Civic employés.—Teamsters in the employ of the Corporation of Belleville, Ont., had their wages increased from \$3 to \$3.50 per day. Library employés at Ottawa, Ont., obtained an advance in wages.

¹See report of St. Thomas, Ont., correspondent.

Cost of Living.—Prices.

Prices generally were very firm, and were upward in several important lines. Grain prices were slightly lower, and hogs showed a considerable decline, but butter, eggs, hay and other farm products were very high for the season. There was a revival in real estate trading at several points and prices were advancing. Winter prices for milk and coal went into effect, but bread prices were lower. Fur goods were considerably higher than at the same time last year. A marked advance in rubber goods was announced for November 1, following upon the high price of crude rubber prevailing for several months past. Hides, leather and shoes were advancing in price. The metal trade was active with prices steady to firm for pig iron, copper, lead, tin and spelter. White lead was low, but the paint market generally was considered firm with strengthening tendencies. The price of cement was increased. Among groceries, tea was firm and upward.

Interruptions to Industry.*

Among industrial and other establishments and buildings destroyed by fire or other cause during October, as reported in the press of the Dominion, the following may be mentioned:

Nova Scotia.—Confectionery establishment at New Glasgow, loss, \$2,500; business block at Sydney, loss, \$25,000.

Heavy rain storms during the month caused considerable damage in farming districts and several washouts occurred on the line of the Intercolonial Railway causing traffic to be suspended for some days.

In the early days of the month, the barkentine *Whidden* from North Sydney laden with coal, was wrecked at Cape Point, loss, \$15,000. On October 28, the coal schooner *Canadienne*, was wrecked off St. Paul's Island. On October 27, the Schooner *Lewanika* was wrecked at Prospect Ledges and on October 31, the *SS. Lavonie* ran on a reef at Three Sisters' Island and sustained severe damages to her hull.

Prince Edward Island.—Outbuildings and contents at North Yron, loss, \$2,500.

New Brunswick.—School house at Land's End; blacksmith's shop of iron works at St. John, loss, \$2,500.

The steam yacht, *Juanita*, was burned to the water's edge at Holdersville, loss, \$1,500.

Quebec.—Railway coal dump at Farnham; business block at Granby; club house at Hull, loss, \$35,000;

sash factory at Joliette, loss, \$2,000; lumber yard at Kingsbury, loss, \$10,000; power house at Lac Deschênes, loss, \$3,000. At Montreal, warehouses, loss, \$50,000; stables and nineteen horses, loss, \$10,000; carpenter shop, loss, \$2,000; grain elevator and contents, customs house, police station and warehouses at Quebec, loss, \$1,210,700; outbuildings at St. Aimé, loss, \$2,000; cheese factory at St. Bruno, loss, \$1,500; sawmill at Sayabec; steam laundry at Waterloo; model farm dwelling and outbuildings at Wheatland, loss, \$15,000.

Barns at Johnville.

On October 14, the *SS. Empress of Ireland* ran on a submerged wreck in the St. Lawrence river between Cap Chatte and Matane and received severe damages to her hull. In a storm on October 30, the *SS. Glenlui* ran ashore in the St. Lawrence and was much damaged.

Ontario.—Power plant and shoe factory at Aylmer, loss, \$100,000, 100 men thrown out of employment; railway workshop and station at Belleville; woollen mill at Clarksburg, loss, \$10,000; church and two residences at Coldwater; outbuildings at Credisville, loss, \$2,500; outbuildings and residence at Creemore; hotel at Ennismore; hotel at Falls View, loss, \$10,000; furniture factory at Guelph; cheese factory at Hastings, loss, \$4,000; factory (partial) at Hespeler, loss, \$1,000; outbuildings and residence at Humberstone, loss, \$3,000; tannery at Huntsville, loss, \$15,000; hotel and theatre at Kenora, loss, \$150,000; 13,000,000 feet of lumber at Midland, loss, \$300,000; pill factory (partial) at Morristown; cheese factory at Ormond, loss, \$3,000; bakery at Ottawa, loss, \$10,000; fancy goods store at Niagara Falls, loss, \$10,000; outbuildings and residence in Niagara township; railway station at Palmerston, loss, \$10,000; at Peterborough, store and contents, loss, \$15,000 and hotel (partial), loss, \$15,000. Hotel at Rainy river, loss, \$10,000; outbuildings and contents at Ridgetown, loss, \$2,000; sawmill (explosion) at St. Clemens, loss, \$45,000; outbuildings and dwelling at Stamford township, loss, \$6,000; restaurant at Toronto, loss, \$10,000; dye works at Toronto, loss, \$20,000; cheese factory at Waterford; cereal factory (partial) at Windsor, loss, \$1,500; warehouse at Woodstock, loss, \$25,000.

Barns at Aldershot, Kirkdale, Niagara, Merritt, Peterborough, Smith, Strathroy and South Augusta.

A storm on Lake Superior in the second week of October caused serious delay to navigation; the loss occasioned was estimated at over \$1,000,000.

On October 14, the *SS. Athabaska* ran ashore on Flower Pot Island 80 miles from Owen Sound, and was damaged to the extent of \$40,000. On October the *SS. Hamonic* came in collision with the barge *Chatanooga*, and was badly strained.

Manitoba.—Warehouse and contents at Brandon, loss, \$20,000; business portion of Gladstone, loss, \$20,000; workshop and four buildings at Rapid City, loss, \$20,000; stables and brickyards at St. Boniface, loss, \$10,000; business block at Winnipeg, loss, \$90,000.

Barns at Franklin and Rosewood.

Prairie fires caused damage in certain portions of Manitoba in the beginning of the month.

Saskatchewan.—Business portion of Battleford, loss, \$40,000. Forest fires in the Beaver Lake district caused considerable damage.

Alberta.—Bank building at Calgary.

British Columbia.—Sawmill and lumber at Arrow Head, loss, \$150,000; sawmill and lumber at Chilliwack, loss, \$24,000; post office at Harper's Camp, loss, \$1,000.

Conditions in the Industries and Trades.

Conditions of employment during October in the several industries and groups of trades throughout Canada, as indicated

* For statement re trade disputes of the month see special article elsewhere in present issue.

by reports of correspondents of the *Labour Gazette* and by information received at the Department of Labour from other sources, may be briefly summarized as follows:

Agriculture.

The month was, on the whole, favourable for agriculture. Unusually wet weather in the Maritime provinces hindered the gathering of the root crop, and in some localities caused serious damage to potatoés through rot. Autumn hay was also damaged and ploughing retarded. In Western Canada, on the other hand, where harvesting and threshing are now almost completed, the weather was dry and warm, and in some sections fall ploughing was made difficult for want of moisture. Elsewhere the usual operations of the season proceeded under favourable conditions, with the demand for labour active. The marketing of the fruit crop, which has been an exceptionally heavy one in the Niagara peninsula, gave very active employment throughout the month. Apples will be somewhat small and light on account of dry weather during August. The forwarding of the grain crop was also in full progress, though a tendency was noted on the part of farmers towards the close of the month to hold wheat and other grains for still higher prices, notwithstanding that general market conditions were very favourable. Pastures in the dairying districts were in good condition and the flow of milk well maintained.

The *Census and Statistics Monthly* for October contains the following statement with regard to crop conditions at the beginning of the month:

Quality is the feature of the field crops of Canada as indicated by the reports of correspondents. Compared with reports at the same date last year, the average quality of spring wheat is 82.58 to 75 per cent. of a standard, of oats 83.97 to 75, of barley 81.22 to 71, of rye 81.29 to 73, of peas 81.34 to 63, of beans 92.32 to 75, of buckwheat 86.01 to 74, of mixed grains 89.28 to 75, of flax 86.97 to 68, and of corn for husking 86.77 to 82. In the Northwest provinces, where the bulk of the field grain is produced, the averages of quality are uniformly high. Compared with last year, spring wheat in Manitoba is 87.28 to 81 per cent. of a standard, oats 86.07 to 73, and barley 85.39 to 68. In Saskatchewan wheat is 92.95 to 61, oats 94.01 to 67, and barley 91.23 to 58. In Alberta spring wheat is 89.05 to 77, oats 90.20 to 84,

and barley 84.18 to 80. These high qualities applied to an output of 350,000,000 bushels at the highest market prices realised in a quarter of a century, are an indication of the country's fortune reaped from the soil of the prairies this year. But in all the provinces as well as in the North-west the record of grain crops are satisfactory.

An estimate to October 15, made by the Grain Agent of the Canadian Pacific Railway Company placed the western wheat crop at 122,000,000 bushels.

A bulletin of the Government of the Province of Saskatchewan relating to conditions at the close of harvesting indicated an average yield of 21½ bushels of wheat per acre.

The October Bulletin issued by the Department of Agriculture, Quebec stated that the crops of the province turned out better than the earlier reports indicated would be the case. Cold weather during May and June made the outlook doubtful if not bad, but the fine weather of August caused an improvement. Heat and rain in that month accelerated vegetation, and while the crop was late it turned out better than the average of the preceding years. Harvesting was conducted under excellent conditions. Prices were well maintained during the season for butter, while cheese and eggs brought good returns. The following is a table giving the crop percentage for this and the preceding four years:

	1905	1906	1907	1908	1909
Wheat.....	77	72	64	57	77

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has references only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

At the Winnipeg office of the Western Grain Growers' Association an average of 150,000 bushels of wheat per day was being handled; this is double the amount handled at the same period last year.

Fishing.

The opening of oyster fishing in the Maritime provinces gave employment to a large number of men and caused a general increase in activity, though the catch was below expectations. Mackerel were plentiful off the Nova Scotia coast and some good fares were obtained. On the whole, however, the storms which occurred at intervals during the month impeded general operations. Some good catches of dog fish were made and the reduction works were busily employed.

Good catches of rough fish were taken in Lake Erie and Lake Ontario, but storms prevented continuous operations.

In British Columbia preparations were under way at Nanaimo for the beginning of the herring fishing season, the trade outlook being favourable. The coho run on the Fraser, up to the closing week of the month, was considered fair. The first vessels of the sealing fleet of Victoria to return reported a fair catch.

During the last session of Parliament, a Special Standing Committee of the House of Commons on Marine and Fisheries was appointed. Almost the whole of the time of the Committee was spent in an investigation of the lobster fishery with a view to recommending to Parliament a series of regulations which would best serve the industry without imposing undue restrictions on the operators. The regulations now in force controlling the conduct of this fishery were adopted some eleven years ago, following the recommendations of a Commission which exhaustively inquired into the conditions and requirements of the fishery at that time. In the interim conditions have materially changed, and the necessity for consequential changes in the regulations has arisen. The Committee, however, felt that it had not been able to obtain all the information that was required to

enable it to satisfactorily report, and it was decided that a special commissioner should be appointed by the Minister to visit the different centres of the industry during the present season to obtain all possible information on the subject, in order that the evidence obtained and the report made by such commissioner might be laid by the Minister before the Committee when Parliament reassembles this fall, after consideration of which the Committee will be in a position to make recommendations to Parliament as to the wisest changes to be made in the Lobster Fishery Regulations. The evidence taken before the Committee respecting the lobster industry has been issued as a special blue book.

Lumbering

Trade conditions continued buoyant throughout Canada with prices advancing, and the general outlook shows a decided improvement compared with the past year. In Ontario and the Eastern provinces, the most of the mills were running to full capacity, being favoured by an abundant water supply. Gangs were being sent into the woods at wages showing an increase compared with October, 1908. A scarcity of men for this employment prevailed in several localities. The cut is expected, in nearly every section, to exceed that of last winter.

In New Brunswick the heavy rainfall caused some damage by sweeping away booms and impeding the forwarding of supplies for the winter camps and the preliminary stages of logging operations.

According to a statement made by the Premier of Quebec the restriction of the export of pulp wood from that Province will be confined to pulp wood cut from crown lands alone. Pulp wood cut on private lands may be exported, as the power of preventing such exportation belongs to the Dominion Government. It will be made a condition of permits issued to cut pulp wood on crown lands that the wood so cut shall be manufactured in Canada. Failure to carry out this condition will involve cancellation of the license. By a decision of the Treasury Department of the United

States, wood pulp mechanically ground imported into the United States from Canada is free of duty until otherwise directed, except in the case of importations from Ontario and Quebec; pulp wood cut on private lands in these provinces is admissible free of duty.

Owing to the increased demand from the North-west provinces, lumber prices in the Kootenay district, B.C., were higher than at any time in the past two years. Stocks were somewhat low, but there was a demand for labour owing to the increased activity in the mills. The coast mills were busy, both export and local trade conditions being generally favourable. Logging operations on the coast have been very active.

The concluding sessions of the Timber and Forestry Commission of British Columbia were held during October.

It was stated that the first shipment of Canadian pulp wood sent to Japan from Canada was forwarded during October.

Mining.

Coal mining throughout Canada was more active than in September. The output in Nova Scotia increased, notwithstanding that labour disturbances still seriously curtailed operations. In Alberta the month was a very busy one; the location of some extensive coal bearing areas on the Peace river was reported. The Crow's Nest Pass Company was steadily increasing its operations, its tonnage showing a considerable increase compared with the preceding month, while on Vancouver Island, trade conditions were very favourable. The demand for coal for local consumption has been especially heavy throughout the North-west Provinces. (*)

In the various metalliferous mines the month was active. The asbestos mines of Quebec were producing steadily as compared with 1908, but were still somewhat less active than in 1907. The mica mines remained dull, notwithstanding that an improvement had been expected. Discoveries of mica in Alberta were reported. Favourable reports were re-

ceived from Cobalt and other mining districts of Ontario, some new discoveries of gold, silver and copper ores being reported in the closing days of the month. There was little change in the British Columbia camps compared with the preceding month, an increasing activity prevailing. In most of the districts contributing to the annual mineral production of the Province, the outlook is more promising than earlier in the year, work having been resumed on several properties inoperative for a more or less lengthy period. The annual output of the Yukon gold fields will considerably exceed in value that of the season of 1908.

The report of the Standing Committee on Mines and Minerals composed of Members of the House of Commons, appointed during the session of 1908, was issued during October. The committee will continue its investigations during the coming session.

Manufacturing.

The month was a busy one for industrial establishments in nearly every branch and locality throughout Canada. The steady increase of manufacturing activity in progress for some time past received a further impetus during the month, and full staffs were working full time in most localities. The iron and steel producing plants and other establishments for the manufacture of structural material were especially busy and were engaged at many points in extensive additions to buildings and equipment. The Dominion Steel Company during October closed a contract amounting to \$500,000 with the Canada Foundry Company of Montreal for the erection of additional blast furnaces, extensions to its Bessemer plant and for two 500 ton open hearth furnaces of new type for a new process of making hearth steel. Confectionery and other establishments manufacturing for the holiday trade were also very busy. The demand for general manufacture products accompanying the increasing trade activity was more buoyant than for some time past.

*A special article dealing with the disastrous explosion which occurred at Extension, B.C., on October 5, is published elsewhere in the present issue.

The annual report of Lake Superior Corporation showed earnings for 1908-09 of \$5,511,582 compared with \$6,787,402 last year. The percentage of operating expenses was 56.3 per cent. compared with 63 per cent. in the preceding fiscal year.

The annual report of the Gas and Electric Inspection Branch of the Inland Revenue Department of Canada shows that during the last fiscal year the total amount of electricity exported by the four companies operating under the Electricity and Fluid Exportation Act was 359,283,286 kilowatt hours, compared with 135,075,680 kilowatt hours generated for home consumption. Only one company was licensed to export natural gas during the year, a total of 887,019,000 cubic feet being exported. In future no licenses are to be issued allowing the exportation of natural gas.

The Ogilvie Flour Mills Company, Limited, in its eighth annual report showed trading profits for the year of \$716,054, and increased its dividends to eight per cent. per year. The Lake of the Woods Milling Company, Limited, reported earnings sufficient to declare a ten per cent. bonus, the net profits of the year amounting to \$723,380.

The Canada Car and Foundry Company, being a merger of existing companies, was organized with a capital of \$3,500,000 bonds, \$3,000,000 preferred stock and \$500,000 common stock.

Railway Construction.

Work in connection with railway construction was rushed forward as rapidly as possible throughout the month, in anticipation of the close of the season of outdoor operations. Staffs in the various camps throughout Canada were heavier than in any previous month of the year and workmen were in demand in several localities.

In connection with the building of the National Transcontinental line one of the most important incidents of the month was the driving of the last spike near the crossing of the Wabigoon river on the section known as section F, completing the connection between Winnipeg and the head of the lakes. The road, however, will not be opened for general

traffic for some time. The 244 miles of line from Winnipeg to Superior Junction has proved one of the most difficult sections of the entire road. Since the inception of the work from 6,000 and 8,000 men have been employed continuously on it. Good progress was also made during the month on the other contracts under way. According to the annual report of the National Transcontinental Commissioners issued during October, the total expenditure on the line at the close of the last fiscal year was \$51,950,717. On March 31, 1909, 725 miles had been graded and 345 miles of track laid.

On the western sections of the Grand Trunk Pacific Railway line the month was active. West of Edmonton, sixty-six miles of track has been laid to the Pembina river crossing, and on the other side of the river the grading is completed to Edson, a further fifty-seven miles. At the Prince Rupert end of the line a contract has been let to Foley, Welch and Stewart for the construction of an extension along the front of the townsite to Seals Cove, 3.5 miles. The work will involve some very heavy rock cutting. Work on the second 140 miles contract on the section from Kitsalas Canyon to Aldermere, B. C., was begun.

The completion of the line from Saskatoon to Wetaskiwin in Northern Alberta by the Canadian Pacific Railway Company was reported during October. Passenger service over the line was inaugurated in the closing week of the month. It was announced that the Canadian Pacific Railway main line would be double tracked westward from Winnipeg to Brandon, Man., within the next couple of years.

The terms of a proposed agreement between the Canadian Northern Railway Company and the Government of British Columbia were given out during October. Under their provisions, a line of railway will be built by the Company from the Province of Alberta to tidewater, as well as a line on Vancouver Island from Victoria to Barclay Sound. It is estimated that about four years will be required to complete the work suggested. The proposed line of railway is for the

purpose of opening up large areas of hitherto inaccessible territory to settlement. It was also stated that the Company will construct a fleet of passenger steamships for operation on the Pacific and Atlantic oceans.

Notice was also given by the Canadian Northern Railway that applications would be made at the next session of Parliament authorising the construction of eleven new branch lines in Western Canada and an extension of time for the completion of thirteen branches previously authorised.

The contractors for the Ha! Ha! Railway line have recently given out a number of contracts for the construction of the new road between St. Alphonse and Chicoutimi.

The annual report of the Minister of Public Works for Ontario shows that during the past year there was 8,399 miles of railway in operation, of which 679 were opened for traffic during the year. Some 293 miles of colonization roads were opened by the Department during the year.

General Transport.

The month just closed was a busy one for all engaged in the transportation trades. Railway companies reported heavy traffic, both freight and passenger. The grain movement was much larger than in the corresponding period of 1908, though shipments from Montreal were less extensive than last year. Over 25,000 cars of grain have reached Fort William this season. No serious car shortage has been reported. Railway earnings have steadily increased for some time past.

Navigation employes were becoming quiet during October, except on freight traffic, as steamships completed their season. The colliers of the Dominion Coal Company for the St. Lawrence route ceased operations. Most of the passenger steamers on the great lakes had also ceased running. Canal traffic however, continued heavy. The month of August was the first in the history of the Sault Ste. Marie canals that the tonnage passing through the Canadian canal was greater than that of the

United States canal. A summary of traffic for September through these canals is as follows:—

	U. S. Canals.	Canada Canals.	Total.
Vessel Passages No.	1,975	943	2,918

Storms on Lake Superior impeded navigation for some days.

It was announced that the Canadian Pacific Railway Company would close its repair and car building shop at Farnham and remove the works to Montreal. The Grand Trunk Railway yards at Little York are also being abandoned.

During the past three months some large contracts for rolling stock have been authorised by the Grand Trunk and Grand Trunk Pacific Railway Companies. Since July 1, the two Companies have received about fifty locomotives and have placed orders for fifty more.

A separate branch of the Department of Railways and Canals has been established to purchase supplies and award contracts for the Intercolonial Railway.

The gross receipts of the Grand Trunk Railway for the half year, according to the semi-annual report given out during October, were £2,866,468, compared with £2,854,787 for the previous half year. The working expenses were at the rate of 72.54 per cent. compared with 72.47 and totalled £2,079,196 compared with £2,069,144. The annual revenue was £845,364 compared with £781,905. Train mileage decreased 381,354 miles.

The twenty-eighth annual meeting of the shareholders of the Canadian Pacific Railway Company was held in Montreal on October 6. (*). It was decided to issue \$30,000,000 in stock at \$125 per share, one share to be allotted for every five shares held by present shareholders.

The annual meeting of the Quebec Central Railway Company showed gross

*A reference to the annual report of the Company was published in the September, 1909, issue of the *Labour Gazette* at page 282.

earnings of \$1,021,682 compared with \$1,110,724 in the previous year, and gross expenses of \$724,918 compared with \$787,293. The cause of the decrease in earnings was stated to be a depression in the pulp wood and lumber trade.

The eleventh biennial convention of the Amalgamated Association of Street Railway Employees of America was held at Toronto, Ont., October 4-9. About 500 delegates were present. The Association is a legislative body empowered to frame measures affecting street car employés in the United States and Canada. New by-laws and rules were adopted by the meeting and the per capita tax was increased in order to provide a larger death and disability fund.

The Trades

Building.—From all parts of the Dominion reports were received of a continued increase in the extent of building operations under way and projected, as compared with the corresponding period of 1908. The number of permits issued in nearly all of the cities showed a heavy increase. In a few localities certain of the outdoor trades were slackening, but the work of finishing was very active, and the outlook is for a prosperous winter season for men in this employment. †

Metal and woodworking.—Employés in metal and woodworking establishments generally were more active than in September, staffs being steadily enlarged and the volume of product increased.

Printing.—The allied trades had a good month, from busy to active conditions being the rule.

Clothing.—Journeyman tailors were in the midst of their most active season. Garment, hat and cap and glove and mitt workers were busy. The shoe factories were on the whole somewhat quiet.

Food and tobacco preparation.—Bakers, cigar makers and tobacco workers had a good month. Cigar makers were more active than for some time past, especially those engaged on the most expensive lines of goods. Confectioners were very busy.

Leather.—Trunks, bag makers and

saddlers had a good month, but tanners and curriers were somewhat quiet.

Miscellaneous.—Barbers, clerks and stenographers had a fair month. Hotel and restaurant employees were fairly active. Theatre employees were busy.

Unskilled labour.—The demand for this class continued keen and at many points the supply was insufficient. Civic improvement works were being rushed to completion. The extensive building operations in progress also gave employment to large numbers of this class. From the standpoint of unemployment during the winter season the outlook is much more favourable than a year ago.

Canadian Trade and Revenue.

Foreign trade.—During September, 1909, the total value of imports entered for consumption was \$30,446,439 compared with \$26,917,406 in September, 1908. For the first six months of the fiscal year ending September 30, 1909, the total value of imports entered for consumption was \$173,200,432 compared with \$142,461,754 in the corresponding period of last year. The total value of domestic exports during September, 1909 was \$23,548,330 compared with \$19,993,430 in September, 1908. The total value of domestic exports during the first six months of the fiscal year ending September 30, 1909, was \$120,484,255 compared with \$110,109,051 in the corresponding period of last year. During September there was an increase in exports of products of the fisheries, the forest, animals and their produce, agriculture and manufactures and a decrease in products of the mine. The grand total of Canadian trade for September, 1909, was \$56,601,753 compared with \$49,510,569 in September, 1908. For the first six months of the fiscal year ending September 30, 1909, total Canadian trade was \$304,390,088 as against \$261,168,652 in the same period of 1908.

A demand for light athletic goods, proprietary medicines, and novelties of Canadian make, was reported from France; for cod-fish and wheat from Brazil; for wheat from Mexico and for flour and railway material from China.

Imperial trade.—Favourable markets for Canadian goods were reported by agents of the Department of Trade and Commerce in Great Britain and the various dominions of the Empire as follows:—Great Britain: apples, honey, butter and peaches; Australasia: timber; West Indies: Canadian comestibles; and Newfoundland: textiles.

Domestic trade.—A steady increase in general activity was the feature of the month. The volume of business was considerably larger than a year ago and the general situation was regarded as sound and free from any tendency to undue buoyancy. Merchants are anticipating a prosperous holiday trade. The growing confidence in financial conditions was illustrated by the strengthening tendency in the discount rates of the banks and by the increasing interest rate demanded on call loans. Bank clearings showed a heavy increase at most parts compared with the corresponding period of 1908.

Thirteen new branches of Canadian banks were opened in Canada during October and four were closed. The rapid development of the Canadian banking business made it necessary for several of the Canadian banks to engage experienced clerks in Great Britain.

The bank statement reflected the increased business activity of the country consequent upon the crop movement. There was an increase of \$13,000,000 in deposits, as compared with the preceding month and of \$120,000,000 compared with the corresponding month of 1908. Current loans gained \$17,000,000 during the month.

The Molson's Bank reported a decrease in earnings compared with the last three years. Net profits amounted to \$493,479 on a capital of \$3,500,000. Profits declared by the Bank of British North America for the first half of 1909 were £35,564. The winding up of the Monarch Bank is being proceeded with.

Notes.

The *Milk Commission* of the Province of Ontario took evidence at a number of points in Southwestern Ontario during October.

The Manitoba commission on *Workmen's Compensation* for injuries began its public sessions for the taking of evidence in October.

Returns made by *Assessment Commissioners* in nearly all Canadian Cities show a steady increase in population and in assessed valuations.

A grant of \$500,000 has been made by the Council of the City of Winnipeg, Man., to the proposed *Selkirk exhibition*, to be held in that city in 1912.

The Honourable the Provincial Secretary of Ontario in referring to the removal of the Central Prison from Toronto to a suburban district stated that a new policy respecting *prison labour* would be inaugurated.

The Co-operative Society of Thetford Mines which was organized about six weeks ago has purchased a store, building and property for the sum of \$3,500 at fifty cents on the dollar. The store expects to open for business in November.

The annual convention of the *Union of Alberta Municipalities* was held at Lethbridge, Alta., A paper on municipal ownership of public utilities was read by Mayor Jamieson of Calgary. Officers were elected.

A *Moral and Social Reform Council* was organized at Ottawa, Ont. The objects of the Council are:—

- The suppression of gambling.
- The suppression of social vice.
- The suppression of the white slave traffic.
- The securing respect for all laws having a moral bearing.
- The promoting of political purity.
- The preventing of child labour, sweatshops, inadequate support of women workers, and other social and industrial wrongs.
- The promoting of temperance and of Lord's Day preservation.

The council will be composed of delegates from all organizations interested in the work, and the executive will be composed of representatives of the different constituent bodies, with a president, one or more vice-presidents and a secretary-treasurer.

The annual convention of the members of the Wholesale Hardware Merchants' Association of the Dominion was held at Quebec. There were thirty-five delegates present from the principal cities of Canada. The third meeting of the Wholesale Dry Goods Association of the Pro-

vinces of Ontario, Quebec, and the Maritime Provinces, was held in the same city.

The corner stone of the *Montreal Technical School*, which is being constructed by the Quebec Government was laid by Sir Wilfrid Laurier, Prime Minister of Canada, and by Sir Lomer Gouin, Prime Minister of Quebec, on October 4, in the presence of a large and distinguished body of citizens.

The death occurred, at Fernie, B.C., on October 11, of Mr. F. H. Sherman, Ex-President of District No. 18 of the United Mine Workers of America, and one of the best known representatives of labour in Western Canada. Mr. Sherman had been President of the District for over five years, and had been forced to resign some months ago on account of ill-health. During the past two years he had acted at different times, as a member of various boards of conciliation and investigation established to deal with coal mining disputes in Western Canada. Mr. Sherman was a native of Somersetshire, England, and was in his fortieth year at the time of his death.

The tenth annual meeting of the *Canadian Conference on Charities and Corrections* was held at Toronto, Ont. October 19-21. There was a large attendance of delegates from outside points, especially of representatives of punitive and hospital institutions, the railways having granted reduced fares to those attending the meeting. Among the subjects on which formal addresses were presented were:—the overcrowding of tenements; the value of labour bureaus; prison reform; child rescue work; the trend of penology; indeterminate sentences; houses of refuge; the management of hospitals; the prevention and cure of tuberculosis, etc. A feature of the meeting was its endorsement of the principle of co-ordination in relief work with a view to complete centralization and the prevention of overlapping and waste. Among the resolutions considered was one urging upon the Government the necessity of erecting one or more suitable hospitals for the care of the so-called harmless insane, each county to be charged at the actual cost of maintenance

according to the number sent in by it. Mr. J. P. Downey, M.P.P., Guelph, Ont., was elected President, and Mr. F. M. Nicholson, Toronto, Secretary-Treasurer.

By the will of the late Mr. G. A. Mitchell, Winnipeg, of the firm of Lyall, Mitchell and Company, building contractors, probated during October, one half of the net income of the estate, which is valued at \$65,000, after the death of the wife and daughter of the deceased, is bequeathed to the University of Manitoba, "for the purpose of equipping, maintaining and providing in the city of Winnipeg a course of instruction and lectures in *technology*, for the free education of young artisans and mechanics in technical knowledge appertaining to their work, such instructions to be given at night, so that young men actually working at a trade or as apprentices, may be able to avail themselves thereof. It being the purpose and desire to provide a means of free education to struggling young artisans and mechanics whereby they may be enabled to acquire a more thorough and a higher technical knowledge of their respective trades." The remaining half is ultimately to be devoted to the same purpose. Should the university refuse the donation or neglect to carry out the terms of the bequest, the trustees are directed to confer with the council of the Builders' Exchange with a view of providing such free instruction in the best possible way.

On October 1, the corner stone of the Legislative buildings of the Province of Alberta was laid at Edmonton, Alta., by His Excellency, Earl Grey, Governor General of Canada. A similar ceremony was performed by His Excellency at Regina on October 4, when the corner stone of the new Legislative building of the Province of Saskatchewan was laid. Each event was made the occasion of a public holiday and of fitting celebrations.

The annual Inter-Society debate between the Hawkeye and Adelpian Societies of the Morningside College, Sioux City, Iowa, will be devoted this year to the question of the application of the Industrial Disputes Investigation Act to the United States, the terms of

the resolution to be debated being as follows:—"Resolved that the Industrial Disputes Investigation Act of Canada should be adopted by the Commonwealths of the United States, constitutionality granted." The debate will take place on December 10.

The consumption of *cigarettes* in Canada, which has been increasing for a number of years past, substantially decreased last year. The following is a statement supplied by courtesy of the Department of Inland Revenue showing the number of cigarettes upon which duty was collected during the past ten years:

STATEMENT OF CIGARETTES ENTERED FOR CONSUMPTION DURING THE FOLLOWING FISCAL YEARS.¹

Fiscal Years.	Number Manufactured in Canada.	Imported.	
		Lbs.	Equivalent Number. ³
1899-1900 ..	116,061,522	9,357	3,342,000
1900-1901 ..	121,383,584	26,327	9,402,000
1901-1902 ..	134,236,034	14,295	5,105,000
1902-1903 ..	176,435,240	21,829	7,796,000
1903-1904 ..	211,302,041	22,955	8,212,000
1904-1905 ..	250,860,387	21,199	7,571,000
1905-1906 ..	269,334,939	24,119	8,614,000
1906-1907 ²	266,377,710	26,855	9,591,000
1907-1908 ..	384,809,344	38,593	13,783,000
1908-1909 ..	356,756,130	35,882	12,815,000

¹The term "Entered for Consumption" means the quantity of cigarettes upon which duty was collected during each fiscal year.

²The fiscal year comprised only nine months.

³The weight of cigarettes is calculated at the rate of 2 8 lb. per mill.

On October 5, an information was laid by Mr. James B. McLachlin, Secretary-Treasurer, District No. 26 United Mine Workers of America, before the Stipendiary Magistrate at Halifax, against Mr. Alexander Dick, sales agent of the Dominion Coal Company, and Mr. J. R. Cowans, Manager of the Springhill colliery, charging that they and divers other persons had combined and conspired to limit the production and supplying of coal, and to enhance prices. The information claimed that the persons mentioned had been continuing such conspiracy from January 1, 1902, up to the present time. On October 18, the hearing of the cases were begun.

Mr. William Roche, a coal dealer in business for forty-three years past, stated that he knew of no arrangement in regard to prices subsequent to 1899. Mr. M. R. Morrow, agent of the Dominion Coal Company at Halifax, stated that he had little knowledge of any arrangement of the kind referred to in the charge. An order was made requiring Mr. Morrow to produce his correspondence with the Dominion Coal Company. At a sitting of the Court held on October 20, a motion was made to quash the information on which the defendants had been arraigned on the ground that it did not disclose any crime. The magistrate held against the motion. An adjournment until the closing days of the month then took place to permit of counsel fulfilling other engagements. On the resumption of the taking of evidence the correspondence between Mr. Dick and Mr. Morrow was taken up and was under examination at the close of the month. The case has attracted widespread interest not only on account of the issue immediately involved, but on account of its alleged bearing on the existing labour dispute between the coal companies in question and certain of their former employés.

A case similarly connected with the labour dispute at present in progress affecting former employés of the Dominion Coal Company was the trial of Mr. Donald McDougall, President of District No. 26 of the United Mine Workers of America, who was arrested on September 12, and conveyed to Montreal, on a warrant sworn to in Montreal, on a charge of criminal libel against the Dominion Coal Company. The charge was that he had printed and published in *La Patrie* of Montreal a defamatory libel, consisting of a statement to the effect that the Company's employés were improperly housed. At the hearing of the case, evidence was taken in regard to the circumstances attending the printing of the statement in question and the placing of the responsibility for publication. At the close of October the case stood adjourned.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N. S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market improved during October. The steel trade continued active, and in districts unaffected by the strike the coal industry was very active. In the strike districts the improvement was marked. All the allied industries, such as the Chemical & Tar Works, foundries and railways were busy. The woodworkers and building trades had an active month.

The Sydney Steel Works had a very busy month. Every department worked to its full capacity, the only drawback being a lack of coke, which only occurred at short intervals and was therefore not a serious factor. From July to the end of October, over fifty thousand tons of American coal were imported, but it is expected that with the closing of the navigation season the Dominion Coal Company will be able again to supply the full quantity required. Abundant ore has been stocked during the summer, but owing to a change in shipping regulations, the vessel carrying limestone and dolomite was laid off and consequently the flux supply ran low. However, a boat of suitable type for the trade was put on some time ago and is rapidly refilling the limestone bins for winter. Construction work on the coke ovens was pushed ahead very rapidly during the month, and the work will continue to be rushed until they are completed. The ovens are of an improved type and will be able to convert a charge of coal into coke in sixteen hours, being eight hours less than the ovens now burning. On the completion of the new ovens improvements are to be made on the old ovens so as to cause them to turn out a charge every sixteen hours, thus increasing their plant capacity. During the month, a contract was entered into with the Canada Foundry Company of

Toronto, for the construction of an additional blast furnace decided on some time ago. The contract also includes an extension to the Bessemer plant and two new open hearth furnaces. The latter are of a new and improved type. Over half a million dollars will be spent on this work. An additional rod mill, two merchant mills and a fourth mill for the production of finished material will also be erected.

At the Dominion Collieries the output went up to over nine thousand tons per day. The amount produced for the month exceeded two hundred thousand tons. A large force of men are at work. The strike is still being conducted by the United Mine Workers of America. No. 1 of the Dominion Collieries had larger outputs in August, September and October than during the same months last year, and barring accidents will probably make a record year.

The Steel Works at Sydney Mines were very active. The iron output to the end of September was forty thousand tons the same quantity of steel was made. The amount of coke produced was fifty-six thousand tons. The coal outputs of this Company are considerably in excess of those of last year. For the first eight months of last year, 447,305 tons were produced, and for the same time this year the output was 521,986 tons. The number of men employed is 2,300 against 2,100 this time last year. The prospects for the balance of the year are very good.

The Inverness Collieries worked steadily during the month and good outputs were obtained. Inverness Colliery had an average output of one thousand tons per day. This about its normal output. Port Hood was also busy and had good outputs.

Transportation by water and by rail was heavy. Slight decreases are shown in the receipts of the Sydney & Glace Bay Tram Company, owing to the strike.

The building trades had a good month. Thirty houses at an average of \$2,500 each are being constructed in Sydney. The same number is going up at Sydney

Mines, but the average cost is less, ranging about \$1,200 each.

The Mining and Technical Schools were opened and will be conducted during the winter.

The Marconi Plant at Port Morien which was partially destroyed by fire is being rebuilt and repairs will be completed by the end of December.

About forty men are employed at East Bay extracting ore which is said to contain a large percentage of silver and lead. The ore now being taken from the mine is being shipped to Swansea where the metals are extracted.

The Customs collections at the port of Sydney for the first six months of the fiscal year show a total of \$94,853 as against \$66,546 for the same period last year.

Wholesale and retail trade was active.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Mackerel were plentiful off some parts of the Cape Breton Coast and large supplies were obtained.

CONDITION OF PARTICULAR TRADES.

The building, metal, woodworking, printing, clothing and transport trades were active. Leather and food and tobacco preparation branches were quiet. Unskilled labour was plentiful.

WESTVILLE, N. S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was no great change in the labour market during October, the different trades being steadily employed. The weather continued fine and mild and did not interfere with outside employment.

The several collieries in the district were working steadily producing an average output. The shipments of the Acadia Coal Company for September were about 25,000 tons and of the Intercolonial Coal Company's about 27,000 tons, being an increase for the month of over 7,000

tons compared with the corresponding month of 1908. The total coal shipments from the district for the nine months ending September 30, 1909, amounted to 380,000 tons.

There were no changes in wages and no unrest in labour circles in general.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy during the month with fall ploughing and the marketing of produce. Large shipments of live stock were also made. The county exhibition was held at Pictou on October 5 and 6.

Mining.—The steamers carrying coal for the Intercolonial Coal Company to the Quebec and Montreal markets ceased operations for the season.

Manufacturing.—All manufacturing establishments were busily employed and the outlook is for constant employment for some time to come.

Railway construction.—Heavy rains on October 24 and 25 caused a number of washouts in this district.

CONDITION OF PARTICULAR TRADES.

Activity prevailed in the building trades. Machinists and engineers, steam engineers, electrical workers, linemen, stove mounters and blacksmiths were active. With horseshoers business was fair. The printing trades had an active month. Tailors found trade steady, and boot and shoe workers had a good month. Barbers were active; the other miscellaneous trades were busy. Street railway employés had a good month. Unskilled labour was well employed.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been during October a marked revival in the industrial activity of Amherst. The largest industry in the town, the Rhodes-Curry Company, has only a few men employed, but the

rolling mill was reopened after several months idleness, and the malleable iron department which has been closed for two years has also been re-opened, and is giving employment to a number of men. The boot and shoe factory is very busy with a full complement of men; the same appears to the Hewson Woollen Mills, the Enamel plant, the Robb Engineering Company, and other industries.

During the month, the McLean Milling Company was organized with a capital of \$50,000; it has already started the construction of a mill, which is to be a brick structure 100 feet long. The Company will manufacture flour, feed and other foods.

The Maritime Coal Railway and Power Company completed the construction of its power plant at Chignecto Mines, and also the construction of a toll line to the Joggins Mines to supply power and light to that town.

On the whole, labour conditions in the county, considering the season of the year, are much improved. The strike at Springhill still continues. In the past ten weeks there has not been a single arrest in the town for disorderly conduct.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops have all been safely harvested with the exception of the potato crop, and the wet weather that has prevailed for some weeks has operated against the farmers. Farm produce continues to command high prices, and the agricultural classes are well satisfied with conditions.

Fishing.—The oyster season opened on October first but the catch is reported small, and the oysters of a poor quality.

Lumbering.—Lumbermen are preparing to enter the woods and the cutters' season will be well up to the average.

Manufacturing.—There has been a steady improvement in manufacturing conditions. The industries are working steadily.

Mining.—With the exception of Springhill, where a strike prevails, the different collieries were all active and reported increasing outputs.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been fairly well employed. Carpenters have been busy. Painters reported business dull, but plumbers were very busy.

Moulders were well employed in most of the industries. Machinists and engineers were very busy, with stove mounters busy.

Woodworkers were busy, but car builders were very dull. Pattern makers were fairly busy.

Printers were fairly busy, and pressmen were steadily employed.

Tailors have been very busy, and garment makers reported work brisk. Boot and shoe workers were very busy.

Butchers and meat cutters were busy.

Trunk and bag makers were busy.

Furriers are asking for more help.

For unskilled labour there was no special demand, the local supply being more than sufficient.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during October, differed little from that of September, except that the prevalence of wet weather interfered to a certain extent, with outdoor work, especially with farming operations. In Charlottetown, the construction of the New Canadian Bank of Commerce building, the eighteen stall round house for the railway and the freight shed on the railway wharf, were the principal works in progress, giving employment to a large number of men. The fitting up of the packing plant formerly operated by the Dominion Packing Company, marked a step in the industrial progress of the place. The last of the month found shipping of produce well under way, and as prices are high except in the case of potatoes, merchants and dealers view the business situation with hopefulness.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The unusually protracted wet weather interfered considerably with potato digging, causing rot in some places. The shipping season opened about the middle of the month and towards the end was in full progress, although the roads cut up by the heavy rains were in a bad condition for hauling.

Fishing.—The oyster season, opened the first of the month. Fishing was vigorously prosecuted, but stormy weather interfered with the catch. High price and a decreased number of oysters were reported.

Railroad construction and employment.—Beyond the new works mentioned in the first part of this report, there were no other features calling for special comment.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy. Carpenters and joiners, lathers and plasterers, painters and paper hangers were active. Plumbers were busy. Gas and steamfitters, stone cutters, and builders' labourers were active. The metal, engineering and shipbuilding, woodworking and furnishing, printing, clothing, food and tobacco preparation, leather and miscellaneous trades were active and transportation employés had a good month. There was a fair demand for unskilled labour.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market have been fairly active in most lines, but scarcely up to the September average. The unusually wet weather retarded farming, building and street repairing. Manufacturing was healthy and in some lines very active building operations still employed a large number of men but were confined to the closing up of un-

finished contracts. Foreign transient labourers have all departed while local labour has been depleted by departures to western points so that the demand in a number of industries was equal and in some instances greater than the supply. Commencing with October 2nd, the Intercolonial Railway Company shopmen began working Saturday afternoons and will continue to do so during the winter. The winter time table of the Intercolonial Railway Company went into effect October 17th, with but few changes from last winter and several trains were withdrawn.

Two unfortunate accidents occurred upon the Intercolonial Railway during October, one being a head-on collision at Nash's Creek, October 5th, where three men were killed and several injured and rolling stock to the amount of \$40,000 destroyed; the other near Pugwash Junction, October 13th, where a number of cars went over the bank. Very bad washouts also occurred on the Canada Eastern Branch and near Dorchester.

Application was made by the Intercolonial Railway Company Machinists' union for the appointment of a Board of Conciliation to inquire into their grievances with the management and the Board was appointed October 20.*

Wholesale and retail trade has been up to the average during the month. Bank collections were fair; real estate was firm, rents in a number of instances weakening. No material changes in wages or hours of labour were noted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very active but were hindered by heavy rains, only one week of the month being fine. Marsh haying, late grain harvesting and potato digging were the most seriously affected, and the damage was considerable. On October 1st, exceptionally high tides caused the Petitcodiac river to burst the dykes in many places along its banks and overflow the Moncton, Dorchester, Trinramar, and Shipbody

*See reference in article dealing with the administration of the Industrial Disputes Investigation Act during October, elsewhere in present issue.

marshes covering large areas of uncut hay and destroying much that was already cut. Potato rot is also reported from many sections, in some cases half the yield being lost. Threshing shows the grain yield only fair. Apples are a very good crop. The meat market shows beef scarce and high and pork quoted at ten cents per carcass.

Railroad construction and employment.—The expenditure upon the Transcontinental for construction in New Brunswick during September was \$175,084. Many of the contracts are now in the last stages of completion, ninety per cent. of the entire ballasting being done. The foundations of Upper Salmon River Bridge, the largest structure of its kind on the system, are about completed, but the superstructure lies over for next season. The Moncton-Chipman fifty miles section will be nearly completed in November and much work has been done at Nappadogan divisional point. Contractors were handicapped by the bad weather, trestles being swept away. The Blackville Indiantown section of the Intercolonial Railway Company has been put into operation and trains now run from Newcastle to Blackville.

CONDITION OF PARTICULAR TRADES.

In the printing and allied trades work was steady. The clothing trades reported active conditions. Bakers and butchers were active. The leather trades were steady. Barbers and clerks reported the demand good and employment steady. Hotel and theatre employees had an average month. Laundry workers were busy. In the transport trades the first half of the month was active in all lines, but passenger traffic fell off towards the close of the month, though the movement of freight was heavy. The demand for train crews was fair for the season of the year. Cab drivers, carters and expressmen were busy. Of unskilled labour the local supply was about all absorbed. No unemployed were observed. Considerable difficulty has been encountered by the labour bureaux in furnishing contractors with men. Wages are \$1.40 to \$1.60 per diem.

DISTRICT NOTES.

Shediac.—Twenty-five men are at work on the construction of the dam on the Scoudouc River for the purpose of generating electricity for the electric light system now being installed in Shediac. It is expected to have the lights on by November 15th.

Pt. du Chêne.—Shipping is much heavier than last fall. Several steamers have cleared with lumber, and several schooners with produce, while traffic with Prince Edward Island has been large.

Bathurst.—About 400 men are working upon the spur line to the Drummond Mines and tracklaying is well advanced. About fifty men are also employed at the mine, getting the ore out and preparing it for shipment. Difficulty in obtaining the necessary number of labourers has hindered the work.

ST. JOHN, N.-B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued dull in the building trades, but other branches appeared to be active. Hilyard Bros' mill closed down on the 18th of October for repairs, but the rotary saw resumed work after a few days. The gang saw will be shut down for the year. It is expected the mill will run until sometime in December if the weather continues fine. The city cashier paid out \$17,082.59 in wages to the civic employees for the four weeks ending October 20. Bank clearings for the four weeks ending October 21 were \$6,055,734 and for the corresponding period last year \$5,522,492 being \$533,242 greater in 1909 than in 1908, and \$401,850 in excess of the four weeks ending September 23 of the current year. Deposits at the Government savings bank during the month of September were \$42,717.08 and withdrawals \$61,124.37. It is probable that the Donaldson line of steamers will have twenty-eight sailings from St. John during the coming winter season.

The following are retail prices prevailing: Turkeys, 24 to 27 cents per lb.; geese, \$1 to \$1.25 each; fowl, \$1 per pair; wild duck, 75 cents; duck, \$1.30; woodchuck, 75 cents; venison, 16 to 18 cents per lb; lamb and veal, 10 to 12 cents per lb; beef, 10 to 18 cents per lb; fresh pork (by quarters), 12 cents per lb; ham, 18 cents per lb; bacon, 20 cents per lb; eggs, 30 to 35 cents per dozen; butter, 26 to 31 cents per lb; squash, 2 to 4 cents per lb; fresh cod-fish, 5 cents per lb; dried cod-fish, 4 cents per lb; mackerel, 20 to 25 cents each; halibut, 15 cents per lb; smelts, 10 cents per lb; bloaters, 24 cents per dozen; finnan haddie, 7 cents per lb; fresh herring, 15 to 20 cents per dozen; salt herring, 24 to 30 cents per dozen; clams, 20 cents per quart; had-dock, 5 cents per lb.

Factory Inspector Kenny found at Hartland several boys of school age employed in mills and ordered them dismissed.

The printing pressmen and assistants have negotiated a wage scale, which goes into effect on November 22nd of this year, as follows: Web pressmen, day work, eight hours, \$15; night work, \$18. In 1911 it is agreed the rate will be increased to \$18 for day work and \$20 for night work. The book and job scale, effective on same date, is \$11, \$12.25 and \$14 for platen presses; cylinder pressmen, \$14. In 1911 these prices will be increased to \$12 in the first instance; \$13.50 in the second; and \$15 in the third. Signed agreements are had with the *Standard Times and Telegraph*, and *Sun and Star*. The above agreements are to remain in force until November 22, 1912.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from up-river districts tell of heavy losses to the farmers by the recent freshet. The chief loss will be in the hay which was stacked on the intervals, much of which was washed away. The unseasonably wet weather this fall has had a bad effect on some of the root crops in Kings County, some of the farmers having to buy potatoes for their own use. The potatoes have rotted badly.

Lumbering.—The cut of logs this year on the upper St. John and tributaries to come to St. John River Log Driving Company booms at Fredericton will probably be at least 125,000,000 feet or fully as great as the season just closed.

Railroad construction.—The accounts of the Transcontinental Railway show that there has been expended in the New Brunswick section a sum of \$7,655,045.01. This was divided among six sections of the work. Ninety per cent. of all the ballasting has already been completed. The foundation has been about completed for the huge bridge at Upper Salmon river, which is to be the largest structure of its kind on the entire system, but no steel will be put up until the spring.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners were active. Painters and decorators, plumbers, gas and steam-fitters, active. Stone cutters and builders' labourers were quiet.

Iron moulders, iron workers and helpers were active. Machinists, engineers, electrical workers and linemen and blacksmiths were busy. Boilermakers were active.

Woodworkers were busy, with shingle weavers active.

Printers and pressmen were busy and bookbinders, active.

Journeymen tailors were busy.

Bakers and confectioners were busy, with cigar makers, active.

Broom makers were dull, but brush makers were active.

Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen, and freight handlers, steamboat men and firemen and ship labourers were active. Street railway employees, were busy.

Unskilled labour was dull.

DISTRICT NOTES

St. Stephen.—The Bank of Nova Scotia has purchased a lot on which to erect a branch building. The building will be of either brick or stone, two storeys high, and will be 52 x 85 feet.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions during the month were active, this being the busy season of the year. Outside work was rushed. Repair work was also being hurried forward. The repairs on St. James' Church were completed and the church re-opened. The Harkins' Academy was closed in, and will be ready for occupancy by the New Year. The first building of concrete erected in the town is being watched with some interest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers have nearly all their crops in. Threshing is about over. The yield was generally good, oats being above the general average. The potato crop promised well, but there has been so much rain and hot weather that about two-thirds of the crop has rotted.

Lumbering.—Some of the mills have closed down for the season and all will be closed before November 1. There were a large number of men in the woods cutting for next season. The cut will be about the same as last year.

Railway construction.—The Drummond Company made good progress with its branch to deep water. The mining link from Blackville was opened for traffic during the month.

CONDITION OF PARTICULAR TRADES.

The building trades were very active, those having contracts wishing to finish them before the cold weather. The wet weather hampered outside operations in these trades. Tailors and garment workers were active, the present being their busy season. Notwithstanding this, trade was not as good as last year, there being a general depression and scarcity of money.

The supply of unskilled labour was greater than the demand and will be so

until smelt fishing begins as soon as the ice forms in the river.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been only fairly active, though the building trades were well employed. The work on the Quebec terminals, suspended since the collapse of the Quebec bridge, was resumed, giving employment to about 150 men on the Sillery section. The new technical school, which when completed will cost over \$250,000, was also begun; the contract for the erection was awarded to Messrs. Simoneau and Dion, Sherbrooke, and that for the outfitting to Messrs. L. H. Gaudry & Company, Quebec. The building is to be completed in April, 1911. Work on the new cement plant at Pointe aux Trembles was suspended, though not completed. A joint committee of boot and shoe manufacturers and representatives from the cutters, casters and machinists' unions have been in conference with regard to certain questions affecting employment. The result of the conferences had not been announced at the close of the month. The free night schools were opened on October 6. The Canadian Pacific Railway Company's steamer *Empress of Ireland* received damages on the passage to Quebec necessitating repair at Liverpool, England.

A disastrous fire on October 16, destroyed the Canadian Northern Railway's grain elevator, the Customs house, cold storage warehouse and other warehouses. The loss was estimated at over \$1,200,000, but comparatively few men were thrown out of employment.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busily engaged ploughing and harvesting the root crop; weather conditions were very favourable.

Lumbering.—Several large gangs were sent into the woods. One of the gangs was recruited in Gaspé. Some of the large mills have finished their cut, but the majority were still running to full capacity. The outlook is favourable. In the Lake St. John region, shantymen are receiving from \$30 to \$35 per month. The rates on the south shore were somewhat lower, namely, \$26 to \$30. The general level was slightly higher than last year.

Railway construction.—A number of contracts for the construction of the new route between St. Alphonse and Chicoutimi have been given out.

CONDITION OF PARTICULAR TRADES.

Activity prevailed in most of the building trades, though plumbers and stone cutters were somewhat quiet. The metal trades, with the exception of electrical workers and linemen, were quiet. Activity prevailed in the printing trades and among tailors and garment workers. Boot and shoe workers, however, were dull, as were also bakers, butchers, cigar makers and the leather trades. Hotel and restaurant employés, etc., were quiet. In the transportation branches, railway employés were busy, but steamboat men, ship labourers, cab drivers, teamsters, etc., were quiet. The supply of unskilled labour was in excess of the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally has been in demand throughout the month, and to an unusual extent for the season of the year. From a canvass of the various industries in the place there is everything to indicate that work will be much more plentiful than last year. All the factories are running full time, and in some cases help is being advertised for. Outside work is plentiful, and for unskilled labour there has been a good demand. Some of

the large construction companies have been short of labourers. The machine shops are getting more orders, and the scale company cannot keep up with orders. The railway companies report business as picking up. A large number of men are being employed on the extension to the Canadian Pacific Railway Company yard here, and on the ballast trains. Wholesale and retail trade was reported good.

The official figures given out from the City Hall show that there has been an increase of \$512,981 on the taxable real estate for the past year. This will mean over \$4,000 additional revenue for the City. The taxable property this year is \$6,225,186, as compared with \$5,812,195 in 1908.

The Street Railway Company has a project before the City Council to double its mileage.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The favourable weather has enabled the farmer to get his fall work done in good season. The grain and root crops have been exceptionally good, especially the potato crop.

Lumbering.—While the lumbermen have not yet started work in the woods, considerable has been done in preparing pulpwood for export.

Manufacturing.—All branches of manufacturing have been busy, all industries running full time.

Mining.—Work at the mines has been carried on with activity, and from indications it will only be extremely severe weather that will close them down.

Railroad construction.—The only railroad work going on in this section is that being carried out by the Canadian Pacific Railway Company which has about 200 men working on the extension to its yards.

CONDITION OF PARTICULAR TRADES.

The building trades reported all branches busy. In addition to many private dwellings, a large new hotel, two business blocks, a new station and a round house are under way.

Machinists were working full time, with orders in hand sufficient to ensure steady work throughout the winter.

Woodworkers were well employed, and the demand for fixtures is good.

The printing trade was somewhat quiet, but there has been no laying off of hands.

Journeyman tailors reported business good. Garment houses reported good business coming in from the east and west.

Bakers and confectioners were quiet. Cigar makers have been a little more active.

Miscellaneous help has been fairly active.

Railway men have been fairly active, and are looking forward to the close of navigation which means more work for them.

Unskilled labour was in good demand.

DISTRICT NOTES

Farnham.—An official announcement has been made that the Canadian Pacific Railway shops will be closed. The loss will be heavy for Farnham in many ways. Some 400 men are employed and the monthly pay roll amounts to over \$7,000.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

October was a busy month for all workers in this city and district and compared favourably with the preceding month. All industries were fully employed. The building trade was particularly active. Wholesale and retail trade was generally good. Rates of wages and hours of labour remained unchanged. The labour market suffered no disturbance.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crop has been exceptionally heavy this fall, and farmers report a prosperous season.

Fishing.—This industry was quiet.

Lumbering.—The month was very active, sawmills being kept busy.

Railroad construction.—The Canadian Pacific Railway Company gave employment to the usual number of men on repair work.

CONDITION OF PARTICULAR TRADES.

The building trades reported active conditions. Blacksmiths, bicycle workers, horseshoers and jewellers had a busy month. Other metal trades were fairly busy. Fairly active conditions prevailed in the woodworking and clothing trades. With the exception of bookbinders, who were less active, the other printing trades were active. Ice handlers were quiet; the other food and tobacco preparation branches were active. Leather workers were quiet. The miscellaneous trades had a fairly good month, while the transportation trades were busy. Unskilled labour was well employed, with very few out of work.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was favourable during October. The building trades were more active than in the corresponding month of last year; the supply of labour, however, was equal to the demand. Sash and door factories were very active some of them having received enough orders from outside points to keep them in operation for several months. Civic improvement work gave much employment. The metal trades were fairly employed but no new hands were needed. The leather industry was active, the production of the tanneries having increased, and it was stated that the number of hands would require to be increased. The Ames Holden factory had a good month, being more active than in the previous month. The Côté factory was very active in the beginning of October, but towards the end of the month work diminished on account of stock-taking. Employ-

demand for good farm hands. Weather conditions were favourable.

Manufacturing.—Manufacturing establishments in general were busy. A new pottery was started and will employ a good number of hands.

CONDITION OF PARTICULAR TRADES.

Carpenters, painters, marble cutters, steam fitters and plumbers were busy. Bricklayers and masons had a fair month, but plasterers were dull, with the exception of shipbuilders who were dull. The metal trades were well employed. Woodworkers reported an active month. Printers had a good month, as had also the clothing and miscellaneous trades. Bakers, butchers and candy makers had plenty of work. Transportation employes were kept busy.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of October was equally as active as September, and doubly as active as the corresponding month of 1908, especially in the building and outside trades. During the month building permits to the value of \$132,100 were granted in Maisonneuve. Wholesale and retail trade was active, and there were no disturbances in the labour market. Certain classes of workmen, such as builders' labourers, common labourers, teamsters, clerks and barbers seemed to be in demand.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were very active. Carpenters, joiners, lathers and plasterers were busy, although less active than in the previous month. Painters, plumbers, steam and gas fitters, stone cutters and builders' labourers were much in demand. Horseshoers had a fair month, and the other metal trades had a busy month. The woodworking

and printing trades reported a busy month. Journeymen tailors and garment workers were active, and glove makers and boot and shoe workers were busy. Cigar makers who have been dull for some time became busy. Saddlers were very busy. Active conditions prevailed in the miscellaneous trades, and with unskilled labour. Very few railroad employes reside in this district, but those who do were busy. Longshoremen were quiet, but will probably be active for the balance of the season. Carters, hackmen and teamsters were busy.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

An increase of \$2,500,000 in building in Montreal, during the nine months of 1909, compared with the same period of 1908, is an encouraging note of the year. The building year practically ceases with the middle of October, insofar as the number of permits issued are concerned. The following statement shows the number of permits issued and value of buildings constructed for the first nine months of 1908 and 1909 respectively:—

	1908.		1909.	
	No. of permits	Value.	No. of permits	Value.
January.....	26	\$ 78,650	50	\$ 120,120
February....	63	114,380	120	235,330
March.....	155	197,683	188	376,275
April.....	217	412,813	342	1,111,891
May.....	258	659,580	327	1,219,504
June.....	191	599,572	219	1,172,790
July.....	177	435,405	257	712,126
August.....	183	738,720	205	790,275
September..	181	622,875	227	716,840
		\$4,060,078		\$6,505,151
Increase for 1909.....		\$2,445,072		

The harbour revenues during September were fairly satisfactory. The amount received by the collector of customs on imports showed an increase of \$1,000 as compared with the correspond-

ing month of 1908, but the exports showed a decrease of \$1,500. The receipts from local traffic also showed a deficit of nearly \$3,000 compared with the same month last year.

Wholesale and retail traders reported a good month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were active.

Manufacturing.—The rubber factory after a month of quietness resumed its usual activity towards the close of the month. Other manufacturing establishments were active.

CONDITION OF PARTICULAR TRADES.

The building trades were active, as were also the printing and woodworking trades. From busy to active conditions prevailed in the metal, clothing, food and tobacco preparation, leather, miscellaneous and transport trades. Unskilled labour had a good month.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A scarcity of hands was the feature of the labour market in Hull during the month just past. Mills had to shut down at night, and operations by day had, in certain cases, to be curtailed. The scarcity was caused by the large exodus to the woods, and to the National Transcontinental, and also by the prospects of longer jobs at the many large constructions now going on in Ottawa and Hull. Common labourers have proved very scarce around the Chaudière mills, and as a result, night operations have stopped at J. R. Booth's sawmills. Exceptionally high wages are being paid in certain cases to many men. For instance, where two men were previously engaged at one machine, if the one man remaining can do the work of both, he is paid double wages; many are thus earning as much as \$3 per day,

an unprecedented rate for common mill hands. This scarcity of labour may bring about an early closing down of the sawmills in this district, for higher wages are paid on excavations and construction works than in the mills. The former averages \$2 a day, and the latter about \$1.65 per day. In Hull proper every factory and mill is still running full time. The same conditions prevail at Aylmer, Deschênes and Buckingham. The average pay is everywhere about the same, namely, \$1.65 per day. Corporation work to the extent of about \$100,000 is now progressing in Hull, and the average wage in this connection is \$2 a day. About 200 men are employed on these jobs, mostly excavators.

The Walters Axe factory, recently passed into the hands of an incorporated company. A large addition of sixty by seventy-five feet is being built for use as a general office and shipping rooms, while the old offices and shipping rooms will be given over to various manufacturing processes. It is the intention of the company to double its staff of seventy-five men. The company has of late engaged in the manufacturing of cutlery and various other lines of steel tools in addition to that of axe-making.

A Quebec firm is negotiating for the construction in Hull of a shoe last factory to cost about \$75,000 to build and equip. The applicants are also disposed to start large works for the construction of shoe making machinery.

The promised advance in mica has not this far materialised, although news of the opening up of new factories at various points in the Ottawa valley has been received.

The season of navigation is in its most active period just now for lumber shipments. It will not, however, be of longer duration than last year, but is expected to close about the 20th of November next. The season was as busy and profitable as last year.

Hull building contractors and architects have abundance of work under way, and many contracts in sight, so that employees of all kinds are assured of steady employment until late in the season.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed in the Ottawa district during October. With one or two exceptions, lumbermen sent more hands to the shanties, and local building and street improvements were more extensive than during the corresponding period last year. The erection of the Central Canada Exhibition grand stand, and the new Grand Trunk Railway station, employing together some 400 skilled and common labourers, were especial causes for activity.

On October 13, seventy members of the local International Union of Leather Workers on horse goods went on strike demanding an increase of ten per cent. on piece work in the shops. At first three shops were affected, one having promised the increase. In this shop the advance was paid for one week at the end of which the men joined the strikers. The men asked for arbitration, but at the end of the month the employers had not consented to this procedure. Some of the men's places were reported filled.

On October 8, a strike was declared in a local tailor shop by the Journeymen's Tailors' Union of America over the alleged violation of an agreement with the local union, No. 143. It was said the employer cut the prices for coat making from \$1.25 per garment to sixty cents. A man and woman quit work and went to another city shop. The employer states that no agreement existed, and that the industry is not affected.

On October 19, the local International Brotherhood of Electrical Workers passed a resolution demanding a minimum wages of thirty cents an hour instead of the present maximum of twenty-five cents. In special cases, expert men were receiving over twenty-five cents with one firm. The union's demand is to be presented on November 2. Machinists in one foundry asked an advance from twenty-seven and one-half to thirty cents an hour, but the request was re-

fused. The Library Board of the City increased the salaries of two women clerks by \$50 a year, and decided that the minimum salary for beginners should, in future, be \$300 a year.

There are only twenty men in the Rescue Mission, compared with fifty at this time last year.

A reduction in fire insurance rates has taken effect in a certain portion of the city from \$1.15 to eighty five cents on a \$100, on a three years' risk, and from an average of \$1.50 to eighty cents in another portion. Better fire protection is the reason for the change.

The annual assessment returns for Ottawa, show a total assessment of \$55,348,814 or an increase of \$4,840,609 over last year. Nearly all the increase was due to the erection of new buildings as the land values were not increased. The population increased 3,076, and is now 83,360.

Meats were increased in price during the month, pork selling at \$30 to \$32 per barrel compared with \$25 earlier in the autumn. Vegetables and fruits are ten per cent. cheaper than a month ago.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops were benefitted by late autumn rains. The local root crop is twenty per cent. better than last year, and the oat crop on the Experimental Farm was fifteen bushels per acre ahead of last season. Corn is an average of three tons an acre better than in 1908. The apple crop is the only fruit crop that shows any improvement over last year.

Lumbering.—The lumber demand was active in the last part of the month, and the best classes of pine was increased a couple of dollars per thousand. The mills are producing at full capacity in contrast with last season when the lack of water power partially paralysed the industry.

Railroad construction.—The Canadian Northern Railway is proceeding with a new line into Ottawa, and the construction of the Grand Trunk Railway station is going ahead satisfactorily.

CONDITION OF PARTICULAR TRADES.

The building trades were active, but moulders, iron workers and engineers were quiet. Electrical workers were busy, and stove mounters active. Horseshoers were very busy. Steady employment was reported in the wood-working trades. The printing trades were actively engaged, and the clothing trades were very busy. Quietness prevailed in the food and tobacco preparation branches, and the leather trades were unsettled owing to the strike. Barbers were quiet, but clerks and stenographers were in fair demand. Furriers were very busy. Railway hands were very busy. Unskilled labour was very actively engaged.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of October the industrial situation remained unchanged as compared with conditions prevailing during the previous month. Nearly all lines remained fully employed. The indications are, that the balance of the season will be as good, if not better than the same period last year.

A joint meeting of members of the City Council and the Board of Trade was held for the purpose of taking more vigorous action in securing new industries. It was decided to secure an expert at a good salary to devote all his energies to this end. It was also suggested that in addition to a salary of \$2,000 or \$3,000 per annum and expense, he be given a bonus of from \$200 to \$500 on each new industry secured. It was also decided that every consideration be given to industry promoters.

On the 11th of the month a new vaudeville theatre was opened to the public. It is a fire proof structure of steel, reinforced with concrete, having a seating capacity for 700 persons.

A branch of the Bank of Toronto, was opened here on October 5.

In 1889 the assessment of Kingston was \$7,318,389. In 1899 it was \$7,809,554 and in 1909 it is \$8,930,348. In the past ten years it has increased twice as much as in the ten years from 1889 to 1899. The chief increase, however, has occurred in the past three years. The assessment three years ago was \$7,912,657. The increase will yield \$6,500 more in taxes next year.

The strike of painters at the shop of A, MacMahon & Company, reported some time ago remained unsettled. No other strikes, lockouts, or changes in the rates of wages or hours of labour were reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a favorable month. Vegetable, roots, fruits, etc., were an abundant crop. The yield in potatoes was exceptionally large.

Fishing was dull.

Lumbering was more active.

Manufacturers reported a busy month.

Mining was active.

Railroad construction continued active.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades continued active. The metal, engineering and shipbuilding trades were active. The Canadian Locomotive Company is about to start on two new contracts, one for twenty-five, and the other for fifteen new engines. Woodworkers and the furnishing trades had a busy month. Printers, tailors, bakers, cigar makers, butchers, tanners, curriers, barbers, broom makers, furriers, laundry and theatre employes reported a busy month. Railway and street railway employees, cab drivers, teamsters, and unskilled labourers were active.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported, as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour of all classes was well employed during the past month, which

was perhaps the best month of the year for nearly all classes of mechanics and labourers. The city has experienced great activity in building operations.

One cement company is advertising for 100 labourers at \$1.75 a day. The Belleville rolling mills and horseshoe factory was kept busy filling orders and large shipments are made every day. This is one of the city's leading industries. The Belleville Hardware Company employs a large number of skilled mechanics and was also busy. Both wholesale and retail merchants reported business excellent. The city teamsters, those employed at corporation work, struck for \$3.50 per day. They were formerly receiving \$3. After being out a few days they were granted their demand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy ploughing, getting in root, crops, apples and fruit. The weather was very suitable.

Fishing was active, large catches of whitefish being made. Other fish were plentiful.

Lumbering was dull in this district.

Manufacturing was active in all branches.

Mining was also active in this county, hundreds of men being employed.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were busy. They have had a splendid season.

Iron moulders, iron workers and helpers, horseshoe makers, machinists, electrical workers, brass workers, blacksmiths, boilermakers and horseshoers all had an active month, there being plenty of work. Many shops worked overtime.

All branches of the woodworking and furnishing trades were very busy this month, with the exception of wood carvers, car builders, gilders and shingle weavers. Coopers were especially active, being rushed with apple barrels and cheese boxes.

Printers, both job and machine were all employed full time. Pressmen and bookbinders were all active.

Journeyman tailors were all busy, some shops working overtime to keep up with orders.

Bakers and confectioners, butchers and meat cutters and cigar makers had a busy month.

The various harness shops were running a full staff during October.

Barbers, clerks, stenographers, delivery employees, furriers, hotel, restaurant and theatre employés as well as laundry workers all reported a busy month.

Railway conductors, engineers and firemen were active as well as switchmen, trackmen and freight handlers. Steamboatmen generally were busy. Cab drivers carters and draymen had a busy month. Teamsters were busy.

The supply of unskilled labour was equal to the demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions generally were very favourable during October, the result being that there were very few idle men in the city or district. The demand for men in all branches was about equal to the supply. All the factories were working full time and in some they were working overtime. Building operations were fairly active, but fell off somewhat during September according to a comparison with the amounts of the building permits for that month in 1908. Last year, September saw permits issued to the total of \$57,230 whereas during the past month the amount was \$46,485 of which \$22,000 was made up by the Knox Church building. The Colonial Weaving Company has just completed a new factory and is installing about \$20,000 worth of new machinery which will result in doubling the output of the plant. The Central Mill started work again this month after being shut down for the last three months; it now has a capacity of 400 barrels of flour a day and will run night and day. The assessment

returns show the population of the city to be 16,907, an increase of 416 over last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy with the marketing of produce, threshing and fall ploughing.

Lumbering.—Lumbering has been very active and the season just opening promises to be even more active, all the firms advertising for men to go to the camps.

CONDITION OF PARTICULAR TRADES.

The building trades have had a good month.

Iron moulders and core makers have had a fair month. Machinists and brass workers were very busy. Blacksmiths have also been busy. Boiler makers were not doing much.

Woodworkers and pattern makers were active: Coopers were busy.

Printers were busy, also pressmen and bookbinders.

Tailors and garment makers reported business good.

Bakers and confectioners and butchers had plenty of work.

Leather workers had steady employment.

Railway and street railway employees steamboatmen, etc., had a busy month and teamsters and express men had an active month.

Unskilled labour was in active demand at good wages.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent. reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions during October were satisfactory with plenty of work for nearly all classes. There was a noticeable demand for female labour more especially as domestics, confectioners, in whitewear, silk goods, knitting and fur establishments and as jewellery workers, good wages being

offered. The building trades continued active, favoured by mild and fine weather. The usual movement of population from the rural districts to the city has begun, but owing to existing favourable conditions, it is not anticipated that much hardship from lack of employment will be experienced during the winter.

Building permits were issued during September for 522 buildings of an approximate value of \$1,046,065 as against 463 buildings of the value of \$1,109,580 in September, 1908. The total number of buildings for which permits were issued for the first nine months of the year was 3,767 representing an approximate value of \$13,054,677 as compared with 2,957 buildings, valued at \$8,618,010 for the corresponding period of 1908.

A by-law to raise \$320,000 for new permanent buildings on the exhibition grounds will be submitted to the rate-payers on January 1st. The rate-payers will also be asked to sanction a by-law to raise \$500,000 to begin work on a scheme for reclaiming Ashbridge's marsh as an industrial and park area. The scheme involves an ultimate expenditure by the city of \$2,700,000 including \$1,700,000 for concrete piling and \$544,000 for excavation. There will be 140 acres available for industrial sites, 70 acres for ships and wharves and 160 acres of park land.

The new Public Reference Library on St. George and College Streets, completed at a cost of \$260,000 exclusive of interior fittings was formally opened to the public on the 28th.

At the meeting of the Board of Management of the House of Industry on October 19th., provision was made for the opening of fifteen stations distributed throughout the city at which bread and soup will be given out during the winter. The officials anticipate a considerable decrease in the number of those needing relief, owing to the marked improvement in industrial conditions.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busy and fall ploughing was well advanced, the weather having been generally favour-

able. Root crops have yielded heavily and pastures are generally in good condition. Milk producers have advanced the price of milk beginning with November 1st. owing to the increased price of feed. During the summer the price ranged from \$1.15 to \$1.18 per 8 gallon can, the increased rate being \$1.50 to \$1.55. The retail price has been increased to eight cent per quart for loose milk and nine cent for bottled milk.

Manufacturing.—Activity prevailed in nearly all lines with orders coming in freely some extensions and new enterprises were undertaken. The Canada Foundry Company has secured a contract from the Dominion Steel Company of Sydney, N. S., for the extension of their Bessemer blast furnaces and plants and the construction of two open hearth furnaces. The amount involved is about \$500,000 and the order will keep most branches of the foundry busy throughout the winter.

The erection of the buildings of the National Iron Works Company, on the site recently secured in Ashbridge's marsh is being rapidly proceeded with, the contracts calling for the completion of the works by February 16. The city has awarded a contract to the company for 1,080 lengths of pipe required for the extension of the water system at \$27.45 per length.

The National Carbon Company of Cleveland Ohio, will establish a branch factory in Toronto to employ about 300 men. The Company has purchased a site of three acres on Davenport Road in the north-western section.

The Toronto Carpet Manufacturing Company will erect a two storey warehouse on King Street East near Fraser Ave. to cost \$42,000.

The Scott Knitting Company will put up a three storey factory on Ryerson Avenue near Queen Street to cost \$12,000.

CONDITION OF PARTICULAR TRADES.

All the building trades were actively employed, plumbers gas and steamfitters being especially busy.

Blacksmiths, boiler-makers, moulders, machinists, sheet metal workers, struc-

tural steel workers and electricians were generally well employed brass workers, jewellers and silversmiths were active.

The woodworking trades including piano workers had steady work.

Printers, bookbinders, pressmen, electrotypers and stereotypers were generally active.

Custom tailors were fair. Garment workers, boot and shoe workers and hat and cap workers were steadily employed. Furriers were busy.

Bakers, confectioners and butchers had continuous work. Brewery workers had a fair month; cigar makers were well employed.

Leather workers were active.

Hotel and restaurant employees, barbers and laundry workers, while not so busy as last month were active. Clerks, salesmen, delivery men and warehousemen were fairly well employed.

Railway and street railway employes expressmen and teamsters had plenty of work. Sailors longshoremen and others employed in freight traffic by water were active.

Unskilled labour has been generally well employed but with the influx of new arrivals the supply is likely shortly to exceed local requirements.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

October showed little change in the labour market as compared with September. General activity prevailed, and the outlook was good in most lines of employment.

A larger number of labourers and teamsters were employed on the extension works of the Ontario Power Company. The International Acheson Graphite Company was enlarging its plant. A grape-juice factory was in operation. Machinery was being installed in the new corrugated paper factory; it has 50,000 square feet of floor space. The sixth 10,000 horse power generator was

being set up in the Canadian Niagara Power Company's plant. Transportation and general business were both increasing. Financial conditions were better.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvesting of apples, grapes and vegetables, late threshing and fall ploughing kept farmers busy. An early snowfall damaged late fruits and somewhat delayed work on the land. The acreage under grapes was larger than ever before. The crop was heavy and prices good.

Manufacturing.—All manufacturing concerns were reported busy. The linen, suspender, neckwear, shredded wheat and enamelled can factories were very busy. Fruit canneries were working to fullest capacity.

Railroad construction and employment.—A small amount of railway construction was going on in the district and general employment on steam roads was better.

CONDITION OF PARTICULAR TRADES.

The building trades were generally active and the outlook was good. A \$30,000 hotel, a number of houses, the Hydro-Electric transforming station were being erected, and a number of men were working in neighbouring places. Masons, painters, stone cutters and builders' labourers were quiet, with all other trades busy.

The usual number of men were working in the metal and engineering trades. Electricians and linemen were again busy on the extension works of the power companies and improvements to electric light and telephone systems in the city and towns of the district.

October is the last month of the rush season in the fruit and vegetable preserving industry. Large numbers of women and many men were employed in the city canneries and also at *Welland, Port Robinson, St. Davids and Niagara-on-the-Lake*. The quantities packed this year were larger than ever before. The wine-manufacturing companies also employ a number of people in their vineyards and factories.

The Clifton hotel closed for the winter, throwing many persons out of employment.

All regular employés of steam railways were working. Winter schedules went into effect on electric lines, reducing the number of trainmen. Teamsters were busy.

Unskilled labour was well employed.

DISTRICT NOTES.

Bridgeburg.—The property owners of the village approved a by-law to build a sewer system. The new varnish factory will be running early next year. It has 14,000 square feet of floor space.

Chippawa.—The contract was let for, and work commenced on the building of the electric steel plant. Forty men were employed on the excavation.

Niagara-on-the-Lake.—Navigation and fruit shipping at this port closed for the season. The cannery was running to full capacity.

Port Colborne.—Grain traffic by the Welland Canal route was very heavy and the elevators were constantly busy.

Welland.—Manufacturing concerns were all busy. Machinery was being installed in the new Page-Hershee tube works. The Ontario Iron & Steel Company will instal a producer gas plant. The company now employs about 300 hands.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment during October was from active to busy.

While some of the building trades continued to experience a lull, the majority of the trades were well employed. There was no abatement in employment on civic works such as street pavements, concrete walks, and sewer construction. These works will continue to employ large gangs of men till the close of the season. The Monarch Knitting Com-

pany Limited of Dunville, Ont., is seeking to locate St. Catharines and has purchased the premises lately occupied by the Sunbeam Electric Lamp Company. The Company will start with 100 hands, principally women and girls. This number will be increased to 300 or 400 hands when the factory is in full running order. Merchants reported wholesale and retail trade active.

The members of the typographical union have secured an increase in pay. Seven machine hands secured an increase of one dollar from the beginning of the month raising their wages from \$14.00 to \$15.00 per forty-eight hours work, with a promise of an increase of another dollar next year. Nine hand compositors had their wages increased from \$13.00 to \$13.50 this year and will have next year a similar increase of 50 cents raising their wages to \$14.00 per 48 hours work. The increase was effected by a conference between the men and master printers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers have been very busy harvesting and shipping, and although the season has been an open one it is feared that some of the fruit will not be harvested before the frost. The shipments of fruit to the west and other markets, which have been very heavy, brought gratifying returns. One shipment alone of ten tons of fruits made by the St. Catharines Cold Storage & Forwarding Company to Winnipeg netted \$870.87. The highest previously realized was \$800.00. The total trade with outside points by this company shows an increase this year of fifty per cent. over last season, and agents report from various markets a brisk demand for all that can be shipped as far west as Calgary and Edmonton.

Manufacturing.—The canning factories were running to full capacity. The Jinks Factory and the Reo Automobile Works have taken on additional hands. Other factories were running full time.

Railroad construction.—The Niagara, St. Catharines and London Railway Company is extending its line from Welland to Pt. Colborne.

CONDITION OF PARTICULAR TRADES.

The building trades with a few exceptions were active to busy.

All branches of the metal and engineering trades were active.

All engaged in the woodworking and furnishing trades reported trade fair.

The allied printing trades were from active to busy.

Journeymen tailors were active. Boot and shoe workers were busy.

Bakers and confectioners, butchers and meat cutters were busy. Cigar makers and tobacco workers were active.

Tanners and curriers, leather workers, saddlers, trunk and bag makers were active.

Barbers, clerks, stenographers, delivery employés, hotel and restaurant employés and laundry workers reported a good month's work.

All lines of transportation continued active or busy.

Unskilled labour was active, with supply and demand well balanced.

DISTRICT NOTES.

Thorold.—Labour was well employed. The Montrose paper mill was closed down the first half of the month but resumed operations October 18.

Merritton.—All mills and factories were running full time and labour was well employed.

Pt. Dalhousie.—Labour skilled and unskilled found ready employment, the supply and demand being about equal.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been one of general activity in all lines of industry. The building trades have been working steadily, and enough work is in sight to keep them so as long as the weather will permit. Industrial establishments in all lines have been working full-handed, and in some cases extra hours, and prospects

are said to be very bright for continued activity during the winter months. Nearly all report trade improved over the same period of last year.

Night classes in the Technical School were started October 11, with an enrollment of about 200 students.

Building permits for the month totalled in value \$247,300; October 1908, totalled \$211,950. The total for the year ending October 31, 1909, is \$1,557,425 compared with \$1,331,182 for the year ending October 31, 1908.

Immigration officers intercepted a party of foreign labourers, October 13, ticketed through from Buffalo to Detroit, on information that their real destination was a point in Canada about 200 miles north of here, under contract with parties operating in Toronto and Buffalo to supply labourers to Canadian firms. They were detained here while investigation was made, and deported to Niagara Falls, N. Y. No prosecution has so far been announced of the parties responsible for their importation.

Unskilled labour has been fairly well employed, and no labour difficulties were reported.

Prices of shoes were advanced 10 per cent. during the month, and another advance is said to be in prospect. The high price of leather, owing to scarcity of hides, is given as a reason.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Grapes have been very plentiful this year, and prices low. Growers state that the acreage is too large, owing to the number of new vineyards coming into bearing, and that planting will have to be curtailed for some years if an over-supply is to be avoided. Local grain buyers complain of the poor condition of oats offered on the city market, the grain is not properly cleaned.

Manufacturing.—Contracts were let for the warehouse and foundry for the Otis-Fenson Elevator Company on October 12.

Railway construction.—Plans were filed October 21, in the registry office of the Hamilton, Waterloo and Guelph Electric Railway. The route shown is

from near the corner of James and Vine streets westerly to and along the edge of Dundurn and Harvey Parks, over the Dundas Canal, thence through East and West Flamboro and Beverly townships. The city by-law calls for an expenditure of \$100,000 by the Company by the end of this year, but an application for extension of time is now before the City Council.

The Canadian Northern Railway officials have announced that their road will be built along the north shore of the bay, and will enter the city from the west.

CONDITION OF PARTICULAR TRADES.

Labour conditions in the trades have been uniformly active during the month, with the single exception of the stove industry, which was reported dull. The moulders' strike is still on, with no particular change in the situation. A number of the non-union moulders have quit the foundries but no strikers have gone back.

The building trades were busy, cement workers found conditions active on two large buildings in which reinforced concrete is being used. Iron workers (other than stove-plate moulders) were busy, as were electrical workers. The wood-working trades were all actively employed. The allied printing trades had a good month. Tailors and garment workers found conditions improved. Boot and shoe workers were exceptionally busy. Bakers and confectionery workers were steadily employed. Cigar makers and tobacco workers were actively employed. Barbers were all working, as were broom makers. Hotel and restaurant employés had a fair month. Railroad employés were busy: Steamboat traffic slackened toward the latter part of the month, and street railway men report the same condition. General labourers had a good month. Teamsters were very busy.

DISTRICT NOTES.

Dundas.—A new industry is to be established here if sufficient capital is subscribed, viz., that of the Harvey Motors Limited, which will manufacture marine and stationary engines.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during the month, which was more active than the preceding one or the corresponding month of last year.

The building trades continued active. The iron trades were busier, and a greater number of men were employed by the city, on local improvement work, and by the street railway on the re-construction of tracks. There was a demand for female operatives, principally in connection with the manufacture of fabrics. The local post office has been changed to a city basis; several were affected financially by the change, and the majority of the staff are placed on a better basis so far as opportunity for advancement is concerned.

The following prices were quoted on the Thanksgiving market day. Turkeys, 24 to 26 cents per lb; geese, \$1.50 each; beef, 5 to 7 cents per lb; veal, 8 to 10 cents per lb; potatoes, 75 cents per bag; butter, 30 cents per lb; eggs, 30 cents per dozen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners were busy.

Manufacturing.—Increasing activity was general; in several factories extra men were taken on, and some overtime was worked. The Waterous Engine Works Company is erecting a large addition to its boiler shops to facilitate the handling of boiler plate.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters and decorators were busy, plumbers, gas and steam fitters were from active to busy.

Iron moulders and coremakers, machinists and engineers were busy. Linemen were active. Metal polishers and buffers, blacksmiths, boilermakers and sheet iron

workers were busy. Stove mounters were active, with horseshoers busy.

Woodworkers, carriage and wagon makers, pattern makers and coopers were busy.

The printing and allied trades, tailors and tailoresses, and bakers and confectioners were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were steadily employed. Barbers, clerks, delivery employés, hotel and restaurant employés were actively engaged. Laundry workers were busy.

Railroad trackmen were active. Freight handlers were busy. A few street railway employés were idle part of the month, the re-construction of the city tracks effecting the service. Teamsters and draymen were busy. Carters and hack drivers were active.

There were not many unskilled labourers unemployed, the supply of work was exceptionally plentiful.

DISTRICT NOTES.

Paris.—Labour was well employed. The factories and mills were busy.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were busy during October and conditions compared favourably with those of the previous month, while the outlook for the coming winter is brighter than at any time since the depression. Building operations were still underway and will continue for some time to come. No new industries have been started, but established industries were fully employed, a number of firms running overtime to meet the orders on hand.

Street paving and the construction of new filter beds for the sewerage system continued to give employment to a large force of men. The City Council has appointed a permanent fire brigade composed of a chief and six

men with the addition of ten call men, who will receive the following wages per year. Chief:—\$1,000, drivers, \$600; stationary men to receive \$500 for first, \$550 for second and \$600 for third year, call men \$100 per year. Formerly the fire brigade was made up of call men who received \$80 per year. No further change in rates of wages or hours of labour has been reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy with fall ploughing and harvesting the root and apple crops and report a fair yield.

Market prices were as follows:—

Hay, \$14 per ton.
Wheat, 98 cents to \$1.00 per bushel.
Oats, 38 to 40 cents per bushel.
Barley, 55 to 60 cents per bushel.
Potatoes, 65 to 75 cents per bag.
Eggs, 25 to 27 cents per dozen.
Butter, 27 to 30 cents per pound.
Chickens, 13 to 15 cents per pound.
Turkeys, 18 to 20 cents per pound.
Live hogs, \$7.50 to \$7.75 per cwt.
Beef cattle, live weight, 4½ to 5 cents per pound.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were fairly active with carpenters, lathers and plasterers, painters and decorators busy. Plumbers, steam fitters and tube mill workers were active. Iron moulders, coremakers and machinists were busy. Electrical workers and linemen were active. Stove mounters and blacksmiths had a fair month. Woodworkers in sash and door factories were busy. Piano makers were very busy with carriage makers and coopers fairly active.

The printing and allied trades had a fair month. Tailors and garment workers were fairly active, and bakers, teamsters and carters were well employed. Unskilled labour had a good month with the supply and demand about equal.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour skilled and unskilled was fully

employed during the month of October employment being more plentiful than in the previous month, or in the corresponding month of last year. The supply of labour, however, was equal to the demand except among cabinet makers, who were somewhat in demand. Four building permits were issued during the month, one being for an addition by the Forwell Foundry Limited, manufacturers of soil pipe and fitting. Another was for an addition to the Wippes block. The value of the permits amounted to \$30,000. Good progress was made on the erection of the additions to the St. Jerome College and the C. Heahn Block. The C. A. Ahrens Shoe Factory and the Stumpfs Block are nearly completed. The addition to the convent is completed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy on fall ploughing, harvesting the root crops, and delivering sugar beets at the Ontario Sugar Factory, which began operations on the 18th of October. The best crop is not as good as in former years, but a better percentage of sugar is reported.

Manufacturing.—Busy conditions prevailed with the Berlin Interior Hardwood Company, which was working overtime, as were the door and sash factories, the Walker Binn Company, the G. Leppert Furniture Company, the Batz Bros. Furniture Company, the D. Heoner Furniture Company and the Oberholtzen Shoe Company.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, decorators and paper hangers, plumbers, stone cutters, and builders' labourers were busy, as were iron moulders, iron workers and helpers, coremakers, machinists, engineers, electrical workers, linemen, metal polishers, brass workers, stove mounters, blacksmiths and boiler-makers. The various wood-working, printing, clothing, food and tobacco preparation, and transportation trades had a very good month. Unskilled labour was fully employed.

WOODSTOCK, ONT., AND DISTRICT.

Mr. W. H. N. McEltheran, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market for the month of October was active, outside labourers especially being very busy. Building operations were brisker than for some time past, the number of new buildings going up absorbing all available help. Manufacturers reported a busy month, orders being plentiful. Tradesmen were all working full time and in some factories overtime. Farmers were mostly busy with fall ploughing, while apple pickers were very active in some localities. A large number of silos were built in the country districts, the woodwork for the most part being done by the farmer himself, while the cement work was let by contract. With the drying up of the pastures the milk supply was diminished, most dairymen having had to feed ensilage.

The City Council passed a by-law to raise \$30,000 for a new school building, to replace an old structure now in use, and to make alterations and additions to another school. The city assessor's returns showed for the year a total business assessment in Woodstock of \$443,570; taxable income, \$112,255; value of real property, \$1,120,427, with buildings, \$3,266,263 or a total value of \$4,386,695.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were actively engaged hauling grain, produce and live stock to shipping points and markets, and also at the fall ploughing.

Prices for farm commodities ranged as follows:—

Turkeys, 18 to 20 cents per pound.
 Geese, 10 and 11 cents per pound.
 Butter, 25 to 27 cents per pound.
 Eggs, 25 to 27 cents per dozen.
 Potatoes, 75 cents to \$1.00 per bag.
 Tomatoes, 35 to 40 cents per bushel.
 Apples, 60 to 90 cents per bag.
 Beef, dressed, 7 to 12 cents per pound.
 Mutton, 10 to 12 cents per pound.
 Lamb, 10 to 15 cents per pound.
 Live hogs, \$7.80 to \$8.10 per cwt.

Manufacturing industries were busy all month. Every available man secured employment. Wagon and sleigh makers were working overtime, as were knitting factory operatives. Work was commenced on the new transformer station in Woodstock. About thirty men will be employed, men were also engaged erecting towers and poles for carrying the wires.

In *railroad construction*, work was quiet.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were very busy the demand being greater than the supply. Work in the new factory for the Tobin Arms Company was being rushed along, it being the intention of the Company to install the machinery at the earliest possible moment. A new addition was also being made to the Oxford Knitting Company's new factory. Several private residences of a substantial character were also started and in course of completion. Carpenters and joiners were very busy in the mills and on outside jobs. Lathers and plasterers were all busy, some outside men being employed. Painters were busy. Plumbers were active, all the available men being well employed, as were also gas and steam fitters. Stone cutters and builders' labourers were all busily engaged.

Stove moulders were very busy, orders from the west being heavy, though Ontario and eastern orders were hardly up to expectations. Machinists were all very busy, there being a demand for more competent men. Linemen were very busy. Metal polishers and buffers were active.

Woodworkers engaged in the several trades were all very busy. Wagon and sleigh makers were working overtime. Furniture makers reported steadily increasing work. Piano and organ makers reported orders good and business on the increase. Church organ manufacturers were all well employed. Wire fence operators were getting busier.

Knitting factory operators were working about a third overtime.

Printers and pressmen were busy.

Journeyman tailors were very busy, fall trade being very good.

Bakers and confectioners were active. Cigar makers were busy.

Tanners and curriers were active.

Barbers were active.

Freight handlers were busy, traffic on all steam roads showing an increase.

Unskilled labourers were all well employed.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during October, which compared favourably with the preceding month and was better than the corresponding month of last year. Outdoor workers in building trades were active, except for a few days. One hundred and forty building permits were issued during the first nine months of 1909. Large gangs of men were employed paving streets, laying cement walks and on the dam, which is nearly finished. Plans were passed for a new \$25,000 sewage disposal plant. The municipal drain has been completed this month; it is eighteen feet wide, from seven to nine feet deep, and about seven miles long. Over a year was required for the work. This ditch is expected to prove a benefit to farmers, a portion of bog land being thus reclaimed.

The city's population is 14,799 an increase of 290 over last year. Taxable property totals nearly eight millions in value.

Wholesale and retail merchants reported trade very active. Coal prices took their usual rise on September from \$7. to \$7.50 per ton. No changes in rates of wages or hours of labour and no trouble in the labour market was reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy ploughing and getting out their root crop. Market prices remained nearly

the same, except, butter which sold at 26 cents a pound.

Eggs were 28 cents a dozen; Wheat, \$1 a bushel; hay, \$15 a ton; and turkeys scarce at \$1.50 each.

Manufacturing.—Manufacturing establishments reported conditions very good.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were rather slack the last of the month. Carpenters, painters and paper hangers were busy. Plumbers were active.

Iron moulders and helpers were busy. Machinists, blacksmiths and boiler-makers were active.

Woodworkers, upholsterers, carriage and wagon makers were active. Coopers were very busy.

The printing and allied trades were busy.

Journeymen tailors and garment workers were active, factory workers were busy.

Bakers, confectioners and butchers were active. Cigar makers were well employed.

Harness makers had a good month.

Barbers, clerks and delivery employes had a busy month. Hotel and laundry workers were active.

All lines of railroad workers were busily engaged. Cab drivers, draymen and teamsters were busy.

Unskilled labourers were fully employed.

DISTRICT NOTES.

Clinton.—The Canadian Flax Mills Company has rented a part of the foundry building which it will use for threshing and breaking the 200 loads of flax grown in this district.

Mitchell.—The local apple buyer has made several shipments to Glasgow, Scotland. There was a large crop of apples in this district. The slaters have completed the roof of the new Carnegie library and the inside work is steadily progressing.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market generally was very fair, and showed a marked improvement over the same month last year. The various factories and foundries were well supplied with orders and the railroads were very busy. In the building trades there was no more work than could be attended to easily, the only buildings of importance in course of erection being the Niagara Power transformer station just outside the city, and the joint Niagara power distribution plant and waterworks pumping house inside the city.

Commercial travellers in connection with the wholesale houses are sending in fifty per cent. more orders than at this time last year, the orders from Western Canada being especially encouraging.

The two large biscuit and candy factories, McCormick's and Perrin's, have started on their fall rush, and are advertising daily for female help.

A gang of thirty men are busy putting in poles throughout the city, to carry Niagara electric power.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The heavy fruit crop in this district, especially of apples, has added considerably to the wealth of the farmers. Potatoes for winter keeping are now being delivered, and appear plentiful at seventy-five cents for a ninety pound bag.

CONDITION OF PARTICULAR TRADES.

Bricklayers were fairly well employed, although the outlook is not bright. Carpenters, lathers, plasterers and painters were busy. Plumbers had plenty of work. Stone cutters were busy. Builders' labourers reported trade somewhat quiet.

Iron moulders were busy. Iron workers at the rolling mills were very busy; on the day shift they work five days a week, extra help taking the off days. Machinists were very busy. Bell telephone linemen were busy putting wires underground in the business section. There is a lot of work ahead for linemen stringing wires for Niagara power in all parts of the city. Metal polishers and stove mounters were busy. Sheet metal workers at McClary's were working overtime.

Carriage and wagon workers were busy especially with orders from the West. At the Grand Trunk Railway Car shops business is very brisk, and a lot of extra help has been employed.

Printers and pressmen were very busy, working overtime in the job departments.

Journeymen tailors were busy, the fall trade being exceptionally good. Garment workers were busy, working overtime. Boot and shoe workers were exceptionally busy, and shoe cutters and lasters on men's fine shoes were being advertised for. The shoe factory at Aylmer Ont., was burned and a number of the hands secured work here.

Cigar makers reported trade good, on the best grades of cigars.

Tanners were very busy; the sole and heel cutting department at Hyman's tannery has moved into part of the Murray Shoe Company's new building, giving more room in the drying department.

The canning factories were very busy, and were hiring a lot of female help. Cardboard box factories were rushed with orders, a very large part of which are received from the North-west.

Railroad train crews were busy. The Canadian Pacific Railway roundhouse is to be enlarged shortly to make room for more engines, to meet the increasing traffic.

Unskilled labour generally was well employed; the preparations of the installing of Niagara Electric power has made considerable work.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were well employed during October, the open weather permitting outdoor work to be continued throughout the month. In local industries the month was reported active. Merchants reported trade favourable. Building permits issued from January 1st until September 31st, totalled \$208,200 in value, permits to the extent of \$11,000 were issued during the month of September.

Street railway receipts showed a falling off for the month of September compared with the corresponding month of last year, owing to the reduction in the fares, the number of passengers carried being greater than in September, 1908.

A considerable demand is being made for steam, to be utilised for heating purposes, furnished by the Light, Heat and Power Municipal Plant. The price of steam to consumers has not yet been decided upon definitely, but the actual cost of production is being watched and the cost to consumers will be determined at a later date.

A new schedule of wages went into effect on the Pere Marquette Railway affecting agents and operators. An advance of \$5.00 per month was made, making the minimum salary \$50.00 per month, \$3.00 per month extra will be allowed operators who have to care for switches and semaphore lights. Where there are over six lamps in use, fifty cents for each additional lamp will be allowed. Extra time will be allowed for Sundays and holidays.

Arrangements have been made with the Public Library Board, whereby supplementary reading will be supplied for scholars in the public schools. One hundred dollars per annum will be expended on this account.

The South Western Traction Railway passing through this city was disposed of by auction to a London syndicate, the

consideration being \$535,000. There is talk of extending this line to the town of Aylmer.

Negotiations were carried on during the month of October between the Michigan Central Railroad trainmen and officials and resulted successfully for the trainmen. As a result a new schedule of wages will go into effect at once, affecting all men except those employed in passenger service. Formerly, brakemen on through freight trains were paid \$2.00 per 100 miles; by the new arrangement they will receive \$2.24 per 100 miles. Conductors on through freights formerly received \$2.85 per 100 miles and will now receive \$3.20 per 100 miles. Brakemen on locals working 18 days per month who had received \$60.00 per month, by the new schedule will receive \$64.75 per month. Brakemen on branch locals who were receiving \$62.50 will now receive \$68.25.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busy with fall ploughing and looking after their stock. The local markets have been well patronised with buyers and sellers. The apple crop this year has been large.

Manufacturing.—Local industries report the month a good average. The Canadian Iron Corporation Company, report the month of October more active than the preceding month.

CONDITION OF PARTICULAR TRADES.

All classes employed in the building trades were busy, favourable weather having prevailed throughout the month. Machinists, boilermakers and moulders were busy. There were no idle printers in the city. Tailors were busy. Bakers and confectioners reported October a busy month.

Unskilled labour was well employed, and a considerable increase was made to the staff employed on civic work.

DISTRICT NOTES.

Aylmer.—One hundred hands were thrown out of work as the result of an

explosion and fire in the Brandon Shoe Factory. The town will assist the shoe factory in rebuilding.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market showed little improvement if any over September. While some branches of manufacturing were busy, others reported trade about the same as in the previous month. The building trades have become quieter. Permits during the month amounted to \$7,850 and were principally for small buildings. Contractors look for little change in the building trade for the coming month. The Foundry and Machine Shops were not overcrowded with orders; in one instance a firm started on short time the last week of the month. Planing mills were all running full time, principally on interior fixtures.

Merchants reported trade brisk and bankers found conditions favourable, paper being met promptly. The Customs returns showed a substantial increase over the same time last year. Passenger traffic will establish a new record.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy with corn and sugar beets, the latter being a large crop and while not up to that of 1908 being of better quality. Prices during the last week of the month were as follows:—

Butter, 25 cents per pound.
Eggs, 30 cents per dozen.
Potatoes, 90 cents per bag.
Hogs, live, \$7.30 per cwt.
Hogs, dressed, \$9.00 per cwt.
Wheat, \$1.00 per bushel.
Cattle, export, \$4.50 cwt.
White fish, 12½ cents per pound.
Salmon, 12 cents per pound.
Hay, \$12 per ton.
Straw, \$4 per ton.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were slack, and carpenters and joiners were only

fairly well employed, painters and decorators were quiet, but plumbers and gas fitters were busy, and builders' labourers had steady work. Machinist, electrical workers and blacksmiths were quiet. Woodworkers, upholsterers, carriage workers and coppers were busy. Printers and bookbinders were busy. Journeymen tailors, garment workers and boot and shoe workers reported a fairly good month. Bakers and confectioners, cigar makers and tobacco workers were active. Barbers, clerks, stenographers had a fair trade, and steam laundries were busy. Steamboatmen and steamboat firemen were very dull, but street railway employes were busy. Owing to the small amount of public improvements done, carters and draymen were idle most of the month. Unskilled labour was fairly well employed.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Work has been plentiful in the local industries, the building trades and among unskilled labourers. The Postum Food Company is spending \$50,000 in one new building and is asking for tenders for another building 112 x 126, four stories high to cost from \$25,000 to \$30,000 when completed. Windsor's progress in prosperity and population is shown by the year's assessment roll just returned by the commissioner. The population is 16,192, an increase of 363 over last year, and the total assessment is \$10,957,025 an increase of \$695,736 over last year. Wholesale and retail merchants reported trade good and money more active.

CONDITION OF PARTICULAR TRADES.

The building trades continued active during the month and good skilled labourers were in demand in all branches.

The iron trades were busy and good skilled men had no trouble in getting plenty of work.

In the woodworking and furnishing trades conditions were active with plenty of orders ahead.

Printers and pressmen reported trade active.

Journeyman tailors and garment workers were very busy.

Bakers, butchers, cigar makers and tobacco workers were all fully employed.

Leather workers were busy, mostly on repair work.

Barbers reported trade fairly good. Good clerks are in demand. Hotel and laundry workers were busy.

Transportation continues active and all connected therewith were fully employed. Cab drivers, carters, teamsters and unskilled labourers were well employed.

DISTRICT NOTES.

Walkerville.—The Detroit E. M. F. Company will establish a \$400,000 automobile plant at Walkerville within the next few weeks. The Company will supply the trade of Canada and other British Colonies and will be known as the E. M. F. Company of Canada. The Company will give employment to about 200 men on starting.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour of all kinds was fully employed during the month, unskilled labour being scarce at \$2.00 per day. The building trades were particularly busy. The bank of Montreal will open a branch here early in November. The town has now four banks. Altogether the business outlook is good.

Market prices during the month were as follows:—

Butter, dairy, 24 to 25 cents per pound.
Butter, creamery, 28 to 30 cents per pound.
Eggs, 30 cents per dozen.
Potatoes, 75 to 80 cents per bag.
Flour, \$3.10 per bag.

Apples, \$3 per barrel.
Cheese, 16 to 17 cents per pound.
Beef, 5 to 15 cents per pound.
Lamb, 8 to 17 cents per pound.
Mutton, 8 to 15 cents per pound.
Veal, 8 to 15 cents per pound.
Pork, 15 to 18 cents per pound.
Bacon, 20 cents per pound.
Ham, 18 to 20 cents per pound.
Lard, 17 cents per pound.
Turkey, 17 cents per pound.
Chicken, 15 cents per pound.
Fish, 10 cents per pound.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Men for work in the woods were hard to procure and were receiving from \$28 to \$35 per month and board. The Algoma Commercial Company reported 800 men in camp, with 200 more required. This Company contemplates the largest season's operations in its history. The Standard Chemical Company of Montreal and Toronto has purchased the charcoal plant that has been idle for some time and intends to have the plant in operation before the end of the year. About sixty men will be employed. This Company proposes to take out 30,000 cords of wood this year for making charcoal. The Company's output will be charcoal, wood alcohol and acetate of lime.

Manufacturing.—The Algoma Steel Company's plant operated full time during October. Work on the construction of a new blast furnace and structural and merchant bar rolling mill was being pushed. Other industries were working with full staffs.

CONDITION OF PARTICULAR TRADES.

The building trades were busy. Normal conditions prevailed in the other skilled trades.

PORT ARTHUR, FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were very similar to those of September. All were em-

ployed, with the supply about equal to the demand. No new industries have opened, but all local industries were steadily employed.

The new elevator at Port Arthur is now in working order and was expected to discharge its first cargo of grain on October 29th. Transportation has been busy during the month, but storms on Lake Superior from the 11th to 16th held up the shipping and rendered work at the docks somewhat slack, although opportunity was taken of it to clear sheds and make shipments west.

No changes in rates of wages have been reported, and no strikes or lockouts.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculture in this district is not an important industry, although there is good agricultural land in the immediate vicinity of Port Arthur and Fort William. It is worth noting under these circumstances, that what is claimed to be the first car of potatoes ever shipped into Port Arthur from a local farm in the township of Hymers arrived on October 27th. Another evidence that this important industry will be further developed is the discussion now going on regarding the joining of the farming committees with electric railways. If this were done, the available agricultural land in this district could be utilised to advantage and a very important industry built up.

CONDITION OF PARTICULAR TRADES.

Building trade operatives were busy, stone cutters especially so owing to the enlarging of a local stone yard which has installed a plant of stone cutting, sawing and planing machinery and has secured many contracts. All metal and engineering trades in this district have been kept busy. Blacksmiths, horseshoers, sheet metal workers have been busy. The printing and food and tobacco preparation trades have been fairly busy. Hair dressers, clerks, stenographers, delivery employés and railway, restaurant and theatre employés were fully employed. The Ly-

ceum Theatre was opened during the month; it has a seating capacity of about 1,200. All transport workers including steamboat men, railroad men, freight handlers, ship labourers, longshoremen, street railway employés, teamsters and expressmen were fully engaged. Grain trains from the west are keeping the railway men very busy. Unskilled labour was well employed, many city improvements, extensions of street railways, etc., going forward.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As compared with the previous month the demand for labour has been approximately the same. For skilled workers, as for instance tinsmiths, there has been a keen demand, but this may be due to an unsettled dispute between certain of the employers and the Sheet Metal Workers' Union. Contractors are not yet able to get all the men they require for large undertakings outside of Winnipeg.

Business generally has developed larger proportions during the month of October. For that month the bank clearings reached the sum of \$97,862,428 as compared with \$86,080,628 in November 1908, which previous to October of this year was the heaviest, from the standpoint of bank clearings in the history of Winnipeg.

All industries appear to be busier than usual and their immediate prospects are much better than normal.

A marked activity in real estate circles is evident. Much higher prices are being paid for land in the centre of the city than have been current for the past two years. Some sub-divisions some miles from the centre of the city are being largely advertised and many lots are being sold.

The Sterling Bank of Canada has purchased a site on Portage avenue and intends erecting thereupon a building for a branch of its business here.

The new Rolling Mills at St. Boniface are approaching completion. The building itself is now ready to receive the machinery of which is already being placed in position.

The assessment commissioner has made a report to the Board of Control which shows the amount of the taxes for the city which will be come due on the 15th of November, and these amounts are as follows:—

Total general rate.....	\$1,621,518.15
Total special taxes.....	705,284.38
Total business taxes.....	206,251.60
Total taxes.....	\$2,533,054.13

For general municipal purposes the levy, to raise \$1,621,518.15, is as follows:—

	Mills on the dollar.
Municipal.....	10' 250
Library.....	253
Schools.....	3' 824
Municipal commissioner.....	055
Public parks.....	500
Total mills.....	15' 000

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Inspections for the month show that 19,278 acres of wheat, or 20,627,400 bushels passed Winnipeg, a record never before equalled. The grades of wheat and the quantity of each, and particulars of other grains, as passed by the government inspectors during October are as follows:—

<i>Wheat</i> —	Cars.
One hard.....	68
One northern.....	7,969
Two northern.....	6,705
Three northern.....	2,390
Number four.....	429
Feed.....	1
Rejected one.....	475
Rejected two.....	301
No grade.....	28
Rejected.....	469
Condemned.....	97
No. 5.....	31
N.E.G.....	4
Total.....	18,974

<i>Winter wheat</i> —	
No. one Alberta red.....	21
No. two Alberta red.....	82
No. three Alberta red.....	124
No. one mixed winter.....	3
No. two mixed winter.....	2
Rejected one.....	6
Rejected two.....	4
Rejected.....	1

No. four R. W.....	46
No. five R. W.....	15
Total.....	304

<i>Oats</i> —	
Number one C.W.....	176
Number two C. W.....	1,641
Number three C. W.....	246
Rejected.....	38
No grade.....	12
Ex. No. 1 feed.....	62
No. 1 feed.....	36
No. 2 feed.....	63
No. 2 mixed.....	3
Total.....	2,277

<i>Barley</i> —	
No. 3 extra.....	8
No. 3.....	502
No. 4.....	241
Rejected.....	53
No. grade.....	4
Feed.....	2
Total.....	810
No. 1 rye.....	3
No. 1 N. W. Manitoba.....	826
No. 1 Manitoba.....	16
Rejected.....	7
Condemned.....	2
Total.....	851

Compared with the receipts of the corresponding month of last year the increase is very marked as the following table shows:—

<i>Grain</i> —	1909	1908
Wheat.....	19,278	14,394
Oats.....	2,277	1,385
Barley.....	810	725
Flax seed.....	851	307
Rye.....	3	1
Totals.....	23,219	16,812

Prices of agricultural produce on the retail market at Winnipeg are as follows: Carrots, per bushel 50 cents; potatoes, per bushel 50 cents; beets, per bushel, 45 cents; parsnips, per bushel, \$1; turnips, 45 cents; onions, per bushel, \$1.25; garlic, per lb., 30 cents; pumpkins and marrows, per lb., 2 cents; cabbage, per lb., 1 cent; cauliflower, per head from 5 to 10 cents; celery, 40 to 50 cents per dozen heads;

Dairy products are being sold retail as follows:—New laid eggs, 40 cents; case eggs, 30 cents; tub butter, per lb., 23 cents; creamery, 30 cents; dairy, from 20 to 28 cents; lard from 16 to 18 cents per lb.

In regard to harvesting operations, it is reported by travellers in the newly settled

districts that they are not yet entirely completed. In some districts there are many fields still in stook and in other it has been impossible to get threshers. These conditions are to be found on the lines that have just been opened up for traffic during the present summer. The continued fine weather however has been a great boon, enabling many of the farmers who were short handed to get their grain safely stacked. Threshing operations will be continued for some weeks yet as weather conditions will permit. Receipts are expected to be fully as heavy during the month of November as they have been during October.

Building trades.—From all parts of Western Canada, reports of building activity are coming to hand. In Winnipeg the number of permits issued during October was greater than in the corresponding month of last year. In 1908 the permits issued numbered 144 and the cost of the buildings \$460,000; this year in October the permits numbered 215 and the cost of the buildings, \$511,850. In the first ten months of 1908 there were issued 1,421 permits for 1,640 buildings at a cost of \$5,183,100. For the first ten months of this year there were issued 2,327 permits for 2,742, costing \$8,860,600.

BRANDON, MAN.. AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market remained unchanged from last month. There has been no shortage of labour, and apparently no one out of work. Many of the harvest and threshing hands have found work further west instead of flocking to the city. The Gas Company is busy laying mains along the principal thoroughfares; the Company expects to supply gas by Christmas. The Court House is nearing completion, and the brickwork of the Victoria Avenue Methodist Church is completed.

The addition to the Canadian Pacific Railway depot is finished and work is rapidly progressing on the new plant for heating the depot. The Canadian Northern Railway Company has announced its intention of building a new depot and hotel in the spring of next year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Practically all harvesting and threshing operations are concluded now. Fall ploughing has been hindered somewhat by the dryness of the season.

CONDITION OF PARTICULAR TRADES.

Bricklayers were fairly active, but masons had a poor month. Carpenters and joiners were very busy and lathers and plasterers busy. Painters and paper-hangers were very busy with plumbers and steam fitters active and builders' labourers and stone cutters busy.

Iron moulders were busy, and machinists very busy, the Canadian Northern Railway shops working overtime. Electrical workers were busy.

The printing trades were active.

Journeyman tailors were active, but cigar makers were dull.

Barbers, clerks and stenographers were reported busy.

Railroad employés were very busy. Unskilled labour was busy.

REGINA, SASK., AND DISTRICT.

Mr. Hugh Peat, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month was very favourable. Active conditions prevailed in the building trade, and there was some demand for carpenters and labourers. Bricklayers were not much in demand.

Monday, October 4th, was a general holiday in commemoration of the laying of the corner stone of the Provincial Parliament Buildings in Regina by His Excellency, the Governor General. The city was decorated and illuminated, and

a large number of people came from all parts of the Province to witness the event.

Work on the Parliament Buildings will be continued throughout the winter, and the contractors hope to close in the west wing before the cold weather sets in, after which the work on the interior will be carried on. The carpenters' shop and sawmill will be running throughout the winter, and it is expected that the plumbers will be employed making the interior connections, the outside plumbing from the power house having been completed. The work of making the fireproof kalsomine blocks with which the whole of the interior will be sheeted will also be continued, and except on the exterior it is expected that very little of the present activity will be relaxed.

A new skating rink will be constructed for the coming season, and a new theatre built of red pressed brick with white stone facing, to cost \$16,000, will be erected. It is hoped that the latter building will be ready for the Christmas season.

A new daily paper is being published by "The Caxton Press" under the title of "*Town Topics and Daily Advertiser.*" The first edition was issued on Friday, October 22nd. It is a free delivery newspaper with a house to house circulation.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing in this district is practically all finished and gangs of men are going north to complete the work there. From the reports of correspondents to the Department of Agriculture it appears that there were not nearly enough threshing outfits to handle the crop this year, and that there was also a scarcity of help available for handling the threshing outfits. The demand for harvesters was very great, and it would appear that in spite of the large number of men who came west to assist in handling the crop there was at no time a scarcity of employment, but the reverse.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull, with many men unemployed. Carpenters and

joiners were very busy and reported a steady demand for men. Lathers and plasterers, painters and decorators, plumbers, gas and steam fitters and builders' labourers were active. Iron workers and machinists were very active. Printers were very busy, with Linotype operators in demand, bookbinders were active. Barbers, cigar makers, laundry workers and unskilled labourers were all active.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was very good, and in several lines of trade the supply of labour has been short of the demand. Unskilled workmen have been scarce, and contractors have in many cases been hard pressed in consequence. In all departments of the building trade men have been in keen demand. Metal workers, electricians and tinsmiths have also been very active. The present season promises, so far as building is concerned, to exceed all previous records, both as regards the number of buildings erected and their total value. The harvest in Moose Jaw district has been an exceedingly profitable one for the farmers. The damage from hail has been slight and many very fine yields are reported on all sides. Trade in the city has been good, especially during the last week of the month and a good fall trade is confidently anticipated.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Whilst threshing operations are not yet completed, sufficient grain has been garnered to demonstrate the fact that the crop in the Moose Jaw district will average high. The damage done by hail is not so bad as previously reported, and very few of the farmers have suffered anything approaching serious loss. A 40 bushels to the acre of wheat is this year's record for the district, but many instances are reported of

crops from thirty to thirty-five. On the whole the farmers are well satisfied. Labour for harvest work has been scarce and wages have ruled high.

CONDITION OF PARTICULAR TRADES.

All departments of the building trade have been active, with carpenters and labourers in special demand. Electrical workers and tinsmiths were all busy. Machinists and boilermakers were both active. Printers were very busy and the general condition of the trade was favourable. Hotel employés, barbers, tailors, confectioners, laundry workers have all been fairly active, with unskilled labour well employed.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The active demand for labour continued throughout October. Opportunities for employment were as numerous as during the preceding month and in excess of the corresponding period last year.

The building trades are especially busy. Excavations are being carried on in all parts of the city, and there is every indication of a continuance of the activity.

Stone cutters, carpenters, and electricians were in demand.

The city is still carrying on street improvements.

The rate-payers voted in favour of a by-law for \$400,000 to be used in further extending the street car service.

Contractors here are paying bricklayers over the current rate of wages, from 62½ cents per hour up to 70 cents. Street car employés have been raised from 21 cents to 25 cents per hour from October 1. Bank clearings were \$2,265,000 an increase of 65.5. Building returns shew an increase of 34.4 per cent. over 1908. The figures are for October 1909, \$403,050 and for same month last year \$88,400.

Wholesalers and retailers report a considerable increase in trade over last year.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, stone cutters and electrical workers were very busy. All other skilled trades were active, with unskilled labour well employed.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market were very favourable. The activity in building continued and from present indications will continue for some time owing to the demand for houses. The hotels are constantly crowded and the best hotels are unable to keep up with the demands for accommodations. The King Edward hotel management will soon have completed a \$60,000 addition and is preparing plans for a further addition of fifty rooms. Building permits for September reached a total of ninety-one amounting in value to \$515,789 as compared with \$123,425 for the corresponding month last year. Bank clearings for the month of September show an increase of more than one million dollars over the month of September, 1908. Traffic on the Municipal Street Car line for the past three months has been very heavy, and shows a steady increase. In July two extra cars were placed in operation on the system and in September two more were added, and an order placed for six more cars.

The September report of the superintendent of public schools shows an enrollment of 2,164 pupils; this is an increase of 29 per cent. over the enrollment for September, 1908.

The harvesting of a good crop has caused an increased activity in wholesale and retail trade.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The Provincial Department of Agriculture has submitted an official report on the Edmonton district

crops of 1909 which shows the net increase in acreage under cultivation to be 6,179 acres. This total increase is distributed as follows: Fall wheat, 379 acres; barley, 6,220 acres; oats, 10,093 acres; with decreases recorded in spring wheat of 10,401 acres, and in flax, 112 acres. The growth compared with other years is equal, if not better than that of several years previous. The estimated yield per acre is as follows: Wheat (spring), 25 bushels; wheat (fall), 25 bushels; barley, 25 bushels; oats, 40 bushels; flax, 8½ bushels.

The season has been an exceedingly favourable one, there having been very little damage from either frost or hail and none whatever from drought or other causes.

CONDITION OF PARTICULAR TRADES.

All classes of skilled mechanics were well employed. The supply of unskilled labour was equal to the demand.

NELSON, B. C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay district during October was quiet, there being a surplus of labour in all lines, except for a slight shortage in the lumber camps which are fast being supplied from the Prairie Provinces.

The Athabaska Mine near Nelson is developing favourably, a force of 15 men being employed.

Extensive development work is at present progressing on the Highland and other mines at Ainsworth Camp, with a view, to making heavy shipments in the near future; about 75 men are now employed. Brick houses have been constructed and the road improved from the mines to the wharf on the lake.

The Velvet Mine in the Rossland camp, for several years past idle, has recently been leased. This property was an extensive producer in past years and it

is expected to be on the shipping list in the future. A small force of men will be employed at first and gradually increased as development justifies.

The free-gold mines of the Sheep Creek district continue to produce gold-bricks regularly and the town of Salmo is enjoying prosperity therefrom. The Royal Bank has opened a branch in the town.

The Crows' Nest Pass Coal Company Limited, is slowly increasing its number of workmen at Coal Creek Collieries, while Michel has slightly over 1,000 men on the pay-roll. Fernie is prospering and making good progress in the building lines both in business blocks and residences. Brick and concrete being chiefly used for all the business blocks. The contractors are pushing forward with the view of completing their work before the cold winter weather interferes.

Development at the Hosmer Mines is progressing with about 400 men on the pay-roll, slightly over 100 men having been laid off recently owing to the present unsuitability of one of the coal seams they were employed upon.

NEW WESTMINSTER, B. C., AND DISTRICT.

Mr. D. J. Stewart, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in this district were very satisfactory, and as long as the present fine weather continues it is felt that there will be ample employment for all classes of labour. Present conditions can be said to be more satisfactory than those of the corresponding month of last year; throughout the season there has been no unusual activity in any particular line of work, and sufficient men were available at all times although in the case of labourers there was no surplus. The 500 French Canadians brought out from the east by a local sawmill company are reported as being well satisfied with their new homes. In this connection it would be well to note the statement made by one of the largest employers of labour on the coast when testifying before the

Timber and Forestry Commission namely, that white labour was cheaper in the end from the fact that the cost of supervision was much less, and, that living on a better scale than the foreigner, they spent the greater portion of their earnings and thus were a benefit to the country at large. The labour unions opened their new Temple on the 29th of September.

The annual Provincial Exhibition held in this city closed its doors on the 16th inst. It was a decided success both from an educational and financial standpoint. The district of Surrey (tributary to this city) again succeeded in carrying off the first prize in the district exhibits.

The value of the fish catch in British Columbia for the year 1907-08 was \$6,122,923.00 out of a total value of the whole catch of fish during this period in Canadian waters of \$25,500,000.

A syndicate has been organised to reclaim about 6,821 acres of land in what is known as Pitt Meadows, the land being purchased from the Dominion Government under certain stringent conditions as to the commencement of the work, in dyking, draining, etc. It is proposed to subdivide this land into small holdings and thus provide homes for a large number of people, a ready market being at hand for what they can produce.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were fairly active, although the greater part of the crops have been safely harvested. On the whole the yield has been satisfactory. The following are market quotations:—

Beef, hind quarters, 8 to 9 cents per pound.
 Beef, fore quarters, 5 to 6 cents per pound.
 Lamb, 14 to 15 cents per pound.
 Mutton, 11 to 12 cents per pound.
 Veal, large, 8 to 9 cents per pound.
 Veal, medium, 10 to 11 cents per pound.
 Pork, 12 cents per pound.
 Fresh eggs, retail, 50 cents per dozen.
 Butter, retail, 35 cents per pound.
 Fowl, per dozen, \$6.50 to \$7.50.
 Ducks, per dozen, \$10 to \$11.
 Potatoes, \$12 per ton.
 Oats, \$25 per ton.

Fishing.—Fishing on the Fraser River is about over for this season and while the catch of sockeye salmon hardly came up to expectations the very good run of cohoes which followed, made up to some extent

for the deficiency. The total pack for the season has not yet been correctly computed, but it is expected to fall short of the estimate made in the beginning of the year.

Lumbering.—Conditions are very satisfactory and many of the mills find it necessary to work overtime in order to cope with the demand. Several large boats called at this port for cargoes of lumber for foreign points.

Railway construction.—The new line of electric railway between this city and Chilliwack is still being pushed ahead; trains are now running from here to Cloverdale.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters, plumbers and builders' labourers were all active.

Iron moulders, iron workers, machinists, engineers, blacksmiths, boiler-makers and horseshoers, were active.

Car builders (electric) were busy, with shingle weavers quiet.

Miscellaneous trades were active.

Steamboat men and steamboat firemen, street railway men, teamsters, expressmen were active.

Unskilled labour was fairly active.

VANCOUVER, B. C., AND DISTRICT.

Mr. George Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The fact that the Provincial general elections take place on November 25th had a slackening tendency on business.

The local Trades and Labour Council passed a resolution that steps be taken to prevent speculation in timber royalties. It also proposed to organise all chauffeurs in the city into a union and to induce the city council to pass laws requiring automobile drivers to pass an examination as to their qualifications to drive.

Night school classes for technical education were started in the different

public schools on October 11 by the School Board. The fees are \$3.00 for the session October 12 to March 30, 1910. This will benefit the building trades and factory hands.

Activity prevailed in Grand View (East End) real estate:—114 feet on Park Drive was sold for \$25,000.

Shipping and railway traffic were very active. Wet weather brought a cessation of building operations, although during the first week \$160,000 in permits were issued.

A Company was formed to build and operate a sugar refinery, paying \$350,000 for a site.

On the 18th, the Board of license commission passed a by-law to license bartenders.

The Saturday Sunset Press was incorporated with a capital of \$50,000. The Beaver Press was established.

The Trades and Labour Council will build a new hall, site and building to cost \$100,000.

The Cambie street bridge (\$675,000) and waterworks extensions (\$400,000) by-laws were passed by the electorate.

The floating dock to be built at a cost of \$1,250,000 was commenced by Swan & Hunter, London. It will be steel throughout and 510 feet long and seventy wide, thirty feet over the sills with a lift capacity of 11,000 tons in three and one half hours. This dock was subsidised by the Federal Government.

The Bank of Vancouver will open on January 3, 1910. The Bank of Ottawa will erect a new building, the site, costing \$200,000 is on the corner of Seymour and Hastings street, one block east of the new post office.

The *Fruit Magazine*, the only monthly devoted exclusively to the fruit industry in Canada, was issued.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The total pack of all varieties of salmon put up on the Fraser River this year will be about 525,000 cases including 100,000 (estimated) cases for the fall pack. Cannerymen paid 22½ cents for coho salmon.

Mining.—Placer gold on Seymour Creek assayed \$64 to the ton. Three con-

centrators will be installed, one having arrived from San Francisco.

CONDITION OF PARTICULAR TRADES.

The heavy rains which fell during the month interfered to a considerable extent with the building trades.

Iron workers and helpers were fairly active. Machinists and fourth class engineers were busy. Electrical workers and linemen were active. Blacksmiths and horseshoers were very active.

The woodworking and furnishing trades were all busy except coopers and shingle weavers who were quiet.

Printers were busy on newspapers, but inactive in the job offices.

The clothing trades were very dull, a large number of tailors being out of work.

The food and leather trades were reported very quiet, a number of cigar workers were out of work.

Delivery and transportation employés were busy and unskilled labour quiet. Loggers and bushmen were active.

DISTRICT NOTES.

Haysport, Skeena River.—The Fishing Company of British Columbia, capital \$1,800,000 will erect a cannery and cold storage plant, having secured a site.

Prince Rupert.—The Provincial Government will advance money to install a lighting system on the streets and to buy a fire engine. A syndicate purchased 400 lots for \$40,000. A large number of mechanics and clerks are idle.

Port Melton, Howe Sound.—The British Columbia Wood Pulp started operations. The sawmill has started shipping lumber. A large number of houses have been erected for the employés.

Princeton.—Grading on the Vancouver, Victoria & Eastern Railroad has reached here. Business is very active.

South Vancouver.—The rate-payers favoured the by-law to expend \$225,000 on the laying of main and distribution water pipes. A large amount of road work is in hand and building trades are active.

Richmond Municipality.—Both the water (\$275,000) and road (\$75,000) loan

by-laws were carried by the rate-payers.

Fort George.—There are thousands of acres of good agricultural land within an area of 100 miles of Fort George, which is situated at the junction of Nechaco and Fraser rivers, near the geographical centre of British Columbia, and on the main line of the Grand Trunk Pacific Railway.

A weekly paper *The Tribune* has been started by John Houston.

North Vancouver.—An extension of two and one half miles of train line to Lynn Valley has been started; the cars will be running by January.

VICTORIA, B. C., AND DISTRICT.

Mr. W. E. Ditchburn, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during October compared favourably with that of September, a very small percentage of people being out of steady employment. The large amount of municipal improvement work going on has kept large numbers of unskilled labourers employed, and this condition will continue as long as weather permits. With three months of the present year yet to run the aggregate value of the buildings for which permits have been taken out already totals \$128,955, more than the amount for the whole of the year 1908. For the first nine months of the year the figures are \$1,443,275 compared with \$815,250 for the corresponding period of last year, and \$1,314,340 for the entire year of 1908. These figures do not include the vast amount of residential building going on in the adjoining suburbs of Oak Bay and Esquimalt. For the year to date a total of 456 permits have been issued as against 427 up to the same time a year ago.

The bank clearings for September were slightly in excess of those of the previous month, and largely in excess of those for the same month of last year. The total was \$5,864,553 as against \$5,718,680 for the month of August. This brings the figures for the first nine months of the

present year to \$48,521,927 compared with \$39,910,774 for 1908.

The present year has seen the greatest number of visitors to the city in its history. The travel on the steamers inward and outward between Seattle and Victoria and Vancouver and Victoria during the past summer, from May up to the early part of October, totalled over 420,000. The most of this travel was made up of tourists visiting the Exposition at Seattle.

The Municipal Council are about to put into effect a new scale of wages for civic employés.

Union leather workers (four) are now working fifty-one hours per week at a wage of \$18.00. This scale is paid by two establishments. Two others still pay the old scale of \$16.00 for a week of fifty-four hours. Only two men have taken the places of those who went on strike on May 3.

CONDITION OF PARTICULAR TRADES.

Work in the building trades continued very brisk. Bricklayers and masons, carpenters, lathers, plasterers, plumbers, etc., all working full time. Painters were all working regularly, and there has been plenty of work for builders' labourers.

Iron moulders found work in a normal condition, no extra activity being in evidence. Machinists and engineers were all working steadily, though boilermakers and iron shipbuilders have not found business brisk. Shipwrights have been constantly at work in the local yards, principally on repair work. Blacksmiths and horseshoers have been kept busy.

Woodworkers and upholsterers found trade only normal, regular hands being employed. Pattern makers all found constant employment. Carriage and wagon makers were kept fairly busy.

The job printing business has fallen off during the past month, necessitating a reduction in forces in some offices. It is thought that this condition is only temporary and that trade will increase at an early date owing to the fact that the elections for the Provincial Legislature are set for November 25th. As the voters lists for the whole province will have to be printed immediately after

November 1st. This with other work that is necessary during an election campaign should keep all printers employed till the Christmas trade starts. Bookbinders were all working regularly.

Journeymen tailors reported trade in a fair condition and garment workers have had a busy season.

Bakers, butchers and meat cutters were all well employed.

Barbers, clerks, stenographers, hotel, restaurant and theatre employés have been kept very busy.

Unskilled labour has been well employed.

NANAIMO, B. C., AND DISTRICT.*

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market in this district have shown no marked change during the month, there being few idle men. Trade was good for the time of the year, the settlement which the miners have made giving general confidence. There have been no changes in rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have about finished their seasons' work.

* A report of the disaster of October 5, by which thirty-two miners were killed at Extension, B.C., is published under a separate heading in the present issue.

Fishing.—The Herring fishing companies are getting ready for the run and expect to put up more fish than last season as they can dispose of all they can cure.

Mining.—There was little activity in the quartz mines of the district. The coal mines, were working full time and can hardly keep up with the demand especially for home consumption. In past years the largest part of the coal was shipped to ports in California but now the local trade forms the largest item of the trade from the island mines.

Railroad construction.—The extension to Alberni is being pushed and they are laying track on the first section graded. The Canadian Pacific Railway Company is clearing land for settlement and a quantity is now on the market.

Lumbering.—Work in the lumber camp is being pushed while the wet weather keeps off. The sawmills in the district are working full time there being a good demand for lumber.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported work as quiet. Carpenters and joiners were active and will be so for some time if the weather permits. Painters and paper-hangers report work as active. Plumbers are also active. Blacksmiths and carriage makers report work as active for the season. Printers also have been active during the month. Teamsters and expressmen reported work as very good. Unskilled labour has been well employed there being few idle men around which is unusual for this time of the year.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF OCTOBER, 1909.

DURING the month of October the Department received three applications for the establishment of Boards of Conciliation and Investigation, namely,

1. On behalf of certain machinists and fitters members of the International Association of Machinists, employés of the Intercolonial Railway of Canada, the dispute affecting, it was alleged, directly, 365

employés, and, indirectly, forty-three others.

2. On behalf of certain leather workers, members of the Leather Workers' Union No. 162 of Ottawa, employed by certain leather manufacturers in the city of Ottawa. In view of the industry affected not being one of the public utilities class, a Board of Conciliation and Investigation

under the Industrial Disputes Investigation Act could only be established by the consent of the employers as well as of the employés concerned. In the present instance, this joint consent was not given. A more extended reference to the dispute will be found in the review of trade disputes during the month of October, 1909, in the present issue of the *Labour Gazette*.

3. On behalf of the Alberta Coal Mining Company Limited of Edmonton, Alta., arising out of differences between the Company and certain of its employés. This application was not accepted by the Minister of Labour on account of the sworn declaration not conforming with the terms of the Act. The application was accordingly returned to the Alberta Coal Mining Company Limited, for amendment and a letter was subsequently received from the Company in which the latter asked that the matter should be allowed to rest for the present.

Other Proceedings under the Act.

In the case of the dispute between the Intercolonial Railway of Canada and certain of its roundhouse employés of Halifax, N. S., members of the Canadian Brotherhood of Railroad Employés, Division No. 15, it was understood that sittings of the Board were held in Halifax

from the 19th to the 23rd of October, and later resumed in the city of Montreal. The report of the Board in this dispute had not, however, been received at the end of the month.

In the application of the machinists and fitters of the Intercolonial Railway of Canada, members of the International Association of Machinists, received in the Department on October 2, 1909, the nature and cause of the dispute were defined as the dismissal of certain employés contrary to alleged agreement, alleged refusal of investigation of these dismissals, alleged withholding of promised increase of pay, and an alleged violation of agreement in respect of preference to be given to married men and old employés in reduction of staff. Mr. Thomas H. Gilmour of Brockville, Ont., and Mr. John G. O'Donoghue of Toronto, Ont., were appointed members of this Board on the recommendation respectively of the Intercolonial Railway and of the employés concerned, and in the absence of any joint recommendation from the foregoing, the Board was completed on October 19, by the appointment of His Honour John A. Barron, County Judge of Perth, Ont., as Chairman. It was understood that the investigation of this matter would be proceeded with early in November.

DISPUTE AMONG THE FISHING POPULATION OF THE PENINSULA OF GASPE, QUE.—SPECIAL INVESTIGATION AND REPORT BY FAIR WAGES OFFICER OF THE DEPARTMENT.

DURING the month of September, a disturbance arose among the fishing population of the peninsula of Gaspé in the Province of Quebec with reference to the prices paid for fish by the local fish merchants, in the vicinity of Fox Bay. The dispute led to rioting among the fishermen, and the Government steamers *La Christine* and *Le Canada* were despatched for the purpose of restoring order. Inasmuch as the industry affected is of considerable importance, and as information with regard to the conditions involved was difficult to obtain through the ordinary channels, owing to the extent and remoteness of the territory

affected, the Minister of Labour instructed Mr. Victor DuBreuil, one of the Fair Wages Officers of the Department, to proceed to the scene of the disturbance in order to make inquiry on the spot of the causes thereof and to report thereon to the Department. Mr. DuBreuil proceeded at once to Fox Bay in pursuance of this instruction and after an inquiry of some days duration presented a written report to the Minister.

Report of Fair Wages Officer.

The following is the full text of Mr. DuBreuil's report in the matter:—

OTTAWA, OCTOBER 19, 1909.

To the

HONOURABLE W. L. MACKENZIE KING,
Minister of Labour,
Ottawa.

Sir:—I have the honour to submit a report of an investigation conducted by your instructions into certain difficulties which existed between the fishermen and some merchants and fish exporters of the several localities in the Gaspé Peninsula during the month of September, and prior to that period, and which had resulted in a riot which created uneasiness in the localities, and induced the authorities to send the Government steamers *La Christine* and *Le Canada* with instructions to protect the citizens and stop the disturbance.

I received my instructions over the telephone when in Montreal on September 23, and on the following day I left Montreal at 8.30 A.M., arriving at Gaspé on Sunday, the 26th, in the afternoon.

Nature of Industry Involved.

The industries concerned are controlled by companies operating general stores, and exporting dry fish. Their principal markets are South American Countries and the Mediterranean ports.

Owing partly to the recent destruction by earthquake of a portion of South Italy, and partly to the inferior quality of fish caught in late years, and to the bad curing process practiced by the fishermen, the export of fish suffered such a decline that the companies claim to have sold at a loss last year, importers preferring to buy fish from Norway or Labrador, where they claim that fish curing is more perfect.

Localities Concerned.

Some of the localities involved are Anse aux Griffons, Petite Rivière, Petit Cap, Grande Anse, Lichourie, Pointe Jaune, Cap Rosiers, but more particularly Fox River, where the riot took place. The country around some of these localities is not very suitable for agricultural purposes, the spring season being very late in opening, and the autumn com-

mencing early. The conformation of the land is mountainous. In some cases, oats have to be cut before they mature, but in other portions of the peninsula the soil is very fertile. The fishermen at any rate have little inclination to cultivate the land, their time during the summer being entirely devoted to fishing.

Character of Population.

The population of the fishing points on the coast of Gaspé is composed almost exclusively of Canadians of French descent, mostly engaged in the fishing trade; a small proportion of the inhabitants work on the land, others are sailors. They are known to be kind, labourious and thriving citizens, but are inclined to become excitable when provoked; the majority of them possess only a very rudimentary education.

The officials and some subordinates of the companies mentioned in this report are from the Island of Jersey, with the exception of Mr. H. J. Hyman, who is a Canadian, born of Jewish parents. The names of the firms mostly concerned in the dispute are as follows:—

The Wm. Fruing Company, The Chas. Robin Collas Company, and H. J. Hyman & Sons, more particularly the last named.

Profits of Local Merchants.

The representatives of the merchants whom I interviewed during this investigation have demonstrated to my satisfaction that their net profits on the sale of goods to fishermen were about 25 per cent. The companies paid a dividend of six per cent. during the last five years, with the exception of last year, which showed a loss. The representatives above mentioned are Mr. H. J. Hyman of Hyman & Sons, who has been a resident of Fox River for 33 years, and has occupied the highest positions of trust in the locality, such as Mayor, Warden, and Justice of the Peace; Mr. Chas. Brien, Agent for the Fruing Company; Mr. Carrol, representing the same company at Fox River; Messrs. Valpy and Le Marquand of the Chas. Robin Collas Company of Gaspé and Fox River respectively, and others.

The number of fishermen concerned in the difficulties is estimated at about 800; they are selling their fish to the merchants and receive in return provisions and dry goods.

Price of Fish.

The fish is divided by the merchants into three grades; prices per quintal or 112 lb being as follows:—for No. 1 quality \$3.50, for inferior quality \$2.00, for extra large fish of over eighteen inches of cut, \$3.60 to \$3.90. The extra large fish representing about twelve per cent. of the yearly catch. In addition the fishermen sell crude cod liver oil to merchants at from eighteen to twenty-two cents per gallon, and about one half a gallon of oil is extracted from one quintal of fish.

The merchants lose severely owing to the shrinkage of fish after it has been bought from the fishermen, and kept in storage for some time.

Causes of Irritation.

The fishermen were irritated at the treatment received from certain of the agents and clerks of the merchants who, it is alleged, annoyed them and members of their families by their arrogance and discourtesy on many occasions. This assertion was upheld by many prominent citizens of Fox River and elsewhere. Some employés of the companies are accused of using scant consideration in dealing with them.

The Truck System.

I found during this investigation that in many cases the disastrous "Truck System" is in operation. Some of the poorest fishermen hardly receive any money. They exchange their fish for provisions and other goods. In these cases if the fishermen were receiving money for their fish they would buy their supplies where they are cheapest, thus creating some competition between the merchants, and this would have the effect of diminishing the prices of goods to a certain extent. The poorest of the fisher-

men are entirely at the mercy of the merchants, if they make a poor catch. They cannot deal with other business places, as they are already indebted to the local merchant, and being unable to meet their obligations have to pay higher prices.

An Instance of Overcharging.

The following is a statement received from a person who is in a position to speak with authority of an instance showing the manner in which fishermen are sometimes dealt with. The case is that of a fisherman who was indebted to a merchant for the sum of \$841. The merchant was in possession of a mortgage on the fisherman's property with interest at eight per cent. and was on the point of taking the property in payment of his claim. The man in question was unable to read, and consequently could not ascertain the prices charged to him. My informant interfered in the matter, and after many efforts had been made to obtain the production of a detailed account, one was furnished, covering three years, by the agent, and in examining the items on the account it was found that for an axe handle the man had been charged \$1.00, while the current price was \$1.00 per dozen. This man, the father of fourteen children, had never used tobacco, and his boys were too young to do so, yet several dollars were entered for tobacco, which had not been purchased. By the intervention of this reliable person a reduction of \$200 was made by the agent, on account of overcharges. This instance of bad book-keeping or bad management or of regrettable clerical errors on the part of some employés of the company, is well known among the inhabitants, and is considered as one of the many causes of the recent disturbance, the men being under the impression that similar mistakes are often made in entering their purchases.

How the System Works.

The merchants sell their goods on credit to fishermen and wait sometimes a period

of a whole year before a final settlement is made of some of the accounts. The fishing season being limited, and the majority of fishermen having no advance, the supplies bought during the winter are paid with fish only after the following fishing season opens. In examining the books of the merchants I saw some accounts amounting to as much as \$150, but in the majority of cases the entries for each family represents amounts between \$5 and \$50.

The companies make an arrangement among themselves by which the prices to be paid to fishermen for their fish is fixed, it is said, to protect their interests, but it appears that this year is the first year during which there has been no deviation from prices originally determined by the companies. The above was admitted by one of the more important agents, and there is, I think, ground for believing that a combination exists between the companies to keep down the prices paid for fish. That such an understanding exists is firmly believed by the fishermen, and can be named as another cause of the recent tumult. Another cause of friction between the parties is the dilapidated condition of the scales used by some merchants for weighing the fish bought from the fishermen.

Antiquated Weighing System.

In the centre of a vacant lot adjacent to the store of one of the merchants can be seen a hugh scale, consisting of two wooden platforms hung by cords and chains to a balancing pole. On one of these platforms are stones, cast iron weights, &c. The stones, &c., are employed instead of regular weights. Similar stones are lying on the ground and can be easily mixed with other stones on the scale. The other platform of this old-fashioned apparatus is empty, ready to receive the fish. A scale of that description cannot give the exact weight of fish. The fishermen are protesting against the use of this ancient and clumsy method of handling their fish. Concerning these scales I would respectfully recommend

that the attention of the Weights and Measures Inspector for the district be called to this matter. If the system of weighing fish is made modern and efficient one cause of the present discontent will disappear.

An Outbreak of Diphtheria, and its Consequences.

In 1908, an epidemic of diphtheria scourged some of the localities in the peninsula, and was severely felt at Fox river. A number of families were quarantined, and the men were not able to fish, consequently could not pay for their supplies at the stores. In looking over the books of one of the Companies, I found a number of accounts left standing since last year, with the comment "payment not to be forced at present on account of diphtheria and other sickness" and "poor fishing in 1908". These entries are divided as follows:—Accounts unpaid in 1908 owing to diphtheria and other sickness in the family. Number of entries twenty-three. Amount unpaid \$933.09. Accounts unpaid in 1908 owing to poor fishery twenty-four entries. Amount unpaid \$678.72, making a total of accounts unpaid during 1908 of forty-seven, amounting to \$1,611.81.

I was unable to find similar entries in other companies' books, as no special mention is made of delay in payments for the same cause. I was informed by reliable persons that the effects of the enforced idleness through sickness, and of the poor fishery among some of the families during 1908, will be keenly felt during the coming winter, if prompt help is not offered.

Price List.

Following is a price list of the most needed articles of food sold to the fishermen in the vicinity of Fox River. The prices are for standing accounts of from five to six months' duration. Some merchants add two and a half per cent. interest on long standing accounts.

Name of Article.	The Fruing Company.	C. Robin Collas Co.	Hyman & Sons.
Flour, per barrel.....	\$7.25 to \$8.00	\$7.00 to \$7.25	\$7.00 to \$7.25

Corn beef lb. (1 lb. tins)...	.25	.20	.20

Salt for curing fish is sold at 90 cts. per barrel at Fox River and at \$1.00 elsewhere.

The merchants do not appear to charge excessive prices for their goods, but I am certain that the poorest class of fishermen have to pay highest prices as a consequence of their inability to pay their bills on short notice.

Average Earning and Equipment.

The fishing season lasts about five months during the year, but considerable time is lost on account of bad weather, and a portion of that time is also lost in securing the "bait." The average catch of two men during the year varies between \$250 and \$600. Very few of the fishermen in the locality earn anything in the winter season; some young men seek employment at railroad construction in the woods, but do not make much more than their keep during the winter, after their expenses have been paid. The cost of equipment required by two men working together, comprising boat, sails, fishing nets, lignes, &c., is estimated at \$200, and cost of repairs for one year is about \$30. A new equipment lasts about twelve years, if kept in good repair, and barring accidents. It will be seen by the above average earnings of two men that those with a large family are somewhat in a precarious situation when the catch is small.

Origin of the Disburbance.

On September 3rd, a man named Philip Francoeur, who had been a resident of the locality, but had resided in the United States for ten or twelve years, in a conversation with some fishermen at Fox River, remarked that if he was duly authorised by the fishermen to act on their behalf he would sell their fish at \$4 per quintal to merchants of Halifax, who were paying that price in Bay Chaleurs, and as the price paid for food was excessive he would see that a schooner was sent from Halifax to buy and load fish. Francoeur is reported further to have said that the condition of the fishermen was shameful, and as he was a man with a knowledge of the law he was certain that forty men could make a law to suit themselves and that nobody, not even His Majesty, could prevent them from putting such a law into effect. Francoeur was given a written authorisation to act on behalf of a number of fishermen, and to negotiate at once with merchants of Halifax. A subscription was raised by the fishermen to defray his expenses during his errand. Francoeur then entered into negotiations with a fish merchant of Halifax, who sent a schooner to Fox Bay, having on board his agent, a Mr. J. W. Nickerson. The men under-

stood that Nickerson had instructions to pay \$4 per quintal for fish; this is denied by Nickerson, a copy of whose sworn affidavit on the subject is attached hereto. As soon as the schooner was signalled Mr. Hyman went on board to meet Nickerson, and urged him not to pay more than \$3.50 per quintal for fish, this being the rate paid by the local merchants. A certain quantity of fish had already been weighed and kept in readiness to be placed on board. The fishermen, on learning that Nickerson would not pay \$4, ordered Nickerson to leave at once and became troublesome. The fishermen it should be said, had become very excited and were annoyed and surprised at the visit of Mr. Hyman to the schooner before they had themselves a chance to see Nickerson.

Hostile Demonstration.

On September 6th, the men made a demonstration, and after having assaulted Mr. Chas. Brien obliged him, by force, to sign an agreement by which he promised to pay \$4 for the fish, and also that he would pay a remittance of fifty cents per quintal for the fish already weighed in his store and kept in stock since the beginning of the present season. He also promised them that he would not take proceedings against fishermen in arrears in their payments for goods bought from his firm during the space of one year, and that he would remove his agent at Fox River and appoint a substitute more acceptable to the fishermen, the present agent being objected to for alleged wrong statements by him to the fishermen. The alleged methods of this agent were another of the causes of the tumult.

Mr. Brien having refused to bind the other merchants by this agreement, signed under protest, and the men appointed a deputation to meet the other merchants, with instructions to get them to sign the agreement. On the arrival of the delegation at Mr. Hyman's house the committee met Mr. Romeril, Mr. Hyman's agent, and summoned him to sign in the absence of Mr. Hyman, who had previously left the locality, fearing violence.

Mr. Romeril ordered the men to disperse from the public roadway, where they were standing. He then drew a revolver and fired a few shots, in the air, as it is claimed and generally believed. The two representatives of the men withdrew and reported their reception to the fishermen, who decided to send another delegate to reiterate their demand. Mr. Romeril followed this man to the spot at which the fishermen were assembled, and was surrounded by them and rudely treated, and in order, it is claimed, to save his life, Romeril fired three shots at the mob, wounding one of the rioters in the leg. He tried then to make his escape. The men followed him and disarmed him. Mr. Romeril then agreed to follow them to the place where Mr. Brien was then engaged in preparing his agreement.

Mr. Nickerson's Affidavit.

Following is the copy of an affidavit sworn by Mr. J. W. Nickerson:—

GRAND ETANG, SEPTEMBER 5, 1909.

I, the undersigned, do hereby solemnly declare before the undersigned witnesses, that in a meeting, Mr. Philip Francoeur for the first time presented me with a petition written in French of the nature of which I asked to be informed. He replied that it was a petition signed by the inhabitants of Fox River and elsewhere which he said he had by the Government to enable him to sell their fish anywhere, or to anybody. He then proposed to sell me about 3,000 quintals cod-fish, which was in the hands of the inhabitants of Fox River at the rate of three dollars and fifty cents per quintal, culled and in proper condition, provided I would give him twenty-five cents per quintal for his own personal purpose.

On my second meeting with the said Philip Francoeur in Mr. Hyman's house I accused him of misrepresenting me and giving me trouble through having told the people that the price I would pay for the fish was \$4 and over. He replied that he had not done so, but that such reports emanated from the fishermen who were all liars and fools. I then proposed

that the matter be dropped altogether, and he replied that he would be glad to do so, and much more pleased than if he had received one thousand dollars.

When I reached Fox River, I found that he had weighed from some people some 195 quintals which I was willing to take at price agreed upon, but he replied that the parties would not deliver it and said that the whole matter was dropped.

Sworn before me this

Witnesses.

Proceedings in Court.

On the 11th, Mr. Brien caused twenty-four men to be arrested. Of that number two were released for lack of proof against them, and five were sent to prison; one for eleven months at hard labour; one for ten months; one for nine months; and two for eight months. The remaining seventeen were released under bail for \$200 for one year.

Disturbance Generally Regretted.

The fishermen after reflection appear deeply to regret the incidents connected

with the disturbance, and they assured me that a recurrence of the difficulties was not to be feared, but as stated above, the situation of some of the men themselves is precarious, and they will pass the winter with the greatest difficulty. Their attitude on the day of the demonstration was due undoubtedly to their having been misled by Francoeur. A sudden fall in the prices of fish, which sold a few years ago at from \$4.50 to \$5 per quintal, without a proportionate reduction in the prices of food &c., discouraged them, moreover, and being of an excitable nature they lost control of their reason and committed acts of violence.

If the price of fish declines further and the price for food remains at its present figure, the position of the fishermen must shortly become intolerable, and they will apparently be forced to abandon their calling and their homes. This would be the ruin of the most important industry of the Gaspé Peninsula, and would deprive that county of some of its hardiest and most needed citizens.

I have the honour to be,

Yours very respectfully,

VICTOR DU BREUIL,

Fair Wages Officer.

CANADIAN FEDERATION OF LABOUR—DEPUTATION TO MINISTERS TO PRESENT RESOLUTIONS PASSED AT ANNUAL CONVENTION.

A deputation representing the Canadian Federation of Labour waited on the Right Honourable the Prime Minister, the Honourable the Minister of Labour and the Honourable the Minister of Marine and Fisheries, on the 30th ultimo, at the office of the Prime Minister. The members of the deputation were Mr. J. W. Patterson, President of the Federation, Mr. George G. Mercure, Secretary, and Mr. J. G. Tapp. Other prominent officials and members of the organisation resident in Montreal who had been expected to be present and form part of the deputation had been, it was explained, prevented from attending.

The object of the deputation was to

present to the Government the resolutions adopted at the annual convention of the Federation held in Ottawa, during the week beginning September 28th. The resolutions were briefly as follows:—

* Requesting the Government to consider the advisability of inquiry by Royal Commission into the irresponsible character of the various American Labour Unions operating in Canada, with a view to protecting Canadian workers from this form of exploitation.

Requesting the Government to consider the drastic way in which the American Alien Labour Law is operated along the Canadian border, and to negotiate with the United States Government with a

view to preventing the humiliation of Canadian citizens or others crossing the border.

In favour of a voluntary military service, as presented by the Canadian militia system, "no regular army", and of a naval policy consistent with the necessities and resource of Canada, acting in harmony with other portions of the British Empire, but preserving complete Canadian autonomy.

Endorsing the policy of the Government in endeavouring so to regulate immigration as to bring in those who will assimilate with the people of Canada.

To amend the Alien Labour Law so as to prohibit the performance of any labour in the Dominion by foreign employés of foreign firms or corporations when such labour can be performed by Canadian citizens; also to place a tax on each foreign employé of a foreign firm or corporation brought into Canada to perform any labour.

Urging that the Dominion Government take the necessary steps to prevent Canadian military bands from being connected with international musical unions, or to insure among military bands recognition of the Canadian Musicians' Union.

Requesting legislation for the purpose of affording simple, cheap and effective facilities for the legal incorporation, regulation, and control of co-operative societies.

Requesting the enforcement of certain marine laws.

Requesting that the Industrial Disputes Investigation Act may be made applicable to all industrial disputes.

That the shipbuilding industry be subsidised so as to enable Canadian shipbuilders to compete with foreigners.

Requesting the discontinuance of the Allied Printing Trades Label on the *Labour Gazette*.

Requesting that Provincial Factory Laws should be made applicable to the Dominion Cartridge Factory.

Expressing gratification at the establishment of a Labour Department, with a direct Minister at its head, and congratulating the Honourable W. L. Mackenzie

King on his elevation to the position of Minister of Labour.

Mr. Patterson discussed the resolutions at some length, dwelling particularly on the Alien Labour Act, the alleged failure of the cartridge factory at Quebec to comply with the Provincial factory law forbidding the employment of children, and on the Industrial Disputes Investigation Act, the extension of which to all industries was urged. Mr. Patterson spoke also of the pleasure which the members of the deputation experienced in being able for the first time to lay such resolutions before a specially appointed Minister of Labour. Mr. Mercure and Mr. Tapp also spoke briefly to the resolutions, the latter referring especially to the Alien Labour Law.

The Minister of Labour thanked the speakers for the reference made to the establishment of a separate Department of Labour, and then discussed briefly the various resolutions. Referring to the Alien Labour law, the Minister pointed out that under the Alien Labour Act it is illegal to bring persons into the country under contract to perform work which can be performed by Canadian citizens, and that it is open to any person who believes these provisions to be infringed to take action to secure conviction. The Minister thought it doubtful if workmen generally realized the full scope of this measure and the power it placed in their hands. He explained that the penalty imposed had frequently been paid to the person giving the original information on which the conviction was based, as was provided for by the Act, and that this might as a rule be looked for under similar circumstances, in the case of other convictions. Referring to the resolutions relating to International Unions and International label the Minister expressed his view that every man should have the right to belong to any organisation which in his view appeared likely to advance the interests of himself or his calling. On the other hand, no organisation should interfere with the natural rights of any citizen. The subject was a large one, and the Minister invited the members of the deputation to place before the

Department at any time any information in their possession which in their view tended to throw light on the relations between the Intercolonial and National Trade Unions, or on the relations of either with the public.

With regard to the extension of the Industrial Disputes Investigation Act, the Minister expressed his own sympathy with the idea. It would be necessary, however, to proceed carefully in such a matter. The Minister's own view was that a beginning in the way of extension might be made by including the building trades within the operation of the Act, these trades being, as he believed, to a large degree within the meaning of the term "public utilities". It would be, however, he thought desirable that before such a step was taken an application for

such a change should be received from the representatives of the trade concerned.

The Minister referred also to the resolution relating to the naval question, and expressed his gratification that the deputation appeared to be in full sympathy with the Government's policy on the question.

The Honourable Mr. Brodeur, Minister of Marine and Fisheries, replied also, devoting himself especially to those of the resolutions which referred to his Department, promising that the matters should receive careful investigation, and asking that his Department might receive the fullest information relating to any alleged infringement of existing laws or regulations in which his Department was interested.

**THE CANADIAN EXPORT BUREAU—INDEX OF CANADIAN MANUFACTURERS,
EXPORTERS AND PRODUCERS, AND OF ARTICLES MANUFACTURED,
BEING COMPILED BY DEPARTMENT OF TRADE AND
COMMERCE, CANADA.**

ONE of the largest projects ever undertaken by the Department of Trade and Commerce, Canada, for the furtherance of Canadian trade abroad, is the launching of the "Export Bureau" by which a complete list will be compiled by the Department, of Canadian manufacturers, exporters and producers, and of articles manufactured in Canada for export.

With the object of ensuring that the list is complete, the Department is enlisting the co-operation of representative organisations, Boards of Trade, newspapers and other bodies, and is sending out a circular with a view to reaching every manufacturer, merchant and producer in the Dominion. It is the hope of the Department that the information thus obtained can be made the basis of a permanent list which will be immediately available at all times in the promotion of the foreign trade of Canada. The Department desires to have the name of every exporter from the Atlantic to the Pacific, with a detailed list of the goods he is in a position to sell abroad. When this information is compiled, it will be

placed on file, systematically indexed, in the offices of all the Canadian Trade Commissioners abroad; that is to say the information will be at once available in six offices in Great Britain, one in France, one in Holland, two in South Africa, two in Australia, one in China, one in Japan, one in Mexico, one in the West Indies and one in Newfoundland.

The subjoined circular is a copy of a circular which is being mailed simultaneously to every newspaper and other weekly and monthly publication in Canada, with the hope, in the interests of the development of Canada's export trade, that it will be published free of charge, and also that some editorial comment will be made thereon. The circular will be sent also to the members of all Boards of Trade, Chambers of Commerce and Trade Associations throughout the Dominion.

THE DEPARTMENT OF TRADE AND COMMERCE,
EXPORT BUREAU,
OTTAWA, October 1, 1909.

The Department of Trade and Commerce desires to announce its intention of compiling an Index of Canadian manufacturers, exporters, and producers generally, who desire to extend their trade abroad.

For this purpose the attached form should be executed and forwarded in the inclosed envelope to the Department without delay.

It would assist the Department materially if the Details under "Articles Manufactured or Produced" be entered in alphabetical order.

The list compiled by the Department will be given the preference at all times when the names of such Canadian firms are required by intending purchasers abroad.

As the information is received at the Department, it will be forwarded to all the Canadian Trade Commissioners in the various parts of the world, and be systematically indexed and be readily available in their respective offices.

F. C. T. O'HARA,
Deputy Minister.

NOTE.—As these circulars are being mailed to addresses obtained from various lists it is possible the same addresses may be on two or more lists. Only one form need be returned to the department destroying any other copy of this circular you may receive.

.....1909.

The form accompanying the above communication is as follows:—

THE CANADIAN CO-OPERATIVE CONCERN, LIMITED, OF HAMILTON, ONT.,

THE Canadian Co-operative Concern, Limited, of Hamilton, Ont., is one of the largest and most successful co-operative undertaking at present operating in Canada. It was organised four years ago and commenced business in February, 1906. The initial membership was 700, but this had increased by the end of the first year to 1,763, and is now in the neighbourhood of 2,400, of whom 2,000 reside in Hamilton or the immediate vicinity, and 400 in other districts. The amount of business handled during the first year was \$91,000, but this had risen during the second year to over \$132,000, and is now over \$150,000. The paid-up capital, which was \$10,000 in 1906, is now over \$29,000. A brief account of the operations of the Company and of its business methods will be of value to those interested in the application of co-operative methods in Canada.

Constitution.

The constitution of the Society grants to each member one vote only and prohibits voting by proxy. Profits are to be divided on purchases and not on capital invested, the maximum rate of interest allowed on the latter being

(Please write distinctly.)

The Department desires above information only from those in a position to do an export business.

A very large number of replies have already been received in response to the circular now being distributed, although the endeavour to reach every individual producer in the Dominion must necessarily be prolonged for some time yet.

fixed at seven per cent. Any person may join the Society by giving his name, residence and occupation, and paying an entrance fee of \$1.00. Each member is supposed ultimately to take up at least three five dollar shares, and the interest and dividends earned are not to be paid until the shares are fully paid up, but are to accumulate and be applied in payment of the sum due on the shares.

Nature of Operations.

The Society's main store is situated at 51-53 King Street West, Hamilton, and carries a general stock, including dry-goods, clothing, boots and shoes, ladies' ready-to-wear garments, house furnishings, hardware and groceries, the trade being about equally divided between farm and city members. The Society has a branch at Dunnville which is patronised very largely by farmers, the stock consisting of dry-goods, clothing, boots and shoes, groceries and granite-ware. It has also a grocery, meat and granite-ware branch situated in the east end of Hamilton, in order to cater to the trade of the members living in that section of the city.

The Society has paid interest on share capital each year at the rate of seven per

cent. as well as purchase dividends ranging from three to eight per cent. the latter being divided every six months. During the last half year of 1908, following on the period of industrial depression, no purchase dividend was possible. The confidence of the members was retained, however, the fullest publicity being given to the state of the business. The chief difficulty encountered by the Society is stated by the Manager to have been lack of appreciation on the part of the members of the methods and objects of co-operation. As a result the Society has been obliged to incur expenses for advertising, window dressing, etc., in order to attract trade and to offset the bargains offered by the general retail trade, expenses which are ordinarily avoided by co-operators.

Store Methods.

The store is divided into distinct departments, and goods received, expenses, &c., are charged to each department, while sales are duly credited to each. An inventory of each department is taken twice a year in connection with the closing of the books for the division of the profits.

No goods are sold except for cash. Each sale is recorded in duplicate giving full details as to commodities bought, salesperson, department, cash received, and member's number. One part of the sales check is handed to the customer and the other forwarded to the cashier. At the end of each day these checks are taken to the head office where they are audited and the total compared with the cashier's receipts and clerk's slips. The sales are then entered into the member's ledger, each member's number corresponding to his ledger page. The entry is limited to a bare record of the date and amount purchased so as to avoid clerical work. The checks are filed consecutively so as to be easily available for reference.

Advertising is done through a special sheet entitled "The Co-operator," half of the space of which is given to topics of interest to co-operators.

The store is managed by a board of seven directors. Each branch has a further advisory committee of seven which meets twice a month and forwards recommendations to the directors. The employes number from twenty-five to thirty.

Savings Department.

To encourage saving, a deposit account has been opened where members are paid five per cent. interest on accumulated dividends or small sums deposited.

THE PEOPLES, BANK OF QUEBEC, QUE.

