the Board of Works.

The parties to the dispute reached an agreement on all the differences except the minimum wages scale and the recognition of the Federal Labour Union.

So long as the two parties to the dispute maintain their present attitude respecting these two clauses, conciliation is absolutely impossible. The Board has exhausted every resource within its power to bring about the much desired conciliation, but, owing to the determined stand

taken by both parties on the two aforementioned points, such is impossible.

Chairman.

(Sgd.) ALEX. SMITH.

**THE INDUSTRIAL DISPUTES PREVENTION ACT OF THE TRANSVAAL—LAW
MODELLED ON THE INDUSTRIAL DISPUTES INVESTIGATION
ACT, 1907, OF CANADA.**

REFERENCE was made in the August number of the *Labour Gazette* to the introduction of a Bill in the Transvaal Parliament for the prevention of strikes which was modelled somewhat closely on the lines of the Industrial Disputes Investigation Act, 1907, of Canada. A letter received by the Minister of Labour on September 27, from the Honourable Jacob de Villiers, Minister of Mines of the Transvaal, contains the information that the measure in question has now become law. Honourable Mr. de Villiers' letter is in the following terms:

"I have to thank you for your letter of the 24th July last, and also for the very interesting documents which have been forwarded by Mr. Acland, the Deputy Minister of Labour.

"I enclose a copy of the Industrial Disputes' Act, as passed in the Transvaal Parliament at its last Session. I regret that I am unable to forward you the official reports of the Debate, as they are not at present available, but will do so later.

"The Bill, as you will see, is modelled on practically identical lines with the Canadian Act; changes being made merely to suit differences in local conditions. The Bill received the support of all sections of Parliament, the principle of conciliation and investigation being accepted in preference to that of compulsory arbitration.

"In preparing and introducing the Bill, I was much assisted by the valuable reports published by your Department.

"I wish to tender you the thanks of my Government for your kind offer of co-operation and assistance, which I greatly value and reciprocate."

The title of the Act as passed is "An Act to establish a Department of Labour in this Colony, to aid in the prevention of strikes amongst employees or lockouts by employers, and to make provision for the settlement of Industrial Disputes by Conciliation after Investigation." The short title is "The Industrial Disputes Prevention Act, 1909."

In the first clause of the Act it is provided that "this Act in so far as it contains provisions to aid in the prevention of strike and lockouts, and for the settlement of industrial disputes by conciliation after investigation shall apply to the following undertakings, trades, or industries, namely:—

"(a) The mining industry;

"(b) Any undertaking carried on by a local authority for the supply of gas, electric light, water, or power, or for tramway, or sanitary services;

"(c) Any other undertaking, trade, or industry to which the Governor may, by proclamation in the *Gazette*, apply those provisions.

"In so far as it relates to other matters this Act shall apply to all undertakings, trades, and industries."

In Chapter II of the Act, which aims at the prevention of industrial disputes, strikes and lockouts pending investigation, provision is made for notice prior to alterations in wages, etc., or hours of employment, and for the continuance of existing conditions in respect of the same pending investigation by a Board of Conciliation and Investigation. It is also made unlawful to declare either lockout or strike pending reference of any dispute to a board, and severe penalties are pro-

vided for to ensure the observance of the law in this respect.

Chapter III of the Act deals with the appointment of Boards of Conciliation and Investigation, and advises the manner in which applications shall be made for the establishment of such boards, the remuneration of members of boards, etc.

Chapter IV, of the act deals with the procedure before boards, their duties and jurisdiction.

The Industrial Disputes Prevention Act of the Transvaal also contemplates and provides for the establishment of a Department of Labour, and for the appointment of an Inspector of White Labour. Among the duties assigned to the Inspector of White Labour are the keeping of a registration of applications for Boards of Conciliation and Investigation; the keeping of a register of all unemployed white persons; the keeping of a register of all private registry offices,

including the inspection of the books of such offices; the establishment of branch registers or labour bureaux for the collection of information in regard to the conditions of labour, domestic or industrial, and the state of trade in various localities; investigation into causes of any lack of employment among white persons; investigation, on the instructions of the Minister, of complaints of ill-treatment of white employees and the conditions of their employment; the reporting from time to time of labour movements and the conditions of labour in the Transvaal and elsewhere; the supervision of conditions of apprenticeship in any undertaking, trade or industry.

The term "employee" under the Act means "any white person engaged by an employer to perform for hire or reward manual, clerical, or supervision work in any undertaking, trade, or industry to which this Act applies."

THE TRADES AND LABOUR CONGRESS OF CANADA.—TWENTY-FIFTH ANNUAL CONVENTION.

THE twenty-fifth annual convention of the Trades and Labour Congress of Canada was held in the City of Quebec, Que., from the 20th to the 24th of September. The sessions were held in one of the committee rooms of the Provincial Legislature.

At the opening session an address of welcome on behalf of the labour organizations of the City of Quebec was delivered by Mr. J. Desrosiers, President of the Quebec and Levis Federated Trades and Labour Council; Sir Lomer Gouin, Premier of the Province of Quebec, and Sir George N. Garneau, Knt., Mayor of the City of Quebec, also delivered addresses of welcome. By special invitation of the executive committee, the Honourable W. L. Mackenzie King, Minister of Labour, addressed the convention at the opening session. Mr. Jerome Jones, of Atlanta, Ga., fraternal delegate from the American Federation of Labour, and Mr. Will Crooks, member of the British Labour Party in the British House of Commons, also spoké at the opening proceedings.

The report of the Credential Committee showed that there were 124 delegates entitled to seats, of which 34 delegates represented 22 trades and labour councils, and 90 delegates represented 70 trades unions. There was also one fraternal delegate.

Report of the Executive Council.

The following is a summary of reports presented by the Executive Council, the Provincial Executive Committees, the Solicitor of the Congress and the British Agent respectively, all of which were referred to the Committee on Officers' Reports.

The Executive Council's report opened with a reference to the progress of organization among wage-earners, and the results attained thereby since the previous convention held in the City of Quebec, thirteen years ago. On the subject of militarism, it was stated that unless the workers take a strong stand against the introduction of military training in the schools and the expenditure of large sums

of money for military purposes, the prospect appears to be that the small minority in favour of such a movement will be successful; it was recommended that the Congress take the lead in calling a convention of all peace-loving citizens in Canada for the purpose of presenting to Parliament the views of those opposed to the movement. Gratification was expressed at the creation of a separate portfolio for labour in the Dominion Government, and it was stated that every assistance would be given to the Minister that would in any way make for the betterment of the people at large. The delegates were asked to co-operate in order to make the work of the Department of Labour a success. On the 12th of January, 1909, the following matters were laid before the Dominion Government for consideration:

Amendments desired to be made to the Industrial Disputes Investigation Act, 1907; the abolition of bonuses on immigrants, etc.; the establishment of an old age pension fund; a request for an eight-hour day for telegraphers and for employees on government contracts; the strict enforcement of the fair wage law and the prohibition of contracting out, as well as the appointment of additional fair wage officers; the appointment of inspectors of gear and tackle; the appointment of a commission on technical education; the demand for an increase in the salaries of the letter carriers; the abolition of the \$200 deposit in election contests and the proclamation of election day as a compulsory legal holiday; a protest against the sale or lease of the Intercolonial Railway, and the amendments desired to the Alien Labor Act.

The calling out of the militia in connection with the strike of the coal miners at Glace Bay, N.S., was, in the opinion of the Executive, unwarranted and their protracted stay unjustifiable. While Congress is not an advocate nor a defender of violence, it does not believe that the public arm should be easily invoked on behalf of a private corporation. It was recommended that the whole matter be thoroughly ventilated and appropriate resolutions passed. In regard to the question of holding an Imperial Labour Conference in 1910, submitted by the British Labour Party, to consider matters of interest common to the working class in all parts of the British Dominions, it was recommended that a favourable reply be made and that the Executive have power to send a delegate should the finances permit. After a reference to the annual convention of the

American Federation of Labour to be held in Toronto, Ont., next month, gratification was expressed at the action of the Postmaster General in granting an increase of about \$150.00 in the salaries of letter carriers. The defeat of the bill introduced in the Senate providing for the exclusion of the officers of international trade unions from Canada was reported, and attention directed to the reports of the Provincial Executives for detailed accounts of the progress of legislation. It was stated that the work of organization among the wage earners was still continuing. The Committee recommended that the efforts of Congress to secure the abolition of all assisted and bonused immigration be continued. Certain amendments to the Industrial Disputes Investigation Act had been prepared, and it was believed that they will be adopted by the Government. The report concluded with a reference to the legal proceedings in the United States against the American Federation of Labour and expressed hope for the ultimate success of that organization.

Reports of Provincial Executives.

Reports were presented from all the provinces, except one, showing the work which had been carried out during the past year. The following is a summary:

BRITISH COLUMBIA.

The Provincial Executive for British Columbia referred to the steady progress which had attended the efforts of the wage-earners during the past year, and gave an account of the subjects brought to the attention of the Provincial Government for consideration, and the reply of the Premier thereto. The following matters were submitted: a protest against bonused, subsidized or assisted immigration; a request for the abolition of the election deposit and the removal of all restrictions upon a free franchise; request for the appointment of a factory inspector; request for the extension of the policy of supplying free text books; the establishment of a sanatorium at Tranquille to be operated as a free public

institution; the establishment of a bureau of statistics; a recommendation that all government work be done by day labour; a request for the extension of the act exempting the funds of labour unions from attachment, to realty and other property of such organizations; assistance to night schools; in favour of granting licenses to hand-loggers; asking for the following conditions on all works and industries in the province (a) a legal day of not more than eight hours or not more than six days per week; (b) a minimum wage; (c) the payment of wages at intervals of not more than two weeks; Government ownership and operation of public utilities, such as coal mines, telephones, canneries, etc. It was also stated that as a result of the regulations governing the immigration of orientals put into force by the Federal Government, the competition by Orientals for employment has been less of a menace to the workingmen of British Columbia this year and the presence of Asiatics has interfered less with the breadwinners of the province in obtaining a living than in any other year since immigration from Asia commenced.

ALBERTA.

The Provincial Vice-President reported that the labour movement in the province was in a very unsettled condition, and it was requested that special efforts be made to provide means for organization work. Little attention had been paid to securing any legislative enactments.

SASKATCHEWAN.

Satisfactory progress was reported in the extension of labour organizations in the province, though little had been done in the direction of the formation of an independent labour party. The aid of the Provincial Government had been secured in settling the strike of the labourers for higher wages on the Legislative Buildings in course of erection in Regina, with the result that the authorities had made an investigation into the rates of wages paid in other parts of the province,

and an increase of $17\frac{1}{2}$ to $22\frac{1}{2}$ cents per hour was granted by the contractors. Persistent efforts had been made to have a fair wage officer appointed, and the necessity was pointed out for the passing of a Factory Act and the amendment of the City Act so as to extend the municipal franchise.

MANITOBA.

The committee for Manitoba reported that the general labour movement did not show much change in that province. The need of a new Workmen's Compensation Act, and for a better administration of the Factory Act had been brought to the attention of the Legislature. A Workmen's Compensation bill was introduced in the Legislature, but after being read the second time, owing to opposition in the law amendments committee, was withdrawn pending an inquiry to be made into the subject of compensation by the Legislature. Assistance had been given to the Social and Moral Reform Council in temperance and other reform work in the province.

ONTARIO.

On March 30, 1909, the Provincial Executive Committee for Ontario, waited on the Ontario Government and presented the following requests for its consideration:—the passage of a plumbing ordinance for the province; the necessity of seeing that fair wage clauses in provincial contracts are carried out; and the advisability of granting legislation to cities, Toronto in, particular, to enforce fair wage clauses in municipal contracts. The latter request was refused. Opposition was made to assisted immigration, particularly that of the Salvation Army. Support was given to an 8-hour bill then before the Legislature. Aid to technical schools was urged, as was also favourable consideration of certain legislation desired by street railway employees.

QUEBEC.

The Executive Committee for Quebec referred in its report to the election of

the president of the Congress to the House of Commons in the election held in October, 1908, and also to the affiliations which have been made with the Labour party of the Province. Note was made of the election of two of the members of the Executive to offices in their respective international organizations. Account was given of an interview with the Provincial Government held in February last when the following matters were presented for consideration. Abolition of property qualification for municipal office; the abolition of the electoral deposit; the appointment of additional factory inspectors; the insertion of fair wage clauses in contracts awarded by the Provincial Government; the supplying of free school books and free and compulsory education; and the removal of old wall paper before new paper is put on. The committee was of the opinion that the appointment of delegates to the various governments to make known the desires of the congress was advisable, and recommended the appointment of representatives to attend all sessions of the various legislatures. Reference was made to the progress of the labour movement in the province and the necessity for organizers who could speak both English and French.

NEW BRUNSWICK.

The executive for this province stated that the income tax law as it applied to the City of Moncton had been amended by raising the exemption from \$300.00 to \$600.00. Reference was also made to the unions which had been organized in the province.

NOVA SCOTIA.

Efforts have been made to have the Provincial Government pass a Workmen's Compensation Act, but so far without success. The Factories and Shops' Acts were amended with respect to the employment of Child and Female Labour.¹ The Sydney Trades and Labour Council has secured the placing of a fair wage clause in all civic contracts; wages are

to be adjusted by a Committee of the City Council and the Executive of the Trades and Labour Council. A satisfactory schedule had been arranged, with nine hours per day for all classes of labour.

Report of the Fraternal Delegate to the American Federation of Labour.

Mr. P. M. Draper, of Ottawa, fraternal delegate to the 28th annual convention of the American Federation of Labour, held in Denver, Col., November 9 to 21, 1908, presented a report showing the number of delegates, the financial standing and the more important resolutions adopted by the convention.

Expenses of the British Agent.

A statement accompanied the Executive reports showing the contributions received for the purpose of maintaining an agent in Great Britain to prevent undesirable immigration to Canada. The receipts amounted to \$2,049.27, and the expenditure to \$2,048.25.

The Parliamentary Solicitor's Report.

Mr. John G. O'Donoghue, the parliamentary solicitor of the Congress, in presenting his report stated that from a labour standpoint, the work of the last session of the Dominion Parliament had been satisfactory, in that it witnessed (1) the creation of a separate portfolio for Labour with a responsible minister in charge (2) the defeat of a bill to outlaw the officers of international trade unions and (3) an increase in the salaries of letter carriers. The report was presented under the following heads: Dominion Election Act; Alien Labour Act; Department of Labour; Eight-hour Day; Proposed amendments to the Lemieux Act; Immigration; Incorporation of Salvation Army; Eight-hour Day for Telegraphers; Inspection of Vessels; Abolition of the Senate; Wages of Freight Clerks on the Intercolonial Railway at Halifax and St. John; Increase of pay to Letter Carriers; Old Age Pensions; Co-operation; Proposed Amendment to Election Act; Proposed

¹See the *Labour Gazette* for September, 1909. page 333.

Amendment to Railway Act; the Militia; the McMullen Bill; Technical Education; and Proportional Representation. Mr. O'Donoghue gave a concise explanation of the various matters dealt with and replied to questions asked by the delegates.

Report of the British Agent.

Mr. W. R. Trotter, the agent of the Congress in Great Britain, gave, in his report, an account of places visited, newspaper comment and criticism of his mission, transportation companies' literature, emigration boards and societies and the operations of the Salvation Army in regard to emigration. Owing to alleged misleading statements in the literature of the transportation companies, Mr. Trotter recommended that such printed matter be censored by the Canadian Government, and also that the date of publication be stamped on all Government immigration literature.

Report of Committee on Officers' Reports.

The Committee to which the various officers' reports were referred, recommended concurrence and also asked the Congress to reaffirm its former position in favour of the abolition of deposits in Federal elections and the making of election day a public holiday, in favour of an eight-hour day on Government contracts, and in favour of old age pensions and technical education. The Committee was of the opinion that letter carriers should be given one day a week off, exclusive of Sunday.

Amendments of Industrial Disputes Investigation Act Suggested.

The amendments of the Industrial Disputes Investigation Act suggested in the Solicitor's report were approved. These provided for striking out the clause requiring that in the statutory declaration demanded from a party making application for the appointing of a board, the necessary authority to declare a lockout or strike shall be stated to have been obtained,

as well as for eliminating the necessity of taking a vote of members of a union which desires to invoke the act, before making application for a Board of Conciliation and Investigation. Another amendment proposed to repeal the present section of the Act in respect to remuneration, which requires an allowance of \$20 per day to chairmen of boards and \$.5 per day to the other members in the case of all-day sitting and half those amounts in the case of half day sittings, and to substitute therefor an allowance of \$25 to each member for each day's sitting of a board.

The repeal of Section 57 is also desired and the following offered in lieu thereof.

"Employers and employees shall give at least thirty days' notice of an intended change affecting conditions of employment or with respect to wages or hours. In the event of such change not being accepted by the employer or the employees affected, the party who has given such notice shall, upon being notified of such non-acceptance, apply for the appointment of a Board under this Act to investigate the proposed change; and in every such case, until the dispute has been finally dealt with by the Board, neither the employer nor the employees affected shall alter the conditions of employment or the wages or hours, or on account of the dispute do or be concerned in doing, directly or indirectly, anything in the nature of a lock-out or strike, or a suspension or discontinuance of employment or work, but the relationship of employer and employee shall continue uninterrupted by the dispute or anything arising out of the dispute. Any violation hereof shall constitute an offence, and the guilty party shall be subject, if an employer, to the penalty imposed by section 58 of this Act, and if an employee, to that imposed by section 59 of this Act.

"If, in the opinion of the Board, either party uses this or any other provision of this Act for the purpose of unjustly maintaining a given condition of affairs through delay, and the Board so reports to the Minister, such party shall be guilty of an offence, and liable to the same penalties imposed for a violation of the next preceding section.

Under Section 57 as at present, the necessity of applying for a Board devolves upon the party disaffected by a change of the kind referred to.

The report of the Committee was adopted.

Report of the Secretary-Treasurer.

The report of the Secretary-Treasurer showed that the total receipts from all sources, including balance from last year, amounted to \$7,899.47. The expenditure was \$6,667.74, leaving a balance of \$1,231.73.

The following table shows the sources of revenue:

Balance on hand, Sept. 23rd, 1908....	\$1,464.35
Receipts from per capita tax, char- ters and supplies....	5,785.12
American Federation of Labour, grant for Legislative purposes....	500.00
Brewery Workers' Int. Union grant for organization work....	100.00
Advertisement in proceedings....	50.00

Total receipts from all sources... \$7,899.47

The Secretary-Treasurer also report-
ed that the membership directly affili-
ated was 36,071, in addition to which
there were 46 trades and labour coun-
cils holding charters from the Congress
representing approximately over 100,-
000 members.

As illustrative of the growth of the
Congress it was stated that when the
Convention previously met in Quebec,
in 1896, the revenue was \$255.26, and
the membership about 3,000.

The Audit Committee, to which the
report was referred, recommended its
adoption, which was carried.

Organization Work.

Mr. W. R. Trotter gave a report of
organization work done in the prov-
ince of Ontario since his return to Can-
ada in July last. He referred to
several questions which had presented
themselves to him during his itinerary,
and suggested ways in which some of
the trades and labour councils of the
Dominion might be strengthened.

Mr. Gustave Francq of Montreal,
presented a report of organization
work carried on in the Province of Que-
bec since the close of the last conven-
tion in Halifax. An account was given
of the places visited and the degree of
success attending the work. It was
recommended that the work of organi-
zation be continued.

Moral and Social Reform.

Mr. James Simpson, of Toronto, on
behalf of the Congress' representatives
to the Moral and Social Reform Coun-
cil, read a full and carefully prepared
report on the various subjects dealt
with during the past year, and sub-
mitted recommendations which the
Council had made in connection there-
with. Mr. Simpson also referred to
different social reform laws which had
been enacted, through the advocacy of

the Moral and Social Reform Council,
and recommended the continuance of
affiliation with that body.

Rev. J. G. Shearer, of Toronto, sec-
retary of the Moral and Social Reform
Council of Canada, at one of the ses-
sions of the Congress gave an account
of the work of the Council and asked
for support for the following reforms
which it was intended to bring to the
attention of the proper authorities: (1)
reform in the treatment of criminals by
probationary and indeterminate sen-
tences; (2) suppression of the white
slave traffic, (3) and the abolition of
race-track betting. At a subsequent
session resolutions bearing on the
above matters were submitted and
adopted.

Fraternal Greetings.

Mr. Jerome Jones, of Atlanta, Ga.,
fraternal delegate from the American
Federation of Labour, in extending the
greetings of that body, gave an ac-
count of the progress which had been
made by organized labour during the
past year. Mr. Jones referred to var-
ious laws which had been enacted in
the United States for the benefit of
wage-earners through the efforts of or-
ganized labour, and closed with a plea
for international peace.

Mr. Chas. L. Baine, of Boston, Mass.,
general secretary-treasurer of the Boot
and Shoe Workers' Union, was accord-
ed the privilege of addressing the dele-
gates at one of the sessions. Mr. Baine
referred to the friendly relations exist-
ing between the wage-earners of Can-
ada and the United States and pointed
out the advantages of affiliation.

Mr. P. J. Jobin, of Quebec, an ex-
president of the Congress, was invited
to address the delegates. He gave an
account of the work of the Congress
during its early days, and made an ap-
peal for unity among the wage-earners
of the Dominion.

Mr. John Charters, organizer of the
International Printing Pressmen and
Assistants' Union, during an address to
the delegates, gave a statement of the
work that his organization is doing for
its members in securing better condi-

tions of employment, with particular reference to the efforts being made to stamp out the spread of tuberculosis.