THE People's Bank of Quebec (La Caisse Populaire de Québec) was founded on May 2, 1908. At the end of September, 1909, it had a membership of 688, and had made 106 loans to members. The aggregate amount of the loans was \$16,438.50, they were made principally to workmen, in amounts ranging from \$10 to \$200, the latter being the present maximum. The clients of the bank are composed mainly of workingmen who when in need of money cannot obtain loans from the chartered banks and would otherwise have to resort to money lenders who sometime charge usurious rates.

The following statement showing the total receipts of the bank from May 2, 1908, the date of organisation, until September 30, 1909 was received at the Department during October through the courtesy of the Secretary and Manager of the bank:—

Paid-up capital.....	\$10,107.33
Entrance fees.....\$	271.40
Profits.....	505.76
	<hr/>
	\$ 777.16

The two last amounts are divided as follows:—

Reserve fund.....\$	169.17
Provident fund.....	10.70
Interest on savings.....	4.36
General expenses.....	93.10
Entrance fees.....	105.50

	<hr/>
	\$20,807.07

Disbursements were as follows:—

Withdrawal of shares.....	\$ 973.78
" savings.....	1,526.75
Loans.....	16,438.50
Interest savings.....	4.60
General expenses.....	192.45
Collections.....	35.00
Cash on hand.....	1,635.99
	<hr/>
	\$20,807.07

THE INDUSTRIAL CO-OPERATIVE SOCIETY OF VALLEYFIELD, QUE., LIMITED.

THE Department received during October, by courtesy of the Secretary of the Valleyfield Co-operative Association, Limited, the following statement with reference to the origin, proceedings and present operations of that association.

Organisation.—The first meeting of the Society was held on October 28th, 1902, when officers were duly elected and arrangements made for an energetic canvass. Meetings were subsequently held from time to time to report progress, etc.

Incorporation.—The movement had been so far successful that on April 27th, 1903, an association was incorporated under seal of the Lieutenant Governor-in-Council at Quebec as "The Industrial Co-operative Society of Valleyfield Limited."

Opening of store.—Immediately after incorporation, the Board of Management proceeded to acquire premises, hire help, etc., with a view to commencing business. On July 3rd, 1903, the association opened its first store with forty members and a share capital of \$600.00.

Subsequent progress.—Sales for the first year amounted to \$15,957.12, and except during the first quarter a seven per cent, dividend on purchases has been paid to members and a three and one half per cent. dividend to non-members. On two occasions viz; the quarters ending July 31, 1906 and April 30, 1908, dividends of eight per cent. to members and of four per cent. to non-members were paid.

In addition to dividend on purchases, five per cent. per annum was paid on share capital which was subsequently increased to six per cent. The society has steadily progressed except during the period of the labour troubles of 1907 and 1908, and the recent depression of the cotton trade on which the local workers almost entirely depend. Notwithstanding these recent interruptions to progress, sales for year ending July 31, 1909, were \$31,243.43 the dividend paid out, \$2,000.98 and interest on share capital \$176.60. The association has recently joined the Co-operative Union of Canada.

GOVERNMENT MEAT CHILLING AND PACKING PLANTS IN ALBERTA.

ABOUT four years ago, when the market price for live hogs in Alberta was exceptionally low, there was started an agitation among the farmers, particularly among those engaged in swine production, that the Provincial Government give to them similar assistance to that rendered to dairymen and that it establish and operate a pork packing plant along as nearly the same lines as the creameries are being conducted as the nature of the business might permit.

A committee was appointed by the Provincial Government to inquire into the matter and report upon the feasibility of the proposition; this committee submitted its report in December last.* No action has as yet been taken by this Government along the lines suggested by the committee.

About two years ago the Central Alberta Stock Growers' Association, the membership of which is composed almost entirely of small ranchmen, began an agitation along lines somewhat similar to that of the Farmers' Association, with the exception that in the arrangement commended by them, the management was to be left in the hands of a private corporation upon whose directorate there should be

*A reference to the findings of the committee was published in the *Labour Gazette* for February, 1909, page, 811, and for March, 1909, page, 915.

one or more officials of the Dominion Government.

A detailed statement of the objects and proposed methods of this arrangement was submitted to the Honourable the Minister of Agriculture for Canada during the month of March, 1909, by the President of the Stock Growers' Association and Chairman of the Committee appointed by that Association to investigate the matter.

There are therefore, two projects under consideration, the one Provincial, looking toward the establishment of a pork packing plant alone; the other, Dominion looking toward the establishment of plants which shall handle all kinds of meat and export the same in the chilled state.

ONTARIO MILK COMMISSION.

DURING the last session of the Legislature of Ontario, Mr. W. K. McNaught, M.P.P. for North Toronto, submitted a resolution in favour of the appointment of a Commission to investigate the milk supply of the Province. The resolution was adopted by the Government, and on the 14th day of May an Order-in-Council was passed appointing the following gentlemen to the Commission: Dr. A. R. Pyne, Toronto; J. R. Dargavel, M. P.P. for Leeds; W. F. Nickle, M.P.P. for Kingston; F. G. Macdiarmid, M.P.P. for West Elgin. They were authorised to enquire into the conditions and methods whereby milk is now being produced, cared for and supplied to the people of the Province for domestic consumption and manufacturing purposes; to investigate the methods whereby clean, wholesome, sanitary milk is being successfully supplied to consumers in this or any other country,

and to make a report as to their findings in the matter, together with such recommendations as might be considered advisable. Dr. Pyne was named as Chairman of the Commission, and at its first meeting some time later Mr. W. B. Roadhouse was appointed Secretary.

Since that time the Commission has carried on its inquiry along two lines; one to ascertain what methods are considered proper from a sanitary and hygienic standpoint in cities in the United States and in Europe; the other to investigate conditions in Ontario and see how far the methods adopted in other places would cause an improvement of the conditions here.

In pursuance of the first line of inquiry, the Commission has visited Rochester, Syracuse, Cornell University, Albany, New York and Chicago, and has collected facts and figures with reference to the working out of the milk supply in these places. To ascertain the conditions prevailing in Ontario, the Commission decided to visit all the cities of the Province, recognising the fact that the milk question is one which especially affects the larger centres. On each occasion the members have conferred with the Medical Health Officer and other health authorities to ascertain what is being done in the municipality from the health standpoint. They have also visited a large number of dairy farms and city dairy plants. The nature of the enquiry has been such as to preclude the taking of evidence in the way adopted by many Commissions, as it appeared to the Commissioners to be more advisable that they should go themselves and personally inspect conditions.

The Commissioners expect to complete their work before the end of the year and to submit a report at the coming session of the Ontario Legislature.

INDUSTRIAL AGREEMENT GOVERNING GRANITE WORKING AT BEEBE PLAIN, QUE.

THE following is the text of an agreement at present in force governing granite workers of different classes at Beebe Plain, Que.

SECTION 1. It is hereby mutually

agreed between the employers of granite workers and the Canadian Granite Cutters Union that the following conditions shall govern the working of granite in Beebe Plain until May 1, 1910.

SECTION 2. This agreement is to include granite cutters, carvers, letter cutters, sharpeners, polishers, turners and surface-machine workers.

SECTION 3. Eight hours to constitute a day's work, six days in the week, for cutters, carvers, letterers and sharpeners. The hours to be from seven a.m. to four p.m. These hours may be changed to suit the daylight in winter. In no case less than forty-five minutes to be allowed each day for dinner.

SECTION 4. Nine hours to constitute a day's work six days in the week for polishers and surface-machine workers. The hours to be from seven a.m. to five p.m. These hours may be changed to suit the daylight in winter, but in no case shall less than forty-five minutes be allowed each day for dinner.

SECTION 4. The minimum rate of wages shall be thirty-seven and one half cents per hour for the average man on monumental work. The minimum rate of wages shall be thirty-eight and one half cents per hour for the average man on building work. If a man be unable to earn the minimum his rate of pay is to be mutually arranged between his employer and himself, and failing such agreement, the matter to be submitted to a committee to consist of the employer and three members of the union. Overtime and holidays to be paid for at the rate of time and one-half.

SECTION 6. The minimum rate of wages for polishers shall be thirty cents per hour. The minimum rate of wages for surface-machine workers shall be twenty-seven and one half cents per hour. Overtime and holidays to be paid for at the rate of time and one half. Apprentices on surface-machines to work six months apprenticeship.

SECTION 7. The minimum rate of wages for tool sharpeners shall be thirty-seven cents per hour. Twelve to eighteen men to constitute a "gang." Over eighteen men to be paid for at the rate of twenty-five cents per man per day. If a sharpener has less than twelve men he may make an agreement with his employer as to his wages, but in no case is he to receive less than 25 cents per man per day.

One apprentice sharpener to be allowed to each journeyman sharpener. In no case shall the journeyman be discharged and the apprentice kept, and in no case is the gang to be cut down to give men to the apprentice. Apprentice gang to be six men the first year and eight the second year. Two years' apprenticeship to be served.

SECTION 8. The employer to furnish all tools except bush hammers, hand hammers, two-foot squares and winding blocks.

SECTION 9. One apprentice granite cutter to be allowed for every five journeyman. Apprentices to serve three years' apprenticeship.

SECTION 10. Should either party desire a change at the expiration of this agreement, notice is to be given three months previous to May 1, 1910, and changes specified in such notice. If no notice be given by either party as above specified, then this agreement shall continue, from year to year, after May 1, 1910.

SECTION 11. It is mutually agreed that any grievance or contention that may arise during the existence of this agreement, as to its performance in good faith by either party, shall be referred to a committee of six members, three to be selected from the local Employers' Association and three from the local branch of the Canadian Granite Cutters' Union, which committee shall act as a grievance committee, and, failing to agree by a two-thirds vote shall refer to the matter in dispute to an arbitration Board of three, one to be selected from the local employers and one from the local branch of the union. These two shall select a third party to act with them and the Board thus constituted shall hear the parties and make an award within fifteen days by a majority vote, such decision to be final and binding upon both parties. But in no case shall there be any strike, lockout or suspension of work during the life of this agreement.

SECTION 12. It is further agreed that only members in good standing of the Canadian Granite Cutters' Union shall be employed or those who have declared it to be their intention to become such at the first regular meeting of the branch.

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF OCTOBER 1909.

The following is a list of contracts awarded by the Department of Public Works, the Department of Railways and Canals and the Department of Marine and Fisheries which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Driver, 2 horses and wagon	4.00

Department of Marine and Fisheries.

DWELLING HOUSE AT PECK'S POINT, N. B.

Dwelling for engineer of fog alarm and

oil house at Peck's Point, N. B.; name of contractor, E. R. Reid; date of contract, July 29, 1909; amount of contract, \$1,940.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenters.....	\$1.75
Painters.....	2.00
Bricklayers.....	3.00
Masons.....	3.00
Labourers.....	1.35

Post Office Department.

During the month of September, orders were given by the Post Office Department for the supplies below mentioned subject to the regulations for the suppression of the sweating system and the securing of payment to the workingmen and workingwomen of fair wages and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type, and making other hand stamps and brass crown seals.....	513.60
Making and repairing rubber dating stamps and type, also other stamps.....	56.40
Supplying stamping material and wooden boxes, and repairing stamping pads.....	521.92
Supplying mail bags.....	3,933.95
Repairing mail bags.....	1,796.38
Making and repairing Post Office scales....	236.00
Making and repairing mail locks, and supplying mail bag fittings.....	593.65
Supplying Railway Mail Clerks' tin travelling boxes, and repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes, parcel receptacles and street letter boxes.....	138.50
Making and repairing miscellaneous articles of Postal Stores.....	80.35
Making and supplying articles of official uniform.....	4,258.55

INDUSTRIAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1909.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factory inspectors of the Province of Ontario, the Ontario Railway and Municipal Board and to the Department of Railways and Canals, for their kind assistance of furnishing the Department with the statements of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 439 individual workpeople in Canada during the month of October, 1909, were reported to the Department of Labour. Of these 146 were fatal and 293 resulted in serious injuries. In addition three fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before October, 1909.

In the preceding month there were ninety-one fatal and 225 non-fatal accidents reported, a total of 316 and in October, 1908, there were seventy-nine fatal and 162 non-fatal accidents, a total of 241. The number of fatal accidents reported in October, 1909, is therefore fifty-five more than in the preceding month and sixty-seven more than in October, 1908. The number of non-fatal accidents reported in October, 1909, was sixty-eight more than in the preceding month and 131 more than in October, 1908. Altogether there were 123 more industrial accidents reported in October, 1909 than in the preceding month and 198 more than in the same month of the preceding year.

Of 213 returns received during the month giving the ages of the victims of industrial accidents, thirty-four referred to persons under twenty-one years of age, sixty-six to persons between twenty-one and forty-five, and seven to persons over forty-five. One hundred and six persons were over twenty-one years of age but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING OCTOBER, 1909, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed	Injured	Total
Agriculture.....	25	40	65
Fishing and hunting.....	7	2	9

Navigation.....	7	5	12
General transport.....	2	15	17
Civic employes.....	3	19	22
Miscellaneous.....	6	27	33
Unskilled labour.....	6	15	21
Total.....	146	293	439

Nature of Fatalities and Accidents.

The disasters of the month involving more than one fatality were a disas-

trous mine explosion at Extension, B. C., wherein thirty-two mine workers lost their lives; the killing of two engineers and an express messenger in a collision at Nash's Creek, N. B.; the drowning of three fishermen on Lake Erie, Ont.; the death of two train hands in a collision at Banning, Ont., and the drowning of two fishermen off Wolfe Island, Ont.

Disastrous Mine Explosion at Extension, B. C. (*)

On October 5, a terrific explosion occurred in number three level of number two coal mine at Extension, B. C., owned by the Wellington Collieries Company. Of the sixty men on duty on the night shift below, thirty-two lost their lives.

Wreck of Intercolonial Railway Train at Nash's Creek, N. B.

On the morning of October 6, the Maritime express, No. 33, Intercolonial Railway, going west ran into a freight special on the same line of railway going east at Nash's Creek, N. B., and in the wreck that ensued the engineers of both trains and an express messenger were instantly killed and three other train hands and two railway mail clerks injured.

Drowning of three Fishermen in Lake Erie, Ont.

During a storm which occurred on Lake Erie, on October 16, three fishermen of Morpeth, Ont., went out to empty their nets. While going so their boat capsized and they were all drowned.

Railway Collision near Banning, Ont.

On October 2, a head-on collision occurred between an east-bound and a west-bound freight train and resulted in the death by scalding of a fireman and a brakeman and the injuring of another member of the train crews.

*See special article elsewhere in the present issue.

Drowning of two Fishermen off Wolfe Island, Ont.

On October 21, two fishermen were proceeding to Cape Vincent, N. Y., with a boat load of fish. When off Wolfe Island, Ont., where they resided, their boat capsized and they were both drowned.

Record by Industries and Trades.

Agriculture.—In this industry twenty-five fatal and forty non-fatal accidents were reported in October, 1909, compared with eighteen killed and fifty-two injured in September, 1909, and twenty-one killed and eighteen injured in October, 1908. Seven farmers met death by accident through falls, five by being run over, four by runaways, two each by live stock, and by being burned to death and one each by drowning, by flying material, by machinery, by being smothered in grain and by tools. Of the serious accidents, eleven were caused by machinery, ten by runaways, seven by falls, five by falling material, four by live stock, two by being run over and one by a collision.

Fishing and hunting.—Among these workers seven were killed and two injured during October, 1909, compared with no accidents in the previous month and none in October, 1908. Six of the deaths were due to drowning and one to an explosion of gasoline. The two other accidents were also due to an explosion of gasoline.

Lumbering.—In this group three workers were killed and nine injured in October, as against ten killed and nine injured in the preceding month and two killed and five injured in October a year ago. One each of the deaths was caused by flying material, by falling material and by drowning. Three of the serious accidents were caused by machinery, two by falling material and one each by being caught between the cars, by an explosion, by tools and by a fall.

Mining.—During October, 1909, forty-five mine workers met death by accident and twelve were injured, compared with eleven killed and thirteen injured in Sep-

tember last and ten killed and fifteen injured in October, 1908. Thirty-two of the fatalities were due to the disastrous explosion at Extension, B. C., (elsewhere described in detail), four each of fatalities were due to explosions of dynamite and to falling material, three to other explosions and two to being run over. Of non-fatal accidents, six were due to falling material four to cars and two to falling material.

Building trades.—There were five killed and twenty-three injured during October, 1909, compared with four killed and twenty-four injured in the previous month and five killed and twenty-two injured during October, 1908. Falls were responsible for the five deaths and also for nineteen of the injuries, and falling material for the four others.

Metal, engineering and shipbuilding trades.—In this group nine workers were killed and forty-seven injured during October, 1909, as against six killed and thirty-three injured in September and one killed and twenty-four injured in October, 1908. Three of the deaths were due to falls, two each to explosions and to machinery and one each to electricity and to being run over. Of the injuries twenty-three were due to machinery, eight to falling material, seven to explosions, three to flying material, two each to falls, to molten metal and to electricity.

Woodworking trades.—During October one woodworker was killed and sixteen injured, compared with ten injured in the previous month and five injured in October, 1908. Falling material caused the fatality, while machinery caused nine, flying material five and falling material two, respectively, of the non-fatal accidents.

Printing trades.—Four were injured during October, three by machinery and one by hot metal compared with two injured in the month before and two in October, 1908.

Clothing trades.—Machinery and flying material caused one accident each in these trades. In September last two workmen were injured and in October, 1908, one.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1909.

Trade or Industry.	Locality	Date.	No.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Charlesbourg, Que.....	Oct. 2	1	Run over by train.
".....	Princeton, Ont.....	" 2	1	Gored by a bull.
".....	Bala, Ont.....	" 2	1	Run over by train.
".....	Berry River, Alta.....	" 4	1	Burned to death in prairie fire.
".....	Blenheim, Ont.....	" 4	1	Fell from a tree.
".....	Manitou, Man.....	" 5	1	Fell from, and run over by load.
".....	Port Colborne, Ont.....	" 6	1	Drowned.
".....	Kintore, Ont.....	" 8	1	Fell from plough, neck broken.
".....	Brockville, Ont.....	" 9	1	Fell while driving cows.
".....	Florenceville, N. B.....	" 10	1	In a runaway.
".....	Stamford, Ont.....	" 10	1	Run over by train.
".....	South London, Ont.....	" 11	1	Fell from apple tree.
".....	Sherbrooke, Que.....	" 11	1	Run over by train.
".....	Greenock Tp., Ont.....	" 15	1	Struck by wood projected from saw.
".....	East Gwillimbury, Ont.....	" 18	1	Gored by a bull.
".....	Beverley Tp., Ont.....	" 20	1	In a runaway.
".....	Maple Grove, N.B.....	" 27	1	Run over by load.
".....	Shakespeare, Ont.....	" 30	1	Caught by fly-wheel.
Gardener.....	Naramara, Ont.....	" 12	1	In a runaway.
Grain buyer.....	Cardston, Alta.....	" 14	1	Smothered in grain in elevator.
Farmer's wife.....	Stettler, Alta.....	" 1	1	Burned to death in prairie fire.
".....	Rockland, Ont.....	" 17	1	In a runaway.
Farm hand.....	Minto, Ont.....	" 5	1	Impaled on handle of rake.
".....	Blandford Tp., Ont.....	" 9	1	Fell 40 ft. in silo.
".....	Port Arthur, Ont.....	" 1	1	Fell from load.
<i>Fishing and hunting—</i>				
Fisherman.....	Everett, B.C.....	" 8	1	By explosion of gasoline.
".....	Steveston, B.C.....	" 6	1	Drowned, fell from boat.
".....	Lake Erie, off Morpeth.....	" 16	3	Drowned, lost in storm.
".....	Off Wolfe Island, Ont.....	" 21	2	Drowned, boat upset in storm.
<i>Lumbering—</i>				
Sawmill owner.....	Greenock Ont.....	" 22	1	Struck by wood from saw.
Pulp mill worker.....	Clarke City, Que.....	" 8	1	Lumber fell on him.
Millman.....	Marysville, N.B.....	" 26	1	Drowned, slipped from foot of bridge.
<i>Mining—</i>				
Quarryman.....	Dundas, Ont.....	" 4	1	Struck by stone from blast.
".....	Hawkesbury, Ont.....	" 11	1	Premature blast.
".....	Viauville, Que.....	" 16	1	Explosion of dynamite.
".....	Dundas, Ont.....	" 2	1	Run over by car.
Miners.....	Extension, B.C.....	" 5	32	Explosion in mine.
".....	Emery Seam, N.S.....	" 9	1	By fall of coal.
".....	North Sydney, N.S.....	" 17	1	By fall of stone.
".....	Elk Lake, Ont.....	" 16	1	Premature explosion.
".....	Battle River, Alta.....	" 22	1	Fall of coal.
".....	Glace Bay, N.S.....	" 31	1	Fall of rock.
".....	Phoenix, B.C.....	" 1	1	Run over by car.
".....	Sandon, B.C.....	" 1	1	Explosion of dynamite.
Blast furnace worker.....	Sault Ste. Marie, Ont.....	" 6	1	Explosion of dynamite.
Coke oven worker.....	Fernie, B.C.....	" 14	1	Run over by coke cars.
<i>Building trades—</i>				
Carpenter.....	Lethbridge, Alta.....	" 5	1	Run over by load of lumber.
".....	Rock Island, Que.....	" 8	1	Scaffold gave way, fell 15 feet.
".....	Toronto, Ont.....	" 12	1	Fell 30 ft., ladder slipped.
".....	Winnipeg, Man.....	" 31	1	Fell 20 feet from scaffold.
Roofer.....	Montreal, Que.....	" 20	1	Fell 60 feet from scaffold.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1909.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Civic employés—</i>				
Engineer of power plant	Aylmer, Ont.	Oct. 12	1	Explosion of boiler.
Fireman.....	Quebec, Que.	" 16	1	Ladder slipped at fire, fell 30 feet.
"	Montreal, Que.	" 19	1	In collision with street car.
<i>Miscellaneous—</i>				
Hotel employé.....	Montreal, Que.	" 13	1	Explosion of hot water furnace.
Paper bag worker ..	Three Rivers, Que.	" 11	1	Drowned.
Gas Co.'s employé....	Windsor, Ont.	" 2	1	Run over by train.
Circus proprietor....	Toronto, Ont.	" 19	1	Kicked by a horse.
Well driller.....	St. Clements, Ont.	" 22	1	Explosion of boiler.
Foreman of dye works	Toronto, Ont.	" 30	1	Explosion of gasoline.
<i>Unskilled labour—</i>				
Labourer.....	Quebec, Que.	" 5	1	Run over by train.
"	Windsor, Ont.	" 1	1	Run over by train.
"	London, Ont.	" 12	1	Run over by train.
"	Dundas, Ont.	" 3	1	Run over by train.
"	Bordeaux, Que.	" 8	1	Caught in stone crusher.
"	Montreal, Que.	" 16	1	Explosion of dynamite.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN OCTOBER, 1909.

Pulp mill worker.....	Clarke City, Que.	Sept. 29	1	Run over by car loaded with pulp.
Miners.....	Jumping Lake, Ont.	" 29	2	Explosion of dynamite.

Textile trades.—Five workers were injured in this group, compared with two injured in the previous month and two injured in October a year ago.

Food and tobacco preparation.—The record for October, 1909, was seven injured. In the previous month the record was four killed and eight injured and in October of last year seven injured. Four of the accidents were due to machinery and one each to an explosion, to an elevator and to being run over.

Leather trades.—During October one leather worker was killed and one injured. In the month before, three workers were injured; there were no accidents in October, 1908. Blood poisoning was the cause of the fatality and a fall that of the accident.

Railway service.—There were twenty-six fatal and forty-four non-fatal acci-

dents in October, 1909, compared with sixteen killed and eleven injured the month before and twenty-seven killed and eighteen injured in October, 1908. Nine of the fatalities were caused by the victims being run over, seven by collisions, four by falls, two by being caught between cars and one each by being struck by an object in passing, by blood poisoning, by a derailment and by falling material. Fifteen of the minor accidents were caused by derailments, nine by collisions, seven by being run over, four each by explosions, by falls and by being caught between cars and one by falling material.

Navigation.—Seven workers were killed and five injured during October, 1909, compared with eleven killed and two injured in the preceding month and five killed and four injured in October a year ago. Four of the deaths were due

to drowning, two to falling material and one to being crushed between a boat and a wharf. Two of the minor accidents were due to falls and one each to falling material, to a tool and to live stock.

General transport.—The October record for this group was two killed and fifteen injured. In September five workers were killed and seventeen injured and in October, 1908, thirteen injured. One of the fatalities was caused by the worker being burned to death and the other to his being run over. Eight of the minor accidents were caused by collisions, two each by being crushed and by falls and one each by a runaway, by being run over and by live stock.

Civic employés.—Three of these employés were killed and nineteen injured during October, 1909, compared with three injured in the preceding month and three also injured in October of last year. An explosion caused one of the fatalities, a collision another and a fall the third. Of the other accidents falls caused seven, being nearly asphyxiated by smoke fire, being run over and collisions, three respectively and flying material one.

Miscellaneous.—Among these workers, death by accident occurred to six and twenty-seven were injured. In September the record was two killed and twenty-three injured and in October, 1908, four killed and eleven injured. Three of the fatalities were due to explosions; to drowning, to being run over and to live stock were due one death each. Twelve of the injuries were due to explosions, six to falls, four to machinery, two to falling material and one each to injuries received while arresting a prisoner, to an elevator and to a collision.

Unskilled labour.—Six labourers were killed and fifteen injured during October, 1909, compared with four killed and twelve injured in the previous month and four killed and fourteen injured in October, 1908. Four of the fatalities were caused by the victims being run over and one each by machinery and by an explosion of dynamite. Three of the other accidents were caused by falling material, two each by falls, by tools, by explosions and by elevators and one each by a collision, by being run over, by machinery and by live stock.

RATES OF WAGES OF FARM LABOUR, RAILWAY CONSTRUCTION LABOUR AND UNSKILLED LABOUR, CANADA, 1909.

DURING the month of October, the Department of Labour obtained from the correspondents of the *Labour Gazette*, resident in the several cities of the Dominion, a return relating to the rates of wages prevailing in their respective districts, during the present season of activity, for farm labourers, railway construction hands and unskilled labourers. In the case of railway construction employés information was also sought from the leading contractors at present engaged in the construction of railways throughout Canada. The material

collected in this way is presented in the accompanying tabular statements.

The tables throw light not only upon the general level of wages for these classes throughout Canada, but upon various other conditions locally affecting the market for labour. From the column headed "Remarks" it will be seen that the tendency of wages has been upward in many localities since the opening of spring, a condition due to the increasing activity of general labour accompanying the steady revival of trade and industry.

RATES OF WAGES OF EXPERIENCED FARM LABOUR, CANADA, 1909.

District.	Rate.		Remarks.
	On yearly engagements.	On summer or short-time engagements	
<i>Nova Scotia—</i>			
Westville	\$15-25 per month with board.	\$1.50 per day with board	
Halifax	"	\$40-45 per month with board.	
Amherst	"	\$30	
<i>Prince Edward Island—</i>			
Charlottetown	\$250-300 per year with board.	\$16-20 per month with board.	Winter rates are \$12-14 per month with board.
<i>New Brunswick—</i>			
Moncton	\$20 per month with board.	\$1.00-1.25 per day with board, per day of 12 hours.	
St. John	\$6 per month with board.	\$20-30 per month with board.	
Newcastle	\$300 per year with board.	\$1.50 per day.	No change since spring.
<i>Quebec—</i>			
Quebec		Same rate as common labour.	There are few or no farm hands engaged by the year in Quebec district.
Three Rivers	\$6.00-7.50 per week with board	\$7.50-9.00 per week with board	
Sherbrooke	\$15-25 per month with board.	\$30-35 per month with board	
St. Hyacinthe	\$26	\$2.00 per day.	
St. Johns	\$18-20	\$30-35 per month with board.	
Maisonneuve	\$2.00 per day and board.	\$1.50-1.75 per day and board	
Hull	\$18-28 per month with board.	\$9-10 per week without board	Rates are 20 per cent. higher than in previous years.
<i>Ontario—</i>			
Ottawa	\$18-20 per month with board.	\$1-1.25 per day with board.	Wages are \$2.00 per month lower on long-time engagements, than in spring
Belleville	\$15-20	\$25-28 per month with board.	No change since spring.
Kingston	\$175-200 per year with board.	\$20-25	"
Peterborough	\$175-200	\$18-20	"
Toronto	\$20 per month with board.	\$25	"
Niagara Falls	\$18-25	\$25-35	
St. Catharines	\$15-20	\$25-30	Fruit pickers on piece work earn about \$2.00 per day, and board themselves.
		or \$1.25-1.50 per day, with board	

Hamilton.....	\$175-200 per year with board.	\$20-25 per month with board.	No change since spring.

Peterborough.....	Outside workers, \$1.75-2.00 per day of 10 hours..... Inside workers, \$1.35-1.50 per day of 10 hours.....	No change since spring.
Toronto.....	\$1.75-2.00 per day of 9-10 hours.....	"
Niagara Falls.....	\$.14-\$.17½ per hour.....	The former rate is paid by Italian contractors to labourers newly arrived from Italy; latter rate is being paid on enlargement of Ontario Power Company's plant

St. Catharines.....	\$1.50-1.75 per day of 9 hours.....	No change since spring.
Hamilton.....	\$.15-\$.20 per hour, 10 hours per day.....	Tendency has been upward since spring.
Brantford.....	\$1.35-1.50 per day of 10 hours.....	No change since spring; civic labourers work 9 hours per day.
Guelph.....	\$1.50-1.75 per day of 10 hours.....	The \$1.40 per day rate is for aged men unable to produce an average man's day work. There were no changes in the rate of wages.
Berlin.....	\$1.40-1.90 per day.....	A slight increase compared with last year.
Woodstock.....	\$.15 per hour, 10 hours per day.....	No change since spring.
Stratford.....	\$1.25-1.75 per day of 10 hours.....	
London.....	On repair work: \$.17 per hour, 9 hours per day.....	
	On road work: \$.19 per hour, 10 hours per day.....	
	On sewer work: \$.20 per hour, 9 hours per day.....	
St. Thomas.....	\$1.50-1.75 per day of 10 hours.....	Tendency has been upward since spring.
Chatham.....	\$1.25-1.50.....	Demand good.
Windsor.....	\$.17-\$.22 per hour.....	No change since spring.
Sault Ste. Marie.....	\$2.00-2.25 per day.....	Wages have been upward to a marked degree.
Port Arthur and Fort William.....	\$2.00-2.25 per day.....	
<i>Manitoba</i> —		
Brandon.....	\$2.25-2.50 per day of 10 hours.....	Wages in spring were \$1.75 per day of 10 hours.
<i>Saskatchewan</i> —		
Regina.....	\$2.25 per day of 10 hours.....	Wages in spring were \$1.50-1.75 per day of 10 hours.
Moose Jaw.....	\$2.00-2.50 per day of 10 hours.....	Wages in spring were \$1.50 per day of 10 hours.
<i>Alberta</i> —		
Edmonton.....	\$2.00 per day of 10 hours.....	No change since spring.
Calgary.....	\$2.50 per day of 10 hours.....	Wages in spring were \$2.00-2.50 per day of 10 hours.
<i>British Columbia</i> —		
Nelson.....	\$2.00 per day of 10 hours.....	No change since spring.
New Westminster.....	\$2.50 per day.....	Wages in spring were \$2.25 per day.
Vancouver.....	\$2.25-2.50 per day of 9 hours.....	
Nanaimo.....	\$2.50 per day of 9 hours.....	

MINING DISASTER AT EXTENSION, B. C.—THIRTY-TWO MINERS KILLED BY AN EXPLOSION.

A terrible explosion occurred at the Extension Mines of the Wellington Collieries Company situated about ten miles from Ladysmith, B. C., at nine o'clock on the morning of October 5. The explosion took place on the third level of No. 2 mine and as a result thirty-two coal miners, of the sixty who were in the level at the time, were taken out dead from the workings.

The shock of the explosion was terrific, stoppings being blown out and doors unhinged, but the effects were confined to the slope where it occurred, the men in the other slopes escaping, though in some cases with severe injuries after a period of extreme danger. The cause of the explosion had not been officially announced up to the close of the month.

The work of rescuing those imprisoned in the mine and of recovering the bodies of the killed was at once begun by forces recruited from Extension and Ladysmith, but progress for some time was slow owing to the presence of after-damp. On October 7, after heroic efforts on the part of rescuers the last of the thirty-two victims was taken out of the mine.

A jury was later empanelled to inquire into the circumstances attending the death of the victims and into the causes of the explosion. There was a large attendance of the public at the sittings and the verdict had not been rendered at the close of the month. A distinguished English mining engineer was appointed by the Provincial Government to act with the Provincial Mineralogist in a thorough investigation of the mine. The investigation was begun at once after the recovery of the bodies.

Immediately on the appearance of the

report of the explosion a telegram was despatched by the Honourable the Minister of Labour to the member of the House of Commons for Nanaimo expressing his sympathy in connection with the disaster and asking for the names of those taking part in the rescue work in order that their names might be submitted for the King Edward medal.

The list of the dead is as follows:—

Thomas Thomas, miner; Thos. O'Connell, miner; Jas. Molineux, miner; Edward Dunn, car pusher; Wm. Davidson, driver; Andrew Moffatt, brattice-man; Alex. Milos, car pusher; Alexander McLellan, miner; John Ismister, track layer; Fred Ingram, bratticeman; Robert White, miner; Wynn Steel, miner; Wm. Kesserick, miner; Robert Marshall, timber man; Wm. Robinson, timber man; John Hewitt, car pusher; Peter Meiland, car pusher; Chas. Scheff, car pusher; Wm. Quinn, driver; Harold Taylor, dirt shoveller; Geo. Bardovini, loader; Alex. Kesserick, miner; Herman Petterson, miner; John Wargo, miner; Oscar Nyman, miner; Chas. Salo, miner; Mike Duncalovitch, miner; Thomas Parkins, car pusher; Ted Ranilovitch, miner; Mickal Vustav, loader; two Finlanders, names unknown.

The explosion appears to have been local in character, only one section of the mine being affected and there being little change in the working condition in that section.

At a public meeting called by the Mayor of Extension, a committee was appointed to receive subscriptions for the relief of any suffering among the families of the deceased. Similar action was taken at several other points.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

British Emigration Returns.

DURING the month ended August 31, 1909, the number of passengers leaving the United Kingdom for British North

America, according to official returns of the Board of Trade, was as follows:

EMIGRATION FROM GREAT BRITAIN DURING AUGUST 1909-1908.

Nationality.	1909	1908
English.....	6,048	5,012
Welsh.....	162	114
Scotch.....	2,368	2,084
Irish.....	455	450
British Colonial.....	790	650
Total of British origin.....	9,823	8,130
Foreign.....	2,225	1,218
Total.....	12,048	9,528

During the eight months ending August 31, 1909, the number of passengers leaving the United Kingdom as above mentioned was as follows:

EMIGRATION FROM GREAT BRITAIN, JANUARY-AUGUST, 1901-1908.

	1909	1908
English.....	43,935	45,196
Welsh.....	867	1,128
Scotch.....	13,813	13,204
Irish.....	3,039	3,324
British Colonial.....	2,092	1,999
Total of British origin.....	63,746	64,451
Foreign.....	18,539	10,099
Total.....	82,285	74,950

Homestead Entries during September, 1909.

The following statement shows the number of homestead entries made during the month of September, 1909, as compared with September, 1908.

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF SEPTEMBER, 1909, AS COMPARED WITH SEPTEMBER, 1908.

Agency.	1909	1908	Increase.	Decrease.
Battleford.....	133	424	291
Brandon.....	6	15	9

Calgary.....	506	462	44	
Dauphin.....	65	606	541
Edmonton.....	308	930	622
Estevan.....	61	387	326
Humboldt.....	110	601	491
Kamloops.....	13	35	22
Lethbridge.....	438	670	232
Moose Jaw.....	557	984	427
New Westminster.....	0	3	3
Peace river.....	5	5	
Prince Albert.....	86	767	681
Regina.....	37	400	363
Red Deer.....	129	288	159
Saskatoon.....	270	270	
Winnipeg.....	116	763	647
Yorkton.....	62	599	537
Total.....	2,902	7,934	319	5,351

It will be seen that there has been a net decrease for September, 1909, of 5,932 in the number of entries made.*

A statement of the entries made during the first nine months of the calendar year, 1909, compared with the corresponding months of 1908, is as follows:

Month.	1909	1908	Increase.	Decrease.
January.....	1,308	1,453	145
February.....	1,364	1,420	56
March.....	2,592	1,869	723	
April.....	4,602	2,987	1,615	
May.....	3,243	2,773	470	
June.....	4,205	3,247	958	
July.....	4,248	2,815	1,433	
August.....	2,832	1,859	973	
September.....	2,902	7,934	5,032
Total.....	27,296	26,357	6,172	5,233

It will be observed that there has been a net increase of 939 in the number of homestead entries made during the first nine months of 1909, as compared with the same months of 1908.

Recent Immigrant Arrivals.

The following is a statement of immigrant arrivals in Canada, classified according as they arrived through ocean ports or from the United States, from the beginning of the fiscal year up to August inclusive:—

*The greater number of entries granted in September, 1908, was on account of the odd-numbered sections having been thrown open to entry on the first of that month.

TOTAL IMMIGRATION TO CANADA FROM APRIL TO AUGUST, 1909, INCLUSIVE,

Of a total of 981 entries made by persons coming from the United States, there were 230 from North Dakota, 154 from Minnesota, 75 from Michigan, 72 from Washington, 63 from Wisconsin, 60 from Iowa, 51 from Illinois, 32 from South Dakota, 28 from Missouri and 21 from Ohio.

Lands Patented During September, 1909.

An abstract of letters patent covering Dominion lands situate in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon territory issued from the Department of the Interior during the month of September, 1909, as compared with September, 1908, was as follows:—

Nature of Grant.	September, 1909.	
	No. of Patents.	No. of Acres.
Alberta Railway and Irrigation Company's sales.....	2	481,00
British Columbia homesteads ..	6	856,90
British Columbia sales.....	13	497,32
Coal lands' sales.....	4	689,44
Commutation grants.....	1	22,62
Homesteads.....	1,647	261,355,718
Hudson's Bay Company.....	1	787,70
License of occupation.....	2	
Manitoba Act grants.....	3	84,09
Mining lands' sales.....	1	160,15
Mineral rights (2,069.86 acres)	11	
North-west halfbreed grants ..	51	10,459,74
Parish sales.....	2	174,74
Quit Claim, special grants (481 acres).....	3	

Railways:		
Calgary and Edmonton Ry.		
Canadian Northern Railway		
Canadian Pacific Ry. grants	11	571,24
Canadian Pacific Ry. grants, Souris Branch		
Grand Trunk Pacific Railway Man. South Western Col. Ry.		
Qu'Appelle, Long Lake and Sask. Rd. & Steamboat Co.		
Sales	32	3,597,85
School lands' sales	22	2,449,51
Special grants	24	244,14
Yukon Territory sales	10	691,74
Totals	1,846	283,123.898

In September, 1908, the number of patents issued was 865, covering an area of 423,285.20 showing an increase for the month of August, 1909, of 981 in the number of patents issued, but a decrease of 140,161.31 acres in the area patented.

Land Sales.

The following is a statement of the farm land sales made by the Canada Northwest Land Company, Limited during the month of September, 1909, compared with the corresponding month of 1908.

LAND SALES OF THE CANADA NORTH-WEST LAND COMPANY.

	Acres.	Price obtained.
September, 1909	804,26	\$ 11,273.90
" 1908	640,42	7,524.23
Increase, 1909	163,84	\$ 3,749.6
From Jan. 1 to Sept. 1, 1909	10,215,24	\$115,818.05
" " 1908	6,677,00	75,588.72
Increase, 1909	3,538,24	\$ 40,229.33

TRADE DISPUTES DURING THE MONTH OF OCTOBER, 1909.

THE mining industry of Nova Scotia continued to be affected by strikes during October at Glace Bay and Springhill, but at the former place the output of coal steadily increased. Settlements were reached in the course of the month in strikes affecting the building trades at Winnipeg, Man., and normal conditions were resumed. Only a few new disputes were reported to have taken place in

The sales of farm lands by the Hudson's Bay Company for the quarter ending September 30, 1909, amounted approximately to 20,900 acres for £51,900, as compared with 5,400 acres for £12,600; and sales of town lots to £500, as compared with £1,300 for the corresponding period of 1908. The receipts were £53,100, as against £48,600 in 1908. The sales for the six months to September 30, 1909, were 32,000 acres for £80,100, and town lots were sold for £2,400 as compared with sales of farm lands 10,000 acres for £23,500 and town lots for £2,900 for the corresponding period of 1908. The total receipts for the six months ending September 30, 1909, amounted to £114,100, as compared with £100,000, for the corresponding six months of last year.

Note.

According to the reports of district and surveying engineers along the line of the National Transcontinental Railway from Moncton to Winnipeg, as summarized in the annual report of the Commissioners, the new road is opening up for settlement many million acres of good agricultural land, especially in the hitherto practically unknown district in north-western Quebec and north-eastern Ontario. Settlers are already taking up land contiguous to the new road, especially in the districts around La Tuque and on the recently completed section running east from Winnipeg. In district D. alone, extending west from the Ontario boundary there are, contiguous to the railway, ten million acres of good arable land.

October, and none of them were of a serious nature.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during October was 11, an increase of 1 compared

with the previous month, and an increase of 7 compared with October, 1908. About sixty-eight firms and 4,661 employés were affected by these disputes, forty-one firms and 263 employés being involved in new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during October was approximately 100,190 working days, compared with a loss of 96,000 days in September, and 37,880 days in October, 1908.

Trades affected by new disputes.—The following table shows the trades affected by new disputes during the month, and the number of workpeople affected in each group of trades.

Trades.	No. of Disputes.	No. of Workers.
Woodworking trades.....	1	16
Clothing trades.....	2	175
Leather trades.....	1	92
Total.....	4	263

Localities affected by new disputes.—One dispute occurred in each of the provinces of Quebec, Ontario, Manitoba and British Columbia.

Causes of disputes.—The following were the causes of the new disputes of the month.

Cause.	No. of Disputes.
For increase in wages.....	2
For recognition of union.....	1
Against employment of non-unionist.....	1
Total.....	4

Methods of settlement.—Of the eleven disputes in existence during October, 5 were terminated in the course of the month. Of these three were settled by negotiations between the parties concerned, one by the places of the strikers being filled, and in one case, industrial conditions ceased to be affected.

Results of disputes.—Of the disputes which were terminated, one ended in favour of the employer, one in favour of the employés, compromises were

reached in two cases, and in one the result was indefinite.

Disputes which commenced prior to the beginning of the month.

The trades disputes in existence in Canada during October which commenced in previous months comprised strikes of coal miners at Glace, Bay, N. S., and Springhill, N. S., carpenters, electrical workers and sheet metal workers at Winnipeg, Man., painters at Kingston, Ont., and Jewish bakers at Montreal, Que.

Strike of Coal Miners at Glace Bay N. S.

The strike of coal miners of the Dominion Coal Company, which took place at Glace Bay, N. S., on July 6, on account of the refusal of the Company to recognize the United Mine Workers of America, continued throughout October, about 1,875 strikers remaining out of work. It was reported, however, that the output of the mines had risen to over 9,000 tons per day, a large number of men being at work. On November 4, the agreement in force between the Dominion Coal Company and the Provincial Workmen's Association was renewed for a period of two years from December 31, 1909, the date of termination of the existing agreement.

Strike of Coal Miners at Springhill, N. S.

A strike of coal miners of the Cumberland Railway and Coal Company which began at Springhill, N. S., on August 10, remained unsettled, and the mines were closed down during the whole of October. The cause of the dispute, which originally involved about 1,700 men was dissatisfaction of the miners with wages and the conditions of employment.

Strike of Carpenters at Winnipeg, Man.

A general strike of carpenters, which took place at Winnipeg, Man., on August 25, was formally declared off on October 14, all of the strikers having returned to work upon the terms demanded. The

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE SERIES C, No. 109.

TABLE OF TRADE DISPUTES DURING THE MONTH OF OCTOBER.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.				Date of termination.	Result.
			Directly.	Indirectly.	Directly.	Indirectly.		Date of commencement.		
						Fe-males.	Males.			
<i>Mining—</i> Coal miners.....	Glace Bay, N.S.....	For recognition of United Mine Workers of America.....	1		1,875				July 6	No settlement reported, but output of mines was claimed to be almost normal at end of month.
Coal miners.....	Springhill, N.S. . . .	For increase of wages, and against conditions of employment.....	1		1,700				Aug. 10	No settlement reported at end of month.
<i>Building trades—</i> Carpenters.....	Winnipeg, Man.....	For increase in wages, and a new code of working rules . . .	12		600				" 25 Oct.	Strike declared off, all strikers having resumed work at terms demanded.
Electrical workers..	Winnipeg, Man.....	Failure to make a new agreement on expiry of old one . . .	8		100				" 5 "	14 Agreement signed, minimum wages to be 40 cents an hour till end of year. Rates for 1910 to be settled by a conference to be held in January.
Painters.....	Kingston, Ont.....	Against employment of a non-unionist.....	1		8				Sept. 27	No settlement reported at end of month.
<i>Metal trades—</i> Sheet metal worker	Winnipeg, Man.....	For increase in wages from 39 to 42½ cents per hour.....			100				July 28	18 Work resumed at minimum wage of 41 cents an hour.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.

<i>Food and tobacco preparation—</i> Jewish bakers.....	Montreal, Que.....	4	65	July 23	No settlement reported, but conditions ceased to be affected.
--	--------------------	---	----	---------	---

DISPUTES WHICH BEGAN DURING THE MONTH.

<i>Woodworking trades—</i> Coopers.....	Winnipeg, Man.....	4	16	Oct. 11	No settlement reported at end of month.
<i>Clothing trades—</i> Garment workers ..	Montreal, Que.....	1	30	50	14 Oct. 19 Places of strikers were filled.
Tailors.....	Vancouver, B.C ..	32	32	13	4 No settlement reported, but 29 firms had granted increase, and only 14 strikers remained out at end of month.
<i>Leather trades—</i> Leather workers ..	Ottawa, Ont.....	4	72	14	No settlement reported at end of month.

* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments, affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employes, or of less duration than 24 hours.

cause of the dispute was the refusal of the employers to grant an increase in wages from thirty-five cents to forty-five cents an hour and to adopt a new code of working rules. About fifty-one firms and 1,200 men were reported to have been originally involved in this dispute.

Strike of Electrical Workers at Winnipeg, Man.

A strike of about 100 inside electrical workers which began at Winnipeg, Man., on August 5, was terminated on October 14, when an agreement was signed by the Electrical Workers' Union and the firms who were members of the Builders' Exchange. The cause of the strike was the refusal of the employers to sign a new agreement providing for a minimum rate of wages of fifty cents per hour, the employers offering instead a minimum rate of thirty-five cents. The agreement which was finally signed provided for a minimum scale of forty cents per hour until the end of the year, the scale for 1910 to be fixed at a conference to be held in January, or by arbitration, if the conference fails to arrive at an agreement. About eight firms were involved in this dispute.

Strike of Sheet Metal Workers at Winnipeg, Man.

On July 28, about 100 sheet metal workers declared a strike at Winnipeg, Man., on account of the refusal of the employers to grant a demand for an increase of the minimum rate of wages from thirty-nine to forty-two and one half cents per hour. After some negotiations, a compromise was reached and work was resumed on October 18, at the minimum rate of forty-one cents per hour.

Strike of Garment Workers at Montreal, Que.

On October 14, a strike of garment workers took place at Montreal, Que., on account of the employment of a non-unionist presser. According to a report received from the employers thirty men were directly affected by the dispute, and fifty male and fifty female employés were

indirectly affected. It was stated that on October 19th, all who went out had been replaced.

Strike of Painters at Kingston, Ont.

No settlement was reported in the case of a strike of eight painters at Kingston, Ont., who went out on September 25, on account of the employment of a non-unionist.

Strike of Jewish Bakers at Montreal, Que.

No settlement was reported in the case of a strike of sixty-five Jewish bakers who declared a strike at Montreal, Que., on July 23, on account of the refusal of four shops to grant a demand for shorter hours and certain improvements in the conditions of labour, but industrial conditions ceased to be affected by this dispute.

New Disputes.

The new disputes of the month were strikes of leather workers at Ottawa, Ont., garment workers at Montreal, Que., tailors at Vancouver, B. C., and coopers at Winnipeg, Man.

Strike of Leather Workers at Ottawa, Ont.

On October 14, a strike of leather workers took place at Ottawa, Ont., affecting about four firms and seventy-two employés. The cause of the dispute was the refusal of the employers to grant a general increase of ten per cent. in wages. It was stated by one of the firms involved that they did not object to advancing wages of some of their employés even more than ten per cent. but they opposed a general increase because several of their employés had recently received an increase of from ten to fifty per cent. and there were others whom they did not consider entitled to an increase.

During the month the leather workers applied for a Board under the Industrial Disputes Investigation Act, 1907, but the consent of both parties being necessary in a dispute not affecting public utilities or mines, and the employers not consenting, no Board was established. The dis-

pute was not terminated at the close of the month.

Strike of Tailors at Vancouver, B. C.

On October 4, a strike of tailors and tailoresses took place at Vancouver, B. C., and continued throughout the month. The cause of the dispute was the refusal of certain employers to grant a demand for an increase in wages of from \$18 to \$20 per week, or and advance of slightly over ten per cent. in piece work prices. The new scale was adopted by twenty-nine firms and thirty-one out of forty-five strikers returned to work, leaving three shops and fourteen employés, of whom four were females, still affected by the dispute.

Strike of Coopers at Winnipeg, Man.

About October 1, the Coopers' Local Union of Winnipeg, Man., presented a new schedule of hours and prices to the managers of the four oil companies, by whom their members were employed. The employers not having signed the new schedule, a strike was declared ten days later, in which about sixteen men were involved. It was reported that the employers did not object to the terms of the schedule, but were unwilling to recognize the union. No settlement of the dispute was reported during the month.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of September, and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during October, 1909.

DOMINION REPORTS.

The Post Office Department.

Report of the Postmaster General for the year ended March 31, 1909. Ottawa: King's Printer, 1909. Page, 606. Price, 30 cents.

THE report of the Post Office Department for the fiscal year ended March 31, 1909, shows a considerable expansion in the service and transactions of the Department compared with the previous year.

The principal increases were as follows:

- In number of post offices..... 656
- In number of postal note offices..... 680
- In number of money order offices.... 196
- In number of savings bank offices.... 18

There was an increase of 2,034 miles in the extent of the system over which mails are carried by railway, and the number of miles over which mails have been carried by all routes was 1,312,073 more than in the previous year. The estimated increase in the number of letters and post cards sent was 9,805,000 over four

per cent. more than in 1908. The growth of the service entailed an increased expenditure of \$586,456.66 but there was a surplus from the operations of the Department amounting to \$809,237.53.

The principal changes in the service were a reduction of the 'drop letter' rate in places having a free delivery system, a reduction in the rate of newspaper postage, and the extension of the free delivery service to 8 new places.

Forestry and Irrigation.

Report of the Superintendent of Forestry. Part VII, Annual report of the Department of the Interior, Ottawa: Government Printing Bureau, 1909. Page, 96.

The report of the Superintendent of Forestry contains a number of recommendations for the extension of the work of this branch, in order to provide for more efficient fire protection and for the reforesting of denuded lands on an adequate scale. Steps have been taken to ascertain the production of timber, by requesting information from all the firms in Canada using wood products, and the returns received from them will be published annually. About one million and a quarter acres of forest reserves

have already been surveyed, out of ten million which are set apart in reserves and parks. In addition there is a tract of land more or less forested stretching from Hudson's Bay to the Rocky mountains, a distance of 1,000 miles with a depth of 400 miles, which requires to be surveyed and carefully protected.

In the spring of 1909, the tree-planting division supplied 2,010 applicants with 2,507,000 trees, and the new applications for the distribution of 1910 number 2,235.

During the past year there was a marked decrease in the number of applications for water for irrigation purposes, and in the number of applicants to purchase land under the irrigation system. This is attributed to the adoption of new regulations requiring the irrigation of fifty per cent. instead of twenty-five per cent. of all lands purchased under the irrigation system, the provisions of the amended Dominion Lands Act permitting the acquirement of land by settlers by pre-emption or purchase, and to the fact that the valleys of the principal streams are now pretty well settled and the available water supply is largely appropriated.

Office of the High Commissioner.

Report of the High Commissioner for Canada for the year ended March 31, 1909. Ottawa: King's Printer, 1909. Pages, 6.

In the report of the High Commissioner for the past fiscal year, it is stated that the movement of immigrants to Canada from Great Britain showed a decrease from 185,831 in 1907 to 95,428 in 1908, while the movement from Canada to the United Kingdom increased from 53,477 to 63,079 in these years. These changes in the movement of population are attributed to the world-wide depression in 1908, and to the restrictive measures adopted by the Canadian government for the purpose of debarring undesirable immigrants. There was a further decrease in the immigration of British subjects to Canada during the first quarter of 1909, compared with the corresponding period of the previous year, but on taking into account all persons entering Canada from the United Kingdom, and deducting

the number to Great Britain, there was a net increase of 4,904 in the immigration into Canada. It is reported that the practice of discharging convicted prisoners on the understanding that they would be sent to Canada has almost ceased, the matter having been vigorously taken up with the authorities in Great Britain.

Juvenile Immigration.

Report of G. Bogue Smart, Inspector of British Immigrant Children and Receiving Homes, for the year ended March 31, 1909. Part II, annual report of the Department of the Interior. Ottawa: Government Printing Bureau, 1909. Pages, 15.

During the past fiscal year, 2,424 children were brought to Canada from England by 16 societies, and applications for children were received from about 15,417 families in Canada. Since the year 1900, 16,610 juvenile immigrants have arrived in Canada, and 15,408 applications for them have been received. The report of the Inspector of British Immigrant Children contains an account of the Children's Act of 1908, which came into force throughout Great Britain and Ireland on April 1st., and of the Children's Court of Birmingham, which deals with juvenile delinquents.

SASKATCHEWAN REPORT.

Agricultural Conditions of Saskatchewan.

Fourth annual report of the Department of Agriculture of the Province of Saskatchewan, 1908. Regina: Government Printer, 1909. Pages 248.

The report of the Department of Agriculture of Saskatchewan shows a steady and great progress in that province in all branches of agriculture. The grain crops of Saskatchewan in 1908 are stated to have been twice as large as the quantities recorded for 1907, and the area of the four principal grain crops increased from 3,057,401 acres in 1907 to 5,970,841 acres in 1908. The number of men who arrived to take part in the harvesting exceeded the estimated number required by over 4,000 the number of harvesters having been 14,034. Wages of from \$1.75 to \$2.25 per day were offered for work in the harvest field, and those who hired by the month received from \$35 to \$45 per month. For threshing the wages

were from \$2.00 to \$3.25 per day, and from \$35 to \$40 per month. The average farm wages during the year amounted to from \$25 to \$30 per month.

BRITISH REPORTS.

Workmen's Compensation.

Statistics of Compensation and of Proceedings under the Workmen's Compensation Act, 1906, and the Employers' Liability Act, 1880, during the year 1908. London: Wyman & Sons, 1909. Pages 71. Price, 7d.

The report on Workmen's Compensation Statistics, for 1908, forms the first of a new series, as it covers the first complete year during which the Act of 1906 was in operation. This Act greatly widened the field of compensation by (1) including all occupations (whether the labour is manual, clerical or otherwise) with certain exceptions: (2) reducing the period of disablement which entitles to compensation from a fortnight to one week: (3) extending compensation to injuries caused by certain industrial diseases.

The statistics in the report are based on collective returns supplied by benefit societies and insurance companies, and upon 34,659 returns from individual employers. Of the latter 31,416 reported that no compensation has been paid. The gross total of compensation paid in the seven principal groups of industries amounted to £2,080,672 representing 3,473 cases of death and 325,484 cases of disablement. The gross total of persons employed in these groups of industries is about 7,500,000.

Twenty-four kinds of industrial diseases are included under the Workmen's Compensation Act. Returns of compensation paid for this cause showed twenty-six cases of death and 2,260 cases of disablement of these, 204 were continued from the previous year, leaving 2,056 in which the first payment of compensation was made in 1908. There were 1,550 cases of diseases in the mining industry, for which compensation was paid. These included cases of nystagmus, snkylostomiasis, beat hand, beat knee, beat elbow, and inflammation of the wrist joint and tendon sheaths. There were 241 cases of lead poisoning, twenty-three of anthraxm,

fifteen of arsenic poisoning, twenty of chrome poisoning, and 10 of compressed air illness. There were also 407 cases of lead poisoning in factories, 14 cases of arsenical poisoning and fifteen cases of anthrax.

AUSTRALIAN REPORT.

Industrial Conditions of New South Wales.

Report of the working of the Factories and Shops Act; early closing acts; Shearers' Accommodation Act; etc., etc., during the year 1908. Sydney: Government Printer, 1909. Pages 49. Price, 1s., 9d.

The report of the Department of Labour and Industry of New South Wales for 1908, shows a condition of great prosperity in that State. There were entered on the registers of the Department at the close of the year, 3,883 factories, employing 70,688 hands, of whom 48,286 were males and 22,402 were females. In the previous year there were entered 3,559 factories with 66,867 employés. There was a considerable decrease in the number of children between thirteen and fourteen years of age, to whom it was found necessary to grant special permission to work in factories, which was due to the good demand for adult labour. At the end of the year the minimum Wage Act passed, providing for a weekly wage of not less than four shillings for all persons coming within the definition of "workmen" or "shop assistant." This law was needed since in the Metropolitan district where were 514 girls receiving less than four shillings a week, and the Newcastle district there 272 girls employed in dress-making and millinery receiving less, the majority being paid no wages at all.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NEW BRUNSWICK CASES.

Damages for negligence causing death.

THE plaintiff, the widow of a man who had been killed while in the employ of the defendant, sued for damages for the death of her husband, alleged to have been caused by the defendant's negligence. The deceased was working for defendant on the construction of the Intercolonial Railway grain elevator at St. John, and was fatally injured by being struck by a plank which fell from a tramway in use in the works. It was claimed that in the distribution of lumber from the tramway too few men were employed for the work; that two men were employed to do three men's work; and that the result was, that they were obliged to work with so much haste that the care requisite to avoid accidents was impossible. There was undisputed evidence that, during the two or three weeks previous to the time when this accident happened, planks had fallen on several occasions precisely as this one did, though without injury to anyone. The jury found that the deceased's death was caused by the defendant's negligence; and that the negligence consisted in insufficient help on the tramway causing careless handling of lumber on the same, and that the "dogs" were not secured to the joists of the staging to prevent the falling out; this latter part of the finding, however, was held to be immaterial. The action had been tried three times, resulting in

a verdict for plaintiff each time, and an increase of damages at the last two trials. Upon a motion for a fourth trial on the ground of misdirection by the trial judge at the third trial, the Supreme Court of New Brunswick held that there was evidence to justify the finding of the jury (who, it seems, were a special jury on defendant's application), and that there was no such misdirection as to warrant an interference with the verdict for \$2,800. The motion for a new trial was dismissed.

(Harris v. Jamieson, 7 Eastern Law Reporter, 175).

Conviction under by-law Regulating Sale of Bread.

A conviction having been made by the Police Magistrate of Westmoreland county for violation of a by-law of the City of Moncton regulating the sale of bread, an order to quash the conviction was discharged and the conviction sustained by the full Court. The conviction was for defendant's exposing for sale in his shop at Moncton a loaf of bread without the stamp, in plain characters, of the initials of the name of the baker by whom the loaf was made, and without the figure denoting the weight of the loaf. The objections to the conviction were (1) that the by-law was beyond the power of the city council to pass; (2) that the provincial legislature had no authority to authorize such a by-law, being against section 91, subsection 2 (as to the regulation of trade and commerce) of the British North America Act; and (3) that the word "bread" used in the by-law did not apply to the loaf exposed for sale, such loaf being fancy bread. The

Court held against all these objections, and, as to the nature of the loaf, they decided they could not interfere, the finding on that point being with the magistrate who heard the evidence and saw the loaf.

(*Rex v. Kay, Ex Parte Phileas A. Leblanc*, 7 Eastern Law Reporter, 209).

QUEBEC CASES.

Prosecution under the Inspection and Sales Act.

In a prosecution, the first one of the kind apparently under the amendments of 1908 to the Inspection and Sales Act, Wilfrid Lapierre, cheese maker of the Shefford Vale Cheese Factory, Shefford County, Quebec, was fined \$25.00 at Granby on the 9th of October last, for incorporating a quantity of inferior and worthless cheese in the centre of several new cheese during the process of manufacture. The cheese were discovered in a Montreal warehouse, and the prosecution was made by Inspector Macpherson of the Dairy and Cold Storage Commissions Branch.

Conviction of Employment Agent for Fraud.

In criminal proceedings which were taken against a person by the name of Samuel Lang, who kept an employment agency at No. 8 Craig Street West, Montreal up to the first of October last, the defendant was convicted of extorting money from workmen, and was sentenced by Judge Lancott to fifteen days imprisonment and costs, or a month longer in gaol in default of paying costs. In passing sentence upon the defendant the judge said, that the evidence in eight cases against the defendant established beyond a doubt that the employment agency he was conducting, though licensed, was not a genuine enterprise, but a fraudulent device for extorting money from very poor workmen, strangers in the city, who were looking for a job to earn the daily bread of their families. Defendant has enticed them by different allurements, and has practised on them a series of systematic frauds, the whole scheme being

the more dangerous on account of being most cleverly planned. It appeared that the defendant had an office with a front sign styled; "The Merchant's Real Estate and Employment Agency, Number 8, Craig Street West", and beneath this sign the words, "Home Refuge". He had two assistants, whom the judge described as a "Puller In," and "A Bouncer". These two, with the defendant's partner and the defendant himself, were in turn standing on the sidewalk to call in workmen and offer them employment on the Canadian Pacific Railway, the Sugar Refinery, and a number of other establishments in the city.

Conviction of Workman in Shoe Factory. for Wilful Damage.

In proceedings taken in the Police Court at Hamilton by the Shoe Company foreman of the McPherson Shoe Factory in that city, against an employé of the Company, for damaging a shoe on which he was working, the Police Magistrate fined the defendant, William Moore, \$10.00 or fourteen days in gaol. The defendant was charged with wilful damage in doing the work and pleaded guilty. The foreman of the department in which the defendant was employed said that the shoe was in good condition when the defendant got it. He produced the shoe in court in a considerably cut up condition, and said that was what happened to it while in the defendant's hands. The foreman explained that it was a common thing for shoes to be destroyed wantonly, and that this was a cause of considerable loss to the Company. The magistrate said that wanton and mischievous carelessness should have no place in the daily work of a workman, and he imposed the fine above stated, with the alternative of imprisonment for fourteen days if the fine was not paid.

Conviction of Railway Yardman for Criminal Negligence.—Released on Suspended Sentence.

At the Brantford Assizes in October, Joseph McGuire, a Grand Trunk yardman, was convicted of criminal negligence and neglect of duty in connection

with a wreck on the Grand Trunk Railway near Mount Vernon on October 6th, 1908, but was released on suspended sentence by Mr. Justice Latchford. On the day of the wreck, defendant was in charge of the shunting engine through the yards, and allowed a London work train to pass through the yards and collided with a yard engine, while the latter was on its way back from Mount Vernon. In the crash three men were killed, namely, the engineer and two firemen. The cause was tried twice. At the first trial the jury disagreed, but at the second trial, as above stated in October, the jury returned a verdict of guilty with a strong recommendation to mercy, on the ground apparently that the defendant had had too much to do in his work. In releasing the accused on suspended sentence the judge commented on what he believed to be the truthfulness of the accused in giving his evidence in the witness box, his respectable character, and his straightforward manner as a witness, which were some of the reasons for his leniency with respect to the accused.

ONTARIO CASES.

Master and Servants Act.—Proceedings under conviction Prohibited.

Upon a motion for prohibition to the Police Magistrate at London on behalf of one S., who was convicted under the Ontario Master and Servants Act, Chief Justice Falconbridge held that the magistrate had no jurisdiction, under that Act, to order payment of wages for any period after the discharge of the servant. He followed in that respect a decision on the same point by Mr. Justice Scott in the North West Territories. (*Goode v. Downing* (1904) 5 Territories L. R. 505). In the London case the Police Magistrate's conviction expressly awarded damages for wrongful dismissal. S., the party convicted, made an abortive attempt to appeal to the Division Court, but it was held that this did not disentitle him to move for prohibition. The prohibition, which stopped further proceedings under the conviction, was granted both as to the wages and the damages, but the Chief

Justice stated that, if the magistrate had specified how much he awarded for wages and how much for damages, so as to make the amounts severable, he might have limited the prohibition to the award of damages.

(*Swanick v. Kotinsky*, 14 Ont. Weekly Reporter, 537)

Workmen's Compensation for Injuries.

Plaintiff, who was in the defendant railway Company's employment as a section man, sued for damages for an injury caused under unusual circumstances. While working upon the railway track, a train came along and a piece of coal fell from the tender and struck him on the ankle, which was thereby fractured. The negligence on defendant's part, which was alleged, was, that the coal was unnecessarily piled in the tender, above the sides, in such quantity and manner that the rapid motion of the train could and did shake down the "chunk" which, falling on the corner of the tender, flew off with dangerous force and struck the plaintiff. Defendants denied any negligence and pleaded that notice of the injury had not been given in proper time under the Workmen's Act, and that plaintiff had released his claim after action for \$300. Mr. Justice Clute, who tried the action without a jury, held that, although the notice of action was too late, there was reasonable excuse for not giving it in time, and that defendants had not been prejudiced; that the release had been obtained under circumstances which, having regard to the physical and mental condition of the plaintiff, rendered it inequitable that it should be allowed to stand; and that the evidence was sufficient to support plaintiff's claim under the Workmen's Act. He awarded \$1,500 damages, upon which the \$300, paid when the release was obtained, was to be credited. Upon an appeal to the Court of Appeal this judgement was affirmed (although not without some hesitation on the merits or main branch of the case), in a judgement by Mr. Justice Garrow for the Court. The appeal was dismissed with costs.

(*O'Brien v. Michigan Central Railway Company*, 14 Ont. Weekly Reporter, 581.)

Damages for Removing Bridge Connecting Farm Lands.

Where the defendants, a railway Company, without the authority of the Railway Commission, removed an overhead bridge (which defendants had maintained for 50 years and were bound to maintain) connecting the parts of the plaintiff's farm, and afforded him no means of access from one part of his farm to the other, it was held by Mr. Justice Clute, who tried the action without a jury, that plaintiff was entitled to \$560 damages for the injury caused by defendant's delay in furnishing proper means of communication between the parts of the plaintiff's farm separated by defendants' railway. This judgement was affirmed on appeal by the Divisional Court.

(Kelly v. Grand Trunk Railway, 14 Ont. Weekly Reporter, 602.)

Floating Ties down Stream. Tolls for use of River Improvement.

In an action by three companies for work done for and services rendered and materials supplied to defendant, in connection with floating ties down streams and towing them on a lake below, the evidence showed that defendant had used the river improvements of the plaintiffs for the two previous years without objecting to the Company's right to compensation for the use of them, and that he had made arrangements for the use of them for the year 1908. The Divisional Court held, affirming the judgement of Mr. Justice Britton at the trial, that the defendant was liable to compensate plaintiffs for the use of the works.

(Pigeon River v. Mooring, 14 Ont. Weekly Reporter 639.)

Twofold procedure to enforce Mechanics' Lien.

Plaintiffs instituted proceedings under the Mechanics' Lien Act to enforce a lien, and also issued a writ for the same purpose. Upon a motion by the defendants before Mr. Cartwright, Master in Chambers, to have the latter action stayed, the Master

held, that the two procedures are quite different, for, in the personal action, there may be a more speedy recovery and a different and fuller judgement than in the other proceeding, therefore it was not right to interfere. The motion was dismissed.

(Hamilton Bridge Works Co. v. General Contracting Co., 14 Ont. Weekly Reporter, 646.)

Master and Servant—Illegal Claim for Damages.

Plaintiff, a labourer, brought an action against the defendants, railway contractors, for damages for injuries caused by freezing his hands through the alleged negligence of defendants' foreman in discharging him without making provision for his safe return to the place from which he had been brought by defendants. The judgement of the trial judge, Mr. Justice Clute, dismissing the action was reversed by the Divisional Court, whose judgement was in turn reversed by the Court of Appeal, who restored the judgement of the trial judge. The last named Court held that, on the evidence, the plaintiff had no legal claim for damages.

(Vasilif v. McDonald & Stephens, 14 Ont. Weekly Reporter, 654.)

Conviction of Hawkers and Peddlers.

The defendant was convicted by a magistrate, under a county by-law, for selling stoves and ranges without a peddler's license. Defendant produced what he claimed to be an agreement with the Western Foundry Company, Limited, of Wingham, and said that he was simply manager and agent for that company, that certain other persons who were tried with him, were hired by him as agents for the company, and as the goods which they sold were the manufacture of that company, he claimed that he should not be obliged to take out a license. The magistrate, however, was of the opinion that defendant and the other defendants were actually purchasers from the company and that the agreement was not bona fide, hence the conviction. Upon a motion to quash the conviction, the principal contention was that the defendant came within the following exception

in section 583 (14) of the Consolidated Municipal Act, 1903, viz: "No such license shall be required for hawking, peddling, or selling from any vehicle, etc., to any retail dealer, or for hawking, etc., any goods, etc., the growth, produce, or manufacture of this province, if the same are hawked or peddled by the manufacturer or producer of the goods, etc., or by his bona fide servants or employés having written authority in that behalf, etc." This section (583 (14)) of the Act is amended by the Act 6 Ed. 7, Ch. 34, sec. 26, which provides that where, as in this case, the defence set up is that the person charged is the bona fide servant or employé of the manufacturer or producer of the goods, the burthen of proving that he comes within such defence shall rest upon him, and in the event of his failing to establish at the trial that he does come within such defence he may be convicted of a violation of this sub-section. Mr. Justice Riddell, who heard the motion to quash the conviction, dismissed the motion with costs. He held that the defendant, under the above law, had to satisfy the magistrate that he did not come within the general provisions of the statute, but did come within the exception, which, in the opinion of the magistrate, he had failed to do, even though there was no evidence contradicting the documents and the evidence of defendant. There is no rule in our law that a judge or jury, or other trial tribunal, must accredit any witness even although not contradicted.

(*Rex v. Van Norman*, 14 Ont. Weekly Reporter, 659.)

Alleged Negligence under Factories Act— Contributory Negligence.

In an action at the Toronto Assizes by Henry Champion, a woodworker and former employé of the Boake Manufacturing Company, for the loss by the plaintiff of the index finger of the left hand, judgement was given on the answers of the jury to certain questions put to them, in favour of the defendant. The plaintiff claimed that he was ripping a narrow strip of board on the 14th of April last when something slipped, and the saw which he was working severed

the finger at the top joint. According to the Ontario Factories Act all machinery of a dangerous nature must be properly guarded, and plaintiff's action was based on the ground that there was negligence on the part of the defendants in not having this done. He produced in court a miniature model of the saw for the inspection of the jury. The jury visited the factory of the defendants and examined the saw which caused the accident, and they found that it was properly protected as required by the Act. They also found that the plaintiff had contributed to the accident by his own negligence.

Settlement of Action for Damages.

Wallace May, of Windsor, was electrocuted in the month of July last while engaged in the works of the tunnel being constructed between Detroit and Windsor. It appeared that one of the rails became charged with electricity and that May touched the rail with a crowbar, whereby he received a shock which proved fatal. He left a widow and two children, girls of fourteen and sixteen years of age respectively. In an action for damages against the Butler Brothers Construction Company, on behalf of the widow and children, a settlement was made between the parties whereby the Company agreed to pay the widow \$1,000 and the children \$500.00 each. The settlement was ratified by Mr. Justice Latchford, who directed that the mother be allowed \$3.00 a week from the share of the younger girl, and \$2.00 a week from that of the elder girl for maintenance.

Convictions for Illegally Skimming and Watering of Milk.

In the prosecution of five farmers living in the neighbourhood of Brockville, four of whom were charged with illegally skimming milk, and one of them for illegally watering milk, each of the defendants was fined \$40 and costs. Six other persons were also prosecuted under the same statute, five for illegally skimming, and one for illegally watering, milk. Four of these were fined \$40.00 and costs each, one \$30.00 and costs, and the sixth \$10.00

and costs. The prosecution was instituted by the prosecutor for the Eastern Ontario Dairymen's Association.

MANITOBA CASE.

Workmen's Compensation for Injuries Act. Damages.

In an action for damages under this act, it appeared that plaintiff was employed by defendant at a sawmill on Lake Winnipeg. He alleged that, at the time of the accident, the saw in the mill was not equipped with a sufficient sawdust carrier, that the same was on the wrong side of the saw and wholly insufficient and inadequate for the purpose. In consequence of this, plaintiff, while operating the saw, was struck in the eye with a piece of sawdust or bark, as a consequence of which he lost the use of the eye. The jury gave a verdict for plaintiff for \$1,000 and defendant appealed.

The Court of Appeal held that, although in such a case, the Court feels grave doubt as to whether the evidence was such as to justify reasonable men in rendering a verdict for the plaintiff, and whether the jury were not influenced by sympathy irrespective of the weight of evidence, yet, in the present state of the law as laid down in the leading cases, the appeal must be dismissed if there was, in support of the verdict, any evidence that the court could not say, the jury ought not to have believed, however slight, and however contradicted it may have been by apparently more reliable testimony. Appeal dismissed.

(McIntyre v. Halliday., 18 Man. Repts., 535).

BRITISH COLUMBIA CASES.

Mechanics' Lien Act. Questions decided thereunder.

By agreement dated 23rd December, 1907, the defendant National Construction Company, Ltd., agreed with the defendant J. M. L. to construct a building upon the property of the last named defendant for the sum of \$80,000. The plaintiffs furnished material from time to time during the course of construction.

The construction company got into difficulties and was unable to complete its contract. On October 24th, 1908, a deed of the property, from J. M. L. to her husband L. G. W., was executed and deposited in the Land Registry Office with the application to register same. On October 28th, 1908, plaintiff's solicitors sent to the defendant, J. M. L., by registered mail, a notice addressed to her, care of L. G. W. Victoria, B.C., in the following terms: "We beg to notify you that J. Coughlan & Sons intend to file a mechanics' lien against your property in the city of Vancouver, being lots 1 and 2, westerly 10 feet of lot 3 in block 29, district lot 541, for the balance due amounting to \$5,180.92, for goods and material supplied and work done by the National Construction Company on the building on the above mentioned lots, if not paid to us at once."

On the same day that this notice was posted, the plaintiffs filed a mechanics' lien in respect of their claim in the County Court office, at Vancouver, and on November 27th, 1908, commenced to enforce same. Other lien claimants had meanwhile commenced their actions in which L. G. W. was made party defendant as owner, and on 7th December, 1908, an order was made, upon the application of L. G. W., consolidating this, and the other actions pending. At the trial the claim of the present plaintiffs came on first for hearing, and, upon the conclusion of the evidence, the presiding judge dismissed plaintiff's action on the grounds that L. G. W., the owner of the property, was not before the court, that there was not notice given to the owner of the property in the terms of section 3 of the Mechanics' Lien Act, Amendment Act, c. 27, of the Statutes of 1907, and that such notice as was given was not given within 15 days before the completion of the work.

The Supreme Court of British Columbia held on Appeal, that the notice required to be given 15 days before the completion of the work means 15 days before the completion of the work of the building as a whole, and not 15 days before the completion of the delivery of the material by the person selling the same.

Section 24, of the Mechanics' Lien Act, Amendment Act, 1900, enacts, that where in any action for a lien the amount claimed to be owing is adjudged to be less than \$250, the judgement shall be final and without appeal. The court decided that this applies only where a loan of money has been awarded, and that the existence of a valid lien is presupposed.

(Coughlan v. National Construction Company and McLean v. Loo Gee Wing, 45 Canada L. J. 531.)

Damages for Negligence.

In an action for damages against the Hunting Lumber Company for the loss of plaintiff's two fingers in a planer machine while employed by the Company last summer, and which was tried by Mr. Justice Clement, the jury brought in a verdict for \$1,800.00. The plaintiff was a foreigner, and the action was based on the negligence of the defendants in not having the machine properly guarded as required by the Statute.

UNITED STATES CASES.

The Court of Appeals of the District of Columbia has approved the sentences of imprisonment for contempt of court imposed by Mr. Justice Wright of the District of Columbia Supreme Court, on Samuel Compers, President, John Mitchell, Vice President, and Frank Morrison, Secretary, of the American Federation of Labour.*

Associate Judge Van Orsdel wrote the opinion of the Court of Appeals and Associate Justice Robb delivered a short concurring opinion. Chief Justice Shepard dissented. Justice Van Orsdel, after reviewing the charges made by the labour

leaders against the Bucks Stove and Range Company, said in part:

It was found by the court below to be a fact not only that these statements were made as charged but that they were made with the intent of inciting the membership of the American Federation of Labour and their friends to continue the boycott against the business of the Bucks Stove and Range Company in defiance of the decree of the court. The defendants having been found guilty of the offence above charged, in the absence of the evidence from the record the sole question left for us to consider is whether, under these circumstances, they constitute contempt of court.

The acts of these defendants, taken as a whole, can produce in the mind of any reasonable person but one impression, a concerted, well-planned effort to encourage the membership of the American Federation of Labour and their friends to disregard and disobey the orders of the court and to create among their followers and their sympathizers a lack of respect for the authority and dignity of the court.

We have a deep sense of the far-reaching importance of this case. Three distinguished citizens, leaders in a great cause for the improvement and uplift of their fellow men, with a larger following probably than was ever marshalled under single leadership in any philanthropic movement, are at the bar of justice to answer the charge of disobedience of an order of a court of the United States. We are not unmindful of the high position which the defendants have attained, but their intelligence forbids any interference or conclusion that the acts charged were committed by them in ignorance of their duty to the courts of their country, hence that excuse cannot be advanced with convincing force.

The sole question before us is the guilt or innocence of the defendants. The high distinction which they have attained, the fairness or unfairness of the Bucks Stove and Range Company and the larger organization to which it belongs, the National Manufacturers' Association, are not matters to be here considered. Neither are we, as a court of review, permitted to modify or extenuate the extreme penalty imposed. These matters, as we have suggested, may be presented properly to the officer vested with authority to commute or pardon.

The inherent power of the court to preserve orderly administration of its affairs and to enforce its orders and decrees has always been recognized. In many instances, as in the case at bar, punishment for contempt is the only means by which the court can enforce its lawful decrees. With a proper exercise of this power the purpose of its creation and organization is made effective without it; it would become an impotent and a useless adjunct of government. If a citizen, though he may honestly believe that his rights have been invaded, may elect when and to what extent he will obey the mandates of the court and the requirements of the law as interpreted by the court, instead of pursuing the orderly course of appeal, not only the courts but Government itself would become powerless and society would soon be reduced to a state of anarchy.

The judgement is affirmed with costs, and it is so ordered.

*For a statement with regard to previous proceedings in this case see the *Labour Gazette* for January, 1909, page 794.

THE LABOUR GAZETTE

DECEMBER, 1909.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF NOVEMBER, 1909.

I.—GENERAL SUMMARY.

THE feature of the month having the most pronounced effect on general industry, as compared with the corresponding period in other years, was the exceptionally fine and mild weather which prevailed in nearly all parts of Canada. This enabled farming, building and other outdoor occupations to be pursued with an unusual degree of activity up to the closing days of the month. Navigation was some days later in closing than last year, and the additional facilities thus afforded for the marketing of the grain crop had an immediate effect upon the general situation. In the lumbering, mining and manufacturing industries and in general trade, the increasing buoyancy noted during the past few months received a further stimulus. Railway construction camps and unskilled labourers on civic improvements and building contracts were among those who especially profitted from the weather conditions. Especially noteworthy was the heavy volume of freight traffic on the railways, which in the closing days of the month led in some instances to fears of a possible car shortage. The outlook for the coming winter season is more favourable than at the corresponding period of any year since 1906.

Changes in Wages and Hours of Labour.

Wages were for the most part very stationary during November. The

following is a statement with regard to the various changes, information concerning which was received at the Department during November:—

Mining.—The Dominion Coal Company signed an agreement with the Provincial Workmen's Association renewing the existing agreement which expires on December 31. The new agreement is for two years. Under the terms of the agreement mine labourers to the number of 800 will receive an advance in wages from \$1.52 to \$1.60 per day.*

Printing trades.—At St. John, N. B., seventy pressmen in the employ of ten firms had their wages increased by from fifty cents to six dollars per week. The various employing printers at Calgary, Alta., granted an increase of \$2.00 to sixty of their employés, the increase being from \$18 to \$20 per week.

Textile trades.—Certain employés of the Corticelli Silk Company at St. Johns, Que., received an increase in wages.

At the close of the shipping season at Montreal, Que., the bonuses earned by the longshoremen during the past season were paid by the various steamship companies. The average bonus amounted to \$35-\$40.

Cost of Living.

The tendency of general prices was upward. Wheat and grains were on about

* See under heading "Recent Industrial Agreements, in the present issue.

the same level as last month, but pork, butter, eggs, and other farm produce were very high. There was a general advance in rough lumber of approximately \$1.00 per 1,000 feet in Western Canada. Hides have been very high, though tanners have refrained from buying. Leather remained firm. In wearing apparel, rubber footwear advanced twenty-five per cent. owing to the continuous increase in the price of crude rubber during the past few months. Cotton fabrics were advancing. Cement prices were upward, and paints and oils were very strong. The average prices realized at the fur sales in London, Eng., during the past month were twenty per cent. higher than in June. In groceries and provisions bread was slightly lower, with meats unchanged, though the holiday demand for poultry and miscellaneous provisions was already making itself felt. Refined sugar advanced ten cents per hundred pounds. Canned goods were very firm. Real estate transactions have been increasing in activity, with values advancing.

Interruptions to Industry.

Among industrial establishments, etc., destroyed by fire or through other causes during November, as reported in the press of the Dominion, the following may be mentioned:

Nova Scotia.—Store and adjoining residence at Arichat; business block at Kentville, loss, \$5,000; business block at Oxford, loss, \$40,000; business block at Stellarton.

Barn at North Kingston.

Prince Edward Island.—Business block and warehouses at Souris, loss, \$61,000.

New Brunswick.—Sawmill at Dalhousie, loss, \$4,000; Intercolonial Railway rest house at Moncton; hotel and outbuildings at Perth, loss, \$10,000; smoke house of packing company at Sussex.

Barn at St. John.

Quebec.—Power house at Coaticook; presbytery at Dunham; bakery and dwelling at Bergerville, loss, \$3,000; tenement house at Limolou. At Montreal, store and boarding house; mattress factory, loss, \$30,000; chemical factory (partial), loss, \$1,000; furniture store; wire nail factory, loss, \$15,000. Steamer *Welshman* at Lachute, loss, \$50,000; stables at Montreal; warehouse at Quebec; dry goods store at Quebec, loss, \$7,000; outbuildings and residence at St. Alexis des Monts, loss, \$3,500; power plant and saw mill at St. Canut; hotel at St. Hyacinthe, loss, \$5,000; saw mill and lumber at St. George de Beauce, loss, \$50,000; warehouse at St. Laurent, loss, \$2,000; dry goods store at Sorel, loss, \$1,500; hotel at Sorel, loss, \$8,000; furnace works at Three Rivers, loss, \$50,000. 200 men thrown out of employment; business block at Wakefield, loss, \$6,000.

Barns at Fulford and Johnville.

Ontario.—General store at Arden, loss, \$17,000 hotel at Acton; business block at Barrie, loss, \$20,000; saw mill and 100 cords of wood at Belleville; general store at Belleville, loss, \$5,000; clothing store at Brampton, loss, \$2,500; summer resort at Burlington Beach, loss, \$1,500; shingle mill at Clyde Mills; stable and contents at Clinton; store at Duncrief; general store at Duncraft, loss, \$7,000; warehouse at Fort William, loss, \$10,000; evaporator factory at Goderich; paper warehouse at Guelph, loss, \$10,000; parsonage at High Park, loss, \$2,500; hotel at Jasper; mattress factory at London, loss, \$15,000, thirty-five workmen thrown out of employment; flax sheds and stables at Lucan; cheese factory at Lord's Mills; flour mill and feed store at Monkland station, loss, \$4,500; dwelling at Merriton, loss, \$4,500; railway station at Nixon; finishing department of a tannery at Oakville; brewery (partial) at Ottawa, loss, \$1,000; ordinance store at Ottawa, loss, \$170,000; municipal building (partial) at Peterborough, loss, \$2,000; sawmill at Rutherglen, loss, \$5,000; church at Rockwood; refinery at Sturgeon Falls; business block at Simcoe, loss, \$20,000; outbuildings and contents at St. Catharines, loss, \$2,000; hotel and stables at Stratford, loss, \$3,000 paper warehouse at Tillsonburg, loss, \$1,500. At Toronto, shoddy warehouse; carriage shop (partial) loss, \$1,500; parsonage, loss, \$2,000; commercial agency, loss, \$1,500; laboratory at University (partial) \$1,000. Hotel at Pembroke, loss, \$15,000; sawmill at Widdifield, loss, \$10,000; general store at Williamstown.

In a heavy storm on the Great Lakes on November 16, the steel barge *Ottawa* laden with corn was wrecked on the northern end of Isle Royale in Lake Superior; the steam barge *Francis Hinton*, laden with lumber went ashore on the north end of Manitowan Island in Lake Michigan and became a total loss.

On November 17, the steamer *Rome* of Toronto was burnt to the water's edge in the St. Lawrence river.

On November 22, a storm of snow and sleet in central Canada caused heavy damage to telegraph and telephone lines and impeded traffic on the railways.

Manitoba.—Stables on ranch at Carberry; church at Cartwright; livery stable at Cartwright; livery stables and stores at Harding, loss, \$20,000; blacksmith's shop at Rivers, loss, \$6,000; business block at Portage La Prairies, loss, \$7,000; outbuildings and residence at Reston, loss, \$3,000; paper warehouse at Winnipeg, loss \$7,000.

On November 22, one of the penstocks of the dam at Lake du Bonnet, operated by the Winnipeg Street Railway Company, gave way and the power plant was flooded for several days. It was estimated that 13,000 workers in establishments using the power from the above named sources were in enforced idleness for a short time.

Saskatchewan.—Power plant at Fort Saskatchewan, loss, \$3,000; business block at Gull Lake; tenement house at Regina; hardware store and implement warehouse at Wapella, loss, \$16,000.

Alberta.—Hotel at Innisfail.

British Columbia.—Milk condensing factory at New Westminster, loss, \$20,000; paint warehouse at Vancouver, loss, \$2,000; flour mill at Victoria, loss, \$30,000.

The steamer *Ominca* struck on a rock in the Skeena river and became a total wreck.

Heavy rains occurred in the end of November, and caused considerable interruption to traffic through mud slides and washouts.

Conditions in the Industries and Trades.

Conditions of employment during November in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of

the *Labour Gazette* and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.*

The prevailing mild weather greatly facilitated fall ploughing, the harvesting of the root crop, the marketing of produce, and general preparations for winter. Threshing has been completed in western Canada, and the marketing of the crop, was proceeding rapidly. Owing in part to the late closing of navigation the western grain movement has been exceedingly heavy, the increase compared with last year being over forty per cent. There were indications, however, that a considerable amount of grain is being held in the farmers' hands.

Cattle were kept in the fields to an unusually late date, pastures being in good condition.

Reports received from the agents of the Department of the Interior in the Northwest Provinces, state that a continuance of the excellent weather enjoyed during the harvest season was experienced throughout threshing operations. A sudden dip to colder conditions early in November accompanied by a general fall of snow, put a stop to ploughing, but many had completed an increased acreage. The labour market has subsided to its usual normal condition incident to this time of year, except in the lumber camps where the demand is brisk at very fair wages. From all districts market conditions were reported normal, with money reported plentiful and prices high. Increased receipts and shipments of grain in the near future will probably further enhance prices and encourage a corresponding briskness in trade. The transportation question which is generally acute at this time of the year, has with the exception of a few places, been giving satisfaction.

The census branch of the Department of Agriculture, Canada, gave out a statement on the root, seed and fodder crops of Canada for the month of Oc-

tober, together with their values, as reported by the regular correspondents. The yield of potatoes is 99,087,000 bushels, which is 22,697,000 bushels more than last year. Turnips are reported at 107,724,000 bushels being 5,476,000 bushels more than last year. The hay and clover crop is 427,000 tons more than last year, its total yield being 11,877,000 tons. Fodder corn shows a decrease of 149,000 tons, the crop being 2,780,000 tons. The average condition of potatoes over Canada is 93.98 per cent.; of turnips and other roots 91.64 per cent.; of hay and clover 88.68 per cent.; and of fodder corn 90.68 per cent. The total value of the four crops is \$202,473,700 as against \$186,595,000 last year. Prince Edward Island is credited with \$5,748,500 or 2.83 per cent of the total; Nova Scotia with \$18,741,300 or 9.25 per cent; New Brunswick with \$13,497,900 or 6.61 per cent; Quebec with \$59,952,000 or 29.69 per cent; Ontario with \$97,475,000, or 48.15 per cent; Manitoba with \$2,886,500 or 1.42 per cent.; Saskatchewan with \$1,896,500 or 0.93 per cent.; and Alberta with \$2,276,000, or 1.12 per cent. The value of hay and clover alone is \$132,287,000 being \$10,403,000 more than last year. The potato rot has done much harm in the Maritime Provinces, as a consequence of the heavy fall rains, but in Quebec and Ontario the yield and quality rank high. Good reports are also made for the Northwest provinces; but considerable damage has been done there in places by early frost in September. In British Columbia all the crops are reported as excellent in quality and yield, but no areas have been procured for that province.

The following statement issued by the department of Agriculture, Ontario, gives the area and yields of the principal field crops of Ontario for 1909. The areas have been compiled from individual returns of farmers and the yields by a special staff in each township in addition to the regular crop correspondents:

Fall Wheat—663,375 acres yielded 15,967,653 bushels or 24.1 per acre, as compared with 16,430,476 and 24.2 in 1908. The annual average per acre for twenty-eight years was 20.8'

*A report of the annual meeting of the Dominion Grange is published under a separate heading elsewhere in the present issue.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has references only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

City and district of correspondent.	Agricultural operations.	Fishing.	Lumbering (including saw-milling.)	Mining.	Manufacturing.	Railway construction.	Building trades.

CANADA DURING THE MONTH OF NOVEMBER, 1909.

and is intended to present, in brief and accessible form, a generalized statement as to the state of employment in the prevailing, no account being taken to wage changes, trade disputes and kindred phenomena treated under separate order indicating in each the degree to which general conditions were favourable or unfavourable, as follows: (1) active

	Metal, engineering and ship-building.	Wood-working.	Printing and Allied trades.	Clothing.	Food and tobacco preparation	Leather.	General transport.	Miscellaneous.	Unskilled labour.

Spring Wheat—135,161 acres yielded 2,223,567 bushels, or 16.5 per acre, as compared with 2,197,716 and 15.5 in 1908. Annual average 15.9.

Barley—695,262 acres yielded 18,776,777 bushels or 27.0 per acre, as compared with 20,888,569 and 28.5 in 1908. Annual average 27.7.

Oats—2,695,585 acres yielded 90,235,579 bushels, or 33.5 per acre, as compared with 96,626,419 and 34.8 in 1908. Annual average 35.6.

Rye—94,661 acres yielded 1,573,921 bushels, or 16.6 per acre, as compared with 1,453,616 and 16.5 in 1908. Annual average 16.4.

Buckwheat—176,630 acres yielded 4,280,790 bushels, or 24.2 per acre, as compared with 3,323,668 and 23.6 in 1908. Annual average 20.0.

Peas—381,609 acres yielded 7,613,656 bushels, or 20.0 per acre, as compared with 7,401,336 and 18.7 in 1908. Annual average 19.4.

Beans—45,029 acres yielded 826,344 bushels, or 18.4 per acre, as compared with 783,757 and 16.9 in 1908. Annual average 17.2.

Potatoes—169,695 acres yielded 24,645,283 bushels, or 145 per acre, as compared with 18,517,642 and 111 in 1908. Annual average 111.

Mangels—70,488 acres yielded 28,928,347 bushels, or 410 per acre, as compared with 29,870,966 and 440 in 1908. Annual average 458.

Carrots—3,506 acres yielded 1,001,653 bushels, or 286 per acre, as compared with 1,120,145 and 275 in 1908. Annual average 346.

Sugar Beets—19,812 acres yielded 7,001,565 bushels, or 353 per acre, as compared with 7,004,748 and 401 in 1908.

Turnips—113,400 acres yielded 50,738,940 bushels, or 447 per acre, as compared with 41,210,189 and 341 in 1908. Annual average 429.

Mixed Grains—474,530 acres yielded 16,199,434 bushels, or 34.1 per acre, as compared with 15,354,350 and 33.7 in 1908.

Corn for Husking—322,789 acres yielded 22,619,690 bushels (in the ear), or 70.1 per acre, as compared with 23,601,122 and 78.8 in 1908. Annual average 71.0.

Corn for Silo—288,346 acres yielded 3,374,655 tons (green), or 11.70 tons per acre, as compared with 2,729,265 and 11.68 in 1908. Annual average 11.45.

Hay and Clover—3,228,445 acres yielded 3,885,145 tons, or 1.20 tons per acre, as compared with 4,635,287 and 1.42 in 1908. Annual average 1.45.

There are 3,180,780 acres of cleared lands devoted to pasture. 231,707 in summer fallow, 300,364 in orchards, 24,614 in small fruit, 11,420 in vineyards, 57,123 in farm gardens, 37,548 in rape, 11,253 in flax and 4,101 in tobacco (of which 3,208 are in Essex yielding 4,388,544 pounds.)

A report on corn growing has been issued by the Ontario Department of Agriculture. The report contains an article on corn growing in Ontario by Professor C. A. Zavitz of the Ontario Agricultural college in which he points out that there are 533,433 acres devoted to corn growing in the province; of this acreage more than one half is located in the counties of Essex, Kent, Middlesex, Elgin, Lambton and Oxford. Essex and Kent produced the greatest quantities of corn for husking and Oxford and Middlesex the greatest amount for the silo. The market value of the corn crop in Essex and Kent, according to the latest report, was \$3,200,556 in 1907.

The present system of demonstration farms operated by the Canadian Pacific Irrigation & Colonization Company will next year be largely extended.

A total of 480 cars of fruit was shipped from St. Catharines, Ont., this year. Three hundred and thirty-six went to Montreal, the other 144 to Winnipeg and the west. The fruit went in refrigerator cars and reached its destination in excellent condition.

The annual meeting of the Ontario Fruit Growers' Association was held at Toronto. The following statements were set forth in the address of the President;

There are 7,000,000 apple trees of bearing age in Ontario.

The capital invested in small fruit growing—strawberries, raspberries, currants, etc.—amounts to over \$3,000,000.

The annual output of the canning and jam factories of the Province is valued at \$7,000,000 a year; and still not over a third to a half the small fruit produced in the Province is put up in these factories.

Over 10,000 men are required to pick the apple crop of Ontario.

Over 60,000 workers are constantly engaged in the business of growing fruit of all kinds, while over half that number are employed in canning factories and in the transportation and handling of the crop between the producer and consumer.

A number of papers dealing with fruit culture were read at the meeting.

The annual convention of the Bee-Keepers' Association of Ontario was held at Toronto.

Fishing.

In the Maritime Provinces, catches where on the whole light, though some good fares of mackerel were taken off the Nova Scotia coast; some of the larger schools, however, did not strike in. Oyster and lobster fishing was in progress with fair results. The dog fish reduction works at Clark's Harbour closed down after a satisfactory season. Smelt fishing had been begun, but catches were somewhat light. The New Brunswick catch of alewives has been satisfactory, but the salmon catch was below that of last year, though selling at good prices. Shad fishing has been prosecuted under favourable weather conditions, but the catch is not above the average. Sardines have been scarce.

On the great lakes, some good catches were reported during November.

Fishing in British Columbia was quiet. Preparations for the opening of the herring season at Nanaimo were actively in progress. Some small catches of cohoes were taken; but salmon fishing was for the most part suspended until the spring. Some good takes of halibut were reported. The last of the sealers has arrived from Behring Sea and the Northern Pacific. The total catch for the season by five schooners was 3,556 seals and eighteen otters.

Final estimates of the British Columbia salmon pack have not been made, but the maximum is placed at 600,000 cases.

It was stated that arrangements had been completed during the month for the shipment of fresh salmon from British Columbia to the British market.

The annual report of the Department of Marine and Fisheries, laid on the table of Parliament during November, showed the total value of fish caught in Canadian waters during the fiscal year 1908-1909 to be \$25,451,085.

Lumbering.

Conditions were more favourable in this industry throughout Canada than for some time past. In Ontario and the Eastern Provinces the sawmills have now almost ceased operations and the men in most cases have been transferred to the woods. Some of the camps found difficulty in securing their quota of hands. Wet weather also interfered in New Brunswick with the forwarding of supplies. The cut, it is expected, will be considerably larger than last year in New Brunswick, Quebec and Ontario. In the Northwest Provinces the winter will be a busy one in connection with the getting out of railway ties, for the supplying of which some heavy contracts have been awarded (*). The British Columbia mills have been steadily increasing in activity, stocks being low and the demand active. The above conditions were reflected in prices paid for lumber, which showed a tendency to stiffen throughout Canada. Rough lumber at some of the most important centres advanced one dollar per thousand.

The Ontario Department of Lands, Forests and Mines, has commissioned Mr. E. J. Zavitz, Professor of Forestry at the Ontario Agricultural College to take stock of the surplus growing timber in Rondeau Park, his report to be followed by the sale of a quantity of valuable timber by public tender.

At a recent session of the Railway Commission, Canada, held in Victoria, B. C., application was made on behalf of the Government of British Columbia for better means of protection against forest fires.

Mining.

The month compared very favourably with November, 1908. In the Nova Scotia coal fields there was still a considerable degree of unrest, but outputs have been gradually increasing, and several of the collieries look forward to an active winter. The Quebec asbestos mines were operated with unusual activity considering the advanced season. In Ontario, activity continued in the various camps. Shipments of ore from the Cobalt camp from January 1 to November 6, 1909, amounted to 49,454,376 pounds. The coal supply for the approaching winter in Western Canada was under discussion and some fears of a shortage were expressed. No reports, however, of actual inconvenience have been received. In British Columbia both coal and metalliferous mines were active, especially the former. The output of the mines at Fernie is now over 2,000 tons per day and is expected to further increase. At Nanaimo also the output is increasing. Shipments of ore from the smelters have also been exceptionally heavy.

The report of the Consolidated Mining and Smelting Company of Canada, Limited, for the year ended June 30 showed total profits of \$361,065 and total assets of \$7,089,910. The gross value of metals produced during the year was \$5,505,526 as compared with \$5,428,501 the previous year. The capital stock has been increased to \$7,500,000.

The issuing of a periodical press bulletin by the Geological Survey Branch of the Department of Mines, Canada, was recently inaugurated. The bulletin will

*See report of Winnipeg correspondent.

contain reviews of publications issued by that branch and other references to the work of the Department.

Manufacturing.

Manufacturing establishments continued increasingly active during November in nearly all the leading centres and branches. The enlarging of factory buildings and the increasing of equipment which had been, comparatively speaking, suspended, during the past two years., have been resumed. The outlook for the coming winter is very favourable.

An estimate of the production of pig iron and steel in Canada during the half year ending June 30 last, made by the trade journal "Hardware and Metal," Toronto, Ont., shows a considerable increase compared with the return for the half year ending December 31, 1908. The increase in iron production amounted to 96,524 tons, and of steel production to 84,333 tons, and every individual line showed an advance. As the production of iron and steel is regarded as affording a criterion of general industrial activity, the above statement is of special significance. No plants have been dismantled during the period but several of the larger corporations have been making large additions to furnaces, mills, etc. Ten furnaces were in blast during the half year. The detailed return is as follows:—

	Half year ending, Dec. 31. Tons.	Half year ending, June 30. Tons.
<i>Pig iron:</i>		
Basic.....	130,255	173,745
Bessmer.....	55,008	99,638
Malleable.....	897	6,259
Ffoundry.....	61,199	74,241
<i>Steel—</i>		
Ingots.....	253,693	338,026
Blooms.....	187,309	218,752
Billets.....	28,839	29,714
Rails.....	131,250	165,614
Wire rods.....	25,333	29,083
Bar steel, iron and structural material.....	44,295	58,362
Castings.....	4,535	7,318
Plate, axles, spikes, and sun- dries.....	3,085	4,377

Following on the rapid advance in raw cotton, time was reduced in a number of

the Canadian cotton mills during November and the earnings of employes cut down by about one fifth.

A merger of the three leading felt Companies has been effected. The new merger is capitalized at \$2,000,000.

A car shortage was feared by manufacturers in some localities.

A marked scarcity of piano tuners was reported as existing by several manufacturing firms. The manufacture and sale of pianos has increased rapidly during recent years and the number of competent tuners has not kept pace with the growing demand. A scarcity of female workers was reported in the whitewear factories of Toronto.

The amalgamation of the Dominion Iron and Steel Company and the Dominion Coal Company was discussed during November, and a plan submitted to the shareholders of both companies. The capitalization of the new Company as proposed will be equal to the total of the capital of the two merging companies, viz., \$57,386,833. There will be no public issue of the securities of the new Company. The adjustment of the balance of the Steel Company's claim for damages and of the price of coal will be referred to chartered accountants.

Railway Construction.

The open weather permitted railway construction operations to be continued with unabated vigour until the closing week of the month. Reviews of the railway construction work completed during 1909 estimate that \$28,000,000 have been spent on construction work alone, an almost equal sum having been expended on supplies and material. Progress has been specially marked in Western Canada where all three of the larger Canadian Railway Companies have made extensive additions. The Grand Trunk Pacific Railway Company completed communications between Edmonton and the head of the lakes. The Canadian Northern Railway Company has opened up the Goose Lake country, while the Canadian Pacific Railway Company completed its second track from Winnipeg to Fort William, thereby doubling the capacity

of the grain outlet, and completed its third trunk line between Winnipeg and Edmonton. The outlook is that 1910 will be quite as active, especially in Alberta and British Columbia, where the plans of the Grand Trunk Pacific and Canadian Northern Companies are very extensive.

In the Speech from the Throne at the opening of Parliament the following reference was made to progress in connection with the National Transcontinental Railway line:

The construction of the Transcontinental Railway has made a substantial advance during the year. The Western division has been extended 66 miles beyond Edmonton, completing a total distance of 861 miles west of Winnipeg. Contracts have been let for 399 miles in the Mountain division; good progress was made on the work. The Eastern division is now open for traffic from Winnipeg to Lake Supreior Junction and thence, by the Grand Trunk Pacific branch, to the lake itself. The whole of the work between Winnipeg and Moncton is now under contract.

Tenders are being asked for the construction of the Quebec bridge. It is estimated that the new piers will cost \$2,500,000 and that the superstructure will weigh 130,000,000 pounds. The total cost it is estimated will be in the neighbourhood of \$10,000,000. The bridge is to be built in five years.

During the twelve months ended March 31, 1909, the Government has guaranteed the bonds of Canadian railways to the extent of approximately \$40,000,000. During the same period the sum of \$35,846,184 was expended on railways on capital account.

The Grand Trunk Pacific Branch Lines Company will apply to Parliament at the present session for an act authorizing the construction of five additional lines of railway.

General Transport.

Railway freight traffic was very heavy during November, wheat shipments from the West being exceptionally large, but passenger traffic showed a falling off as compared with September and October. The volume of general merchandise moving was reported greater than in many months past. Railway earnings continued to show heavy increases, as compared with the corresponding period of 1908. Shippers in some localities were

finding it difficult to obtain cars, but no serious instances of shortage had been reported up to the closing week of the month.

At the annual meeting of the shareholders of the Canadian Northern Railway Company held at Toronto, Ont., on October 30, gross earnings of \$10,581,767 were reported and working expenses of \$7,015,405. Gross earnings increased nearly nine per cent. and net earnings over seventeen per cent. The average mileage operated was 3,013 miles compared with 2,866 miles in 1907-08.

The Grand Trunk Pacific Railway service hitherto established between Winnipeg and Wainwright has been extended as far west as Edmonton, Alta.

It was announced that the Intercolonial Railway Commission had decided to accept the uniform bill of lading authorized by the Railway Commission, which came into effect for other railways on October 1, 1909.

The Railway Commission held a number of sittings in Western Canada during November. It is the present practice for the Inspectors of the Board of Railway Commissioners to forward to the Superintendent or other official of the Railway Company interested, a copy of the report made by the Board's Inspector regarding station buildings and safety appliances. Hereafter, the Railway Official receiving the Inspector's report will acknowledge receipt direct to the Chief Operating Officer of the Board, advising him what action is being taken in connection therewith.

Street Railway earnings were heavy. The Montreal Street Railway Company published its annual report during November. Gross earnings for the year ended September 30, 1909, were \$3,874,838 an increase of \$197,406, while operating expenses were \$2,255,019 an increase of \$96,625. The number of passengers carried was 95,376,373, an increase of over 460,000. The Company operates 138 miles of track. The completion of the first year of actual operation of the Edmonton Municipal Street Railway occurred during November. The number of passengers carried showed

a steady increase throughout the year amounting in October to 242,266.

Navigation on the Great Lakes and St. Lawrence closed for the most part in the final week of the month, the date being several days later at most points than last year. The winter port season at Halifax, N. S., and St. John, N. B., opened and the outlook is for a busy winter. Prior to the close of navigation, long-shoremen, ship labourers, etc., had very active employment.

The volume of the lake commerce of the present season promises to be well up to the record which was established by the season of 1907.

Returns compiled by the Harbour Commission of Montreal, Que., show that over 12,000,000 bushels of grain were handled by the Commissioners' elevator this year, as compared with 8,661,350 bushels in 1908. There has been an increase of 20,000 tons in the tonnage of Transatlantic vessels.

The one hundredth anniversary of the inauguration of steam navigation on the St. Lawrence river was celebrated at Montreal, Que., on November 3, the "Accommodation", the first steam vessel to ply between Montreal and Quebec, having made her first departure from Montreal on November 3, 1809.

The following is a summary of traffic through the Sault Ste. Marie Canals during the month of October:

	U. S.	Canada.	Total.
Vessel Passages...No.	1,968	995	2,963
Regist'd Tonnage Net	4,644,258	2,955,190	7,599,448
<i>Freight—</i>			
East Bound Net tons	3,457,147	4,192,308	7,649,455
West Bound Net tons	1,162,846	314,939	1,477,785
Total Frgt., Net tons	4,619,993	4,507,247	9,127,240

The Trades.

Building.—The fine weather enabled building operations to be prosecuted with unusual activity at most points and this, taken in conjunction with the pronounced increase in the number and extent of contracts awarded during the past few months, made the month an exceptionally

busy one. Compared with preceding years, not since 1906 have building operations been on so extensive a scale at this period. The outside trades were becoming less active as the winter season approaches, but the inside trades were all well employed and the outlook is for an active winter season.

Metal and woodworking.—These trades were more active than during the preceding month and considerably more active than during the corresponding month of 1908.

Printing.—The allied trades on the whole had a good month.

Clothing.—Journeyman tailors were for the most part busy and garment workers, glove, hat and cap makers reported favourable conditions. Boot and shoe workers were still somewhat quiet.

Textile.—Cotton mill employés were working on short time. Other textile workers reported a good month.

Food and tobacco preparation.—Bakers, with the advent of cold weather, were more active. Confectioners were very busy. The outlook for the holiday trade in confectionery was reported excellent. Cigarmakers and tobacco workers were well employed.

Leather.—Tanners, curriers, etc., were fairly active, and leather workers had a good month.

Unskilled labour.—In the closing week of the month the shutting down of outside operations on street improvements, railway construction and other large undertakings threw a number of men out of work, but the favourable weather permitted outside activity to be maintained to an unusually late date, rendering the month, compared with the corresponding period in other years, a very favourable one. The outlook from the standpoint of unemployment during the winter months is favourable.

There was a pronounced shortage of domestic servants in almost all portions of the Dominion. The recent increase in activity in the lighter manufacturing industries has withdrawn a large number of young women from domestic service to employment in these establishments. Wages have been upward.

Canadian Trade and Revenue.

Foreign trade.—During October, 1909, the total value of imports entered for consumption was \$31,473,960 compared with \$27,659,360 in October, 1908. For the first seven months of the fiscal year ending October 31, 1909 the total value of imports entered for consumption was \$204,674,392 compared with \$170,121,114 in the corresponding months of 1908. The total value of domestic exports during October, 1909, was \$27,250,759, compared with \$26,299,212, in October, 1908. The total value of domestic exports during the first seven months ending October 31, 1909, was \$147,735,014, compared with \$136,408,263 in the corresponding period of 1908. During October there was an increase in exports of the mine, of the forest and of manufactures and a decrease in exports of products of the fisheries, animals and their produce and agriculture. The grand total of Canadian trade for October 1909, was \$62,417,394 compared with \$57,238,333 in October, 1908. For the first seven months of the present fiscal year, total Canadian trade was \$366,807,482 as against \$318,406,985 in the same period of 1908.

A good demand for agricultural implements was reported from Russia, for asbestos from Japan, for iron safes from Mexico and for apples from France.

Imperial trade.—Favourable markets for Canadian goods were reported by agents of the Department of Trade and Commerce in Great Britain and the various dominions of the Empire as follows: Great Britain: grain, cattle, timber, cider and leathers; Australasia: bacon, dairy produce, potatoes and seeds; South Africa: news print and apples; Newfoundland: rubber goods and flour.

Domestic trade.—Trade wholesale and retail, was buoyant during November and with favourable weather a heavy holiday turnover is anticipated. Winter lines have been slow in moving, owing to the prevailing mild weather, but small wares and notions have been in exceptionally good demand. General sales will total considerably higher than at the

same period last year. Groceries, provisions and leathers were moving freely. Real estate transactions were increasing and money, though still fairly easy, was in good demand.

The circulation of the chartered banks of Canada during October reached the highest point ever recorded. Seven of the banks availed themselves of the privileges accorded by the amendment to the Bank Act passed in 1907, by which an over issue is permitted to assist in the marketing of the harvest. The amount of extra currency thus rendered available this year was \$1,164,905 compared with \$290,254 last year. Discounts reflected the recent improvement in general trade, but call loans are considerably below the record of a year ago.

The earnings of the Bank of Montreal last year were the largest in its history, profits amounting to \$2,043,796. Deposits showed a very marked expansion, as well as call loans outside of Canada. The Eastern Townships Bank's fifty-first annual statement showed net earnings of \$390,535 compared with net profits last year of \$367,111.

Canadian Revenue.—Canadian revenue during November, 1909, amounted to \$8,748,923.20, compared with \$6,867,988.40 in November, 1908. For the eight months ending November 30, 1909, the total revenue was \$64,656,509.92, compared with \$55,115,227.17 in the corresponding months of 1908. The total expenditure on capital account during November, 1909, was \$3,450,781.71, compared with \$4,152,011.76 in November, 1908. For the eight months ending November 30, 1909, the total expenditure on capital account was \$20,646,866.45, compared with \$22,156,194.23 in the corresponding period of 1908. The leading items of expenditure on capital account during November, 1909, were: public works, railways and canals, \$2,740,453.58; railway subsidies, \$334,160; and bounties, \$226,099.45.

Notes.

A co-operative delivery association was under discussion by the Retail Merchants' Association of Guelph, Ont.

The sixth annual convention of the *Union of Manitoba Municipalities* was held at Portage la Prairie, November 24-25.

The formal opening of the *Locomotive Engineers' Building* at St. Thomas, Ont., was celebrated by a banquet during November.

A *Railway Enginemen's Educational Club* has been formed at Winnipeg, Man., for the purpose of hearing lectures appertaining to the operation of a train or locomotive.

On November 17, the *Dominion Commercial Travellers' Association* held a general meeting at Montreal, Que., at which Mr. S. J. Mathewson was re-elected president. It was reported that the membership had increased to 6,500, being 425 more than last year.

At the semi-annual meeting of the Board of Governors of the *Montreal Technical Institute*, satisfaction was expressed at the progress which had been made in the work of technical instruction by night schools. A total enrolment of 816 students for the present year was reported. Last year the total enrolment was 767.

An investigation is being made by the Department of Agriculture, Saskatchewan, into reports recently published of a serious *coal shortage* in the western portion of the province. The Department has de-patched the head of the statistical Branch, to make an investigation at Lethbridge, Taber and other mining points, with a view of fixing the responsibility for any shortage found to exist.

At London, Ont., the adoption of *Sunday street cars* is under discussion. At Port Arthur, Ont., the operation of the Port Arthur Elevator Company, on Sundays, in view of the fact that all the elevators at Fort William, and certain other elevators at Port Arthur are operated on Sunday during the grain rush, is being advocated by the Board of Trade.

Six serious *boiler explosions* occurred in Canada during October as follows:—At Aylmer, Ont., electric light and water plant; in the Turkish Bath hotel, Montreal; at the Chateau Frontenac, Quebec; in a sawmill at St. Clements and at Parker's Dye Works, Toronto. A loco-

motive boiler exploded at River Beau-dette, Que.

The *Canadian Bankers' Association* held its annual meeting in Montreal on Thursday, November 25. Officers were re-elected as follows: President, Sir Edward Clouston; vice-presidents, Duncan Coulson, George Burn, H. Stikeman, M. J. A. Pendergast; Council, B. E. Walker, E. F. Hebden, D. R. Wilkie, B. B. Stevenson, James MacKinnon, H. C. McLeod, James Elliott, N. E. Lavoie, G. P. Scholfield, C. A. Bogert, F. L. Pease, G. H. Balfour, E. L. Thorne, W. D. Ross.

The *Canada-West Indies Trade Commission*, which has been sitting this autumn at Toronto and Ottawa, has fulfilled the first part of its mission, namely the taking of evidence in Canada. The latter part of its investigation will be finished in the West Indies, where the commissioners will go in January next. As yet their report has not been made public.

Legislation at present in force empowers the Government to grant a bonus of three per cent. to *dry-dock companies* for twenty-years. A delegation representing shipping and shipbuilding interests recently petitioned the Government that the bonus be increased to four per cent. and the time extended to fifty years.

On September 24, the Charlton Saw-mill Company, at Collingwood, Ont., was convicted before Mr. W. A. Hogg, Police Magistrate, of Collingwood, of an infringement of the Alien Labour Act, and a fine of \$50 was imposed.

The balance sheet of the *Glance Bay, N. S., Co-operative Society, Limited*, for the quarter ending September 30, 1909, shows that business for the quarter amounted to \$21,456, compared with \$30,631 during the preceding quarter, and \$29,084 in the same quarter a year ago. Labour disturbances are held responsible for the falling off in business. Profits for the quarter enabled the payment of a six per cent. dividend.

It was reported from London, Eng., that the share of profits divisible among the British Columbia Electric Railway

Company's employés out of earnings of the year to June 30, 1909, would be \$50,000, the share for each employé being \$58.10. The bonus is paid to every employé of the Company who has been in the service of the Company from July 1 of the previous year continuously until the date of the payment of the bonus.

The City of Ottawa recently took out an insurance policy with the Canadian Railway Accident Insurance Company to protect itself against actions for damages that might be brought by any workmen injured in the connection with the construction of an aqueduct on Wellington Street. The staff at present numbers 100 men and the insurance costs \$1,050. The city has a similar policy covering the men engaged on its electrical plant. In the case of the aqueduct insurance a misunderstanding arose as to whether the Company should be liable as soon as an accident happened. The city solicitor has advised that the policy calls for the payment of money to the city and only after the injured workman has proved a claim.

The second session of the second *Legislative Assembly of Saskatchewan* was opened at Regina on November 18. The Lieutenant Governor of the Province in opening the session referred to the remarkable increase in the aggregate yield of grain, namely, from 9,000,000 to 200,000,000 bushels within the past ten years. The wheat crop of the Province for the present year is estimated at 80,000,000 bushels. The suitability for cereal production of a large area of new land in the South-western part of the Province was also pointed out. The hope was expressed that building operations in connection with the proposed Hudson Bay Railway would be commenced at an early date. The question of branch railway extensions was mentioned as the most pressing problem of the Province. A Factories Act and a Public Health Act will be introduced during the present session.

The inspectors of Dominion penitentiaries in their latest report to the Government, refer to the *convict labour* problem as follows:

The rapid increase in population intensifies the labour difficulty and makes it necessary to decide upon some solution without delay. The question of prison labour is not one of policy. Labour is imposed as a part of the sentence and is as obligatory as detention. The only question of policy involved is that of determining the kind of labour to be adopted. The work required to maintain the institutions provides employment for about one-half the prison population. If the other half is to be employed, as the sentences require, what employment shall be adopted.

So far as we can see, there are but three courses open for consideration.

1. To maintain the convicts in idleness or semi-idleness, in defiance of the sentence and at the expense of the tax-payers.

2. To establish industries and dispose of the products on the open market.

3. That the government shall utilize the labour of its wards in providing for its own requirements.

The objections to the first and second proposals are obvious, but we can see no valid or reasonable objection to the suggestion that articles required for the various departments of the government should be provided by the labour of those who are maintained at public expense. In a previous report (1905) we called attention to the policy adopted by the Legislature of the State of New York and subsequently embodied in the constitution of that state. We understand that the statute was drafted after consultation with, and with the concurrence of representatives of the manufacturing and labour interests, and that its operation is entirely satisfactory to both.

The present condition of our penitentiaries makes the question an urgent one, and we respectfully submit it for your consideration.

With respect to the proposed new Technical High School at Toronto a deputation of trustees and officials who recently visited United States cities, advise the addition of ten new courses and place the number of rooms necessary in the new school at 67. The new courses advised for adoption are: Carpentry, wood turning, pattern making, forging, foundry practice, machine shop practice, plumbing, sheet metal work, printing, design as applied to textile, etc. The committee also advise that the new Technical School include the following rooms: Elemental chemical laboratory, quantitative analysis laboratory, qualitative analysis laboratory, elementary physics laboratory, electrical laboratory, dynamo laboratory, steam engineering laboratory, applied mechanics rooms, chemical lecture room, physical lecture room, two freehand drawing rooms, room for drawing from cast, applied design room, clay modeling room, molding room, wood carving room, printing room, two mechanical drawing rooms, machine drawing room, architectural drawing room, three kitchens, model dining-room

and kitchen, laundry, hand sewing-room, machine sewing-room, dressmaking room, millinery room, library and reading room, commercial exhibit room, auditorium to seat 800 people, gynasium, offices thirty class rooms, recreation, assembling, bicycle and lunch-rooms in the basement.

The second session of the eleventh *Parliament of Canada* was opened on November 11. The speech from the Throne referred to the steady and progressive growth of the present year, the increase in the trade and revenue and immigration arrivals, and the rapid recovery from the financial embarrassment following the depression of 1907-08. A reference to the rapid progress made on the construction of the National Transcontinental Railway and to the plans for the reconstruction of the Quebec Bridge was made. Among legislation which will be introduced in the present session will be a Bill for the organization of a Canadian naval service, a Bill confirming the new convention respecting commercial relations between France and Canada, a Bill to sanction the leasing of branch lines to the Intercolonial Railway System, and a measure to render more effective the present legislation respecting combines which unduly enhance prices. A report of the exploratory survey for the railway from the Western wheat fields to Hudson Bay will be presented to Parliament.

The annual meeting of the Provincial *Lord's Day Alliance* for Quebec was held at Montreal, Que., on November, Que., on November 9. The Rev. W. R. Young, D.D., was elected President and the Rev. George Mingie, M. A., Secretary. In the annual report of the Secretary it was stated that though the advance had not been as great as had been wished, there were many reasons for hopefulness. The most perplexing problem has been that of the moving picture shows and the enforcement of the Act with regard to the railways. The Provincial Lord's Day Alliance for Ontario held its annual meeting on November 12, the Right Rev. J. F. Sweemey, D. D., Bishop of Toronto being elected President. The report of the Executive Committee dealt

with the Electric Railway Act which fixed the running of cars on Sundays within well defined limitations. Sunday labour on railway construction was stated to have been practically stopped while railway and steamship companies have lessened their Sunday labour, though a large number of trainmen and longshoremen are still without rest on Sundays. The increase in the use of motor cars on Sunday was stated to have caused an increase in the sale of gasoline on that day. The committee also referred to the sale of Sunday papers, Sunday sales of ice cream and soft drinks, the operation of cement work on Sundays and other subjects.

After a retirement lasting nearly twelve hours, the jury empanelled to enquire into the causes of the explosion in No. 2 Extension mine on October 5, brought in its verdict on November 2. The jury had three full days' evidence to consider. The inquiry made was of a thorough nature. Besides the expert testimony of the Chief Inspector of Mines, the government engaged the services of the provincial mineralogist, and of an eminent English coal mining expert. Counsel represented the Government and the Company, and on behalf of some of the families of the victims was a representative accorded the privilege of the court. The evidence in the sworn depositions of the witnesses, as taken down by the court stenographer covered forty columns of newspaper type, and elaborate plans assisted the jury to understand the evidence. The verdict was as follows:

"We, the jury empanelled to inquire into the cause of the explosion which took place at No. 2 Extension mine, on October 5, 1909, have come to the conclusion, after investigating the evidence of the different sworn witnesses, find that the explosion was caused by a cave-in in the 2½ level. Gas being present in the atmosphere, gas and dust being liberated by the cave-in, the sudden displacement of air creating the compression, causing the partly changed atmosphere to become dangerous, and coming in contact with naked lights to explode. Taking into consideration the unnatural and faulty conditions of the roof of this particular cave, and in view of the fact of no evidence to show of bad timbering, we can in no way hold the Company responsible, and therefore exonerate the Company from criminal negligence.

Taking into consideration the volume of work entailed in this particular department, and after taking from the statements of the Chief Inspector of Mines, and evidence in general, we are of the opinion that the coast district being so large, it is impossible to make as thorough or systematic inspection as is absolutely necessary. We, therefore, recommend that the staff be increased, and that every colliery in British Columbia be compelled to

equip its mines with up-to-date oxygen life-saving apparatus."

Important *Customs Regulations* have been promulgated in the *Canada Gazette* and the following articles used as materials in Canadian manufactures are transferred to the free list.

A. Metallic elements and tungstic acid when imported by manufacturers for use only in their own factories in the manufacture of metal filaments for electric lamps.

B. Twine or yarn of paper when imported by manufacturers for the purpose of being woven into fabrics in their own factories.

C. Steel imported for manufacturers for use in their own factories in manufacturing rough unfinished parts of rifles, when such parts are to be used in rifles, to be made for the Government of Canada.

D. Gun barrels, in single tubes, forged, rough bored.

E. Antimony Salts for use in dyeing.

F. Hyposulphite of Soda when imported by Tanners for use in their own factories in the tanning of leather.

G. Rolled iron in rods not over half an inch in diameter or in width, to be manufactured into horseshoe-nails, when imported by manufacturers of such nails.

Duties are reduced in the following cases:

A. Cold rolled sheets or plates of steel with sheared edges over fourteen gauge and not less than one and one-half inches wide, when imported by manufacturers of mower bars, hinges, typewriters and sewing machines, for use only in the manufacture of the said articles in their own factories. Under the preferential tariff, five per cent., *ad valorem*; intermediate, seven and one-half per cent.; general, ten per cent.

B. Preparations made for pyroxylin and wood naphtha when imported by manufacturers for use only in their own factories in the coating of imitation leather. Preference five per cent., *ad valorem*; immediate, seven and one-half per cent.; general, ten per cent.

C. Coated or sized cloth when imported by manufacturers for use only in their own factories in manufacturing sensitized blue or black print cloth. Preference ten per cent., *ad valorem*; intermediate, twelve and one-half per cent.; general, fifteen per cent.

The appropriation of \$600,000 made by the Alberta legislature for the extension of the *provincial telephone system* has been already nearly exhausted, so great has been the expenditure on new

lines for this year. Of rural line, 500 miles have been completed radiating from various points in the Province. This has given telephone connection to 500 farmers. If fine weather continues for another month or six weeks it is expected that another 200 miles of rural lines connecting 200 farmers' telephones will be completed. Of the long-distance pole lines 150 miles have been constructed. Another phase of the work, has been the construction of a proposed Calgary-Gleichen toll line, also an extra wire circuit from Macleod to Coleman to accommodate the business which will arise when the connection with Kootenay Telephone Company in British Columbia is made. New toll offices have been opened at Botha, Frankburg, Handisty, Lougheed, Three Hills, Trochu, Cooking Lake, Ministik and Tofield. New local exchanges have been opened at Sedge-wick, Bowden and Granum. Large increases of business have necessitated reconstruction of the exchanges at Medicine Hat, Wetaskiwin, Claresholm, Lloydminster and Nanton. At Lethbridge it has been found advisable to install a full new automatic system, likewise an automatic branch exchange in the east end of Calgary.

During the past few months a number of convictions have been made by Police Magistrates in different cities of the Dominion under the act for the suppression of the opium traffic passed at the session of the Parliament of Canada, held in 1908. At Toronto, London, Winnipeg and New Westminster and other points, fines were imposed and vigorous action taken for the closing of opium dens.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N. S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continued to improve throughout the month, and general

activity prevailed all over the district. The coal, iron, and steel trades were very busy, and all skilled artisans were relatively active. The tone of business, especially in Sydney, was buoyant, and compared with conditions this time last year were much more settled. At that time the two largest companies of the Province were settling a dispute in the courts and the labour market was un-

favourable. A spirit of depression seemed to have seized upon all trades and classes. But now the Coal and Steel Companies have merged their interest, while labour difficulties are disappearing.

The coal trade was very active and the collieries unaffected by the strike conditions were operated to their utmost capacity. The output of the Dominion Collieries for October was 205,000 tons. The November output was much larger. Twelve collieries are operated by the Dominion Coal Company, and of this number only one is idle. No. 1 Colliery will beat last year's output by at least 20,000 tons. Banking in the coal heaps will begin at an early date, the amount to be placed in the heaps to be just as great as last year.

The Nova Scotia Steel and Coal Company continued very active, all departments having being able to market all of their iron and steel products. The output of coal for this year exceeds that of 1908 by 103,000 tons. Much of this large increase comes from the collieries lately opened up. The prospects for the winter are good. Upwards of 130,000 tons of coal will be placed in the heaps this winter.

Port Hood Coal Company had a very good year, and prospects for the winter trade are also good.

The Inverness Coal Company had a busy month and produced on an average 1,000 tons per day. With favourable weather, this colliery will run steadily all winter.

The Dominion Iron and Steel Company was very active. All departments were busy and new records were created, in some of them. Construction work is being rushed ahead. The Company reports a great demand for its products, and their market is widening fast.

The building trades were very active, five or six new buildings having being started in Sydney during the month.

Transportation by rail was fairly heavy.

While shipping was fairly heavy, yet the tonnage for the year was less than in 1908. A comparison with the previous two years shows that Louisburg has suffered the greatest decline.

Wholesale and retail trade was very active.

CONDITION OF LOCAL INDUSTRIES.

Fishing was not as remunerative this year as in 1908.

CONDITION OF PARTICULAR TRADES.

Activity prevailed in the various skilled trades and among unskilled labourers.

WESTVILLE, N. S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Favourable conditions prevailed in the labour market during November, all the leading industries working steadily and the collieries full time. The output of the latter showed an increase compared with the year 1908, the shipments of coal in October, 1909, being about 13,000 tons above those of the corresponding month of last year. Traffic by water has closed for the season. Wholesale and retail trade were good. There was no unrest in the labour market. The outlook is favourable for a continuation of steady employment. The technical schools were well under way and will continue active for the winter season.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This industry was quiet, the chief employment of the farmers being the marketing of farm produce which finds a ready sale at good prices. Butter and fresh eggs were very scarce.

Fishing.—Salmon and smelt fishing were being actively pursued.

Lumbering.—Activity prevailed, and there was a demand for a large number of men for work in the woods.

Manufacturing.—Manufacturing establishment were generally busy. It was reported, however, that the Sutherland Rifle Sight Company discharged some ten workmen for a few days and also the

Standard Drain Pipe Company some twenty men, but it was stated that all had been re-employed by the end of the month.

CONDITION OF PARTICULAR TRADES.

The outside building trades were quiet but the indoor trades had a fair month. Blacksmiths and horseshoers had a fair month and the other metal trades an active one. The printing and miscellaneous trades reported fair conditions, while the clothing and food and tobacco branches had a good month. Street railway employés, teamsters and expressmen were active. Unskilled labour was active.

HALIFAX, N. S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month was not as active as in the corresponding month of 1908. Work in the building line was in most instances of a finishing nature and fewer hands were employed. Both the large public schools are well advanced, the bulk of the work being on the interiors. The new cathedral has advanced several stages, the roof slating and inside work receiving much attention, while the Post Office repairs and convent addition are in the hands of the plasterers and inside decorators. The building permits issued have for the most part been for work of comparatively unimportant character, with two exceptions, one being for alterations and extensions to the Royal Bank of Canada to the extent of \$60,000 and the other for the erection of an engineering laboratory, which is being built as an annex to the Technical College at a cost of \$10,000. The latter institution is now open and is being well attended.

Work along the waterfront during the past month has been fairly good, but great activity is expected to prevail during the coming month. In grain shipments a large increase over previous years

is already assumed. The Furness Witby Co., who have been appointed agents for the Allan line of steamers, have already secured space in the grain elevator for 250,000 bushels, and it is calculated that before the season is ended upwards of 1,000,000 bushels will pass through. During 1908, some 200,000 bushels were shipped from this port to Mexico and an increased output should necessarily follow during 1910. This is a more cheerful outlook, since, with the exception of last season's shipment, it is some years since grain in any quantity has been shipped from here. The first cargo of grain, 24,000 bushels, left this port November 18, for Liverpool via St. Johns Newfoundland.

Apple shipments are already beginning to reach large proportions. On November 11, some 31,000 bushels were sent via the Elder-Dempster line to South Africa, and other shipments are expected to follow. Some ten days previously, 26,000 barrels were shipped to London from this port, and 10,000 barrels forwarded from Annapolis; with the large apple crop other large shipments are being arranged for.

The first mail boat of the season, R. M. S. Virginian, arrived on the 19th inst. She brought 530 tons of cargo, thirty-five first, seventy-eight second, and 407 third class passengers. In 1905 the first boat brought 332 passengers. In 1906, 377 passengers were on the first boat. Last year the first Allan liner brought 189. It will be seen that the number of passengers on the first boat were larger than for some years past, except in 1907, when 936 came. Officials at the government piers expect the record for 1909-10 to exceed that of any year since 1903.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There have been no material changes in prices, except in eggs, which have advanced, and are now retailing as high as 45 cents and 50 cents per dozen. Potatoes range (in large quantities) from 36 cents to 38 cents per bushel; turnips 27 cents to 30 cents.

Fishing.—Some big takes of mackerel were made late in October, but during the

present month local fishermen have made but average catches. Most of the fish were shipped to Boston.

Manufacturing has fallen off as compared with October. The Acadia Sugar Refinery laid off about 100 employés early in the month, and it is stated that they will not resume full operations for some time.

Mining has been about normal. The Dominion Mining Company, report a yield during seventeen day's crushing of 183 ounces, worth about \$3,500.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a fair month; also carpenters. Lathers and plasterers had a better month than usual, with prospects fair. Painters had an average month considering the season. Plumbers had a fairly good month. Gas fitters were well employed. Stone cutters had a fairly good month, above the average for November. Builders' labourers were well employed. Electrical workers were fairly active; sheet metal workers were busy. Boilermakers were dull, with other metal lines normal. Printers, pressmen and bookbinders were well employed. Tailors were dull, but the trade will become busier during December. Bakers and confectioners had an average month, with prospects good. Barbers had a fair month. Freight handlers, maintenance of way men and station clerks had a fair month. Street railway employés had a good month. Freight handlers and longshoremen had a fair month. Unskilled labour was fairly active.

AMHERST, N. S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been a revival of industrial activity during the past few months. The factories have all been running steadily and a number of them have been working over-time. The McLean Milling Company has its new brick plant well towards completion. The Amherst

Worsted Company started active operations this month and will at the outset employ twenty hands. The Malleable Iron Company after two years of idleness is running to full capacity, employing fifty hands and expecting to augment this force shortly. The three above industries are all being supplied by electric power from the Maritime Coal Railway and Power Company so that their activity is proving beneficial to the latter Company.

The wholesale houses reported business well up to the average. Retailers reported business rather quiet, but this is due to bad roads and the season of the year. No material change was reported in wages. The strike at Springhill still continues; the United Mine Workers of America are furnishing relief funds to the strikers. The executive of the organization will pay double relief for the purpose of supplying the miners with winter necessities.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvests were good and produce commands good prices.

Lumbering.—Extensive preparations are being made for the coming winter. It is as yet impossible to say what the cut will be this season, but there are more men at present in the lumber camps than at any time for two years past.

Manufacturing.—Heads of industries all report conditions improved. More men are employed than at any time for two years and the prospects for a good winter's work are excellent.

Mining.—With the exception of Springhill the coal mining centres are all active, working full time and the outputs steadily increasing.

The plaster quarries at Amherst Point are still working actively and are shipping large quantities to New York where this product commands a ready market.

The stone quarries at Wallace have closed down for the winter. Both Companies report a steady summer's work with prospects good for next year.

CONDITION OF PARTICULAR TRADES.

The building of the McLean Milling Company's new building gave the local

bricklayers a busy month. Carpenters and joiners have been fairly well employed. Lathers and plasterers reported business dull; the same applies to painters. Plumbers have been busy. Stone cutters were out of work for the season.

Iron moulders were busy in the majority of industries. Machinists were well employed and boilermakers were working overtime.

Woodworkers were fairly busy, car builders are still largely out of employment but expect work to start early in December. Pattern makers were reported to be busy.

Printers reported a busy month but the local supply is still sufficient to meet the demand.

Journeyman tailors had a busy month. Garment makers were also busy. Boot and shoe makers were steadily employed.

Bakers and confectioners were busy. Butchers and meat cutters reported business brisk.

Trunk and bag makers were busy.

Barbers were busy. Furriers were working overtime.

Conditions among unskilled labourers considering the season of the year were better than last year, but the local supply was sufficient to meet all demands.

CHARLOTTETOWN, P. E. I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market in November differed from that of October in that the supply showed an increase over the demand, a natural condition at this time of year. Work on the new railway wharf and freight sheds closed down for the season at the last of the month. These works gave employment to a large number of men during the autumn. A number of other contracts, including wharves, breakwaters, etc., were discontinued for the season. In Charlottetown the new railway roundhouse and the Bank of Commerce are nearly completed. Good crops and good prices have given an optimistic tone to business.

Both wholesale and retail merchants report sales and collections satisfactory. Extensive repairs are being made to the plant formerly occupied by the Dominion Packing Company, but now by Davis and Fraser, who are entering into an arrangement with the Government, whereby cold storage will be provided for the general public. Work at this building furnishes employment to a number of men.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of the month found all crops gathered in and a considerable quantity shipped. Owing to the unusually protracted mild weather, the movement in meat and poultry was slower than usual.

Fishing.—Oyster fishing was carried on up to the close of the month but in other branches operations were discontinued about the middle of the month.

Railroad construction and employment.—Beyond the works above mentioned there was nothing to note under this head, supply and demand being well balanced.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, decorators and paper hangers, gas and steam fitters, stone cutters and builders, labourers were active. Plumbers were busy.

Iron moulders, workers and helpers, machinists and engineers, steam engineers electrical workers, sheet metal workers, were active. Bicycle workers had a dull month.

Woodworkers, upholsterers, carriage and wagon makers, and car builders, were active.

The printing, clothing, food and tobacco preparation, leather, transport and miscellaneous trades were active. There was a fair demand for unskilled labour.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during November has been

fairly active, fine and mild weather for the season having facilitated the carrying on of outdoor operations. Contractors have been enabled in most cases to complete their contracts, and much repair work has been done. Consequently, carpenters and builders' labourers have been in fair demand. Work upon streets and sidewalks has been actively carried on, a large number of men being employed. The Board of Works Department announce that \$28,394 has been spent in this way, 6,500 feet of street being macadamized, 1,100 feet paved with blocks and 1,700 feet of permanent sidewalk laid down. Legislation will be asked to empower the City Council to collect fifty per cent. of the cost of granolithic sidewalks from citizens who desire the same along their fronts in 1910. Electric signal gongs have also been placed by the Intercolonial Railway Company Management at the various railway crossings in the city, excepting Main Street which is to be protected by gates. Local Manufacturing Companies all report a favourable month for the season. The Dominion Textile Company commencing with November 1st, reduced the working hours of their operatives from sixty hours per week to forty-nine hours. About 250 hands are employed in the factory here, fifty of whom are men and boys. Hours are from 7.30 a.m. to 5.30 p.m., with four hours Saturday. The pay-roll is \$3,000 fortnightly. The New Brunswick Wire Fence Company is building an extension 175 by thirty-five for offices and store room. They report a very successful season with sales among farmers showing an increase of twenty per cent. over last year. The Marvin Biscuit Company has made some reductions in staff as is usual at this season. Thirty operatives are now employed from 7 a.m. to 6 p.m., with a weekly pay-roll of \$240.

The barrel factory staff has also been reduced, thirty hands being now employed. Owing to the increased demand for sugar in bags the demand for barrels has fallen off and the Company is calling for only 2,000 cords of stove wood against 4,500 on previous seasons. The estimates upon the Transcontinental Railway in New Brunswick for October was \$425,800.

Owing to the excessively wet weather work was much retarded. The staff has been reduced and will soon be on a winter footing. Wholesale and retail trade has been fairly satisfactory. Customs returns, for Moncton Port during October showed collections of \$7,288 against \$6,356 in October 1908. The demand for houses has fallen somewhat and a wider choice is available. Rents consequently are lower. Bank collections have been fair and real estate slow but firm. No further changes in hours of labour or rates of wages were reported. Relations between employers and employés have been cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy ploughing and on general fall work, weather being more favourable than in October. High tides the first of the month again flooded the marshes and broke the dykes in a number of places. Grain crops upon threshing were found not up to expectation. Potatoes are offered at 35 cents per bushel, oats at 50 cents, buckwheat meal at \$2.25 per cwt, hay at \$10.00 to \$12.00, pork at 10 cents per carcass, butter at 24 cents to 28 cents and eggs at 20 cents per dozen.

Fishing.—Smelt fishing was commenced, but only small catches were made.

Lumbering.—This industry was fairly active and there was a demand for capable men at wages of \$22. to \$28 per month.

Mining.—The Maritime Oilfields Company has suspended operations for the winter.

CONDITION OF PARTICULAR TRADES.

Active conditions prevailed in most of the various trades. Railroad crews were in fair demand and very good time was made in many cases. Trainmen, trackmen and switchmen were busy. For unskilled labour, the demand was fair on odd jobs preparatory to winter at wages \$1.25 to \$1.50 per day. The supply is dependent upon local sources and but few unemployed were found.

ST. JOHN, N. B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With the opening of the winter port service, business in all lines has been given an impetus. The weather has been mild, and outdoor work has been carried on as in mid-summer.

The Portland Rolling Mills, which had been closed down for about three weeks, started operations again November 13. The Bank of New Brunswick intends to open a branch in New Glasgow, N. S., in a short time. Bank clearings for the five weeks ending November 25 were \$7,795,751 and for the corresponding period last year \$7,029,213 being \$766,538 greater in 1909 than in 1908, and \$1,740,017 in excess of the four weeks ending October 21 of the current year. The city cashier paid out \$17,729.20 to officials and employes for the four weeks ending November 25.

The following are retail prices prevailing: Turkeys, 22 to 24 cents per lb; chickens, 90 cents to \$1.50 per pair; fowl, 75 cents to \$1.10; geese, \$1.25 each; black duck, 75 cents per pair; domestic duck, \$1.50; venison and moose, 16 to 20 cents per lb; veal 14 to 16 cents per lb; lamb, 10 to 16 cents per lb; beef, 16 to 18 cents per lb; fresh pork, 15 cents per lb; rabbits, 25 cents per pair; ham and bacon, 16 to 20 cents; butter, 25 to 30 cents per lb; eggs, 26 to 38 cents per dozen; potatoes, \$1.50 per barrel; celery, 10 cents per bunch; turnips, 80 cents per barrel; squash, 2 cents per lb; parsnips, \$1.75 per barrel; onions, 5 cents per lb; carrots, 20 cents per peck; lettuce, 5 cents per bunch; pumpkins, 2 cents per lb; cabbage, 50 cents per dozen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Advices from Hartland state that oats are being handled in fairly large quantities at 35 cents per bushel. Hay is scarce, and sells at \$9.25 to \$10.50. Butter is plentiful at 22 and 23 cents per lb., while eggs are scarce at 23 cents.

George Fawcett of Sackville, has shipped this year 11,000 bushels of potatoes, most of them going to Montreal and Toronto, although he has sent one carload to the Cobalt mines, another to Bermuda, and one to Cuba. The shipments from St. John to Cuba for the week ending November 27 will total 20,000 barrels of potatoes, and it is announced that a Victoria county dealer, will ship 1,000 barrels per week during the coming winter. The Provincial Department of Agriculture has a warehouse at Havana for the use of shippers from this province, and Dewitt Bros., of St. John, have opened a retail potato business in Havana of their own.

Fishing.—J. F. Belyea, inspector of fisheries, says that the local fishermen have disposed of their catch of alewives. They had been sold to Halifax through local parties at an average price of \$3 per barrel. The catch will be between 9,000 and 10,000 barrels. The salmon catch was not up to the average last year but sold at good prices. The weather conditions were favorable for shad fishing, but the catch was not above the average of the last twenty years, although better than the total of the past two years. The small herring or sardines, used chiefly for lobster bait, were scarce, but the exceptional price of from \$6 to \$8 per hogshead was obtained.

Lumbering.—The St. George Greetings says: "The New River Lumber Company have about one hundred men in the woods, and are engaged in building dams, blowing rocks, and various other work connected with the large lumbering operations to be carried on at this point. The mill will soon be under construction. Men are now working on the foundation."

The lumber cut on the Tobique River this year will be about 30,000,000 feet, about half as much again as last year. The Barker Lumber Company, of Boston, has purchased an interest in the lumber Company of James McNair, of Red Rapids, Victoria County, and the business is being reorganized as a joint stock Company. The proposed capital stock is \$24,000 and the chief place of business will be in the parish of Gordon, Victoria County.

Mining.—Montreal capitalists interested in the copper deposits at Martin Head are making preparations to develop the property. The property is located on the shore of the Bay of Fundy.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners were active, with painters and decorators, quiet. Plumbers, gas and steam fitters, and stone cutters were active. Builders' labourers were quiet. The metal and woodworking trades were from active to busy.

Printers, pressmen and bookbinders, journeymen tailors, bakers and confectioners and cigar makers were busy. Broom and brush makers were active.

Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen, and freight handlers, steamboat men and firemen, ship labourers, street railway employés, were busy, with teamsters and expressmen active.

Unskilled labour was active.

DISTRICT NOTES.

Fredericton.—Good progress is being made upon the erection of the Bank of New Brunswick's new building on Queen Street. It is expected that the building will be ready for occupancy early in the new year.

Sackville.—The enlargement of the Electric Light Company's power house is now completed, and the new boiler, dynamos, etc., are in full operation.

NEWCASTLE, N. B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during November has been active. There have been fewer idle men this fall after the mills closed than usual, a number of the men employed at the mills going to work on the branch line for the Drummond Company where they will

have work most of the winter. The season has been wet; this has delayed outside work generally. Wages are fair, viz: \$1.50-\$1.75 per day of ten hours.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is not much work at present. There has been very open weather.

Lumbering.—Trade is active, large numbers of men going into the woods every day, but the work has been retarded by the heavy rains; streams are very high and the ground is soft for hauling.

CONDITION OF PARTICULAR TRADES.

The building trade has been very active. The demand for skilled men was greater than the supply, and a number of men had to be brought in. A large skating and curling rink is being built; it will cost about four thousand dollars.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and E. Little, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of November was on the whole less active than October, outdoor employment having fallen off through weather conditions. In the building trades about one third of the month was suitable for outdoor work and the various trades were very busy during that interval. During the rest of the month, however, the outside branches were dull. Immediately prior to the close of navigation the coasting trade was, as usual very busy. The annexation of the municipality of Limolou was under discussion. A contract for the construction of the new ferry boats was given out; the boats will be of steel and will be built by the G. T. Davie & Sons Company at St. Joseph de Lévis. (*)

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had an exceptionally favourable month for

ploughing, frosts having held off until after the middle of the month. Notwithstanding the abundant yields, prices for farm produce have remained exceptionally high.

Lumbering.—The saw-mills have all closed down and the men were leaving for the winter's work in the woods.

Railroad construction.—The new branch of the Canadian Northern Railway between Limolou and the Montmorency river is about completed, but has not been opened for traffic pending the settlement of certain differences with the municipalities through which it passes.

CONDITION OF PARTICULAR TRADES.

The inside building trades had a good month, but the outside branches were interfered with by weather conditions. The metal trades had a fair month with the exception of machinists and engineers who were quiet. The woodworking trades were busy. The printing and clothing trades were active with the exception of boot and shoe workers who were quiet. Cigar makers and tanners were also quiet. Railway employés were busy, but steamboat men were dull, nearly all of the boats having gone into winter quarters in the closing part of the month. Longshoremen were busy during the closing days of the season and ship labourers were quiet. The supply of unskilled labour was in excess of the demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A decline in general employment took effect during the month of November which was less active than October, due largely to the cessation of out-door operations and the closing down of the saw-mills for the year. Compared with the corresponding period of 1908, the month was more active. The building trade was still active. Business although less active than in October showed an improve-

ment over November 1908. Rates of wages, hours of labour remained unchanged and the labour market was free from unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing, hauling grain and hay to market and fall ploughing furnished the chief occupation.

Fishing was quiet.

Lumbering.—The sawmills closed down for the season, but the firm immediately hired men to go up to the bush.

Manufacturing.—This industry experienced a busy month.

Railroad construction was rather quiet. Other industries were active for the season.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers and plasterers, painters, decorators and paperhangers and plumbers were very busy up to the last week of the month. Gas and steam fitters, stone cutters and builders' labourers were also active.

Iron moulders, iron workers and helpers, coremakers, machinist and engineers had in general a quiet month on account of the burning down of the foundry and shop of the Canada Iron Corporation. Blacksmiths and horseshoers were rather active. Jewellers reported as quiet month.

Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers were active. Pattern makers experienced dullness.

The printing and allied trades were active.

Journeymen tailors, garment workers and glove makers were active. Boot and shoe workers were not quiet so active as the others.

Bakers and confectioners, butchers and meat cutters were busy. Cigar makers and tobacco workers were active, but ice cutters and drivers had a poor month.

Quiet conditions prevailed among leather workers.

Barbers had a fair month; other miscellaneous trades were active.

Busy conditions prevailed in the railway branches. Steamboat employées were very busy, navigation closing only in the last day of the month. Cab drivers hackmen, carters, draymen, teamsters and expressmen were active.

Unskilled labour was well employed till the last week of the month when a decline in the demand occurred.

SHERBROOKE, QUE. AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during November have been active. This has been brought about by the fine weather whereby outside work was carried on without interruption. Orders have kept the machine shops busy. In the Jenckes Machine Shop extra men have been taken on and overtime is being worked. All other industries are fully employed, and there will be no cessation from labour other than that which follows when the winter sets in. The new structural steel concern has started with several heavy orders. Wholesale and retail trade is good. The Board of Trade intends starting a campaign to interest outside concerns to locate here, and the question of appointing an industrial commissioner is now before the City Council. There have been no changes in wages and no unrest during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The open weather has allowed the farmers to do more outside work than for some years past and as a result a much larger area has been ploughed and cleared than in any previous season. Stock has been left out much longer than usual, so that the hay shortage will not be felt as was anticipated earlier in the season.

Lumbering.—Lumbermen are waiting for snow. Men have already gone into the woods and the wages paid are about the same as last year.

Manufacturing.—All industries were running full time.

Mining.—Operations are still being carried on and some of the large concerns will have their asbestos mills running all winter. Several new properties are being opened up, and this gives employment to a large number of men.

Railroad construction.—Work on the extension of the yard at the Canadian Pacific Railway station is still being carried on with a large gang of men.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade have been busy.

Machinists, iron workers and moulders were busy, electrical workers were active with blacksmiths and horseshoers busy.

The woodworking trades were also busy. The printing trade was fairly active.

Journeymen tailors and garments workers. Bakers, butchers and cigar makers were active.

Railway employées were busy.

Unskilled labourers were in good demand.

DISTRICT NOTES.

Lake Megantic.—The big mill of the Lake Megantic Lumber Company closed down the night gang. The mill will still be kept running during the day until the logs at the slips are cut up or cold weather interferes with the work. The mill of the Lake Megantic Lumber Company, at Megantic, shut down for the season, and the crew have all been paid off.

Waterville.—George Gale & Son's factory is being rushed this autumn to fill orders. The Company is running night and day most of the time.

Covansville.—The amount of business being done by the merchants of the village is considerably larger than that done last year at this date.

Graniteville.—The granite industry is very active for this time of the year, several carloads being shipped daily.

Farnham.—The Canadian Pacific Railway shops are at present occupied by about ten men who are finishing all work on hand. A very few of the men have accepted positions elsewhere, a large

number of men could not afford to pay Montreal rent at the wages offered.

ST. JOHNS, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active, work being advanced as rapidly as as possible. The Canadian Pacific Railway Company commenced the erection of its new bridge over the Richelieu river. A temporary structure has been put up in order to remove the wooden bridge and replace it with an iron one, double tracked. Over 100 men were engaged in this work. It was stated that trains would be able to use this temporary bridge within two weeks. The Grand Trunk Railway Company was preparing to re-build its bridge over the Richelieu. The city and the harbour authorities ask that all of the first portion shall pass over the wharves on arches or pillars so as not to interfere with the traffic nor with the beauty, nor with the usefulness of the port, but the company dissents. The work being done for the Government on the wharves has, owing to this division in opinion, been discontinued, to recommence as early in the spring as possible. By that time an agreement will probably have been reached.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy marketing their produce which commanded high prices.

Manufacturing.—With the exception of the Singer Company, which still remains quiet, manufactories were busy. The Corticelli Silk Company increased its staff slightly. Sash and door factories, the potteries, the Standard Drain Pipe factory, foundry and machine shops and agricultural implement plants as well as other smaller factories were active, the outlook for the winter being hopeful.

CONDITION OF PARTICULAR TRADES.

Stone cutters were fairly busy, but the other building trades were quiet. The metal trades were active, with the exception of iron shipbuilders and caulkers who were dull. Woodworkers reported a fair month. All branches of the printing trade were employed. The clothing trades were fairly well employed, while food and tobacco branches were busy. A good month was reported by the transport trades.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. V. Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market were active during November. Although activity in the building trades slackened through seasonal causes, employment was fairly satisfactory. The improvements on the cathedral were advancing rapidly; the stone work is nearly completed and the work inside is being pushed, a large number of hands being employed. A large number of workmen were also employed on the addition to the Seminary of St. Hyacinthe; this work will continue throughout the winter. Sash and door factories had a good month, employing full staffs. The iron works were quiet, but were more active than during the corresponding month of last year. Boot and shoe factories were very busy, the outlook for the balance of the season being satisfactory. The tanneries were very busy. Garment working establishments were fairly active giving work to full staffs. The organ factory was very busy, several improvements being made owing to the heavy orders received. The Penman factory gave continuous employment. During the month a factory was opened for the manufacture of oiled leather goods and lumbermen's footwear, employing about thirty hands. Retail trade was fair. Wholesale trade showed an increase, but business was slow in

regaining normal activity on account of the heavy cost of the necessities of life. Banks reported a good month, collections being easy.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions in this industry were very active. Fall work of all kind was well advanced. The supply of labour equalled the demand. Prices of farm produce were high and sales easy. Pork advanced from fifteen to sixteen cents per pound, eggs sold for thirty-five cents per dozen, with other commodities in proportion.

CONDITION OF PARTICULAR TRADES.

The building trades had a fairly good month, and the metal and woodworking trades were fully employed. The printing and allied trades reported active conditions. The clothing and food and tobacco preparation branches were well employed. Activity prevailed in the leather trades. Barbers, clerks, delivery employés, hotel, restaurant and laundry workers were fully employed. Railway employés were busy and the other branches of the transport trades active. Unskilled labour had a fairly good month.

DISTRICT NOTES.

Sorel.—The work of improving the St. Joseph de Sorel church will give employment to a large number of men during the winter. A number of vessels have been placed in winter quarters in the harbour. Dredges Nos. 1, 2, 3, 4 and 6 which were employed in the lower part of the river have been brought nearer Sorel. Five were placed in operation between Pointe aux Trembles and Sorel and one off Ste. Anne de Sorel. The dredges *Tarte*, *Beaujeu* and *Galveston* were stalled for the winter. The dredging season closed on November 25. Repair work on the Government wharf was proceeding rapidly, the portion uniting it with the Richelieu Company's wharf being nearly complete. A large amount of work will still require to be done before the advent of snow and

ice in order to protect the works against possible danger.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With few exceptions the different trades were very active and prospects for the winter season are most favourable, the fine weather prevailing having permitted outdoor work to be prosecuted with vigour. The month was more favourable than the corresponding month of 1908. The number and value of building permits issued in November were much greater than at the same period in 1908. Notwithstanding the advance of the season, eight-six permits for a value of \$289,600 were issued for new buildings and permits for repairs valued at \$30,000. With the new tunnel for Ville St. Louis and Rosemount and some street expropriations which will take place this winter, workmen should have a busy season.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Cotton mills were only fairly active. The boot and shoe factories were very active. Overtime was necessary in some cases in sash and door factories. Biscuit factories were also very active.

CONDITION OF PARTICULAR TRADES.

The building trades were active in all branches. Machinists, electrical workers, linemen and tinsmiths were active and in demand. The other metal trades were busy. Woodworkers reported a good month. The printing trades were busy. Journeymen tailors were in demand and first class hands received a slight increase in wages. The regular price is \$12 per week but some have been earning as much as \$15 per week. Boot and shoe workers were active. Food and tobacco preparation branches reported a fair month. Activity was reported in the miscellaneous and transport trades.

MONTREAL, QUE., AND
DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

During October there were granted 216 building permits for buildings valued at \$587,075. In the corresponding month of 1908, 127 building permits were granted valued at \$377,085 showing an increase for October, 1909, of \$209,990. There was a slight decrease in the permits for repairs this year the total being \$41,570 as against \$44,995 last year.

The monthly report of the Montreal post office shows an increase of \$7,727 in October, 1909, as compared with the same month a year ago. The revenue in the respective periods was \$85,000 against \$77,272. There has been also an increase in the weight of mail matter received from Great Britain of \$1,626 lbs in letters, 3,586 lbs. in newspaper mail and seventy-five lbs. in parcel post. Registered letters were 4,730 more than in October, 1908.

The revenue of the Port of Montreal showed an increase of \$1,443 for October, 1909, as compared with the corresponding month of 1908.

The following table shows the number of vessels arriving in the Port of Montreal during the several years mentioned together with their total tonnage:

Year.	Number of Vessels.	Total Tonnage
1906.....	728	1,797,077
1907.....	674	1,738,059
1908.....	671	1,784,847
1909.....	801	1,705,570

The decrease in the tonnage was in vessels arriving from the lower St. Lawrence; the transatlantic tonnage showed an increase of 18,000 tons over last season of navigation.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The market for farm produce was very active.

Fishing.—Prices of fish were high.

Lumbering.—Conditions were satisfactory.

Railway construction.—Quietness prevailed.

CONDITION OF PARTICULAR TRADES.

The building, woodworking, printing, leather and miscellaneous trades were active, as were also electrical workers, linemen, stove mounters, shipwrights, caulkers, sheet metal workers, tool sharpeners and horseshoers. The other metal trades had a good month. Boot and shoe workers had a good month, and other branches of the clothing trades an active one. Bakers, confectioners, butchers, meat cutters and ice handlers were active; cigar makers and tobacco workers had a good month. Railway employes, teamsters and expressmen were active. Steamboat men, ship labourers and longshoremens were active in the forepart of the month, but became quiet with the close of navigation on November 25. Street railway employes, cab drivers, etc., were busy. Unskilled labour had a quiet month.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferriere, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

The condition of the labour market in Hull during October was very favourable both from the employer's and the employes' point of view. There has been no time lost from scarcity of water. Weather conditions were exceptionally favourable and orders at the various shops were in advance of the corresponding period of last year.

Despite the closing down of all sawmills in the district, and the laying up of perhaps two thousand hands, several hundreds from Hull, no lull has been experienced among the working class, as nearly all of those have been sent up to the camps of their respective sawing concerns. Gilmour and Hughson's mills were closed down only on October 27, or one full week later than last year. Booth's mill laid off about 300 men sometime in the closing week of the month,

but all were sent to the bush the same day. Aylmer mills also closed their doors for the season several days later than in 1908.

The local banks reported a scarcity of money. They are inclined to think that people are holding back their savings for Christmas purchases. They also suspect the open weather as being partly responsible for the temporary shortage in the circulation. People will not buy heavy goods until forced to do so by the inclemency of the weather.

Another clothing factory has been opened. This is the third industrial establishment of the kind here. The Smith Company has leased an important property on Wellington Street and intends employing about forty hands, mostly women and girls.

Cement has advanced 30 cents a bag since the new merger has gone into effect. Wright Brothers, a building material firm, are opening a new branch, namely, the manufacture of white enamel finish, a new variety of wall plaster. A \$1,500 machine specially designed and built in Ottawa has been set in operation.

The Matthews Pork Packing Company is beginning the canning of vegetables. Pork and beef are now turned out in 21 different varieties. The firm now has about 100 different brands of food stuffs on the market. The staff is increasing correspondingly and over 200 now find employment in Hull alone, besides 100 more in the various meat markets and in the large stables in Ottawa.

The Eddy Company now enforces a compulsory examination of their girls' teeth. Every female worker in the match shop has to undergo once a week a specialist's examination. Every defect is reported on a slip which is handed to the patient and the latter is obliged to have it remedied as quickly as possible at her own cost. This is in accordance with the provisions of the law of the Province of Quebec.

Shipments of metallic pipes to Hull were very heavy during the month. A large steel steamer, brought to the government dock at Hull a full consignment of pipes of various sizes for waterworks and other purposes. Some will be used this winter in waterworks exten-

sions, the job being under contract and employing about twenty hands, paid \$2.25 and \$2.50 per day.

The only increase of wages in Hull of late was one granted by the school commissioners to teachers of both sexes. Ten dollars a year increase has been granted to about forty teachers, whose pay varies from \$180 to \$225 a year.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Open weather during November permitted a continuance of the season's marked activity in building and allowed sawmills to operate a month or six weeks longer than last year. These conditions more than offset the benefit labour derived in the corresponding month last year by the construction of the Chaudiere dam and the electric railway extension to the Experimental Farm.

A civic report at the beginning of the month showed that the total value of Ottawa building permits during October was \$334,150 as against \$163,350 in October, 1908. November has also been a brisk month compared with other years. The building inspector reports that the whole summer's building operations will amount in value to five million dollars, or twice as much as last year. There has been an unusually large number of apartment houses and tenement rows built. The latter will supply the heavy demand for dwellings at from \$16 to \$20 rental. The corporation has 800 men employed on various works, which is an exceptionally large staff for so late in the season. The prospects are that many of these will be given work all winter. The next largest source of employment is the Grand Trunk station and hotel which the Company proposes to keep under construction all winter. The city engineer reports day labour a marked success in laying nine miles of concrete side walks during the summer.

The car shortage reported from other parts of Canada is said by local railway

companies not to have affected transportation here.

Retail trade found the month exceptionally active, and wholesale houses are placing large quantities of Christmas stock. The plentifulness of money was shown by the prompt payment of taxes which were some \$15,000 ahead of last year.

The Rideau canal was not drained until November 29, keeping navigation open a little longer than last year. The season surpassed that of 1908 in shipments of lumber and farm produce. The Ottawa Forwarding Company, which lost the steamer Welshman early in the month through fire, proposes to construct another vessel in Ottawa, 112 feet long with twenty-five foot beam, and to build some new scows. Shipping was very brisk prior to the close of navigation.

The cost of living was increased by a rise in the retail prices of pork from 15 cents to 18 cents a pound; milk from 7 to 8 cents per quart; fresh eggs from 30 to 40 cents per dozen; butter from 27 to 30 cents per pound; apples from 15 to 20 cent per gallon; coal from \$7.25 to \$7.50 per ton; and rubbers by about twenty-five per cent. Potatoes and beef dropped about 10 per cent.

The seventy members of the local union of leather workers on horse goods, who went on strike on October 19, demanding a ten per cent. increase, are still out. Negotiations are in progress between a committee of the strikers and some of the employers with a view to settlement. Other branches of labour have not been disturbed by wages disputes.

A large lithographing and printing establishment will be erected next spring on Somerset Street occupying a lot sixty-six feet by 105.

The Allied Trades and Labour Association of Ottawa, has approved a proposed by-law to permit the sale of pork by the quarter instead of by the carcass only.

Torbolton farmers have organized a society, questions of mutual interest will be discussed regularly for the instruction of members.

The Travellers' Aid Society has been formed to look after homeless girls. It has secured the co-operation of the railway companies to assist in finding young women in need of protection. A home with accommodation for 20 persons has been secured by this society.

The Galetta Electric Power and Milling Company which recently took over the plant of the Arnprior Electric Lighting Power Company for \$30,000 is supplying energy for several new industries. It has over 2,000 horse power available and has built a reinforced concrete dam 15 feet high across the Mississippi river.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The open autumn gave farmers an extra supply of milk and saved fodder. Extra feeding began a month earlier last year. Potatoes yielded about twenty-two per cent. more than the previous season and are selling at fifty cents a bag. Eggs and meats are considerably dearer, though the latter are plentiful.

Lumbering.—Three of the Ottawa Valley lumber mills were running at the end of November, and the manufacture of lumber and pulp generally was continued a month longer than in 1908, owing to the better water supply. The best white pine varieties of lumber are sold out and contracts have been closed with English buyers for next year's cut of deal at an advance of five per cent. over last year.

Manufacturing.—The brick making industry had a most active season on account of the briskness in building.

Railroad construction and employment.—The Canadian Northern Railway Company has completed its line into Ottawa and proposes to start a through train service, to Quebec on December 5.

A temporary station, has been built. An electrical storm, on November 23, destroyed some 500 telegraph poles in the Ottawa district and the lines were down for several days, interrupting the train, and telegraph services.

CONDITION OF PARTICULAR TRADES.

Building trades were steadily employed. Moulders, engineers, machinists, electrical

workers and linemen. Horseshoers and tool sharpeners, were busily occupied. The woodworkers and furnishing trades, were actively engaged. All the printing trades were busy. Garment workers, and journeymen tailors were busy. There was a demand for girls to operate power machines. Butchers were very busy, but cigar makers were quiet. Leather workers also were idle on account of the strike. Delivery employees were very busy as well as furriers, dry goods and grocery clerks and confectioners' help. Locomotive engineers were very busy, and trainmen were working extra time. Carters, draymen and unskilled labourers were busy.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

While there was a slight falling off in opportunities for employment in some lines, the month considered in its entirety was an active one in nearly all branches. Building operators continued briskly and several permits were issued for new buildings. On the 11th. of the month the governors of the School of Mining, Queens University, awarded contracts for the new chemistry building's as follows: Masonry and carpentry, \$59,634; plumbing, heating, ventilation, metal work and slating, \$7,672; painting and glazing, \$1,940; electrical work, \$1,195. The work of excavations having been completed some time ago, work on the foundation began early in the month. The governors will spend \$92,000 for the building. The contracts awarded total \$70,441, so that there is \$21,559, left for fittings and architects' fees. Plans and specifications for the new Metallurgy building, for which \$40,000 has been donated to the governors, were also completed during the month, and tenders will be called for at once for the same.

The annual report of the postmaster general, just issued, shows that the Kingston post office revenue for the past year was \$47,000, as compared with

\$44,000, during the previous year, an increase of \$3,000.

The Frontenac Lead Mining and Smelting Company is now, meeting with success in securing capital to finance the concern. Recently several capitalists of the United States advanced \$125,000 on bonds, which insures a capital of \$165,000 to begin with.

During the month a Company was formed with a view of securing a lease of the government dry dock. The Company is composed chiefly of Collingwood and Kingston business men, when the lease is acquired, it is proposed to expend \$50,000 on improvements to the plant. The steamers City of Ottawa and Carleton, both of Montreal, will enter the government dry dock here in turn, after the Keyport, now occupying it, comes out. The government dry dock has been leased for the winter by the Montreal Transportation Company, which will place one of its large steamers in it for extensive repairs.

Among the estimates recently brought down in the House of Commons, the following is the voter for the Dominion Penitentiary here:—

	1909-10	1910-11
Salaries and retiring allowance.....	\$73,000	\$74,000
Uniforms and mess allowances.....	4,000	4,000
Maintenance of convicts allowances..	24,000	26,000
Discharge expenses, convicts allowances.	4,000	4,000
Working expenses allowances.....	18,000	18,000
Industries expenses allowances.....	17,000	14,000
Lands, buildings and equipment allowances.....	10,000	10,000
Miscellaneous equipment allowances	1,000	1,000
Miscellaneous special allowances.....	200	200
Total allowances.....	\$151,200	\$151,200

In the public works accounts the following proposed expenditures at Kingston appear: Post Office: addition to building and alterations, revote of \$7,-875; lapsed, \$25,000; Kingston Royal Military College improvements, \$15,000.

Towards the end of the month a slight difference between the management of the Electric Street Railway, and the City Council with respect to the cost of power, etc., caused a stoppage of the car service for a couple of days. Eventually a settlement was effected and the cars have since been running on schedule time.

It is understood that the painters who

went on strike recently, at the establishment of A. McMahon & Company, will soon return to work, a satisfactory settlement being in sight.

At a meeting of the Carpenters' and Joiners' Union, it was decided to grant the sum of \$25.00, to be divided between the new hospital for tuberculosis, and the new wing at the Hotel Dieu. The Knights of Labor, Coal and Ore Handlers Assembly, No. 1275, also donated \$15.00, to the general hospital.

There were no strikes, lock-outs, or changes in the rates of wages, or hours of labour reported during the month.

At a meeting of the Trades and Labour Council held during the early part of the month, a resolution was passed, condemning the building of a Canadian navy. An effort is being made by the council to arrange a meeting for the public discussion of this subject.

The question of bringing the Grand Trunk Railway line, into the city has again been under advisement.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers reported a busy month, housing the fall crops, ploughing and making general preparations for winter. The president of the local vegetable grower's association, attended the fifth annual convention of the Ontario Vegetable Grower's Association, held in Toronto. He reported the convention one of the best ever held by the association. The Kingston association leads the list, with the largest membership, having increased 125 per cent. London is a close second, with 100 per cent. The competition will close on December 1st.

Fishing while somewhat improved, was dull. *Lumbering* was quiet. *Manufacturing* was very active. *Mining* and *railroad construction* were quiet.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades continued active. The metal and engineering trades were active. During the month, the Canadian Locomotive works staff commenced to fill a contract for forty new engines. The ship building

industry was active. Local boat builders have many new orders for motor boats of various types for next season. From present indications they will have an active winter. Many of the orders are from outside points. Woodworkers and furnishers reported an active month. Printers were active. clothiers, bakers, butchers, cigar makers, tanners, barbers, broom makers, clerks, delivery employes, furrier, hotel, restaurant, theatre employes, laundry workers and dyer's reported an active month. Transportation was active. The Montreal Transportation Company started the first week of the month, with a great rush of grain, 385,000 bushels arriving in that time. The cargoes all wheat, came from Fort William. The boats when lightened cleared again for Fort William. The steamer Prince Rupert also arrived from Fort William, and discharged 75,000 bushels of wheat, at Richardson's elevator. This activity prevailed most of the month. Unskilled labour was quiet as a result of inclement weather.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. Macdiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed in this city and district, during the month of November, being more active than in the same month last year. It is a long time, since there were so few idle men. Every industry was running to full capacity and on full time. The rolling mills, two hardware companies, horseshoe factory, and the two cement plants were largely responsible, for the active condition of the labour market. The construction of Trent Valley Canal gave employment to many men, from this city. Building operations were very brisk, as was also civic work, such as the building of new granolithic walks, and road improvements. Bank clearings were the largest in years. Both retail and wholesale merchants, reported great activity, especially since the cold weather began,

about the middle of the month. There was no changes in the rates of wages, or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fall ploughing is completed, apples picked, fall wheat in, and threshing done. There was a splendid crop. Cheese factories closed this month and farmers were busy drawing cheese, apples, hay, etc., to market.

Fishing.—Large quantities of herring are being caught.

Lumbering was active in the northern part of the county.

Manufacturing in nearly all branches was active.

Mining was very active, throughout the county.

Railroad construction was dull in this district. Work on the Canadian Northern Railway between Trenton and Toronto began the first of this month. This is employing many men.

CONDITION OF PARTICULAR TRADES.

All branches in the building trades reported a very busy month, owing to the many new buildings going up, as well as alterations and improvements. Builders' labourers were all employed.

Iron moulders and helpers, iron workers, machinists, electrical workers, brass workers, blacksmiths, boilermakers, horseshoers and metal polishers, were all busy.

The various furniture factories, wood-working establishments, as well as carriage shops were all running full time. Coopers were especially active.

Both news and job printers, had an active month. Pressmen and bookbinders were busy, one of the local offices installing a new Web newspaper press.

Journeyman tailors had a very active month on fall orders. Boot and shoe workers were busy.

Bakers and confectioners, butchers and meat cutters and cigar makers, all reported an active month.

Harness makers were very busy, all the shops working full staffs.

Barbers, clerks, stenographers, delivery

employés, furriers, hotel, restaurant, theatre and laundry employés were all busy.

Both railway and steamboat traffic, was very heavy during the month consequently there were no idle men employed, in this business. Steamboats practically transport all the cheese and apples, from this section. Cab drivers, draymen and teamsters were very busy.

Unskilled labour was in demand at good wages.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. A. J. Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during November showed little change, very few men being idle. The building trades continued active the weather during the month being very favourable. At least 125 new residences were either completed or under construction in this city this year, at a cost of over \$200,000. The new Roman Catholic church has just been completed; it will have a seating capacity of 1,000. Two new business blocks have also been erected. The past year has shown a falling off in the amount of cheese sold on the Peterborough Board. There were 39,214 cheese boarded this year, compared with 41,420 last year. The total receipts for 1909 were \$383,983, compared with \$418,083.13 in 1908, a decrease in 1909, of \$34,099.65. The contract for the erection of a new dam at Burleigh Falls, to cost \$60,000, has been awarded to Messrs. Bishop & Buchanan. The charitable societies have not been very much taxed this fall, the open weather and the amount of outdoor work available having relieved the situation. The great majority of the labouring classes have had plenty of work.

CONDITION OF LOCAL INDUSTRIES.

Agricultural.—Farmers have been very busy ploughing and marketing produce.

Potatoes are plentiful at fifty cents per bag; last year they brought \$1.00 per bag. Hay has been high in price, though there is plenty in the county, nineteen dollars per ton is being asked.

Lumbering.—This industry was extremely active, though some of the camps had not got their full complement of men. The wages paid this year are \$28 per month; last year \$23 per month were paid.

Manufacturing.—Activity was the rule. In several of the factories extra men were engaged and some were working overtime.

CONDITION OF PARTICULAR TRADES.

The building and metal trades were busy. Woodworkers had steady work, as had all branches of the printing trades. Garment workers, boot and shoe workers were steadily employed, as were confectioners and bakers. Leather workers were very busy. Railway and street railway employes and the other branches of the transportation trades continued active.

DISTRICT NOTES.

Port Hope.—The Grand Trunk Railway Company has decided to at once take up the sidings in its yards as desired by the Ideal Company, in order to give room for the new buildings to be erected by that Company.

TORONTO, ONT., AND DISTRICT.*

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month generally was characterized by unusually open weather for the season, enabling building and other out-of-door employments to be carried on with but little interruption. Skilled labour was generally well employed, and there was little complaint of unemployment, among unskilled workers, except among

recent arrivals. Female labour for factories and domestic service, was in demand. The relations between employers and employed continued harmonious.

During October, 646 building permits, representing an approximate value of \$1,540,355, were issued, as compared with 552 permits, representing \$1,019,492 in October 1908. The total number of permits issued for the first ten months of the year was 4,232, representing a value of \$14,595,032, as against 3,352 permits, representing \$9,637,502, for the corresponding ten months of 1908.

The receipts of the Toronto Railway Company, for October were \$336,287, of which the city received a percentage amounting to \$26,902, as compared with receipts \$306,572, and civic percentage \$24,525 in October 1908.

The Women's Work Bureau, operated last winter of the Local Council of Women, will this season, be under the direction of the Associated Charities. An office has been opened on the corner of Queen and Jarvis Streets. The Free Employment Bureau for men has begun operations in the same building.

At the municipal elections on January 1st, a by-law to provide the sum of \$759,000, for the construction of a viaduct connecting Bloor Street East with Danforth Avenue and affording access across the ravines to the north-eastern section of the city, will be submitted to the rate-payers. The general electors will also be asked to express their opinions, on the question of the construction and operation by the city of a system of subway and surface street railways. A three storey brick school-house to cost \$100,000 is being erected on Dufferin near Bloor Street.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy with fall ploughing and making preparations for winter. Prices for produce were good and conditions generally satisfactory. Recent heavy rains put the land in good condition, and filled the wells and streams.

Manufacturing.—Manufacturing plants were generally busy, with plenty of or-

* A special report of this meeting is printed elsewhere in the present issue.

ders ahead in most cases, and prospects of an active winter. The bountiful harvest in the West is regarded as assuring a considerably increased demand from that quarter in all leading lines.

The Fairbanks-Morse Canadian Manufacturing Company, will erect a four storey warehouse at 1379 Bloor Street, at a cost of \$50,000.

The National Iron Works, Limited, is erecting a foundry, building on a pile foundation to cost \$20,000, on the site in Askbridges Bay, recently purchased from the city. Other buildings will be put up later.

CONDITION OF PARTICULAR TRADES.

The building trades were active, slackening a little towards the close of the month. A shortage of brick interfered to a slight extent with operations.

Iron workers in all lines had a good month. Brass workers, jewelers and silversmiths were busy.

Furniture workers, cabinet makers, and upholsterers had steady work. Coopers, carriage makers, and piano workers were well employed.

Printers and allied trades were generally active. Two unions embracing printing pressmen and their assistant, have withdraw from the American Federation of Labour and resolved to affiliate with the Canadian Federation of Labour. As a result of this action the question of the right of shops where men belonging to the receding unions are employed to use the union label has been raised.

Custom tailors were active. Garment workers, boot and shoe workers, hat and cap workers, and furriers had continuous employment. The glove makers organized a local union in affiliation with the International Glove Makers Union.

Bakers, confectioners, butchers and brewery workers had plenty of employment. Cigar makers were active.

Leather workers had a good month.

Hotel and restaurant workers, barbers and laundry workers, were well employed. Clerks, salesmen and others engaged in retail trade were increasingly busy toward the end of the month.

Railway and street railway employes, expressmen and teamsters were active.

Sailors, longshoremen and others employed in connection with navigation were busy during the early part of the month, but many were laid off for the season.

Unskilled labour was generally well employed but recent arrivals found little demand for their services.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

November was the best month that working people in Niagara Falls, have had in some time. There was work for everyone, and supply and demand for labour were usually well balanced. Carpenters were in demand and more girls were wanted in factories. The continuance of this demand is not certain, though the outlook for the winter is good.

The Ontario Power Company had about a thousand labourers and teamsters employed, excavating for its new conduit, and would employ more if they were available.

Several gangs of unskilled labourers were recruited in this city, for works in other places.

Commercial and financial conditions improved.

The city obtained permission to lay a new water main through the Provincial park, to furnish additional fire protection at the north end.

Work on the Niagara boulevard, ceased for the season.

A recent article in the *Electrical World* contains the following data relative to the utilization of the energy from Niagara Falls. "Of the 5,000,000 horse-power represented by Niagara Falls, only about 5.5 per cent is being utilized. Of this, 126,800 horse-power is employed in electro-chemical processes, 56,200 horse-power for railway service, 36,400 horse-power for lighting, 45,540 horse-power for various industrial services. 12,300 horse-power is transmitted over more than one hundred miles, 33,500 horse-

power between seventy-five miles and one hundred miles, 3,100 horse-power fifty miles, 79,640 horse-power between ten and thirty miles, while 145,500 horsepower is used locally showing that many industries have been induced to locate at the Falls by the power conditions to be found there."

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Work was being closed for the season and employment fell off.

Manufacturing.—Manufacturing concerns were active. The shredded wheat, corset, neckwear, suspender and chain-and-trap factories were very busy.

The railway switch and frog plant was running to full capacity. The chemical fertilizer (cyanamid) works further increased staff, employing a number of young men at from \$35 to \$50 per month.

Another company to develop the natural gas field was organized. Existing companies were extending and improving their pipe lines and giving employment to a number of men—chiefly labourers.

Railroad construction.—The Niagara St. Catharines & Toronto Railway employed sixty-five labourers, and some teamsters in grading for its extension from *Melland* to *Port Colborne*. This was completed and nothing further will be done till Spring.

CONDITION OF PARTICULAR TRADES.

The building trades were active and there was considerable work ahead. Carpenters were very busy and bricklayers and masons, painters and plumbers busy. Lathers, gas and steam fitters and builders labourers were quiet, with stone cutters dull.

The iron working and electrical trades were active.

Journeyman tailors were active.

Canning factories were reducing the number of their employes, but apple evaporators gave some employment.

Office and salespeople were rather quiet, hotel and restaurant employes were dull.

Freight traffic on all railway lines showed an improvement, but passenger

traffic was light. A few extra trackmen were employed. Lake transportation was heavy. Teamsters were active.

Unskilled labour was in demand.

DISTRICT NOTES.

Bridgeburg.—A factory for making sheet metal articles, and iron gratings is being established. It is a branch of a United States concern. It is stated that the shops at the ship-yards will be enlarged and the plant placed in operation again.

Dunnville.—The Erie Knitting Company's factory was running overtime. The new factory of the Monarch Knitting Company, was rapidly going up. Lake fishermen made large catches. The apple evaporator was busy.

Fort Erie.—Many men were employed in new works at adjacent summer resorts. Many dwellings and other buildings were being erected, and new piers and wharfs, and concrete sidewalks constructed.

Welland.—The Canadian Electro-Steel Company, will erect a large plant next year if *Crowland township* will grant a fixed assessment. An experimental plant will be established at once. Another woodworking concern may locate here.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was much the same in November as in October. General conditions were from active to busy. While there was no rush in any line of industry, there was steady employment for labour, with the supply and demand well balanced.

The building trades were a little more active than last month finishing out-door work for the season. The open weather facilitated work on street pavements, and sewer construction, though some of this work will have to be left over till next season.

A new industry has been secured, viz.,

the Canadian branch of the Crocker-Wheeler Company, which has purchased at \$5,000 the Ross factory building and site, and is asking for a fixed assessment of \$10,000 for a period of ten years. The Company will manufacture heavy electrical machinery and will employ 100 hands by December 31, 1910. It is to pay out in wages \$50,000 per year.

The Jencks Machine Company will enlarge its plant next year and will increase the number of men employed. The Company is now busily engaged in the installing and supplying of hydrolic machinery for an electric light plant in the Cobalt district and has fifty of its employés from this district on the ground assisted by others.

The McKinnon Dash Company, Limited, has put on a night shift to get out orders on hand.

Business, wholesale and retail, was reported fair for the season.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather conditions have favoured the fruit men in harvesting and the results have amply borne out the statements that this year's crops in the aggregate far exceeded that of previous years.

During the year just closed a total of 480 cars of fruit were shipped away from this city alone; 336 went east to Montreal and 144 to Winnipeg and western points. The capacity of each car is 2,400 small baskets or 1,200 large ones, the freight charges on these cars would total \$19,000 and the fruit in them would be worth \$440.00 to \$600.00 per car. Two-thirds of the fruit shipped consisted of grapes, the rest being apples, peaches, plums, and pears. The results from the western shipments were very satisfactory. Besides the shipments by car, shipments were made by boat to Toronto and other points and the canning factories were busy all season handling their share of the fruits. The fruit men are preparing to increase the acreage to supply markets not yet reached.

CONDITION OF PARTICULAR TRADES.

The building trades were from active to busy.

All branches of the metal and engineering trades reported a good month.

The woodworking trades were active, and conditions were favourable in the furnishing trades.

The allied printing trades were active to busy.

Journeymen tailors and boot and shoe workers were active.

Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers were active.

Tanners and curriers, leather workers, saddlers and trunk and bag makers were active.

Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés, and laundry workers reported conditions fair.

All branches of transportation were from active to busy.

Unskilled labour was well employed.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed.

Merritton.—All the mills and factories were running full time.

Thorold.—Favourable conditions prevailed in the labour market.

Fonthill.—The Fonthill Gravel Company, has been chartered and is capitalized at \$50,000.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been one of unusual activity in almost every line of industry. The building trades have been steadily employed, weather conditions having been favourable throughout. The building permits issued during the month, total in value \$157,750, being over \$52,000 in excess of those issued last year during the same period. The total for the year will probably exceed that of 1908 by over \$200,000.

Retail merchants report business good and improved over the same month last year.

The annexation of a large area of territory to the city during the year has necessitated a good deal of construction work in providing sewers, water services and pavements, and in consequence, city labourers have been pretty steadily employed. These works will soon cease, however, and there is not much in prospect for the winter months.

There have been no disturbances reported in the relations between workmen and employers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Large markets were the rule during the month. Butter and eggs were scarce and dear. Butter sold at 28 to 35 cents per pound and eggs at 30 to 35 cents per dozen. Chickens were quoted at 80 cents to \$1.50 per pair; and turkeys, at 18 to 20 cents per pound. Beef was 7 to 8 cents per pound; and pork \$10.50 to \$11 per cwt. Potatoes were plentiful, but the quality was not first class. They brought 70 to 80 cents per bag. Apples were only a fair crop. Growers reported difficulty in securing sufficient pickers and packers this year. Hay is said to be a good crop, but the price continued to range around \$17 per ton, which is considered high.

The Hamilton Horticultural Society, held its annual meeting November 6. The membership was reported as 300. The officers' reports indicated a very successful year. About 50,000 bulbs were distributed by the Society, and prizes were given for the best displays.

Manufacturing.—The Jackson Typewriter Company, which commenced business over a year ago, but ceased owing to litigation in connection with its patents, is reported to have arranged its affairs so as to permit of a resumption.

The McPherson Shoe Company has just completed a large extension to its factory and is reported to have acquired a large block of land adjoining for the purpose of a still further addition to its plant.

Railroad construction.—Nothing new

has developed in connection with the entrance of the Canadian Northern Railway to the city, except that the Dundas Town Council has entered a protest against the reported intention of the Company, to cross the Desjardins Canal by a bridge at a lower level than the existing structures.

For the quarter ending September 30, the receipts of the street railway were the largest in the history of the Company. They amounted to the large sum of \$101,239.40, or an increase of \$7,979.37 over the corresponding quarter last year.

Citizens have become interested in the project to connect Lakes Erie and Ontario by canal from the Grand River to Hamilton, and strong representations are being made to the Department of Railways and Canals, in favour of this route, as an alternative to the enlargement of the Welland Canal.

CONDITION OF PARTICULAR TRADES.

Steady employment has been the rule in every branch of industry during the month. There is hardly any need to particularize, as "busy" would indicate the general condition in the different trades.

Exceptional activity was reported in respect to boot and shoe workers, cigar makers, garment workers, the allied printing trades and woodworkers.

The stove plate moulders' strike is still on and no new developments were reported. About seventy-five men are on the strike roll. There have been no desertions from the strikers' ranks, and no inclination is manifested to accept the reduction in wages which caused the strike early in the spring. A number of non-union men have quit the foundries, their places being filled by others from outside places.

Unskilled labour has been generally well employed.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour skilled and unskilled, was well employed during November. The

building trades and factories were busy. The Brandon Shoe Manufacturing Company has decided to locate here, and has purchased land on which to erect a factory; fifty persons will be employed at the start.

The Board of School trustees has decided to discontinue the school banking system. It was found to take up too much of the teachers time, and apparently was not popular with the pupils as it was poorly patronized. It was introduced to teach economy.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists were busy, exceptionally fine weather being favourable to farm work up to the 22nd when heavy rains set in.

Manufacturing.—The factories in most lines were busy, and several were working overtime. The Gould Shapley & Muir Company, manufacturers of gas engines, windmills and cement mixers are about to erect large additions to factory.

Railroad construction.—The re-construction of the tracks of the Brantford street railway, is giving employment to a number of men.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators, plumbers, gas and steam fitters were busy.

Iron moulders and coremakers were from active to busy. Machinists, engineers, electrical workers, linemen, blacksmiths, boiler-makers, sheet metal workers and horseshoers were busy. Metal polishers, buffers and plasters were from active to busy. Stove mounters were active.

Carriage and wagon makers, pattern makers and coopers were busy.

The printing and allied trades were busy.

Tailors and tailoresses were busy.

Bakers and confectioners were busy. Cigar makers and tobacco workers were active.

Leather workers and saddlers were from active to busy.

Barbers, clerks and delivery employes were steadily employed. Furriers, hotel and restaurant employes and laundry workers were busy.

Railroad trackmen were active. Freight handlers were busy. Street railway employes were steadily employed. Teamsters and draymen were busy.

Unskilled labour, generally speaking, was fully employed.

DISTRICT NOTES.

Paris.—The fabric mills were busy. The machinery in the new factory of the Sanderson-Harold Company, manufacturers of screens, refrigerators etc., is nearly all installed. The Bank of Hamilton is erecting a new branch at a cost of \$10,000; temporary offices have been opened.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market showed a marked improvement over the corresponding month of last year. The building trades are finishing up the season's work without many new contracts coming in, but all branches of manufacturing were well supplied with orders and in a number of cases, are taking on additional hands, and working overtime. The Gold Medal Company, has commenced operations in the Morlock-Clure Plant under the name of the Guelph Upholstering Company. The Standard Lime Company has installed a new hydrating lime plant and the manufacture of the new product has been commenced. The plant will require about ten additional hands and will have a capacity of two kilns. Steady progress is being made on the preparatory work for the distribution of Niagara energy giving employment to a force of men, as the Bell Telephone Company have also done, in changing from the old to the new central energy system.

The Guelph Radial Railway Company, submitted its annual report to the City Council, together with a cheque for \$4,860; a four and a half per cent. dividend. This was the total profit to the

city, despite the serious handicap caused by the permanent road operations.

The revenue from the Guelph Junction Railway also is very satisfactory and shows a profit to the city for one year of \$25,756.69, an increase over last year of \$3,368.69.

Customs returns for the month were \$15,796.78, an increase over the corresponding month last year of \$1,663.45.

The City Council has passed a by-law requiring every retailer of milk in the city to secure a license and to permit of a rigid inspection of premises and dairy as well as to reports on the conditions surrounding the source of the milk supply.

Twenty-two public school teachers will, on the first of the year, receive an increase in salary. No further changes in rates of wages or hours of labour have been reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very busy, finishing fall work and marketing produce, the weather conditions proving very favourable.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, lathers and plasterers, reported a quiet month, while carpenters and joiners were busy. Painters and plumbers were fairly well employed.

Iron moulders reported a busy month, also coremakers and machinists. Tube mill workers were very busy. Electrical workers and linemen were actively employed and blacksmiths were fairly active.

Piano and organ workers had a busy month, working overtime. Carriage and wagon makers reported a fair month. Pattern makers were busy.

Printers and allied tradesmen had a fair month.

Journeymen tailors were busy, also garment and factory workers, brussels carpet weavers, reported a quiet month.

Bakers and confectioners were busy, while cigar makers were actively employed.

Teamsters and expressmen were well employed.

The supply of unskilled labour was equal to the demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were busy during November, and the month compared favourably with the preceding one. Unskilled labour was engaged in sewer construction, and in the building of underground conduits for the Bell telephone system. Building operations were still going on and will continue active for some time. Eight building permits for buildings valued at \$6,000 were issued during the month. The J. M. Snyder block on Queen street was completed, and is being occupied by the firm of Snyder Bros., as a grocery store. The Ahrans shoe factory and the Stumpfs block were also completed. Good progress was made on the erection of the Shantz button factory, the brick work being finished and the roof put on. The brick work on the addition to the St. Jerome College and the Bell telephone office was finished.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were somewhat quiet, being engaged in marketing their produce.

Manufacturing.—Manufacturing establishments were very busy several of them being obliged to work overtime.

CONDITION OF PARTICULAR TRADES.

Activity prevailed among the building metal and woodworking trades. The printing, clothing, food and tobacco preparation, leather, miscellaneous and transport trades were busy. Unskilled labour had an active month.

WOODSTOCK, ONT., AND
DISTRICT.

CONDITION OF PARTICULAR TRADES.

Mr. W. N. McEltheran, correspondent,
reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

The labour market was very active, every available man finding ready employment. Building operations were brisk, the fine weather permitting of outdoor work up to the end of the month. Work in the new factory for the Tobin Arms Company was rushed along. Special activity was reported by knitting mill operatives, the Oxford Knitting Factory running nights. A transaction of considerable importance took place during the month with regard to the Oxford Knitting Company. A Montreal syndicate bought over the whole stock at \$150 per share, this gaining control of the factory. It is reported that the new holders contemplate adding to the present facilities, with a view to doubling the output. This will mean the employment of probably seventy-five more operatives, and also an enlargement of the fine new factory which the Company moved into this year.

Retail trade was fair, but had not gained the steadiness looked for at this time of the year.

A new four-roomed school in Ingersoll was opened. Work on the transformer station for Hydro-Electric Power was commenced. Linemen were steadily employed erecting poles and stringing wire. It is not yet known what the power will cost delivered in Woodstock.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a fine month in which to get fall ploughing done and roots in. Timely rains towards the end of the month, filled the low-lands. Roots were a good crop; apples also were good.

Manufacturing.—All branches of manufacturing experienced a busy month. Conditions were gradually getting back to old time activity, several factories working overtime.

Bricklayers and masons, were very busy several dwellings and the Tobin Arms Company factory absorbing all the available men. Carpenters were very busy, as were also lathers and plasterers. Painters and decorators were all busy. Plumbers and gas and steam fitters all found ready employment. Stove moulders were rushed all month, while machinists were steadily employed. Stove mounters were very busy. Wagon makers were working overtime. Furniture factory employés were working full time and orders were reported good. Piano and organ workers were very busy. Church organ makers reported steady employment with good orders in sight. Knitting mill operators were working overtime, orders being well up and increasing daily. Wire fence operatives were slack, but expected to be going good shortly. Printers and pressmen were active. Journeymen tailors reported a very busy month. Confectioners and candy makers were very busy, with the Christmas trade. Cigar makers reported increasing activity. Tanners were active. Unskilled labourers all employed.

STRATFORD, ONT., AND
DISTRICT.

Mr. Joseph T. Carlin, correspondent,
reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

The condition of the labour market was fairly active showing a marked improvement over the same month of last year. Some branches of manufacturing were busy, others reported trade about the same as last month. The dam is now finished and a large gang of men were working on the cement foundation for the Waterloo Street bridge and on the new boat house. Considerable real estate has changed hands this month. Retail merchants did a good business. Wholesale merchants and factories reported more orders coming in than at this time last year, especially from Western Ca-

nada. Customs return totalled \$14,492.82 and the excise returns for the port of Stratford \$5,694.14.

No changes in rates of wages have been reported and no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy threshing and marketing. The markets have been well patronized. Prices were:

Butter, 20 to 23 cts. per pound.
Eggs, 30 cts. a dozen.
Geese, \$1 each.
Chickens, 40 to 60 cts. a pair.
Apples, 65 cts. to \$1 a bag.
Potatoes, 75 cts. a bag.

Manufacturing.—All industrial establishments have been very active, especially the woodworking, clothing and woollen mills.

Railroad construction.—The rate-payers will vote at the municipal elections in January, on a by-law, to allow the People's Railway Company to build tracks through the city; also on a money by-law for the taking and paying of preference stock in the Company to the amount of not more than \$90,000.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were quiet.

Painters and paper hangers were dull. Plumbers were busy.

Iron moulders, workers and helpers were busy. Machinists, blacksmiths and boiler-makers were active.

Woodworkers, varnishers, upholsterers wood carvers, were busy, carriage and wagon makers were active. Coopers were very busy.

Printers were busy, especially job and ad men.

Journeyman tailors and clothing factory workers were active.

Bakers and confectioners had a good month. Butchers were busy. Cigar makers were active.

Barbers, clerks and delivery employes were busy. Hotel, restaurant and laundry workers were active.

Railroad conductors, engineers and firemen were very busy. Trainmen, trackmen and switchmen were active.

Freight handlers were busy, cab drivers draymen and teamsters had a busy month.

A number of unskilled labourers were out of work.

DISTRICT NOTES.

St. Marys.—The Township of Blanshard again voted on the by-law to grant a bonus of \$20,000 to the St. Marys' & Western Railway; the by-law was carried by a majority of four. A similar by-law was voted upon last May, and carried, but upon protest for irregularity was subsequently quashed.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions among all classes were fair throughout the month, although towards the close outside work began to fall off. In the building trades very little new work is being commenced and building operations are not as active as at this time last year. The transformer station for Niagara Power is nearing completion. The McClary Company is making an extension to its foundry, thirty five by eighty-five feet. The Hourd Company factory, is being extended by two additions, one thirty-five by fifty-four feet, and one thirty-five by twenty. The factory has been shut down a few weeks to allow the additions to be built.

The benefit society of the McClary Manufacturing Company has engaged a trained nurse to look after employes and their families when incapacitated through illness or injury.

On Saturday evening, November 13, Prof. Adam Shortt, of the Civil Service Commission and John Mitchell, Vice-President of the American Federation of Labour, addressed a mass meeting of citizens, called by the committee of the Board of Trade, Ministerial Alliance and Trades and Labour Council, who are endeavouring to form a civic federation.*

*A special report of this meeting is printed elsewhere in the present issue.

Local improvements carried on by the city this year cost \$81,000; last year \$133,000 was spent for the same purpose. Sewers cost \$15,346.76; sidewalks, \$12,-989.48; curbs and gutters, \$17,566.28; and pavements \$35,941.55 in 1909.

The work of preparing for the installation of Niagara Electric Power is being gone on with rapidly. Poles have been erected in almost all parts of the city on which to string the wires. Work on the distributing plant is going ahead, and a vote of the citizens is to be taken in January to ascertain if they are willing to spend \$70,000 to put the wires underground in the business sections of the city.

CONDITION OF PARTICULAR TRADES.

One-third of the bricklayers usually engaged here have gone away through lack of work, there being about enough to keep those left behind busy. Carpenters reported trade becoming a little slack. Lathers and plasterers, painters, and builders' labourers were fairly well employed.

Iron moulders, iron workers, electrical workers and linemen were busy. Machinists reported trade fair. Bolt workers are becoming slack, and a number have been laid off.

Car builders have gone on winter hours, but they have a lot of work on hand. Coopers were busy.

Printers were busy. Two job houses are putting in new cylinder presses.

The mild weather has affected the tailoring trade, which was not as busy as usual at this time of the year. Garment workers, however, were busy, and boot and shoe workers very busy. Tanners and carriers were also very busy.

The cessation of out-of-door work is causing idleness for a number of unskilled labourers.

DISTRICT NOTES.

Sarnia.—The Standard Chain Works of Sarnia, which ceased to do business, a few months ago and which had signed an agreement to operate the plant for twenty years, has returned its bonus to the town.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market continued favourable during November. There was a scarcity of skilled workers during the busier months of the summer, and considering the lateness of the season, the month of November has been an exceptionally good one. The weather has been favourable, there being little cold to interfere with outside work. Traffic on the railroads has been brisk and railway shop employes have been busy. Considerable track and yard work has been done in this vicinity, by the Michigan Central Company, thus creating a demand for unskilled labour. The completion of the Subway was a set back for unskilled workers, but the city has had gangs of labourers at other work, and there were few idle men. The past summer has been one of the best for unskilled labour. Trade has been quiet during the month. Stock is still being subscribed for the co-operative grocery store, and the announcement of the new quarters to be occupied by the concern, may be expected in the near future. Local industries report the month a fair average. There have been no changes, in the hours of labour, or rates of wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Those engaged in farming reported a quiet month. Extra good prices have been realized on farm products in this vicinity.

Fishing.—A considerable amount of fish taken from Lake Erie, at Port Stanley, is being shipped through the city.

Railroad construction and employment. A considerable amount of work has been furnished unskilled labourers by the Michigan Central Railway Company, in the railway yards.

CONDITION OF PARTICULAR TRADES.

The building trades were well employed, favourable weather conditions keeping all hands fairly active.

Railway employes, moulders, machinists, blacksmiths were well employed.

Journeymen tailors reported the month less active than the previous month.

The amount of traffic on railways entering the city has been good for November.

Unskilled labourers have been well employed throughout the month.

DISTRICT NOTES.

Aylmer.—It is reported that the Brandon Shoe Company, whose factory was badly damaged by an explosion and fire, have under consideration an offer from the city of Brantford to locate there.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly well employed during the month, though the building trades was beginning to show signs of slackness. A number of bricklayers left for Detroit. Carriage and wagon factories were pressed with orders, and were working extra time. Planing mills were somewhat quiet, and on short time, in one instance owing to the small amount of building going on. The Evaporating Factory had a very busy month; 500 bushels of apples per day, were delivered for a time, and a large number of extra hands were required. Commercial travellers reported orders, far in excess, of 1908. The open fall has been favourable, for the labouring class, and the month closed with few men dull.

CONDITION OF PARTICULAR TRADES.

Bricklayers and plasterers were quiet, but carpenters and joiners were busy

and lathers and plasters fairly well employed. Painters were quiet; plumbers very busy and builder labourers quiet.

Iron moulders, iron workers and helpers were employed steadily. Of machinists, some were working full time, and others on short hours. Electrical workers and line men reported a good month. Blacksmiths were quiet, except in the larger foundries. Sheet metal workers were quiet.

Wood workers in some cases, were very busy. Upholsters were active. Carriage and waggon makers were very busy. Pattern makers reported trade about the same as the previous month.

Printers, electrotypers and bookbinders reported a fair month.

Journeymen tailors, garment workers and boot and shoe workers were busy.

Bakers and confectioners, cigar makers and tobacco workers were busy.

Barbers, clerks, delivery employes, laundry workers reported trade brisk.

Cab drivers, hackmen, carters and draymen, teamsters and expressmen reported business normal.

Unskilled labour was fully employed.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Active conditions prevailed in the labour market during the month, the building trades being as brisk as last month. The Postum Cereal Company has closed a contract for another large building; the contract price is, \$45,000, to be completed in ninety days. The Standard Paint and Varnish Company is building a large addition to plant. The Whittier Stove Company is also building a large addition. Wholesale and retail merchants reported trade active, and collections fairly good.

CONDITION OF PARTICULAR TRADES.

The building trades were fully employed. Bricklayers, carpenters, plas-

terers, painters, plumbers, gas fitters and builders' labourers had plenty of work.

Iron moulders, workers, helpers and machinists reported trade good. Electrical workers, blacksmiths, sheet metal workers, and horseshoers were busy.

Woodworkers, carriage and wagon makers had a busy month, mostly on repair work.

Printers and pressmen have had a busy month.

Journeyman tailors have had a fairly good month. Garment workers were very busy.

Food and tobacco workers were all fully employed.

Leather workers were busy on repair work.

Barbers reported trade a little dull.

Clerks and stenographers were in demand. Hotel and laundry workers have had plenty of work.

Conductors, engineers, firemen and freight handlers were very busy. Cab drivers, draymen and teamsters had a good month.

Unskilled labour was well employed.

DISTRICT NOTES.

Walkerville.—Manufacturers were very busy, with plenty of orders ahead.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fully employed during the month of November. Work on the construction of docks, blast furnaces and rolling mills for the Lake Superior Corporation was being actively pursued by the several contractors. Lumbering operations were brisk. Wholesale and retail trade was fair, with good prospects for the holiday season. Several large transactions in real estate have taken place at good prices. The citizens will vote on local option at the next municipal election on January 3.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Normal conditions were reported.

Lumbering.—Conditions were brisk.

Manufacturing.—Establishments were all working full time.

Mining.—Favourable conditions prevailed.

CONDITION OF PARTICULAR TRADES.

The building trades were busy. Normal conditions were reported in all the other skilled trades.

PORT ARTHUR, FORT WILLIAM, ONT., AND DISTRICT.

Mr. Fred Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of November has been busy in this district for workers, and with the exception of operatives in the building trade, as good as October. Everybody was considerably busier than during the corresponding month of last year.

In all branches of work the supply seems to be about equal to the demand. General labourers have been busy, preparing foundations for buildings. Work on roads and street railways, is gradually closing up, but the men discharged, have found employment.

No new industries have been started. There has been no exceptional activity in any particular trade. Commercial activity as evidenced by shipments etc., has been somewhat interfered with by stormy weather on the lake, but transportation was busy and labour well employed at the docks.

There have been no changes in rates of wages or hours of labour, and no strikes or lock-outs during the month.

One of the most important buildings erected here this fall has been the Finnish Co-operative Stores and Labour Hall. This building is being erected entirely by the Finnish people. It will cost between \$25,000 and \$35,000 and will afford accommodation for the Finnish co-oper-

ative store and the Finnish Printing Company in the basement. The first floor will be divided into lodge and committee rooms, tea rooms, etc. The whole of this work is being put through by men and women who are mostly employed at unskilled work, and the building is being erected on the day work plan by the Finns. The workmen in this way, work out the value of their shares and so become stock holders.

There has been a number of small contracts let to working men for clearing land with a view to putting some on the market in five and ten acre lots for market garden purposes.

Many men and teams are also engaged in laying out new roads and clearing land for building lots in close proximity to Fort William and Port Arthur.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The number of men engaged for the lumber camps this year does not seem to be as great as usual, but it is reported that arrangements are being made with settlers along the lines to take out railway ties and that in consequence these will have a busy winter.

Railroad construction.—A number of men have left for the camps.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were busy, working of course on a shorter day. Masons and bricklayers have been held up, about a week by heavy frosts, but weather on the whole has been open, though heavy falls of snow having impeded work. At the end of the month owing to a thaw work on building has been renewed with vigour. Carpenters and plasterers and lathers have had a very busy month and painters have been kept well employed on inside work. Plumbers and steam fitters and sheet metal workers have been very active.

The printing trades have been busy and are getting busier in view of the Christmas trade. Three of the four newspapers published in these cities have new and commodious premises and this month

the foundations of a large printing establishment have been laid for the fourth paper; this building will be carried to completion early in the spring.

Unskilled labour has had plenty of work.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During November there has been a very large influx of labourers of the non-skilled classes into the city. In comparison with the similar movement last year the one of this month is much larger. A large number came to the West with the special object of assisting in harvesting, and are now returning to the East; others are coming into the city from railway camps and railway gangs with the hope of being re-employed for work in the woods. The demand for men for the latter occupation is much stronger this year than in 1908. Stocks of lumber throughout the Canadian West have diminished very considerably and it is feared that the supply of dry lumber for use during the building season of 1910 will be inadequate. In view of such a condition, the lumber companies generally are placing as many men in the woods as they can possibly handle. Another feature stimulating the logging industry is the demand for ties. For a supply of these for use in the Canadian West, the three largest Canadian railways, are all directing their attention to the timber resources of Northern Manitoba and Northern Saskatchewan. In these districts during the coming winter over 3,000 men will be employed in the getting out of ties and logs. The Prince Albert Lumber Company will alone have 1,500 men at work, and the balance will be employed by various other lumber companies. The Big River Lumber Company, Saskatchewan, purpose during next summer erecting north of Prince Albert a mill with a capacity of fifty million feet per annum. Plans for this mill are al-

ready completed, and it is expected, according to a statement made by the manager of the Company, that the mill will be ready to operate about August next.

Industries in Winnipeg during November were seriously interrupted by the break down of the power supply furnished by the Winnipeg Electric Railway Company. On November 24th one of the penstock's of the Company's plant, located on the Winnipeg River near to Lac du Bonnet, burst and flooded the power house and stopped the machinery. The result of this stoppage threw Winnipeg into darkness and stopped all the industries which relied upon this plant for power. At the end of the month the damage had not been repaired, and as a result about 6,000 people workpeople are out of employment, and there is still, at the time of writing, but little hope of the damaged plant being put into operation again for some days. The Electric Railway Company have an auxiliary steam plant in Winnipeg with a capacity approximately of 8,000 horse power, according to statements made by representatives of the Company. This plant was brought into requisition but it was found quite unequal to the task of moving all the street cars and supplying all the electric light services. As to the driving of motors installed by manufacturers and others, and for operating the elevators, there was no power available. The Company's plant at Lac du Bonnet has a maximum capacity of 28,000 horse power, and the maximum load, as determined by indicators at the transforming station in Winnipeg, has not at any time exceeded 15,000 horse power. With the employment of the auxiliary steam plant, which proved to have only a capacity of approximately 4,000 horse power, and the employment also of the auxiliary plant of the City of Winnipeg, a limited car service and lighting service was secured to the citizens. The City of Winnipeg for the past two years has obtained electric current from the Street Railway Company for the operation of its water works system, but it had an auxiliary steam plant equal to the work of doing the necessary pumping as soon as the Street

Railway Company's plant ceased to deliver the power, the city's plant was immediately put into operation and there was no interruption to the water service in consequence of the break down of the Company's plant.

The loss to the manufacturers is very serious and the interruption came at a time when they were exceptionally busy.

The deliveries of grain during the past few weeks have been somewhat disappointing in volume. The reason for their not exceeding the returns of last year for a corresponding period is that farmers are holding their wheat and oats for higher prices. Reports from provincial points corroborate this view of the situation.

CONDITIONS OF PARTICULAR INDUSTRIES.

In the building trades there is continued activity. All classes of skilled workers are kept fully employed, and with the exception of one cold period, the weather has been favourable. Many buildings are being closed in so that the interior work of finishing can be carried on without interruption during the winter months. The outlook for the next season is particularly bright, as many new buildings are being projected and plans are being prepared by the local architects.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market remained practically unchanged throughout the month. Building operations still continued briskly. The brickwork for a new moulding shop, for the Manitoba Windmill and Pump Company has been completed. A Motor Garage, 60 x 120, for the Reliance Machine Works is ready for the Steel Roof. Work has commenced on a three-story warehouse for E. L. Christie, wallpaper merchant and decorator. The International Harvester Company has announced its intention of erecting a

\$65,000 warehouse early in the spring. The Gas Company is still busy laying mains on the streets, some difficulty has been experienced in securing sufficient labourers, advertisements appearing continually in local papers. Railroad transport has been exceptionally good during the past month, the Canadian Northern Railway especially being very busy. The labour market was quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — Threshing operations are now over, and the season's work finished.

Lumbering. — Many men have left for the lumber camps, but the local papers still contain advertisements for help.

Manufacturing. — The Hanbury Manufacturing Company is still working overtime.

CONDITION OF PARTICULAR TRADES.

Bricklayers have been very busy during the past month, but practically all of the work is now finished. Carpenters and joiners were very busy, the Hanbury Manufacturing Company's sash and door factory working overtime. Lathers, plasterers, painters, plumbers and gas and steamfitters, iron moulders were busy. Machinists were very busy. Canadian Northern Railway machinists working overtime. Printers and journey men tailors were busy. Cigar-makers were also reported busy and railroad employés were very busy. Unskilled labour had a good month.

REGINA, SASK., AND DISTRICT.

Mr. Hugh Peat, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month was active. There was a slight falling off in the demand for labour in the building trades, and many bricklayers were unemployed. Carpenters were in fair demand. Many

workers in the building trades have left the city for their homesteads.

Work on the Parliament buildings is proceeding as rapidly as possible. The kalsomine block makers are busy and there is also a number of carpenters employed making forms for concrete construction.

Two blocks were finished during the month, the Willoughby & Duncan block, which is occupied on the ground floor by stores, and the Smith Block on Searth Street, in which the Canadian Northern Company have their freight and ticket offices.

A new curling rink has been constructed. This will have a capacity of nine sheets of ice for curling. A skating rink has also been built on the north side of the city, 125 feet by 70 feet.

It has been stated that the Ogilvie Flour Mill Company will erect its western mill in Regina.

The Regina Trades and Labour Council passed the following resolution:

That, whereas Adam Weisbrodt met with a fatal accident on the Parliament Buildings, and that whereas other accidents occur on which no inquests take place, and that whereas the absence of such inquests tends to make contractors careless and scaffolding faulty, therefore, be it resolved that the Regina Trades and Labour Council urge the Attorney General to put into force the machinery of his department, and make such inquests compulsory; and be it further resolved that copies of this resolution be sent to the press and also the Attorney General."

A resolution was also sent to the City Council petitioning that body to extend the franchise to householders, and to have the poll tax on house holders abolished.

The Regina Branch of the Canadian Letter Carriers' Association, No. 30, was inaugurated during the month with a charter membership of eight.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — The harvesting of the crop throughout the province is completed, and it is estimated that the average yield is about nineteen and a half bushels to the acre. Large numbers of the men who were employed on threshing and harvesting operations have gone north to Prince Albert, Sturgeon Lake, Cold Lake and other points to engage in lumbering.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull, with many men unemployed. Carpenters and joiners, lathers and plasterers were fairly active. Plumbers and gas and steam fitters were very busy. Labourers were dull. Iron workers and machinists were active. Printers were very busy, with linotype operators and job compositors in demand. Bookbinders were very busy. Barbers, cigar-makers and laundry workers were active. Unskilled labourers were dull.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the month was active, for the time of the year. The weather towards the close of the month has been somewhat severe, but outdoor work has continued and those engaged in different branches of the building trade had an extra busy season. Several business blocks are now in the course of construction and the building of new residences still continues in all parts of the city.

Business in all lines has been exceptionally good during the month, and there is every indication of a good Christmas trade.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing operations are now completed, and the farmers are busy marketing their produce. Everywhere there is a feeling of satisfaction as a result of the season's crop.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, joiners plasterers and builders' labourers have all been fairly well employed. In the case of carpenters, the supply has not been equal to the demand. Plumbers and

electrical workers have also been well employed. The printing and allied trades had a good month and the various trades employed in the railway shops were also well employed. Tailors, laundry workers, bakers, confectioners, barbers and hotel employés were all active.

CALGARY, ALTA., AND DISTRICT.

Mr. Edwin Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour was active. The cold weather of the last two weeks, almost entirely stopped excavating and building operations. The shut-down on public works cost \$3,000 per day in wages. With moderation of weather, renewed activity will ensue. Lack of stone is at present affecting stone cutters. Bank clearings for November, 1908 were \$7,769,612 and for this year the total is \$12,210,346. Buildings permits for November, 1909, show a big increase in number and value over the same month last year. The figures being sixty-nine permits at an estimated cost of \$211,550, and for the same month last year, thirty-one permits calling for an expenditure of \$61,700. Customs returns show an increase of \$23,597 over the same month of last year and nearly \$16,000 over the former month of 1907. Wholesalers and retailers report considerable increase in trade. Up to date, ten miles of water mains and twelve miles of sewer have been laid in different parts of the city.

CONDITION OF PARTICULAR TRADES.

The various skilled trades were active, or very active. Unskilled labour had a good month.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month was a fairly busy one in every line of industry except outside

building, which was retarded somewhat by cold weather. Inside finishers have a much larger amount of work on hand than usual at this time of year and a large number will find employment well into the winter months. Since January first there has been expended on public works about three-quarters of a million dollars. This is in excess of any past season, but has been necessitated by the rapid growth of the city. The largest expenditures of the year, for public works have been as follows: Power plant, \$320,000; paving, \$125,000; water and sewer, \$80,000; sidewalks and boulevards, \$35,000; bridges, parks and opening new streets, \$16,000.

Building permits for October, totalled \$83,535. They totalled \$98,735 for the corresponding month last year. According to the building inspectors' report ending October 31st the following are details of the year's building operations. Residences, value \$699,170; stores, value \$497,108; schools, value \$116,200; churches and convents, value \$108,950; hotels and apartments, value \$376,300; roundhouse, value \$60,800; power plant, value \$76,820; factories, curling rinks, stables, warehouses, etc., value \$99,280; foundries and machine shops, \$41,500; additions and alterations, value \$104,648.

During the past six months, the Dominion, Union and Molson's Banks, and the National Trust Company have purchased property in the business section on which they will erect office buildings in the near future.

On November 18th, the ratepayers endorsed an agreement with the Canadian Pacific Railway Company allowing the Company entrance to the city over a high level bridge. The bridge will have railway, tramway, traffic and pedestrian accommodation, and will cost over \$1,000,000.

On the 25 instant about 150 miners ceased work, at three of the largest mines, in the district. They are demanding a wage agreement, which calls for a wage of ten per cent. of the price of coal; they also ask immediate improvements in bunk house conditions.

At the last meeting of the Senate, of the University of Alberta, plans were adopted

for the first building. The foundation of which are now being laid on the University site. The plans provide for the construction of a building 72 x 230 feet in size, with wings on the north and south ends 38 x 110 feet. The cost is estimated at \$500,000.

No changes in rates of wages or hours of labour were reported.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Preparations for the annual timber cut are in full progress, and during the last few days several parties of men have left for their winter's work in the woods. It is not expected that the booms which the Dominion Government are placing on the river will be completed in time to hold the winter's cut of logs; the cut, therefore, will be curtailed to a certain extent.

Railroad construction.—The railway bridge over the Pembina river which is to be the highest on the Grand Trunk Pacific system is completed to more than half the distance over the Canyon, and the expectations are that it will be entirely completed by Christmas. Piers are also being erected for the bridges at Wolf Creek and McLeod river.

On the 24 instant, the Grand Trunk Pacific inaugurated a tri-weekly passenger and freight service East as far as Wainwright, and a freight service West as far as Entwistle.

On the 15th instant, grading was commenced on the Alberta and Great Waterways Railway. About 200 teams and three hundred men are employed.

CONDITION OF PARTICULAR TRADES.

Stone cutters were very quiet, during the month. All other classes of labour were well employed.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay district

during the month of November was quiet, the supply slightly exceeding the demand. There was a slight shortage in some of the logging camps, which industry is slowly, but steadily improving from the demoralized condition resulting from the panic of 1907.

There is a slight surplus of miners and mine workers at the chief points throughout Kootenay district, including Rossland, Trail, Nelson and Fernie. The setting in of winter at Fernie has reduced the number of carpenters and builders' helpers employed.

The Consolidated Mining and Smelting Company's smelter at Trail, B.C., continues to show a gratifying increase in output. During the three months ended September 30, 1909, the first quarter of the Company's fiscal year, the output of the smelter was, \$1,648,582., while the returns for October total \$412,865, which is largely in excess of returns for the corresponding months of last year. This should bring the output for the year close to \$6,000,000, which would be by all odds the largest return from the smelter for any year since it commenced operations. A feature of the returns for October, is that over half the output for the month was pure gold, while lead contributed about one-quarter of the total, the balance being made up of silver and copper. The smelter employs about 500 men. The capacity of the refinery in connection therewith has been recently doubled.

The damage by spring freshets to the railway between Three Forks and Sandon has been repaired, opening transportation to Sandon and surrounding mines again. It is expected a considerable tonnage of ore will be shipped from that locality during the coming winter months.

At a meeting of the Fruit Growers' Syndicate, composed of those growers who combined during the past season to sell their fruit together, Mr. E. K. Beeston who had charge of the business for the syndicate submitted a statement of the financial results of the enterprise. The net average return on strawberries was \$2.15 per crate of twenty-four boxes; raspberries, \$2.65 per crate, and

cherries, ten to twelve cents per pound. The sixteen growers represented in the syndicate exported fruit to the value of \$5,000, and are well satisfied with the results received. Other growers will be invited to join in the syndicate's operations before the next season for the mutual advantage of all fruit growers. The Dominion Express Company and the Canadian Pacific Railway Company supplied an excellent service this year.

NEW WESTMINSTER, B. C., AND DISTRICT.

Mr. D. G. Stewart, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in this district cannot be said to be in as healthy a condition as last month. This was caused by the wet weather having set in, which prevented to some extent the prosecution of outdoor work, although when possible the work of paving streets, extending sewers, etc., is being carried on and is furnishing employment for a large number of men. Compared with the corresponding month of last year there are many more avenues of employment open. Two more chartered banks (making six in all) will shortly open for business here. A large deal in water-front property on the south side of the Fraser river recently took place; it is reported that a large steel plant will be built thereon. A wire factory is also a possibility in the near future, while an abattoir to cost \$75,000, is an assured fact. The tannery which has been idle for some time has again began operations; besides providing employment for a number of men, it opens a market for the sale of hides. The new line of electric railway between this City and Eburne is now in operation and is being well patronized; the business on this line is sure to increase as the fine agricultural land through which it passes becomes settled. A new line of electric railway to connect this city with the large Fraser Mills is being surveyed; this will be the means of bringing considerable business here, providing it with rapid and regular means of transportation.

The appalling accident which occurred on the line of the British Columbia Electric Railway between this city and Vancouver on the 10th inst., and in which fifteen men met their death and nine more were seriously injured, has brought grief to many homes both here and in Vancouver.

During the month a representative from the Province of Alberta delivered an address before the Board of Trade here re the securing of better trade relations between Alberta and British Columbia, it is hoped that some good, will result from the interchange of views on the matter, as each Province has a supply of goods which the other requires. The bar to the success of the exchange seems to be the high freight rates.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural conditions are quiet at present but great activity continues in real estate. Many of the larger holdings are being subdivided into five and ten acre lots thus providing homes and a sure living for many families. Good prices prevail for all farm commodities.

Fishing.—Fishing is practically at a standstill on the Fraser river at present. Small catches of coho salmon are reported but the greater number of the fishermen have removed their nets until spring salmon fishing again begins.

Lumbering.—Conditions still continue active. A number of steamers called at this port during the month for cargoes of lumber to be in most cases taken to foreign ports. In addition, the orders from the Prairie provinces have been larger than before.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were active, but, carpenters, lathers and plasterers were quiet. Plumbers were active with builders' labourers quiet.

Iron moulders, iron workers, machinists, steam engineers and boilermakers were active.

Woodworkers were quiet, with car builders, (electric) busy, and shingle weavers quiet.

Printers, pressmen, bookbinders, bakers, confectioners and butchers were active, with cigar makers quiet.

Barbers were active and clerks and stenographers quiet, laundry workers were active.

Steamboat men, street railway men and teamsters were active.

Unskilled labour has been quiet.

VANCOUVER, B. C., AND DISTRICT.

Mr. George Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The markets during November reached very high levels, though an advance is expected shortly in dairy produce. Christmas fruits arrived in large quantities and at a good price. Some retail prices were as follows:—

Ham, per lb.....	\$.20	\$.25
Bacon, per lb.....	.25	.35
Pork, dressed, per lb.....	.12½	.20
Pork, tenderloin, per lb.....	.10	.30
Beef, per lb., dressed.....	.12½	.20
Beef, fronts, per lb.....	.06½	.08
“ hinds.....	.11	.12½
Veal dressed.....	.10	.20
Lamb, per lb.....	.15	.25
Turkeys, Eastern.....	.30	.35
Turkeys, local.....	.30	.34
Geese, local.....	.25	.30
Chickens, per lb.....	.25	.30
Eggs, dozen.....	.35	.40
	.50	.60

Butter—

Manitoba.....	.28½
Best Dairy, per lb.....	.25
Creamery.....	.25
	.40

The Canadian Development Company, Limited, was formed with the object of promoting British Columbia industries, with offices at London and Vancouver.

The first shipment of eggs, (116 barrels) from Shanghai, China arrived; 16,369 cases of Japanese oranges also arrived.

Shipping was very active especially in the coastwise lumber trade.

The percentage of profit to come to the City from British Columbia Electric Railway Company for October will amount to \$3,940.92, which is about \$1,000 larger than any cheque ever received before. For the first ten months

of the year the city has received \$25,-682.06 from the Company, about \$8,000 more than any previous period of a similar length.

The Vancouver Furniture Manufacturing Company shipped the first car of furniture manufactured in this city, to a point East. The Company employs thirty-five men.

Tenders for the construction of almost fourteen miles of water piping have been called for by the city. The work contemplated is as follows for next year:

3.05 miles of 4 in. at 60 cents.....	\$ 9,762
8.26 miles of 6 in. at 80 cents.....	34,880
.46 miles of 8 in. at 1.10 cents.....	2,662
2.20 miles of 12 in. at 1.50 cents.....	17,460
100 hydrants.....	5,000
Crosses, valves, etc.....	9,706

Total..... \$79,470

The following money by-laws will be voted on by the rate-payers next January:

Opening streets.....	\$350,000
Macadamizing.....	150,000
School Purposes.....	270,000
Land Purchase.....	334,000
Exhibition.....	85,000
Coal Harbor Causeway.....	80,000
Parks.....	50,000
Fire halls.....	35,000
Juvenile home.....	20,000

Total money by-laws..... \$1,376,000

The real estate market was active, several large transactions being reported. The old *World* building and site forty-five by fifty-two feet was sold for \$50,000.

One engineering party of the Canadian Northern Railway has located a line down the Fraser river, about sixty miles East of Vancouver. Another party is engaged on the main Thompson River, and a third is between Tete Jaune Cache and the Yellowhead Pass.

The Trades and Labour Council organized a Company and will build a \$45,000 labour hall on a \$50,000 site.

The labour market was normal. The heavy rains towards the end of the month, compelled outside workers to lay off work. Carpenters reported, however, that during the past season, few of their number had been out of employment, and that the backward spring was compensated for by a late fall.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Herring fishing is brisk. Japanese fishermen seem to be in the majority.

Lumbering.—Prices maintained strong, with a good demand for building material.

Manufacturing.—The furniture manufacturers reported business as very active.

Mining.—Northern advices state activity prevails at the different diggings.

CONDITION OF PARTICULAR TRADES.

Weather conditions were the cause of enforced idleness in the building trades. Plumbers, gas and steam fitters reported trade active. The metal engineering and shipbuilding trades were generally active, a few machinists reporting, members of the craft unemployed. The blacksmiths will be assessed one day's pay during the current year and one day's pay in 1910 to finance a campaign for an eight-hour day throughout the country. Carriage and wagon makers, and street car builders were active. Printers were active, there being thirty-five job offices in the city; a new daily paper will shortly be started. Journey-men tailors reported a number of their craft idle, partly owing to the unsettled strike and largely to competition with the Orientals. Bakers and confectioners, reported that at present there were over forty members in the union. Butchers and meat cutters were very busy, but cigar makers were very quiet. Railroad and steamboat employes were active. Longshoremens reported a number idle.

The Musician's Union, report a membership of 120, half of which is regularly employed during the day time, while the balance are fairly well employed.

DISTRICT NOTES.

Prince Rupert.—There are 800 names on the voters' list, and the population is 4,000. A large number are idle, yet there is considerable building going on.

Creston.—Building is reported very active, several large stores are being put up.

Eburne.—The first regular cars on the Eburne-Westminster line were put into service.

North Vancouver.—The ferry by-law for the expenditure of \$128,000 for the purchase of a new boat and wharf was carried by the ratepayers. Building is fairly active.

VICTORIA, B.C., AND DISTRICT.

Mr. W. E. Ditchburn, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of November saw a number of men out of steady employment. This has not been caused by lack of opportunity as conditions are as brisk as in former months of the year, but rather on account of weather conditions. The month has, up to the present time, been a very wet one, and a number of those employed in the building branches, unskilled labour and municipal improvement works, and outdoor workers have been compelled to lay off for a considerable portion of the time. Besides this, during the present month, a number of men employed in Northern British Columbia and in the Yukon have returned to Victoria for the winter months. These include engineers, firemen, and general steamboat men who were employed during the former month on the northern rivers, where the season's work is now over. Should the weather conditions permit the building of tracks will again assume their former brisk aspect, though only intermittent periods of activity can be expected during the rest of the winter months.

A new shipbuilding industry has been established in Victoria Harbor during the present month. The title of the firm will be Messrs A. Watson & Son, and they will handle all kinds of wooden shipbuildings. Although the wooden shipbuilding industry has been somewhat dull during the past summer months, only small repair work going on, it is expected that this winter, as last, will see the construction of light draft steamers for the northern rivers

taken in hand, and this will give employment to a number of men.

Transportation on the boats plying between this city and Project Sound ports and Vancouver has fallen off very materially during the month, owing, no doubt, to the close of the summer travel season and the closing of the exhibition at Seattle.

The bank clearings for the month of October were the highest in the history of the local clearing house, aggregating \$6,873,867, an increase over the previous month of over half a million dollars.

The building permits issued during October amounted to \$104,840 as compared with \$90,755 for the same month of last year. The figures for the year up to the beginning of the present month compared with the same period of the previous year are as follows:

	1909	1908
January.....	\$ 78,080	\$ 54,725
February.....	122,680	72,325
March.....	211,640	110,800
April.....	188,060	129,625
May.....	188,620	79,295
June.....	90,120	74,010
July.....	372,120	106,070
August.....	141,040	134,770
September.....	140,935	53,630
October.....	104,840	99,755
Total (10 mos.).....	\$1,548,135	\$915,000

The customs receipts for the month of October show that although there was a slight falling off from the previous month, the gain over the corresponding month of last year was considerable. The following are the figures:

Duty.....	\$102,783.43
Chinese.....	44,548.00
Other Revenue.....	5.90
Total.....	\$147,337.33

The total for October of last year was, \$103,798.25.

CONDITION OF PARTICULAR TRADES.

While there are many buildings under construction, the building trades have felt the effect of the rainy weather which has prevailed during the month. This has caused the laying off temporarily of a number of those on outside work, but those employed on inside work have had steady employment. This con-

dition prevailed throughout all branches of the building trades.

Iron moulders have found their trade in a normal condition. Iron workers and helpers also were working steadily. Linemen have been kept busy. Blacksmiths, boiler makers, iron ship builders, were fairly busy during the month. Shipwrights and caulkers were only employed on repair work, no new work having been started up to the present time.

Wood workers and upholsters were not over-crowded with work during the month, carriage and wagon makers were fairly busy, and pattern makers were constantly employed.

The printing trades has somewhat improved during the present month owing, no doubt, to the fact that the elections for the Provincial House took place on the twenty-fifth of the month. The photo engravers have also been kept very busy.

Journeymen tailors found trade picking up and were steadily employed during the month. Garment workers also were kept busy on the local factory.

Bakers, confectioners, and meat cutters reported business in a healthy condition during the month. The local cigar manufacturers complain that the changes in the inland revenues' rates affecting their business militates against them.

Clerks and stenographers were kept regularly employed during the month, as were delivery employés. Hotel and restaurant employés were not as busy as during the summer months, owing to the falling off in travel.

The unskilled labourers in city work and other outside employment have felt the effects of the wet weather, and have been employed only part of the month.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market, in this district have not shown much

change during the month and for the time of year are very active, there not being many idle men in the district at present. A new industry has been started in the shape of a herring cannery which will be in operation when the herring run has fairly started. The business is being run on the same processes, and with the same kind of machinery as in Great Britain, and has every prospect of being successful.

Business men report trade conditions, as bright, and there has been a steady increase in transportation, and travel. There have been no changes in wages or hours during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is very little activity among the farmers at present.

Fishing.—Herring fishing is about to start. The fish are outside and are expected to strike in at any time. There are more men and companies than last year, as well as the new herring canning factory, and if conditions are as they have been in the past the last year's output will be greatly increased.

The whaling station on the Gulf has started with fair success so far. The stations on the outside having to stop for a while on account of the weather.

Lumbering.—The lumber camps have been working steadily up to the last few weeks, but wet weather is hampering them now. The saw mills in the district were working full time, there being a good demand for dressed and sawed lumber.

Mining.—The coal mines in the district are working to their full capacity, the demand for coal being very active. This applies to two of the new companies as well as to the older companies in the district.

Railroad construction.—Work is going forward steadily on the extension to the Eastern and Northern Railway. Land clearing by the Canadian Pacific Railway is being pushed as fast as possible and the land as cleared is placed on the market.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported work quiet. Carpenters and joiners have been

exceptionally well employed for the time of year, and are still busy when weather permits. Painters and paper hangers were quiet. Plumbers were active, but builders' labourers were quiet. Blacksmiths and carriage makers were active

for the time of year. Printers have been active during the month. Teamsters and expressmen reported work active. Unskilled labour has been fairly well employed, there being few idle men for the time of year.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF NOVEMBER, 1909.

DURING the month of November an application was received for the establishment of a Board of Conciliation and Investigation on behalf of the Edmonton Standard Coal Company, Limited, of Edmonton, Alta., the dispute affecting, it was alleged, 75 employés.

Report Received.

During the month the report was received of the Board of Conciliation and Investigation to which had been referred certain differences between the Intercolonial Railway of Canada and certain of its roundhouse employés, members of the Canadian Brotherhood of Railroad Employés, Division No. 15, Halifax.

Other Proceedings Under the Act.

In the case of the application from the Edmonton Standard Coal Company, Limited, of Edmonton, Alta., it was stated that the dispute was caused by the dismissal of five men by the pit boss, the other employés of the Company ceasing work without notification to the Company. It was also stated by the Company that differences existed between the management and the employés arising out of a demand on the part of the

employés for an increased rate of wage. Mr. Frank B. Smith, Mining Engineer, of Edmonton, Alta., was appointed a member of the Board on the recommendation of the employers. Mr. Clement Stubbs, of Edmonton, Alta., was appointed by the Minister as second member of the Board in the absence of any recommendation on behalf of the employés, and on December 2, the Board was completed by the appointment of Mr. Geo. F. Cunningham, of Edmonton, Alta., as Chairman, on the recommendation of the other two members of the Board.

During the month of November, sittings were held of the Board of Conciliation and Investigation which had been established to adjust differences between the Intercolonial Railway of Canada and machinists and fitters in its employ, members of the International Association of Machinists, but at the end of the month the sittings of this Board had not been concluded. The members of this Board are: His Honour Judge John A. Barron, of Stratford, Ont., County Judge of Perth, Chairman; Mr. Jas. H. Gilmour, of Brockville, Ont., member appointed on behalf of the employers; Mr. J. G. O'Donoghue, of Toronto, Ont., member appointed on behalf of the employés.

I.—REPORT OF BOARD IN DISPUTE BETWEEN THE INTERCOLONIAL RAILWAY OF CANADA AND CERTAIN OF ITS ROUNDHOUSE EMPLOYÉS.

ON November 17, the Minister received the report of the Board established in the matter of differences between the Intercolonial Railway of Canada and certain of its roundhouse employés, members of the Canadian Brotherhood of Railroad Employés, Division No. 15, Halifax. The report in question was

signed by the three members of the Board, viz: Sir. Geo. Garneau, of Quebec, Que., Chairman, Mr. Jas. H. Gilmour, of Brockville, Ont., member; Mr. Aaron A. R. Mosher, of Halifax, N. S., member.

In a letter dated, November 26, the Department of Labour was advised of

the acceptance of this report by the Government Railways' Managing Board, and on December 2, a letter was received in the following terms, signifying the acceptance of the report by the employés concerned.

"CANADIAN BROTHERHOOD OF
RAILROAD EMPLOYÉS.

HALIFAX, N. S., November 29, 1909.

"F. A. ACLAND, Esq.,
Deputy Minister of Labour,
Ottawa, Ont.

"Dear Sir,—

I beg to advise you that at a meeting of Division No. 15, Canadian Brotherhood of Railroad Employés held Thursday 25th inst., a resolution was unanimously passed accepting the findings, of the Board of Conciliation and Investigation appointed to inquire into the differences between this Division and the Intercolonial Railway.

The Division also wishes to express its sincere appreciation of the manner in which the Board conducted the case, and for the consideration shown our representatives by the members of the Board.

Yours truly.

(Sgd.) CHAS. McTIERNAN,

*Chairman of Grievance Com-
mittee, Division No. 15,
Canadian Brotherhood Rail-
way Employés, Halifax,
257 Campbell Road."*

The points referred for investigation were analysed by the Board as follows: 1. Have senior men with equal ability been dismissed while junior men were retained? 2. Have the men been unjustly discriminated against? 3. Have they been discriminated against, in certain cases, on account of their being members of the Canadian Brotherhood of Railroad Employés? 4. Does the Board admit the claim made by the representatives of the Intercolonial Railway, that the responsible officials must be the judges in the selection of the men for reten-

tion or dismissal from the employ of the railway?

In respect of the first point the Board finds that in certain instances men were retained in the employ of the Intercolonial Railway who were junior to some of those dismissed, the reason for such action on the part of the Company being apparently based on qualifications for special duty possessed by some of the junior men, or on the comparative records of the men as to their conduct and ability. In the case of Joseph Gibson, one of the men dismissed, and Alexander Murphy, retained in the employ of the Company, the Board finds that the evidence does not disclose any reason to show that Gibson should be considered as less able or efficient than Murphy.

In respect of the second point the Board has been unable to establish to its satisfaction that any unfair discrimination has been exercised.

In respect of the third point that discrimination had been exercised in certain cases against men on account of their being active members of the Canadian Brotherhood of Railroad Employés, the Board finds that the evidence does not justify it in believing this to be the case.

With respect of the claim that the responsible officials of the Intercolonial Railway must be the judges in the selection of men for retention or dismissal, the Board admits this claim, but at the same time, deems it necessary to point out that in dealing with a very large number of employés some instances of undue hardship imposed upon the latter will unavoidably occur. The Board advise that where men belong to a duly incorporated or recognized union which has no schedule of agreement with the railway, and that when the employés grievances entail reference to officials who are not accessible to the men at the place where they are employed they should be allowed to present them through the medium of the duly qualified officers of the union to which the complainants belong.

The Board in conclusion recognizes the willingness and the good spirit shown by both parties to the dispute in procuring the evidence which was required.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

In the matter of the Industrial Disputes Investigation Act 1907, and in the matter of differences between the Intercolonial Railway and certain of its Roundhouse Employés, members of the Canadian Brotherhood of Railroad Employés, Division, No. 15.

To the Honourable

The Minister of Labour,
Ottawa, Ont..

Sir:—We, the undersigned members of the Board of Conciliation and Investigation, appointed by you on the 25th of September 1909, in the above matter, beg respectfully to submit the following report.

The members of the Board first met in the Board of Trade rooms, at Halifax, N. S., on the morning of the 19th of October, and, after being duly sworn, proceeded to acquaint themselves with the details of the case submitted to them, as set forth in the documents accompanying the application for the Board.

The Employés had two duly authorized representatives present, but owing to a misunderstanding the representatives of the Intercolonial Railway were absent, and the Board adjourned to the following morning, in order to have all parties present. Telegrams were sent to the Chairman of the Board of Management of the Intercolonial Railway and to the General Superintendent to inform them of this.

The Board met on the following morning, there being present, besides the three members, Messrs. Jos. Gibson and Charles Squires, delegated by the Canadian Brotherhood of Railroad Employés, Division No. 15, representing the Employés, and Messrs. F. P. Brady, Member of the Board of Management and General Superintendent of the Intercolonial Railway, and G. R. Joughins, Superintendent of Motive Power, representing the Company. The day was spent in discussing the points at issue with the representatives of the parties and in en-

deavouring to bring about an amicable settlement. The representatives of the Employés submitted a list of names of men dismissed and of men retained to prove the complaint contained in the application for a Board of Conciliation and Investigation, and when the Board adjourned in the afternoon, it was with the understanding that the representatives of the parties would confer together before the next meeting of the Board, to see if the basis of an amicable agreement could be arrived at.

The next morning, when the Board resumed its sitting, the parties reported that no agreement had been arrived at, and General Superintendent Brady stated that he desired the Board to pronounce itself on the principle of "whether the men should be the judges of who should be retained or dismissed from the service of the railway."

It being evident that no agreement was possible, the Board proceeded to hear the witnesses asked for by the parties and to receive the documentary evidence submitted. The testimony was taken under oath and the documentary evidence duly attested, and this occupied the Board on the 21st, 22nd, and the morning of the 23rd. of October.

On the 20th. of October, the Chairman of the Board of Management of the Intercolonial Railway had telegraphed to our Chairman as follows:—

OTTAWA, OCT. 20, 1909.

SIR GEORGE GARNEAU,
Halifax, N. S.

"I am desirous of appearing before the Board before concluding its work to present views of management on points at issue. May I ask you to adjourn from Halifax to Montreal at conclusion, as it is impossible for me to go so far east owing to pressure of public business.

(Signed) M. J. BUTLER.

All the witnesses in Halifax having been heard, the Board adjourned on the 23rd of October to meet again on the 27th.

The meeting in Montreal was held in the Intercolonial Offices, all the members of the Board being present, as well as re-

representatives of the Railway and Mr. Jos. Gibson, representing the Employés. Mr. Nelson M. Rand, who was Master-Mechanic on the Intercolonial Railway when the dismissals took place, and who had been summoned as a witness, gave his evidence, and the Chairman of the Board of Management, Mr. Butler, presented the views of his Board on the principle involved in the points at issue. The investigation was then closed and the members of this Board proceeded to review the evidence and discuss their findings.

An analysis of the question submitted to the Board reduces it to the following points:—

1. Have senior men with equal ability been dismissed while junior men were retained?

2. Have the men been unjustly discriminated against?

3. Have they been discriminated against, in certain cases, on account of being members of the Canadian Brotherhood of Railroad Employés?

4. Does the Board admit the claim made by the representatives of the Intercolonial Railway, that the responsible officials must be the judges in the selection of the men for retention or dismissal from the employ of the railway?

The following is the unanimous opinion of the Board:

1. The Board finds that, in some instances, men were retained in the employ of the Intercolonial who were junior to some of those dismissed, the reason for such action on the part of the Company being apparently based on qualifications for special duty possessed by some of the junior men, or on the comparative records of the men as to their conduct and ability.

Nevertheless, in the case of Joseph Gibson, one of the men dismissed, and Alex. Murphy, retained in the employ of the Company, a careful comparison of the records and evidence before the Board establishes that Gibson was the senior man in length of service and does not disclose any reason to show that he should be considered as less able or efficient than Murphy.

2. The Board cannot establish to its satisfaction that unfair discrimination has been exercised. The manner in which the selection of the names of the Roundhouse Employés, to be retained in the service or dismissed, was made, could not be clearly established by the investigation, and, under these circumstances, the Board recommends that the seniority and qualifications of the Roundhouse Employés who have been dismissed be carefully looked into by the higher officials of the Railway and compared with those of the men, in the same class, who have been retained, so that any involuntary injustice which might have been committed be remedied without unnecessary delay.

It having appeared, in the course of the investigation, that undue interference was suspected, on the part of certain political organizations or committees, in connection with the selection of the names for dismissal or retention, the Board finds that all the sworn evidence heard before it tended clearly to disprove any such interference.

3. On the question of discrimination, in certain cases, having been exercised against the men on account of their being active members of the Canadian Brotherhood of Railroad Employés, the evidence before the Board does not justify it in believing this to be the case.

4. The Railway Company, through the Chairman of the Board of Management and one of the other members, strongly urged the claim that the officials of the company must be the judges of the qualifications of the men in its employ for retention or dismissal. The Board admits this claim, but at the same time it deems it necessary to point out that, in dealing with a very large number of employés, some instances of undue hardship imposed upon the latter will unavoidably occur. The higher officials of the Railway state that they are always willing to investigate complaints on the part of the men and that such complaints may be carried up, through the chain of responsible officials, to the General Superintendent, or even to the Board of Management. This, on principle, is eminently

fair and just, but in practice it will be found, in many instances, to entail on the men concerned expenses which are beyond their reasonable means. It is therefore the opinion of the Board that, when the men belong to a duly incorporated or recognized union which has no schedule of agreement with the Railway, and when their grievances entail reference to officials who are not accessible to the men at the place where they are employed, they should be allowed to present them through the medium of the duly qualified officers of the union to which the complainant belongs.

The Board desires to acknowledge the willingness and good spirit shown by both parties to the dispute in procuring the evidence required by it.

We have the honour to be.

Sir,

Your obedient servants,

(Signed) J. GEO. GARNEAU,

Chairman.

" A. R. MOSHER,

" J. H. GILMOUR,

Quebec, November 12th, 1909.

REPORT OF THE DEPUTY MINISTER OF LABOUR ON INDUSTRIAL CONDITIONS IN THE COAL FIELDS OF NOVA SCOTIA.

IN the closing days of August 1909 Mr. F. A. Acland, Deputy Minister of Labour, left Ottawa, under direction of the Hon. W. L. Mackenzie King, C.M.G., Minister of Labour, for the purpose of conducting a special inquiry into the condition of the coal mining industry of the Province of Nova Scotia. The inquiry, it was directed, should have special reference to the differences then existing between the operators of the different collieries and their employés on the one hand, and among the employés themselves on the other. Mr. Acland left on his mission, on Monday, August 30, returning on September 19, having in the meantime visited every important centre of the coal mining industry in Nova Scotia and having discussed the situation in its general bearings with the managers of all the leading collieries, with the leading representatives of the workmen affected, and with prominent

citizens in the thirteen cities and towns most closely interested.

The report of the Deputy Minister, which constitutes an authoritative and comprehensive review of current conditions in this important industrial field, was prepared under date of September 25, and was presented by the Honourable the Minister of Labour to Parliament in blue book form in the closing week of November. The following is a brief review of its more salient features.

Coal Mining Statistics.

The report opens with a brief statistical survey of the coal mining industry of Nova Scotia. The following table from the report shows the producing coal mines of the province, and the production and number of workmen employed at each mine, for the year ended September 30, 1909:

Company.	County.	Production.	No. of Employés.
Dominion Coal Co.....	Cape Breton	3,816,958	5,486
Nova Scotia Steel and Coal Company.....	"	662,350	1,792
Cumberland Railway and Coal Company.....	Cumberland.....	416,132	1,726
Acadia Coal Company.....	Pictou.....	413,782	1,090
Intercolonial Coal Company.....	"	315,590	937
Maritime Coal Railway and Power Company, Chignecto.....	Cumberland.....	15,839	165
Maritime Coal Railway and Power Company, Joggins.....	"	51,130½	149
Inverness Railway and Coal Company.....	Inverness.....	283,704½	568
Port Hood Coal Co.....	"	99,700	216
Other Companies.....	Various.....	226,096	804
		6,299,262	12,933

During the same period the coal of Nova Scotia was marketed as follows:—

	Tons.
In Nova Scotia.....	1,950,631½
In New Brunswick.....	510,330½
In Quebec.....	2,047,638½
In the United States.....	499,634½
Elsewhere.....	477,353½
Total.....	5,485,588½

It will be seen that Quebec, or the portion of the domestic coal market wherein competition with the United States' product is most keen, consumes about one third of the Nova Scotia product, while the Nova Scotia coal exported to the United States is less than ten per cent of the product, and, for the year named, was less than half a million tons. The United States product, on the other hand, was marketed in Canada dur-

ing the year ended June 30, 1909, to the extent of 11,711,961 tons, of which 6,710,933 tons represented bituminous coal and 1,139,233 tons bituminous slack or dust, the remainder being anthracite and coke.

With respect to the Canadian and American tariff on coal the report states:

"The Canadian duty on bituminous coal is 63 cents per ton, and on bituminous dust or slack and on charcoal 14 cents per ton. There is no duty imposed by Canada on anthracite or coke.

"The United States duty on coal for many years prior to 1894 was 75 cents a ton, under which the export from Nova Scotia, after fluctuating violently between 254,750 tons in 1873, and one-half, one-third, and one-fourth that figure in the few succeeding years, was almost wiped out in 1892 and 1893 when the amount sent to the United States was respectively 13,833 tons and 16,099 tons. In 1894, the duty was made 40 cents, and so remained for three years, during which there was a marked increase in export. In 1897, the United States tariff imposed a duty of 67 cents on coal, and this remained unchanged until a few weeks ago, when a reduction was made to 45 cents.

COAL PRODUCTION IN ALBERTA, BRITISH COLUMBIA AND NOVASCOTIA FOR THE FIVE YEARS 1904-08.

Year.	Alberta, short tons 2,000 lb.	British Columbia, short tons 2,000 lb.	Nova Scotia, short tons 2,000 lb.	Total tons of 2,000 lb.	Percentage of Increase Canadian Coal Production.
1904.....	728,931	1,862,625	5,596,241	8,187,797	
1905.....	811,228	1,945,452	5,646,583	8,403,263	2.63 p.c. inc. over 1904
1906.....	1,385,000	1,955,000	5,840,000	9,180,000	9.24 p.c. " 1905
1907.....	1,834,745	2,365,000	6,354,000	10,553,745	14.96 p.c. " 1906
1908.....	1,845,000	2,362,000	6,540,000	10,747,000	1.83 p.c. " 1907
Totals.....	6,604,904	10,490,077	29,976,824	47,071,805	

Alberta increase 1908 over 1904.....1,116,069 tons or 153 p.c. increase.
 British Columbia increase 1908 over 1904..... 499,375 tons or 26.8 p.c. "
 Nova Scotia increase 1908 over 1904..... 943,759 tons or 16.8 p.c. "

The report also gives the following statement showing the total coal production of Canada by Provinces from 1904 to 1908:—

The Labour Situation.

The present situation has arisen mainly out of a struggle between two rival organizations, namely, the Provincial Workmen's Association and the United Mine Workers of America, concerning the enrollment of the employes and the question of recognition by the employing companies. In an introductory review of the conditions which led to this situation, the report gives a brief account of each of the contending organizations.

With regard to the Provincial Workmen's Association it is stated as follows:

"The Provincial Workmen's Association of Nova Scotia and New Brunswick was organized in the year 1878, and from that date until the beginning of the present dissension was practically the only trade union known among the miners of the province. The organization, which was incorporated under the laws of Nova Scotia in 1881, is controlled by a Grand Council, and its chief office is the Grand Secretaryship, a salaried position, which has been for the last eleven years occupied by Mr. John Moffatt, Dominion, C.B. The majority of the miners have, as a rule, belonged to the Provincial Workman's Association, but its membership has fluctuated as the demand for organization appeared to be pressing or otherwise. It has been the practice in most cases for the operating companies to give formal recognition to the different unions of the Provincial Workman's Association, that is to say, to accept a committee representing the union as entitled to speak on behalf of the employes, and frequently, to make agreements with such bodies. In addition, several of the employing companies have made it a practice to collect the dues of the Provincial Workmen's Association; that is to

say, on the written request, as a rule, of a particular employé the company will deduct from the wages of the employé the dues payable to the order; and as a matter of convenience in such cases, the custom has grown up whereby the company has made such collection from a list furnished by the Grand Secretary, the necessary changes being made regularly. The method of collecting dues is usually termed the 'check-off,' and, apart from what is known as the 'closed shop,' is perhaps the largest measure of recognition that is sought by unions or conceded by employers.

"The effect of the system is of course to make the employer a party to building up the union, the regular deduction of dues in the way described tending to prevent delinquencies and generally to keep the organization compact. The point is one which has figured somewhat prominently in the present difficulties. Coal mining companies were specially empowered under the Nova Scotia law to make these collections, though not all companies have assumed the responsibility. There are, of course, other dues similarly collected, for hospital, doctor, &c., and in some cases, where the men ask, for church. The collection of union dues is understood to be a practice confined to the coal mining industry.'

Concerning the United Mine Workers of America, the report contains the following:—

"The United Mine Workers of America is an unincorporated body, comprising in its ranks the majority, probably, of the workers in the bituminous and anthracite mines of the United States. By many of the bituminous operators, the organization has received a recognition similar to that granted the Provincial Workmen's association by the Canadian operators; in the case of the anthracite operators, however, such recognition has been definitely refused. The body claims a membership fluctuating from three to four hundred thousand, not falling below the former figure. The order is governed by an executive board, termed 'International,' whose business is conducted from Indianapolis, Ind. The various local unions are grouped into districts which are given numbers and each district is entitled to a representative on the executive. The coal miners of eastern British Columbia and Alberta, for instance, have been during the last few years organized as local unions of the United Mine Workers of America and constitute District No. 18 of the order, with district president and secretary on salary, and a representative on the executive. The president of the organization for many years was Mr. John Mitchell, who became widely known during the great coal miners' strike in the United States in 1902, and on that and other occasions took high rank as a labour leader. Mr. Mitchell was a year ago succeeded in the presidency by Mr. Thomas L. Lewis, of Bridgeport, Ohio, a native of Wales."

Following the above a list of the various local organizations affiliated with the Provincial Workmen's Association and of the locals affiliated with the United Mine Workers of America is given.

A General View of the Situation.

After reviewing briefly the conditions existing at the several mines of the Province with respect to the standing of the two organizations and the relations of the same with the operators the report contains the following summary of the

situation as a whole: "It will be seen from the above statement that there are three coal mining strikes at present in progress in the province of Nova Scotia, namely, at Glace Bay, Inverness, and Springhill, all of them arising out of the struggle between the rival unions. The strikes at Glace Bay and Springhill took place after the disputes to which they had reference had been investigated by a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. The strike at Inverness took place without any reference to a Board under the Industrial Disputes Investigation Act, and would appear therefore to be directly opposed to the spirit and terms of the Act. At Glace Bay, the strike appears to be practically broken, though the production is still below normal, and many employés are receiving relief; the military force is likely to be retained for some time to come. At Inverness, where the proportions are smaller, the strike is yet more definitely broken, but there is still a considerable number of men on the United Mine Workers of America relief lists, and military protection is still considered desirable. At Springhill, no attempt is made to work the mine, and operations apparently at a standstill for an indefinite period, with a promise of the worst results to the industry and community concerned."

History of the Struggle.

In following somewhat more closely the struggle which has resulted in such wholesale disaster to the coal mining industry of Nova Scotia, the report sets forth in detail the circumstances under which the United Mine Workers of America, formed their earliest organizations in Nova Scotia and under which arose the beginning of the strife with the Provincial Workmen Association. The action of the latter organization in combatting the intrusion of the United Mine Workers of America into its field is also dealt with and a sketch given of the several leaders on both sides who have taken part in different phases of the agitation. The report then deals at length with each of the three strikes which resulted from

the conflict between the rival unions, namely, the strike at Glace Bay, the strike at Inverness and the strike at Springhill.

The Strike at Glace Bay.

In dealing with the strike at Glace Bay, the circumstances which led to the appointment of a Board under the Industrial Disputes Investigation Act, are dealt with at some length. The Board's finding on the question of recognition is described and the more important points of the minority report which was presented are outlined. The report then describes the various incidents preceding and following the declaration of a strike which took place on July 6. An analysis of the daily output of the mines during July, August and September is also given, and the events connected with the calling out of the militia are briefly stated.

As defining the attitude of the Department of Labour with regard to the strike, the following official statement was made public on July 13 by direction of the Minister of Labour:

"The dispute at Glace Bay between certain of the employés of the Dominion Coal Company, members of a local union of the United Mine Workers of America, and the said company, has already been the subject of government intervention by reference under the Industrial Disputes Investigation Act, and the report of the Board appointed has been given to the public in accordance with the provisions of the Act.

"Were parties to industrial disputes encouraged to look indefinitely to government intervention, or given reason to believe that the findings of boards appointed expressly for the purpose of inquiring into existing troubles would be subject to further revision by the minister or other officer of the Department of Labour, it would seriously prejudice the effectiveness of the work of the boards appointed under the Act and the value of their findings and might only serve, having regard to industrial disputes generally, to prolong rather than minimize the period of industrial strife."

With respect to the probable duration of the strike the report states as follows:—

"The duration of the strike is of course wholly conjectural. The United Mine Workers of America is said to be allowing relief at the present time at the rate of \$2 for each man, \$1 for a wife and 50 cents for each child. The officials of the United Mine Workers speak confidently of their ability to stand such a strain indefinitely, but this is obviously the language of exaggeration, and must at any rate depend largely on whether or not the Order is called on to support yet other strikes in other districts. At the present rate of growth in output the company will by the end of October, if not sooner, reach a point of production substantially equal to that usually attained during the winter months, or until the 'banking' is commenced in February. It is likely, therefore, that the majority of those now on strike will be surplus labour during most of the winter."

The Strike at Inverness.

The strike at Inverness, which was the second in point of date of commencement, differed from the cases at Glace Bay and Springhill inasmuch as the dispute had not been referred to a Board under the Industrial Disputes Investigation Act, and was therefore an infringement of the terms of that Act. The circumstances under which the strike was called are described. The strike took place on July 9, but the record of outputs from that date onward showed that its effectiveness was short-lived. The strikers who originally numbered 418 had diminished to about 100 by the first of September. Military protection was in this case, as at Glace Bay asked for and granted.

While in Inverness a special meeting of the municipal council was called to meet the Deputy Minister who has asked various questions with regard to the operations of the Industrial Disputes Investigation Act.

The Strike at Springhill.

In dealing with the strike at Springhill, the report describes the conditions under which the Board of Conciliation and Investigation was appointed under the Industrial Disputes Investigation Act, to deal with the threatened dispute and the other circumstances which, on the refusal of the men to accept the findings of the Board, resulted in the calling of a strike on August 9. The pumpmen and others necessary to protect property, who usually remain at work in case of a general strike, were in this instance withdrawn, and the protection of the mines was undertaken by the officers, who are still continuing the work. The feeling which exists between the management and the men is analysed at some length in the report.

The Industrial Disputes Investigation Act.

With reference to the consensus of opinion in Nova Scotia with regard to the Industrial Disputes Investigation Act, 1907, the report contains the following as its concluding statement:

"I heard much discussion of the Industrial Disputes Investigation Act while in the coal mining districts of Nova Scotia. While many had views as to amendments that would, in their opinion, strengthen the Act, there was a general consensus of approval of the principle of the measure. Before the present series of 'recognition' strikes set in, every coal mine in Nova Scotia save one was working under terms recommended by a Conciliation Board, or arranged while a Conciliation Board was being established for the purpose of investigation. The solitary exception was the Inverness mine, where the agreement had existed from 1906, before the enactment of the Act, but where the manager shortly before the present strike started, had written the department for forms looking to the establishment of a Board.

"Since the enactment of the measure and prior to the present trouble there has been but one strike of importance in the coal mining industry in Nova Scotia, that, namely, of the mines at Springhill in 1907, and this, occurring after an inquiry before a board, was strictly legal. The only important strike, occurring in open infringement of the Act is that now in progress at Inverness, where, however, the trouble was largely the work of newly-arrived Belgians. There was a strike of a few day's duration at Springhill a week or two after the enactment of the Act in 1907, but the men returned to work immediately on learning that the new Act applied to their case.

"Looking at the number of agreements affected in the coal mining industry under the Industrial Disputes Investigation Act, it is impossible not to feel that the men have in this Act a means of appealing to public opinion against unfair treatment, which is likely to prove far more effective than a strike. Three-fourths of the miners of Nova Scotia, even in face of the existing strikes and friction, are contentedly working under agreements thus affected."

Later Developements.

It may be added that since the date of the report, September 25, events in con-

nection with the difficulties under discussion have developed closely along the lines indicated in the report as probable. The output at the Dominion mines has gradually increased until during the latter days of November it exceeded 9,000 tons. This figure, while not as high as the daily output prior to the strike, is considerably higher than that which usually prevails after the close of navigation. The average output for the last week of November 1908, after the close of navigation, reached about 5,000 tons, against an output of 9,000 for the present year. The Management of the Dominion Coal Company, moreover, state it to be their intention to continue this high rate of winter output, and with that object are proceeding to bank coal immediately. Banking is not usually started until some time in February. The number of soldiers remaining in the district is about 170.

In the case of the Cumberland Railway and Coal Company at Springhill, the mines have remained closed from the date of the strike. The Railway Department of the Company ceased operations at the same time, with the exception of express and local passenger trains. In a communication to the Department the Management of the Company states that the employés of the Railway Department are associated with the Canadian Brotherhood of Railway Employés and are not on strike, but that the majority of the men are idle on account of the suspension of operations at the mines. The Management reports that the Barge Department, the Sea-going Tug "Springhill", and seven large barges are also idle, laid up at Parrsboro and their crews discharged, owing to the strike; wharf hands and trimmers are also idle.

In the case of the Inverness Railway and Coal Company, the output during the month of November averaged between 800 and 900 tons, being about sixty-five per cent. of the output for the same period last year. There are still about 100 men on strike. The regular troops left Inverness on the first of October and one Company of the 94th Regiment is now under orders to aid the civil power, required. An action was brought by the

Company during the month of October against David Neilson, the agent at Inverness of the United Mine Workers of America on the ground that he was supporting the strike contrary to the provisions of the Industrial Disputes Investigation Act. Mr. F. A. MacEchen, stipendiary magistrate, convicted Mr. Neilson

of an infringement of the Industrial Disputes Investigation Act, and imposed a penalty of \$500 or three months imprisonment. Information was laid against Mr. Neilson on ten courts, the decisions with regard to which had been rendered only in one case prior to the end of the month. -

THE WORK OF THE DEPARTMENT OF LABOUR.

THE ninth annual report of the Department of Labour, describing the work of the Department during the fiscal year ended March 31, 1909, was published in November, and is now available for distribution.

The work of the Department is classified in the report under the following headings: (1) The *Labour Gazette*. (2) The Industrial Disputes Investigation Act, 1907. (3) Oriental Immigration—Statement regarding anti-Oriental disturbances at Vancouver in September, 1907, and enquiries and missions arising therefrom. (4) Mission of Deputy Minister of Labour to England concerning immigration to Canada from the Orient, and from India in particular. (5) Inquiry by Deputy Minister of Labour under Royal Commission into Japanese losses in anti-Asiatic riots. (6) Inquiry by Deputy Minister of Labour under Royal Commission into methods by which Oriental labourers had been induced to emigrate to Canada. Portion of report relating to immigration from India and China. (7) Inquiry by Deputy Minister of Labour under Royal Commission into Chinese losses in anti-Asiatic riots. (8) Opium Traffic in Canada. Special report by Deputy Minister of Labour on the need for the suppression of the same. (9) Opium Traffic in the East.—The International Opium Commission at Shanghai, China. (10) Report of Royal Commission on industrial disputes in cotton factories in the Province of Quebec. (11) Fair Wages on public contract work. (12) Strikes and lockouts in Canada during 1908, with comparative statistics for the years from 1901 to 1908, inclusive. (13) Industrial accidents in Canada during 1908,

(14) Industrial accidents in Canada during 1908, with comparative statistics for the years 1904, 1905, 1906 and 1907. (14) The Library of the Department. (15) The circulation of the *Labour Gazette*. (16) The distribution of the *Labour Gazette* and other publications; (17) Inquiries, correspondence, and other departmental work. The volume also contains an appendix, giving the proceedings of the twenty-two Boards of Conciliation and Investigation which presented their reports during the year, a list of applications for boards, the proceedings of which were not completed, legal decisions under the Industrial Disputes Investigation Act, 1907, and the text of the Act.

The Labour Gazette.

In the chapter relating to the *Labour Gazette*, an account is given of the general articles appearing in it, with a brief description of the special articles which were published during the year. These included reports of proceedings with reference to twenty-one Boards of Conciliation and Investigation, eleven special articles on co-operation, nine articles on labour legislation in Canada and twelve special reviews of publications. Briefer reviews were also made of seventy-six other reports.

The Industrial Disputes Investigation Act.

In the chapter on the Industrial Disputes Investigation Act, it is pointed out that during the two fiscal years in which it has been in existence, there were fifty-five references under the Act. In forty-nine cases, boards of conciliation and

investigation were established, and in the six remaining ones settlements were effected during the formation of the board or during the discussion arising out of the application. In two cases strikes occurred after an inquiry had taken place. A table is given showing the application for boards of conciliation and investigation since the Act came into force, indicating in each case the date of receipt of application, parties to the dispute, party making application, locality, number of persons affected, nature of dispute, names of members of board, date on which board was constituted, date of receipt of report of board and result of reference. The wide interest taken in this legislation abroad is referred to, numerous inquiries concerning it having been received from public men, educationists and others in the United States, as well as from many people in Great Britain, New Zealand and other countries.

Oriental Immigration.

The report contains a brief review of the circumstances which led to action being taken with regard to immigration from the Orient and of the various missions and inquiries entrusted to the Department of Labour with reference to it, an account of which appeared in the previous annual report. These missions and inquiries were not completed at the close of the fiscal year 1907-1908, and the report under review contains therefore a summary of the later ones, comprising a mission of the Deputy Minister of Labour to England, which resulted in satisfactory arrangements for the prevention of the immigration to Canada of Indian labourers; an inquiry by the Deputy Minister of Labour under Royal Commission into Japanese riots; an inquiry under Royal Commission by the Deputy Minister of Labour into methods by which Oriental labourers had been induced to emigrate to Canada and an inquiry under Royal Commission by the Deputy Minister of Labour into losses sustained by Chinese residents of Vancouver, B.C., in anti-Asiatic riots during September, 1907.

The Opium Traffic.

A summary is given of the result of an investigation conducted by the Deputy Minister of Labour into the opium traffic in Canada, which was followed by the enactment of a law prohibiting the importation, manufacture and sale of opium for other than medical purposes.

There is also given a brief report of the proceedings of the International Opium Commission at Shanghai, upon which the Dominion of Canada was represented by Mr. W. L. Mackenzie King, C. M. G. The nine resolutions adopted by the Commission are quoted in full. These recommend various measures for the suppression of the opium traffic.

Industrial Disputes in Cotton Factories in Quebec.

The chapter of the Report dealing with the Royal Commission on industrial disputes in the cotton factories of Quebec, contains a summary of the report of the Commissioner, in which several suggestions are made for the improvement in the relations between employers and their employés. A scheme for the automatic adjustment of wages is described, which is in force at Fall River, Massachusetts, by which changes in rates of wages are computed by committees of the Cotton Manufacturers Association and the Fall River Textile Council. A system of profit sharing at the Bourne Mills, Fall River, is also described.

Fair Wages on Public Contract Work.

It is stated in the report that during the past fiscal year, 315 fair wage schedules were prepared by the Fair Wages Officers of the Department for insertion in public contracts, which was ninety-three more than in the previous year. Of the total of 315 schedules, 162 were for the Department of Railways and Canals, 122 for the Department of Public Works, eighteen for the Department of Marine and Fisheries, and eleven for the Department of

Militia and Defence. Since the inception of the Department in 1900, there have been prepared 1,600 Fair Wages Schedules, of which almost one-half have been for the Department of Railways and Canals, and over one-third for the Department of Public Works. During the last fiscal year supplies were also furnished to the Post Office Department to the amount of \$129,333.92 under conditions designed to insure the payment of fair wages and reasonable hours to the workmen employed.

Strikes and Lockouts.

During the calendar year 1908, it is stated in the Report that the number of strikes and lockouts in Canada was sixty-nine, a decrease of eighty-two compared with the previous year. The total number of employés involved in trade disputes which began during 1908 was approximately 26,250, compared with 34,972 in 1907. The loss of time to employés through trade disputes during 1908, was about 706,556 working days, compared with 613,986 in 1907. The Report contains a classified table of the trade disputes in existence in Canada during 1908, showing in each dispute the occupation of the employés involved, the locality of the dispute, the alleged cause of object, method of settlement, result, dates of commencement and termination, number of establishments and employés affected and the approximate loss of time in working days. By means of three coloured

charts, there is graphically shown the variation from month to month of the number of employés involved in trade disputes, the number of disputes in existence, and the loss of time in working days for each year from 1901 to 1908, inclusive.

Industrial Accidents.

The number of fatal industrial accidents reported to the Department during 1908 was 1,272, compared with 1,353 in 1907, and the number of non-fatal accidents was 2,277 compared with 2,752 in the previous year. In the railway service 326 men lost their lives, and among those engaged in agriculture there were 223 fatalities. The mining industry ranked next with 148 men killed followed by the lumbering industry with 113 men killed.

Other Departmental Work.

As in previous reports, a catalogue is given of reports and other documents added to the library of the Department during the fiscal year.

The total circulation of the *Labour Gazette* at the close of the fiscal year is stated to have been 13,810 copies, of which 9,338 were paid subscriptions and 4,472 were distributed free. There was a total distribution of 169,641 individual copies of the *Labour Gazette*. The total number of publications, letters, etc., mailed from the distribution branch was 200,332.

THE AMERICAN FEDERATION OF LABOUR—TWENTY-NINTH ANNUAL CONVENTION, AT TORONTO, ONT.

THE twenty-ninth annual convention of the American Federation of Labor was held in Massey Hall, Toronto, November 8th to 20th.

At the opening session appropriate addresses of welcome were delivered by His Worship, Mayor Oliver, on behalf of the City of Toronto; Hon. Dr. Reaume, Minister of Public Works, for the Province of Ontario; and Mr. William Glockling, President of the Trades and Labour

Congress of Canada. A telegram expressing regret at being unable to attend and extending to President Gompers and the delegates his best wishes for the success of the convention was received from Hon. W. L. Mackenzie King, Minister of Labour. A communication of a similar nature was received from Mr. W. L. Chelton, U.S. Consul at Toronto.

In reply to the various addresses of

welcome President Gompers delivered a short speech on the international labour movement, referring to Canadian affiliation in the following words:

In the American Federation of Labor and in our international unions, I venture to say—and I am confident I am within the limit of truth in the statement—that among the men called upon to officer the international trade unions of the American Continent, there is a greater percentage of Canadians who are in executive positions in the international unions, as compared in numbers, than there are natives of the United States. I venture to make the assertion again—and know it is within the limits of truth—that, in comparison to payments, as well as per capita tax, there is as much, if not more, expended out of the funds of the American trade union movement in Canada than there is in the United States. In the American trade union movement will recognize this one fact, that the border line—the imaginary line that designates in the mind or on a map that this side is Canada and the other is the United States—does not interfere with the unity of the interests of the employing class on both sides of it. It should not interfere with the unity of the American workers—and I use the term American in its broadest sense, not confining it, to every man, woman and child on the North American Continent. That is my conception of American. When I speak of my own country, I refer to it as the United States of America, and when I say America, I mean all America, not a part of it.

The report of the Committee on credentials showed an attendance of 316 delegates, representing eighty-eight national and international unions, twenty-two state federations, fourteen trade and federal labour unions, and sixteen fraternal organizations.

The first few days of the convention were taken up with the presentation of reports of the various officers and of the executive council, which were referred to committees appointed by the president for report.

The President's Report.

The report of the president dealt at considerable length with the injunction and contempt of court proceedings pending against President Gompers, Vice-president Mitchell and Secretary Morrison. Other matters of importance touched upon were: The amendment of the United States Federal Eight-hour Law, so as to extend its provisions to all government employes and employes of contractors and sub-contractors doing work for or on behalf of the Government; the passing of uniform laws in the several states covering employers' liability and workmen's compensation for injuries; the separation of the United

States Department of Commerce from that of Labour and the establishment of a Department of Labour to be presided over by a Secretary of Labour having full cabinet rank; industrial education; convict labour; child labour; immigration; and litigation. A brief account was also given of the European tour of the President taken in obedience to the direction of the Federation.

Reports of Secretary and Treasurer.

The reports of the Secretary and Treasurer showed a substantial gain in membership. The following is a summary of the receipts and expenses for the twelve months ending September 30, 1909:

<i>Receipts</i>	\$371,005.53
<i>Expenses</i>	203,702.07

<i>Balance on hand, October 1,</i>	
1909.....	\$167,303.46
The balance is distributed as follows:—	
In general fund.....	\$51,426.32
In defense fund for local	
trade and federal labour	
unions.....	115,877.14

Report of Executive Council.

The report of the Executive Council dealt largely with the adjustment of industrial disputes between affiliated unions; announced that a meeting of the governors of several States had been arranged to be held in the city of Washington on January 5, 6 and 7 for the purpose of devising ways and means for the establishment of uniform laws in the various states for the better protection of life; favoured the enactment of a law regarding old age pensions; urged a better system of industrial education; arranged a plan for a more systematic organization of farmers and farm labourers; and submitted a plan for co-operation with existing commissions for the conservation of natural resources and the promotion of public health.

Reports of Fraternal Delegates.

The report of the fraternal delegates to the British Trades Union Congress,

held in the city of Ipswich, commencing September 6, 1909, commented on the progress made by the British trades unionists in procuring the enactment of legislation favourable to the working classes. Principal amongst these were the Miners' Eight-hour Law and the Trade Boards Law, which provides for the establishment of Wage Boards in the ready-made tailoring, cardboard box making, machine-made lace and net finishing and ready-made blouse industries. These boards have power to fix and enforce a minimum standard of wages; to act as centres of information and organization, to nourish and cherish the interests of the workers and to foster a healthy state of industry within the particular trades in which they operate. Another was the Labour Exchanges Law, which authorizes the Board of Trade to establish labour exchanges, through which the unemployed will be assisted in securing work. It was also stated that agreements relative to the exchange of cards and other matters of mutual interest, had been entered into between the Metal Moulders' Union of Denmark, Norway, Sweden, Germany, Austria and France and the International Moulders' Union of North America, and that a similar agreement with the British union only awaits formal action before becoming a reality. Agreements of a like nature have been executed between the German and British Garment Workers' Unions and the United Garment Workers of America.

The fraternal delegate to the Trades and Labour Congress of Canada, in his report paid a high tribute to the officers and delegates of that organization for the excellent work they were doing on behalf of the international labour movement.

Report of Special Committee on Industrial Education.

The interim report of the Special Committee on Industrial Education was one of the most interesting documents laid before the convention. At the last meeting of the Federation this committee was appointed for the purpose of making a thorough investigation into the needs

of industrial education and of submitting a statement as to the extent to which these needs are met by existing institutions, with suggestions for the promotion of Industrial Education in such a manner as will best serve the interests of the whole people.

In order to bring out practical suggestions towards a solution of the problem the committee addressed themselves to the following questions:

1. Should trade, vocational, technical and industrial schools be established as a part of the public school system?
2. Should private industrial educational institutions be tolerated?
3. Under what conditions and terms should industrial schools, either public or private, be countenanced and supported?
4. Under what conditions should semi-private or semi-public industrial schools, namely, the so-called "co-operative industrial schools," be approved or disapproved?
5. Should they be free, supported by the city, county or state in which they are located?
6. Should they be under the control or partial control of the national Government?
7. And should their instructors or teachers be practical men from the ranks of trade occupations or should they be men who know nothing of the trade itself except its theoretical side?
8. What should be taught under the head of "Industrial Education?"—the cultural side, the professional side, the mechanical side, the business side, or all combined?
9. To what extent, if any, should labour headquarters, labour temples and labour halls be used to favour industrial education?

The conclusions reached and recommendations made by the committee are in part as follows:—

It is believed that the future welfare of America largely depends on the industrial training of our workers and in protecting them.

The inquiries of the Committee seem to indicate that if the American workman is to maintain the high standard of efficiency, the boys and girls of the country must have an opportunity to acquire educated hands and brains, such as may enable them to earn a living in a self-selected vocation and acquire an intelligent understanding of the duties of good citizenship.

Owing to past methods and influences, false views and absurd notions possess the minds of too many of our youths, which cause them to shun work at the trades and to seek the office or store as much more genteel and fitting. This silly notion has been shaken by the healthy influence of unions and will be entirely eradicated if industrial training becomes a part of our school system and in consequence of this system of training, he will advance greatly in general intelligence, as well as in technical skill and in mental and moral worth, he will be a better citizen and a better man and will be more valuable to society and to the country.

More specific recommendations are as follows:—

1. The continuance and progressive development of supplemental trade education, as inaugurated by trade unions, and call special attention to the work undertaken

by the International Typographical Union in the establishment of a school for the higher education of its members. It is a practical application to a trade union of a necessity that exists and admitted.

The Committee further recommend that all trade unions which have not adopted a system of technical education, give the matter the consideration it so richly deserves; and we further believe that the present undertakings of the unions call for the most enthusiastic admiration and are entitled to the most cordial and loyal support.

Follows a list of organizations who have undertaken an extension of education for their members:

International Typographical Union, Electrotypers and Stereotypers, International Photo-Engravers of North America, Printing Pressmen and Assistants' Union, International Granite Cutters, International Horse-shoers' Union, Pattern Makers' League of North America, and the Carpenters of Chicago and Cook County.

2. We favour the establishment of schools in connection with the public school system, at which pupils between the ages of fourteen and sixteen may be taught the principle of the trades, not necessarily in separate buildings, but in separate schools adapted to this particular education and by competent and trained teachers.

The course of instruction in such a school should be English, mathematics, physics, chemistry, elementary mechanics and drawing. The shop instruction for particular trades and for each trade represented, the drawing, mathematics, mechanics, physical and biological science applicable to the trade, the history of that trade and a sound system of economics, including and emphasizing the philosophy of collective bargaining. This will serve to prepare the pupil for more advanced subjects, and in addition, to disclose his capacity for a specific vocation.

In order to keep such schools in close touch with the trades, there should be local advisory boards, including representatives of the industries, employers and organized labour.

3. The Committee recommends that any technical education of the workers in trade and industry being a public necessity, it should not be a private but a public function, conducted by the public and the expense involved at public cost.

4. We recommend the continuance of the life of the Committee and final report to the 1910 Convention.

5. That the Convention request the United States Department of Commerce and Labour to investigate the entire subject of industrial Education in this country and abroad.

6. To request the Committee to co-operate with the Department of Commerce and Labor in said investigation.

7. To request the Executive Council of the American Federation of Labour to act with said Committee ex officio.

8. To request the officers of all organizations affiliated with the American Federation of Labour, to supply us with all information they may have relative to Industrial Education as soon as possible. And this for the purpose of getting an up-to-date report with up-to-date methods of how Industrial Education should be taught, conducted and promoted.

The committee to which this report was referred heartily endorsed the action of the committee, fully concurring in all the recommendations contained in the report. It was recommended that the committee be continued as suggested in the report to make a final report to the 1910 Convention.

Report of Committee on Boycott.

The following brief extracts from the report of the Committee on Boycott may be taken as the sentiment of the convention and the attitude of the American Federation of Labour on this question:

We concur with the sentiment expressed by the Committee on Boycotts as the Norfolk Convention that the boycott should only be resorted to after all efforts at adjustment have failed, but when instituted, it should be made so effective that speedy agreement between the firm and union affected will follow. In speaking of the boycott, the President, in his annual report, had this to say:

"We have always held, and we still hold that the workers, or any of the people, have the right to withhold or to bestow their patronage as they choose; that they have the right to advise friends and sympathizers of this action and of the reasons therefor. It is hardly necessary to state that in the case of the workers, the unfair attitude of the dealer in question has always been the reason for withdrawal of patronage. It has been made clear that he refused to pay the standard rate of wages, and to agree to other equitable conditions which the workers seek through their organizations, and hence the withdrawal of patronage. The boycotts declared by other citizens have sometimes been placed for other reasons, and they can safely be left to a defence of their own actions. I only wish to point out in passing that the boycott is by no means a weapon used by the workers alone. It is one of those inalienable rights which are at times used by all people. The right to withhold or bestow patronage is one of those things which can neither be enjoined, forbidden nor punished."

With the sentiment expressed and the policy enunciated your committee is in most hearty accord.

We say that when your cause is just and every other remedy has been employed without result, boycott; we say that when the employer has determined to exploit not only adult male labour, but our women and our children, and our reasoning and appeal to his fairness and his conscience will not sway him, boycott; we say that when labour has been oppressed, browbeaten and tyrannized, boycott; we say when social and political conditions become so bad that ordinary remedial measures are fruitless, boycott; and finally we say, we have the right to boycott, and we propose to exercise that right.

Fraternal Greetings.

The fraternal delegates from the British Trades Union Congress, J. R. Clynes, M.P. for Northeast Manchester, and A. H. Gill, M.P. for Bolton, delivered instructive addresses, as did also the delegate from the Trades and Labour Congress of Canada, Mr. F. Bancroft.

Mr. Claues E. Tholin, a representative of the Swedish Federation of Labour, spoke at some length through an interpreter on labour conditions as at present existing in Sweden.

Mrs. Margaret Drier Robins, President of the National Women's Trade Union

League, appealed for assistance for the better organization of women, girls and children working in factories.

Rev. Charles Stelzle, representing the Federal Council of the Churches of Christ in America, gave an address and appealed for a closer union between the churches and the labour unions.

Mr. J. Havelock Wilson, a member of the British House of Parliament, and President of the British Seamen's Union, spoke on the work being done by the organization he represents in bettering the condition of the sailor.

Miss Beatrice Vaughan spoke briefly in regard to the work being done in Toledo in establishing homes where working girls could live at a reasonable cost. She urged that similar work be taken up in other cities.

The convention was also addressed by Professor Frances Squire Potter, General Corresponding Secretary of National American Women's Suffrage Association.

Resolutions.

A large proportion of the resolutions submitted were local in character and referred to matters of interest only to citizens of the United States. Those of special interest to Canadians are given below:

Re the British Budget:

RESOLVED, That the A. F. of L., in Convention assembled, place upon record its appreciation of and admiration for that great tribune of the people in the British Parliament, Lloyd George, Chancellor of the British Exchequer, for his herculean support through the British Budget of the welfare and interests of the whole people of his country, as opposed to the opposition he has aroused among the aristocracy therein, in their defence of property;

RESOLVED, That we recognize in that contention the economic struggle in which we also engaged, viz., whether in the advancement of civilization, the rights of the people, or the interests of property shall be paramount; and, that in our broad gauged internationalism we here and now send back to Great Britain through its Fraternal Delegates to this Convention the God speed of the assembled delegates to Lloyd George and to his associates in the great effort being made through the pending adoption of the British Budget of a great and grand principle directly affecting the best interests of the masses of the people.

Re "Sunday Labour":

WHEREAS, The churches and the clergy are taking a growing interest in the study of the labour movement; and

WHEREAS, Many of the ministers of the various denominations are indicating that interest, in part, by a

public discussion in their pulpits of the problems of the toilers; and

WHEREAS, It would be an advantage to both church and labour to select a special day upon which the attention of all classes may be concentrated upon the questions which concern the toilers; therefore, be it

RESOLVED, That the Sunday preceding the first Monday in September be officially designated by the American Federation of Labor as "Labour Sunday," and that the churches of America be requested to devote some part of this day to a presentation of the labour question; and be it further

RESOLVED, That the various central and local labour bodies be requested to co-operate in every legitimate way with the ministers who thus observe "Labour Sunday," seeking, with them, to secure as large an audience of workmen and others as possible.

Re Canadian Labour Movement:

WHEREAS, The success of the Canadian Labour movement is, and has been largely due to the sympathetic and financial support extended to it by the various International Trades Unions, to whom it is so closely related; and

WHEREAS, It is the desire to cement those relations still closer and closer into an indissoluble bond; and

WHEREAS, The Canadian Labour movement appreciates, and is indebted to, the A. F. of L. for its active and generous assistance in stimulating and promoting the work of propaganda and organization; therefore, be it.

RESOLVED, That this Convention assembled, view with approval and satisfaction the efforts of the A. F. of L. to promote and advance the best interests of the Canadian Labour movement, in their desire to more fully organize the wage-earners of the Dominion of Canada, and particularly those of the French-speaking race in the Province of Quebec, and that the Executive Council be commended for the steps taken to increase the possibilities of successful results, and recommends that, as far as possible, the good work begun be continued.

Re-organization in Quebec:

WHEREAS, At the last Convention of the Trades and Labour Congress of Canada, held at Quebec, in September last, the following resolution was unanimously carried:

"WHEREAS, The American Federation of Labor has been fortunate enough to have had the able assistance of Brother Joseph Ainey as organizer in the Province of Quebec; and, whereas, this Congress has the utmost confidence in the ability, knowledge, experience and integrity of Brother Jos. Ainey, along the line in which he has been engaged; Therefore, be it resolved, That we heartily endorse the action of the A. F. of Labour in this connection and urgently recommend that Brother Ainey be continued as permanent organizer by the A. F. of Labour, as we think such a course will redound to the benefit of the A. F. of Labour as well as to the manifest advantage of the toiling masses"; therefore, be it

RESOLVED, That this Convention endorse the action of the Executive Council in appointing an organizer for the Province of Quebec and Eastern Canada, who speaks the French and English languages fluently, and request the Executive Council to maintain him in that position, so long as the results and circumstances will permit of it.

Re International Trades Unionism:

WHEREAS, We, as representatives of the wage-earners and wealth producers of Canada, recognize that the American Federation of Labour is International in

name, International in its work to emancipate the toilers of the American Continent:

WHEREAS, We believe that the future success of the labour movement in Canada depends upon the activity of the laboring men and women of the Dominion, in their own behalf, supplemented with the assistance that they may receive from the organized wage-earners of every other country;

RESOLVED, That we, the representatives of the American Federation of Labour, declared in favour of the International Labour movement, and pledge our assistance to the organized wage-earners of Canada in extending the power and usefulness of the labour movement in the Dominion;

RESOLVED, That we endorse every effort of the men and women of every country on the American Continent to become thoroughly organized and affiliated with the American Federation of Labour;

RESOLVED, That we, the representatives of the American Federation of Labour, in Convention assembled, endorse the strike of the United Mine Workers of America, now in existence in the Province of Nova Scotia, Canada, and pledge our moral support in their efforts to establish the organization in that Province and throughout Canada.

Re The International Labour Congress of Europe:

WHEREAS, The American Federation of Labour is an international movement, having for its object the uplifting and improvements of the conditions of the men and women of toil, regardless of the national or governmental boundary lines and

WHEREAS, It seems from the reports that the American Federation of Labour is not properly and thoroughly affiliated and united with the workers of the Old World; therefore, be it

RESOLVED, That the incoming Executive Council are hereby authorized to make such arrangements, and to affiliate the American Federation of Labor with the International Labour Congress of Europe and such other International bodies as will properly and thoroughly unite and cement our movements with the organized movements of the world in behalf of labour.

Re Union Label:

WHEREAS, It is the sense of this convention that the struggle for the emancipation and recognition of organized labour will be greatly advanced by the conscientious application of all personal expenditures in the support of the demand for the products of union men; therefore, be it

RESOLVED, That each member of an organized labour union be, and the same are hereby admonished, to purchase no article of wearing apparel, or any other commodity, which does not bear the Union Label of the respective trade employed in the manufacture of such articles.

Other resolutions.

Among other resolutions were the following:—

Urging the Government of the United States, in its army, navy, postal and other departments, to insert a clause in all contracts for supplies providing for an 8-hour day, sanitary conditions and the payment of prevailing or union rates of wages.

That the terms of the Chinese Exclusion Act should be enlarged and extended, so as to exclude from the United States and its insular territory, all races native of Asia, other than those exempted by the present terms of the Act.

Favouring an eight-hour day for post office clerks.

Extending sympathy to the Swedish trades unionists in their struggle for freedom and pledging support.

Urging an extension of the provisions of the eight-hour bill to be made to apply to all work done for the Government of the United States under contract.

Calling upon Congress to pass a comprehensive Postal Savings Bank Act.

That the executive officers of the Building Trades Department of the American Federation of Labor be instructed to desist from further attempting to consolidate the Amalgamated Society of Carpenters and Joiners with any organization.

Pledging support to the United Brotherhood of Leather Workers on Horse Goods in the effort which it proposes to make for the establishment of a universal eight-hour work day for its members.

In favour of female suffrage co-equal with male suffrage.

Setting forth that the seamen of the Great Lakes have been on strike for nine months, about 9,000 men being involved, including sailors, marine firemen and marine cooks being involved; and protesting against the action of the Lake Carriers' Association in discriminating against union men.

Urging the United States Government to more strictly enforce the provisions of the copyright law in reference to the importation of works of art.

Expressing sympathy and condolence with the families and dependents of those who lost their lives in the Cherry, Ill., mine disaster.

Election of Officers.

All the former officers were re-elected by acclamation as follows:—

President, Samuel Gompers.
 First Vice-president, James Duncan.
 Second Vice-president, John Mitchell.
 Third Vice-president, James O'Connell.
 Fourth Vice-president, Max Morris.
 Fifth Vice-president, D. A. Hayes.
 Sixth Vice-president, Wm. D. Huber.
 Seventh Vice-president, Joseph F. Valentine.
 Eighth Vice-president, John R. Alpine.
 Treasurer, John B. Lennon.
 Secretary, Frank Morrison.

Congressman, W. B. Wilson, representing the United Mine Workers of America, and T. V. O'Connor, representing the Longshoremen's Union, were elected to represent the Federation at the next meeting of the British Trades Union Congress. John J. Manning, of the International Laundry Workers' Union, was elected to represent the Federation at the next meeting of the Trades and Labour Congress of Canada.

Notes.

St. Louis, Mo., was selected as the place at which the next annual meeting of the Federation will be held.

It was decided that if Messrs. Gompers, Mitchell and Morrison were compelled to serve the sentence imposed upon them

by the Court, they be paid salaries at the rate of \$5,000 per annum for the whole period of their incarceration.

A resolution was passed expressing sentiments of appreciation and thanks for the welcome and hospitality shown the visiting delegates and their wives by the officials of the Province of Ontario and the City of Toronto. Thanks were also extended to the press of Toronto for courtesies and fairness shown in reporting the proceedings of the convention; to the local entertainment committee; to the Business Men's Club; to the wives and daughters of the trades unionists of Toronto; to the local musicians. The resolution concluded with the following sentiment:

"That the freedom of speech, which we have exercised without judicial restraint, based on superconstitutional and self-arrogated authority, has been more in conformity with the fundamental principles of a free and self-governing people, free speech and a free press, than is possible at present in the United States of America"

The Union Label League of the Federation held its annual session at Toronto, about 115 delegates being present. The body is composed of representatives from the various unions using the union label. Some thirty-seven national and international unions with a membership of 365,000 are thus represented. The project of a universal design for union labels was discussed. The income of the League during the past year was \$2,782.

INTERVIEW OF TRADES AND LABOUR CONGRESS OF CANADA WITH DOMINION GOVERNMENT.

A delegation representing the Trades and Labour Congress of Canada held an interview at Ottawa, Ont., on November 5, with the Dominion Government for the purpose of presenting a number of resolutions passed at the recent annual convention of the Congress. The Prime Minister, Sir Wilfrid Laurier, accompanied by the Honourable W. L. Mackenzie King, Minister of Labour, received the deputation, and an extended discussion of the various topics brought up by the representatives of the Congress ensued. The deputation was made up of Mr. William Glockling, President of the Congress; Mr. James Simpson, Vice-President; Mr. P. M. Draper, Secretary; Mr. J. G. O'Donoghue, Parliamentary Solicitor; Mr. Alphonse Verville, M.P.; Mr. George Shipman, of Toronto and Messrs. Joseph Ainey and Gustave Franco of Montreal.

Representations of the Deputation.

In introducing the deputation Mr. Glockling expressed the thanks of the Congress for the creation of a separate portfolio of Labour, and presented a resolution requesting the restoration of lights on switches on the Intercolonial Railway system.

Mr. Simpson discussed at some length the proposed creation of a Canadian navy and the subject of technical education. Thanks were extended for the increase granted last year to the letter carriers. Mr. Simpson also discussed the calling out of the militia in connection with the Glace Bay strike. The resolutions brought forward by Mr. Simpson were as follows: expressing disapproval of aggressive warfare, requesting the submission of the defence proposals to a referendum vote of the people and advocating the holding of a demonstration in memory of the centenary of peace between the United States and Canada; thanking the Government for the increased grant to letter carriers and asking that they be granted one holiday per week and requesting the appointment of a Royal Commission to investigate the calling out of the militia at Glace Bay and the conduct of the militia while there.

Mr. Gustave Franco thanked the Government on behalf of the Congress for its adoption of the Co-operation Bill of 1908, and requested that the Government submit the Bill again to Parliament, with the restrictive banking clause removed.

Mr. Joseph Ainey requested the aboli-

tion of the \$200 deposit required of candidates for election to Parliament, the enactment of compulsory voting, and the making of election day a public holiday.

Mr. P. M. Draper discussed the fair wages question and presented a resolution requesting the appointing of Fair Wages Officers for each Province, with power to see that all fair wages conditions were adhered to.

Mr. George Shipman presented a resolution advocating the establishment of a manufactory by the Government for the manufacture of the leather goods used by the Department of Militia and Defence.

Mr. J. G. O'Donoghue discussed the Alien Labour Act, the Eight-Hour Day Bill, certain amendments of the Railway Act and legislation with reference to the inspection of vessels. The appointment of a commission on old age pensions was also requested and proportional representation endorsed. The granting of immigration bonuses was opposed by Mr. O'Donoghue.

Mr. Alphonse Verville, M.P., expressed the appreciation of labour for the creation of a separate portfolio of Labour, and dealt with legislation now before Parliament and in a general way with the work of the Tradés and Labour Congress.

Reply of the Minister.

At the request of the Prime Minister, the Honourable the Minister of Labour replied to the various petitions presented. On behalf of the Government, Mr. King thanked the Congress for its very carefully thought-out resolutions and assured the delegation of the sympathetic attitude of the Government towards many of the suggestions. The resolution with regard to the restoration of

lights on switches on the Intercolonial Railway system he undertook to discuss with the Minister of Railways and Canals. As to technical education, the Minister stated that the Government would do all that it could do under the Federal laws to meet the wishes of the Congress. The Minister also promised that no action in connection with the Glace Bay strike would be taken until the report of the Deputy Minister of Labour was laid before Parliament. The questions dealt with by Messrs. Franceq, Ainey and O'Donoghue, the Minister stated, were of importance and worthy of consideration at the hands of the Government. With regard to alleged violations of fair wages schedules, every complaint received, the Minister pointed out, had been fully investigated with satisfactory results. The Minister promised that all future complaints will be similarly investigated. The matter of the establishment of a manufactory for leather goods will be taken up by the Minister with the Department of Militia and Defence.

Sir Wilfrid Laurier discussed briefly the resolution with regard to peace, and outlined the policy of the Government in connection with naval defence. The proposed festival of peace was cordially endorsed. Sir Wilfrid explained that the Canadian navy would not disturb the peace of the world but would be for defence. The Prime Minister also referred to co-operation, expressing his appreciation for the thanks of the Congress for the Government's past action, and stated that further efforts would be made to comply with the requests of the Congress.

A brief discussion on the extension of the Industrial Disputes Investigation constituted the closing proceedings of the interview.

INTERVIEW OF DOMINION LEGISLATIVE BOARD OF THE BROTHERHOOD OF RAILWAY TRAINMEN WITH THE MINISTER OF LABOUR.

A deputation representing the Dominion Legislative Board of the Brotherhood of Railroad Trainmen appeared before the Honourable the Minister of Labour, at his offices in the Department

of Labour, on Friday, November 12, to present the views of the Organization with regard to the Industrial Disputes Investigation Act and an Amendment desired to the same.

Mr. James Murdock, Vice-President of the Brotherhood, of Toronto, acted as spokesman for the deputation.

Views of the Brotherhood.

Mr. Murdock stated it was the desire of the deputation to place before the Minister of Labour their views regarding the Industrial Disputes Investigation Act, and an amendment desired to the same. Mr. Murdock pointed out that it was not the wish of the deputation to depreciate in any way the value of the Act. They realized that the measure had been productive of great good in many ways, and they realized, moreover, that it was an act that was destined to remain on the Statutes of Canada. They believed, however, that in some ways a certain provision contained in the Statutes handicapped such an organization as that which the deputation represented. He would add that the organization numbered not less than 8,600 men in Canada, extending from Victoria, British Columbia, to Sydney, Nova Scotia, this number being comprised in twenty-six lodges. On the Canadian Pacific Railway alone, there were not less than 2,200 members of the organization employed.

Re the Industrial Disputes Investigation Act.

Mr. Murdock referred to Section 15, clause b, of the Industrial Disputes Investigation, also to Section 16, subsection 3, and urged that the members of his Brotherhood should not be put to the necessity of taking a vote of their several local unions in order to satisfy the Minister that a strike would be declared. It would be necessary under these sections, he stated, to take a vote of each Brotherhood and the branches were scattered from one end of the country to the other. He objected to the expense which the taking of the vote would mean, and looked upon it as being of little value. The men generally would sustain the original contention and he thought they should not be asked to vote for a strike and then come back and make an investigation. It would be necessary to

vote the men again. That vote would cost the Brotherhood on the Canadian Pacific Railway, at the lowest estimate, \$4,000. Mr. Murdock went on to explain the difficulties which would ensue, as he held, by reason of the members being scattered over the whole Dominion.

Re Workmen's Compensation.

Mr. Murdock said that the Committee desired him to speak briefly about the Workmen's Compensation Act, and asked if it would be possible in any way to have a Dominion Act framed which would uniformly deal with all cases in the provinces, or if some pressure could be brought to bear upon the provinces to bring about this result. He called attention in this connection to the great differences existing between the Workmen's Compensation law in different provinces of the Dominion, and in different States of the United States.

Reply of the Minister.

The Minister of Labour congratulated the deputation on their meeting in Ottawa and on their organization of a legislative body, which was a great help, not only to the men, but to the Government. He regretted that he had not the Prime Minister and other members of the Government with him. It would, however, be a pleasure to him to let them know the size of the deputation and what had been said. He would see that their views were carefully considered. The purpose and intention of the Industrial Disputes Investigation Act was not to place any unfair obligation upon the men, but in legislation one had to consider all the possible kinds of cases that might come up, and it was only after an act had been working for a year or two that one could see where modifications were necessary to meet certain classes of cases. It was not at all the desire of the Government to make it difficult for labour organizations to have the Act invoked. All that was desired was to see that the public were not put to unnecessary expense investigating

an endless number of grievances. The Minister undertook to take up the matter with his colleagues.

As to Workmen's Compensation legislation, the Minister agreed that it would be an advantage if there were one law

throughout the Dominion. Of course, in legislative matters, the British North America Act gives certain powers to the provinces, and workmen's compensation is a matter which arises out of contracts.

The deputation then withdrew.

CIVIC FEDERATION FORMED AT LONDON, ONT.

AT a public meeting held, November 13, at London, Ont., attended by representatives of the chief industrial concerns of that city and by a large number of workpeople, it was unanimously decided to establish a Civic Federation, for the purpose of promoting good relations between employers and employés.

The movement looking to this end was begun in February last, when at a meeting of the Ministerial Alliance of London, Ont., a committee was appointed to confer with the Board of Trade, and the labour organizations of the city to consider the advisability of forming a civic federation in London. The Board of Trade subsequently appointed two representatives to confer with the Committee of the Ministerial Alliance. Two representatives of labour were also appointed to act on the committee.

The meeting held last month was called at the invitation of this committee. Additional interest was lent to the occasion by the presence of Professor Adam Shortt, Civil Service Commissioner, and Mr. John Mitchell, Vice-President of the American Federation of Miners, as speakers. The meeting was presided over by His Worship, the Mayor of the City.

Professor Shortt, in addressing the meeting dealt at some length with his experiences as a member of boards appointed under the Industrial Disputes Investigation Act. Some agency, he stated, was necessary to prevent the clashes which were so disastrous to employers, employés and the general public. In the past the necessity for mediation had not been so great, owing to the freedom of competition. But with the tendency and necessity for organization of capital, on one side, and of labour equally on the other hand, disputes were more likely to arise. There was a prejudice

in many minds in favour of free competition, both in capital and labour, but plainly the most efficient agency for overcoming periodic waves of depression was combination. Combinations of both labour and capital were highly desirable, but he would not admit that the power to regulate gave also the power to tyrannize on the part of capital or to hold up on the part of labour. The problem was the relating of the forces one to another. Professor Shortt added he had been surprised at the trivial happenings that sometimes brought on disputes. It was not the amount at stake, but the human nature that was stirred up. "My experience," he continued, "is that capital and labour separately are reasonable, but, it is necessary that you have a mediating agency of some kind, and for you it may best be a civic federation. What I want to impress upon you above all is the necessity in our day of the combination system, and the great need of having some mediating agency."

Mr. John Mitchell in his address touched generally upon the relations between capital and labour, though with special reference to the work of the National Civic Federation of New York, in which he is chairman of the trades' agreement department. The experiment in Canada with the Industrial Disputes Investigation Act, he stated, is being followed with marked interest in the United States. Mr. Mitchell explained in detail the work of the National Civic Federation of New York. It combined the leading employers of the United States and the chief officers of the great unions, with a third element made up of men neither employers nor employés. When strikes occur, the federation, he explained, "tries to bring the disputing parties together and effect a settlement.

And in eighty cases out of 100 they are successful. Each year a larger number of employés and workmen have entered into the trades agreements, and this is becoming largely the method by which industry is being conducted."

At the conclusion of the meeting, the following resolution was moved by Rev. J. G. Inkster, seconded, by A. T. McMahan and unanimously carried:

"Resolved that the present executive committee be asked to unite and invite the Trades and Labour Council, the Board of Trade, and the City Council representing the citizens of

London, to appoint twelve men each, who shall, together with the present executive committee, meet and consider the formation and constitution of a London Civic Federation, and report to a mass meeting of the citizens to be called at their earliest convenience."

A hearty vote of thanks to the speakers of the evening was moved and carried. During the evening a telegram was read from Hon. W. L. Mackenzie King, Minister of Labour, conveying his greetings to the meeting and wishing a career of usefulness to the Civic Federation.

ANNUAL MEETING OF DOMINION GRANGE—NATIONAL COUNCIL OF AGRICULTURE FORMED.

THE thirty-fifth annual meeting of the Dominion Grange, was held in the parlours of the People's Institute, Toronto. At this meeting, in accordance with arrangements previously made, there were present, in addition to the regular grange delegates, representatives from Manitoba and Saskatchewan farm organizations.

The most important feature of the meeting was the formation of a Canadian National Council of Agriculture, uniting the farmers of Ontario, Manitoba, Saskatchewan and Alberta.

Objects of National Council.

The objects of the new Association, according to the constitution which was adopted, are as follows:—

(a) To organize the farm population of the Dominion for the study of social and economic problems having a bearing on the happiness and material prosperity of the people.

(b) To collect such material from scientific and literary sources, the annals of class movements and the records of legislative enactments in our own and other countries, as are necessary for the proper information of our people and to disseminate the same.

(c) To formulate our demands for legislation and present them through the officers of the Association to the

notice of Parliament and our different legislative bodies.

(d) To encourage the entry of our farmers into active membership in one or other of the political associations according to individual predisposition as a means to make the political parties without distinction responsive to and representative of the demands of the people who form the bulk of the population.

(e) To urge the adoption of co-operative methods by our members (but outside our Association), in the purchase and sale of commodities, that equity may be established in the business of exchange.

Constitution.

The main clauses of the constitution are as follows:—

1. That this Association shall be called the Canadian National Council of Agriculture.

2. Any association of farmers entirely independent of Government control in the Dominion of Canada, organized to give effect to any or all of the purposes set forth in the preamble of this constitution shall be eligible for membership in this Association.

3. The membership of this Council shall consist of the executives of each of the affiliated associations provided that no affiliated association shall be represented by more than five members.

4. The officers of the Council shall consist of a President, Vice-President and Secretary-Treasurer, to be elected from the members of the Council at each annual meeting.

5. Five members, to be drawn from not less than three associations, shall constitute a quorum for the transaction of business at the annual or special meeting. The Council shall hold a meeting at least once a year.

6. The time and place of meeting shall be fixed by the President, provided that a meeting must be held when demanded by any three associations having membership in the Council. One month's notice of meeting must, however, be given, except a majority of associations declare for an emergency meeting, when one week's notice shall suffice.

7. The expenses incurred in the conduct of the business of the Council shall be provided for by a pro rata levy on the membership of the affiliated association as shown in the last annual report of each.

8. Travelling expenses of delegates to the Council shall be pooled and the flat rate borne by the Association which they represent in proportion to the number of delegates sent.

9. Living expenses of delegates when in session shall be borne by the association they represent.

Other Proceedings of the Convention.

Other important proceedings of the meeting were the presentation of the annual address of the master and of the reports of the legislative and educational committees. The extension of co-operative methods among farmers was the subject of a lengthy discussion. Resolutions were adopted against combines, for the fair taxation of railways, favouring government ownership of long-distance telephone lines and of western elevators, favouring the establishment of a provincial police force, opposing iron and steel bounties and favouring the submission of the proposal to establish a Canadian navy to a referendum.

PARLIAMENTARY REVIEW OF BILLS, MOTIONS, DEBATES, ETC., AFFECTING LABOUR.

ON November 12, the Minister of Labour presented to the House of Commons the annual report of the Department of Labour for the year ending March 31, 1909. On November 26, the Minister laid upon the table of the House of Commons the report of the Deputy Minister of Labour on industrial conditions in the coal fields of Nova Scotia.

Mr. Alphonse Verville (Maisonneuve) introduced in the House of Commons, on November 22, Bill No. 21, Respecting the Hours of Labour on Public Works. The terms of this Bill are identical with those of a measure which Mr. Verville introduced in the House of Commons last session.

Mr. Claude Macdonell, (South Toronto), introduced in the House of Commons on November 22, Bill No. 23, to amend the Industrial Disputes Investigation Act, 1907. The measure in question is a copy of a bill which was introduced in the House last session.

Mr. M. Martin, (St. Mary's Montreal), introduced in the House of Commons, on November 24, Bill No. 39, to amend the Railway Act, with the object of inserting in section 259, of the Railway Act after the words "such construction" the following words: "and all workmen, day labourers or other persons employed by the company in the operation of its railway," and by adding thereto a sub-section declaring that no company shall at any time during the period of engagement of any workman, day labourer or employé, when paying his wages withhold the whole or any part thereof for any reason, and further that such wages shall be paid at intervals of not more than two weeks.

Bill No. 26, Respecting Co-Operative Credit Societies was introduced in the House of Commons on November 26, by Mr. F. D. Monk, (Jacques Cartier).

In a brief statement on the introduction of the Bill, Mr. Monk explained that

the scope of this measure would be confined to co-operative loan and saving societies.

A Bill Respecting Co-operation was introduced in the House of Commons, on November, 30, by Mr. Lloyd Harris, (Brantford,) which Mr. Harris explained as being designed to permit of the incorporation and supervision of all kinds of co-operative societies.

On November 11, notice was given of a proposed resolution by Mr. Hugh Guthrie, (South Winnipeg,) declaring that "in the opinion of this House, it is advisable that a commission of inquiry be forthwith appointed to investigate

the needs of Canada in respect to technical education, and to report on ways and means by which those needs may be best met."

In conformity with authority obtained last session a committee of the Senate has this session been appointed on Immigration and Labour with authority to take the initiative towards collecting information on these subjects. The membership of this committee is as follows: Hon. Messrs. Beith, Bolduc, Dandurand, Davis, Frost, Jaffray, McMullen, Riley and Watson, with Hon. Francis T. Frost as chairman.

INVESTIGATIONS BY FAIR WAGES OFFICERS OF COMPLAINTS RESPECTING RATES OF WAGES PAID TO CERTAIN WORKMEN.

DURING the month of November, a conclusion was reached in the case of investigations which had been made by one of the Fair Wages Officers into complaints of alleged violations of the Fair Wages Schedules in a contract of the Department of Public Works with Messrs. Peter Lyall & Sons of Montreal, for the construction of an addition to the Montreal Post Office, in the rates of wages paid to certain workmen employed thereon. The workmen in question were Mr. Cecil Hutt and Mr. Geo. W. Bailey, both carpenters resident in Montreal.

Mr. Hutt claimed at the rate of five cents per hour during 1,130 hours, being the difference between the rate of 25 cents per hour which he received and the rate of 30 cents per hour, provided in the Fair Wages Schedule of the contract for this class of labour. The investigation showed that Mr. Hutt was entitled to the amount claimed, viz., \$56.50. A cheque for the sum in question was received by the Department from the firm of Peter Lyall & Sons, 1909, and was duly transmitted to Mr. Hutt.

Mr. Geo. W. Bailey claimed at the rate of five cents per hour during the period of his employment with Peter Lyall & Sons on this contract, being the difference between the rate of 25 cents

per hour which he received, and the rate of 30 cents per hour provided in the Fair Wages Schedule of the contract for this class of labour. Mr. Bailey claimed also extra pay at the rate of time and a half for alleged overtime, and at the rate of double time for Sunday work; the total amount of his claim being \$75.17. Investigation showed that Mr. Bailey was employed as a carpenter during 937½ hours and that he was entitled to recover from the firm of Peter Lyall & Sons an amount of five cents per hour for this time, being the difference between the rate of 25 cents per hour which he received and the rate of 30 cents per hour provided in the Fair Wages Schedule, amounting in all to \$46.85. A cheque for this amount was received from the firm of Peter Lyall & Sons on October 30, 1909, and was transmitted by the Department of Labour to Mr. Bailey.

Investigation has also been made into a claim preferred by Frederick Dickens, of Verdun, Que., in respect of the rate of wages which was paid him by the firm of Peter Lyall & Sons during the period of his employment as a builder's labourer on the contract for the Montreal Post Office annex. At the close of the month the correspondence in connection with this matter had not been concluded.

Investigation was further made into a complaint from the Regina Trades and

Labour Council to the effect that the fittings for the new Post Office and Custom House at Regina were being made and fitted into position by a company which was not paying the rates of wages prescribed in the Fair Wages Clause of its contract with the Depart-

ment of Public Works. The report of the Fair Wages Officer was subsequently received in the Department, but at the close of the month the correspondence in respect of this matter had not been completed.

BRITISH COLUMBIA LEGISLATION AFFECTING LABOUR, 1909.

A copy of the statutes of British Columbia passed during the present calendar year, was received at the Department of Labour, by courtesy of the King's Printer of British Columbia, during the month of November. The following is a review of the legislation passed during the year of interest from the standpoint of industry and labour.

Safety in Coal and Metalliferous Mines.

The Coal Mines Regulation Act is amended by two additions to the rules, for the purpose of better securing the safety of employes. In future, in mines where the winding apparatus is not provided with steam automatic contrivances to prevent overwinding, the cage, when men are being raised, must not be wound up at a speed exceeding three miles an hour, after the cage has reached a certain point in the shaft. Every cage used for lowering and raising persons in the shaft must be provided with a proper and adequate safety clutch, which will effectually prevent the falling of any cage upon the breaking of the rope, or the failure of the brake to operate.¹

The provisions of the Coal Mines Regulation Act with reference to the granting of coal miners' certificates is also amended. Certificates of competency are only to be granted by a board of three examiners, at collieries designated by the Lieutenant-Governor-in-Council. One of these examiners is to be appointed by the Lieutenant-Governor-in-Council; one, with two alternates, by the manager or managers of the colliery; and one coal miner, with two alternates, possessed of a certificate of competency as such, by the coal

miners actually working in the colliery. The law did not allow previously for the appointment of alternates and required in the case of the coal miner that he should have had at least three years' experience as a working miner.²

"The Inspection of Metalliferous Mines Act" is amended by an addition to the rules permitting the Lieutenant-Governor-in-Council to modify or alter the code of mine signals to suit conditions which may arise. The code of mine signals if thus altered is to have effect only after it has been published two successive months in the British Columbia Gazette. The amended code must also be laid before the Legislative Assembly within the first fifteen days of the session next after the date thereof.³

Co-operation.

The Act with regard to "Farmers' Institutes and Co-operation" is considerably amended and enlarged in the section relating to the authorizing and formation of co-operative corporations. The law now sets forth in full detail the requirements as to number of shareholders, right to incorporate, declarations, corporate existence and powers, limitations of individual interests, the making of contracts, keeping of registers of members and membership, payment of dividends, transfer of shares, retirement of members, holding of meetings, winding up of associations, auditing of accounts, etc., etc.⁴

Timber manufacture.

The "Timber Manufacture Act" of 1906, which required timber cut on

¹Nova Scotia statutes, 1909, chapter 33.

²Nova Scotia statutes, 1909, chapter 34.

³Nova Scotia statutes, 1909, chapter 36.

⁴Nova Scotia statutes, 1909, chapter 5.

Crown lands to be used or manufactured in the Province, was previously confined to timber cut west of the Cascade range of mountains. The Act is now made applicable to the entire Province. A clause is added, however, permitting the Lieutenant-Governor-in-Council to authorize the export of the following kinds of timber cut on ungranted lands of the Crown, namely, piles, telegraph and telephone poles, ties, and crib timber, although not manufactured or to be used in the Province.⁵

The Storage of Explosives.

Under the Act respecting the storage of explosives, buildings used for the storage of over 200 lbs. of gun-powder, or of over ten pounds of any other explosive substance, were to be deemed "powder magazines" within the meaning of the law. Under an amendment of the past session any receptacle for the keeping of over 500 gallons of gasoline constitutes a "powder magazine" for the purpose of the Act.⁶

Notes.

The "Succession Duty Act" is amended.⁷

The "Bush Fire Act" is amended, more stringent provisions being made with regard to the supervision of fires for clearing land.⁸

The "Highway Traffic Regulation Act" is amended by a clause placing a load limit for vehicles east of the Cascade range of mountains.⁹

The "Mineral Act" is extensively amended in the clauses relating to free miners' certificates, certificates of improvements, evidences of location, etc.¹⁰

A very important Act of the session

was that cited as the "Water Act, 1909." The Act is designed to consolidate the law relating to the acquisition and use of water for all purposes.¹¹

An extended amendment of the "Municipal Act" was passed. Any city in British Columbia may, by by-law, place the business of the city under the management of a board of control to be composed of the Mayor of the city and two controllers elected by the city at large.¹²

An important Act from the standpoint of the fruit industry is one which provides for the establishment of depots and facilities for the preparation for market and shipment of fruit grown in British Columbia.¹³ The "Horticultural Board Act" is also amended.¹⁴

The law with regard to the granting of hand-loggers' licenses is amended. The fee is placed at \$25 and the license holds for one year. Licensees must be provincial voters, except persons of the Indian race. Steam power is not to be used by a licensee.¹⁵

An Act was passed relating to the Public Service of the Province, by which a system of appointments by competitive examination under the supervision of a Commission was introduced. The re-organization and reclassification of the existing service by a Commission is also provided for.¹⁶

The "Placer Mining Act" is amended so as to give power to the Gold Commissioner to extend the limits of a claim in bench or dry diggings beyond the limits of the bench or dry diggings, but not to exceed 250 feet square. The law previously permitted the Commissioner to extend the limits in bench diggings only, and in no case to exceed 100 feet square.¹⁷

CO-OPERATIVE LOBSTER PACKING ON THE NOVA SCOTIA COAST.

DURING the past summer, certain differences arose between lobster fishermen and packing concerns at Louisburg, Gabarouse and other points on the Nova Scotia coast, chiefly with regard to the price to be paid by the packers for the season's catch. The differences proved incapable of adjustment until some time after the opening of the season, whereupon the fishermen resolved to operate factories on a co-operative basis in order to provide a market for their catch. A statement with regard to this action of the fishermen is given below.

Co-operative Factories Opened at Gull Cove and Gabarouse Harbour.

For many years, Mr. H. E. Baker, operated factories at Gabarouse and Forchu, buying lobsters from St. Esprit to Scaterie. Last year he went out of the lobster business. Mr. C. L. Mitchell who operated the Louisburg Factory in partnership with Mr. Baker, died in March last. Mr. Baker and Mr. Mitchell paid the fishermen who owned their own gear, \$3.75 per cwt. for lobsters, in 1908.

The firm of Robert Simpson & Company took over the factories operated by Messrs Baker & Mitchell. On the announcement of prices, it was found that the firm had reduced the price of lobsters from \$3.75 paid by their predecessors in 1908, to \$2.25 per cwt.

The fishermen of Gabarouse thereupon, held meetings and decided that they would not accept less than \$3.00 per cwt. The representatives of Robert Simpson & Company, refused to pay any advance on \$2.25. The fishermen accordingly applied to the Dominion Government for permission to pack their own lobsters, which was immediately granted, the Marine & Fisheries Department agreeing to grant licenses to a minimum of fifteen fishermen to pack lobsters, profits to be shared between them, share and share alike.

The fishermen at Gabarouse procured two licenses, one for Gull Cove, the other for Gabarus Harbour. They procured

buildings and supplies and got to work about the tenth of June, over a month after the commencement of the lobster season. They had great difficulty in procuring empty cans, as the manufacturers, as a rule, do not make cans after the opening of the lobster season. The majority of canmakers, being also sealers, are at work in the canneries along the coast during the lobster season. Moreover, after they began work, a heavy storm destroyed many of their traps; this was followed by another storm in July which destroyed almost the whole of the remaining traps. The two factories succeeded in packing about 400 cases of lobsters and after all expenses were paid, the fishermen at one factory were paid about \$2.50 per cwt., for their lobsters, and about \$3.00 at the other. All their bills were paid, including stock on hand, over 300 cases of empty cans and other necessary outfits.

At Forchu and Louisburg the fishermen sold to Robert Simpson & Company, for \$2.25 up to July 1, and for \$2.50 for the remainder of the season.

The fishermen at Mainadieu were offered \$2.25 per cwt. for lobsters, by the Burnham & Morrell Company. They refused to accept this price and demanded \$3.75 per cwt., the price paid in 1908. The firm opened its factory for the season's work, and waited till the middle of May, but the fishermen not agreeing to accept its offer, the factory was closed. Afterwards the fishermen held a meeting and decided to accept the offer and wired the manager to return. The firm, however, would not then re-open the factory and the fishermen sold their lobsters to Robert Simpson & Company, at Forchu and Louisburg for \$2.25 per cwt., to July, and for \$2.50 per cwt. for the balance of the season.

The lobster fishing, on the south and east coast of Cape Breton the past season, resulted in about one-third of an ordinary catch. Fishermen did not get their traps in the water until late in May on account of the disagreement with the packers, and afterwards the several storms destroyed their gear. They reported an exceptionally poor season.

CO-OPERATIVE OR PEOPLES' BANKS IN THE PROVINCE OF QUEBEC.

IN the October, 1909, issue of the *Labour Gazette* a list was published of twenty-six Co-operative or Peoples' Banks at present in operation in the Province of Quebec, the date of formation and the names of the President and Secretary or Manager being given in each case. Since the list in question was

published, information concerning six additional banks, has been forwarded to the Department by Mr. Alphonse Desjardins to whose courtesy the Department was indebted for its original statement. The names of these banks are as follows:

CO-OPERATIVE BANKS IN THE PROVINCE OF QUEBEC.

Locality.	Date of Formation.	President.	Secretary or Manager.
La Caisse Populaire de St. Théophile du Lac comté de Champlain.....	Sept. 6, 1909	Rev. J. P. Boulay.....	Sinai Lucien, Sec'y and Mgr.
" de l'Enfant Jesus, comté de Beauce	Sept. 19, 1909	C. A. Bilodeau.....	Jos. Nadeau, Sec'y Rev. Jos. Jobin, Manager.
" de St. Ulric de Matane, comté de de Rimouski.....	Sept. 26, 1909	Rev. P. C. Saindon.....	David Ouellet, Sec'y and Mgr.
" de St. Ephrem, comté de Beauce...	Oct. 3, 1909	Rev. L. M. Morrisette...	U. E. Page, N. P., Sec'y and Mgr

" de Trois Rivières (cite).....	Oct. 17, 1909	Rev. Jules Massicotte....	A. Lebrun, N. P., Sec'y and Mgr.

SETTLEMENT OF DIFFERENCES IN THE BOOT AND SHOE TRADE AT QUEBEC, QUE.,—FORMATION OF CONCILIATION BOARD APPROVED.

FOR some time past a number of differences have been under discussion between boot and shoe manufacturers of the City of Quebec, and their employes. Though the differences in question were in several cases of a minor character, the length of time during which they remained unsettled gave currency to various rumours of a disquieting nature. Eventually, however, a series of conferences took place between representatives of the manufacturers and the labour unions concerned, and a satisfactory settlement of the existing differences was reached during November.

The most important feature of the arrangement arrived at, was the appointment of a joint Board of Conciliation and Arbitration by the manufacturers and employes for the settlement of all differences, present or future, between the parties concerned. No strike or interruption of work may now take place until the cause thereof has been passed

upon by the Board, which must be appealed to by either side entertaining a grievance.

By the terms of the settlement matters relating to wages will be dealt with once a year. Previously the employes in the several establishments, or different sections of them, might prefer a demand for increased remuneration at any time; this occasionally caused embarrassment to manufacturers who had submitted samples to the trade and had quoted prices on the assumption that wages conditions would be unchanged while orders in the lines in question were being filled.

The new joint Board is made up as follows:—

President, O. Goulet.

Secretary, L. Rouilland.

Representatives of manufacturers, Messrs. O. Goulet, John Ritchie, L. Routhier, W. A. Marsh, J. Muir, H. Gale, G. F. Langlois, E. A. Marois, F. Lachance.

Representatives of Unions, Geo. Marois, E. Pepin, E. Ferland, A. Paradis, D. Depatis, Omer Brunet, A. Letourneau, J. Bruneau and F. Angers.

The effect of the above agreement has already proved beneficial. The manufacturer of boots and shoes is one of the leading industries of the City of Quebec, involving the investment of a large amount of capital and the employment of several thousand hands. Any interruption to its activity is felt at once by a large portion of the population. The settlement of the recent unrest has been followed by an improved tone in the business community.

The full text of the agreement under which the Conciliation Board is constituted as follows:—

ARTICLE 1. With the object of improving the relations between employers and employés in the factories of Quebec, and to settle the difficulties which occur frequently, and also to deal with business which interests the said industry, it is by the present decided to establish a joint committee of employers and workers which shall be named *The Board of Conciliation*.

ARTICLE 2. The joint committee will be composed of nine manufacturers and three members of each of the three Unions, who shall elect a President and a Secretary at the meeting of the month of September in each year. This committee will attend to all general questions.

ARTICLE 3. The meeting of the Committee shall take place on the second Thursday of each month, subject to change by mutual consent and each special meeting will be called by the Secretary upon request of the President, or of five members of the Committee.

ARTICLE 4. The quorum of the meetings shall be of five manufacturers and five workers, There must however be present one representative of each union; in case the business to be transacted should interest one union in particular, the said union shall be represented by at least two of its members. In case the interested parties shall not attend two consecutive meetings the complaint shall be considered void.

In calling meetings mention shall be

made of any important business to be transacted by the committee.

ARTICLE 5. The President and the members of the Committee in case of absence will be replaced by other members of their respective bodies.

ARTICLE 6. The Committee will have the power to appoint sub-committees to study special matters.

ARTICLE 7. All complaints and difficulties which cannot be settled by the officers of the union shall be submitted to the joint Committee and shall be decided unanimously. In case a unanimous decision cannot be arrived at, the difficulty shall be submitted to a Board of Arbitration, composed of three members, one selected by the manufacturers, one by the workers. These two arbitrators will appoint the third one. The decision of this Tribunal shall be final.

ARTICLE 8. Considering that the manufacturers grant a preference to members of the three Unions and agree to bring their complaints before the joint Committee to have them settled by conciliation, or arbitration, and not to close their factories, the Unions agree on the other hand to submit their grievances to the said Committee and to supply the manufacturers with competent workers, who must give satisfaction, and not to stop work.

ARTICLE 9. All complaints of both parties shall be made in writing to the Secretary of the Committee at least six days before the meeting.

ARTICLE 10. All modification in price lists must be submitted by either party to the joint Committee on the 1st of June, to take effect on the 1st of November, for one year. It is understood that this does not apply to the introduction of new machinery, or new work, which may be discussed at any time during the year.

ARTICLE 11. Where members of the Committee are personally interested in any dispute, they shall have no right to attend meetings as members of Committee, but may be present to explain the case.

ARTICLE 12. Any change in these by-laws can only be made after notice of motion of which mention shall be made in the notice calling the meeting. The

adoption of any change shall be at a later meeting and must be unanimous.

ARTICLE 13. The Board of Arbitration shall be formed eight days after the Committee of Conciliation have failed to come to an agreement. Any claim to be adjusted will date from the day on which it was made to the joint Committee of Conciliation.

ARTICLE 14. Orders of the day:

Reading of minutes,
Report of officers,
Report of sub-committee
Reading of letters,
Unfinished business,
New business.

Discussion or information pertaining to the industry, which the President may permit the Committee to study.

IMMIGRATION AND COLONIZATION.

British Emigration Returns.

During the month ended, September 30, 1909, the number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING SEPTEMBER, 1909-08.

Nationality.	1909.	1908.
English.....	6,531	5,044
Welsh.....	158	103
Scotch.....	2,174	1,687

October.....	3,550	5,221	1,673
Total.....	30,846	31,578	6,172	6,906

It will be seen that there has been a net decrease of 734 in the number of homestead entries made during the first ten months of 1909, as compared with the same months of 1908.

Nationalities of Homesteaders.