Infernal Affairs.

An addition was made to the constitution providing that the Executive Committee appoint all standing committees on the first morning of the opening day of each convention. Herebefore the committees were elected.

It was decided to bond the secretary-treasurer in the sum of \$2,000.00.

Each affiliated organization will hereafter be furnished with a detailed statement of receipts and expenditures.

It was resolved to send copies of the annual convention proceedings to professors of economics in colleges and universities and all churches affiliated with the Social and Moral Reform Council.

Appropriations.

The Ways and Means Committee recommended the following expenditures, which were approved: Secretary-Treasurer, \$700.00; fraternal delegate to the American Federation of Labour, \$100.00; solicitor, for attendance at convention, \$100.00; caretaker of convention hall, \$10.00; translator, \$15.00; chairwoman, \$10.00; Social and Moral Reform Council, \$50.00; allowance to president to attend A. F. of L. convention, \$50.00; hotel expenses of the fraternal delegate from the American Federation of Labour.

Government Annuities.

Mr. S. T. Bastedo, Superintendent of Government Annuities, at one of the sessions gave a lucid description of the provisions of the Government Annuities Act, 1908. Mr. Bastedo explained the advantages of taking out annuities, which were absolutely secure, and were administered without charge to the annuitant. The various plans on which payment may be made were described.* A brief discussion followed, and upon motion, the matter of government an-

nuities was referred to the executive, to report upon the question at the next convention.

Resolutions Submitted.

Nearly sixty resolutions were introduced. These were referred to the Committee on Resolutions, which in many cases amended or offered substitutes for the originals. Account is given in the following record only of such resolutions as were concurred in.

The Glace Bay Coal Strike.

The following resolution in reference to the strike of members of the United Mine Workers of America at Glace Bay was concurred in:

"That whereas the United Mine Workers of America at the request of the miners of Nova Scotia extended their jurisdiction to that province, and

"Whereas an organization known as the Provincial Workmen's Association has disobeyed the mandate of the majority of the members in deciding to join the United Workers, and

"Whereas the Dominion Coal Company realizing the weakness of the provincial organization and the strength of the international organization discriminated against the members of the international union to their detriment and to the advantage of the members of the provincial organization, and

"Whereas the United Mine Workers were compelled to declare a strike to prevent discrimination after a Board of Investigation under the Lemieux Act had declared that there was no discrimination but merely preference shown, and

"Whereas the members of the Provincial Workmen's Association refused to join the United Mine Workers in their struggle with the Dominion Coal Company, and continued to work as an auxiliary to the Company in their determination to defeat the United Mine Workers.

"Therefore be it resolved that this Congress strongly condemn the action of the Provincial Workmen's Association as inconsistent with the highest claims of the trade union movement and unanimously endorse the stand taken by the United Mine Workers of America, and further,

"Resolved, that it would be in the best interest of the wage earners living in houses owned by corporations if legislation was obtained prohibiting eviction during times of strikes, providing strikers pay their rent, and be, it further,

"Resolved, that this Congress condemn the overriding of municipal authority in calling out the military ostensibly to protect property and permit workmen to go to work, when in the case of the Springhill strike, and under similar circumstances, it was deemed inadvisable to call out the military, notwithstanding the fact that there was property to protect and workmen to defend, and be it further,

"Resolved, that we express our admiration of the United Mine Workers in their protracted struggle and assure them of the hearty moral support of the thousands of trade unionists."

A further resolution which was adopted asked the Dominion Govern-

* The text of Mr. Bastedo's address is published under a special heading elsewhere in the present issue.

ment to appoint a Royal Commission to investigate the calling out of the militia at Glace Bay, the conduct of the militia while there, the disregard of the law, both municipal, provincial and Dominion, the conduct of the officials supposed to administer the law, the arrest of Mr. D. McDougall and all other circumstances surrounding the dispute between the Dominion Coal Company and the United Mine Workers at Glace Bay.

Immigration.

The special committee appointed to consider the subject of immigration presented the following report:

"Your committee have made a careful review of the reports of Solicitor O'Donoghue and British Agent Trotter and we concur in their reports and recommendations, and also in the former policy of the Congress as enunciated from time to time with regard to immigration, and we recommend a continuation of this policy, and would also recommend that the attention of the Government be called to the abuses of the bonus system as outlined in the various reports submitted, more particularly with regard to the Salvation Army methods and that a copy of all proofs in the possession of this Congress shall accompany our protest against their propaganda of misrepresentation, and further we believe that the work of education carried on during the past two years in Great Britain has been productive of much good, and we believe that if the incoming executive can see their way clear to do so, this work should be continued."

The following additional resolution was also presented:

"That this Congress use its influence to procure proper protection for Canadian workmen against the horde of Japanese coolies that have been flooding our country for the past 10 or 15 years, by either getting our Government to pass a law that will absolutely exclude the Japanese from our country or by getting the Governments of both Canada and Japan to come to some substantial agreement by which the Canadian workmen can be assured that it is the intention of our Government to guard their interests against this growing evil."

After considerable discussion the report of the Committee and the above resolution were concurred in.

In connection with Oriental immigration it was decided to ask the British Columbia executive committee to act as statisticians and furnish the general executive with all necessary data.

Two telegrams protesting against the suggested relaxation of the regulations regarding the immigration of Orientals to expedite work on the Grand Trunk Pacific which had been received

were referred to the Executive Committee for action.

Militarism.

The discussion on the subject of militarism was the most protracted of the convention and the accompanying resolution thereon was unanimously passed:

"Whereas, in the opinion of this Congress, war is an evil which all workers should seek to eliminate; and

"Whereas representatives of the various nations and others have approached the subject of peace conferences at the Hague and elsewhere with the view of insuring international peace; and,

"Whereas, this Congress, representing as it does the wage earners of Canada, on which class falls in the last analysis the entire cost and burden of constituting, equipping and maintaining the armed forces of destruction; and

"Whereas, in view of the inevitable loss the race is subjected to by the competitive system of defence that calls for the forsaking of the higher walks of useful pursuit for the destruction of life and property by those upon whom war eventually reacts most disastrously, and

"Whereas, this Congress believes that the day of peace will dawn when the wage earners of all lands will have decided that they have nothing to gain by fighting each other and that life to the wage-earner is of greater import to himself and those depending upon him than is the gain of selfish and ruling governments, therefore, be it

"Resolved, by the Trades and Labour Congress of Canada in convention assembled, that it does hereby express its disapproval of aggressive warfare, and that the subject in all its phases have full discussion by all central and affiliated labour bodies with the view of being in a position to discourage the same whenever and wherever the opportunity presents itself; and be it further resolved that copies of this resolution be forwarded to all labour papers, trade union journals and secretaries of every labour organization; and be it still further resolved that the Executive of the Congress act as a special peace committee in the event of the call of any peace conference in Canada, and to deal with all matters arising in connection with such questions, and that a referendum of the people of Canada be taken by the Dominion Government before any expense is incurred for defence."

Education in Quebec.

On the introduction of the appended resolution, the position of the educational system in the Province of Quebec was explained by delegates from that province, who pointed out the lack of uniformity in the text books and the higher price of the same as compared with school books in other provinces:

"Whereas, despite the reiterated demands of the Executive Committee of the Province of Quebec, to obtain for our schools free and uniform text books, justice has not been granted; and

"Whereas the law made by the Provincial Government does not apply to all school commissions, but only to the Montreal Catholic School Commission; and

"Whereas the Catholic School Commission of Montreal refuses to comply with this law, and this case is pending at the present time before the Court of Appeals; and

"Whereas, the school system existing in our Province renders obligatory on the working class a cost four times greater for their school books than in other provinces; therefore be it

"Resolved, that the school code be amended so that uniformity in books may obtain, not only in one municipality but in all municipalities of the province; and it be

"Further resolved that the Provincial Government call for tenders for the printing of copy books and other school books, and that they be sold at cost pending their gratuitous distribution."

The resolution was adopted.

Canadian Manufacturers' Association Committee Report.

Attention having been called to certain statements made by the ex-president of the Canadian Manufacturers' Association at the recent meeting of the Association in Hamilton, a committee was appointed to prepare a reply thereto. The report of the Committee was presented in the form of a resolution which deprecated the repeating of misrepresentations with respect to the officers of international trade unions. Objection was also taken to the reported approval by the Lieutenant-Governor of Ontario of the statements made, and it was recommended that the matter be brought to the attention of the proper authorities. This was agreed to.

Private Constables.

The following resolution protesting against the employment of private constables was adopted unanimously:

"Resolved that this Congress emphatically protest against the practice of allowing private corporations to employ private constables with the powers of regular police; and be it further

"Resolved, that whenever the requirements of public safety demand the employment of extra police protection, the particular municipality involved should assume control and pay every extra man necessary under such conditions; and be it further

"Resolved that if the present practice is to continue the law should be enforced for the protection of all citizens."

Legislation Desired.

Resolutions asking for amendments of existing laws or the introduction of new legislation were adopted as follows:

In favour of Federal legislation with regard to co-operative trading.

That the Provincial Executive Committees ask the Provincial Governments in their respective provinces for legislation restricting the hours of work for shop assistants to eight per day.

That Provincial Executive Committees seek legislation for an eight-hour day on Sundays for street and electric railway employees.

Asking for amendment to the Ontario Assessment Act providing for a lower rate of assessment on improvements than on land values.

In favour of the abolition of property qualifications and deposits in elections.

That the Government of Quebec be asked to pass a law reducing hours of employment in factories.

Prohibiting any railway to carry passengers, mail or freight, unless the road is modernly equipped.

Reaffirming the former request of the Congress that loan, friendly and other societies deposit authenticated quarterly reports with a responsible government officer showing possession of funds sufficient to cover all obligations.

That the Government of Ontario be requested to prohibit the sale or purchase of any second-hand bottle or jar and also the sale of any merchandise put in any second-hand bottle or jar.

Prohibiting the use of running boards on street cars and in favour of all cars being built with centre aisles; also requiring all rear platforms on pay-as-you-enter cars on street railways to be inclosed.

That Executive Committees ask for Provincial legislation providing for the removal of old wall paper before new is put on.

In favour of the rates of wages in the metal trades at the Government ship yards at Sorel, Que., being referred to the Department of Labour with a view to having the same adjusted.

Asking for the appointment of a fair wage officer for each province, with full power to ensure that all conditions of the schedule are adhered to on all bonused and subsidized industries, and also that a penalty clause be inserted in Government contracts to be enforced in case of violation of any of the terms of such contracts.

Asking that means be taken to have employment bureaus maintained by the municipalities, in cities of 75,000 or over, and that the transactions of said bureaus shall be reported to the public quarterly.

Condemning the practice of street railway companies in compelling motormen and conductors to work seven days per week, and asking the Provincial Governments to enforce the law ensuring one day's rest in every seven.

Reiterating the position of Congress that all employers of labour be compelled to pay all employees at no longer intervals than fourteen days and in current coin.

Miscellaneous Resolutions.

The following resolutions of a miscellaneous character were approved:

"That the General Executive select a few of the more important matters of concern to labour for which legislation is desired and concentrate their efforts for their enactment.

That the Congress ask for the revoking or annulling of the charter of the Provincial Barbers' Association of Quebec on the grounds that it is only a speculative institution.

Against the sale of the Intercolonial Railway to a private company.

Approving of the action of the American Federation of Labour in placing an organizer in Eastern Canada, and recommending that Mr. Joseph Ainey's appointment be made permanent.

In favour of asking the Federal Government and the Railway Commission to have uniforms worn by civil and railway employees manufactured by union labour and to bear the union label.

That the Quebec Executive Committee be instructed to endeavour to have the factory act of the province enforced in foundries.

In favour of the solicitor, in conjunction with the General Executive, looking into the incorporation acts of the different provinces and preparing such amendments as may ensure confidence and safe investment as under the laws governing Canadian banks.

Against the infliction of fines by employers for the violation of factory rules.

Indorsing cigarmakers, boot and shoe workers and all other bona fide union labels, and in favour of an "Honor Roll" to promote the purchase of union label goods.

Indorsing the action of the Canadian Peace Association in petitioning the Dominion Government to join with the United States in holding a demonstration in commemoration of a century of peace between the two countries.

Pledging support to the boot and shoe workers on strike in Fredericton, N.B.

Against members of the civil service, both federal and provincial, accepting outside employment.

In favour of all trades and labour councils holding charters from the Congress maintaining neutrality as a council in all elections where there is no direct and absolutely independent candidate representing labour.

Pledging moral support to brewery workers in their endeavour to complete the organization of their craft in Canada.

In favour of the Ontario Labour Educational Association in its efforts to provide employment for the unemployed and pledging moral support.

That the General Executive oppose any attempt to increase the election deposit in Dominion elections.

Indorsing the action of the Plumbers' Union of Winnipeg in taking an appeal against the decision of the Manitoba courts in reference to picketing to the Privy Council and asking for moral and financial assistance from trade unions.

Asking for the support of members of Parliament for every effort to shorten the hours of labour, and in the event of refusal, reasons for same to be sought.

Asking for the appointment of a competent appraiser to inspect all imported granite.

Asking the Government of Quebec to enforce the insolvency law empowering liquidators of bankrupt estates to pay wages due as first claims.

That Congress reaffirm its former position on technical education, and ask the Dominion Government to appoint a commission to make inquiry on the subject, and that Mr. James Simpson, of Toronto, be appointed on said commission.

Asking the Federal Government to manufacture all leather horse goods required for the public service.

It having been reported that the fair wage clause as adopted by the Province of Quebec

was being violated on the technical school being erected in Montreal, a resolution was passed asking that the Congress protest against the alleged violation.

Officers, 1909-10.

The following officers were elected for the ensuing term:

President—Wm. Glocking, Toronto, Ont.

Vice-President—Gustave Franco, Montreal, Que.

Secretary-Treasurer—P. M. Draper, Ottawa, Ont.

PROVINCIAL EXECUTIVE COMMITTEES.

BRITISH COLUMBIA.

Vice-President—J. C. Watters, Victoria; G. G. McGeer, Vancouver; Phil Parker, Revelstoke; J. A. Ackin, Vancouver.

SASKATCHEWAN.

Vice-President—Jas. Somerville, Moose Jaw; Hugh Peat, Regina; Chas. Perry, Saskatoon; W. Tilston, Moose Jaw.

MANITOBA.

Vice-President—W. J. Bartlett, Winnipeg; W. N. Goodwin, Winnipeg; R. C. Ward, Winnipeg; R. Riggs, Winnipeg.

ONTARIO.

Vice-President—F. Bancroft, Toronto; Fred Ury, Port Arthur; Eugene Cadieux, Ottawa; Joseph T. Marks, London.

QUEBEC.

Vice-President—Fred Robert, Montreal; Jos. Ainey, Montreal; M. Welsh, Quebec; J. C. McClellan, Montreal.

NEW BRUNSWICK.

Vice-President—L. F. Wallace, Moncton; Jas. B. Johnson, McAdam Jct.; Alex. Gibb, St. John; Chas. Smith, Moncton.

NOVA SCOTIA.

Vice-President—John T. Joy, Halifax; Percy Clancy, Halifax; Geo. Murray, Truro; S. Gregory, Sydney.

Fraternal delegate to American Federation of Labour—Mr. Fred Bancroft, Toronto, Ont.

The selection of the vice-presidents and committees for the provinces of Prince Edward Island and Alberta was referred to the General Executive.

Fort William, Ont., was chosen as the next place of meeting.

THE CANADIAN FEDERATION OF LABOUR.—FIRST ANNUAL CONVENTION.

THE first annual convention of the Canadian Federation of Labour began in the City of Ottawa, Ont., on the

28th of September and continued for the three following days. Addresses of welcome were extended by His Worship

Mayor Charles Hopewell and Controller Nap. Champagne. Mr. James W. Patterson, President of the Federation replied to the addresses. Mr. John Moffatt, of Dominion, N.S., Grand Secretary of the Provincial Workmen's Association, Mr. Z. Berube, of Quebec, Que., and Mr. A. C. Tresham, of Brantford, Ont., also took part in the opening proceedings. The Honourable W. L. Mackenzie King, Minister of Labour, was unable to be present owing to a previous engagement.

The Credential Committee reported that forty-six delegates were entitled to seats at the convention. These represented two trades and labour councils and twenty-six unions. There were also three fraternal delegates—two from the Provincial Workmen's Association and one from the Canadian Brotherhood of Railway Employees.

The President's Address.

The following is a synopsis of the President's address as read to the delegates:

Careful consideration was urged for all business coming before the convention and a hearty welcome was extended to the fraternal delegates. In reference to the progress which had been made during the first ten months of the existence of the Federation, the organization had, it was stated, become recognized as a powerful factor in the future trade union movement of Canada. Under the heading of militarism, the President, while stating that labour organizations are traditionally opposed to militarism in any form, suggested that the matter be considered from the standpoint of Canada alone, and expressed the opinion that military and physical exercises in the schools for both boys and girls should meet with the approval of the Federation. Regarding technical schools, it was stated that it would appear to be in the general interest, if each province would aid in establishing such a school in each large industrial centre and model farms in the unsettled parts of the province where the rudimentary principles of farming might be taught free of charge. In order to aid people to settle on the unoccupied lands,

the President recommended that the Provincial Governments be asked to adopt some system whereby loans could be made to settlers at a low rate of interest and under conditions which would encourage emigration from the cities to the land. While many matters of importance would come before the convention, the future growth and advancement of the Canadian Federation of Labour should engage the most serious thought. In conclusion, attention was called to the statements which were made at the recent meeting of the Trades and Labour Congress of Canada in the resolutions passed by that body in regard to the Provincial Workmen's Association and suggested that the scope of the Royal Commission which had been asked for by the Trades and Labour Congress of Canada to inquire into the presence of the militia at Glace Bay be extended so as to include inquiry into the source of the money spent there by the United Mine Workers.

General Executive Report.

The report of the General Executive stated that while there had been some losses in the ranks, there had been many gains, notwithstanding the opposition of international unions. Owing to the expenditure necessary to establish the Federation on a proper basis, and the per capita tax decided upon at the previous convention being a small one, it was found that there was not sufficient funds to maintain a paid travelling organizer.

It was recommended that full consideration be given to the question of ways and means. A number of changes in the constitution were submitted. An increase in the honorarium to be paid to the secretary-treasurer was recommended. Under the heading of the status of foreign organizations, the Committee considered that the Government should appoint a commission to inquire into the matter. In reference to imperial defence it was suggested that the Federation put itself on record in favour of a voluntary military service and approving of a naval policy consistent with Canadian necessities and resources, acting in harmony with the other portions of the British Empire, but preserving complete Canadian autonomy.

in control, and that all warships or military equipment, as far as possible, be built and manufactured in Canada.

Gratification was expressed at the establishment of a separate portfolio of Labour and congratulations were extended to the Honourable W. L. Mackenzie King on his appointment as Minister of Labour. Attention was called to the drastic manner in which the American Alien Labour Law is enforced along the border line, and a recommendation made that the Government be requested to open negotiations with the United States Government with a view of preventing the humiliation of Canadians crossing into the United States. In regard to immigration, the committee was of the opinion that while the various governments are honestly endeavouring to regulate immigration, special care should be taken as to the class of people coming in. It was recommended that the Government be asked to extend the scope of the Lemieux Act so as to include all classes of industrial disputes, and that the Government be urged to pass the co-operative bill which was passed in the House of Commons, but was defeated in the Senate. Approval of the imposition of an export duty on logs by the Quebec Government was recorded and recommendation made that the incoming executive wait on the Government before leaving Ottawa and present the matters which should be brought to its attention.

Ontario Executive Report.

The Committee for Ontario expressed the belief that the determination of the Canadian workmen to think and act for themselves is year by year making a greater impression on the community. While the work in Ontario has not progressed owing to strenuous opposition and the apathy of the members, the report stated that the Federation is holding its own, but urged the necessity of steps being taken to propagate the objects of the association. It recommended that all existing organizations of Canadian affiliations alone be communicated with, with a view of securing amalgamation. In regard to immigration, the Committee recommended that representations be

made to the Federal and Provincial Governments for a stricter supervision of the class of immigrants being brought to this country.

Quebec Executive Report.

The Committee for Quebec reported the passage by the Legislature of a Workmen's Compensation Law, which will come into force in January 1910. General progress in national trade unionism was recorded. Two references of trade disputes under the Lemieux Act had been made and in each case, the award had been accepted as satisfactory. Mention was also made of the success of the woodworkers of St. Romuald in their strike against a wage reduction.

Committee on Reports.

The report of the Committee on President's address and Executive Committee's Reports recommended concurrence, with the additional recommendation that the establishing of an official organ in English and French be considered by the Executive Committee, but that the Provincial Executives be consulted before final action. The recommendations were adopted.

Report of Secretary-Treasurer.

The report of the Secretary-Treasurer showed that the receipts for the year, with the balance on hand, amounted to \$1,317.64; and the expenditure \$998.85, leaving a balance of \$318.79.

Six charters were issued during the year.

The Audit Committee reported having examined the books and recommended that the report be adopted. This was concurred in.

Organization.

Mr. T. J. Griffiths of Montreal, Que., formerly general organizer of the Federation presented a statement of the work which he had performed during his tenure of office, which had necessarily been limited owing to funds being required for other purposes.

Ways and Means.

The Ways and Means Committee recommended that the revenue be derived as heretofore by a per capita tax; that the secretary-treasurer's honorarium be increased to \$200.00 and that the customary grants be made by the convention. The report was adopted.