The nationalities of homesteaders during the month of October, 1909, as reported by the several agencies of the Department in Manitoba, Saskatchewan, Alberta and British Columbia were as follows:—

Nationalities.	No. of Entries.
Canadians from Ontario.....	412
“ Quebec.....	74
“ Nova Scotia.....	22
“ New Brunswick.....	14
“ Prince Edward Island.....	7
“ Manitoba.....	105
“ Saskatchewan.....	234
“ Alberta.....	50
“ British Columbia.....	14
Persons who had previous entry.....	191
Newfoundlanders.....	
Canadians returned from the United States...	51
Americans.....	1,256
English.....	417
Scotch.....	103
Irish.....	59
French.....	30
Belgians.....	19
Swiss.....	1
Italians.....	3
Roumanians.....	10
Syrians.....	4
Germans.....	80
Austro-Hungarians.....	138
Hollanders.....	10
Danes (other than Icelanders).....	14
Icelanders.....	5
Swedes.....	64
Norwegians.....	86
Russians (other than Mennonites and Douk-hobors).....	74
Mennonites.....	1
Doukhobors.....	
Chinese.....	
Japanese.....	
Persians.....	
Australians.....	
New Zealanders.....	
Greek.....	1
Total.....	3,550

Representing 8,788 souls.

Of 1,308 entries made by persons coming from the United States, there were 330 from North Dakota, 229 from Minnesota, ninety-three from South Dakota, ninety from Iowa, seventy-nine from Michigan, seventy-four from Washington, sixty-seven from Wisconsin, forty-nine from Illinois, thirty-eight from Missouri, thirty from Oregon, twenty-eight from Indiana, twenty-five from Nebraska, twenty-two from Kansas, twenty-one from Ohio and twenty from New York.

Lands Patented.

An abstract of letters patent covering Dominion lands situate in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory issued from the Department of the Interior during the month of October, 1909, as compared with October, 1908, was as follows:—

Nature of Grant.	October, 1909.	
	No. of Patents.	No. of Acres.
Alberta Railway & Irrigation Company's sales.....	7	3,813'00

In October, 1908, the number of patents issued was 2,210, covering an area of 345,884.21 acres, showing a decrease for the month of October, 1909, of thirty-five in the number of patents issued and of 12,097.59 acres in the area patented.

Notes.

A report issued by the Department of Trade and Commerce, Canada, shows that during the twelve months ended October 22, the total number of Chinese entering Canada subject to the poll tax of \$500, was 467, or only about half the number who entered during the preceding twelve months. The total poll tax amounted to \$233,500. During the period, 4,464 Chinese arrived at Vancouver in transit to other countries.

A pamphlet has been issued by the Department of Agriculture, Ontario, based

on information supplied by the colonization branch, giving valuable information concerning the resources and products of the Province. The pamphlet is intended for distribution in Great Britain as an encouragement to agricultural immigrants.

The influx of American farmers into Western Canada has been continuous for many months past and the proximity of winter has not caused any cessation. During the month of September immigration into Canada from the south exceeded the combined immigration from the continent of Europe and Great Britain and the number was almost double that for the same month last year.

Lieutenant-Col. T. Howell, secretary of the Immigration Department of the Salvation Army, is at present in Great Britain for the purpose of selecting immigrants who will be brought to Canada under the Army's supervision.

RECENT INDUSTRIAL AGREEMENTS AFFECTING LABOUR.

Quebec Railway Trainmen.

THE Quebec Railway Light and Power Company adopted from July 1, 1909, the following schedule of pay, rules and regulations governing the trainmen in its employ.

ARTICLE 1.—The word "Trainmen" as used herein applies to Conductors, Train Baggage-men and Brakemen, also to men employed in yard service.

ARTICLE 2.—Trainmen on all trains and yard services will be paid on an hourly basis and as follows:

STEAM TRAIN RATES PER HOUR.

Conductors.....	\$.30
Baggage-men.....	.20
Brakemen (Senior).....	.17½
Brakemen (Junior).....	.16

ARTICLE 3.—In Steam service (except night way-freight) ten hours will constitute a day. Trainmen on night way-freight will be guaranteed a minimum of twelve hours pay for each trip worked.

ARTICLE 4.—In electric train service less than five hours, one half day will be allowed, over five hours and less than

eleven consecutive hours from coming on duty will constitute a day. Trainmen in electric service are guaranteed a minimum of one day's pay and overtime at one-tenth of the daily rate for each hour after eleven hours from coming on duty. In computing overtime less than thirty minutes will not be counted, thirty minutes or over will count as one hour.

ELECTRIC TRAIN RATES PER HOUR.

Conductors (Capable of running Steam Service trains).....	\$.27½
Conductors (Capable of running Electric Trains only).....	.26
Brakemen (Senior).....	.17½
Brakemen (Junior).....	.16

ARTICLE 5.—Trainmen, having regular runs, will not absent themselves from duty without permission from the superintendent or train despatcher, and any time absent as above will be deducted from their time allowance.

ARTICLE 6.—Trainmen, who have completed their hours of duty, will, if requested by the superintendent, remain on hand to perform time made, per hour.

ARTICLE 7.—The Company will so

regulate the number of crews in regular service that men employed will make full time.

ARTICLE 8.—Inexperienced Brakemen will be paid as Junior rates for the first twelve months, after which, if competent, they will be paid at Senior rates.

ARTICLE 9.—Trainmen required to lay over night in Quebec Yard or on Louise Dock and having to stay in charge of train expecting to be required for duty at an early hour, will be paid Pro Rata in addition to time previously made in running and performing Terminal or other work.

ARTICLE 10.—If men are required before six a.m. they will be called except for regular trains.

ARTICLE 11.—Summer and winter uniform suits and caps will be furnished free of charge to Conductors, Train Baggage-men and Brakemen who have been in the service of this Company on this division for at least five years.

ARTICLE 12.—Trainmen relieving other men in a superior position will receive the compensation allowed for such superior position.

ARTICLE 13.—Trainmen will be given promotion according to seniority on this division in train service and will be governed by merit, fitness and ability.

ARTICLE 14.—Any man refusing promotion or failing to qualify for promotion will thereafter rank junior to the man promoted in his place.

ARTICLE 15.—Any man who is not promoted when his turn comes will be advised the reason therefore by the Company.

ARTICLE 16.—The line of promotion will be as far as practicable from Conductor on electric to Conductor on steam trains; from Brakemen on electric to Brakemen on steam trains; from Brake-men to Baggage-men on steam train; and from Baggage-men to Conductor on electric trains.

ARTICLE 17.—The choice of trains and runs will be offered to trainmen according to Seniority.

ARTICLE 18.—Trainmen on work trains will be guaranteed a minimum of ten hours for every day called on duty, and, if owing to unsuitable weather they cannot complete their day on such train

they may be used in other train service for such time as will complete the day, and for overtime if needed. If after their day's work the engine has to go to Montmorency or Ste-Anne as the case may be they will be paid overtime for such run with the additional thirty minutes allowed for terminal work.

ARTICLE 19.—In all cases the thirty minutes' allowance on beginning and thirty minutes on finishing their day will be allowed Trainmen for terminal work.

ARTICLE 20.—When Trainmen are ordered for a train which is afterwards annulled they will be allowed one quarter day, provided they have not been kept on duty over two hours.

ARTICLE 21.—Trainmen on electric trains having to haul a freight car over any portion of the road will be allowed 25 cents extra, and if required to load or unload way freight will be paid steam trains rates for work performed but not at night way freight rates.

ARTICLE 22.—Trainmen on through or unassigned freight or work trains being required to load or unload way freight will be paid way freight rates for work performed.

ARTICLE 23.—Trainmen must be on hand ready for duty thirty minutes before the hour set for departure of train, unless it was previously arranged to be on duty earlier.

ARTICLE 24.—When a trainman is discharged or resigns he will be given a certificate stating term of service and in what capacity employed, stating also the reason for leaving the service.

ARTICLE 25.—If a vacancy is made in train service through sickness or otherwise it will be fixed by the Superintendent as to whom will fill the vacancy, but in the absence is prolonged over five days it will be filled according to Seniority, provided they apply for it in their turn.

IN THE CASE OF YARD AND WORK TRAIN SERVICE.

ARTICLE 26.—In computing overtime any fraction of an hour less than thirty minutes will be counted one-half hour, and over thirty minutes to count as one hour, but in the case of all other trains

no fraction of an hour less than thirty minutes will be counted thirty minutes or over to count one hour.

ARTICLE 27.—Trainmen will be promptly advised if time claimed is not allowed and reason given.

ARTICLE 28.—Trainmen off duty on Company's business to attend court or otherwise will be paid for actual time lost at their respective rates until they can be set back on their own or other runs and reasonable expenses allowed.

ARTICLE 29.—If suspended from duty, and after investigation found to blameless trainmen will be paid the daily rates of their class, but not more than one day for each twenty-four hours.

ARTICLE 30.—Trainmen held or snow bound or detained from any other cause will be paid Pro Rata for time so detained, unless they can be relieved or otherwise ordered off duty.

ARTICLE 31.—All steam trains will be supplied with two Brakemen of at least six months experience as such.

ARTICLE 32.—All electric trains will be supplied with one Brakemen when hauling a trailer handling passengers.

ARTICLE 33.—Trainmen travelling passenger on trains or on light engines by order of the Superintendent will be paid the schedule rate of the train they travel on.

ARTICLE 34.—Steam trainmen being assigned several runs to complete a day's work and having short lay off will be considered on duty for ten consecutive hours computing from thirty minutes before time set for departure of trains, on their first trip and until thirty minutes after arrival on last trip. Such time to be allowed for making up and setting away trains and turning engine provided time allowed is not exceeded.

ARTICLE 35.—All trainmen having to make up or set away their trains or having to perform other terminal duties will be allowed thirty minutes after arrival, provided such work does not exceed thirty minutes, otherwise they will be paid overtime.

ARTICLE 36.—The general intent under this rule in that Trainmen shall receive the minimum allowance for their work computed in hours except where allowance

is to be made for terminal work must be reputed either on the basis of actual hours in service or daily allowance.

ARTICLE 37.—Conductors and Brakemen in yard service working from 7 a.m. until 6 p.m. will be allowed an hour for lunch when possible about noon, if only thirty minutes they will be paid for one hour. If required to work after 6 p.m. they will be paid Pro Rata.

ARTICLE 38.—When a trainman is suspended or discharged he will, on written request filed within ten days after such suspension or discharge, have a fair impartial trial and will be advised within fifteen days the result of the decision. Should such investigation prove his blameless he will be reinstated and will be paid schedule rates for time lost.

ARTICLE 39.—Trainmen required to local engines in a case of emergency will be paid at the rate of 25 cents per hour extra.

ARTICLE 40.—Trainmen being required to work on Sundays will be on continuous duty beginning with their first trip that day and until off duty at night time to be computed in hours.

ARTICLE 41.—This schedule of rates and rules to continue in effect subject to ninety days notice of a desire for revision from either parties.

Renewal of Agreement Between the Dominion Coal Company and the Provincial Workmen's Association.

On December 31, 1909, the present agreement between the Dominion Coal Company and the Provincial Workmen's Association expires. Negotiations relating to the renewal and modification of this agreement between the parties thereto have been in progress for several weeks past and were concluded on mutually satisfactory terms in the opening week of November. The agreement then arrived at renews the existing agreement for a period of two years, that is, until December 31, 1911. The contract is renewed almost in its entirety, no rates being changed, except that a five per cent. increase is granted in the case of labourers now receiving \$1.52 as their maximum rate. The maximum rate for these will be for the next two years \$1.60

per day. A further enlargement of the old agreement provides that the new contract will apply to the Emery colliery, which was not included in the expiring agreement. (*)

*The full text of the expiring agreement was published in the April, 1908, issue of the *Labour Gazette*, at page, 1225.

It will be remembered that the agreement of March 16, 1908, thus renewed, was originally made by award of a Board under the Industrial Disputes Investigation Act†

†See the *Labour Gazette* for February, 1908, page 957, and for April, 1908, page, 1222.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1909.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factory inspectors of the Province of Ontario, the Ontario Railway and Municipal Board and to the Department of Railways and Canals, for their kind assistance of furnishing the Department with the statements of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 422 individual work people, in Canada, during the month of November, 1909, were reported to the Department of Labour. Of these 143 were fatal, and 279 resulted in serious injuries. In addition, six fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before November, 1909.

In the preceding month there were, 146 fatal, and 293 non-fatal accidents reported, a total of 439, and in November, 1908, there were 124 fatal, and 198 non-fatal accidents, a total of 322. The number of fatal accidents reported in November, 1909, was, therefore, three less than in the preceding month, and nineteen more than in November, 1908. The number of non-fatal accidents reported in November, 1909, was fourteen less than in the preceding month, and eighty-one more than in November, 1908. Altogether there were seventeen less industrial accidents reported in November, 1909, than in the preceding month, and 100 more than in the same month of the preceding year.

Of 155 returns received during the month giving the ages of the victims of industrial accidents, sixteen referred to persons under twenty-one years of age

fifty-two to persons between twenty-one and forty-five, and fifteen to persons over forty-five. Sixty-seven persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:

Nature of Fatalities and Accidents.

The disasters of the month involving more than one fatality were: the wreck of a Great Northern Railway work train near New Westminster, B.C., wherein twenty-two workmen were killed, and fifteen seriously injured (two of the latter dying later); the death of three street railway employés and fifteen passengers, and the injuring of nine others in a collision between a street car and a runaway car laden with lumber near

Lakeview, B.C.; the drowning of the crew, six in number, of the barkentine, *John S. Bennett*, in a collision in the Atlantic; the burning to death of three members of a farmer's family near Collingwood, Ontario.; the electrocution of two electric workers at Chambly Basin, Quebec; the running over of a farmer, and his mother at a railway crossing at Pont Rouge, Quebec; the killing of two train hands in a derailment at Eholt, B.C.; the death of two firemen in Montreal, Quebec; the killing of two train hands in a railway wreck at Crest, Ontario; and also, of two train hands in a collision at Pasqua, Saskatchewan, and the killing of two workmen by an explosion of acetylene gas at Parry Sound, Ontario.

Disastrous Railway Wreck Near New Westminster B. C.

On November 28, a Great Northern Railway work train ran into a washout within a mile of the city limits of New Westminster and a bunk car in which were thirty-five Japanese workmen fell into the culvert, the engine settling back on it. Twenty of the workmen in the bunk car were instantly killed, and fifteen injured, two of the latter dying a short time afterwards.

Disastrous Collision at Lakeview, B. C.

On November 10, a flat car laden with lumber broke away from a train which was proceeding ahead of an interurban car from Vancouver at a point between Lakeview and Collingwood stations on the British Columbia Electric Railroad. It crashed into the passenger car behind it, killing instantly fifteen of the occupants of the latter, among whom were the street car crew numbering three. Nine others were seriously injured, one of them dying subsequently.

Drowning of Crew Barkentine John S. Bennett Off Block Island, R.I.

On the morning of November 8, the barkentine *John S. Bennett*, owned by a firm of Liverpool, N.S., and manned by

Nova Scotians, bound from New York to Halifax, N.S., with a cargo of coal, came in collision with a four masted schooner off Block Island, Rhode Island, and sank immediately carrying down with her, her crew consisting of six persons.

Two Workers Electrocuted at Chambly Basin, Que.

On November 2, while electric workers at Chambly Basin, Quebec, were stringing wires half way between Chambly Basin and Chambly Canton, Quebec, for the Montreal Light and Power Company, a gust of wind blew a telephone wire on to the wire the men were working at. A short circuit was at once formed, and two of the workers were instantly killed, the third being badly burned.

Level Railway Crossing Disaster at Pont Rouge, Que.

On November 2, the local Canadian Pacific Railway train running from Three Rivers to Quebec, struck a conveyance containing a farmer and his mother at Pont Rouge, County of Portneuf, Quebec, and killed them both.

Railway Derailment at Eholt, B. C.

On November 1, Canadian Pacific Railway engine No. 1, 385 was derailed near Eholt, B.C., on the Phoenix branch of the railway, and went over the embankment of 150 feet, fatally injuring the engineer and fireman.

Killing of Two Firemen at Montreal, Que.

By the collapse of the interior of a mattress factory during a fire at Montreal, Que., on the morning of November 8, two firemen were instantly killed, and eight others more or less seriously injured.

Wreck of Grand Trunk Pacific Railway Train At Crest, Ont.

On November 18, while coming down a grade at Crest, a small village twenty-one miles west of Fort William, Ont., at

a high rate of speed a Grand Trunk Railway flat car, with a ditcher, the ca-boose and an engine, were derailed, instantly killing the brakeman, and fatally injuring the fireman.

Railway Collision At Pasqua, Sask.

In a blinding snow storm which raged during the night of November 22, a west bound freight train on the line of the Canadian Pacific Railway crashed into the end of a stock train standing at Pasqua, Sask., instantly killing two stockmen.

Explosion of Acetylene Gas at Parry Sound, Ont.

On November 26, while three members of the Mechanical Department of the

acetylene gas generating plant of the Department of Marine at Parry Sound, Ont., were storing the gas in buoys and storeholders an explosion occurred which instantly killed one of the workmen, and fatally injured another who died a few hours later, and seriously injured the third.

Records by Industries and Trades.

Agriculture.—During November, 1909' there were nineteen fatal and thirty-two non-fatal accidents in this industry, compared with twenty-five killed and forty injured in the preceding month, and fourteen killed, and twenty-two injured in November, 1908, Seven of the fatalities were due to the victims being run over, one to being burnt to death, three to falls, two each to firearms

and collisions and one each to falling material, drowning, to exposure and to a runaway. Nine of the non-fatal accidents were due to falls, six each to being run over and to machinery, four to live-stock, three each to falling material, and to runaways, and one to fire-arms.

Fishing and hunting.—One fisherman was killed by an explosion and one by drowning in November. In October, 1909, there were seven killed and two injured, and two killed in November of last year.

Lumbering.—Death by accident occurred to thirteen workmen in this group during November, 1909, while eighteen others were injured. In the previous month, there were three killed and nine injured and in November, 1908, eight killed and eleven injured. Machinery caused five of the deaths, falling material four, drowning, two and a runaway and being run over, one each. Nine of the injuries were caused by machinery, five by falling material, two by falls and one each by a tool and by flying material.

Mining.—Ten mine workers were killed, and twenty-three injured during November, 1909, compared with forty-five killed and twelve injured in the month before, and nine killed and sixteen injured in November, 1908. Three of the fatalities were due to explosions of dynamite, one to an explosion of powder, two to drowning, two to being run over by cars, and one each, to a fall and to falling material. Ten of the minor accidents were due to falls, five to mine cars, three to falling material, two to machinery, and one each to flying material, to an explosion of dynamite and to live-stock.

Building trades.—During November, 1909, five of these workers met death through accident, and twenty-five were injured, as against five killed and twenty-three injured in the preceding month, and two killed and twenty-four injured in November a year ago. Four of the fatalities were caused by falls and one by drowning. Fourteen of the non-fatal accidents were caused by falls, eight by falling material, two by flying material and one by an explosion of gas.

Metal trades.—There were nine killed

and fifty-three injured in November, 1909, compared with nine killed and forty-seven injured, in October last, and three killed and thirty-one injured in November, 1908. Three each of the deaths were due to electric shock, and to falling material, two to falls and one to drowning. Sixteen of the injuries were due to falls, fourteen to falling material, thirteen to machinery, four to molten metal, three to flying material, and one each to an explosion of gas, to electric shock, and to an elevator.

Woodworking trades.—There were eight workmen injured during November, 1909, compared with one killed and sixteen injured in October last, and seven injured in November, 1909. Machinery caused four of the injuries, and flying material and falls two each.

Printing trades.—Machinery injured three of these workers, and falls two others in November, 1909. Four workers were injured in the preceding month, there being no accidents in November, 1908.

Clothing trades.—One worker was injured in November. In the month before, there were two injured and in November, 1908, there were one killed, and one injured.

Textile trades.—In November, 1909, machinery and a fall caused each a death in this branch. Machinery caused four and flying material one of the injuries. In October, last five workmen were injured and in November, 1908, there were no accidents.

Food and tobacco preparation.—Electric shock killed one worker in November, and ten others were injured, compared with seven injured in the month previous and three injured in November a year ago. Seven of the injuries were caused by falls, and one each by machinery, by a tool and by being struck by a train.

Leather trades.—One of these workers was killed by a fall in November, 1909, as against one killed and one injured in the month before, and one killed in November, 1908.

‡ *Railway service.*—Forty-six railway employés were killed and thirty-eight injured in November, 1909, compared with twenty-six killed and forty-four

injured in October last, and fifty-six killed and thirty-six injured in November of last year. Twenty-nine fatalities were due to derailments, seven to being run over, four to falls, two each to collisions and to being caught between cars, and one each to falling material and to an explosion. Twenty-one of the non fatal accidents were due to derailments, five to falls, three to explosions of boilers, two each to collisions, to being run over and to machinery and one each to being caught between cars, to falling material and to flying material.

Navigation.—During November, 1909, thirteen of these workers were killed, and eleven injured, compared with seven killed and five injured in the previous month and nine killed and five injured in November, 1908. Eight of the deaths were caused by drowning, four by falls and one by falling material. Of the injuries six were caused by falls and five by explosions of dynamite.

General transport.—There were nine killed and nineteen injured in November, 1909, compared with two killed and fifteen injured in the month before and nine killed and twelve injured in No-

vember, 1908. Four of the deaths were due to collisions, two each to runaways and to falls and one to being run over. Four each of the injuries were due to collisions, and to falling material, seven to falls, two to live stock and one each to a runaway and to flying material.

Miscellaneous.—Five were killed and twelve injured in November, 1909, compared with six killed and twenty seven injured in the preceding month and six killed and nine injured in November, 1908. Two each of the deaths were caused by an explosion of acetylene, and runaways and one by being smothered in cement. Five each of the minor injuries were caused at machinery and by explosions and two by falling material.

Unskilled labour.—Six labourers were killed and six injured during November, 1909. In October, there were six killed and fifteen injured, and in November, 1908, four killed and sixteen injured. Being run over caused four of the fatalities and falling material and drowning one each. Explosions caused three of the non-fatal accidents and falling material, machinery and a fall one each.

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF NOVEMBER, 1909.

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

ALTERATION TO EXAMINING WAREHOUSE,
MONTREAL, QUE.

ALTERATIONS to the examining warehouse, Montreal, Que.; name of contractor, D. Lalonde, Montreal; date of contract, November 8, 1909; amount of contract, \$3,727.00.

RAILWAYS IN NORTHERN ONTARIO.

To the Manitoulin and North Shore Railway Company (or to the Canada Central Railway Company with the consent of the Manitoulin and North Shore Railway Company, and subject to the approval of the Governor-in-Council), for the following lines of Railway:—

“(a) from a point on the said line of railway, between Little Current and Sudbury, westerly towards the Algoma Central and Hudson Bay Railway; not exceeding 100 miles;

“(b) from Little Current thence crossing the Canadian Pacific Railway, at or near Stanley and thence to Sudbury; not exceeding 64 miles;

“(c) from a point at or near Sudbury, northerly, not exceeding 30 miles; the said subsidies being granted in lieu of the subsidies granted by chapter 43 of 1906, Section 1, item 1, not exceeding in all 194 miles.”

Date of subsidy agreement, November 23rd, 1909. Amount of subsidy, \$3,200 per mile, not exceeding \$6,400 per mile. Railway Company, the Manitoulin and North Shore Railway Company.

RATE OF WAGES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

TRADE DISPUTES DURING THE MONTH OF NOVEMBER, 1909.

WHILE industrial conditions in Canada, with respect to strikes and lockouts, were somewhat improved during November, compared with the previous month, the strikes at Glace Bay and Springhill, Nova Scotia, which had been in existence for several months, continued to affect injuriously the mining industry of that province. The mines at Springhill remained closed

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefore is filed in the office of the Minister of and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

Post Office Department.

During the month of November, orders were given by the Post Office Department for the supplies below mentioned subject to the regulations for the suppression of the *sweating* system, and the securing of payment to the workingmen and working women of fair wages and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type, and making other hand stamps and brass crown seals.....	1,164.64
Making and repairing rubber dating stamps and type, also other stamps...	82.25
Supplying stamping material and wooden boxes and repairing stamping pads....	1,517.10
Supplying mail bags.....	6,433.75
Repairing mail bags.....	1,217.99
Making and repairing post office scales..	327.50
Making and repairing mail locks, and supplying mail bag fittings.....	3,307.60
Supplying galvanized iron trays, and repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes and parcel receptacles.....	193.10
Making and repairing miscellaneous articles of Postal Stores.....	113.65
Making and supplying articles of official uniform.....	460.55

throughout the month, but at Glace Bay the strike ceased to affect materially the mining operations. None of the new trade disputes of the month were of serious consequence.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to

DISPUTES WHICH BEGAN DURING THE MONTH.

Trade	Location	Cause of Dispute	No. of Disputes	No. of Workers	Duration (Days)	Notes
Mining— Coal miners	Edmonton, Alta.	Against discharge of employes	1	75	Nov. 25	Work resumed pending formation of Board under I.D.I. Act. Employes re-instated pending decision of Board.
	Acton, Ont.	Dispute with a foreman, followed by demand for changes in piecework prices	1	7	Nov. 15	27 Three strikers returned to work, November 16, employers agreed to changes in prices to take effect, January 1.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firms or establishments concerned. Mention moreover, is not made of disputes involving less than six employes or of less duration than 24 hours.

have been in existence in Canada during November was eight, a decrease of three compared with the previous month, but an increase of five compared with November, 1908. About sixteen firms and 3,868 employes were affected by these disputes, two firms and eighty-one employes being affected by the new disputes of the month.

Loss of time in working days.—The loss of time of employes through trade disputes during November was approximately 95,950 working days, compared with a loss of 100,190 days in October, and 5,715 in November, 1908.

Trades affected by new disputes.—The following table shows the trades affected by new disputes during the month and the number of workpeople affected in each group of trades.

Trade.	No. of disputes.	No. of workers.
Mining	1	75
Clothing trades	1	7
Total	2	82

Localities affected by new disputes.—One of the new disputes of the month occurred in the Province of Ontario, and the other in the Province of Alberta.

Causes of disputes.—One of the new disputes of the month arose on account of the discharge of five employes, the cause of the other strike was originally a dispute with a foreman, which was followed later by a demand for some changes in piecework prices.

Methods of settlement.—Of the eight disputes in existence during November, definite settlements were reached in two cases and in two others, conditions ceased to be affected. One of the disputes was settled by reference to a Board under the Industrial Disputes Investigation Act, 1907, and the other by negotiations between the parties concerned.

Results of disputes.—Of the disputes that were terminated, one resulted in favour of the employers, one in favour of the employes, the result of one was not reported, and the result of the fourth was indefinite.

Disputes which commenced Prior to the Beginning of the Month.*

The trade disputes in existence in Canada during November, which commenced in previous months, comprised strikes of coal miners at Glace Bay, N.S. and Springhill, N.S., leather workers, at Ottawa, Ont., tailors at Vancouver, B.C., coopers at Winnipeg, Man., and printers, at Kingston, Ont.

Strike of Leather Workers at Ottawa.

No settlement was reported in the case of the strike of leather workers which took place at Ottawa, Ont., on October 14 and in which about four firms and seventy-two employés were involved. The cause of the dispute was the refusal of the employers to grant a general increase of ten per cent. in wages.

Strike of Tailors at Vancouver, B.C.

No settlement was reported in the case of a strike of tailors at Vancouver, B.C., which began on October 4, on account of the refusal of the employers to grant a demand for an increase in wages from \$18 to \$20 per week. There were originally thirty-two firms, and forty-five employés involved in this dispute, of whom thirty-two were males and thirteen females, but in the course of October, twenty-nine firms had granted the demand and during the month of November, there were only three firms and fourteen employés involved.

*For a statement with regard to conditions during November, in connection with the strikes of coal miners, at Glace Bay, Inverness, and Springhill all concluding portion of special article dealing with a report of the Deputy Minister of Labour published elsewhere in the present issue.

New Disputes.

The new disputes of the month, comprised strikes of coal miners at Edmonton, Alta., and glove makers at Acton, Ont.

Strike of Coal Miners at Edmonton, Alta.

On November 25, a strike of coal miners took place at Edmonton, Alta., in which about seventy-five men employed by the Standard Coal Company were affected. It was stated by the Company that the men went out in sympathy with five men who had been discharged. The Company immediately applied for a Board of Conciliation, under the Industrial Disputes Investigation Act, 1907, and in the meantime reinstated the five employés pending the decision of the Board.

Strike of Glove Makers at Acton, Ont.

On November 15, a strike of seven table cutters, employed in the glove factory of Messrs. W. H. Storey at Acton, Ont., declared a strike. It was stated by the Company that the cause was a disagreement between one of the employés and a foreman. On the following day three of the strikers returned to work, but the others remained out until November 27, when they agreed to return on condition that the Company would make some changes in the piece work prices at the beginning of the New Year. It is stated that very little trouble was caused by the dispute.

The table which is published herewith, is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of November and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of Departments and Bureaus were received at the Department of Labour, Ottawa, during November, 1909.

DOMINION REPORTS.

Public Works.

Report of the Minister of Public Works on the works under his control for the fiscal year ended, March 31, 1909. Ottawa: King's Printer, 1909. Page, 569. Price, 30 cents.

IN the report of the Department of Public Works, it is stated that the total expenditure of the Department during the fiscal year 1908-1909 amounted to \$14,784,739.39 classified as follows:—

Harbours and rivers.....	\$3,305,920.32
Dredging.....	4,547,773.43
Slides and booms.....	137,086.57
Roads and bridges.....	49,106.26
Public buildings.....	5,845,286.70
Telegraphs.....	535,480.12
Miscellaneous.....	364,085.99

The total revenue for the year was \$299,437.38 of which slides and booms produced \$76,455.41, graving docks \$60,505.16, rents \$23,268.44, telegraph lines, \$113,175.34 and casual revenue, \$26,033.53.

The principal operations of the Department during the year are described in the report. The final report on the survey of the Georgian Bay Canal was issued and investigations were carried on along the tributaries of the Ottawa river in connection with the question of water storage for canal purposes. A commencement was made in the undertaking of the storing of the waters of the upper Ottawa River, during the spring freshets, in order to render it available during the period of low water from October to March.

Railways and Canals.

Annual report of the Department of Railways and Canals for the Fiscal Year from April 1, 1908 to March 31, 1909. Ottawa: King's Printer, 1909. Page, 410. Price, 30 cents.

The report of the Department of Railways and Canals for the last fiscal year shows a total railway expenditure of \$41,569,184.26. Of this sum \$24,892,422.68 was for the National Transcontinental Railway, and \$92,427.83 for surveys for a railway to Hudson Bay. The sum of \$1,785,887.39 was paid as railway subsidies. The expenditure on the Intercolonial Railway was \$13,195,253.71, and on the Prince Edward Island Railway \$961,537.31. The total revenue from government railways and canals was \$9,093,921.68 of which the railways produced \$8,894,420.42. The working expenses of the government roads amounted to \$9,764,586.51 showing a deficit of \$870,166.09.

In the surveys for a railway to Hudson Bay two routes were traversed, one from Le Pas Mission on the river Saskatchewan to Fort Churchill, and the other from Le Pas Mission to Port Nelson. Should the former route be chosen the River Churchill would afford facilities for the development of electrical power. On the other hand it is pointed out that at some future time a canal could be built from the bay up the Nelson river to Lake Winnipeg.

The Agricultural Industry.

Report of the Minister of Agriculture for the Dominion of Canada for the year ended March 31, 1909. Ottawa: King's Printer, 1909. Page, 175. Price, 10 cents.

In the report of the Minister of Agriculture for Canada, it is stated that the export of cheese during the year ended March 31, 1909 amounted to 164,907,139 lb., compared with an export of 189,710,463 lb., in the previous year. There was an increase in the quantity of butter exported from 4,786,954 lb., in 1907-1908 to 6,326,355 lb., in 1908-1909, but in the export of butter the past two years fell far below any year since 1897. The cause of this decline is attributed to the dry seasons of 1907 and 1908.

A movement of great importance to agriculture was inaugurated during the year in the establishment at Rome of the International Institute of Agriculture, as the result of resolutions passed at an international conference in 1905, which had been called by the King of Italy. Forty countries have given their adhesion to the Institute.

Its objects are the collection of reports and statistics of agriculture from all the countries of the world, the compilation and co-ordination of these reports and their redistribution in condensed and convenient form for the use of the various countries. The Institute is maintained by a special grant from His Majesty the King of Italy and by contributions from the countries adhering to it which are divided for the purpose into five classes. Canada is placed in the second class which entails an annual contribution of \$2,316.

At the meeting of the General Assembly, Senor Titoni of Italy was re-elected President, Hon. Mr. Fisher, Minister of Agriculture for Canada was elected first vice-president and Hon. M. Yermoloff, Secretary of State for Russia was elected second vice-president.

Annuities, Bounties and Chinese Immigration.

Report of the Department of Trade and Commerce for the Fiscal Year ended March 31, 1909. Part IV, Canadian Trade. Miscellaneous Information. Ottawa: King's Printer, 1909. Page, 87.

Part IV of the report of the Department of Trade and Commerce for the last fiscal year, deals with a number of mis-

cellaneous subjects which come under the purview of the Department. These comprise Annuities, Bounties, Chinese Immigration, Revenue and Expenditure of the Department, Statistical Record of the Progress of Canada, Tonnage Tables, the Trade Commissioner Service.

It is stated that during the seven months (approximately) ending July 31, 1909, the Canadian Government issued 288 annuity contracts, aggregating \$65,022.80 and the purchase money received on account thereof was \$206,410.15. There were forty-four immediate annuities totalling \$11,121.80 at a cost of \$108,923.80, and 244 deferred annuities amounting to \$53,901.00 on which \$97,486.35 had been received in premiums.

There were paid in Government bounties during the last fiscal year, \$693,423 on pig iron, \$838,100 on steel, \$333,091 on steel manufactures, \$307,434 on lead, \$34,561 on manila fibre and \$260,698 on crude petroleum.

The Chinese immigration during the ended March 31, 1909, amounted to 695 persons exempt from taxation and 1,411 who paid the tax. The revenue derived from the tax amounted to \$713,131.00. and the refunds to \$67,500.00. The sum of \$318,750.00 was paid to the provinces as their share of the capitation tax.

Criminal Statistics.

Report of the Minister of Justice as to Penitentiaries of Canada for the Fiscal Year ended March 31, 1909. Ottawa: King's Printer, 1909. Page, 215. Price, 15 cents.

In the annual report of the Inspectors of Penitentiaries of Canada it is stated that the average daily population of the penitentiaries during the fiscal year 1908-1909 was 1,625, compared with 1,418 in the previous year, an increase of 14.6 per cent. A noticeable feature is the large proportion of convicts from urban centres as compared with rural districts, Montreal contributing seventy-seven per cent. of the population of St. Vincent de Paul penitentiary, and Winnipeg eighty per cent. of that of Manitoba. Of the 1,765 prisoners in custody on March 31, 1909, 1,046 or 59 per cent. were Canadian born, and twenty-three per cent. were foreigners. Ten per cent.

were under twenty years of age, fifteen per cent, were unable to read or write. Seventeen per cent were total abstainers, and forty per cent. were intemperate.

The success of the parole system of dealing with prisoners is shown in statistics covering the ten years in which it has been in operation in Canada. During that period 1,516 paroles were granted from the penitentiaries and 999 from prisons, jails and reformatories. Of this number 1,483 prisoners completed their sentences on parole, 879 were still reporting and only fifty-four licences were forfeited by subsequent conviction and ninety-nine were forfeited for non-compliance with conditions. In the opinion of the Inspectors the work of supervision is now too great for one officer, and it is suggested that the various provinces be requested to make immediate provision for the supervision of such as may be released on parole from provincial institutions.

The principle of indeterminate sentences for habitual offenders is advocated in the place of sentences for a definite term, on the expiry of which unreformed criminals are let loose to prey once more on the community.

With reference to prison labour, the inspectors point out the need of deciding upon some solution of the problem without delay. Labour being imposed as part of the sentence is obligatory, but the work required to maintain the institutions provides employment for only one-half the prison population. It is suggested that the other half might be occupied in making articles for the various departments of the Government, which they consider a better plan than the other alternative of establishing industries and disposing of the products in the open market.

Coal Fields of Western Canada.

Department of Mines, Geological Survey Branch. The Coal Fields of Manitoba, Saskatchewan, Alberta and Eastern British Columbia. By D. B. Dowling. Ottawa: King's Printer, 1909. Page, 109.

In a report on the coal fields of Manitoba, Saskatchewan, Alberta and Eastern British Columbia, issued by the Geological Survey Branch, an estimate is

given of the total area of these fields and their probable content of coal. This estimate gives an approximate area of 22,506 square miles, containing 143,490,000,000 tons of coal. The various classes of coal occur in the following proportions:

	Tons.
Anthracite.....	400,000,000
Anthracite and semi-anthracite.....	860,000,000
Bituminous and semi-anthracite.....	43,070,000,000
Coal and lignite coal.....	21,000,000,000
Lignite.....	78,160,000,000

The output of the mines in the Crow's Nest district of British Columbia, increased from 230,000 in 1900 to 876,731 tons in 1907, and the coal production of the provinces of Alberta and Saskatchewan, increased from 1,590 tons in 1881 to 1,555,582 tons in 1906.

Iron Ores of the Ottawa Valley.

Report on the Iron Ore Deposits along the Ottawa and Gatineau rivers, by Fritz Cirkel, M.E., Ottawa: Mines Branch, 1909. Page, 147.

The iron ores of the valleys of the Ottawa and Gatineau rivers have been the subject of an investigation by Mr. Fritz Cirkel, M.E., for the Mines Branch of the Department of Mines and his report has just been published. After describing in detail the various iron deposits in this region, the writer concludes that many of them would yield ores which could in all probability be treated profitably in the electric furnace, and it is stated in the report that this method of reducing the iron ores can compete with the blast furnace for the production of pig iron, when electrical energy can be developed at a low cost. The great water powers available in the Ottawa and Gatineau valleys would render electrical smelting very feasible. Large quantities of power could be developed at Pagan Falls, Cascades, Chelsea rapids, Great Falls, Coulonge river, Roche Fendue, Calumet Falls, and Chats Falls.

The report is illustrated by five plates, fifteen drawings and two maps, and forms a valuable addition to the series of bulletins on the mineral resources of Canada issued, under the direction of Dr. Eugene Haanel, by the Mines Branch of the Department of Mines.

ONTARIO REPORTS.

The Dairying Industry.

Appendix to annual reports of the Dairymen's Associations of the Province of Ontario. List of Cheese Factories and Creameries in operation in Ontario during the summer of 1909. Toronto: King's Printer, 1909. Page, 56.

In an appendix to the Annual Reports of the Dairymen's Associations of Ontario it is stated that during the season of 1908, 1,661,039,751 pounds of milk were delivered at cheese factories, from which 120,624,436 pounds of cheese were manufactured, with a total cash of \$13,106,919.95. The creameries of the Province of Ontario manufactured 9,895,109 pounds of butter, with a total cash of \$2,355,170.43. During the summer of 1909 there were in operation in Ontario, 1,177 cheese factories and ninety-seven creameries. Provision has been made for the registering of all factories and the granting of certificates to makers, the former to come into operation at the beginning of 1910, and the latter at the beginning of 1911.

BRITISH REPORTS.

Wages and Hours of Labour.

Report on Changes in Rates of Wages and Hours of Labour in the United Kingdom in 1908, with comparative Statistics for 1899-1907. London: Wyman & Sons, 1909. Page, 192. Price, 9d.

According to the report of the British Board of Trade on the Changes in Wages and Hours of Labour in the United Kingdom, a decline in wages began about the third month of 1908, and there was a steady downward movement from that time until the close of the year, which continued during the first six months of 1909. Over 963,000 workpeople out of nearly 10,000,000 had their wages changed during 1908, the net result of all the changes being a decrease of £59,200 per week. Taking into account the various dates at which the changes came into operation, the net decrease in the year's wages bill due to the changes in the rates of wages was estimated at £873,800 as compared with increases of £5,821,000 in 1907 and £1,419,000 in 1906. Of the 963,000

workpeople affected by changes in rates of wages during 1908, advances were received by 119,000 including 57,000 employed by public authorities, 12,000 in the textile trades, 11,000 in the printing and allied trades, and 9,000 in the building trades. The number who sustained decreases was 464,000, including 283,000 employed in coal mining, 83,500 in engineering and shipbuilding, and 69,000 in the manufacture of pig iron and iron and steel. The wages of the remaining 380,000 were at the same level at the end as at the beginning of the year.

The number of workpeople whose changes in rates of wages were preceded by a stoppage of work was only 1.9 per cent. of the whole. The proportion whose changes were arranged by conciliation, wages boards, arbitration, etc., was 62.4 per cent. changes affecting 6.5 per cent. took effect under sliding scales, and in the case of 31.1 per cent. the changes were arranged by direct negotiations between employers and the employés or their representatives. The hours of labour of 23,000 workpeople were reduced, out of 26,500 whose hours were changed. The net effect of all the changes was a reduction of nearly 38,400 hours in the weekly working time of the people affected

OTHER REPORTS RECEIVED.

Canada.—Report of the Commissioners of the Transcontinental Railway for the fiscal year ending March 31, 1908.

Steamboat Inspection Report. Supplement to the Forty-Second Annual Report of the Department of Marine and Fisheries for the fiscal year, 1909.

Evidence taken before the Marine and Fisheries Committee respecting the lobster industry during the Session of 1909.

The Whitehorse Copper Belt, Yukon Territory, by R. G. McConnell. Department of Mines, Geological Survey Branch.

Report of His Honour Judge Ruegg, K. C., as to the Application of the Factory and Workshop Act 1901 to Florists' Workshops.

RECENT LEGAL DECISIONS AFFECTING LABOUR

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NOVA SCOTIA CASES.

The Chinese Immigration Act.

A number of Chinamen had been clandestinely landed on the shore of Cape Breton. The customs officer, at Sydney, detailed the defendant to look after the matter and the defendant, with the aid of the Sydney police, rounded them up and put them in prison. Their

names were unknown and no warrant had been issued. Subsequently, a warrant was issued, but, no offence having been disclosed, the prisoners were discharged. Another information was then laid and the same men were again put in custody and the County Judge convicted them, but the Supreme Court of Nova Scotia discharged the prisoners. In an action by eight of them against the defendant for false imprisonment (no malicious prosecution being alleged), damages were awarded the plaintiff.

(Chen Fun and others v. Campbell, 7 Eastern L. R., 147)

QUEBEC CASES.

Constitutionality of Provincial Sunday Observance Law.

In a number of cases pending before the police magistrates of the City of Montreal, against the proprietors of several moving picture shows, on account of the moving pictures being open to the public on Sundays, proceedings were taken, during the past month, to test the constitutionality of the provincial law under which the prosecutions were carried on. In one of these cases a petition was presented before Mr. Justice Guerin for a writ of prohibition to three of the police magistrates, a constable, and the attorney-general of the province, restraining them from further proceeding with the case. An injunction was also asked to enjoin them against taking any further actions. It was argued for the petitioners, that the accusations were made under a provincial statute regarding Sunday observance which was *ultra vires* of the provincial legislature, unjust and oppressive, and, therefore, essentially null and void and without legal existence. It was contended that the passing of laws regarding Sunday observance pertained exclusively to the Dominion Parliament, and, therefore, that the police magistrates could not act under provincial law which had no legal force. A writ of prohibition and a writ of injunction, pending the final judgement in the present test case, were asked for. The learned judge granted the application for the writ of prohibition, but refused the injunction and reserved the question of costs. The effect of the decision will be that further proceedings will be stayed in all the cases now pending before the police magistrates until the conclusion of the appeal to the Superior Court, where the constitutionality of the Provincial Court will be determined; but the police authorities will not be prevented from taking new proceedings for new offences.

The Early Closing Law in Montreal.

In the city of Montreal, there have been a number of cases before Recorder

Dupuis charging some thirty merchants with infractions of the early closing by-law. Among these were several defendants charged with having kept their drug stores open during prohibited hours. The defendants pleaded guilty, but judgement was reserved by the Recorder. Counsel for the accused quoted authorities which, it was alleged, showed that the Provincial Legislature had no power to authorize the city to pass such a by-law. He also claimed that the resolution restricted the liberty of the subject and was discriminating and injurious to the interests of tradesmen. Referring to the druggists the recorder remarked, that all drug stores came under the law the same as other prescribed places. They must close their doors, and the only sales permitted would be medicines, and such articles in cases of emergency. The Montreal Pharmaceutical Association thought the matter of sufficient importance to call a meeting at the College of Pharmacy to consider the ruling that drug stores were not exempt from the operation of the by-law. About a dozen business men of the city testified that they were paying taxes and rent to the city, that one-third of their business was done in the evenings and that the by-law would be ruinous to their business. In two cases, where the questions were asked, it was mentioned that assistance had three nights off each week. In almost all the cases witnesses stated, that much of their business was done with tourists who went for a walk in the evenings, with the intention of purchasing things at the stores, and that, if they were compelled to close on Tuesday and Wednesday evenings, it might mean ruin to them. It has been stated in the Montreal press, that a previous early closing by-law was quashed as illegal and *ultra vires*, in consequence of which the city had to pay heavy damages to the merchants who were convicted under the provisions of the by-law and this is said to be the reason why the Recorder reserved judgement in the cases. If his decisions were upset either by the Superior Court or the Privy Council, the city might be again placed in the position of having to pay heavy damages, hence

the delay. A decision, in one case, would not involve much risk, but in the large number of cases in question the damages might be heavy.

NEW BRUNSWICK CASE.

Workmen's Compensation.

In the Supreme Court chambers on November 27, Mr. Justice McKeown in the matter of the petition of J. Frederick Baxter, of this city, machinists, for claim under the Workmen's Compensation for Injuries Act and amended acts, vs. the Minas Basin Steamship Company, delivered judgement in favour of the plaintiff, and awarded him \$650 damages for the loss of his index finger of the right hand, sustained while placing a propeller on the S. S. Brunswick, the defendants' steamer, April 5th last. The amount is to be paid in weekly payments of \$6.50. The case was heard on October 4th., last and Mr. A. A. Wilson, K. C., appeared for the plaintiff and Mr. W. H. Harrison for the defendant. The act provides that there shall be no appeal.

ONTARIO CASES.

Death of Electrician—Unsuccessful Claim for Damages.

The plaintiff, the widow and administratrix of Alphonse Paquette, claimed damages for the death of her husband, an electrician in the employ of the defendants, who was thrown from a high ladder while repairing an electric light, in the centre of defendants' rink, by reason of a boy skating against the ladder. Plaintiff alleged that her husband's death was due to defendants' negligence, in that the ladder supplied by defendants was not properly constructed for the purpose for which it was used, and was unsuitable for such purpose, being defective in design and manufacture. Upon the findings of the jury, at the trial before Mr. Justice Anglin, the action was dismissed. The Divisional Court, on appeal, ordered a new trial. The Court of Appeal reversed the judgement of the Divisional Court, and restored the judgement at the trial on the

ground, that the unsuccessful party (in this case the plaintiff) must be able to point to something like a mistrial or perverse or unreasonable conduct on the part of the jury, in order to attack a verdict for his opponent and this had not been done.

(Paquette v. The Rideau Skating Club, 14 Ontario Weekly Reporter, 845.)

Municipal Lands Exempt From Mechanics' Lien.

Upon a motion to vacate a lien registered by the plaintiffs, a contracting company, against the lands of the defendants, the corporation of the city of Ottawa, under the provisions of the Mechanics' and Wage Earners' Lien Act, it was held by Judge McTavish, judge of the county court of the County of Carleton, that the lands of a municipality actually required for the use of the municipality such as fire halls, police stations, &c., are exempt from the operation of the Act, on the grounds of public policy and public convenience. In his judgement on the case, the learned judge said that it had been "held that the lands of a railway company were exempt from the operation of the Act on grounds of public policy and public convenience. (R. v. Alford, 1885. 9 O. R., 643.)

The test which was applied in that case, if applicable to this, would be decisive against the plaintiffs' right to enforce their lien. Executions against railway companies and against municipal corporations for the recovery of ordinary debts, have to be enforced in a certain specific manner prescribed by the legislature. An ordinary debt against a municipality cannot be enforced by sale under execution of the property of the municipality, and it seems to me that if the legislature intended that municipal property actually could be sold by this process, that right would appear in more definite terms. It is surely in the public interest that public buildings, such as police stations, fire halls, &c., should not be sold under this summary process. It may be that the Act would apply to such lands of a municipality as are not actually required for the uses of the municipality, but the enforcing of mechanics' liens

against such public buildings as are in question here would very seriously interfere with the convenience and rights of the public. I am asked to decide this question, which is one of very great importance, in this summary way. In the absence of express authority covering the point at issue. I am bound to give effect to my own opinion, and that is, that the plaintiffs are not entitled to the lien claimed."

The judge made an order vacating the lien registered by plaintiffs, but without prejudice to any other action which plaintiffs might see fit to take and gave defendants costs of the motion, but with permission to plaintiffs to appeal, if they so desired.

(General Contracting Company v. City of Ottawa, 14 Ontario Weekly Reporter, 749.)

Damages by Coke Worker Against Gas Company.

Charles Latham, a coke worker employed by the City Gas Company, of the City of London, sued the Company for damages alleged to have been sustained under the following circumstances: Plaintiff was carrying a pail of hot water up a ladder, on the Company's premises, when he slipped and fell a distance of twenty-five feet, breaking his left leg and ankle, and spraining his right ankle. He claimed that the defendants were responsible for the accident, on account of the defects of the arrangement of the ways and works and machinery in use on the Company's premises. The jury awarded the plaintiff \$1,000 damages.

Mechanics' Lien—Claim for Damages for Delay.

Plaintiff brought action to establish and enforce his lien under the Mechanics' and Wage Earners' Lien Act, which arose out of two contracts in writing, and for additional work. Defendant denied that the work was authorized in writing or properly done, or done in the time specified, and claimed \$500 as liquidated damages for each week of delay. The referee before whom the matter

came, gave judgement for plaintiff for \$3,250.21, and dismissed defendant's claim for damages. Upon an appeal by the defendant (the owner) from this judgement and a cross-appeal by the plaintiff (the contractor) from the same judgement, both appeals were dismissed by the Divisional Court, and the judgement of the referee affirmed.

(Hutchinson v. Rogers, 14 Ontario Weekly Reporter, 768.)

MANITOBA CASES

Questions as to a Company's Indemnification Against Loss.

The Court of Appeal has held that it is improper for plaintiff's counsel, at the trial before a jury of an action by an employé of a Company for damages for a personal injury suffered by him in the course of his employment, to ask a witness for the defendants if the Company is indemnified against loss in the event of an adverse verdict. The mere asking of such a question, though the witness be not required to answer it, and does not answer it, is sufficient to warrant the court in setting aside a verdict for the plaintiff and ordering a new trial. The Court, in this decision, followed the judgements on the point in Longhead v. Collingwood Shipbuilding Company, 16 Ont. L. R. 65, 21 Ont. W. R. 697; Col. v. Van Why, 3 American and English Annotated Cases 552, and Casselman v. Dunfie, 65 North Eastern Reporter 494.

YUKON TERRITORY CASE.

Wages for Work Done as a Miner.

Action for work done by plaintiff as a miner. Plaintiff had worked for a Society organized in France to mine in Alaska. Subsequently this Society sold out to a Company also organized in France. Mr. Justice Craig who tried the action held that there was no novation, namely, there was no transfer to the Company of an obligation to pay the debt incurred to the plaintiff by the Society for whom the plaintiff had previously worked. The defendant Company had

not authorized its manager to assume payment of plaintiff's debt owing by the Society. Plaintiff was given judgement for the work done for the defendant Company in 1907, but it was held that he could not collect for work done for the Society in 1906.

(*Demesmay v. Société Minière du Klondike*, 11 Western L. R., 377.)

BRITISH CASE.

A Curious Compensation Claim.

At Stockport, on Friday, Louis Heywood a spinner, sued the Broadstone Spinning Company, Limited, for compensation under the Workmen's Act.

It was stated that the employés at the mill were allowed to bring refreshments to quench their thirst whilst following their employment. On March 19th this year, the applicant was getting hold of a herb beer bottle, when it burst and injured his left eye. He was treated at the Manchester Eye Hospital, and the eye had to be removed. On August 16th he returned to work and is working at present. The room was very hot, and caused a severe thirst. The firm knew the herb beer was taken there and he contended that the risk of the accident was a risk which was incidental to his employment and if it was with their consent, then they were responsible for any

accident that might occur. The application was for compensation at the rate of £1 per week for eleven weeks and for a declaration of liability.

Several witnesses were called in regard to the custom and practice in mills and it was stated that eleven out of twelve minders in this room had herb beer.

For the firm it was submitted that the accident did not arise out of or in the course of his employment. If the applicant was thirsty he could get a drink of water and that he took the beer at his own risk.

His Honour said the employés supplied themselves with moderate and reasonable refreshment in order to better enable them to perform their work. It was a very hot room, where men would be likely to require a liquid refreshment. He did not think any court had yet decided any case on similar lines to that and probably the Court of Appeal would either in that case or some other case have to give its decision. He found the practice was allowed and one which was to their benefit, in so far as their workmen were able to do their work better. He must make an order for £1 per week for the eleven weeks and also a declaration of liability in this case.

Counsel remarked that the case raised an interesting point and asked for stay of execution if an appeal was made, which was granted.

THE

LABOUR GAZETTE

JANUARY, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF
DECEMBER, 1909.

I.—GENERAL SUMMARY.

THE December holiday trade, which is generally regarded as a fair indication of economic and industrial conditions for the year, largely exceeded in volume that of the preceding year and in many sections was reported heavier than in any previous season. This was in part the result of favourable weather conditions, a period of mild weather in the opening weeks of the month having been succeeded by snowfalls which provided excellent winter roads and enabled the farming community to reach the markets with a minimum of effort. The underlying cause, however, was the increased agricultural yields of the past season, the value of which, according to the latest estimate, will exceed that of the previous year by over \$100,000,000. Especially noteworthy in connection with the Christmas trade were the superior quality of the goods demanded and the abundance of ready money. General industry, as well as the trade of the country, has received from the same cause a pronounced stimulus, and for some months past a steadily increasing degree of activity has been reported in the lumbering, mining, manufacturing and transportation branches. This tendency was further accentuated during December. In the lumbering industry, the general demand has increased, prices have been upward, and the outlook is for a large cut during the coming winter. In the mining industry, the collieries have

steadily increased their outputs, and the metalliferous mines are in a more favourable position than for some time past. The manufacturing industry was still more active than in November; staffs were being increased in many localities and a scarcity of skilled hands was reported in certain branches. There has been a resumption of the expansion in plants and equipment which was so pronounced a feature in this industry during 1906 and 1907. Railways have been exceptionally busy, the larger companies reporting a marked increase in earnings and in the number of hands employed. Navigation closed at an unusually late date, after an exceptionally busy autumn season, and the outlook is that the winter port business of 1909-10 will largely exceed that of the preceding year. The fishing industry was quiet from seasonal causes. The mild weather of the first half of the month enabled outside operations in connection with railway construction, civic improvements and building to be unusually prolonged. Later, large numbers of men were laid off in these branches. From the standpoint of unemployment during the winter, the situation at the close of the month was much more favourable than for several years past, no reports of widespread distress having been received from any centre of population. The outlook for the industrial season of 1910 is on all sides regarded as most favourable, in

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

view of the large amount of railway construction and other building projected, the increasing growth of immigration, and the marked industrial and trade buoyancy resulting from the favourable crop returns of 1909.

Changes in Wages and Hours of Labour.

The following is a statement with regard to the various changes in wages and hours of labour, information concerning which was received at the Department during November:—

Metal trades.—The wages of iron moulders were increased at Brantford, Ont., and decreased at London, Ont. (*)

Civic employés.—A revised and increased schedule of salaries for employés in the Public Library at Toronto will go into effect from the beginning of 1910.

Railway employés.—Machinists (100), blacksmiths (6) and locomotive firemen (50) in the employ of the Pèrè Marquette Railway Company received new schedules, involving in the case of the two first mentioned a reduction in hours and an increase in wages from January 1, and in the case of the last mentioned an increase in wages from December 15 (**). Telegraphers and station agents in the employ of the Temiscaming and Northern Ontario Railway Company obtained an increase, in the case of the latter from \$55 to \$60 per month and in the case of the former from \$53 to \$58 per month.

Prices—Cost of Living.

A noteworthy feature of the month of December was the exceptionally high prices at which poultry, eggs, butter and other farm produce were sold during the holiday season. This was followed by a recession, insofar as poultry was concerned, in the closing days of the month, but the bulk of the holiday trade was transacted on very high price levels. Hogs were also very high in price. Grains remained firm to upward, but fodder prices were easy. Grocery prices were generally steady, with flour markets

inclined upward. An advance in the price of brooms has taken place. Lumber prices remained very firm. Metals have been firm with a strengthening tendency. Hides and leather prices showed strength, hides being nearly four cents per pound higher than in 1908. Raw cotton still remained higher in price than at any time since 1903. Rubber goods remained very high.

The tenders for supplies to provincial institutions in Ontario showed an advance in the price of butter, flour, meat, milk, oatmeal, etc., of approximately five per cent. compared with the quotations secured last year.

Interruptions to Industries.

Among industrial establishments, etc., destroyed by fire or through other causes during December, as reported in the press of the Dominion, the following may be mentioned:

Nova Scotia.—Chair factory at Bass river, loss \$23,000, 300 men thrown out of employment; ferry steamer *Halifax*, at Halifax, loss \$20,000; business block, at Halifax, loss \$28,000; dry goods store at Windsor, loss \$15,500.

In the beginning of the month heavy rains caused considerable damage in Nova Scotia, washing away tracks and bridges. On December 27, a severe storm off the Atlantic coast caused heavy damage to shipping; among other accidents the schooner *A. K. McLean* was wrecked.

New Brunswick.—Business block (partial) at Fredericton, loss \$1,000; business block at Hampton.

On December 15, shore ice carried away \$4,000 worth of fishermen's nets; part of these were subsequently recovered.

Quebec.—Store at Chenneville, loss \$2,000; business block at Cowansville, loss \$15,000; hotel at Huntington; convent at La Tuque, loss, \$12,000; tenement at Mile End, loss \$10,000; monastery at Mistassini. At Montreal, store, loss \$15,000; store, loss \$1,500; railway offices; tobacco factory, loss \$6,000; foundry and hat factory, loss \$70,000; leather factory, loss \$2,000; clothing store (partial) loss, \$1,000. Railway workshop at Point St. Charles; business block at St. Hyacinthe, loss \$5,000; business block at St. Hyacinthe, loss, \$24,000; convent at St. Agathe, loss, \$15,000; foundry at Valleyfield.

Ontario.—Stable and contents at Belleville; electric light plant, flour mill and sash factory at Essex, loss, \$50,000; store at Galt, loss, \$8,000; furniture store at Guelph, loss, \$20,000; town hall and store, loss, \$2,000; store at Kingston, loss, \$5,000; post office (partial) at Lakefield; grocery store at London. At Ottawa, bakery and two stores, loss, \$5,000; orphanage, boiler explosion, loss, \$3,000; seven stores, loss, \$8,000. Flour mill at Niagara Falls, loss, \$50,000; theatre at North Bay, loss, \$2,000; boarding house at Port Dover; plumbing establishment at Peterborough, loss, \$8,000; tug *Auguste* at Port Dalhousie; hotel at Parry Sound, loss, \$1,400; railway station at Parkdale, loss, \$5,000; machine works at Ridgetown, loss, \$25,000; business block at Sudbury, loss, \$125,000; portion of gas works at Catharines, loss, \$4,000; business portion of Thessalon, loss, \$100,000; fruit warehouses at Toronto, loss, \$150,000; rooming

*See reports of local correspondents.

**See article on Recent Industrial Agreements elsewhere in the present issue.

house at Toronto, loss, \$1,000; clothing factory (partial) at Toronto, loss, \$2,000; boarding house at Wood-bridge.

Barns at Deseronto, Dundonald, Panryn and South London.

Manitoba.—Business block at Altona, loss, \$60,000; outbuildings and dwelling at Portage la Prairie. At Winnipeg, furniture factory, loss, \$100,000; dairy building of Agricultural College, loss, \$55,000; hotel; newspaper office and steel works, loss, \$50,000.

British Columbia.—Hotel at Salmo, loss, \$8,000; lumber mill and boarding house at Seal Cove, loss, \$190,000; cannery at Skeena, loss, \$20,000. High water damaged the power plant at Vancouver to the extent of \$8,000; at the same place the yacht club building was burned, loss, \$50,000.

Floods in the beginning of December caused heavy damages to railways in British Columbia; the Vedder river bridge was carried away causing a loss of \$10,000. On December 17, the schooner *Lulu* caught fire off Prince Rupert and became a total loss.

Conditions in the Industries and Trades

Conditions of employment during December in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of the *Labour Gazette* and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

The mild weather which prevailed during the first half of the month enabled stock in several localities to be kept in the fields, thereby effecting a considerable saving in fodder. Later, the good winter roads and exceptionally high prices of the second half of the month made Christmas marketing very profitable for the farming community. The same conditions facilitated the cutting and marketing of cordwood. Apart from these activities, and the caring for stock, the month was a quiet one for agriculturists.

The final estimate of the quantity and value of the field crops of Canada during 1909, as given by the Census and Statistics Branch of the Department of Agriculture, Canada, placed the total acreage under crop at 30,065,556 acres compared with 27,505,603 acres last year, and the total value of the product at \$532,992,100, an increase of over \$100,000,000 as compared with last year. The total value of the wheat harvest in the Western Provinces is estimated at \$121,560,000 compared with \$72,424,000 last year.

The condition of the new crop of fall wheat during December was placed at ninety-three per cent. compared with seventy-five per cent. last year. There has been an increase of twenty-one per cent. in Alberta and nine per cent. in Ontario in the acreage compared with the preceding year.

The dairy season of 1909 as compared with that of 1908 showed a slight increase in exports of cheese but a considerable decrease in the exports of butter due to an increase in home consumption. Prices were lower for both butter and cheese than in 1908.

The final bulletin of the Manitoba Department of Agriculture estimates the total yield of the crop during 1909 at 113,514,482 bushels, compared with 113,058,168 bushels in 1908. The total acreage under crop was 4,777,210 acres. Nearly 22,000,000 bushels of wheat had been marketed on December 1. The production of wheat and barley fell off in 1909, but potatoes and fodder showed a heavy increase. The stock raising branch reported favourable conditions, except in the sheep raising department. It was stated that \$2,589,780 were expended for farm buildings during the year.

The annual report of the Secretary of Agriculture for Nova Scotia showed that the season has been one of the best experienced by the farmers of that Province. The following is a copy of the official return:—

Crop.	Acreage.	Yield per Acre.	Total.
	<i>Acres.</i>	<i>Tons.</i>	<i>Tons.</i>
Hay.....	640,000	1.5	960,000
	<i>Acres.</i>	<i>Bus.</i>	<i>Bus.</i>
Oats.....	138,000	30	4,140,000
Wheat.....	20,600	20	412,000
Barley.....	10,600	23	243,800
Buckwheat.....	18,000	26	468,000
Beans.....	3,100	20	62,000
Peas.....	1,500	24	36,000

pondents stated that more help was needed. Wages were about the same as last year, this is, from \$12 to \$25 per month with board on yearly engagements, and from \$25 to \$35 with board for summer engagements.

The Guelph, Ont., winter fair and the Maritime winter fair of Amherst, N. S., were held during December, and were both in point of attendance and the number and quality of exhibits a pronounced success. A number of most interesting and valuable lectures were delivered by agricultural experts, and several meetings of agricultural associations were held. Among important meetings which took place during December were, the thirty-first annual meeting of the Ontario Agricultural and Experimental Union, the annual meeting of the Ontario Apple Shippers' Association and the annual meeting of the Maritime Fruit Growers' Association. Another important meeting of the month was that of the Manitoba Grain Growers' Association held at Brandon, Man., at which the main subject of discussion was the government ownership of elevators. It was announced during the convention that the Government of Manitoba would establish a line of internal grain elevators as a public utility to be owned and operated by the public and was prepared to co-operate with the Association in working out a plan to that end. A committee was appointed to discuss the matter in detail with the Government. It was decided to admit women to membership in the association.

Fishing.

The month was quiet. Smelt fishing opened in the Maritime Provinces; catches were fair and prices high, especially during the closing week of the month. The opening of the lobster season in Nova Scotia on December 15, gave employment to a considerable number of men, though catches were generally light. The coastwise fisheries were dull. In British Columbia, preparations in connection with the herring season at Nanaimo were very active, but no large takes were reported up to the

close of the month. The sealers at Victoria were beginning to sign their crews for the season of 1910.

Lumbering.

The mild weather which prevailed throughout Ontario and the Eastern Provinces up to the middle of December was unfavourable for work in the woods. A heavy rainfall in the Maritime Provinces made the forwarding of supplies unusually difficult and operations were correspondingly delayed. In the latter half of the month, however, the freezing of the swamps and an abundant snowfall facilitated the work. The outlook is that the cut will exceed that of the season of 1908-09. Work in the saw-mills had entirely ceased by the middle of the month, the season having been prolonged to an exceptionally late date. Market conditions were favourable, with prices upward in tendency. In Western Ontario and the Northwest Provinces the outlook is for a busy winter in the woods. Some heavy contracts for railway ties are being carried out. In British Columbia general conditions continued to improve. The mills were well employed, with a good demand for product. The logging camps were quiet, on account of weather conditions, but the outlook is for an increased production.

A feature of the month was the holding of a lumberman's convention at Vancouver, B.C., forty lumbermen from Western Ontario, Manitoba, Saskatchewan, Alberta and British Columbia being present. The regulation of prices was discussed. The consensus of opinion was that the outlook for the industry for the coming year was very favourable. It was suggested that a similar meeting should in future be held annually.

The Canadian Forestry Association, of which the membership is now 2,250, an increase of 275 over last year, will hold a special convention in New Brunswick during 1910, and its annual business meeting at Ottawa on March 11.

It was announced that the Province of Quebec would send experts to Europe in order to make a report on the preservation of forests and water power.

Mining.

In Nova Scotia the collieries were working steadily except in localities affected by labour disturbances. The Dominion Coal Company stated that the strike for some weeks past had had little effect on output, the Company having made increased shipments to several customers and having already begun banking. Up to December 20, 11,830 tons had been banked. For the four weeks ended December 18, 1909, the Company's total output from the mines was 207,021 tons, compared with 148,484 tons in the corresponding weeks of 1908. Banking has been begun by the Company at least two months earlier than usual. The collieries of Alberta and British Columbia had a busy month, some shortage of fuel at points in the Northwest Provinces having stimulated the demand.

The metalliferous mines had a good month throughout Canada. The output of asbestos was well maintained in Quebec, and shipments from the Cobalt and other mining camps of Ontario were heavy. In November, the total shipments from Cobalt amounted to 2,447 tons, being the product of seventeen mines. The various camps in British Columbia were producing steadily, the output showing an advance compared with the corresponding period of 1908.

Manufacturing.

The manufacturing industry was much more active than at the corresponding period of 1908. A large number of establishments took on additional hands and in several localities advertisements for help in manufacturing establishments appeared in the press. Female help for whitewear factories was reported scarce at Toronto, Berlin and other points. The cotton mills remained quiet, but there was a revival of activity in the woollen mills. The iron and steel trade has been very active and the outlook is for still more active conditions resulting from the busy conditions prevailing in the construction trades and the proportionate increase of metal consumed.

The Nova Scotia Steel and Coal Company reported as follows for the calendar year 1909:

	Tons.
Coal mined and shipped.....	830,000
Iron ore mined and shipped.....	460,000
Coke made.....	85,000
Limestone and dolomite mined.....	70,000
Pig iron made.....	62,000
Steel ingots made.....	63,000
Blooms and billets cogged.....	54,000
Finished materials, bars, plates and forgings shipped from New Glasgow.....	53,000
Amount of freight paid to the Intercolonial Railway.....	255,000
Freight carried by Sydney Mines Railway of the company exceeded.....	1,400,000
Coal and ore freighted by boats owned or time chartered by the company.....	925,000

The total wages paid by the company during the year was nearly \$2,500,000. With the single exception of coke made, the figures named above all show very substantial increases over the past year.

Further negotiations looking to the completion of the amalgamation of the Dominion Coal and the Dominion Iron and Steel Companies were held during December.

The installation of transformer stations and other equipment for the use of Niagara power was in progress at several points in Southwestern Ontario.

Railway Construction.

Winter conditions went into effect in the closing weeks of the month and a considerable number of men were discharged from the various camps. In the Northwest Provinces the return of these to the cities considerably swelled the number of unemployed. Work, however, was continued to an unusually late date, and the winter promises to be very active on rock cutting, bridge building, the forwarding of supplies and other employment possible at this season.

The completion of the large bridge over the Pembina river, about sixty-six miles west of Edmonton on the Grand Trunk Pacific line, will considerably facilitate the laying of steel.

Some large contracts for the supply of ties, bridge timber, fence posts, &c., were awarded by the Alberta and Great Waterways Railway Company at the end of December.

About 450 men and 400 teams have

been employed throughout the past year on the Canadian Pacific Railway Company's Bow Valley Irrigation system. The construction of the eastern section of this system will be commenced in 1901.

Tenders for the removal of the wreckage of the Quebec bridge were under consideration during December.

An additional report was presented by the Honourable the Minister of Railways to the House of Commons giving details of the result of the survey of the proposed Hudson Bay Railway. It is noted in the report that Nelson is a better harbour than Churchill and the line to that point is sixty-seven miles shorter than to the latter. It is estimated that 64,000,000 bushels of wheat may be marketed annually by the road.

The provincial agreement to be entered into by the Government of British Columbia with the Canadian Northern Railway Company binds the Company to build a line of railway through the Yellow Head Pass to the coast south of the Fraser river, to establish a ferry service between that point and Victoria, to build a line of railway from Victoria to Barclay Sound, and to employ no Asiatics on construction work, the entire work to be constructed and to be sufficiently equipped within four years. In return the Province agrees to guarantee the bonds of the Company to the extent of \$30,000 per mile, to exempt the railway from taxation for ten years and to give the railway Company right-of-way over provincial lands with the usual privileges of taking from them timber and gravel. The Company agrees to indemnify the Province from any payments under its guarantee and to make the same a charge upon the whole Canadian Northern Railway system. The agreement with the Kettle River Valley Railway Company looks to the construction of a line of railway from the Boundary district to the coast cities, by as direct a route as possible. The line is to be built from Grand Forks twenty miles up to the North fork of the Kettle river, a line from Midway to Penticton and a line from Penticton to the Nicola, Kamloops and Similkameen Railway near Nicola; no Chinese nor Japanese

persons are to be employed on the work; and fair wages are to be paid to workmen, the whole to be finished within four years.

The Grand Trunk Pacific Branch lines Company is asking authority by legislation to construct the following lines:

1. From a point on the western division of the G.T.P. between the east limit of range twelve, and the west limit of range seventeen west of the third meridian, thence, in a southwesterly and westerly direction to a point in the vicinity of Calgary or to a point on the line which the company is authorized under paragraph fourteen of clause eleven of said chapter, to construct to Calgary.

2. From a point on the proposed line mentioned in paragraph one between the east limit of range twenty, and the west limit of range twenty-eight west of the third meridian, thence in an easterly and southeasterly direction to Regina or to a point in the vicinity thereof.

3. From a point in the proposed line mentioned in paragraph two between the east limit of range twenty-four, and the west limit of range twenty-seven west of the second meridian to Moose Jaw or to a point in the vicinity thereof.

4. From a point on the western division of the Grand Trunk Pacific between Arthland and Wainwright, thence in an easterly and southeasterly direction to a point on the line which the company is authorized to construct to Battleford.

5. From Regina or a point in the vicinity thereof, thence in a southeasterly and westerly direction to Lethbridge or to a point in the vicinity of Lethbridge on the line which the company is authorized to construct from Calgary to the boundary of the province of Alberta, at or near Coutts, authorizing the issue of bonds to the extent of \$30,000 a mile of the said lines of railway and comprising the said lines, within what are defined as the Manitoba, Saskatchewan and Alberta extensions.

According to a report issued by the Warehouse Commissioner at Winnipeg, Man., with regard to interior, terminal and eastern transfer elevator capacity, there has been a marked increase in capacity during the past twelve months. In Manitoba there are in all 312 stations having elevators with a capacity of 21,624,500 bushels, an increase in capacity during the year of 772,000 bushels. In Saskatchewan seventy-six stations have been added to the list, making a total of 330 points at which elevators have been erected. The storage capacity in this province has increased from 17,924,500 to 24,279,000 bushels. In Alberta there are 121 points at which elevators have been erected, compared with sixty-five last year; their capacity has almost doubled during the year being now 8,050,400 bushels. Altogether, there are in Western Canada 769 stations at which 1,763 elevators are in active operation, having a storage capacity of 54,234,900 bushels.

General Transport.

Railway employes had a busy month. Freight traffic showed an increase in volume compared with December, 1908, and the holiday passenger trade was heavy. Railway earnings continued to show large increases compared with the corresponding period of 1908. Railway shop employes also became more active during the month.

The first train over the line of the Canadian Northern Railway between Quebec and Ottawa arrived at the latter point on December 5.

It was announced that the Canadian Northern Railway Company would erect repair shops and a roundhouse in Toronto during the coming year.

According to a Detroit, Mich., despatch navigation on the Great Lakes for the year 1909, closed on December 6. Referring to the disasters of the season the following statement was given out:

Twenty-five vessels with a total tonnage of 30,146, and valued at \$1,144,000, have been wrecked the past season, and of those who operated these boats sixty-two have perished. Chief among the causes of disaster has been fog. Twenty-four collisions are recorded, and at least fifty per cent. of these were caused by fog. Last year's record was: Sixteen vessels lost, valued at \$631,000, with a total tonnage of 26,250; total loss of life, thirty-three.

The Commissioners of the Port of Montreal have outlined arrangements looking to the carrying out of the following improvements:—

1. To double the capacity of the port.
2. To lessen St. Mary's current so that water portage from one end of the harbour to the other will be possible.
3. To give and all year round railway service from Point St. Charles to Bout de l'Isle, open on equal terms to every railway doing business in Montreal.
4. To create manufacturing and warehousing sites possessing:
 - (a) Direct rail connection over all lines with every part of the continent.
 - (b) Deep water wharfage available to all ocean lines coming to the port.
 - (c) Water access by way of the canal system to Western Canada and the United States.
5. To create low priced power for the movement of harbour equipment, grain elevators, etc.
6. To reduce the handling charges on every ton of freight coming into the port.

Tonnage through the Canadian locks at Sault Ste. Marie this year will exceed 25,000,000 tons. The following is a comparison of the months of 1909 with last year:—

	1908. Tons.	1909. Tons.
April.....	85,208	96,566
May.....	527,968	1,723,492
June.....	988,384	1,742,015
July.....	1,815,567	4,613,744
August.....	1,924,388	5,009,468
September.....	2,122,903	4,790,188
October.....	2,557,260	4,507,247

Street railway employes had a very active month. Earnings of companies were satisfactory and a considerable increase in the number of employes took place during the past year.

The British Columbia Electric Railway Company's annual statement shows an annual revenue of £123,400, an increase of £2,400. The directors have decided to extend the system with a view to allow for a larger population than at present.¹

Under date of December 13, the Board of Railway Commissioners for Canada notified the different railway companies that an investigation will be held during January as to whether brakemen shall be allowed to ride on the top of trains.

With the closing of navigation, long-shoremen, ship labourers, &c., entered upon their period of dullness. The winter ports of Halifax, N.S., and St. John, N.B., however, were very busy, and anticipate a much heavier movement of traffic than last year.

The annual report of the Canadian Pacific Railway steamships line showed a shrinkage in net revenue of \$700,000.

The Canadian Northern Railway Company has announced that on the opening of navigation next year it will inaugurate a passenger and freight service between Canada and Great Britain, two twenty-knot steamers having been purchased.

According to reports received by the Department of Trade and Commerce 95,000,000 bushels of wheat will be available for export from Canada this year. Up to the close of November there had been received at Fort William 56,479,211 bushels of wheat, being 13,963,932 bushels more than at the same date last year. Lake shipments totalled 45,718,683 bushels, an increase of 12,419,641 bushels over last year.

¹For a statement relating to the distribution of bonus to employes of this Company see the report of the New Westminster correspondent.

The Trades.

Building.—Outside operations had for the most part ceased, but the mild weather allowed an exceptionally large amount of work of this kind to be performed in many localities. Bricklayers, masons and builders' labourers were dull. Plumbers were active, as were carpenters in many places. The outlook is for an active winter on inside work.

Metal and woodworking.—The month was active for those employed in manufacturing establishments, though there was a falling off of employment in some sash and door factories. Electric workers and linemen had a good month. The winter promises to be an active one for ship builders on repairs. The demand for cooperage stock was somewhat light, the fall rush being over. Owing to the light apple crop in some sections the demand for barrels was below the normal during the past autumn.

Printing.—The month was very active for printers, pressmen, electrotypers, bookbinders, &c.

Clothing.—Journeymen tailors were busy during the first half of the month, but were quiet towards the close, and will remain so for a period. Garment workers and hat and cap makers, etc., had a busy month. Boot and shoe workers continued quiet, though sorting orders were satisfactory. Furriers were very busy.

Leather.—A fair month was reported by leather workers, with tanners and curriers somewhat dull.

Food and tobacco preparation.—Bakers and confectioners had a busy month on holiday goods. Cigar makers and tobacco workers were also more active.

Miscellaneous.—Retail clerks, delivery employés, hotel and restaurant employés, etc., were very busy in connection with the holiday trade.

Unskilled labour.—From the standpoint of unemployment, reports from all of the larger centres showed that there were fewer men out of work in the closing days of the year than at any similar period for some years past. The unemployed were made up for the most part of recent arrivals. With the close of

outside operations, a considerable increase in the number of those out of work took place, but a much more favourable winter than last year or the year before is anticipated. The scarcity of domestic servants continued.

Canadian Trade and Revenue.

Foreign trade.—During November, 1909, the total value of imports entered for consumption was \$35,434,039, compared with \$24,706,349 in November, 1908. For the first eight months of the fiscal year ending November 30, 1909, the total value of imports entered for consumption was \$240,108,031, compared with \$194,827,463 in the corresponding period of last year. The total value of domestic exports during November, 1909, was \$35,315,713, compared with \$21,672,224 in November, 1908. The total value of domestic exports during the first eight months of the fiscal year ending November 30, 1909, was \$183,050,727, compared with \$168,080,487 in the corresponding period of last year. The grand total of Canadian trade for November, was \$73,151,731, compared with \$59,514,256 in November, 1908. For the first eight months of the fiscal year ending November 30, 1909, total Canadian trade was \$439,959,213, as against \$377,921,241 in the same period of 1908.

According to reports of Trade Commissioners received at the Department of Trade and Commerce, Canada, a considerable demand for British Columbia herring has sprung up in the Orient. Imports of machinery into Japan have also in recent years shown a phenomenal increase. Chinese imports of feathers have increased.

Imperial trade.—In Great Britain and the different dominions of the Empire openings for Canadian products were reported as follows: For Canadian leather at Glasgow; for maple and street railway supplies at Leeds and Hull; for agricultural machinery in India; for motor vehicles, agricultural implements, carriage and wagon building material and railway material in South Africa, where trade generally is improving.

Domestic trade.—From all sections of the country reports indicate a heavy increase in the volume of retail holiday trade as compared with that of 1908. Weather conditions were very favourable, excellent snow roads having enabled farmers to reach their markets with a minimum of effort. Money was apparently plentiful, and the favourable outlook, following upon the bountiful crop returns imparted a buoyancy which was felt in almost every branch of trade and industry. The sorting trade among wholesalers was active but stocktaking was for the most part in progress in this department. Bank clearings showed a heavy increase compared with the corresponding period of 1908.

The bank statement for November showed a continuance of the large increases previously recorded in deposits and loans. There was a slight decrease in circulation owing to a lessening of the demand in connection with the crop movement. Current loans in Canada for November showed an increase of nearly two per cent. for October and a gain of fourteen per cent. over the returns for November, 1908. Deposits advanced by over \$25,000,000 during the month.

Commercial paper was exceptionally well met in Section fourth. At the ninety-second meeting of the Bank of Montreal, it was stated that deposits had increased by \$36,000,000 during the past year. The net profits of the Merchants' Bank for the year ended November 30, 1909, were \$831,159, compared with \$738,597 in 1908. The business of the Bank of Ottawa increased during the year, the circulation having exceeded that of 1908 by \$327,580 and deposits by \$4,690,777; the bank opened seven new branches during the year. The Bank of Toronto reported a decrease of \$3,000 in profits due to low money rates. The Union Bank of Canada has had a successful year, \$100,000 having been added to reserve fund and nineteen new branches or agencies opened. The Bank of Ottawa reported an increase of over \$4,690,000 in deposits and over \$327,000 in circulation. The rest fund was increased by nearly \$300,000 and the capital by a like amount. The Bank of

Toronto added \$250,000 to rest account and nearly \$8,000,000 were added to deposits, while loans increased by \$4,000,000.

Canadian revenue.—The Honourable the Minister of Finance for Canada in delivering the Budget Speech in the House of Commons estimated a revenue of \$98,000,000 for the current fiscal year and current expenditure of \$81,000,000.

According to the annual statement of the Provincial Treasurer of Saskatchewan the total revenues of the present fiscal year amounted to \$3,355,679. It is expected to carry forward about \$100,000 to the next fiscal period.

Notes.

The Workmen's Compensation Commission of Manitoba continued its sessions during December.

The Merchants' Bank of Canada has applied for the incorporation of a pension fund for its employes.

The annual meeting of the union of British Columbia Municipalities was held at North Vancouver, B.C.

The Early Closing Association of Montreal, Que., was re-organized, with Mr. J. B. E. Poirier as President and Mr. Edward Hardy as Secretary.

A farm of over 600 acres has been purchased by the Government of Ontario in the vicinity of Guelph, Ont., for the purpose of establishing a new Central Prison thereon.

A deputation representing the proposed Canadian International Exposition and Selkirk Centennial to be held at Winnipeg, Man., waited upon the Government of Canada with a request for a grant of \$2,500,000 towards the project.

The Montreal Branch of the Canadian Manufacturers' Association and the Montreal Builders' Exchange held their annual banquets during December. The Honourable the Minister of Labour was present at the latter and spoke with reference to industrial accidents, technical education, trade disputes, and conciliation and arbitration, and kindred subjects.

An inter-provincial conference on uniform regulations for the construction and

inspection of boilers was held at Regina, Sask. The deputy minister of public works for Manitoba, was elected chairman of the conference.

The following is a statement of the affairs of the People's Bank of St. Maurice, Que., on December 1, 1909, after three and one-half months operation.

The Ontario Provincial Council of the International Bricklayers' Union held its annual session at Toronto, President Chamberland, of Guelph, presiding. About fifty delegates were present. The past season, it was reported, has been a very profitable one to bricklayers, and in several places wages have been increased. The membership of the union in Ontario is estimated at 2,500. A number of resolutions were passed for presentation at the Biennial conference of the union to be held at Boston, Mass., in January.

The report of the committee appointed by the Board of Education of Toronto to visit a number of cities in the United States to procure information regarding technical education, formed a basis of a conference between the members of the special Committee of the Board on Technical Education and representatives of the Canadian Manufacturers' Association, the Board of Trade and the District Trades and Labour Council. The special committee appointed by the Board to consider the advisability of opening manual training and domestic science classes in the eastern and western sections of the city at nights, recom-

mended that classes be opened in Queen Alexandra and Dawson Street schools three nights a week, for boys and girls, who have never had such lessons, and for Public School pupils who wish to take the more advanced work in these classes.

The organization was announced of the Quebec Railway Light, Heat & Power Company, Limited, being a merger of the Quebec Railway, Light & Power Company, the Quebec Gas Company, the Frontenac Gas Company, the Jacques Cartier Light & Power Company, and the Canadian Light & Power Company of Levis. The new company will have a capital of \$10,000,000, in twenty-year five per cent. bonds, and \$10,000,000 in common stock. The amalgamating companies comprise the tramway, light, heat and power companies of Quebec and vicinity, including the electric line at Montmorency Falls and Ste. Anne de Beaupré. The Jacques Cartier Gas Company, immediately prior to the amalgamation, distributed \$4,000 among its employes, numbering fifty persons. The money was distributed *pro rata* according to salaries and length of service, and a further sum of \$500 was given to the widow of an employe who was accidentally killed three years ago while in the service of the company.

At the second annual general meeting of the Civil Service Savings and Loan Association of Ottawa, Ont., the financial statement showed 371 shareholders and over six thousand dollars out on loans to 162 persons, the smallest loan being \$2 and the largest \$364.14. It was decided to pay a dividend at the rate of five per cent. per annum for the first six months of the year, upon all shares paid up at the end of that period, and also to recommend to the board of administration the advisability of paying interest on deposits at the rate of four per cent. per annum for the coming year.

A prize competition and sale instituted by the Canadian Handicrafts Guild was held at Montreal during December. This is not an exhibition in the usual sense, but a display of handiwork sent in from all parts of the Dominion, in competition for prizes offered by friends of the Guild. It was wider this year in scope than was

attempted previously. As an experiment to discover if workers in the various crafts need, and desire, a place of sale for their products, it was stated to have been successful, as was proved by the response received from every province.

The annual meeting of the Commercial Traveller's Association of Canada was held at Toronto. The treasurer's statement showed receipts for the year of \$123,817. Of this amount \$53,992 went in mortuary benefits, and \$71,275 to surplus allotment account. After general expenses had been met, a balance of \$45,196 remained to be placed to permanent reserve. The surplus is now \$687,372. The membership last year was increased by 686, and now totals 9,326.

A dividend to the workmen at the rate of nine per cent. in addition to their wages, was recently announced as the result of the first nine months' working of the co-partnership plan instituted by Sir Christopher Furness at West Hartle-

pool. The scheme was started in order to avoid the trade disputes which had been so frequent and so ruinous, and the idea of giving the men a direct interest in the concern was received with hearty co-operation by the workers. It is considered as demonstrated that the arrangement provides a permanent guarantee against strikes, which in the case of a firm whose contracts are often time-limited under heavy penalties embarrass the directors continually. Under the new conditions, operations at the shipyards have preceded with satisfaction to all concerned. The board recently announced that every steamer built and repaired since the commencement of the co-partnership scheme has been delivered in strict accordance with the terms of the contract.¹

¹A special article giving details with regard to the arrangement was published in the *Labour Gazette* for December, 1908, page 613.

II.—REPORTS OF LOCAL CORRESPONDENTS.

DURING the month of December, Mr. J. Markey, of Woodstock, Ont., was appointed correspondent of the *Labour Gazette* for Woodstock, Ont., and district, in the room of Mr. W. H. N. McElheran, resigned. Mr. Edwin Howell of Calgary, Alta., was appointed correspondent for Calgary, Alta., and district in the place of Mr. George Howell, resigned.

SYDNEY, N. S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continued active throughout December, and apart from the district of Glace Bay industrial activity exceeded that of past years. In the strike district conditions improved and a record output was made in the early part of December. The steel industry continued active, while construction work

at the Sydney plant gave employment to a large number of men. The merging of the Dominion Steel with the Dominion Coal Company will have a beneficial effect upon the business of the district, and is looked upon by the business public with satisfaction.

The output of the Dominion Coal Company ranged between 8,000 and 10,000 tons per day, and on the 16th., 11,022 tons were produced. Shipments of coal will be continued from Louisburg and International Pier while the season is open. A few thousand tons have been placed in the heaps at two of the Collieries.

General activity prevailed at the Nova Scotia Steel Works. With the exception of Sydney No. 2, Colliery which had broken time in the latter part of the month, all the other collieries were very busy. The Steel Department of this Company was very busy.

All departments of the Sydney Steel Works were continuously employed during the month. The yards are well stocked with supplies of ore and limestone for the winter months. Prospects

for the steel industries of Cape Breton are said to be bright.

Transportation by rail was heavy, but the closing of the St. Lawrence for the year affected shipping.

The building trades had a fair month, although the weather interfered with outside work to a large extent. Other skilled trades were active and unskilled labour was well employed.

The usual activity of the holiday season prevailed in wholesale and retail trade.

INDUSTRIAL ACCIDENTS.

In the early part of the month, Cape Breton was visited by a violent wind storm from the east accompanied by heavy rain. Considerable damage was done to shipping and piers. A large part of the S. & L. Railway was washed away. Temporary repairs were affected within a week, but it is the intention of the Coal Company to move the road-bed in that section more inland. Thousands of lobsters were thrown up on the beach by the violence of the storm.

WESTVILLE, N. S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was active, although heavy snow storms interfered somewhat with work in the collieries. During November the mines worked full time, the Acadia Coal Company's collieries producing some 28,000 tons and the Intercolonial Coal Company's mine about 23,000 tons, being altogether an increase of 6,000 tons compared with last year. Shipments of coal from this district for the eleven months ending November 30, 1909, were about 435,000 tons. The shipments for the whole Province during the same period were 3,679,130 tons. Trade generally was active and there was no unrest in labour circles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were quiet, being engaged in marketing their produce, which brought good prices. The butchers found cattle scarce and have to import in quantities. Eggs and butter were in demand.

Lumbering.—Conditions in this industry were very favourable, and the cut is expected to be large.

Manufacturing.—With the exception of the Sutherland Rifle Sight Company which was quiet, manufactories in general were busy.

CONDITION OF PARTICULAR TRADES.

Plumbers were fairly active; other branches of the building trades were quiet. The metal trades were generally active. Satisfactory conditions were reported in the clothing, food and tobacco preparation, miscellaneous, and transport trades. The supply of unskilled labour exceeded the demand.

HALIFAX, N. S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month has been fair. While building and repairing contracts were not as active as during December, 1908, there was increased activity in other lines, notably among freight handlers and longshoremen. The mild weather which prevailed during the greater portion of the month enabled an amount of work to be carried on building operations which is not usual in December. Indications for 1910 at present are not bright for the building trade. During the past year there has been a large falling off in the issuing of permits as compared with 1908. Permits issued for the first eleven months of the year totalled 529, with a valuation of \$616,034 as against 605 permits, with a valuation of \$805,175 for the first eleven months of 1908. The figures of last year, however, were the largest for some years.

Work along the waterfront, while but fair during the first week of the month, increased greatly as the month progressed, and sent the record for December above that of the corresponding period of several years. In addition to the extra demands on the longshoremen for shipments of grain and apples, the S.S. Corinthian stranded on George's Island in the harbour on the 19th inst., and the greater part of her cargo of grain, lumber, etc., had to be removed.

The boilermakers, iron ship builders and helpers of Halifax and Dartmouth have organized a union.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Fishing has been for the most part light during the month so far as local fishermen were concerned, while along the coast in the vicinity of Shelburne the catches have been but small and irregular. The lobster season opened on the 15th December and while some fairly large fares were taken by local fishermen, no large exportations are reported. In Yarmouth however, on the 20th inst., one of the largest shipments on record was made, when 100,000 crustaceans were shipped to the Boston markets.

Manufacturing has been fairly active during the month, with *mining* and *lumbering* dull.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull. Carpenters were fairly well employed during the first half of the month, but were dull towards the end. Lathers were dull, with plasterers fairly busy. Painters, decorators and paper hangers were dull, but plumbers were busy and gas and steam fitters had a fair month. Stone cutters and builders' labourers were dull. Electrical workers had a fair month. Horseshoers were dull. Printers and pressmen had a busy month. Bookbinders were fairly busy. Tailors experienced a dull month, which is attributed mostly to the mild weather. Bakers and confectioners were busy. Butchers and meat cutters had a good

month. Furriers were busy. Maintenance of way employés and railway clerks had a fair month. Freight handlers and longshoremen experienced the best month for some time. Unskilled labourers were fairly well employed. Other lines were about up to the average for the season.

AMHERST, N. S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Taking weather conditions into consideration, labour has been fairly well employed. At the Canadian Car & Foundry Company, formerly Rhodes Curry & Company, the largest industry in town, work has been slack, but large quantities of iron material have been pouring in to the plant and the officials state that in a few weeks the shops will be running full time. In all the other industries work has been more brisk and everything points to an era of industrial expansion.

The McLean Milling Company's new quarters have been about completed and operations will be begun in January. This Company will manufacture different kinds of feed and flour.

Business both in the wholesale and retail trades was reported good.

The Maritime Winter Fair which was held here on December 6-10, brought a large number to the town and stimulated retail trade.

Wages remain about the same. There have been no strikes or disturbances of any kind other than that at Springhill which continues without apparent change.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Produce commands very high prices. The price of hay is steadily advancing and large quantities are being shipped to Newfoundland.

Lumbering.—The lumber industry is having a remarkable revival, especially among the smaller operators.

Manufacturing.—All industries, with the exception of the car works, were well employed.

Mining.—Mining was brisk except at Springhill where the strike still continues.

CONDITION OF PARTICULAR TRADES.

Bricklayers were fairly busy during the open weather that prevailed the first of the month, but are now idle and will probably continue so until the end of the winter. Steam fitters and plumbers were very busy. Moulders were busy in the majority of the shops. Machinists were well employed, with boilermakers busy and horseshoers very busy. Woodworkers were fairly well employed and upholsterers reported business dull. Car builders were largely out of employment, but pattern makers were very busy. Printers had a busy month. Tailors were well employed, with garment makers, boot and shoe workers, and trunk and bag workers very busy. Stenographers were well employed, and furriers were all working overtime. There were a number of unskilled labourers out of work or on odd jobs only.

CHARLOTTETOWN, P. E. I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during December, was the same as in November, with the supply somewhat less than the demand. Outdoor work was closed down for the season. In Charlottetown, the finishing touches were given to the new railway round-house, the Canadian Bank of Commerce and a number of lesser contracts. The usual volume of business was done during Christmas week, a timely snowfall having improved the travelling, thus improving trade in city and country. The shipping of produce was ended for the year, with the exception of that carried by a few steamers. Merchants, and bankers reported collections up to the average.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were normal. With high prices for almost every product the farmers had reason to view the situation optimistically.

Fishing.—The exceptionally mild weather during the greater part of the month was not favourable for the shipment of smelts and eels, a business which is carried on extensively during the winter. Frost at the close of the month came to improve the situation in this respect.

Manufacturing.—The few factories in this almost exclusively agricultural province, were conducted under usual conditions.

Railroad construction and employment.—With the exception of a short period near the close of the month, when the trains were delayed by a snow storm, there was no interruption to regular employment.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, lathers and plasterers, painters, stone cutters and builder's labourers had a dull month, but carpenters and joiners, plumbers, gas and steam fitters, were active. Other skilled trades were active and the demand for unskilled labour was well maintained.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during December continued in a healthy and active state. Mild weather the first half of the month favoured outdoor operations, and a large amount of inside finishing work on uncompleted contracts gave carpenters and builders a steady month. Ninety-one building permits valued at \$185,000 were issued during the year for fifty-four dwellings, nine stores one bank and twenty-four other building; 164 plum-

bing plans were also passed. In the suburbs about twenty-five dwellings were erected. The dearth of houses existing the past three years is thus relieved and rents are easier, with a better choice of houses. Manufacturing concerns are all in operation and with full staffs of operatives except some which are closed for annual stocktaking and repairs. The Enterprise Foundry Company, Sackville closed for stocktaking December 22nd, and will resume work June 3rd, 1910. This foundry was destroyed by fire July 1908, but was rebuilt on an enlarged scale and opened February 1909. The plant is one of the largest and most modern in the Maritime Provinces, special attention being given to labour saving devices and arrangements contributing to the employé's comfort. About 125 names are on the payroll which amounts to \$5,000 per month. Nearly all work in this factory is done by the piece and relations between management and operatives are cordial. The Charter held by the Moncton Electric Railway Heat and Power Company, has been sold to another company for \$10,000, and the building of a street railway is expected in the spring. The Customs returns showed imports for November at \$92,295 as compared with \$44,935 in November, 1908, and duties collected at \$7,599 against \$8,445 in 1908. Payments for construction on the National Transcontinental in New Brunswick for November amounted to \$376,564. The month was quiet, and certain branches of the work will necessarily be discontinued during winter; 141 miles of steel track are now laid on the various contracts, being about half of the New Brunswick mileage. On the International Railway about 1500 men have been employed and track is laid to the eighty-first mile. Retail trade has been good and wholesale fair the Canadian Brotherhood of Railway Employé's numbering about 3,000, employed mainly upon the Intercolonial Railway have decided to amalgamate with the Canadian Federation of Labour. The Brotherhood will continue its organization under their old name but will pay a per capita tax on each member to the Canadian Federation.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Caring for stock and marketing produce occupied the farmers, attention this month. Prices in all lines of produce ranged high, except for potatoes. Hay is plentiful, but the demand so far has been light. Pork sold at 10 cents per lb; chicken, 18 cents per lb; turkey, 24 to 28 cents; geese 20 cents per lb; dairy butter, 25 to 28 cents; creamery, 30 cents. Farmers' help was scarce. Youths who could adapt themselves to farming life would readily find work in the farming localities here.

Fishing.—Smelt fishing season opened December 1st, and some good catches were made along the shores and in the Miramichi waters. The outlook is much better than last season, which was a total failure. Prices are 5 to 6 cents per lb.

Lumbering.—Mild weather with much rain and lack of snow interrupted operations the first three weeks of the month. Snow falls since have much improved prospects and a cut equal to last season's is expected. Men were only fairly plentiful at wages \$24 to \$28 per month.

Mining.—The Maritime Oilfields Company Limited, while prospecting for oil sank two wells on the Albert Company's side of Petitcodiac River twelve miles from this city and at a depth of 750 feet struck natural gas. A mercury gauge adjusted to a two-inch stand pipe with a steady flow of gas registered 1,000,000 cubic feet in twenty-four hours from one well and 300,000 cubic feet from the other. Operations are suspended for the winter.

CONDITION OF PARTICULAR TRADES.

Carpenters and masons were in fair demand, with plumbers busy and stone cutters slack.

Artisans in the various metal trades all reported an average month, with fairly active conditions.

Employé's in the various woodworking factories were all busy during the month replenishing stock for next season's work. Upholsterers were busy, also varnishers and polishers. Carriage and wagon makers were dull. Barrel Factory employé's were slacker.

Active conditions prevailed in the printing and clothing trades.

Bakers and butchers were very active.

Leather workers were busy.

Barbers and clerks were active.

Theatre employés and laundry workers were very busy.

General passenger traffic being heavy and much special freight traffic moving created a good demand for train crews, and good time was made by many men. Telegraphers were busy, also carters, teamsters and expressmen.

Unskilled labour was in good demand owing to the mild weather and but few unemployed were noticed. Wages were \$1.30 to \$1.50 per day.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market improved during December, especially along the water front. Several of the mills have closed down for the winter, but a majority of the employés are working as ship labourers. Up to December 18, there were filed at the Custom House cargoes for twelve steamships, and the valuation totalled, \$2,097,588. Of this \$1,529,408 was the value of Canadian goods. The wheat shipments by the above vessels were 584,088 bushels, and the cattle shipments 1,238 head of Canadian cattle and sixteen head of American cattle. Bank clearings for the four weeks ending December 23, were \$6,184,160, and for the corresponding period last year \$5,574,288, being \$809,872 greater in 1909 than in 1908, and \$1,611,951 less than during the five weeks ending November 25, of the current year. The receipts at the Savings Bank during the month of November were \$50,938.27, and the withdrawals \$69,692.97. City employés and officials were paid \$20,480 by the city cashier for the four weeks ending December 24.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Beef cattle have been in great demand, but the supply has been

equal to it. The price has been from \$6 to \$7 per hundred pounds live weight. Dressed beef has been selling from five cents to seven cents per pound by the carcass, while local butchers charge fourteen cents per pound for steak and nine cents for roasts. Poultry has been plentiful and the prices good. Turkeys sold at twenty-eight cents per pound during the Christmas season, while the farmers received eighteen to twenty-three cents. Chickens have been netting the poultry men ten to twelve cents, ducks and geese brought twelve to sixteen cents. Beef hides are high, ten and one-half cents per pound being readily paid. Butter has remained steady at twenty-two to twenty-three cents. Eggs retail at twenty-eight cents. The price of potatoes is low, being in Hartland seventy-five cents per barrel and in Aroostook \$1 per barrel. Large quantities of hay are being shipped from Hartland and the price is \$10.25 to \$11.25 per ton. Oats remain at thirty-five cents per bushel.

CONDITION OF PARTICULAR TRADES.

The building trades were from quiet to dull, except in the case of plumbers who were active. The metal trades were active or busy. The printing and food trades were busy, but the clothing trades were quiet. Railway employés and long-shoremen were very busy, as were street railway men, teamsters, etc. Unskilled labour had a good month.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been active, though nearly all outside work for the present is about completed. The repairs to Harkin's Academy are about finished; in the vicinity of \$40,000 were put on it. Outside work has been very much delayed on account of wet weather. The river is still open, which is very un-

usual at this time of the year. A new curling and skating rink has been built this fall, and is now ready.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is not much activity at this season of the year, but prices for all kinds of produce have been high.

Fishing has not been very active, as there has not been enough frost. Only those who had scows could work. A number of nets went adrift, entailing a heavy loss to the fishermen. The price of smelts is high, the buyers paying from five to six cents per pound. A few fishermen have made good winter's wages already.

Lumbering.—The season has not been very good for operating. It has been almost impossible to get supplies in either for men or horses. The low ground is still too wet to work on.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month was somewhat duller for labour than November. Two heavy snowfalls gave a considerable amount of employment to snow shovellers and carters who would otherwise have been out of work. Navigation closed on or about December 5. The steamer *Sundt* with a cargo of coal from Cleveland, Ohio, arrived on December 1 and was the last steamer from up the river. The last steamer for Europe left on December 3, and the last of the Nova Scotia colliers on the fourth. The steamer *Montcalm* left for Seven Islands on the eighteenth returning on the twenty-third. The keels have been laid for the construction of two steel ferry boats to ply between Quebec and Levis. Several iron vessels were in the docks for repairs; the iron ship-building trade will accordingly be fairly active until the spring. The merger of the gas, electric light and power companies will throw a number of men out of

work. The price of gas was advanced from \$1.20 to \$1.50 per 1,000 feet. Work has been started on the approaches for the Quebec bridge. Employés of the Jacques Cartier Gas Company and the Frontenac Gas Company were presented with a bonus amounting to \$4,000.

About 100 labourers, in the employ of the Harbour Commissioners, were discharged on the twenty-seventh instant. Some of these men have been working for the commission for nine years past.

The result of the two day's voting in Limoilou on the By-Law for the annexation of that Municipality to the City of Quebec was concluded on the thirtieth instant. The total vote polled was 439, and of these 308 were in favour of annexation and 131 against.

The price of provisions in this City are high at present: Turkeys, 24 to 25 cents per pound; fowl, 90 cents apiece; eggs, 50 cents per dozen; butter, 28 to 30 cents per pound; potatoes, 50 cents per bushel.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Market prices were very high, turkeys bringing 22 cents per lb.; hogs, dressed, \$12 to \$13 per cwt.; beef, per quarter, 7 to 8 cents per lb.; mutton by the carcass, 10 to 12 cents per lb.; eggs, 60 cents per dozen; butter, from 26 to 30 cents per lb.

Lumbering.—The snowfall has rendered conditions very favourable for logging.

Railway construction.—The extension of the Quebec Central Railway in Beauce and Dorchester counties was completed and inspected prior to being opened for traffic in January. The extension is over twenty miles long.

CONDITION OF PARTICULAR TRADES.

The building trades were dull, though carpenters and painters had a good month. The metal trades were generally quiet; boilermakers, shipbuilders, electric workers and linemen were active. The printing and clothing trades were from active to busy. Food and tobacco preparation trades were busy, but ice

cutters were still dull. Furriers, delivery employés, etc., were very busy, but hotel, restaurant and laundry workers were quiet. Railway employés had an active month, with street car employés quiet and cab drivers, hackmen, etc. dull. The supply of unskilled labour was in excess of the demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was fairly active during December, wholesale and retail merchants being well employed. The building trades continued active on account of the fine weather prevailing. Trade in general was fairly good. Rates of wages remained the same, and the best of understanding prevailed between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy selling and carting farm and dairy produce which sold well at good prices.

Fishing.—The "Tommy" cod has not made its appearance yet.

Lumbering.—The lumber mills were closed, but sash and door factories were running to full capacity as a consequence of the activity in the building trade.

Manufacturing.—Factories were well employed.

Railroad construction.—Railroad construction was rather quiet this month.

The Canada Iron Corporation has decided to rebuild its large foundry burned down last month, and has succeeded in getting a reduction in taxes from the city.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, decorators and paper hangers have been very busy, also plumbers, gas and steam fitters and builders' labourers.

The metal trades had a quiet month, except blacksmiths and horseshoers who were active.

Woodworkers and carriage and wagon makers were busy.

The printing and allied trades had a rather quiet month.

Journeymen tailors, garment workers and glove makers were busy, but boot and shoe workers were not quite so busy as the others though they had a fair month.

Bakers and confectioners, butchers and meat cutters and cigar makers were well employed, but ice cutters and drivers have not yet begun work this winter.

Barbers were kept busy. Clerks, stenographers, delivery employés, furriers, hotel and restaurant employés and laundry workers had all plenty to do.

Railroad employés reported a fairly busy month. Cab drivers and hackmen report a quieter December than last year, but teamsters and expressmen were well employed.

There was less demand for unskilled labour than during the previous month, but about the same as last December.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Business generally has been very good during the month of December. There was a certain amount of broken time with those on outside work, but not nearly so much as in past years, the weather being very mild until the last of the month. The machine shops and all other industries are running full time, and the Jenckes' Machine Company has orders now in hand which will keep it going all winter. Prospects are far better than at the same period last year. The secretary-treasurer of the city is several thousand dollars ahead of the same period last year. This is an excellent indication of working conditions, as there are few cities of its size where more property is held by the working men than in Sherbrooke.

A by-law will be submitted to the people whereby the city enters into an agreement with the Sherbrooke Street Railway for a period of forty years. The city will give exemption from taxes for twenty years and at the end of that period has the option of taking over the road. If the measure meets with the approval of the citizens, the company will extend its system in the city and to outside points. It is the intention to spend about half a million dollars next summer on the road.

Christmas trade was very good, and retailers reported a good turnover.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The demand for pulp wood is not so good as was anticipated at the beginning of the season, but there are a number of men employed in the woods.

Manufacturing.—All branches were fully employed. The woollen mills are advertising for help and the carpet company has just secured several large orders.

Railroad construction.—Work is at a standstill.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet, though carpenters and joiners were active on inside work. Machinists, moulders and iron workers were busy. Woodworkers, upholsterers and carriage makers were active, with pattern makers busy. Printers and book binders were active, and journeymen tailors and garment workers were busy. Bakers and confectioners busy, with cigar makers active. All miscellaneous trades were active. Railroad men, especially freight handlers were quiet, but street railway men busy. Unskilled labour was in good demand.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. V. Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was active in December and industrial conditions were

excellent. The fine weather prevailing during the greater portion of the month permitted outdoor work to be continued much later than usual. The building trades, which at this season of the year are generally quiet, were more active than in the corresponding months of former years. Sash and door factories were fairly active. The work on the cathedral was being actively pursued, a considerable number of workmen being employed. Conditions were quiet in the metal trades. The musical instrument factory had a busy month. The leather industry was very active. Garment working and woollen factories worked with full staffs. Negotiations were in progress looking to the opening of a new boot and shoe factory. Wholesale and retail merchants reported a good month. Banks reported a fair month with easy collections. There were no changes in wages nor hours.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Favourable conditions prevailed. Farm products sold well with stiffening prices. Butter was sold at from twenty-six to twenty-seven cents per pound and eggs at from thirty-five to forty cents per dozen. There was an abundance of farm work, and farm hands were busy, but the supply was equal to the demand.

CONDITION OF PARTICULAR TRADES.

Plasterers, painters, plumbers, gas and steam fitters were active; the other branches of the building trades were well employed. The metal trades were busy and the woodworking trades active. A satisfactory month was reported by the printing trades. The clothing, food and tobacco preparation, leather and miscellaneous branches had an active month. Railway employés were fairly busy. Unskilled labour was fairly well employed, there being very little idleness.

DISTRICT NOTES.

Sorel.—The steamers *Montmorency*, *Maisonneuve*, *Alpha* and *Hosanna* of the fleet of the Department of Marine were

docked at St. Joseph and will undergo repairs during the winter. Messrs. Beauchemin and Sons have built an important addition to their establishment, and are installing a foundry plant. A large parcel of land was purchased by this firm and over \$40,000 will be expended on machinery. A large steel stone lifter is being built by the Marine Department. This vessel will be furnished with powerful machinery enabling it to break shale and rock in the bed of the river at a depth of forty-five feet. A new steel dredge was also commenced in the yards of the Department. It will be of steel, 180 feet long by forty in width, and fourteen feet in depth. All of the dredging fleet of the Department have gone into winter quarters at Sorel and over 600 men are employed on repairs,

ST. JOHNS, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

On the whole activity prevailed. Work on the Canadian Pacific Railway bridge went forward briskly. The Government shipyards were busy repairing the dredges to be used in deepening the Richelieu river. Building operations slackened somewhat, but conditions were more favourable than at the same time last year. The Standard Drain Pipe factory worked five days per week overtime and this will continue in order to replenish stock. At the potteries also overtime was worked. No holidays will be given this year in these establishments which were running to full capacity. Merchants reported more business than last year, and banks had a good month. No changes occurred in wages or hours, and friendly relations existed between capital and labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy marketing their produce which brought high prices. During the Christmas sea-

son turkeys were selling at from 27 to 30 cents per lb; chickens from 90 cents to \$1.00 per pair; beef from \$7.50 to \$8.00 per 100 lb; fresh pork from \$12.50 to \$13. per 100 lb; fresh eggs 40 cents per dozen; butter 27 cents per lb; potatoes from 50 to 60 cents per bag; apples from \$3.50 to \$4. per barrel.

Manufacturing.—The canning factory became more quiet but on the other hand the Molleur factory engaged all the young girls and women who worked in the cannery, and overtime was being worked in this establishment.

CONDITION OF PARTICULAR TRADES.

Carpenters, joiners, painters, paper hangers, plumbers, gas and steam fitters had a fair month but the other building trades were dull. Electrical workers and linemen were quiet; the other metal trades were active, with woodworkers very active. The printing and allied trades had an active month. More satisfactory conditions than were prevalent during December, 1908, were reported by the clothing trades. The miscellaneous and transport trades were well employed, no hands being idle.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity in the labour market was well maintained during December, especially in the building trades, in which all branches except stone masons' (who nevertheless had a better month than in the corresponding period of 1908) were very active. Workers in the other trades appeared satisfied, having been well employed with the exception of day labourers. With the last class inactivity prevails every winter, not so much on account of the scarcity of labour as owing to the large number of labourers who work outside of Montreal and Maisonneuve during summer and return to these localities in the winter. A viaduct which will give employment to a number of men has been

commenced in St. Louis. Builders' labourers had their wages decreased by two cents per hour during Christmas week.

CONDITION OF PARTICULAR TRADES.

With the exception of stonemasons, whose quiet season had commenced, the building trades generally were well employed. Moulders, iron workers, machinists, electrical workers, blacksmiths, roofers and horseshoers were well employed. Shipwrights were active; the other branches of the metal trades were quiet. Active conditions were reported by woodworkers and by the printing trades. Workers in the clothing trades were in demand. An increase in activity was reported by those engaged in food and tobacco preparation. The leather, miscellaneous and transport trades were well employed. Unskilled labour was quiet.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Trade and commerce during December were active; an increase of twenty-five per cent. in turnover was reported over that of the corresponding period of 1908.

The annual report of the Building Inspector showed an increase of \$3,055,320 in building operations in 1909 compared to 1908. The number of building permits was 2,359 in 1909 against 1,756 in 1908. In the month of November 1909, 124 building permits were issued valued at \$425,855 compared with 103 permits valued at \$264,610 in the same month last year.

The statistics of the Lachine Canal again show an increase in traffic. The number of vessels visiting this port have doubled; 23,000,000 bushels of wheat were carried. The returns show that a total tonnage of 1,790,056 tons passed through the canal this season.

The fire department has published its report showing that the firemen

answered 1,689 alarms during the calendar year. Nine people lost their lives in fires during 1908.

During the seven months of navigation, between May and November the receipts derived from customs duties on imports showed an increase of \$2,012,005 compared with the corresponding period of 1908.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The month was one of the best of the year insofar as the sale of farm products was concerned.

Manufacturing was generally active.

Railway construction was quiet.

CONDITION OF PARTICULAR TRADES.

The building, woodworking, printing, clothing, leather and miscellaneous trades were active. Ship builders and shipwrights were dull; the other branches of the metal trades were well employed. Cigar makers had a good month. Railway and street car employés were active, as were also hackmen, carters, etc. Unskilled labour was quiet.

HULL, QUE., AND DISTRICT.

Mr. Rod. Laferriere, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in the month just past has been very active, judging by the demand for additional labour. Factories were working full time and there was a scarcity of hands in several large establishments. The Woods Company was in need of 200 girls at from \$5 to \$10 per week. The Laurentide Mica Company was also short a couple of hundred hands at from 60 cents to \$2 per day. The only ones without work at the close of the season were the shipbuilders at the Ottawa Transportation Company's yards, about a dozen men all told. There were no repairs and no new construction on hand, and for the first time in many years the men were laid off, but only for about one month. Although the season

has not given the customary employment to snow shovellers, there does not seem to be an oversupply of men in that class. At the Eddy shop, contrary to the usual custom at this time of the year, very few of the workmen have been laid off, and those secured employment elsewhere.

The general condition of affairs in this city may be exemplified by giving the opinion expressed by leading business men, bankers and others to the correspondent of the *Labour Gazette*. Mr. J. A. Pharand, said that his cash business so far is 33 1-3 per cent. ahead of last year. Caron, Carriere and Company, dry goods merchants, stated that the month of November was well ahead of last year's but that the mild weather at the end of the year caused the high average to decline in December; however, they noticed that there was plenty of money in circulation and that there was plenty of labour for all who cared to work. Messrs. P. D'Aoust & Company, grocers, stated that business was much better than last year at this time. Mr. Martel, grocer, was of the same opinion. Bankers as well as the City Treasurer, declared that collections have been easier and in excess of last year at the same date. The St. Vincent de Paul society and other charitable institutions have so far had practically no cases for support.

Several corporation contracts were under way giving employment to a couple of hundred hands at high wages. Construction trades were generally busy, several buildings being under way.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The amount of money paid out by the Ottawa Electric Railway Company, and the corporation of Ottawa for snow shovelling was much smaller in December than in the corresponding month of the previous year. One storm, on December 14, necessitated an expenditure of \$5,000 by the street railway and \$500

by the city, but the absence of snow storms was not regretted by nearly so many job seekers as would have been the case in most years. The last sawmill did not close until December 4. Mills of the Ottawa valley ran five or six weeks later into the season than they did in 1908. Money was plentiful for Christmas buying. The satisfactory condition of the people was reflected in City Tax Collector's annual statement of receipts, which showed only \$11,834 arrears. Ninety-two per cent. of the general taxes and 95 ninety-five per cent. of the water rates were paid up promptly enough to secure the discount provided. Merchants report the month exceptionally favourable for collections and the increase of several thousands of dollars in the revenue of the Ottawa Customs port showed an improvement in trade over the Christmas period of last year. A representative week's bank clearings were \$3,430,896 or \$300,000 more than the corresponding days of 1908. Though the farmers spent money with caution this was due more to their desire to recover completely from losses sustained during the trade depression preceding the last season than to any present stringency. Commercial men of Ottawa report the financial situation satisfactory for both the past month and the past year.

The Upper Ottawa Improvement Company which has charge of the drive on the Ottawa river and its tributaries reports the season of 1909 to have been the largest on record for the handling of sawlogs and pulp wood.

Allowing for the set back to manufacture caused by floods during six weeks of the early summer, the production of lumber in the Ottawa valley is at least as large as in 1908. This is approximately 500 million feet. With prices ranging from \$5 to \$8 higher for the upper grades of white pine the cut is worth considerably more. All the best classes of white pine sidings, shorts and strips are sold up as well as telegraph poles and railway ties. The only lumber held in large quantities is box and cull varieties so there is encouragement for extensive operations in the woods. The usual large exodus of men from the

shanties occurred at Christmas, but most of them were replaced. The wages did not alter materially but lumbermen had a chance to pick their hands.

Mr. J. R. Booth has completed a card-board mill at a cost of \$235,000 with a capacity of forty tons per day. It will begin operations about the middle of January. He is also building a new pulp mill to contain twelve grinders which will eventually increase his output eighty per cent.

The weather has been favourable for the work on the Grand Trunk Railway station and hotel where 225 men are employed. This is the chief source of extra employment compared with last winter. It is stated that the station will be ready next autumn and the hotel a year later.

The Carleton council at its December meeting arranged to begin work in the spring on the improvement of 300 miles of road in the county. The intention is to spend \$30,000 a year of the \$300,000 which is to be laid out. The provincial government pays one-third of the cost.

The strike of seventy leather workers affecting four Ottawa shops which began on October 4, continues. The Local International Union which declared the strike claims that only five men have gone back to work and the employers state that their business is not seriously affected. The union reports the receipt of \$3,000 in strike pay from international headquarters. The Hugh Carson Company one of the harness makers was prosecuted in the police court for an alleged violation of the Alien Labour Act, based on the charge that it had imported from New York, an American leather worker to fill the place of one of the the strikers. The case was dismissed by Magistrate O'Keefe on the ground that it was not shown that any contract of a binding nature had been made with the workman before his arrival in Canada. The workman had come as a result of correspondence with the Company's representative, but having learned of the strike refused to take the position.

A strike of one day's duration occurred in the foundry of MacFarlane and

Douglas when some fifty or sixty men stopped work as a protest against a worker whom they said was behind in his union dues. The employer stated that he was asked to deduct the union fees from the worker's wages but refused.

A strike declared by the local stage hands union in the Grand Opera House against the wages paid by the lessee came to an end January 1st, when the theatre passed over to new management. The union stated that five employes were called out. The stage hands were receiving from \$6 to \$10 per week, while the union wage is from \$10 to \$16. The employer denied that he had refused any demand of the union either as to wages or class of help.

An evidence of the friendship existing between the workmen and employers was shown at Christmas when the Ottawa Electric Railway Company gave to each of its men, chiefly motormen and conductors, a present of \$2, and larger gifts to the higher officers.

The Trained Nurses Association of Ottawa, including eighty-three members, has increased rates from \$15 to \$18 per week, claiming that this is the scale in most other cities. Some twenty other nurses will be benefited by the change.

The civic corporation closed a contract for its supply of coal for \$6.65 a ton with the Connell Coal Company, compared with \$7.15 with another company last year. For private consumption the price is \$7.25 a ton, the same as last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers employed the agreeable weather during December in marketing produce. Butchering was general in the Ottawa district. Butter and meats are at the same prices as a month ago except that turkeys fluctuated from 20 cents to 25 cents per pound retail at Christmas. Fresh eggs sold at fifty cents per dozen, and are very scarce. The mild weather has been favourable to dairy cattle, and milk is more plentiful than a year ago.

Lumbering.—Road making for the hauling of lumber was delayed in the woods by lack of frost. For the same

reason repair work on the Ottawa river improvements for driving purposes was hindered as workmen never begin until the river freezes over. Anchor ice and snow hindered shipping and manufacture at some of the pulp and paper plants but shanty operations generally were helped by the light winter.

Manufacturing.—The manufacturing of men's rough clothes created a demand for factory girls in Ottawa. Other lines of manufactures are steady.

Railroad construction and employment.—The Canadian Northern Railway Company has begun running trains into Ottawa connecting the city with Quebec. The Christmas passenger traffic was heavy on all the railways. Railway companies are busy repairing damage caused by the November storm which destroyed several thousand telegraph poles. The demand for these poles has increased prices a dollar each.

CONDITION OF PARTICULAR TRADES.

Plumbers and steam fitters were busy. Other building trades were quiet. Electric workers and linemen were busy. Other metal trades were steadily employed. Jewellers were very busy. Woodworking trades were steadily employed. The printing trades were busy. Machine operators on men's and women's clothes were busy. Butchers and ice cutters were busy. Other food trades were quiet. Clerks were busy, stenographers quiet. Furriers rushed and theatre employés quiet. Railway employés were well employed and street railway hands were busy. Delivery employés were busy. Unskilled labour was quiet.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

December 1909 was a very active month from an industrial standpoint in Kingston. Merchants, encouraged by

the steady growth of business, made extra large importations, and reported large sales as a result. According to reports from reliable sources the Christmas trade of this year was much better than that of 1908. The people not only bought more largely, but called for superior goods, and did their buying much earlier this year. Farmers and others encouraged by the cheap holiday rates on the various lines came to the city in large numbers and made heavy purchases. At the general post office the Christmas Day mail was twenty-five per cent. greater than that of a year ago. The carriers also had double loads on the following Monday.

The passenger traffic over the Canadian Pacific Railway, the Grand Trunk Railway, the Bay of Quinte and Kingston and Pembroke railways during the Christmas rush was very heavy.

The following are the student registrations in the various facilities of Queens University for the season of 1909-10 as compared with the session of 1908-09:

	1908-9	1909-10
Undergraduates, Arts (in attendance)	439	475
Post graduates, Arts, (in attendance)	19	30
Undergraduates (Extra normal)	318	410
Post-Graduates, Arts, (Extra normal)	21	28
Candidates for B. Paid and D. Paid	25	14
Students, Theology	29	25
Students, Practical Science	292	310
Students, Medicine	210	218
Students, Education	56	43
Registered in two faculties	56	56
Total students	1,351	15,17
Increase over preceeding year		166

The continued fine weather during almost the entire month, allowed building operations to be continued without interruption. Reports from the City Engineer, and assistant City Engineer indicate that during 1909, nearly half a million dollars worth of building construction was undertaken in Kingston. The City Engineer reported that from January 1st to December 1st, the number of permits issued from his office was 476, permits for new buildings 106, plumbing permits 242, plumbing fees collected \$360; drain permits issued 158. In all 875 permits were issued during the eleven months, and 600 inspections were made. The estimated cost of construction was as follows: New buildings, \$375,000; re-building, \$50,500, additions \$9,250; re-

pairs \$12,945; total \$447,695. This estimate is said to be low, and that the actual cost would easily total \$500,000. In 1908,, there seventy-eight new buildings as against 106 in 1909. The engineer again recommended that hereafter a fee be charged for building and drain permits and also that contractors be required to file a statement as to the estimated cost of each structure. He also recommended that a plumbing inspector be appointed.

On the 17th of December, the Board of Works held its final meeting. Seven and one-eighth miles of concrete walks were laid during the year at a cost of \$5,000. Less than six and a half miles were laid last year. Half a mile of limestone macadam road was constructed out of the year's appropriation.

It was decided to buy necessary land for street extensions. The engineer not only presented a comprehensive report of the year's work on the streets but also recommended that the land breaking of stone by poor men in the city during the winter be continued, as hand broken stone is better than machine broken stone. One mile of road was treated with three coats of oil (1,500 gallons), at a cost of \$131.52 and the results proved very satisfactory. He advised that all recently reconstructed roads be treated with oil having an asphaltic base during the coming year. The cost would be \$300 to \$400 more than to use water, but the dust nuisance would be abated to a greater extent, and the wear and tear would be reduced. In Kingston the total mileage of walk is fifty-five. There are now forty-one miles of permanent walks, so that only fourteen miles of boardwalk remain to be replaced. There were twenty-six asphalt crossings constructed during the year and considerable other asphalt repair work was done.

At a joint meeting of the City Council and the Board of Trade they decided to co-operate in the expenses of interviewing manufacturers with a view to securing the location of new industries here.

The manager of the city light, heat and power works, reported that this year there were 248 new gas services installed, the largest number in one year since the

plant was started. There were 10,490 feet of mains laid. The number of new electrical services installed this year was 112. The business of the plant had increased rapidly during the year 1909. The manager also drew attention to the fact that within a few months a by-law will have to be sanctioned by the rate-payers for the expenditure of \$30,000 for renewals to the plant.

At a meeting of the waterworks committee the superintendent was authorized to call for tenders for timber for repairing the waterworks wharf, the committee decided to do the repairs by day labour under the direction of the superintendent.

Marine transportation continued until near the end of the month. By the end of the month nearly every boat was tied up, and large numbers of mariners had returned home for the holiday season. Nearly all reported a successful and profitable season. The management of the local transportation company's report a very good season, notwithstanding the summer shortage in grain. The fall shipments turned out large. Package freight was heavier this year than ever before. The coal trade closed during the month, after a successful season, navigation on the Rideau canal also closed during the month. The various boats reported a fair season.

The following are the total quantities of grain, coal, ore, flour, merchandise, etc., that arrive at the port of Kingston by vessel during the season of navigation in 1909 up to December 1st.

Grain from the west, 10,906,784 bushels, or over 3,000,000 less than last year. Coal, 17,295 tons; iron ore, 1,824 tons. Flour, 1,349 tons; mill products, 245 tons; salt, 65 tons; merchandise, 129 tons. Tonnage of vessels from Kingston to Montreal: steam 27,990 tons; barges 115,528 tons.

The above quantities of materials constitute 303 cargoes.

During the month the Dominion Government granted a lease of its dry-dock at Kingston, to the Kingston Shipbuilding Company (recently organized). The Company will have a capital of \$500,000. It will pay a rental of \$10,000 a year for the dock, and the lease will run for twenty-one years. The lease of the dock will be a decided advantage to Kingston. It is expected that very shortly there will be

fifty men at work, and that in a year or two the staff will number from two to three hundred men. Although the lease does not commence until April 15th, 1910, the Company will begin at once to install a new plant. At least \$50,000 will have been expended by next summer and when the work is completed in a couple of years, it is expected the plant will be worth \$150,000 in addition to the original cost of the dry-dock, and former equipping.

The hope of the Company is to develop a business here which in the past has been impossible for want of proper repairing facilities. For instance, the package freighters alone should help support the dock. There are now thirty or forty of these large freighters running from the upper lake ports to Montreal and they are a class of vessel that are in more danger than any other. Kingston is the right place to receive and repair them.

Under present arrangements at the government dry-dock the superintendent reports that more work will be done to the government boats this winter than usual. The government is rebuilding a dredge, two scows and a tug. Twenty men will be employed all winter, at the various trades.

The prices quoted on the Kingston market for Christmas produce were as follows:—

Eggs—new laid, 40 to 50 cents per dozen; butter, 23 to 25 cents per pound, farmers' butter, in prints, 25 cents; packed 24 cents; rolls, 24 cents; tubs, 23 cents.

Vegetables.—Carrots, 50 cents a bushel; apples, \$1 a bushel; turnips, 65 cents a bag; cabbage, 50 cents a dozen; onions, \$1 a bag; potatoes, 50 cents per bag. Beef, by carcass, 14½ to 15½ cents; cuts, 6 to 15 cents; pork, 11½ cents by carcass; lamb, 10 cents by carcass; live hogs, 8 cents per pound; turkeys, 17 cents to 25 cents per pound; chickens, 60 cents to \$1.25 per pair; mutton, 9 cents per pound; lamb, 12 to 14 cents per pound; ducks, \$1.00 to \$1.65 per pair; geese, \$1.00 to \$1.50 each.

Grain.—Oats, 39 to 40 cents; local wheat, 98 cents; buckwheat, 70 cents; barley, 55 to 70 cents; rye, 65 cents; peas, 85 cents; old corn, 80 cents; flour, baker's \$3.00 to \$3.40; farmers, \$3.00 to \$3.15; Hungarian patent, \$3.10 to \$3.30; oatmeal and rolled oats, \$3.40 to \$3.50; cornmeal, \$2.00 to \$2.10; bran, \$24 per ton; shorts, \$26 to \$27 per ton; straw, \$10.00 to \$11.00; hay, loose \$14.00 to \$15.00; pressed \$14.00 to \$15.00; salmon trout, 12½ cents per pound; skinned Digby herring, 20 cents per pound; whitefish, 12½ cents per pound; pike, 10 cents per pound; Chinook salmon, 30 cents per pound; kippered herring, Yarmouth bloaters, 40 cents per dozen; perch, 30 cents per dozen; frogs' legs, 40 cents per dozen; Atlantic salmon, 30 cents per pound; salt codfish, 7 to 15 cents per pound; halibut, 20 cents per pound; fresh haddock, 10 cents per pound; bullheads, 12½ cents per pound; red herring, 20 cents per box; mackerel, 15 cents

per pound; lake herring, 8 cents per pound; finnan haddie, 10 to 12½ cents per pound; fresh lobsters, 25 cents per pound; sea bass, 12½ cents per pound; pickerel, 12½ cents per pound; mackerel, 15 cents per pound.

Commencing on January 18th, 1910, the leading stores of the city are to close each day, with the exception of Saturday, at 5 o'clock. This is to be given a trial until the end of March, and if found to be satisfactory will be carried out all through the year.

There were no changes in the rates of wages or hours of labour and no strikes or lockouts reported. The strike reported between A. McMahon and Company and eight painters was finally settled, the firm agreeing to employ union men upon its contracts. One employé who remained at work during the difficulty paid into the union a fine of \$25.00 and back dues, etc., amounting to \$10.00 or \$15 as part of the settlement.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were rather quiet having largely disposed of their crops at good prices. The work of the month consisted largely of hauling wood, lumber, hay, grain, etc., to market and getting out wood for next year's consumption. A number of successful agricultural, dairying and other society meetings were held during the month.

Fishing while not an important factor was slightly improved as compared with last month.

Lumbering was more active. A number of gangs of choppers etc., having been organized for the woods.

Manufacturing, railroad construction, mining and other industries were fairly active.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering and shipbuilding trades were more active than at the corresponding period last year. Woodworkers and furnishers reported a busy month. Printers and pressmen had an active month. Journeymen tailors were quiet, but ready-made clothiers reported an active month. Bakers, butchers, cigar makers, tanners, barbers, broom makers, clerks, delivery

employés, furriers, hotel, restaurant, laundry employés and all branches of transport business as well as unskilled labour reported an active month.

DISTRICT NOTES.

Frontenac.—During the month the county council instructed the treasurer to write off his books all accounts in dispute with township councils regarding the county poor in the city institutions.

The same grants were made to the Kingston charitable institutions as last year, as follows:—General Hospital \$1,000; Hotel Dieu \$700; Infants' Home \$150; Orphans Home \$100.

Newborough.—With respect to the summer trade in this locality it is stated on reliable authority that tourist's left over \$40,000 in the village last season. This is but one of many resorts in this district.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of December this year was the best for labour in many years. There were very few idle men to be seen. The weather was mild and most favourable for outside work. Not a factory or workshop closed down during the month but on the contrary all were working full time with a full staff of workmen. It is conceded by all that the city and district were never in a better condition. The Belleville Hardware Company had to work three nights a week to keep up with orders. Several other industries had their staffs working overtime. Both the cement plants were working full time giving employment to a large force of men. The rolling mills were very busy. Building operations were brisk, the \$45,000 addition to the county court building gave employment to many skilled and unskilled men. Merchants generally reported a splendid business. It might be mentioned that not a failure

has taken place here during the past year. Banks report the money market excellent. There were no strikes or changes in wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are now devoting their time to butter making and getting in their winter's supply of fuel.

Fishing was dull, only rough fish being caught.

Lumbering was inactive in this district.

Manufacturing was active in all local branches.

Mining was very active throughout the county.

Railroad construction was dull.

CONDITION OF PARTICULAR TRADES.

Those employed in the building trades had an unusually active month as the mild weather permitted outside work to proceed.

Iron moulders, iron workers and helpers, machinists, electrical workers, brass workers, blacksmiths, boilermakers and horseshoers all had an active month.

All branches of the woodworking trades were fairly employed, all the factories running full time. Outside orders were plentiful.

Both news and job printers had a very busy month owing to the Christmas advertising. Machine men, pressmen and bookbinders were also busy.

Journeymen tailors were all very active and many shops worked overtime to fill Christmas orders.

Bakers and confectioners, butchers and meatcutters and cigar makers had an active month.

Harness makers were all employed.

Bakers, clerks, stenographers, delivery employés, furriers, hotel, restaurant, theatre employés and laundry workers had a very active month.

Railway conductors, engineers, firemen, switchmen and freight handlers were all engaged. Cab drivers, hackmen, carters, draymen, teamsters and expressmen were all active.

Unskilled labour was in good demand.

PETERBOROUGH, ONT., AND
DISTRICT.

Mr. J. Arthur Sharp, correspondent,
reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

Labour generally was well employed during the month, being more active than at the corresponding month last year. The mild weather during the first part of the month was favourable to the building trades, which were unusually active for the season. Indoor workers will have employment the greater part of the winter. Last month showed a falling off in permits for building over the same month last year. November 1908, saw building permits issued to the amount of \$25,525, while this year the amount was only \$15,275. During the past year five new churches have been erected or were begun; a rough estimate of the cost of these buildings is \$155,000. The Wm. Hamilton Company has been awarded the contract for a new set of pumps for the City of Hull. The Colonial Wearing Company has received two car loads of new machines and will add considerably to the capacity of its factory.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy with fall ploughing the first part of the month and later with shipping grain. They got very good prices for fowl. Turkeys sold for 30 cents per lb, and geese and chickens were correspondingly high.

Lumbering.—Fairly active conditions prevailed.

Manufacturing.—The factories were all running steadily with full staffs of employés.

CONDITION OF PARTICULAR TRADES.

The building trades had a fairly good month though no very large operations were going on.

Iron moulders had a fair month. Machinists, engineers, electrical workers and brass workers were busy.

Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers were active. Coopers were busy.

Printers and bookbinders were active and journeymen tailors were busy.

Bakers and confectioners had a very busy month.

Railroad employés were well employed as is usual at this time of the year.

Unskilled labour has been active until the latter part of the month.

DISTRICT NOTES.

Cobourg.—M. Jex & Company began work on a one hundred and thirty-five foot addition to the Provincial Steel Company's plant here.

A small army of men are now engaged in construction work on the new Canadian Northern Railway line east of here, and the work is being rapidly pushed.

TORONTO, ONT., AND
DISTRICT.

Mr. Phillips Thompson, correspondent,
reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

During December skilled labour generally was in active demand and few out of employment excepting those whose occupations are suspended during the winter. A large number of labourers engaged in street paving and sidewalk construction were laid off early in the month, and outdoor work on buildings was generally discontinued. The unemployed are much fewer than during recent winters, and the problem of providing for cases of hardship will be considerably less difficult. The Christmas trade was unusually heavy and put much money in circulation, as well as affording temporary employment to a large number as extra help.

Building permits were issued during November to the number of 650, representing an approximate value of \$1,940,650 as against 412 permits, representing an approximate value of \$1,359,749 for November 1908.

The Toronto General Trusts Corporation has obtained a permit for an eight-storey office buildings 104 feet high, and another has been granted to the Standard Bank for a seven-storey bank and office building, 103 feet high. The Board of Control granted these permits on the condition that the buildings are to be constructed with metal sashes and frames and furnished with auxiliary pumps and special fire extinguishing appliances.

The Board of Education has established night classes for manual training and domestic science which are open two hours for three nights each week, in Queen Alexandra and Dawson street schools, the teachers being paid \$2.25 per night for the extra service.

The Toronto Ferry Company has given a contract to the Polson Company for a large new ferry boat, 185 feet in length by forty-four feet beam, to carry 2,200 passengers. The cost will be about \$80,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were occupied mainly with the care of stock and marketing produce. Before Christmas unusually high prices were obtained for turkeys and other fowl, and market conditions generally throughout the month were very favourable.

Manufacturing.—Factories have as a rule been busy with plenty of orders and prospects of steady work for some time to come. The good harvest in the West and the continued influx of immigrants has had a stimulating influence upon manufacturing industry.

The city has awarded a contract for 2,000 lengths of twelve-inch cast iron pipe at \$16.75 per length or \$33,500 in all, to the Canada Foundry Company. The Canada Foundry Company is building an addition to their machine shop on King street East, to cost \$12,000.

The Toronto Bolt and Forging Company is included in the merger of several bolt and nut companies representing in all, about \$1,000,000 capital under the name of the Canada Bolt and Nut Company Limited. As a result of the merger

it is proposed to make extensive additions to the Swansea plant.

CONDITION OF PARTICULAR TRADES.

The building trades were generally quiet, owing to the season, but a number of unfinished contracts will give employment for some time to indoor workers. The Slate & Tile Roofers Union has been organized in affiliation with the American Federation of Labour.

Blacksmiths, boiler makers, moulders, machinists, structural steel workers and electrical workers had plenty of work. Jewelers and silversmiths were busy.

Furniture workers, cabinet makers and upholsterers were active. Carriage makers, coopers and piano workers had steady work.

Printers and allied trades were well employed. The Pressmen's Union organized by seceders from the International body has been recognized by the latter as an independent organization.

Custom tailors, garment workers, furriers had and cap workers and boot and shoe workers had a busy month.

The provision trades were active. Cigar makers had a good month.

Leather workers had continuous employment.

Hotel and restaurant help, barbers and laundry workers were busy, especially during the holiday season. Clerks, salesmen, bookkeepers, delivery men and all connected with the retail trade were very busy.

Railway and street railway men, expressmen and teamsters were busy.

Unskilled labour was not so well employed as last month, many being out of work.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The year closed with conditions generally satisfactory in industrial circles and a very good outlook for the new year.

The Ontario Power Company further increased the number of labourers employed on its extension works. The Hydro-Electric transforming station was made ready for the roof. The new library building was practically finished. Architects report much building in prospect for 1910. Retail merchants expressed some disappointment at the volume of holiday trade.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing concerns were generally active. Iron working plants were busy. The new corrugated paper factory, now ready to commence work, will employ a considerable number of men and an extension of the plant is planned.

CONDITION OF PARTICULAR TRADES.

There was a temporary demand for bricklayers, but employment for this class of men will be less active before Spring. Carpenters, and plumbers were active, painters and builders labourers quiet.

Work was plentiful in the metal and engineering trades. Electrical workers and linemen were busy.

Salespeople, office workers and delivery employers were facing a dull period. Hotel and restaurant employment was scarce.

Railways experienced an increase of freight traffic when lake navigation closed. Holiday passenger traffic was heavy. Teamsters were busy.

Unskilled labour was well employed.

DISTRICT NOTES.

Chippewa.—Commencement of the construction of the steel plant here has been followed by general prosperity. It is expected that the Welland river will be dredged to accommodate lake-draught vessels next spring. Preliminary work was under way.

Port Colborne.—Heavy up-lake shipments just before the close of navigation emptied the cement company's storehouses and the plant will probably run all

winter. A storm did considerable damage to the harbour works.

Welland.—The metal working trades were very active. A large steel scow was launched at the Beatty works. The Page-Hershey Company, let the contract for a coal shed to hold 200 cars and the whole tube plant will be completed in February. The business of the Ontario Iron and Steel Company was increasing rapidly and an enlargement of the foundry was commenced. A number of dwelling houses were being erected. Crowland township voted to fix assessment on the proposed plant of the Electro Steel Company.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

December maintained the record of general activity in all branches of industry in this vicinity.

Building operations were quiet at the opening of the year, but with the advent of spring became active to busy and closed with better prospects for employment than for two seasons past. During the year about seventy new buildings were erected; of these sixty were residences for working men. Considerable additions and repair work was done. Plans for next season's work include the erection of from thirty to forty houses for working men's families. This is owing to the steady growth of the city and to meet a long-felt need.

Civic improvement work was extensive this year, and was an important factor in the employment of labour. Next season a new water supply main will be laid from the reservoir to the city, a distance of three miles, at an estimated cost of \$150,000. The supply pipe will be twenty-four inches in diameter and will increase the city's supply $2\frac{1}{4}$ times. The main will be in addition to the one already in use and will give ample pressure for fire purpose as well as for domestic and factory purposes.

Christmas trade proved fully up to last year's, the purchases consisting largely of useful articles. Merchants generally were well satisfied.

This year proved a very busy one for the Welland Canal; about 400 more vessels were locked through than last year and about double as many as two years ago.

Up to December 15th, when navigation closed 2,412 vessels had passed through the canal as compared with 2,028 in 1908 and 1,303 in 1907. A majority of the boats carried grain this year, some of them with cargoes as great as 80,000 bushels. This outstrips any previous year's carrying on the Welland Canal.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fruit growers and farmers are well satisfied with the past season's crops and results. An estimate of the growth of this industry may be made from the fact that 480 cars were shipped by the Cold Storage Company, Limited, of St. Catharines alone, each car being worth \$400 to \$600. Queenston, Jourdan, Beamsville, Grimsby and Winaona would each about equal the shipments made from St. Catharines and the above does not include shipments made by boat and to canning factories, of which there are eight in the district doing a large business. The fruit growers are increasing their acreage and claim the industry is but in its infancy.

Railroad construction.—The Northern, St. Catharines and Toronto Railway have about completed the line through Welland to Port Colborne. When completed the line will give convenient service from Lake Ontario to Lake Erie, connecting Pt. Colborne and intermediate places with the boat service from Pt. Dalhousie to Toronto.

CONDITION OF PARTICULAR TRADES.

The buildings trades were active to busy, with conditions quieting down at the close of the month owing to weather conditions. All branches of the metal and engineering trades were from active to busy. McKinney Dash factory was still

working a night shift of thirty hands in the chain department. The woodwork- ing and furnishing trades were active. The allied printing trades were busy. Journeymen, tailors boot and shoe work- ers were active. Bakers and confection- ers, butchers and meat cutters, were busy. Cigar makers and tobacco workers were active. The leather trades were active. Barbers, clerks, stenographers, delivery employés furriers, hotel and restaurant employés were busy. Laundry workers were active. All lines of transportation were active. Unskilled labour was well employed the first half of the month but was quiet towards the close.

DISTRICT NOTES.

Thorold.—Business generally was good and labour well employed.

Merritton.—The condition of the labour market was satisfactory.

Pt. Dalhousie.—Favourable conditions for the employment of labour prevailed. The Canadian Maple Leaf Rubber Com- pany, advertised for hands.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, re- ported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The active conditions reported for November continued during December. The building trades were all fairly well employed, and though cold weather interfered with outside operations early in the month the trades had more work than in the corresponding period last year. Prospects are very encouraging.

Retail merchants reported an excep- tionally busy month, the Christmas trade in almost every line showing marked improvement over last year.

The city council having agreed to take 1,000 horse-power from the Hydro-Elec- tric Commission for use in operating the waterworks and sewage disposal plants, placed orders on December 21, with the Canadian Westinghouse Company for two motors and two transformers for the

Beach pumping station. Two new 3,000,000 gallon pumps were also ordered from the same firm, and two 6,000,000 gallon pumps from the McDougall Company. The total consumption of water in November was about 200,000,000 gallons.

There were 100,685 square yards of macadam roadway laid during the year, about twice as much as in any previous year. It cost 25 cents a square yard. Of cement walks 126,168 square feet were laid at an average cost of 10.70 cents per square foot. Last year cement walks cost 41.1 cents per square foot.

On December 10, the failure of the supply of electric power, due to slush ice in the flume at DeCew Falls caused a temporary paralysis of business throughout the city. The trouble was overcome the next day.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Exceptionally large markets were the rule during the month. The supplies of turkeys were slow in arriving, but came with a rush a few days before Christmas, when there were more than enough for everybody. The price did not break to any extent, as it did last year, remaining at from 20 to 25 cents per pound. Christmas beef brought 9½ to 10½ cents per pound by the quarter. The display was the finest in many years. New laid eggs commanded 50 cents per dozen.

Manufacturing.—The Canadian Westinghouse Company is experiencing the busiest period in its history.

Railroad employment.—The Hamilton Street Railway Company, increased the number of cars on its Barton street line.

The traffic on the suburban lines and the steam roads was very heavy.

The Hamilton Steamboat Company, announces that the season of 1909 was the most successful in its history.

CONDITION OF PARTICULAR TRADES.

Busy conditions continued in all the trades. Exceptional activity was experienced by sheet metal workers, tin-smiths, boot and shoe operatives, the allied printing trades and workers in the

transportation lines. The demand for extra salesmen and saleswomen during the holiday season was in excess of the supply. Some factories were shut down toward the end of the month for stock-taking and repairs, but will reopen at the beginning of the year. This condition is not unusual but the period of idleness will be rather shorter than usual in other years.

Unskilled labour was fairly well employed but the slack season for this class of workers has now set in.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during December. The iron trades were exceptionally busy, and the building trades were also busy for the season of the year. The past year was favourable to all classes of labour, and there are indications that 1910 will be even more favourable. The Waterous Engine Works Company is asking the city council to close Jex street to enable an extension of the works. The Plough factories were exceptionally busy, considerable overtime being worked; large extensions are under consideration. The Nail Company finds present premises too small and will move to larger quarters. The Slingsby Fabric Manufacturing Company, has acquired additional premises and the Watson Underwear Manufacturing Company is enlarging its operations. The Western Counties Electric Company is erecting a reinforced concrete transformer station, which will enable them to receive 40,000 horse-power of electric energy direct from the DeCew Falls. The value of building permits issued by the city engineer during the month, shows an increase over the corresponding month of last year of \$112,000 and the increase for the year over 1908, is \$149,030, the total value of permits for the year being \$438,885. Twenty-five machine moulders received an increase in wages of

from 15 to 25 cents per day. In several of the factories, the employés received gifts from the management at Christmas. In one factory about 300 turkeys were distributed.

The following prices prevailed at the Christmas markets: Turkeys, 22 to 25 cents per lb; geese \$1. to \$1.35 each; butter, 26 to 28 cents; eggs (fresh) 35 to 40 cents a dozen; beef 8 to 12 cents lb; pork, 12 to 14 cents lb; potatoes, 65 cents per bag.

Merchants reported trade backward up to the 17th; after that it was exceptionally brisk. The value of the Merchants' Protective Association is shown in the report of the collector, who in the past seven months collected \$2,000 bad debts for members of the association. About eighteen miles of concrete sidewalk, sewer, pavement, and storm sewer were constructed by the City Engineer's department during the year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were active, chiefly on the care of stock and the marketing of produce.

Manufacturing.—Manufacturers were busy and in several instances very busy. Large additions to several factories are being arranged for.

The large factory for the Shoe Manufacturing Company, recently located here, is being rushed to completion.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy, when the weather was favourable. Lathers, plasterers, painters, plumbers, gas and steam fitters were busy. Carpenters and joiners were busy nearly all the month.

Iron moulders, coremakers, machinists, engineers, electrical workers, linemen, metal polishers, buffers and platers were busy. Stove mounters were not very busy. Blacksmiths, boiler makers, sheet metal workers and horseshoers were busy.

Woodworkers, carriage and wagon makers, pattern makers and coopers were busy.

The printing and allied trades were busy.

Tailors and tailoresses were busy.

Bakers and confectioners were busy. Cigar makers and tobacco workers, were active.

Leather workers and saddlers were from active to busy.

Barbers, clerks, delivery employés, furriers, hotel and restaurant employés and laundry workers were busy.

Railroad trackmen were active. Freight handlers were busy. Teamsters and carters were active, as were hackmen. Draymen were busy.

There were some unskilled labourers toward the close of the month unemployed.

DISTRICT NOTES.

Paris.—The fabric mills were busy. The Sanderson-Harold Company has commenced operations in its new factory. The Plough factory has been closed for several weeks. There are a few unemployed in the town.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during December continued active, though building operations were practically at a standstill, with the exception of the Hydro-Electric power transforming station, on which there are still a number of men employed. The large addition to the Provincial Winter Fair building was completed and the fair, which was held from the 6th to the 10th of December, proved to be the best on record, both in point of attendance and number of exhibits, the horse show proving a great attraction. The different associations holding their annual meetings at the same time were all largely attended.

The Ontario Provincial Government has decided to locate the new Central Prison or Reformatory, outside the city limits, having purchased about 500 acres of land. The government will erect buildings thereon at an estimated cost of

\$500,000, but most of the construction work will be done by convict labour.

Owing to the Winter Fair and the Christmas trade, wholesale and retail merchants reported a very good month.

Customs returns for November were \$20,731.09 as compared with \$12,303.67 for the corresponding month last year.

Twenty-eight Brussels carpet weavers employed by the Guelph Carpet Mills Company Limited went out on strike on December 11th. They wanted extra pay for overtime and better working conditions. No settlement has yet been reached.

Manufacturing plants were generally busy with orders ahead in most cases and prospects of an active winter.

CONDITION OF PARTICULAR TRADES.

All employed in the building trades reported a quiet month, though plumbers had an active month. Tube mill workers were very busy. Iron moulders, reported an active month, some shops taking on additional men. Coremakers, machinists and engineers were well employed.

Electrical workers and linemen were active. Blacksmiths and horseshoers had a good month. Woodworkers in sash and door factories and piano makers reported an active month. Carriage and wagon makers were fairly well employed. Pattern makers were busy. Printers and allied trades had a good month. Journeymen tailors were slack, but garment workers were active.

Bakers, confectioners, butchers, barbers, also hotel and restaurant employes, reported a very active month. Street railway employes and expressmen were also very busy. There was little demand for unskilled labour.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Factory employment was very busy, during the month, being more active than during the corresponding month

of last year. Bricklayers, masons, builders' labourers and unskilled labourers were somewhat inactive since winter set in. At the C. A. Ahrens Shoe Factory a couple of shoe makers and a sole cutter were wanted. Girls were wanted at the Hagen Shirt and Collar Factory, by the Stir White Wear Company and by the W. G. & R. Shirt and Collar Company. The building of the Niagara Distributing Power Plant was completed during the month. Good progress was made on the I. S. K. Weber block. The foundry of the J. E. Shantz estate was closed on the 11th. Both wholesale and retail trades was reported very good. There were no changes in hours of labour or rates of wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were somewhat quiet during the first half of the month, but during the latter part of the month become active teaming wood, saw logs and building stone, and marketing farm product. Butter was selling at 28 cents per pound; eggs at 36 cents per dozen; turkeys at from 22 to 25 cents per pound; geese from 14 to 15 cents per pound; ducks at 50 and 60 cents each; Chickens at 50 cents; beef, front quarter at 6½ cents per pound; hind quarter at 7½ cents per pound; dressed hogs at \$11. to \$11.50 per hundred; potatoes at 75 cents per bag; apples at \$2.50 per barrel.

Manufacturing establishments were very busy, with many of the industries working overtime. The C. A. Ahrens Shoe Company moved into its new factory the first of the month. Another new industry, the Berlin Fuel Savers Company has leased part of the market building and began operation the first of the month, employing ten men.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were inactive, with carpenters and joiners active and lathers and plasterers quiet.

The painting, decorating and paper hanging branches were somewhat inactive. Plumbers, gas and steam fitters were active, with stone cutters and builders' labourers inactive.

Iron moulders, iron workers and helpers, coremakers, machinists, steam engineers, electrical workers and linemen were busy. Metal polishers buffers, platers and brass workers, stove mounters, blacksmiths and boilermakers were also busy, as were tool sharpeners and horsehoers.

The woodworking and furnishing trades were very busy.

Printers, pressmen were busy.

Journeyman tailors, garment workers, hat makers and glove makers were busy, with boot and shoe workers very busy.

Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers were busy.

Tanners and curriers, leather workers, saddlers, trunk and bag makers were active.

Barbers, broom makers and clerks were busy, as were shirt and collar makers and shirt waist makers.

Busy conditions were reported among transportation employés.

Unskilled labour was somewhat inactive.

WOODSTOCK, ONT., AND DISTRICT.

Mr. John Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

In practically all lines conditions have been unusually active, and the outlook is most promising. Nearly all the factories were working full time with full staffs, some working overtime. The prospects are that these or similar conditions will continue through the winter. Some establishments report the best business in their history for the year just closing. The two organ and piano factories were working to full capacity, and expect to keep it up. The same was true of the two wagon factories. The furniture factory was running with practically a full staff, and expects to continue so. The cereal mill was running night and day. The wire fence business was also very active and a local concern engaged in the manufacture of school desks was very busy. This was the off month in the

stove business; but the season has been an unusually good one and prospects are excellent. There was a good demand for female labour. A knitting factory employing 100 girls has work for twenty-five more. A biscuit and confectionery factory employing many girls reported trade active. Retail trade has been very good. There have been no complaints of want of employment.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had a good season. There is a good demand for produce at high prices.

Manufacturing.—Conditions have been more satisfactory during the past season than for some years; the indications are that these conditions will continue.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have had a good season and an unusually long one. Carpenters and joiners have been busy, and there is still considerable work. Lathers and plasterers have also some work still. Builders' labourers and many of those having trades for which this is the slack season are finding employment in the factories.

Iron workers and moulders have had a good year. December is a slack month in the stove business, but in other lines of foundry work, employment has been steady.

Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon builders have been busy, with good prospects.

Printers and pressmen, tailors and garment workers were busy.

There was little or no unskilled labour seeking employment.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were busy during December and conditions compared fa-

avourably with the preceding month, employment being more plentiful than in the corresponding month of last year. The supply of labour, however, was equal to the demand, as nearly all outside work in the building trades was at a standstill. Gangs of men were engaged on the erection of the building of the Niagara power transformer station. The city council has decided to submit a by-law to the ratepayers in January to provide the sum of \$10,000 to complete the Victoria improvement. All the factories reported business very good, especially the woodworking establishments. Wholesale and retail merchants reported a good trade especially during Christmas week. No changes in rates of wages or hours of labour, and no disturbances in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy feeding cattle and marketing produce. The price of poultry was higher this season than for some time. The Swift Company, of Chicago, has opened an agency and has shipped three carloads of dressed fowl from here to the West. Turkeys sold from 20 to 23 cents a lb. for the Christmas holidays.

Manufacturing.—All branches were busy and all factories running full time.

CONDITON OF PARTICULAR TRADES.

Most of the building trades were at a standstill, as is usual at this season of the year. Iron moulders, workers and helpers were busy. Machinists, blacksmiths and boiler makers were active. Woodworkers, carriage and wagon makers were active. Coopers were busy. Printers were busy. All the clothing factory workers were busy.

Bakers, confectioners and butchers were very busy; cigar makers were steadily employed. Harness makers reported business very good. Barbers, clerks, and delivery employés were busy. Hotel restaurant and laundry workers were active. All railroad employés were active, especially freight handlers. Cab drivers, draymen and teamsters were busy. Unskilled labour was dull.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Local conditions for the mass of the workers showed a decided improvement over the same period last year. The retail houses did a heavy Christmas trade. At Hyman's tannery a new warehouse is in course of erection, to accommodate increasing trade. A number of sewers are being put in, making considerable work for labourers. A number of the large manufacturing concerns shut down between Christmas and New Year for stocktaking and repairs to machinery. The coal carrying barge *Bessemer II.* went down on Lake Erie, with thirty-two members of the crew. This boat handled the bulk of the soft coal used here. At McClary's Foundry, the moulders, who formerly received a bonus of 25 cents on board prices, had the bonus taken off at the first of December, which had the effect of a twenty per cent. reduction in their wages. The Trades and Labour Council has named twelve delegates to attend the Civic Federation meeting, the second Monday in January.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather conditions up to the middle of December saved thousands of dollars to the farmers in this locality, as they were enabled to leave their cattle in the pastures, thereby saving feed. Turkeys brought from 18 to 22 cents per lb. for the Christmas trade.

CONDITION OF PARTICULAR TRADES.

In the building trades a large number were idle, bricklayers were employed only to about half their number, but plumbers were fairly busy.

Stone moulders reported trade slack, while in the foundries business was fair. Iron workers and bolt and hinge makers were busy. Machinists reported trade fair. Electrical workers and linemen were very busy and brass workers and polishers busy.

Upholsterers were not busy; not much of this work is done here now. Carriage and wagon workers reported trade fair. Car builders and coopers were busy.

Printers and pressmen continued busy.

Journeyman tailors reported trade poor. Garment workers were busy. Boot and shoe workers were exceptionally busy, and were working overtime.

Bakers and confectioners had an exceptionally busy month. Cigar makers reported trade fair.

Tanners were busy.

Train crews reported an exceptionally good month. Teamsters were slack.

Among *unskilled labourers* but few were without work, and conditions are much more hopeful than last year.

DISTRICT NOTES.

The worst sleet storm in years visited Western Ontario the latter part of November, and created a great amount of damage to wires and poles. The Bell Telephone Company had fifteen gangs out for two weeks repairing, besides loaning fifty men to the Canadian Pacific Railway Company for the same work.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month of December was very favourable notwithstanding the advent of cold weather. Work in the building trades continued active throughout the month and those who desired work had no difficulty in procuring it. The work chiefly consisted in finishing contracts of the past season. On the railways the month was a good average, all hands being well employed. There was an increase in the number of crews put in service. Railway shop employes were busy, with the demand for skilled workers slightly in excess of the supply. During the month, Pere Marquette Railway machinists, blacksmiths and locomotive firemen were notified of an in-

crease in wages. The increases were the result of conferences with the officials. The representatives of the men were generously dealt with by the officials and the best of feeling prevails. The increases mean a great deal to this city and show a desire on the part of the company to have its employes well paid. Merchants reported the Christmas trade exceptionally heavy and many additional clerks were employed to handle the business. There was plenty of money in circulation, which indicated general prosperity. The city assessor reports that from indications the population will show a decided increase with the completion of the census. Municipal skating rinks, on vacant city property, were thrown open to the children and are being well patronized by all classes. The rinks are well looked after by the city and the experiment is a decided success. The supply of unskilled labour was slightly in excess of the demand, but no extreme cases of want have been reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The city markets have been well attended with buyers and sellers. Turkeys sold at from 18 to 20 cents per pound and were in good demand.

Manufacturing.—Local industries report the month a good average.

CONDITION OF PARTICULAR TRADES.

Work in the building trades continued throughout the month, the work done being chiefly indoor work. Metal workers, in the railway shops were well employed. Tailors reported the month quiet.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour, skilled and unskilled, was fairly well employed during the first part of the month but showed a falling off

towards the last. The building permits issued by the chief of the Fire Department totalled \$26,000 in value, but a number will not be proceeded with for a time. The Wagon and Carriage Company has been exceedingly busy and the Gananoque Spring and Axle Company has been working fourteen hours a day in order to keep up with orders. The McKeough & Trotter Machine Company who on November 1st, began on short time had on the 20th of the month to resume full hours. Park Bros., Machinists and Foundrymen reported trade better than in 1908, and were working full time with a larger staff. Planing mills showed signs of slackness towards the middle of the month and a number closed down during the holidays to resume on the 3rd of January. Dry goods merchants reported the Xmas trade in excess of that of 1908, and merchant tailors stated trade has been the best in twenty years.

A new industry has been secured viz. the Modern Malleable Range Company capitalized at \$40,000.

The city milkmen on December 20th, raised the price of milk from 6 cents to 7 cents.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners reaped a rich harvest during Christmas week. Poultry reached the highest price in the history of Chatham; turkeys ranging from \$2 to \$6; geese \$1.75 to \$2; ducks 60 to 85 cents; chickens 25 to 60 cents; live hogs \$8 per 100 lb; dress \$10 to \$11; hay, \$13 to \$14 per ton; butter 25 to 28 and 30 cents per lb; eggs, strictly fresh, 35 cents per dozen.

CONDITION OF PARTICULAR TRADES.

Bricklayers and plasterers were very quiet, but carpenters and joiners were fairly well employed on short hours. Painters were slack, but plumbers were busy, and gas and steam fitters very busy. Builders' labourers were dull.

Iron moulders, iron workers and helpers, machinists, sheet metal workers and linemen were quiet. Blacksmiths and horseshoers were busy.

Woodworkers and upholsterers were fairly busy and carriage and wagon makers were exceedingly busy.

Printers reported a fair month, but bookbinders were somewhat quiet.

Journeymen tailors reported trade brisk, many working overtime. Boot and shoe workers were busy.

Bakers and confectioners reported trade far in excess of last year. Cigar makers were busy.

Barbers, clerks, stenographers, delivery employes and laundry workers were very busy during the latter part of the month. Cab drivers and hackmen were busy.

Unskilled labour reported a few idle at the last of the month.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were well employed. The Windsor Gas Company is digging up its pipes and repairing them; this is giving employment to about 100 men and if the weather permits it will last into the new year. In 1909 there were 176 building permits issued during the first eleven months to the value of \$421,385; in 1908, 163 were issued with a total value of \$297,780. The Board of Works have spent this year \$32,000 on sidewalks, streets and curbing. A Scale Company of Toledo, has leased a building for a term of years and is having it fitted up for the manufacturing of scales; this will give employment to twenty-five hands to start with. A new company has been formed called the Canadian Safe Company, and will start building as soon as it can locate a site; the Company expects to give employment to seventy-five hands.