Affiliation of Provincial Workmen's Association and Canadian Brotherhood of Railway Employees.

A special committee was appointed to confer with the fraternal delegates from the Provincial Workmen's Association and the Canadian Brotherhood of Railway Employees with a view of devising means for the affiliation of these bodies with the Canadian Federation of Labour.

The Committee subsequently reported that an agreement for amalgamation, which was satisfactory to the Canadian Federation of Labour Executive, had been reached, but that the terms of the same had to be submitted to the Provincial Workmen's Association and the Canadian Brotherhood of Railway Employees for their ratification. It was finally resolved to concur in the work of the Committee, and to empower the incoming executive to conclude the details with the officers of the above mentioned organizations.

A resolution welcoming the fraternal delegates from the Provincial Workmen's Association and the Canadian Brotherhood of Railway Employees and extending congratulations to both associations on the accomplishment of an arrangement for affiliation, as well as according the representatives present the full privileges of the convention, was carried unanimously.

Constitution Amended.

The amendments to the constitution suggested in the report of the General Executive were adopted on recommendation of the Committee on President's address and Officers' Reports with some additional clauses.

Article 1, Sec. 2. was amended to read as follows:—

Its purpose shall be to organize the working classes of Canada into Canadian Federated Trades Unions. All Unions when organized, to be grouped in accordance with the particular branch of industry it belongs.

The appended three sections were added:

Sec. 3. When three or more Unions are formed in any group, there shall be elected from their number by a referendum vote, an officer, who shall be the Executive Secretary of that group. His duties shall be defined by the General Executive from time to time, and he shall be ex-officio a member of the General Executive.

Sec. 4. All Unions under the Federation shall hold a charter direct from it.

Sec. 5. The Federation may, by special arrangement, enter into joint agreement with the National Canadian organizations for affiliation, on such terms as may be agreed upon.

Under Article II., Sec. 2. the basis of representation was changed. The section now reads:

Canadian Federation local unions shall be represented by accredited delegates in the ratio of one delegate for each fifty members or under, and one for each additional fifty members or majority fraction thereof. Canadian Central Trades Councils, three delegates; locals affiliated with national organizations shall be entitled to send as representatives to the convention of the Canadian Federation of Labour, one delegate for each five hundred members or fraction thereof by paying direct to the general offices of the Canadian Federation of Labour a per capita tax of one cent per member per month.

Article III., Sec. 1. had a clause added providing for the payment of a per capita tax of one cent per month from national labour organizations with a chief executive and chartering locals of their own craft.

In Article IV., Sec. 1. under the head of officers, the words "assistant secretary" and "organizer" were deleted, while in Sec. 2. providing for one vice-president from each province being included on the Executive of the Federation, it was decided to provide for the inclusion of three members to be elected at the convention.

The following new clause was added to Article IV:

The Executive shall have power to appoint from time to time one or more organizers, in various districts, and to define their duties and pay. While so engaged, such organizers will be known as officers of the Federation.

Section 4. of Article V. defining the duties of a general organizer was struck out.

Communications Received.

Communications received from the following were read before the convention:

From John Sandgren, of New York, N.Y., on behalf of the Swedish Workmen's Association, appealing for aid for the working people of Sweden, where a general strike is now in progress. This was referred to the Executive Committee.

From G. Leclerc, of Montreal, Que., President of the Canadian Federation of Shoeworkers, and from H. Gravelle, Secretary of the National Carpenters' Union of Montreal Que., expressing regret at inability to be represented at the convention.

Fraternal greetings were received from the Provincial Workmen's Association and from Mr. G. A. Pin, labour editor of "Le Soleil", Quebec, Que.

The Secretary of the Tanners and Curriers' National Union of Quebec, Que., drew attention to the fact that owing to improved machinery and low wages in the tanning industry in Ontario, the Quebec tanners could not compete, and asked that efforts be made to organize the Ontario tanners. The letter was referred to the Executive Committee.

Resolutions Adopted.

The following is the text of the various resolutions adopted by the convention:—

Alien Labour Law Amendment:—

That this federation petition the Federal Government to so amend the Alien Labour Law as to prohibit the performance of any labour in the Dominion by foreign employees of foreign firms or corporations when such labour can be performed by Canadian citizens, and so to further amend said law as to provide for a tax being placed on each and every individual foreign employee or a foreign firm or corporation brought into Canada to perform any physical labour whatsoever.

Military Bands and International Affiliation:—

That this convention of the Canadian Federation of Labour considers it inimical to the future interests of Canadian military bands to hold membership in the so-called International Musical unions and as Canadian military bands are in no way dependent for their existence on engagements secured in the United States of America, it is further resolved that the Dominion government be requested to take such steps as in their wisdom may seem necessary to prevent our Canadian military bands from being or becoming affiliated with so called musical unions or to take such steps as will insure among military bands recognition of Canadian musical unions.

Amalgamation of Unions:—

Resolved: That it be an instruction to the incoming executive of this federation to immediately enter into negotiations with all and every purely Canadian workmen's association, with a view to the amalgamation of the whole into one grand Canadian Federation of Labour. And that the incoming executive hereby empowered to complete such amalgamation on such terms as shall in their opinion be just to all parties, without further reference to this federation. Or that they may if it is in their opinion desirable submit any proposition for amalgamation to a referendum vote of unions affiliated with the federation.

Indorsing P.W.A.:—

Indorsing methods of the Provincial Workmen's Association in present strike of coal miners of Glace Bay and disapproving of the actions of the United Mine Workers.

Qualifications of Engineers:—

That the Minister of Marine and Fisheries be asked to put in force marine laws providing for officers in charge of steam boilers being properly qualified.

St. Lawrence Pilots:—

That the Federal Government be requested to prohibit members of Quebec Pilots' Association from acting as pilots on steamships plying on the river St. Lawrence as this practice injures the licensed captains.

Election of School Commissions:—

That the Government of Quebec be asked to amend the law governing the election of school commissioners so that in future they will be elected by popular vote.

Apprenticeship:—

That the Executive Committee be deputed to protect a law, the object of which shall be the control of the apprenticeship system, same to be submitted to the proper authorities.

Inspection of Scaffolding:—

That the Government of Quebec be requested to appoint scaffold inspectors on all large buildings.

Dry Docks and Shipbuilding Subsidy:—

That it is advisable that the Dominion Government build dry docks to provide for making repairs to vessels in Canada, and that a liberal subsidy be paid to ship builders in order to encourage the shipbuilding industry.

Half-cent Coins:—

That Federal Government be asked to add half-cent pieces to the coinage of the country.

Museums of Safety Devices:—

That the Provincial Government of Quebec be asked to establish museums of safety devices for machinery in the industrial centres similar to that in the City of Montreal.

Uniformity of Text Books:—

That the Government of Quebec be asked to enforce law providing for uniformity of text books in all parts of the province.

Cartridge Factories Inspection:—

That the Federal Government be asked to have provincial factory laws put into force in the cartridge factories of the Dominion.

Public Libraries:—

In favour of public libraries, and asking the Government of Quebec to establish same in the larger centres.

Executive Reports:—

That Provincial Executive Committee's reports be submitted to delegates to the convention one month prior to meeting.

Officers Elected.

The following officers were elected for the ensuing term:—

President.—J. W. Patterson, Ottawa, Ont.

Vice-President.—Z. Berube, Quebec, Que.

Sec.-Treas.—Geo. Mercure, Ottawa, Ont.

Members of Executive.—Omer Brunet, Quebec, Que.; A. C. Tresham, Brantford, Ont.; J. G. Tapp, Ottawa, Ont.

Brantford, Ont., was selected as the place of meeting in 1910.

THE CANADIAN MANUFACTURERS' ASSOCIATION.—THIRTY-EIGHTH ANNUAL CONVENTION.

THE thirty-eighth annual convention of the Canadian Manufacturers' Association was held at Hamilton, Ont., September 14-17. In the neighbourhood of 250 members of the Association, from different parts of Canada, were present. A number of subjects of great importance to industry and labour were discussed.

Presidential Address.

The address of the retiring President, Mr. Robert Hobson of Hamilton, Ont., was delivered during the opening day's proceedings of the convention. Mr. Hobson reviewed the present industrial situation, and dealt in detail with several of the problems calling for consideration on the part of manufacturers. Looking backward over the past year, a noticeable improvement in trade was recorded, while from every quarter encouraging reports of a revival in business had been received. The outlook was pronounced very favourable in view of the excellent crop reports, the many large undertakings in progress, and the revival in immigration. The anti-dumping regulations were criticized as insufficient to prevent the unloading of foreign goods in Canada at slaughter prices. Referring more particularly to labour conditions, the President noted a falling-off in the number of strikes, and referred to the Industrial Disputes Investigation Act as having been instrumental in preventing labour difficulties without unduly interfering with the rights of either party. In this connection he advocated legislation to prevent foreign agitators from fermenting disturbances among Canadian workmen. The strike in the Nova Scotia collieries was referred to and the action of the

strikers denounced. Other subjects dealt with at some length in the address were, immigration, the United States tariff, transportation, the relations of Canada to the Empire, and the business before the association.

Financial Statement.

The treasurer's report showed receipts from all quarters amounting to \$52,250.09, not including a balance of \$7,751.97 from last year. Receipts from membership fees were \$30,447.25, a gain of over \$2,000. Disbursements amounted to \$54,526.14, leaving cash on hand July 31, 1909, amounting to \$5,475.92. Surplus assets are estimated at \$16,000.

Membership.

At the annual meeting of 1907 and 1908, a falling off in the Association's rate of growth was reported. Up to 1906, the average yearly increase was 285, but in 1907 this dropped to 85 and in 1908 to 23. Last year, however, the gain was 171, new members to the number of 323 having been enrolled, while the resignations of 152 were accepted. The total membership on August 1, 1909, was distributed as follows:—

By Provinces.		By branches.	
Ontario.....	1,444	Toronto.....	599
Quebec.....	547	Montreal.....	415
Nova Scotia.....	86	Quebec.....	63
British Columbia.....	111	Nova Scotia.....	86
New Brunswick.....	48	Manitoba.....	98
Manitoba.....	98	British Columbia.....	111
Alberta and Saskatchewan.....	19	Niagara.....	44
Prince Edward Island.....	3	General.....	940
Total.....	2,356	Total.....	2,356

Classified on the basis of fees paid, the returns are:—

Class A (up to 50 hands, \$10).....	1,714
Class B (up to 100 hands, \$15).....	241
Class C (over 100 hands, \$25).....	401
Total.....	2,356

A new section and a new branch were formed during the year, viz., the glove and mill section, and the Niagara District branch.

In December last, a request was received from the British Columbia Branch for a ruling as to the eligibility of mining companies. The view taken by the committee on membership was that when coking, smelting or refining was combined with mining, the applicant should be deemed eligible. Rather than make a definite ruling, however, it was decided to continue as in the past, and deal with each application on its merits.

Reports of Standing Committees.

The following is a brief résumé of the reports of the various standing committees of the Association, as considered and adopted at the annual meeting.

The "Industrial Canada" Committee.—A year of steady growth, marked improvement and substantial profit was reported, notwithstanding the policy of retrenchment adopted by many business houses. Earnings from advertising increased from \$16,842 to \$19,903, a gain of nearly 20 per cent. The cost of publication rose from \$14,320 to \$16,511. Profits for the year were \$3,491. The year has been the best by \$400 the paper ever had. The average issue has consisted of 84 pages compared with 74 in 1907-08. Circulation has increased by 200 during the year. A suggestion to issue a directory of all Canadian manufacturers was held over.

The Railway and Transportation Committee.—The principal matters dealt with by the committee during the past year were as follows: Bills of lading, a new bill to become effective Oct. 1, 1909, having been obtained; foreign competition on the Pacific Coast; freight rates, a number of changes having been obtained affecting lumber, wire fencing, international rates, rates to certain Bri-

tish Columbia points, transcontinental rates, and import rates; freight classification; express rates; interswitching; ocean bills of lading; telephone and telegraph tolls; and returned packages. The work of the Department in connection with matters of an individual character increased materially. A visit to the eastern and western provinces was paid by the manager of the Department. The committee acknowledged its appreciation of the prompt manner in which the Board of Railway Commissioners continue to dispose of matters brought before it.

The Tariff Committee.—As it was generally understood that no changes in the tariff were to be made during the 1908-09 session of Parliament, only a few matters affecting members of the Association were dealt with by this Committee. Among subjects discussed by the committee were, the appointment of a tariff Commission, the woolen duties, the export duty on pulpwood in Quebec, the Franco-Canadian Convention and the duty on lumber. A list of decisions in which the Department is interested was given in the committee's report. The committee was instrumental in obtaining refunds in a number of instances in which excessive rates had been charged, and considerable time was devoted to the dumping problem. The manager of the Department visited the members in Manitoba, Alberta, British Columbia, New Brunswick, Nova Scotia and Quebec City, during the year.

The Parliamentary Committee.—The report of this committee, whose duty it is to watch all legislation affecting the interest of Canadian manufacturers, began with a summary of the labour situation. Since July, 1908, a much healthier tone has prevailed in the labour market. It was stated that in most lines, production is now little short of what it was when the depression of 1907 first declared itself. "The percentage of unemployment" says the report "has in consequence been greatly reduced. Work has been steadier, wages have been better, and, owing to the fact that the majority of factory workers, after a touch of hard times, have been anxious to take full advant-

age of their opportunities, the spirit of restlessness has happily been very little in evidence." A reference was made to the prevalence of strikes among builders, teamsters, longshoremen and miners, with a particular reference to the labour disturbances in the Nova Scotia collieries. Other subjects dealt with in the report, nearly all being acts introduced into or passed by the Dominion Parliament or the legislatures of the several provinces, were the following: The Eight-hour Day Bill; the Nova Scotia Labour Commission; certain restrictive labour legislation in Ontario; workmen's compensation legislation in Quebec and Manitoba; the Secret Commissions Act of the past session; proposed amendment of the Dominion Elections Act; the appointment of the Conservation Commission; Imperial Defense; the Conditional Sales Act of Ontario; the Stationary Engineers' Act, Ontario; proposed amendment of the Ontario Assessment Act; the regulation of Bill Board Advertising; the Factories Act Amendment, Ontario; the Ontario Labour Bureau; the abolition of Juries in Division Court Cases; the legalizing of stock dividends in Quebec; succession duties, Quebec; the B. C. Foreign Corporation Act; the Bulk Sales Act of British Columbia; and the case of the Metallic Roofing Company vs. the Sheet Metal Workers' Union of Toronto.

The Insurance Committee.—In the report of this Committee to the last annual meeting, mention was made of the re-organization of the Department under plans which brought the Mutual Fire Insurance Companies, organized under the auspices of the Association, into closer relations. It was then the confident expectation of the Committee that by this concentration of forces it should be able to do much more effective work, as also to develop along other lines of influence. The present report opened with the statement that the year's operations have completely justified the expectations then formed, and that in no preceding year, since the inauguration of the Departments, has anything like the extent of work been done or equal results accomplished. The report explained the basis upon which the co-operation of the Departments proceeded. The following

is a summary of the work done during the year for individual members:

	No. of risks.	Amount of insurance.
Policies examined.....	106	\$10,711,164
Risks inspected.....	115	6,048,900
Total.....	221	\$16,760,064

or about 50 per cent., more in both number of risks and amount of insurance than in the preceding year.

In the matter of inspections, the increase is most marked, for whereas in 1907-8, the total was 52, in 1908-9 it was 115.

In the adjustment of fire losses, a perceptible decrease was reported. During the year, only four losses aggregating \$10,843.30 were adjusted which in both number and amount is the smallest since the organization of the Department. With regard to the establishment of automatic sprinklers, however, a new record has been established. During the year, the committee has laid out or passed full or partial sprinkler equipments for 21 factories.

The report set forth an interesting summary of insurance legislation passed during the year and of the proceedings of the Banking and Commerce Committee of the House of Commerce.

The Commercial Intelligence Committee.—The Commercial Intelligence Committee discussed in its report the following subjects; scope and usefulness of the weekly bulletin of the Department of Trade and Commerce, Canada; the extension of the Trade Commissioners' Service; suggested improvements of the service; foreign and domestic trade encouragement; revival of the made-in-Canada campaign; tariff reform in Great Britain; the West Indian preference; the British Patent Act; Income Tax in the United Kingdom; Postal Affairs; and Imperial Preferential Trade. In an appendix to the report, a detailed description is given of methods to be employed in the made-in-Canada campaign.

The Technical Education Committee.—It was found impracticable by this committee to carry out the instructions of the convention of 1908, viz., to appoint a commission to take evidence, with the

assistance of the provincial governments, with regard to the need for technical education in Canada. The announcement that the province of Quebec would undertake the establishment of a system of technical education rendered it unlikely that concerted action at all points between the provinces would be obtained. It was resolved, accordingly, to concentrate the energies of the association in obtaining from the various provincial governments recognition of the need of technical education similar to that given by Quebec. Financial difficulties also stood in the way of the original programme of the Committee. The Committee also took into consideration a statement made by the Government of Canada to a deputation representing the Trades and Labour Congress of Canada on Jan. 12, 1909, and resolved to renew its representations of previous years to the Dominion Government. The Committee recommended that an effort be made to have technical education taken up vigorously in all parts of Canada as a purely provincial issue. The report concluded with a summary showing what the various provinces have done to date, and as far as is known, what their plans are for the future, regarding this question.

Other Resolutions.

In addition to the above, resolutions were adopted at the closing session of the convention in the following matters:

Thanks:—

The thanks of the association were extended to the Hamilton members, the officers of the Thirteenth and Ninety-first Regiments, the Mayor, Board of Control and City Council, the Hamilton Commercial and Royal Hamilton Yacht Clubs, the Hamilton Street Railway Company and the Hamilton Barton Incline Railway Company, the Hamilton Board of Trade, the Conservatory of Music, the Telegraph and Telephone Companies, the Transportation Companies and the newspapers.

Bill of Lading—

Thanking the officers and members of the general and special committees of the Canadian shippers who successfully procured a form of bill of lading which so ably facilitates the shipping and receiving of freight without undue delay or unfair loss to the shippers or receivers; also thanking the merchants and grain men who supplied information.

When it is considered how important a fair shipping bill of lading is for the small shipper and what a great step forward this is for our commerce, the merit of the work done herein cannot be too highly estimated.

Technical Education—

Whereas, a united enquiry as to Canada's requirements in respect of technical education is a matter of

great and ever more pressing importance to all interests, employer, employee and consumer alike.

And Whereas, Sir Wilfrid Laurier has intimated that the government would collect and publish the desired information.

Be it Resolved, That the Canadian Manufacturers' Association in Convention assembled expresses its lively satisfaction at the Premier's intimation and respectfully urges the early appointment of the Commission promised.

International Exhibition and Selkirk Centennial, 1912—

Resolved, That the Canadian Manufacturers' Association in Annual Convention assembled does herein endorse the project for holding an International Exhibition to celebrate the Selkirk Centennial in Winnipeg in 1912, and pledge itself to do all in its power to further said Exhibition by encouraging its members to make creditable exhibits of Canadian manufacturers.

And Resolved, That the Federal Government be urged to assist the project financially as far as may be considered practicable.

Uniform Boiler Regulations—

Whereas, The several provinces, under the powers vested in them, have in the past formulated regulations governing the construction and inspection of boilers,

And Whereas, Owing to the fact that each Province through its staff acting alone, the resulting regulations differed in many respects causing much confusion, annoyance and loss to user and builder,

And Whereas, Uniform regulations providing for the safety of the public, including users and builders, are highly necessary and desirable,

Be it Resolved, That the Canadian Manufacturers' Association does herein urge the different Provincial Governments to accept the principle of uniformity and to adopt the suggestion offered that a conference of representative officials from the several Provinces be held in such place as may be found convenient at the earliest possible date to make recommendations for a uniform measure of this nature.

Pure Food Law—

Whereas, The chief analyst of the Inland Revenue Department has recently drafted food standards to govern the manufacture of all food products.

And Whereas, Up to the present time comparatively few of the 200 or more firms affected have had an opportunity of studying the proposed measure,

Be it Resolved, That the Canadian Manufacturers' Association in Annual Convention assembled, does herein urge the Department to furnish each firm with a copy of said draft, and

Be it further Resolved, That the Department be requested not to enact any legislation of this nature until after the session of 1910, so that all affected will have had an opportunity of expressing their views.

Woollen and Knit Goods—

Whereas, The growing of wool and manufacturing it into fabrics are indigenous and essential industries to Canada, and

Whereas, It is important that wool growers should have places and facilities for assembling, sorting and marketing their wool, and

Whereas, The printed report of the government commissioner to Great Britain has confirmed the statements made by the Canadian woollen manufacturers, and

Whereas, The Right Honourable, The Premier at the banquet in Montreal last September stated the government would appoint a further commission if desired by the Canadian Manufacturers' Association, on which the Association would have representation,

Be it Resolved, That the Dominion government be and are hereby requested to immediately have a thorough enquiry made as to the cause of the decline in the growth of Canadian wool and the failure of so many Canadian woollen factories, and that, owing to the

serious condition of the woollen industry, the government be urged to devise without delay a policy by which, in Canada, the growing of wool will be fostered and its manufacture into fabrics be encouraged.

Pulp, Paper and Lumber—

Resolved, That the policy of the Quebec Government in prohibiting the export of logs and pulp wood from the Crown Lands of the Province of Quebec is endorsed, and it is urged that action thereon be taken without delay so that the prohibition take effect as soon as possible.

Resolved, That this Association favours the prohibition of the export of logs and pulp wood from Canada and respectfully requests the Dominion Government to enact the necessary legislation to prohibit such export.

Resolved, That we appreciate and heartily approve of the beneficial action of the Dominion Government in establishing a permanent commission for the conservation of the natural resources of Canada, and urge that the local governments of the various Provinces be asked to assist and to co-operate in these matters and also to provide effective protection against destruction of the forests by fire.

Duty on Lumber and Shingles—

Resolved, That in view of the change in the tariff on lumber and shingles recently made by the United States, the Canadian Manufacturers' Association heartily endorses the resolution adopted by manufacturers of lumber and shingles at a recent meeting held in Vancouver, B.C.

Shipbuilding in Canada—

Whereas, With the growth of Canadian commerce and the development of our great transportation systems, an enlarged Canadian merchant marine becomes more and more a necessity, and

Whereas, The rich resources of the Dominion and her magnificent waterways and harbours have specially fitted her for the industry of steel shipbuilding.

Be it Resolved, That this Association should again urge upon the Dominion Government the wisdom of extending such substantial encouragement as will insure the immediate promotion and building up of the industry in Canada.

Officers.

The following officers were elected:

President.—John Hendry, The British Columbia Mills, Timber and Trading Co., Vancouver, B.C.

First Vice-President.—W. H. Rowley, E. B. Eddy Co., Hull, Que.

Ontario Vice-president.—J. P. Murray, Toronto Carpet Company, Toronto, Ont.

Quebec Vice-president.—W. A. Marsh, Wm. Marsh Co., Quebec, Que.

British Columbia, Vice-president.—W. H. Barker, B.C. Packers' Association, Vancouver, B.C.

Manitoba, Vice-president.—T. R. Deacon, Manitoba Iron Works, Winnipeg, Man.

Nova Scotia, Vice president.—P. P. Edwards, Londonderry Iron and Mining Co., Londonderry, N.S.

New Brunswick, Vice-president.—James Fleming, St. John, N.B.

P.E.I., Vice-president.—Hon. F. I. Hazzard, Charlottetown, P.E.I.

Alberta and Saskatchewan Vice-president.—P. Burns, Calgary, Alta.

Chairmen of committees were elected as follows:—

Parliamentary.—J. O. Thorn, Toronto.

Commercial Intelligence.—Stanley Pettit, Toronto.

Reception and Membership.—C. M. Murray, Toronto.

Technical Education.—J. F. Mackay, Toronto Globe.

Tariff.—R. O. McCulloch, Galt.

Railway and Transportation.—J. R. Marlow, Toronto.

Notes.

Immediately following the Convention held in Montreal, last year, a visit was paid by a number of members of the Association to the MacDonald College at Ste. Anne de Bellevue, and towards the end of October the Toronto Branch organized an excursion to the Ontario Agricultural College at Guelph.

At the annual banquet of the Association, held on Sept 16, addresses were delivered by Lord Strathcona and Mount Royal, the Lieutenant Governor of Ontario, the Honourable G. P. Graham, Minister of Railways and Canals, Canada, who dealt with the subject of transportation, the Honourable W. L. MacKenzie King, Minister of Labour, who referred to the relationship of employers and employees and to the value of conciliation and arbitration and of permanent boards of conciliation and arbitration as a means of settling labour disputes, the President of the Guelph Agricultural College, and others.

The next annual meeting of the association will be held at Vancouver, B. C.

GRAND COUNCIL OF PROVINCIAL WORKMEN'S ASSOCIATION.—THIRTIETH ANNUAL CONVENTION.

THE thirtieth annual meeting of the Grand Council of the Provincial Workmen's Association was held at Halifax, N.S., September 21-24. Delegates were present to the number of over fifty, representing a membership of approximately 5,000.

Resolutions were passed condemning the methods of international trade unions in Canada, and of the United Mine Workers of America in instituting, during July last, a strike in the Glace Bay district. The formation of a Canadian Miners' Union in Western Canada was approved as well as the formation of a Canadian navy. Affiliation with the

Canadian Federation of Labour was discussed and delegates appointed to attend the annual meeting of that body with the view of arriving at an arrangement. Other matters discussed were, the eight-hour day, and the operation of riding raikes and travelling roads. Dr. Magill, chairman of the eight-hour day Commission appeared before the Council and described the work of the Commission.

Officers were elected as follows:—

Grand master, Stephen B. McNeil, Glace Bay; associate grand master; A. B. McIsaac, Inverness; grand secretary, John Moffatt, Glace Bay; grand treasurer, Ronald Nicholson, Glace Bay; grand guardian, John A. McNeil, Dominion; inside watch, William McLearn, Westville; outside watch, James Lammond, Sydney Mines; grand sub-secretary, R. F. Kerr, Westville; legislative committee, Hugh Muir, Pictou; D. A. McIsaac, Port hood; A. Davies, Sydney Mines; P. McIntyre, Reserve, and J. E. Walker, Inverness.

THE FISHERMEN'S UNION OF NOVA SCOTIA.—FIFTH ANNUAL CONVENTION.

THE fifth annual meeting of the Fishermen's Union of Nova Scotia was held at Halifax, N.S., during September. Twenty-five stations of the union were represented, including the principal fishing places from Digby to Antigonish, Halifax and Cape Breton island being well represented.

Officers were elected for the ensuing year as follows:—

President, D. Scott, Main-a-dieu.
Vice-President, Aug. Harris, Digby.
Secretary-Treasurer, B. Cummings, Port Joli.
Executive Committee,—Mr. Thomas, Herring Cove; Elijah Covey, Indian Harbor; Mr. Morrison, Inverness; Mr. McPherson, Cape Breton.

The resolutions passed at the annual convention 1908 were re-affirmed. These favoured: Better transportation facilities; the repeal of the cannery license law; equalizing the bounty paid to fishermen in vessels and boats; the purchase of seed lobsters by the government with a view of preserving the spawn;

that the provincial government extend to the fishing industry the same protection and encouragement as is given to the other industrial callings, and, as a matter of special assistance, appoint a practical man as an outside official of the department of industry, whose duty shall be to collect statistics relating to the fisheries and also to deliver a course of lectures as occasion may require on subjects connected with the industry. The prohibition of all beam trawlers from entering Canadian ports for refitting or supplies except in stress of weather was asked for, and a rebate of duty on gasoline engines for fishermen's use.

The union also advocates a change in the size limit of lobsters to suit the different counties of the province and a strict enforcement of all laws made for the protection of this crustacean.

The use in shallow waters of seines for catching herring, under the method called tucking, was condemned.

THE TRADES UNION CONGRESS OF GREAT BRITAIN.—FORTY-SECOND ANNUAL CONVENTION.

THE Forty-second Annual Congress of the Trade Unions of the United Kingdom was held at Ipswich, on September 6 and the five following days. The Congress was presided over by the Chairman of the Parliamentary Committee, Mr. D. J. Shackleton, M.P.

The standing orders of the Congress provide that it shall consist only of representatives of Trade Unions who are actually working at their trades at the time of their appointment, or are permanent paid officials of the Unions they represent. Trade Unions may send one delegate for every 2,000 members or fraction thereof, but many of the larger Unions do not send the full number or delegates to which they are entitled. Voting on important questions is by card, on the principle of one vote for every 1,000 members represented. The following analysis shows the composition of the Congress, compared with the corresponding figures for the Congress of 1908:—

Groups of Trades.	1908.			1909.		
	No. of organizations.	No. of Delegates.	No. of members.	No. of organizations.	No. of delegates.	No. of members.
Building.....	9	23	126,293	7	17	101,584
Mining and quarrying.....	10	116	574,274	8	174	564,611
Engineering.....	13	19	46,241	10	15	40,151
Shipbuilding (including boiler-making)	4	16	73,850	4	11	72,045
Other metal trades.....	18	33	68,815	6	36	74,000
Textiles.....	15	103	219,038	12	98	224,267
Clothing.....	8	24	59,268	7	17	54,344
Transport (land and water).....	14	49	176,161	14	48	149,519
Chemical, gas and general labourers.....	8	25	75,997	8	25	63,099
Printing, bookbinding, etc.....	13	23	60,055	13	23	59,474
Pottery and glass.....	4	5	8,570	4	5	7,625
Woodworking and furnishing, etc.....	8	10	27,347	7	9	24,956
Baking and cigarmaking.....	3	6	7,432	3	5	8,432
Enginemen.....	9	26	52,663	5	27	55,598
Post office employees.....	3	5	42,013	3	5	50,705
Miscellaneous.....	24	36	94,021	22	31	100,879
Total.....	163	519	1,712,031	133	497	1,651,789

The number of organisations accounted for in the above statement is 133, but some of these organizations are Federations having members of several of their constituent Trades Unions in attendance at the Congress. Allowing for such cases, members of about 219 Trade Unions attended as delegates this year out of 1,150 Unions in existence. The membership represented, however, comprised 70 per cent. of the total membership of all Trade Unions. The decline of 60,000 in the membership represented as compared with 1908, occurred chiefly in the building, transport and labour groups, and was partly due to the absence of some unions which were represented at the previous Congress, and was also alleged to be the result of trade depression.

Among the principal subjects on which the Congress passed resolutions were:— Restriction of the hours of labour to eight per day for work-people generally; old-age pensions; amendment of the Mines Regulation Act, the Factory and Workshop Acts, and the Compensation to Workmen Act; the wages and general conditions of labour of workers employed by contractors for the Government; labour exchanges; compulsory state insurance; trade boards; evictions during trade disputes; State help for blind workpeople; abolition of the premium bonus system; and secular education. A resolution in favour of compulsory arbitration in trade disputes was rejected by a large majority.

The next annual convention will be held at Sheffield.

**FORMATION OF THE CANADIAN PEACE AND ARBITRATION SOCIETY.—
PETITION IN COMMEMORATION OF CENTURY OF PEACE
BETWEEN CANADA AND THE UNITED STATES.**

THE Canadian Peace and Arbitration Society was organized at Toronto, Ont., during September, with Sir William Mulock as President, Dr. C. S. Eby as Secretary, and with headquarters at 88 College street. The basic idea of the Society is that although arguments in favour of peace attract little attention while peace prevails, are likely to be

deemed unpatriotic amid rumours of war, and are at all times regarded as unsatisfactory by many who see in them only a negative proposition, nevertheless peace proposals stand for a positive system of thought, of political economy and of statesmanship, and are creative of conditions conducive to the highest development of human happiness. The object of

the Society is to co-operate with other peace societies throughout the world in showing—

1. That peace promotes prosperity and advancement.
2. That the peace of the world is in the hands of the people.
3. That the world's progress towards international peace has brought us within sight of an international tribunal whereby international differences may be adjusted by an International Court of Justice.
4. That the present is a fitting occasion for directing the eyes of the world to the condition of Canada consequent on an unbroken century of peace.

The Century of Peace.

It is in connection with the last mentioned object, viz., the commemoration of the unbroken century of peace between Canada and the United States now drawing to a close, that the initial activity of the Society has been undertaken. Such public commemoration of the happy conditions that have thus prevailed between Canada and the United States, with the resultant benefits to the two countries, will, it is hoped, also serve as an object lesson to the world as to the influence of peace upon human progress, and accelerate the arrival of the time when international differences may be settled not by the arbitrament of the sword, but by appeals to international courts of justice.

The Society has no wide organization of its own, and is pan-denominational in character. The campaign which it has instituted in the above will accordingly work by and through existing organizations and other agencies in the hope of obtaining in this way the support of a great popular movement in furtherance of its present objects, viz., the directing of the eyes of the world to the condition of Canada consequent on an unbroken century of peace.

Petition to the Government.

The means immediately chosen to this end is a petition to His Excellency the Governor-General of Canada in Council, to be signed by every citizen of Canada desirous of furthering the blessings of world peace.

The petition is headed in the following terms:—

To His Excellency, the Governor-General of Canada in Council:

“Whereas nearly one hundred years have elapsed since the War of 1812-14, which was terminated under conditions practically abolishing armaments of war along the international frontier between Canada and the United States; and

“Whereas the effects of an unbroken century of peace and goodwill between the two countries, as seen in the increasing industrial, commercial, social and moral development of our people, have been so pronounced as to attract the attention of the whole world;

“Therefore, we, the undersigned citizens of Canada, rejoicing in the manifold blessings that have come to us through a century of unbroken peace, and believing that a suitable commemoration of this unique event in the world's history is opportune and calculated to produce lasting good,

“Respectfully petition the Government of Canada, either alone or jointly with that of the United States, as may be deemed expedient, to arrange for a national or international commemoration of an event of such world-wide significance,

“Whereby the whole people may have the opportunity of participating in a public expression of thanksgiving to the Giver of all good for the blessings that have flowed to them from a century of peace.”

Circulars Issued.

In bringing the matter to the attention of the Canadian public in this way, a number of circulars have been issued drawing the attention of various classes and organizations to the movement, and requesting their co-operation. The Society desires that every Canadian may have an opportunity of signing this petition, and to that end hopes to be able to arrange for its general distribution throughout the country. In this connection, different circulars have been issued to the clergy, the press, boards of trade and chambers of commerce, the teaching fraternity, labour organizations, and a selected list of individuals. A copy of

the circular which was addressed to the labour organizations of the Dominion is as follows:—

TORONTO, Sept. 15, 1909.

To the Labour Organizations of Canada, Greeting:

To The Secretary,

My Dear Sir:—

Herewith I forward you a copy of a petition being circulated by the Canadian Peace and Arbitration Society, which is the first step of a campaign for securing permanent peace.

As we have no widely extended organization to do the work, and as we know that "the people", as represented by your Union and other similar organizations, are in sympathy with the abolition of war, we turn to you for help in making this petition a great utterance of the people.

The government will respond to a strong voice from the people. An educative campaign will prepare the people for another move, and much will be done to counteract the stampee for militarism now being pushed by the jingo party. Canada, saved from militarism, will be in a unique position, which should make her leader in the campaign for the peace of the world.

Kindly note suggestions on back of petition and take your own methods to secure the largest number of signatures. We shall be glad to send more copies, and also to answer questions.

Cordially yours for Peace and Equality,

C. S. EBY, *Secretary.*

P.S.—All petitions should be signed and returned to the Secretary, 88 College St., Toronto, Ont., by the middle of October, if possible.

Method of Preparing Petition.

It is particularly desirable that there should be a large number of individual signatures to the petition, and those to whom it is addressed are earnestly requested, not merely to sign themselves, but to obtain as many signatures as possible, and to place petition blanks wher-

ever each one will form the nucleus of new circles of signers and distributors. In churches, clubs and organizations of any kind, a vote in behalf of signing may be taken, and only the Clergyman, the President or Chairman and the Secretary will need to sign their own names and the name of the body, and state the number of persons who have voted to sign. When a petition form is filled, sheets of foolscap paper may be attached and the blank extended indefinitely for more signatures.

The signing of the petition involves no financial or other responsibilities. It will, however, give the opportunity to every one to make a contribution towards expenses and the work of the Canadian Peace and Arbitration Society, which, with Peace Societies in other lands, is carrying on a campaign to do away with war and bring "Peace on earth." The contribution of one dollar or more entitles the signer to become a member of the Society and a fellow-worker if he so desires.

It is desired to present this petition to the Government as soon as possible. For blank forms or information of any kind, application should be made to the Secretary, Dr. C. S. Eby, 88 College street, Toronto. As the cost of this work will necessarily be very considerable, those who sympathize with the movement will please send money contributions to the Treasurer, Wm. Greenwood Brown, 24 King street West, or to the Secretary.

THE CANADIAN GOVERNMENT ANNUITIES ACT, 1908.—ADDRESS ON THE ACT BY THE SUPERINTENDENT OF ANNUITIES.*

THE Canadian Government Annuities Act of 1908 was conceived, the details worked out, and the machinery provided in order that residents of Canada might have within their reach the facilities for making provision for their old age with absolute security, and with the largest possible return, thereby utilizing our marvelous resources to make our people the most universally thrifty and prosperous people on the face of the globe. By this provident legislation, any person with the determination to do so, no matter how small his earnings, may provide an

income for that period when his earning powers have declined or ceased, and when the shadows lengthen.

Resume of Act and of Procedure thereunder.

The procedure is simplicity itself. All that a person need do is to deposit from time to time in any Money Order Office,

*The address published herewith was delivered by Mr. S. T. Bastedo, Superintendent of Government annuities, before the Trades and Labour Congress of Canada, during the session of that body held at Quebec, Que., in September.

or, if he prefers, to remit direct to the Department, such sums as he may be able to spare, which sums will be improved at 4 per cent. compound interest, and at the date fixed for the annuity to begin such annuity as the total amount at his credit will purchase at the rates in force at the time he began his payments will be paid to him so long as he may live. The Government acts as trustee of the funds, and the annuitant receives the entire benefit of every dollar that he pays in, without the deduction of one cent for expenses of any kind. The earliest age at which payments may begin is five; the maximum amount of annuity which may be purchased is \$600, and the minimum \$50. No annuity is payable until the age of 55, except for invalidity or disablement; but it may begin at any later date desired, and it should be remembered in purchasing an annuity its object is to supply an income at a time when the earning powers have ceased, and that the longer the annuity is deferred the larger will be the income received. If the amounts paid in are not sufficient to buy an annuity of \$50, all payments made with three per cent. compound interest will be returned to the annuitant if living, or to his heirs. Should invalidity or disablement occur before the age of 55, so that the annuitant is incapacitated from earning a living, and should he have paid in sufficient to purchase an annuity of not less than \$50, it may be paid to him from his then age.

Details of Plans Available.

Annuities may be purchased on two plans, which are known as Plans "A" and "B." Under Plan "A," should the annuitant die before the annuity becomes payable, all payments made with three per cent. compound interest would be returned to his legal representatives. Under Plan "B," a larger annuity may be secured for smaller payments, as the return contingency has not to be provided for, a plan which will appeal to a person who has no heirs or others dependent upon him, and who may desire to purchase the annuity at the lowest price.

No better guarantee should be required that the proposition is worthy of fullest

confidence, than the knowledge that the wealth and credit of Canada is at the back of the purchase.

The annuity cannot be seized for debt, and it cannot be forfeited. There are no lapses and no penalties. Neither can the amounts which have been paid in be withdrawn, a most wise provision, otherwise the intent of the Act, which is to enable persons to provide for their old age, would be defeated.

Elasticity of the System.

The system is elastic as to payments, and adapts itself to the convenience and circumstances of the individual.

You may pay in only twenty-five cents a week, or you may pay in ten, fifteen, twenty or more dollars at a time.

You may pay by weekly, monthly, quarterly, half-yearly or yearly premiums if you prefer that plan, the cost being no greater where the annual rate is split up into several payments than if paid in one sum in advance.

You may start with a lump sum, and continue by periodical payments, in which case the periodical payments would be smaller than if no lump sum were paid; and you may deposit lump sums at any time, which will give a corresponding increase to your annuity.

You may start with a lump sum, as the equivalent of arrears, and complete the contract by periodical payments. That is, a man of 40 (or any other age), wishing an annuity at, say, 60, may by a single payment pay the equivalent of the premiums between his then age and, say, age 20, and complete the contract as if he had begun at age 20.

You may, after making periodical payments for a longer or shorter period, complete the contract by a single payment, in order that you may have no further payments to make.

You may provide by single or periodical payments for annuities for yourself, your wife, and your children, and you may contract that the payments made shall be returned to you or your legal representatives should the annuitant die before the annuity is payable.

You may, when your annuity is due, provide that a portion of it (not exceeding

one-half) shall be payable to your wife so long as she lives.

You may provide by a single payment for a last survivor annuity for yourself and wife not to exceed \$600, which annuity will be paid so long as either of you lives; and any two or more persons may join in making the same provision; but a man and wife may each purchase an annuity of \$600.

You may complete your payments at a certain age, and allow these to accumulate that you may secure an increased annuity at a subsequent age.

You may purchase an immediate annuity, payable in quarterly instalments, and receive the first instalment three months after the purchase money has been paid.

Your annuity may, when it becomes payable, be guaranteed for a number of years, and should you die before the guaranteed period expired, the annuity would be paid as you had directed for the unexpired portion of the term, but should you survive the guaranteed period, it would be continued to yourself so long as you lived without additional charge.

A society, or an association of persons, being a body corporate for fraternal, benevolent, religious or other lawful purposes, may contract for annuities for its members.

Insurance of Employees and Employers.

Employers of labour may contract for annuities for their employees, or may assist their employees in the purchase of annuities. This feature of the Act should particularly commend itself to the present gathering, and should also interest every honest employer of labour and every faithful employee. I believe employers of labour, and especially manufacturers, are beginning to realize that the interests of employer and employee must be more closely related if the employer is to secure the best results. I believe, also, that were employers to assist their employees in the purchase of annuities, they could not make a more profitable expenditure of money, and that there would be no more fruitful way by which they could win the esteem of their employees than by demonstrating a will-

ingness to co-operate with them in making this provision for their old age. I believe, further, that were this assistance accepted, the employees need have no suspicions or apprehensions that the employer would use it as an argument why he might withhold an increase of wages. It is the custom of some firms to make their employees a donation at the end of the year, and others share with their employees a certain percentage of the profits, but this practice is not nearly so satisfactory, and the benefits not so permanent as if the employer would contribute monthly for the purpose mentioned. Under the Government's plan, a contract would issue to each employee, so that should he leave the service of the employer who was contributing towards the payment of his annuity he would receive the benefit of such contribution up to the time he left his service, and that amount would go on improving at four per cent., compound interest until the annuity was due. For example, a payment by the employer of \$10 a year for 10 years in the case of a man starting at 20, would alone secure him at 60 an income of \$60. *The Act distinctly provides that the amount so paid in by the employer must ensure to the employee's benefit.* Should the employee engage with another employer who was not willing to contribute, the employee could continue making such payments from time to time as his circumstances permitted, and at the date when he drew his annuity, he would receive such annuity as the total amount at his credit would purchase.