CONDITION OF PARTICULAR TRADES.

As the weather permitted, the building trades were all working. All connected with the iron trades were fully employed. The woodworking and furnishing trades were working full time with the

exception of one planing mill. Printers and pressmen were very busy and journey-men tailors were working overtime. Garment workers are in demand. Bakers, butchers and tobacco workers were very busy on the Christmas trade. Leather trades were busy. Barbers reported a quiet month on account of the weather. Clerks, delivery employés, hotel and laundry workers were fully employed. All connected with transportation were fully employed. Unskilled labour was well employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are about through with their season's work, with the exception of hauling produce to market. Prices were as follows:—Apples \$1.10 per bushel; potatoes 60 cents per bushel; eggs 35 cents per dozen; chickens \$1 to \$1.25 per pair; ducks \$1.25 to \$1.50 per pair; butter 28 to 30 cents per lb; turnips 40 cents per bushel; carrots 40 cents per bushel; onions \$1 per bushel; celery 35 cents per dozen; beets 40 cents per bushel; parsnips 40 cents per bushel; squash 5 and 10 cents apiece; cabbage 5 cents per head; cauliflower 10 cents per head; hay \$12 per ton; and straw \$5 per ton.

Manufacturing.—Manufacturers were very busy, some of them running overtime.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during December, except during the last week when the steel plant closed down for necessary repairs and improvements. Merchants generally reported a good holiday trade. The general outlook is favourable.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Normal conditions prevailed.

Lumbering.—This industry was very busy. A scarcity of men for the woods was complained of.

Manufacturing.—The charcoal plant has commenced operations under new ownership after a lengthy idleness. The Standard Chemical Company has purchased this plant from the Lake Superior Corporation. The Lake Superior Corporation has a large staff engaged enlarging docks and erecting a new blast furnace and rolling mill for structural shapes and bars in connection with the steel plant. It is the intention of this Corporation to greatly enlarge its sphere of operations during the coming summer, a coking plant being among the proposed new works. At the annual municipal elections by-laws were voted on for the construction of about \$25,000 worth of cement walks and \$6,000 for sewers; these both carried.

CONDITION OF PARTICULAR TRADES.

Plumbers were busy; the other building trades reported normal conditions. Normal conditions were also reported in the other groups of the skilled trades.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With the closing of navigation this district has entered on a quiet period. December has been a quiet month in contrast to the last, but was much busier than the same month last year. No new work has been started and much building work has been closed down for the winter. With the closing of navigation the freight handlers have had to seek other work and as the lumber camps are not very busy this season there are a good many canal labourers and building operatives out of work or employed on short time. Wholesale trade has been fairly busy, but a falling off has caused a slight stoppage of workers

in warehouse work, taken on for the busy season. All wholesale houses are keeping on their regular staffs and are doing a better business than at the same time last year. Retail trade has been good and the merchants express themselves as well satisfied with the Christmas trade.

The labour market on the whole has been in a quiet, healthy state. No interruptions caused by strikes or lockouts, and no friction has been reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Comparatively few men have been engaged in the cities, settlers in the district are being employed in small lumber and tie camps.

Railroad construction.—The camps have taken some of the idle freight handlers and building labourers from the cities.

The western dry dock at Port Arthur has been busy preparing for spring operations and a large number of labourers have been employed there.

CONDITION OF PARTICULAR TRADES.

All the building trades except painters, plumbers and steam fitters have been quiet, the three trades named have had a busy month.

Electrical workers and linemen on street railway extension have been fully employed.

The printers and allied trades have had a very busy month, owing to extra Christmas advertising, special numbers of local papers and the election literature.

Journeymen tailors were very busy till Christmas.

All the miscellaneous trades were kept busy until Christmas.

Traffic on the railways has been heavy, railway workers well employed.

Unskilled labour has been quiet and there is more than enough to meet all demands.

WINNIPEG, MAN., AND DISTRICT

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As is usual at this season of the year the supply of labour exceeded the demand. Compared with previous years the number of unemployed was less. The existence of distress was less marked than it has ever been. Following the activity of Christmas week there is usually a large number unemployed and they remain so until spring.

Retail trade during December was much more extensive than ever before in Winnipeg. Wholesale trade during the year has expanded by about twenty-five per cent. In staple lines such as hardware and wholesale groceries and in fancy goods and luxuries the increase has been approximately fifty per cent.

The factories of the city as a whole were kept fairly busy, but some slackness is expected in January.

Bank clearings for the year 1909, amounted to \$770,649,322 or twenty-five per cent. more than the total of the year previous.

Building permits for the past ten years were as follows:—

Year.	Permits.	Buildings.	Cost.
1900.....	530	658	\$1,441,863
1901.....	630	820	1,708,557
1902.....	822	973	2,408,125
1903.....	1,227	1,593	5,689,400
1904.....	1,768	2,268	9,651,750
1905.....	3,349	4,099	10,840,150
1906.....	3,487	4,204	12,625,950
1907.....	2,433	2,827	6,309,950
1908.....	1,544	1,769	5,513,700
1909.....	2,497	2,942	9,226,325

The prospects for the ensuing year are that there will be continued activity in the erection of new buildings.

There have been no changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Grain receipts were heavier towards the close of the month and prices have gained slightly. It is still the opinion of many bankers that

only about half the crop has been marketed.

Transportation.—The changes in the railroad mileage of the Canadian West during the year 1909, are as follows:—

Canadian Pacific—		
Mileage at the beginning of 1909.....	5,693	
New steel in 1909.....	404	
Mileage at the beginning of 1910.....	—	6,097
Canadian Northern—		
Mileage at the beginning of 1909.....	3,250	
New steel laid in 1909.....	250	
Mileage at the beginning of 1910.....	—	3,500
Grand Trunk Pacific—		
Mileage at the beginning of 1909.....	982	
New steel laid in 1909.....	403	
Mileage at the beginning of 1910.....	—	1,385
Great Northern—		
Mileage at the beginning of 1910.....	450	
Total mileage in the provinces at the beginning of 1909.....	10,415	
Total new steel laid in 1909.....	1,057	
Total mileage in the provinces at the beginning of 1910.....	—	11,472

CONDITION OF PARTICULAR TRADES.

A more than usually large number of men are being employed finishing the many new buildings that were advanced to a sufficient extent to permit of their being covered in for the winter. The amount of building in the several cities of the west is having the effect of keeping Winnipeg mechanics better employed than is usually the case at this season of the year. Plans for new structures to be erected in the course of the year indicate some heavy demands upon the local foundries in the early spring.

The printing and allied trades in comparison with conditions in the corresponding month of last year were exceptionally busy. The plant of the Voice Publishing Company was destroyed by fire and damage to the extent of \$20,000 resulted.

During the month of December the traffic on all the railroads was exceptionally heavy, though the weather was unfavourable. The grain movement was steady and passenger traffic abnormally large.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during December was quiet. Nearly all exterior building

operations have ceased for the winter, with the result that members of the building trades were unemployed, excepting plasterers and carpenters engaged on interior finishing. The railroads were still very busy, the full complement of men being employed. The Hanbury Manufacturing Company was still working overtime, and business was brisk with other manufacturing companies in the city. Advertisements appeared in local papers for unskilled labourers; and so far, no cases of anyone being unable to obtain work have been heard of. The general condition of wage-earners in the city is much better this year than last. No cases of distress were yet reported. Certain differences occurred between members of the cigar makers union and J. Dillon, cigar manufacturer, resulting in the former being locked out. The Manitoba Grain Growers Association, held a very successful convention in the city during the third week of the month, over 500 delegates being in attendance. Resolutions favouring government ownership of internal elevators and terminals were adopted. Brandon was again chosen as the place of meeting. Wholesale and retail business during the month was very good. The weather has been extremely severe, and the snowfall heavy; but so far the railroad companies have been able to keep the roads clear, and there is no danger of the serious fuel famine of three years ago being repeated.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were idle, but carpenters and joiners were fairly busy on interior finishing and factory work. Lathers and plasterers were active, and stone cutters and monumental masons were busy, with builders' labourers dull. Machinists, engineers, and electrical workers were busy. The printing and allied trades were busy and the clothing trades were active. Bakers, confectioners and butchers were very busy, with cigar makers fairly busy. Railroad transport men were busy, and unskilled labour fairly busy.

REGINA, SASK., AND DISTRICT.

Mr. Hugh Peat, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was fairly active. Considering the season of the year, artisans in the building trade found fair employment. Bricklayers were quiet, but carpenters, painters, plasterers and others found no great scarcity of employment, and the demand for labour would have been greater if the weather had been more favourable for building operations. Altogether, the season of 1909, has been a very good one; many large business blocks and residences have been erected, whilst the work on the new Parliament buildings has afforded employment to a large number of men.

Retail merchants reported a year of exceptional activity, with receipts from the Christmas trade exceeding those of the previous year.

The month of December was marked by exceptional activity in real estate circles, 275 feet of frontage on Scarth Street and Cornwall Street changing hands for the sum of \$119,750; another twenty-five feet on Scarth Street was sold for \$16,000.

Post Office returns for 1907 (nine months ending March 31) were:	\$35 925.25
1908.....	61 000.04
1909.....	71 662.00

The Regina Clearing House figures for the week ending December 16th, were \$1,603,625; this will give some idea of the volume of business transacted in the city.

The Health and Relief Department report that there are practically no cases of distress, only three cases for relief having come before its notice; these were all cases of widows with children to support.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Normal winter conditions prevail. There has been a fairly

good fall of snow which has made the roads good for sleighing and the farmers have taken advantage of it to do necessary hauling.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull; carpenters and joiners, and painters and decorators were fairly active; plumbers were busy; builders' labourers were quiet.

Electrical workers had a very busy month, sheet metal workers were quiet.

The condition of the printing trade was good, and was a marked improvement on the corresponding period of last year. Linotype operators and job compositors were in demand. A new weekly paper under the title of the "Saturday Spectator" made its first appearance during the month, and will be issued every Saturday from the offices of the University press. Bookbinders had a busy month.

Cigar makers were fairly active. Barbers and laundry workers were active.

MOOSE JAW, SASK., AND DISTRICT.

Mr. F. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the past month was active. Notwithstanding some severe weather, outdoor workers found employment. The month has been a notable one in so far as business activity is concerned. The Christmas trade furnishing a new record in volume.

A review of the building permits for the nine months of the present year, from April to December, discloses some interesting figures. The most noticeable fact is the number of large residences erected; thirty-six of these cost from \$3,000 to \$10,000 each. The total cost of the buildings erected this year amounts to \$675,440 as against \$430,925 last year. The grand total for the past four years is two million dollars. The prospects for next year are for a still greater amount of building. As regards large

buildings, there are already in sight the Lands Titles Office, an Armoury, a new post office, a new grocery, warehouse and two banks. The bank of Montreal opened a branch in temporary quarters during the past month and will build next year. The lack of a commercial spur track alone prevented the erection of warehouse accommodation by a number of retailers and with the completion of this spur many such buildings will be proceeded with next spring. Hotel accommodation is one of the present needs of the city.

CONDITION OF PARTICULAR TRADES.

Printers and pressmen have been very active during the past month, also bakers, confectioners, butchers, ice cutters store clerks and hotel employés. Railroad employés in the transportation department have all been well employed as were also laundry workers, hackmen, draymen, carters, etc.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general labour market during December has shown a considerable decrease in activity, but compared favourably with December 1908. A large number of labourers have been employed on the construction of the Grand Trunk Pacific bridges west of the city, and the clearing of the right-of-way of the Alberta and Great Waterways railway, the latter road has also let a contract for \$200,000 worth of bridge timber and ties, which will provide employment for a large number of men. Building operations have been quiet during the month owing to the cold weather.

Statistics for the month of November are as follows: Customs, November 1908, \$10,622, November 1909, \$15,806; building permits, November 1908, \$80,505, November 1909, \$60,260; Bank clearings, November 1908, \$4,117,188,

November 1909, \$5,422,881; post office returns, November 1908, \$5,400, November 1909, \$6,300.

On December 1, the trouble between the mine operators and their employés was amicably adjusted, the miners receiving an increase in wages amounting to 2½ cents per car of coal, and recognition of the union.

On the 26th inst, the ratepayers voted the sum of \$246,000 as the city's share of the traffic section of a high level bridge to be built by the Canadian Pacific Railway. The unions of the building trades have organized a local council of the American Federation of Labour. Wholesalers reported trade fair and retailers reported trade much better during the holiday season than it has been for a number of years. No changes in wages or hours of labour were reported during the month.

CONDITION OF PARTICULAR TRADES.

With the exception of carpenters, painters and plumbers, the building trades were very quiet. The printing and allied trades reported trade fair. Cigar makers were employed. The number of unskilled labourers is steadily increasing as outside work is being completed.

NELSON, B. C. AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay district during December was quiet, though coal mining and lumbering showed a considerable improvement as compared with the same month for the past two years. Nelson has about sixty unemployed and the quartz mining camps have all a slight surplus of miners.

The Imperial Bank has built a new office itself at Moyie, B. C. The December pay day at Moyie amounted to about \$34,000. The upper workings of the St. Eugene Mine at Moyie have been shut down for the winter, reducing the number

of men employed by about eighty and leaving on the pay roll at present slightly over 300 men. The "Society Girl" and "Anoroa" mines at Moyie employ about fifteen men each on development work and from present appearance will soon be producing.

The most of the lumber mills have shut down for the winter, though a slightly increased force of men are employed in the woods in comparison with last winter, about 600 men being employed at the several camps to the south of Elko in East Kootenay.

The tonnage produced by the Crow's Nest Pass Coal Creek Collieries is increasing, about 1,300 men being on the pay roll at that camp. There are practically no unemployed coal miners within the Crows Nest Pass district at present. The Hosmer Mines have recently increased their working force by about 100 men making their pay roll total over 500 men. The Crows Nest Pass Coal Company Limited, disbursed \$170,000 on its December pay day.

Fernie has about forty unemployed carpenters and builders, which number may be slightly increased next month until spring.

The Kootenay Motor Boat Company Limited, of Nelson, B. C., which started about a year ago has manufactured and sold over \$10,000 worth of motor boats during 1909, and plans to more than double production during 1910.

NEW WESTMINSTER, B. C. AND DISTRICT.

Mr. D. J. Stewart, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were quiet, although they compared favourably with the corresponding month of last year. At present there are a considerable number of idle men, principally labourers and carpenters. Conditions are not likely to improve in any of these lines for some months or until the spring opens up. Work is being continued on the electric road to Chilliwack but progress is slow,

owing to the wet weather which is also interfering with street and sewer work being carried on in the city.

The employés of the British Columbia Electric Railway, some nine hundred (900) in number, have each received a cheque for the sum of \$58.10, representing one-third of the amount available for dividends, after a payment of four per cent. has been made on the common stock of the Company. Each employé who has served the Company without a break from the 1st of July of the previous year to the date of distribution is entitled to participate in the bonus. The gross amount available for this purpose this year is greater by \$5,000 than last year, but owing to the large increase in the number of employés the net amount available for each is less than last year.

The Great Northern Railway Company has agents making arrangements for acquiring the right-of-way for the extension of the railway from Hope to Abbotsford, and it is expected that work will be under way on construction early in the new year.

A Company composed of Alberta and British Columbia capitalists has been organized to build grain elevators in this city, Vancouver and Prince Rupert for the handling of the grain from the Prairie Provinces.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions were active owing to the approach of Christmas, and good prices prevailed, particularly for fowl. Farmers generally report the past season as the most successful for a number of years, as good prices and a ready market prevailed.

Fishing.—Conditions were very quiet and will continue so for some time, until the season for spring salmon opens up.

Lumbering was active and a heavy demand was made on the log market which is reported as being brisk. Shipments to the North West continue heavy, in addition to which a large quantity is being shipped to foreign ports.

CONDITION OF PARTICULAR TRADES.

The building and metal trades were active, but woodworkers printers and

tailors were quiet. Barbers, clerks and stenographers were quiet, with laundry workers active. Steamboat men, and street railway men were active, with unskilled labour dull.

VANCOUVER, B. C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour was unchanged, the year, ending with general activity, outdoor trades excepted, on account of the wet weather.

Merchants reported that the trade this month has been in volume twice that of the corresponding month of last year. The cold weather strengthened the price of eggs and butter. Local grown vegetables became scarce and importations from California began to come in.

Building prospects are exceedingly bright.

In addition to the Canadian Northern Railway and the Kettle River Railway bills to come before the next session of the Legislature there will be eleven other railway bills.

The recent advance announced by the railways in the freight rate per hundred pounds on shingles to eastern points in Canada aroused vigorous protests from the manufacturers.

Advices state that mining investments will have the almost exclusive call on eastern money within the next few months. Pronounced activity prevails in the mining districts of Northern British Columbia and Queen Charlotte Islands, miners being demand.

The ugly weather around the northern halibut fishing grounds proved disastrous to the fishing steamers returning to the city with minor catches.

Shipping business on the waterfront was at a standstill during the end of December, owing to the heavy fogs and Xmas holidays, although there were several large craft in the harbour.

The Board of Trade passed a strong resolution favouring a Board of Control

instead of the city council handling civic affairs.

A meeting will be held on January 31, 1910, to form a British Columbia Agricultural Association to arrange dates for the fairs which will be held in the province next year.

The money by-laws to be submitted to the civic electorate on January 13th, 1910, amount to \$1,546,400 or \$170,000 more than recommended by the Finance Committee.

The Property Owner's Association resolved to request the City Council to pass a by-law limiting the height of buildings to 150 feet.

The "Vancouver Shipping Gazette" a daily paper devoted exclusively to shipping interests began publication.

The Trades and Labour Council decided to urge the city to make one year's residence a qualification for voting in municipal elections. The council will ask the city council to take a plebiscite on the eight-hour day for civic employes, with a nine-hour wage, in January next. Last January the eight-hour a day plebiscite carried, but the council refused to pay a nine-hour wage.

CONDITION OF PARTICULAR TRADES.

Bricklayers and stone cutters were dull, other branches of the building trades were quiet, though carpenters and painters on inside work were fairly active. The metal trades were well employed. Electrical workers and linemen were active. The printing trades were active. Retail clerks and delivery employes were very busy, but restaurant employes were quiet. The supply of unskilled labour was greatly in excess of the demand.

DISTRICT NOTES.

Prince Rupert.—Citizens sent a deputation to Victoria to urge the government to install an electric lighting plant in Prince Rupert. When the city is incorporated the tax-payers propose to make the undertaking a municipal owned matter. Tenders were wanted for sewerage works.

Skidegate, Queen Charlotte Islands.—

A shipment of 50,000 feet of spruce lumber was sent to England, via the Suez canal. Activity in lumbering prevails.

NANAIMO, B. C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district has been active for the time of year, there being very few idle men. There was exceptional activity in the coal trade. Wholesale and retail merchants reported business very active. There have been no changes in hours of labour or rates of wages.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Herring fishing is in progress although as yet the fish have not come inside in large quantities. There are more engaged this year than ever before and the new cannery is in active operation.

The Whaling station on the gulf is having very good success. The stations on the outside coast are not in operation at this time of the year.

Lumbering.—The sawmills were work-

ing full time, the demand for lumber being good. The logging camps are not doing much at this time of year owing to the weather, which has been very wet.

Mining.—Work in the coal mines is being pushed to full capacity. Some of the companies have lost some time owing to the heavy rainfall causing washouts on the railways. One of the largest companies, that at Extension, having been idle over two weeks but they are all now working. Some new mines are being opened up on the north end of the Island with very fair prospects. Railroad construction is being pushed as fast as the weather will admit. The local sandstone quarry is being worked, but not on an extensive scale.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet, but carpenters have been active for the time of year. Painters and paper hangers report work as quiet, with plumbers, blacksmiths and carriage makers active. Printers also have been active, and teamsters and expressmen have had a very fair month. Unskilled labour has been exceptionally well employed for the time of year, owing principally to the damage done to the railroads and streets by the exceptionally heavy rainfall during the first part of the month.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF DECEMBER 1909.

DURING the month of December two applications were received for the establishment of Boards of Conciliation and Investigation, as follows:—

1. On behalf of telegraphers and station agents employed on the lines of the Grand Trunk Railway Company east of Detroit, the dispute affecting, it was alleged, 760 employes.

2. On behalf of James W. Blain, of Strathcona, Alta., coal mine operator, contractor for the output of the Cardiff Coal Company, Limited, of Cardiff, Alta.

Other Proceedings Under the Act.

In the application of the telegraphers and station agents employed on the lines

of the Grand Trunk Railway Company east of Detroit, for the establishment of a Board, it was stated that the differences in question related to a demand on the part of the employes for an increase of wages, extra pay for Sunday work, and annual vacations without loss of salary, also to the advertising of vacancies and to the incorporation of the wage scale in the schedule of agreement. It was stated also that conferences had been held between the managing officials and the committee of employes in October and November, 1909, but that no agreement had been reached. The number of employes affected by this dispute was stated to be 760. Mr. Wallace

Nesbitt, K.C., of Toronto, and Mr. W. T. J. Lee, of Toronto, were appointed by the Minister as members of the Board on the recommendation of the employers and of the employés respectively, and in the absence of any joint recommendation from the foregoing, the Board was completed by the appointment by the Minister of Labour, of Mr. J. E. Atkinson, of Toronto, as Chairman.

The application of Mr. James W. Blain, of Strathcona, Alta., contractor for the output of the Cardiff Coal Company, Limited, of Cardiff, Alta., was received in the Department on December 2, and related to certain differences between the employer and the employés of the Cardiff Coal Company's mines, the latter numbering seventy-five in all, which had arisen through a demand on the part of the employés for certain changes in the

wage scale. The Department was subsequently advised of the withdrawal of this application, and of the termination of the dispute in question.

Reports Received.

During the month reports were received of two Boards of Conciliation and Investigation established under the Act, as follows:—

1. Report of Board to which had been referred certain differences between the Intercolonial Railway of Canada and its machinists and fitters, members of the International Association of Machinists.
2. Report of Board to which had been referred certain differences between the Edmonton Standard Coal Company and its employés.

I.—REPORT OF BOARD IN DISPUTE BETWEEN THE INTERCOLONIAL RAILWAY OF CANADA AND ITS MACHINISTS AND FITTERS.

ON December 8, the Minister received the report of the Board established in the matter of differences between the Intercolonial Railway of Canada and its machinists and fitters, members of the International Association of Machinists. The report in question was signed by the three members of the Board, viz., His Honour Judge John A. Barron, of Stratford, Ontario, Chairman; Mr. James H. Gilmour, of Brockville, Ontario, member appointed on the recommendation of the employer; Mr. J. G. O'Donoghue, of Toronto, Ontario, member appointed on the recommendation of the employés.

In the application for the establishment of this Board it was stated that the dispute related to:—

"I. Dismissing certain employés contrary to signed agreement or schedule;

"II. Refusal of investigation for men dismissed according to Article 4, Section 3 of signed agreement, viz., 'An investigation for men dismissed.'

"III. Certain employés not receiving increase of pay which was promised in October, 1908, and again in June, 1909.

"IV. Violation of Article 4, Section 1 of schedule bearing on reduction of ex-

penses by reducing the force which provides for married men with families depending on them for support to be given the preference.

"V. Men who have been a number of years in the service who are near the age for pension being dropped from service."

The Board in its report has given its findings on each of the five points above mentioned. In respect of the alleged dismissal of certain employés contrary to signed agreement or schedule the Board finds that the services of about 350 men were dispensed with in pursuance of a policy of retrenchment, and that the necessity for this reduction in the staff was explained by the management to a committee of the employés concerned. On this point, the Board further observes that "it can readily understand the difficulty of applying the schedule under the circumstances but no further difference will arise on the point because all the representatives of the Company expressed their desire and intention to keep and enforce the schedule hereafter."

Concerning the alleged refusal of investigation for men dismissed the Board finds that a conference was held be-

tween the management and a committee of the employés at which the reason for the dismissals was given, and that it appeared that the management could not have done more.

Regarding the claim that certain employés had not received increases of pay promised in October, 1908, and in June, 1909, the Board finds that, whilst an increase of wages was promised to boiler makers and machinists, the annual return for the Intercolonial System showed a deficit and that the matter of increase dragged along until the beginning of the present year, when the Chairman of the Government Railway's Managing Board stated that he had a sum of money for distribution among the men above referred to. Pending the present investigation the increase had not been given, but the Board expressed the opinion that it should now be given, dating from April 1, 1909.

Regarding the alleged violation of Article 4, Section 1, of the schedule, bearing on reduction of expenses through reduction of the staff, which provided for a preference to married men with families depending on them for support, the Board heard the evidence of every one desiring to be heard. At Halifax, it appears that amongst those who were let go were men who had been a very long time in the service of the road. The Board finds that loss of employment by these men was, no doubt, a real hardship, and further observes that the passage of the amendment to the Provident Fund Act now before the House of Commons is amply justified by the consideration of these cases. The men contended that the section of their schedule with the Company calling for the application of the seniority rule should have been applied to the roundhouse and the shop at Halifax as if these were one, so that the older men in each case should be given the preference of employment. The Company, on the other hand, claimed that if only the shop was closed the roundhouse should not be brought into the matter at all. The majority of the Board think that under the circumstances the seniority rule could not be enforced, inasmuch as 78 of the employés working in the shop

were let go, and that the roundhouse should not be considered. Mr. O'Donoghue does not see his way clear to agree to this. The Board's report further observes that in any event the passage of the Act above referred to will do justice to all concerned.

Regarding the claim of employés who had been a number of years in the service and who had almost reached the age for pension being dropped from the service, the Board expresses the opinion that the men should receive their pension under the proposed amendment of the Provident Fund Act from the date of their dismissal.

The report concludes with the following observations: "A feature in regard to the dismissals was brought into the investigation which, though not directly referred to the Board, the Board nevertheless did not desire to exclude, and that was that in the dismissal of employés political interference was had, and political preference was shown. Once the suggestion was made the Board exhausted every means to ascertain what the facts were, and they unanimously find that the evidence establishes that political interference or political preference had no part whatever in the dismissals the Board was called upon to consider.

"The Board feels it due to Mr. Butler, Mr. Brady and Mr. Joughins to say that their instructions in every case with regard to the dismissals were that politics were not to have any part in the matter.

"The Board must express its pleasure at the cordial relations existing between the I.C.R. officials and the representatives of the men.

"Our work has been much facilitated by all parties concerned."

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of differences between the Intercolonial Railway and its machinists and fitters, members of the International Association of Machinists:

The Board of Conciliation and Investigation created under the Statute in that behalf, and to whom, on the 19th day of October, 1909, was referred certain disputes, claims and demands, which said disputes, etc., are hereinafter set forth and numbered respectively from I to VI, respectfully report as follows:—

The said Board held a series of sittings at Montreal, Ottawa, Moncton, Halifax and Quebec, at all of which places all evidence offered was taken, and at all of which places Charles Bleakney and John Delahirst, the parties who made the application for investigation were present and took part in the same, together with several others, representing the machinists and fitters of the Intercolonial System.

The said Charles Bleakney and John Delahirst were at the time of the Statutory application in these proceedings, and still are employés of the Intercolonial Railway within the meaning of Section sixteen, Sub-section three of the Industrial Disputes Investigation Act, 1907.

1. *“Dismissing certain employés contrary to signed agreement or schedule.”*

The Board find that the services of about three hundred and fifty men were dispensed with. This very large reduction in the staff was made in pursuance of a policy of retrenchment. The fact undoubtedly was that, in the course of many years, the road had become overmanned, and it became apparent that if proper economy was to be exercised, the service of many men in “the Maintenance of Equipment Department”, had necessarily to be dispensed with. In Halifax, alone, about 125 men were laid off. This large dismissal of men at Halifax was unavoidable, because of the fact that the employers decided to and did in fact abolish entirely all attempts at heavy repair work for locomotive maintenance, retaining only a sufficient number of employés for ordinary roundhouse purposes. The object in view in dismissing the men in regard to whom this investigation was ordered was beyond dispute, to permanently reduce the staff and thus put an end to over expenditure.

When the dismissals were made the management met a Committee of the

men and explained the reason for the dismissals, namely, the necessity for reduction. The Board can readily understand the difficulty of applying the schedule under the circumstances but no further difference will arise on the point because all the representatives of the Company expressed their desire and intention to keep and enforce the schedule hereafter.

2. *“Refusal of investigation for men dismissed according to Article four, Section three of signed agreement viz.:—an investigation for men dismissed.”*

As to this it has already been pointed out that there was a conference between the Committee and the Company at which the reason for the dismissal was given. That same reason and no other has been given by the Company before us so that it appears to us that the management could not have done more than they did.

3. *Certain employés not receiving increase of pay which was promised in October, 1908, and in June, 1909.*

In the fall of 1908, a committee of the men met Mr. Butler and the latter expressed his desire to increase the wages of the boiler makers and machinists. Whilst the matter was in hand the annual return for the road showed a deficit, and the matter of increase dragged along until the beginning of this year when Mr. Butler stated that he had a sum of money for distribution amongst the men above referred to. Pending this investigation the increase has not been given, but the Board think it should now be given, dating from April the first, last.

4. *“Violation of article four, Section one of Schedule bearing on reduction of expenses by reducing the force which provides for married men with families depending on them for support to be given the preference.”*

The Board heard the statements of every man who desired to give his evidence. At Halifax, it appears that amongst those who were let go were men who had been a very long time in the service of the road. Whittle was thirty-one years in the service, Delaney, thirty; Baisley, fifteen, and Phaeln twenty-nine or thirty. At Rivère du Loup also the

same thing happened. H. Des Rochers had been in the service, twenty-three years; Samson, twenty-three; Raymond, twenty-two; Lavoie, twenty, and Thibierge, twelve. At Campbellton, T. McDevitt, twenty-two years.

Loss of employment by these men was, no doubt, a real hardship and the passage of the amendment to the Provident Fund Act now before the House of Commons is amply justified by the consideration of these cases. The men contend that the section of their schedule with the Company calling for application of the seniority rule should have been applied to the roundhouse and the shop at Halifax as if one, so that the older men in each case should be given the preference of employment. The Company, on the other hand, claimed that if only the shop was closed the roundhouse should not be brought into the matter at all. The majority of the Board think that under the circumstances the seniority rule could not be enforced, inasmuch as all of the employes working in the shop were let go, and the roundhouse should not be considered. Mr. O'Donoghue does not see his way to agree to this. In any event the passage of the Act above referred to will do justice to all concerned.

At Moncton particular stress was laid upon the cases of Trites and LeBlanc. Their immediate superiors spoke very highly of them, while the higher officials alleged indifference to his work in Trites' case, and slowness on the part of LeBlanc.

While all the men above referred to will come under the amendment of the Provident Fund Act, the Board recommend that they be given work at the first available opportunity.

5. *Men who have been a number of*

years in the service, who are near the age for pension, being dropped from service.

This has already been covered. The Board is of the opinion that the men should receive their pension under the proposed amendment from the date of their dismissal.

6. A feature in regard to the dismissals was brought into the investigation which though not directly referred to the Board, the Board nevertheless did not desire to exclude, and that was that in the dismissal of employes political interference was had, and political preference was shown. Once the suggestion was made the Board exhausted every means to ascertain what the facts were, and they unanimously find that the evidence establishes that political interference or political preference had no part whatever in the dismissals the Board was called upon to consider.

The Board feels it due to Mr. Butler, Mr. Brady and Mr. Joughins to say that their instructions in every case with regard to the dismissals were that politics were not to have any part in the matter.

The Board must express its pleasure at the cordial relations existing between the I.C.R. officials and the representatives of the men.

Our work has been much facilitated by all parties concerned. All of which is respectively submitted.

TORONTO, December 4, 1909.

(Sgd.) JOHN A. BARRON,

Chairman.

(Sgd.) J. H. GILMOUR,

For the I.C.R.,

(Sgd.) J. G. O'DONOGHUE,

For the men.

II.—REPORT OF BOARD IN DISPUTE BETWEEN THE EDMONTON STANDARD COAL COMPANY AND ITS EMPLOYEES.

THE Minister received on December 27, the report of the Board of Conciliation and Investigation, to which had been referred certain differences between the Edmonton Standard Coal Company, of Edmonton, Alta., and its employes, to the number of seventy-five.

The differences in question were stated in the Company's application to have arisen through the discharging of five employes by the pit boss; which resulted in all the other employes quitting work for a period of two days without notification to the Company. The application referred also to proposals,

which were said to be in contemplation by the employés, for increased rates of pay.

Mr. Frank B. Smith, of Edmonton, Alta., and Mr. Clement Stubbs, of Edmonton, Alta., were appointed members of the Board on behalf of the employer and employés respectively; and on the recommendation of the foregoing, the Board was completed on December 2, by the appointment of Mr. Geo. F. Cunningham, of Camrose, Alta., as Chairman. The report was signed by all the members of the Board.

In the hearing before the Board, it was claimed by the employés that two of their number had been discharged on October 27, without reason; and that, when on the following day a committee of three was appointed to inquire into the dismissal of the said employés, the members of this committee were also discharged without justification. It was also claimed on behalf of the workmen concerned that the pit boss had shown discrimination in an effort to suppress organization on the part of the employés, and that all five of the men discharged were active members of the United Mine Workers of America.

On behalf of the Company it was claimed that the two employés discharged on October 27, were guilty of disobedience to the Company's rules. During the hearing before the Board the Company claimed that these two employés should be suspended for a period of one week, for the purpose of upholding the discipline of the mine. Acknowledgement was made, however, on behalf of the employer that the three subsequent dismissals were caused by hasty and impolitic action by certain officials of the Company; and the Company expressed its willingness to reinstate the latter. In respect of the rates of pay a satisfactory arrangement was effected between the Company and its employés. The Company formally expressed its willingness to abide by the decision of the Board.

The findings of the Board are confined to the question of the dismissal of two employés by the pit boss on October 27. From the evidence submitted the Board

finds nothing to warrant the discharge of the two men on the 26th of October, but, that on being reinstated they had, on October 27, committed a breach of a generally recognized rule, and for such should be censured. The Board expresses the view, however, that the employés in question have already been sufficiently punished. The Board also expresses the opinion that the rules relating to the discipline of the mine should be kept posted in a prominent place at the mine.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

*To the Honourable the Minister of Labour
Ottawa, Ont.*

Sir:—

As members of the Board of Conciliation and Investigation established under your hand and seal on December 2, 1909, for the purpose of investigating, with an endeavour to settle a dispute between the Standard Coal Company, Limited, and its employés—miners, teamsters and labourers, we beg to submit you in detail the procedure of the Board in the effort to arrive at a settlement of said dispute. Cause of dispute—employers' claim.

The pit boss of the Standard Coal Mine discharged five miners and all the other employés quit work in sympathy with them for two days without notifying the Company. There were also demands for an increased rate for mining the coal, which had not been submitted to the Management at date of Application for a Board of Conciliation but might be at any time. A copy of the Rebuttal Claim recently sent to Ottawa is appended.

Copy of Rebuttal Claim.

In the matter of an Act to aid in prevention and settlement of strikes and lockouts in mines and industries connected with public utilities; and in the matter of a dispute between the Edmonton Standard Coal Company, Limited and the employés thereof.

We, the undersigned, being duly sworn, do solemnly declare:

1. The employés of the Edmonton-Standard Coal Company, Limited, having its head office in the City of Edmonton, in the Province of Alberta, in answer to the application for an Arbitration Board under the said Act claim that on or about the 26th day of October, 1909, the said Company discharged two of its said employés without giving any reasons for so doing.

2. On the 27th day of October, 1909, the said employés of the said Company appointed a Committee of three among themselves to inquire into the dismissal of the said two employés referred to in the above paragraph, and the said Company dismissed the said members of the said committee without giving any cause or excuse and without justification.

3. The allegation made on the part of the said Company that the employés ceased work without giving the said Company notice is misleading, as not setting out the true facts.

4. When the said Company discharged the three employés appointed as a committee to investigate the discharge of the first two employés, as aforementioned, then the balance of the employés of the said Company discontinued work in sympathy with those who had been wrongfully dismissed, and contrary to the said Act, by the said Company.

And we make this solemn declaration conscientiously believing the same to be true, and knowing that it is of the same force and effect as if made under oath and by virtue of the Canada Evidence Act.

Severally declared before me at the City of Edmonton, in the Province of Alberta, this 21st day of December, A.D. 1909, the same having been interpreted from English into Ruthenian by A. C. Brovey, he having been first sworn by me to well and truly interpret the same, and the deponents seemed to perfectly understand the same and subscribed their names or made their marks thereto in my presence.

GEORGE LEZERUCK,
his

THOMAS x KOSSACK
mark

VINCENT BARTON,
VINC. HOLUB
JOZEF FRIDEL.

(Sgd.) J. M. CMYA.

A Commissioner for taking affidavits in and for the Province of Alberta.

Sittings of Board.

On the morning of the 20th day of December, 1909, the Board met, all three members being present. After a few minutes preliminary discussion as to the method of procedure a J. P. of Edmonton District, in the Province of Alberta (who was in proximity to the place of meeting) was called in and the three members took the oath of Office.

The chairman having read the application for a Board with the cause and nature of complaint, and a Rebuttal claim entered by the representative of the employés asked the representative of the Company, if he was willing to abide by the decision of the Board and received a reply in the affirmative. On receiving a reply in the negative to the same question from the representative of the employés he then declared the sitting open for discussion and investigation of the dispute.

Evidence was then led by F. B. Smith, representative for the Company and member of the Board, that on the 25th day of October, 1909, the pit boss found noxious gases prevailing in a part of the mine at 1:30 p.m. of that day and on inquiry found that Thomas Kosack and Vincent Holub (two miners employed in the mine) had blasted coal with black blasting powder at or about 11:30 a.m. contrary and in disobedience to a rule made eighteen months previous and still in operation, viz.: that blasting operations should not commence before four o'clock in the evening of each working day—that this rule was made out in the form of a notice and posted in a conspicuous place at the mine; that this rule was made for the purpose of keeping the air as free as possible from noxious gases during the working hours of the

miners. Also that there were exceptions to the rule in the form of a joint understanding between the miners and the pit boss that in some places and at certain times at the discretion and only with the sanction of the pit boss, some men were allowed to blast coal with a white smokeless powder; that Thomas Kosack and Vincent Holub had not obtained this sanction, and therefore he contended that the pit boss had just cause for dismissing those men; to uphold the discipline of the mine; that with regard to the three miners George Lazeruck, Martin Rospinich and Alex. Zahon there had been hasty and impolitic action by certain officials of the Company. On a query from the chairman he admitted unjust dismissal of these three men and a guarantee of full reinstatement. In addition to the evidence led by Mr. Smith he made the statement that as representative of the Company, in an effort to arrive at a settlement of the dispute; that the three miners, George Lazeruck, Martin Rospinich and Alex. Zahon would be fully reinstated and that for the purpose of upholding the discipline of the mine that a suspension of Thomas Kosack and Vincent Holub for two weeks would be required.

Clement Stubbs, representative of the employés, and member of the Board, then gave evidence contending that the pit boss had discriminated in an effort to suppress organization on the part of the employés. That all five members discharged were active members of the United Mine Workers of America, that the three miners George Lazeruck, Martin Rospinich and Alex. Zahon were a committee appointed to investigate the cause for discharge of Thomas Kosack and Vincent Holub. Anthony Brovey, an official of the United Mine Workers of America, was called and duly sworn and testified that the organization of the men took place on the 22nd of October present year, that the five men were active members of the local organization and that the miners, Thomas Kosack and Vincent Holub, were discharged on the 26th October and George Lazaruck, Martin Rospinich and Alex. Zahon were discharged on the twenty-seventh or after.

Frank Smith, representative for employers, disproved any connection with the two dismissals—that the order was given in the first case by the pit boss who had charge of the mine and was responsible for its safety and wellbeing. In the second case or discharge of the three miners, the order was given by the Financial Manager for the Company and the cause of it was the posting of a strong notice at the mine signed by some of the miners. On a query from Mr. Stubbs, Mr. Smith said he did not have the notice there, but it was in the Company's office, on this notice being sent for it was found to read thus:—

Notice:

We started a union yesterday, and nobody should come to work until they take those two men that got fired yesterday.

ALEX. ZAHON & DZONEX LAZERUCK,
Pit Committee.

The chairman then called attention to the fact that in the case of the last three miners discharged, blame had been admitted on the part of the officials of the company and full reinstatement guaranteed, that the dispute now devolved into a question of proof or disproof of whether Thomas Kosack and Vincent Holub did or did not do acts contrary and in disobedience to a rule or rules of the mine.

Mr. Stubbs then requested Mr. Smith as representative of the Company to withdraw a clause in the application for a Board of Reading. There are also demands for an increase rate for mining the coal which have not been submitted to the management up to date but may be at any time, as this part of the dispute was settled. Mr. Smith asked for an adjournment to prepare a paper to be placed before the Board in the afternoon. The request being acceded the Board adjourned.

Proposals of the Company.

On a resume of the sitting in the afternoon, F. B. Smith submitted the appended proposals.

EDMONTON, ALTA., Dec. 20th, 1909.

*Chairman of Conciliation Board,
Edmonton Standard Coal Company
and Employés.*

SIR,—I beg to state that with regard to the Edmonton Standard Coal Company's application for a Conciliation Board to investigate a dispute between the above, the latter part of the application stating the nature of the dispute has entirely been annulled as everything has been satisfactorily arranged between the Company and the United Mine Workers of America. The former part of the dispute is still being considered by the Board and the Company have authorized me to make a compromise in the case so that matters can be amicably arranged.

To uphold the discipline of the mine they have asked that the Board concur in their wish to have the two men, Thomas Kosack and Vincent Holub, suspended for one week on account of their disobedience to the orders of the pit boss by firing a shot at an unreasonable time without his sanction. The Company trust that the Board will consider this matter favorably but they are entirely willing to abide by their decision in the matter.

Yours very truly,

(Sgd.) FRANK B. SMITH,

*Representative for the Edmonton
Standard Coal Company.*

After a good deal of discussion by the Board it was decided to adjourn to allow Mr. Stubbs to place the latter proposal before a meeting of the employés in order to try and arrive at an amicable settlement.

The Board then adjourned for the day.

Second Day's Sittings of the Board.

On the morning of the 21st day of December, 1909, the Board again met. All three members being present; prior to the meeting and in accordance with the wishes of all the members of the Board. The Chairman had received the

result of the meeting between the representatives of the employés and the employers, which result was unfavourable to a settlement on the proposals put forward, and having received the names of the witnesses he subpoenaed the following:—Joe Firdel, Vance Barton, Thomas Kosack, Vincent Holub, George Lazeruck, Alex. Zahon, to give evidence before the Board and A. C. Brovey as interpreter.

Evidence.

The first witness called upon was Joe Fridel, who on being duly sworn testified to queries from the Chairman that he was a Polander, that he was a miner at the Edmonton Standard Coal Mine for four years, that he was not at work the 25th of October, that he was at work on the 26th and 27th.

Q. Were the two men, Thomas Kosack and Vincent Holub, discharged on the day you were not at work, or 25th October?

A. I think the day after.

Q. Did you ever see a Notice posted at the Mine relative to times for blasting operations?

A. Yes.

Q. Did you read the notice?

A. Yes.

Q. What did the notice specify?

A. That the miners could only blast at fifteen minutes to twelve and 4:15.

Q. Can you read English?

A. A little.

Smith to Chair. Test him on any clause in the Act.

On test. Failed to make out reading Clause No. 21.

On test. Made better attempt at typewritten reading.

Q. Do you understand English by reading?

A. Understand partly; didn't understand the notice fully but was told what did not understand.

Q. Did everyone fire according to that rule?

A. Yes.

Q. How long did that rule prevail?

A. Until this summer.

Q. After that what happened?

A. The pit boss told the men to blast only once a day.

Q. At what time?

A. In the evening.

Q. Did men blast in the middle of the day after that?

A. Yes.

Q. Did they get permission?

A. I do not know.

Q. Did you get permission?

A. No.

Q. Did you know that you were not to fire in the middle of the day?

A. Yes, everybody did.

Q. Did you ever ask for sanction?

A. Yes, about two weeks ago.

Q. Did you get it?

A. Yes, but was told not to use too much powder.

Q. Do you work near the two men, Thos. Kosack and Vincent Holub?

A. Yes on the same entry.

Q. Were you at work the day they were discharged?

A. No.

The next witness called was Vance Barton, who on being duly sworn, testified that he was Polish by nationality, that he had worked five years in the Edmonton Standard Coal Mine, that he did not remember seeing notice, that he understood there was one, that he only knew what the other men said, which was that miners could blast at 11.45 a.m. and 4.15 p.m., that this rule prevailed until a year ago this summer, that the pit boss told them to blast only once a day on account of ventilation, that shooting once a day still prevails, that any time he wanted to blast during the day he got sanction from the pit boss, that he got white powder to blast with from the pit boss during the day or any blasting before 4.15 p.m., that he worked far away from the two men discharged.

The next witness called was Thomas Kosack, who on being duly sworn testified to queries from the Board that he was Polish by nationality, that he had worked for three years at the Edmonton Standard Coal Mine, that he never knew anything about a notice relative to blasting, that the custom was to blast when they had no coal to load, that that custom still prevails, that he did not understand question, that sanction had to be obtained, that once a day blasting had been in operation for a year, that he had never asked permission, that he was discharged by the pit boss on the 26th of October and that the pit boss did not give any reasons, that he did not shoot on the middle of the day on the 26th, *but shot in the middle of the day on the 25th, said afterward he did not shoot until evening 25th*, that he was discharged 3.30 p.m. 26th, that he was working on the 27th, that he did blast in the middle of the day on the 27th, that he had got his work back because the Committee had seen the pit boss, that the pit boss went into his place with some men on the 27th, he thought managers had stopped the place, that pit boss had asked him if he shot before noon, that he had that he was at work on the 30th, that no reasons were given for discharging him, or given him back his work, that pit boss was in his place between the 21st and 26th

October, that the pit boss did not ask him if he had joined the Union, that the pit boss was sore at him, that he did not have any reason to be sore at him, that he did not work in the same place, that he was shifted to the east, that he thought he was discharged because he belonged to the Union, that he had not any reason for so thinking, that he never shot in the middle of the day prior to the 26th, that he did not know sanction had to be obtained.

The next witness called was Vincent Holub and on being duly sworn testified to queries from the Board, that he was a Polish by nationality, that he had worked during the last eleven months at the Edmonton Standard Coal mine, that he had worked there previous but one year had elapsed between, that he did not see any notice relating to blasting, that he had heard some people say that there had been a notice posted, and that it read shooting should be done at 11.45 a.m. and 4.15 p.m., that that practice was followed, that that practice prevailed until lately, that he meant by lately until now, that the men only got blasting in the middle of the day when they were out of coal, that he did not know if with or without permission, that he blasted once without permission, that he had permission, that he did not know what date, that he had asked permission because he had no coal, that he did not know if the pit boss gave out any white powder, that he was discharged on the 26th, that he was again discharged on the 27th, that no reasons were given in either cases, that pit boss had asked him if he had fired a shot in the middle of the day, that he replied he had, he started work on the 30th October, that it was in the same place, that he was not working now, that his place had stopped since the 14th December.

In the afternoon Vincent Holub was again called and placed on the witness stand, he testified that the pit boss had never asked him if he was in the Union.

The next witness called was George Lazuruck, who on being duly sworn, testified to queries from the Board, that he was Ruthenian by nationality, that he had worked at the Edmonton Stan-

dard Coal for three and a half years, that he had not been in the employ between May and September last, that he saw a notice posted at the mine, that he read it, that he could not read English good, but sufficient to understand it, that the wording of the notice was that the men should only shoot twice a day at 11.45 a.m. and 4.15 p. m., that this prevailed a long time in fact there was not any other notice, that he did not know of any verbal notice, that there was no other written notice, that he had never notice personally, he did not know of any other custom prevailing, that he only shot in the evening, that he never shot in the middle of the day, that many others shot in the middle of the day, that he did not know whether they asked permission from the pit boss or not, that he worked in the third west, that he has heard that the pit boss gave out white powder to shoot in the middle of the day but did not know definitely, a question asked by Mr. Stubbs if there was any conversation between him and the pit boss between the dates October 21st and 26th, was objected to as irrelevant by Mr. Smith, the chair ruling the question in order, witness testified that he had conversation on the 22nd October, that the pit boss said "I hear you are one who is starting a Union here and if I find that to be correct I will discharge you the next morning," that he was appointed on the Committee to investigate the cause of discharge of the first two men discharged, that the Committee saw the pit boss at his office on the 26th October, in the evening and on the morning of the 27th the information they got was that the places in which the men worked were stopped until the Engineers would survey the mine, he was sure of the date of the conversation with the pit boss relative to joining the Union, that it was the 22nd, because the men were organized in the evening. He was also discharged being told that his place was stopped. He did not shoot in the middle of the day.

Alex. Zahon was the next witness called and on being duly sworn testified to the queries from the Board, that he was Ruthenian, that he had worked in the Edmonton Standard Coal Mine three

months, that he also worked two weeks last spring, that he had never seen or heard anything of a notice, that he did not know of any rule relative to blasting in the mine, that he shot at quitting time, because of the smoke, that he worked in the third west, that he did not need to shoot in the middle of the day as he always had coal, that he had heard shots in the middle of the day but did not know any particular one that shot, that here was no one close to him who blasted in the middle of the day, that he was on the Committee to investigate the discharge of the two men, that the pit boss said that he wanted to stop the place on the morning of the 27th men could not go to work until surveyors surveyed the mine that the Committee saw the pit boss on two occasions, one evening of 26th and morning of 27th, that on the morning of the 23rd the pit boss asked him if he has joined the Union. He made no threats.

This being all the evidence the employers wished to submit, the Chairman asked Mr. Smith if he wanted to produce any evidence in behalf of the Company, on receiving a reply in the negative the Board dismissed the witnesses present.

The Board immediately made, a review of the evidence, and after some discussion proposals were made and drafted as a basis of unanimous findings.

Mr. Smith asked for suspended decision to allow him personal deliberation of the proposals drafted.

The Board then adjourned for the day.

Further Session.

EDMONTON, ALTA., 22nd Dec., 1909.

The Board again met this morning at 10 a.m., and after further discussion of the evidence it was decided to have it all typewritten so that the members could more readily discuss the matter in question as taken down verbatim by the chairman.

Board adjourned until afternoon.

Reports and Findings of the Board.

On resuming, the Board fully discussed the questions involved and unanimously came to the following findings:—

That on the charges specified in the application relative to the discharge of three of the employés, and also to the claim that there would be a demand for an increase scale of wages the Company by consent of the Board withdrew;—this brought the dispute to a point where it devolved on the discharge of two of the miners.

In the evidence submitted we find nothing to warrant the discharge of the two men on the 26th October 1909; but, on being reinstated they did on the 27th day of October 1909, deliberately commit a breach of a generally recognized rule, and for such should be censured. Having however in our opinion been punished sufficiently for such breach of discipline we would recommend that Thomas Kosack shall remain in the employ of the Company and that Vincent Holub shall present himself at the mine and be given a working place as soon as possible'

The Board has not had the evidence submitted to them why the two men were discharged on the 27th October. But if the action of the pit boss in discharging the men was taken on a violation of the aforementioned custom, relative to the firing of shots in the middle of the day, then the Board uphold his action, so the better to preserve the discipline of the mine, and the comfort of the employés. We would, however, add that all such rules relating to the discipline of the mine should be kept posted in a prominent place at the mine.

(Sgd) GEORGE F. CUNNINGHAM,
Chairman.

" FRANK B. SMITH,
*Representative Edmonton Standard
Coal Company.*

" C. STUBBS,
Representative of the employés.

STATEMENT SHOWING PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, DURING THE CALENDAR YEAR, 1909.

DURING the calendar year 1909, the Department of Labour received reports from Boards of Conciliation and Investigation established for the adjustment of disputes in the following cases, namely:

1. The John Ritchie Company, Limited, of Quebec, Que., and its employés, to the number of between 200 and 300.

2. The Kingston and Pembroke Railway Company and its employés to the number of nineteen directly and 1,600 indirectly.

3. The Great North Western Telegraph Company and its employés on the lines of the Michigan Central Railway Company in Canada to the number of seventy-five.

4. The Manitoba Cartage Limited, of Winnipeg, Man., and its employés to the number of forty directly and 260 indirectly.

5. The Dominion Coal Company, Limited, of Glace Bay, N. S., and its employés to the number of 3,000.

6. The Nicola Valley Coal Company, of Merritt, B. C., and its employés to the number of 150.

7. The British Columbia Copper Company, of Greenwood, B. C., and its employés to the number of 225.

8. The Winnipeg Electric Railway Company, of Winnipeg, Man., and its employés to the number of 600.

9. The Nova Scotia Steel and Coal Company, Limited, of North Sydney, C. B., and its employés to the number of 340.

10. The Dominion Textile Company and its employés at Montreal to the number of seventy directly and 3,000 indirectly.

11. The Canadian Pacific Railway Company and its railroad telegraphers to the number of 1,600.

12. The Western Coal Operators' Association, comprising: The Alberta Railway and Irrigation Company, the H. W. McNeill Company, the Pacific Coal Company, the Leitch Collieries, Limited, the the Western Canadian Collieries, Limited, the International Coal and Coke Company; Limited and Hosmer Mines, Limited, and its employés to the number of 2,100.

13. The Cumberland Railway and Coal Company, of Springhill, N. S., and its employés to the number of 1,550.

14. The Canadian Pacific Railway and its longshoremen at Owen Sound to the number of 250.

15. The Grand Trunk Pacific Railway Company and its engineers, firemen, conductors, brakemen, baggagemen and yardmen, to the number of 300.

16. The Canadian Northern Railway Company and its maintenance of way employés, to the number of 1,100 directly and 700 indirectly.

17. The Canada West Coal Company, of Taber, Alta., and its employés to the number of 300.

18. The Corporation of the City of Saskatoon, Sask., and labourers to the number of 150 directly and 150 indirectly.

19. The Intercolonial Railway of Canada and its roundhouse employés to the number of twenty directly and 1,000 indirectly.

20. The Canadian Pacific Railway Company and its freight handlers at Fort William, Ont., to the number of 700.

21. The Intercolonial Railway of Canada and its machinists and fitters to the number of 363 directly and forty-three indirectly.

22. The Edmonton Standard Coal Company, Limited, of Edmonton, Alta., and its employés to the number of seventy-five.

In addition to the foregoing disputes a Board was also established on December 3, for the adjustment of a dispute between the Grand Trunk Railway Company and telegraphers and station agents to the number of 760, employed on its lines east of Detroit, Michigan, the report of which had not been received at the end of the year.

Applications for the establishment of Boards were received also in the course of the year from Mr. James W. Blain, of Strathcona, Alta., contractor for the output of the Cardiff Coal Company, Limited, at Cardiff, Alta., and from certain leather workers in Ottawa, Ont., employed by the firms of Messrs. M. J. Wilson & Sons, S. & H. Borbridge, Hugh Carson, Limited, and the Craig Harness Company, Limited.

In the former case proceedings were suspended at the request of the applicant before any Board was established, an agreement having been reached between the Company and its employés.

The application of the leather workers in Ottawa, Ont., related to an industry which did not belong to the public utilities class to which the Industrial Disputes Investigation Act primarily applies, and a Board could therefore only be established by the consent of all parties concerned. Such joint consent not being obtained, no Board was established.

The twenty-two disputes enumerated in the foregoing list related to the following industries, namely:—coal mining, seven; metal mining, one; railway employés (all branches), eleven; street railway employés, one; longshoremen, one; civic employés, one; industries other than public utilities, two.

In eighteen out of the twenty-two disputes recorded the inquiry resulted either in a direct agreement between the parties or in such an improvement of relations as led to the settlement of the dispute. The four exceptions were as follows:—

1. The dispute between the Nicola Valley Coal Company and its employés.

2. The dispute between the British Columbia Copper Company and its employés.

3. The dispute between the Dominion Coal Company and its employés.

4. The dispute between the Cumberland Railway and Coal Company and its employés.

In the case of the dispute between the Nicola Valley Coal Company and its employés, the latter whilst proceedings for the establishment of a Board were under way ceased work. Operations were resumed after the Board had concluded its proceedings, and it is understood that the investigation was of material value in securing a settlement.

In the case of the dispute between the British Columbia Copper Company and its employés individual reports were made by each of the three members of the Board. The report of the Chairman for the settlement of the dispute was accepted by the Company. The employés, however adopted the report which had been made by the

member of the Board who had been appointed on their nomination; and a strike was declared on June 23, at a time when the Company's mines were closed on account of a scarcity in the fuel supply. It was understood that operations were resumed as soon as a supply of fuel was obtained for the Company's operations.

In the case of the dispute between the Dominion Coal Company and its employes the report of the Board for the adjustment of the dispute was accompanied by a minority report from the member appointed on the recommendation of the employes, and on July 6, a strike was declared. The strike had not been declared off at the end of the year, but the output since the close of navigation was considerably larger than for the same period of the preceding year.

In the case of the dispute between the Cumberland Railway and Coal Company and its employes the report of the Board for the adjustment of the dispute was accompanied by a note in which the member appointed on the recommendation of the employes dissented from the findings of the Board in certain respects.

A strike was declared in the Company's mines on August 10, which continued up to the end of the year, the mines having produced no output in the meantime.

In the case of the dispute between the Western Coal Operators' Association and its employes a cessation of work had occurred on the part of the employes before application was made to the Minister of Labour for the establishment of a Board. During the sittings of the Board the mines remained closed, but on June 30, an agreement was signed for the resumption of operations, which was in substantial accord with the findings of the Board.

In the case of the dispute between the Canada West Coal Company and its employes a cessation of work had occurred on the part of the employes before application was made to the Minister of Labour for the establishment of a Board. During the sittings of the Board, the mines remained closed, a settlement was effected very shortly after the receipt of the unanimous report of the Board to which the differences had been referred for adjustment.

WORK OF THE DEPARTMENT OF LABOUR DURING DECEMBER.

On December 10, a money order for \$11.39 was received in the Department of Labour from the firm of Peter Lyall & Sons, Montreal, covering the amount of a claim preferred by Mr. Frederick Dickens, of Verdun, Que., against that firm, for work performed by him as a builders' labourer on the erection of the Montreal Post Office Annex. This claim had been previously investigated and reported on by one of the Fair Wages Officers of the Department of Labour. The sum received was duly transmitted to Mr. Dickens. The amount due Mr. Dickens, as ascertained by the Fair Wages Officer, represented the difference between the rate of 20 cents per hour which he was paid during a period of 456 hours, and the rate of 22½ cents per hour provided for this class of labour in the Fair Wages Schedule which was embodied in the contract with Messrs. Peter Lyall & Sons, for this work.

On December 14, a communication was received by the Minister of Labour from Mr. Thomas Dunlop, carpenter, of Montreal Annex, Que., alleging an infringement of the Fair Wages Clause of the contract with Peter Lyall & Sons, for the construction of the Montreal Post Office Annex, in the rate of wages paid to Mr. Dunlop during his employment as a carpenter on this work. Upon receipt of this complaint steps were at once taken to have the same investigated by one of the Fair Wages Officers of the Department. At the close of the month the claim in question was a subject of communication between the Department and the parties concerned.

Fair Wages Schedules.

During the month of December the Department of Labour prepared at the request of the Departments concerned,

Fair Wages Schedules for insertion in contracts for various public works, as follows:—

Construction of a steel pontoon gate lifter for Welland Canal.

Station building at Renous River, N. B.

Line of railway from the end of the thirty-fifth mile of the branch to La Tuque, on St. Maurice River, to La Tuque Falls, Que.

Restoration of Ordnance Store Building at Ottawa, Ont.

Conversion of church into an armoury at Canning, N. S.

Construction and erection of additional targets at St. John, N. B., Rifle Range.

Engineer fixtures, New Ordnance Stores, Montreal, Que.

Construction of a line of railway on Canadian Pacific Railway, 1.96 miles long, from Thessalon, on Lake Huron, to point of junction with Canadian Pacific Railway Sault Ste. Marie Branch.

Supply, delivery, and erection of steel work, power house on Chambly Canal, Chambly Canton, Que.

Construction of concrete piers and abutments and roadway approaches for Highway Bridge at Chapleau, Allumette Island.

Inquiries, Correspondence, Etc.

During the month of December inquiries were received in the Department on a wide range of subjects, many of them relating to the operation of the Industrial Disputes Investigation Act, and others seeking information on various subjects of commercial, social and economic interest. Among those who were furnished information in regard to the Industrial Disputes Investigation Act were:—The Imperial Trade Commissioner, Montreal; the United States Consul-General, Montreal; the President of the Federated Trades of the Canadian Northern Rail-

way System, Winnipeg; the Canadian Government Agency, St. Paul, Minnesota; an important firm of engineers in New York City; an ex-member of the New York State Assembly and a very large employer of labour in the City of Schenectady, N. Y.

Inquiries were received from two different quarters for data respecting the pulp and paper mills of the Provinces of Ontario and Quebec. The Department was also consulted in regard to the number of persons employed in the lumbering and mining industries of Ontario and Quebec; and for the purpose of obtaining also the addresses of large employers of labour in the lumbering industry throughout Canada.

A communication was received from the Section of Trade and Commerce of the Political Science Seminary in the University of Kiel, Germany, seeking information respecting mining and industrial statistics in Canada.

Inquiries were also made in respect of Canadian industrial legislation; the conditions of employment in various branches of industry; the effect of certain employments on the health of the working men, and the average length of artisans' lives; the laws in Canada on the subject of hired help; the laws in Canada with regard to the establishment of free employment agencies; the number of Asiatics employed in various callings in the Province of British Columbia; statistics of boiler explosions, and other industrial accidents in Canada; the cost of living; co-operation; Chinese immigration; workmen's compensation; employers' liability; building operations in Canadian cities; public and private control of public utilities; the wages paid to various classes of workmen; the exports of farm products, and the prices at which such products are sold; and the industrial situation in Nova Scotia.

INDUSTRIAL AND LABOUR CONDITIONS IN CANADA DURING 1909.

THE year 1909 has been characterized by a steadily increasing activity in general trade and industry. The expansion was less marked in the first half

of the year, when a favourable winter season was followed by a backward spring. From the beginning of the summer, however, the revival was pronoun-

ced, and the closing months witnessed a degree of general activity unexperienced since 1906 and the opening months of 1907.

The causes and outstanding features of this return to buoyancy were various. Canada has shared with many other countries in the comparatively easy money market and the general process of recovery from the crisis of 1907. A very important factor, however, in the recovery in Canada, has been the heavy agricultural yields of the year, the value of the crops being estimated as showing an increase of \$100,000,000, that is, of twenty per cent. as compared with that of the crops of 1908. The promise of this return which the early months of summer foreshadowed produced an immediate effect on general trade and industry. The lumbering industry, which had been quiet for some time past, showed a strong tendency upward. In the mining industry, also, especially in the metalliferous branch, conditions became much more buoyant. General manufacturing became active, and the tendency toward expansion which had been a characteristic of 1906-1907, but which had been checked by the panic of the latter year, again asserted itself. From similar causes, the transportation trades, both by rail and by water, had a much busier autumn than in 1908, the late date at which navigation closed and the continuance of mild weather until after December 1, having materially assisted the movement of freights. Passenger traffic was heavier than in some years past and railway earnings showed a marked advance. Accompanying these developments, the heavy expenditures in connection with the National Transcontinental Railway and the extensions of the existing railway systems were continued, and had a far-reaching effect on general trade and employment. The building trades, after a year of quiescence, became active again, and though the high returns of 1906 and 1907 were not reached the amount of building completed largely exceeded in value that of 1908. Wages and cost of living were upward, a feature of the year having been the rapidity with which prices recovered after the severe

depression of the autumn of 1907. Immigration, also, after a marked falling off in 1908, resumed its upward tendency, and returns for the past year were over twenty-five per cent. heavier than those of 1908.

At the close of the year the outlook was regarded as most favourable not only for the immediate future but for the general industrial season of 1910. While there were many out of employment from seasonal causes, as is usual at this period of the year, little or no inconvenience or distress was reported from any of the large centres of population, and with normal conditions the winter will be a satisfactory one for the labouring classes. In connection with outdoor work during 1910, both railway construction and building promise to continue with unabated activity, while financial and trade conditions are regarded as being on a sound basis.

Immigration and Colonization.

During 1907, the number of immigrants arriving in Canada was approximately 280,000. Returns for 1908, showed a falling off of nearly one-half, the decrease being almost entirely in arrivals through ocean ports. During the past year, however, there was a resumption of the heavy immigration movement characteristic of the years previous to 1907, the returns at the close of the year showing an increase of over one-quarter as compared with the return for 1908. The careful supervision exercised by the Government with regard to the quality of the immigrants entering Canada was continued during the past year with satisfactory results. The Province of Ontario also took active steps to secure the immigration of a suitable class of farm labourers and domestic servants. The influx from the Western States into Canada was even heavier in volume than during the preceding years, it being estimated that nearly 70,000 persons entered the Dominion from this quarter alone. The number of homestead entries granted and the acreage of Dominion lands patented showed a decrease, the number of entries in 1908, having been unprece-

dentedly large. On the other hand the sales of farm lands by land companies showed an increase in many cases in 1909.

Wages and Hours of Labour.

Wages which were on stationary or lower levels in 1908, especially with the unskilled class, were upward in tendency during the past year. Railway construction camps, which were able to command an abundance of help at a decreased rate in 1908, experienced some scarcity of hands as the summer advanced and rates were substantially increased. River drivers in the Ottawa also obtained an advance compared with the preceding year. A noteworthy increase of the year was that granted by the Dominion Government to letter carriers and post office clerks. Printers and civic employés also obtained higher wages in a number of localities. The general tendency in this respect became more pronounced in the late summer and autumn months, when unskilled labour obtained marked increases especially in Western Canada. Several important agreements affecting railway employés and involving higher wages were signed during the autumn. Wages in the building, woodworking and metal trades were firm to upward in view of the increasing activity in these branches. In connection with the engaging of men for the winter lumber camps, wages were on a higher level than in 1908.

Prices—The Cost of Living.

Prices and cost of living were upward during the year. Following the panic of 1907, the steady advance in the general price level which had been in progress for several years past received a check, and in some instances recessions were noted. With the trade revival of the past year, however, this quiescence in the market disappeared, and prices resumed the tendency characteristic of the period prior to 1907. This was especially pronounced during the latter half of the year when the price of several important staples reached a higher point than in many years past, while the general cost of living was higher probably than at any previous time in

Canada. Among commodities in the price of which the upward tendency was marked during 1909, the following may be mentioned: grains, hogs, eggs, flour, hides, cotton, rubber, furs and structural material. Real estate was firm to upward.

Interruptions to Industry.

There were sixty-nine trade disputes reported to the Department of Labour to have been in existence during 1909, being a similar number to that reported in the year 1908, and compared with 149 in 1907; 138 in 1906; eighty-seven in 1905; 103 in 1904; and 160 in 1903. The number of workpeople involved was approximately 17,873, compared with 26,232 in 1908. The number of working days lost through trade disputes was approximately 842,275 in 1909, compared with 718,443 in 1908, and with 613,986 in 1907. The increase in the loss of time in 1909, was chiefly due to two strikes of coal miners in Nova Scotia, one of which began on July 6, and the other on August 10. In both cases the majority of the strikers remained out of work during the rest of the year. The former dispute affected 2,500 and the latter 1,700 men.

Conditions in the Industries and Trades.

Conditions of employment during 1909, in the several industries and trades throughout Canada may be briefly summarized as follows:—

Agriculture.

The year was more favourable to agriculture than for several seasons past, and the heavy yields and high prices prevailing in almost every branch of the industry and section of the country was the most outstanding feature of the year, imparting a general buoyancy to trade and industry especially during the latter half of the year. The final estimate of the Census and Statistics Branch of the Department of Agriculture placed the total value of the Dominion of Canada field crops in 1909, at over \$530,000,000, an approximate increase compared with that of the preceding year's crop of \$100,000,000.

The winter season was favourable, the snowfall being abundant and live stock wintering well. The spring was somewhat late in opening and sowing was correspondingly retarded. During the months of June and July, however, growth was very rapid, the weather being warm with a fair supply of moisture, with the result that the delay in seeding was largely overtaken, and the harvest was not more than a few days later than in 1908. Danger from frosts was avoided and the grain garnered in good condition notwithstanding a more or less general scarcity of help. The root crops, except in the Maritime Provinces where rains caused damage, were gathered under almost equally favourable conditions, and the late date at which navigation closed enabled good progress to be made with marketing. Pasturages during the autumn months were in excellent condition, the year being in marked contrast in this respect with the corresponding period of 1908.

The dairy season of 1909, was uniformly regarded as favourable. The gross value of cheese and butter exports was \$17,861,755 compared with \$18,987,340 in the preceding year, a decrease of \$1,125,585. Compared with the returns of 1907, there was a decrease of \$2,324,643 and compared with those of 1906, a decrease of \$8,137,279. The falling off was most marked in the case of butter exports, which was largely attributed by competent authorities to the increase in home consumption.

Fruit growers on the whole had a very profitable year.

Fishing.

The year was on the whole a fair one for fishermen. Banking fleets in the Maritime Provinces brought home some of the largest fares on record. In British Columbia it was the year of the "big" run of sock-eye salmon and as a result some twelve traps and seventy-three canneries were in operation, though the total take is estimated below that of 1905, the last "big" year. In other respects the year was without remarkable incident.

Off-shore fishermen in the Maritime Provinces reported, as a rule, fair cat-

ches. Returns from the lobster fisheries were light; the Fisheries Committee of the House of Commons conducted an extended investigation into conditions in this branch of industry with a view to improvement.¹ The condition of the oyster fisheries of the Maritime Provinces was also made the subject of Governmental inquiry by the different provinces concerned.²

On the Great Lakes and on the lakes of the Northwest Provinces conditions were normal.

Apart from the activity in connection with the salmon run the herring fishery at Nanaimo had a successful season. The whaling stations on Vancouver Island were also busy, though catches were less extensive than in the preceding year. The Victoria sealing fleet reported a very light catch.

Fish prices were well maintained, being upward in the closing months of the year.

The regulation of fishing in contiguous waters of Canada and the United States was the subject of negotiations between the two countries during 1909. The Royal Commission on the Georgian Bay fisheries presented its report and a second commission began the taking of evidence with regard to the fisheries in the Northwest Provinces. To encourage the sale of Canadian fish products in the interior provinces a rebate of express charges previously allowed for fish caught off the Maritime Provinces was continued and was extended to cover the Pacific ocean product forwarded to points in the Northwest Provinces.³

Lumbering.

The end of 1909, saw the lumbering industry in much more favourable condition than at the beginning of the year. Weather conditions during the opening months of 1909 were favourable for work in the woods and a fair cut was made; in the Northwest Provinces the cut of ties was unprecedentedly heavy. High water in the spring however, delayed the opening of the eastern mills by fully two weeks and caused at some points consider-

¹ See *Labour Gazette* for November, 1909, page 526.

² See *Labour Gazette* for October, 1909 page 491.

³ See *Labour Gazette* for June, 1909, page 1,282.

able embarrassment. On the other hand with the opening of the sawing season a period of continuous and steady revival in the general tone of the lumber trade took place. Prices became firm to upward, and the activity of the mills was correspondingly affected. The change was most marked in the case of British Columbia where, for some time previous, extreme dullness had prevailed in the industry. This was especially true in the Mountain section of this Province following upon the increased demand from the Prairie Provinces resulting from the heavy immigration movement and the favourable crop returns. In the closing months of the year the gangs being sent into the woods for the coming season were larger than in the preceding year and were obtaining higher wages. Though the mild weather and heavy rainfall delayed the beginning of operations in the woods the outlook at the close of the year is for a larger cut than in the preceding season.

An increasing recognition of the necessity of safeguarding the lumber supply of the country was evidenced on many sides during the year. New forest reserves were established by provincial authorities and the problem of fire protection received careful attention. The Dominion Forestry Association appointed a permanent secretary and held a special convention at Regina, Sask., for the encouragement of tree planting in the Prairies Provinces. The British Columbia Government appointed a special timber and forestry commission, which conducted an extended investigation into conditions governing the industry in the Province during the summer and autumn of 1909. The question of the imposition of an export duty on pulp wood was considerably debated.⁴

Mining.

As in several other branches of industry conditions were much more favourable in the closing than in the opening month of the year.

In the coal mining branch, labour disturbances caused heavy losses. Espe-

cially was this the case in Nova Scotia, where three disastrous strikes extended over a period of several months throwing a large number of men out of employment and seriously diminishing the output. In the closing months of the year, however, outputs were steadily increasing and conditions were more favourable than during the summer months. The shipping season was favourable, though somewhat late in opening. The settlement of a long-standing disagreement between the Dominion Coal Company and the Dominion Iron and Steel Company was a feature of the spring months; later the amalgamation of the Companies was under discussion. The collieries of Alberta were seriously affected by labour disturbances in the spring and early summer, but a satisfactory settlement was arrived at, and outputs were largely increased in the latter half of the year. In the Crow's Nest Pass and on Vancouver Island the year was characterized by a steady increase in activity.

Metalliferous mines had a good year. The output of asbestos was heavy, though the mica trade remained dull. A merger of several of the asbestos companies was effected during the year. Outputs from the Cobalt camp were satisfactory and the other metalliferous mines of Ontario were active. Prospecting in the northern portion of the Province was very active. An important incident was the opening up of the Gowganda district and the discovery of many promising claims in that vicinity. In British Columbia the mines became generally active in the late summer months and continued so until the close of the year.

Reviewing the past year, the *Canadian Mining Journal* of January 1, 1910, said:

"When, one year ago, we reviewed the growth of Canadian mining during the previous twelve months, we expressed the belief that the year 1909, was to be a period of strong expansion. Events have proved this belief to be well founded. The past year has brought health and strength to almost every department of mining in the Dominion. Indeed, the commercial and financial conditions have been excellent; and rich accessions, in the way of new mining territory, have been added to our stores of mineral wealth. As a nation, Canada looks forward to the coming year not only without misgivings but with sturdy confidence. Never before were the prospects so good for the industry; and most certainly, never before have the people of Canada been so widely interested in that industry.

⁴ See *Labour Gazette* for October, 1909, page 408.

Manufacturing.

The year was one of steadily increasing activity, though the increase was comparatively slow during the first six months. Early in the summer, however, with favourable reports from the growing crops and the general financial improvement, the movement became more rapid and widespread. The iron and steel trade was busy throughout the year. Manufacturers of structural material also reported orders heavy. In the late summer and autumn months this activity was extended over many branches, especially smallwares, which had previously been comparatively quiet. Branches reporting a busy year were flour mills, confectionery establishments and clothing manufactories. There was a general expansion in staffs and a lengthening of hours of employment. The tendency towards the enlargement and improvement of factory buildings, which was so marked a feature of the years 1906 and 1907, was also resumed. Cotton mills, as a result of the high price of raw cotton, were on short time throughout a considerable portion of the year, but woollen establishments reported an increase in activity. Manufacturers were advertising for help in some localities during the closing weeks of the year, and the outlook was for a continued and increasing buoyancy.

Railway Construction.

The year was a very busy one. It was estimated that fully \$28,000,000 were expended in Western Canada, not including the sums expended for supplies and material, on new railways during the twelve months ended December 31, 1909. A large part of this expenditure was in connection with the construction of the Grand Trunk Pacific Railway lines and branches; but the Canadian Pacific Railway and the Canadian Northern Railway completed several important extensions in the Provinces of Manitoba, Saskatchewan and Alberta under substantial subsidies from the several Provincial Governments. The main line of the Grand Trunk Pacific Railway between Edmonton and the head of the Great

Lakes was formally opened for traffic. Altogether over 1,000 miles of new steel were laid by the railway companies of Western Canada during the past season. This total is made up by the different companies as follows:—Canadian Pacific Railway, 404 miles; Canadian Northern 250 miles; Grand Trunk Pacific, 403 miles, this making a total of 1,057 miles. In addition to this, some work was done by the Great Northern in British Columbia. According to these figures more than one-tenth of the railway mileage of the country was added to the existing systems, the total for the entire western Provinces at the beginning of 1909, being 10,415 miles. The end of the year thus saw 11,472 miles of railway existing in that part of Canada lying west of the Great Lakes. In Ontario and the Eastern Provinces, also, the year, from the standpoint of railway construction, was a very busy one. Several thousand men were employed on the National Transcontinental line in New Brunswick and Northern Ontario, and the Canadian Northern and Canadian Pacific Railway Companies were at work on some important branches. Altogether upwards of 4,000 miles of railway lines were under contract during the year. A feature of the season was the rapidity with which the regions opened by new railway lines were settled, a large number of new towns coming into existence, especially between the head of the lakes and the Rocky mountains. The outlook at the close of the year was that the season of 1910, would be fully as active as that which has just closed. Especially noteworthy in this connection were the developments promised by the Grand Trunk Pacific and the Canadian Northern Railways in British Columbia. The whole of the National Transcontinental line between Winnipeg and Moncton is now under contract and contracts have been awarded for 399 miles in the mountain division.

From the standpoint of the labour supply, contractors during the second half of the year were unable to obtain a sufficient number of men at many points in Western Canada, notwithstanding a considerable advance in wages.

Some heavy additions to rolling stock and general equipment were made by the various companies during the year, and railway repair shops at several points were enlarged, as, for example, at Moncton, Montreal, Stratford and elsewhere.

Important features of the year were the completion of the tunnel under the Detroit river at Windsor, the completion of surveys in connection with the proposed railway to Hudson Bay, the completion of the double track of the Canadian Pacific Railway from the head of the lakes to Winnipeg, the erection of a large number of elevators by the railway Companies in Western Canada and the completion of two spiral tunnels, being the first of the kind to be erected on this continent, by the Canadian Pacific Railway Company in British Columbia.

General Transport.

The year was an active one for transportation employés of all classes, especially during the summer and autumn seasons.

Railway employés had a good year, traffic having been fair during the winter and spring, and heavy during the summer and autumn seasons. Passenger traffic was exceptionally heavy. This was reflected in increased earnings, and gave employment to an increased number of train crews and other workmen. The grain movement of the autumn months began at an earlier date than last year, and in volume greatly exceeded that of any previous year. Railway shop employés after a quiet winter and spring season became busy. Street railway employés also had a good year, the number of passengers carried in nearly all the cities showing an increase.

Navigation employés of all classes had an active year. The winter port business showed an increase over that of the preceding year. Navigation was somewhat late in opening and the volume of traffic was for a time variable; later in the season, however, canals reported increasing traffic and at the close of the year the total largely exceeded that of 1908, the total tonnage being upwards of 32,000,000, as compared with 17,000,000

in the preceding year. The increase in the traffic of the Sault Ste. Marie canal alone was over 14,000,000 tons. The season of ocean navigation at Montreal opened on April 23rd, and closed on November 28th, being nine days longer than that of last year. The various shipping lines reported a fair business, and in passenger traffic there was a large increase. A feature of the season was the inauguration of the White Star Dominion line service. The import trade was in excess of last year, but exports, owing chiefly to a decline in grain and cattle were lower. The total harbour revenue of Montreal was \$350,883 compared with \$333,123 in 1908.

The Trades.

The various skilled trades had a good year. Employés in the building trades were much more active than in 1908, and though the total value of buildings erected was below that of 1907, the outlook is for a busy winter season on inside work and a good year in 1910. Employés in metal and woodworking establishments became more active in the last six months of 1909, than for some time past. Printing and clothing employés were active, as were bakers, confectioners, cigar makers and tobacco workers. Tanners and curriers were somewhat quiet, but leather workers were well employed. Retail clerks were more active than in 1908. Hotel and restaurant employés were also more active, the tourist season having been a heavy one. Unskilled labour had a much better year than in 1908, being well employed at good wages in nearly every locality throughout the season of activity.

Canadian Trade and Revenue.

The import and export trade of the Dominion showed a steady upward tendency throughout the year. Compared with the total return for 1908, an increase of over \$55,000,000 was recorded, whereas in 1908 the total total foreign trade declined by about \$70,000,000 as compared with the preceding year. Espe-

cially noteworthy was the growth in imports which characterized the latter half of 1909.

Domestic trade reflected the general industrial buoyancy and was at many points estimated to be twenty per cent. heavier than in 1908. The Christmas trade was exceptionally heavy and the quality of the goods purchased showed a considerable improvement. Bank clearings showed a very heavy increase compared with 1908. Collections were easy and bank profits upward in tendency. The outlook at the close of 1909, was for an active and prosperous year.

The expansion which Western trade has enjoyed during last year is set forth in the statement of Winnipeg's bank clearings which was issued on the last day of the year. The figures show a remarkable growth over those of 1908, the increase being in the neighborhood of \$153,000,000.

Statistics relating to business failures in Canada in 1909, as reported by R. G. Dun & Company, show a marked improvement as compared with the previous year. The number of firms suspending diminished and the amount of liabilities was correspondingly reduced, though certain failures of exceptional size affected the general comparison. All commercial insolvencies last year numbered 1,442 and involved \$12,982,800 of defaulted indebtedness, whereas in 1908 1,640 concerns closed their doors, owing \$14,931,790. With that exception, however, it is necessary to go back to 1897, to find as large a total of failures, and in only one other instance during the same period were the liabilities as heavy—namely, \$13,221,259 in 1907. Improvement was greatest in the manufacturing division, 354 defaults for \$3,933,938 comparing with 426 for \$5,976,498 in the preceding year and 393 involving \$6,667,452 in 1907, while the trading class supplied 1,059 failures against 1,171, but a few suspensions of unusual size swelled liabilities to \$7,867,287, which was only moderately smaller than in 1908. In the third division, including lines of business not properly included in the other two classes there were twenty-nine defaults, or fourteen less than in the previous year, but the

loss in money was considerably greater, partly because of two large brokerage suspensions late in the year, which made total liabilities \$1,181,575 against \$721,856. There were no banking failures, whereas two institutions closed their doors in the year preceding, owing \$2,137,224.

Labour Legislation.

An enumeration of the more important enactments affecting labour passed by the Parliament of Canada and by the Legislatures of the several Provinces during 1909, will be of interest in a review like the present.

The *Dominion* legislation of the year provided for the creation of a permanent commission for the conservation of the natural resources of the Dominion, amended the government annuities Act of 1908, sanctioned the granting of an increase in wages to letter carriers and other Post office employés, enlarged the authority of the Board of Railway Commissioners in the matter of the protection of level highway crossings, and gave additional encouragement to the agricultural industry and transportation interests.*

Nova Scotia legislation of the year included amendments of the Factories Act, the Children's Protection Act, the Companies Doctors' Act and the Mechanics' Lien Act. Changes in the law respecting the reporting of accidents in metalliferous mines and respecting the publication of Industrial statistics were also made. An important act of the year was one establishing a Board of Public Utility Commissioners for the Province.

In *New Brunswick* the more important labour legislation of the year referred to Factory Inspection, Immigrant Childre and Prison Labour.

The most important act of the year from a labour standpoint in *Quebec* was a Workmen's Compensation Act. The Quebec Trade Disputes Act was amended and the mining law enlarged in the matter of the granting of miner's certificates. A Public Utilities Commission was created by special statute. Other subjects

*See the *Labour Gazette* for June 1909, p. 1337.

dealt with were, Sunday Observance, the Protection of Railway Crossings, the administration of Crown lands and forests, the pensioning of public officers, etc.

Among the subjects of new legislation in Ontario were, safety in mines, child labour, the protection of wages, woodmen's lien, the protection of miners, Sunday cars, safety in public buildings and the regulation of public utilities.

Manitoba legislation during 1909, included acts for the protection of wages, the inspection of steam boilers and the regulation of government and municipal telephones and telegraphs.

In Saskatchewan, the new legislation of the year gave additional protection to threshermen in the matter of wages, and to employ generally under the Master and Servants Ordinance. The Children's Protection Act of 1908, was amended, and some important legislation passed for the encouragement of railway construction and the carrying out of public improvements.

The Alberta Legislature amended the Steam Boilers' Act and the Mechanics' Lien Act of 1906, and passed a comprehensive measure for the protection of neglected and dependent children. Some important railway legislation became law.

British Columbia legislation of the year, included acts providing additional safeguards for those employed in coal and metalliferous mines, relating to co-operation, and regulating the storage of gasoline and the manufacture of timber within the Province.

Notes.

By an explosion in No. 2, mine at Extension, B. C., thirty-two miners lost their lives.

The fourth Quinquennial Congress of the International Council of Women was held at Toronto.

The American Federation of Labour held its twenty-ninth annual convention at Toronto, Ont., in November.

At the annual meeting of the Dominion Grange it was resolved to form a National Council of Agriculture.

A Civic Federation, for the purpose of providing means for the settlement of labour disputes was formed at London, Ont.

The commission for the conservation of natural resources of Canada, in accordance with the Act of Parliament of the session of 1909, was named on August 31.

The public ownership of interior elevators was actively discussed in Western Canada and some important action taken in the closing weeks of the year.

The Nova Scotia Eight-Hour Commission took evidence during the year. The Ontario Milk Commission also collected a large amount of data relating to the province.

A large number of co-operative people's banks, for the encouragement of thrift and the combatting of usury, were established in the Province of Quebec. Various co-operative distributing societies had a successful year. An important incident in connection with the co-operative movement in general was the formation at Hamilton, Ont., of a Co-operative union, to include all *bona fide* co-operative associations in Canada.*

*See the *Labour Gazette* for April, 1909, page 1123.

REVIEW OF TRADE DISPUTES IN CANADA DURING 1909.

THE total number of strikes and lock-outs in existence in Canada during 1909, was sixty-nine, the same number as in the next preceding year, but much less than in any previous year of which the Department has record. There was, however, a considerable increase in the

loss of time to employes occasioned by trade disputes. This was owing in great measure to strikes in certain coal mines of Nova Scotia, in which a large number of employes were involved for several months and a strike of coal miners in Alberta and Eastern British Columbia,

which continued for three months and affected over 2,000 men. Apart from these disputes, there were no others of serious importance during the year.

Strike of Coal Miners in Alberta and Eastern British Columbia.

On April 1, about 2,100 men employed in the mines operated by members of the Western Coal Operators' Association in Alberta and British Columbia, stopped work, on account of their failure to reach a new agreement with their employers as to working conditions. On May 3, an application on behalf of the employés was received at the Department for the establishment of a Board of Conciliation and Investigation, and the Board was appointed on May 15. A month after the report of the Board was made, and on June 30, an agreement was signed by representatives of both parties, following closely the findings of the Board, and work was resumed. This dispute affected the mines at Hosmer, Coleman, Lille, Lethbridge, Bankhead, Hillcrest, Bellevue, Passburg, Canmore, Taber and Frank, and caused the closing down of the British Columbia Copper Company's smelter and mines at Greenwood, B. C.

On July 6, a strike of about 2,500 coal miners of the Dominion Coal Company, took place at Glace Bay, N. S., on account of the refusal of the Company to recognize the United Mine Workers of America. It was claimed by the Company that an

agreement was in force which had been made with the Provincial Workmen's Association, on behalf of its employés, and for this reason the United Mine Workers of America could not be recognized. So far as the strikers were concerned, the dispute continued during the rest of the year, although many of them sought employment elsewhere. The Company continued to operate its mines with a diminished staff, and gradually filled the places of the strikers. In the last two months of the year the weekly output was in excess of the corresponding weeks of 1908.

On August 10, a strike of 1,700 employés of the Cumberland Railway and Coal Company took place at Springhill, N. S., after their failure to adjust their differences with the Company through a Board of Conciliation and Investigation, which presented its report on July 23. The principal cause of the dispute was the refusal of the Company to recognize the United Mine Worker of America, but the employés also wanted certain changes in the conditions of their employment with regard to the determination of the standard weight of a box of coal, the schedule of prices, and the docking system. The mines were closed on account of this dispute until the end of the year, and there were also thrown out of work many of the Company's railway employés, the crews of one tug and seven barges, and a number of wharf hands and trimmers.

Magnitude of Trade Disputes.

There were approximately 17,881 employés involved directly and indirectly in trade disputes which began during 1909, compared with 26,232 in 1908. The following table shows the numbers affected, according to the months in which each dispute began.

TOTAL NUMBER OF EMPLOYES INVOLVED IN TRADE DISPUTES WHICH BEGAN DURING 1909.

	Directly.	Indirectly.	Total.
January.....	176	176
February.....	169	169
March.....	716	158	874

Loss of Time in Working Days.

The loss of time to employés through trade disputes during 1909, amounted approximately to 842,275 working days, compared with a loss of approximately 718,443 in 1908. An estimate of the loss of time by months is given in the following table.

TABLE SHOWING LOSS OF TIME IN WORKING DAYS TO EMPLOYES THROUGH TRADE DISPUTES BY MONTHS DURING 1909.

Disputes by localities affected.

Of the sixty-eight disputes which began in 1909, twenty-six took place in the Province of Ontario and twelve in Quebec. British Columbia ranked next with eight dis-

putes and Manitoba with seven. No strike or lockout was reported to have taken place in Prince Edward Island. In the following table the number of disputes is given by Provinces according to the months in which they began.

Methods of Settlement.

Of the sixty-nine disputes in existence during 1909, including one which began in the previous year, sixty-five were terminated either by definite settlements being reached, or by the places of the strikers being filled and industrial conditions ceasing to be affected. In twenty-one cases settlements were effected through negotiations between the parties concerned, and in twenty cases by the places of the strikers being filled. The termination of four strikes was due to conciliation under the Industrial Investigation Act, 1907.

The following table shows the methods of settlement of trade disputes during 1909.

PARLIAMENTARY REVIEW OF BILLS, MOTIONS, DEBATES, Etc., AFFECTING LABOUR.

IN the House of Commons, on December 6, Mr. Hugh Guthrie (South Wellington) moved:—"That in the opinion of this House it is advisable that a commission of inquiry should be forthwith appointed to investigate the needs of Canada in respect of technical education, and to report on ways and means by which these needs may be best met." In Mr. Guthrie's speech in support of the resolution, and in the ensuing debate, the point was strongly emphasized that the subject of technical and industrial training is one deserving of greater attention than has been bestowed upon it in this country to the present time.

The debate on Mr. Guthrie's resolution was adjourned on motion of the Honourable Mr. King in order that the Government might have opportunity of further considering the matter from the point of view of the attitude of the Provinces towards federal action.

The resolution is in terms very similar to one which was presented in the House of Commons by Mr. Guthrie in 1907, and it was stated by Mr. Guthrie that, in again bringing the proposal forward, he was

acting on the request of the Dominion Trades and Labour Congress and of the Canadian Manufacturers' Association, both of which parties had passed resolutions upon the subject. Resolutions in support of the present proposal had also been passed, he said, by between fifty and sixty of the leading Boards of Trade and Chambers of Commerce in Canada. Mr. Guthrie admitted that the most formidable objection which could be made to his proposal was the point that under the British North America Act the question of education is defined as one for the exclusive jurisdiction of the Provinces. He contended, however, that the term "education" as used at the time of the passing of the British North America Act did not comprehend that industrial training which, within more recent years, has come to be recognized as an indispensable adjunct to the commerce and industry of the world, and maintained that the federal control of matters relating to the trade and commerce of Canada which was provided for in the B. N. A. Act meant that industrial training was distinctly a matter for federal action.

Mr. Guthrie urged also that the Dominion Government had already entered the field of industrial training by the establishment of various Experimental Farms, the Royal Military College, Kingston, the School of Navigation, Kingston, the Marine Biological Research Stations on Georgian Bay and on the coast of Gaspé; and by the important research work which is being conducted through the Dominion Department of Mines. In the course of his address Mr. Guthrie spoke of the attention which had been given to industrial training in Great Britain, in Germany, in the United States, and in other countries; and maintained that very great benefits had been derived from technical and industrial instruction which had been afforded in these countries.

The Minister of Labour.

The Honourable W. L. Mackenzie King, Minister of Labour, referred in opening to the loss of life from industrial accidents in Canada as evidence of the existing need for a more efficient system of training for workmen in the various departments of industry. During the past ten years 624 coal miners had lost their lives in the operation of the coal mines of British Columbia, whilst from 13,000 to 14,000 Canadian workmen of all classes had been killed during this decade in the course of their employment. Under modern industrial conditions technical education was, he believed, a necessity for any nation which is to keep abreast of the times. Not only had industrial conditions changed within recent years but a complete change had occurred in the nature of industrial competition which had become worldwide. If Canadians were to hold their own against modern competition it would only be bringing their workmen up to the highest degree of efficiency, and by seeing that their industries were managed by men second to none in technical knowledge. The need for technical education in Canada was clearly shown by a comparison of conditions in this country with conditions in Germany, France, Switzerland, and the United States. Another consideration which had been alluded to

during the debate was the shortage of skilled workmen in Canada for the development of the nation's industries. Moreover as Canadians we should not overlook the obligation which society owes to the working classes to enable the latter to realise to the full the capacity which they have within them. Continuing, the Minister alluded to the work of technical education as now carried on in the Provinces of Nova Scotia, Quebec, Ontario and also to the efforts which were being made by some of the other Provinces in the same direction. The Department of Labour, he observed, had gathered much information on the subject of technical education and would be pleased to place the same at the service of all who were interested in the subject. Too much importance, he said, could not be attached to the work of technical education by authorities whose duty it was to carry on this work; some doubt as to the jurisdiction of the Parliament of Canada in the matter had been expressed and this should be carefully considered. It had been stated that the provinces had no objection to the Dominion pursuing such a course. The Minister thought that before the Dominion Government took the step suggested in the resolution there should be something more than a negative attitude on the part of the provinces, and that it should not be a case of "no objection" but a case of an expressed desire from the Provincial authorities on the subject. Under these circumstances he thought it would be better if the mover of the resolution would allow the Government further opportunity to consider the question from this point of view, and therefore moved the adjournment of the debate.

Mr. R. L. Borden.

Mr. R. L. Borden expressed the opinion that in a comparatively new and almost undeveloped country like Canada it would seem to be eminently wise, in the first place, to take stock, as it were, of the resources which the country possesses, and, in the next place, to endeavour to come to a conclusion as to the most effective way in which these resources can be developed. As to the importance of

industrial and technical education there was but one opinion. To his mind the argument of Mr. Guthrie on the constitutional question was absolutely convincing. Yet he had never heard of any province raising an objection. The Parliament of Canada, had the right to vote money for any purpose that it might deem proper and had exercised this right in various ways. He was in entire sympathy with the object which the mover of the resolution had in view, and trusted that action would be taken along the line therein suggested if no other action could be taken. For himself, he would have greatly preferred that more definite and practical and speedy action should be taken than that suggested in the present resolution.

The Minister of Finance.

Honourable W. S. Fielding, Minister of Finance, declared his intention of voting for the adjournment of the debate, not for the purpose of side-tracking the question, but, that further opportunity might be given of considering not the wisdom of doing something but the best way of aiding a movement which seemed to command the favour of the whole House. For his own part he joined most heartily in all that had been said with regard to the necessity and importance of technical education. The Government itself had every desire, moreover, to show its appreciation of this work. Much had already been done in Nova Scotia, to mention but one of the Provinces, in the matter of technical education, and it would be wise, he thought, before the Dominion proceeded to deal with the question, for Parliament to put itself in communication with the Provincial authorities so as to ascertain how the Federal and Provincial authorities could work together.

In the course of the debate speeches in support of the resolution were made by Messrs. Alexander Haggart (Winnipeg), Ralph Smith (Nanaimo), J. H. Sinclair (Guysborough), A. C. Macdonell (South Toronto), Alphonse Verville (Maison-neuve), F. L. Fowke (South Ontario), A. B. Crosby (Halifax), J. D. Reid (Gren-

ville), Morley Currie (Prince Edward County), Wm. Thoburn (North Lanark), and Col. S. Hughes, (Victoria).

Other participants in the debate were Dr. T. S. Sproule (East Grey), and Mr. Louis Lavergne (Drummond and Arthabasca).

On the conclusion of the debate a division was recorded on the motion of the Minister of Labour for the adjournment of the debate, resulting, as above mentioned, in the adjournment of the debate.

In the House of Commons, on December 9, Mr. Alphonse Verville (Maison-neuve) moved the second reading of Bill No. 21, respecting the Hours of Labour on Public Works, and in doing so outlined the reasons which in his judgement made it desirable that the measure in question should become law. On the conclusion of the ensuing debate the Bill was read a second time, and on the motion of Mr. Verville was referred to a special committee of the House of Commons, consisting of Honourable W. L. Mackenzie King, Minister of Labour; Mr. A. C. Macdonell, (Toronto); Mr. Ralph Smith, (Nanaimo); Mr. Wm. Staples, (Macdonald); Mr. L. E. Prowse, (Queens, P. E. I.); Mr. David Marshall, (East Elgin); Mr. Alphonse Verville, (Maisonneuve).

On December 17, on motion of the Honourable W. L. Mackenzie King, Minister of Labour, the following were added to the membership of this committee:—Messrs. Stanfield (Cumberland), Broder, (Dundas), Turcotte (Nicolet).

The Bill in question had been previously introduced by Mr. Verville on December 11, 1906, on February 14, 1908, and on January 28, 1909. It provides that "every contract to which the Government of Canada is a party, which may involve the employment of labourers, workmen or mechanics, shall contain a stipulation that no labourer, workman or mechanic in the employ of the contractor or sub-contractor, or other person doing or contracting to do the whole or a part of the work contemplated by the contract, shall be permitted or required to work more than eight hours in any one calendar day, except in cases of extraordinary emergency caused by fire, flood, or danger to life or

property." Provision is made in the Bill for the voiding of public contracts in which the foregoing stipulations are not complied with, and it is further declared that the proposed law shall apply also to work undertaken by the Government of Canada by day labour.

In moving the second reading of the Bill, Mr. Verville asserted that the demand for a shorter working day was almost universal, and that the question was one which the Parliament of Canada should study and consider so that relief might be afforded to all who are, at the present time, labouring under trying conditions. The Dominion Government should be, he claimed, a model employer of labour. Against the eight-hour day proposal it had been urged, in some quarters, that the effect would be to reduce and to demoralize production. Mr. Verville did not, however, believe that shorter hours of labour would have any such effect. Upon the conclusion of the debate M. Verville declared himself also as gratified with the discussion, and as satisfied that the Bill should be referred to a special committee after the principle involved had been affirmed by the passage of the second reading. In the course of his remarks Mr. Verville congratulated the Government on having appointed a Minister of Labour who could devote all his time to the study of labour questions. The demand, he said, which had been made, for years past, for the creation of this portfolio showed the necessity for it.

The Minister of Labour.

The Minister of Labour expressed the belief that the workmen of Canada owed a debt of gratitude to Mr. Verville for the introduction of this Bill. The history of labour legislation showed that, on the whole, a shortening of the hours of labour had been of immense benefit not only to the working classes but to the industries themselves. The question of hours of labour in Canada was primarily one for the consideration of the Provincial Legislatures, but the discussion of the subject in Parliament would, he believed, be reflected in future

legislation by the Provinces. In so far as the question bore upon the amelioration of the everyday life of the working classes he was of opinion that the Dominion Parliament, so far as its power extended, should do all that it could to further that end. Parliament, he observed, had certain powers in regard to works carried on by the Government of Canada.

In so far as the Bill related to the hours of labour on public works it was desirable to point out that the Government had already taken considerable steps toward meeting the object which the Bill had in view through the adoption in 1900, of a Fair Wages Policy, providing for the payment of fair rates of wages to workmen engaged on public works, and the enforcement of the hours of labour current in the districts where such works are being carried on. The Minister concurred in the opinion which had been expressed by other participants in the debate that the Bill should be referred to a special committee in order that the measure might not be lost on a vote, and that all interests concerned might have an opportunity of being heard, and in order also that the various points which had been raised in the present debate might be fully considered.

Mr. R. L. Borden, observed that the subject to which the present bill related was one which must be dealt with. In common with every member of the House, he was disposed to give the most sympathetic consideration to all measures designed to improve the condition of the labouring classes. He was willing that the Bill should be referred to a special committee in order that the parties concerned might be heard, and in order that any information in the possession of the Government might be produced.

In the course of the debate the point was raised that the Bill as introduced, would have the effect not only of regulating the hours of labour on Government works but of precluding the purchase by the Government, or by contractors on Government works, of any materials produced under a system which required the workmen concerned to work more than eight hours per day. A fear was also expressed that, in its present form,

the measure might seriously interfere with the operation of mills and factories employed in part in the execution of Government contracts, and that the passage of such a law might increase the difficulty which farmers now experience in obtaining the labour which is required for their farming operations.

It was urged by one of the participants in the debate that a conference should be held of the various Provincial Governments for the purpose of adopting a uniform law on this subject throughout the Dominion. Reference was made to the eight-hour law as applied to mining and smelting operations in British Columbia, and the statement was made that a great change had been effected thereby in the men employed in this branch of industry, and in the conditions of their home life. It was also asserted that the eight-hour day in England and in Australia had produced excellent results.

The following members took part in the debate: Honourable W. L. Mackenzie King, Minister of Labour, Mr. R. L. Borden, (Halifax); Mr. J. W. Edwards, (Frontenac); Mr. Hugh Guthrie, (South Wellington); Mr. W. S. Middleboro, (Grey, N. Riding); Mr. A. S. Goodeve, (Kootenay); Mr. Joseph Turcotte, (Quebec); Mr. C. A. Magrath, (Medicine Hat); Dr. T. S. Sproule, (East Grey); Mr. E. N. Rhodes, (Cumberland); Mr. A. Meighen, (Portage la Prairie); Col. Sam. Hughes, (Victoria); Mr. J. W. Maddin, (South Cape Breton); Mr. D. D. McKenzie, (North Cape Breton); Mr. Thos. Beattie, (London); Mr. A. B. Crosby, (Halifax); Mr. Ralph Smith, (Nanaimo); Mr. Ernest Roy, (Dorchester); Mr. J. C. Doherty, (Montreal, St. Anne); Mr. J. D. Taylor, (New Westminster); Mr. A. C. Macdonell, (South Toronto); Mr. G. H. Cowan, (Vancouver City); Dr. J. D. Reid, (Grenville); Mr. E. Devlin, (Wright) and Mr. G. H. Barnard (Victoria, B. C.)

Meetings were held on December 13 and on December 17, of the special committee of the House of Commons on Mr. Verville's Bill (No. 21), at which plans were laid for a full inquiry into the matters in question.

Government Railways Pension Fund.

In the House of Commons, on December 7, the Minister of Railways and Canals moved the second reading of Bill No. 19, to amend the Intercolonial and Prince Edward Island Railways Employés Provident Fund Act. The object of this Bill is to provide for conditions which have arisen through a reduction which has recently been made in the staff of the Government Railway System, through which a number of the older employés have, for the time being, been dropped from the service. The Minister explained that under the present statute the number of years during which an employé has to work before becoming entitled to the benefits of the Provident Fund Act is fifteen. The present Bill proposes to reduce this time to ten years, and to apply it to those who were in the employ of the Government Railway System up to March 31 last, and who had been in the employ of the Government Railway System for ten years. The Bill was given a second reading and subsequently referred to Committee of the Whole.

Proposed Amendment to Dominion Elections Act.

In the House of Commons, on December 9, Mr. A. C. Macdonell (South Toronto) moved the second reading of Bill No. 22, to amend the Dominion Elections Act, for the purpose of repealing the three sections of the present law requiring the making of a deposit of \$200 by candidates for election to the House of Commons; and for the purpose also of making polling day in Dominion general elections a public holiday throughout Canada. A debate ensued on Mr. Macdonell's motion, and an amendment proposed by the Minister of Justice was adopted, declaring that the Bill be not now read a second time, but this day six months.

In the House of Commons, on December 9, Mr. A. C. Macdonell (South Toronto) moved the second reading of Bill No. 23, to amend the Industrial Disputes Investigation Act, 1907. In so doing Mr. Macdonell observed that the Minister

of Labour had some amendments to consider in connection with the Industrial Disputes Investigation Act which might be conveniently considered at the same time with the amendments which were proposed in the present Bill. As he was anxious to advance the latter to the committee stage, he moved the second reading on the understanding that the Bill should thereafter be allowed to stand until the Minister of Labour was prepared to consider the present measure with his own proposed amendments to this statute. This suggestion was concurred in by the Minister of Labour, and the Bill thereupon passed second reading and was referred to Committee of the Whole.

In the House of Commons, on December 16, Mr. W. E. Knowles (Moose Jaw) inquired whether the Government intended "during the present session of Parliament introducing legislation to amend the Industrial Disputes Investigation Act, 1907, with a view to meeting the wishes of the Railroad Brotherhood to avoid delay in the steps required prior to the declaration of a strike."

In reply, the Honourable W. L. Mackenzie King, Minister of Labour, stated that it was the Government's intention to introduce legislation to amend the Industrial Disputes Investigation Act, 1907, during the present session.

Railway Act Amendment.

In the House of Commons, on December 10, Mr. E. N. Lewis, (West Huron) moved for leave to introduce Bill No. 66, to amend the Railway Act. The Bill in question is almost identical with one which was introduced by Mr. Lewis last year, and which provided for the appointment of inspectors of sanitary equipment on railways, and also for the appointment of counsel to conduct hearings before the Board of Railway Commissioners on be-

half of applicants who may be persons of small means.

A new feature of the present Bill is a clause requiring the making of an annual return by the railways of Canada to the Board of Railway Commissioners, showing the names and employment of all trainmen, despatchers, operators and other employes concerned in the control and operation of trains, who have worked over twelve hours on any one day, or an aggregate of eighty-four hours in any one week. Mr. Lewis explained that the object of this Bill was to assist in the prevention of accidents, which sometimes occur through despatchers and others being kept on duty during excessive hours. The Bill was read a first time.

Committee on Proportional Representation.

On November 17, a resolution was adopted on motion of Mr. F. D. Monk (Jacques Cartier) providing for the appointment of a select committee "to investigate the different systems of proportional representation adopted or suggested elsewhere as an improvement upon our present method of election, with power to extend inquiry to all the various forms of the proportional representation laws, proposed or in force; and with power to send for persons and papers; and to report from time to time."

The following members were subsequently appointed to compose the committee in question, the Honourable W. L. Mackenzie King, Minister of Labour, Chairman; Messrs. Monk (Jacques Cartier), Turcotte, (Quebec County), Burrell (Yale-Cariboo), McGrath (Lethbridge), Wilson (Laval), Kyte (Richmond, N. S.).

On December 15, the special committee presented its first report, asking that leave be granted to have proceedings and evidence before the same printed. The report was concurred in.

THE WORK OF THE RAILROAD YOUNG MEN'S CHRISTIAN ASSOCIATION.

IN the October number of the *Labour Gazette* brief reference was made to the welfare work which is being carried on by the Railroad Department of the

Young Men's Christian Association along the lines of the Canadian Pacific Company throughout Canada; and allusion was made also to the financial assistance

which has been granted by this Company to the Association, in the efforts which the latter is making to maintain the character and morals of the men employed in the Company's service. The attitude of the Canadian Pacific Railway Company towards the Railroad Y. M. C. A., is typical of the attitude of most of the other important railway systems of North America towards the Association. The exigencies of the railroad service make it necessary in some instances that shops, yards, terminals, etc., where large numbers of men are employed, and divisional points where employés must lay over at the end of their runs, should be established in sparsely settled localities in which comfortable living accommodation and desirable forms of diversion cannot be obtained. In a booklet entitled "Welfare Work" which has been published by the Canadian Pacific Railway Company, it stated that boarding houses were erected by that Company and given over to individuals who made what they could out of them, but, that as this had not proven altogether satisfactory, the Company was trying an experiment with the Railroad Department of the Y. M. C. A. It is further added in this booklet that the satisfactory working of one building at Revelstoke, B. C., during the past two years, had induced the Company to increase the number of points at which these buildings are established. In addition to the commodious and comfortable buildings at Revelstoke, B. C., Schreiber and Chapeau, Ont., the Canadian Pacific Railway has recently erected and furnished a building at Kenora, Ont., costing \$50,000 and a fifth building at White River, Ont., costing about \$27,000. These buildings have been given to the Y. M. C. A., to operate because of its unselfish purpose to be of service to railway men without financial gain. The general plan on which these buildings are operated is as follows:—the Railway Company makes a monthly appropriation sufficient to cover the salary of the secretary, in addition to providing light, heat, repairs, etc., the men paying a fee of \$5, which covers use of bath, reading room, and general social privileges of the building. They pay \$1.25 a week and \$5.40

a week for board. The operation of the building is in the hands of a local committee composed for the most part of railway men.

On the Grand Trunk Railway System there would seem to be in all no fewer than sixteen associations, as follows:—Island Pond, Montreal, Niagara Falls, Fort Erie, Toronto, Spadina Avenue, Toronto-East, Toronto-Mimico, Stratford, Sarnia, Port Huron, Durand, Chicago-Edison, Chicago-Dearborn Station, Allandale, East Deering, and Bridgeburg.

The interest which has been taken by the Grand Trunk Railway Company in the work of the Railroad Y. M. C. A. has found expression in the following published letter of Mr. Chas. M. Hays:—

"We believe that the Railroad Y. M. C. A. has been and is doing a very necessary work for the social, mental and physical improvement of our employés, and because of this opinion, the Grand Trunk Railway Company has contributed to December 31, 1907, the sum of \$72,758, toward the construction, enlargement and improvement of the fourteen associations located at division points on our system of railways."

"The Company is also contributing a large sum per annum towards the expenses of operating and maintaining these associations, with the belief that the indirect benefit in a financial way is in excess of the amount expended, because of the better condition of our men, both mentally and physically, to perform their duties in connection with the operation of our trains, the maintenance of our road and the service generally."

(Sgd.) CHAS. M. HAYS,

Second Vice Pres. and Gen. M.

In a booklet entitled "Efficiency and Dividends", issued by the Railroad Department of the International Committee of the Young Men's Christian Associations, testimony is borne by the presidents of the most important railway systems on the North American continent to the value of the service which is being performed for their respective Companies by the Railroad Department of the Young Men's Christian Associations;

and statistics are also furnished of the number of Associations, the membership, the daily attendance, the attendance at Bible classes and religious meetings, and the number and valuation of buildings devoted to this work.

It is most significant of the success of the movement that there are in existence, in Canada and the United States, at the present time, 225 Railroad Y. M. C. A.'s, with a membership of about 85,000 and buildings valued at \$3,625,000. One of the principal reasons for the remarkable success of this movement is no doubt the fact that each Association is an organization of the men themselves, conducted by them, and in their interest alone. Generous appropriations have been made by the railroad companies towards the erection, equipment, and maintenance of the necessary buildings and staff, but the men themselves have borne also an important share of the expense.

The work of the Railroad Y. M. C. A. has now been developed to so general an extent that it has been recognized, in the words of President McCrea, of the Pennsylvania Railroad, as "a permanent institution" and "a most important factor in general railroad work." In a letter written by the Senior Vice-President of the New York Central System it is declared by him that "the contributions of the Railroad Company to these Associations have been among the most profitable investments the roads have made." Mr. Geo. J. Gould, President of the Gould Lines, writes: "during the past ten years we have helped establish the Railroad Y. M. C. A. at thirty points on our lines. Our employés are very

appreciative of the benefits derived from these organizations, and we regard the money expended as a good investment." The foregoing statements are representative of the general attitude of the railway officials of North America towards the Railroad Y. M. C. A. This work is now established in Canada, the United States, and Mexico, on railroads comprising over eighty per cent. of the railroad mileage in these countries. It has the loyal support of all railroad men and the hearty support of the corporations.

Through its Industrial Department the work of the Young Men's Christian Association has been carried into many branches of industry, and the following tribute has recently been paid by Judge Elbert H. Gary, Chairman Board of Directors, United States Steel Corporation, to the service which the Association has rendered to American industry:—"I am glad to declare my belief in the advantages of having a Young Men's Christian Association in an industrial community as tending greatly to the building up of the character of the men, and therefore increasing their efficiency." One of the branches of work in which the Y. M. C. A. has been found of very great practical service is the railroad construction camp, and it may be of interest to Canadians to learn that on the portion of the Grand Trunk Railway now in course of construction in the Province of British Columbia a Young Men's Christian Association Secretary is at work among the men, and that the contractors, Messrs. Foley, Welch & Stewart, are bearing the expense involved.

IMMIGRATION AND COLONIZATION.

THE following is a statement of recent immigrant arrivals in Canada, classified according as they arrived

through ocean ports or from the United States, from the beginning of the fiscal year up to November, 1909, inclusive:—

Total.....	102,972	90,762

Homestead Entries During November, 1909.

The following statement shows the number of homestead entries made during the month of November, 1909, as compared with November, 1908.

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF NOVEMBER, 1909, AS COMPARED WITH NOVEMBER, 1908.

Agency.	1909.	1908.	In-crease.	De-crease.
Battleford.....	135	337	202
Brandon.....	11	39	28
Calgary.....	565	223	342
Dauphin.....	94	199	105
Edmonton.....	331	561	185
Estevan.....	96	60	36
Humboldt.....	135	243	108
Kamloops.....	13	47	34
Lethbridge.....	369	306	63
Moose Jaw.....	1,386	972	414
New Westminster..	1	1
Peace River.....	3	3
Prince Albert.....	107	166	59
Regina.....	57	132	75
Red Deer.....	116	167	51
Saskatoon.....	444	444
Winnipeg.....	149	177	28
Yorkton.....	131	291	160
Total.....	4,143	3,876	1,302	1,035

It will be seen that there has been a net increase for November, 1909, of 267 in the number of entries made.

A statement of the entries made during the first eleven months of the calendar year 1909, compared with the corresponding months of 1908, is as follows:—

HOMESTEAD ENTRIES DURING JANUARY-NOVEMBER, 1909-1908.

Month.	1909.	1908.	In-crease	De-crease.
January.....	1,308	1,453	145
February.....	1,364	1,420	56
March.....	2,592	1,869	723
April.....	4,602	2,987	1,615
May.....	3,243	2,773	470
June.....	4,205	3,247	958
July.....	4,248	2,815	1,433
August.....	2,832	1,859	973
September.....	2,902	7,934	5,032
October.....	3,550	5,221	1,671
November.....	4,143	3,876	267
Total.....	34,989	35,454	6,439	6,904

It will be seen that there has been a net decrease of 465 in the number of homestead entries made during the first eleven months of 1909, as compared with the same months of 1908.

Nationalities of Homesteaders.

The nationalities of homesteaders during the month of November 1909, as reported by the several agencies of the

Department in Manitoba, Saskatchewan, Alberta and British Columbia were as follows:—

Nationalities.	No. of Entries.
Canadians from Ontario.....	393
“ Quebec.....	76
“ Nova Scotia.....	10
“ New Brunswick.....	12
“ Prince Edward Island.....	9
“ Manitoba.....	170
“ Saskatchewan.....	402
“ Alberta.....	101
“ British Columbia.....	14
Persons who had previous entry.....	182
Newfoundlanders.....	1
Canadians returned from the United States.....	75
Americans.....	1,388
English.....	552
Scotch.....	138
Irish.....	57
French.....	45
Belgians.....	10
Swiss.....	7
Italians.....	1
Roumanians.....	9
Syrians.....
Germans.....	43
Austro-Hungarians.....	175
Hollanders.....	7
Danes (other than Icelanders).....	18
Icelanders.....	13
Swedes.....	61
Norwegians.....	56
Russians (other than Mennonites and Doukhobors).....	100
Mennonites.....
Doukhobors.....
Chinese.....	2
Japanese.....
Persians.....
Australians.....	1
New Zealanders.....
Servians.....	1
Bulgarians.....	14
Total.....	4,143

Representing 9,605 souls.

Of 1,463 entries made by persons coming from the United States, there 626 from North Dakota, 238 from Minnesota, ninety-four from Washington, sixty-eight from South Dakota, fifty-five from Michigan, fifty-one from Iowa and Wisconsin, forty from Idaho, thirty-nine from Montana, twenty-two from New York and twenty-one from Illinois.

Lands Patented.

An abstract of letters patent covering Dominion lands situate in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory issued from the Department of the Interior during the

month of November, 1909, as compared with November 1908, was as follows:—

Nature of Grant.	November, 1909.	
	No. of Patents.	No. of Acres.
Alberta Railway & Irrigation Company's sales.....	8	1,920.00
British Columbia homesteads....	12	1,664.13

Notes.

A deputation of over fifty ladies waited upon the government of Ontario to request the establishment of a bureau in London, England, for the encouragement of the immigration of *domestic servants* to Ontario. The Honourable the Premier of the Province stated in reply that the government did not favour the establishment of such a bureau, but would bonus a private agency for the bringing out of employés of that class.

Believing that there are many who desire Canadian farms, but who wish by extra payments to escape the hardships of the pioneer, the Canadian Pacific Railway Company is planning to break land and erect houses on many quarter sections, and to hand these partially prepared farms over to immigrants who can afford the expenditure of a few hundred dollars to cover this preliminary work.

A statement of various *regulations* which have been issued in regard to immigration was tabled in the House of Commons by the Honourable the Minister of the Interior during December. It included a circular sent to the immigration officers to assist them in interpreting the general regulations, in which emphasis is laid on the fact that money is expended and administration exercised to secure immigrants who will occupy farm lands, and to keep out undersirables who would contribute to the congestion of towns and cities. A regulation recently adopted provides "that if an Asiatic immigrant, destined either for Canada or the United States is found to be affected with a loathsome, contagious or infectious disease, whether or not such is readily curable, such immigrant is to be summarily rejected and prohibited from landing."

The sales of *school lands* by the Dominion Government were recently completed for the year. In all there were twenty sales, held at Emerson, Arnaud, St. Anne, Beausejour, Whiternouth, Oak Point, Lloydminster, Macleod, Pincher Creek, Lethbridge, Lacombe, Stettler, Edmonton, Roblin, Grandview, Dauphin, Winnipegosis, Laurier, Swan River and Zealandia. The number of acres disposed of in all the sales aggregated 329,-

669 acres, and the amount of money realized was \$3,577,138 or an average of \$10.86 per acre.

The work of the staff of the quarantine station at Grosse Isle has ended for the season. The Superintendent of the station reported that during the shipping season 364 ocean steamers were inspected,

being nine more than last year. Some 145,000 passengers were inspected, being 40,000 more than the previous season. There were 553 immigrants detained at Grosse Isle against 250 last year. In 1908, there were no deaths among the patients landed, but in 1909, eleven died from their respective diseases.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF DECEMBER, 1909.

The following is a list of contracts awarded by the Department of Railways and Canals which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Railways and Canals.

NEW POWER HOUSE AT CHAMBLY, QUE.

SUPPLY, delivery and erection of the structural steel work required for the new Chambly Canal Power House at Chambly Canton, Quebec. Date of contract, December 27th, 1909. Amount of contract \$1,750. Contractors, "the Phoenix Bridge and Iron Works, Limited" of Montreal, Que.

Trade or Class of Labour.	Rate of Wages, Not less than:
Structural steel workers....	\$0.30 per hr., 9 hrs. p. day
Riveters30 " 9 "
" helpers.....	.17½ " 9 "
Blacksmiths.....	2.50 per day 10 hours.
Mechinists.....	2.50 " 10 "
Hoisting engine driver....	2.00 " 10 "
Carpenters.....	2.00 " 10 "
Labourers.....	1.50 " 10 "
Driver, 1 horse and cart....	2.50 " 10 "
Driver, 2 horses and wagon	3.50 " 10 "
Foreman of erection.....	No special rate.

CONCRETE DAM AT BURLEIGH FALLS, ONT.

Construction of concrete dam at Burleigh Falls, Company of Peterborough, Ontario; Trent Canal. Date of contract, December 14th, 1909. Amount of contract, schedule rates. Contractors, "R. W. Bishop, Civil Engineer, of Owen

Sound, Company of Grey, Ont., and M. Buchanan, of Peterborough, Ont."

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman for labourers.....	\$2.25
Stonecutters.....	3.50
Blacksmiths.....	2.25
" helpers.....	1.75
Labourers.....	1.50
Masons.....	3.50

" firemen.....	1.50
Steam derrick engineers.....	2.50
Driver, 1 horse and cart.....	2.00
Driver, 2 horses and wagon.....	3.00

Post Office Department.

During the month of December orders were given by the Post Office Department for the supplies below mentioned subject to the regulations for the suppression of the sweating system, and the securing of payment to the workmen and working women of fair wages and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of orders.
Making metal dating stamps and type and making other hand stamps and brass crow seals.....	1,249.75
Making and repairing rubber dating stamps and type, also other stamps.....	73.90
Supplying stamping material and wooden boxes, and repairing stamping pads.....	308.54
Supplying mail bags.....	4,107.54
Repairing mail bags.....	1,228.42
Making and repairing post office scales.....	214.75
Making and repairing mail locks and supplying mail bag fittings.....	1,479.74
Supplying Railway Mail Clerks' tin travelling boxes, and repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes and parcel receptacles.....	289.20
Making and repairing miscellaneous articles of Postal Stores.....	112.40
Making and supplying articles of official uniform.....	445.20

OPPORTUNITIES OF EMPLOYMENT.

WITH the increasing industrial activity of the past few months information has reached the Department from various

sources to the effect that a scarcity of labour was being experienced in particular localities and branches of employment. For example, a considerable scarcity of help available for employment in the railway construction camps was reported from Western Canada during the months of July and August. Later, a statement was received from the Secretary of the Employers' Association of Toronto, that there was a shortage of skilled help, both male and female, for the manufacturing plants of different members of the Association. Again, in the closing weeks of the year, the Canadian Manufacturer's Association circularized its members, asking for information with respect to the labour supply and prospects in that regard for the future. Of a total of 463 manufacturers from whom replies were received in this connection, 156 stated that they were in need of additional help.

During 1906 and 1907, when industrial activity was very pronounced throughout Canada, the Department published from time to time in the *Labour Gazette* a special article setting forth a series of specific statements received from employers and employés with regard to opportunities of employment. The object of the article was that skilled workmen and labourers might be made aware in a definite way of opportunities of employment and the demand for labour in different branches of industry and in

different parts of the Dominion. While exercising care and discrimination in the statements published, the Department desired it to be understood that the parties supplying the information were alone responsible for its accuracy and that beyond publishing the same for the mutual benefit of employers and employés, the Department assumed no responsibility in connection with the publication.

In view of current conditions, the Department will resume publication of the article above mentioned, provided the necessary information is placed at its disposal. In this connection it will be pleased to receive from persons desirous of obtaining skilled or unskilled labour connected with any industry or trade in Canada, a brief statement setting forth the nature and extent of the demand. Similarly the Department will be pleased to receive and publish, on behalf of persons out of employment, statements from labour unions or bodies of skilled or unskilled workmen, setting forth the nature and extent of the supply of labour available. Persons desirous of profiting by the information published in this way should communicate direct with the persons concerned for further particulars, exact terms, &c., the purpose of the Department in publishing the information being solely that of making known as accurately as possible, conditions with regard to the demand for and supply of labour.

TRADE DISPUTES DURING THE MONTH OF DECEMBER, 1909.

THE only place where industrial conditions were seriously affected by trade disputes in Canada during December was at Springhill, N. S., where the coal mines were shut down owing to a strike which had been in existence since the month of August. Only two new disputes were reported during the month, in both of which only small bodies of employés were involved.

Analysis of Trade Disputes During the Month.

Number and magnitude.—The total number of trade disputes reported to

have been in existence in Canada during December was eight, a decrease of two compared with the previous month, but an increase of four compared with December, 1908. About sixteen firms and 1,869 employés were affected by these disputes, two firms and forty-six employés being affected by the new disputes of the month.

Loss of time in working days.—The loss of time to employés through trade disputes during December was approximately 45,730 working days, compared with a loss of about 95,950 days in November and of 531 days in December, 1908.

Trades affected by new disputes.—The following table shows the trades affected by new disputes during the month and the number of employés involved in each group of trades.

Trade.	No. of disputes.	No. of employés.
Textile trade.....	1	40
Food and tobacco preparation..	1	6
Total.....	2	46

Localities affected by new disputes.—One of the new disputes of the month occurred in the Province of Ontario, and the other in the Province of Manitoba.

Causes of disputes.—One of the new disputes of the month was caused by the refusal of the employers to grant a demand for extra pay for overtime, and dissatisfaction with the conditions of employment. The cause of the other dispute was the employment of apprentices. A dispute which began in November, but which had not been previously reported was caused by the refusal of an employé to pay a fine for an alleged infraction of rules of his trade union.

Methods of settlement.—Of the eight disputes in existence during December, three were terminated, leaving five still in existence at the end of the month. One of the disputes was settled by arbitration and in the case of the other the method of settlement was not reported.

Results of disputes.—One of the disputes resulted in favour of the employés, in another the employer was not directly concerned, and in the case of the other one which was terminated the result was not reported.

Disputes Which Commenced Prior to the Beginning of the Month.

The trade disputes in existence in Canada during December, which commenced in previous months, comprised strikes of coal miners at Springhill, N. S., leather workers at Ottawa, Ont., plumbers at Calgary, Alta., coopers at Winnipeg, Man. and tailors at Vancouver, B. C.

Strike of Coal Miners at Springhill, N. S.

No change in the situation was reported in the case of a strike of 1,700 coal miners at Springhill, N. S., which began on August 10, on account of the refusal of the Company to grant a demand for an increase in wages and certain changes in the conditions of employment.

Strike of Leather Workers at Ottawa, Ont.

No settlement was reported in a strike of leather workers at Ottawa, Ont., which began on October 14, on account of the refusal of the employers to grant a general increase of ten per cent. in wages. Four firms and about seventy-two employés were affected by this dispute.

Strike of Plumbers at Calgary, Alta.

On November 29, a strike of plumbers took place at Calgary, Alta., According to a report received from the employer, the cause of the dispute was the refusal of a member of the journeymen Plumbers and Steam Fitters' Union to pay a fine of twenty dollars, which had been imposed upon him for the violation of certain rules of the union forbidding the riding of bicycles to work and starting work ahead of time. The firm claimed that they paid the fine to the shop steward, but that the union would not accept settlement in this way. Eventually the member paid his fine and work was resumed on December 13. It was stated that thirteen men were affected by this dispute. No report with regard to this matter was received from the union.

Strike of Coopers at Winnipeg, Man.

No report was received of the settlement of a strike of coopers at Winnipeg, Man., which began on October 11, but industrial conditions ceased to be affected by it. The cause of the dispute, in which four firms and about sixteen employés were involved, was the refusal of the employers to recognize the Coopers' Union.

Strike of Tailors at Vancouver, B. C.

No settlement was reported in the case of a strike of tailors at Vancouver, B. C.,

<i>Food and tobacco pre-paration—</i> Cigar makers.....	Brandon, Man.....	Against employment of appren-tices.....	1				Dec. 7		No settlement reported at end of the month.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination involved, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishment concerned. Mention moreover, is not made of disputes involving less than six employés, or of less than 24 hours.

which began on October 4, on account of the refusal of the employers to grant a demand for an increase in wages from \$18 to \$20 per week, but the demands of the strikers having been granted by twenty-nine firms in October, only three firms were affected in December, and the number of strikers had decreased from forty-five to fourteen.

New Disputes.

The only new disputes of the month causing a loss of time of over twenty-four hours, which were reported to the Department were a strike of carpet weavers at Guelph, Ont., and of cigar makers at Brandon, Man.

Strike of Carpet Weavers at Guelph, Ont.

On December 11, a strike of Brussels carpet weavers took place at Guelph, Ont., in which twenty-eight men were reported to be directly affected and about twelve indirectly. It was stated by the

employers that the cause of the dispute was the refusal of the men to work overtime or on Saturday afternoons. According to the men the cause was the refusal of the firm to pay extra for overtime and general dissatisfaction with the conditions under which they were working. The strike was still in existence at the close of the month, but it was reported that the employers were attempting to fill the places of the strikers.

Strike of Cigar makers at Brandon, Man.

On December 7, six cigar makers declared a strike at Brandon, Man., the cause of the dispute being the alleged employment of apprentices contrary to union rules. No settlement of this dispute was reported during the month.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of December, and which have been reported to the Department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF DECEMBER, 1909.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factory inspectors of the Province of Ontario, the Ontario Railway and Municipal Board and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statements of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 344 individual work people in Canada during the month of December 1909, were reported to the department of Labour. Of these 126 were fatal and 218 resulted in serious injuries. In addition two fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before December, 1909.

In the preceding month there were 143 fatal and 279 non-fatal accidents reported, a total of 422, and in December 1908, there

were eighty-five fatal and 188 non-fatal accidents, a total of 273. The number of fatal accidents reported in December 1909, was therefore seventeen less than in the preceding month and forty-one more than in December 1908. The number of non-fatal accidents reported in December 1909, was sixty-one less than in the preceding month and thirty-eight more than in December 1908. Altogether there were seventy-eight less industrial accidents reported in December 1909, than in the preceding month and seventy-one more than in the same month of the preceding year.

Of 176 returns received during the month giving the ages of the victims of industrial accidents twenty referred to persons under twenty-one years of age fifty-nine to persons between twenty-one and forty-five, and twelve to persons over forty-five, eighty-five persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the acci-

dents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING DECEMBER, 1909, BY INDUSTRIES AND TRADES

Nature of Fatalities and Accidents.

The disasters of the month involving more than one fatality were: the foundering of the car ferry Bessemer II in Lake Erie with its crew including eight Canadian workmen; the sinking of dredge No. 8, off Mutton Island in Lake Superior whereby six of the crew lost their lives; the foundering of the schooner "Mispah" off the Atlantic coast in which three were drowned; the killing of two workmen by the falling of a wall at Londonderry, N. S.; and the death of two workers at the plant of the Cobalt Hydraulic Power Company on Montreal River.

Foundering of the Car Ferry Bessemer II in Lake Erie.

During a heavy storm on Lake Erie on December 7, the car ferry Bessemer II turned turtle and went to the bottom with her crew of thirty-five souls, among whom were eight Canadians.

Sinking of Dredge No. 8 off Fort William, Ont.

On December 9, dredge No. 8 of the Great Lakes Dredging Company suddenly sprang a leak near Mutton Island, off

Fort William, Ont. and foundered within a short time carrying down six members of its crew.

Wreck of the Schooner Mispah in the Atlantic.

On December 3, the schooner "Mispah", ran shore in a heavy storm near Highland Light, Mass., and became a total wreck. Three of her crew were drowned. She was a Canadian vessel owned in Lunenburg, N. S.

Killing of Two Workers at Londonderry, N. S.

On December 2, a falling wall in the foundry of the Londonderry Iron Works at Londonderry, N. S., killed two workers and badly injured two others.

Death of Two Workmen on Montreal River, Ont.

On December 27, two of the employes of the Cobalt Hydraulic Power Company on the Montreal River, Ont., fell to the bottom of the shaft, a distance of 300 feet and were instantly killed.

Records by Industries and Trades.

Agriculture.—In this industry during December, 1909, twenty-eight were killed and twenty-one injured, compared with nineteen killed and thirty-two injured in the preceding month and thirteen killed and twenty-two injured in December, 1908. Eight of the fatalities were caused by the victims being run over, four by falling material, three each by runaways, by being frozen to death, by falls and by drowning, two by machinery and one each by firearms and by live stock. Of the injuries seven were caused by falls, four by machinery, three each by runaways and by falling material, two by being run over and one each by exposure and by live stock.

Lumbering.—During December there were twelve killed and twelve injured in this group, as against thirteen killed and eighteen injured in November last, and six killed and sixteen injured in December of last year. Eight of the deaths

were due to falling material, two to machinery and one each to being run over and to a fall. Four each of the other accidents were due to machinery and to falling material, two to flying material and one each to a fall and to a tool.

Mining.—Eleven mine workers were killed during December and fourteen injured, compared with ten killed and twenty-three injured in the previous month and eighteen killed and seventeen injured in December, 1908. Falling material caused three each of the fatalities, falls two, and asphyxiation by gas, an elevator and an explosion one each. Five each of the injuries were caused by falling material and by explosions of dynamite, two by cars and one each by a fall and by flying material.

Building trades.—A builders' labourer at Ottawa, Ont., was killed by falling material, and a roofer at Toronto, Ont., by a fall; fifteen other workmen were injured. In November, 1909, there were five killed and twenty-five injured, and in December of last year five were killed and sixteen injured. Nine of the non-fatal injuries were due to falls, four to machinery and one each to a runaway and to an explosion of gasoline.

Metal trades.—In this group sixteen were killed and fifty injured during December, 1909, compared with nine killed and fifty-three injured in the previous month and three killed and thirty-five injured in December, 1908. Five of the fatalities were caused by falling material, four each by falls and by machinery, two by being run over and one by an elevator. Of the other accidents nineteen were caused by machinery, fifteen by falling material, seven by falls, five by molten metal, three by flying material and one by cars.

Woodworking trades.—During December machinery caused the death of a planing mill worker at Fraserville, Que., and fifteen other workers were injured, compared with eight injured in the preceding month and nine injured in December of last year. Machinery caused eleven of the minor accidents, flying material three and falling material one.

Printing trades.—One workman was injured by nitric acid during December;

in November last five were injured, and in December, 1908, three.

Clothing trades.—Machinery and a tool seriously injured one workman each in this group. There was only one minor accident in the previous month and one in December of last year.

Textile trades.—There were five injuries reported, four due to machinery and one to a fall, during December. In the preceding month two workers were killed and five injured and in December, 1908, one killed and five injured.

Food and tobacco preparation.—A butcher at Coaticook lost his life by his knife slipping and piercing his abdomen; eight other workers were injured. In November last, one worker was killed and ten injured and in December, 1908, one killed and seven injured. Four of the injuries were caused by machinery, two by being scalded and one each by falling material and an elevator.

Railway employés.—In this group, the record for December was fourteen killed and twenty-nine injured, compared with forty-six killed and thirty-eight injured in the preceding month and twenty-one killed and twenty-one injured in December of last year. Eight of the fatalities were due to being run over three to being caught between cars and one each to machinery, to a fall and to falling material. Of the non-fatal accidents eleven were due to falls, six to being caught between cars, three to being run over, two each to tools and to being struck by a locomotive and one each to a collision, to falling material, to machinery, to flying material and to being struck by an object in passing.

Navigation.—During December there were twenty-four of these workers killed and three injured, compared with thirteen killed and eleven injured in November and three killed and two injured in December, 1908. Drowning caused eighteen of the deaths, falls four and falling material two. Falls caused two of the other accidents and falling material one.

Transport.—Seven workers in this group were killed and sixteen injured during December, compared with nine killed and nineteen injured in the previous

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF DECEMBER 1909.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Fitch Bay, Que.....	Dec. 1	1	In a runaway.
".....	Rosthern, Sask.....	" 1	1	Frozen to death.
".....	Grenfell, Sask.....	" 2	1	Fell forty-nine feet in elevator.
".....	Montreal, Que.....	" 3	1	Run over by train.
".....	Gilbraltar, Ont.....	" 4	1	Fell in barn.
".....	Weston, Ont.....	" 4	1	Run over by train.
".....	Ingersoll, Ont.....	" 4	1	" " "
".....	Strathroy, Ont.....	" 8	1	" " "
".....	Milton, Ont.....	" 9	1	" " "
".....	Yarmouth Tp. Ont.....	" 9	1	Caught in fly wheel.
".....	Hanna, Sask.....	" 9	1	Frozen to death.
".....	Argenteuil, Que.....	" 14	1	In a runaway.
".....	Faraday Tp. Ont.....	" 14	1	Accidentally shot.
".....	Grand Bay, N. B.....	" 16	1	Run over by train.
".....	Glanford, Ont.....	" 16	1	Drowned, his vehicle fell into a creek.
".....	Stanbridge, Que.....	" 18	1	Load of wood tipped over on him.
".....	Port Credit, Ont.....	" 21	1	Run over by train.
".....	West Templeton, Que.....	" 22	1	Struck on head by binding pole.
".....	Fraserville, Que.....	" 21	1	Load of hay fell on him.
".....	Inglewood, Ont.....	" 22	1	Killed while moving a house.
".....	Waterford, Ont.....	" 27	1	Drowned in pond on farm.
".....	Letellier, Que.....	" 28	1	Frozen to death.
".....	Sutton, Que.....	" 3	1	By a fall.
Rancher.....	North Vancouver, B. C.....	" 27	1	Gored by a bull.
Farmer.....	Penhalf, Man.....	" 28	1	In collision between vehicles.
".....	Elgin, Ont.....	" 31	1	Tree fell on him.
Farmer's wife.....	Montreal, Que.....	" 3	1	Run over by train.
Farmer's son.....	Ristico, P. E. I.....	" 11	1	Drowned, fell into well.
<i>Lumbering—</i>				
Sawmill hand.....	Riviere du Loup, Que.....	" 7	1	Caught in shafting.
Logger.....	Cedar Lake, Ont.....	" 21	1	Tree fell on him.
".....	Herschel, Ont.....	" 11	1	Log rolled on him.
".....	Montmorency, Que.....	" 14	1	Tree fell on him.
".....	Welwood, Ont.....	" 16	1	" "
".....	Marysville, B. C.....	" 20	1	" "
".....	Wycliffe, B. C.....	" 20	1	" "
".....	Bonaventure, Que.....	" 22	1	" "
Lumberman.....	Sutton, Que.....	" 15	1	Run over by train.
".....	Gagetown, N. B.....	" 17	1	Tree fell on him.
Pulp mill worker.....	Windsor Mills, Que.....	" 22	1	By a fall.
Millwright.....	Grandview, Man.....	" 27	1	Caught in shafting.
<i>Mining—</i>				
Miner.....	Lethbridge, B. C.....	" 14	1	Asphyxiated by gas.
".....	Frank, Alta.....	" 14	1	By fall of coal.
".....	Coal Creek, B. C.....	" 18	1	Run over by coal cars.
".....	Deloro, Ont.....	" 17	1	Caught in elevator.
".....	Cobalt, Ont.....	" 27	2	Fell 300 feet in shaft.
".....	North Bay, Ont.....	" 29	1	Run over by train.
".....	Michel, B. C.....	" 3	1	Fall of stone.
".....	Greenwood, B. C.....	" 10	1	Fall of rock.
".....	Cobalt, Ont.....	" 30	1	Premature explosion.
".....	Temagami Sta., Ont.....	" 29	1	Run over by train.
<i>Building trades—</i>				
Builders' labourer.....	Ottawa, Ont.....	" 6	1	Board fell on head.
Roofer.....	Toronto, Ont.....	" 16	1	Fell from scaffold.
<i>Metal, engineering and shipbuilding trades—</i>				
Foundrymen.....	Londonderry, N. S.....	" 1	2	Brick wall fell on them.
".....	Toronto, Ont.....	" 11	1	Fell into tank of cyanide of pota h.
".....	Hamilton, Ont.....	" 11	1	Caught in belting.
".....	Sydney, N. S.....	" 7	1	Overcome by gas, fell into furnace.
".....	".....	" 7	1	Run over by yard engine.
Boilermaker.....	London, Ont.....	" 4	1	Two ton casting fell on him.
Stationary engineer.....	Trenton, Ont.....	" 18	1	Struck on head by broken belt.

"	Port Stanley, Ont.....	" 6	1	Fell into hold.
Canal workers.....	Sault Ste. Marie, Ont.....	" 27	1	Lumber fell on him.
<i>General transport—</i>				
Driver.....	Kingston, Ont.....	" 7	1	In a runaway.
"	Chambly, Que.....	" 14	1	Kicked by a horse.
"	Quebec, Que.....	" 29	1	In a runaway.
Teamster.....	Ottawa, Ont.....	" 7	1	Fell twenty-five feet with team.
"	Windsor, Ont.....	" 8	1	Piano fell on him.
Stage driver.....	Hanna, Sask.....	" 9	1	Frozen to death.
Expressman.....	Toronto, Ont.....	" 20	1	Wagon overturned on his head.
<i>Miscellaneous—</i>				
Brickmaker.....	Toronto, Ont.....	" 1	1	Mass of clay fell on him.
Trained nurse.....	Ottawa, Ont.....	" 1	1	Fell in elevator shaft.
Clerk.....	Toronto, Ont.....	" 17	1	Fell down elevator shaft.
Cement works emp....	Calgary, Alta.....	" 7	1	Caught in shafting.
Caretaker.....	Winnipeg, Man.....	" 14	1	Head crushed by elevator.
"	Hamilton, Ont.....	" 29	1	Run over by train.
<i>Unskilled labour—</i>				
Labourer.....	Toronto, Ont.....	" 7	1	Struck by street car.
"	Montreal, Que.....	" 13	1	Run over by loaded vehicle.
"	"	" 10	1	Explosion of dynamite.
"	Ottawa, Ont.....	" 6	1	Plank fell on head.
FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN DECEMBER, 1909.				
Farmer.....	Rosthern, Sask.....	Nov. 30	1	Frozen to death.
Construction hand.....	New Kipp Sta., B. C.....	" 30	1	Run over by train.

month and two killed and ten injured in December, 1908. Two each of the fatalities were due to runaways and to falling material and one each to live stock to a fall and to exposure. Five of the minor accidents were due to runaways, four each to falls and to collisions, two to live stock and one to falling material.

Civic employes.—Thirteen of these employes were injured during December, compared with two killed and thirteen injured in November last, and four injured in December of last year. Six were injured by falling material at fires, two each by falls and by being asphyxiated by gas and one each by a runaway, by live stock and by a collision.

Miscellaneous.—Six of these workers lost their lives through accident and four were injured. In the previous month the

record was five killed and twelve injured, and in December, 1908, six killed and eleven injured. Three of the deaths were due to accidents in elevators, and one each to falling material, to machinery and to being run over. Two each of the other accidents were due to exposure and to falling material.

Unskilled labour.—During December four labourers were killed by accident and ten were injured, compared with six killed and six injured in the previous month and five killed and nine injured in December, 1908. One each of the fatalities was caused by a collision, by being run over, by an explosion of dynamite and by falling material. Of the other accidents six were caused by falling material, two by falls and one each by machinery and by cars.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during the month of December, 1909.

DOMINION REPORTS.

Geology and Economic Minerals of Canada.

A descriptive sketch of the Geology and Economic Minerals of Canada, by G. A. Young. Introduction by R. W. Brock, Director of Geological Survey, Ottawa: Government Printing Bureau, 1909, Page, 195.

AN important volume illustrated with eighty-two plates and two maps has been issued by the Geological Survey Branch of the Department of Mines, consisting of a descriptive sketch of the geology and economic minerals of Canada. In the introduction it is stated that an attempt has been made in this publication to give merely a general idea of the conditions obtaining in the various geological provinces into with the more important minerals which are characteristics of, or which have been exploited in each.

The great development of the mineral industry in Canada is shown in the statement that in 1886 the mineral production of Canada did not reach \$10,250,000 in value, and was only \$2.23 per capita. In 1908, the production was over \$87,-

000,000 or \$12.57 per capita. The total production for the last twenty-three years amounts to \$926,516,579, of which gold represents \$267,700,000.

The Transcontinental Railway.

Report of the Commissioners of the Transcontinental Railway for the year ending March 31, 1909. Ottawa: King's Printer, 1909. Page, 45.

In the report of the Commissioners of the Transcontinental Railway for the fiscal year ended March 31, 1909, it is stated that the total expenditure for the year amounted to \$24,892,772.98, making the total expenditure to March 31, 1909, \$51,950,717.02. The total miles of grading was 725.5 and the total miles of track laid 345.43. The entire line, with the exception of the entrance into Winnipeg, was reported to be under contract. With regard to the economic value of the country through which the line passes, it was estimated that from 114 to the 185th mile about 2,500,000 acres out of 3,712,000 would make good farming land, from the 185th to the 285th mile, containing 7,500 square miles, 6,000 square miles or 3,800,000 acres could be considered good arable land. In the next forty miles there would be about 500,000 acres of good arable land, 300,000 acres of medium

quality, and 200,000 acres of pasture and rocky land, well wooded. From the 325th mile there is a range of about 1,000,000 acres of agricultural land. Beyond that the arable land is much more restricted, and west of the 470th mile there is very little land fit for cultivation.

The returns of casualties to men employed by the contractors showed that there were sixty-eight men killed and twenty-two injured during the year.

AUSTRALIAN REPORTS.

Shipping and Migration Statistics.

Shipping and Oversea Migration of the Commonwealth of Australia for the year 1908. Commonwealth Statistician. Melbourne, 1909. Page, 97.

The shipping statistics of the Commonwealth of Australia, for the year 1908 show that 2,022 vessels entered during that year compared with 2,210 in 1907, and 2,029 vessels cleared compared with 2,184 in the previous year. With regard to the nationality of those entering in 1908, 342 were Australian, 798 were from the United Kingdom, 283 from New Zealand and nine from other parts of the British Empire. The total number of foreign vessels was 590, of which 129 were French, 156 German and 160 Norwegian.

The migration returns showed 72,208 arrivals of all nationalities, and 59,058 departures, compared with 68,638 arrivals and 56,124 departures in 1907.

NEW ZEALAND REPORT.

Industrial Conditions in New Zealand.

Eighteenth Annual Report of the Department of Labour of New Zealand, Wellington: Government Printing, 1909. Page, 225.

In the report of the Department of Labour of the Dominion of New Zealand for the year ended March 31, 1909, it is stated that the trade depression of 1908, was felt in New Zealand, but not to a serious extent. The producers of New Zealand received some millions of pounds less than anticipated owing to the shortness of money among their customers in Europe and America, and speculative building and investment were adversely affected. Many in the building trades

were consequently thrown out of work. The employes of many flax mills were also discharged on account of the sudden drop in the price of flax. In most of the other industries however, with the exception of the iron and engineering trades, fairly active conditions prevailed. The government employment bureau rendered assistance to 10,391 persons, with 7,510 dependents in 1908-9, compared with 6,305, with 4,408 dependents in the previous year. In 1909, there were 12,040 factories in New Zealand, an increase of 454 over the previous year, and there were 78,848 factory workers, an increase of only 223, compared with 1908.

Workers' Dwellings in New Zealand.

Report on Workers' Dwellings by the Hon. the Minister of Labour, Wellington: 1909. Page, 4.

By the Workers' Dwellings Act, 1908, the Department of Labour of New Zealand is authorized to erect and rent workers' dwellings. By March 31, 1909, 108 houses had been erected and finished, twelve were nearing completion and six others had been begun. Only three were unlet on that date. The gross weekly rent of these houses, including insurance and taxes ranged from 10s. 6d. to 18s. 3d. The experiment was tried of erecting a ferro-concrete house, and it was found to be nearly as cheap to build as a similar house of wood, and to cost much less for future maintenance.

OTHER REPORTS RECEIVED.

Canada.—Report of the Hudson's Bay Bay Railway Surveys. First Annual Report of the Civil Service Commission of Canada.

Ontario.—Report of the Farmers' Institutes of the Province of Ontario, 1908. Part I—Farmers' Institutes.

Australia.—Trade and Customs and Excise Revenue of the Commonwealth of Australia for the year 1908.

Belgium.—Annuaire de la Legislation du Travail. Publié par l'Office du Travail de Belgique. 12e Année, 1908.

Italy.—I Lavotori dele Miniere. Parte seconda. Il contratto di lavoro.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NOVA SCOTIA CASES.

Injunction Restraining Conveyance of Land in Aid of Manufacturing Enterprise.

IN a judgement granting an injunction to restrain the City of Halifax from conveying land in aid of a manufacturing enterprise, Mr. Justice Meagher says, in part:—The land in question was expropriated by the city in 1893, for “the extension and improvement” of the water system of the city, at a cost of \$1,050. A pipe line was carried through it since then. The proposed sale is for the original cost, but it is intended to reserve a strip a few feet wide on each side of that pipe and to give the purchaser a right-of-way over it. It is clear that while the city may devote land so acquired to temporary uses which will not interfere with the express purposes for which it was obtained, it cannot apply it to any purpose inconsistent therewith. This view was not controverted upon the hearing, nor was it disputed that the city might determine it was no longer required for the object originally designated, but it was contended that this determination could only be evidenced by an express resolution to that effect. The resolution passed by the council with the view of being enabled to make this sale, declared that this land was not required for water extension purposes, but was silent on the other branch, viz. the improvement of the water system. The two things are quite distinct. The city therefore has never determined that it may not be necessary for improving the water system, and consequently is not in a position to make a legal sale thereof and should, therefore, be restrained from doing so. It is a wholesome principle, in relation to municipal bodies, which restrains them from disposing of lands acquired for a designated purpose, or devoting them to any use inconsistent with such declared

purpose. If it were otherwise a door would be opened for such bodies to become speculators in land, a position wholly foreign to the objects for which they were created, and involving considerable danger to civic interests.

(Hubley v. City of Halifax, 7 Eastern L. R. 360.)

NEW BRUNSWICK CASES.

Damages for Loss of Index Finger.

In proceedings taken in the Circuit Court before Mr. Justice McKeown, without a jury, the petitioner, J. F. Barker of St. John, machinist, claimed damages, under the Workmen's Compensation for Injuries Act, against the Minas Basin Steamship Company, for the loss of the index finger of his right hand while placing a propeller in the defendants' steamer “Brunswick” in April last. The judge awarded petitioner \$650 damages, which is to be paid in weekly payments of \$6.50.

ONTARIO CASES.

Alien Labour Case at Collingwood, Ont.

An information was laid at Collingwood, Ont., on August 28, 1909, charging the defendants with having unlawfully assisted the importation of a citizen or resident of the United States into Canada under contract to perform services and labour in Canada. The County Judge gave, on July 24, 1909, his consent that the penalty for any violation discovered might be recovered upon summary conviction before any judge of the County Court or before the Police Magistrate of Collingwood. The hearing was commenced before the latter on September 2, 1909, the evidence of the complainant being heard and the case was adjourned to September 9, 16, 23 and 24, being finished on the last date. The evidence proved the hiring, that the workman in question was an American citizen and had never been in Canada before and that the contract was made by correspondence.

The defendants urged that the correspondence showed that there had been no intention of hiring the workman but that he had come to Collingwood of his own volition. The Police Magistrate, however, held that the Act had been violated and imposed a fine of fifty dollars and costs.

(Beasley v. the Charlton saw-mill Company; W. A. Hogg, Police Magistrate, Collingwood.)

Alien Labour Case Dismissed at Ottawa, Ont.

A charge of a breach of the alien labour act was laid by certain striking leather workers against Hugh Carson, Limited, of Ottawa, but was dismissed by the Magistrate.

It was shown that a member of the firm wrote to a man named Heath, at Salem, N. Y., offering him employment. Heath came over, but did not have his tools, and, before he got them, learned of the strike. He thereupon declined the job. The court held there was no evidence of a binding contract to give Heath work, and that therefore there was no importation.

Master and Servant—Contributory Negligence.

Action for damages for injuries sustained by the plaintiff, a servant of the defendant, while engaged in chopping hay with a machine provided by the defendant by reason of alleged defects in the machine, which was nearly new and made by a reputable manufacturer. The trial Judge Mr. Justice Teetzel held, that the plaintiff failed to establish that the machine was defective or unnecessarily dangerous, or that his injury was attributable to any negligence of the defendant; on the contrary the injury was attributable to the plaintiff's own want of care in feeding the machine. If there was any defect in the machine, it was brought to the knowledge of the defendant. No machine of this class is free of danger to a man who is not careful, but the employer is liable for the consequences, not of danger but of negligence. Action dismissed, and with costs if asked for.

(Bennie v. Verrall, 14 O't., Weekly Reporter 1095.)

Mechanics' Lien Act—Special Defences Including Damages

Plaintiff, a contractor, brought action to establish and enforce his lien under the Mechanic's Lien Act. The claim arose out of two contracts in writing and for additional work. Defendant denied that the work was authorized in writing, or properly done, or done in the time specified, and claimed as actual damages for each week of delay. The Official Referee, who tried the claim, gave judgement for plaintiff for \$3,250.21 and dismissed defendant's claim for damages. This judgement was affirmed by the Divisional Court.

(Hutchinson v. Rogers, 14 Ont. Weekly Reporter, 768.)

Employment of Child Under 14.

Plaintiffs employed one J., a child under fourteen, to work in their factory. J. was injured by the fall of a goods elevator, and recovered \$1,500 damages against plaintiffs on the ground that it was negligence on the part of a company to employ a boy contrary to the prohibition of the Ontario Factories Act, R. S. O., 1897, c. 256, s. 3 (5). Plaintiffs then brought action against the present defendant Company to recover amount paid J. as damages, claiming under an Employers' Liability Insurance policy issued to plaintiffs by defendant Company. Defendants contended that they were relieved of liability by a clause in the policy to the effect that the insurance did not cover injuries caused or received by any child illegally employed with the knowledge of the insured. The action was tried before Mr. Justice Latchford who held that the plaintiffs had no knowledge that J. was under the age of fourteen years, and was employed contrary to the provisions of the Factories Act, and that the present defendant Company was liable to repay plaintiffs the amount which they had paid J. for damages.

(Morton v. Ontario Accident Insurance Company, 14 Ont. Weekly Reporter 1010.)

Wages Assigned.

The plaintiff a storekeeper, supplied wage-earners with goods on verbal agree-

ments that he should be paid, by their employers, out of their wages, and that the employers consented to these agreements. Mr. Justice Teetzal had decided at the trial, without a jury, and the Divisional Court on appeal affirmed his judgement that the plaintiff had an equitable assignment of sufficient of their wages, which might be owing them, to satisfy his accounts, and could sue their employers without joining the several wage-earners as parties to the action.

(Lee v. Freedman, 14 Ont. Weekly Reporter, 1139.)

Damages For Death of Husband.

In an action for damages by the widow of a man who had been killed at the cement factory at Shallow Lake, while placing a short belt on a pulley, the defendant Company denied all liability, claiming that the machinery in use was as safe as could be made and was the machinery ordinarily used for the purpose. In the course of negotiations for a settlement the Company had offered the plaintiff \$500, which was refused, but, the offer being increased to \$700, this was accepted and judgement was entered for the plaintiff for that amount by consent.

(Anderson v. Owen Sound Portland Cement Company.)

Damages For Loss of Four Fingers

In an action for damages for the loss of four fingers of his right hand in a cutting machine in McFarlane & Douglas' factory on Slater Street, Ottawa, Alfred Currier, of Ottawa, a minor, who sued by his aunt as next friend, was awarded \$500 damages by the jury at the last assizes in that city. The verdict was given on the ground that the cutting machine should have been protected by a guard. The jury were sent back several times by the judge (Sir Wm. Mulock, C. J.) with a view to having them satisfactorily answer several questions which he had submitted to them. One of these questions, upon which they did not agree, was, whether or not the knife would "trip" without any one pressing on the treadle. The learned judge intimated that the jury might well have allowed greater compensation.

(Currier v. McFarlane et al.)

Damages For Loss of a Leg.

In an action by Mrs. Augusta P. Grossman, of Chippewa, on behalf of herself and her son Frederick Grossman, whom she alleged assisted in her support, the plaintiff claimed large damages from Harry D. Symmes, a contractor of Niagara Falls, for injuries to her son, who had been run over by one of defendant's engines and so injured that his leg had to be amputated between the ankle and knee. The defendant operated the line of railway used for the purpose of hauling material to the Power House of the Ontario Power Company, and the plaintiff alleged that the defendant operated the engine so negligently that the young man was thrown from the platform to the engine and run over. The principal defence was contributory negligence on the part of plaintiff's son. The action was settled for \$1,500 damages.

Damages against Railway Company.

In an action against the Grand Trunk Railway Company, tried at the last Ottawa Assizes, the plaintiff, John Taylor of Madawaska, was awarded \$500 damages for the death of his son, Silas Taylor, who was killed through the alleged negligence of defendants. Plaintiff claimed that his son, while employed as a brakeman on the railway in the Madawaska yards, was run over and killed through the negligence of one of the Company's engine drivers in not complying with the rules of the Company. It was alleged that while deceased was engaged in shunting cars, he got off the train that was being made up, opened a switch, signalled the engineer to back up the train, and then attempted to get on the leading car. It was contended that the train was backed up immediately the signal was given, without allowing time for the deceased to get on the car. The rules state that reasonable time must be allowed. It was while attempting to get on the moving train that the deceased fell and was run over and killed. No one actually saw the accident happen, and so the Company maintained that there was no proof that the rule had not been

complied with, and, therefore, that there was no evidence on which the jury could find that the Company was liable. The defendants also alleged that reasonable time had been given. The jury, upon the evidence on behalf of plaintiff awarded him \$500 damages.

Damages for death of Contractors' Fireman.

Another action for damages tried at the last Ottawa Assizes was that in which the plaintiff, Joseph Doherty, claimed damages for the death of his son, Patrick, killed by the machinery used for operating a steam shovel near Montreal. The defendants A. R. McDonnell of Montreal, and M. J. O'Brien, of Renfrew, are contractors. It appeared that the deceased was a fireman for the steam shovel, and that he got his leg and high so badly crushed in the machinery that he died some time afterwards in great agony. It was claimed that the cog wheel which injured the young man had not been sufficiently protected. The defendants' principal plea was contributory negligence in that the deceased had no authority to go in where he had gone at the time of the accident, and that he had so admitted before he died. The jury awarded plaintiff \$1,500 damages.

MANITOBA CASES.

Workmen's Compensation.

One J., while engaged as a switchman on defendants' railway at Port Arthur, Ont., met with injuries which resulted in his death. The plaintiff, his widow, was appointed administratrix of his estate by a Manitoba Surrogate Court, and brought this action for damages, claiming both at common law and under the Workmen's Compensation for Injuries Act (R. S. M. 1902, c. 178). It was held by the Court of Appeal following *Lawrence v. Kelly* (decided by the Manitoba Court of King's Bench), that the plaintiff could not sue under the corresponding Ontario Act without having been first appointed administratrix by an Ontario

Court, and that as the injury took place in Ontario the Manitoba Act could not apply, and there being no such right of action at common law, the entry of a nonsuit by the trial Judge was right.

(*Johnson v. Canadian Northern Railway Company*, 45 Canada L. J. 685.)

In *Lawrence v. Kelly*, above mentioned, Mr. Justice Macdonald, of the Manitoba Court of King's Bench, decided that a workman suing in Manitoba, in respect of an injury suffered in Ontario, caused by negligence of a fellow workman, cannot claim the benefit of the Workmen's Compensation for Injuries Act of Manitoba, nor can he recover under the corresponding Ontario Act when he failed to give notice, or bring his action, within the time prescribed by that Act. Neither can he recover at common law without proof of personal negligence on the part of his employer. The decisions in *Plan v. Grand Trunk Railway*, 27 U. C. R., 78, and *O'Sullivan v. Victoria Railway Company*, 44 U. C. R. 128, were followed.

(* * *)

Judgement to the amount of \$2,000 was given by Mr. Justice Cameron at the Brandon Fall Assizes in favour of Edmund Fulcher, Plaintiff against Dumais & Lachance, contractors. Plaintiff was engaged by defendants as a bricklayer on the Armoury building in Brandon, when a derrick brake gave way, allowing a box of bricks to fall on plaintiff, causing him serious bodily injury and dislocating his foot.

Plaintiff sued under the Manitoba Workmen's Compensation Act.

BRITISH COLUMBIA CASES.

Injury to Servant.

Action for damages for injuries sustained by plaintiff whilst engaged as a switchman on defendant's electric motor tramway between their ore bins and smelter furnaces. The plaintiff, having crossed the track to set the switch for the motor, which was about to return from the furnaces, started back over the track in order to take his usual seat on the head

end of the motor, and got his foot caught in a hole in the floor between the rails. He shouted to the motorman, who immediately cut off the current and applied to brakes, but the motor did not stop quickly enough to prevent the accident, and ran upon the plaintiff, breaking his leg in three places. The hole had been there for some time previous to the accident; the accident occurred just before daybreak; and the plaintiff had not been at work for more than one shift. There was some suggestion in the evidence that the hole was left there for the purpose of making room for a bar connecting the two rails in the track.

The defendant moved for a non-suit and submitted no evidence. Mr. Justice Irving, who tried the case without a jury, found the defendants guilty of negligence and liable in damages. He said that the hole in which plaintiff placed his foot was originally caused by a bar connecting the two rails. This bar was removed but the hole was not filled up or guarded, although it had been visible to the motorman for some weeks. In these circumstances, knowledge of the defect, or neglect of duty to know of the defect, should be imputed to the defendants. "The continued omission to mend this manifest defect would justify a jury in inferring that the employer was guilty of negligence according to the common law in one of two ways; either by neglecting to take reasonable precautions for the workman's safety or by omitting to provide a proper system of superintendence or inspection, which system, had it been in existence, would have resulted in the mending of this trap." The hole being in between the tracks, and extending from one rail to the other, opposite a switch, was almost in the very spot where the brakeman was bound to go in regaining his seat on the motor after operating that switch. The learned judge found that plaintiff did not contribute to the accident, that the motorman was not in fault; and that, as a result of being worn down by work, the brakes on the motor would not work, knowledge of which defect, having regard to previous complaints, must also be imputed to

defendants. The damages were fixed at \$4,500. An appeal from this judgement to the full Court was dismissed with costs.

(Barnes v. British Columbia Copper Company, 12 Western L. R. 68.)

Court divided in Opinion.

Plaintiffs sued defendant Company for damages for the death of their son, a locomotive driver in the defendants' employ, who was killed by having jumped from a train of which he had lost control. The jury found in favour of plaintiffs and \$6,000 common law damages. It was held on appeal, by Chief Justice Hunter, that the only verdict reasonably open to the jury on the evidence, was that the deceased lost his life by his own negligence. Mr. Justice Irving was of opinion that the damages were excessive, while Mr. Justice Morrison was of opinion that the verdict should stand. The result was an order for a new trial, the costs of the appeal to the defendant Company in any event of the new trial, and the costs of the first trial to follow the result of the new trial.

(White v. Victoria Lumber Company, 45 Canada L. J. 724.)

YUKON TERRITORY CASE.

Master and Servant. Injury to Labourer in Mine.

Plaintiff sued the Defendant Company under the provisions of the Employers Liability Ordinance of the Yukon Territory, Chapter 5, Territory Ordinances, 1908, for damages for injuries sustained by plaintiff while in defendants' employ, by reason of a defect in the condition and arrangement of certain tunnel, drift, or excavation, in which plaintiff was working at the "Venus" mine, near Conrad, in the Yukon Territory, and which defect, it was alleged, had not been remedied owing to the negligence of the foreman of the mine. Plaintiff was employed as a mucker or labourer and was under the orders of the foreman, who, on the day of the accident, asked him to assist another workman who was putting in timbers,

or lagging at another part of the mine. These timbers or lagging were used for the purpose of separating the ore from the waste as it was passed into the chute. While so engaged plaintiff was struck by a piece of loose rock and severely injured by having several ribs and his collar bone broken, as well as other injuries which will prevent him having the same free use of his arm as he had before the accident. Just before the noon hour, as was the custom, a blast had been set off in the shaft near where the plaintiff was assisting his fellow workman in the timbering or lagging. Some of the rock, which had been loosened by the blast but had not fallen down, was still hanging to the side of the wall, and another workman was engaged in picking this loose rock in order that it might fall down and be taken out of the way. The plaintiff said in his evidence that he did not know that this place was particularly dangerous, and that it was while he was working there, under the orders of the foreman, that a portion of the rock fell and he was corroborated by three other witnesses. For the defence there was evidence to show that the foreman had warned the men working with the lagging to be careful, as the rock was dangerous, and that plaintiff was personally warned of this by the foreman. There was also some evidence to show that the plaintiff had been well treated after the accident by the Company, and that he had said he was himself to blame.

Judge Macaulay, who tried the case without a jury, said that it was impossible for him to conclude that defendants were guilty of any negligence, on the part of their foreman, which resulted in the injury to the plaintiff, nor could he conclude that the injury was caused by any such defect as was alleged. In order to mine the ore it was necessary that blasting should be done. The foreman, in warning the plaintiff on two occasions to keep out of danger, was performing all the duties that were imposed upon him by his position. Not only did he warn the plaintiff but others did, and while the injuries which plaintiff suffered were most regrettable, he must conclude that these

injuries were not caused by the defendants' negligence, but solely by plaintiff's own negligence in not accepting the warnings which were repeatedly given to him. The principles of law are well settled in matters of this kind and he, therefore, dismissed the action with costs.

(Houlihan vs. Yukon District Gold Mining Company
12 Western L. R. 110.)

BRITISH CASE.

Decision by House of Lords re Trade Union's Parliamentary Fund.

No more important judgement has in recent years been given by the House of Lords than that which the Earl of Halsbury and Lords Macnaghten, James of Hereford, Atkinson, and Shaw, rendered during December in the case of "Osborne v. the Amalgamated Society of Railway Servants and others," the arguments in which were heard in July. The appeal to their Lordships' House was by the Society against a judgement of the Court of Appeal, which reversed a decision in favour of the Society. The question was whether it was competent for a trade union to provide for the maintenance of Parliamentary representation by means of a compulsory levy on its members. The Law Lords unanimously uphold the judgement of the Court of Appeal declaring the illegality of the rules of a trade union as to the formation of a fund for the return of members of Parliament.

The Earl of Halsbury read the following judgement:—

My Lords, I think the decision of this case must depend upon the construction which your Lordships will place upon the Statute 34 and 35 Victoria, chapter 31. In the definition clause of that Act it is enacted that the term "Trade Union" means such combination, whether temporary or permanent, for regulating the relations between workmen and masters or between masters and masters, or for imposing restrictive conditions on the conduct of any trade or business as would, if this Act had not passed, have been deemed to have been an unlawful combination by reason of some one or more of its purposes being in restraint of trade. This was amended in the 16th Section of the Act 39 and 40 Vict., cap. 22, as follows: "The term Trade Union means any combination, whether temporary or permanent, for regulating the relations between workmen and masters or between workmen and workmen or between masters and masters, or for imposing restrictive conditions on the conduct of any trade or business, whether such combination would or would not, if the principal Act had not been passed, have been deemed to have

been an unlawful combination by reason of one or more of its purposes being in restraint of trade." The first section of the earlier Act protects any purposes of a Trade Union from being held to be unlawful merely because they are in restraint of trade, with the consequence that no agreement is to be rendered void or voidable. By the fourth section it is provided that nothing in the Act shall enable any Court to entertain any legal proceeding for enforcing or recovering damages for the breach of any agreements between members of the Union—(1) Concerning the conditions in which they shall or shall not sell their goods, transact business, employ or be employed. (2) Any agreement for the payment by any person of any subscription or penalty to a Trade Union. (3) Any agreement for the application of the funds of a Trade Union—(a) to provide benefits to members; (b) to furnish contributions to any employer or workman not a member of such Trade Union in consideration of such employer or workman acting in conformity with the rules and resolutions of such trade Union; (c) to discharge any fine imposed upon any person by sentence of a Court of Justice. The Act is, as it were, the charter of incorporation, and it undoubtedly renders some things lawful which but for the enactment would be unlawful, and with a degree of minuteness gives a specific authority to certain contracts and to certain applications of funds that appear to me to be absolutely exhaustive. The question of how far and to what extent trading corporations were limited by the Memoranda of Association, which bear a close resemblance to what is here enacted as applicable to Trade Unions, was very amply discussed in "Riches v. Ashbury Railway Company" (Law Reports, English and Irish, House of Lords Cases, 7). The House of Lords in that case—consisting of Lord Cairns, Lord Chelmsford, Lord Atherley, Lord O'Hagan, Lord Selborne—seem to me to have settled the law in a manner which seems to me to dispose of this case. It is true that the Act does not make the Trade Union a corporation; but, taking the only distinctive word used, a "combination," it can hardly be suggested that it legalises a combination for

anything, and if some limit must be placed on its powers one can only apply the same rules that were agreed to by the noble and learned Lords in that case, and it certainly would not be easy to find a more supreme authority than the judgments in that case. This statute, I think, gives the charter for all such "combination," and what is not within the ambit of that statute is, I think, prohibited both to a corporation and a combination; it only exists as a legalised combination having power to act as a person and to enforce its rules within the limits of the statute whatever those limits are, and in the matter most relevant to the present question it has with great care protected from interference three applications of its funds, among which it is too obvious for argument that the object now in question is not one. It is manifest therefore, that if confined to the three purposes protected by the fourth section nothing else is within the purposes of a Trade Union as defined by the twenty-third or sixteenth section of the two Acts, and it is impossible to uphold this power of taxing the members beyond the purposes for which the Trade Union exists. You have heard a very learned and interesting argument, itself a commentary upon very learned arguments by the Court of Appeal, and I do not desire to be understood as expressing dissent from the views therein expressed. I only hesitate to give my opinion because I think the views I have expressed upon the construction of the statute are enough to dispose of this case, and I do not desire to go beyond what is necessary for the decision of this case. Many questions might arise here; for pecuniary assistance might be given to a person who without such assistance might not be able to support the burden of being elected a member of Parliament without it. It may be difficult to express in sufficiently definite language how far individual freedom of judgement can be preserved consistently with acceptance of pecuniary support. I can foresee questions of this sort, and I do not desire to be called upon to decide them until they do arise, and I therefore content myself by saying that this levy is to my mind manifestly beyond the powers possessed by a Trade Union.

THE LABOUR GAZETTE

FEBRUARY, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JANUARY 1910.

I.—GENERAL SUMMARY.

EXCEPTIONALLY mild weather prevailed in almost every section of Canada during January. Out-of-door employment was, as a result, unusually active for the season of the year. This was especially the case in the building trades and in railway construction. Mining operations were also facilitated. Some of the lumber camps, however, in New Brunswick reported operations hampered by the absence of frost and snow; and unskilled labour found the work of snow removal in the cities and on the railways considerably curtailed. The prevailing industrial prosperity on the other hand absorbed a much larger portion of the labour usually unemployed at this season than in the past two years, and few or no reports of distress arising out of unemployment were received from the leading centres. Manufacturing continued very active. Annual stock-taking in this branch and in the wholesale and retail trade of the country revealed a satisfactory turn-over, especially during the second half of 1909. Agriculture and fishing were in their season of dullness.

With regard to the outlook for 1910, the general feeling at the close of January was one of confidence that the process of recovery from the depression of 1907-08, which was marked during 1909, would be steadily continued. The comparative ease in the money market has been accompanied by a rapid and general revival

of trade and industry, and heavy expenditures on railway construction and general building are assured for the coming year, the amount of the latter already projected being much larger than at the corresponding date of 1909. The lumbering, mining and manufacturing industries are in a much more favourable position than a year ago. A feature of the situation receiving much attention at the present time is the upward tendency of prices and cost of living, which has injuriously affected a large portion of the community.*

Changes in Wages and Hours of Labour.

Wages were on the whole very stationary throughout the Dominion during the past month. The following is a statement with regard to the various changes in wages and hours of labour, information concerning which was received at the Department during January:—

Metal, engineering and shipbuilding trades.—Stationary engineers in the employ of the municipality of Ottawa, Ont., received an increase of \$10.00 per month.

Public employés.—Policemen at St. John, N. B., received a new schedule. The hours of Provincial employés at Toronto, Ont., were lengthened.

Railway employés.—An increase was granted to locomotive engineers in the

* A special article on this subject is published in the present issue.

employ of the Père Marquette Railway Company(†)

Interruptions to Industry.

Among industrial establishments, etc., destroyed by fire or through other causes during January, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Tailor shop at Amherst; printing establishment at Amherst, loss, \$30,000; blacksmith and carriage shop at Halifax, loss, \$3,000.

New Brunswick.—Two tenements at Bathurst, loss, \$2,000; potatoe house at East Florenceville, loss, \$1,000; saw mill at Summerville, at St. John, grocery store, loss, \$1,500; hotel, loss, \$1,700; rectory, loss, \$2,000; glass and crockery store, loss, \$15,000; woodworking factory, loss, \$50,000.

Quebec.—Hotel at Ayer's Cliff, loss, \$2,500; powder factory at Belœil, loss, \$75,000; bailiff's office and residence at Cartierville, loss, \$4,000; plumbing establishment at Cowansville, loss, \$1,000; general store at Chicoutimi, loss, \$30,000; saw-mill at Danville; grocery store at Delorimier, loss, \$2,000; school house at Hull, loss, \$12,000; hote at Lachute, loss, \$10,000. At Montreal, clothing store at Montreal, loss, \$5,000; tailor shop and hotel, loss, \$5,000; bakery, loss, \$1,200; shoe furnishing factory, loss, \$3,000; store and tenements, loss, \$10,000; apartment house, loss, \$3,000; nunnery (partial); glass works, loss, \$30,000; grocery store and residence, loss, \$18,000; tool factory, loss, \$5,000; sash factory loss, \$5,000, (100 thrown out of employment); theatre, loss, \$10,000, photographic store, loss, \$15,000. Carriage factory at Quebec; newspaper office at Quebec; saw-mill at St. Augustin, loss, \$6,000; church at Ste. Catherine; church at St. Célestin, loss, \$9,500; powder works at St. Hilaire, loss, \$2,000; photographic gallery at St. Hyacinthe, loss, \$1,000; tenement house at Shawinigan Junction, loss, \$1,000.

Ontario.—Hotel and bowling alley at Amherstburg, loss, \$20,000; paint shop and storeroom at Brockville, loss, \$5,000; theatre at Chatham; two business blocks at Charlton; blacksmith's shop at Belleville; Government offices at Cochrane; stores and residences at Easton's Corners; business portion of town of Elk Lake, loss \$190,000; boarding house at Fort William; tenement, house at Hawkesbury, loss, \$2,000; hospital at Hamilton, loss, \$6,000; hotel at Kenora; business block at Little Current, loss, \$100,000; flour mill at Niagara Falls, loss, \$50,000; six stores at North Bay, loss, \$20,000; grain warehouse and 1,000 bushels of grain at Onondaga; two stores at Orangeville; tailor shop at Parry Sound, loss, \$20,000; two stores at Sault Ste. Marie, loss, \$8,000; business block, hotel and post office at Sturgeon Falls, loss, \$75,000; cattle byre and stables with contents at Turlow, loss, \$3,000. At Toronto, shoe store, loss, \$20,000; photographic supply store loss, \$1,000; flour mill (partial), loss, \$1,500; hotel, loss, \$4,000; school house (partial); blind factory (partial), loss, \$1,000.

Manitoba.—Grocery store at Carberry; elevator at Emerson, loss, \$30,000; school house at Headingly, loss, \$8,000. At Winnipeg, business block, loss, \$2,000; newspaper office, loss, \$5,000; mattress factory, loss, \$15,000; wire works loss, \$75,000.

Saskatchewan.—Hotel at Davidson, loss, \$3,000; hotel at Swift Current, loss, \$2,000; general store at Wynward, loss, \$15,000

Alberta.—Power plant at Lethbridge.

British Columbia.—Theatre and store at Victoria, loss, \$25,000.

† For detailed information with regard to this change see report of St. Thomas, Ont., correspondent.

Conditions in the Industries and Trades.

Conditions of employment during January in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of the *Labour Gazette* and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Farmers were in their dull season, work being confined to the care of stock, the cutting and hauling of cord wood, the marketing of produce and other winter occupations. The snowfall though light was sufficient to render hauling easy. High prices prevailed and had the effect of bringing out grain and produce in large quantities.

Up to the close of navigation over 36,000,000 bushels of Western grain had been marketed through Canadian ports, and over 19,000,000 bushels through American ports, some 17,000,000 of the latter having been shipped by way of Buffalo. Up to the middle of January, 65,483 cars of grain had been inspected, of which the Canadian Pacific Railway hauled 40,000, the Canadian Northern 18,270, the Grand Trunk Pacific 3,500, and the Great Northern 2,690.

The Census and Statistics Monthly for January stated that farm values had increased during the past year in all the Provinces with the exception of Prince Edward Island and British Columbia. The value of farm animals also showed a steady increase for all classes in all of the Provinces. With regard to wages the following statement is given.

The average wages during the summer season for competent farm and domestic help for the Dominion is \$23.69 per month for males and \$11.08 for females, exclusive of board, and per year \$216.29 and \$116.08 for males and females of the same class. These figures are for the native born; the wages for immigrants are lower. The average value of board per month is placed at \$10 for males and at \$8 for females.

The highest wages are reported for the western provinces, where they reach \$30 per month and \$300 per year for males, and \$17 per month and \$171 per year for females. A large majority of correspondents comment on the scarcity of reliable farm and domestic help, and report that neither male nor female help make yearly contracts. It would appear from the reports of correspondents that the more general practice is to employ male help during the busy season by the day, and the wages

range from \$1 per day in the Maritime provinces to \$2.50 and \$3.00 per days with board in the western Provinces. In Ontario the average monthly wage for men is \$21.52 and \$10.22 for women, exclusive of board, which is \$2.17 less for men and eighty-six cents less for women than the average wage for all Canada.

The final returns of the field crops in Saskatchewan as compiled by the Bureau of Information and Statistics in the Department of Agriculture are as follows:—

	Total Acreage.	Total Yield.	Average Yield.
Wheat.....	4,085,000	90,215,000	22·1
Oats.....	2,240,000	105,465,000	47·1
Barley.....	244,000	7,833,000	32·1
Flax.....	819,100	4,448,700	13·9

These crop yields place Saskatchewan in the third rank among the provinces of the Dominion and States of the Union as a producer of wheat and oats; The average price on the farm for the wheat crop of all grades was eighty-four cents per bushel, which means that the wheat crop was worth \$75,780,600 to the producers. The oat crop at an average price of twenty-six cents per bushel, was worth \$27,420,900, and the total value on the farm for all grain, roots and fodder crops raised in Saskatchewan in 1909, together with that of milk and its products, was \$132,539,242. The total agricultural assets of the Province of Saskatchewan are valued at \$178,421,961 owned by 81,303 farmers and grown on less than twelve per cent. of the estimated arable acreage in the Province south of parallel fifty-five. In harvesting the crop, the farmers of Saskatchewan received aid from 12,500 harvesters brought from the east on seven excursions and distributed throughout the Province. The Province received over sixty-five per cent. of the harvesters who came West this year. There are in the Province at the present time, 842 grain elevators, having a total capacity of 24,279,000 bushels.

Several important conventions of agriculturists were held during January. At Regina, Sask., a convention of the agricultural societies of Saskatchewan was held at which upward of 200 delegates were present. At Edmonton, Alta., an important convention of Alberta agri-

culturists was held. At Belleville, Ont., the Eastern Dairymen's Association of Ontario held a successful meeting, and at St. Thomas, Ont., the Dairymen's Association of Western Ontario held its forty-third convention of the same kind. At both of the latter an exhibition of butter and cheese was made. The Bedford District Dairymen's Association held its annual convention at Cowansville, Que.

The committee of the Manitoba Grain Growers' Association, appointed to co-operate with the Provincial Government for the drawing up of plans for the Government ownership of interior elevators presented a memorandum to the Government in January. It suggested that the Government should assume the financial responsibility of acquiring existing elevators or of building a new system, the cost being estimated at about \$3,000,000. It was proposed that these elevators should be made self sustaining, a schedule of storage rates being suggested. The appointment of an Elevator Commission of three to have charge of the system was recommended and the work of the Commission outlined. Methods of valuing present elevators, handling grain, controlling weights, providing for the working of the elevators, etc., were outlined in the memorandum. The memorandum also suggested the inauguration of a system of promotion of employes and the establishment of a pension fund.

It is estimated that live stock dealers in Alberta received \$9,000,000 for stock last year. There were in force in Western Canada 939 grazing leases, covering 3,259,271 acres as follows:—

	Acres.
Manitoba.....	12,642
Saskatchewan.....	632,493
Alberta.....	2,132,718
British Columbia.....	281,418

Fishing.

The month has been quiet throughout Canada. Smelt fishing in the Maritime Provinces has been a failure in some localities as a result of the mild weather; in others catches were fair. Some good catches of mackerel and herring, however, were reported. Catches of tommy-cod in the St. Lawrence river were fair. On

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has references only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

the Great Lakes only a few rough fish were taken. In British Columbia the month was generally quiet.

Lumbering.

Work in the woods proceeded under favourable conditions during the first half of the month but a thaw later considerably hampered operations in the Province of New Brunswick and was felt to a lesser degree in Ontario. Apart from this feature the month was an active one throughout Canada. The outlook is for a year of activity and expansion, notwithstanding that the dullness prevailing during the past two years has left an accumulation of stocks in some sections. Prices have continued firm. In British Columbia the outlook for a heavy exportation of lumber to the Prairie Provinces in 1910, is excellent. The coast lumbermen are rapidly reducing stock.

The Canadian Lumbermen's Association held an important convention at Ottawa, Ont., February 1-2.

The annual convention of the Canadian Forestry Association will be held at Fredericton, N. B. February 23-24.

A total of 8,683 timber licenses west of the Cascades brought a total of license fees to the Treasury of British Columbia, of \$1,218,195.11; while to the east of the mountains, the total of licenses was 6,481, producing in revenue \$746,967.10. Timber and license transfers added a total of \$8,023; penalties aggregated \$16,825; and 1,092 coal and petroleum licenses \$69,200.

Mining.

The month of January was on the whole more favourable than December in the mining industry. The Nova Scotia collieries showed increasing activity. The mica mining industry of Quebec was also more active, and though the asbestos camps were affected by weather conditions the month compared very favourably with the corresponding month of 1909. Activity was pronounced in the Cobalt and other camps of Northern Ontario. A feature of the month was the discovery of some very promising claims

in the Porcupine district and the pronounced prospecting activity which followed. Over 2,000 claims have already been staked out within an area of four townships in this section and several hundred men were engaged in development work. In British Columbia the collieries and metalliferous mines were active, conditions being for the most part unchanged from December.

The following is a comparative statement of the production of the Nova Scotia collieries during 1908 and 1909:—

	1908	1909
Cape Breton Co.....	3,950,210	3,345,341
Pictou County.....	600,019	527,349
Cumberland County.....	473,339	404,235
Inverness Co.....	348,910	320,752
	5,372,478	4,597,677

Total shipments from the Cobalt camp during 1909, amounted to 29,751 tons, compared with 25,264 tons in 1908, and 14,850 tons in 1907.

The production of gold in Nova Scotia in 1909, is estimated at 12,500 ounces, a slight increase over the year 1908.

Manufacturing.

The manufacturing industry had an active month, the general expansion noticed during the past few months having been continued. Stocktaking and repairing of machinery caused a number of shut-downs, as is usual at this period of the year. Conditions otherwise may be described as normal and in almost every locality and branch of the industry the outlook for 1910, is regarded as favourable. Woollen and textile mills were busier than for many months past.

Railway Construction.

Railway construction was confined for the most part to rock cutting and the forwarding of supplies and materials. The mild weather enabled work to be prosecuted with unusual activity on the several contracts. Bridge construction was in progress at points on the National Trans-continental Railway. Preliminary work was in progress in connection with the Quebec bridge.

According to an estimate based by the

"Marine World" on returns received from the leading railway companies operating in Canada, 1,507 miles of new track, exclusive of second track and sidings, were laid during 1909, compared with 1,505 miles during 1908.

It is estimated that 312 miles of track were laid during 1909, on the Eastern Division of the National Transcontinental Railway. Altogether 561 miles have been laid in this Division, leaving 1,244 miles to be laid.

According to the statistical report of the Department of Railways and Canals, the railway mileage of Canada increased 1,138 miles during the year ended June 30, 1909. There were at that date 24,104 miles of railway in operation. During the same period there was added to existing rolling stock ninety-seven locomotives, 2,090 freight cars and sixty-six passenger cars.

Three new branches of the Canadian Pacific Railway in Western Canada were recently opened for passenger traffic, namely, a branch from Stettler to Castor, a branch from Weyburn to Forward and a branch from Lethbridge to Carmingale.

General Transport.

Railway employés were generally active, freight traffic being well maintained. Railway car shop employés also had an active month. The earnings of the leading companies continued to show gains over the corresponding periods of previous years.

The Railway Commission recently gave judgement postponing until January 1st, next, the going into operation of the new regulations of the telegraph companies announced in September, 1909, reducing code words composed of artificial combinations of letters to a maximum of five letters instead of ten.

The Railway Commission decided during January, not to forbid the presence of brakeman on the top of moving trains and to maintain the present headway of twenty-two feet six inches. An important order was also issued by the Board with regard to farm crossings.

Winter port traffic at St. John, N. B., and Halifax, N. S., had been well maintained (*).

The Trades.

Building.—The prevailing mild weather facilitated outside operations to an unusual degree, though bricklayers, stonecutters, and builders' labourers were for the most part idle. The inside branches, however, were unusually active, and in nearly all of the larger centres carpenters, lathers and plasterers had a good month. Plumbers were well employed on repairs.

Metal and woodworking.—These trades reported greatly increased activity as compared with January, 1909, due to the marked revival in manufacturing. Employés in plants for the manufacture of structural material were especially busy. Annual stocktaking accounted for some idleness in several localities.

Printing.—The allied trades were well employed and in several localities were busy.

Clothing.—Journeymen tailors were dull from seasonal causes, but garment workers were active. Knitting mill employés were very active. In the boot and shoe trade there was a marked improvement compared with the preceding months.

Textile.—Notwithstanding the high price of raw material, Canadian cotton mills were active. The woollen mills have recently become considerably more active. Carpet factories also were active.

Food and tobacco preparation.—Bakers and confectioners had a fair month for the season. Cigarmakers and tobacco workers were active. Ice cutters began work at a somewhat later date than last year, but were busy during the greater part of January.

Leather.—Tanners, curriers and leather workers had a fair month.

Miscellaneous.—Laundry workers, barbers, retail clerks, delivery employés, etc., reported normal conditions.

Unskilled labour.—The month compared very favourably for this class with January, 1909. There was little employment in connection with snow removal,

* See reports of local correspondents elsewhere.

but the general activity of industry had absorbed a much larger number of this class than a year ago, and there were few or no reports of unemployment involving distress received from the larger centres of population. The outlook is very favourable in connection with the resumption of spring activity.

Canadian Trade and Revenue.

Foreign trade.—During December, 1909, the total value of imports entered for consumption was \$31,687,924, compared with \$23,130,672 in December, 1908. For the first nine months of the fiscal year ending December 31, 1909, the total value of imports entered for consumption was \$271,796,355, compared with \$217,958,135 in the corresponding period of 1908. The total value of domestic exports during December, 1909, was \$38,066,086 compared with \$26,502,700 in December, 1908. The total value of domestic exports for the first nine months of the fiscal year ending December 31, 1909, was \$221,116,813, compared with \$194,583,187 in the corresponding period of 1908. The grand total of Canadian trade for December, 1909, amounted to \$72,527,465, compared with \$51,276,931 in December, 1908. For the first nine months of the fiscal year ending December 31, 1909, total Canadian trade was \$512,486,678, as against \$429,198,172 in the same period of 1908. In December, 1909, there was an increase in exports of products of the mine, the fisheries, the forest, animals and their produce, agriculture and manufactures.

According to reports of Trade Commissioners received at the Department of Trade and Commerce, Canada, a considerable market for Canadian eggs and potatoes has arisen in Cuba. Salted herring, apples, potatoes, machinery and motor boats were being asked for in China. A good opening for Canadian exports was stated to exist in Guatemala.

Imperial trade.—In Great Britain and the different dominions of the Empire openings for Canadian products were reported as follows:—For canned fish in Australasia; for maple sugar, maple syrup and furniture in South Africa and for staves and headings in Newfoundland.

Domestic trade.—There was the usual lull following the holiday season and retail trade was generally quiet. Wholesalers, however, reported a fair movement of goods, and there was a general feeling of confidence. Stock-taking was completed early in the month and satisfaction was generally expressed with the result of the past year's business.

The amount of money secured by the issue of Canadian bonds during 1909, was in the neighbourhood of \$240,000,000. Stock issues of Canadian owned companies brought the total to \$265,000,000, the largest capital issued in the history of the country.

Bank clearings in 1909, totalled \$5,205,000,000, an increase of \$1,062,800,000.

The December bank statement showed a shrinkage in note issues but a gain in current loans. During 1909, a total of \$120,000,000 was added to deposit account.

Interest rates remained low and the outlook is for easy money for some time.

At the forty-third annual meeting of the Canadian Bank of Commerce held January 11, 1910, a decrease of profits, owing to the easy condition of the money market was announced. Over \$700,000 was carried forward to profit and loss account. The Provincial Bank of Canada reported an increase in deposits and reserve. The net profits of the Traders' Bank of Canada allowed an addition of \$200,000 to rest account and of \$10,000 to pension and guarantee fund. The Royal Bank reported an increase of over thirty per cent. in deposit and note circulation. The bank increased its dividend from ten to eleven per cent. The United Empire Bank reported a marked improvement in business as indicated by a gain or more than eighty-six per cent. in deposits and of forty per cent. in profits. The Bank of Hamilton also increased profits by six per cent., the reserve fund being strengthened by an addition of \$27,140. The Bank of New Brunswick enlarged its capital, the sum of \$55,250 being added to rest account, which is now 178 per cent. of the capital stock. The Bank of Nova Scotia earned twenty per cent. on capital, being an increase of \$45,000 over the earnings of the pre

vious year: \$100,000 were added to reserve fund. The Farmers' Bank of Canada had a good year, nearly every item showing a gain, especially deposits.

Notes.

The Workmen's Compensation Act of Quebec, came into force, January 1, 1910.

The annual convention of the Ontario Association of Architects was held at Toronto, January 11-12.

The fifth semi-annual convention of the Canadian local unions of the United Garment Workers of America was held at Hamilton.

The fifth annual convention of the Corporation of British Columbia Land Surveyors was held at Nelson, B. C., January 11.

The twenty-fourth annual meeting of the Canadian Society of Civil Engineers was held at Ottawa, Ont., on January 25-27.

The eighth annual report of the Lord's Day Alliance was issued during January and contained a detailed statement of the work of the Alliance during the past year.

The annual convention of the Canadian Clay Products Manufacturers' Association was held at Chatham, Ont. Mr. W. McCredie was elected president and Mr. D. O. McKinnon, of Toronto, Ont., Secretary.

The Short Course classes at present in session at the Agricultural College at Truro, are the largest yet held in the history of the College. From 250 to 300 farmers and their sons are attending. Out of the total enrollment, sixty-five are from Prince Edward Island, twenty-six from New Brunswick, and about 150 from Nova Scotia and one from Newfoundland.

The Ontario section of the Trades and Labour Congress of Canada had an interview with the Government during January. The deputation urged the appointment of a special committee of the Legislature to consider a revision of the Workmen's Compensation Act; that municipalities be given local autonomy in the fixing of the rate of assessment on land and improvements so that the rate on improvements might be reduced and the rate on land increased; that Sunday work for street railway employés in cities

and towns be limited to eight hours; that vestibules be made compulsory on pay-as-you enter cars; that for miners, the days' work should be eight hours, and legislation to enforce a standard rate of wages in municipal contracts. The deputation included F. Bancroft, vice-president of the Trades and Labour Congress of Canada for the Province of Ontario; Joseph Marks, London, editor of the Industrial Banner; Jas. Gibbons, L. H. Gibbins, James Simpson, John Corcoran, W. J. Storey, Sidney Jones, Magnus Sinclair. The deputation was introduced by John Armstrong, Secretary of the Ontario Labour Bureau. The members of the Cabinet present were: The Hon. Sir J. P. Whitney, Hon. Dr. Pyne, Hon. Frank Cochrane, Hon. James Duff, Hon. A. J. Matheson, and Hon. J. J. Foy.

The first session of the twelfth Legislature of British Columbia was opened at Victoria, B. C., on January 20. In the Speech from the Throne reference was made to the satisfactory condition of trade and industry and the substantial development of the Northern portion of the Province. The reorganization of the Department of Agriculture was stated to have produced satisfactory results. The Legislature will be asked to pass upon a contract providing for the building of 600 miles of trunk line with branches and connections by the Canadian Northern Railway and the extension of the Kettle River Valley Railway. The interim report of the Forestry Commissioners and the report of the Civil Service Commissioners will be presented.

The second session of the twelfth legislature of Ontario, was opened at Toronto, Ont., on January 25. Reference was made in the Speech from the Throne to the extension of the mineral industry, the profitable year of the Temiscaming and Northern Ontario Railway, the fair yield and high prices of agricultural products, the proceedings of the Milk Commission, the progress made in the construction of transmission lines for the distribution of Niagara power and the purchase of a site near the City of Guelph for the new Central Prison. With regard to the enhancement of cost of living the following statement was made:—

The remarkable and continuous advance in the price of foodstuffs and of many articles of household use, has attracted and certainly merits public attention. It has already caused hardship in many households and promises to add grievously to the burden of living, especially in our cities and towns, except in the cases of people of large incomes. It would seem that prompt and thorough enquiry is necessary with a view to the possible suggestion of a remedy. Obviously this condition of affairs, affecting the people of the Dominion of Canada as a whole comes within the purview of the Dominion Government and Parliament, and it is to be hoped that such enquiry will be instituted.

The twelfth annual report of the Montreal Builders' Exchange issued during January referred to the installation by the Exchange of the first and only permanent Builders' Exhibit in Canada. Reference was also made to the improved civic prospects, the construction of two large technical schools and the negotiations looking to the adoption of a uniform contract. The report also refers to the Workmen's Compensation Act of the Province of Quebec. A favourable reference was made to the results of the Industrial Disputes Investigation Act, the extension of which to all industrial disputes was advocated. The report concluded with an interesting summary of building statistics and with a reference to the important fact that in 1909, not a single strike occurred in the building trades in Montreal.

The financial statement of the School Savings Bank of Ville St. Louis after two years and five months operation shows total deposits made by the children of \$10,369.43 and other receipts of \$174.84. The expenditure showed: amount withdrawn for deposit in bank of \$7,370.00 and amount withdrawn owing to death, change of residence, want, \$818.96, a total of \$8,178.96; leaving a balance in hand of \$2,365.31.

The formal opening of the Hamilton Technical and Art School by His Honour the Lieutenant Governor and the Honourable the Minister of Education of Ontario, took place January 20-21.

At the first regular meeting of the Winnipeg Public School Board for 1910, the following clause in the building committees report was passed unanimously:—

"That the Board reaffirm its desire:

1. To have all workmen employed on any contract in connection with the erection of buildings into which the Board may enter, paid a liberal wage.

2. To assist in a practical way the carrying out of this desire by incorporating in specifications a clause requiring contractors to pay to workmen such wages as may from time to time be arranged or agreed upon between the representatives of the trade interested, and the executive of the Builders' Exchange."

Representatives of the Canadian Embalmer's Association waited on the Honourable the Premier of Ontario during January to ask that the Government appoint a Board of Examiners to issue certificates to undertakers who pass examinations, provision to be made for the revocation of licenses in case of unprofessional conduct, the Board at all times to exercise power of supervision over all undertakers.

The annual meeting of the Dominion No. 1, branch of the Employés' Relief Fund was held during January. The average number of contributors monthly was 764, of whom 139 received benefits. Two death claims were paid. One widow and thirty children are still receiving benefits. The receipts for the year were:— Balance on hand Jan. 1, 1909, \$10,-958.79, received from members' dues, \$2,-168.75; received from Dominion Coal Company's grant \$1,187.50; received from Government grant, \$71,187.50; interest on money in bank, \$256.60; total \$15,759.14. The disbursements amounted to a total of \$4,904.09, leaving a balance in the bank of \$10,855.

In the Province of New Brunswick a year of industrial and commercial expansion is expected. The press of the Province has lately devoted considerable space to showing the substantial progress made in nearly every town during 1909. A big factor in the future growth of the country is the new railroads that are being opened. The International across the northern part of the Province will be in operation this year, and the Grand Trunk Pacific from Moncton to the Quebec boundary is nearing completion and is opening up very promising territory. It is announced that two large parties of British farmers with capital, will arrive during the first week in April and will settle upon vacant farms and upon the new lands opened up by the railway. Despite a falling off in cattle shipments, winter export trade at St. John has been nearly half a million dollars greater than at this time last year.

The twenty-second convention of the Ontario Architect's Association was held at Toronto.

The formation of a merger of canning companies in Ontario, to comprise about fifty-six factories, including those previously in the Canadian Cannery's Consolidation, was announced during January.

Two new steamers will be placed upon the Pacific Ocean by the Grand Trunk Pacific Railway Company, to ply between Prince Rupert, Victoria, Vancouver and Seattle. The steamers are to have a speed of eighteen knots.

A conference was held at Montreal

between the general managers of different railway systems and representatives of trainmen in their employ with regard to wages conditions for this class throughout Canada.

At the beginning of 1910, W. J. Gage and Company, Limited, publishers, Toronto, in closing up the books, for 1909, paid a bonus equivalent to two weeks salary to all employes (not shareholders) who had been in the service of the Company for two years and over, and a bonus equivalent to one week's salary to all in the employ of the firm for over one year and under two years.

II.—REPORTS OF LOCAL CORRESPONDENTS.

MR. James P. McMurphy, New Westminster has been appointed correspondent to the *Labour Gazette* for New Westminster, B. C., and district, in the place of Mr. J. D. Stewart, resigned.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continued active throughout January, the mild weather greatly stimulating all the industries in the district. A healthy tone pervaded the trades, and apart from the district of Glace Bay, the first month gave indications of a very busy year.

Reviewing the past year, a larger volume of business was done than in any one year since 1903, almost every concern in the Sydney district reporting increased business.

The Dominion Coal Company, which produced three and one-half million tons of coal in 1908, only mined two million seven hundred and fifty thousand tons, in 1909. The falling off was due to strike conditions since July 6th.

Substantial progress was made at the Nova Scotia Steel and Coal Company's works during 1909. A comparison of outputs show an increase in the amount

of coal mined, steel and iron manufactured and coke made.

COAL OUTPUTS.		
Year.		Tons.
1909.....		810,000
1908.....		680,772
Increase.....		129,228
STEEL INGOTS.		
1909.....		66,720
1908.....		52,000
Increase.....		14,720
PIG IRON.		
1909.....		58,000
1908.....		54,000
Increase.....		4,000
COKE.		
1909.....		87,000
1908.....		79,000
Increase.....		8,000

The two collieries of this Company, which for a few weeks were closed down for repairs, were started up during the latter part of the month and prospects are bright for a busy year.

The Dominion Iron & Steel Company had a good year, the only cause of interruption being a shortage of coal supply caused by the strike in the Glace Bay district. To make up the deficiency, the Company had to import 98,000 tons from the United States. But for the hindrance caused by this interruption in the coal supply, the year would have been the best in the Company's history. Even with the handicap, the tonnage

and several important items were heavier than ever before. The following table gives the output of the principle materials produced in the year ending 31st December, 1909:

	Gross tons.
Pig iron.....	256,272
Steel ingots.....	297,330

From these were produced:

	Tons.
Rails.....	140,091
Wire rods.....	73,047
Merchant blooms.....	25,407

By-products recovered were:

Sulphate amonia.....	tons	3,031
Tar.....	gals	4,020,000

The policy of expansion adopted by this Company is the greatest evidence of its prosperity, and has given an impetus to all other business concerns in the Island.

Rhodes, Curry & Company reported a year of progress, with splendid prospects ahead.

Chappell Brothers, Limited, wood-workers, had a good year and enlarged plant. The last two months of the year were exceptionally busy ones, the factory having to work overtime to meet orders.

Andrews Brothers & Jessom, wood workers, had a successful year.

The Saunderson Manufacturing Company, tar paper, increased its business during the year, and reported continued growth of business in sight.

The receipts of the Cape Breton Electric Company for the first nine months showed a falling off as compared with the previous year. The last three months of the year were more favourable.

The Sydney Cement Company erected five buildings made out of their own product "Rampart Cement Concrete." This Company had a fair year, and is under contract to supply large quantities of cement to the Dominion Iron & Steel Company for the new works.

The Tar & Chemical Company reported a fair business for the year 1909, although progress was somewhat hampered during the early months of the strike at the Glace Bay collieries. There is a good demand for the products of this Company.

Since 1904, the Bell Telephone Company has almost doubled the number of telephones in use. The system has been also greatly improved, and new lines have been built through parts of the Island, heretofore, unreached by any telephone system. Telephones in use 1904, were 918; telephones in use 1909, 1,700.

The Custom's revenue receipts at the port of Sydney for 1909, totaled \$181,937, as against \$130,391, in 1908.

Building operations in the City of Sydney for the past year were very active. Ninety building permits were issued, the total value of the work being \$156,820. Of the permits issued forty-eight were for new dwelling houses; five for alterations to present buildings; nine for additions; seven for repairs; seven for warehouses; six for shops, and eight for miscellaneous buildings. A scarcity of dwelling houses may cause an activity in the building trades of Sydney as soon as the season permits of active outdoor work.

The following is a table of men employed and wages paid by the larger industries of Sydney:

	No. of men.	Monthly Pay-Roll.
Dominion Iron & Steel Company, Limited.....	3,000	\$ 180,000
Intercolonial Railway.....	200	13,000
Rhodes, Curry & Company, Limited	100	5,000
Chappell Bros., Limited.....	75	3,300
Shaw & Mason, Limited.....	50	3,000
Dominion Tar & Chemical Company, Limited.....	40	2,500
Lynch Bros., Dolan Company, Limited.....	60	2,300
Sydney Cement Company.....	50	2,000
Cape Breton Electric Company and S. & G. B. Railway Company....	100	5,800
Sydney Foundry & Machine Works	30	1,500
Eastern Telephone Company.....	35	1,500
Total.....	3,740	\$219,900
Approximate for the year.....		\$2,638,800

The unusually open weather conditions greatly favoured shipping, and the Ferry boats, with but one or two days interruption, continued to ply between Sydney and North Sydney during the whole month. Much coal was shipped from International Pier going by the way of Portland to Canadian markets.

The building trades were quiet, but other skilled trades were active.

Wholesale and retail trade was normal. Freight transportation by rail was fairly heavy.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment was a little below the average in regard to days worked and the output of the collieries, a decrease of about 5,000 tons in the output having occurred during the month. For the year ended December 31, 1909, shipments from this district were about 60,000 tons less than in 1908. General employment for the year, however, has been very good, the different industries being steadily employed. With the exception of a strike of boy labourers in May, 1909, in the Drummond colliery, there has been no unrest in the district, the minor difficulties which frequently occur having been settled between the management and committees of the workmen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This industry was quiet through seasonal causes.

Lumbering.—Operations in this industry began with great activity, but have so far been seriously hampered by adverse weather conditions. During December a very heavy snow storm prevailed, and there having been no severe frosts previously, conditions were not favourable for making hauling roads, especially on swampy ground. This will probably retard progress in this industry for some time.

Manufacturing.—The various establishments were busily employed, with the exception of the Rifle Sight works.

Mining.—This industry was actively employed, with a bright outlook. The mines in this district are beginning to get down very deep; the Drummond colliery has reached a depth of about

8,000, but pitching on an average of eighteen degrees, which is considered deep to maintain and keep up a large output.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet. Machinists and engineers were busy, as were also blacksmiths. Horseshoers were active and jewellers found trade good. Carriage and wagon makers were quiet. Fair conditions were reported in the printing trades. Journeymen tailors and garment workers were active, and boot and shoe workers had a good month. Barbers had a fair month. Teamsters and expressmen had a good month; the other transport trades were active. With unskilled labour the supply was equal to the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour during the past month was inactive. Work in the building trade has been confined to interior work. In this line probably the most activity was shown in the work on the post office alterations. In this there are some seventy men employed in the work of plastering, electrical wiring and placing the necessary heating apparatus. Along the waterfront work has been but fair, and while there were periods—early in the month—when there were one or two rushes, the demand was never too great to be handled by those seeking employment. In the manufacturing line the Silliker Car Company was probably the busiest. In addition to the work on hand it has been awarded contracts to construct freight and passenger cars for the Intercolonial and Canadian Northern Railways. The work embraces three first-class passenger cars, two Pullmans, five second-class cars, three colonist sleepers, four combination second-class and baggage cars, three postal cars, two baggage cars, and three

hundred freight cars, the contract figures being upwards of \$500,000. The Halifax Cold Storage Company reported a prosperous business for 1909. During that period there were 15,000,000 pounds of fish handled for export; the fish is sent across the continent, considerable quantities being sent to Chicago and Seattle. This industry employs about sixty hands and has a branch plant at Hawkesbury in the eastern end of Nova Scotia.

The Customs receipts for the port of Halifax for 1909, showed a large increase over 1908. In the latter year they were \$1,587,770.35. In 1909, the figures were \$1,733,144.57, an increase of \$145,374.22.

The firm of Collyer & Brock, Montreal, which had the contract of wiring the new addition of the Royal Bank of Canada, had its license cancelled, owing to non-compliance with city ordinances. The city ordinance provides that before a license can be issued the work must be done by practical and experienced wiremen, who shall be held responsible for all work, or by practical wiremen under the guidance of a certified journeyman. It is claimed that the Montreal firm obtained a license, but had no permit. Finally, a solution of the difficulty was effected by a foreman of the Montreal firm leasing a shop and otherwise complying with the law.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This industry was quiet as is usually the case at this time of the year. There were many farmers who took advantage of the short term courses of the Provincial College of Agriculture at Truro. The attendance this year was very large and was taken advantage of by several farmers who have been but a short time in the Province from Great Britain.

Fishing has been rather dull among local fishermen, but in Digby County, about the 17th inst., some big catches were made, from which the fishermen of eight settlements were paid in cash upwards of \$5,000 for one day's work.

Lumbering was dull.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and carpenters were dull. Lathers and plasterers had a

better month than the corresponding month of 1909. Painters were dull. Plumbers were fairly active, but stonecutters very quiet. Electrical workers were not well employed. Boilermakers had a quiet month. Horseshoers were dull. Car builders had a fair month. Printers, pressmen and book-binders had a good month. Tailors were very quiet. Bakers and confectioners had their usual January inactivity. Butchers and meat cutters were busy. Ice cutters had a fair month, and expect an improvement in February. Freight handlers, railway clerks, maintenance and way men, ship labourers and longshoremen had a fair month. Unskilled labour was dull.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been a decided improvement in the condition of the labour market during the past month. More men are now on the pay rolls of the different industries than at any time during the past year. The Canadian Car Company (Rhodes, Curry & Company), which had been practically idle for five months, has more than doubled the number of its employés, and enough orders are now booked to assure steady work until October. As this is the largest industry in the town, its increased activity has had a most favourable affect on local labour conditions.

At the Joggin mines much forward work is being done by the Maritime Coal, Railway and Power Company. The number of hands have been greatly augmented. Twice as many are now employed as were on the Company's books a year ago. Thirty double houses were built during the year and the Company has not yet ceased building. They have also introduced electric lighting into the village, and the stores and streets present a much better appearance than formerly.

The strike at Springhill is the one unfavourable feature in the district. The Company has brought in about one hundred men, mostly foreigners, during the month and have been raising small quantities of coal, but is handicapped for the want of experienced coal cutters. About 200 men have left the town, but most of the men are still in idleness, supported by the relief funds of the U.M.W.A.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Prices for farm products were never higher than at present.

Fishing.—The small catch has been a practical failure owing to the open season.

Lumbering started in very busily and the outlook was favourable for a large cut. For the last ten days the weather has been so mild that the snow has disappeared and the industry has been tied up. If climatic conditions do not speedily change the cut will fall far short of what was anticipated.

Manufacturing.—All the industries were working steadily, enlarging staffs and increasing output.

Mining.—Very active conditions prevailed, except in Springhill. The other collieries were working day and night with larger forces of men than ever employed before.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have had no work, but carpenters and joiners were well employed. Painters and paper hangers reported business dull; stone cutters were out of employment.

Moulders were busy, and iron workers and helpers were well employed. Machinists and engineers were working steadily. Electrical workers were very busy, with boiler makers well employed.

Wood workers were busy; upholsterers rather dull; and car builders busy.

Printers were very busy, working overtime.

Journeymen tailors were very busy. Boot and shoe workers were steadily employed.

Bakers and confectioners were active.

A marked improvement over the month of December occurred in the employment of unskilled labourers.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the month of January, showed little change from that of December, with the supply somewhat in excess of the demand. The mild weather and the breaking up of the roads and the ice, the latter part of the month, had an unfavourable effect on general trade in the city. In the building line there was nothing new to report, outside work being practically at a stand-still. The sales which the dry-goods merchants usually bring on at this season of the year, did not materialize. The new winter steamer *Earl Grey* kept running to Charlottetown, a week later than was known in the history of winter navigation, thus adding to the amount received by longshoremen. The handling of the freight this year was given by contract to the United Brotherhood of Longshoremen. The other union, the Labourers' Protective Union, objected to this, claiming that the work should be divided between the two, as in other years. A compromise was arranged whereby the latter will receive work later in the season.

Among industrial changes of the month was the organization of Bruce Stewart & Company, the largest engineering and foundry firm in the province, into a limited liability company, and the merging with it of the concern known as the Charlottetown Foundry Company.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Snow storms which blocked the roads the first part of the month, and heavy thaws, which broke them up in the latter part, interfered with operations of the agriculturists.

A feature of the month was the sending over to Truro, at the expense of the Provincial Government, of about seventy farmers' sons, to take the short course in the Agricultural College.

Fishing.—Mild weather helped the catch of eels and smelts, which are shipped extensively to the Boston and New York markets.

Manufacturing.—The few factories on this Island were carried on under the normal conditions.

Mining.—After boring to considerable depth in various parts of the Island, with a view to ascertain the mineral possibilities of the province, the work which had been carried on at the expense of the Federal Department of Mining, was brought to a close. There were no indications of minerals or oil in sufficient quantities to justify the opening up of mines or wells.

Railroad construction and employment. The new round house, which was the latest important addition to the extensive new plant which has been built for the P.E. Island railway in this city during the past four years, was occupied this month. During one week there were many delays in traffic owing to the blockade of the road with snow.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, had a dull month. Carpenters and joiners, lathers and plasterers, painters, decorators, and paper hangers, plumbers, gas and steam fitters, were active. Stone cutters and builders' labourers, had a dull month. The metal, engineering and ship building, wood working and furnishing, printing, clothing, food and tobacco preparation, miscellaneous and transport trades were active. It was a dull month for leather workers and unskilled labour.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was no marked change from last month, employment remaining normal

and steady. Local manufacturing industries were as a rule active, employing their usual quota of help. Some, notably the Humphrey Woollen Mill, employing over one hundred operators, have been running extra time to fill orders. The building trades were quiet, though considerable inside work was being done. Woodworking factories were active, preparing stock for summer. Wholesale trade showed expansion and retail trade remained steady. Customs returns for the port of Moncton and outports show total imports for the year at \$606,951 and duties collected \$81,711, as compared with imports \$716,485 and duties \$99,262 for 1908, being decrease in both cases. Exports, however, show an increase, totals for 1909, being \$585,508, as against \$346,560 in 1908. Gypsum exports from Hillsboro showed an increase and the outlook for the coming season is good.

The Moncton-Buctouche Railway Company is being reorganized and the name changed to Buctouche Railway and Transportation Company. Application is being made for a charter to extend the railway to Richibucto and to operate a steamer between that place and West Cape, P. E. I. The Moncton Electric Railway Company is also asking for power to change its name to the Moncton Tramways Electric and Gas Company, to increase its capital stock from \$195,000 to \$1,500,000 and power to generate, sell and supply electricity and gas, natural or manufactured, to Moncton and other places. Navigation between Port du Chene and Summerside closed December 20th., being the latest date for years, and the winter service Steamer *Minto* began plying on the Cape Tormentine route on that date. Navigation upon the Miramichi river closed December 27th., also being the latest for years. The adoption of a schedule classifying the work of the Intercolonial Railway clerks in the general offices and placing a minimum value upon each position was responsible for a number of increases in salaries to several clerks, varying from \$2.50 to \$10.00 per month; about twenty clerks were affected. No other material changes in rates of labour or hours of work were noted, and no unrest upon the part of operatives.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were quiet. Farm produce was in good demand at advanced prices in most cases. The hay market was moderately quiet.

Fishing.—The smelt catch on the north shore was light. The average price on the ice was five and a half cents.

Lumbering.—Active conditions prevailed in this locality but work was interfered with by mild weather.

Mining.—Considerable coal is being raised at Grand Lake, Queens County, coal mines, ten car loads per day being shipped.

Railroad construction.—The estimates for the work finished along the Grand Trunk Pacific in New Brunswick, for December, totals \$252,233; January, owing to winter conditions will show a falling off. The Toronto Construction Company has fifty miles of roadbed completed and track laid. The Corbett Floresch Company has forty miles of its contract completed. Work upon the remaining 10 miles of its contract has been suspended until May.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet. Iron moulders, iron workers and machinists were busy. Woodworkers were fairly busy. Orders for job work were good and there was steady work for printers and pressmen. In the clothing trades, conditions were active for the season. Bakers were busy. Ice cutters were active, storing for next season's delivery. The leather trades were quiet. Barbers, were busy, and clerks and stenographers steady, the supply being in excess of demand. Theatre employés were active, also laundry workers. Passenger and freight traffic was heavy for the season, but special work was a little slacker than last month. Fair time was made by railway crews. Teamsters and expressmen were moderately busy. For unskilled labour, the demand was only moderate. The absence of heavy snowfalls was felt by a quota of this class dependant upon this source of employment. Lumbering and other avenues of labour seem-

ed to have fairly absorbed the local supply of unskilled men and the number of unemployed met with is not large, with cases of destitution rare.

ST. JOHN, N. B. AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market remained about the same as in December. The continued mild weater has been favourable for outdoor work, and considerable repair work has been carried on.

A new industry was started on January 17, by T. H. Estabrooks, who has installed a plant for the manufacture of coffee. The new machinery does away with the old processs of grinding, and by crushing reduces the coffee to small even grains. The skin, or chaff, which is on the bean after roasting is also removed.

The Bank of New Brunswick held its annual meeting on January 17. The net profits for the year 1909, after making all the customary deductions, amount to \$136,305. There was added to the rest account \$25,000, an increase over the amount added in previous years. The rest now is \$1,347,125, against \$1,291,875 last year, increased partly by this addition and partly by the addition of \$30,250 premium on new capital issued in the year. The last issue of capital stock was at \$265 per share. The capital is now \$755,500, and the rest \$1,347,125, equal to 178 per cent. of the capital stock. There was added to the pension fund a sum of \$5,000.

There had been filed at the Customs House cargoes for 38 steamships up to January 22. There vessels carried away Canadian goods valued at \$6,071,982, and foreign goods valued at \$1,580,371 making a total of \$7,652,353. The total value for the same number of steamers last year was \$7,198,745, showing that the value of goods so far is \$453,608 over that of last season. Wheat shipments were 2,183,662 bushels. The cattle shipments this season have shown a great falling off. During the month of December they

totalled 2,933. In December, 1908, eight vessels took away 5,448 and in December, 1907, the shipments were 2,368. The total shipments during the season of 1908-1909 were 22,923. Not one head of American cattle has passed through this port up to the present.

A statement of exports from the port St. John to the United States show a large increase in the year 1909, over that of 1908. The total for 1909 was \$3,417,416.05, and that for 1908, was \$1,939,363.18, an increase of \$1,478,052.87. The product of American logs which went through St. John was \$1,060,811.18 as compared with \$624,582.34 in 1908.

Bank clearings for the year 1909, amounted to \$72,404,500, an increase of \$5,968,864 over the preceding year. The clearings for the last five years are as follows:—

The deposits at the Savings Bank during the month of December totalled \$53,798.69, and the withdrawals were \$60,769.17, being \$6,970.48 in excess of the deposits.

The Customs receipts for the year 1909, show an increase over that of 1908.

The Inland Revenue receipts for the month of December show a decrease of \$442.31, compared with the corresponding period in 1908.

The annual meeting of the St. John Pilot Commissioners was held on January 7. During the past year the arrival of vessels liable to pilotage dues were as follows:

British.	
Schooners.....	116
Barques.....	2
Steamships.....	218
Total.....	336
Foreign.	
Schooners.....	195
Barques.....	9
Steamships.....	35
Total.....	239

The above figures show a grand total of 311 schooners, 11 barques and 253 steamships or, in all, 575 vessels.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The falling off in cattle shipments from St. John has injured the Carleton County hay trade, as the second grade of hay was formerly sold to the steamship companies. Formerly there was a difference of only \$1 a ton in the price of first and second qualities, but now the latter is \$2 less than first grade. The prices now are \$9.25 and \$11.25 per ton. Oats are bringing thirty-six to thirty-eight cents.

Fishing.—The sale of the harbour fishing privileges took place January 4. In 1909, the sum of \$1,516.35 was realized. This year the fishermen paid \$5,180.30, an increase over last year of \$3,663.95.

Lumbering.—The total shipments of lumber from New Brunswick in 1909, were 325,213,041 superficial feet in 339 vessels of 822,272 tons, compared with 306,445,056 feet in 296 vessels of 720,804 tons in 1908. The Bay Shore Lumber Company will cut about 6,000,000 feet from its own property, and has arranged to cut as much more for other lumber firms. At the Crown Land Office, Fredericton, on January 12, a timber berth of of three square miles on the New Canaan river was sold at auction. The upset price was twenty dollars per square mile, and the successful bidder was S. H. White, of Sussex, at forty-two dollars per mile. The Willard Kitchen Company secured the lease for five years, at a rental of twenty-five dollars per year, of a block of ungranted crown land on Merritt Brook, along the National Transcontinental Railway and forming a part of the Blue Bell track. Another sale took place on the 26th, when two timber limits were sold. A limit of two square miles on the head of the Northwest Branch of the Oromocto was bid in by the McLellan-Smith Lumber Company of Oromocto, at \$100 per mile. A limit of two and a half square miles on Canaan river, Queen's County, was bid in by Donald B. Winslow for Alfred West, of Cole's Island, at sixty-three dollars per square mile.

Mining.—A company has made application for incorporation for the development of the Grand Lake coal fields. The Company is to be known as the Big Six

Coal Company, Limited. The chief place of business will be at Salmon Harbour, Parish of Chipman, Queen's County. It will carry on a general mining business, asking the right to construct and conduct railroads, saw-mills, as well as boarding houses and hotels for its employés. The capital stock is to be \$2,000,000.

Railway construction.—About one hundred and thirty-five miles of rails have been laid on the Grand Trunk Pacific Railway in New Brunswick.

CONDITION OF PARTICULAR TRADES.

The building trades were generally dull, but the metal trades were active. Woodworkers were busy, with shingle weavers, dull. Printers and pressmen were busy, with bookbinders. journeymen tailors bakers and confectioners, ice cutters and drivers, active cigar makers broom and brush makers. Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen, and freight handlers, were busy. Steamboatmen and firemen, active, with ship labourers, and street railway employés, busy. Unskilled labour was dull.

DISTRICT NOTES.

East Florenceville.—On January 9, fire completely destroyed a potato house valued at \$1,000, which contained stock valued at \$500.

Fredericton.—The Dominion Bridge Company has commenced active work on the erection of the four new steel spans which will complete the Fredericton-St. Mary's highway bridge. About fifty men are employed.

St. George.—The Charlotte County Weir Owners and Weir Fishermen's Union held its annual meeting on January 7. The report of the executive committee was read and adopted. The executive had settled on a scale for sardines of six dollars per hogshead, which will be in effect next season from April 15th, to December 1st. James A. Belyea was elected president; Peter Cameron, vice-president; George E. Frauley, secretary-treasurer. A resolution introduced by

George M. Byron, of Campobello, was adopted, dealing with a request for a bounty on silver hake and squid. It was decided to memorialize the Government to establish a fertilizing plant in Charlotte County.

Sussex.—A company, with Canadian and United States branches will manufacture the Acme steel ladder. The ladder will be made at the works of the Sussex Manufacturing Company for the Canadian trade, but a factory will also be erected and equipped in the United States.

Summerville.—On January 22nd the saw-mill owned by B. F. Smith was destroyed by fire. The mill had not been running.

NEWCASTLE, N. B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The month has been rather poor for smelt fishing on account of the soft weather. Bass have been very scarce.

Lumbering.—The depth of snow has interfered with the cut as the operators had to stop cutting and haul it from the yards. A thaw, however, has taken most of it away and will help the lumbermen.

The skilled trades were all quiet for seasonal causes.

QUEBEC, QUE., AND DISTRICT.*

Messrs. P. J. Jobin and E. Little, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The weather was fine and the snowfall light during January. Work was begun

* In the issue of the *Labour Gazette* for January, 1910, page 747, it was stated that the price of gas, following the formation of a merger of gas companies in Quebec, was advanced from \$1.20 to \$1.50 per thousand feet. This should have read from fifty cents to \$1.50 per thousand feet, with a cash discount of twenty per cent. for prompt payment.

on the abutments for the Quebec bridge. The Ross Rifle Company has distributed \$3,000 to the foremen and heads of departments in bonuses, the maximum being \$400 and the minimum seventy-five dollars. This system will be continued in 1910. The shoe trade improved, some of the factories having to work overtime to meet orders. The ice harvest commenced on the tenth of the month, a week later than usual, the ice being from sixteen to eighteen inches thick at the end of the month. There has been a general increase in rentals and much dissatisfaction is expressed among tenants. Total bank clearings were \$118,797,000, as compared with \$111,812,000 in 1908. A number of labourers discharged by the Harbour Commissioners last month have been re-engaged.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Conditions were favourable in the woods, the snowfall being sufficient.

CONDITION OF PARTICULAR TRADES.

In the building trades outdoor workers were dull but carpenters, lathers, plasterers and plumbers were active. The metal trades were quiet, with the exception of boilermakers who were well employed. The printing and clothing trades were active, boot and shoe workers being busy, though glove makers were quiet. In the food and tobacco preparation trades the month was quiet, except among ice cutters. The leather trades were active. Miscellaneous employés were somewhat quiet. In the transport branch railway employés were active and other branches were dull. The supply of unskilled labour was in excess of the demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during January differed very

little from that of the previous month, the supply exceeding the demand to a slightly larger extent.

The good roads prevailing did not seem to have much effect on trade, but enabled the farmers to haul firewood and transport farm products to market. There was no exceptional activity noticed except in the building trade which was helped by the fine and mild weather prevailing. Retail trade was quiet in general but wholesalers report a fair month. Rates of wages and hours of labour remained the same.

Three Rivers with its port and other facilities for receiving and shipping goods, besides being situated a few miles only from Shawinigan Falls, is one of the best places for all kinds of factories in the Province of Quebec.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There were plenty of farm products on the market, but prices were well maintained.

Fishing.—The tommy cod season was fairly successful but there was not much other fishing going on.

Manufacturing.—All factories reported a fair month.

Railroad construction and employment was quiet this month.

Lumbering.—Lumber firms were employing about the same amount of men as last year in the bush. They have had very favourable weather during January for their work.

CONDITION OF PARTICULAR TRADES.

Printers, pressmen and bookbinders were fairly well employed during January.

Journeymen tailors, garment workers and glove makers were busy. Boot and shoe workers made a fair month.

Bakers and confectioners, butchers and meat cutters reported a fair month, ice cutters and drivers were very active. Cigar makers and tobacco workers were fairly employed.

The leather trades were rather quiet.

Barbers were busy, also clerks, stenographers and delivery employés, while furriers were quiet, but hotel, restaurant,

theatre employés and laundry workers were active.

Railroad conductors, locomotive engineers and firemen and other regular railroad employés were fairly active. Cab drivers, hackmen, carters, teamsters and expressmen were also fairly employed.

As usual at this time of the year the supply of unskilled labour exceeded the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All branches of labour have been fully employed with the exception of masons and bricklayers who suspend work during the winter months. Machinists and all those employed in factories have been working full time. The prospects are that the orders now in hand will keep the establishments running full time until the spring. In the machine shops, which were probably the most to suffer during the trade depression, business is good, and the majority of the men who suffered a reduction in wages then have had their previous rate renewed.

The value of the exports registered through the U. S. Consul's office here for the year 1909, amounted to \$2,202,756.67. The chief items were asbestos, \$701,546.50; hides and skins, \$122,220.16; lumber, \$191,139.57; pulp wood, \$381,682.50.

CONDITION OF LOCAL INDUSTRIES.

Lumbering operations were somewhat handicapped during the last two weeks owing to the thaw. The hauling of lumber and logs was practically at a standstill.

Manufacturing.—The manufacturing industries are running full time, and at the woollen mills more help is being advertised for. The Paton Company, has started a knitting branch, which gives employment to about twenty hands.

Mining.—Work has been suspended somewhat in the asbestos pits, but in the

copper mines at Eustis work is going on night and day. Preparations are being made to open up the Hepburn mine by the Eustis Company in the spring; this should give employment to a number of men.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were dull. Machinists, moulders and all iron workers were running full time, with plenty of work ahead. Blacksmiths were busy, as were horseshoers. Electrical workers were active, but linemen were quiet. Woodworking establishments were busy, getting out work for buildings that will be started in the spring. Pattern makers showed more activity consequent to the increase in business in the machine shops. Carriage and wagon makers were busy. The printing and allied trades have been active. Journey-men tailors have been quiet, but garment workers have been active. Bakers and confectioners were active, and cigar-makers busy. Miscellaneous trades have been fairly active. So far as transportation is concerned business has been quiet. Several train crews have been laid off. This is accounted for in a measure by the fact that the shipment of pulp wood to the United States is almost at a standstill. Cab drivers, expressmen and teamsters were active. Unskilled labour was in demand, and there were few men out of employment.

DISTRICT NOTES.

Cowansville.—The annual meeting of the Eastern Townships Dairymen's Exchange was held on Saturday. The report of the sales during the past season was as follows: Butter 27,631 packages, valued at \$347,783.66. Cheese, 5,747 boxes, valued at \$52,640.90. The value of the butter and cheese sold for 1909, amounted to \$400,424.56.

Magog.—The thaw was a boon to this place, for it caused the wheels of the Dominion Textile Company's plant to be again set in motion. The water rose in the canal a foot and a half.

Farnham.—Work has commenced at the J. M. Fortier Tobacco Factory and

the farmers from the surrounding country are bringing in large quantities of tobacco. The prices range from nine cents to thirteen cents per lb., according to quality. Next year it is expected that much larger crops will be cultivated.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. V. Phaneuf, coorespondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market during January were favourable. The building trades were more active than in the corresponding month of 1909. The supply of labour, however, was equal to the demand. Sash and door factories were very active, having received sufficient outside orders to keep them busy for several months to come. Civic work was quiet. The metal trades were fairly well employed. The leather industry was active, and it was stated that additional hands would soon be required. The boot and shoe factories had a good month. The other manufacturing establishments had a busy month. Wholesale and retail trade had an active month. There were no changes in wages or hours.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The general condition of agriculture was excellent in every respect. There is an abundance of farm produce and prices are high. Farm labourers were very quiet.

Manufacturing.—The Ames Holden factory, the Coté factory, the organ factory, the corset factory, the Yamaska Paper Box factory, and the Crescent underwear factory had an active month. The last mentioned establishment, which opened in November 1909, has considerably increased its premises, and will give work to about sixty additional hands. The new Arsenault boot and shoe factory commenced operations during the month, the city council having granted it tax exemption for a certain period.

CONDITION OF PARTICULAR TRADES.

Carpenters, joiners, lathers, plumbers, gas and steam fitters and builders' labourers had a fair month, but the other building trades were quiet. On the whole, the metal trades had a good month, as had the woodworking, printing, and food and tobacco preparation branches. Tanners and curriers had an active month. The miscellaneous trades had a busy month. Active conditions were reported among railway employés. There was a fair demand for labourers, the supply and demand being about equal.

DISTRICT NOTES.

Sorel, Que.—Labour conditions were very satisfactory. The Government shipyards were very active as was also the Duhamel & Bros.' footwear factory, which employed a large number of men and will considerably add to its premises in the spring. The Richelieu Company had a large quantity of work on hand repairing and overhauling its fleet of steamers for next season.

ST. JOHNS, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During January outside work became quieter compared with the preceding month, but was more active than in the corresponding month of last year. This was due to favourable weather. There has been very little snow and unless more rigorous weather sets in soon it is feared that the cutting and storing of ice for next summer will be impossible. The Richelieu river was almost free of ice. Negotiations were being carried on whereby two new manufacturing companies, one of bed springs and mattresses and the other of boots and shoes, will open new establishments. Activity in the export of grain and hay slackened during January, the soft weather having deteriorated the roads. Other branches of trade, however, reported satisfactory

conditions, much better than at the corresponding period of 1909. There have been no changes in wages nor hours of labour and cordial relations existed between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had nearly stopped marketing their produce although prices were very high.

Manufacturing.—The potteries were very active, the men seeking to enlarge their turn-out owing to working by the piece.

Railroad construction.—Work on the Canadian Pacific Railway bridge was being rapidly pushed forward; a large number of hands were employed thereon.

CONDITION OF PARTICULAR TRADES.

The different branches of the building trades were reported from quiet to dull. Iron workers and their helpers, moulders, and coremakers had a good month. Machinists and engineers were fairly active. Horseshoers and jewellers had an active month; but electrical workers, linemen, tinsmiths, and tool sharpeners were dull. The woodworking trades reported an excellent month. The printing trades were very busy, but the clothing trades had a quiet month. Bakers and confectioners had a fair month and butchers and meat cutters a good one.

Theatre and laundry workers had a good month but hotel and restaurant employés were dull. Railway employés had a fairly good month. Cab drivers hackmen, carters and draymen had a good month. Unskilled labour was idle through lack of snow.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All branches of the building trades were more actively employed during January than for the corresponding month a year ago. The fine winter made

it possible for contractors to push work on the many houses under construction.

About 350 men are employed by the city on street works at \$1.75 per day for ordinary hands.

A sewer in a newly annexed portion of the city, a large relief sewer on Kent Street and an aqueduct are the chief works. A departure was made from the method of having all sewer construction done by day labour and a \$5,000 sewer given out to a contractor. The city's annual report shows that during 1909, \$361,174 was spent on local improvements compared with \$307,471 the previous year. Asphalt streets were the chief item last year, amounting to \$281,221. The summer of 1910 promises to be much heavier for local improvements. The Board of Control has considered plans to construct a \$350,000 drainage system to be completed in three years.

Three money by-laws were approved by Ottawa ratepayers on January 3. They are: \$60,000 for enlarging the city hall; \$45,000 to erect an incinerator for destroying garbage; \$10,000 a year for advertising for industries and tourist traffic. Another by-law was approved granting a franchise to the Metropolitan Electrical Company to deliver power in the city.

Ice harvesting gives employment to a couple of hundred men. The absence of deep snow helps the industry.

The Chaudiere pulp and paper industries are running to full capacity, being favoured by exceptionally good water power.

The small amount of money distributed for snow shovelling deprived a considerable number of work they had depended upon. Outside of the difficulties experienced by some families owing to this situation the city is comparatively free from poverty. The fewness of applications for relief at the city charity department and the small number of inmates in the Rescue Mission indicate better than average prosperity among the poorer people.

Local trade is active. The bank clearings for the fortnight ending January 27, were \$7,617,974, an increase of 14.5 per cent. over last year.

Ottawa is getting a large number of

orders for railway and lumber camp supplies. Experienced factory girls are much in demand. One manufacturer and dealer of clothing who employed about 40 hands failed, the reason being losses sustained from many failures among his customers last year.

No labour disputes occurred.

The strike of seventy leather workers in four Ottawa harness factories which began on October 4 for ten per cent. increase is still unsettled.

A new labour organization known as the Ottawa Gas Workers' Union No. 9, has been organized with twenty-five members. Some eighty freight handlers checkers, etc., are interested in a movement to form a union among the railway hands in Ottawa thus employed.

A committee of the Ottawa Public School Board is looking into a superannuation scheme for teachers, providing for a contribution of from two to three per cent. of their salary and retirement at sixty years of age.

The first annual spring horse show will be held in Ottawa on May 5, 6, and 7. The expense including prize money, will be \$7,000. The Eastern Ontario live stock and poultry show which concluded January 21, drew an estimated attendance of about 12,000.

Nearly all the labour population of the town of Almonte have signed a pledge to boycotting butchers who are alleged to be charging exorbitant prices. A similar plan was discussed by the Allied Trades and Labour Council of Ottawa but the members decided that legislation was the only effective remedy against the alleged unwarranted high prices of most of the necessaries of life.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are benefitting from good prices for cattle and dairy produce. Beef has sold as high as five cents a pound on the hoof. Eggs are thirty cents a dozen, packed, and freshly laid are fifty cents. The open winter facilitated marketing.

Lumbering.—Lumbering was hampered by thaw which damaged the shanty roads in some sections. Reports show

that no serious results will follow, but if soft weather continues a proportion of the log cut will not be hauled out to the streams. Two of the local mills are improving their sawing equipment for larger operations next summer. The buoyant market for high grade lumber continues. The cut of J. R. Booth for the season of 1909, has been estimated at 70,000,000 feet and the W. C. Edwards Company at 80,000,000 feet. Mr. Booth went behind 12,000,000 during the spring floods when his mill was idle six weeks. Shephard and Morse Company cut 33,000,000 feet.

Mining.—The local mica factories have taken back many hands who were laid off last year in the the dull season.

CONDITION OF PARTICULAR TRADES.

The building trades were very active, but the metal and shipbuilding trades were quiet, though blacksmiths were busy. Linemen were actively engaged. The woodworking and furnishing trades were busy, as were the printing trades. Journeymen tailors, were busy, and garment workers very busy. Food and tobacco preparation trades were steadily employed. Tanners and carriers were quiet. Barbers were busy, broom makers, clerks and stenographers, quiet. Delivery employés, furriers, hotel, restaurant and theatre employés, and laundry workers, busy. Railway employés were steadily employed, with teamsters and expressmen busy. Unskilled labour was fairly well employed for the winter season.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

If the month of January be taken as an indication, the year 1910 should be an active one, industrially, in Kingston. There seemed to be little or no diminution in the opportunities of employment, while an increased demand for labour occurred in some lines, which had previously been running on short time. For some time past the Dominion Textile

Company's mills had been running only three-quarter time. About the middle of the month, the local manager received word that the mills would be required to run full time, and to resume complete operations at once. The Kingston Hosiery Mill Company, and other institutions also advertised for increased help during the month. On the 8th of January a number of men started breaking stone in the municipal quarry. This afforded employment to a number who were previously idle. The wages earned range from twenty-five cents to \$1 per day. A large force of men were employed harvesting the ice crop, which is said to be of a fair quality. The prospects for building this year are already very bright. So far the three largest erections will be the Metallurgy building at Queens' University, the Bank of Commerce, and the building to be erected by the Kingston Shipbuilding Company which takes over the Government dry dock on April 15th. A number of other new buildings, and repairs and extensions to many old ones are contemplated, while some are already under way.

During the month a number of vessels which arrived at the various elevators late in the season, and which could not be emptied, because the elevators were full, were unloaded. This made considerable activity in the grain trade.

The United States Consul reports that the exports from Kingston district, for the past year, to the States, exclusive of returned United States goods, amounted to \$757,998.04, the largest record, and a big increase over 1908.

The waterworks department, sent out 4,140 bills to consumers for the January quarter. This is about 100 more than last year. The Light, Heat and Power department, are sending out 2,800.

On January 1st, there were only about \$1,000 of last year's taxes outstanding out of a total of \$182,000. The Collector was expecting a clean sheet by the middle of the month. The revenue of the city this year, will be over \$200,000. Last year, it amounted to \$192,000. The increase of taxes this year will amount to between \$6,000 and \$7,000. and there will be an increase in other revenues, without an

increase in taxation. The market tolls for 1909, were \$1,062.30, an increase of \$500, over the preceding year.

On the 11th. of January, the vice-president, and general superintendent of the Grand Trunk Railway, had a consultation with the Board of Trade. The questions taken up were, the shifting of the Grand Trunk Railway main line, further into the city, the building of the Kingston, Smith's Falls and Ottawa line, giving direct Grand Trunk Railway connection between Ottawa and Toronto; better freight conditions for the city; and the running of late afternoon trains out of Montréal and Toronto, through to Kingston instead of stopping the run at Brockville and Belleville as at present. The Board of Trade was promised that all the questions discussed would receive immediate and serious consideration with an early reply.

Early in the month, the City Engineer visited Ottawa, re. the construction of driveways and approaches to the residences in the vicinity of the recently built Grand Trunk Railway subway. Plans are being prepared and the work will be done in the spring.

The closing of local stores and shops at 5 p.m., every day, but Saturday is, so far, giving satisfaction to all concerned. Their were no further reductions in the hours of labour, changes in the rates of wages, or strikes or lockouts reported during the month.

The annual meeting of the Kingston Hosiery Company, Limited, was held on Wednesday, January 26th, 1910. The statement was presented that the amount of wages paid out during the year 1909, was about \$70,000.

CONDITION OF LOCAL INDUSTRIES,

Agriculture.—Farmers had an active month, cutting timber, and wood, pressing and drawing hay, and other produce to the various markets, and making general preparations for spring's work. At present everything indicates an early spring in this district.

Fishing was more active than in the previous month.

Lumbering, and *manufacturing* continued active.

Mining was very active. At the Feldspar mines in this district about ninety tons are being shipped every working day, and a large staff of men are employed. There are also eighteen teams engaged in the work.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering, woodworking, shipbuilding, and furnishing trades, reported a very active month for this time of the year. Printers were active, but clothier's were dull. Bakers, butchers, ice cutters, and drivers, cigar makers, tanners and curriers, broom makers, delivery employés, hotel, restaurant, theatre, and laundry employés reported a busy month. All lines of transportation and unskilled labour were fairly active.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Thanks to very mild weather during the month of January, labour, especially unskilled, was well employed and in good demand. There were only a few wet days. Almost all the manufacturing industries were running with full complements of men. This city and district was never in a more prosperous condition, and prospects are very favourable. In the early spring it is expected that the Canadian Northern Railway Company will begin operations on its line through this city. The Belleville Iron and Steel Company was closed down the greater part of the month, making the usual repairs. Both the big cement plants were busy, as well as the brass and steel works, and the Belleville Hardware Company. The latter can hardly keep up with orders. Merchants reported business a little dull after the holidays, but less so than in recent years. Banks reported money plentiful. Full hours and regular rates of wages prevailed in all industrial concerns except one which reduced the hours from ten to nine. A larger number

of men and teams were employed getting in the ice harvest which promises to be very abundant. There was no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Hay is plentiful at \$14.50 a ton. There is some anxiety about fall wheat, owing to lack of snow. Feed is plentiful.

Fishing.—Rough fishing was active.

Lumbering was active in the northern part of the county.

Manufacturing was active.

Mining.—A larger number of men were employed at mining and a number of new mines were worked. This industry is developing rapidly.

CONDITION OF PARTICULAR TRADES.

A number of carpenters, joiners, lathers and plasterers, painters, plumbers, gas and steam fitters were busy all month on the larger addition to the court house. Outside of this, the building trades were dull.

Iron moulders, machinists and engineers, electrical workers and brass workers had an active month. Blacksmiths, boilermakers and horseshoers were all well employed.

All branches of the woodworking trades had a busy month, with the exception of car builders and shingle weavers, few of whom were employed.

Hand compositors, job printers, machine operators, pressmen and bookbinders had an active month.

Journeymen tailors had a busy month, there being no idle tailors in the city.

Bakers and confectioners, butchers and meat cutters, ice cutters and cigar makers reported an active month.

Harness makers were all employed.

Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant, theatre employés and laundry workers were all active.

Railway engineers and firemen reported a busy month. Freight handlers were also busy. Cab drivers, carters, teamsters and expressmen had an active month.

Unskilled labour was in fair demand.

PETERBOROUGH, ONT., AND
DISTRICT.

Mr. J. Arthur Sharp, correspondent,
reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

The general condition of the labour market in January was very satisfactory. While the building trades were a little quiet, it was owing to the weather, as there will be plenty of work as soon as the weather will permit. The factories are all working full time and some of them are working overtime. The Canadian General Electric Company is working a day and night shift in some of the departments and is very busy in all departments. The Peterborough Hack Company has decided to double its capacity and the present buildings are being enlarged; \$30,000 worth of new machinery will be installed.

The Quaker Oats Company is making preparations to erect a warehouse to cost \$80,000. The central Smith creamery has made a record sale of butter; beginning Nov. 1st., last, up to the middle of this month the output for ten weeks was eight tons, all of which was consumed in the city and sold at good prices. The wholesale and retail houses report business good for this time of the year, a by-law to provide \$19,000 to build an Isolation Hospital was defeated, and one to give a thirty year franchise with use of streets for poles and wires to the Peterborough Light and Power Company was carried.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are getting good prices for all their products.

Lumbering.—Conditions are good for lumbermen, and the cut will be much larger than last year.

Manufacturing.—All lines are exceptionally busy, the plants in some cases working overtime.

Railroad construction is being rapidly pushed on the Canadian Northern Railway between Cobourg and Grafton, several gangs of men being at work.

CONDITION OF PARTICULAR TRADES.

The building trades, as is usual at this time of the year, were quiet, though considerable indoor work was going on.

Iron moulders were well employed. Machinists and electric workers were very busy. Metal polishers, buffers, platers and brass workers had all they could do. Blacksmiths also had a good month and tool makers were very busy.

Woodworkers and upholsterers were rather quiet, but pattern makers were busy.

Printers, bookbinders and pressmen were less active than last month.

Tailors, garment makers, boot and shoe workers had a quiet month.

Bakers, confectioners, butchers and meat cutters were well employed.

Cigar makers reported business dull.

Leather workers and saddlers were busy. Railway and street railway employes were well employed; also expressmen and teamsters.

Unskilled labour was rather dull.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent,
reported as follows:—

GENERAL CONDITION OF THE LABOUR
MARKET.

Conditions during January continued satisfactory, with labour generally well employed. The mildness of the season has been unusually favourable to out-of-door work, with the result that building has been carried on during the winter to a greater extent than hitherto known. There was very little complaint of unemployment. Building permits were issued during December representing an approximate value of \$1,428,250, an increase of \$650,065 over the value represented by permits issued in December 1908. The total number of permits issued during 1909, was 7,144, representing a value of \$18,154,047 as compared with 5,285 permits representing a value of \$11,795,436 for the previous year.

At the municipal elections on January 1st, the ratepayers adopted by-laws granting \$320,000 for new exhibition

buildings, and for raising \$262,000 for new fire halls and police stations. The by-law for the construction of the Bloor St., viaduct, calling for an expenditure of \$759,000, was defeated. The plebiscite on the question as to whether the city should apply to the Legislature for power to construct subway and surface street railways was favourable to the proposal by a large majority.

The annual report of the Harbour master of Toronto showed that the number of vessels coming in the port during the year was 2,939, a decrease of 492 as compared with the previous year. The total tonnage was 1,480,293, as compared with 1,521,165 for 1908. Coal receipts by vessel amounted to 123,374 tons, a decrease of 25,304 tons. This is attributed to the obtaining by the electric light company of power from Niagara Falls instead of having to run dynamos by steam power. The total coal imports by rail and vessel during the year were 1,131,728 tons, a decrease of 90,864 tons.

The gross receipts of the Toronto Railway Company for 1909 were \$3,903,257, of which the city received a percentage amounting to \$507,827.

The gross receipts of the Toronto Industrial Exhibition last year were \$249,603, an increase of \$15,465 over 1908. The expenditure was \$211,643, an increase of \$25,092. The city's share of the profits amounted to \$37,959.

The receipts of live stock at the Western Cattle Market for 1909, consisted of 172,336 cattle, 144,984 sheep, 92,484 hogs and 30,149 calves, a total of 439,953, as compared with total receipts of 419,202 in 1908. The weigh fees amounted to \$7,376, as against \$6,808.

At a meeting of the Board of the House of Industry on the 18th, a report was presented showing that 489 new families had been assisted during December, making a total of 805 families on the list for out-door relief. The inmates of the House numbered 166. Casuals numbering 295, were admitted for 1,294 nights and given 3,575 meals, breaking 115 tons of stone. Of the casuals 149 had refused to work.

On the 21st, a deputation from the To-

ronto District Labour Council waited on Sir James Whitney and the members of the Provincial Government and requested the enactment of several measures in the interest of labour, including further legislation to secure adequate compensation for injuries to workmen; limitation of Sunday work for street railway employes to eight hours; the compulsory construction of vestibules on pay-as-you-enter cars; an eight-hour day for miners; and the enforcement of clauses in municipal contracts fixing a standard scale of wages.

A movement to boycott meat as a means of securing lower prices made considerable progress towards the end of the month, a large number having pledged themselves to abstain from the use of meat for thirty days, or until a reasonable reduction in price is made.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farming activities during the month have been largely confined to the care of stock and the marketing of produce. The roads have generally been in good condition for sleighing.

Manufacturing.—Activity continued to prevail in most lines of manufacture, with plenty of orders and every indication of a busy spring season. The opening up of the Porcupine lake gold fields in Northern Ontario has caused a great demand for tools, construction material and camp supplies of all kinds.

W. J. Gage & Company, stationery manufacturers, have made a distribution of profits among employes who have been with the Company for twelve months. The amount distributed this year was \$5,000.

Railway construction.—The building of the extension of the Canadian Northern Railway to the east of Toronto is progressing. A number of men and teams are at work and the force will soon be largely increased.

CONDITION OF PARTICULAR TRADES.

A considerably larger proportion of men employed in the building trades than usual were at work. Plumbers, steam and gas fitters were well employed.

Blacksmiths, boilermakers, moulders, machinists, structural steel workers, and electrical workers had a good month. Brass workers were active, jewelers and silversmiths fair. The blacksmiths have organized a union in affiliation with the International Brotherhood.

Furniture workers, upholsterers, cabinet makers and other woodworkers were active. Piano workers had plenty of work.

Printers and allied trades had steady work.

Custom tailors were not so well employed as last month. Garment workers boot and shoe workers, and whitewear workers were active.

The provision trades were steadily employed. Brewers had a fair month. Cigar makers were quiet, ice-cutters were busy.

Leather workers were well employed.

Hotel and restaurant employés, barbers and laundry workers were active. Clerks, salesmen and bookkeepers were fair.

Railway and street railway men, teamsters and expressmen had steady work.

Unskilled labour was more generally employed than usual at this season.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The industrial activity which marked the closing months of 1909, was undiminished during January 1910. Very few men were idle. The mild weather facilitated out-of-door work. The outlook was good but there was no unsatisfied demand for men. Railway freight traffic was heavy. The new public library building was occupied. Stanford township passed a by-law permitting a company to build a system of water-works.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Beyond the pruning of orchards and vineyards, no agricultural work was going on.

Lumbering.—Some small saw-mills gave employment to a few men in the district.

Manufacturing.—Manufacturing concerns were active. The Cyanamid Company made large shipments and the plant was running full time. Iron working and clothing concerns were reported busy.

The Ontario Power Company's extension works went steadily forward, employing six hundred and fifty men. The Company officers stated that they had all the skilled men they needed but that more labourers would be required in the near future.

CONDITION OF PARTICULAR TRADES.

Suspender and neckwear factories were busy. Ice-cutting and packing employed many men for a short time. Hotel and restaurant employés were rather more active. Railway employment was normal. Freight business was good but passenger traffic light. Snow falls were light during the early part of the winter and few extra men were engaged for track clearing work. Teamsters continued busy. Unskilled labour was well employed.

DISTRICT NOTES.

Welland.—All local industries were active and general employment was good for the season.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market for January was active. In a few lines, such as the building trades, there was a noticeable lessening of activity, which is usual at this season of the year. A marked improvement over the corresponding month of last year. Prospects for employment for the coming season in nearly all branches of trade are good. Business, wholesale and retail was reported good for the season of the year. Market prices show

that meats have advanced in price during the month by two to three cents per pound.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—An important event to fruit growers was the annual dinner of the St. Catharines Cold Storage Company on January 25th.

Manufacturing.—All manufacturing plants had a good month with conditions favourable to labour. The Reo Automobile Works were busy employing additional hands. The city has closed with the Monarch Knitting Company, and Crocker-Wheeler Company, the latter manufacturers of heavy electrical machinery. The Monarch Knitting Company, will pay in wages, exclusive of office help, \$15,000 per annum, and will employ the first year fifty hands. The Crocker-Wheeler Company will pay annually in wages \$50,000, and will employ the first year at least 100 hands. Both companies received in consideration from the city a fixed assessment.

Railway construction.—The construction of the N. St. C. & L. R. R. electric line to Pt. Coulbourne is being pushed ahead as fast as weather conditions will permit.

The Dunville, Wellandport & Beamsville Electric Railway Company is seeking entrance to the city, and plans are under way to construct a "high level bridge" connecting the western portion of the city with the east.

CONDITION OF PARTICULAR TRADES.

The building trades though a little quiet had a very fair month's employment for the season of the year. All lines of the metal and engineering trades were active. Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers and coopers were active. The allied printing trades were active, with prospects good. Journeymen tailors and boot and shoe workers were active. Bakers and confectioners, butchers, and meat cutters, ice cutters and drivers, cigar makers and tobacco workers were active and report a fair month's

employment. Tanners, and curriers, leather workers, saddlers, trunk and bag makers, were well employed. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés, and laundry workers, were active. Transportation was active to busy. The total number of boats passing through the Welland Canal for 1909 to the close of the season, was 2,771, being an increase over the previous year of 662 boats. Unskilled labour was active, the ice cutting which was a feature of the month's operations gave employment to a large number of men. The ice was of the very best quality and conditions were favourable to the harvesting.

DISTRICT NOTES.

Port Dalhousie.—Labour was active during the month. The Maple Leaf Rubber Company was advertising for hands to learn the business.

Merritton.—The labour market was favourable.

Thorold.—All the mills and factories had a fair month, and labour generally was well employed.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The usual mid-winter quietness in the building trades was experienced, although not as pronounced as in January, 1909. In other lines of industry, however, the busy conditions reported in December were maintained. The steel and iron trades, and the manufacture of harvesting and electrical machinery were exceptionally active. Building permits for the month totaled in value \$18,600, about \$6,000 more than in the same period last year. The total value of permits issued in 1909, for new buildings and repairs was \$1,263,000. Announcements have already been made of proposed extensions to Hamilton industrial concerns, amounting to \$1,500,000. The city will spend \$300,000 on good roads, a debenture-by-law

to raise this amount having been ratified by the ratepayers at the municipal elections. Bank clearings show a steady increase each week, the improvement ranging from \$200,000 to \$400,000 a week, as compared with last year. Street railway earnings for the year were \$339,108,126, an increase over 1909, of \$26,382.84. The city's share in percentage amounted to \$34,648.52, an increase over 1908, of \$2,110.65. The receipts of the railway in the quarter ending December, were \$10,000 in excess of the same quarter in 1909.

The newly-organized Board of Control has appointed a publicity commissioner, at a salary of \$1,500 a year, whose chief duty will be to endeavour to secure the location of new industries in Hamilton.

The Technical School was formally opened by His Honour the Lieut-Governor on January 20. It is stated to be the only one of its kind in Ontario. Classes have been organized in the first-year course, which embraces: English, arithmetic, algebra, physics, mechanical drawing, electricity, forging, machine shop practice, and woodworking. The art classes of the Art school are also being continued. Day and evening classes are provided. About 400 pupils are enrolled.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The last week of the month witnessed a drop in the prices of beef, dairy produce and poultry. Beef prices declined about a cent a pound; butter and eggs came down five cents, chickens and turkeys three and four cents per pound respectively.

Manufacturing.—The International Harvester Company's works were exceptionally busy. About \$100,000 will be spent in new buildings.

The Otis-Fenson Elevator Company has now in course of erection new buildings which will cost \$100,000, and has announced that \$200,000 more will be expended in increasing the plant this year.

The London Machine Company will make a \$20,000 addition to its works.

The Hamilton Steel & Iron Company is planning extensions that will cost nearly a million dollars.

The Canadian Westinghouse Company is very busy turning out orders for electrical equipment.

The business of the Sawyer Massey Company recently changed hands and it has been reorganized with a capital of \$7,000,000. The headquarters of the new company will be at Toronto.

Railroad construction.—The Dominion Power & Transmission Company, has passed its annual dividend, and will devote the surplus earnings to improving the street railway. About \$250,000 is said to be available for this purpose.

Navigation.—The annual meeting of the Turbine Steamship Company was held Monday, January 10, in the Board of Trade rooms. The statement of the financial position of the Company was the most promising that has been issued for some years, the boats having earned from \$14,000 to \$15,000 more than last year. The old board of directors was re-elected.

CONDITION OF PARTICULAR TRADES.

The building trades generally had a dull month, although sheet metal workers tinsmiths and lathers reported a fair amount of employment. There was no change in the aspect of the strike in the stove foundry moulding shops. Some of the foundries had their usual shut-down during the month, but resumed operations towards the end. Stove mounters were dull, and metal polishers were busy, electrical workers quiet, blacksmiths and horse-shoers, fair, woodworkers, upholsterers, carriage makers and pattern makers busy, the allied printing trades good, garment workers busy, custom tailors quiet, boot and shoe workers busy, and cigar makers very busy.

The Tuckett Company increased its staff by about 20. Tobacco workers were idle a good part of the month. Bakers and confectionery workers, were fairly busy. Barbers were slack, as were hotel and restaurant employés. Railroad employés were brisk, and street railway employés, fair. Weather conditions interfered with the employment of labourers, but conditions were improved over the same period last year.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed, during the month which compared favourably with the month preceding and was better than January of last year. There was some activity in the building trades as weather permitted.

The majority of the factories were busy, especially manufacturers of agricultural implements, where considerable overtime was worked.

The Verity Plough Company is building a large addition to its moulding shops. Merchants had a quiet month following a brisk Christmas trade.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing generally was very brisk, three factories running overtime. Prospects are very bright. The new shoe factory just started is very busy, with many orders ahead.

Railroad construction.—The street railway company is making preparations to continue, as soon as weather permits, the work of re-constructing its tracks; eighty pound rails are being used.

CONDITION OF PARTICULAR TRADES.

Building operations continued on a limited scale, few bricklayers and masons found employment. Carpenters and joiners, lathers and plasterers were active for the time of year.

House painters and decorators, gas and steam fitters found trade a little dull, but painters in factories were busy.

Iron moulders and core makers in general were busy, as also were machinists and engineers. Electrical workers were dull, linemen were busy for January. Metal polishers, buffers and platers in most cases were busy, but stove mounters were slack. Blacksmiths, boiler-makers and horseshoers were busy. Street metal workers were active.

Woodworkers (in factories), carriage and wagon makers, and pattern makers, were busy. Coopers were active.

Printers, pressmen and the allied trades in most cases were busy.

Tailors and tailoresses have not been very busy since the holiday season. Boot and shoe workers were busy, some working overtime. Bakers and confectioners were busy, with cigar makers and tobacco workers active.

Leather workers and saddlers were active.

Barbers, clerks and delivery employés were steadily employed, as were hotel and restaurant employés. Laundry workers were busy.

Railroad trackmen were active. Freight handlers were busy. Street railway employés were steadily employed. Draymen were busy. Teamsters, cab drivers and expressmen were active.

There were not many unskilled labourers unemployed.

DISTRICT NOTES.

Paris.—The labour market continued favourable, very few being unemployed. The Plough factory has been closed for some time, but other factories and mills were busy.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market for January was quieter than during the preceding month, but compared very favorably with the corresponding month last year. Many of the local industries were closed down during the early part of the month for stocktaking and repairs, but towards the end conditions improved and men in factories were nearly all working full time. A force of men, was employed cutting ice and shoveling snow. The School Board is calling for tenders for a new six-roomed school and the Hospital Board is advertising for tenders for a new Nurses' Home in connection with the General

Hospital. The City Council will erect a new Isolation Hospital as soon as the weather permits. The strike of the Brussels Carpet Weavers is still on. The men desired to have their grievances submitted to a Board of Conciliation but the employers refused.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, lathers and plasterers, reported a very quiet month, with carpenters, painters and decorators fairly active. Iron moulders and helpers, core-makers, machinists, electrical workers and linemen all had an active month. Piano and organ makers were well employed. Carriage makers were fairly active. Coopers and pattern makers, had an active month, while printers and allied trades, reported a fair month.

Tailors and garment workers were well employed.

Bakers and confectioners were busy. Ice cutters and drivers were also busy, as were barbers, clerks and stenographers. Teamsters and expressmen were active. Unskilled labour was quiet, with the supply in excess of the demand.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During January, the general condition of the labour market was favourable. Skilled labour was well employed, and in the last half of the month unskilled labour was more active than in the corresponding month of 1909, cutting and packing ice. Business generally, transportation, and bank clearings were favourable. There were no changes in rates of wages nor hours of labour. Male and female help was in demand at two boot and shoe factories and at the Hagen Shirt and Collar Company.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy hauling cord wood, saw logs, stone, hay and other products.

Lumbering.—This industry was active.

Manufacturing establishments were busy, the Berlin Interior Hardwood Company, and the Jackson and Cochrane Foundry Company working overtime.

CONDITION OF PARTICULAR TRADES.

The building trades generally were quiet, though steam and gas fitters had a good month. Iron moulders, iron workers and helpers, coremakers, machinists, engineers, electrical workers and linemen, were very busy; the other branches of the metal trades were active. Coopers were inactive; other woodworkers were busy. The printing and clothing trades reported active conditions. Butchers, confectioners, bakers, ice cutters and drivers, cigar makers and tobacco workers were active. The leather trades were active. Laundry workers were active; the other miscellaneous trades were busy. Railway employes were active. Unskilled labour was very quiet.

DISTRICT NOTES.

Galt.—Labour was well employed in January, all the factories and foundries reporting busy conditions, overtime being worked in some cases.

WOODSTOCK, ONT., AND DISTRICT.

Mr. John Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The very favourable conditions reported in December continued through January, with some improvements. Nearly all the factories were running full time, with full staffs, and some were working overtime. As compared with the same month last year there was a notable improvement. The promise is that the coming year will equal the best in a decade. This is particularly true of the musical instrument trade. Both piano and organ factories here are working to their full capacities, and the expectations are that the year 1910, should

nothing unexpected happen, will equal 1907. Conditions in the furniture business are also very favourable. The Canada Furniture Manufacturer's factory has been working full time with a full complement of men. The wagon factories were busy, and the local stove industry was working five days a week with a full staff. This, of course, is the quiet season for the building trades, but there are prospects of a very good year to come. The building programme includes one new school building, and the remodelling of another. Chalmers' Church Congregation will either rebuild or remodel, and Knox Church intends erecting a new manse. There is a strong probability of a new city hall being begun this year. There have been no complaints of want of employment. Many of those employed in the building trades during the summer find work in the factories during the winter. There is some demand for skilled labour. In both the furniture and the piano, and organ trades, good men are welcomed. There appears to be plenty of unskilled labour; but so far it has all been absorbed.

CONDITION OF PARTICULAR TRADES.

There is still some unfinished work in the building trades, but not a great deal. The past season was only fairly good; but there is every reason to expect that the coming year will be much better.

Conditions among moulders and other iron workers are very good for this time of year.

Woodworkers and wagon makers employed in the factories were busy, and are looking forward to the future with satisfaction.

Printers were busy. The supply of good printers is scarcely up to the demand.

Garment workers were fairly busy. Steady work the year round is found for most of those employed here.

Bakers, confectioners, butchers and cigar makers were all fairly busy.

Barbers, clerks, delivery employés and laundry workers were fairly busy.

Most of the unskilled labour is absorbed by the factories in the winter. The con-

struction of the towers in this district for the Hydro-Electric transmission line will likely afford additional employment.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during January, continued active, though building operations were at a stand-still. Some repairs and inside work gave employment to a few of the building trades.

All the factories were working full time, and the prospects are that these conditions will continue through the winter. A new industry "The Imperial Rattan Company," of Walkerville, has purchased the Borland Carriage Company's factory which has been idle for some time; the price paid was \$25,000. The Company expects to commence operations in February with sixty hands, and to increase the number to one hundred. The heavy fall of snow has given employment to a large number of men and teams clearing the streets.

Merchants reported business very good. The custom returns for the port of Stratford totalled \$9,615.41. This is a much smaller figure than the returns of previous months. No change in rates of wages occurred. There have been no complaints of want of employment, and no trouble in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers have had a good season. The city markets were well attended and high prices for produce prevailed. Grain prices remained the same as last month. Butter was twenty-five to twenty-seven cents per lb. and eggs thirty-five a dozen. Some market days, this month the country roads were unpassable, on account of the heavy snow, making it difficult for the farmers to bring in their produce.

Manufacturing establishments reported a busy month.

CONDITION OF PARTICULAR TRADES.

In the building trades a large number were idle. Plumbers were busy.

Iron moulders, iron workers, boiler-makers, and machinists were active. Blacksmiths were busy.

All woodworking factory workers were busy.

Printers reported plenty of work.

Journeyman tailors were quiet, though factory workers were fairly busy.

Bakers, confectioners and butchers were busy. Ice cutters were busy; the ice is of good quality and about fourteen inches thick. A number of men and teams were employed cutting and storing.

Barbers, clerks and delivery employes were busy. Hotel, restaurant, and laundry workers were active.

Railroad crews reported conditions very busy. Cab drivers, draymen and teamsters had plenty of work.

Unskilled labourers were dull but not as many were idle as during the corresponding month of last year.

DISTRICT NOTES.

Goderich.—The ratepayers are to vote on February 12, on a by-law to give a fixed annual tax rate of \$1,800 on the Goderich Elevator and Transit Company's plant, and \$1,200 on a proposed new elevator of the same company for ten and twenty years respectively. The new elevator is to be of concrete, 500,000 bushel capacity and will cost approximately \$150,000. The Company has now a pay roll of \$60,000 a year and 115 employes. It expends in railway freight over \$1,000 per day and at least \$50,000 a year for water freight.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A severe set back was given to labour during the month, and the number of unemployed was added to, both as regards outdoor and indoor work. A number of

sewers which had been started, were abandoned until spring on account of weather conditions. Building operations were practically at a standstill, and in the foundries and factories a noticeable falling off of work has occurred.

A severe snow storm on the 22nd of the month completely tied up the street railway, and the hand shovel with teams and sleighs had to be resorted to, some of their lines being blocked for three days. The steam lines and radials also suffered considerably from the storm.

The revenue derived by the city from the London and Port Stanley Railway, owned by the city, and leased to the Pere Marquette Railway Company shows a falling off for the year 1909, of \$3,326.42 or of about fifty per cent., caused through the completion of the London and South-Western Traction Company, which covers the same territory.

The cost of living in this city, as taken from the files of the London Advertiser, for the year 1900, and the present year shows a phenomenal increase, the following being some of the items:—

	1900	1909
Beef, by quarter.....	5 to 6c lb	8 to 9c. lb
Mutton, by quarter.....	5 to 7c. lb	8 to 11c. lb
Lamb, by quarter.....	8 to 9c. lb	12 to 13c. lb.
Live hogs.....	\$5.40 to 5.60	\$8.25 cwt.
	cwt.	
Dressed hogs.....	\$7.25 cwt.	\$11.50 to \$12
	cwt.	
Young pigs.....	\$3.50 to 7.00	\$5.50 to 9.
	cwt.	
Eggs.....	22 to 25c. doz	35 to 40c. doz
Butter in rolls.....	20 to 21c lb	26 to 28c. lb
Butter creamery.....	24 to 25c. lb	28 to 30c. lb.
Turkeys.....	8 to 9c lb	15c. lb
Geese.....	5 to 6c. lb.	12 to 14c. lb.
Chickens.....	40 to 60 c. pr.	13 to 14c. lb.

CONDITION OF PARTICULAR TRADES.

Very little work was done by bricklayers, carpenters, lathers, plasterers, painters, plumbers, stone cutters and builders' labourers.

Iron moulders were slack in the stove trade, but fairly active in other lines. Machinists reported trade fair, with some idle. Metal polishers and stove mounters were not very busy.

Carriage and wagon workers were fairly well engaged. Car builders had a lot of repair work in hand.

Business was inclined to be a little

slack in the printing and allied trades, although there were few idle men.

Journeymen tailors were very slack, with a number doing nothing. Garment workers reported trade fair. Boot and shoe workers were busy.

Tanners and curriers were busy.

Railway train crews have been busy, especially engineers and fireman; a large number of double headers being run and snow plows being out on account of weather conditions. Street railway hands were doing a lot of overtime, the men complaining of being overworked.

There was a large number of idle men among unskilled labourers, but employment is being found for them by the Charities Aid Society at the different wood yards, the Society paying for part of the labour.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The building trades were much quieter during January than during the preceding month, owing to the unfavourable weather conditions. However, those engaged on inside work were able to go on. The supply of unskilled labourers was in excess of the demand, except on certain days when large gangs were employed by the railways and civic authorities in handling snow. The M. C. R. R. Company continued ice cutting at Waterford and completed the 1910 harvest. During the month the Annual Dairymen's Convention was held in the city and was largely attended. The Assessor's report covering the past year, shows a considerable increase in population. The school board is planning for the erection of a new school in the section of the city south of Wilson Bridge. A grant of \$500 has been made by the City Council to the Industrial Committee, said funds to be used in advertising the exceptional advantages to be found in this city by manufacturing concerns.

The Pere Marquette Engineers have been notified that commencing February 1, a substantial increase in pay will be granted. The new schedule will be as follows: On through freight an increase of 23 cents is made per 100 miles. For this class of service engineers will then receive \$4 per 100 miles. For switch engine service forty cents per day is added, which under the new schedule will amount to \$3 per day. For passenger service the new rate will be \$3.25 per 100 miles, an increase of twenty-five cents per 100 miles. For local work the rate will be \$3.65 per 100 miles, which will be an increase of thirty-five cents per 100 miles. It is understood that Pere Marquette trainmen are at present in conference with the officials and a new schedule of wages will in all probability result.

The splendid showing made by the Light, Heat, Power and Gas department and the Waterworks department is a matter for congratulation on the part of the citizens and a triumph for civic ownership.

For the waterworks the gross revenue from all sources including cash balance on hand and January, 1909, amounted to \$54,371.17. Expenditure on repairs and extension were \$33,641.19, leaving a balance of \$20,729.38. After deducting payment of interest on debentures and principal which amounted to \$11,593.49, a net surplus is shown which totals \$9,136.09. In the Light, Heat and Power department the revenue exceeds expenses by \$18,223.71, however, \$17,456.88 of this amount was spent in extending gas mains, installing steam heating system and additional electric light service.

Arrangements are being made for the installation of the Hydro Electric Power Company. It is expected that the Michigan Central Railway, will use in the neighborhood of 450 horse power. A special rate will be arranged for the Michigan Central Railway which after discounts have been deducted is expected to total about \$32.40.

The merchants state that trade showed a falling off after the Christmas rush but towards the latter part of the month there was a considerable revival.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The markets were not well attended during January as the farmers found it difficult to come to the city with their produce.

Manufacturing.—Manufacturing concerns report a normal month.

Railway construction and employment.—A considerable number of unskilled labourers found employment during the month in keeping traffic open on the railways during and after snow storms.

CONDITION OF PARTICULAR TRADES.

In the building trades those engaged in inside work were fairly well employed, but very little outside work could be done on account of the cold weather. Railway shop employes reported an active month. Tailors reported trade quiet. Railway employes in the traffic department reported the month a fair average. Unskilled labourers had rather a dull month.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was no demand for skilled labour during January. The building trades were very quiet. The recently organized Modern Malleable Range Company, capitalized at \$40,000, commenced the manufacture of stoves on the 26th of the month and a number of men found employment. The Chatham Fruit Growers' Association contemplates enlarging its present quarters, and with the assistance promised from the city will add a cold storage plant. With the extreme cold weather during December and January a larger number of small firms stored ice than in the past few years with the result that a large number of the labouring class were steadily employed throughout the month. The Industrial Committee of the City Council has been in communication with a number of

industries. Of the twenty-six different manufacturing concerns in the city all with the exception of three have been running full time. Merchants reported trade somewhat quiet after the Xmas trade but are looking forward for a good spring. The city so far has not been called upon for charity to any great extent. There have been no strikes or lockouts and no changes in rates of wages.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were idle, carpenters and joiners and plasterers reported work very scarce. Plumbers were busy, but builders' labourers were idle. Iron moulders, iron workers and helpers, and machinists were fairly busy, but electrical workers and linemen reported few orders. Metal polishers, buffers, platers and brass workers were busy. Sheet metal workers were quiet, horse-shoers reported the month far above the average. Planing mill woodworkers were very quiet, but carriage and wagon makers were busy. Printers, pressmen and bookbinders were busy. Journey-men tailors, garment workers and boot and shoe workers were rather quiet. Bakers, confectioners, butchers, ice cutters and drivers were busy. Cigar makers and tobacco workers have been quiet. Barbers, clerk, stenographers, theatre employes and laundry workers were busy. Cab drivers and hackmen reported trade good. Carters and draymen were slack. Unskilled labour was fairly well employed.

CONDITION OF LOCAL INDUSTRIES.

Farmers are now devoting their time attending to their stock as lumbering in the district is a thing of the past.

Prices still remain firm, hay at \$14; live hogs reached the highest during January \$8.55 line weight, but took a drop to \$8 before the end of the month. Seed corn is rated at \$1 per bushel.

Railroad construction has been quiet. Objection was taken to the C. W. & L. E. Electric R. R. in the township of Dover, over the right of way and until a decision is reached the Company is unable to advance any further.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to the severe weather, labour conditions were not as active as in the month previous. As soon as weather permits, however, there will be plenty of work as there are a lot of unfinished jobs. The Postum Cereal Company has a large number of hands employed installing machinery. It will take about three months to complete. The Toledo Scale Company has started work and is giving employment to twenty-five hands. Fuller Bros. have leased a building and are putting in about \$5,000 worth of machinery to manufacture pop corn. A scarcity of female labour prevails. The wholesale and retail merchants reported the year 1909, the best year they ever had and prospects good for 1910.

CONDITION OF PARTICULAR TRADES.

Owing to the cold weather, bricklayers, plasterers, painters and builders' labourers were not very busy. The rest at the building trades were fully employed.

Iron workers on all lines had a good month.

Woodworking establishments, as well as carriage shops, were all running full time.

Printers and pressmen were all fully employed.

The tailoring trade was quiet, but garment workers were in demand.

Bakers, butchers and meat cutters were busy. Ice cutters were busy laying in supplies.

Leather workers were all working.

Barbers reported trade quiet. Clerks, stenographers, delivery employes, hotel and laundry workers found plenty of employment.

Railway and street railway employes were active. Owing to the severe weather and the heavy ice in the river the transfer boats have had to have extra help, giving employment to a large number of men.

Unskilled labour was well employed.

DISTRICT NOTES.

Walkerville.—The Imperial Rattan Company will remove from Walkerville to Stratford on the first of February. About fifty hands were employed. The Regal Automobile Company has its building completed and expects to be ready for business by the first of February.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour on the whole was well employed in January and business was fair. The steel plant was shut down for about four weeks for repairs but the employes were able to secure work on construction. The Algoma Steel Company had a large staff of men engaged in the erection of a blast furnace, rolling mill, docks, etc. It is the intention of the Algoma Central Railway to extend its line this spring, work to commence as soon as possible. Altogether the outlook is very bright. The ratepayers voted on a local option by-law which was defeated. By-laws for \$26,000 for cement sidewalks and \$6,000 for sewers to be constructed during the coming summer were carried.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Conditions were normal.

Lumbering.—Operations were brisk.

Manufacturing.—The various manufacturing establishments operated steadily during the month.

CONDITION OF PARTICULAR TRADES.

From normal to busy conditions were reported in the various skilled trades.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All trades in this district have been very quiet during January, while the

closing of navigation on the lakes naturally shuts out a great deal of labour, this has been emphasised this winter by the slackness of work in the lumber trade.

There have been no new works started, but in both Fort William and Port Arthur important new industries are expected in the spring.

In the building trades, while general quietness prevails there are a few buildings still in course of erection, notably the Canadian Northern Hotel and the Collegiate Institute in Port Arthur. Several smaller buildings both in Fort William and Port Arthur are being finished; this keeps more men employed than in the same period last month.

The linemen of the light and telephone departments of both cities have been busy, and the full staff of men employed.

The employés of the Municipal Street Railway, have put in suggestions for alterations in the terms of employment which will give a small increase in wages; The joint Railway Commission met a deputation of the men on January 26th., and after hearing them passed a resolution that the Commission should meet the men in committee on February 2nd., and discuss the terms of agreement.

There is confidence expressed on all sides that the coming summer will be busy. The building trade is expected to open early as many foundations were put in last fall, and some blasting is being done at the present time for block foundations. All these buildings can be got under way early.

In Port Arthur, plans of a new Library, to cost \$25,000, and plans of a new Y. M. C. A. building, to cost \$30,000, are prepared and arrangements are being made to start both these buildings early in the spring. This will contrast favourably with last year when June was reached before a general movement was made in the building trades.

Following the work of the ice-breaking tug *Whalen*, an open channel has been broken from the docks at Port Arthur to the open water of Lake Superior ever since the closing of navigation.

On the 20th. inst., a strong breeze from the land broke the ice field inside the bay

and drove the ice clear of Thunder Cape, which left the docks and the whole of the bay free of ice. The citizens enjoyed the unwonted sight of blue waters in the month of January for three days, when the ice formed again.

The weather has been mild and the ordinary commercial work of the two cities is proceeding along routine lines quietly. Owing to the activity of the late summer and fall there have been but few cases of distress. The cases reported have been met by a ladies' committee, and baskets of provisions and clothing have been supplied. Most of the cases have been in the country districts among settlers in the early months of settlement.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is comparatively speaking very little unemployment at the present time in Winnipeg, a condition unusual at this season of the year.

Trade both wholesale and retail has been decidedly better than usual. In wholesale trade the increase is especially noticeable. Bank clearings show a greater increase than usual over the corresponding period of last year. The increase in January as compared with January of 1909, is 34.7 per cent.; the increase of January, 1909, over January of 1908, was five per cent. In the hardware business one wholesaler reports that the business of January, of this year, has been fully thirty per cent. better than for the same month of last year.

The T. Eaton Company, has secured property at the rear of its present store for the erection of a factory building which when completed, probably during the present year, will give facilities for the employment of some thousands of work people. It is the intention of this firm to manufacture clothing in the factory in question.

During the past few weeks the Winnipeg Development and Industrial Bureau.

has been in conference with a committee of the City Council with a view to securing to manufacturers some exemption from taxation. It is contended that the increase in land values, as a result of the growth of the city, caused by the increase in the number of industrial establishments, results in the factory operators having to pay higher taxes proportionately as the land and property values rise. This, it is claimed, makes the cost of production heavier and deters manufacturers from coming to the city. To overcome this objection they desire the City Council to give manufacturers a fixed assessment, and not one that is raised every year as the value of the land they occupy advances. Another request made by the Bureau is that manufacturers should be exempt from the operation of the business tax. As yet no definite action has been taken by the City Council.

Some important decisions have been arrived at by the Winnipeg City Council as to the amount of public work that will be done during the present year. Already contracts have been let to make additions to the substructure of the Louise bridge, over the Red river, and tenders have been invited for the erection of the new steel superstructure. The Canadian Northern railway and the Grand Trunk Pacific railroad jointly, have awarded a tender to Thos. Kelly & Sons, for the erection of a substructure for a steel railroad bridge over the Assiniboine river near its juncture with the Red river in the city of Winnipeg. This work will be completed before the ice moves in the early spring.

The Canadian Pacific Railroad Company has awarded a tender to J. D. McArthur & Company, for the erection of the substructure of the bridge to be built over the South Saskatchewan at Outlook.

The City Council of Winnipeg have arranged to proceed with the following public works during the present year.

Local improvements—	
Asphalt pavements.....	\$ 500,000
Granolithic walks.....	50,000
Sewers.....	230,000
Block pavements.....	30,000
Macadam pavements.....	15,000
Plank sidewalks.....	30,000
Waterworks.....	250,000

Street and lane openings.....	50,000
Boulevards.....	6,000
Compulsory plumbing.....	1,000
Addition, city hall annex.....	20,000

Total.....	\$1,182,000
Special works—	
Fire halls.....	50,000
Parks.....	150,000
Louise Bridge.....	107,000
Conduits.....	50,000
Police stations.....	75,000
Power scheme.....	850,000
Total.....	\$1,282,000

The Sterling Bank will open a branch in Winnipeg in the beginning of February.

The Manitoba Rolling Mills Company's new buildings have been completed and will be put into operation on February 15th.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Grain receipts continue to exceed in volume the receipts for the corresponding periods of last year. Prices are being maintained at a level that appears to be satisfactory to the farmers. The executive of the Grain Grower's Association have submitted a plan to the Manitoba Provincial Government for the operation of a Government system of elevators. Several conferences have been held and it is understood that as a result of these the Government will submit a measure embodying the conclusions arrived at at the session of the legislature to be held this month.

Transportation.—It is understood that the three railroads have in the course of preparation plans for work during the coming season that will be more extensive than those of any previous year. President Wm. Mackenzie, of the Canadian Northern Railroad Company, has stated that that Company will do more work this year, than it has done in any previous year. No definite plans have as yet been announced.

CONDITION OF PARTICULAR TRADES.

Building.—More men are working on new buildings at the present time than is usual. The weather has been fine, and is regarded as exceptional. The building inspector states that the amount of permits issued during January of the present

year will exceed the total for the same month of any year, with the exception of January, 1906. In the building inspector's opinion the present year will be one of the busiest the city has ever had.

Leather trades.—The Great West Saddlery Company is proceeding with the erection of a new factory, that will increase its output very considerably and provide facilities for the employment of a large number of additional work-people.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during January was practically the same as in the preceding month; and was considerably better than in the corresponding month of last year. So far, there have been no cases of want brought to the notice of the city officials. The Hanbury Manufacturing Company is still working full time; and the Gas Company still laying mains and making connections. The McDiarmid & Clark Company has taken out a permit for a \$10,000 brick building for a sash and door factory; the excavating has been completed, and the concrete foundation walls are now under way; the brickwork will be commenced as soon as possible, as the building has to be ready for occupation by April 1. The addition to the Winter Fair building is nearing completion and will be ready for the annual fair, the first week in March. The City Council is negotiating with the Canadian Northern Railway Company, for the erection of a \$200,000 hotel and depot to be completed this year. There was no change in the situation between the locked out cigar makers and the Dillon Company.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The Hanbury Manufacturing Company is still working full time. The McDiarmid & Clark Company is erecting an addition to its factory.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were all unemployed. Carpenters and joiners were fairly busy on inside work. Plasterers were busy on the Methodist Church and Court House. Gas fitters were busy. Machinists were actively employed. Electrical workers were busy. Printers were active, and journeymen tailors were fairly active. Cigar makers were dull. Railroad transport was fairly active. Unskilled labour was dull.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The weather during the past month has been most favourable to labour out of doors.

Building has never wholly ceased this winter, and many residences are at present in course of construction. Generally speaking the condition of labour during the month has been very satisfactory. Moreover there is an optimistic feeling in labour circles regarding future prospects. The good crops and the return of easy money have had the effect of stimulating trade in all lines, and the present year gives promise of being one of the best building years in the city's history.

Retail and wholesale trade has been fairly brisk for the time of year and reports generally indicate increasing business.

CONDITION OF PARTICULAR TRADES.

All departments of the building trade have, of course, as is usual at this period of the year, been rather quiet, although carpenters, lathers and plasterers have been fairly well employed. Painters, and decorators have been quiet, also plumbers and gas and steam fitters. Iron moulders, iron workers, machinists, and engineers have been fairly active, but electrical workers, and linemen have been rather slack. Blacksmiths, horse-

shoers have been well employed, while printers and allied workers have been very busy. Barbers, confectioners, hotel and restaurant employes, have all been active.

CALGARY, ALTA., AND DISTRICT.

Mr. Edwin Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was a general slackening in the labour market as compared with the previous month, but employment was considerably more active than during the same month of last year. The Calgary Cement Company has closed down the manufacturing portion of the plant for a time. The mild weather has permitted excavations being carried on in various parts of the city. The number of building permits issued for January, total forty-eight, at an estimated cost of \$88,750, an increase of 31 permits and in cost of \$66,100 over January, 1909. Bank clearings also showed nearly twice the amount of business done as compared with January, 1909; the figures for 1909, were \$5,561,296 and for January 1910, \$9,447,788. Wholesalers and retailers reported a volume of trade considerably in excess of January, 1910. Quietness prevailed in the labour market.

CONDITION OF PARTICULAR TRADES.

In the building trades bricklayers, stone cutters and builders' labourers were dull, but painters and plumbers were busy, and carpenters fairly active. The metal trades, had a good month, and woodworkers, were fairly active. The printing, and allied trades, were busy, while the clothing, food and tobacco preparation and miscellaneous trades had a good month. Railway employes were active, but unskilled labour was dull.

NELSON, B. C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay district

during January was quiet, there being a surplus of quartz miners at Rossland, Nelson, Moyie, and other points, though coal miners, and lumbermen appeared, to be fully employed.

The tonnage of ore shipped and milled in the surrounding district, for the year, ending December 18, has been reported as follows:—

	tons.
Blue Bell (Mine).....	5,010
Blue Bell (Milled) Mine	44,600
Cork "	468
Emerald "	1,085
Granite Poorman "	389
Granite Poorman (Milled Mine)	12,350
Kootenay Bell "	3,560
Molly Hughes "	385
North Star.....	2,739
Nugget (Milled) "	5,450
Queen, (Milled) "	20,790
Richmond, Eureka "	2,766
St. Eugene "	20,758
Second-Relief, (Milled Mine)	7,205
Silver Cup Mine	1,565
Mon-Roi "	1,146
Whitewater "	1,612
Whitewater Deep, (Milled Mine).....	34,800
Yankee-Girl, Mine.....	3,260

The Sullivan Group of mines, situated near Kimberly, in East Kootenay, has been recently secured by the "Consolidated Mining and Smelting Company, of Canada, Limited." under lease and option, and a force of men has been engaged to put the property in shape for shipping ore. Ore production from the Sullivan will not only mean a greater tonnage for the Trail Smelter, but an increased output from the refinery in connection therewith, the daily capacity, of which is being increased from 70 to 120 tons of refined lead.

The Highland Mine at Ainsworth, has shut down, throwing out of employment about 50 men. This mine has been under option and operation by a syndicate from the United States for several months past.

The development force, on the "Le-Roi" mine at Rossland, has been slightly reduced.

The pile driving is about completed for the new wharf now being constructed at Nelson by the Canadian Pacific Railway Company.

On the morning of January 18, a runaway Canadian Pacific Railway locomotive at Nelson killed H. H. Terry, a boilermaker's helper in the employ of the Canadian Pacific Railway Company, and

injured another workman, whose wrist was broken.

"That H. H. Terry came to his death by Engine No. 1300 running into roundhouse door and into engine No. 1382, where deceased was at work.

"We are of the opinion that the engine was tampered with while standing at ash-pit on No. 1 track by some person or persons unknown.

"We would recommend that in future all engines under steam should be in charge of a watchman while on tracks outside of roundhouse waiting for regular crew."

Arrangements are now under way for the starting of a co-operative store, at Nelson, over \$5,000 being now subscribed. A meeting for organization purposes is set for January 28th, 1910.

NEW WESTMINSTER, B. C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions are quiet at present, although January of the present year, will compare very favourably with the corresponding months of former years. There are a number of idle men here at present, principally labourers, but the wet season accounts for this condition. Work on the British Columbia Electric Tramroad to Chilliwack and minor extensions are progressing as well as may be expected. In addition to their former contract for fifty miles of road, the other side of Abbotsford, the Great Northern Railway Company, has awarded to Messrs. Foley, Welch & Company, a further contract for thirty miles of road. This means the opening up of a country rich in minerals and of great value commercially, to the district. Indicative of the activity about to commence in the building line is a call for tenders for competitive designs for the Royal Columbian Hospital in this city. The designer obtaining first place is to receive a premium of \$400. The second a premium of \$300 and the third \$200.

A new industry to be started, is the Western Canadian Bag, Envelope and Box Company.

Owing to a system of sewage, which is being installed, the plumbers are fairly busy, but there are enough men here to keep up with the demand.

Transportation facilities on the river, between this city and Chilliwack, were somewhat disorganized for a few days owing to floating ice.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—There is considerable activity in this line at present, some of the mills are working overtime and the Canadian Pacific Lumber Company's mill at Port Moody, which has been closed for some time, has again started running.

CONDITION OF PARTICULAR TRADES.

Iron workers and helpers and machinists were fairly active. Blacksmiths, plumbers, steam fitters, printers, electric car builders, street railway men and teamsters were busy. Bricklayers, masons, carpenters and unskilled labourers were quiet.

VANCOUVER, B. C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month compared favourably with December, though generally quiet in the building line because of the wet weather. The chief activity was in connection with the coasting trade. Trade with Mexico increased above expectations. It is estimated that some twenty extra vessels will be engaged in the coastwise traffic, the coming season. The month saw higher levels reached in wholesale and retail prices, but principally in the latter. Tomatoes from warmer climes found a lively market at \$1.50 a basket.

The city will erect a new incinerator to cost \$75,000.

The Board of Works spent in 1909, \$296,575, or about \$1,000 a day.

The Canadian Pacific Railway Company will rebuild and enlarge the Hotel Vancouver, occupying about five years to complete the proposed improvements.

While the local real estate market did not awaken to its full activity after the

new year, a number of important deals, were put through on inside or business property.

A \$52,000 apartment block will be erected.

"Opportunities." a new monthly publication was issued in the interests of real estate and the development of the resources and possibilities of British Columbia.

Plans were prepared for a \$60,000 labour temple.

Hon. H. E. Young, Provincial secretary, asked the Trades and Labour Council to appoint a representative to give the local Government information with respect to diseases of occupations, to be forwarded to the International Congress on Diseases of Labour, to be held at Brussels next September. The Trades and Labour Council appointed a committee to look into the eight-hour bill before the Federal Parliament. A convention for the discussion of a proposed Provincial Federation of Labour will be called by the local Trades and Labour Council.

The Ministerial Association, of Vancouver, has asked for affiliation with the Trades and Labour Council.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The month was quiet excepting for halibut, which was active.

Lumbering.—There was little change in the industry from last month.

Mining.—Activity was reported on the Queen Charlotte Islands and at Stewart, on the Portland Canal, a smelter being located at the latter place.

Transport.—A feature of the month were the heavy shipments eastward.

CONDITION OF PARTICULAR TRADES.

Building operations were unchanged from last month.

Metal and woodworking.—Conditions were unchanged from December.

Printing.—The allied trades were active towards the end of the month.

Clothing.—Tailors had an inactive month, with prospects uncertain.

Leather.—Workers on horse goods, were quiet.

Food and tobacco preparation.—Bakers and confectioners were fairly active, but cigar makers reported a surplus of unemployed workmen.

Miscellaneous.—Barbers and clerks were very quiet. Hotel, restaurant and theatre employés had an active month. Bar tenders reported a large number out of employment.

Unskilled labour was unchanged from last month.

VICTORIA, B. C., AND DISTRICT.

Mr. W. E. Ditchburn, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of December, outside labour was employed about half time, owing to unfavourable weather conditions. Those employed at inside work in mills, factories, etc., had constant employment. The municipal authorities had two gangs of men (day and night) working for two weeks during the latter part of December on the Vitrifield brick road over the James Bay Causeway, which helped to a certain extent to make up for the lost time during the earlier part of the month. Street work for the next month will be carried on as fast as weather conditions will allow, but at best those employed at this class of labour, will only get in about three-quarter time.

The domestic servant and farm hand problem is now a live one and the Vancouver Island Development League has issued the following circular for distribution throughout Eastern Canada and the Old Country, from which good results are expected:

Vancouver Island needs a large number of house domestics. They will get good homes, and receive wages according to their experience and skill. Housekeepers are very seldom in demand. The average wage paid is as follow:—

General Domestic from \$15 to \$25 per month and board.
Housemaids from.....\$20 to \$25 per month and board.
Plain Cooks from.....\$20 to \$25 per month and board.
Good Nurses from.....\$20 to \$25 per month and board.
Extra good Cooks from..\$25 to \$30 per month and board.
Girls of sixteen.....\$15 per month and board.

Domestics get one evening and one afternoon off each week, and every other Sunday afternoon and evening off. Domestic are expected to wear caps and aprons.

All applicants must have references as to competency and good character.

To girls wishing an opportunity to better themselves in a new country, Vancouver Island offers special opportunities in the line of domestic service. The climate is delightful, very similar to England, but with more sunshine. The population is almost exclusively English, Canadian, Scotch and Irish. The only drawback domestics will find is that it will be difficult for them to keep from getting married, especially if they are competent cooks and house domestics.

Average wage \$25 a month and board in the winter \$30 to \$35 a month and board in the summer.

Good chances in this way for young men to learn mixed farming, poultry-raising, fruit-growing, and vegetable-growing, and at the same time be self-supporting and save money.

The above figures and conditions as to Domestic and Farm Help have been furnished the Vancouver Island League from the best sources obtainable, and are considered accurate and trustworthy.

That Victoria has experienced a very prosperous year is evidenced by the bank clearings. All previous records were broken in this respect. The aggregate clearings for the year were \$70,695,882, as compared with \$55,356,013 for the year 1908, which year only exceeded its predecessor by about \$22,000 in round figures. The monthly returns for the past three years are as follows:—

Month	1909	1908	1907
Jan.....	\$4,235,476	\$4,391,096	\$3,909,509
Feb.....	4,321,397	4,271,712	3,750,822
March.....	4,940,269	4,290,782	4,039,507
April.....	5,529,870	4,634,079	4,554,441
May.....	5,407,596	4,695,269	4,852,411
June.....	6,452,155	4,500,812	4,843,161
July.....	6,051,953	4,940,811	5,208,912
August.....	5,718,680	4,259,231	5,062,571
September.....	5,864,553	4,310,210	4,422,850
October.....	6,873,867	5,063,689	5,309,669
November.....	7,200,485	5,049,844	5,030,516
December.....	8,099,370	4,939,071	4,361,242
Total.....	\$70,695,882	\$55,356,013	\$55,330,588

Another evidence is given of the importance of Victoria in the Customs returns for the past year, which exceeded, those of 1908, by approximately \$200,000, the monthly returns being as follows:—

	Imp. Duties.	Chinese	Other	Total
January....	\$63,163.81	\$ 7,544	\$ 9.10	\$70,716.90
February....	86,953.25	1,523	57.10	88,533.35
March.....	84,219.57	6,036	14.50	90,270.07
April.....	91,510.18	22,052	11.95	113,574.13
May.....	88,657.42	33,530	59.40	122,246.82
June.....	162,941.47	46,040	46.90	209,028.37
July.....	94,788.25	51,082	117.03	145,987.28
August.....	95,707.92	65,594	13.10	161,315.02
September..	110,968.79	40,270	11.95	151,250.74
October....	102,783.43	44,548	5.90	147,337.33
November..	99,561.52	46,522	15.10	146,098.62
Dec., to 30.	94,106.02	25,657	52.35	119,815.37
Total.....				\$1,576,760.00

The immigration returns for the past twelve months, at the port of Victoria are as follows:—

From January 1, 1909 to December 31, 1909.

European immigrants from Australia, thirty-three male, ten female, total forty-three.

European immigrants from China and Japan, eighteen male, six female, total twenty-four.

European immigrants from Mexico, eight male, two female, total ten.

Japanese immigrants from Japan, seventy-four male, 110 female, total 184.

Chinese immigrants from China, 929 male, forty-seven female, total 976.

European immigrants from United States, 1,078 male, 273 female, total 1,351.

The seventy-four Japanese male include students, merchant's sons and children to join parents. The 929 Chinese male include all first time Chinese to this country; also children and students. The Customs returns give the amounts collected as head tax each month.

At a meeting of the Retail Milk Vendors it was decided that, owing to the advanced prices of feed, the price of milk be raised from 1st January, 1910, as follows:—

1 pint, per month.....	\$ 2.00
2 pints, ".....	3.50
3 pints, ".....	4.75
4 pints, ".....	6.25
5 pints, ".....	7.75
6 pints, ".....	9.25
8 pints, ".....	12.00

The wholesale price to be thirty-five cents per gallon.

In the past the price of milk has been based on one pint per month, \$1.50 and graded according to quantity obtained. A few milkmen who are not in sympathy with such an increase are selling as follows:—

1 pint, per month.....	\$ 1.75
2 pints, ".....	3.00
3 pints, ".....	4.50
4 pints, ".....	5.75
5 pints, ".....	7.00
6 pints, ".....	8.25
7 pints, ".....	9.50
8 pints, ".....	10.50

CONDITION OF PARTICULAR TRADES.

Bricklayers and stone masons, carpenters and joiners, who have been working on outside works have not had full time during the past month, but those em-

ployed inside have worked practically full time. There are a few carpenters idle at present, owing to weather conditions, delaying the starting of some structures, but after this month it is expected that all will find employment. Painters have worked fairly steadily except on outside work. Builders' labourers have had some lay offs on account of the weather of late.

Iron moulders and iron workers found work in a normal condition. Machinists and engineers also have been well employed during the month. There were some idle engineers in the city, who work during the summer season in the northern rivers, and make this city their winter quarters. Electrical workers and linemen were well employed. Stove mounters and blacksmiths and moulders were constantly employed. Boilermakers and iron ship builders, and also ship carpenters, and caulkers were mostly employed in repair work. Horseshoers and carriage blacksmiths found steady employment. Jewelers had a busy time on holiday work.

Woodworkers have been very busy, for sometime, getting out fittings for the new stores and office buildings being constructed, and report the future bright. Varnishers and finishers have also been kept busy on this work. Carriage and wagon workers were well employed, as were pattern makers.

On December 1st, the *Evening Post*, published by the Colonist Printing and Publishing Company ceased publication. This necessitated the laying off of thirteen hands, consequently there were a number of idle printers in the city during December. They gradually left town for other places. Job printers, found work fairly brisk during the past month getting out work for the municipal elections, but now this branch of the trade is rather quiet in some offices. However, it is not expected that dullness will last long as the Provincial Parliament is now in session. Bookbinders reported trade in a fair condition.

Journeymen tailors reported trade fair, although there have been the usual stocktaking sales of the ready-made stores going on during the month. Garment workers were busy on spring goods.

Bakers, butchers and cigar makers were kept well employed.

Harness makers all found steady employment.

Clerks have been well employed during the past month and stenographers, while some have been idle will find steady work, while the legislation is in session. Hotel and theatre employés have not been so busy as during the summer season, but few have been out of work.

Street railway employés have had constant employment as the year just ended has seen very heavy traffic on the lines of the British Columbia Electric Railway Company.

Owing to unfavourable weather conditions, unskilled labour has not been very steadily employed, but has averaged about half time. This condition of affairs is expected to exist for the next month at least.

NANAIMO, B. C., AND DISTRICT.

Mr. A. E. W. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district during the month has not shown much change from last month. In some industries work has been very brisk. Outside labour, however, lost a good deal of time on account of bad weather. For the time of year conditions have been very good.

The Herring Cannery just started, is in active operation, it is also canning clams, and as soon as machinery arrives will commence putting up sardines. So far there is a demand for all that can be turned out.

Merchants reported trade good, although there is a general slackening up after the Xmas rush. Trade is keeping up well, there being a good demand for nearly all kinds of merchandise. There have been no changes in rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The herring fishery is in full operation and although the fish were a little

late coming in, which set the men back some, indications are for a good catch. The whaling station on the gulf is busy, and is catching nearly as many whales as can be worked up.

Lumbering.—The lumber trade keeps up, the saw-mills in the district are working full time. Owing to wet weather there is not much activity in the logging camps at present.

The coal mines of the district are working to their full capacity and cannot keep up with the present demands, there being a general shortage down the Coast. There is a good deal of Diamond drilling going on by the new coal companies, and some by the old companies as prospects are for a steady demand for coal from this Island.

Railroad construction is being pushed as fast as the weather will allow.

CONDITIONS OF PARTICULAR TRADES.

Bricklayers and masons, reported work quiet. Carpenters and joiners were quiet owing to the weather, but there was more work going on than is general at this time of the year. Painters and paper hangers were quiet. Plumbers were active. Builders' labourers were quiet. Blacksmiths and carriage makers were active for the time of year. Printers reported work as active. Journeymen tailors were quiet. Teamsters and expressmen reported work good. Unskilled labour, owing to weather conditions, has not had a very good month, but there were not as many idle men as is usual at this time of year.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JANUARY, 1910.

DURING the month of January, two applications were received for the establishment of Boards of Conciliation and Investigation, as follows:

1. On behalf of the Alberta Coal Mining Company, Limited, of Edmonton, Alta., the dispute affecting, it was alleged, directly, thirty-five, and indirectly, twenty-five employés.

2. On behalf of the British Columbia Copper Company, limited, of Greenwood, B. C., the dispute affecting, it was alleged, 350 employés.

Other Proceedings Under the Act.

In the application of the Alberta Coal Mining Company, Limited, for the establishment of a Board, it was alleged that the employés had gone on strike without notice. It was further alleged that about two months before a demand had been made by the employés for higher wages, but that when application was made by the Company for the establishment of a Board of Conciliation and Investigation the workmen in question had gone on working, and that the matter was dropped.

In a communication from the em-

ployés, which was received in reply to the Company's application, it was declared that the dispute between the Company and its workmen related to proposed changes in the conditions of employment which had been requested by the employés about three months previously with respect to wages, and that these causes of dispute still exist. It was also denied that the employés had ceased work without any demands being made. It was further declared that complaint had been made respecting the accuracy of the scales in use by the Company in the weighing of coal mined by the employés. Recognition was also demanded for the local union of the United Mine Workers of America.

Mr. J. O. Hannah, of Taber, Alta, and Mr. Clement Stubbs, of Fernie 'B.C., were appointed members of the Board on the recommendation of the employer and of the employés respectively, and the Board was completed on January 17, by the appointment of Mr. R. G. Duggan, of Taber, Alta., as chairman. Mr. Duggan was appointed by the Minister on the recommendation of the other two members of the Board.

In the application of the British

Columbia Copper Company, Limited, for the establishment of a Board of Conciliation and Investigation, it was alleged that the differences in question between the Company and its employés related to a demand which had been received from the latter that no workmen (except officials and shift-bosses) other than members of the Western Federation of Miners should be employed by the Company. It was declared by the Company, that no discrimination had at any time been practised against the members of any labour union, but that the Company reserved to itself the right to employ men according to their abilities rather than their affiliations. Mr. John A. Mara, of Victoria, B.C., and Mr. John McInnis, of Phoenix, B. C., were appointed members of the Board on the recommendation of the employer and of the employés respectively, and on January 22, in the absence of any joint recommendation from the other members of the Board, Mr. J. H. Sinclair, of Vancouver, B.C.,

was appointed by the Minister as third member and chairman.

Certain carpet weavers, members of the Brussels Carpet Weavers' Union, Local No. 277, formerly employed by the Guelph Carpet Mills Company, Limited, of Guelph, Ont., also asked during the month for the establishment of a Board, owing to differences as to wages, hours, and other conditions of labour; and to a demand on the part of the workmen for the right to meet the employer for the discussion of any grievances that may arise. There had been a cessation of work before the communication from the employés was received in the Department.

The industry in question not being one of the public utilities' class to which the Industrial Disputes Investigation Act primarily applies, the establishment of a Board could only be proceeded with upon the joint consent of both parties concerned. The Company's consent was not obtained and the establishment of a Board was not, therefore, proceeded with.

COMMISSION OF INQUIRY RE TECHNICAL EDUCATION.

AN important announcement was made by the Minister of Labour, in the House of Commons, on January 28, of Government policy regarding the appointment of a commission to investigate the needs of Canada in respect of technical education. The Government, he said, was of opinion that it was very much in the national interest that a commission on technical education should be appointed; and that, considering the importance of the subject, the proposed commission should have an opportunity of visiting other countries, especially Great Britain, France, Germany and the United States, to study the systems and methods of technical education obtaining in those countries, in order that Canadians might avail themselves of the experience in the matter of technical education which has been gained by them.

In the January number of the *Labour Gazette* reference was made to a motion which was made by Mr. Hugh Guthrie

(South Wellington) in the House of Commons, on December 6, "That in the opinion of this House, it is advisable that a commission of inquiry should be forthwith appointed to investigate the needs of Canada in respect of technical education, and to report on ways and means by which those needs may be best met;" and to the ensuing debate thereon which was adjourned on motion of the Minister of Labour in order that an opportunity might be afforded to the Government of further considering the constitutional point which was involved in respect of the jurisdiction of the Federal Parliament in this matter.

On December 13, a communication was addressed by the Minister of Labour to the Prime Ministers of the several Provinces, in which the latter were asked whether the appointment by the Federal authorities of a commission to inquire into "the needs and present equipment of the Dominion as respects industrial training and technical education, and

into the systems and methods of technical instruction obtaining in other countries, particularly in Great Britain, France, Germany and the United States," would meet with the approval of the Provincial Governments, and also whether exception to such a course would be taken on any grounds of jurisdiction. The letter of the Minister of Labour on this question and the replies which have been received from the several Provinces are as follows:

The Minister's Letter of Enquiry.

OTTAWA, December 13, 1909.

Dear Sir:—

The Dominion Government is considering the advisability of appointing a Royal Commission to inquire into the needs and present equipment of the Dominion as respects Industrial Training and Technical Education, and into the systems and methods of technical instruction obtaining in other countries, particularly in Great Britain, France, Germany, and the United States. It is intended that the commission shall be solely for the purpose of gathering information, the information when obtained to be published in a suitable report to be at the disposal of the Provinces and available for general distribution.

I may say, that the view of the Government is that a Commission of the kind suggested might render valuable services to the Dominion as a whole, since it would be in a position to conduct an inquiry on a wider and more comprehensive scale than might be considered desirable or possible in the case of the different Provinces, and which if undertaken by the Provinces individually must lead inevitably to the duplication and re-duplication of energy and expense. It is recognized, however, that the work of such a commission to be of national service should have the hearty endorsement of the Governments of the several Provinces of the Dominion, and I am, therefore, writing to ask if the appointment by the Federal authorities of a Commission of the character and scope suggested, would meet with the approval of your Government, and to inquire in

particular, inasmuch as some doubt has been expressed on the point, whether exception to such a course would be taken on any grounds of jurisdiction.

Yours faithfully,

(Signed) W. L. MACKENZIE KING,
Minister of Labour.

Reply from the Premier of Nova Scotia.

HALIFAX, December 23, 1909.

Dear Sir,—I beg to acknowledge the receipt of your letter of the 13th instant, on the subject of the advisability of appointing a Royal Commission to inquire into the needs of Technical Education.

I would be delighted to see such a Commission appointed by your Government; in fact, I have long advocated such a course being taken and you can accept my assurance that such a course, if adopted, will meet with the hearty approbation of the Government of Nova Scotia.

Yours truly,

(Sgd.) G. H. MURRAY.

HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa.

Reply from the Premier of New Brunswick.

ST. JOHN, N.B., December 16, 1909.

HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa.

Dear Sir,—I beg to acknowledge receipt of your favour of the 13 instant, informing me that the Dominion Government is considering the advisability of appointing a Royal Commission to enquire into the needs and present equipment of the Dominion as regards industrial training and technical education, and into the system of methods of technical instruction prevailing in other countries, specially in Great Britain, France, Germany and the United States.

I entirely agree with the view of the Government to the effect that a Com-

mission of this kind might render valuable service to the Dominion as a whole, and I have no hesitation in saying that the appointment by the Federal authorities of a Commission of the character and scope suggested in your letter, would meet with the approval of my Government, and no exception would be taken to such a course on any ground of jurisdiction.

Yours very truly,

(Sgd.) J. D. HAZEN.

**Reply from the Premier of Prince
Edward Island.**

CHARLOTTETOWN, December 18, 1909

Dear Sir,—I beg to acknowledge receipt of your letter of the 13th instant, regarding the advisability of the Dominion Government appointing a Royal Commission to inquire into the needs and present equipment of the Dominion as respects Industrial Training and Technical Education, and into the systems and methods of technical education obtaining in other countries, &c., with the request that the matter should be considered and approved of by the Government of this Province, and whether exception to such a course would be taken on the grounds of jurisdiction.

In reply, I beg to say that your proposal meets with the approval of our Government, and I wish to assure you that no exception will be taken upon the grounds of jurisdiction. We believe it would be in the interest of the country at large that such a Commission should be appointed, and that all possible information be obtained upon a subject of so much importance.

Yours faithfully,

(Sgd.) F. L. HASZARD,
Premier.

THE HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa, Ont.

Reply from the Premier of Ontario.

TORONTO, December 16, 1909.

Dear Sir,—I have your letter of the 13th instant.

I understand the object of the proposed Commission, to inquire into the needs and present equipment of the Dominion as respects training and technical education and into the system of methods for technical instruction obtaining in other countries, will be solely for the purpose of gathering information. This being so, I see no objection to the creation of the Commission, and no exception will be taken to it on the part of the Province of Ontario.

Yours very truly,

(Sgd.) J. P. WHITNEY.

THE HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa.

Reply from the Premier of Quebec.

QUEBEC, December 30, 1909.

THE HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa.

Sir,—I have submitted to my colleagues of the Executive Council the letter you were kind enough to write to me on the 13th instant, asking me whether the Government of the Province of Quebec would approve the appointment by the Federal authorities of a Commission to make an investigation concerning technical education in this country.

We are of the opinion, my colleagues and myself, that anything pertaining to public education—whether the subject be special teaching or general teaching—belongs to the Provinces exclusively, and I want to write you so, in order that there may be no misunderstanding on that point. As, on the other hand, you give me the assurance that the Federal authorities, in instituting a Commission of Investigation, would simply do it with a view to help the Provincial Governments by having collected information which they would later on put at the disposal of the latter, we see no objection to the appointment of such a Commission.

Please accept, Sir, the expression of my highest regards,

(Sgd.) LOMER GOUIN,
Prime Minister.

Reply from the Premier of Manitoba.

WINNIPEG, December 16, 1909.

Sir,—I have the honour to acknowledge receipt of yours, under date of December 13th, regarding the advisability of appointing a Royal Commission to inquire into the industrial training and technical education of Canada.

I appreciate the fact that education is a matter under the Constitution entirely vested in the Provinces and realize that it is a delicate question on which to give advice such as you solicit.

The matter is an important one and I think, in view of the rapid strides along industrial lines that the Canadian people are making, there is necessity for more attention being given to technical education than what has been the practice or custom in the past.

I shall certainly be pleased to see more interest taken in this matter and our young men better qualified for the opportunities that are offered along industrial lines by having a first-class technical education to qualify them for the responsible and important positions that are awaiting men of that quality.

I have the honour to be, Sir,

Your obedient servant,

(Sgd.) R. P. ROBLIN,
Premier.

HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa.

Reply from the Premier of Saskatchewan.

REGINA, December 21, 1909.

Dear Mr. King,—I have duly received your letter of the December 13, on the subject of Technical Education and the proposal now under consideration by your Government for instituting an enquiry by a Royal Commission, and which asks whether the proposal meets with the approval of the Saskatchewan Government, and whether any exception would be taken by us on the ground of jurisdiction.

I may very readily state that the Saskatchewan Government will raise no objection against the proposed enquiry by

the Dominion Government on any grounds; on the contrary we believe that the Federal Government is the proper authority to proceed in the matter in the way proposed, that it is a subject which can be more efficiently, economically, and effectively dealt with by the Central Government than by the various Provincial Governments; and, in addition that, inasmuch as industrial training, and technical instruction intimately affect trade and commerce, these branches of education ought to be viewed from the National rather than from the Provincial standpoint.

Believe me,

Very sincerely yours,

(Sgd.) WALTER SCOTT.

HON. W. L. MACKENZIE KING, C.M.G.,
Minister of Labour,
Ottawa, Ontario.

Reply from the Premier of Alberta.

EDMONTON, ALTA., Dec. 28, 1909.

Dear Sir,—I am instructed by the Hon. Premier Rutherford to acknowledge receipt of your letter of the 13th, in reference to the advisability of the Dominion Government appointing a Royal Commission to inquire into the needs and present equipment of the Dominion as respects Industrial Training and Technical Education.

I am directed by the Premier to say that this project meets with the hearty endorsement and approval of his Government.

Yours faithfully,

(Sgd.) M. J. McLEOD,
Clerk, Executive Council.

HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa, Ont.

Reply from the Premier of British Columbia

VICTORIA, January 15, 1910.

HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa, Ont.

Dear Sir,—I beg to confirm my telegram to you of January 10, as follows:—

“Owing to absence of Minister of Education with whom I wished to confer, regret being unable reply sooner to your favour regarding Technical Education. He has now returned and an answer will be sent you promptly.”

Having since then had an opportunity of consulting with the Minister of Education, I beg to state that the appointment of a Commission by the Dominion to inquire into the subject of Industrial Train-

ing and Technical-Instruction meets with the approval of this Government.

It is not the intention of the Government of this Province to take exception to the course you propose on any grounds of jurisdiction.

I might add that this Government will gladly afford any facilities in its power to assist in carrying out the object in view.

Yours very truly,

(Sgd.) RICHARD MCBRIDE.

THE COMBINES' INVESTIGATION BILL.

IN the House of Commons, on January 18, the Honourable W. L. Mackenzie King, Minister of Labour, moved for leave to introduce Bill No. 101 to provide for the investigation of Combines, Monopolies, Trusts and Mergers which may enhance prices or restrict competition to the detriment of consumers; and in so doing furnished to the House an outline of the proposals which are contained in this Bill, as well as a brief statement of the reasons which have led to its preparation. On the conclusion of the Minister's remarks the Bill was read a first time. In proposing the motion the Minister spoke as follows:

Explanation by the Minister.

“The somewhat lengthy title of this Bill may help to explain its scope and purpose. The short title is the Combinations' Investigation Act. As human ingenuity has devised a great many forms of combination for the purpose of affecting an increase in prices, or the restriction of competition, an effort has been made in this measure to give a definition of the word ‘combine’ sufficiently comprehensive to embrace all forms of combination which may have this effect, and in particular to make it clear that this measure shall have reference to all such forms of combination as are popularly known as monopolies, trusts, mergers and combines. This legislation differs in some particulars from legislation of a like nature which has been introduced in other countries, in that it is not aimed against combines or mergers as such,

but rather against the exercise on the part of combines, mergers or monopolies, in an unfair manner, of the powers which they may get from that form of organization. This is an age of organization and not merely of local or national competition but of world-wide competition, and any industry or any nation which wishes to hold its own in the field of competition must do much in the way of perfecting organization. A highly organized industry should, from the facilities it has of improving production, lead to greater efficiency and economies of one kind and another, which should, on the whole, benefit the consuming public. But, we know that in other countries, and possibly also in this country, organizations have not always used their corporate powers primarily to the advantage of the consumers but have taken, in some cases, possibly, an unfair advantage to themselves. This measure seeks to afford the means of conserving to the public some of the benefits which arise from large organizations of capital for the purpose of business and commerce. It is organized society which alone makes the organization of capital and industry possible, and the people have a right to expect, and to look to the government to see that their rights shall be conserved and that their liberties shall not be curtailed by privileges which they permit others to enjoy.”

Mr. R. L. BORDEN. “Who is to initiate the investigation?”

Mr. KING. “Perhaps it would be well if I were to explain somewhat in

detail the procedure suggested by this measure. It is provided that the Act shall be under the Minister of Labour, and that in connection with the administration of the Act a Registrar of Boards of Investigation shall be appointed."

"In all measures of this kind that affect private interests and at the same time public rights, there are two factors which have to be kept constantly in mind. There is first in all legislation of this kind which affects private interests and public rights, a desirability of securing the minimum of interference with private business where that business is conducted in a fair and proper way and on the other hand the desirability of providing a ready and efficient means for individuals or the public to secure their due rights where these rights are interfered with or encroached upon by any corporation. These two objects, have, it is hoped, been kept in mind in the drafting of this measure. It is believed that the Bill as introduced will afford a ready and convenient means whereby parties who have reason to believe that any combination is unduly enhancing prices or unfairly restricting competition, may obtain an investigation, and an effective remedy against evils which may be found to exist. This, it is sought to obtain in the first place by providing that six or more persons who feel that a combine exists and that prices have been enhanced or competition restricted by reason of such combine to the detriment of the consumer, may make application to a judge of the high court for an order to grant an investigation. The judge may, if he so desires, call before him witnesses, but all that is necessary is for the judge to assure himself before granting such order that a prime facie case has been made out. The judge, if satisfied there is reasonable ground for believing that a combine exists which is injurious to trade or which is operating to the detriment of consumers, and that it is in the public interest an investigation should be held, he may direct or rather shall direct an investigation under the provisions of this Act. When the judge issues an order for an investigation the order is to be directed to the minister, who is therefore to call each

of the parties concerned to name a member on the Board of Investigation. The Act in this particular proceeds along lines somewhat similar to the procedure under the Industrial Disputes Investigation Act. The parties who have made the complaint are called upon to name a representative on this Board of Investigation, the parties concerned in the alleged combine are called upon to name a representative on their behalf, and the two gentlemen thus chosen are given opportunity of conferring together with a view of selecting a third person (who must in this particular case be a judge) to act as chairman of the Board of Investigation. Failing agreement the Minister appoints the chairman. The Board thus constituted shall have all the powers of a court of record; it shall have power of summoning witnesses, of ordering the production of documents, of taking evidence on oath. When the Board has duly investigated the matters before it, it is the duty of the Board to draw up a report and submit that report to the Minister who is obliged to give it publicity by publishing it in the *Canada Gazette*, by sending copies to the parties concerned, by distributing copies to the press if so desired, and by supplying copies to any other parties who may make application. Perhaps it would be well to read the section which refers to the Board of Investigation:

"The Board shall expeditiously and fully and carefully inquire into the matters referred to it and all matters affecting the merits thereof, including the question of whether or not the price or rental of any article concerned has been unreasonably enhanced or competition in the supply thereof unduly restricted in consequence of a combine, and shall make a full and detailed report thereon to the minister, which report shall set forth the various proceedings and steps taken by the Board for the purpose of fully and carefully ascertaining all the facts and circumstances connected with the alleged combine, including such findings and recommendations as in the opinion of the Board, are in accordance with the merits and requirements of the case."

"There are certain classes of evils in

the remedying of which it is believed publicity is more effective than penalty. It may not be that publicity will in all cases prove an effective remedy, but certainly in industrial matters it has many times in the past proven to be effective. While this Act provides machinery of a nature calculated to let in the light on the workings of these large corporations when it is believed they are operating in a manner unfair to the consumer, and while it is believed that much good will be accomplished in this way, the legislation does not rely entirely upon publicity to bring about the desired remedy. There are other remedies proposed, and one is the remedy already existing in connection under other legislation with respect in certain cases to such articles as are protected by the tariff. The statute in this particular gives authority to the Governor in Council where the Board reports that prices have been unduly enhanced or that competition is being unfairly restricted in virtue of the protection given to a particular article to reduce the tariff on that particular article or to remove the duty altogether.

"Then, there is another class of combination which it is hoped this measure may be the means of preventing. I refer to the case of persons holding patents and who exercise their exclusive rights and privileges to restrict competition. In section 22 of the Act, there is this provision:

"In case the owner or holder of any patent issued under the Patent Act has made use of the exclusive rights and privileges which, as such owner or holder he controls, so as unduly to limit the

facilities for transporting, producing, manufacturing, supplying, storing or dealing in any article which may be a subject of trade or commerce or so as unduly to restrain or injure trade or commerce in relation to any such article or unduly to prevent, limit or lessen the manufacture or in relation to any such article or unduly to enhance the price thereof, or purchase, barter, sale, transportation, storage or supply of any article, such patent shall be liable to be revoked."

"The clause then sets forth the steps that may be taken for the revoking of the patent where an adverse report has been made by a Board in such a case.

"Then there is a further clause which provides that where a Board finds any combination has been guilty of enhancing prices or unfairly restricting competition to the detriment of the consumers, if the guilty parties or corporations persist in the conduct which has been reported against, they shall be guilty of an indictable offence and liable to a penalty not exceeding \$1,000, and costs, for each day that they continue to offend after the expiration of ten days from the date of publication of the report of the Board in the *Canada Gazette*. These are the main features of the measure. A good part of the Bill is taken up with the setting out the machinery for investigation, a part of it relates to the meetings of the Board, the remuneration and expenses of the Board and the taking of evidence, and there are a few miscellaneous clauses. I think, however, what I have said will be sufficient as an outline of the Bill."

PARLIAMENTARY REVIEW OF BILLS, MOTIONS, DEBATES, ETC., AFFECTING LABOUR.

ELSEWHERE in the present number of the *Labour Gazette* reference has been made to the introduction, on January 18, by the Minister of Labour of a Bill to provide for the investigation of Combines, Monopolies, Trusts and Mergers, which may enhance prices or restrict competition to the detriment of consumers; and to an important announcement which was made by the Minister

of Labour, in the House of Commons, on January 28, of the Government policy in respect of the appointment of a Commission of inquiry on the subject of Technical Education.

Hours of Labour on Public Works.

A special committee of the House of Commons, appointed to report on Bill No.

21,—An Act respecting the Hours of Labour on Public Works, held meetings on January 21, and on January 26, Professor O. Skelton, of Queen's University, attending at both meetings of the Committee; and giving evidence in respect of legislation in other countries on the subject of hours of labour.

Some 3,000 copies of the Bill were also sent out by the clerk of the committee with a circular letter to Trades and Labour organizations throughout Canada, Farmers' Institutes, Stock Breeders' and other Agricultural Associations, Boards of Trade and Chambers of Commerce, Transportation and Marine companies, Manufacturers and others. In this circular it was stated that the special committee was desirous of obtaining all the information possible on the question, and of hearing the views of all parties interested. Some 600 replies have already been received, as follows:—

Manufacturers.....	475
Boards of Trade.....	29
Transportation and Marine Companies.....	8
Trades and Labour organizations . . .	54
Farmers' Institutes, Stock Breeders' and other Agricultural Associations.....	34

On the conclusion of Professor Skelton's evidence, officers of the Department of Labour and witnesses will be heard before the committee on behalf of the various interests affected by the proposed legislation.

Fatal Accidents on the Transcontinental Railway.

A statement was presented to the House of Commons, on January 26, in the form of a return of fatalities which have occurred in the construction of the National Transcontinental Railway during the past three years through the use of explosives. The statement in question showed that, in all, 114 fatalities have occurred, as follows:—

DISTRICT "A"

1907.....	0
1908.....	2
1909.....	9

DISTRICT "B"

1907.....	3
1908.....	12
1909.....	2

DISTRICTS "C" & "D"

.....	0
-------	---

DISTRICT "E"

1907.....	0
1908.....	0
1909.....	9

DISTRICT "F"

1906-07.....	13
1907-08.....	35
1908.....	27
1909.....	2

It would appear from the return that notice was sent by the Commissioners of the Transcontinental Railway to contractors and sub-contractors, directing that the attention of workmen should be called to the risk which is involved in the handling of dangerous explosives. The commissioners also sent Dr. J. F. Donald, an expert analyst and assayist, to report on the use and the quality of the explosives employed in District "F". He reported the principal causes of the accidents as careless or ignorant handling of the explosives, and stated that, but little fault, could be found with the quality of the explosives. It would further appear that when accidents have occurred a report has been at once made by the resident engineer to the district engineer, giving the name of the victim and the probable cause of the accident. The contractor also invariably notified the coroner for the district, who looked into each case and held an enquiry if he deemed the same necessary. In the Province of Quebec enquiries were held by the coroner in all cases.

FAIR WAGES SCHEDULES AND FAIR WAGES CLAIMS.

ON January 7, a cheque for \$20.45 was received in the Department of Labour from the firm of Peter Lyall & Sons, Montreal, in settlement of a claim preferred by Mr. Thomas Dunlop, of Montreal Annex, Que., against that firm for work performed by him as a carpenter on the erection of the Montreal Post Office Annex. This claim had been previously investigated and reported upon by one of the Fair Wages Officers of the Department of Labour. The sum in question was duly transmitted to Mr. Dunlop, and was accepted by him in full settlement of the claim. The amount due Mr. Dunlop, as ascertained by the Fair Wages Officer, represented the difference between the rate of twenty-five cents per hour, which he received during a period of 409 hours and the rate of thirty cents per hour provided for this class of labour in the Fair Wages Schedule of the contract.

On January 21, an Express Money Order for \$12.70 was received in the Department from the firm of Peter Lyall & Sons, Montreal, in settlement of a claim preferred by Mr. Jas. Walton of Verdun, Que., against that firm for work performed by him as a carpenter on the erection of the Montreal Post Office Annex. This claim had been previously investigated, and reported upon by one of the Fair Wages Officers of the Department of Labour. The amount above mentioned

represented the sum due Mr. Walton, as ascertained by the Fair Wages Officer, being the difference between the rate of twenty-five cents per hour, which he received during the period of his employment, and the rate of thirty cents per hour, which was provided for this class of labour in the contract. The Money Order was duly transmitted to Mr. Walton, and was accepted by him in full settlement of the claim in question.

Fair Wages Schedules.

During the month of January, the Department of Labour prepared, at the request of the Departments concerned, Fair Wages Schedules for insertion in contracts for various public works, as follows:—

Construction of buildings on Prince Edward Island Railway from Harmony to Elmira.

Construction of a derrick scow for the Sault Ste. Marie Canal.

Construction of an addition to the Eastern Departmental Building at Ottawa, Ont.

Construction of a pile protection pier at Winnipeg Beach, Man.

Construction of new vehicle shed, Ordnance Stores, London, Ont.