Security Offered.

The vital feature of an annuity is, of course, security, and not present security only, but that security which will ensure the payment of the annuity perhaps 50 or 75 years hence, and it is only a government that can absolutely fulfil a promise to give such security.

The difficulty, heretofore, in the case of a large number of people, and particularly in the case of wage-earners and persons of small incomes, has been in finding a safe and lucrative means of investment of the small amounts at their command

after the daily calls upon their incomes have been met. The Savings Banks would appear to be the institution in which this class of persons has the greatest confidence, as is evidenced by the fact that there is at present in such banks in Canada upwards of \$60,000,000; but the income which the savings of a lifetime would give on capital so invested, the rate of interest being but three per cent., would be far from adequate to meet the wants of the investor in his old age. Should he entrench upon his capital, the source of his income would soon be exhausted. The only way, therefore, by which a wage-earner may make the best possible provision for his old age is by a plan which will enable him to spend not only the interest on what he has saved, but the principal as well, and this plan is supplied by the Government Annuities Act, the annuity representing a return to the purchaser of his principal with interest thereon at four per cent. per annum in periodical payments calculated upon his longevity, but payable so long as he may live, should he live to be 100 or over. He may, perhaps, die before his longevity is reached, but the fact that he will receive a specific income every three months for life, no matter how long he may live, and an income three or four times as large as he could obtain from any other form of investment, will probably concern him more than the possibility that he may die before receiving back the whole of his purchase money, or that he may die after receiving a few payments only. If the precise time were known when he would cross "The Great Divide," it could be arranged that every cent that he had paid in would be returned to him within the time; but, without this information, mortality experience covering many years is the only basis on which calculations can be made.

An incident recorded in one of our newspapers a few days ago emphasizes the value of an annuity. A man in New Zealand who thought he had made sufficient money to keep him comfortably for the remainder of his days decided that he would work no longer. He reasoned in this way: I am 60 years of age, my longevity is 15 years, but I might live to

be 85; I can, therefore, spend each year so much capital as well as the interest, and he spent accordingly. What was the result? At 85 the sands of time were still running, but his money was gone, and it is said he now sits in the Market place at Wellington, soliciting alms with a placard on his breast on which are the words: "Take pity on an old man who was out in his calculations." Now, had he purchased an annuity, he would probably have been in receipt of not only a larger income, but an income, as I have already pointed out, for life. Riches have wings, and statistics informs us that not one man in thirty retiring with a competency retains that competency to the end, and that to-day 95 per cent. of men at 60, in Christian countries, are dependent upon their daily earnings or on their children for support.

The Annuities Plan and Old Age Pensions.

Much of the distress which has been shown by the recent Pension Act to exist in England might have been avoided by the adoption of a scheme like the Canadian scheme half a century ago, and if Canada is not, ultimately, to face the same conditions as obtain in England and many other European countries, the people of small incomes must make definite provision for their old age. It is quite within the bounds of fact to say that in Canada to-day, for each man, woman and child who has an assured income for life, and who can, for that reason, contemplate the approach of old age with serenity and equanimity, there are thousands who, as the thought is forced upon them, can only have feelings of sad misgiving as they ponder upon the subject of what the future may have in store for them, and chiefly because they have adopted no systematic plan of saving. That plan is now presented by the Government Annuity Act, and if our young men, women and children embrace their opportunity, they need have no fear as to the future, for a few cents a week will provide an eventide of comfort and happiness. They should act on the advice of Sir Walter Raleigh, to "use thy youth so that thou mayest have comfort to remember it when it hath forsaken thee,

and not sigh and grieve at the account thereof. Use it as the springtime which soon departeth, and wherein thou oughtest to plant and sow all provision for a long and happy life."

Illustrations.

An illustration or two will suffice to show the advantage of an annuity as an investment for old age. An annuity of \$100 to begin at 60, will cost a man beginning to pay at 20, an annual payment of \$10.01, about $2\frac{3}{4}$ cents a day, a total of \$400.40. It would require \$2,000 invested at five per cent. to give the same income. An annuity of \$200 would cost \$20.02 a year, $5\frac{1}{2}$ cents a day, a total of \$800.80; \$200 is the income on \$4,000 at five per cent. \$300 would cost \$30.03 a year, $8\frac{1}{4}$ cents a day, or a little over \$1,200; \$300 is the income on \$6,000 at five per cent. \$400 would cost \$40.04 a year, 11 cents a day, or a total of about \$1,600; \$400 is the income from \$8,000 invested at five per cent. \$500 would cost \$50.05 a year, $13\frac{3}{4}$ cents a day, or a total of \$2,002; \$500 is the income from \$10,000 invested at five per cent. \$600 would cost \$60.06 a year, $16\frac{1}{2}$ cents a day, or a total of \$3,402.40; \$600 is the income from \$12,000 invested at five per cent. But the principal to be invested at five per cent. he might never possess, while the annuity could be paid for in easy payments, with but little, if any, sacrifice. Should the annuitant die before 60, all his payments with three per cent. compound interest would be returned to his heirs.

A man beginning at age 20 with a cash payment of \$1.0, paying 25 cents a week (13 a year), and adding \$10 every five years until he is 60, would receive an annuity of \$151.96 at age 60. If his employer added \$10 a year, the annuity would be increased to \$253.33 at 60, and in case the annuitant died at age 59 his heirs would receive \$1,865.

If the employee paid in 25 cents a week (\$13 a year), and the employer \$10 a year, the annuity at 60 would be \$231.28, and if the annuitant died at 59 his heirs would receive \$1,696.22.

An annuity of \$1.25 a week, or \$65 a year, the amount of the pension granted by the British Government with certain qualifications to persons attaining the age of 70, the payment of which pension entails a charge upon the Treasury of some \$50,000,000 annually, could be obtained under the Canadian scheme by a man starting at 20, for an annual payment of \$2.50; by a man at 25, for an annual payment of \$3.25; by a man at 30, of \$4.25; by a man at 35, of \$5.70; by a man of 40, of \$7.65; by a man of 45, of \$10.35; and by a man of 50, of \$15, less than five cents a day, and there are few men at 50 years of age, in any walk of life, who do not spend, needlessly, much more than five cents a day. If he should die before the age of 70, all that he had paid in with three per cent. compound interest would be returned to his heirs. In the case of the man starting at 20 and paying in \$2.50 a year, the return, in case he died on the eve of receiving his annuity would amount to \$290.40, and in the case of the man starting at 50 and paying in \$15 a year, to \$415.05.

Table of Rates.

Illustrations were also given by the Superintendent from the following table to show the yearly payments (which may be split up into weekly, monthly, quarterly or half-yearly amounts if desired without any addition to the cost), required for the purchase of an annuity of \$100 beginning at age 55, 60, 65 or 70, and payable quarterly thereafter for life.*

*In the event of death before the first instalment of the annuity falls due, all payments made, with 3 per cent. compound interest, will be refunded to the heirs. The cost of each additional \$100 up to \$600 at same rate. Example: A payment of \$10.01 a year from 20 to 60 will buy an annuity of \$100.

Information as to the cost to males or females of any age from 5 to 85 of annuities on any authorized plan will be furnished on receipt of particulars as to age (or ages) last birthday, the age at which annuity is desired to begin, and the amount of annuity required.

CO-OPERATIVE OR PEOPLE'S BANKS ESTABLISHED IN THE PROVINCE OF QUEBEC.

DURING the past two years a considerable number of Co-operative or People's Banks, for the encouragement of thrift and the providing of proper facilities for the loaning of small sums to workmen or others of small means, have been established in the Province of Quebec. The first of these, from which the subsequent movement took its origin, was founded by Mr. Alphonse Desjardins at Levis, Que., in December, 1901. A detailed description of the constitution and objects of this bank was published in the *Labour Gazette* for March, 1905, (*)

and its proceedings have been reviewed from year to year since. In 1906, an act to facilitate the establishment of institutions of this kind was passed by the Legislature of Quebec (†), and the banks in question have since been incorporated under its provisions. In the practical work of founding these institutions Mr. Desjardins has taken an active part, and the following list, comprising all of the banks at present in existence, with the date of formation and leading officers in each case, was furnished by him to the Department:

*Page 980.

WELFARE WORK BY THE CANADIAN PACIFIC RAILWAY COMPANY.

THE Canadian Pacific Railway Company is the largest single employer of labour in the Dominion of Canada. By its trains and ships its operations extend half way around the globe, from Antwerp and London in Europe to Japan and China in the far East. Altogether an army of over 70,000 men is required to carry on the many and varied activities in which the Company is engaged.

The adoption by so large and powerful an organization of a definite policy towards its employees in the matter of what is commonly known as "welfare work" is therefore of considerable importance and significance. Welfare work may be defined as embracing any effort by an employer on behalf of his employees, over and above the payment of wages, towards making them more comfortable and contented with their present work and towards robbing their declining years of the terrors of incapacity and loss of employment. In carrying out work of this

character the Canadian Pacific Railway Company does not claim that its motive is purely philanthropic, but frankly confesses that considerate treatment of its employees is a paying business. In this it is merely following the example both of the military schools and of many of the leading captains of industry in recognizing the importance of providing workmen with proper food, sanitary conditions and the very best tools. In the industrial world of to-day, profit must come by obtaining the best results from the labourer and mechanic. In an enterprise like that of the Canadian Pacific Railway Company, the hearty co-operation of the employees is a necessity, not only for the comfort and safety of the travelling public, but for the business of the road and the dividends of the stockholders.

The Company has recently issued a very attractive illustrated booklet descriptive of its policy with regard to welfare work and the various steps that have

been taken up to the present in carrying it into execution. Some copies of the work have been received at the Department during September and the following is a review of its more important contents.

The Basis of Railway Welfare Work.

In the introductory paragraphs of the booklet, the principles underlying the policy of the Company in this regard are frankly set forth. The enormous increase in traffic and the many improvements in equipment have made railroading much more exacting in its requirements from the men engaged in it. The clearest heads, the steadiest nerves and the strongest muscles are demanded in the men operating the trains and manning the ships. How the men spend their spare hours is therefore of direct importance to the Company, even though it can exercise no immediate authority over its men when off work. Hence its willingness to help in providing its employees with healthful recreation and opportunities for mental and physical improvement. The training of men for the service is especially important. For some time past, accordingly, a large and increasing amount of money has been devoted each year for special welfare work. That the expense has been justified both from a business and a humanitarian standpoint the higher officers of the road are firmly convinced. To quote the booklet:—"It has brought the men and the management into closer relationship. It has made the employees feel that the Company takes a sympathetic interest in their welfare; that it is not merely trying to grind out the best years of their lives with exacting work, long hours and small pay, without giving them anything to look forward to but retirement without compensation through disability or old age. This welfare or betterment work has done much to stamp out that spirit of discontent that once was prevalent among railway workers. It has generally raised the tone and character of the men, increasing their loyalty and efficiency, and helping them to realize that the success of the company that employs them, means their own

success and that these both depend upon each worker doing well his own part."

Educational.

The Company has inaugurated at its Angus works, Montreal, a new system of handling apprentices. A young recruit, after satisfying the management as to his general intelligence and good health is put through a systematic and continuous training, which upon the completion of his apprenticeship, enables him to qualify for a mechanic's position and the higher posts in the organization. The training is progressive and includes the moral and physical as well as the mental side. After a course in reading, writing, arithmetic, geography, drawing, shop mechanics and other subjects, advanced classes in mechanics, electricity, locomotive and car construction are available. This side of the training is carried on in a room set apart for the purpose. Instruction classes are held during working hours, and the boys are paid for their time. Scholarships are annually donated by the Company to the ten best apprentices. Two additional scholarships, tenable for four years at McGill University, are awarded each year to sons of employees. A system of night classes has also been organized the upkeep of which is borne chiefly by the men themselves. Over 250 employees take advantage of these classes, and the syllabus include such subjects as locomotive shop practice, electrical engineering, mechanical drawing and mathematics, in all of which capable instructors have been employed, while some of the highest officials of the service, exercise supervision over the course as a whole. In telegraphing and shorthand, the young clerks in the general and other offices at Montreal, have access at a fee of \$2.00 per month, to schools established by the Company, the fees being refunded in full at the end of a six months term to pupils who have attended 75 per cent. of the classes. The Company has also provided instruction cars with competent men in charge to give instruction in the mechanism, operation and care of the Westinghouse air brakes, steam heating and safety appliances. One of these cars

is employed on the western lines and another on eastern lines. Attendance is compulsory on all employees in connection with train service and maintenance of equipment, and each man is required to undergo an examination. The work of these cars has greatly extended the knowledge of the employees.

First Aid to the Injured.

For giving prompt assistance in case of accident there is an organization called the Canadian Pacific Railway Centre of the St. John Ambulance Association, which includes in its scope all employees of the Company. Its object is not to rival but to assist the medical profession. During the past three months the services of the organization have been requisitioned in the case of more than one hundred injuries at the Angus Shops. In several other cases there was an undoubted saving of life, and in others serious diseases, such as blood poisoning, have been prevented, as well as a great deal of suffering alleviated immediately after the accident. A number of the men at the Angus Shops have obtained certificates of their ability to give first aid in any kind of accident likely to occur in connection with their occupation. It is the intention of the Company to extend its ambulance classes throughout its entire system.

Railway Young Men's Christian Associations.

As a result of the unselfish efforts of the Y. M. C. A., to be of service to railway men, the Company has donated a number of buildings on its Transcontinental line to be devoted to special Y. M. C. A. work for its employees. For the operation of these buildings the Company makes a monthly appropriation, while the men pay a fee of \$5.00 which covers the use of baths, reading room and general social privileges. They pay \$1.25 and \$4.50 a week for board. The management of the building is in each case in the hands of a local committee, usually consisting of railway employees. Buildings are in operation at Revelstoke, B. C., and at Schreiber, Chapleau and Kenora Ont.

Meals and Sleeping Quarters.

In the Angus shops, Montreal, attractive dining rooms for the men have been opened, where wholesome, well-cooked food is served in comfortable surroundings at very low prices. A full meal costs 19 cents and an average meal 15 cents. One thousand men can be comfortably seated at once. Free sleeping accommodation for train crews is provided at every divisional point between the Atlantic and the Pacific, especially for the use of engineers and firemen. To all of these, kitchens with ranges are attached, where the men can prepare their own meals. At some of the points, stewards are in charge to furnish meals at nominal prices.

The Safety League.

A "Safety League" has been organized at Toronto, Ont., by the co-operation of the management and the men, for the mutual protection of each other and the safeguarding of the travelling public by a strict enforcement of the standing rules and regulations. It is the duty of any member of this League who notices the violation of any rule by a brother employee to warn him of his neglect and to report it to the League. The person named is compelled to accept the caution with thanks.

The Steamship and Express Departments.

The employees of the steamship services participate in the general welfare work of the Company in the same way as the railway men, insofar as conditions of employment permit. In the former, a system of bonuses has been established for long service men. Promotion in the service is strictly by seniority, except in rare cases, and great care is taken in the choice of young men to avoid the chance of their being passed over. Under the Merchant Shipping Act, a ship owner is bound to care for any member of the crew who falls ill or is injured while on articles. The Company has made it a rule not only to live up to the letter of the law but to see that the family of any sufferer is looked after until his recovery.

The Dominion Express Company, though part and parcel of the Canadian Pacific Railway Company, is conducted as a distinct institution. Its 1,200 employees are eligible for the long service bonus, and are uniformed by the Company.

Floral Work—Hotel Department.

For twelve years past the Company has annually donated to its employees many thousands of packages of seeds and bulbs. No rules are made in this connection, the work being entirely voluntary on the part of the employees. The Company trusts that it is amply rewarded in the improved appearance imported to station grounds and general surroundings.

The employees of the many hotels of the Company are encouraged to found organizations for mutual improvement and enjoyment. All are granted regular vacations, labour saving devices have been installed in the various hotels and particular attention paid to sanitation, ventilation and light.

Pensions for Employees.

The Company has established a pension fund for the retirement of employees who have reached an age when they are unequal to the further performance of their duties. The system calls for no contributions from the employees themselves and the rules are very simple.* All officers and employees who have attained the age of 65 years and who have been 10 years or longer in the Company's service are granted an allowance of one per cent. of the average monthly pay received during the 10 years preceding retirement. No pension allowance, however, is to be less than \$20.00 per month. The number of persons over 70 years of age on the pension roll at January 1, 1909, was 105; between 60 and 70 years of age, 148; under 60 years of age; 23—total 276 persons. The amount paid out for the year was \$50,694.79 and the balance to the credit of the fund was \$657,345.60.

REHABILITATION OF OYSTER FISHERIES OF MARITIME PROVINCES.

AT a meeting of representatives appointed by the Governments of the three Maritime Provinces held recently at Moncton, N. B., for the purpose of discussing means of rehabilitating the oyster fisheries of those Provinces, a number of conclusions were reached, which though not to be regarded as final, throw an interesting light on the conditions prevailing in this important branch of the fishing industry in Canada. The representatives of the different Provinces present at the meeting were, the Hon. D. V. Landry, representing the Province of New Brunswick, Mr. A. S. Barnstead and Mr. S. Y. Wilson, representing the Province of Nova Scotia, and Mr. R. H. Montgomery, representing the Province of Prince Edward Island. Mr. A. S. Barnstead acted as secretary of the convention. The following is a summary of the conclusion arrived at.*

That there has been a notable decline in the production and quality of oysters from the natural beds of the Maritime Provinces.

That the causes are attributable to over-fishing unaccompanied by cultivation; natural enemies, such as star-fish, etc., and laxity in the enforcement of fishery regulations.

That in order to ensure a stricter supervision on the part of the fishery wardens it is advisable that officials appointed should not be financially interested in the fish industry and should devote all their time to their duties.

That the open season for the natural beds should remain as at present.

That there are large areas of the foreshore in the Maritime Provinces which have been proven adaptable to oyster culture by the fact that great quantities of oysters live there naturally and propagate, and further that these areas could be greatly extended by private cultivation.

That the culture of oysters by private individuals on leased areas should be encouraged as tending to improve conditions.

(* This summary was supplied by courtesy of Mr. Barnstead.

*See the *Labour Gazette* for January, 1903, page 552.

That arrangements be made between the Federal and Provincial Governments so that ample security be afforded all holders of leases.

That the leasing of areas for private culture should be confined to non-productive areas.

That the Department allow seed oysters

to be taken from shallow water for the stocking of private beds.

That the Dominion Government, through the Department of Marine and Fisheries, establish and carry on experimental plots of ground suitable for oyster culture in each of the Maritime Provinces.

QUEBEC LEGISLATION AFFECTING LABOUR, 1909.

THE first session of the twelfth Legislature of the Province of Quebec was begun on March 2 and was closed by prorogation on May 29, 1909.¹ Altogether 180 statutes were passed, of which the more important from the standpoint of industry and labour are reviewed below.

Workmen's Compensation.

The act of the session which created the greatest amount of interest as directly affecting labour was an Act "respecting the responsibility for accidents suffered by workmen in the course of their work, and the compensation for injuries resulting therefrom." Workmen's compensation has been for some years past a subject of discussion in the Province of Quebec. The discussion culminated in 1907, in the passing of an act to provide for the appointment of a Royal Commission to take the whole question into careful consideration and to report thereon to the Legislature.² Following this legislation, a commission was appointed in the month of June, 1907, and for some time thereafter held an extended investigation, in which the points of view of both employers and employees within the Province, and the legislation enacted elsewhere on the subject were examined in detail. The report of the Commission was issued in March, 1909, and the legislation of the past session was the outcome.³ The Act

is divided into four sections referring respectively to compensation, liability for accidents, security and procedure.

Compensation.—Broadly, the Act declares that accidents to a workman in the course of his employment entitles the person injured or his representatives to compensation. The class of employment to which this provision applies is defined, agricultural industries and navigation by means of sailing being excepted. For absolute and permanent incapacity the person injured is entitled to an allowance equalling fifty per cent. of his yearly wages. In case of permanent and partial incapacity the allowance is to be half the sum by which his wages have been reduced. For temporary incapacity the compensation is to be one-half the daily wages received at the time of the accident, beginning on the eighth day. When the accident causes death the compensation shall amount to four times the average yearly wages of the deceased, and shall in no case be less than \$1,000 nor more than \$2,000. Allowance is also to be made for medical and funeral expenses. The Act defines how the compensation is payable. No compensation is to be granted if the accident was brought about intentionally by the person injured. The court may reduce the amount of compensation if the accident was due to the inexcusable fault of the workman, or increase it if due to the inexcusable fault of the employer. Where the yearly wages of the workman exceed \$600, no more than this sum shall be taken into account; the surplus up to \$1,000 confers the right to only one-fourth of the compensation in question. The Act does not apply at all where the yearly wages exceed \$1,000. The basis upon

¹A copy of the statutes passed during the session was received at the Department of Labour during September, by courtesy of the King's Printer, Quebec.

²For a review of this Act see the *Labour Gazette* for June, 1907, p. 1,384.

³For a statement with regard to the appointment of the Commission see the *Labour Gazette* for July, 1907, p. 12. The report was reviewed in the *Labour Gazette* for April, 1909, p. 1,111.

which wages must be calculated and the time when the compensation is payable are set forth. The compensation is to be entirely at the charge of the employer.

Liability.—In addition to the recourse given by this Act, the person injured or his representatives retain the right to obtain compensation under the common law from any person responsible for the accident other than the employer or his agent. The compensation so awarded discharges to the extent thereof the employer of his liability. An action against a third person thus responsible may be taken by the employer at his own risk. In the case of fatal accidents, the employer is only liable for the compensation prescribed by the Act. Where an employer has assumed the assessments or premiums of an insurance company or mutual benefit society, the moneys obtained therefrom must be applied on account of the compensation allowed by the Act. If, however, the company or society neglects or refuses to pay, the employer's liability continues. The injured person is required to submit to a medical examination if the employer so desires it, the right to compensation being suspended until such examination takes place. The injured person, however, may demand that the examination take place in the presence of a physician chosen by himself.

Security.—The compensation for temporary incapacity and for medical and uneral expenses is to be secured by privilege on the moveable and immoveable property of the employer. Compensation for permanent incapacity or for death is to be secured by a privilege on moveable property of the same nature and rank, and by a privilege upon immoveable property ranking after other privileges and after hypothecs.

Procedure.—The Superior Court and the Circuit Court have jurisdiction in actions under the Act. Appeals must be taken within fifteen days from the rendering of judgments. No trial by jury is allowed in any action taken under the Act. All proceedings are to be summary and subject to the provisions of the Code of Civil Procedure. Actions to re-

cover compensation are subject to a prescription of one year.

The Act comes into force on January 1, 1910. It does not apply to pending cases nor to accidents happening prior to the date mentioned.⁴

Conciliation and Arbitration in Trade Disputes.

The Quebec Trade Disputes Act of 1901, is amended in several important particulars. The effect of the amendment is to do away with the standing arbitration council of the old Act and to provide for the establishment of special expert committees to deal with the several disputes. Provision was previously made for the appointment of two Councils of Arbitration, one for the settlement of railway labour disputes and the second for the settlement of other disputes, both holding office for two years. This division in the matter of jurisdiction is now done away with. The appointment of Councils, moreover, was previously by the Lieutenant-Governor-in-Council; it is now by the Minister of Public Works and Labour. The method of appointment is also altered in that the member representing the employer and the member representing the employees must agree upon a third arbitrator within ten days, instead of twenty-one days as previously. A number of details relating to vacancies, the appointment of acting arbitrators, etc., are repealed. Members of Councils remain in office until their report has been transmitted to the Minister, and a vacancy in a Council is filled in the same manner as the person whose seat is vacant was originally appointed. The section setting forth in detail how the recommendations of employers and employees are to be ascertained is repealed, as is also the paragraph defining the proceedings of a Council when one party makes default to appoint a councillor. Councils of Arbitration in future may sit in private, either upon their own motion or upon the application of either party.⁵

⁴Quebec, stat. 1909, chap. 66.

⁵Quebec, stat. 1909, chap. 32.

The Mining Law—Miners' Certificates.

The Quebec Mining Law, as consolidated in 1892, was amended in some very important particulars. The chief feature of the new legislation is the substitution of a system of miners' certificates in place of the prospecting licenses perviously issued. The latter are being continued in certain cases until January 1, 1910. The term "miner's certificate" is applied to the new system so as to avoid confusion. The holder of a miner's certificate is entitled to prospect on all lands public or private, subdivided or not subdivided, in which the mining rights are vested in the Crown. In the case of a discovery, he is entitled to mark it out by erecting a stake on the chief point and four other stakes at each corner of a right angle strip of land not exceeding in size 200 acres and not less than forty acres. After this, the Department is to be notified at once of the staking and within four months of the date inscribed on the stakes, application must be filed for a mining license. This application must be accompanied by a fee of ten dollars, and, in addition, by a sum equal to \$1.00 per acre per year. The principal objects of the law are to secure the property of the mine to the discoverer; to prevent blanketing by imposing reasonable charges; to invite capital into the mining industry by not hindering operations; to keep lands free, or the property vested in the Crown as long as they are considered available for mining purposes; and to avoid litigation at all stages. The system, it will be seen, involves an acreage tax in preference to the obligation of performing a certain amount of work on the claim.⁶

Sunday Observance.

The Sunday Observance Law of 1907 is amended by increasing the severity of the punishment for offences. Previously a fine of not less than \$1.00 and not more than \$40.00 with costs, or in default of payment, imprisonment not exceeding thirty days, might be imposed. This punishment is now made applicable only

to first convictions. For subsequent convictions the maximum fine is raised to \$100, or, in default, to imprisonment for not more than sixty days.⁷ Under an act amending the charter of the City of Quebec, the City Council is given power to order by by-law the closing days of theatres, moving pictures, or other shows or amusements on Sundays.⁸

Public Utilities' Commission Created.

An Act was passed creating the Quebec Public Utilities' Commission. "Public Utility" is defined as meaning "every corporation other than a municipal corporation, firm, person or association of persons, the business and operations whereof are subject to the legislative authority of this Province, their lessees, trustees, liquidators, or receivers, appointed by any court, that now or hereafter own, operate, manage or control any system, works, plant or equipment for the conveyance of telegraph or telephone messages, or for the conveyance of travellers or goods over a railway, street railway or tramway, or for the production, transmission, delivery or furnishing of heat, light or power, either directly or indirectly to or for the public." The Commission is to consist of three members appointed by the Lieutenant-Governor in Council, each of whom is to hold office during good behaviour for ten years from date of appointment. The Commission is to have a President and Vice-President. Full details are given as to the individual powers of the Commissioners and their relations *inter se*. The Commission is also to have a Secretary and the further staff necessary for the proper performance of its duties. The President of the Commission is to receive \$4,000 a year, the other Commissioners \$3,000 each, and the Secretary \$1,800. A sum not exceeding ten dollars per day for each day's sitting may in addition be allowed the Commissioners by the Lieutenant-Governor in Council. The jurisdiction of the Commission includes all matters within the jurisdiction of the Railway Committee of the Executive Council, and covers all questions relating to the transportation of

⁷Quebec, stat. 1909, chap. 51.

⁸Quebec, stat. 1909, chap. 80, sec. 7.

⁶Quebec, stat. 1909, chap. 27.

goods, all contestations as to tolls on public utilities, all such questions as the placing of rails on public roads, contestations between public utilities and municipalities, etc., certain special conditions to be performed by telegraph, telephone, heat, light and power companies are enjoined over and above those which may be prescribed by the Commission. Summing up, the Commission is given general supervision of all public utilities, subject only to the legislative authority of the Province. Special parts of the Act are devoted to the procedure of the Commission and to appeals from the decisions of the Commission. The Act is to come into force by proclamation of the Lieutenant-Governor.⁹

Inquiries by Commissions Concerning Public Matters.

The Act respecting inquiries concerning public matters is considerably strengthened. Public health is added to the list of subjects into which inquiries may be made by Royal Commission. The Lieutenant-Governor is also empowered to appoint a Secretary to the Commission. The Commissioner may, in future, with the authorization of the Attorney-General employ stenographers, clerks and messengers and incur such further expenses as may be necessary. The salaries of Commissioners, Secretaries, etc., are to be fixed by the Lieutenant-Governor in Council; previously, a limit of \$10 per day in the case of the Commissioners and \$2 per day in the case of clerks were prescribed. The section of the Act defining by whom the expenses of the Commission are to be paid is also amended.¹⁰

The Pensioning of Public Officers.

On January 1, 1893, the superannuation of Civil Servants in the employment of the Province was abolished, insofar as future entrants into the service were concerned. The provisions of the Revised Statutes, accordingly, from that time forward, applied only to Civil Servants appointed previously to the date named. By an act of the past session the effect of the Act of 1893 is nullified, and members of the

Civil Service whenever appointed are once more made eligible for superannuation. Employees appointed between January 1, 1893, and the coming into force of the Act of 1909 may, provided they notify the Provincial Treasurer in writing, avail themselves of certain privileges in the matter. If a person desires the period of service entitling him to a pension to run from the date of his appointment, he is required to pay in a sum with interest capitalized annually equal to the aggregate of the deductions that would have been made from his salary if the Act of 1893 had not been passed. If, however, he wishes his period of service to count from the time the Act of 1909 comes into force, no payment, of course, with regard to the past is required. In the event of an officer, who has arranged to make back payments, dying before the completion of his payments his widow or children are to be entitled to the full pension, less the amount of the sum remaining due and the interest thereon.¹¹

The provisions of the Education Act with reference to the pensioning of officers of primary instruction are amended. The pension of male officers is fixed at two per cent. of the average salary for each year of service up to thirty-five years; a female teacher is to receive three per cent., of her average salary for each year up to thirty-five, provided that the pension is not to exceed ninety per cent., of her salary when she retired nor the sum of \$800 a year, the limit which is also set for male pensioners. The provisions relating to the pensioning of widows of officers and to instalments and stoppage are also enlarged. The annual grant of the Government to the pension fund is increased from \$5,000 to \$12,000. Excess of receipts over expenditure instead of being placed with the Provincial Treasurer in trust are to be employed in future towards increasing the allowances to male pensioners who are receiving less than \$300.¹²

Protection of Railway Crossings.

By special Act of the session, the Council of any city, town or other municipal

⁹Quebec, stat. 1909, chap. 16.

¹⁰Quebec, stat. 1909, chap. 13.

¹²Quebec, stat. 1909, chap. 33.

corporation may contribute by by-law to the expense of safeguarding level railway crossings whether by the erection of gates, construction of tunnels or overhead bridges, or by other devices. Money may be borrowed for this purpose and the bonds or debentures of the corporation issued therefor. The by-law need not be submitted to the approval of the electors.¹³

Crown Lands and Forests—Colonization —Water Powers.

In an amendment of the law respecting the administration and sale of public lands and forests, the Crown Lands' agent is bound to sell land suitable for cultivation and classified as such, to any settler who applies therefor, though no more than 100 acres may be sold by the agent to the same person unless the lot applied for, according to survey, measures more. The limit in any case is placed at 125 acres. The settler cannot obtain more until he has procured the issuing of letters patent for the lands which he holds under location ticket and after at least one half of the lands has been placed under cultivation. A settler, however, who has obtained a first grant of 100 acres, on making an affidavit that he is the father of at least four children under sixteen years of age, shall be entitled to a further grant of 100 acres. After July 1, 1909, lots sold or granted for settlement may not be sold nor alienated by the holder of the location ticket for five years following the date of the ticket, except by gift, will, or by abintestate successions, in which case the donee, heir or legatee is subject to the same prohibition.¹⁴ The law respecting colonization societies in certain parts of the Province is also amended.¹⁵

The Homestead Act of 1897 is amended in the sections governing the hypothecation of lands granted to a bona fide settler and the exemption of the same from seizure. New legislation is also included governing the selection of lands as homesteads and the conditions on which these shall be exempt from seizure. The list

of settler's effects exempt from seizure and execution is also extended.¹⁶

By an addition to the Municipal Code, territory not already forming part of a city, town, village or parish municipality, and situated within three miles of the National Transcontinental Railway may, on petition, be erected into a village municipality by proclamation of the Lieutenant-Governor.¹⁷

The conditions under which lands required for the development and utilization of water powers may be expropriated, are defined in a separate Act of the session. Water powers are declared to be a matter of public interest and the proprietor thereof may expropriate adjacent lands so as to allow him to utilize the powers subject to the conditions of the Act. The Act defines in detail what lands may be expropriated, when expropriation may take place and the procedure to be followed.¹⁸

The law with regard to the fixing of tolls by persons who have made improvements on streams is amended. Such tolls are to be fixed by the Lieutenant-Governor-in-Council, upon the report of the Minister of Public Works and Labour, after inspection of the works by an engineer or other competent person. The tariff is to be based on the value of the works or improvements, and the amount required for their maintenance, or other just considerations. Due notice of the inspection must be given. The cost of fixing tolls is to be borne by the person applying for the fixing thereof.¹⁹

Miscellaneous.

Acts with reference to *succession duties* were passed.²⁰

Incorporation was granted to *La ligue anti-alcoolique de Quebec*, an association with the object of contending against the progress of alcoholism.²¹

Acts were passed amending the statutes of incorporation of the *Polytechnic School*, the *Quebec Technical School* and the *Montreal Technical School*.²²

¹³Quebec, stat. 1909, chap. 57.

²¹Quebec, stat. 1909, chap. 132.

²²Quebec, stat. 1909, chaps. 35, 36 and 37.

In defining the objects for which *co-operative agricultural associations* may be created, the "sale and purchase of agricultural products" was previously included. The phrase is now changed to to read "the purchase, preservation, transformation and sale of agricultural products."²³

Some modifications were made in the legislation governing *extra provincial commercial corporations* and joint stock companies.²⁴

School commissioners or trustees are authorized, if they see fit, to establish "*School Savings Banks*" within their municipalities. The Superintendent of Public Instruction may make regulations governing the administration of such banks.²⁵

The *Public Health Act* is considerably added to. The authority of municipal sanitary inspectors is increased. The cleaning or disinfecting of certain buildings, railway cars and boats by order of municipal sanitary boards is authorized.²⁶

An Act was passed prohibiting the payment of additional remuneration beyond regular salary to persons employed in the *Civil Service* except by Order in Council, in which the name of the person who is to receive the extra remuneration as well as the services for which the remuneration is allowed, must be mentioned.²⁷

The appointment of a *Turnpike Roads and Toll Bridges Commission* is authorized, for the purpose of devising equitable rules for the abolition of such roads and bridges in the Province.²⁸

In the course of the session, a resolution was passed advocating measures to put an end to the over-straining of *women and children workers* in industrial establishments to the impairment of health and the compromising of the future of the families of workingmen.

An Act was passed providing for the reducing of the number of aldermen and establishing a *Board of Control* in the City

of Montreal. The Act provided for the holding of a referendum in September on the following questions:

1. Are you in favour of the reduction of the number of aldermen from two to one for each ward?
2. Are you in favour of a board of control elected by the people?
3. Are you in favour of a commission of public works appointed by the city council?

On September 20, the vote on the above questions was taken, being in favour by a large majority in the case of questions one and two and against the appointment of a commission of public works.²⁹

By an amendment of the section of the *Fisheries and Fishing Act* relating to fines, confiscations and prosecutions, prosecutions may be taken against persons domiciled outside of the Province within fifteen months from the date the offence was committed. The Act previously specified that all suits for the recovery of fines must be taken within six months of the date of the contravention.³⁰ Certain works in salmon rivers were also forbidden.³¹

An Act was passed revising the *legislative allowances* and salaries of the Speakers, Deputy Speakers and members of the Executive Council, Legislative Councillors and members of the Legislative Assembly, as follows:³²

Classes.	Previous allowance per year.	Present allowance per year.*
Members of the Legislative Council and Assembly.....	\$ 800	\$ 1,500
First Minister.....	5,000	7,000
Ministers.....	4,000	6,000
Speaker, Legislative Council...	2,000	3,000
Speaker, Legislative Assembly	2,000	3,000
Deputy Speakers.....		1,000

Legislation with regard to *transportation interests* was passed as follows: Incorporating the Angus short Line Company, the Grand Lake and Bell River Railway Company, and the Lachine,

²⁸Quebec, stat. 1909, chap. 9.

*These salaries are payable when the session lasts over thirty days. Previously when sessions were under thirty days the members of the legislature were allowed \$6.00 per day. At present, the rate allowed in such an eventuality is \$10 for each day's attendance.

Jacques-Cartier and Maisonneuve Railway Company; amending the charters of the Dominion Line Company and the Hull Electric Company; extending the time for construction of the Matane and

Gaspe Railway, the North Eastern Railway, the Quebec and Lake St. John Railway and branches, the Quebec and Saguenay Railway, and the Quebec County Railway.

MANITOBA LEGISLATION AFFECTING LABOUR, 1909.

THE twelfth legislature of Manitoba opened its second session at Winnipeg, Man., on February 4, 1909, and was prorogued on March 10, 1909. The statutes passed during the session were issued during August, and a copy of the same was received at the Department of Labour, by courtesy of the King's Printer of Manitoba, during September, 1909. The following is a brief review of the legislation of the session, of interest from the standpoint of industry and labour.

Protection of Wages.

By an amendment of the Assignments Act of the Revised Statutes, an additional safeguard is provided in case of assignments for the payment of wages in priority to the claims of ordinary or general creditors. Previously the provision applied to wages or salary "where employment is by the day, week month or year". The words "or by the hour or other period of time," are now added to this provision.¹ The Executions Act of the Revised Statutes is amended to similar effect.²

A special Act was passed "respecting assignments of wages or salaries to be earned in the future." No assignment of future wages given in consideration of a loan of less than \$200 is to be valid unless it is accepted in writing by the employer and afterwards registered, except where the wages are assigned to secure a past indebtedness for necessities or to secure an account for necessities to be supplied thereafter. No assignment of future wages made by a married man who is living with his wife is to be valid, unless the written consent of the wife is attached to the assignment or endorsed thereon. The amount of

money advanced on such assignments must exceed 95 per cent. of the amount of wages or salary thus assigned.³

By an addition to the Country Courts Act it is now provided that where a debt is for wages or salary and is sought to be garnisheed there must be attached to the summons served on the garnishee a memorandum showing the residence of the primary debtor and the nature and place of his occupation in the service of the garnishee at the time of issuing the summons, and also stating whether the debt so due was not incurred for board or lodgings. In the absence of the last-mentioned statement it may be presumed by the garnishee that the debt was not incurred for board or lodging.⁴

A verbal change is made in the section of the Mechanics' Lien Act which requires employers to keep pay-lists. The act previously required every employer of workmen "by the day or piece work" to keep such a list. This is now changed to read "by time or by piece work".⁵

Inspection of Steam Boilers.

A number of important amendments are made to the Steam Boilers' Inspection Act. In future when an inspector is called upon to make a special inspection of a boiler, the owner is required to pay his travelling expenses in addition to the usual fee. The section of the act relating to the application of tests is repealed. The section requiring boilers to be fitted with fusible plugs, to safeguard against low water, is made more stringent, the requirements for boilers of different kinds being set forth. The section giving inspectors the right of access to boilers is also enlarged, operators as well as managers and owners being now required to

¹Man., Stat., 1909, chap. 1.

²Man. Stat. 1909, chap. 29.

³Man. Stat. 1909, chap. 2.

⁴Man., Stat. 1909, chap. 11.

⁵Man., Stat. 1909, chap. 6.

facilitate tests by inspectors. The owner of a portable boiler must in future inform the boiler inspector of his district where his boiler is located on or before May 1 in each year. On boilers which have not been inspected or which have been condemned, inspectors are now required to place an official tag prohibiting the use of the boiler. For removing the tag, a penalty of not less than \$20 or more than \$100 may be imposed. The lieutenant Governor-in-Council is given power to make rules and regulations for the inspection of steam boilers and all matters connected with the construction and working thereof, such rules to be published in the Manitoba Gazette.⁶

Government and Municipal Telephones and Telegraphs.

The government telegraph commissioners are given power by special statute to issue regulations from time to time respecting the keeping of accounts, the application of funds, the control of employees and other matters, the same to be subject to the approval of the Lieutenant Governor-in-Council. By an amendment of the Municipal Telephone Act, the guarantee of the province of debentures is to be conclusive evidence that all formalities have been complied with and the legality of the debentures is not thereafter to be questioned.⁷

Miscellaneous.

The Noxious Weeds Act, 1906, is amended.⁸

Incorporation has been granted to the *Union of Manitoba Municipalities* by special act.⁹

Acts were passed considerably amending the *Corporation Taxation* and the *Railway Taxation Acts*.¹⁰

With respect to *public sanitation*, municipal councils may now pass by-laws requiring unsanitary buildings to be closed.¹¹

The provisions of the Public Health Act with regard to the *inspection of food* and providing safeguards against the sale of unwholesome food are considerably enlarged.¹²

An addition is made to the Public Schools Act providing for the establishment and administration by the Department of Education of a system of *medical inspection of schools* and creating means for attending to the health, cleanliness and physical condition of the pupils attending public schools.¹³

The *Public House Sanitation Act* is made more stringent. Previously, the requirements as to cleanliness, ventilation and heating in public buildings were subject to inspection by the license inspectors. They are now made subject to the inspection of any inspector appointed to enforce the act.¹⁴

By an amendment to the *Children's Protection Act*, children who habitually hawk or sell articles in a street or public place during school hours may be apprehended without warrant as neglected.¹⁵

The *Game Protection Act* is amended and consolidated. Among its provisions are sections setting forth the responsibility of hunters and of taxidermists, and persons operating cold storage plants receiving game killed during the closed season.¹⁶

After November 1, 1909, all *extra-provincial corporations* not holding charters to do business in the province will require to take out a license levied according to capital stock, under a penalty of \$50.00 per day.¹⁷

At the trial of any action to recover damages resulting from *fire* proved to have been started by sparks from a railway locomotive, it shall in future, be presumed that such fire was occasioned either by negligent management on the part of the employees in charge of the locomotive or by the imperfect and negligent construction of the locomotive.¹⁸

¹⁶Man. Stat. 1909, chap. 22.

¹⁷Man. Stat. 1909, chap. 10.

¹⁸Man. Stat. 1909, chap. 19.

A feature of the session was the introduction and discussion of a comprehensive *Workmen's Compensation Act*. The bill was subsequently withdrawn, on the understanding that it would be referred to a commission with instructions to investigate and report on the subject.

On March 4, a resolution was moved in the Legislature by the Premier of the Province and passed recommending that the initial *grain elevators* of the province be publicly owned and controlled, such ownership and control to rest in the Federal Government.