Work at Rockliffe Rifle Range, Ottawa, Ont.

PRICES AND THE COST OF LIVING—I. A MONTH'S STATISTICAL REVIEW OF WHOLESALE AND RETAIL PRICES TO BE ISSUED BY THE DEPARTMENT.

THE Department of Labour, in connection with its monthly review of industrial and labour conditions published as the leading article in each issue of the *Labour Gazette*, has for some time past dealt in a general way with the subject of prices, as reflecting current industrial and economic conditions throughout Canada, and as bearing on the cost of living. The unsatisfactoriness of general statements in such a matter, and the importance of the question to the commu-

nity, has led the Department to adopt a more comprehensive and systematic method of dealing with the subject, and for several months past arrangements have been in progress looking to the inauguration of a periodical statistical review of prices in the *Labour Gazette*.

In dealing with the subject of prices, it is necessary to differentiate sharply between wholesale and retail. The former being much more sensitive than the latter, are especially valuable as indicat-

ing current industrial and trade sentiment; whereas the latter more directly reflect the cost of living to the individual.

Retail Prices.

As the cost of living varies to a degree according to local conditions, the Department will publish from month to month, hereafter a table showing the prices of thirty-four commodities which enter largely into the cost of living at the more important centres of population throughout Canada. The reader is referred to the first article of this series which appears on a subsequent page of the present issue, from which full details as to the nature, and scope of the article may be ascertained. In order to permit of generalization, an average for the several localities will be struck and a carefully prepared budget applied thereto, by means of

which comparisons from month to month on a general scale may be possible.

Wholesale Prices.

From the standpoint of wholesale prices it is the intention of the Department, to publish from month to month in future a summarized tabular statement showing the price tendencies, of some 225 commodities which enter largely into the trade of the country and which may be considered as reflecting the more important phases of its industrial activity. Publication of this monthly summary will be begun in the March issue of the *Labour Gazette*, and a full explanation will be made on that occasion with regard to the articles covered, sources of information, etc. The method of index numbers will be applied in order to render comparisons possible from month to month.

PRICES AND THE COST OF LIVING.—II. SPECIAL INVESTIGATION BY THE DEPARTMENT INTO THE COURSE OF WHOLESALE PRICES IN CANADA DURING THE PAST TWENTY YEARS.

IN order to insure that the monthly analysis of wholesale prices above referred may be constructed on a proper basis, and in view also of the widespread interest at present prevailing in the subject of prices and the cost of living in Canada, the Department began early in the year 1909, an extended investigation into the course of wholesale prices from the year 1890 up to the present time. The results of this investigation, which has involved a great deal of research are now in the press and will be issued at as early a moment as possible in the form of a special report.

The investigation which was extended so as to cover some 225 commodities is divided into the following subdivisions:

1. Grains and fodder.
2. Animals and meats.
3. Dairy produce,
4. Fish,
5. Other foods, groceries, etc.
6. Textiles,—woollens, cottons, silks, linens, jutes.
7. Hides, leather, boots and shoes,
8. Metals and implements,

9. Fuel and lighting, }
10. Building material,
 - a Lumber,
 - b Other building material,
 - c Builders' hardware,
 - d Paints, oils and glass,
11. House furnishings:
 - a Furniture,
 - b Crockery and glassware,
 - c Cutlery and silver plated ware,
 - d Kitchen furnishings.
12. Drugs and chemicals.
13. Miscellaneous, including furs, liquors and tobacco, rope, soap, etc.

In the case of each commodity quoted under the above headings, numbering over 225 in all, a table showing the actual wholesale price obtaining at the governing market in Canada on the opening market day of each month from the year 1890 until the close of 1909, will be given in the report. In a following division, a series of tables of "relative" prices is given, in which the average yearly prices shown for each article in the first series of tables is expressed in percentages of the average price of each

commodity during the decade 1890-1899. Following this a number of charts will set forth in a graphic way the course of prices of the more important commodities during the twenty year period both singly

and in combination with other related commodities in the accompanying matter. An analysis of the more important results shown is given, with a full explanation of the methods of calculation employed.

PRICES AND THE COST OF LIVING—III. RESULTS OF A SPECIAL INVESTIGATION BY THE DEPARTMENT INTO THE WHOLESALE PRICES OF ANIMALS AND MEATS, 1890-1909.

FOR some years past, and especially since the beginning of the present century, one of the most important features of the general industrial and economic situation in Canada, as in several other countries, has been a continuous and pronounced advance in prices and the cost of living. The upward tendency seemed for a time to have reached its highest point in 1907, when prices attained a level in many instances unprecedented and in others equalled only under circumstances of a very special or exceptional character. The financial panic of the autumn of 1907, arrested this tendency and caused in many departments a recession during 1908. The check, however, proved to be but temporary. The comparative slightness of the effect it produced on prices, and the early recovery to the upward and buoyant tendency which had been previously so pronounced, constituted, in fact, one of the most noteworthy features in connection with the stringency in Canada. This became particularly marked with the increasing industrial activity and trade prosperity of 1909, in the closing months of which the high cost of living had become a subject of very widespread discussion, affecting as it did the immediate personal well-being of nearly every class in the community and especially those dependent upon a fixed rate of income. Since the opening of the present year, public interest has been still more intense. A large number of the trade journals and daily newspapers of the country have published special articles dealing with the subject in greater or less detail, and a number of investigations of varying character into the nature and causes of the phenomenon have been undertaken both on public and private initiative. It is safe

to say that no public question at the present moment equals in general interest, that of the abnormal cost of living.

The High Price of Meats.

Since the beginning of the present phase of the discussion perhaps the chief topic referred to by the press and by the public at large has been the high price of meats. Early in the month of January this aspect of the situation was made the subject of special investigation and action in the United States. In several of the larger cities in that country a systematic boycott against the use of meats was commenced, part being taken therein by several thousands of people. The movement spread to Canada and in the closing days of January similar action was discussed and in some cases resolved upon, in certain localities in Ontario, the object of the movement being primarily by way of protest against what was felt to be an undue enhancement of prices in this important class of commodities.

Special Investigation by the Department.

In view of the interest attaching to this branch of the subject the Department has decided to publish in advance the part of the special report on wholesale prices during the past twenty years described in the preceding article, relating to animals and meats, that is, Part II, in order that this information may be of the greatest possible assistance in connection with the discussion now in progress.

The commodities covered in this part of the investigation, the unit of measurement adopted, and the wholesale market selected as the most representative of conditions prevailing throughout the country are as follows:—

Commodity.	Quantity.	Market.
English, boneless breakfast bacon	per lb.	Montreal.
Beef, dressed	per cwt.	Toronto.
Cattle, Western, prime, off cars	"	Winnipeg.
Cattle, butchers', choice steers	"	Toronto.
Fowls	per lb.	Montreal.
Hams, smoked, medium size	"	Montreal.
Hogs, choice, selects, f.o.b.	per cwt.	Toronto.
Hogs, dressed	"	Toronto.
Lard, pure, in tiers	per lb.	Toronto.
Mutton, dressed	per cwt.	Toronto.
Pork, heavy Canada short cut mess	per bbl.	Montreal.
Sheep, export ewes	per cwt.	Toronto.
Turkeys	per lb.	Montreal.
Veal, dressed	per cwt.	Toronto.

In the case of each of the above, the price on the opening market day of each month is quoted from a reliable authority back to January, 1890. In the case of dressed beef, dressed hogs, dressed mutton, and dressed veal, the record does not extend beyond 1903. This is owing to the fact that the wholesale meat trade of Toronto, which is represented in the quotations, has come into existence only during the past few years, nearly all the butchers having previously bought their animals on the hoof and either slaughtered them themselves or had them slaughtered in a common abattoir.

The tables are for the most part self-explanatory. The average price for the year being worked out enables the record for each commodity to be followed with considerable clearness.

Following the tables of actual prices is a table of "relative" prices or index numbers, in which the several commodities are grouped together for purposes of comparison

and combination. The statistics set forth in this table show for each commodity the percentage which the average price of the commodity from year to year was of the average prevailing during the decade 1890-1899. Thus in the case of bacon, the number 146.0 under the heading of 1908, means that the average price of bacon during that year was forty-six per cent. higher than the average price of bacon during 1890-1899. In a similar way bacon in 1906, is shown to have been 15.4 per cent. lower in price than during the decade 1890-1899.

In order to show at a glance a number of the important combinations that may be worked out from the table of relative prices a chart is added, where a line is traced for cattle and beef, fowl and turkeys, hogs and hog products, sheep, tallow and mutton, and for all of these in combination.

Combining all of the animals and meats included in the investigation it will be seen that during the year 1909, prices were approximately forty-eight per cent. higher than during the ten-year period 1890-1899, and that compared with 1906, they were fully seventy-seven per cent. higher.

A series of articles reviewing the several groups of the Department's investigation into wholesale prices, will be published from time to time in the *Labour Gazette* during the coming year, though, as above stated, it is the intention that the full report be placed before the public in a few weeks' time.

WHOLESALE PRICES, CANADA, 1890-1909.—II. ANIMALS AND MEATS.

ENGLISH, BONELESS, BREAKFAST BACON.

(Average Price 1890-1900 = 100)

THE CANADIAN CONSERVATION COMMISSION—INAUGURAL MEETING! HELD AT OTTAWA.

THE first annual meeting of the Canadian Commission for the conservation of natural resources was held at Ottawa, January 18-21, with a full attendance of members, representing every Province in the Dominion.*

A feature of the meeting was the inaugural address of the Chairman, the Hon. Clifford Sifton, on the opening day of the convention.

Inaugural address of the Chairman, Hon. Clifford Sifton.

At the outset of his address, the Chairman noted that the commission met under the mandate of Parliament as an independent body, national in its constitution, to undertake in an advisory capacity the great work of collecting and tabulating information as to the natural resources of the Dominion, and advising upon measures which would make for the conservation of these resources for the present and for future generations. Its work, therefore, must be undertaken in a thorough and scientific manner, and its recommendations based on authority, and disinterestedness. In the framing of legislation constituting the commission every care had been taken to avoid any risk of interference with the rights of Provinces. In accepting the position of chairman, Mr. Sifton stated that he had determined to withdraw from all participation in party political affairs and proposed to adhere rigidly to this rule.

After referring to the magnitude of the work before the commission the Chairman noted that it was in many respects more favourably situated than the United States to adopt a wise and prescient policy of conservation. The great bulk of forest lands and water powers of the country were still vested in the Crown, whereas in the United States they were held in most part by vested interests.

Outlining the policy that should be

adopted by the commission the Chairman noted that the first great work should be the making of a complete and thorough *inventory* of natural resources, thus enabling discrimination of information for public use and laying the basis for an intelligent and comprehensive Government policy of conservation. It was not the function of the commission to stand in the way of development, but rather to assist it in every way possible.

Dealing briefly with some of the practical reforms that might be inaugurated, he noted that in the exploitation of the *mineral resources* of the Dominion there was great scope for scientific development to prevent waste and to secure a more economic development of resources. In 1905, the mineral production of Canada was twenty and a half millions. In 1908, it had increased to no less than eighty-seven millions. But exclusive of the Yukon this development had taken place practically only in settled portions of the country. By far the greater portion of the Dominion remained unprospected. Great bodies of minerals known to exist were at present useless because of lack of effective means of treatment. The electric smelting process, in the investigation of which the Canadian Government had taken the lead, promised an enormous development for the iron ore deposits of Ontario. At Cobalt wasteful methods of mining prevailed and in British Columbia there was failure to save valuable mineral contents such as zinc, in the treatment of copper ores. The fatality record in mining accidents was stated to be one of the worst in the world and there was urgent and immediate need of effort to protect the lives and the health of mining people.

The *fisheries* gave ample scope for the efforts of the commission in assisting to secure the adoption of policies which would more effectively secure and conserve the fish supply.

On the subject of *public health* it was pointed out that while the Dominion

*For statements re the organization of the Commission see the *Labour Gazette* for June, 1909, page 1337, and for August, 1909, page 287.

spends great sums on work of eradicating the diseases of animals, similar attention is not given to the diseases of human beings. A sub-committee of the commission might work in developing a plan for dealing with the cure and prevention of tuberculosis. At present the pollution of rivers and streams was being dealt with only in a partial, perfunctory and haphazard manner.

The water supply for domestic use, for the promotion of fertility of soil, for navigation, and for power, was a universally necessary national resource. It could be conserved and improved by proper treatment, such for instance as methods of cultivation which tended to prevent rapid run off, the preservation of forest growth and construction on a large scale, by the federal Government at the headwaters of the Ottawa. If a proper policy were adopted with regard to the *conservation of water and waterpowers* the masses of the people would never be required in future to pay toll to monopolies upon a continually growing unearned increment. The water powers of Canada, he said, were roughly estimated as capable of a possible development of nearly seventeen million horsepower.

In *forestry* great strides had been made in the past few years, and universities were now turning out trained foresters. Regulations for cutting calculated to conserve and improve merchantable timber, should be adopted. Relentless war should be waged against the present destruction of the forest. Fertility of soil, regularity and volume of stream flow, climatic moderation as well as timber supply depended upon prevention of fire losses. Two great reserves should be created immediately; the first one on the east slope of the Rocky Mountains, embracing all forest lands. This reserve is already in process of formation by the Dominion which will bring in a bill for that purpose shortly. A second reserve should embrace all Provincial Government lands south of the height of land, and extending from Sudbury to the neighborhood of Port Arthur, except such portions along the railways as are fit for cultivation. Pre-

vention of forest fires from railway locomotives was the most important first step, the present situation in this respect being intolerable.

In *agriculture* conservation of the fertility of the soil outweighed all other subjects.

Concluding, Mr. Sifton emphasized the advantageous position in which Canada stood at the present time. "Having overcome the initial difficulties," he said, "we have laid the foundations for national progress, and are now on the eve of great expansion and prosperity. The least study of conditions will make it clear that we shall soon see a great influx of capital, especially from the United States. It will come to acquire our sources of wealth. It will acquire in order to monopolize. It is our duty to provide in advance, against this by so amending all organic laws that no matter who acquires the ownership, the people will not be deprived of their control, nor of their fair share of the wealth, produced from them in the future."

By order of the commission the chairman's address will be printed for distribution.

The commission during the opening day of the convention visited the Chaudiere dam, and the works of the J. R. Booth Company, the E. B. Eddy Company, and the Ottawa Electric Company.

Second day's proceedings.

On the second day of the convention, January 19, the proceedings were confined to the reading of the following addresses:—

Dr. B. E. Fernow, Dean, Faculty of Forestry, University of Toronto, Toronto—Forestry.

Hon. Jules Allard, Minister, Department of Lands and Forests, Quebec—Forestry and Water Powers in Quebec.

Dr. J. W. Robertson, C.M.G., Ste Anne de Bellevue, Quebec—The Conservation of Agricultural Resources.

Dr. Eugene Haanel, Director, Mines Branch, Department of Mines, Ottawa—Possible Economies in Production of Minerals of Canada.

Hon. Adam Beck, M.P.P., London—

Hydro-Electric Developments in Ontario, developed and potential.

Kelly Evans, Commissioner, Ontario Game and Fisheries Commission Toronto—Fish and Game in Ontario.

Chas. R. Coutlee, C.E., Engineer-in-charge, Georgian Bay Canal Survey, Ottawa—The Conservation of Water and Hydro-Electric Potentialities in the Ottawa River Basin; with a general view of hydro-electric plants in Western Canada.

F. T. Congdon, M.P., Dawson—Fur-bearing Animals in Canada, particularly with reference to the measures that should be taken to prevent their extinction.

Dr. P. H. Bryce, Chief Medical Inspector, Department of Interior—Measures for the Maintenance and Improvement of the Public Health.

Dr. H. T. Gussow, Botanist, Central Experimental Farm, Ottawa—Diseases of Forest Trees (with lantern slides).

Dr. C. Gordon Hewitt, Entomologist, Central Experimental Farm, Ottawa—Insects Destructive to Canadian Forests (with lantern slides).

Third day's proceedings.

The third day of the convention was devoted to a discussion of organization, and the appointment of committees on Lands, Water Powers, Mines, Forest, Fisheries, and Public Health. The various committees appointed held further meetings for the discussion of the work in hand.

PENSION FUND FOR EMPLOYEES ESTABLISHED BY THE MICHIGAN CENTRAL RAILWAY COMPANY.

ON January 1, 1910, a pension arrangement went into effect for employes of the Michigan Central Railway Company who through age or disability are or may become unable to continue longer in the service.

In a pamphlet issued by the Company describing the operation of the fund, the president of the company makes the following introductory statement:

"The success of the Company is dependent largely upon two facts, viz., wise and conservative management by its Board of Directors and officers, and loyal and efficient service and co-operation on the part of the men in the ranks. I trust that the establishment of this pension plan, entirely at the expense of the Company, will be accepted as an expression of faithful, efficient service in the past and as an incentive for renewed effort to make the service rendered the public still more efficient and valuable."

Rules.

The rules for the operation of the pension department provide for the annual appointment by the President of a board of eight, whose duties are to administer

the fund and to determine the eligibility of employes to receive allowances. All employes of the Company on attaining the age of seventy years are to be retired, those of them who have been continuously in the service for, at least, ten years preceding retirement, to be eligible for pensions. An employe who has been twenty years in continuous service and who becomes unfitted for duty, may also be retired on pension. Examination by a physician appointed for the purpose is required in the case of employes less than seventy years of age applying for retirement. The allowance made is one per cent. of the average monthly pay received for the ten years immediately preceding retirement. The Company, however, reserves the right to establish a lower basis should the system involve an expenditure of more than \$56,000 per annum, the sum which has been fixed by the directors as the maximum amount at present available for the purpose. The allowances are to be paid monthly, but may be withheld in cases of gross misconduct. The arrangement includes all employes of railroads owned, leased, or operated by the Company. Employment on any of the so-called New York Central lines also renders an

employé eligible for pension. Leave of absence, suspension for discipline or temporary lay-off (not exceeding one year) is not considered a break in continuity of service. Employés leaving the service, however, and being subsequently re-engaged are regarded as new employés for the purpose of the pension system. The acceptance of a pension does not debar a retired employé from engaging in business, but he is not allowed to re-enter the service. The assignment of pensions is not permitted. The establishment of the system does not confer any right on an employé to be retained in the service, or any right or claim to a pension, the Company expressly reserving its right

and privilege to discharge from its service any employé at any time without liability for pension.

In the statement accompanying the above rules in the pamphlet issued by the Company the following announcement is added:

"It is hoped that it will be found possible in the future to make more liberal provision than the present plan permits, especially for those who receive the lowest compensation. To this end, we ask the hearty co-operation of every employé in everything that will promote the prosperity of the road, as upon this prosperity depends the ability of the Company to make such increase."

RETAIL PRICES OF STAPLE ARTICLES OF CONSUMPTION, CANADA, JANUARY, 1910.

THE accompanying table sets forth the retail prices prevailing on or about the fifteenth day of January, 1910, of the more important staple commodities entering into the cost of living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement is given of the rental of a representative workingman's dwelling of the better class in the quarter of each locality usually occupied by workmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care has been taken to ensure that the quotations in each case refer to exactly the same class of commodity, in order that the statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people and is representative of every Province in the Dominion.

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the respective localities, under detailed instructions as to sources of information, quality of goods to be quoted, etc., from the Department.

It is the intention of the Departments to publish quotations for a similar list of commodities from month to month hereafter in the *Labour Gazette*. It will be possible in this way to note directly the more important changes in retail prices and the cost of living affecting a considerable portion of the community. By the employment of averages, and the application of a carefully selected workingman's budget to the statistics, some interesting comparisons and generalizations will be rendered possible and will be included in future issues. The Departments' initial endeavour, however, will be to secure complete accuracy in its quotations.

RETAIL PRICES OF STAPLE

LOCALITY.	Beef.		Veal, fore quarter, per lb.	Mutton, hind quarter, per lb.	Pork.		Bacon, best, smoked per lb.	Fish, fresh, good quality, per lb.	Lard, pure leaf per lb.	Eggs.		Milk, per qt.	Butter.		Cheese, Canadian per lb.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

British Emigration Returns.

During the month ended November 30, 1909, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

Nationality.	1909	1908
English.....	2,164	1,509
Welsh.....	51	15
Scotch.....	502	371
Irish.....	131	87
British Colonial.....	61	35
Total British subjects.....	2,909	2,017
Foreign.....	1,990	686
.....	4,899	2,703

During the month ended December 31st, 1909, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING DECEMBER, 1909-1908.

Nationality.	1909.	1908.
English.....	1,564	886
Welsh.....	19	5
Scotch.....	468	239
Irish.....	36	31
British Colonial.....	31	15
Total British subjects.....	2,118	1,176
Foreign.....	1,326	787
Total.....	3,444	1,963

During the calendar year ended December 31, 1909, the number of passengers leaving the United Kingdom, as above, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING CALENDAR YEAR 1909.

Nationality.	1909.	1908.
English.....	59,071	56,490
Welsh.....	1,190	1,308
Scotch.....	18,464	16,705
Irish.....	4,109	4,088
British Colonial.....	3,109	2,730
Total British subjects.....	85,943	81,321
Foreign.....	27,372	14,107
Total.....	113,315	95,428

Homestead Entries During December, 1909.

The following statement shows the number of homestead entries made during the month of December, 1909, as compared with December, 1908.

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF DECEMBER, 1909, AS COMPARED WITH DECEMBER, 1908.

Agency.	1909	1908	In-crease.	De-crease.
Battleford.....	68	150	82
Brandon.....	6	7	1
Calgary.....	275	278	3
Dauphin.....	61	141	80
Edmonton.....	225	338	113
Estevan.....	44	29	15
Humboldt.....	95	169	74
Kamloops.....	13	27	14
Lethbridge.....	171	455	284
Moose Jaw.....	540	944	454
New Westminster..	3	2	1
Peace River.....	8	8
Prince Albert.....	74	93	19
Regina.....	39	77	38
Red Deer.....	88	128	40
Saskatoon.....	201	201
Winnipeg.....	76	90	14
Yorkton.....	85	127	42
Total.....	2,072	3,105	225	1,258

It will be seen that there has been a net decrease for December, 1909, of 1,033 in the number of entries made.

A statement of the entries made according to months during the calendar year 1909, compared with the calendar year 1908, is as follows:—

HOMESTEAD ENTRIES DURING CALENDAR YEAR 1909-1908.

Month.	1909.	1908.	In-crease.	De-crease.
January.....	1,308	1,453	145
February.....	1,364	1,420	56
March.....	2,592	1,869	723
April.....	4,602	2,987	1,615
May.....	3,243	2,773	470
June.....	4,205	3,247	958
July.....	4,248	2,815	1,433
August.....	2,832	1,859	973
September.....	2,902	7,934	5,032
October.....	3,550	5,221	1,671
November.....	4,143	3,876	267
December.....	2,072	3,105	1,033
Total.....	37,061	38,559	6,439	7,937

It will be seen that there has been a net decrease of 1,498 in the number of homestead entries made during the calendar year 1909, as compared with the calendar year 1908.

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE CALENDAR YEAR, 1909, AS COMPARED WITH CALENDAR YEAR 1908, ACCORDING TO AGENCIES.

Agency.	1909.	1908.	In-crease.	De-crease.

Total.....	37,061	38,559	6,573	8,071

Nationalities of Homesteaders.

The nationalities of homesteaders during the month of December, 1909, as reported by the several agencies of the Department of the Interior in Manitoba, Saskatchewan, Alberta and British Columbia were as follows:—

Nationalities.	No. of Entries.
Canadians from Ontario.....	190
" Quebec.....	29
" Nova Scotia.....	7
" New Brunswick.....	6
" Prince Edward Island.....	4
" Manitoba.....	63
" Saskatchewan.....	252
" Alberta.....	58
" British Columbia.....	6
Persons who had previous entry.....	104
Newfoundlanders.....
Canadians returned from the United States...	21
Americans.....	573
English.....	293
Scotch.....	76
Irish.....	32
French.....	12
Belgians.....	6
Swiss.....	3
Italians.....
Roumanians.....	3
Syrians.....
Germans.....	32
Austro-Hungarians.....	159
Hollanders.....	3
Danes (other than Icelanders).....	4
Icelanders.....	5
Swedes.....	35
Norwegians.....	36
Russians (other than Mennonites and Doukhobors).....	59
Mennonites.....
Doukhobors.....
Chinese.....	1
Japanese.....
Persians.....
Australians.....
New Zealanders.....
Total.....	2,072

Representing 4,887 souls.

Of 594 entries made by persons coming from the United States, there were 221 from North Dakota, 110 from Minnesota, forty-two from Michigan, thirty-one from South Dakota, twenty-six each from Illinois and Wisconsin, twenty-five from Washington and twenty-one from Iowa.

The following is a statement of recent immigrant arrivals in Canada, classified according as they arrived through ocean ports or from the United States, from the beginning of the fiscal year up to December, 1909, inclusive:—

IMMIGRATION TO CANADA FROM APRIL TO DECEMBER, INCLUSIVE 1909

Ordinary labourers.....	.18 " 9 "

TRADE DISPUTES DURING THE MONTH OF JANUARY, 1910.

THERE were no interruptions to industry in Canada of a serious nature through new trade disputes during the month of January, and the only locality seriously affected was Springhill, N.S., where a strike of coal miners, which had begun on August 10, 1909, was still in existence. The situation there, however, showed an improvement over the previous month.

Analysis of Trade Disputes During the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada, during January, was five, a decrease of three compared with the previous month, but the same number as in January, 1909. About eleven firms and 1,836 employés were

Post Office Department.

During the month of January orders were given by the Post Office Department for the supplies below mentioned, subject to the regulations for the suppression of the *sweating* system, and the securing of payment to the workingmen and working women of fair wages and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	569.67
Making and repairing rubber dating stamps and type, also other stamps.....	85.50
Supplying stamping material and wooden boxes, and repairing stamping pads.....	990.95
Supplying mail bags.....	950.00
Repairing mail bags.....	1,815.80
Making post office scales.....	312.50
Making and repairing mail locks and supplying mail bag fittings.....	2,599.60
Supplying Railway Mail Clerks' tin travelling boxes, and repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes and parcel receptacles.....	220.75
Making and repairing miscellaneous articles of Postal Stores.....	9.50
Making and supplying articles of official uniform.....	8,606.90

affected by these disputes, two firms and ten employés being affected by the only new dispute which was reported during the month.

Loss of time in working days.—The loss of time to employés through trade disputes during January, was approximately 44,394 days, compared with a loss of about 45,730 days in December, and about 1,000 in January, 1909.

Trades affected by new dispute.—The one new dispute of the month affected ten employés in the building trades.

Locality affected by the new dispute.—The new dispute of the month occurred in the Province of Ontario.

Cause of dispute.—The cause of the new dispute of the month, was the refusal of the employers to grant a demand for an increase in wages.

Methods of settlement.—Of the five disputes in existence during January, one was terminated, leaving four still in existence at the end of the month. The dispute which was ended was settled without negotiations, the demands of the men being granted by one firm, and the places of the strikers being filled by the other.

Result of dispute.—In the dispute which was terminated, the strikers were partially successful, their demands in some cases being granted.

Disputes Which Commenced Prior to the Beginning of the Month.

The trade disputes in existence in Canada during January, which commenced in previous months, comprised strikes of coal miners at Springhill, N. S., leather workers at Ottawa, Ont., carpet weavers at Guelph, Ont., and tailors at Vancouver, B. C.

Strike of Coal Miners at Springhill, N. S.

A strike of 1,700 coal miners at Springhill, N. S., which began on August 10, 1909, on account of the refusal of the Company to grant a demand for recognition of the union, an increase in wages, and certain changes in conditions of employment, continued throughout January, no settlement being reached. It was reported, however, that mining operations were renewed in one mine, a number of men having been secured to take the places of the strikers.

Strike of Leather Workers at Ottawa, Ont.

The situation with regard to a strike of seventy-two leather workers at Ottawa, Ont., which began on October 14, remained unchanged, no settlement being reported. The cause of the dispute was the refusal of four firms to grant a demand of the men for a general increase of ten per cent. in their wages.

Strike of Carpet Weavers at Guelph, Ont.

A strike of twenty-eight carpet weavers at Guelph, Ont., which began on Decem-

ber 11, continued throughout January, but it was reported that the Company had procured ten men from England to take the places of the strikers. The cause of the dispute according to the employers, was the refusal of the men to work overtime or on Saturday afternoons, but according to the men the causes were the refusal of the employers to pay extra for overtime, and general dissatisfaction with the working conditions.

Strike of Tailors at Vancouver, B. C.

No settlement was reported in the case of a strike of tailors at Vancouver, B. C., which began on October 4, but only three firms and fourteen employées continued to be affected, twenty-nine firms having granted the demand of the strikers for an increase in wages from \$18 to \$20 per week.

Strike of Cigar Makers at Brandon, Man.

A strike of six cigar makers was reported in the *Labour Gazette* for January, to have taken place at Brandon, Man., on December 7, but word has since been received from the firm involved that only four men went out, and that their action had no effect on the business of the factory.

New Dispute.

The only new dispute of the month was a strike of bricklayers at Toronto, Ont., which began on January 1, and affected two firms and ten employées. The cause of the dispute was the refusal of the employers to grant a demand for an increase in wages from fifty cents to sixty cents per hour. The schedule rate for build-ings is fifty cents, but an additional ten cents was claimed for sewer work. It was reported that the strike was terminated on January 27, one of the firms having granted the increase demanded, and the other having replaced the strikers with four non-union men.

The table published herewith is a compilation of the trades disputes of the Dominion of Canada, which began or were in

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES C, No. 112.

TABLE OF TRADE DISPUTES DURING THE MONTH OF JANUARY

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.				Date of termination.	Result.
			Directly.	Indirectly.	Directly.		Indirectly.			
					Indirectly.	Directly.	Males.	Females.		
<i>Mining</i> — Coal mining.....	Springhill, N.S.	For recognition of union and increase of wages and against conditions of employment...	1	1,700	Aug. 10	No settlement reported, but places of some strikers were filled, and operations were begun again in one mine.
<i>Textile Trades</i> — Carpet weavers....	Guelph, Ont.....	Demand of men for extra pay for overtime and general dissatisfaction with conditions..	1	28	12	Dec. 11	No settlement reported at end of month, but places of some strikers were filled.
<i>Clothing Trades</i> — Tailors.....	Vancouver, B.C.	For increase in wages from \$18 to \$20 per week.....	3	14	Oct. 14	No settlement reported at end of month.
<i>Leather Trades</i> — Leather workers ..	Ottawa, Ont.....	Demand for ten per cent. increase in wages.....	4	72	Oct. 14	No settlement reported at end of month.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JANUARY, 1910.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factory inspectors of the Province of Ontario, the Ontario Railway and Municipal Board and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statements of returns of accidents reported to them.

INDUSTRIAL accidents occurring to twenty-seven individual work people in Canada during the month of January, 1910, were reported to the Department of Labour. Of these, eighty-seven were fatal, and 184 resulted in serious injuries. In addition, one fatal accident was reported as having taken place prior to the beginning of the month, information not having been received by the Department before January, 1910.

In the preceding month there were 126 fatal and 218 non fatal accidents reported, a total of 344, and in January, 1909, there were sixty-six fatal and 164 non-fatal accidents, a total of 230. The number of fatal accidents reported in January, 1910, was therefore, thirty-nine less, than in the preceding month, and 21 more than in January, 1909. The number of non fatal accidents reported in January, 1910, was thirty-four less than in the preceding month and eighteen more than in January, 1909. Altogether there were seventy-three less industrial accidents reported in January, 1910, than in the preceding month, and forty-one more than in the same month of the preceding year.

Of 136 returns received during the month giving the ages of the victims of industrial accidents, eleven referred to persons under twenty-one years of age, forty-two to persons between twenty-one years and forty-five, and ten to persons over forty-five. Seventy-three persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING JANUARY, 1910, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	19	21	40

Total.....	87	184	271

Nature of Fatalities and Accidents.

The disasters of the month involving more than one fatality were, the derailment and wreck of a Canadian Pacific Railway train at Spanish river, near Webbwood, Ont., involving the loss of over forty lives, among whom were five railway employes, and two commercial travellers; and the killing of two loggers near Port Milford, Ont., by the falling of a tree.

Wreck of Canadian Pacific Railway passenger train near Webbwood, Ont.

On January 21, 1909, Canadian Pacific Railway train No. 7, composed of an engine, mail, baggage and express cars, second class coach, colonist, first class coach, diner and Pullman, was proceeding at a fair rate of speed towards Spanish river, which is crossed by an iron bridge, near Webbwood, Ont. The engine, mail, baggage and express cars had gone on the bridge, when for reasons still unascertained at the end of January, the second class coach, the colonist car, the first class car and the diner and the Pullman, were derailed, and went down the bank of the river. The wreck caused the loss of over forty lives, among which

were five railway employés and two commercial travellers.

Killing of two loggers at Port Milford, Ont.

On January 11, 1910, while two loggers were engaged felling timber in the woods, at Port Milford, Ont., a tree fell on them, their bodies being discovered by neighbours.

Records by Industries and Trades.

Agriculture.—During January, 1910, there were nineteen fatal and twenty-one non fatal accidents happening to persons engaged in this industry, compared with twenty-eight killed and twenty-one injured in the preceding month, and fourteen killed, and thirty-six injured in January, 1909. Of the fatal accidents, seven were due to exposure, three each to railways and to falling material, two to live stock, and one each to a fall, to heart failure, to a runaway and to machinery. Of the other accidents five each were due to machinery, and to falls, three each to runaways, to live stock, and to falling material, and one each to tools, and to railways.

Fishing and hunting.—Two trappers were seriously injured by the premature explosion of a cartridge. There were no accidents in December, last, and four fatalities in January, 1909.

Lumbering.—Eleven of these workers were killed, and seven injured in January, 1910, as against twelve killed, and twelve injured in December, 1909, and nine killed and eleven injured in January, of last year. Five of the fatalities were caused by falling material, four by machinery, and one each by railways, and by flying material. Four workmen were seriously injured by falling material, and one each by a fall, by machinery and by a tool.

Mining.—During January, 1910, eleven mine workers were killed, and nine injured, compared with eleven killed and fourteen injured in December, last, and five killed and four injured in December last, and five killed, and four injured in January, 1909. Falling material caused four deaths, being

frozen to death two, being caught between mine trains two, and drowning, a fall, and an explosion of dynamite, one each. Cars caused four serious injuries, falling material and falls two each, and an explosion one.

Building trades.—In this group death by accident befell two workers, while nine others were injured, against two killed and fifteen injured in the previous month and four killed and eleven injured in January, 1909. Falls caused the two fatalities. Four of the other accidents were caused by falls, two by falling material and one each by an explosion, and by an elevator.

Metal, engineering and shipbuilding trades.—There were five fatalities and thirty-five non fatal accidents, compared with sixteen killed and fifty injured in December last and three killed and twenty injured in January, 1909. Two each of the deaths were due to falling material, and to machinery, and one to molten metal. Of the other accidents thirteen were due to machinery, nine to falling material, five to flying material, four to falls and two each to explosions and to molten metal.

Woodworking trades.—In these trades a workman was killed by machinery, and six workmen were injured, four by machinery and one by falling material. The record for the preceding month was one killed and fifteen injured and for January, 1909, one killed and ten injured.

Clothing trades.—Machinery injured one and a fall another in January, 1910, compared with two injured in December, last and one injured in January, of last year. During January, 1910, a cotton mill worker was killed at Brantford, Ont. by being drawn into shafting, four other workmen were injured, two by machinery, and one each by a fall and by flying material. There were five injuries in December, 1909, and one injury in January, 1909.

Food and tobacco preparation.—Nine workers in this group were injured, three each by falls and by machinery, two by tools and one by molten metal. The record in December was one killed and eight injured, and in January, of last year, one killed and five injured.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN JANUARY, 1910.

Miner.....	Phoenix, B.C.....	" 23	1	Struck by rock from blast.
------------	-------------------	------	---	----------------------------

Leather trades.—A tanner fell into a boiling vat and was scalded to death, and machinery injured four other workmen during January. In the previous month there were no accidents, and in January, 1909, one workman was injured.

Railway service.—There were twenty-three railway employés killed, and twenty-nine injured in January, 1910, compared with fourteen killed, and twenty-nine injured in December, last, and eighteen killed, and twenty injured in January, 1909. Eleven of the fatalities were due to being run over, six to derailments, three to falls, two to collisions, and one to falling material. Seven of the other accidents were due to collisions, five each to falling material and to being run over, and three each to derailments, to being caught between cars, to collisions, and to an explosion of gasoline.

Navigation.—A cook on Canadian vessel off the coast of Nova Scotia was washed overboard and drowned. In the preceding month these were twenty-four killed, and three injured, and in January, 1909, two killed and five injured.

General transport.—One of these workers was killed, and nineteen others injured during January, 1910, compared with seven killed, and sixteen injured in December, and nine injured during

January, 1909. A piano fell on a piano-mover in Toronto, Ont., and killed him. Of the minor accidents ten were caused by collisions, seven by falls, and one each by a runaway and by falling material.

Public employés.—Falls injured two of the above workers, asphyxiation by gas one, being assaulted by a prisoner one. Thirteen were injured during December, and eight were injured in January, of last year.

Miscellaneous.—In this group three workers met death by accident and seventeen others were injured, as against six killed and four injured in December last, and four killed and eleven injured in January, a year ago. Two of the fatalities were due to a derailment, and one to a fall. Twelve of the non fatal accidents were due to an explosion of nitro-glycerine, three to falls and one each to being run over and to falling material.

Unskilled.—There were eight killed and seven injured in January, compared with four killed, and ten injured in the previous month, and one killed, and ten injured in January, 1909. Four of the deaths were caused by falling material, three by being run over and one by a fall. Four of the other accidents were caused by falls, two by falling material and one by being run over.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during the month of January, 1910.

DOMINION REPORTS.

Railway Statistics.

Railway Statistics of the Dominion of Canada, for the year ended June 30, 1909. Ottawa: King's Printer, 1909. Page, 252.

IN the report of the Comptroller of Statistics of the Department of Railways and Canals for the year ended June 30, 1909, it is stated that the mileage of railways in actual operation was 24,104, not including 675 miles of the new transcontinental railway, which was opened for traffic. This was an increase of 1,138 miles over the previous year. It was also estimated that on June 30 last, there were at least 3,300 miles of railway

under construction. In proportion to population the Dominion of Canada has the largest railway mileage of any country in the world, but in relation to its area it has the smallest.

The total capital liability of railways in Canada, increased from \$1,239,295,013 in 1908, to \$1,308,481,416 in 1909. Eliminating the capital liability of the uncompleted Grand Trunk Pacific Railway, and the mileage of the Government owned lines, the capital obligation amounted to \$55,638 per mile.

The railways of Canada carried 32,683,309 passengers, and 66,842,258 tons of freight in 1909, a decrease of 1,361,683 passengers, and an increase of 3,771,091 tons of freight compared with the previous year. The aggregate earnings of rail-

ways for the year were \$145,056,336.19, a decrease of \$1,861,977.42 compared with 1908, and the operating expenses were \$104,600,084.43, a decrease of \$2,704,058.08.

The accident returns showed that there were 478 persons killed and 1,404 injured by railways of Canada in 1909, representing an increase of twenty-nine in the number killed and a decrease of 943 in the number injured, compared with the previous year. Of the 19,443 trainmen employed in 1909, one in every 172 was killed and one in every twenty-eight injured. During 1909, seventy-six persons were killed and seventy-two injured at highway crossings.

On June 30, 1909, there were 125,195 employés in the service of Canadian railways, compared with 106,404 on June 30, 1908, and 124,012 in 1907.

The electric railways in Canada carried 314,026,671 passengers in 1909, an increase of nearly 15,000,000 compared with the previous year. The number of employés was 10,544, a gain of 603 over 1908. There were sixty-eight persons killed and 2,139 injured, an increase over the previous year of one in the number killed and 256 in the number injured.

Dominion Lands and Emigration.

Annual Report of the Department of the Interior for the fiscal year ending March 31, 1909. Ottawa: King's Printer, 1909. Page, 501. Price, 45 cents.

During the fiscal year ended March 31, 1909, the revenue of the Department of the Interior amounted to \$3,228,904.96, an increase of \$477,088.74 over the previous year. The principal source of revenue was from Dominion lands, which produced \$2,254,283.98. Of this amount the sum of \$951,442.28 was derived from sales of land, \$389,039, from homestead fees, and \$269,837.52 from timber dues. The revenue from sales of land was made up largely from sales of irrigation, coal and purchased homestead lands.

There were 39,081 homestead entries, representing a population of 93,852 souls. Of the homesteaders 10,962 were Canadians, of whom 693 were from the United States, 9,829 were Americans, 5,649 English, 1,310 Scotch, 506 Irish, and 3,342 Austro-Hungarians.

The statistics of immigration show that there were, 146,908 immigrants during the

year 1908-9, compared with 262,469 in the previous year, which was the greatest number on record for any single year. Nearly one-half of the total male population which arrived in Canada last year was composed of farmers and farm labourers. The falling off of immigration from Great Britain was due largely to regulations against the admission of undesirables, and the decline of the number of immigrants from European countries was due to restrictive laws in force in those countries. There was a slight increase in the number of arrivals from the United States, of whom there were about 60,000, each one of whom possessed on an average, \$1,000 in stock, cash and effects.

UNITED STATES REPORT.

Industrial conditions in New Jersey.

The Industrial Directory of New Jersey, compiled and published by the Bureau of Statistics of New Jersey, Trenton, N. J., 1909. Page, 641.

The third issue of the Industrial Directory of New Jersey for 1909, contains an account of all the towns and villages in the State having a population of one hundred and over, with especial reference to the industrial opportunities which they offer, in respect to water power, labour, municipal assistance, afforded by gifts of free factory sites and bonuses. Lists of the railroads of the State, summer resorts, and manufactures are also given.

OTHER REPORTS RECEIVED.

Canada.—Report of the Northwest Mounted Police, 1909. Eighth Report of the Geographic Board of Canada, 1909.

Ontario.—Twenty-seventh Annual Report of the Provincial Board of Health for the year 1908.

Report relating to the registration of births, marriages and deaths in the Province of Ontario for the year ending 31st December, 1907.

Report of the Fruit Branch, Department of Agriculture, Ontario, 1908

Report of the Women's Institutes of the Province of Ontario, 1909. Part I.

University of Toronto. Report of the Board of Governors for the year ending 30th June, 1909.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

ONTARIO CASES.

Alien Labour Case at Chatham, Ont.

A CHARGE against the Chatham, Wallaceburg and Lake Erie Railway Company of violating the Alien Labour Act by engaging P. J. Shields, general manager, by previous contract in the United States, was recently dismissed. It was found that though Shields came from Utica, N. Y., his parents came from Ireland, and had never been naturalized. The court therefore held that Shields was a British subject.

Opium Case at London, Ont.

A decision was recently handed down in the case of a firm of druggists at London, Ont., charged with selling opium for other than medicinal purposes. Some time ago an officer in plain clothes succeeded in purchasing a quantity of the drug from a clerk in the employ of the firm, and information was at once sworn out. In giving judgement his honour said, that he found that the opium had been sold by a clerk in the employ of the druggists, and not for medicinal purposes. He found that the proprietors of the store were not liable for the act of their clerk in selling, unless it was shown that the actual sale was made with their express knowledge, and this was not shown in the present case. He found further, however, that opium was unlawfully kept for sale, and convicted both the proprietors on that head. After being warned of the seriousness of the offence, both were allowed to go on suspended sentence.

Mechanic's Lien on Hotel property—Payment upon Architect's certificates.

Plaintiffs sought to enforce a lien claimed for work done and materials supplied

in building a hotel. Defendants, according to agreement, were to make payments each month, upon production of architect's certificates that such payments were due. Nine progress estimates were given plaintiffs by the acting architect, the last of which was dated 1st June, 1908. In February or March defendants refused to make further payments, on the ground that plaintiffs had failed to furnish a satisfactory bond "for and conditional upon" the performance of their agreement. Ten days before the trial of the action the architect gave plaintiffs another progress certificate shewing a balance due plaintiffs of \$6,730.13. Upon a reference to the Local Master at Kenora he held, that defendants were not justified in refusing to make further payments, nor plaintiffs justified in discontinuing their work. He gave plaintiffs judgement for amount certified to be due on 1st June, after deducting payments on account and \$991 for insurance on hotel after 1st January. Upon an appeal to the Divisional Court the judgement of the Master was varied by increasing plaintiffs' judgement by \$991, the amount of the insurance, and added to the judgement an order that any surplus which might be realized by sale of the hotel, after payment of sums directed to be paid out of the proceeds, shall be paid into Court, subject to further order, and reserving leave to plaintiffs to apply to the Court in respect of the lien which they have, and for which payment has not been provided for by the judgement. The Master's judgement was otherwise affirmed, and the appeal dismissed without costs. The decision in *Sherlock v. Powell* (1899) 26 Ont. App., Repts. 407 was specially referred to in the judgement of the Court.

(Kelly Bros. & Company, v. Tourist Hotel Company. 15 Ontario Weekly Reporter, 29.)

Workmen's Compensation Act—Dismissal of appeals by both parties to action.

The plaintiff as administratrix of the estate of her deceased husband, an engine driver, sued for damages on ac-

count of his death in a collision between his train and a yard engine near Brantford. The jury found that the system by which the control of the yard engine was operated, which was under the yardmaster, not the despatching officer, was defective, and that the death of plaintiff's husband was caused by the negligence of the defendants' servants, viz., the superintendent and yard master, and assessed the damages at \$8,250 at common law and at \$3,300 under the Workmen's Compensation for Injuries Act. The trial judge held, that the yard master, and superintendent were competent officials, that the system above referred to and used was deliberately adopted in preference to what the jury found was the proper one, and gave plaintiff judgement for \$3,300, under the Workmen's Compensation Act and dismissed the action at common law. The plaintiff appealed to the Court of Appeal to increase the amount to \$8,250; the defendants, who had admitted their liability under the Act and had paid \$3,096 into Court, cross-appealed to have the judgement reduced to that sum. The Court dismissed both the appeal and the cross-appeal.

(Frack v. Grand Trunk Railway Company, 15, Ontario Weekly Reporter, 55.)

Master and Servant—Negligence of railway company not proven.

Action by the widow and children of Paul Brennan, deceased, to recover damages for his death, caused, as they alleged, by the defendants' negligence. The deceased was a railway yardsman, and had charge of the defendants' engine and cars at their Ottawa yard. On the 17th June, 1909, he was standing on the foot-board of one of the engines, which was moving northerly, when he fell in front of the moving engine and was killed. The action was tried with a jury, and questions were submitted to them, subject to a motion for a nonsuit, upon which judgement was reserved. Upon the answers of the jury the plaintiffs claimed to be entitled to judgement. Chief Justice Mulock, of the Exchequers Division, (after setting out the facts and portion of the evidence) said, that the proper conclusion to draw

from the evidence was, that as Brennan, stood upon the foot-board with his hand upon the hand-grab he became unconscious, and in consequence fell; but, whether that was the correct inference or not, there was nothing in the evidence to show that the deceased fell off the foot-board either because it was too high from the ground, or because it was too narrow. Even if the foot-board was too high or too narrow, there was no evidence to show that the accident was caused by either circumstance. Action dismissed with costs.

(Brennan v. Grand Trunk Railway Company, 1 Ontario Weekly Reporter, 365.)

Master and Servant—Negligence under Factories' Act.

Appeal by the defendants from a judgement in favour of the plaintiff, upon the findings of a jury, for recovery of \$1,500 damages. The action was brought by Joseph Doherty to recover damages for the death of his son Frank Doherty, a workman employed by the defendants, alleged to have been caused by the defective condition and arrangement of the ways, works and machinery of the defendants, which had not been remedied owing to the negligence of the defendants, or some of their servants, as alleged. The Divisional Court, dismissed the appeal with costs, being of opinion that the commission of a wrong, according to the law of the Province, had been proved by the application of the Factories' Act, dangerous machinery not having been, so far as practicable, securely guarded; that the burthen of proof as to contributory negligence was on the defendants, and there was evidence to support the verdict; and that the damages were not so grossly excessive as to impel the Court to grant a new trial, or put the plaintiff to the alternative of a reduction of damages.

(Doherty v. Macdonell, 1 Ontario Weekly Notes, 368.)

Services by Sister to Brother under his promise not to remarry.

The plaintiff who was a sister of the defendant abandoned her occupation, and went to live with him in 1895, upon the death of his wife, to take care of

his household and children, upon his representations that he would not marry again, that she would have a home with him for her life, unless he predeceased her, and in that event she would have the benefit of an insurance on his life effected for her benefit. There were nothing in writing, and no oral promise to pay the plaintiff wages. The plaintiff lived with the defendant and cared for his house and children until 1908, when he remarried. The plaintiff sued for damages for breach of the contract which she alleged, and for money, expended by her on the defendant's behalf. The judge of the County Court of Essex, sitting for Mr. Justice Anglin, deviated judgement for plaintiff, for \$1,530, having for six years wages less forty days barred by the Statute of limiting. Upon an appeal to the Divisional Court was held that the representation of the defendant that he would not marry again was merely an expression of intention; a contract of a widower not to marry again would be void as against public policy; because of the representations made by the defendant, the plaintiff was entitled to recover the value of her services for the last six years before action; but was not entitled to recover for moneys expended by her voluntarily and without the request of the defendant. Judgement of the judge of the County Court affirmed.

(Bradley v. Bradley, 1909, 19 Ontario L. R., 525.)

Workmen's Compensation for Injuries Act. Important Questions decided by Divisional Court and Court of Appeal.

Section 9, of the Workmen's Compensation for Injuries Act, which requires notice of the injury to be given, provides that the notice must be given within twelve weeks after the occurrence of the accident causing the injury, and that in the case of death the want of notice shall not bar the action which the Act gives, if the Judge is of opinion that there was "reasonable excuse." in which the verdict at the trial was for the plaintiff, for the want of notice. In this case, the Court of Appeal, upon an appeal from the Divisional Court, which granted a new trial with leave to the plaintiff to amend his case so as to complain of a digestive

system in use at the place of the accident, held, that ignorance of the law is not a "reasonable excuse"; and in this case the plaintiff, the brother of the deceased person who was injured, and who sued as administration of his brother's estate, might have given the notice before he was appointed administrator, and his solicitor's mistaken idea to the contrary did not excuse the want of the notice; the action therefore failed; and the judgement of the Divisional Court above mentioned was reversed.

The following were the acts, and the findings of the jury. The deceased was employed by the defendants as a workman on the tracks in a railway yard, and, when crossing the tracks with other workmen on his way home from work, was struck by an engine and killed. The negligence alleged was, that the engineer in charge of another engine in the yard let off a large quantity of steam, which prevented the deceased from seeing or hearing the engine which struck him. The jury found that the defendants were guilty of negligence by blowing off steam or hot water at such a critical moment, with such a large number of employees between the tracks; that the deceased came to his death by reason of the negligence of a person in charge of an engine of the defendants, such negligence consisting of blowing off steam or hot water, and that a proper look-out was not kept in a proper place on both engines when backing; and that there was no contributory negligence. On these findings the trial Judge entered judgement for the plaintiff. Upon an appeal by the defendants to the Divisional Court, it was held by that Court that the position of the deceased, in view of clause five of section three of the Workmen's Compensation for Injuries Act, was, in the absence of any finding to the contrary, that of a mere licensee; that he could not claim the benefit of section 276, of the Dominion Railway Act, because the engine was not passing over or along a highway at rail level; but that the deceased might have had cause to complain of a defective system, within the meaning of clause one of section three, from the facts developed in the evidence, al-

though not specifically mentioned in the pleadings; and a new trial was ordered, with leave to amend so as to set up a case of a defective system at the place where the accident occurred.

The Court of Appeal, reversing the judgement upon the other ground, did not, as a Court, express an opinion upon these points. But the following statements were made by judges of that Court.

Mr. Justice Osler, referring to *Willetts v. Watt & Co.*, (1892) 2 Eng. Q. B. 92, said that the discretion of the Divisional Court in allowing the plaintiff to make a new case, after the time had elapsed within which a new action could be brought, should not, on that ground, be interfered with.

Mr. Justice Garrow, said, that the true position of the deceased at the time of the accident was not that of a mere licensee, but of a person upon the defendant's premises by their invitation, and one to whom the defendants owed a duty to take reasonable care that he should not be injured.

And Mr. Justice Meredith, said, that there was no proof of any negligence on the part of the defendants; and the granting of a new trial, in order to enable the plaintiff to set up an entirely new case, was contrary to proper practice.

(*Giovinazzo v. Canadian Pacific Railway Company*, 1909, 19 Ontario L. R., 325.)

Master and Servant—Meaning of Contract. Dismissal and Justification of same.

By agreement in writing between the plaintiff and the defendants, the plaintiff was, as traveller for the defendants, "continuously" for a period of three years to take orders for goods to be supplied by the defendants from samples furnished by them, and to take care of all samples and return the same from time to time as requested; and the defendants were to pay him eight per cent. "on all good and accepted orders." In an action to recover commission on goods sold, and damages for wrongful dismissal, under the circumstances stated below, Mr. Justice Riddell, who tried the action without a jury, held, that "good and accepted orders" was not synonymous with "orders

accepted and filled;" nor did the words refer only to orders which the customer could by law compel the defendants to fill; but, if the defendant's dealt with an order in such a way as to lead the plaintiff and the customer to believe that they intended to fill it, it was "accepted" within the meaning of the contract. He also held, that where the defendants received an order for goods and sent it to their factory, so that the goods might be made to fill the order, that was an acceptance of the order within the meaning of the contract.

The plaintiff, who was a man of nervous temperament, contracted a cold, and about July, 1907, commenced to use a certain catarrh cure which contained cocaine, and this drug by his increasing use of the cure, reduced him to such a nervous wreck that in October, 1908, he was taken to a sanitarium. He recovered by November 29, following, but in the meanwhile his landlord had seized the goods in the house rented by him, and amongst others the defendants' samples, and the defendants had to pay \$135 to recover them, and on October 31, 1908, the defendants discharged the plaintiff, who brought this action to recover commission and damages for breach of the contract of employment. Upon this state of facts the learned Judge held, that the plaintiff was entitled to damages, inasmuch as his illness was not such as indicated that he would not be able to perform his contract for a substantial part of the unexpired period, and therefore not such as to put an end to the agreement in a business sense.

Held, also, that neither the use of the word "continuously" in the contract made any difference, nor the fact that the illness of the plaintiff was brought on, to a great extent, if not wholly, by his own folly, inasmuch as the illness of a nervous subject, allowing himself to be overcome by a seductive drug which saps his powers of self-control as well as his physical strength, cannot be fairly taken out of the category "act of God."

Held, also, that the fact that the plaintiff had borrowed certain sums of money from customers of the defendants, did not justify the dismissal, inasmuch as

none of the witnesses said that the borrowing had in the least affected them, nor seemed to think the less of the plaintiff, or of the defendants on account of it.

Held, also, that the fact, that the plaintiff had permitted the defendant's property to be seized for rent, in spite of the provisions in the contract, about taking care of the samples and returning the same as required, did not justify the dismissal, because, though it amounted to a breach of the agreement, it was not wilful, and could be compensated for.

Held, therefore, that the plaintiff was entitled to damages in addition to his commissions; and a reference as to these was directed on both branches of the case; the defendants to be at liberty to prove any set-off or counter claim.

(McDougal v. Van Allen Company, Limited, 1909, 19 Ontario L. R., 351.)

QUEBEC CASES.

Damages for Injuries to Workman—Article 1054 of Civil Code of Lower Canada.

In an action to recover damages for injuries sustained by him in consequence of an accident in the Company's Calcium Carbide Works, the plaintiff's evidence shewed that a furnace operated upon a new system had been recently installed, that he was employed with other workmen to charge the furnaces, draw off the liquid carbide when it was ready through openings in the base of the furnace, clean orifices and re-plug them with moist mortar preparatory to re-charging. While the plaintiff was in the performances of his work in re-plugging one of

these orifices an explosion occurred which caused the injuries complained of. There was no evidence of contributory negligence. The trial Judge gave judgement for the plaintiff, awarding him substantial damages. This judgement was reversed by the Court of Review (Q. R. 35 s. c. 385), but restored by the Court of King's Bench (Q. R. 18 κ. B. 271), Mr. Justice Cross, dissenting. Upon appeal to the Supreme Court of Canada, it was held, (Justices Duff and Anglin, dissenting) that apart from any presumption arising under article 1054 of the Civil Code of Lower Canada, the fact of the explosion occurring under such circumstances sufficiently established actionable negligence on the part of the Company.

It was held by Chief Justice Fitzpatrick, and Mr. Justice Anglin, as against Justices Girouard and Duff, (Mr. Justice Idington, said, expressing no opinion upon the question), that under, said article 1054 of the Civil Code, masters and employers, as well as other persons, are responsible for damages caused by things under their control or care where they fail to establish that the cause of the injury was attributable to the fault of the person injured, to vis major or to pure accident, or that it occurred without fault imputable to themselves. In the result the judgement appealed from (which reversed the decision of the Court of Review) was affirmed, and the judgement at the trial in plaintiff's favour was restored, Mr. Justice Duff, dissenting..

(Doncet v. Shawinigan Carbide Company, 42 Supreme Court Reporters, 281.)

THE LABOUR GAZETTE

MARCH, 1910.

**INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF
FEBRUARY, 1910.**

I.—GENERAL SUMMARY.

THERE was some revival in general trade and industry after the lull of January. The weather has been exceptionally mild, enabling outdoor work to be continued under unusually favourable conditions. The lack of snow shovelling, as a means of employment, was felt in some localities, but the general activity of industry counteracted this feature. Unemployment during the present winter has been less than in several years past, and little or no distress has been reported from any of the large centres. The ice supply was gathered under favourable conditions, the product being clear and of a good thickness. Building, transportation and mining were the industries chiefly facilitated by the fine weather. Among agriculturists some damage to winter wheat is feared on account of the early disappearance of the snow. In fishing and lumbering operations have been impeded by the same cause. Manufacturing continued very active, with a demand for additional help in several branches and localities, especially among employers of female labour.

hand compositors had their wages increased from \$12 to \$13.50 per week and machine operators from \$15 to \$17 per week. Pressmen and pressfeeders at Quebec also obtained a new agreement involving some minor changes. At Peterborough, Ont., printers to the number of forty-five, had their wages increased, from \$12 to \$13.50 per week in the case of journeymen printers, from \$15 to \$16 per week in the case of foremen, and from \$16 to \$16.50 per week (after six months) in the case of linotype operators.

Railway employes.—Locomotive engineers in the employ of the Michigan Central Railway Company obtained an increase dating from February 1.¹

General transport.—The team owners of Vancouver, B.C., acceded to a request of the teamsters for a nine-hour day after March 1, wages to remain unchanged.

Civic employes.—The city council of Vancouver, B.C., has adopted the eight-hour day, without decrease of earnings. The following is a list of the increases involved:

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour, during February, 1910.

Printing trades.—At Quebec, Que.,

	Nine-hour day rate.	Eight-hour day rate.
Blacksmith.....	\$.36	\$.40
Bridge foreman.....	.45	.50
Bridge foreman's leader.....	.35	.40
Straw bosses.....	.33½	.37½
Pipe layer.....	.32	.36
Ditch and sidewalk men.....	.30	.34
Labourers.....	.28	.31½
Street sweepers.....	.25	.28
Old men, cleaning.....	.22	.25

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

Interruptions to Industry.

Among industrial establishments, etc., destroyed by fire or through other causes during February, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Warehouse at Halifax.

On February 7, the steamer *Centreville* ran on the rocks near the Trout Cove breakwater, and proved a total loss.

New Brunswick.—Hotel at Moncton, loss \$20,000; ship chandler's store and warehouse (partial) at St. John, loss, \$2,000; general store at Salisbury, \$10,000.

Quebec.—General store at Ferme Neuve, loss, \$2,000; town hall at Fraserville, loss, \$30,000; saw-mill at Montmagny, loss, \$2,000; planing mill and residence at Murray Bay, loss, \$70,000. At Montreal, stable and contents; spice mill, loss, \$5,000; store; business block, loss, \$7,000; cotton waste warehouse, loss, \$6,000. Hotel at Nicolet, loss, \$20,000; storehouse at Quebec, loss, \$1,000; planing mill at Quebec, loss, \$6,000; store at St. Johns; restaurant at Sorel, loss, \$1,500.

Ontario.—Saloon and dwelling at Cobalt, loss, \$6,000; public hall at Colborne; Grand Trunk Railway car at Hamilton, loss, \$5,000; lacquer vat at foundry and power station, loss, \$16,000; two stores and residence at Iroquois, loss, \$10,000; business block at London, loss, \$70,000; Huron college (partial) at London, loss, \$5,000; church at Lindsay, loss, \$2,000; business block at Merripton; business block at Ottawa, loss, \$100,000; bakery at Ottawa, loss, \$1,500; hotel at Ottawa, loss, \$3,000; millinery store and telephone exchange at New Hamburg; tunnel station at Port Huron, loss, \$35,000. At Toronto, coal chute; harness factory, loss, \$1,700, and business block, loss, \$30,000. Store at Vittoria; ferry slip at Windsor; flour mill at Waterdown, loss, \$10,000; church at Woodsville, loss, \$2,000.

Manitoba.—General store and hotel at Sidney, loss, \$7,000; store and residence at Tyndall, loss, \$3,600; and business block at Winnipeg, loss, \$15,000.

Saskatchewan.—Store and office at North Portal, loss, \$15,000.

British Columbia.—Hotel at Hazelton, loss, \$15,000.

Conditions in the Industries and Trades.

Conditions of employment during February in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of the *Labour Gazette* and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

The care of stock, the cutting and hauling of cordwood and the marketing of produce furnished the chief employment among agriculturists during February. Good snow roads and high prices stimulated the movement of produce. In the closing days of the month mild weather, by causing the snow to disappear, exposed

the winter wheat crop to danger in portions of Ontario, though no serious damage had been reported at the end of the month. In Western Canada the fuel problem has been very satisfactorily met in the farming community. The demand for farm labour was still quiescent; but it is expected that 7,000 men will be required for farm work in the spring in Western Canada at wages for experienced men of \$30-\$35 per month with board, and for unexperienced men of \$15-\$20 per month with board.

Tests to ascertain the effects of cold storage on apples for shipment to Great Britain are being conducted by the Department of Agriculture, Canada. The fruit has been kept in cold storage at St. John, N.B., Montreal, Que., and other points. Several consignments will be forwarded subject to careful supervision and observation.

Mr. A. G. Turney has been appointed Provincial Horticulturist by the Government of the Province of New Brunswick.

Several very important meetings of associations of agriculturists were held during February. Various Breeders' Associations of cattle, swine and horses in Ontario and Quebec held their annual meetings. Fruit growers' associations in several sections of the Dominion also held conventions which were largely attended. The Canadian Seed Growers' Association met at Ottawa. At Winnipeg, Man., a joint meeting of the Provincial Agricultural and Dairy Associations was held at which some important papers were read and discussed. At a meeting of the Saskatchewan Grain Growers' Association held at Prince Albert, Sask., the formation of a national organization of agriculturists was completed; Daniel McCuaig, of the Manitoba Grain Growers' Association, was elected President and E. C. Drury of the Dominion Grange was elected Secretary. The organization will include representatives from various farmers' associations throughout the Dominion. A three-days session of the United Farmers' Association of Alberta was held. The Central Farmers' Institute of British Columbia held its annual meeting.

The latest statistics show the area of

land under cultivation in Canada last year to have been 30,065,556 acres, with a total yield valued at \$532,992,100, as compared with \$432,534,000 from 27,505,663 acres in 1908. It is shown there was in every province an increase in the value of field crops over 1908. This was particularly the case in Saskatchewan, where the increase was about one hundred and sixty per cent.

According to a report issued by the Warehouse Commissioner at Winnipeg with regard to interior, terminal and eastern transfer elevator capacity, there was a marked increase in capacity during last year. In Manitoba there are now 312 stations, having elevators with a capacity of 21,624,500 bushels, an increase in capacity during the year of 772,000 bushels. In Saskatchewan seventy-six stations were added to the list, making a total of 330 stations, with a capacity of 24,279,000 bushels. Stations having elevators in Alberta have almost doubled during the year, and now number 121, with an almost doubled capacity of 8,050,400 bushels. Altogether there are in Western Canada 769 stations at which 1,763 elevators are in active operation, having a storage capacity of 54,234,900 bushels.

The first number of the Bulletin of Agricultural Statistics, issued by the International Institute of Agriculture, Rome, Italy, was received during February. According to the Convention, agreed upon in 1905, one of the principal objects of the Institute is to collect, compile, co-ordinate and unify all official information relating to agricultural products; and to encourage the collection of such information by the countries which do not have a regular statistical service for such work; so as to compile information and totals as to the areas, conditions and production of agricultural products, to be disseminated to parties interested throughout the world. By means of this statistical service, the Institute plans to present agricultural statistics furnished by the official statistical services of the different countries, and thereby to publish more complete and reliable information as to the growing crops than is now available to the world; with the hope of securing

closer correspondence between the prices of agricultural products and the real conditions of supplies. The first issue outlines the statistical service which will be rendered during 1910-1911. Statistics as to the area sown to winter wheat and winter rye is given, with an estimate of the production of wheat in 1909.

Fishing.

The month was generally quiet. Smelt and bass fishing have been seriously interfered with by mild weather in the Maritime provinces though improved catches were reported in the closing days of the month. Other catches were fair, but stocks were reported low. Rough fish in fair quantities were taken on the Great Lakes, and the winter catch of white fish in the lakes of the Prairie provinces has been fair.

The International Fishery Regulations prepared by the joint Commissioners of Canada and the United States under authority of the agreement of 1898, for the protection and preservation of food fishes in the international boundary waters of the two countries, were tabled in the House of Commons early in February. They are to come into force by simultaneous proclamations on a date to be agreed upon. The regulations are intended to insure the conservation of the fishing industry in the territorial waters of Passamaquoddy bay, the St. John and St. Croix rivers, Lake Memphremagog, Lake Champlain, the St. Lawrence river, Lake Ontario, the Niagara river, Lake Erie, the waters connecting Lake Erie and Lake Huron, including Lake St. Clair, Lake Huron, excluding Georgian bay, but including the North channel; St. Mary river and Lake Superior; Rainy river and Rainy lake; Lake of the Woods; the Strait of Juan de Fuca and adjacent waters, and such other contiguous waters as may be recommended by the international fisheries commission and approved by the two Governments.

Lumbering.

The mild weather interfered with operations in the woods to some extent in Ontario and the Eastern Provinces, and

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

CANADA DURING THE MONTH OF FEBRUARY, 1910.

and is intended to present, in brief and accessible form, a generalized statement as to the state of employment in the prevailing, no account being taken as to wage changes, trade disputes and kindred phenomena treated under separate order indicating in each the degree to which general conditions were favourable or unfavourable, as follows: (1) active

	Metal, engineering and ship-building.	Wood-working.	Printing and Allied trades.	Clothing.	Food and tobacco preparation	Leather.	General transport.	Miscellaneous.	Unskilled labour.

some curtailment of the cut is expected in consequence. In the closing days of the month the hauling of logs to the streams had been begun and a large number of men and teams were sent into the woods for this work. In British Columbia the active conditions previously reported continued, with prices firm to upward.

The Canadian Forestry Association held a two days' session, at Fredericton, N.B., February 23-24, which was largely attended. A number of papers were read. Resolutions were passed:—recommending that the cut of small growth should be limited; endorsing the establishment of a permanent forest reserve on the eastern slope of the Rocky mountains; recommending the preservation of water powers, recommending that railway companies be compelled to take greater precautions for the prevention of forest fires; and recommending the preservation of timber lands at the head waters of rivers.

The Canadian Lumbermen's Association held a convention at Ottawa, Ont., in the opening week of the month.

Mining.

In the Nova Scotia collieries, the output was considerably larger than in February, 1909, but labour disturbances still continued an unfavourable feature. An early opening of navigation is looked for. The coal boring operations on Prince Edward Island which had been in progress for nearly two years have been discontinued. In Ontario and Quebec mining operations were active, the mild weather having facilitated work. The asbestos mines reported a heavy output for the season, favourable weather having permitted some extensive improvements and development. There was a considerable revival in the mica market. At Cobalt, Ont., active development continued. The mining situation in British Columbia remained steady and unchanged. The collieries in Alberta were affected by the lessening demand for fuel resulting from the mild weather. The Crow's Nest Pass collieries were fairly active and those on Vancouver Island were busy. The metaliferous camps of British Columbia were on the whole, active.

At the tenth annual meeting of the LeRoy Mining Company, Limited, held in London, Eng., it was reported that the operations of the year had resulted in a net loss of £9,701, attributed to the lack in considerable bodies of payable ore. A comprehensive scheme of exploration and development is at present being carried out.

Manufacturing.

The favourable conditions which have prevailed for several months past in manufacturing continued during February, establishments running for the most part full time and with full staffs of employes. In some localities there was a demand for additional employes, especially of female employes, as, for example, in certain establishments at Woodstock, Ont.¹ In all sections of the country an active year is looked for.

At the annual meeting of the Canadian Consolidated Rubber Company an increase of thirty per cent. in sales during the past year was announced; net earnings amounted to \$573,319.

The annual statement of the Nova Scotia Steel and Coal Company showed a large increase, net profits for the year being \$907,949, compared with \$734,701 in the previous year. The sum of \$184,453 for premium and commission on redemption of old and new bonds was paid out of the profits of the year. The reorganization of the finances of the Company authorized by the shareholders has been carried out.

At the annual meeting of the Montreal Cotton Company total profits for the year of \$295,397 were announced.

The Canadian output of pig iron for 1909, has been estimated at 800,000 tons, by Mr. T. J. Drummond, president of the Lake Superior Corporation. Up to the beginning of the twentieth century the annual production was under 100,000 tons.

The following extract is from a communication received from an officer of the Colonial Bleaching and Printing Co., Limited, Montreal:

"The Dominion Textile Company hope to have their Colonial Branch at St.

Henry, Montreal, in operation about May. These works were formerly calico printing works but are being reconstructed at a cost of \$125,000 and will in future be used as a bleachery for the white goods trade. The plant will be modern in every respect and the Company will be in a position to meet the competition of the English Bleachers who are their keenest competitors in the home market. The bleacheries at the Merchants and Hochelaga branches will be closed, the business being concentrated. The calico printing business is all done at the Magog branch. There is now a demand for cotton weavers at Magog, Que.; Windsor, N.S.; and Kingston, Ont., all branches of the Dominion Textile Company, and at Hamilton, Ont., and Milltown, N.B., branches of the Canadian Colored Cotton Company. My informants are the Manager of the Textile Mills and the Managing Director of the Colored Cotton Company.

Railway Construction.

Winter conditions still prevailed in the camps, work being facilitated by the mild weather. The outlook is for pronounced activity immediately on the opening of spring, and men were being already engaged in Western Canada.

In connection with the National Transcontinental Railway, track has been laid in New Brunswick west to Nappadogan lake and for forty miles westerly from Moncton. Ballasting will be commenced early in the spring and it is expected that the work will be completed in August. The Winnipeg and Lake Superior section, it is expected, will be completed in July. The contract for the clearing away of the debris of the Quebec bridge calls for its completion by March 1. On the Grand Trunk Pacific line track laying eastward from Prince Rupert will be begun early in March. Heavy deliveries of steel for track laying and bridge building have recently been made. It is expected that the track will be laid westward to the Yellow Head Pass this year. Rapid progress is being made on the large bridges over Wolf creek and the Macleod river.¹

¹For statement with regard to progress made to date on construction of the National Transcontinental Railway, see special article elsewhere in present issue.

The Canadian Northern Railway Company has announced that it will build between 500 and 600 miles of road in Western Canada during the coming season.

The Canadian Pacific Railway Company will undertake extensions amounting to fifty-six miles in Manitoba, 346 miles in Saskatchewan, forty-five miles in Alberta, 174 in British Columbia.

General Transport.

Railway traffic was well maintained during February, the earnings of the large companies increasing steadily. Grain receipts at the head of the Lakes were increasing. The absence of snow greatly facilitated operations during the present winter and curtailed expenses. For the same reason an early opening of navigation is anticipated. Longshoremen at St. John, N.B., and Halifax, N.S., have had a good winter season. A number of electric railway companies held their annual meetings in February, and reported satisfactory earnings. The Halifax, N.S. Electric Tramway Company reported an increase in earnings. The earnings of the Ottawa Electric Railway increased from \$606,229 in 1908, to \$677,357 in 1909. The gross receipts of the Winnipeg Electric Railway were \$2,623,731, compared with \$2,206,094 in the previous year. The last half yearly statement of the Grand Trunk Railway Company showed gross receipts of £3,632,900.

A steamship service between Montreal and Australasia will be inaugurated during the present year.

Receipts of the Montreal Harbour Commissioners for 1909, totalled, \$380,174, an increase over 1908, of \$25,680. Each branch of traffic shows an increase, but the increase was most marked in local trade.

The Trades.

Building.—Bricklayers, masons and builders' labourers were generally dull from seasonal causes, but the other branches had an exceptionally good month. The outlook is for a very active year in nearly all the larger centres.

Metal and woodworking.—The month was generally active for employés in these

branches. Industrial establishments reported in most cases full time and full staffs, with orders well in advance.

Printing.—Printers, pressmen, electrotypers, etc., had an active month.

Clothing.—Journeymen tailors were generally quiet but garment workers and boot and shoe workers were active on spring and summer trade. Glove makers were somewhat quiet on account of the high price of glove leather.

Textile.—Cotton and woollen mills continued active.

Leather.—Tanners and curriers had a fair month. Leather workers were active.

Food and tobacco preparation.—Bakers were quiet on account of home baking during the winter season. Confectionery establishments reported a revival in activity following the lull of January. Tobacco workers were well employed and cigar makers had a good month. Ice cutters and packers had a very busy month, the product being exceptionally clear and of good thickness. Ample supplies were secured.

Miscellaneous.—Among retail clerks some revival as compared with January, was reported. Hotel and restaurant employés were quiet. Theatre employés were in their busy season. Laundry workers were active. The scarcity of competent domestic servants continued in nearly all sections of Canada and steps were being taken in several quarters to increase the available supply. A deputation waited upon the Honourable the Premier of Ontario in this connection, on February 28.

Unskilled labour.—As is usual at the season the amount of employment offering was limited and a further curtailment occurred through the lack of work at snow removal. No unemployment on any serious scale, however, was reported and the amount of assistance rendered necessary by charitable institutions was less than in many years past. A good year is expected with abundance of employment on the opening of the spring season.

Canadian Trade and Revenue.

Foreign trade.—During January, 1910, the total value of imports entered for

consumption was \$30,253,852, compared with \$23,113,627 in January, 1909. For the first ten months of the fiscal year ending January 31, 1910, the total value of imports entered for consumption was \$302,050,207, compared with \$241,071,762 in the corresponding period of 1909. The total value of domestic exports during January, 1910, was \$20,258,406, compared with \$15,387,322 in January, 1909. The total value of domestic exports for the first ten months of the fiscal year ending January 31, 1910, was \$241,375,219, compared with \$209,970,509 during the corresponding period of 1909. In January, 1910, there was an increase in exports of the mine, the fisheries, the forest, animals and their produce, agriculture, and a decrease in manufacture. The grand total of Canadian trade for January, 1910, amounted to \$51,500,102, compared with \$39,177,675 in January, 1909. For the first ten months of the fiscal year ending January 31, 1910, total Canadian trade was \$563,986,780, as against \$468,375,847 in the same period of 1909.

According to reports of Trade Commissioners received at the Department of Trade and Commerce, Canada, there is a good demand in Holland for Canadian apples, fresh and evaporated; also a demand for Canadian wheat in Mexico and for Canadian potatoes in Cuba.

Imperial trade.—In Great Britain and the different dominions of the Empire openings for Canadian products were reported as follows: For Canadian seeds, cod oil, birch wood for spools, and flax fibre, in Great Britain; and for condensed milk, woodenware, apples and furniture in South Africa. Many inquiries were reported by the Trade Commissioner of Australasia for information concerning Canada by prospective emigrants. The imports of Canadian flour into British Guiana were reported as increasing.

Domestic trade.—Wholesale and retail domestic trade remained steady. There was some revival from the seasonal dullness of January, and the outlook for spring activity is regarded as favourable.

The bank statement for January showed an increase of \$9,000,000 in savings' bank deposits over the previous highest record and a decrease of \$21,500,000 in

demand deposits. Notes in circulation and current loans also showed a decrease.

For the first two months of 1910, bank clearings were approximately \$30,000,000 heavier than in the corresponding month of last year, and \$71,000,000 larger than for a similar period two years ago.

During the month of February the Honourable the Minister of Finance for Canada, laid upon the table of the House of Commons the terms of a commercial agreement between Canada and Germany, by which the application of the surtax by Canada on German goods will cease and a selected list of articles of Canadian production will be admitted to Germany under the provisions of the German Conventional Tariff.

The Standard Bank of Canada reported an increase in circulation and deposits during the past year and an addition of \$100,000 to reserve.

Canadian Revenue.—Canadian revenue for the month of February, 1910, amounted to \$8,173,937.94, compared with \$6,567,186.11 in February, 1909. For the eleven months ending February 28, 1910, the total revenue was \$89,684,460.46, compared with \$75,504,822.72 in the corresponding period of 1909. The total expenditure on capital account during February, 1910, amounted to \$2,730,320.39, compared with \$2,486,553.66 in February, 1909. The total expenditure on capital account for the eleven months ending February 28, 1910, was \$29,989,535.68, compared with \$39,302,102.81 in the corresponding period of 1909. The leading items of expenditure during February, 1910, were Public Works, Railways and Canals, \$2,152,197.62; Militia, capital, \$184,807.55; Railway subsidies; \$184,320.00, and bounties, \$163,934.84.

Notes.

The fifth annual convention of the Retail Hardware and Stove Dealers' Association of Ontario was held at London, Ont., during February.

A Good Roads Commissioner for the Province has been appointed by the Government of Manitoba.

At a meeting of the Grand River Association at Galt, Ont., on February 4,

Mr. J. P. Jaffray, of Galt, was appointed President and Mr. J. P. Hancock, Galt, Secretary-Treasurer, to succeed the provisional officers appointed in December last. It was decided to urge the Provincial Government to appoint a Commission to investigate the need of regulating the flow of water in the river.

It is stated that the population of Prince Rupert, B.C., is now 4,000 and is steadily increasing. Construction work involving an expenditure of \$1,000,000, has been carried out in the past eight months.

In the Speech from the Throne with which the Legislature of Alberta was opened on February 10, measures were forecasted for the betterment of municipal organization, the regulation of traffic on highways and the prevention of corruption at municipal elections.

Some large quarries opened at Novar, Sask., in the summer of 1909, will be worked actively this year. The pay-roll exceeded \$4,000 per month. The stone is of a good quality and the supply in sight very large.

A large deputation representing the Retail Merchants' Association of several Provinces waited upon the Right Honourable the Prime Minister of Canada and several members of the Cabinet on February 25, to express opposition to two bills before Parliament dealing with the subject of co-operation.

The United Farmers' of Alberta Co-operative Association of Red Deer, organized during the autumn of 1909, reports successful progress. The membership consists of farmers having farm produce to dispose of and being members of any union of the United Farmers of Alberta.

The fourth annual meeting of the New Brunswick Union of Municipalities was held at Campbellton, N.B., on February 17-18.

The twelfth annual convention of the Associated Boards of Trade of British Columbia was held at Nelson, B.C. Resolutions were passed favouring government ownership and operation of telephone lines, the establishment of a uniform system of boiler inspection laws between the several provinces, and the abolition of personal property tax.

At the seventh annual meeting of the shareholders of the Stanley Mills & Company, Limited, Hamilton, Ont., it was reported that increased interest is being taken in the system whereby employes are admitted as preferred shareholders. The number of shareholders and the amount of their investment have materially increased in the past year; over one-third of the employes being now shareholders.¹

The Glace Bay, N.S., Co-operative Society, Limited, held its fourteenth quarterly meeting on February 25. Business for the quarter amounted to \$29,388, compared with \$21,456 during the preceding quarter and \$37,401 in the corresponding quarter of a year ago. Some \$12,315 have been withdrawn from the business during the past year as a result of the labour disturbances. The reserve amounts to \$4,271 on a share capital of \$6,035.

The fourth annual report of the Penny Bank of Toronto, covering the twelve months ending June 30, 1909, shows a growth in deposits of from \$100,862 to \$112,682. Deposits in the public schools of Toronto increased by \$6,706. Branches have been opened in five of the public schools at Ottawa and in West Toronto, London, Brampton, Bowmanville and Earlescourt. Over 741,000 deposits have been made since April 1, 1905 in Toronto alone. Average deposits were twenty-nine cents, and average withdrawals, \$4.18.

The second half-yearly meeting of the Guelph Co-operative Association was held on February 8, 1910. The most successful year since the founding of the Association was reported, the turn-over amounting to \$41,748, compared with \$29,795 in the previous half year, while profits were \$2,147, compared with \$1,043. A crockery and enamel ware department has been added. The reserve fund is now seventy-five per cent. of the share capital.

Notice of motion was given of the following resolution in the Ontario Legislature during February:—"That in the opinion of this House the Province and

the municipalities should unite in (a) the establishment of craft or trade schools in the towns and cities in Ontario to supplement the practical training of the workshop; (b) an arrangement as to the basis of support for such schools as between the Province, the municipalities and interested manufacturers; (c) the establishment in large industrial centres of Technical High Schools; and that the powers of the municipalities should be enlarged so as to enable them to aid in the support of such schools.

The fourth annual convention of the Canadian National Association of Builders was held at London, Ont., February 8-9. At the opening session Mr. J. H. Lauer, secretary, made an address dealing with the development and work of the Association. The Association is now composed of the six largest exchanges in Canada. The President and Vice-President also delivered important addresses. Other addresses dealing with the present method of awarding contracts, organization among builders, the rights of the lowest bidder and kindred subjects. Resolutions were passed to provide for the expenses of the year, to provide for the co-operation of affiliated exchanges in the event of labour disturbances, to have certain proposed workmen's compensation acts carefully scrutinized, opposing the proposed eight-hour day bill at present before Parliament, favouring the encouragement of technical education. Mr. E. T. Nesbitt was elected President and Mr. J. H. Lauer, Secretary-Treasurer.

A deputation representing the British Columbia members of the Trades and Labour Congress of Canada waited upon the Government of the Province during February and presented the following memorial:

We, the members of the British Columbia Executive of the Trades and Labour Congress of Canada, and representatives of organized labour in this Province beg leave to submit for your consideration and favourable action the following matters touching the welfare of the wage-earners of British Columbia.

1. Abolition of property qualifications for holding public office.
2. Abolition of election deposit.
3. Abolition of the poll tax and exempting tax on incomes of less than \$2,000 per annum.
4. Eight-hour day on all Government work.
5. The insertion of a clause in all Government contracts for work to be done compelling contractors to pay workmen not less than the recognized trade union rate of wages.

¹For a description of the arrangement see the *Labour Gazette* for April, 1908, page 1,232.

6. The Government to take over the Tranquille Sanatorium, and to operate and maintain the same as a free public institution.

7. The amendment of the British Columbia Model Railway Act as to, apply to interurban electric lines.

8. The Factory Act to apply to bakeries.

9. Amendment to the Coroners' Act, making it mandatory upon Coroners to make inquest in every case of sudden or violent death.

10. The extension of further timber leases to be re-

fused and the restriction upon hand loggers to be removed.

11. The amendments to the School Act submitted by the Vancouver School Board.

12. Extension of free text book principle to include all school supplies.

13. The strict enforcement of the Steam Boiler Inspection Act and no amendments to be made with the view of reducing the qualification required for engineers.

14. The Government ownership of coal mines, lumber industries, telephones and all other public utilities."

II.—REPORTS OF LOCAL CORRESPONDENTS.

DURING the month of February, 1910, the death occurred of Mr. Rodolphe Laferrière, correspondent of the *Labour Gazette* for Hull, Que., and district. Mr. Laferrière had held the position of correspondent since February, 1901, having been the first to be named for that district. Mr. E. E. Cinq-Mars has been appointed to the vacancy created by Mr. Laferrière's death.

SYDNEY, N. S. AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market remained unchanged from last month, all the large industries being very active. Business was much stimulated by favourable weather conditions, and although the winter has so far been very open, there was sufficient snow most of the month to permit of easy travel, which was taken advantage of by country people. The coast has been free from drift-ice, and very little of it was seen during the month. Sydney Harbour was open during the whole month, and with the exception of a few days the ferry boats plying between Sydney and North Sydney, were uninterrupted.

The situation in the coal industry shows little change from January. General activity prevailed in all the large colliery districts, although the demand for coal of certain qualities does not seem to be so great as it was a year ago. The Glace Bay district is still affected by the strike. The output of the Dominion Col-

lieries for January was two hundred and twelve thousand tons, (212,000 tons) being an increase of 12,000 tons over the output of January, of last year. Prospects for an increased output by the Dominion Coal Company are favourable.

The Nova Scotia Coal Company had a very good month and while there was considerable broken time at some of their collieries, yet compared with last year the output was large. This Company is still developing the coal areas possessed by them, and a new colliery is about to be opened up in the Little Bras d'Or section.

Inverness colliery had a busy month, with the output closely averaging 1,000 tons per day. They report that slack-coal is not much in demand.

Port Hood colliery did not produce to its fullest capacity owing to a scarcity of miners.

The iron and steel trade was very active. Nearly all departments of the Sydney Works were active.

The Sydney Mines Steel Works had a busy month and will continue active, there being a brisk demand for the product.

The capital necessary for the rolling mills to be established in Sydney has nearly all been subscribed. A fuller account of this project will be given in the next issue.

Transportation by rail was fairly heavy, and coal shipments continued regular throughout the month.

Both wholesale and retail business were active.

Unskilled labour was well supplied. Agriculture and fishing were equal. The skilled trades were well employed.

WESTVILLE, N. S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour in this town and district was on the whole satisfactory, the manufacturing industries being steadily employed. With the exception of a few days of idleness the collieries were busy and the output was very good. The outdoor trades, owing to weather conditions, have been quiet and the supply of labour equal to the demand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Quiet conditions prevailed in this industry. Farm produce was in good demand at remunerative prices.

Lumbering.—Active conditions were reported, good sleighing making business brisk. In addition to mine supplies received by railway a large number of farmers were employed with their teams hauling pit timber. Unfavourable weather in the early part of the season will somewhat diminish the cut.

Mining.—Up to the end of the month activity in this industry was reported.

CONDITION OF PARTICULAR TRADES.

Plumbers, gas and steamfitters reported a fair month; the other building trades were quiet. Iron moulders, coremakers, machinists, engineers, electrical workers and linemen had a good month. Blacksmiths were active and horseshoers were busy. The printing trades were active. Boot and shoe workers had a good and journeymen tailors a fair month. Butchers, bakers, confectioners, ice handlers and cigarmakers had a good month. A cigar making establishment on a small scale, was started. Clerks and delivery employés were active, as were also laundry workers. With the exception of ship labourers and longshoremen, who were in their dull season, the transport trades were active. Unskilled labour was quiet.

HALIFAX, N. S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market for the past month has been dull. Owing to the weather, outside work on building operations was practically suspended, while inside work was not carried on to any extent, with the exception of the repairs to the post office, where there were some sixty hands engaged.

Work along the waterfront has been only fair, but many cars have been engaged in the handling of inward and outward freight, which has afforded employment for many who would otherwise have been idle. The available hands were always in excess of the demand.

Work has been resumed to a larger extent in the Acadia Sugar Refinery, where, some months ago, a number of hands were laid off. Other manufacturing firms are about up to the season's average.

The bank clearings for Halifax, for the week ending February 4, 1909, were \$1,670,234, while the returns for the week ending February 3, 1910 were \$1,912,902, an increase of \$242,668.

The fourteenth annual meeting of the Halifax Electric Tramway Company was held on February 14. The report for the year showed steady progress, the net earnings for 1909—\$177,973.79—showing an increase of \$18,068.71 over 1908, and \$31,465.56 over 1907. The proportion of operating expenses to income was 53.54 per cent., as compared with 55.29 in 1908. The total receipts were \$447,579.84, made up as follows:—Passenger receipts, \$197,330.15; light and power, \$191,322.89; gas, \$57,797.44; sundry earnings, \$1,129.36. The amount paid out in four dividends was \$85,129.94, leaving a surplus for the year of \$92,843.85. The net earnings of 1898 were \$54,748.54, or \$123,225.25 less than 1909. The total number of passengers carried in 1909 was 4,465,308, an increase of 292,322 over 1908, and the largest in the

history of the Company. In 1898 the passengers carried numbered 2,419,268.

Indications point to the opening up of gold and silver mines in Halifax county. In Cheyztcook and Port Petweswick some 25 men have been placed at work. If the prospects warrant, this number will be augmented by a larger force. In the Dunbrack and Chinook mines at Musquodoboit prospecting is being carried on, and good quantities of silver ore are being obtained.

The Plumbers' Union has notified the Master Plumbers' Association that on and after the first day of May, 1910, they will request an increase of ten cents per hour on their present pay, which is now twenty-five cents per hour for a week of fifty-four hours.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Some wholesale prices prevalent near end of month.

Butter, creamery, boxes, 26c. to 27c. per lb.
 Butter, creamery, tubs, 27c. to 28c. per lb.
 Butter, creamery, prints, 28c. to 29c. per lb.
 Cheese, large, 12½c. to 13c. per lb.
 Cheese, turns, 13c. to 13½ c. per lb.
 Eggs, fresh, 25c. per dozen.
 Beef, forequarter, 7c. 9½c. per lb.
 Beef, hindquarter, 8c. to 11c. per lb.
 Lamb, 10c. to 12c. per lb.
 Mutton, 7c. to 8c. per lb.
 Pork, 10c. to 11c. per lb.
 Bacon, 18c. per lb.

Fishing.—Local fishermen made but small catches. Fresh fish was brought in from the banks and brought good prices. Dried salt codfish from Newfoundland was also in local market.

Manufacturing and mining.—Both showed an improvement over January.

Bricklayers, masons, carpenters, joiners and painters had a dull month. Lathers and plasterers had a better month than February, 1909, but were not active. Painters and decorators were quiet. Plumbers had a fair month. Gasfitters were quiet. Stone cutters and builders' labourers were dull. Electrical workers had a fair month. Boilermakers were dull. Blacksmiths and horseshoers were fairly active. Other lines were about normal. Printers, pressmen and bookbinders were busy. Tailors had a dull month. Ice cutters and drivers were busy. Butchers and meat cutters had a fair month. Barbers were well employed.

Maintenance-of-way employés, freight clerks and freight handlers had a fair month. Longshoremen were fairly active. Unskilled labour was dull.

DISTRICT NOTES.

Shelburne.—Joseph McGill, ship builder has now under construction a steamer for the Valley Steamship Company of Annapolis. She is to be 107 feet long, twenty-two foot beam, nine foot hold, and is to be completed by the spring. The last vessel, the seventh built by this firm, was the schooner *Arginia*. She was launched some weeks ago, is of the semi-knock-about style, ninety-eight feet over all, twenty-four foot beam, and nine feet eight inches depth. She is intended for salt banking in the summer and the West India trade in the winter.

Yarmouth.—The latest steamer to be completed by the Burrell-Johnson Iron Company is the *Aspy*. Her hull was constructed by Joseph McGill, Shelburne, and her finishings, engines, etc., were completed by the Yarmouth firm. She is 124 feet over all, twenty-five foot beam, eighty-six hold, and is destined for freight and passenger service between Aspy Bay and North Shore.

AMHERST, N. S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions in Amherst are steadily improving from month to month. The largest industry is the Rhodes-Curry branch of the Canadian Car Company. Business has been decidedly slack in this concern for the past two years, but now the full complement of hands, numbering about 1,200 are actively at work. They have orders on hand that will ensure steady work, full time for the next six months. There has been some readjustment made in regard to the wage scale, but the officials state that there was no reduction. The changes were limited to piece workers.

The other industries all report a busy season. The Amherst Boot & Shoe Company held its annual meeting during the

month and the reports of the officials were highly satisfactory. The usual dividend was declared.

Springhill continues to be the dark spot in the county. The strike still continues without sign of settlement. The Company has imported a number of men and are raising a small quantity of coal, but their efforts are handicapped by inability to secure certified miners. There are no indications of a settlement of the strike. Apart from this industrial conditions are steadily improving.

The Black Printing Company's Plant was destroyed by fire during the present month throwing a number of printers and typesetters out of employment.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the season this industry was quiet. Farm produce commands good prices. Hay is being sold in large quantities.

Fishing.—Owing to the open season the smelt industry has been largely a failure. The shipments will be fifty per cent. less than last year.

Lumbering.—At the opening of the season a big cut was anticipated but mild weather has largely prevailed for six weeks, with but little snow in the woods, and swamps and streams are opened, seriously interfering with lumbering. The output will probably be forty per cent. less than what was estimated and many of the smaller dealers stand to lose heavily.

Manufacturing is steadily improving. More men are employed and the output is larger than for two years.

Mining was very active except in Springhill.

CONDITION OF PARTICULAR TRADES.

No building is going on at present and the outlook for the coming season is not promising. Moulders were busy, with iron workers in general very active. Machinists were steadily employed. Boiler workers were fairly busy. Woodworkers were active. Upholsterers were busy, but only a limited number were employed. Car builders were more active than at any period for two years. Printers were very busy, with pressmen well employed.

Journeymen tailors were all actively employed, with boot and shoe makers very busy. Bakers were busy and ice cutters and drivers were active. Leather workers reported business dull, but trunk and bag makers were busy. Furriers were very busy and laundry workers had steady work. Taken on a whole there is an improvement in labour conditions, but the local market was sufficient to meet the demand.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during February showed but little change from January, with supply in excess of the demand. The mild weather of the previous month, which had interfered with traffic on account of the breaking up of ice on the rivers, was succeeded by a cold snap which had a more favourable effect on traffic. In the building line there was practically nothing new to report, very little outside work being done. Bankers and business men reported commercial conditions normal for the month. Good progress was made in fitting up the large plant formerly owned by the Dominion Packing Company and since acquired by Davies and Fraser, who are installing cold storage, the project to be assisted by the Provincial Government.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather was more favourable for agricultural operations in the way of hauling wood, mussel mud, etc., than in the previous month.

Fishing.—The season for smelts and eels closed the middle of the month. The mild weather operated against the success of the industry in a number of sections.

Manufacturing.—The new factories in the Island were carried on under the usual conditions, the labour supply about equalling the demand.

Mining.—Operations under this head,

which had been confined merely to boring for oils and minerals, have been discontinued.

Railroad construction and employment.—Construction work was practically at a standstill and conditions presented no unusual features.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a dull month. Carpenters and joiners, lathers and plasterers, plumbers, gas and steam-fitters were active. Painters and paper-hangers, stonecutters and builders' labourers were also active, as were the skilled trades generally. Unskilled labour was in fair demand.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in labour and commercial circles during February, have been normal and prosperous, showing no marked changes over those of the preceding month or of the corresponding period of 1909. No new enterprises creating additional fields for labour have developed but all local manufacturing industries have been steadily and in many cases, very actively operating with their usual complement of employes. The Record Foundry and Machine Company announced a very successful year in 1909, with earnings more than double those of 1908. It is actively at work with a staff of over 250 hands. The Humphrey Woollen Mills are also running day and night shifts to fill orders. Building operations are quiet. Wholesale trade is reported active and expanding, with retail trade average. Custom duties collected in January were \$4,483 as against \$4,378 in January, 1909. The value of imports was \$45,418 as compared with \$27,898 in the same month of last year.

The fifteenth annual convention of the Canadian Forestry Association held in the city of Fredericton, February 23-24, was largely attended. Resolutions relating to systematic forest protection and conservation were passed, also the following: "Resolved, that in the opinion of

the Canadian Forestry Convention the time has arrived when in the interests of the conservation of our forests the Federal and Provincial Governments should limit the cutting of lumber or pulpwood on Crown Lands."

The fourth annual convention of the New Brunswick Municipalities was held at Campbellton, February 16-17. Resolutions relating to various municipal reforms were passed including one recommending the adoption of uniform municipal statistics and accounting and one asking the Provincial Government for the establishment of a Bacteriological laboratory in the Province for the examining of milk, water and food supplies. No changes have been noticed in rates of wages or hours of labour and no unrest among employes.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The New Brunswick Fruit Growers' Association held its annual meeting at Fredericton, February 23. The thirty-fourth annual meeting of the Farmers' and Dairymen's Association, also held at Fredericton, February 21-23, was marked by a large attendance and instructive sessions. Resolutions were passed asking the Department of Agriculture to adopt the plan of granting a bonus on dairy cows as a method of encouraging dairying and that an official test of the composite samples of cream from creameries be made monthly.

Lumbering.—Lumbering operations have been much interfered with by unfavourable weather. Upon the Miramichi the cut is estimated at 50,000,000 ft., or about twenty-five per cent. less than last year's cut. Scarcity of men and high prices of provisions were also factors operating against the industry.

Railroad construction and employment.—The Intercolonial Railway Company is calling for tenders for the construction of a branch line between Nelson and Chatham, a distance of nine miles. The estimates for money expended in January upon the National Transcontinental Railway in New Brunswick, was \$134,726. Cold weather caused the curtailment of work, but conditions are expected to be normal in March."

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet, also carpenters, but decorators and paper hangers were busy.

Iron moulders, iron workers and helpers were active, also machinists and linemen. Blacksmiths and horseshoers were busy. Stove mounters and boilermakers were active.

Factory hands, upholsterers, varnishers, polishers and carmen were busy.

Printers and pressmen reported supply and demand about equally balanced.

Journeymen tailors were active with the demand good and in excess of the supply. Garment workers were steadily employed and milliners and apprentices were busy.

Bakers and butchers were active. Ice cutters were busy.

Leather workers were active.

Barbers were active; apprentices to learn the trade were scarce. Clerks and stenographers reported the demand fair. Hotel and theatre employés were in demand. Laundry workers were busy.

Considerable special work is being done in addition to regular train service, consequently the month was good for train crews and fair time was made by men. Trackmen reported ordinary winter conditions. Freight handlers were busy, with teamsters and expressmen active.

The supply of unskilled labour somewhat exceeded demand, conditions being quiet. Few unemployed however were met and cases of destitution were rare. The outlook for the coming season is good.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The market for labour improved during the month of February. Several business firms are about to remove on May 1, and considerable alterations and improvements are now being pushed forward to enable those merchants to occupy their new premises on the above date. The recent heavy snowstorms also gave employment to a large number of men in removing the snow from the streets.

The Portland Rolling Mills, which were shut down for two weeks, while new boilers were being installed, have resumed operations. The full number of 100 men are at work and the steam hammer is being used for the making of car trucks. The Western Union Telegraph Company has completed the stringing of a new copper wire from St. John to Montreal. This additional wire was made necessary by the increase in the business to upper Canadian points. The lumber lands, mill, driving dams, twelve cottages, boarding house, etc., pork packing and butter factory (charter of the Coverdale Driving Company), belonging to the estate of the A. L. Wright Lumber Company, Limited, Salisbury, were sold at public auction in St. John, February 26, for \$45,000. The Wright Lumber Company is in liquidation. The lands consist of 9,000 acres of granted lands, 18,000 acres of Government lands, and 500 acres of farm lands, making a total of 27,500 acres.

Up to February 26, there has been filed at the Customs House cargoes for sixty steamships. The vessels took away Canadian goods valued at \$10,396,616 and foreign goods valued at \$2,779,648, making a total valuation of \$13,176,264. Last season the value of sixty cargoes sent out was \$12,552,293. Bank clearings for the four weeks ending February 24, were \$5,500,466, and for the corresponding period last year \$4,607,356, being \$893,110 greater in 1910 than in 1909. The deposits at the savings bank for the month of January were \$54,067.88; withdrawals, \$57,229.88. For the four weeks ending February 18, the city cashier paid out \$5,210.92 in wages to workmen, and for the four weeks ending February 21, \$9,807.28 was paid out in salaries to civic employés, making a total of \$15,018.20. The Customs receipts for the month of January, were \$131,218.55, and for the corresponding period last year, \$98,517.17, an increase of \$32,701.38.

The Building Inspector submitted his report to the city council on February 14; 136 permits were issued for new buildings, additions and repairs, the estimated cost of which was \$376,200. Twenty-four of these were for brick, at an estimated cost of \$179,500, and 112 wood, estimated

cost \$195,000. The number of permits exceeded those issued in 1908, by thirty-five, and the cost of the new structure was \$136,050 greater than in that year. The number of buildings damaged by fire during the year was twenty-two, insured for \$42,000, on which the insurance loss was \$8,256.

CONDITION OF LOCAL INDUSTRIES.

Reports from Hartland of February 19, say "that not since the potato market opened up five years ago has the price offered farmers been so low. Hartland buyers are offering fifty cents per barrel, while Woodstock buyers pay but forty cents. During the past week more potatoes were marketted than ever before in one week, and all were sold at less than the cost to produce. The price of hay is good, the farmers get \$11.50 to \$12.50 for it. Oats are advancing slowly, bringing thirty-eight cents. Eggs are more plentiful and are bringing twenty-two cents. Butter in tubs or boxes is hard to dispose of and brings only eighteen cents, but pound prints or rolls bring twenty-two cents. The mild weather has cheapened the price of fuel. At the beginning of the winter farmers were asking \$5.50 per cord for dry hardwood. It can now be bought for \$4.50 and green wood at \$3."

Fishing.—There is a great scarcity of fish in the city. Owing to the stormy condition of the weather it has been impossible to do much fishing. One dealer says that twenty-seven years ago there were 300 small fishing schooners from the port of St. John catching herring for freezing, while this year not ten barrels had been taken from the whole Bay of Fundy.

Lumbering.—Reports from the lumbering districts are that in most places the hauling is excellent, the heavy rains leaving just enough snow and ice to form a bottom and the light storms since have made ideal going over the most of the roads, and the few bad places can be repaired. The teams and men are again going in by the dozen daily, so that by this time most of the camps have their full complement and work is active to have the cuts ready for spring driving.

The amount of stumpage paid to the Provincial Government for the year 1908-9, was \$246,742.77, the Shives Lumber Company heading the list with \$20,213.65.

Mining.—An agreement has been closed by which the Martin Head copper mines are transferred to a Montreal syndicate. It is understood that the work done so far has revealed deposits of considerable value. Active operations will be commenced in the near future.

Railway construction.—The month of January was probably the slowest of the year on the Transcontinental in New Brunswick. The working force was practically laid off, and the engineering staffs have been greatly reduced. The estimates of the money expended during January, on the various contracts, amounted to \$134,726.52.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, builders' labourers and plumbers were dull. Plumbers, gas and steamfitters, and stonemasons were active.

Iron moulders, iron workers and helpers, machinists and engineers, steam engineers, electrical workers and linemen, blacksmiths, boiler-makers, steel metal workers and horseshoers were active.

Woodworkers were busy, with shingle weavers very dull.

Printers and pressmen were busy, bookbinders were active.

Journeyman tailors were active.

Bakers and confectioners, ice cutters and drivers, and cigarmakers were active.

Broom and brush makers were active.

Railroad conductors, locomotive engineers, locomotive firemen, railroad telegraphers, trainmen, switchmen, trackmen and freight handlers were busy. Steamboat men and steamboat firemen active, with ship labourers and street railway employes busy. Teamsters and expressmen were active.

Unskilled labour was quiet.

DISTRICT NOTES.

Andover.—Fire completely destroyed the factory and foundry of A. E. Kupkey on the morning of February 1. The loss is estimated at about \$3,000.

Fredericton.—In a statement given out by Secretary Hubbard, it is announced by the Provincial agricultural department that the total shipments of potatoes from New Brunswick via St. John to Cuba, this year, amount to upwards of 80,000 barrels. Up to January 31st, last, there had been barreled at the Provincial Government's frost proof warehouse at St. John 27,867 barrels. New Brunswick potatoes are now the only ones in Havana and the dealers of this Province have captured the market. The daily consumption is about 2,000 barrels.

In connection with the development of the potato trade a large business in barrels is opening up in this province.

The Farmers' and Dairymen's Association opened a session on Monday evening, February 21, there being a large attendance.

Hampton.—A branch of the Bank of New Brunswick was opened here on February 14.

Sackville.—The boot and shoe department of the A.E. Wry Company's new factory started during the week ending February 12. The machinery plant is all set up, and two electric motors are at work, to be soon supplemented with three additional ones.

Salisbury.—The general store and warehouse of H. C. Barnes & Son was totally destroyed by fire on the evening of February 4. The total insurance was \$11,300.

NEWCASTLE, N. B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has been very quiet. Every branch of business has been dull, though there have been no failures during the winter. The only employment outside of the lumbering industry is in the pulp mills in Chatham and Derby which are running steadily. The weather was favourable for lumbering, with the exception of a few days. The supply of labour has been greater than the demand owing principally to the failure of both smelt and

bass fisheries. Previously there would be as much as from \$10,000 to \$15,000 paid out on the ice to the fishermen, while this winter only about \$500 have been so spent. The fish were becoming more plentiful towards the end of the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Hay is selling at \$15 per ton; oats at fifty-five cents per bushel; potatoes \$1.50 per barrel; turnips at eighty cents; butter at thirty cents per pound and eggs at thirty-five cents per dozen.

Lumbering.—Most of the men were coming out of the woods and the teams were busy hauling. The season, on the whole, has been fairly good and the cut in this district will be about the same as last season.

CONDITION OF PARTICULAR TRADES.

Plumbers had a very good month, but the other building trades were dull. Blacksmiths were not busy. Carriage and wagon makers were actively engaged, preparing for the spring trade. There is not much new work on hand but a great deal of repairing and painting. Journeymen tailors reported a very dull season. Butchers were very quiet, Ice handlers were very busy storing ice for the summer. The supply of unskilled labour was more than equal to the demand.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and P. J. Jobin, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month was somewhat more active than the preceding one, the heavy snowfalls having created a demand for unskilled labour. A larger number than usual also were employed in connection with the ice harvest, the season for which was shortened by the mild weather. The fitting up of boats for the season of navigation was begun. A large new warehouse, to replace one of those destroyed by fire, will be commenced at once and rapidly pushed to completion; the cost will be about \$12,000. Quebec Typo-

graphical Union No. 302, obtained a new scale of wages on February 17, to hold for four years.¹ The new agreement involves an increase of twelve and a half per cent. in wages. The Printing Pressmen's Union No. 152 also obtained a new scale.²

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Dullness prevailed.

Lumbering.—Activity continued, the logs being brought out under favourable conditions.

Railroad construction.—The starting of the short line to bring the National Transcontinental Railway into Quebec, and the work on the new caissons for the Quebec bridge, and the removing of the debris on the south shore contributed to increase the demand for labour. Some 14,000 tons of rock were removed by a single blast at Cap Tourmente.

CONDITION OF PARTICULAR TRADES.

Carpenters, lathers and painters were active, but the other branches of the building trades were quiet or dull. In the metal, engineering and woodworking trades activity prevailed. The printing and allied trades were busy. Boot and shoe workers were active. Cigar makers were quiet. Tanners and curriers were active, but the other leather trades were quiet. Barbers, clerks, hotel employés, etc., had an active month. Railway employés were active, but other branches were quiet. For unskilled labour the supply was in excess of the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during February have been active and there have been few unemployed during the month. Every branch of industry has been fully occupied with the exception, of course, of the outside building trades. The demand upon the "poor box" of the city has been lighter this year than for some time past. The want columns of the local papers tell

of the demand for help in factory and machine shop. The latter industries are running full time and the prospects ahead are much brighter than at the same time last year.

When the spring opens up there will be a good demand for the building trade. The Canadian Pacific Railway contract for the new station and other buildings will be commenced. It is understood from the contractor that the round house will be further enlarged.

The City Council and Sherbrooke Street Railway Company have come to an understanding, and it now remains for the rate-payers to ratify the agreement. The Company intends expending \$500,000 on the extension of the system. They will lay their rails to the portions of the city that has grown up within the past few years. The chief point between the Company and city was whether the latter would agree to the former selling surplus electric power. The institution of the Company is to develop a power that will be much in excess of what they will require for some years to come, and they want to get some return for this outside of the railway earnings until such time as the system will demand the whole of the power. The stipulation is that they will sell the power at the same rate as the city now charges. It is estimated that \$250,000 will be spent on this portion of the extension and the other half on laying track throughout the city.

Wholesalers report trade good, while retailers say that the usual cheap sales at this time of the year are well patronized.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is not much activity in the agricultural line. Farmers who have wood lots, and those who have not, are busy hauling wood to the various railway centres. The price of pulpwood has dropped about fifty cents a cord from that of last year, but the price of cordwood remains about the same.

Lumbering.—Lumbermen are busy getting the season's cut to the water's edge or to points of shipment. This year there have been more logs cut than in any year for some time past.

Mining.—The work at the asbestos

properties is not quite so good owing to the weather, but the mills of the various properties are running to full capacity so as to catch up with the output of last season.

CONDITION OF PARTICULAR TRADES.

The building trade has been quiet owing to the season of the year. Carpenters and joiners were busy at inside repair and alteration work. Painters, paperhangers and plumbers were also busy.

Moulders, machinists and iron workers were busy. All the machine shops were running full time and there were sufficient orders ahead to make the outlook bright.

The woodworking trade was fully employed getting ready for spring work already contracted for.

The printing trade was very busy during the month and extra help was advertised for.

The wholesale clothing establishments were running to full capacity and journeymen tailors were busy.

The cigar factories were busy, as the demand for this product is much better than for some time past. Ice cutters and those connected with this branch of industry were busy.

Miscellaneous trades were active during the month.

On one or two of the railway systems business was somewhat quiet especially those in the freight branch.

Unskilled labour was in good demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market showed little change compared with January, though business showed a slight improvement, not only on the preceding month, but over the same month in the preceding year. A heavy fall of snow gave employment to a large number, for a few days, clearing the streets. The improvement in business activity has been more noticeable

in the wholesale branch than in the retail. Rates of wages and hours of labour remain the same. There have been no strikes or lockouts during February.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The markets have been fairly well attended. Farmers have been chiefly engaged in looking after stock and bringing their products to town.

Fishing.—Conditions were very quiet this month.

Lumbering.—Lumber firms did considerable work in the bush this month; the heavy snow fall helped a great deal.

Manufacturing.—No pronounced improvement was reported over the preceding month, conditions being steady. The Wabasso cotton factory is doing very well and is awaiting the fine season to enlarge plant.

Railroad construction and employment.—The Canadian Pacific Railway employed a number to clear the roads.

CONDITION OF PARTICULAR TRADES.

The building trades have done exceptionally well for this time of the year. The metal, engineering and shipbuilding trades have been quiet, except blacksmiths and horseshoers. Woodworkers were busy, also carriage and wagon makers, but others were less active. Printers, pressmen and bookbinders were fairly active. Journeymen tailors and garment workers were active, also boot and shoe workers. Glove makers were more active. Bakers and confectioners were only fairly busy, but butchers and meat cutters, ice cutters and drivers, cigar makers and tobacco workers reported a good month. The leather trades were rather quiet. Barbers had a fair month. Delivery employés were well employed. Furriers were rather quiet, with hotel and restaurant employés the same, but theatre employés and laundry workers were active. Railroad employés reported a fair month. Cab drivers, hackmen, carters and draymen were fairly employed. The demand for unskilled labour was slight.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was very active during the month of February. There was some interruption in the employment of outside workers, but not as much as in past years, and with the fine weather activity was resumed in the building trades. Sash and door factories have been active, and the metal trades have much improved. There was great activity at the woollen mills of the Penman Manufacturing Company, Limited, some of the departments working with day and night shifts. Work has not been so plentiful for several years past in that factory. Boot and shoe manufacturers have had a most active month, employing full staffs. Messrs. J. A. & M. Côté are making a considerable addition to their factory, which has become too small for the orders they are receiving. The leather factory also had a very busy month. The corset factory had a good month. The clothing factory had a very busy month, employing a large number of women and young girls. The candy and biscuit factories were active, more so than during the previous month, or the corresponding month of last year. The musical instrument factory had a good month, with a large number of orders and a full staff. Outside work has employed a number of labourers. As ordered by the Railway Commission, a viaduct will be built in the spring at the Bourdages street crossing of the Grand Trunk Railway, which will give considerable employment. A by-law was voted by the taxpayers granting an exemption of taxes for a period of ten years to the Arseneault & Robert Company, boot and shoe manufacturers, who have commenced operations during the month with a staff of about thirty men, the city undertaking to furnish electric power during the same period, provided the sum of \$200 be not exceeded. Another request for a \$6,000 bonus has been

made to the City Council for a factory of musical instruments, organs, &c; the new company promising to employ a certain number of men and to pay a stated amount in yearly wages. A new company has been started for the manufacture of card-board boxes. Work on the cathedral is being pushed actively, a number of workmen of all classes being employed. The work of enlarging the St. Hyacinthe Seminary is progressing rapidly, a large number of workmen and common labourers being employed.

Wholesale and retail trade was rather quiet, but was more active than in the corresponding month of last year. The banks reported a good month, collections being fairly easy. In hours of labour or rates of wages no change occurred during the month. The relations between employers and employés have been cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The month has been one of the best in the year for the sale of farm products; the prices which were obtained have been the highest that have been paid in the past for the same products. Work on the farm has been plentiful, but there was no demand for additional hands.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were employed when the weather was favourable. Lathers, plasterers, painters, plumbers and gas and steam fitters were busy. Carpenters and joiners were busy most of the month.

Iron moulders, iron workers and helpers, machinists, engineers, electrical workers, linemen, blacksmiths, boilermakers and horseshoers had a fair month.

Woodworkers, upholsterers, varnishers, polishers, wood carvers and pattern makers were well employed.

The printing and allied trades were well employed. Garment workers, both male and female, were very well employed. Boot and shoe workers had one of their best months. Bakers, confectioners, butchers and ice cutters were well employed. Leather workers and saddlers were active. Barbers, clerks,

delivery clerks, furriers and hotel, restaurant and laundry workers were well employed. Railway employés were active. Freight handlers were busy. Draymen and carters were active. Hackmen were busy. Unskilled labourers had a fair month.

DISTRICT NOTES.

Sorel.—The condition of the labour market in Sorel was fairly good. Building operations were active and factories worked steadily. The greatest activity prevails in the shipyards at St. Joseph de Sorel, where over 1,200 men are busy repairing the hundreds of vessels which take up their winter quarters in Sorel harbour. At the Government shipyards more than 800 men are busy building and repairing the several vessels of the fleet used in dredging the river. Work is being pushed ahead with vigour, as there is every indication that the opening of navigation will come early this year.

ST. JOHNS, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in general has been much more active than during the previous month, the winter having resumed its usual course. All the transportation lines have resumed their activity. Stone quarries have been very busy, with many orders to fill. Work is still actively in progress on the Canadian Pacific Railway bridge; the height of the water in the Richelieu river makes the work very difficult. The Government yards have resumed their repair work on the ships used in the deepening of the Richelieu.

Advantage was taken of the ice to finish the new water intake for the St. Johns' waterworks system, which will be Government property. Large sheds are being built for cutting granite, the idea being to treble the production, there being many contracts to fill. Norcross Brothers, of Worcester, Mass., are building the shops and are putting in modern machinery. It is reported the granite

quarry will employ three times as many men as were ever previously employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were fairly busy making provisions for the spring season and hauling products to market.

Manufacturing.—Factories were fairly active. A few new hands had to be engaged in some of them. The work of establishing a tannery has been commenced; no such industry existed here before. It will produce all kinds of leather and will commence operations in April.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were rather quiet. Carpenters and joiners were all fairly well employed and reported a fair month. Lathers and plasterers were rather dull. Painters, decorators and plumbers were quiet, as well as gas and steam fitters. Stone cutters were active and in demand. Iron moulders, iron workers and helpers, and core makers were all fairly active. Machinists, engineers and machine engineers were all well employed. Electrical workers and linemen were rather quiet. Metal polishers and brass workers were fairly well employed. Tool sharpeners, horse-shoers and jewellers were fairly well employed. Woodworkers, upholsterers, varnishers, polishers and wood carvers were well employed. Carriage and wagon makers reported a fair month. Printers, pressmen and bookbinders were all employed. Journeymen tailors and garment workers reported a rather quiet month. Hatters and glove makers were rather quiet. Bakers and confectioners, butchers and meat cutters were fairly active. Ice cutters were very active storing ice for the coming season. Barbers, stenographers and delivery employés reported a fair month. Hotel, restaurant and theatre workers, as well as laundry workers, were well employed. Railroad conductors, engineers, firemen, telegraph operators and trainmen were well employed. Trackmen reported a good month. Cab drivers, hackmen, carters and draymen were all very active. Unskilled labour reported active condi-

tions throughout the month. Street walkers are not seen here.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Workers in the building trades, with the exception of a few branches, had a quiet month, although better than the corresponding month of 1909. There will be a resumption of activity in March and all the building trades are preparing for an active summer. Three or four heavy snowfalls in February have given employment for some time to the unskilled labourers who rely on snow storms for winter work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers, especially those who grow large quantities of vegetables, were very busy preparing their hotbeds. Those who have winter gardens sell their products at very remunerative prices.

Manufacturing.—The factories in the district were busy, especially in the boot and shoe line. Sash and door manufacturers are preparing for the coming season, which promises to be one of the most active in Maisonneuve and vicinity.

CONDITION OF PARTICULAR TRADES.

Bricklayers were fairly busy, but masons, as well as carpenters and joiners, had very little work. Lathers and plasterers had a good month, as well as painters and decorators. Plumbers had a fair month as had gas and steamfitters. Stonecutters were quiet and building labourers had little to do.

Iron moulders were busy and iron workers and helpers were active. Machinists and engineers had a good month as well as mechanical engineers. Electrical workers were active and linemen quiet. Metal polishers had a fair month, stove mounters were in demand and blacksmiths were busy.

Ship carpenters and tool sharpeners were fairly active and tinsmiths and horseshoers active.

Woodworkers had a very quiet month, except carriage and wagon makers and car builders who were active.

Printers had an active month. Pressmen, bookbinders and compositors were in demand.

Garment workers had a satisfactory month. Workers were in demand in some branches of the boot and shoe industry.

Bakers and confectioners, butchers and meat cutters were very busy. Ice cutters were very active. Cigar makers and tobacco workers were good. Leather workers had a fair month.

Barbers and laundry, hotel and restaurant employés were in demand.

Railway employés were well employed. Longshoremens and unskilled labourers, had little to do.

MONTREAL, QUE., AND DISTRICT

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Customs receipts for the first month in the year 1910, suggest that this year will be one of the most prosperous for trade. The total collections on imports show an increase of \$176,358.81, or over seventeen per cent. over January, 1909.

During January, 1910, seventy-three building permits, representing a value of \$158,560, were issued, as against fifty permits, representing \$130,120 in January, 1909.

The receipts at the Montreal Post Office show an increase of \$15,000 over January 1909.

A strike of several hundred garment workers was in process of settlement.

CONDITION OF LOCAL INDUSTRIES.

Agriculture was active.

Manufacturing was fairly active.

Railway construction was quiet.

Other industries in general had a good month.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, decorators

and paperhangers, plumbers, gas and steamfitters were active. Stonecutters were quiet and building labourers were fairly active.

Metal and engineering trades were fair, except machinists and engineers, blacksmiths, sheet metal workers, horseshoers and jewellers, who had a good month.

Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, car builders and pattern makers were active.

The printing and allied trades were active, as well as the clothing, food and tobacco preparation, leather, miscellaneous and transport trades.

Unskilled labourers were quiet.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been little change in the labour situation during the past month.

The paper industry is somewhat dull and the mills are not employing a complete set of men. The mica industry is picking up rapidly. Some of the shops that were closed for two years are now working overtime. The high price for pork does not seem to affect the Matthews Pork Packing establishment where many workmen are employed. Several men are employed until the opening of navigation in the shipyard of the Ottawa Forwarding Company, repairing canal barges.

The prospects for next summer are good. A large demand for labour is expected.

The mild weather during the winter has meant a saving of about twenty-five dollars per family in fuel and clothes. On the other hand those who did not go to the bush, expecting to make as much or nearly so by shovelling snow, were disappointed.

The work at the sewer for Flora lake is progressing slowly.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

February, like the previous month, was very favourable to building operations. Both on account of the fine weather and owing to tests by contractors of the possibility of carrying on successful stone masonry in winter, the season continued to be a record one in house construction. A new industry started by J. R. Booth at the Chaudiere gives employment to many men in manufacturing cardboard. The factory has a capacity of 40 tons a day and cost \$235,000. It is driven by a new electric power house capable of generating 9000 horsepower. The City Charity Officer reports that only one-third of the men usually in search of employment at this time of year, applied for work in February. His charity distributions of fuel this winter, up to the first of March, amounted to 375 cords of wood and 125 tons of coal. This quantity is a little less than usual despite the expansion of the city into workingmen's territory. Some of the large stores laid off hands temporarily during a business lull but no employé was more than a couple of weeks idle.

An agreement was reached on February 12, between the four local harness manufacturers and the leather workers' union by which many of the seventy workmen who went on strike on October 4, went back and promises were given to re-engage the whole number as soon as places could be found for them. Owing to the fact that some outside harness makers had been engaged during the strike the shops had not taken back all the strikers by the end of the month. The union men state there was a promise to grant an increase in wages but one of the large employers denies that any promise was made to the union but that he was willing to consider the claims of his men individually. Another manufacturer declined to give the terms of settlement. Hugh Carson, Limited, one of the shops affected by the

strike was burned out the day following the settlement, causing a loss of \$75,000. New quarters were secured at once and the staff of thirty now out of employment will soon be taken on. The union reports the receipt of \$8,000 in strike pay from the headquarters of the Leather Workers' International Association of America.

The City Engineer's estimates for the year provide for an expenditure of \$232,300. An increase in street improvements of \$10,000 is for macadam roads.

The Ottawa Electric Railway Company at its annual meeting, on February 7, reported gross earnings of \$677,357, an increase of \$61,127 over the year before. The passengers carried numbered 14,983,799, an increase of a million and a quarter.

The civic assessment statement for 1910, shows total assessment of \$75,885,211, an increase of over four and a half millions, of which one and a half was on land values and nearly all the rest on new buildings.

The Municipal Electric Commission reported revenue in 1909, of \$116,941 giving a net profit of \$23,642. The house lighting lines during the year were lengthened from forty to fifty miles. The customers increased from 3,164 to 3,643. A reduction on meter rates on buildings using \$100 or over per year is announced by both the Municipal and Ottawa Electric managements. The reduction will range from ten per cent. up to fifty per cent., the larger the consumption the greater the discount.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fine winter weather favored marketing and farmers saved expense in hauling goods to the Ottawa market. Eggs and milk became more plentiful.

Lumbering.—Much of the food supplies for lumber camps were hauled in on the summer roads on account of a lack of ice on the lakes and rivers. J. R. Booth hauled many logs to Ottawa by train. The contracts for the coming summer's cut of lumber are being made at around ten per cent. advance on last year. The demand for pine mill culls and box lumber increased during February. The

demand continues to be brisk for upper classes of pine.

Manufacturing.—The Ottawa Piano Company, with \$60,000 capital, and the Ottawa Gearing and Rotary Engine Company, capitalized at \$100,000 both propose to open factories in Ottawa.

CONDITION OF PARTICULAR TRADES.

The building season has been the most active on record for winter. Although men have been more plentiful than in summer, wages are unaffected. Bricklayers and masons were actively employed, with lathers and plasterers very busy, there being no idle hands in the city. Carpenters and joiners, painters, decorators, paperhangers, plumbers, gas and steamfitters and stonecutters were busy. Builders' labourers were fairly busy. Iron moulders, iron workers and helpers, coremakers, machinists, engineers, steam engineers, electrical workers, linemen and horseshoers were busy; the other metal trades were quiet. Woodworkers had a fairly busy month. Linotypers were busy, the other printing trades were quiet. Journeymen tailors and garment workers were fairly busy. Ice cutters and drivers were busy; bakers, confectioners, butchers and meat cutters reported a fair month. The leather trades were busy. The demand for mica hands was reported improving. Clerks and stenographers were quiet; other miscellaneous trades had a busy month. Railway employes, teamsters and expressmen were steadily employed. Cab drivers, hackmen, carters and draymen were busy. Unskilled labour was quiet, but there was more employment than usual at this season.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Extremely cold weather, and heavy snowfalls throughout the greater part of the month, had an unfavourable influence on the labour market here during the

month of February. On the other hand several steps were taken that must surely lead to industrial activity during the coming season. Manufacturing and many lines of industry were carried on actively throughout the month. In the House of Commons, the Honourable, the Minister of Public Works, asked for a revote of \$60,000 for the improvement of the Canadian channel, between Kingston and Brockville, beginning about eighteen and one half miles below Kingston. There was a vote last year of \$75,000 for this purpose, not more than \$15,000 of which was expended. During the month, the Frontenac lead mine was turned over to a trustee to be organized as the Canadian Smelting Company, Limited, under the laws of Ontario, with a capital of \$500,000. The Company will start operations at the mine, and on the erection of a general smelting plant at Kingston as soon as the weather permits, probably about April 1. The Company expects to be fully organized by that time, with the head office at Kingston. A large portion of stock for a new insurance company—The Traveller's Life Assurance Company of Canada, was underwritten.

As the result of a conference between the City Council and the Kingston Shipbuilding Company, it was decided to submit a by-law to the people, asking that the dry-dock be exempted from taxation, on condition that the Company agrees to guarantee an expenditure of \$30,000 a year in salaries and wages for the first three years, and \$40,000 annually thereafter, and that it also expend \$50,000 this year in buildings and equipment, or pay taxes on that amount. The property in any event to be liable for school taxes. Being a Government institution this property has hitherto been exempt from taxation. The Company is to pay the expenses of submitting the by-law. Negotiations were carried on by the representative of an Ottawa Company, and the owners of the various stages between Napanee, Sydenham, Battersea and Kingston, with a view of establishing a new motor bus company and taking over the various lines in the spring.

The chairman of the Light, Heat and Power Committee reports that the plant showed a profit of \$11,586 for 1909, and that the gas plant had showed a profit for the first time since dollar gas had been given to the people three years ago.

The Board of Works is preparing a report to be submitted to Council, recommending that eleven blocks of permanently paved roads be laid down on various streets in the city.

The Directors of the Orphans' Home are preparing to build a \$14,000 addition. The Legislative Committee of the Kingston Board of Trade passed the following resolution:—

“That in the opinion of the Kingston Board of Trade the size of bread should be regulated by statute for the whole Province as follows:—That no person should make bread for sale, other than fancy bread, except in loaves weighing either one and a half or three pounds avoirdupois and that loaves of such weight shall be known as standard bread. That no person shall make fancy bread (as defined in 8 Ed. vii., Ch. 56, Sec. 2) for sale except in loaves weighing one pound avoirdupois.

“That the Kingston Board of Trade are in favour of the passage of Bill No. sixty, with the substitution for section one of such amendments to the statutes as may be necessary to give effect to the above resolution.”

On Tuesday, February 1, and again on the 15, Council No. 4, of the National Marine Engineers held social events. Six hundred people attended the annual “at home.”

The arrangements for closing all dry goods stores at five p.m., except Saturday ceases at the end of the month. The arrangement proved satisfactory. Early closing will be adopted again during the summer months, in a general way.

There were no strikes, lockouts, changes in the rates of wages or the hours of labour reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Farmers, fishermen, lumbermen, miners and those engaged in railroad construction were only fairly active.

CONDITION OF PARTICULAR TRADES.

The building trades were rather quiet. Metal, engineering and shipbuilding trades were active. A large staff of men are engaged doing the necessary work for the opening of navigation. The various companies have a large number of men

rebuilding and making repairs to the various vessels to be used the coming season. A number of new boats are under construction. Woodworkers and furnishers were quiet. Printers and clothiers were rather quiet. Bakers, butchers, etc., were quiet. Ice cutters, cigar makers and tanners were active. Barbers, clerks, delivery employés, furriers, hotel, laundry, and the various lines of transportation, with unskilled labour, were quiet.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of February was very favourable for nearly all classes of labour as every manufacturing industry was running, with the exception of the roller mills which were closed for a couple of weeks while undergoing repairs, but which are now running with a large staff of skilled and unskilled men. Both the big mills of the Canada Cement Company were running, employing about 1,000 men; one mill operating night and day. Both the Belleville hardware and brass and steel factories could hardly keep up with orders, while the furniture and woodworking establishments were also busy. There were very little building operations going on, although a number of painters, plasterers, electricians and carpenters were engaged on the new Court house addition. A large number of men and teams were employed in getting out ice, the quality of which is of the best. Owing to the light snowfall during the month there were few engaged at snow shovelling. Work on the Trent Valley Canal gave employment to many while many were engaged in erecting the poles for the new Seymour Electric & Power Company throughout the county. Both retail and wholesale merchants reported business better than at the same month last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Hay and feed are plentiful and prices reasonable. Butter is twenty-five cents a pound and eggs thirty cents.

Fishing.—A number were engaged catching rough fish, most of which is exported.

Lumbering was active in the northern part of the county.

Mining was very active, especially in the vicinity of Marmora, Bancroft and Madoc.

There was little activity in *railway construction* work during February.

CONDITION OF PARTICULAR TRADES.

The building trades had a quiet month, although a number were employed. Plumbers, gas and steamfitters had a fairly active month. Very few builders' labourers were working.

Iron moulders, iron workers and helpers, machinists, electrical workers, linemen, brass workers, blacksmiths and boilermakers reported a busy month. A number of shipwrights were engaged making repairs to vessels in the harbour. Horseshoers had an active month.

Such trades as woodworkers, upholsterers, polishers, carriage makers and coopers had a busy month, both here and in Deseronto and Trenton. Furniture factories were very active, shipping out large quantities of finished products.

All branches of the printing trades carried on in this district were well employed.

Journeyman tailors had a busy month, all workers being engaged.

Bakers and confectioners, butchers and meat cutters and cigar makers had an active month.

Harness makers reported all hands working.

Barbers, clerks, furriers, hotel, restaurant and theatre employés had an active month. Laundry workers were busy.

Railwaymen generally had a fairly active month. Owing to the small

amount of snow, very little difficulty in operating has prevailed. Cab drivers hackmen, teamsters and expressmen were active.

Unskilled labour was in fair demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharpe, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions have been satisfactory and labour generally well employed. While the building trades were rather quiet, as is usual at this time of the year, the iron industries and electric workers were very busy. The Canadian General Electric Company is making preparations to enlarge its plant; the increase in business demanding larger quarters. The Peterborough Lubricator Company is very busy, having received a large order from London, England. E. H. Mann & Company have taken over the plant of the Mann Lumber and Cheese Box Company and are in full operation sawing lumber for farmers. St. Peter's Total Abstinence Society have bought the Richard Hall property and will spend about \$5,000 fitting it up for club rooms for the Society. The price paid for the property was \$12,000. A profit of \$9,705.70 is shown in the report for 1909, of the water system. This is a slight increase over the preceding year. The water works are owned by the city. The rate of taxation this year will be twenty-two mills as the general rate, with an extra mill for separate school supporters. The trouble between the Typographical Union and the publishers has been settled and the men have gone back to work at an increase in wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are busy getting out lumber and cord wood, caring for stock and marketing produce.

Lumbering is active, with conditions favourable.

Manufacturing is active, some of the factories working night and day.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, lathers and plasterers found trade dull. Carpenters and factories for woodworkers were busy. Those usually employed at outside work were quiet. Plumbers, gas and steam-fitters had plenty of work. Painters were fairly active.

Metal, iron and brass moulders had steady work. Machinists were busy as were electric workers and linemen. Metal polishers, buffers, platers and brass workers were active. Blacksmiths were busy. Tool makers also were busy.

Carriage and wagon makers were busy. Pattern makers were active and coopers busy.

Printers, pressmen, electrotypers, etc., had a fairly good month.

Journeyman tailors were a little quiet the first part of the month, but reported plenty of work later.

Bakers, confectioners, butchers and meatcutters were active. Cigar makers reported business improving.

Leather workers were very busy.

Barbers reported trade fair.

Railway and street railway employes had a busy month. Freight handlers, teamsters and expressmen had a good month.

Unskilled labour was fairly well employed.

TORONTO, ONT., AND DISTRICT.

Mr. Philips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

February was not so favourable for outside labour as January, owing to the cold weather. There was consequently, considerable less activity in the building trade; otherwise conditions were about the same as during the preceding month. Heavy snowfalls gave temporary employment at removing snow to a large

¹For the Peterborough Hack Company, in the *Labour Gazette*, for February, page 863, first column, read the Peterborough Lock Company.

number. The active season in building and civic work will set in unusually early, and many large undertakings are in prospect in the immediate future. Towards the end of the month work was begun on the sewerage system of the Indian Road district in the western section of the city, employing a large number. Among the buildings for which permits have been issued, work on some of which has already begun, are the Foresters' Temple, to cost \$50,000; addition to St. Michael's Hospital, \$180,000; Toronto General Trust Corporation, eight-storey block, \$375,000; Standard Bank building, \$200,000; Liberal-Conservative Association building, \$150,000; Union Bank building, \$175,000.

At the regular monthly meeting of the Board of Management of the House of Industry, held on the fifteenth, a report was presented showing that 296 families and 603 children had been assisted during the month. There were 1,101 families on the books for assistance, showing a decrease as compared with last year. The number of inmates at the Home was 171. The number admitted to the casual ward was 347, of whom 320 were males.

The fifth annual meeting of the Labour Temple Company was held on the twelfth. The financial statement showed receipts of \$10,302 and expenses \$7,826, in addition to \$1,000 paid on the mortgage, leaving a balance of \$1,476 on hand. The mortgage liability is reduced to \$11,500, and the assets of the Company amount to \$46,944. The following board of Directors was chosen: D. A. Carey, Thomas Walsh, James Simpson, A. C. Thompson, Q. H. Gibbins, John McFayden, W. J. Hayes, Wm. Glockling, A. C. Sanders, J. Storey, J. Spencer, J. Ralph, Joseph Gibbons, W. T. Thompson and J. F. Redall.

The report of J. E. Thompson, Industries and Publicity Commissioner of Toronto, on the work of the Department last year, states that the new industries secured spent \$1,500,000 in the erection of factories, and that during the present year three more companies will locate in the city, investing about \$2,000,000 capital and employing over

2,000 men. The expenses of the department, last year, were \$7,450. The resignation of Mr. Thompson, as commissioner has been accepted by the city.

A contract for the construction of the outfall sewer in connection with the sewage disposal works has been awarded to F. H. Dickenson, of Hamilton, for \$125,504.

The receipts of the Toronto Railway Company for January were \$331,346, of which the city received a percentage of \$37,704, as compared with \$289,972 total receipts, and \$30,174 city's percentage, in January, 1909.

The site secured by the Board of Education, for a Technical school, on Bloor Street East, has been expropriated by the Provincial Government as a site for the new Government House, for \$90,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were engaged in taking care of stock and marketing produce, the prices for which remained high. The market for horses was very good and at sales held in Toronto, excellent prices were obtained. The country roads were generally in good condition for hauling, and the farmers were never more prosperous.

Manufacturing.—Activity prevailed at nearly all manufacturing plants, with plenty of orders ahead in most lines.

Railroad construction.—Work on the eastern extension of the Canadian Northern Railway is being actively pushed.

CONDITION OF PARTICULAR TRADES.

Bricklayers, stone masons and builders' laborers were generally laid off. A fair proportion of carpenters, lathers, plasterers, plumbers and steamfitters, and other indoor workers were employed on unfinished contracts.

Blacksmiths, boilermakers, moulders, machinists and electrical workers had steady work. Structural steel workers were rather quiet. Brass workers, jewelers and silversmiths were active.

Furniture workers, cabinet makers and upholsterers had a good month. Piano

workers were active. Printers were fair. Bookbinders had plenty of work. Custom tailors, as usual between seasons, were slack. Boot and shoe workers and hat and cap workers were active. Garment workers were generally well employed though conditions were unsettled owing to strikes. Ninety cloak-makers employed by the Continental Costume Company went out on the eighth, demanding an increase of pay and recognition of the union, and sixty girls in the overall and shirt factory of T. E. Braime & Co., struck on the second, because they were compelled to pay for the thread used in their work.

The provision trades were steady. Cigar makers fair. Ice cutters were busy.

Leather workers had a fair month.

Hotel and restaurant employés, laundry workers and barbers were active.

Railway and street railway employés, teamsters and expressmen were busy.

Unskilled labour was quiet.

DISTRICT NOTES.

Aurora.—Thomas Sisman is erecting a shoe factory and has purchased the requisite machinery and equipment.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

February saw some diminution of the industrial activity which marked the earlier winter months. Cold and snow were responsible largely for this. Building operations were suspended; much of the time, electric linemen could do only repair work; the pruning of trees and vines in the fruit district was stopped; and other out-of-door employment was interfered with. On the other hand, many labourers were required to shovel snow.

Commercial interests reported a quiet period, but the financial outlook was more encouraging.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—All agricultural activities were suspended.

Fishing.—Winter fishing on Lake Erie was reported to be poor but prices were high.

Manufacturing.—Manufacturing concerns were all employing full winter staffs. Metal-working and clothing concerns were busiest.

The Ontario Power Company rushed its construction work in spite of the unfavourable weather and employed additional men. Three hundred feet of the conduit canal was roofed in and heated so that concrete construction was not interfered with by the cold.

Railroad construction and employment. Railway traffic was normal for the season. Many labourers were employed by both steam and electric lines to remove snow from tracks and yards.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were largely idle owing to bad weather. Carpenters suffered in a less degree from the same cause. Other building trades were all quiet except plumbers, who had a great deal of repair work.

Employment in all metal-working trades was reported to be good, both in the city and nearby places. There was much work for linemen but cold weather caused much delay.

Neckwear, suspender and shirt factories were busy.

Laundry workers were steadily employed. Barbers, clerks, hotel and restaurant employés and ice men were quiet.

Railway employment was generally good in all departments, and many extra trackmen and labourers were working. Teamsters were active. Unskilled labour was well employed.

DISTRICT NOTES.

Welland.—Metal-working plants were busy. The Ontario Iron & Steel Company added a night gang of fifty men. Another tool steel factory and new 'chemical works are projected.

Dunnville.—By-laws to bonus a gas engine works and a telephone equipment factory were carried.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market for February was active and busy. All branches of industry were well employed, except the building trades, which showed the usual slackening at this season of the year, work being confined almost exclusively to indoor work. Contractors and architects are unanimous in reporting prospects for next season as very good.

The various ice houses have secured an abundance of ice for all purposes, and of a quality unsurpassed in previous years. This ice was cut from the Welland canal levels. The St. Catharines Woollen Knitting Mills, which were re-organized in December, are getting under way; at present their staff of employes numbers thirty; this will be increased to full strength as soon as possible. The output is principally woollen socks, etc. The Welland Vale Manufacturing Company, the McKinnon Dash and Metal Company, the Reo Automobile Works, the Packard Electric Company, the Jinks Machine Company and the saw works, all had a good month.

The Monarch Woollen Knitting Mills are getting into shape as rapidly as possible and will be in operation at an early date. The Crocker-Whaller Company's Electrical Machine Works are being fitted up preparatory to starting operations. The City Council has appointed J. P. Casey as Industrial Commissioner for the city, and already several new factories are in prospect. The high level bridge project is gaining headway. Stock is being secured and the city will be asked to take part of the \$150,000 or \$200,000 needed. This

bridge, when completed, will span the old Welland canal and give easy access to the city from the west. The new public school "Alexandra", in St. Patrick's ward, has been completed and was opened on February 14.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Meetings throughout the district are being held to plan for improvements in the conditions of the fruit industry re packing, shipping, and transportation.

All *manufacturing* plants reported trade good.

CONDITION OF PARTICULAR TRADES.

The building trades are between seasons, with fair employment and prospects good. All branches of the metal and engineering trades were active. The woodworkers and furnishing trades were active. The allied printing trades were active. Journeymen tailors were quiet, with boot and shoe workers active. Food and tobacco preparation workers reported conditions fair. All leather workers were active. Barbers, clerks, stenographers, delivery employes, furriers, hotel and restaurant employes, and laundry workers were active. All lines of transportation were active. Unskilled labour was from active to quiet.

DISTRICT NOTES.

Port Dalhousie.—The conditions of the labour market was active.

Thorold.—Labour was well employed.

Merritton.—Favourable conditions of employment prevailed.

Dunnville.—Two bonuses were carried by the people, one to loan \$30,000 to the Canadian-American Gas and Gasoline Engine Company, the Company's plant to cost \$45,000 and employ fifty men first year, seventy-five for second and third year and 100 after. The second bonus by-law was for \$10,000 to purchase a site and building for the Wilhelme Telephone Manufacturing Company, who will employ twenty-five hands.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions during the month have been in most respects, better than during the same period last year. The building trades have experienced the usual seasonable slackness, but even in this particular matters were improved over 1909, as evidenced by the record of building permits issued, an increase of over \$25,000 being reported. The various industrial concerns have been operated steadily, with a full complement of hands, and the number of men seeking employment was smaller than usual at this time of year. Weather conditions interfered with outdoor labour the greater part of the month, but prospects are bright for a busy season, when the frost is out of the ground.

Bank clearings for the month showed an increase of \$1,500,000 over February, 1909. Retail merchants report a very satisfactory month, and the transportation lines were busy.

The city's sewer department has in contemplation the construction of about seventeen miles of sewers to serve the section in the east end recently annexed.

The Board of Education estimates call for an expenditure of \$292,415.58, to meet which the school rate of taxation will be increased three-tenths of a mill. The old rate was six and three-tenths mills. The general tax rate has been set at twenty-one mills, the same as last year.

The California Asphalt Company was awarded the contract for the city supply of asphalt, at \$22.75 per ton.

Much inconvenience was experienced during the month through a shortage in the supply of natural gas, which is used extensively for manufacturing and domestic purposes here. The pressure diminished materially whenever the temperature became low, and in some cases caused a temporary shut-down by concerns depending on natural gas for fuel.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Features of the city market during the month were a steady advance in pork prices, and a reduction in the price of eggs. Dressed hogs reached \$12.75 per cwt. toward the end of the month, and new laid eggs declined ten cents per dozen, selling on February 26, at thirty-five cents per dozen.

Manufacturing.—Work on the \$300,000 Sayley dry-air blast plant at the Hamilton Steel & Iron Company, is being rushed, and it is expected to be ready for operation in two months. This is part of the \$1,000,000 improvement of the works contemplated by the Company during the year.

The Otis Fensom Elevator Company has made a start on the \$200,000 extension of its works.

Overtime has been the rule during the month at the works of the Canadian Westinghouse Company.

Railroad construction.—Large quantities of rails piled along the right-of-way of the Canadian Northern Railway, near Oakville, leads to the belief that track-laying will soon commence on the Company's line into this city.

CONDITION OF PARTICULAR TRADES.

The building trades had a quiet month, except lathers and plasterers, who were busy. Conditions in the other trades were uniformly steady, with boot and shoe operatives and garment workers entering on a busy season. The demand for labourers was rather quiet, owing to weather conditions, but the number of unemployed was perceptibly less than during the same period last year.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Favourable conditions continued during the month, which compared favourably with January, and were better than the

corresponding month of last year. In the building trades there was considerable employment, and the factories and mills were, with few exceptions, very busy. A busy year is expected in all branches of industry carried on here.

Extensive public works by the city will give employment to a number, among these being the construction of a \$50,000 reinforced concrete bridge, and the erection of a Collegiate Institute, to cost \$100,000. There is a continued demand for female help. Merchants had a fair month.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing was brisk, several factories were busy. Several large factory additions are being erected.

In *railroad construction work* there are evidences of a busy season ahead.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, lathers and plasterers were mostly unemployed; a few had work part of the month. Carpenters and joiners in factories were active; others were practically unemployed. Painters, plumbers, gas and steamfitters were a little quiet.

Iron moulders, coremakers, machinists and engineers, blacksmiths, boilermakers and metal polishers were busy. Linemen and sheet metal workers were active. Stove mounters and horseshoers were a little slack.

Woodworkers, carriage and wagon makers and coopers were active. Pattern makers were busy.

Printers, pressmen and allied trades were busy.

Tailors and tailoresses found trade a little quiet. Boot and shoe workers were busy.

Bakers and confectioners were busy. Cigar makers and tobacco workers were active.

Leather workers and saddlers were active.

Barbers, clerks, delivery employés, hotel and restaurant employés were steadily employed. Laundry workers were busy.

Railroad trackmen were active. Freight handlers were busy. Street railway employés had steady employment. Draymen were busy. Teamsters and expressmen were not very busy. Cab drivers were active. Unskilled labour was well employed, for this season; there were not many out of work.

DISTRICT NOTES.

Paris.—Labour generally was well employed. The mills and factories were busy.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during February improved as compared with the preceding month, nearly all skilled workmen being well employed. Manufacturers in most cases, report orders ahead, with some working overtime to meet the demand for their goods.

Prospects for building operations during the year are fair, some tenders having been already let.

The Co-operative Association held their annual meeting and presented their half yearly balance sheet, which showed business done in all branches to the amount of \$41,748.19, an increase of \$11,952.76 over the last six months, which was considered very satisfactory, a dividend of five per cent. being declared to shareholders.

The statement presented at the annual meeting of the Water Commissioners was most satisfactory and shows a larger balance than any year in the history of the works. It was so satisfactory that the Commissioners immediately passed a resolution giving a further ten per cent. reduction on all domestic rates, to take effect at the next payment.

The Light and Heat Commissioners also presented their annual report to the City Council and report the best year since the City owned the plant.

Customs receipts for January, were \$15,-293.89, an increase over the corresponding month last year of \$5,523.70.

In the estimates which have been brought down in the Ontario Legislature the professors and officials of the Ontario Agricultural College and Macdonald Institute, come in for substantial increases in their salaries, to the total amount of more than \$5,000 per year.

No settlement has yet been reached in the strike of the Brussels Carpet weavers.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers had a very quiet month. Painters, decorators and paperhangers were fairly active. Iron moulders, core-makers and helpers were busy. Machinists and electrical workers were employed. Linemen were busy on rural telephone work. Metal polishers, blacksmiths and horseshoers had a fair month. Woodworkers and upholsterers were very active. Piano workers were well employed, as also were pattern makers. Carriage and wagon makers were quiet. The printing and allied trades had a very busy month, some new men being taken on. Journeymen tailors were slack, with garment workers busy.

Unskilled labour had a fair month, a number being employed in getting material ready for permanent road making.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During February, labour was on the whole well employed, factory hands being much more active than in the corresponding month of last year. Bricklayers and masons were somewhat quiet since winter set in. Good progress was made to the addition to the Wippes' block. Two buildings permits for dwelling houses were issued in January and one in February; architects report having numerous plans on hand. The Town

Council granted the School Board \$70,000 for a new school house, to be erected this summer. The School Board increased the salary of four caretakers from \$475 to \$500 per annum. The Town Council increased the mayor's salary from \$600 to \$700 a year, and appointed the tax collector as assessment commissioner, with an increase in salary of \$200 per year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were generally busy hauling wood, saw logs, building stone, hay, oats and other farm produce. Some inquiries were being made for farm help for the coming season.

Lumbering.—Saw mills were busy, with a large supply of logs on hand.

Manufacturing.—Busy conditions prevailed, overtime being necessary in some cases.

CONDITION OF PARTICULAR TRADES.

Plumbers, gas and steamfitters and stonecutters were active, but the other building trades were quiet. From busy to active conditions were reported in the metal and woodworking trades. The printing trades were busy, as were also the clothing, food and tobacco preparation and leather trades. The miscellaneous trades had an active month as had also railway employés. Unskilled labour was quiet.

DISTRICT NOTES.

Galt.—Nearly all classes of labour were well employed during the month, with manufacturing establishments working overtime in some instances. Messrs. J. W. Gardner & Co., were remodelling their planing mill and making a sash and door factory out of it. Unskilled labour was busy working at sewer extensions.

Preston.—Busy conditions prevailed in nearly all classes of labour. The Pullman Coach and Car Shop was very busy and preparations were being made to enlarge the same as soon as weather conditions permit.

Elmira.—Labour was well employed, with all factories busy.

WOODSTOCK, ONT., AND DISTRICT.

Mr. John Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

“Nobody who is able and willing to work need be without employment” may be said to summarize the labour situation here. This does not mean, of course, that there is work for everyone at his trade or of the kind he prefers; but that there is work of some kind. The reports from practically all the factories continue encouraging. Most of them are working full time with full staffs; some are increasing their staffs slightly. One factory reported a slackness in one department, but it is fully expected that improvements in the other departments will compensate for this. Most of the factories report some inquiries for employment, but not many, and very few from skilled men. The Bain Wagon Company reported that they have had some difficulty in securing good blacksmiths, and the Karn-Morris people stated that until recently they had some trouble in securing all the machine men and cabinet makers they needed. There is a good demand for girl labour. Both Bean & Westlake’s biscuit factory and the Oxford Knitting Company are looking for girls. The latter would take on ten or fifteen at once, and from fifty to seventy-five in the course of two or three months.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The musical instrument manufacturers, the wagon manufacturers, glove manufacturers, knitting factory, foundry and planing mills reported conditions very satisfactory and prospects good. Generally speaking they are working longer hours and with larger staffs than last year. The Tobin Arms Company will have its new gun factory in operation in a couple of weeks.

CONDITION OF PARTICULAR TRADES.

The building trades are quiet at this time of the year. About thirty men are employed on the transforming station for the Hydro-Electric power, and there is some inside work still in progress. Many carpenters, masons, plasterers, etc., find work in the factories or at other employments, and there is little complaint. Painters and paperhangers are fairly busy.

Moulders, stove mounters and iron workers report the conditions fairly good, especially when comparison is made with last year. A wagon factory reports a difficulty in securing first-rate blacksmiths.

Woodworkers, especially those employed in the factories are busy; but there is not a great demand for men. Varnishers and polishers are busy, but the factories seem to be fully supplied.

Printers generally, are busy; but there has been no demand for men this month.

Tailors and garment makers are fairly busy. The knitting factory is busy and there is a good demand for girl labour.

Cigar makers are well employed. A considerable improvement in the conditions of a year ago are reported. There are not very many inquiries for employment. Ice cutters have been busy. There is some demand for girl labour at biscuit and confectionery factories.

Saddlers report business very good.

Barbers have been steadily employed.

There is very little unskilled labour out of employment; but the demand seems to be pretty well supplied.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during February continued active though building operations were at a standstill, except on the Hydro-Electric power transforming station which is nearing completion. The building is about eighty-five feet long,

and sixty-four feet wide and is of red brick; twenty-five men, mostly carpenters were working on it this month. The building contractors are having a supply of brick and stone hauled, ready to make an early start when weather permits.

The Imperial Rattan Company has begun operations with thirty workers, for the manufacture of house and porch furniture; the Company intends to double their staff shortly.

A number of men and teams found employment keeping the walks and streets cleared of snow. The merchants reported trade very good. Factory employment was more active than during the corresponding month of last year. The Customs returns were \$9,391.08, an increase of \$2,372.65 over the corresponding month of 1909. The Excise returns totalled \$5,047.20.

No change in the rates of wages or hours of labour and no trouble in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were occupied with the care of stock and in marketing produce. Market prices were:—

Butter, 25c. per lb.
Eggs, 30c. to 35c. per dozen.
Chickens, 60c., each.
Potatoes, 70c., a bag.
Apples, 50c. to 70c., a bag.
Wheat (standard), \$1.04 per bushel.
Oats, 41c., per bushel.
Peas, 80c. to 83c. per bushel.
Barley, 48c. to 50c. per bushel.
Live hogs, \$8.25 to \$8.35, per cwt.

Manufacturing.—All factories were running full time.

CONDITION OF PARTICULAR TRADES.

Most of the building trades were at a standstill, as is usual at this time of year. Prospects are bright for the coming season.

Metal, iron moulders, workers and helpers were active.

Machinists, blacksmiths and boiler makers were busy.

Woodworkers, upholsterers, varnishers, carriage and wagon makers were busy. Coopers had a good business.

Printers were well employed.

Journeyman tailors and factory workers were busy.

Bakers, confectioners and butchers were fully employed, cigar makers found steady employment.

Barbers, clerks and delivery employés were active.

Hotel, restaurant and laundry workers were busy.

Railroad conductors, engineers and firemen were active, trackmen have been kept busy owing to the heavy snowfalls, cab drivers, draymen and teamsters were well employed.

Unskilled labour was quiet.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

An improvement was noted during the month in all indoor work, and the outlook is promising. Full time is being worked in all the factories and foundries, and overtime in some cases. In the building trades everything is at a standstill. Early in the spring the Geo. White Engine and Separator Works are to build some more large buildings in the east end, and remove there from the centre of the city. Building permits issued for January, were \$61,810, against \$24,800 for the same month last year, the most important being for the combined power station and pumping plant, for an addition to the city waterworks and for the Niagara power installations. This building was commenced last fall. Three carloads of steel have arrived for the hydro-electric towers, for carrying the transmission line to the power house, from transformer station. Cross arms are being strung throughout the city to carry the wires, and it is expected that the city's Niagara power plant will be in operation by midsummer.

A deputation from this city waited on the Ontario Government, to obtain a grant for the Western University here. The Trades and Labour Council assisted the movement.

CONDITION OF PARTICULAR TRADES.

In the *building trades*, fully fifty per cent. are idle. A large number of bricklayers went to the United States to work during the winter months.

Moulders and iron workers are busy. The local bolt and hinge works are to shut down on March 1, for two weeks or more, on account of a dissolution in partnership.

Carriage and wagon workers report trade fair. Car builders are busy.

Printers have been fairly busy. During the month an international law was voted on to increase the Mortuary benefit from \$75 to \$400. Pressmen were very busy.

Journeyman tailors report trade poor at the present time. Garment workers are busy. Boot and shoe workers are extra busy.

Ice cutters had a good month, and have a plentiful supply for the coming summer. Cigar makers report trade fair.

Tanners and curriers are very busy, and the business is being added to continually.

Railroad train crews have had to combat a lot of snow this month, but trade has been good. Teamsters got a lot of work removing snow from the down town streets, and from the street railway lines.

This has been a bad month for unskilled labour, and a large number were idle.

DISTRICT NOTES.

Goderich.—Two by-laws to grant a fixed assessment of \$500,000 for ten years to each of the Western Canada Flour Mills Company and the Goderich Elevator Company were voted on. Both by-laws carried. The success of these by-laws means that two new grain elevators will be built here, one as an annex to the Western Canada Flour Mills Company, and the other as an addition to the present large elevator. The income on taxes to the town will be increased by about \$6,000, as a result of the carrying of the by-laws.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of February was quiet in the building trades, due to the continued cold weather. Railway employes were well employed. A substantial increase in pay was granted to Michigan Central Railroad locomotive engineers, effective February 1. This increase was the result of a conference between official and representatives of the locomotive engineers. Under the new schedule, main line engineers on freight will receive \$3.85 per 100 miles in place of \$3.65, an increase of twenty cents per 100 miles. Engineers on passenger will receive \$3.75 per 100 miles in place of \$3.40, an increase of thirty-five cents. The rate governing local freight engineers will remain the same as heretofore.

It is the intention of the Michigan Central Railroad Company to inaugurate a telephone system to replace in part, the present telegraph system for despatching trains and transacting other business heretofore handled by telegraph. The information given to the public is to the effect that it is not the intention of the Company to replace telegraph operators where now installed, with men unable to do key work.

An effort is being made to have the City Council take more interest in Pinafore park and by liberal expenditure make this suburban play-ground a centre of attraction. It is felt by some that an appropriation for this purpose would do much towards placing the municipal railway on a paying business. The movement has the endorsement and support of the Trades and Labour Council members.

Unskilled labour was quiet during the month, the supply exceeding the demand. Considerable employment was occasioned by the heavy snowfalls which affected local railway and street railway traffic to a considerable extent.

In local industries the month was a

fair average. The Sutherland Innis Stave Factory reported the offering of logs satisfactory, and the result is that the prospects are good for an active summer.

The question of reducing the price of gas to consumers was discussed by the City Council Committee, but the proposed reduction did not materialize and the old rates will govern prices for a further period.

Negotiations are being carried on between members of the Industrial Committee and representatives of a concern desirous of finding a suitable location for the establishment of a factory to employ thirty-five skilled hands; the prospects of an agreement being reached are said to be bright.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The cold weather did not afford much opportunity for work among the farmers in this district, and as a result the only work that could be done was attending market, looking after stock and getting out wood and timber.

Manufacturing establishments were fairly well employed.

CONDITION OF PARTICULAR TRADES.

Very little work was done in the building trades during February, the continued cold weather preventing work from being carried on. Railway shop blacksmiths, machinists and metal workers were well employed during the month. The journeymen tailors reported trade quiet. A considerable amount of traffic was handled by the railways. Among unskilled labour, the supply was greater than the demand.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The building trades were very quiet during the whole month. Very few building permits have been issued so

far. Owing to the severe weather, a number of buildings that were contracted for have been held back. The consequence was that bricklayers were dull, but expect March to show improvement.

The month has been a good one for the carriage and wagon trade, some branches of Gray & Sons working overtime. The Chatham Wagon Works have a large number of orders in advance of 1909. Planing mills were not crowded with work, some were still on short time. All foundry and machine shops were on full time, with the full complement of men.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull. Carpenters and joiners, lathers and plasterers, painters, decorators and paper-hangers were quiet. Plumbers, gas and steamfitters were fairly busy, but builders' labourers were dull.

Iron moulders, iron workers and helpers, machinists and engineers were fairly well employed. Electrical workers and linemen were quiet. Metal polishers, buffers, plate and brass workers were very busy. Sheet metal workers slack, horseshoers had a good month.

Woodworkers, carriage and wagon makers were very busy.

Printers, pressmen and bookbinders reported a fair month.

Journeymen tailors, garment workers and boot and shoe workers were quiet.

Bakers and confectioners, butchers, cigar makers and tobacco workers reported trade up to the preceding month.

Barbers, clerks and laundry workers reported a fair month.

Cab drivers, carters and draymen were quiet.

For unskilled labour there was no demand.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market, during the month, was good,

notwithstanding the cold weather, except among the bricklayers. The building trades were fairly well employed, and manufacturers were running full time, with full staffs. Wholesale and retail merchants reported trade ahead of the same month last year. There is plenty of money in circulation among the farmers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had a good month. There is a good demand for produce, at high prices.

Manufacturing.—Manufacturers were all busy and the prospects are good.

CONDITION OF PARTICULAR TRADES.

Owing to the cold weather, bricklayers and masons were not working very steadily, although there was plenty of work when the weather permitted. The rest of the building trades were fully employed.

Iron workers and moulders have had a good month. In other lines of laundry work employment has been steady. Blacksmiths and sheet metal workers were very busy.

Woodworking and furnishing trades were active, with plenty of work on hand.

Printers and pressmen were very busy.

Tailors reported business a little quiet. Garment workers were in demand.

Food and tobacco workers were all fully employed.

Leather workers were busy on repair work. Barbers reported business fair. Clerks, hotel and laundry workers were all fully employed.

Train crews reported a good month. Steamboat men were all busy. Teamsters were slack.

Unskilled labour was fairly well employed.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As usual business was quiet during February, but prospects were bright

for a very busy summer. The supply of labour was slightly in excess of the demand, largely due to the fact that construction work was retarded by snow and cold. It is expected that a large amount of building will take place during the coming season, but so far no contracts have been awarded. There has been much discussion about the high cost of living, but comparison with other towns shows that this locality is favourably situated.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Quiet conditions prevailed.

Lumbering.—This industry was very active.

Manufacturing.—The Algoma Steel Company is pushing work on the enlargement to its plant, including docks, coke ovens, blast furnace, rolling mill for structural steel, etc.

Railway construction.—The Algoma Central & Hudson Bay Railway has advertised for tenders for the construction of about thirty-one miles of road. This line will run from the Helen iron mine north to the main line of the Canadian Pacific Railway.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet. Normal conditions prevailed in the other skilled trades.

PORT ARTHUR, FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment in February has been quiet, but the month compared favourably with the same month last year. No new works have been started and there has been no exceptional activity in any trade. Transportation and wholesale and retail trades have been quiet. There have been no changes in rates of wages. The trades have been without evidence of unrest, except that street railway employes are asking for an increase of wages and other improved conditions.

The outlook for the coming summer is healthy, there is every indication that a very busy building season will be experienced. Real estate is already moving and many plans are being prepared for blocks, public buildings and residences. The architects are all busy, preparing for the summer trade.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Lumbering this year has been very quiet.