A *Bulk Sales Act* was passed whereby purchasers of stocks of goods in bulk are required to demand and the vendor to furnish a statement showing particulars of all debts over \$50 verified by statutory declaration. The act applies to sales by manufacturers, commission merchants

and persons whose ostensible occupation is to buy and sell merchandise.¹⁹

The following *transportation-interests* were the subject of special legislation:—

1. Canadian Northern Railway Company.—Securities of three branch lines, aggregating 220 miles in length, guaranteed, at the rate of \$13,000 per mile.

2. Canadian Northern Railway Company.—Aid granted for construction of Winnipeg terminals.

3. Manitoba Great Northern Railway Company.—Incorporated.

4. Midland Railway Company of Manitoba.—Act of incorporation amended.

5. Winnipeg Electric Railway Company.—Issue of debenture stock confirmed and validated.

6. The Winnipeg and Northern Railway Company.—Time for commencement and completion of railway extended.

¹⁹Man., Stat. 1909, chap. 60.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

British Emigration Returns.

During the month ended July 31, 1909, the number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING JULY, 1909-1908.

Nationality.	1909	1908
English.....	6,780	5,241
Welsh.....	213	139
Scotch.....	1,953	1,241

RAILWAY FROM HARMONY STATION,
ELMIRA, P.E.I.

Construction of branch line of railway from Harmony Station to Elmira, P.E.I., P.E.I. Railway. Date of contract, September 1st, 1909. Amount of contract, schedule rates. Contractors, Whitehead Bros. of Grand Falls, N.B.

RATE OF WAGES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefore is filed in the office of the Minister of Labour, and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

BRIDGE ON WELLAND CANAL, ONT.

Erection of Steel Highway Bridge over raceway near Lock No. 2 of old Welland Canal, St. Catharines, Ont., Welland Canal. Date of contract, September 23, 1909. Amount of contract, \$1,439.00. Contractors, The Hamilton Bridge Works Company, Ltd., of Hamilton, Ont.

Making and supplying articles of official uniform.....	1,232.00

Nature of Order.	Amount of Order
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 827.01

INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1909.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factory inspectors of the Province of Ontario, the Ontario Railway and Municipal Board and to the Department of Railways and Canals, for their kind assistance of furnishing the Department with the statements of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 316 individual work-people in Canada during the month of September, 1909, were reported to the Department of Labour. Of these, 91 were fatal and 225 resulted in serious injuries. In addition, three fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before September, 1909.

In the preceding month, there were 126 fatal and 264 non-fatal accidents reported, a total of 390, and in September, 1908, there were 102 fatal and 154 non-fatal accidents, a total of 256. The number of fatal accidents reported in September, 1909, is, therefore, 35 less than in the preceding month, and 11 less than in September, 1908. The number of non-fatal accidents reported in September, 1909, was 39 less than in the preceding month and 71 more than in September, 1908. Altogether, there were 74 fewer industrial accidents reported in September, 1909, than in the preceding month, and

60 more than in the same month of the preceding year.

Of 158 returns received during the month giving the ages of the victims of industrial accidents, 37 referred to persons under twenty-one years of age, 53 to persons between twenty-one and forty-five, and 16 to persons over 45. Fifty-two persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING SEPTEMBER, 1909, BY INDUSTRIES AND GROUPS OF TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	18	52	70

Civic employees.....		3	3
Miscellaneous.....	2	23	25
Unskilled labour.....	4	12	16
Total.....	91	225	316

Nature of Fatalities and Accidents.

The disasters of the month, involving more than one fatality, were the drown-

ing of three members of the crew of the schooner *Van Straubenzie* in a collision on Lake Erie; the killing of two men by a smelter explosion at Victoria Mines, Ont., the death of two trainmen in a derailment at Phoenix, B.C., and the killing of the engineer and fireman of a passenger train in a collision at Canaan, N.S.

Foundering of Schooner "Van Straubenzie" in Lake Erie.

On the morning of September 27th, the passenger steamer *City of Erie* ran down the schooner *J. C. Van Straubenzie* off Port Colborne, Ont., in Lake Erie. The latter immediately foundered, carrying down her captain, mate and cook.

Smelter Explosion at Victoria Mines, Ont.

On September 14, the water jacket surrounding the settler in the smelting plant at Victoria Mines, Ont., burst, and the contact of the water and white heat of the settler caused an explosion which instantly killed three workmen.

Wreck of Ore Train at Phoenix, B.C.

On September 18, a tree which was blown across the Great Northern Railway track on one of the switchbacks of the Granby mine at Phoenix, B.C., derailed an ore train. In the wreck the engineer and fireman of the train were killed.

Railway Collision at Canaan, N.S.

On September 21, the engineer and fireman of the Quebec express, bound from Boston to Quebec, were instantly killed by their train crashing into the rear of a Central Vermont Railway train at Canaan, N.S.

Record by Industries and Trades.

Agriculture.—There were eighteen fatal and fifty-two non-fatal accidents reported in this industry during September, 1909, compared with forty-five killed and thirty-nine injured in the previous month, and seventeen killed and thirty-five injured in September, 1908. Three each of the

fatalities were caused by tools, by being burned to death and by live stock, two each by being struck by trains and by falls, and one each by accidental shooting, by drowning, by a runaway, by falling material, and by machinery. Of the injuries, eighteen were caused by falls, fourteen by machinery, seven each by live stock and by runaways, two each by tools and by being struck by trains, and one each by an explosion and by falling material.

Lumbering.—There were ten fatal and nine non-fatal accidents, as against three killed and sixteen injured in August last, and two killed and three injured in September, 1908. Machinery caused three of the deaths, being run over and falling material two each, and flying material, being accidentally shot and drowning one each. Machinery also caused five of the non-fatal accidents, falling material two, and a fall and flying material one each.

Mining.—Among these workers, eleven were killed by accident and thirteen were injured in September, compared with twelve killed and eighteen injured in the preceding month, and nine killed and sixteen injured in September, 1908. Of the deaths, four were due to falling material, two each to being struck by trains and an explosion in a smelter, and one each to a fall, to machinery and to drowning. Six of the injuries were due to falling material, four to explosions of dynamite, and one each to an explosion in a smelter, to the fumes of a blast, and to being struck by the cars.

Building trades.—During September four fatalities and twenty-four serious accidents occurred, compared with three killed and twenty-six injured in August last, and four killed and nineteen injured in September of last year. The four deaths were caused by falls. Fifteen of the injuries were caused by falls, four by falling material, three by machinery and two by explosions.

Metal, engineering and shipbuilding trades.—Six workers were killed and thirty-three injured during September, as against five killed and ninety-six injured in August last, and five killed and thirty injured in September, 1909. Two

each of the deaths were due to machinery and to falls, and one each to an electric shock and to an explosion of steam. Of the minor accidents, fifteen were due to machinery, seven to falling material, three each to falls and to flying material, two each to electric shock and to molten metal, and one to an explosion of gasoline.

Woodworking.—Ten of these workers were injured, all by machinery, during September, 1909. In the previous month the record was one killed and fifteen injured. In September, 1908, there were five non-fatal accidents.

Printing.—Machinery caused two minor injuries. In the month before there were four injuries, and in September a year ago one injury.

Clothing.—To machinery was due one accident in this group during September. In August last, two workers were injured; there were no accidents in September, 1908.

Textile.—Two of these workers were injured, one by falling material and the other by machinery. In the preceding month one worker was injured; in September, 1908, there were no accidents.

Food and tobacco preparation.—There were four killed and eight injured, compared with five injured in August and two killed and three injured in September, 1908. Two of the fatalities were caused by an explosion of steam and one each by machinery and by drowning. Machinery caused three of the non-fatal accident, falling material two and hot candy, a fall and being struck by a train one each.

Leather trades.—Three leather workers were injured during September, 1909, one each by machinery, by an explosion and by falling material. There were no accidents in the previous month, and in September, 1908, two were injured.

Railway service.—There were sixteen railway employees killed by accident and eleven injured during September, 1909, as against eleven killed and twenty-two injured in August last, and twenty-three killed and twelve injured in September, 1908. Of the deaths, six were due to being run over, four to falls, two to a derailment and one each to being struck by an object when passing, to being caught between cars, to falling material

and to machinery. Of the non-fatal accidents three were due to falls, two each to being run over and to falling material, and one each to a collision, to machinery, to an explosion of dynamite and to being caught between cars.

Navigation.—The record for September 1909, was eleven killed and two injured, as against six killed and three injured in the month before, and seven killed and two injured in September, 1908. Five of the deaths were caused by drowning, four by falls and two by falling material. Flying material and machinery were the causes of the other two accidents.

General transport.—In these branches, there were five killed and seventeen injured in September. The record in August was eleven killed and twenty-five injured, and in September, 1908, seven killed and ten injured. Two each of the fatalities were due to falls and being struck by trains, and one to falling material. Nine of the other accidents were due to falls, three to runaways, two to collisions, and one each to being crushed, to falling material and to an elevator.

Civic employees.—Three of these employees were injured during September, two by falling material and the third by a fall. In the preceding month the record was one killed and seven injured, and in September a year ago, three injured.

Miscellaneous.—Two of these workers were killed and twenty-three injured during September, as against twelve killed and sixteen injured in August last, and nine killed and six injured in September, 1908. A fall caused one death and machinery the other. Machinery caused nine of the injuries, explosions five, falls three, elevators and machinery two each, and tools and flying material one each.

Unskilled labour.—Four labourers were killed and twelve injured during September, compared with eleven killed and twenty-nine injured in the previous month, and eleven killed and five injured in September, 1908. Being run over was responsible for three of the fatalities, and electric shock for the other. Five of the injuries were due to falling material, two each to explosions and falls, and one each to tools, machinery and being run over.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE SERIES, F. No. 71.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1909.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Downie Tp., Ont.....	Sept. 4	1	Accidentally shot.
".....	Waterville, Que.....	" 6	1	Struck by train at crossing.
".....	Blenheim, Ont.....	" 11	1	Impaled on fork.
".....	St. Johns, Que.....	" 11	1	Drowned, fell from wharf.
".....	Underwood, Ont.....	" 14	1	Burned to death in house.
".....	Pictou, N.S.....	" 14	1	Gored by a bull.
".....	Aberfoyle, Ont.....	" 15	1	Fell from silo.
".....	La Salette, Ont.....	" 16	1	Struck by train.
".....	Beaumont, Que.....	" 17	1	Cut artery in leg with scythe.
".....	Ellinore, Alta.....	" 26	1	Thrown from load and run over.
".....	Toronto, Ont.....	" 23	1	Fell from apple tree.
Farmer's wife.....	Hopetown, Ont.....	" 9	1	Burned to death.
Farm hand.....	Streetsville, Ont.....	" 14	1	Crushed by load of pigs.
".....	Chilliwack, B.C.....	" 22	1	Attached and bitten by drove of pigs; died from effects.
".....	New Westminster, B.C.....	" 17	1	Struck by end of broken cable.
Farmer's daughter.....	Lander, Man.....	" 18	1	Burned to death in prairie fire.
Farmer's son.....	St. Augustin, Que.....	" 21	1	Dragged to death by a bull.
".....	Victoria West, B.C.....	" 18	1	Impaled on pitchfork.
<i>Lumbering—</i>				
River driver.....	Thompson River, B.C.....	" 3	1	Drowned while driving logs.
Train man in logging camp.....	Port Renfrew, B.C.....	" 7	1	Run over by logging car.
Sawmill hand.....	Montmagny, Que.....	" 9	1	Cut in two by circular saw.
".....	Blind River, Ont.....	" 9	1	Caught in belting.
".....	Vancouver, B.C.....	" 11	1	Iron pulley burst, piece struck him.
".....	Port Renfrew, B.C.....	" 8	1	Run over by car laden with lumber.
".....	Black River, Man.....	" 20	1	Caught in belting.
Logger.....	Bracebridge, Ont.....	" 12	1	Accidentally shot by companion.
".....	Fassett, Ont.....	" 14	1	Tree fell on him.
".....	Hull, Que.....	" 15	1	Tree fell on him.
<i>Mining—</i>				
Miner.....	Glace Bay, N.S.....	" 7	1	Struck by empty box.
".....	Glace Bay, N.S.....	" 13	1	Run over by car.
".....	Glace Bay, N.S.....	" 15	1	Fall of coal.
".....	Taber, Alta.....	" 13	1	Fall of rock.
".....	Cobalt, Ont.....	" 19	1	Fell 70 ft. in shaft.
".....	Coal Creek, B.C.....	" 16	1	Fall of rock.
".....	Glace Bay, N.S.....	" 20	1	Fall of rock.
Quarryman.....	Hawkesbury, Ont.....	" 28	1	Drowned while quarrying near river.
".....	Hampstead, N.B.....	" 24	1	Struck by handle of winch.
Smelter men.....	Victoria Mines, Ont.....	" 14	2	Smelter exploded.
<i>Building Trades—</i>				
Painter.....	Montreal, Que.....	" 2	1	Fell 30 ft. from scaffold.
Carpenter.....	Vancouver, B.C.....	" 7	1	Fell from roof of house.
".....	Toronto, Ont.....	" 22	1	Fell 10 ft. from scaffold.
".....	Toronto, Ont.....	" 23	1	Fell 40 ft.
Stone mason.....	Three Rivers, Que.....	" 30	1	Scaffold gave way, fell 35 ft.
<i>Metal, engineering and Shipbuilding Trades—</i>				
Stationary engineer.....	Oil Springs, Ont.....	" 7	1	Caught in shafting.
".....	Coquitlam, B.C.....	" 16	1	Struck by breaking cable
Lineman.....	Ottawa, Ont.....	" 8	1	Fell 40 ft. from pole.
Electrical worker.....	Montreal, Que.....	" 16	1	Electrocuted.
Bridge worker.....	Thamesford, Ont.....	" 8	1	Fell from bridge.
Boilermaker.....	Victoria, B.C.....	" 14	1	Escaping steam.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1909.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Food and Tobacco Preparation—</i>				
Miller.....	Bridgeport, Ont.....	Sept. 7	1	Drawn into shafting.
".....	Forest Glen, N.B.....	" 16	1	Drowned while working under mill.
Sugar refinery hand.....	Montreal, Que.....	" 1	1	Steam pipe burst.
Foreman in abattoir.....	Toronto, Ont.....	" 22	1	Scalded by steam.
<i>Railway Service—</i>				
Engineer.....	Phoenix, B.C.....	" 17	1	In a derailment.
".....	St. Augustin, Que.....	" 23	1	In jumping from exploding locomotive.
Fireman.....	Fort William, Ont.....	" 10	1	Struck by object while passing.
".....	Levis, Que.....	" 21	1	Fell from train.
".....	Phoenix, B.C.....	" 17	1	In a derailment.
Brakeman.....	Marquette, Man.....	" 1	1	Run over by train.
".....	Moorefield, Ont.....	" 17	1	Run over by train.
".....	New Liskeard, Ont.....	" 22	1	Fell from train.
".....	Fairfax, Man.....	" 20	1	Caught between cars.
".....	Montreal, Que.....	" 30	1	Run over by train.
Trackman.....	Niagara Falls, Ont.....	" 13	1	Struck by a train.
".....	Cornwall, Ont.....	" 13	1	By cave-in of gravel.
Coal shutes man.....	Niagara Falls, Ont.....	" 3	1	Run over by train.
Wheel tapper.....	Brantford, Ont.....	" 22	1	Run over by engine.
Yardman.....	Fort William, Ont.....	" 20	1	Struck by fly-wheel in elevator.
Car cleaner.....	Toronto, Ont.....	" 28	1	When falling from car, burst artery.
<i>Navigation—</i>				
Longshoreman.....	Montreal, Que.....	" 9	1	Fell into hold.
".....	St. John, N.B.....	" 9	1	Fell 30 ft. into hold.
".....	Toronto, Ont.....	" 21	1	Drowned, coal barge sank.
Deckhand.....	St. Damase, Que.....	" 10	1	Derrick fell on him.
".....	Bridgeburg, Ont.....	" 14	1	Drowned, fell from ferry.
".....	Tod Inlet, B.C.....	" 13	1	Fell into hold.
Sailor.....	St. John, N.B.....	" 21	1	Bale of rags fell on him.
".....	Sault Ste. Marie, Ont.....	" 25	1	Caught between boat and pier.
Captain.....	Lake Erie, Ont.....	" 27	1	Drowned, schooner foundered in collision.
Mate.....	Lake Erie, Ont.....	" 27	1	Drowned, schooner foundered in collision.
Cook.....	Lake Erie, Ont.....	" 27	1	Drowned, schooner foundered in collision.
<i>General Transport—</i>				
Driver.....	Montreal, Que.....	" 9	1	Struck by train at crossing.
".....	Waterville, Que.....	" 8	1	Struck by train at crossing.
Street ry. employee.....	Kingston, Ont.....	" 7	1	Fell from car.
Teamster.....	Toronto, Ont.....	" 27	1	Cave-in of sand bank.
".....	Ymir, B.C.....	" 29	1	By falling with bridge which gave way.
<i>Miscellaneous—</i>				
Oil operator.....	Tilbury, Ont.....	" 9	1	Fell 60 ft. from derrick.
Brick maker.....	Port Credit, Ont.....	" 22	1	Caught in machinery.
<i>Unskilled Labour—</i>				
Labourer.....	Winnipeg, Man.....	" 6	1	Run over by auto.
".....	St. Catharines, Ont.....	" 10	1	Run over by train.
".....	Montreal, Que.....	" 14	1	Electrocuted.
".....	Ingersoll, Ont.....	" 27	1	Run over by train.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN SEPTEMBER.

Farmer.....	Cummock, Ont.....	Aug. 30	1	Hay sling fell on him.
Painter.....	Amherst, N.S.....	" 31	1	Fell 35 ft. from roof.
Deckhand.....	Windsor, Ont.....	" 30	1	Drowned off ferry.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during September, 1909.

DOMINION REPORTS.

Trade Returns.

Report of the Department of Customs, containing the tables of imports, exports and navigation of the Dominion of Canada for the fiscal year ended March 31, 1909. Ottawa: King's Printer, 1909.

DURING the fiscal year ended March 31, 1909, the total trade of the Dominion of Canada, including imports entered for consumption and all exports, amounted to \$559,718,116. This total was greater than for any former year except 1907-1908, when the aggregate trade amounted to \$638,435,222. The trade with Great Britain amounted to \$204,428,319, compared with \$229,443,627 in the previous year, and the trade with the United States declined from \$324,173,325 to \$272,631,127. The trade with France, Germany, Spain, the West Indies, China and Japan, and Switzerland also showed a decrease, while there was an increase in the trade with Italy, Holland, Belgium, Newfoundland, and South America. The amount of duty collected was \$48,059,791.93, equivalent to a percentage of 16.11 on the total value of goods entered for consumption, dutiable and free.

Inland Revenues.

Reports, returns and statistics of the inland revenues of the Dominion of Canada for the year ended March 31, 1909, part 1, excise. Ottawa: King's Printer, 1909. Page, 233. Price, 15 cents.

The excise revenue of Canada, which accrued during the fiscal year ended March 31, 1909, amounted to \$15,134,549, compared with \$16,068,171. There was a decrease in the quantity of spirits produced from 6,849,763 proof gallons in 1907-8 to 5,176,048 in 1908-9. The manufacture of tobacco, snuff and cigarettes, in the last fiscal year amounted to 17,978,589 lbs., being over 2,000,000 lbs. above the average for the previous four years. On the other hand, the number

of cigars manufactured in 1908-1909 which amounted to 186,419,145, was more than 11,000,000 below the average for the previous four years.

Indian Affairs.

Annual report of the Department of Indian Affairs for the year ended March 31, 1909. Ottawa: King's Printer, 1909. Page, 620. Price, 30 cents.

The Report of the Department of Indian Affairs for the last fiscal year shows that there has been, on the whole, a continued improvement in the conditions of the native races in Canada. During the year there was an excess of 97 births, among them over the number of deaths, while the estimated population increased from 110,205 in March, 1908, to 111,043 in March, 1909. A marked advance was observed in the character of their dwellings, in their industrial pursuits, and in other features of civilization. Compared with the previous year there was an increase of nearly \$200,000 in their earnings from agriculture, and an increase of 3,968 acres in the amount of land put under crop. The principal earnings of the Indians were derived from the following industries:

Agriculture.....	\$1,477,997
Beef.....	256,939
Wages.....	1,626,546
Various industries.....	644,388
Fishing.....	510,419
Hunting and trapping.....	616,834

There were 10,479 pupils enrolled in the 308 Indian schools, of whom 5,323 were boys and 5,156 were girls. Compared with the preceding year there was an increase of 171 pupils.

BRITISH REPORTS.

Means of Assistance of the Unemployed.

Report by Mr. Cyril Jackson and Rev. J. C. Pringle on the Effect of Employment or Assistance given to the "Unemployed" since 1886 as a means of Relieving Distress outside the Poor Law. London: Wyman and Sons. Page, 783. Price, 12s., 6d.

An important report on the effects of employment or assistance given to the unemployed has been issued as Appendix Volume XIX, to the report of the British

Royal Commission on the Poor Laws and Relief of Distress. A summary is given of the results of previous inquiries which were made during the three periods of scanty employment, in the years 1885-8, 1892-5, and 1902-5, and the nature of the relief agencies which dealt with the unemployed during those periods.

In a list which is said not to be exhaustive, twelve causes of unemployment are mentioned. There are: Sicknes and low physique; deficiency of character; the casual nature of employment in many trades; seasonal character of certain trades; over specialization; introduction of machinery; the decay of apprenticeship; boy labour which leads to no permanent employment; army service which unfits men for regular work; alien immigration; relief works causing regular employees to lose their work; underselling by charitable or rate-aided agencies.

The following suggestions are made as a solution of the unemployed problem. Better organization of industry, which would render the trade crisis less acute by steadying the supply of labour. Differentiation of the unemployable from the willing workers, and the better classification of paupers, which would show the extent of the problem, and how far a re-organization of labour must be carried.

TRADE DISPUTES DURING THE MONTH OF SEPTEMBER, 1909.

THE principal industrial disturbances in Canada through trade disputes during the month of September, were in the coal mining industry of Nova Scotia, where three strikes which had begun in previous months, were still in existence, and a large number of employees were idle. At Inverness, N.S., normal conditions were resumed, so far as the Company was concerned; at Glace Bay the mines continued in operation with an output still somewhat below the normal, but higher than that of the preceding month; at Springhill, the mines remained closed. Building operations at Winnipeg were impeded by a strike of carpenters which had begun in August, but by the end of September most of the strikers had returned to work. There were only two

Cutting off the supply of unskilled and unintelligent labour by training boys to enter regular and permanent trades. In conclusion, it is remarked that relief works must tend to discourage the self-insurance of the workers through trade unions or thrift, and must tend to retain superfluous labour which ought to be dispersed. If state or municipal action is desirable at all, the opinion is expressed that it should take the form of a better regularization of their own ordinary work.

OTHER REPORTS RECEIVED.

Canada.—Report of the Department of Trade and Commerce for the fiscal year ended March 31, 1909. Part II. Canadian Trade: 1. With France, 2. with Germany, 3. with United Kingdom, 4. with United States.

Reports, returns and statistics of the Inland Revenues of the Dominion of Canada for the year ended March 31, 1909. Part II. Inspection of weights and measures, gas and electricity.

Great Britain.—Annual Statement of the Navigation and Shipping of the United Kingdom for the year 1908, with comparative tables for the years 1904 to 1908.

new disputes, and neither of them was of serious consequence.

Analysis of Trade Disputes During the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during September, was nine, a decrease of eight compared with August, but an increase of five compared with September, 1908. About 30 firms and 4,474 employees were affected by these disputes, two firms and about 28 employees being involved in new disputes.

Loss of time in working days.—The loss of time to employees through trade disputes during September was approxi-

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE SERIES C., No. 108.

TABLE OF TRADE DISPUTES DURING THE MONTH OF SEPTEMBER.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.			Date of commencement.	Date of termination.	Result.
			Directly.	Indirectly.	Directly.	Indirectly.	Fe- males, Males, males.			
			Di- rectly.	Indi- rectly.	Fe- rectly.	Males, Males, males.	Fe- males, males.			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.										
<i>Mining</i> — Coal miners.....	Glace Bay, N.S.....	For recognition of the United Mine Workers of America....	1		1,875			July 6		No settlement reported at end of month.
"	Inverness, N.S.	Alleged reduction from wages for dues to P.W. Association to which strikers did not belong.....	1		100			" 8 Sept.		No settlement reported, but company ceased to be effected.
"	Springhill, N.S.	For increase in wages and against conditions of employment.....	1		1,700			Aug. 10		No settlement reported at end of month.
<i>Building Trades</i> — Carpenters.....	Winnipeg, Man.....	For increase in wages and a new code of working rules.....	12		600			" 25		No settlement reported, but most of the strikers had returned to work on the terms demanded.
Electrical workers..	"	Failure to make a new agreement on expiry of old one.....	8		100			" 5		No settlement reported at end of month.

<i>Clothing Trades—</i> Garment workers	Ottawa, Ont.	For increase in wages, and pay- ment of time and a half for overtime.	1	4	2	24	23	Places of strikers were filled.
	Montreal, Que.	For shorter hours and improve- ment in conditions of labour.	4	65		July 23		No settlement reported at end of month.

DISPUTES WHICH BEGAN DURING THE MONTH.

<i>Building Trades—</i> Bricklayers and masons	Peterboro, Ont.	Against employment of non- unionist and for payment of union wages.	1	20		Sept.	7	8	Increase in wages granted.
	Kingston, Ont.	Against employment of a non- unionist.	1	8		"	27		No settlement reported at end of month.

* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

mately 96,000 working days, compared with 108,925 in August, and 179,085 in September, 1908.

Trades affected by new disputes.—Both of the new disputes of the month affected the building trades.

Localities affected by new disputes.—The two new disputes of the month took place in the Province of Ontario.

Causes of disputes.—The following were the causes of the new disputes of the month.

Cause.	No. of disputes.
Against employment of a non-unionist	1
Against employment of non-unionist and for higher wages	1
Total	2

Methods of settlement.—Of the nine disputes in existence during September, three were terminated in the course of the month. Of these, one was settled through negotiations between the parties concerned, one by the resumption of work by most of the strikers, and in one case the places of the strikers were filled.

Results of disputes.—The employers were successful in two of the disputes which were terminated, and the employees in one.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes in existence in Canada during September, which commenced in previous months, comprised strikes of coal miners at Glace Bay, N.S., Springhill, N. S., and Inverness, N.S., carpenters and electrical workers at Winnipeg, Man., Jewish bakers at Montreal, Que., and garment workers at Ottawa, Ont.

[Strike of Coal Miners at Glace Bay, N.S.]

A strike of coal miners, which began at Glace Bay, N.S., on July 6, on account of the refusal of the Dominion Coal Company to recognize the United Mine Workers of America, continued with little change throughout September. About 2,500 men were at first affected by this dispute, but during August about one-quarter of

the strikers secured employment elsewhere, and more of them left Glace Bay for other points in the course of September. Mining operations were continued, and at the end of September, the Company's statement showed a production of somewhat over 8,000 tons a day, which was about four-fifths of the normal production at that time of the year. Somewhat less than 200 soldiers remained on duty at Glace Bay, the rest of the force which had been called out at the beginning of the strike, having returned to Halifax.

Strike of Coal Miners at Springhill, N.S.

No settlement was reported in the case of a strike of coal miners of the Cumberland Railway and Coal Company, which took place at Springhill, N.S., on August 10, on account of the dissatisfaction of the men with wages and conditions of employment. The strikers originally numbered about 1,700 men, but a few of them left for other districts during August and September. The work of mining was completely at a standstill, officials of the Company merely continuing to operate the pumps.

Strike of Coal Miners at Inverness, N.S.

A strike of coal miners employed by the Inverness Coal and Railway Company, which took place at Inverness, N.S., on July 9, ceased in September to affect the Company, the daily production of the mines having gradually increased, until it was again normal. The cause of the dispute was the alleged deduction by the Company of \$1.05 per quarter for dues and assessments in the Provincial Workmen's Association, from the wages of certain employees who were members of the United Mine Workers of America. It was estimated by the Company that the number of strikers was about 100, chiefly Belgians who had not been long in the country. On the other hand, the United Mine Workers claimed to have on their list two or three hundred strikers. These included, however, many new arrivals who had come with the intention of working, but had not begun on account

of the existence of the strike. Somewhat less than 100 soldiers were stationed at Inverness.

Strike of Carpenters at Winnipeg, Man.

No settlement was reported in a strike of carpenters which began at Winnipeg, Man., on August 25, on account of the refusal of the employers to grant a demand for an increase in wages from 35 to 45 cents an hour and a new code of working rules. Most of the strikers, however, had returned to work, a large number of the employers having signed the new agreement. The contractors, who were members of the Winnipeg Builders' Exchange, continued to hold out against the demands of the strikers, and were carrying on their work with non-unionist carpenters. General industrial conditions were only slightly affected by the dispute at the close of the month.

Strike of Electrical Workers at Winnipeg, Man.

No settlement was reported in a strike of inside electrical workers at Winnipeg, Man., which began on August 5, on account of the failure to arrive at an agreement to replace the one which had expired. About eight firms, members of the Builders' Exchange, and 100 employees were involved in this dispute.

Strike of Jewish Bakers at Montreal, Que.

No settlement was reported in a strike of Jewish bakers at Montreal, Que., which began on July 23, affecting four firms and about 65 employees. It was alleged by the men that the cause of the dispute was the refusal of the employers to grant their

demands for a holiday on Saturdays, a decrease in the hours of labour from 17 or 18 to 10 per day, higher wages and better conditions of employment.

New Disputes.

The new disputes of the month were strikes of bricklayers and masons at Peterborough, Ont., and painters at Kingston, Ont.

Strike of Bricklayers and Masons at Peterborough, Ont.

On September 7, about 20 bricklayers and masons at Peterborough, Ont., stopped work on account of the employment of non-unionists, and with a view of obtaining an increase in wages, bringing them up to union rates. On the following day work was resumed, the employer having agreed to pay the union scale of wages.

Strike of Painters at Kingston, Ont.

On September 27, a strike of 8 painters was reported to have occurred at Kingston, Ont., on account of the refusal of a painter, employed in the shop affected, to join the Union of Painters and Decorators of America. This dispute was the recurrence of one which took place on August 16.* No settlement of the strike was effected during September.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of September, and which have been reported to the Department.

*See the *Labour Gazette* for September, page 387.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NOVA SCOTIA.

Damages for alleged defective performance of work.

IN an action for work done on certain small steamers belonging to defendants, the claim was admitted, but

defendants set up a counter-claim for a much larger sum for damages on account of the alleged defective performance of work by plaintiff as a ship carpenter in caulking and otherwise repairing a steamer belonging to defendants. It was alleged that a tank in the steamer was so defectively caulked by plaintiff that the leakage therefrom caused the steamer to sink at her moorings; hence the counter-

claim, which included the costs of raising the boat and defendants' inability to use the boat for several days. In giving judgment on the counter-claim Mr. Justice Longley said that the question was, "whether this was due to the negligence of the plaintiff or his employees. The plaintiff personally knew nothing of the matter. The work was undertaken by his foreman and executed by men whom his foreman employed, but I think that there is no doubt that, if the work was negligently done, the plaintiff is responsible. The instruction I give myself for making this finding is; if the plaintiff employed suitable, competent and efficient men to do this work, and these men performed the work in a careful and businesslike manner, then the plaintiff is not liable in damages. If the job was done with reasonable care and efficiency such as an honest workman would do, then if it turned out that a leak ensued some days after, it must be put down as an incident which is liable to happen under any circumstances, and which no reasonable care and prudence could have avoided." Acting upon this view of the law, the learned judge analyzed the evidence and found that the work was done in a proper and workmanlike manner, that the plaintiff was not shown to be negligent in the performance of the work, and was not therefore liable in negligence to defendants. He dismissed the counter-claim with cost, and gave judgment for plaintiff's claim and his costs of suit.

(McPherson v. Judge T. Eastern L.R. 110).

NEW BRUNSWICK.

Workmen's Compensation for Injuries.

In a summary proceeding under this Act. (Con. Stats. N.B., 1903, c. 146, as amended by 7 Edw. 7, c. 26, s. 2), the petitioner claimed to recover compensation for injuries received while working for the defendant on a rock cutting in the construction of a road bed for the International Railway. There was evidence that the petitioner was one of a gang employed for the defendant in blasting rock on the proposed line of railway, and that the rock to be blasted was afterwards used in cement and otherwise to fill in parts of the road bed. The learned

judge found for the petitioner on all other points, but referred two questions to the full Court for instructions, namely (1), whether the petitioner was exempt from the benefit of the Act on the ground that he was a servant in "quarrying"; (2), what amount of compensation might be awarded under section 6 of the Act. The Court was unanimous in holding (1), that making a rock cutting in the construction of a railway roadbed is not "quarrying" within the meaning of the Act, even though the rock removed is used to build the road bed; and (2), that, under section 6 of the Act, damages may be assessed to an amount equal to the estimated earnings of the workman for three years preceding the injury, although that amount should exceed \$1,500. This section fixes a limit, but not a measure of damages. An order was made accordingly.

(Henry, petitioner, v. Malcolm, defendant, 39 N.B. Repts. 74.)

Damages for Negligence.

In an action of trespass in which, in answer to questions submitted by the judge to the jury, a verdict was entered for the plaintiff for \$2,000, it appeared that the plaintiff, who was the agent of an express company and travelled on the defendant's steamer in charge of the company's express parcels, by direction of the steamer's officers went down on a twin freight elevator to look for some missing parcels in the steamer hold. The elevator stopped at the between decks and the plaintiff stepped off into the other elevator shaft and was injured. He was not warned of the danger; the light was bad; and, though he was given a ship's lantern, it did not cast any light at his feet. The jury found that he fell as a result of the defendants' negligence in not properly protecting the elevator, and that he was not guilty of contributory negligence. Upon a motion for a new trial the Supreme Court held that the plaintiff was entitled to require that the defendant's premises should be rendered reasonably safe for him, and that the verdict for the plaintiff should stand.

(McBeath v. The Eastern Steamship Company, 39 N.B. Repts. 77.)

ONTARIO.

Wage Earner's Lien for Work Done.

Upon the trial of an issue directed to be tried by an order obtained by an execution creditor, the question was, which one of two of the parties to the action, the plaintiff or the defendant T., a wage earner, was entitled to certain moneys in the hands of the Canadian Pacific Railway Company? The Railway Company for the purposes of the action (which was what is usually known as an interpleader issue), were joined as defendants. It appeared that a certain contractor failed to pay all bills as required by his contract with the railway company to build certain houses for the company. The contract gave the company the right to pay those bills. The contractor by letter gave an assignment of \$2,676 to plaintiffs, which was received and acknowledged by the company. The plaintiffs claimed the money in the hands of the company under their assignment. The defendant T. claimed as a wage earner who had worked on the houses for the company, and sought to have the company pay him as they might have done under the contract. Judge Kehoe of the District Court of Sudbury, who tried the issue, held, that the plaintiffs were entitled to the money, and that defendant T. had no right to a lien on the moneys for his work. He gave judgment for the plaintiffs for \$1,600, less the costs of the defendant railway company, who were directed to pay this sum to the plaintiffs, less the company's costs in all the proceedings, including the costs of the issue. Plaintiffs were also allowed costs against the defendant.

(T. Knight Bros. Co., v. Turner and C.P.R. 14 Ont. Weekly Reporter, 517.)

Conflicting Mining Claims.

D. and M. both filed claims on the same day claiming discovery of a certain mining claim in the Montreal River Mining Division situate in the unsurveyed portion of the Temagami Forest Reserve. D.'s claim was allowed as the evidence showed that he had made a valuable discovery, while M. had only re-set posts which had marked a cancelled claim on the same

land, and had worked at the same spot where it had been previously worked and abandoned.

(Munro v. Downey and Downey v. Munro; 14 Ont. Weekly Reporter, 523.)

Liability for Workman's Wages.

Plaintiff, who worked in defendant's stone quarry, sued for his wages. The defendants denied plaintiff's employment. There was no contract under defendants' seal as a corporation; but the acting manager of defendants told plaintiff to go to work, three of the directors knew he was working, and defendants got the benefit of the work. The defendants were held liable.

(Milne v. Ontario; 13 Ont., Weekly Reporter, 1137.)

Child Labour.

The Children's Aid Society of Ottawa in connection with a movement against the employment of young girls by local organ grinders to collect from the public as well as sometimes operating the machine, charged Joseph Lande with having his daughter Angeline, under 16 years, soliciting alms. It was shown that the girl was but 13 years of age. The magistrate fined Lande \$25 and \$2 costs with the option of leaving the city by Wednesday.

Sentencing of Rioters at Fort William.

Following the shooting affray which took place during the recent strike of freight handlers at Fort William, fifteen men were arrested by the police, of which one was discharged at the preliminary hearing as there was no identification. The rest were all tried. Charles Frank, charged with rioting and unlawful assembly, was sentenced to nine months imprisonment; Tony Limber and John Delarbi pleaded guilty to the same charges and were sentenced to seven months each; Tony Botchenski, Wasyl Condogon, Geo. Christie and Mike Tomchuk were acquitted. Charged with unlawful assembly, Tony Panapolis and E. Mazrione were found guilty and sentenced to seven months each; S. Bibos was found guilty and sentenced to thirty days' hard labour; while Joe Stalmuck, Gus Millis, Geo. Devacos and Jas. Macropolis were acquitted.

MANITOBA.

Liability of Trade Union.

A further important decision in the long standing case of *Cotter vs. Osborne*,* involving the imposing of damages upon a trade union, was delivered during September at Winnipeg, Man.

*For statements re previous decisions in this case see the *Labour Gazette* for April, 1909, page 1154, and September, 1909, page 401.

The plaintiffs recovered a judgment against defendants for damages arising out of the defendants interfering with the plaintiffs during a plumbers' strike. Execution was issued, but nothing realized, and upon an ex-parte application by the plaintiffs an order was made for the appointment of a receiver. Subsequently an application was made to continue that order. The chattel property was not of sufficient importance to justify the appointment of a receiver, but the dues and assessments owing were considerable.

His Lordship, in delivering judgment, referred to the constitution which governed the plumbers' union, and stated he could not find any contract whereby a member agrees to pay dues, neither could he find anything to justify the contention that such a contract could be implied. When a member was in arrears he stood suspended from all benefits and might later be expelled. Under all these circumstances His Lordship did not think the receiver could recover by action. In his opinion there was nothing of value for the receiver to collect, and the plaintiff's motion was, therefore, dismissed with costs.

(*Cotter vs. Osborne et al*; Court of King's Bench, Winnipeg, Metcalf J.)

Payment of Workmen's Wages Under Builders' and Workmen's Act.

One DeG. had a contract for some grading on the roads in the defendant municipality, and the municipality owed him, in respect of such work, the sum of \$865.58. DeG. did not pay his workmen, and this action was brought by the plaintiff for the wages due to himself, and the several other workmen who had assigned their claims to him. Plaintiff's right to the money was resisted by two other parties, claiming under garnishing

orders, and by several creditors of DeG. who had orders upon the municipality. Plaintiff's claim to priority was based upon the Builders' and Workmen's Act, R.S.M. 1902, c. 14.

It was decided by Mr. Justice Mathers, that section 4 of that act, making a proprietor directly liable for payment of the wages of workmen employed by a contractor doing any work for him, effects what might be termed a statutory assignment to the workmen, to the amount of their unpaid wages, of the moneys payable by the proprietor to the contractor, so that the workmen are entitled to priority over the claims of creditors holding garnishing or other orders against the proprietor in respect of such moneys, and such creditors are entitled to be paid out of any balance in the order in which notices of their several claims were given to the proprietor. In such case it makes no difference that the proprietor has made a payment to the contractor which diminishes the amount available for such other creditors.

(*Bryson v. Municipality of Rosser*, 18 Man. Repts., 658.)

Lien of Stable Keeper for Keep of Horse.

In a case in which the Court of Appeal of Manitoba had to consider certain clauses in the Stable Keepers' Act (R.S. M. 1902, c. 159, secs. 2, 3) and the Hotel Keepers' Act (R.S.M. 1902, c. 75), the court held, that a livery stable keeper has no lien on a horse for its stabling and keep as against the real owner, when the horse was stolen and placed with him by the thief. Section 2 of the Stable Keepers' Act, which gives a livery stable keeper a lien on animals for stabling and feeding them, and the same rights and privileges for exercising and enforcing such lien as hotel keepers may have or possess in virtue of the Hotel Keepers' Act, does not give the livery stable keeper the same right of lien which a hotel keeper has at common law in respect of goods or animals left in his charge by a guest who may have stolen the same, as the latter act in its terms gives only a lien on the property of persons who may be indebted to the hotel keeper for board or lodging, whatever may be his rights independently of the act.

(*Harding v. Johnston*, 18 Man. Repts., 625.)

THE LABOUR GAZETTE

NOVEMBER, 1909.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF OCTOBER, 1909.

I.—GENERAL SUMMARY.

A still further increase in general trade and industrial activity occurred in Canada during October. Labour was still more actively employed, than in September, especially in the outdoor trades, in anticipation of the closing of the season of activity. Railway construction work, building, and civic improvement work were especially active, and larger numbers were employed than in any previous month of the season. The threshing and marketing of the grain crop proceeded rapidly, causing marked activity in the agricultural and transportation branches. The very favourable agricultural yields and the high prices obtaining therefor, imparted a widespread stimulus to manufacturing and general trade. An advance in the interest rate bore testimony to the increasing demand for money. The lumbering and mining industries both reported more favourable conditions than in the preceding month. Fishermen also had a better month. The outlook with regard to the winter season, from the standpoint of possible unemployment during the period when outdoor operations are suspended, is more favourable at the close of the month than at the corresponding period of last year, and much more favourable than at the corresponding period of 1907.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more

important changes in wages and hours of labour, information concerning which was received at the department of Labour, during October.

Lumbering.—In connection with the engaging of men for the winter lumber camps the tendency of wages was still upward as compared with last year.

The printing and allied trades.—From October 1, sixteen printers at St. Catharines, Ont., obtained an advance from \$14 to \$16 per week of forty-eight hours in the case of machine hands, and from \$13 to \$13.50 in the case of hand compositors.

The clothing trades.—Thirty-one journeymen tailors in Vancouver, B.C. accepted an increase from \$18 to \$20 per week, and a raise of ten per cent. on piece work.

Railway employés.—About 200 brakemen and 120 conductors in the employment of the Michigan Central Railway Company, living at St. Thomas, Ont., received a substantial increase in wages.¹ Agents and telegraph operators in the employ of the same company on its Canadian lines also received an increase in wages.