Railroad construction.—Men have been engaged in Fort William and Port Arthur for railway construction on the Grand Trunk Pacific.

Agriculture.—In the agricultural townships of this district the farmers are forming Farmers' Institutes to discuss matters of interest, such as roadmaking, co-operation and experimenting in farm produce. These farmers' clubs have been useful to the farmers in buying stores on the co-operative principles. They are now discussing the advisability of grading their produce and sending to town markets co-operatively.

CONDITION OF PARTICULAR TRADES.

The building trades have been quiet, but as there has been some buildings going up and also some repairs to elevators being made, a fair number of men have been kept employed all winter, which is in marked contrast to last winter. All other trades have been quiet. Printers have had a steady month. Journeymen tailors have been very dull. The weather has been mild, with the exception of twelve days in the middle and end of February, when the cold was intense.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

At the present time, the number of men unemployed is less than usual for this season of the year. The immi-

gration department of the Provincial Government anticipates that there will be a dearth of labour for farmers as soon as spring opens up. This is probably in view of the fact that this year, according to statements made in the press, there will be more railroad building than in any previous year.

Trade continued active as reported last month. Wholesalers report that the demand for spring goods from all parts of the west, is exceptionally heavy.

Bank clearings continue to increase in volume at about the same rate as reported last month—approximately from thirty to thirty-five per cent.

A company has been incorporated that has for its object the establishment of a glue factory.

At the present time, a large number of men are employed in putting down the substructure of the new bridge, over the Assiniboine river, close to its junction with the Red river, in the city limits. Another large gang is employed similarly on the Grand Trunk bridge, over the Red river, at the foot of Lombard street. Other bridges of unusual size are being built in the Canadian west and the substructures will be down before the ice moves out of the streams.

During the month a large number of permits have been taken out for the erection of buildings during the ensuing building season.

There have been some important conventions held in Winnipeg. Various classes of agricultural and stock-breeding associations have been in convention at the Agricultural College, and retail associations of different classes, have met in the city. The retail lumber men of the provinces of Alberta, Saskatchewan and Manitoba are resisting the attempt of the British Columbia Mills to include in all shipments a certain percentage of odd lengths. Up to the present time the lumber shipped has all been of even lengths—that is six, eight, ten, twelve, fourteen or sixteen foot lengths, and the British Columbia mills want to send seven, nine, eleven, thirteen, fifteen, etc. The retailers object on the ground that the market has been accustomed to even

lengths and they will not be able to sell the odd lengths. The wholesalers say that there is a great deal of waste in cutting to even lengths.

The Executive Committee of the Grain Growers' Association of Manitoba has been in session and in conference with the Manitoba Government, with respect to the proposed adoption, by the Local Government of a system of Government elevators. They have agreed with the Government as to the terms of a measure with this object in view, with the exception of the appointment of the Commission that will have control. The Grain Growers desire to have the nomination of the Commission, and the principle involved will not be assented to by the Government. The Government have submitted to the Legislature a bill which enables it to expropriate existing elevators and to build new ones at points where sixty per cent. of the farmers undertake to patronize the Government elevator and no other.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The receipts of wheat during the latter part of the month have fallen off somewhat, as a result of the cold weather. The temperature has averaged from ten to thirty below zero. Prices however remain at a satisfactory level, although the export demand for wheat has not been very pronounced during the latter part of the month.

The report of the Department for Agriculture for Manitoba has been issued and shows that the amount of land ready for crop is slightly below the amount of the previous year. The acreage prepared for the crop of 1910, is 2,171,000, while the acreage prepared for the crop of 1909, was 2,275,000. A summary of the agricultural statistics shows the following figures:—

	Area in crop. Acres.	Average yield. Bushels.	Total yield. Bushels.
Wheat.....	2,643,111	17.33	54,774,000
Oats.....	1,373,683	37.1	50,983,000
Barley.....	801,008	27.31	16,416,000
Flax.....	20,635	12.29	253,000
Rye.....	3,007	16.9	50,000
Peas.....	1,454	17.5	25,000
Cultivated grasses.....			148,280 tons
Total grain crop.....			113,500,000 bus.

Milling.—About the only class of industry complaining of dullness are the millers. They say that both the domestic and export movement is slow. It looks as if dealers were either well stocked or waiting for lower prices.

CONDITION OF PARTICULAR TRADES.

A contract has been let out by the Western Canada Flour Mills for important extensions to plant in St. Boniface, which will involve an expenditure of approximately \$250,000. The plant additions, which are already under course of construction, will comprise a fireproof cleaning house, constructed of reinforced concrete, with a modern and up-to-date wheat cleaning outfit. The building for this installation will be 148 feet high, operated in connection with a wheat storage, having a capacity of 380,000 bushels.

Another undertaking of some magnitude is planned for Winnipeg. A joint stock company has been incorporated with a view to the erection of a fourteen-storey hotel at a cost of approximately \$1,000,000.

A barrel factory will be erected in St. Boniface very soon; it will get its staves and heads from a barrel stave and heading plant that is in the course of erection at Rainy river.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

February has been a very dull month, though not more so than the corresponding month of last year. With regard to distress through lack of employment, the conditions have not been grave.

It is fully anticipated that opportunities of employment during the spring will be much more numerous than in the corresponding months of last year.

Much building will be done during the coming season; several large business blocks, apartment buildings and hotels will be erected. Messrs Clement and

Clement have announced their intention of building a five-storey business block, of reinforced concrete. Mr. A. E. Bullock will build two apartment blocks, commencing as soon as weather permits. On the 28th, of the present month, the agreement, between the City Council and the Canadian Northern Railway will be voted on by the ratepayers; the agreement, if ratified, will give the Canadian Northern Railway the privilege of closing Lorne avenue, and for fifteen years will fix the assessment on their station buildings at \$20,000. The Company, on the other hand, agrees to erect together with the new station, a first-class hotel of not less than one hundred rooms.

Tenders are being called for the new Convent of St. Michael, the basement for which is already in.

The Manitoba winter fair opens the first week of next month, and will be one of the largest ever held in the city.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were all idle, but work was expected to start shortly. The majority of carpenters and joiners were busy. Lathers were dull, but plasterers were still busy. Stone cutters and builders' labourers were dull.

Iron moulders and electrical workers were busy. Machinists were active.

The printing and allied trades were active.

Cigar makers were active. Butchers were busy.

Railroad transport was fairly active, considerably more active than during the corresponding month of last year.

DISTRICT NOTES.

A delegation representing the Municipalities of Woodworth and Birtle attended the meeting of the City Council, asking that the Council assist them in getting the Provincial Government to make a grant to any railroad company building a line, northwest from the city, through the foregoing municipalities. The City Council expressed its sympathy,

and a committee was appointed to wait on the Honourable G. R. Coldwell in reference to the matter.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the past month, has been fairly active for the time of year. During the first two weeks of the month exceedingly mild weather prevailed, permitting considerable outdoor work. Building has been carried on to some extent during the entire winter, and the season will probably go on record as one of the best in several years, for those employed in the different branches of the building trade. Business in the retail and wholesale trade has been good. As spring approaches, active preparations are being made for what promises to be the most active building year in the history of the city. Several business blocks, at least two bank buildings, land titles' office, boys' college, addition to post office and city hall extensions, &c, are among the definite plans published to date. There will also be considerable civic improvements, including street paving. Among the season's probabilities is the building of a street railway system. Several propositions are being considered by the City Council at the present time.

CONDITION OF PARTICULAR TRADES.

There has been no work for bricklayers during the past month. Many carpenters, lathers, and plasterers have found employment, however. Painters, plumbers, electrical workers, linemen have all been dull. Blacksmiths, boiler-makers, machinists and engineers have been fairly active. Horseshoers, iron workers and helpers were busy; also printers. Clerks, hotel employés, barbers, theatre employés were fairly active.

CALGARY, ALTA., AND DISTRICT.

Mr. Edwin Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment was fairly active during February, and no change occurred as compared with the previous month. Considerable improvement was shown over the same month of last year. The very cold weather prevailing during the greater part of the month made it a dull month for bricklayers and masons, stone cutters and unskilled labour as soon as weather moderates work will commence on the double tracking of the line between Calgary Station and Calgary Junction, Canadian Pacific Railway, to accommodate the fast increasing traffic of Calgary. The Calgary Transmission & Power Company is taking bricklayers and labourers to Exshaw to commence the erection of its sub-station for the distribution of the power to be brought from Kananakis. Wholesalers and retailers report trade as moderate and about the same as previous month. The United Carpenters' Council of the City, has presented a demand to the employés for an increase in wage from forty-one and one-ninth to fifty cents per hour, and a schedule of agreements, the same to come into operation on July 1, 1910.

CONDITION OF PARTICULAR TRADES.

Carpenters, joiners, painters, decorators, plumbers, gas and steam fitters had a good month. Plasterers were fairly active, but bricklayers, masons, lathers and builders' labourers were dull. Sheet metal workers were active; electrical workers, linemen and horseshoers were busy. The other metal trades had a good month. Carriage and wagon makers reported satisfactory conditions; the other woodworking trades were moderately busy. The printing trades were busy. Journeymen tailors were active. Butchers were active, and bakers and confectioners were busy. Busy conditions prevailed among leather workers.

Clerks were busy; the other miscellaneous trades had a good month. Railway employés had a fair month; street railway employés, teamsters and expressmen were busy. Unskilled labour was quiet.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to the exceptionally mild weather the conditions of the labour market have shown a slight improvement over the previous month. There has been a fair demand for unskilled labour along the lines of the Grand Trunk Pacific and of the Alberta & Great Waterways' Railways.

The City Telephone Department expects to install between 700 and 800 new 'phones, this season, and will ask for a grant on capital expenditure of \$80,000 towards this work. Last year there were installed about 400 'phones, and about \$40,000 was expended. On the twenty-first instant, the ratepayers voted to expend \$75,000 on improvements in the East End Park and Exhibition grounds. A by-law to remove the present hay and produce market further north, also carried. The intention is to hold the old site on which to build a City Hall, which will be necessary in the near future.

A by-law to raise \$33,000 to purchase a site for a public library was defeated. At the annual meeting of the Board of Trade held recently, the president reported an increase in membership of 105 during the past year.

R. G. Dun & Company and Bradstreets Company, Limited have opened offices, also the Bank of Ottawa. The Imperial Bank has opened a branch office in the west end of the city.

Building permits for January amounted to \$44,090, as compared with \$20,240 for the corresponding month last year.

Bank clearings for January were \$5,243,160.75, and for January, 1909, \$3,580,021.51.

A comparison of statistics for the years 1908 and 1909 are as follows:—

	1908	1909
Customs' receipts	262,905	269,566
Bank clearings	38,496,510	51,561,020
Postal revenue	60,540	67,713
Money orders issued	206,550	237,218
Money orders paid in	243,582	342,146
Postal notes paid	37,700	38,297

The Royal Bank of Canada has purchased a site for a bank and office building.

The School Board has let the contract for a school in the west end; the estimated cost is \$95,000.

The year 1909 has witnessed the greatest progress along educational lines since the establishment of the Province, in September, 1905. At that time there were 562 schools. There are now 1,249.

The United Farmers' Association held their annual convention in this city the latter part of January. This was the most important convention in the history of the agricultural interests of the province, two hundred delegates being present. Definite action taken by the convention included the passing of resolutions urging the Dominion and Provincial Governments to secure and operate terminal and internal elevators, respectively; adopting the draft agreement re the Government pork packing plant; and adopting the principle of co-operation among the farmers of the different unions.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The amount of grain grown in this district, in 1909, was:

Wheat, spring	1,116,775	bus.
Wheat, fall	56,750	"
Barley	1,156,875	"
Oats	7,879,600	"
Flax	7,395	"
Total	10,217,395	"
Value	\$2,316,226	

The amount of grain grown, in 1908, was, 8,459,445 bushels, valued at \$2,055,287.

The Canadian Pacific Railway Company has purchased a large area in the north-west corner of the Hudson's Bay Company reserve, between Eighteenth and Twenty-first streets to be used for yards and work shops in connection with lines into the northern country.

Railway construction.—Contracts for supplies for the Alberta and Great Waterways Railway totaling \$3,000,000 have been awarded during the past few weeks. The President of the company says there will be 200 miles of the road completed next summer.

The Grand Trunk Pacific, Tofield-Calgary branch line being built under Provincial Government guarantee is completed as far as Camrose (about forty miles). The contract for the remaining 210 miles has been awarded to the J. D. McArthur Company, Limited, and will be completed by the end of the year.

The steel on the main line of the Grand Trunk Pacific is laid to Wolf creek, 120 miles west of the city, and the Company anticipates building to Tête Jeune Cache a distance of sixty-nine miles next summer.

Contractors are shipping on an average forty cars of freight per day to Wolf creek, and 2,000 teams are employed freighting west as far as the Yellow-Head pass.

Mining.—Mild weather since the beginning of the year has caused a decrease in the demand for coal, and miners have been working half time.

CONDITION OF PARTICULAR TRADES.

No changes in rates of wages or hours of labour were reported during the month in the building trades. With few exceptions skilled mechanics in the building trades were unemployed, especially the latter part of the month. The printing and allied trades were busy. Journeymen tailors were active. Bakers, butchers and meat cutters, ice cutters and cigar makers were active. Barbers and other miscellaneous trades were well employed. Railroad men were busy. The condition of the unskilled labour market was much better than in previous years.

NELSON, B. C., AND DISTRICT.

Mr. A. B. Dockstader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout Kootenay district, during the month of February, has been quiet, as was the case last month. A considerable number of men are idle at the Quartz mines, and in addition, this month there are a few unemployed coal miners in the Crow's Nest Pass district.

The free-gold mines in the Sheep Creek district, near Salmo, B.C., are progressing favourably and producing gold bricks with regularity, and while several of the new prospects in that locality are developing favourably, the oldest or original producing mine of that camp has larger ore bodies in sight than at any previous time.

The Sullivan mines, near Kimberly, in East Kootenay, are now operated by a force of about fifty men for the Canadian Consolidated Mining and Smelting Company, of Trail, B.C., to which smelter the ore is being shipped.

The Young Men's Christian Association building in Nelson is nearing completion, and it is expected that it will be ready for occupation within the next month.

The Hosmer Coal Mines are continuing to develop favourably, about 500 men being employed, and about half their coke-ovens being in operation. The Company intends installing a washer to separate the rock from the coal, in the near future, when the quality of the coal will be the best, and the quantity produced largely increased.

CONDITION OF LOCAL INDUSTRIES.

The Coal Creek collieries are now employing a force of about 1,200 men, and the tonnage produced has increased recently, the tonnage at present produced being about 2,300 tons daily, and it is expected that will be increased considerably in the coming months; however,

it is reported that the average wages earned by the miners at this mine during the past year have been lower than in former years.

Harmonious relations exist between employer and employés throughout the district.

NEW WESTMINSTER, B. C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of February showed but slight improvement over last month, the wet weather retarding activity in all out of door work. In consequence there were a number of men idle (principally labourers).

Two wholesale grocery firms of Vancouver, have opened branches in this city in temporary quarters, and intend to build at an early date.

The returns of the land registry office for the month of January, show that property valued at \$1,250,000 changed hands during the first thirty-one days of the year, bringing in a revenue in fees of \$5,000, about double the amount realized from the same source last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Very little practical work was in progress, owing to the time of the year.

Fishing.—Operations were practically at a standstill.

Lumbering.—General activity prevailed. All the mills working at their full capacity.

Railroad construction.—The British Columbia Electric Company intends, in the very near future, to commence building extensive terminals, including freight sheds, in this city.

Manufacturing.—The Western Canada Paper and Boxboard Company has commenced clearing its property, preparatory to erecting a factory. The building will be 300 feet long by 250 feet wide,

and will employ 200 persons. The Company estimates its output at 20,000 pounds per day.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet, and builders' labourers were very dull, but plumbers and gas and steamfitters were busy.

Iron moulders, iron workers and helpers were fairly active. Machinists, engineers, linemen, blacksmiths, sheet metal workers and horseshoers were busy. Ship builders were quiet. Jewellers were fairly busy.

In the woodworking and furnishing trades all branches very quiet, with the exception of car builders and shingle weavers who were fairly active.

All the printers are employed, with pressmen active.

Journeymen tailors were fairly active.

Bakers and confectioners, butchers and cigar makers were all busy.

Barbers were all active, with clerks and stenographers fairly active, and hotel employes very busy.

Railway employes were quiet, but teamsters and expressmen were active.

Unskilled labour was very dull.

VANCOUVER, B. C., AND DISTRICT.

Mr. George Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As compared with the previous month the demand for labour has been approximately the same. The continued wet weather caused outside work to be very quiet. Skilled workers in general, were fairly active, excepting cigar makers and tailors, which were very quiet.

Business generally has developed larger proportions during the month of February. Bank clearings increased.

A marked activity in the real estate is evident. Much higher prices were paid for lots and buildings in the centre of the city than have been current for the past year. Sub-divisions four and five miles from the post office are being

largely advertised, especially those at North Vancouver.

The owners of teams acceded to the request of the teamsters to set in force a nine-hour day for city teaming after March 1, instead of continuing the ten-hour work day.

The City Council passed a resolution suggesting that the Provincial Government take over all lines in the province.

An eight-storey building will be erected at the corner of Hastings and Howe streets, seventy-eight by 120 feet.

The New England Fish Company reported the arrival of 120,000 pounds of halibut, the selling price of which is eight cents per pound, an increase of one cent. In the United States it is eleven and one-half and twelve cents wholesale.

CONDITION OF LOCAL INDUSTRIES.

The Amalgamated Association of Carpenters, and the Brotherhood of Carpenters and Joiners increased their affiliation fee to \$10.00.

The new post-office will be occupied on March 1.

CONDITION OF PARTICULAR TRADES.

In the building trades all departments reported trade quiet, not because of lack of work, but the weather conditions.

Iron moulders, workers and helpers reported trade fairly active. Blacksmiths and horseshoers were active.

Linotype operators were busy, also job printers.

Waiters reported that the demand for men exceeded the supply; \$14.00 a week and board is the rate paid.

VICTORIA, B. C., AND DISTRICT.

Mr. W. E. Ditchburn, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the latter part of January, and up to the middle of February, all skilled tradesmen, with the possible exception of some of those in the building

trades, have been constantly employed. Those employed in the building trades have worked about half time, owing to unfavourable weather conditions. This state of affairs also applies to unskilled workmen. It is expected that after the end of the present month conditions will be much improved as by then the winter will be practically over, and everybody will be working full time again. In the building trades, the prospects are exceptionally bright for another prosperous year. Already a commencement has been made on the new home for the Young Men's Christian Association, to cost in the vicinity of \$100,000; also the new McCallum block on Douglas street, to cost \$30,000. The contract has been let for the new "Times" building; and the contract has also been let during the month for the new wing of the Empress Hotel. The British Columbia Hardware Company are about to build a very large warehouse and Messrs. Brown and Cooper intend putting two more storeys in the premises on Government street, as well as putting up a new building for their own use on Gordon street. This amount of new buildings, with the great amount of building already on hand, should give constant employment to all those employed in this line of business, for many months to come. During the month of January there were forty-two building permits taken out of the city hall, as compared with thirty-nine for January a year ago, while the number of permits issued during January of this year was not much greater than those of the same month a year ago, the amounts involved show a great increase in favor of January, 1910, being \$128,000, as compared with \$78,000 for January, 1909, an increase of sixty-five per cent. over 1909, and 128 per cent. over the same month of 1908.

The bank clearings for January, made a heavy advance over the same month of last year, and in fact, any other year in the history of the city. The figures were \$7,390,767. The following is a list of the clearings for the month of January during the past five years.

1910.....	\$7,390,767
1909.....	4,235,476
1908.....	4,391,095
1907.....	3,909,509
1906.....	3,517,434
1905.....	3,205,685

The month of January was a record breaker in the matter of real estate transactions. Deals aggregating over three millions of dollars were put through. The bulk of the business has been confined to inside or business section property.

January was also a very busy month in the hotel business, every hotel in the city being filled up during the whole of the month. The amount of tourist travel has been much greater during this present winter than for some time past. There has also been a greater number of commercial travellers arriving here than has been the case in the past.

Both wholesale and retail trade was reported as good, though in the retail boot and shoe business there has been several "slaughter sales" going on for some time. These sales have been caused mostly by merchants having to move out of their present premises, to make way for others who are willing to pay the advance in rents now asked for Government street stores.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners have had plenty of work to do, but on account of unfavourable weather conditions they only succeeded in getting in about half time. Lathers, plasterers and plumbers were well employed, as also were painters working on inside work.

Iron moulders, iron workers and helpers and machinists found steady work during the month. Blacksmiths and boilermakers also were well employed; iron shipbuilders and shop carpenters and caulkers worked principally on repair work. Horseshoers had all the work they could do.

Work is still brisk in the woodworking business here owing to the great amount of fixtures being gotten out for new buildings being constructed. Polishers

also found work in plenty. Carriage and wagon makers and pattern makers were kept busy.

Printers, both news and job, find that business has improved during the month. The Government printing office has taken in some extras, for the sessional work, the Legislature now being in session. There are now no idle printers in the city.

Journeyman tailors and garment workers found their trades in about a normal condition.

Harness makers were kept constantly employed during the month in regular work.

Bakers and butchers were steadily employed during the month. Cigar makers say trade is a little slow this month, but this is the usual state of affairs at this season, every year.

Ship labourers and street railway employés were kept well employed during January.

Unskilled labour was employed only about half time during January, on account of wet weather.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. W. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market in this district have not shown much change during the month. The principal industries have been working steadily while outside labour has been affected by the exceptionally mild weather.

Business among wholesalers and retailers has been good, though usually very quiet.

There have been no changes in rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There has been very little work among the farmers this month.

Fishing.—The herring fishing has just closed for the season and while some are complaining, the majority have done fairly well. There have been far more men engaged in the fishing this year than ever before and large expenditures made for warehouses and other buildings. Industry is controlled by the Japanese, very few Canadians being able to get work.

Lumbering.—The sawmills of the district were working actively, there being a good demand for lumber. The logging camps were not doing much, most of them being closed until the weather opens.

Mining.—The coal mines of the district are working to their full capacity and can hardly keep up with the demand.

Railroad construction.—There is very little railroad construction work in progress owing to the weather. The same applies to the clearing operations of the Canadian Pacific Railway Company.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have not done much during the month. Carpenters and joiners reported work as quiet, owing principally to weather conditions. Painters and paper hangers were quiet, but plumbers were active. Builders' labourers have not done much. Machinists and engineers were quiet, but blacksmiths and carriage makers reported work active. Printers report work as active. Cigar makers reported work as active for the time of year. Teamsters and expressmen reported work active. Unskilled labour has not been very well employed during the month and there are a number of men looking for work, though not as many as is usual at this time of year.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF FEBRUARY, 1910.

ON February 5, a communication was received in the Department from certain employés of the Canadian Gowganda Silver Mining Company, members of Gowganda Miners' Union, No. 154,

Western Federation of Miners, of Gowganda, Ont., in which it was stated that notice had been given by this Company of a proposed reduction in wages and change in hours, effective from the first of

February, and that at a meeting of the employés, on February first, it was decided to apply for a Board of Conciliation and Investigation to which matters in dispute between the Company and its employés might be referred for adjustment. As the application in question was not in the form prescribed under the terms of the Industrial Disputes Investigation Act, 1907, no Board could at once be established, and communication was had with the employés affected, in which the latter were informed of the requirements of the Act. On February 17, a further communication was received from the employés to the effect that the matters in dispute between the company and its workmen had, in the meantime, been settled and that it was now unnecessary to request a Board.

On February 12, a communication was received requesting the establishment of a

Board in the case of a dispute between the Michigan Central Railroad Company and its Maintenance-of-Way employés, in Canada, to the number of 358, members of the International Brotherhood of Maintenance-of-Way Employés. The application was held for amendment in certain respects, and it is understood that, in the meantime, negotiations leading to a settlement were resumed and were under way at the end of the month.

It was understood by the Department that during the month of February, the Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act, for the adjustment of certain differences between the British Columbia Copper Company, of Greenwood, B.C., and its employés assembled in that place, but at the end of the month the report of the Board in this matter had not been received.

REPORT OF BOARD ON MATTERS IN DISPUTE BETWEEN THE GRAND TRUNK RAILWAY COMPANY AND ITS TELEGRAPHERS AND STATION AGENTS.

ON February 24, the report was received by the Minister, of the Board of Conciliation and Investigation, which had been established, on December 7, for the adjustment of certain matters in dispute between the Grand Trunk Railway Company and its telegraphers and station agents to the number of 760, employed on the Company's lines east of Detroit. The differences in question related to a demand on the part of the employés for an increase of wages, extra pay for Sunday work, annual vacations without loss of salary, advertising of vacancies and the adoption of a wage scale in the form of a schedule. Mr. Wallace Nesbitt, K.C., of Toronto, and Mr. W. T. J. Lee, of Toronto, were appointed members of the Board on the recommendation of the Company and of the employés respectively, and, in the absence of any joint recommendation from the foregoing, the Board was completed by the Minister, on December 21, by the appointment of Mr. J. E. Atkinson, of Toronto, as chairman. The Board assembled in Montreal, the Grand Trunk Railway Company being represented by

Mr. Chas. M. Hays, president; Mr. E. H. Fitzhugh, first vice-president; and Mr. W. G. Brownlee, general transportation manager; and the telegraphers being represented by Mr. D. Campbell, third vice-president of the Order of Railroad Telegraphers, and Messrs. J. A. Bell, A. E. Austin, P. A. Robertson, V. Mongeau and B. J. Rowell.

In the hearing it was asked that the men on the Canada Atlantic Railway should be brought under the same schedule as the other lines east of Detroit. The Company in reply, announced that the employés, in question, would be brought under one schedule with the Company's other telegraphers and agents, but that only the portion of the road between Swanton and Ottawa should be classed as "Main Line", and the remainder as, "Branch Line." It was proposed by the employés that the "23" message should be adopted by the Company, by which all the men in a division would be notified by bulletin, five days in advance of all vacancies and permanent positions coming under the schedule, and ten days allowed the men during

which to file applications for the same. The Company was unwilling to agree to this proposal. It was also proposed by the men that an official wage list should be published showing the salaries of all positions governed by the schedule. The Company was, however, unwilling to agree to the publication of a wage list. The Company, moreover, could not see its way to shorten the hours of the day's work, nor to accede to any other of the men's proposals. On the point of wages, however, it expressed its willingness to add, \$14,000 to the pay roll covered by the schedule of January 1, 1908, and \$4,000 to the Canada Atlantic schedule, to be apportioned as the Company would decide but without making it apply necessarily to the minimum salaries. The Company's position was that the financial condition of the Grand Trunk, and its obligations to its shareholders, would not warrant giving the men more than this. The proposal in question was not acceptable to the men, who pointed out that the employés on the Canada Atlantic would, by the abolition of their separate schedule, lose the two weeks' holidays which they at present enjoy.

The Board were unanimous in agreeing that the rules and rates of pay governing agents and telegraphers, effective January 1, 1908, should remain in effect, subject to certain exceptions, and that the same should become effective upon the Canada Atlantic Railway whose lines should be classed as "Branch Lines" except from Swanton to Ottawa. The Board were also unanimous in the opinion that Article 21, of Rules and Rates of Pay, of January 1, 1908, should be amended so as to provide for minimum salaries per month, as follows:—

	Main Line.	Branch Line.
Agent and telegrapher, with dwelling, fuel and light.....	\$50	\$46
Agent and telegrapher, without dwelling, fuel and light.....	55	51
Telegraphers.....	50	46
Relieving agents or telegraphers' relieving agents.....	75	75

A regular telegrapher called away from home to relieve a telegrapher will be paid a minimum rate of \$5 more than his regular salary.

The Chairman and Mr. Lee were of opinion that the Company should also be asked to increase salaries by an amount equal to six per cent. of the schedule of January 1, 1908. Mr. Nesbitt, on the other hand, considered that after accepting the above new minimum salaries the Company would be meeting the needs of the case by distributing \$12,000 to salaries which were above the minimum of the schedule of January 1, 1908. Upon the question of extra pay for Sunday work, Mr. Nesbitt considered that if the Company would recognize the amount of Sunday labour as one factor influencing the distribution of the above mentioned amount of \$12,000, it was as far as it could be asked to go. The Chairman and Mr. Lee were agreed that the Company should be asked to substitute for Article thirteen of the schedule of January 1, 1908, the following:

13. Telegraphers required to work on Sundays will be paid extra for such work *pro rata* on schedule salary based on a thirty-day month (less than thirty minutes not to be counted—over thirty minutes and less than sixty minutes to be counted as one hour) with a minimum compensation of twenty-five cents for each call for which one hour's service shall, if necessary, be rendered.

It was also proposed, in the report of the Board that the rules and rates of pay therein provided for, should be effective, February 1, 1910, and thereafter, subject to ninety days' notice of change.

Report of Board.

The text of the findings of the Board is as follows:—

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of differences between the Grand Trunk Railway Company, of Canada, and its employés, being telegraphers and station agents.

As members of the Board of Conciliation and Investigation appointed to deal with the dispute between the Grand Trunk Railway Company and its employés, being telegraphers and station agents, we beg to report as follows:

The Grand Trunk Railway Company was represented by Mr. Charles M. Hays, president; Mr. E. H. Fitzhugh, first vice-president, and Mr. W. G. Brownlee, general transportation manager.

The telegraphers were represented by Mr. D. Campbell, third vice-president of the Order of Railroad Telegraphers, and Messrs. J. A. Bell, A. E. Austin, P. A. Robertson, V. Mongeau and B. J. Rowell.

The Board met at Montreal and held sittings on the 8th, 9th and 14th days of February, 1910, and subsequently met for consideration and interviews with the parties on the 16th, 17th, 18th, 21st, and 22nd days of February, 1910.

The men proposed that a number of changes should be made in the existing schedule of rules and rates of pay.

Two of these proposed changes may be linked together, namely, (1) the "23" message by which, if adopted, all the men in a division should be notified by bulletin five days in advance, of all vacancies and permanent positions coming under the schedule, and ten days allowed the men during which to file applications for such vacancies; and, (2) in order that the salaries attached to all positions may be known to the men, they asked that an official wage list showing the salaries of all positions governed by the schedule be attached and become part of the schedule.

Overtime pay was asked for work done on Sundays and legal holidays, the pay to be *pro rata* on schedule salary.

Overtime pay for meeting late or early trains outside the hours covered by the day's work had been limited to those whose salary, including receipts from all sources, during the preceding year did not exceed, \$60 per month.

The men asked that this limitation should be eliminated.

They asked that ten consecutive hours, including meal hour, should constitute a day's work at offices where one or two telegraphers are employed, and that eight consecutive hours, including meal hour, should constitute a day's work at offices where more than two telegraphers are employed.

The men asked that article thirteen, of the schedule which provides conditionally that work on Sundays and certain legal holidays be paid for extra, should be made to apply unconditionally to all men coming under the schedule.

Two weeks' holidays, with pay each year, were asked for.

It was asked also that the men on the Canada Atlantic should be brought under the same schedule as the other lines east of the Detroit and St. Clair rivers, and that the Canada Atlantic should be classed as a "Main Line."

On the question of wages, the men asked for increases ranging from twelve and one-half per cent. to seventeen per cent.

In reply to these propositions the Company announced at the outset, that the Canada Atlantic employes would be brought under one schedule with the Company's other telegraphers and agents. It proposed, however, that only the road between Swanton and Ottawa should be classed as "Main Line", and the remainder as "Branch Line."

The Company did not agree to the "23" message and the publication of the wage list.

It could not see its way to agree to shorten the hours of the day's work, nor to any other of the men's proposals.

On the point of wages, however, it expressed its willingness to add \$12,000 to the pay roll covered by the schedule of January 1, 1908, and \$4,000 to the Canada Atlantic Schedule, or a total of \$16,000 to be apportioned as the Company would decide, but without making it apply necessarily to the minimum salaries.

This was not acceptable to the men. They pointed out that the men on the Canada Atlantic would, by the abolition of their separate schedule, lose the two weeks' holidays which they enjoy under it. So that taking from the proposed \$4,000, therefore, the amount represented by the loss of holidays, the total sum of money which the Company proposed to distribute would be reduced to less than \$16,500 a year. With this increase they would not be satisfied.

The Company's position was that the financial condition of the Grand Trunk, and its obligations to its shareholders, would not warrant giving the men more than this.

The Board, after very fully going into every point raised by either party, and

giving careful consideration to the interests of the men on the one side and the position of the Company on the other, were unanimous in agreeing that the rules and rates of pay governing agents and telegraphers, effective January 1, 1908, should remain in effect subject to the exceptions hereinafter noted, and, with the same limitation, should become effective upon the Canada Atlantic Railway, whose lines should be classed as "Branch Lines" except from Swanton to Ottawa, which should be classed as "Main Line", the schedule of the Canada Atlantic of 1907, to be cancelled.

The members of the Board were also unanimous in the opinion that article twenty-one of rules and rates of pay of January 1, 1908, should be amended, so as to read as follows:—

21. The minimum salary per month will be as follows:—

	Main Line.	Branch Line.
Agent and telegrapher, with dwelling, fuel and light.....	\$50	\$46
Agent and telegrapher, without dwelling, fuel and light.....	55	51
Telegraphers.....	50	46
Relieving agents or telegraphers' relieving agents.....	75	75

A regular telegrapher called away from home to relieve a telegrapher will be paid a minimum rate of \$5 more than his regular salary.

At this point the unanimity of the Board ceased. The Chairman and Mr. Lee were of the opinion that the Company should be asked to increase salaries by an amount equal to six per cent. of the schedule of January 1, 1908. That in order to effect this it should be ascertained what amount of money represents six per cent. of the annual wage list, and that after the increases rep-

resented in the above minimum salaries be deducted from that amount, the balance should be divided and apportioned by the Company to salaries which are above the minimum schedule of January 1, 1908.

Mr. Nesbitt on the other hand, considered that after accepting the above new minimum salaries the Company would be meeting the needs of the case by distributing \$12,000 to salaries which were above the minimum of the schedule of January 1, 1908.

Upon the question of extra pay for work on Sundays, Mr. Nesbitt considered that if the Company would recognize the amount of Sunday labour as one factor influencing the distribution of this \$12,000, it was as far as it should be asked to go.

The Chairman and Mr. Lee went further than this, and agreed that the Company should be asked to substitute for article thirteen, of the schedule of January 1, 1908, the following:—

13. Telegraphers required to work on Sundays will be paid extra for such work *pro rata* on schedule salary based on a thirty-day month (less than thirty minutes not to be counted, over thirty minutes and less than sixty minutes to be counted as one hour) with a minimum compensation of twenty-five cents for each call for which one hour's service shall, if necessary, be rendered.

As amended in accordance with the report herein of the majority of the Board the rules and rates of pay should be effective February 1, 1910, and thereafter, subject to ninety days' notice of change.

(Sgd.) J. E. ATKINSON,
Chairman.

WALLACE NESBITT,

W. T. J. LEE.

Toronto, February 22, 1910.

LABOUR ORGANIZATION IN CANADA DURING 1909.

TABLES are published herewith containing a list, by industries and groups of trades, of the labour organizations formed and dissolved in Canada during the year 1908, with details relating to locality, date of organization and other particulars.*

The tables, with accompanying matter, are designed to present an analytical review of the progress of labour organization in the Dominion during the past calendar year, and are similar in form and scope to the annual reviews previously published by the Department each year since 1903.

The General Result.

According to information received by the Department up to the end of February, 1910, the total number of labour organizations formed in Canada during 1909, was 162, and of organizations dissolved, ninety. This represents an actual increase of seventy-two in the number of organizations in existence. There was a decline of thirty-five in the number of organizations formed, compared with the preceding year, but the number of organizations dissolved was the same. The net gain of seventy-two shown in 1909, compares with a gain of 107, in 1908; 174, in 1907; sixty-nine, in 1906; a loss of two in 1905; a gain of forty-four in 1904, and a gain of 221, in 1903, the last mentioned being the year in which the formation of labour organizations was most active since the record of the Department was established.

*The tables are based on information collected by the Department of Labour during the year from the daily press, the trade journals of the different central labour organizations, and other sources, details having been obtained or verified by correspondence with the secretaries of unions, the organizers of central bodies, the correspondents of the *Labour Gazette*, and other persons in a position to furnish accurate information. Instances may have occurred of labour organizations in particular localities having been formed or dissolved without the fact being reported to the Department, though the extent of organization and dissolution in the several trades or provinces is indicated, it is thought, with considerable accuracy in the table. It was found especially difficult, however, in some instances to obtain exact information with regard to the causes leading to the surrendering of charters.

The Record by Industries and Trades.

The following is a statement by industries and groups of trades, of the labour organizations formed and dissolved in Canada during 1909:

Trades and Labour Councils.—Trades and labour councils were organized during 1909, at Sherbrooke, Que., and at Saskatoon, Sask., and a United Trades Council, at Toronto, Ont., Two councils went out of existence during the year, one at St. John, N.B., and one at Chatham, Ont., respectively.

Fishing.—Stations of the Fishermen's Union, of Nova Scotia, were formed at Red Head, N.S., and at West Berlin, N.S.

Lumbering.—The Lumber Handlers' Union, of Vancouver, B.C., went out of existence.

Mining.—The United Mine Workers of America organized a District Union and thirteen local unions in Nova Scotia, and nine local unions in Alberta. The Western Federation of Miners organized local unions at Elk Lake and Gowganda, Ont. Thirteen lodges of the Provincial Workmen's Association ceased to meet, all in Nova Scotia, Four unions of United Mine Workers were dissolved, one in Nova Scotia, one in Saskatchewan, one in Alberta and one in British Columbia. Two unions of the Western Federation of Miners, both in British Columbia, went out of existence.

The building trades.—A Building Trade Council was formed at Montreal, Que., and another, at Lethbridge, Alta., A National Union of bricklayers and masons was organized at Beauport, Que., but four International Unions of bricklayers and masons, all in Ontario, were dissolved. Among carpenters, ten branches of the United Brotherhood of Carpenters and Joiners were organized, and eight went out of existence, while seven branches of the Amalgamated Society of Carpenters and Joiners were dissolved. An Operative Plasterers' Union was formed at Lethbridge, Alta., while the Wood, Wire, and

Metal Lathers' International Union organized two branches, and dissolved, one. The Brotherhood of Painters, Decorators and Paperhangers of America formed five unions and dissolved, one; while the United Association of Plumbers, Gas Fitters, Steamfitters and Steamfitters' Helpers organized one branch, at Saskatoon, Sask. Three branches of the Journeyman Stonecutters' Association, all in Alberta, were formed, as was an International Union of Tile Layers and Helpers, at Vancouver, B.C. Two Canadian Granite Cutters' Unions, both in Ontario, and one Granite Cutters' Association, at Victoria, B.C., were dissolved. The Hod Carriers and Building Labourers' Union formed one branch at Regina, Sask., and another, at Lethbridge, Alta.

The metal, engineering and shipbuilding trades.—A Metal Trades Council was formed at Vancouver, B.C. The International Moulders' Union formed one branch, and a branch each of the Iron Moulders' Union of North America and the Iron Moulders' Helpers' Union were dissolved. Three branches of the International Association of Machinists and two of Machinists' Helpers were formed. The International Union of Steam Engineers formed eight branches and dissolved one. An International Union of Elevator Constructors and one of the International Union of Electrical Workers were formed, and one of the latter dissolved. Two branches of the Metal Polishers, Buffers and Platers International Union were organized, and one went out of existence. The International Brotherhood of Blacksmiths organized two branches and dissolved two. A branch of the International Brotherhood of Boilermakers and Iron Shipbuilders was formed at Rivers, Man.; one of the Amalgamated Sheet Metal Workers' International Alliance, at Victoria, B.C., and one of the International Association of Bridge and Structural Iron Workers, at Midland, Ont. Three branches of the last named, two of the International Stove Mounters and Steel Range Workers' Union, one of the Allied International Association of Metal Mechanics, one of the Ornamental Iron, Wire and Grill

Workers' Union, and one of the Amalgamated Sheet Metal Workers' International Alliance went out of existence.

The woodworking and furnishing trades. In these trades, a branch of the Amalgamated Wood Workers' International Union and of the Pattern Makers' League of North America, were formed, the former at Berlin, Ont., and the latter at Winnipeg, Man. A Coopers' International Union was dissolved at Winnipeg.

The printing and allied trades.—Six International Typographical Unions were formed in 1909, three printing press feeders and assistants' unions, and one Canadian typographical union. One union of the International Brotherhood of Bookbinders was dissolved.

The clothing trades.—Two Journeymen Tailors' Unions, two International Boot and Shoe Workers' Unions, and one Cutters and Trimmers' Union were formed; and an International Union of Glove and Mitt Workers and a National Union of Shoe Die Workers went out of existence.

The textile trades.—Two unions were formed, and two dissolved, the former being a Union des Fileurs du Canada, at Montmorency, Que., and a branch of the United Textile Workers of America, at Magog, Que., the former being a branch of the Federation of Textile Workers of Canada, and the latter affiliated with the International Union.

The food and tobacco preparation trades.—The International Union of the United Brewery Workmen, formed three branches and one local was dissolved. A Chef and Cooks' Union, at Toronto, went out of existence.

The leather trades.—One union was formed and one union dissolved, the former being a branch of the United Brotherhood of Leather Workers, on Horse Goods, at Montreal, Que., and the latter a branch of the same association, at Gananoque, Ont.

Hotel, restaurant and theatre employés.—In this group three branches were formed, a Hotel and Restaurant Employés International Alliance Union, at Fernie, B.C., a branch of the International Alliance of Theatrical Stage Employés, at Victoria, B.C., and a branch

of the Moving Picture Machine Operators, at Toronto, Ont.

Railway service.—The Canadian Brotherhood of Railway Employés formed six branches; the Order of Railway Conductors, one; the Brotherhood of Locomotive Engineers, one; the Brotherhood of Locomotive Firemen and Enginemen, three; the Brotherhood of Railroad Trainmen, two; the Brotherhood of Maintenance-of-Way Employés, thirteen; the Railroad Helpers and Labourers, one. The Commercial Telegraphers' Union of America (Canadian Pacific System Division No. 1), including lodges from Halifax to Vancouver was formed. This Union absorbed eight local unions of the same employés. The Railway Service Unions dissolved during the year were, Brotherhood of Railway Clerks, one; Brotherhood of Railway Carmen, seven; and International Brotherhood of Maintenance-of-Way employés, three.

Street railway employés.—The Amalgamated Association of Street and Electric Railway Employés formed one, and dissolved one union, the former, at Port Arthur, Ont., and the latter at St. John, N.B.

General transport.—A Union of the International Brotherhood of Teamsters was formed at Calgary, Alta., and two team drivers' unions, one at St. John, N.B., and one at Vancouver, B.C. were dissolved.

Navigation.—Two branches of the National Association of Marine Engineers, and one each of the United Brotherhood of Longshoremen and of the Canadian Association of Masters and Mates were formed and two branches of the International Longshoremen's Association, and one of the Surface Rock & Submarine Drill Workers' Union became extinct.

Miscellaneous.—The Civil Service Federation of Canada was formed at Ottawa, and a Civil Service Association at St. John, N.B.; Journeymen Barbers formed three unions and the Federated Association of Letter Carriers, two; A Re-

tail Clerks' Association was also formed and a Canadian Musicians' Union. One branch of each of the following unions went out of existence; the Retail Clerks' International Protective Association; the International Brotherhood of Paper Makers, Pulp, Sulphite and Paper Mill Workers; and the International Glass Workers' Union.

Civic employés.—A Civic Park Employés' Union was formed at Toronto, Ont.

General.—Three Federal Labour Unions were formed, at Ottawa, Ont., Guelph, Ont., and Saskatoon, Sask., respectively, together with a Woodcutters' Association, at Winnipeg, Man., and a Workingmen's Association at Prince Rupert, B.C.

Aggregate Results by Industries and Groups of Trades during the past Six Years.

It will be seen from the table that there has been an increase in the number of organizations in existence in all of the industries and groups of trades with the exception of the lumbering industry, the leather trades and the general transport branches, in each of which there has been a net loss of one. In the textile trades and among street railway employés, the number remained unchanged. The most pronounced gain was among railway employés, who organized twenty-eight new unions and dissolved eleven, a gain of seventeen. The printing trades increased by thirteen, the metal trades by nine, the miscellaneous trades by six, the building and general labour branches by five each, the clothing and hotel, restaurant and theatre branches by three each, and the food and tobacco preparation trades by two.

The accompanying table sets forth the aggregate number of labour organizations formed and dissolved in Canada during 1909, according to industries and groups of trades, compared with the years 1904, 1905, 1906, 1907, 1908 and 1909:

Though Ontario heads the list in 1909, as in previous years, in the number of organizations formed and dissolved, it no longer shows the largest net gain among the Provinces, Alberta leading in this respect, with an increase of seventeen. Ontario comes second, with an increase of fifteen and Saskatchewan third, with an increase of fourteen.

Record by Months of Labour Organizations formed, 1904, 1905, 1906, 1907, 1908 and 1909.

The Department secured information with regard to the date of formation of 128 labour organizations formed during 1909, compared with 129 during 1908, 171 during 1907, 127 during 1906, ninety-four during 1905, 113 during 1904, and 243 during 1903. The record by months for these years is shown in the following table:

**REMEDIES FOR STRIKES AND LOCKOUTS.--EXHAUSTIVE REPORT OF
SPECIAL LABOUR COMMISSION OF CALIFORNIA.—MEASURE
ON LINES OF INDUSTRIAL DISPUTES INVESTIGATION
ACT.**

A REPORT by Mr. Harris Weinstock, Special Labour Commissioner of the State of California, is of more than common interest to Canadian readers, because of the emphatic conclusions of its author in favour of the principle of compulsory investigation of disputes, on the lines constituting the basis of the Industrial Disputes Investigation Act, 1907, the report closing, moreover, with a recommendation for the enactment, by the State of California, of a measure providing for such procedure, and which, as submitted in draft form by the Commissioner in his report, closely approximates the Canadian law. At the close of his report, Mr. Weinstock mentions that after a careful inquiry into this subject in many countries, he had arrived at these conclusions only to find them anticipated by the experience of the Canadian Act, as set forth in a report of the Department, which reached him while in Paris a year or two ago.

"My satisfaction," writes Mr. Weinstock, "can be understood when I found among other documents in this collection, the first annual report just issued by the Canadian Labour Department of the operation of the Act, which showed that ninety-seven per cent. of the labour disputes submitted to a public inquiry had been amicably adjusted, and that in only three per cent. of cases inquired into had there been strikes after an award was made."

"Here" continues the Commissioner, "we have a most striking illustration of the difference in effectiveness between voluntary arbitration and public inquiry. Under voluntary arbitration, having behind it all the machinery and influence of the State, there are strikes and lockouts in about ninety-seven per cent. of cases and peaceful settlement, without cessation of work, in about three per cent. of cases. Under public inquiry we find the very first year of its trial in Canada, when at best, the

system could not yet have been perfected, ninety-seven per cent, of peaceful settlements without cessation of work, and but three per cent. of strikes. Whatever doubts or misgivings I may have had as to the desirability or the practicability of the proposed public inquiry law were removed by the showing made by Canada, as the result of an actual application of the principle. Surely, if in California, through the medium of public inquiry, adjust peacefully ninety-seven per cent. of labour disputes, we shall have accomplished a most important work, and shall come as near establishing industrial peace as under our system of government is possible."

Italy, Russia and Austria.

Labour legislation in Italy is, just now, the report states much occupied with the problem of legalizing and regulating collective bargaining between associations of workers and associations of employers, more particularly with regard to agricultural labour, in which there exist unions numbering 270,000 members. In most trades there have already been established permanent arbitration bodies, chosen half from among the workers and half from among the employers. Trade unionism in Italy only dates from 1892, and did not assume real importance until after 1898. The peasant organizations began in 1901, and they differ widely in their aims and methods. In some districts they regulate the internal migration of farm labourers, and in others they undertake the collective leasing of farms, which are exploited on a co-operative basis.

In Russia, it is stated, that while according to the laws labour is permitted to organize, trade unions are practically suppressed or rendered powerless through the action of the police authorities. For this reason and also owing to lack of funds, strikes of any duration are prac-

tically impossible. These conditions have led to a diminished efficiency of Russian labour, rendering it increasingly difficult for the employers to compete against foreign manufacturers. In consequence of strikes in 1905 and 1906, wages in Russia have risen from fifteen to thirty per cent. and the hours of labour have been shortened, but the progressive increase in the cost of living has counterbalanced the increased wages.

In Austria, the conditions of the wage-earner is far superior to that of his fellow-worker in Russia. The average working hours are nine and a quarter per day, and the average earnings are \$240 a year. Eight per cent. of the earnings are contributed to the funds of labour unions, and about nine per cent. are paid in taxes. The standard of living is far lower than in the United States, even a skilled wage-earner in Vienna rarely occupying more than one room and a kitchen, with his family. His diet usually consists of bread, vegetables and coffee, with scrap meat for Sunday dinner.

The Austrian workingman, however, has some advantages. In the event of sickness he is furnished by the State with free medical treatment and free medicine, and an allowance equivalent to sixty per cent. of his annual wages, for a period of twenty weeks. If he is disabled by accident, he likewise receives a State allowance, equivalent to sixty per cent. of his annual earnings. Towards the sick fund the employer contributes one-third and the workingman two-thirds, and towards the accident fund, the employer contributes ninety per cent. and the employé ten per cent.

Under the name of 'Social Democrats' the labour party has great political power, having eighty-seven representatives in the lower house. The chief effort of the trade unions is to obtain recognition, and where trade unions are recognized the tendency has been to enter into contracts with the employers, running from three to five years. The labour federation insists on the strict observance of these contracts, and in case of their violation by any union,

financial support is withheld, and, if need be, such union is expelled from the federation. In order to prevent any selfish or radical labour leaders from needlessly prolonging strikes, a secret ballot is taken every week during a long strike, on the question, 'Shall the strike be continued?' There is no Government intervention in labour disputes in Austria, but officials holding high positions often take the initiative in bringing the conflicting parties together, for the purpose of conciliation.

Germany, Belgium and France.

The Commissioner reports that the condition of the wage-earners in Germany is very favourable. Although they receive about half the wages that are paid in the United States, there are no slums, and even the poorest quarters are attractive and clean. There is no intemperance, and sincere interest is manifested by the authorities in the well-being of the working classes. The system of technical schools, and the three years' discipline in the army, have materially raised the standard of efficiency. There are few beggars or paupers in Germany, owing to the sick, accident and old age pension funds, by means of which all workpeople who become incapacitated receive support. As these funds are partly derived from contributions of the wage-earners, no sense of pauperism is attached to receiving financial aid from these sources.

Labour organization has made rapid advances in Germany in recent years, and the trade unions have been recognized by many of the smaller employers, and those in the printing, bookbinding and building trades, but the larger employers have refused to deal with them. In 1907, arbitration courts for trade disputes were established, for the purpose of deciding disputes between individual workmen and their employés. To conciliate in disputes between bodies of workers and their employers, and to give expert information and opinions in reference to trade questions to legislators and to state executives. Although there is no compulsion attached to these courts, a large proportion of the disputes

are submitted to them, seventy per cent. having been brought before the court at Berlin, in most of which compromises were effected. A law is now under consideration for the establishment of Chambers of Labour, to act as arbitration courts, where such courts do not exist.

On the basis of population, Belgium is the greatest industrial country in the world, its imports and exports amounting to fourteen billion dollars, with a population of seven millions. The standard of wages, however, is lower than that of France and other European countries, and as a consequence of intemperance, slums are to be found in the larger industrial centres. While the cost of living has increased, food products are cheaper than elsewhere in Europe, on account, it is stated, of Belgium being a free trade country. The principal feature of trade unionism in Belgium is the existence of two bitterly opposed organizations, the Socialists, who number about ninety per cent. of organized labour, and the Christian Labour party; the former of these bodies is said to stand for anti-capitalism, collectivism and aggressiveness in dealing with the employers, while the Christian Labour party stands for individualism, conciliation and arbitration in labour disputes. Most of the employers and wage-earners oppose compulsory arbitration, but there are found important exceptions; Professor Emile Waxweiler, of Brussels, one of the greatest of Belgian authorities on economic questions, expressed the opinion that compulsory arbitration was the only logical and ultimate remedy for strikes and lockouts, and the organized wage-earners of Ghent, numbering about fifteen thousand of the most intelligent workmen in Belgium, favour compulsory arbitration, having, it is said, observed that despite all the losses and sacrifices made by the English workman in conducting his strikes, he was not much better off than he was in the beginning, and the conclusion was forced on them that the losses due to strikes often more than offset the gains.

In France, the labour unions are socialistic and political in character and aims, rather than economic. Numerous

strikes are said to result from the non conciliatory attitude of the employers, and from the wide powers of declaring strikes entrusted to local unions, without reference to the central body. Arbitration, either voluntary or compulsory, is not favoured either by employers or employés, individual bargaining being the rule. Several mutual strike insurance associations have been organized among the employers, which undertake to pay their members a daily amount to cover operating expenses during a strike. These associations have had an important restraining influence in preventing needless strikes.

Labour conditions in England.

England was the only European country, in which it was found by the Commissioner, that the number of strikes is decreasing. As a rule, there is no hostility between labour unions and British employers, and their relations are said to be growing more cordial, partly owing to the methods of conciliation, and partly, according to some, on account of labour going into politics, and thus being brought into closer contact with the employers.

While numerous disputes are settled peacefully by means of boards of conciliation and arbitration established in the various industries, the Board of Trade has intervened in an increasingly large number of disputes in recent years, forty-seven cases of intervention having occurred during the first eight months of 1908. In October, 1908, a standing court of voluntary arbitration was set up by the President of the Board of Trade. Three panels of about fifteen members each were nominated by him, the first composed of men of eminence and impartiality, the second of employers, and the third of workmen and trade unionists. Whenever desired, a court of three or five members will be nominated by the Board of Trade from these panels, to deal with industrial disputes.

Conditions in Australia and New Zealand.

In the state of Victoria, Australia, the only provision for state intervention

in labour disputes is through the medium of wages boards and industrial court of appeals. Wages boards are appointed by the Government, in certain trades, upon application of either of the parties interested. They have the power to determine the lowest wages or prices to be paid to any employés, and may fix special rates for old, slow, or infirm workers. They may also prescribe the hours of work and limit the number of 'improvers' employed. A court of appeal consisting of a Supreme Court Judge, has power to review the determination of the boards. If a strike occurs in a trade working under an award, the Governor-in-Council, through the Minister of Labour, may suspend the whole or part of the award, enabling the employers to hire others to take the places of the strikers at any wages that may be agreed upon. By means of the wages boards, 'sweating' has been entirely stamped out, and a higher degree of industrial peace is said to have been attained than is found in any other country.

In New South Wales, a court of voluntary conciliation and arbitration was established after a great maritime strike in 1891. This law proved a dead letter, and in 1895, a system of compulsory inquiry was established, which was changed in 1901, for a system of compulsory arbitration. In 1908, on the expiry of the Compulsory Arbitration Act,

a new law was passed providing for wages boards, supplemented by an industrial court room, formed for the purpose of enforcing the awards of the wages boards. In 1904, a compulsory arbitration law was passed by the federal parliament of the Commonwealth, substantially the same as that of New Zealand. The cardinal principle of these laws is that labour loses the right to strike and the employer the right to lockout, and that the court has plenary powers to summon before it the parties likely to cause industrial strife. ¶

Conclusion and Recommendations.

In the concluding chapter, the Commissioner expresses the opinion that voluntary arbitration is largely a failure, and that compulsory arbitration would not fit the conditions of his own state of California. Finally, recommendation is made for the enactment of a law, calling for a public inquiry in labour disputes before they had reached the stage of a strike or lockout. The legislation, as submitted in definite form, follows closely the lines of the Canadian Industrial Disputes Investigation Act, 1907, the chief differences being that it applies only to public utilities and public or contract work for cities, counties, or the State; and that a period of seven days is fixed after the filing of objections to the award, during which a strike or lockout is unlawful.

REVIEW OF TRANSPORTATION, CANADA, 1909—WORK COMPLETED TO DATE, ON NATIONAL TRANSCONTINENTAL RAILWAY.— THE INTERCOLONIAL SURPLUS.

ON February 1, 1910, the Honourable the Minister of Railways and Canals gave his annual review of the transportation interests of the Dominion, during the past calendar year, and more particularly of the various projects in which the Government of the country is directly interested. The following are extracts from important passages of the statement presented by the Minister:

Canal Traffic, 1909.

The canals of Canada in 1909, carried perhaps the largest volume of traffic in their history. The freight which passed through amounted to 33,720,748 tons, as compared with 17,502,820 in 1908. This was an increase of 16,217,928 tons, or 93 per cent. in one year. To give an idea of the measure of increase in the freight traffic through our canals, let me

state that three years ago the total traffic was only 10,523,185 tons, and ten years ago it was only 5,013,693 tons; so that last year it was nearly seven times as much as it was ten years ago. Of the traffic of 1909, 27,976,399 tons was eastbound and 5,744,349 westbound.

Railway Mileage and Traffic, 1909.

We have a larger railway mileage per head of the population than any other country in the world. It now amounts to 24,104 miles, an increase on the previous year of 1,138 miles. There is a peculiar situation in reference to the traffic of last year; there was a considerable improvement in the moving of products, but the passenger traffic fell off. Notwithstanding the apparent improvement in business, the people did not travel as much last year as the year before when business was better, perhaps having less business they had more time to travel the year before. The results were as follows:

The railway mileage of Canada is now 24,104, an increase of 1,138, miles during the year.

The freight traffic aggregated 66,842,258 tons, an increase of 3,771,091 tons. In dollars, \$1,968,128.

The passenger traffic amounted to 32,683,309, a decrease of 1,361,683. A decrease in dollars of \$919,015.

National Transcontinental Railway,—Eastern Section.

The following statement was given as to work completed on the eastern section of the National Transcontinental line up to the close of 1909:—

GRADING ON MAIN LINE.

NOTE.—Above mileages represent the equivalent of fully ballasted track. The mileages of sidings are included.

The Grand Trunk¹ Pacific,—Work completed to date.

With regard to progress made on the line of the Grand Trunk Pacific west of Winnipeg, the following memorandum by the Chief Engineer of the western section of the National Transcontinental Railway was presented:—

PRAIRIE SECTION.

This section of road extends from Winnipeg to Wolf creek, a distance of 915 miles.

The grading and bridging are completed throughout the whole distance, and 1,431 miles of single fencing have been built. The track is laid from Winnipeg to a point about twenty-four miles west of Entwistle, a distance of 885 miles, and a telegraph line has also been built. There is a lift of ballast on the line from Winnipeg to Entwistle, a distance of 861 miles.

The road is in operation from Winnipeg to Edmonton, a distance of 795 miles, and the traffic for the past twelve months has been as follows:—

- 74,715, number of passengers.
- 5,880,069 bushels of grain.
- 117,810 tons of general freight.

The accommodation provided for public traffic service on this section is as follows:—

Six engine houses, three machine shops, six divisional station houses, thirty-three way station houses, fifty-six section houses, sixty-seven bunk houses, fifty-five tool houses, thirty-five water stations, six coaling stations, seventy-seven loading platforms, 113 grain elevators, thirteen stock yards.

For the safety of the travelling public all crossings by this road of other railways have been guarded by an interlocking plant.

The following is the public traffic rolling stock:—

Ninety-two locomotives, six sleeping cars, three par-lour cars, four first-class cars, nine second-class cars, four mail and express cars, nine baggage cars, eleven colonist cars, eighty-three conductors vans, thirty-three refrigerator cars, two official cars, 3,213 box freight cars, 895 platform cars, thirty-one stock cars, three Russell snow ploughs.

Work on the "prairie section" is practically closed down for the winter season; the only work going on, being the laying of the track and the finishing of some of the buildings.

MOUNTAIN SECTION.

This section of the road is about 837 miles in length.

The following works are under contract, viz:—

From Wolf creek to a point 179 miles west thereof. Messrs. Foley, Welch and Stewart are the contractors for the grading and wooden bridges.

They have done considerable clearing of the right-of-way and about 200,000 cubic yards of excavation. They, however, have a great number of teams on the tote road hauling in plant, tools and supplies, so as to be in readiness for a vigorous prosecution of the works upon the opening of spring. Only a small force is now at work in the cuttings.

There is a large quantity of sand and gravel delivered at both points, and a large force of men are engaged in excavating the foundations for the piers, pedestals and abutments; as soon as the track reaches Wolf creek, say in three weeks, cement will be carried up to that point by train.

It is of urgent importance that the work on these two structures be rushed to completion with the greatest possible speed, in order that the track-laying may be advanced, thus facilitating the transportation of plant, tools and supplies to the unlet portions of the "mountain section," enabling intending contractors to bid very much lower for the work than they otherwise could.

From the point 179 miles west of Wolf creek, to a point 597 miles west thereof, the work has not been placed under contract.

From the point 597 miles west of the Wolf creek to Prince Rupert, a distance of 240 miles, the work of grading and the construction of wooden bridges is under contract with Messrs. Foley, Welch and Stewart.

No work has as yet been executed on the first forty miles, and merely a good start has been made on the next 100 miles; the reasons being, that navigation closed on the Skeena river about a month earlier than usual, thus putting a stop to running in supplies, tools, plant, etc. However, the contractors are exerting their efforts to push a tote road through so as to enable them to haul in supplies, etc., by team and keep the work moving throughout the winter. They are now at work on one of the tunnels and some rock cuttings.

The work of grading and the construction of wooden bridges on the last 100 miles, to Prince Rupert, was practically completed when a very heavy storm with a high tide, caused damage, washing away some of the rock embankments where exposed to the sweep of the open ocean, and bringing down considerable slides from the mountain sides, filling up some cuttings and blocking up waterways. The damage, however, was not very extensive.

Mr. Ferguson, the contractor for the substructure of the several steel bridges, having failed in carrying out his contract, the Grand Trunk Pacific Railway Company have relieved him of the work, and are carrying it on themselves by day labour. This work is progressing very slowly, but better conditions are promised for the future. If these promises are not realized, the track-laying in the spring will be delayed.

Steel rails for this 100 miles; one locomotive; one conductors' van and twenty-four cars, for the work of track-laying and ballasting, have been delivered at Prince Rupert, and a large quantity of ties have been delivered along the line.

About one mile of track has been laid, but nothing further will be done in that direction until next spring.

With regard to steel superstructure for bridges, the following summary was given:—

Cost of completed bridges	\$ 1,122,449.05
Estimate cost of uncompleted bridges	
under contract.....	2,145,065.66
Estimate cost of bridges not yet under	
contract.....	1,949,987.66
Total estimated cost of steel superstruc-	
tures of Eastern Division.....	\$ 5,217,502.37

The Intercolonial Railway.

The Minister also dealt at length with the Hudson Bay Railway, the Quebec Bridge and the Intercolonial Railway. With regard to the last mentioned it was stated that a surplus of \$622,388 would accrue for the nine months of the fiscal year ending December 31, 1909. Receipts increased by \$442,154, expenses decreased by \$757,087, and the net betterment amounted to \$1,199,241 under new board of management. Gross receipts for nine months, \$7,073,300; and gross expenditure, \$7,690,912.

THE CIVIC FEDERATION AT LONDON, ONT.

ON Friday evening, February 11, a meeting was held in the City Hall, London, Ont., of representatives named by the City Council, the Board of Trade, and the Trades and Labour Council, with the object of forming a Civic Federation, for the discussion of questions relating to employer and employé, and the peaceable settling of trades disputes.

Rev. J. G. Inkster outlined a number of departments which could be profitably organized as follows:—

1. A trades agreement department, where the employers of labour and the labour leaders might come together to seek agreement on the subjects of hours of labour and wages.

2. An industrial conciliation depart-

ment, through which the employers of labour and the workers might strive to prevent ruptures. This department would deal with strikes, lockouts and arbitration.

3. An industrial economic department, to discuss practical economic questions.

4. A welfare department for employers only. This department would have to do with questions of sanitation, recreation and housing conditions.

5. A woman's department, for women only, to consider the conditions of female labour.

6. A public ownership department, to discuss this important phase of civic life.

7. A municipal reform department, to teach practical politics.

8. A publicity department, for issuing information regarding the movements of the federation.

Moved by Capt. T. G. Murphy, seconded by Rev. J. G. Inkster, that a Nominating Committee be appointed to outline the policy of the Federation. The Committee subsequently brought in a report, which nominated the following: Rev. J. G. Inkster, Dr. Burdon, and Messrs. T. J. Murphy, A. W. White, H. B. Archer, W. W. Gammage, and W. B. I. Wright.

At a subsequent meeting of the Committee, Rev. J. G. Inkster was elected Chairman and T. J. Murphy, Secretary.

It is the intention to have some prominent economists address the citizens on the subject shortly.

COMMISSION ON HOURS OF LABOUR IN NOVA SCOTIA.

A REPORT of very great interest on Hours of Labour in Nova Scotia has been presented to the Government of that Province by a Commission composed of Professor Robert Magill, of Dalhousie University, Halifax, N.S., Chairman; Mr. Henry Macdonald, of Glace Bay; and Mr. David W. Robb, of Amherst; who were appointed under the authority of a provincial statute of April, 1908, "to inquire into and report upon the economic effect of a limit to a working day for the workmen employed in the various industries in the Province of Nova Scotia, with special reference to the effect of such limitation upon the following matters: (a) production; (b) wages; (c) employment; (d) export trade; (e) Canadian industries; regarding which had to different conditions obtaining in different districts, of amount and cost of production."

In their report the Commissioners find that the eight-hour day is favoured by three groups of writers, as follows:—

1. The American Federation of Labour who write from the standpoint of labour, though not Socialism. These are: George Gunton; George MacNeil; Samuel Gomersers; and Samuel Danryid.

2. John Rea, a noted author against Socialism; Wm. Mathers, of the firm of

the Saltford Iron Works; and Hadfield & Gibbons, Hadfield being one of the firm of Hadfield's Steel Foundry Company and Gibbons a noted author on Economics.

3. Writers from the standpoint of Socialism: Sydney Webb; Webb & Cox; The Fabian Tracts; and J. A. Hobson. Reference is also made to Tom Mann and H. Hyndman.

The Case for Eight Hours.

The case by these writers is presented under three heads: (1) the humanitarian side; (2) the economic side; (3) the legislative side.

As regards the humanitarian side of the shorter day all writers agree that a shorter day would be of immense benefit to the health, education, morals, family life, and citizenship of the working classes.

As regards the economic side of the shorter day the writers differ considerably.

(1) Respecting production: The first group argue that a man cannot do as much work in eight hours as in nine or ten, and that the shorter day must lessen production and make room for more men; the second group, that a man can do as much work in eight hours as in

nine or ten in most industries and that the shorter day will not lessen production; the third group, that in some industries a man can, and in others he cannot, do as much in eight hours as in nine or ten. In some industries, therefore, production would, and in others it would not be lessened by the shorter day. (2) Respecting the unemployed: The first group say that the shorter day would give work to all the unemployed; the second group, that the shorter day would give work to practically none of the unemployed; the third group, that the shorter day would give work to some of the unemployed. (3) Respecting wages: The first group maintain that the shorter day would increase wages; the second group, that it would leave wages almost unchanged; the third group, that it would help to raise wages. (4) Respecting demand: The first group say that the shorter day would increase demand by increasing the market and increasing consumption; the second group that it would leave production and therefore demand unaffected; the third group, that it would affect demand. Some of them think it would crush out sweated industries, others that it would crush out industries that minister to the rich. (5) Respecting profits, interest and capital: The first group argue that while the shorter day would lower the rate it would increase the total of profit, therefore, it would be in the interest of capital as well as labour; the second group, that it would not affect profits; the third group, that it would lessen the rate of interest, and that the capitalist would not get as much and the worker would get more of the income of the nation.

As regards the legislative side of the shorter day, the Commission find that the writers differ as to the form which the eight-hour law should take. All agree that the non-legislative methods, public opinion, voluntary concession of employers, and trades union action are all defective, and that a law is necessary, but there is little or no agreement about the nature of the law which ought to be passed. Practically all admit that a universal law compulsory upon all industries would be fatal. Trade option was advocated by the Socialists, and by

Mr. Rea. But it was rejected by the labour unions in favour of trade exemption. Then both trade option and trade exemption were rejected by the Socialists as wrong in principle and unworkable in practice, and all forms of option, such as that proposed by Mr. Mathers, were rejected. Should the Government then deal with each industry by itself, and pass an eight-hour law for each, one by one? This plan was also rejected by the Socialists, and the only method left is trade enquiry. If this plan, the only one left according to the leading advocates of the eight-hour law, were applied to Nova Scotia, it would simply mean, the report says, a long series of Royal Commissions, one for each industry. And as the Commissions would have power to hold public meetings, and take ballots, besides the power to take evidence, the business of Royal Commissions would be a growing one. It is also to be observed that this method, according to its advocates, cannot be effective unless the Government is well under the control of the people, and unless labour is well organized.

The Case against Eight Hours.

Passing to the reverse side of the case the Commissioners observe that the writers who have taken the side against the eight-hour law are: C. Bradlaugh; W. J. Shaxby; Fawcett; R. W. Haldane; John M. Robertson; and Francis Walker. Their arguments may be summed up as follows: (1) It is doubtful whether the State could interfere, considering that the workers are now upon ground firm enough to fight their own battles. (2) We should consider the rights of the minority of workers. (3) To jump at once from ten hours to eight is too risky; it should be done gradually. (4) A uniform eight-hour law throughout all trades would be unjust because of the difference between the trades, and because of the differences between the workers and the conditions under which the work is done.

The Commissioners have made brief reference in their report to legislation in regard to hours of labour in other countries, and find in this connection that in England, the United States, Switzerland, Austria, France, Germany, Holland,

Russia and Australia, legislation limits the hours of labour in certain industries; whilst in Austria, France, Holland, Great Britain, Australia and the United States, laws have been passed regulating the hours of coal miners.

☛ The laws limiting the hours of adult labour in Canada have also been referred to by the Commissioners as follows:—*Coal Mines*: British Columbia and Alberta, eight hours, bank to bank; *Metaliferous mines and smelters*: British Columbia, eight hours; *Factories*: Women and young persons in Nova Scotia, New Brunswick, Quebec and Ontario, ten hours per day and sixty per week, with provision for emergencies; Manitoba, nine hours per day and fifty-four per week. In Ontario no employé shall be required or permitted to work for more than six days of ten hours each in any one week or upon any Sunday when he worked on the previous Sunday. The penalty for violation is from twenty-five dollars to \$100. *Shops and Stores*: The workers in these are regulated mainly by restricting the working hours of persons under a certain age.

Applicability to Nova Scotia.

Part II of the report is devoted to a discussion of the subject of the applicability of an eight-hour day to various industries and occupations of the Province of Nova Scotia. The observations of the Commissioners in this respect and the conclusions which they have based thereon are summarized in the concluding chapters of the report.

The Commissioners find that capitalists and employers of labour are as a whole opposed to a statutory eight-hour day. Their argument is the economic one, that a provincial law would not affect their competitors, that the increased cost could not be put upon prices, that profits cannot afford it, and that either the wages must be decreased or the industries seriously injured. It appeared to the Commissioners that the provincial character of the law is the most serious objection to it. It should be recognized they held, that manufacturing on a large

scale in Nova Scotia is still in its infancy. Such a law would tend to prevent the establishing of new industries in the Province of Nova Scotia. A company would not be likely to start steel ship-building in an eight-hour province if it could locate its plant in a ten-hour province unless the eight-hour province offered greater advantages for ship-building than Nova Scotia offers over, say, St John. The argument from profits was to the Commissioners less convincing. Profits they claim, depend upon capitalization among other things and stock-watering is not unknown in Canada. The problem of over-capitalization is recognized as a difficult one, and the Commissioners believe that it tends to put an undue burden upon managers, and to militate against the interests of the employés. It is surely unjust they claim, to tax the employés of an industry either in wages or in hours to make profits on too large a capitalization. The opposition of employers as a class, would, they feel, render the enforcement of an eight-hour law difficult.

The Commissioners agree that union men desire the shorter day legalized, also that union men believe an eight-hour day would lead to the employment of more men and to an increase in wages, but hold that the arguments used by unionists are based on the conception of a general law applicable to all the competing firms in any one trade, and that few of them felt certain about the effects of a law that would apply only to Nova Scotia. Some of them felt that such a law would be an injustice to the Nova Scotia employer. It was found impossible to get the views of unorganized workers as a whole. In two cases, however, their views were put before the Commission. The employés of the Nova Scotia Steel and Coal Company, through two of their number chosen for the purpose, expressed the view that they could not do as much work in eight hours as in ten for long, and they do not want a shorter day if it would reduce their earnings. On the other hand they did not think that the Company could stand the increased cost of production. The employés of the Robb Engineering Company

objected to any reduction in wages and thought the men could not do as much work in eight hours as in ten, though they might in nine.

The Commissioners state that the most popular argument for an eight-hour day among the workers was that it would give work to the unemployed. If unemployment means permanent unemployment there is, the report says, little, if any such in Nova Scotia, except in such rare cases as there are serious mental or moral defects, and such cases would not be affected by an eight-hour law. True, in any one place there may be an excess of labour for the time, such as too many grocers or too many bricklayers for the demand in that place, but this would equally exist under the shorter day. If unemployment means temporary unemployment due to the depression of trade, this would exist equally under the shorter day. It would appear that the only unemployment in Nova Scotia is that caused by climatic or seasonal conditions. One of the great needs of labour in Nova Scotia is just the need of finding work during the winter months. But the climate would be unaffected by an eight-hour law. If it is uneconomical to do certain classes of work in the winter, working a shorter day in summer will not spread the work over the winter months. Employers would simply try to import more labour, and the number of men laid off in winter would be greater under the shorter day than now.

One of the arguments for the eight-hour day was that it is necessary for the health of the workers. It is found, however, impossible to give any accurate information about the health of the workers.

Conclusion.

The Commissioners in conclusion state as follows:—

“A general and compulsory Provincial eight-hour law would be at present a fatal blow to the industrial prospects of Nova Scotia. Such industries as fishing, farming and lumbering are not suitable for

such legislation, and this applies also to dock and wharf labour and to shipping. The manufacturing industries would be put, by a merely provincial law, under a great disadvantage in competing with those of the other Provinces. An eight-hour law for any industry should be applicable to all the competing firms in that industry, but this condition could not be secured by a Provincial law.

“So far as coal mining is concerned, the Commission would gladly report in favour of the shorter day if the facts permitted them to do so. But the existing market for Nova Scotia coal presents features of a grave character. The coal industry is fundamental to the welfare of the Province, and before enacting legislation which would undoubtedly add to the cost of operating the mines or seriously reduce wages further consideration should be given to the features referred to.

“The Commission are satisfied that the present working day in shops and stores is too long, that it could be shortened without detriment to the interest of any class in the community, and that there is an overwhelming case for legislation in this matter. And the hours of drug stores could and should be lessened also.

“The Commission consider that six days a week are enough for employes of street car companies, and that legislation to that effect would be justifiable. They consider also that six days a week are enough for barbers' shops.

“They consider that the nurses in the Provincial hospitals are on duty too many hours, in view of the nature of the work and the amount of wages, and they believe that while an eight-hour system may not be the best for hospital work, the number of hours off duty and of holidays should be increased, even if some additional expenditure be incurred. And they consider that boys employed in hotels should not be required to work seventy or seventy-five hours per week, but that a maximum of not more than sixty should be prescribed.”

**PRICES AND COST OF LIVING.--RESULT OF SPECIAL INVESTIGATION
BY THE DEPARTMENT INTO WHOLESALE PRICES OF GRAINS AND
FODDER AND MEATS DURING THE PAST TWENTY YEARS.**

IN the *Labour Gazette* for February, 1910, a statement was published with reference to a special investigation conducted during the past year by the Department into the course of wholesale prices in Canada, from the year 1890 up to the present time. An outline was given therein of the scope of the investigation and of the methods employed. The results of a portion of the investigation, namely, that relating to animals and meats, was also published, in view of the widespread interest with respect to the high prices prevailing for some time past for meat products of various kinds.

Grains and Fodder.

In the present issue the Department presents the statistical tables which have been compiled in the course of the investigation with regard to prices of grains and fodder in Canada during the past twenty years. The commodities covered in this part of the investigation are as follows:—

Commodity.	Measure.	Market.
Barley, Western, malting	Per bush.	Winnipeg, Man.
Barley, Ontario No. 2	"	Toronto, Ont
Bran	Per ton.	"
Hay, No. 1	"	Montreal, Que.
Corn, No. 3, yellow	Per bush.	Toronto, Ont.
Oats, Western, No. 2, white	"	Winnipeg, Man.
Oats, Ontario, No. 2, white	"	Toronto, Ont
Peas, No. 2	"	"
Rye, Ontario No. 2	"	"
Shorts	Per ton	"
Straw, baled	"	"
Wheat, No. 1, Northern	Per bush.	Winnipeg, Man.
Wheat, Ont., No. 2, white	"	Toronto, Ont.

In the case of each of the above, the price on the opening market day of each month is quoted from a reliable authority back to 1890.

The tables are, for the most part, self explanatory. The average price for the

year being worked out enables the record for each commodity to be followed with considerable clearness.

In order to compare the course followed by the prices of the several commodities and to combine them so as to show the course of prices for grains and fodder as a whole, a table of relative prices or index numbers is added to the above. These numbers show for each commodity the percentage which the average price of the commodity, from year to year was of the average prevailing during the decade 1890-1899. Thus in the case of barley, No. 2, Ontario, the number 122.5 under the heading 1890, means that the average price of the grade of barley specified during the year in question, was twenty-two and one-half per cent. higher than the average price during the decade 1890-1899. Similarly, barley during the past year is shown to have been forty-five and one-tenth per cent. above the average for 1890-1899. By adding these index numbers and taking an average from year to year the course of grain and fodder as a whole, is shown, reckoning each of the commodities named as of equal importance.

The results are more clearly shown in the annexed series of charts.

While the courses of the different commodities have varied somewhat, it will be seen that in general the lowest point was reached in the years 1896-1897, since when there has been a pronounced upward movement. This became particularly marked in 1907-1908, the past year sustaining the high level reached in 1908, namely, approximately seventy per cent. higher than in the year 1897, and approximately fifty per cent. above the average price of the last decade of the nineteenth century.

In the next issue of the *Labour Gazette* statistics with reference to dairy produce and fish will be presented.

*Prices quoted are taken from various sources, including newspapers, records of dealers, and in the case of recent years, from the records of the Winnipeg Grain Exchange. A dealer in Winnipeg handling a very large quantity of oats, and who has been in the business for some years prior to 1890, checked the above quotations and stated they are accurate in so far as his records show. No. 2 White Oats represents the great bulk of that class of grain produced.

HOURS OF LABOUR ON PUBLIC WORKS.

During the month of February, a special committee of the House of Commons, which was appointed on December 9, to report on Bill No. 21,—An Act respecting the hours of labour on public works,—to which reference is made in the *January* and *February* numbers of the *Labour Gazette*, continued its work of investigation and listened to evidence which was given by Professor O. Skelton, of Queen's University, in respect of legislation in other countries on the subject of hours of labour; and also to evidence which was given by Mr. Victor DuBreuil and Mr. J. D. McNiven, Fair Wages Officers of the Department of Labour, regarding hours of labour in Canada. In the course of the evidence of Mr. Victor DuBreuil, an outline was given also of the method of preparing and of enforcing compliance with Fair

Wages Schedules, which are prepared by the Superintendent of Labour to govern rates of wages and hours of labour on various public works throughout Canada.

During the month, a large number of communications were received by the clerk of the committee from manufacturers, Boards of Trade, agricultural stock breeding and dairy associations, transportation and marine companies, and from labour organizations, expressing the views of those interests in respect of the proposals which are contained in this Bill.

At a meeting on February 23, Honourable W. L. Mackenzie King, Minister of Labour and Chairman of the Committee, submitted for the information of the committee an address on the "Eight-Hour Day", which was delivered by Professor R. Magill, of Halifax, before the Canadian Club of Ottawa.

RECENT INDUSTRIAL AGREEMENTS.

TWO important agreements, each for a four-year period, were signed during February, in the Printing and Allied Trades, at Quebec. The one affected Typographical Union, No. 302, and the other Printing, Pressmen and Assistant's Union, No. 152. The following firms signed both agreements:—

The Telegraph Printing Company; The Chronicle Printing Company; L'Action Sociale Publishing Company; Le Soleil Publishing Company; L'Evenement Publishing Company; La Vigie Publishing Company; Imprimerie Madame Chasse; T. J. Moore's Company, Printers; Imprimerie Prosper Larose; and Imprimerie Laflamme et Proulx.

The text of the agreements follows:—

Scale of Prices, Quebec Typographical Union No. 302.

CLAUSE 1. Forty-eight hours to constitute a week's work in book and job offices and evening newspapers. Forty-five hours to constitute a week's work on morning papers. Seven and one-half

hours to constitute a night's work. The following scales of prices to obtain for the period stipulated:

Hand men (day work), from February 18, 1910, to February 17, 1912, \$13.50; from February 18, 1912 to February 14, 1914, \$15; machine men (day work), from February 18, 1910 to February 17, 1912, \$15.50, from February 18, 1912 to February 14, 1914, \$17; hand men (night work), from February 18, 1910 to February 17, 1912, \$15.75, from February 18, 1912 to February 14, 1914, \$17.25; machine men (night work) from February 18, 1910 to February 17, 1912, \$17.50, from February 18, 1912 to February 14, 1914, \$19. Overtime: hand men (day work), from February 18, 1910 to February 17, 1912, \$38, per hour, from February 18, 1912 to February 14, 1914, \$42, per hour; Machine men (day work), from February 18, 1910 to February 17, 1912, \$43, per hour, from February 18, 1912 to February 14, 1914, \$48, per hour; machine men (night work), from February 18, 1910 to February 17, 1912, \$58, per hour, from

February 18, 1912 to February 14, 1914, \$.63, per hour.

CLAUSE 2. Piece work on monoline machines twelve cents per thousand ems for night work. Overtime, price and one-half. Type to be used no larger than eight point. An optional piece scale of ten cents, per thousand ems, on linotype machines on evening newspapers only, the type to be no larger than eight point.

CLAUSE 3. When machine is out of order or waiting for copy, operator to be paid for the time he worked at the machine as operator, then he will finish his day's work at the case, and will receive the same salary as if working on the machine.

CLAUSE 4. Night men when coming back to work in day time to receive a minimum of half a night's pay.

CLAUSE 5. Foreman of office or department foreman shall receive not less than three dollars per week over scale for hand men. Overtime at the rate of time and one-third.

CLAUSE 6. Learners on machines to receive not less than two dollars per week below regular machine rate. Apprenticeship term to be twelve weeks. Hours to be same as those covering journeymen.

CLAUSE 7. Apprentices to obtain as formerly, but it shall be obligatory on the part of the employer and the union members to give apprentices every opportunity to learn the trade.

CLAUSE 8. Machine tenders: \$18 on day time and \$20 for night.

CLAUSE 9. It is agreed on the part of the employers that none but members of Typographical Union, No. 302, shall be employed in their composing rooms. Said Quebec Typographical Union, No. 302, agrees that none of its members shall be allowed to work in non-union offices in the city except for organization purposes, and with the consent of the President of the Publishers' Association. Employers agree not to take any work from non-union offices.

CLAUSE 10. Double price shall be paid for work done on Sunday, New Year's Day, Christmas and Labour Day, and no piece work shall be permitted.

CLAUSE 11. Quebec Typographical Union, No. 302, agrees to supply men on demand. If unable to do so, employers may advertise for men or secure them otherwise, it being understood that preference be given to union men, but under no consideration shall contracts be made with non-union men for any specified period, it being understood that those men are employed in emergency cases, only when union men are not available.

CLAUSE 12. The foregoing is the minimum scale of this union only.

Quebec Pressmen's Agreement.

It is agreed by and between the Publishers or Job Printing offices, as the case may be, and the Quebec Printing Pressmen and Assistants' Union, of the I.P.P. & A.U., that the following scales of wages shall be paid for a week of forty-eight hours, for the periods stipulated.

Pressmen in charge of newspaper press, between February 18, 1910 and February 17, 1912, \$16, between February 18, 1912 and February 17, 1914, \$17; cylinder pressmen between February 18, 1910 and February 17, 1912, \$12, between February 18, 1912 and February 17, 1914, \$13; assistants, platen and cylinder, between February 18, 1910 and February 17, 1912, \$8, between February 18, 1912 and February 17, 1904, \$9; cylinder feeders, between February 18, 1910 and February 17, 1912, \$7; between February 18, 1912 and February 17, 1914, \$7; stereotypers, between February 18, 1910 and February 17, 1912, \$15, between February 18, 1912 and February 17, 1914, \$16.

CLAUSE 1. Provided: That all those qualifying for the above scales must have served four years apprenticeship in their respective branches of the trade only, before being eligible for said scales and must furnish proof of having served the required time when called upon by employer.

CLAUSE 2. It is provided that offices shall be entitled to apprentice pressmen and apprentice pressfeeders on a ratio of one to four members employed, or a fraction thereof. But it is provided that none now employed shall be discharged

to conform to this rule. Journeymen pressmen are pledged to teach every apprentice under their control every feature of presswork. Union to register all apprentices.

CLAUSE 3. It is understood that the employer shall call upon the Union to furnish competent men to fill all positions when vacant. The Union being unable to furnish them, the employer may advertise or otherwise secure such men, it being understood that the preference shall be given to Union men.

CLAUSE 4. In the instance of a man leaving his position of his own free will to go into another business, such time as may have been served up to time of departure, shall not be allowed on apprenticeship term.

CLAUSE 5. Where girl feeders belonging to the union are employed, it is agreed that they shall receive one dollar per week less than the scale obtaining for men feeders; it being provided that the union cannot deny membership to girl feeders.

CLAUSE 6. Overtime: Time and one-third. Double time for Sundays, Christmas, New Year's Day and Labour Day. Foremen in charge of pressroom to receive two dollars above cylinder pressmen's scale. Night workers to receive two dollars in excess of above rates.

CLAUSE 7. It is allowed that should the union be unable to furnish press feeders when called upon, nothing is to prevent offices from employing apprentices to fill such positions. Nothing in this agreement to mean that pressfeeders shall not put forms on presses, or perform such other work as the foreman may consider necessary to their development as pressroom workers.

CLAUSE 8. Should there be any misunderstanding as to the meaning of this agreement the question at issue must be settled by arbitration; the arbitration board to consist of one member appointed by the union, the other by the employer; these two to choose a third. An award by these three shall be binding on all parties concerned.

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF FEBRUARY, 1910.

The following is a list of contracts awarded by the Department of Public Works, and the Department of Railways and Canals which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

Making and repairing miscellaneous articles of postal stores.....	77.65
Making and supplying articles of official uniform.....	5,549.80

RETAIL PRICES OF STAPLE ARTICLES OF CONSUMPTION, CANADA, DURING FEBRUARY, 1910.

The accompanying table sets forth the retail prices prevailing on or about the fifteenth day of the month preceding the present issue of the *Labour Gazette*, of the more important staple commodities entering into the cost of living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement is given of the rental of a representative workingman's dwelling of the better class in the quarter of each locality usually occupied by workingmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care has been taken to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people and is representative of every Province in the Dominion.

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the respective localities, under detailed instructions as to sources of information, quality of goods to be quoted, etc., from the Department.

THE Department presents herewith its second monthly statement of retail prices throughout Canada, the nature and source of which are explained in the above standing heading.

As stated in the last issue of the *Labour Gazette*, it is the purpose of the Department to base on these statistics comparisons, from month to month, as to the trend of cost of living throughout the Dominion. It has been thought advisable to defer the beginning of this calculation until the next issue in order that the preliminary ground-work may be properly laid, and every precaution taken to secure complete accuracy in the basal statistics. An extensive correspondence has been held during the past month with the representatives of the Department in order to insure uniformity in the principle on which the quotations are made as between the several localities.

RETAIL PRICES OF STAPLE

⁵Lignite.

⁶Error in January report, should be 12½ oz. instead of 20 oz.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE SECOND HALF OF 1909.

THE pronounced increase in general industrial activity, which occurred during the second half of 1909, was reflected in the wages of employes in several branches, chiefly among unskilled labourers and railway construction employes. Railway operatives also maintained the upward tendency which characterized the wages of these classes in 1907 and 1908. Among civic employes, the tendency was generally upward. The various skilled trades, including the building, metal and woodworking trades, were firm to upward, but with few important changes. The printing trades were among the most active in securing improved conditions with respect to wages and hours. The increased activity of manufacturing arrested the down-

ward tendency in wages, which was marked in 1908.

A detailed statement with regard to the changes in wages and hours occurring during the second half of 1909, information concerning which was received at the Department, is as follows:—

Changes by Industries and Groups of Trades.

Agriculture.—No pronounced change was reported during the second half of the year, though the general tendency was firm to upward. A table showing the rates for farm hands during the summer season of 1909, was published in the *Labour Gazette* for November, 1909, page 594.

Fishing.—The prices to be paid for sockeye salmon on the Fraser river, during the fishing season, were fixed at twelve and a half cents during August. The rates were the same as those in effect in 1905, the last year of the "big" run. The canners also decided that in the rating of red spring salmon taken in the nets, each one over fifteen pounds in weight should be counted as the equal of two sockeyes. Fifteen cents per fish were paid by the canners for late sockeyes and cohoes.

Lumbering.—In connection with the hiring of men for winter work in the woods, wages were from two dollars to four dollars higher than in the preceding year.*

Mining.—The Dominion Coal Company signed an agreement with the Provincial Workmen's Association renewing an existing agreement which expired on De-

ember 31. The new agreement is for two years. Under the terms of the agreement, mine labourers to the number of 800, received an advance in wages from \$1.52 to \$1.60 per day.†

The building trades.—Wages were for the most part stationary, during the second half of 1909. Masons and carpenters at Calgary, Alta., had their scale increased, the former from sixty to sixty-two and a half cents per hour, and the latter from fifty-four to fifty-five cents per hour. At Winnipeg, Man., a large number of carpenters went on strike, during August, for an increase from thirty-five cents to forty-five cents per hour. A number obtained the increase; others were working for forty cents per hour.

Metal, engineering and shipbuilding trades.—A reduction on piece-work prices among moulders, stove mounters and

*See reports of Hull, Ottawa, and Sault Ste Marie correspondents in the *Labour Gazette* for October, 1909.

polishers went into effect at London Ont. At Brantford, Ont., machine moulders had their wages increased. At Winnipeg, Man., linemen had their hours reduced from ten to nine per day, without material change in wages.

Printing and allied trades.—Printers at St. Catharines, Ont., Calgary, Alta., and Fernie, B.C., obtained an increase in scale. At St. John, N.B., pressmen signed a new agreement, under which an immediate increase was granted and further increases arranged to occur in 1911. The agreement signed is to remain in force until November, 1912. There was previously no regular scale.

Clothing trades.—Cloak makers at Montreal, Que., received an increase amounting to ten per cent. in wages. At Vancouver, B.C., journeymen tailors received an increase in scale, as well as in piecework prices.

Railway service.—Several important increases were granted during the closing half of 1909, details with regard to which will be found in the accompanying table. Among the classes affected were trainmen and telegraphers on the Michigan Central system, locomotive firemen on the Père Marquette system, maintenance-of-way employés on the Canadian Northern Railway system, west of Port Arthur; and telegraphers on the Toronto

and Northern Ontario Railway system between North Bay and Cochrane. In the aggregate, over 1,100 workmen were affected by these changes. At Fort William and Port Arthur, Ont., in addition, 700 freight handlers, in the employ of the Canadian Pacific and Canadian Northern Railway Companies, received a substantial increase in wages, as the result of the award of a Board under the Industrial Disputes Investigation Act.†

Miscellaneous trades.—At Ottawa, Ont., a large departmental store introduced an early closing arrangement affecting approximately 300 hands to the extent of twelve hours per week.

Railway construction employés and unskilled labour.—With the advance of the season, labour classified under the heading became much more active, and rates advanced considerably, especially in Western Canada. Detailed tables, showing the rates prevailing during the autumn were published in the *Labour Gazette*, for November, 1909, pages 596 and 598. See also the *Labour Gazette* for September, 1909, pages 314-5. Altogether, it was estimated that 12,000 men received advances, ranging from twenty-five cents to fifty cents per day.

†See the *Labour Gazette* for September, 1909, page 341.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

Homestead Entries During January, 1910.

The following statement shows the number of homestead entries made during the month of January, 1910, as compared with January, 1909:

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF JANUARY, 1910, AS COMPARED WITH JANUARY, 1909.

Notes.

A considerable number of immigrants from Great Britain had already begun to arrive in Canada during the closing days of February. Several special trains were required to convey the arrivals from St. John and Halifax to Montreal.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF FEBRUARY, 1910.

Under this heading account is taken of such accidents only, as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factory inspectors of the Province of Ontario, the Ontario Railway and Municipal Board and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statements of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 237 individual work people in Canada during the month of February, 1910, were reported to the Department of Labour. Of these, forty-one were fatal and 196 resulted in serious injuries. In addition six fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before March, 1910.

In the preceding month there were eighty-seven fatal and 184 non-fatal accidents reported, a total of 271, and in February, 1909, there were seventy-six fatal and 160 non-fatal accidents, a total of 236. The number of fatal accidents reported in February, 1910, was, therefore, forty-six less than in the preceding month and thirty-five less than in February, 1909. The number of non-fatal accidents reported in February, 1910, was twelve more than in the preceding month and thirty-six more than in February, 1909. Altogether there were thirty-five less industrial accidents reported in February, 1910, than in the preceding month and one more than in the same month of the preceding year.

Of 182 returns received during the month giving the ages of the victims of industrial accidents, eighteen referred

The organization of the Government of the Province of Ontario for promoting the emigration of suitable settlers, meeting them upon arrival at Toronto, Montreal, or Quebec, and placing them in Ontario, where they will have good homes and the best prospects of success, will be further improved this season.

to persons under twenty-one years of age, ninety-five to persons between twenty-one and forty-five, and fourteen to persons over forty-five. Fifty-five persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

Nature of Fatalities and Accidents.

The chief disasters of the month causing the death of more than one workman were: the killing of three train hands in a derailment near Truro, N.S., and the suffocation of two workmen at a fire in Hamilton, Ont.

Railway Fatality near Truro N. S.

On February 28, an Intercolonial Railway engine and nineteen cars laden with

coal and steel were derailed near Truro, N.S. In the wreck, the fireman, engineer and brakeman, who were all on the engine, were killed.

Asphyxiation of two Workmen at Hamilton, Ont.

In a fire which occurred at the Gurney-Tilden foundry at Hamilton, Ont., two stove mounters were asphyxiated by smoke. The jury empanelled in the case rendered the following verdict:—"We, the jury empanelled to inquire into the deaths of Harry Bawdon and Albert McCulley, find that they came to their deaths by being suffocated by smoke from a fire. We are of the opinion that insufficient means of escape were provided by the Company; also that lacquer rooms and other places where inflammable materials are used should be isolated or made fire-proof."

Record by Trades and Industries.

Agriculture.—There were six fatal and twenty non-fatal accidents in this industry during February, 1910, compared with nineteen killed and twenty-one injured in the preceding month and fifteen killed and twenty-four injured in February, 1909. Of the fatal accidents two were due to falling material and one each to exposure, two being found dead, to flying material and to live stock. Five of the minor accidents were due to falls, three each to falling material, to runaways and to live stock, two to exposure and one each to being run over, to machinery, to being scalded and to flying material.

Fishing and hunting.—The body of a trapper was found on Manitou Lake, Man., partially devoured by wolves. In January, 1910, there were two non-fatal accidents and none in February, 1909.

Lumbering.—Death through accident occurred to three workers and serious injury to eleven others in February, 1910. In January, 1910, there were eleven killed and seven injured and in February, 1909, nine killed and eighteen injured. One each of the fatalities was caused by falling material, by drowning and by machinery. Four of the injuries were caused by falling material, three by machinery and

two each by flying material and by tools.

Mining.—Six workers were killed and eighteen injured during February, 1909, as against eleven killed and seven injured the month before and two killed and seven injured in February, of last year. Three of the deaths were due to falling material, two to mine cars, and one to a fall. Six of the injuries were due to falls, eight to falling material, three to cars and one to an explosion of gas.

Building trades.—During February, 1910, eleven of these workers were injured nine by falls and one each by flying material and by falling material. In the previous month there were two killed and nine injured and in February, 1909, two killed and two injured.

Metal, engineering and shipbuilding trades.—In these trades there were six workmen killed and thirty-seven injured as against five killed and thirty-five injured in January last, and five killed and thirty injured in February a year ago. Two each of the fatalities were due to electric shock, to falls and to being suffocated. Of the non-fatal accidents eleven each were due to falling material and to machinery, four to explosions, three each to electric shock, to falls and to flying material and one each to tools and to molten metal.

Woodworking trades.—There were ten workers injured in February, 1910, six by machinery and one each by a fall, by falling material, by a tool and by flying material. In the month before the record was one killed and six injured and in February, 1909, fourteen injured.

Printing trades.—An apprentice was killed in Montreal, being caught between a hoist and a floor, and two workers were injured by machinery. There were no accidents in the preceding month and six injured in February, 1909.

Clothing trades.—In February, 1910, machinery injured one these workers. In the previous month two were injured and one was injured in February, of last year.

Textile trades.—Three serious accidents happened in these trades due to falls and one to machinery. There were no accidents in the month before and there were three non-fatal accidents in February, 1909.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES, F. No. 74.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF FEBRUARY, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	East Whitney, Ont.....	Feb. 7	1	By cave-in of gravel.
".....	Rexton, N.B.....	" 15	1	Found dead.
".....	St. Elenthère, Que.....	" 10	1	Flying piece of circular saw.
".....	Nanaimo, B.C.....	" 11	1	Kicked in head by a cow.
Farmer's son.....	Morden, Man.....	" 13	1	Caught under moving building.
Farm hand.....	Medicine Hat, Alta.....	" 8	1	By exposure.
<i>Fishing and hunting—</i>				
Trapper.....	Manitou Lake, Man.....	" 8	1	Killed by wolves.
<i>Lumbering—</i>				
Logger.....	Jocks, Ont.....	" 14	1	Log rolled on him.
".....	Cloose, B.C.....	" 17	1	Drowned—canoe capsized.
Saw mill hand.....	Notre Dame de Laterrière, Que.....	" 3	1	Fell on circular saw.
<i>Mining—</i>				
Miner.....	Frank, Alta.....	Feb. 2	1	Caught between cars.
".....	Stellarton, N.S.....	" 7	1	By fall of stone.
".....	Copper Cliff, Ont.....	" 28	1	By fall of stone.
".....	Cumberland, B.C.....	" 7	1	Fall of coal.
".....	Michel, B.C.....	" 18	1	Run over by car.
Quarryman.....	George's River, N.S.....	" 3	1	By fall in quarry.
<i>Metal, engineering and shipbuilding trades—</i>				
Electrical worker.....	Vancouver, B.C.....	Feb. 10	1	Electrocuted.
".....	Niagara Falls, Ont.....	" 10	1	Fell into turbine.
".....	Nicolet, Que.....	" 25	1	Electrocuted.
Iron workers.....	Hamilton, Ont.....	" 17	2	Suffocated by poisonous fumes at fire.
Bridge builder.....	Fredericton, N.B.....	" 14	1	Fell seventy feet to ice below.
<i>Printing trades—</i>				
Apprentice.....	Montreal, Que.....	" 19	1	Body caught between hoist and floor.
<i>Food and tobacco preparation—</i>				
Brewer.....	Fort William, Ont.....	" 9	1	Ignition of varnish in tank.
<i>Railway service—</i>				
Engineer.....	Near Truro, N.S.....	" 28	1	In a derailment.
Fireman.....	Near Truro, N.S.....	" 28	1	In a derailment.
Brakeman.....	Kamsack, Sask.....	" 22	1	Run over by train.
".....	Near Truro, N.S.....	" 28	1	In a derailment.
Car shop hand.....	Moncton, N.B.....	" 18	1	Run over by shunter.
Yardman.....	Winnipeg, Man.....	" 3	1	Run over by train.
<i>Navigation—</i>				
Sailor.....	Vancouver, B.C.....	" 6	1	By explosion of dynamite.
Longshoremen.....	Montreal, Que.....	" 12	1	Run down by box car.
<i>General transport—</i>				
Teamster.....	Oshawa, Ont.....	" 15	1	By avalanche of earth.
Stable man.....	Montreal, Que.....	" 21	1	Kicked by horse.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES, F. No. 74.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF FEBRUARY, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
<i>Public employés—</i>				
Mail carriers.....	Pachena, B.C.....	" 15	2	Drowned, sloop upset.
<i>Miscellaneous—</i>				
Hotel employé.....	Bala, Ont.....	" 9	1	Explosion of acetylene, gas.
Hotel keeper.....	Nicolet, Que.....	" 9	1	Burned to death in hotel fire.
Errand boy.....	Montreal, Que.....	" 19	1	Crushed in an elevator.
<i>Unskilled labour—</i>				
Labourer.....	Toronto, Ont.....	" 12	1	By avalanche of frozen earth.
.....	Montreal, Que.....	" 26	1	Run over by cars.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN JANUARY, 1910.

Farmer.....	Repentigny, Que.....	Jan. 31	1	Load fell on him.
Farmer's son.....	London Township, Ont.	" 31	1	By fall in barn.
Miner.....	Fernie, B.C.....	" 29	1	Fall of rock.
".....	Cobalt, Ont.....	" 31	2	Explosion of dynamite.
Construction hand.....	Whoop-up, Alta.....	" 31	1	Caught between cars.

Food and tobacco preparation.—In these trades a workman was burned to death by the ignition of varnish and six others injured, three by falls, two by machinery and one by the ignition of varnish. The record for the preceding month was one killed and six injured and for February, 1909, eight injured.

Leather trades.—A tool, a fall, machinery and an explosion of shellac were each responsible for a serious accident in this group, compared with one killed and four injured in January, 1910, and no accidents in February, 1909.

Railway service.—Six railway employés were killed and thirty-one injured during February, compared with twenty-three killed and twenty-nine injured in the preceding month and twenty-two killed and seventeen injured in February, 1909. Three each of the fatalities were due to derailments and to being run over. Of the other accidents seven were due to derailments, five to falls, four each to being run over and to falling material; three each to being struck by an object in passing, and to being struck by a

locomotive; two each to being caught between cars and to machinery and one to an explosion of steam.

Navigation.—In this group an explosion of dynamite and being run over caused one death each and three other workers were injured by falling material. In the previous month the record was one killed and in February, of last year, one killed and three injured.

General transport.—During February, 1910, two workers were killed and seven injured, as against one killed and nineteen injured in January, last, and seven injured in February, 1909. One of the fatalities was due to live stock and one to falling material. One each of the seven other accidents were due to exposure, to a tool, to a fall, to falling material, to electricity, to machinery and to being caught between cars

Public employés.—Two of these employés were killed and eleven injured during February, 1910, compared with four injured in the month before and three injured in February, 1909. The two deaths were caused by drowning and six of the

minor accidents were caused by falls, three by collisions and one each by an explosion and by a derailment.

Miscellaneous.—Three fatal and eleven non-fatal accidents happened during February, 1910, compared with three killed and seventeen injured in January, last, and five killed and nine injured in February, 1909. One each of the fatalities was due to an explosion of gas, to being burned to death and to an elevator. Three of the injuries were due to elevators, two to machinery and to falls and one each to

an explosion of coal oil, to being run over, to live stock and to falling material.

Unskilled labour.—During February two labourers were killed and ten injured, compared with eight killed and seven injured in the previous month and seven killed and five injured in February, a year ago. Falling material and being run over each caused a death. Five of the minor accidents were caused by falling material, two by falls and one each by being run over, by an explosion and by live stock.

TRADE DISPUTES DURING THE MONTH OF FEBRUARY, 1910.

THE only trade dispute which began in February, affecting a large number of employés was a strike of garment workers in Montreal, Que., in which upwards of a thousand persons were affected for one day, and about three hundred during the last five days of the month. Of the old disputes, the only one of serious proportions was the strike of coal miners at Springhill, N.S., where 1,700 men had been out of work for over six months. Mining operations had been resumed, however, to a limited extent.

Analysis of Trade Disputes During the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada, during February, was twelve, an increase of six compared with the previous month,* and of seven compared with February, 1909. About forty-eight firms and 3,068 employés were affected by these disputes, thirty-eight firms and 1,236 employés being affected by new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during February, was approximately 49,484 days, compared with a loss of 44,650 days in January, and 4,395 in February, 1909.

Trades affected by new disputes.—The

following table shows the trades affected by new disputes of the month, and the number of workpeople involved in each group of trades:—

Trades.	No. of disputes.	No. of workers.
Clothing trades.....	4	1,143
Food and tobacco preparation...	2	53
Printing and bookbinding.....	1	40
Total.....	7	1,236

Localities affected by new disputes.—

The new disputes of the month occurred in the following provinces of the Dominion:—

Province.	No. of disputes.
Quebec.....	3
Ontario.....	3
Manitoba.....	1
Total.....	7

Causes of disputes.—The following were the causes of the new disputes of the month:—

Cause.	No. of disputes.
For increase in wages.....	2
For increase in wages and recognition of union.....	1
For "closed shop".....	1
Against promotion of employé before expiry of apprenticeship.....	1
Against conditions of employment.....	1
Sympathetic.....	1
Total.....	7

*The statistics in the present article relating to trade disputes of January, differ from those given in the February *Labour Gazette*, as they are based on later information received.

Methods of settlement.—Of the twelve disputes in existence during February, six were terminated, leaving six still in existence at the close of the month. One dispute was settled by arbitration, four by negotiations between the parties concerned, and one by the strikers establishing a co-operative shop.

Results of disputes.—Of the six disputes that were terminated during the month, two resulted in favour of the employés, and in another they were partially successful. Compromises were reached in two cases, and in one the result was indefinite, the strikers having entered into business for themselves.

Disputes Which Commenced Prior to the Beginning of the Month.

The trade disputes in existence in Canada, during February, which commenced in previous months, comprised strikes of leather workers at Ottawa, Ont., coal miners at Springhill, N.S., carpet weavers at Guelph, Ont., bricklayers at Regina, Sask., and tailors at Vancouver, B.C.

Strike of Leather Workers at Ottawa, Ont.

A strike of about seventy-two leather workers, which began at Ottawa, Ont., on October 14, on account of the refusal of four firms to grant a demand for a general increase of ten per cent. in their wages, was terminated on February 14, a compromise being reached.

Strike of Bricklayers and Masons at Regina, Sask.

On January 15, a strike of bricklayers and masons occurred, at Regina, Sask. The cause of the dispute was the employment of labourers in the construction of the Parliament buildings, to build the interior partitions, composed of plaster block, a branch of work which was claimed by the bricklayers as their own. The matter was referred to the Commissioner of Public Works, who decided that the rate of wages for

this class of work should be fifty-five cents an hour, and work was resumed on February 14. According to a report received from the Bricklayers and Masons' Union, eighteen men remained unemployed, pending a settlement of the dispute, but according to the employers, only three were involved in the dispute.

Strike of Coal Miners at Springhill, N. S.

There was little change in the situation of the strike of 1,700 coal miners at Springhill, N.S., which began on August 10, on account of the refusal of the Cumberland Railway and Coal Company, to recognise the United Mine Workers of America and to grant demands for an increase in wages and for certain changes in conditions of employment. The places of some of the strikers, however, had been filled, and a small daily output is now reported.

Strike of Carpet Weavers at Guelph, Ont.

No settlement was reported in the case of a strike of carpet weavers at Guelph, Ont., who went out on December 11, to the number of about thirty-eight, on account of the refusal of the employers to grant a demand for extra pay for overtime, and general dissatisfaction with the conditions of employment. About twelve men were indirectly affected by this dispute. In the course of January and February, it was reported that the places of some of the strikers had been filled.

Strike of Tailors at Vancouver, B. C.

While no settlement was reported in a strike of tailors at Vancouver, B.C., which began on October 4, conditions ceased to be materially affected by it. During October, twenty-nine firms had granted the demand of the strikers, for an increase in wages from eighteen dollars to twenty dollars per week, leaving only three firms and fourteen employés involved in the dispute.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES C, No. 113.

TABLE OF TRADE DISPUTES DURING THE MONTH OF FEBRUARY.

Occupation	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.	Approximate No. of Employés affected.			Date of commencement.	Date of termination.	Result.
				Directly.	Indirectly.				
					Fe-males.	Males.			
<i>Building trades—</i> Bricklayers and masons.....	Regina, Sask.....	Against employment of labourers for interior plaster block work.....	1	18	Jan. 15	Feb. 14	Rate of wages fixed by Commissioner of Public Works, at fifty-five cents an hour, but class of labour not specified.
<i>Mining—</i> Coal miners.....	Springhill, N.S.	For recognition of union and increase of wages, and against conditions of employment.	1	1,700	Aug. 10	No settlement reported, but places of some strikers were filled.
<i>Textile trades—</i> Carpet weavers ...	Guelph, Ont.....	Demand of men for extra pay, for overtime, and general dissatisfaction with conditions..	1	28	Dec. 11	No settlement reported, but places of some strikers were filled.
<i>Clothing trades—</i> Tailors.....	Vancouver, B.C.	For increase in wages from \$18 to \$20 per week.....	3	14	Oct. 4	No settlement reported, but conditions ceased to be effected.
<i>Leather trades—</i> Leather workers ..	Ottawa, Ont.....	Demand for ten per cent. increase in wages.....	4	72	Oct. 14	Feb. 14	Increase in wages granted, a compromise.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.

DISPUTES WHICH BEGAN DURING THE MONTH.

<i>Clothing trades—</i> Garment workers	Toronto, Ont.	Refusal of employers to give thread free instead of deducting cost from wages.	1	58	2	Feb.	No settlement reported at end of month.
Cloakmakers	Toronto, Ont.	Demand for "closed shop"	1	48	3	"	No settlement reported at end of month.
"	Montreal, Que.	Demand for increase in wages.	1	40	18	"	No settlement reported at end of month.
"	"	In sympathy with striking cloakmakers.	25	365	23	"	No settlement reported, but fourteen firms had signed agreement.
<i>Food and tobacco preparation—</i> Hebrew butchers.	Montreal, Que.	Demand for increase in wages and recognition of union.	6	30	7	"	No settlement reported, but five employers had granted demands prior to strike. Strikers opened a co-operative meat market, and conditions ceased to be affected.
Cigarmakers	Winnipeg, Man.	Against promotion of employé before term of apprenticeship had expired.	1	23	8 Feb.	"	Employe restored to apprenticeship status.
<i>Printing and bookbinding—</i> Printers.	Peterborough, Ont.	Demand for increase in wages from \$12 to \$14 per week for day work.	3	40	4	"	An increase in wages granted. A compromise.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

New Disputes.**Strike of Cloakmakers at Montreal,
Que.**

On February 8, a strike of cloakmakers of the firm of Messrs. A. Sommer & Co. took place at Montreal, on account of the refusal of the employers to grant a demand for an increase in wages. On February 23, a sympathetic strike was declared, twenty-six firms and about 1,000 employés being then involved. On February 24, fourteen employers signed an agreement and promised not to help Messrs. A Sommer & Co. to fill their contracts during the progress of the strike. The terms of the agreement were reported to be as follows. Fifty hours to constitute a week's work. Extra time to be paid time and a half, double pay to be given for work on the following days:—New Year's Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas. Wages not to be held back for more than three days. Business agents of the unions to be admitted at any time into the shops. A twenty-four hours' notice only to be required on the part of the employers or the employés, when a personal engagement is to be broken.

Almost all the strikers were unionists, some being members of the national, and others of the international organization. There were 300 employés still on strike at the end of the month, of whom seventy-five were from the shop of A. Sommer & Co.

**Strike of Garment Workers at Toronto,
Ont.**

On February 2, a strike of about fifty-eight female garment workers was reported to have taken place at Toronto, Ont. The cause of the dispute was an objection to the practice employed by the firm involved of charging their employés for the thread used, and deducting the cost from their wages. It was claimed by the employés that the deductions came to from one to one and a half dollars per week, while their wages were from five to seven dollars

per week. The employers stated that their system of charging for thread had been in force for twenty years. No settlement of the dispute was reported during the month.

On February 3, a strike of cloakmakers of the Continental Costume Company, took place at Toronto, Ont., in which about forty-eight male and twenty-two female employés were reported to have been directly affected, and twelve male and three female employés were indirectly affected. The dispute arose from a demand for a union shop. No settlement of the dispute was reported during the month.

**Strike of Printers at Peterborough,
Ont.**

On February 4, a strike of about thirty-five journeymen printers and five apprentices was declared at Peterborough, Ont., affecting the three newspaper offices of that place. The cause of the dispute was the refusal of the employers to grant a demand for an increase in wages from twelve dollars to fourteen dollars per week for the day printers. On February 9, the strike was declared off, a compromise having been effected.

**Strike of Cigar Makers at Winnipeg,
Man.**

On February 8, a strike of twenty-three cigar makers took place at Winnipeg, Man. According to a report received from the employer, the cause of the dispute was the promotion of a female apprentice before she had served her full time. On February 17, work was resumed, the employé having been restored to the rank of apprentice.

**Strike of Hebrew Butchers at Montreal,
Que.**

On February 7, a strike of thirty Hebrew butchers took place at Montreal, Que., on account of the refusal of six employers to grant demands of their employés for an increase in wages and recognition of their union. No settlement was reported during the month,

but prior to the declaration of the strike, five employers had granted these demands. In the course of the month, the strikers opened a co-operative meat market, and conditions ceased to be affected by the dispute.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of February, and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus have been received at the Department of Labour during February, 1910.

DOMINION REPORTS.

Iron and Steel Production.

The production of iron and steel, in Canada, during the calendar years 1907 and 1908, by John McLeish, B.A., Department of Mines, Ottawa: Government Printing Bureau, 1909. Page, 35.

IN a report of the Department of Mines on the iron and steel production of Canada, it is stated that the present rate of production of iron ore in Canada varies from 300,000 to 400,000 tons per annum. In addition from 650,000 to 700,000 tons are obtained from Newfoundland each year, and a quantity from the southern shore of Lake Superior. Numerous iron ranges are known to exist in Ontario north of Lakes Superior and Huron, but owing to the cost of transportation and the low grade ore in some cases, they cannot compete with the imported ore. At present there are about seven or eight producing mines in Canada,

only one of which produces more than 100,000 tons per annum. There are sixteen completed blast furnaces, which turned out 630,835 tons of pig iron in 1908. In addition over a million tons of iron and steel were imported.

ONTARIO REPORT.

Mining Statistics of Ontario.

Eighteenth annual report of the Bureau of Mines of Ontario, Part 1. Toronto: King's Printer, 1909. Page, 320.

Part I of the Eighteenth Annual Report of the Ontario Bureau of Mines, contains a statistical review of the mining industry of the Province for 1908, reports on iron ranges in northern and northwestern Ontario, continuing the series in previous annual reports, and an account of the region adjacent to Lake Abitibi.

The following table shows the mineral production of Ontario in 1908, with the number of employés in the various branches of the mining industry, and the wages paid them.

Product.	Quantity.	Value.	Employés.	Wages.

(c) Value crude petroleum, exclusive of Dominion Government bounty.

(d) Petroleum refining works only.

BRITISH REPORTS.

Industrial and Co-operative Societies.

Reports of the Chief Registrar of Friendly Societies for the year ending December 31, 1908, Part B. Industrial and provident societies. London: Wyman & Sons, 1909. Page, 272. Price, 2s., 2d.

In an introductory memorandum to the Report of the Chief Registrar of Friendly Societies, of Great Britain, on industrial and provident societies a brief review is given of the origin and progress of these organizations, and of the legislation relating to them. The oldest co-operative society of which there are official records

is the Hull Anti-Mill and General Industrial Society, which was founded at Kingston-on-Hull in 1795, to enable its members to purchase wheat as good as possible, and to manufacture flour at the cheapest rate for their use. This society continued in existence until 1897, when it was voluntarily wound up. Similar movements appear to have developed simultaneously in various parts of the country, but they were not recognized by law until 1834, when societies were authorized to be established for any purpose not illegal. In 1846, they became an integral part of the scheme of associated thrift as represented by provident societies. In

1852, the first law relating specially to their operations was passed, and ten years later they were granted the privilege of incorporation. Various amendments to the law were made from time to time, the statute at present in force being the Act of 1893, as amended in minor details in the years 1894 and 1895.

The societies registered on December 31, 1908, are divided in the report into the following groups: (1) Societies for carrying on industries and trades; (2) Societies for carrying on businesses; (3) Land Societies. In group (1), comprising ordinary co-operative societies, there were registered 2,243 of these societies, of which 243 were wholly "productive," 887 wholly "distributive" and 1,080 both productive and distributive. The balance on the trade of the year in 1,918 societies resulted in a profit of £10,852,664; and in 211 societies in a loss of £27,184.

In group (2) there were registered 298 workmen's clubs, eighty-four "financial" businesses, and sixty-eight societies of a miscellaneous nature. Of the workmen's clubs, 179 showed a profit of £27,192, and 107 a loss of £8,405, at the end of the year.

In group (3) returns were furnished by 137 ordinary land purchase societies, having a membership of 17,807, and 123 small holdings and allotments societies, with a membership of 5,926.

In the aggregate, it is stated in their report, co-operation in its various phases represented in 1908, a membership of 2,679,805, while the total assets were £58,315,484, an addition of nearly two millions sterling during the year.

Poor Relief in Great Britain.

Royal Commission on the Poor Laws and Relief of Distress. Appendix, Volume XII. Memoranda by individual commissioners on various subjects. London: Wyman & Sons, Limited, 1901. Page, 464. Price, 5s. 7d.

Appendix XII to the report of the Royal Commission on the Poor Laws and Relief of Distress, treats of the subject chiefly from the historical standpoint in a series of memoranda by individual commissioners. Mr. Stewart Loch contributes a memorandum in regard to the

period from 1601 to 1834. Professor William Smart gives an account of the Report of the Commission of 1832, and of the Poor Law Amendment Act of 1834, based on the Report. The work of the Poor Law Commissioners from 1834 to 1847, and of the Poor Law Board from 1847 to 1871, and the first six years of the Local Government Board. Mrs. Sidney Webb describes the policy of the Central Authority from 1834 to 1907, and the medical services of the Poor Law and Public Health Departments, and gives the history of Poor Law administration in Bradford from 1883 to 1906, and in Poplar from 1837 to 1906. Right Hon. Charles Booth furnishes an abstract of statistics on the Poor Law unions of England and Wales with remarks on the reforms that are needed, and the tables of the present areas of Poor Law administration, and a new grouping of Unions for proposed Poor Law Boards.

SCOPE OF EDWARD MEDAL EXTENDED.

SOME two years ago His Majesty the King, was pleased to institute a medal to be called the Edward Medal, for the purpose of distinguishing the many heroic acts performed by miners, quarrymen and others in saving or endeavouring to save the lives of others from perils in mines and quarries.¹

During December last, His Majesty was pleased to extend the scope of the medal so as to admit its being awarded to those who in the course of any industrial employment, endanger their own lives in saving or endeavouring to save the lives of others from perils in connection with such employment.

The following is the text of the King's Warrant in this connection:—

EDWARD THE SEVENTH, by the Grace of God, of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, KING, Defender of the Faith, Emperor of India, to all to whom these Present shall come:

GREETING:

WHEREAS We, by a Warrant under Our Royal Sign Manual, bearing date the thirteenth day of July, one thousand nine hundred and seven, in the seventh year of Our Reign, did institute and create a new Medal to be entitled the Edward Medal, to be awarded for heroic acts performed by Miners and Quarrymen and others, who endanger their own lives in saving or endeavouring to save the lives of others from perils in Mines and Quarries within Our Dominions and Territories under Our protection and jurisdiction:

And whereas We are desirous of extending the scope of this decoration:—

It is ordained that the Edward Medal of the First Class and the Edward Medal of the Second Class shall be awarded to those of Our faithful subjects who in course of Industrial Employment endanger their own lives in saving or endeavouring to save the lives of others from perils incurred in connection with such Industrial Employment in these Our Dominions, and in Territories under Our protection or jurisdiction, and such awards shall be made only on recommendation to Us by Our Principal Secretary of State for the Home Department.

Where the said Medal is granted otherwise than for acts performed in Mines, the Medal shall bear Our effigy on the obverse, and on the reverse a suitable design, with the words "For Courage."

Given at Our Court at Sandringham, the first day of December, one thousand nine hundred and nine, in the ninth year of Our Reign.

By His Majesty's Command,

W. J. GLADSTONE.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NOVA SCOTIA CASES.

Judgement in Coal Conspiracy Case.

Stipendiary Magistrate Fielding delivered judgement, on February 15, in the coal conspiracy case, and committed J. R. Cowans and Alexander Dick for trial at the next sitting of the Supreme Court.¹

Bail was fixed at \$1,000 each, with one surety for \$1,000. The defendants each went bail for the other.

The Magistrate stated that he had not treated the case as political economy, but had dealt with it solely as a matter of law and had not gone into the matter of trusts or rights, or as to what inspired the prosecution.

Rioters Punished.

In the Criminal Court, at Sydney, on September 22, Mr. Justice Lawrence meted out heavy sentences to the striking miners who were found guilty by a jury, of meeting for riot and unlawful assembly. Of the cases before the court six were found not guilty, and forty-eight were convicted. The principals in the rioting, John Connolly and John Guthro, were sentenced to two years each in Dorchester Penitentiary. James Murphy and Nathan Roche each were given nine months in jail; seven were released on six months' suspended sentence, and the rest were fined from \$20 to \$50 each, and in default of payment from two to six months' imprisonment.

Fatal Injuries Act. Damages for Negligence.

An action under the "Fatal Injuries Act", of Nova Scotia, brought by the plaintiff, on behalf of himself and his wife, to recover damages for the death of their son, a young man who was

killed in the defendants' mine while working as one of the defendants' employés. The jury awarded, \$1,200 damages, and divided the amount, giving to each, \$600, father and mother. The death of the employé was caused by a stone or rock of several tons' weight falling out of the hanging wall of the mine upon the deceased workman, just after work had been resumed in the mine, and after it had remained unworked for some eighteen months. The jury found that the negligence of the defendants, which caused the death of their workman, consisted in "not having the overhanging wall cased and protected from falling; timbering overhead in trench, not sufficiently strong to hold a fall of stone liable to fall from overhanging wall; that the working place was not safe, and that, if the walls had been properly examined, the stone which fell would have been noticed as dangerous; and lastly, that the unsafe condition of the working was discoverable by a reasonably careful inspection. Defendants first appealed to the Supreme Court of Nova Scotia, which dismissed the appeal, and afterwards to the Supreme Court of Canada, where the appeal was again dismissed. The principle contention of the appellants before the last named Court was, that the mine, which had been unworked for some eighteen months, had been properly examined, before work had been resumed, by the superintendent of the mine, and the managing director; that the inspection was careful and complete; but that, whether it was negligent or not, the company, having employed competent men, were not liable, and that the evidence did not justify the findings. Justices Davies and Idington, who gave judgement for the Supreme Court of Canada, were of opinion that the evidence sustained the findings of the jury. Mr. Justice Davies said, that while the master is not necessarily liable for the negligence of the superintendent of his works, he is bound to see that these works are suitable for the operations he carries on at them; and he cannot, by

¹See the *Labour Gazette* for November, 1909, page 533.

leaving their supervision to his superintendent, escape liability, for the duty is one of which he cannot divest himself. He must provide, at least fit and proper places for the workmen to work in, and a fit and proper system and suitable materials under and with which to work. Such a duty cannot be got rid of by delegating it to others. In view of the disuse of the mine for a period of eighteen months, he deemed the position on the resumption of work, as regards the mine owners' duties to their employes, to be the same as if they were then, for the first time, placing their men at work in the mine. Their duty to their workmen in this situation, was to provide them with a reasonably safe place in which to work. When that duty has been delegated, any negligence of an employe to whom it has been confided, must be imputed to the employer, whether an individual or a body corporate.

(*McDougall v. Ainslie Mining & Railway Company*, 7 Eastern L. R., 429; 42 Supreme Court Reports, 420.)

Dismissal of Case against Coal Miners.

An action by the Cumberland Coal & Railway Company, of Springhill, against eight Belgians brought there to work in the mines, for the cost of their transportation from Inverness to Springhill, came off before Justice Walsh, of Amherst, and was dismissed.

A Thiel detective, on duty, on behalf of the Company at Springhill, explained how he had hired the Belgians in Inverness, and showed the contracts which they had signed, showing that it was stated that a strike existed in Springhill. He was examined, at length, relative to the methods he had adopted in securing the consent of the men to come to Springhill.

The assistant general manager, testified how the Company had requested the I.C.R. to furnish transportation for the strike breakers from Inverness to Springhill and that transportation was to be charged to the Company. The Company had not yet paid the fares, but had received notice that the same was charged to the account of the Company.

It was contended, on behalf of the de-

fence, that as the statement of claim was for "money advanced," and as the cash had not been paid over by the coal Company, though they might be charged with the same, the action could not be sustained, and the magistrate dismissed the action on this ground, although he advised the parties at variance to endeavour to effect a settlement. Shortly after the decision was given the solicitor of the Company gave notice of appeal.

Quashing of Conviction under Fisheries' Act.

The trial of Captain John Smith, of the steam trawler *Wren*, accused of fishing in unlawful waters, is the first trial ever held in Canada under the new *Habeas Corpus* Act passed by Parliament last year. A warrant was issued by the inspector of the Fisheries' Department, at Halifax, and a trial was held. Smith was found guilty and fined \$100, with costs by the inspector, and in default of payment he was sentenced to three months in jail.

Upon an application for his release under the *Habeas Corpus* Act, the judge, released Smith, stating that he had been illegally imprisoned, the evidence being insufficient to convict.

QUEBEC CASES.

Apportionment of Damages for Negligence.

Plaintiff, on behalf of herself and her children, sued to recover damages resulting from the death of her late husband, who was killed by a loose rock falling on him while he was at work in a mine owned and operated by defendants. The trial judge found as a fact, that the foreman of the mine was aware, at the time of the accident, of the danger caused by the presence of rock in the roof of the slope or drift where deceased had been ordered by him to work, and that he took no steps to protect the workman. Upon appeal the Court of Review, at Montreal, agreed with this finding.

It was also found as a fact by the trial judge and affirmed on appeal, that deceased had contributed to the accident

by failing to follow instructions given him to carefully observe the state of the roof each morning before commencing his work, so as to ascertain if there was any loose rock at the place where the accident occurred, and that he neglected these warnings at the time he was killed. There being a common fault and negligence on the part of deceased and the defendants' foreman, the trial judge, assessed the damages at \$3,000, and, under the law of Quebec, apportioned the damages, giving \$500 to the plaintiff personally, and \$1,000 to her in her capacity of tutrix to her children. This judgement was affirmed by the Court of Review, and also by the Supreme Court of Canada, to which an appeal was taken from the Court of Review. The Supreme Court held, that where, as in this case, there is a common fault (*faute commune*), and the party who claims compensation for an injury caused by the fault of another, has been also guilty of fault, which contributed to the accident, he must share the responsibility, and the plaintiff can be awarded only a proportion of the sum total of damages, varying according to the degree in which the respective parties were to blame. The Court was unanimous in dismissing the appeal with costs, and confirming the judgement of the trial judge in favour of the plaintiff.

(Lefebvre v. Nicholls' Chemical Company, of Canada 42 Supreme Court, Reports, 402.)

ONTARIO CASES.

Master and Servant.—Servant's Contributory Negligence.

Plaintiff's hand was crushed between a piece of timber being lowered into the Detroit river tunnel, and the shield through which it was being lowered, alleged to have been caused by the negligence of defendants' employés. At the trial the County Court judge of the County of Essex gave plaintiff judgement for \$50 and costs. Upon appeal to the Divisional Court the action was dismissed on the ground that the evidence showed that the plaintiff had only himself to blame, first, in not having his injury promptly attended to, and later, when his condition became more serious,

in not doing as he was told and going to see a surgeon.

(McKervey v. Butler Brothers, 15 Ontario Weekly Reporter, 175.)

Master and Servant.—Servant's voluntary risk.—Contributory Negligence.

Plaintiff, widow of deceased, brought action claiming damages for death of her husband, caused, as alleged, by defendants' negligence. The work upon which deceased was employed at the time of his death was that of constructing a tunnel under the Detroit river, and, as a civil engineer, his position was that of superintendent of shaft No. 2. On the night of September 14, 1908, a fire occurred in shaft No. 4., which was supposed to have been caused by the use of candles in the hands of some of the defendants' workmen engaged in making repairs to a bulkhead containing compressed air which was leaking. The place where the fire occurred was about 2,000 feet distant from shaft No. 2, where deceased was employed, and was quite beyond any place in the tunnel where his duty to the defendants required him to be. At the time of the fire there were workmen in the tunnel, and deceased, attracted to shaft No. 2, by the fire, went down that shaft with others to assist in extinguishing the fire, and to rescue the workmen, and, while in the tunnel, was suffocated by the smoke, which was very dense, although the fire itself was not serious. The negligence relied on was, in not providing and maintaining proper supervision of the work, in leaving timber or paper exposed, in permitting the improper use of fire, and otherwise conducting the work in a negligent manner; negligence of the superintendent, absence of proper appliances to put out fires, and of sufficient modes of egress from the shaft in which the fire occurred. At the trial, Mr. Justice Teetzel dismissed the action. His judgement was affirmed by the Divisional Court. An appeal to the Court of Appeal was dismissed and the Divisional Court judgment affirmed. It was held by the Court of Appeal, that deceased had no duty at the fire, nor had defendants any duty to keep the fire from

that section of the tunnel; that, the deceased was not employed where the fire occurred, but was a volunteer, acting deliberately; and, that the defendants were not liable.

(Kimball v. Butler Brothers, 15 Ontario Weekly Reporter, 221.)

Liabilities of Hotel and Restaurant Keepers.

The liability of hotelkeepers to provide food and lodging to travellers, at any hour of the night or day, they may be called upon, is recalled by a judgement delivered by Chancellor Boyd on an application by a restaurant keeper, of Chatham, to quash a by-law restricting the hours during which restaurants may be kept open for business on Sunday in Chatham. The by-law compels the restaurants to close from two to five in the afternoon, and from seven o'clock Sunday evening until five o'clock Monday morning. The restaurant keeper was supported in his attack on the by-law by the hotelkeepers, who explained their support by stating that they preferred to be rid of the catering to travellers' wants, finding it more convenient to send them to a nearby restaurant.

The Chancellor refused the application, holding that the Council had the power, under the Municipal Act, to regulate the hours during which the restaurants could do business. He referred to the fourteen hotels of Chatham "instituted for the convenience of passengers and wayfaring men," and said that however convenient it might be for them to be able to send late guests to a restaurant they could not rid themselves of their obligation to furnish food and shelter for travellers in consideration of which the law gave them a lien on the effects of their guests. Should hotelkeepers fail in their duty, it is for the municipal authorities to see to it and let them know that they do so at the peril of their licenses.

Conviction of Locomotive Engineer.

A C.P.R. locomotive engineer pleaded guilty before the police magistrate, at Perth, to being intoxicated while on

duty in charge of a freight train. The Crown Attorney prosecuted. Counsel for the C.P.R. company stated the facts of the case at the request of the Crown, but did not press for severe punishment. Counsel for the accused pleaded for a lenient sentence. The magistrate referred to the serious nature of the offence and imposed a fine of \$100 and costs, or six months' imprisonment. The maximum penalty, under section 413 of the Railway Act, is \$400 fine or five years' imprisonment, or both.

A Case under the Ontario Factories' Act.

A merchant tailor, in the City of Ottawa, assuming that his premises, did not come under the provisions of a factory or shop regulations, and considering his shop of a high standard, received the inspector with discourtesy and obstruction in the discharge of his official duties.

The inspector failing after repeated attempts to determine the relation of the alleged proprietor to the work-shop in question, laid an information before the Police Magistrate, under, sec. fifty-one of the Ontario Factory Act, which provides that the owner or proprietor of any factory, hereafter, established is required to notify the inspector of the establishing of such a factory, and receive from the inspector a permit to operate the same before beginning operations. The case was heard before Magistrate O'Keefe, in the City of Ottawa, on February 16, 1910. The defendant pleaded guilty, and having written a full apology to the inspector for his discourtesy and obstruction, and agreed to comply with all requirements of the Act, or inspector in future, the inspector requested an adjournment of the case until February 21, which was granted. The case was again called on February 21, when the defendant, through his council, pleaded the excellent condition of his factory, and that he was wholly unaware that he came within the provisions of the factory laws, and regretted this action that led to his being called in court for the first time. The Crown Attorney pointed out that the factory

laws were established for the welfare of the general public, that the inspectors were charged with a grave duty, and that obstruction or hindrance to the inspectors of any kind would not be tolerated by the department. The Magistrate followed in the same, strain observing that it should be a warning to owners or proprietors of factories or shops. And that should a similar case come before him again he would inflict a penalty that would be a substantial warning to such persons. On the recommendation of the Crown Attorney and the inspector, the case was permitted to be withdrawn, the defendant paying the costs.

MANITOBA CASE.

Alleged Criminal Negligence of Employer.

A coroner's jury has found that Andrew Coleman died as a result of exposure, and death was due to gross carelessness on the part of John C. Comlins, who was in charge of a party of labourers, en route to Comlins' lumber camp. The evidence showed that the labourers arrived with a number under the influence of liquor, and started on an eight-mile march to the camp from Darwin. The deceased strayed at dusk, falling a few feet, from the road, where he was found frozen stiff in the morning by volunteer searchers. It did not appear that Comlins made any attempt to find the missing man. Fifteen minutes after the inquest Comlins was arrested on the coroner's warrant, which charged him with manslaughter.

SASKATCHEWAN CASE.

Action for Wages. Immoral Conduct as Defence.

Plaintiff sued as assignee of one "H", who was employed as a farm servant by defendant for the season of 1908, at \$25 per month and fifty cents per day extra for the time he was threshing. The defence was the grossly immoral conduct of the servant, by the seduction of the defendant's infant daughter during

the term of service, which came to the defendant's knowledge only on October 23, 1908, when the servant was leaving defendant's employment, at the completion of his term of service. The District Court Judge, before whom the action was tried, held, that the servant had forfeited all right to his wages by such conduct, and gave judgement for the defendant. An appeal against this judgement was dismissed with costs.

Mr. Justice Newlands, for the full court of five judges, after reviewing a number of decided cases on the question, said that grossly immoral conduct was a breach of the contract of service, and he knew of no immorality on the part of a servant more gross nor more detrimental to the interests of his master than the seduction of his daughter, who, in this case, was only fourteen years of age. The servant having broken his contract, and that breach not having been waived, he could not recover, and, as the grossly immoral conduct was continued during the whole term of service, it was a defence to his whole claim for wages, that is, he broke his contract each month, and therefore, never earned a month's or any wages. He was, therefore, of opinion that, as "H." never earned any wages, there was nothing for him to assign to the plaintiff, and that the judgement of the District Court Judge should be affirmed with costs.

(Wood v. Barker, 12 Western L.R., 225.)

Sunday Work Necessary.

In the case of the prosecution of W. H. Lecky, representing Peter Lyall & Sons, of causing work to proceed on the Parliament buildings on Sunday, November 28, Magistrate Trant, at the hearing, dismissed the charge on the ground that the evidence adduced by the prosecution was sufficient to show, that the work done was not only necessary in the ordinary sense of the word, but that it was a case in which the reservations section of the Act applied. The second charge, that of working on Sunday, December 8, was withdrawn by the Attorney-General.

ALBERTA CASES.

Workmen's Compensation Act Applicable to G. T. P. Company and its Contractors.

An important decision has been just handed down by Judge Taylor in the arbitration under the Workmen's Compensation Act between Allan Murray, of Edmonton, and the railroad construction contractors, Foley, Welch and Stewart. Murray was employed as a carpenter on the G.T.P. construction. While working on a trestle bridge he was knocked off the structure by some moving timbers and sustained injuries to his foot. He claimed \$9 a week since the accident happened.

The respondents, Foley and Stewart, denied their liability to pay compensation under the Act, contending that as contractors on the Grand Trunk Pacific railway company in the construction of that railway they were consequently subject to the exclusive legislative authority of the Parliament of Canada; and, that in pursuance of such legislative authority, the Parliament of Canada had made applicable to such work the provisions of the Public Works Health Act, being chapter 135 of the Revised Statutes of Canada, 1906, and the applicant came under the provisions of such Act and received medical attendance in pursuance of its regulations. The Workmen's Compensation Act under which the proceedings were taken, it was, therefore, held, did not apply to the Grand Trunk Pacific Railway Company, or to the respondents as its contractors.

This contention was not upheld by the arbitrator, Judge Taylor, in the following judgement:

"In this matter I am of the opinion that the Workmen's Compensation Act applies. The Public Works Health Act does not in any way cover compensation for injury that may be incurred to any workman. It is for the purpose of compelling certain contractors or companies engaged in public works to properly care for the health of the workmen and make the camps sanitary. It is also for the

purpose of compelling them to have within reasonable distance of the workmen, proper medical men and hospital accommodation to care for any of the workmen who may become sick or injured, as it is well known that most of these works are carried on at great distances from the places where medical care or accommodation for the sick or injured is to be had. The health regulations permit the contractors or companies to levy a certain contribution from every workman to meet the expenses incurred. This no doubt, in many cases reimburses the company for their outlay. The Workmen's Compensation Act is for a different purpose. It is to reimburse the workmen to a certain extent, for his loss of time if he should suffer an injury which incapacitates him from work. He might not even be confined to the hospital or require the doctor's care. While in some cases the two Acts might overlap, I do not see that they in any way conflict. In my opinion, therefore, the Workmen's Compensation Act is not *ultra vires* and does apply to such construction works as that in which the claimant was engaged."

BRITISH COLUMBIA CASES.

Failure to Establish Mechanic's Lien.

In a mechanic's lien case Sherritt vs. McCallum, one John Young agreed to build a house for the defendant at Foul Bay, the plasterer "to make good all defects and make good after other tradesmen have finished." Plaintiff was subcontractor for the plastering and completed his work on July 14th, last. On applying to Young for his money, \$160, the latter told him he had thrown up the job. Becoming unable to complete his contract Young had abandoned it, and McCallum finished it by day labour. On July 30th, Sherritt gave notice of a lien, but he did not file it within thirty-one days after the completion of his work, as required. Instead he endeavoured to get on the premises to do some touching up after the other tradesmen, but plaintiff's foreman would not allow him in. On August 25th, he got in and did four or

five hours' work, and subsequently took the present action.

Judge Lampman held that plaintiff was a trespasser on August 25th, and had express notice that he was not wanted to do any more work. The circumstances showed plainly that he was not making a *bona fide* attempt to complete his contract, but was instead trying to manufacture a lien, and his action must, therefore, be dismissed with costs.

Security for Costs under Workmen's Compensation Act.

The defendant Company, in a proceeding under the Workmen's Compensation Act, applied for an order for security for costs. The claimant was the administrator of the personal estate of Albert Kruz, deceased who died in consequence of injuries received whilst in the Company's employment. The claim for compensation was in due course brought before an arbitrator, pursuant to the provisions of the Workman's Compensation Act, and the evidence having been substantially given, several adjournments, were had for different purposes. After the proceedings commenced the claimant became an inmate of the penitentiary on a charge of theft. He was also insolvent. Whilst the matter was still before the arbitrator an application was made in chambers by the Company, for security for costs, on the grounds that the applicant was not interested in the subject matter of the arbitration; that the estate of the deceased was insolvent; that the claimant was under penal servitude, and the dependent wife of the deceased lived beyond the jurisdiction of the court. The application was opposed first, because it should have been made to the arbitrator; secondly, because the right to security, if such right existed, had been waived; and thirdly, because of the facts set forth in evidence, the Company was not entitled to security. Mr. Justice Morrison, before whom the matter came, said that the third objection raised the substantial point of contention in answer to the Company's real grounds, viz. the application of the well known

principle of law that a nominal plaintiff, if without means, may be ordered to give security for the costs of the action. The judge reviewed the authorities which, in his opinion covered the case with respect to the third objection above stated, and held that that objection did not apply in the present case. On the other points of objection he was of opinion that the application by the Company, if it could have been made at all, should have been made, to the arbitrator, and then it should have been made in time. The application for security for costs was refused with costs.

(Re Kruz v. Crow's Nest Pass Coal Company, 12 Western L. R., 158.)

Workman's Wages—Contract of Hiring.

The defendant Company, in an action for wages, admitted that the plaintiff was employed by the month, but contended that he was not entitled to recover because it is the custom amongst land surveyors and their field assistants to terminate the employment at any time without notice, even though the hiring be a monthly one. The County Judge of the County Court of Victoria, before whom the action was tried, decided that it could not be contended that such a custom overrides an express contract, and that in this case there was evidence, verbal and written, of a contract for a monthly hiring. He said that while the custom as stated may exist between surveyors and their assistants, it did not follow that the same custom would prevail in the case of the Company engaging surveyors, and their assistants. He gave judgment for the plaintiff for the balance of the amount claimed after making certain deduction.

(Andrews v. Pacific Coast Coal Mines, Limited, 12 Western L. R., 163.)

BRITISH CASE.

The application for leave to appeal by the defendants in the case, Cotter vs. Osborne, was made before the privy council in London during February, and was refused.

The original suit was brought by the master plumbers of the city against the

defendants, the journeymen plumbers and the members of local unions, to restrain them from interfering with the plaintiffs and the men hired by them during the plumbers' strike, in July, 1906, and to recover damages assessed at \$25,000 for losses which they had sustained. The case was tried before Mr. Justice Mathers, who held that the defendants had broken the law and had thereby rendered themselves liable for damages for inducing those who remained in the plaintiff's employ, or afterwards entered the same, to leave that employment, and for preventing others from doing so. The injunction was also made perpetual to restrain the defendants from interfering with the plaintiffs or their workmen.

When the case was brought up the secretary for the union was sent to jail for contempt of court, on account of the fact that certain books asked for by the plaintiff were not forthcoming, and that in short, the production of them was practically refused.

From that decision the defendant's appealed. The judgement of the court of appeal was delivered by Mr. Justice Perdue, that the appeal of the defendants should be dismissed, no costs of the appeal being allowed to either party. The court held that for a number of persons to combine to induce others to break contracts was unlawful, and if such others were induced to break, and did break their contracts that this constituted an actionable wrong. It was no justifica-

tion for the defendants to show that they were not actuated by malice or ill-will against the persons injured by their acts, and that they only sought to further their own interests. It was further claimed that picketing or besetting of the plaintiff's shops with the object of coercing the employés or inducing them to cease working was also unlawful.

Following this judgement a receiver was appointed by the court to collect the monies through the solicitors of the master plumbers and to realize the judgement from the journeymen. It was, however, found impossible to realize anything from the union as a union, because it had no corporate existence and no legal way of enforcing payment of dues. This action was, therefore, defeated by the unions disbanding. Action was then taken against individual members personally, but this too was abandoned as with one exception, none of them had any property which could be recovered against. No action was taken against the exception since it was shown that he had taken no active part in the strike, so that as far as damages were concerned the plaintiffs gained no advantage from the strike.

It was realized, however, by the unions that the fact of the injunction being granted prohibiting picketing was a grave one, since it deprived them of one of their strong weapons in time of strike. It was, therefore, decided to appeal the decision still further. The result has not been announced.

THE LABOUR GAZETTE

APRIL, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF MARCH, 1910.

I.—GENERAL SUMMARY.

THE spring season has opened fully three weeks earlier than last year throughout Canada. The effect upon general industry and labour has been far-reaching. Agriculturists have been able to work on the land at an earlier date than in several years past, and an increase in the acreage devoted to crop will probably result. Railway construction employés, the building trades, and unskilled labour generally, have benefitted greatly as a result of the favourable weather conditions. In western Canada there was already an active demand for general labour, and the supply was fully absorbed in many localities. The mining industry has also been favourably affected by the early opening of spring. Lumbering and fishing, on the other hand, in central and eastern Canada, have been hampered by the disappearance of the snow and ice, and a diminution in the lumber cut is expected. The expected early opening of navigation has engaged large numbers of men who would otherwise have remained inactive. There has been a further steady increase in the activity of manufacturing establishments. General trade was buoyant, with prices and wages firm to upward. The general outlook is for a very active season, the amount of employment in sight being larger, and general industrial and financial sentiment being more confident, than at any time since the pronounced activity of 1906 and 1907.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour, during March, 1910.

Metal, engineering and shipbuilding trades.—On March 1, the following circular, signed by the manager, was posted throughout the workshops of the Canada Foundry Company, Toronto:—

"I have been authorized to announce that, dating from March 1, 1910, a general increase in wages of five per cent. will be made to all the works' employés of the Canada Foundry Company, Limited, who are on an hourly basis.

"The management recognizes the harmony that has existed between themselves and the employés during the dull times, and takes the earliest opportunity afforded by improved prospects, of showing its appreciation in a practical manner."

Approximately 1,000 men will be affected by the above and the total increase will amount to \$600-\$650 per week.

Boilermakers and boilermakers' helpers in the Intercolonial Railway shops at Moncton, N.B., to the number of twenty-five, had their wages advanced two cents per hour; the change was made retroactive to April, 1909.

Clothing trades.—Tailors at St. Catharines, Ont., obtained a ten per cent. increase in wages. Coatmakers at London, Ont., to the number of thirty-five, received an increase of twelve per cent. on piece work prices.

Public employés.—The estimates of the Ontario Legislature passed during March, provided for a general increase to clerks and stenographers employed by the Government. Civic employés at Vancouver, B.C., received an increase in scale. Firemen at Stratford, Ont., obtained a voluntary increase in scale. At Berlin, Ont., firemen's salaries were increased by \$50 per annum, and the wages of corporation labourers by one cent per hour. At Moose Jaw, Sask., twenty labourers in the employ of the corporation of the city were decreased from twenty-five to twenty cents per hour for the remainder of the winter season.

Railway employés.—A general increase in wages of train despatchers and telegraph operators on the Middle Division of the Grand Trunk Railway system was announced during March; chief despatchers and despatchers were advanced \$5 per month, and operators from \$5 to \$10 per month.¹ Freight handlers and checkers in the employ of the Canadian Pacific Railway, (250) at Toronto, had their wages increased from fourteen and fifteen cents to fifteen and sixteen cents per hour.

Street railway employés.—Motormen and conductors in the employ of the London Street Railway Company had their wages increased one cent per hour in the case of second and third year men, and two cents per hour in the case of employés of over three years' standing.

Interruptions to Industries.

Among industrial establishments, etc., destroyed by fire or through other causes during March, as reported in the press of the Dominion, the following may be mentioned.

Nova Scotia.—Hardware store at Truro, loss, \$2,000.

About March 15, fire broke out in the big slope of the Acadia Coal Company's mine at Stellarton, and caused considerable damage.

New Brunswick.—Laundry at St. John; tenement house at St. John, loss, \$1,500.

Quebec.—Boiler room and contents at mine in Black Lake; outbuildings at Charlemagne, loss, \$2,000; outbuildings at Labelle, loss, \$1,500; store at Lachine, loss,

\$10,000; saw-mill at Lysander. At Montreal, moving picture theatre, loss, \$20,000; tenement house, loss, \$5,000; wholesale clothing establishment, loss, \$6,000; church (partial); store at Quebec; sporting goods store, loss, \$5,000; hospital (partial at Ste. Foye); outbuildings and contents at St. Johns, loss, \$2,000.

Ontario.—General store at Burgessville, loss, \$10,000; business block at Chatham, loss, \$35,000; business block at Collingwood, loss, \$10,000; hotel and general store, at Comber, loss, \$10,000; hotel at Coteau Landing, loss, \$3,000; parsonage at Delta; large portion of business section of town of Elk Lake, loss, \$200,000; outbuildings and stock at Kinmount, loss, \$3,000; church, at Goderich, loss, \$15,000; outbuildings and residence, at Lakefield; pavilion, band stand and large bath house, at Erieau; livery stable at Norwood; tenement house, at Ottawa, loss, \$3,000; store, at Orillia, loss, \$12,000; two stores at North Toronto, loss, \$5,000; outbuildings and stock at Port Hope; drilling outfit in Raleigh township; skating rink, at Simcoe, loss, \$6,000; business block, at St. Catharines, loss, \$8,000. At Toronto, machine shop, loss, \$7,000; planing mills, loss, \$8,000; foundry twenty-five men out of employment; copper-smith's establishment, loss, \$5,000; engine house, loss, \$1,500. Shoe factory, at Waterloo, loss, \$30,000; tenement house (partial) at West Toronto, loss, \$1,000; seed warehouse and laundry at Windsor, loss, \$250,000, seventy hands out of employment.

Manitoba.—Hotel at Hamiota, loss, \$15,000; railway station at Minnedosa, loss, \$5,000; general store at Shoal Lake, loss, \$15,000; club house at Winnipeg, loss, \$50,000.

Saskatchewan.—Business section of Outlook, loss, \$80,000.

British Columbia.—Explosion in boiler room and power house at Ymir, loss, \$16,500. Business block at Victoria loss, \$15,000; planing mill, at Vancouver, loss, \$15,000.

Conditions in the Industries and Trades.

Conditions of employment during March, in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of the *Labour Gazette* and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

The feature of the month was the exceptionally warm weather which prevailed throughout Canada and which had the effect of advancing the season by approximately three weeks as compared with 1909. During the opening days of the month the break up of the winter roads interfered with marketing. In the second half, however, agriculturists were able to work on the land and a large amount of ploughing had been completed by April 1, both in Ontario, the eastern provinces, the Northwest provinces and British Columbia. Some seeding was also done in Ontario, southern

¹The increase was granted after a reference of the matter under the Industrial Disputes Investigation Act, 1907. See report of Board elsewhere in present issue.

Manitoba, Saskatchewan and British Columbia. Orchardists were busy spraying.

Prices were well maintained, though eggs declined. Hogs continued very high. There was a very active demand for horses and cattle. Potatoes were unusually low. The export grain trade was very dull, though prices were firm.

The maple sugar season opened and the outlook is for a heavy production.

Fall wheat in Ontario was reported to have suffered in certain districts from the rapid disappearance of the snow and subsequent alternating frosts and sunshine.

There are in the Province of Quebec, according to a directory issued by the Department of Agriculture, 575 butter and 1,316 cheese factories, 679 combined butter and cheese factories and fifty-six stations where milk is gathered and the cream separated for use in factories. In all 2,626 establishments are included in the list.

A commission was appointed by the Government of Manitoba to inquire into the condition of the live stock industry of Manitoba, with special reference to the alleged monopolistic control of the industry.

With the opening of the spring season in western Canada an active demand for farm hands was reported at several points in the Northwest provinces. Applications for over 8,500 men were filed with the Dominion Commissioner of Immigration at Winnipeg. High wages were offered, the scale ranging from \$25 to \$40 per month for experienced men and from \$10 to \$20 for unexperienced help. Good hands are offered from \$300 to \$350 for yearly engagements. Details with regard to the demand are as follows:—

Experienced men: For Manitoba, 2,458; for Saskatchewan, 1,819; for Alberta, 1,407; total 5,684.

Inexperienced men: For Manitoba, 1,042; for Saskatchewan, 421; for Alberta, 458; total, 1,921.

Married couples: For Manitoba, 262; for Saskatchewan, 419; for Alberta, 270; total 941.

Boys wanted, twenty-two.

Grand total, 8,578.

Fishing.

General quietness prevailed in the Maritime Provinces, coastwise receipts

being somewhat light. Preparations for the opening of the lobster season were actively under way. The early disappearance of the ice curtailed the catch of smelt and the year compares unfavourably with 1909. New Brunswick harbour receipts were also lighter; the value of the St. John harbour fishery is estimated at \$55,000, a shortage of \$18,000, as compared with the previous year. The Lunenburg banking fleet sailed at an earlier date than usual. On the Great Lakes conditions were normal. In British Columbia some good catches of spring salmon and some heavy catches of halibut were reported.

Lumbering.

The early disappearance of the snow brought winter operations in the woods to a close from two to three weeks earlier than usual. As a result the cut in Nova Scotia will be considerably curtailed. On the whole, however, the expectation is that in Ontario, Quebec and New Brunswick the cut will nearly equal that of last year, though it is feared that it will be impossible to remove all of the logs to the streams. The water, moreover, will probably be less favourable for driving than last year. The large number of men returning from the winter camps affected the unskilled labour supply in several localities. Preparations for the opening of the mills were actively under way by the close of the month. Pulp and paper mills were generally active. In British Columbia the mills were very busy; a large number of loggers went into the woods with the advent of spring weather and the outlook for the year is considered excellent.

At the eleventh annual meeting of the Canadian Forestry Association held at Ottawa, March 10, resolutions were passed favouring better fire protection along railway lines, the establishment of a forest reserve on the eastern slope of the Rocky Mountains, the reservation of forests on the head waters of streams, the conservation of water powers, and the establishment of forest reservations in areas suited only for forests. The consideration of the fire laws was left to a

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

special committee appointed at the meeting. The publication of pamphlets and periodical literature will be extended during the coming year. Officers were elected as follows: Patron, His Excellency the Governor-General, Earl Grey; Honorary President, the Right Honourable Sir Wilfrid Laurier, Prime Minister; President, the Honourable Senator Edwards; Vice-President, George W. Chown, The Board of Directors was increased from fifteen to twenty-one.

The annual meeting of the Lumbermen's Association of Nova Scotia, was held at Halifax, March 16. Strong endorsement of the Provincial Government's policy of conservation was passed. The following officers were elected: President, F. C. Whitman, Annapolis Royal; Secretary, A. W. Mills, Annapolis Royal.

Mining.

Conditions were active throughout Canada, the favourable weather having facilitated operations. The Nova Scotia collieries were very busy, except in the districts still affected by labour disturbances. The output was much larger than in March, 1909. The early disappearance of the ice off the coast gave promise of a favourable shipping season. The outlook is for a considerable increase in metalliferous mining in Nova Scotia, during the present year. In Quebec there was increased activity in the copper and asbestos mines with the disappearance of the snow. Favourable outputs were reported from the Cobalt camp, shipments during February having totalled 2,257 tons. Activity also prevailed in the nickel, silver and other mines of northern Ontario. Prospecting became very active in the closing weeks of the month. The coal mines of British Columbia and Alberta were producing steadily, with the trade outlook favourable. The metalliferous camps of British Columbia were fairly active.

A preliminary table of the mineral production of Canada shows the total value of the production of 1909, to have been in excess of \$90,000,000, compared with a total value of \$85,927,802 for 1908. The actual increase or betterment,

however, was somewhat greater owing to a slight change made in the method of compiling statistics.

The twelfth annual convention of the Canadian Mining Institute, which now numbers 1,000 members, was held at Toronto. Several important papers and reports were read.

At the annual meeting of the Crow's Nest Coal Company net profits of \$145,029 for the year were declared. Since June, last, the tonnage of coal mined has greatly exceeded the tonnage of any previous year. The sum of \$215,839 has been spent in improvements during the year.

Notice of a resolution was given, in the House of Commons, by the Honourable the Minister of Mines, Canada, providing for an expenditure not to exceed \$50,000 for investigations and experiments tending to promote the production of zinc and zinc products from Canadian ores.

The annual statement of the British Columbia Copper Company shows that the smelters treated 373,336 tons of ore, from which ore 6,325,000 ounces of fine copper, 18,244 ounces of gold and 64,234 ounces of silver were extracted. The net profits were \$236,338, compared with \$93,960 in 1908, and \$88,155 in 1907.

Manufacturing.

There was a steady increase in manufacturing activity, with, at the close of the month, every prospect of a busy year. Orders on hand were extensive and many plants were working overtime. Heavy goods were especially in demand.

The annual meeting of the Canadian Westinghouse Company, Limited, was held at Hamilton, Ont., Profits for the year were \$498,379. The sales for the year were the largest in the history of the Company, being about double those of 1908.¹

The annual report of the Canadian General Electric Company showed earnings about equal to those of the previous year. The Company was affected by the financial and industrial depression during the first half of 1909, but was very active during the second half.

¹See report of Hamilton, Ont., correspondent.

The report of the Nova Scotia Steel & Coal Company for 1909, showed gross profits amounting to \$907,949, compared with \$734,701 during the preceding year. The sum of \$362,633 has been expended during the year on capital account. The volume of business was in excess of any previous year.

It was announced by the Dominion Government that the iron and steel bounties would not be renewed at the end of the present fiscal year. The bounties have been in force fourteen years. The total amount paid in bounties last year was, on pig iron \$693,423, on steel \$838,100 and on manufactures of steel \$333,091. Altogether \$14,000,000 have been paid in bounties.

According to returns gathered by *Canadian Machinery* the production of iron and steel in Canada during 1909, as compared with 1908, was as follows:—

	Year ending	
	Dec. 31 1908.	Dec. 31 1909.
Total iron production.....	566,515	679,161
Total ingot steel production...	511,569	675,929

DETAILS.

<i>Pig iron:</i>		
Basic.....	345,494	362,947
Bessemer.....	116,230	164,002
Malleable.....	18,293	29,500
Foundry.....	81,932	107,041
Charcoal.....	4,566	15,671
<i>Steel:</i>		
Ingot.....	511,569	675,929
Blooms.....	370,563	472,126
Billets.....	105,473	139,335
Rails.....	267,377	337,346
Wire rods.....	41,420	73,002
Bar steel, iron and structural material.....	81,984	121,058
Castings.....	9,350	13,960
Plate, axles, spikes and sundries.....	3,140	6,521

On December 31, 1909, Canada had sixteen completed furnaces, of which eleven were in blast and five were idle. Of the total, twelve usually use coke for fuel and four use charcoal. In addition, three coke furnaces were being built on December 31.

Railway Construction.

The mild weather has greatly facilitated railway construction operations through-

out the winter, and spring work is being resumed at least three weeks earlier than last year. Large numbers of men were engaged, especially in western Canada in connection with the renewed activity in the camps. In the Province of New Brunswick, in northern Ontario and throughout the Northwest provinces and British Columbia the year promises to be exceedingly busy in view of the numerous lines contracted for or projected. In addition to the extensive operations in connection with the extension of the Grand Trunk Pacific and the Canadian Northern lines to the Pacific the building of branch lines by the Canadian Pacific Railway, and Grand Trunk Pacific Railway in the Prairie provinces is being done on an extensive scale. It is stated that thirty new towns will be created as a result of the building of new lines by the Canadian Pacific Railway alone.

The Grand Trunk Pacific Railway line has now been completed as far as Edson, 120 miles west of Edmonton. From this point 1,000 teams have been engaged hauling supplies during the winter as far west as Tête Jaune Cache.

General Transport.

The month was a very active one for railway and street railway employes. Traffic returns on nearly all of the systems show a large increase compared with those of March, 1909. Train crews had a very active month and railway shop employes were busy. Easter holiday traffic was exceptionally heavy.

The earnings of the Temiscaming and Northern Ontario Railway for 1909, totalled \$739,450, compared with \$419,488 in 1908.

The early date at which preparations for the opening of navigation were begun was an important feature of the month, large numbers being given employment. At the close of the month the ice had almost entirely disappeared from the St. Lawrence river, and navigation, in connection with local trade, had commenced at several points.

Official announcement was made of the inauguration of a Canadian Northern steamship service between Montreal,

Quebec and Bristol. The first sailing will be on May 12.

The outlook is for a busy season on trans-oceanic traffic.

The Trades.

Building.—The building trades were immediately and very favourably affected by the early opening of spring. In nearly every locality the outlook is for a large increase in activity during the present year, and the preliminary work on many important contracts was begun during March. Bricklayers, masons, stonecutters and the other outside branches were the classes chiefly affected, the month comparing very favourably with the corresponding period in previous years. Carpenters were busy and painters and decorators very busy in several localities. The number of permits issued in most of the leading centres was largely in excess of the record for March, 1909.

Metal and woodworking.—Employés in industrial establishments reported increasing activity, the month showing a gain as compared with February, and a considerable gain as compared with March, 1909. Boilermakers, shipbuilders and caulkers began their active season at an exceptionally early date.

Printing.—The printing trades had a good month in nearly all of the large centres. There was a demand for men in some localities.

Clothing.—Tailors were active and garment workers busy. Boot and shoe workers had a fair month.

Textile.—Cotton and woollen mills were very active, the latter reporting greater activity than in several years past.

Leather.—Leather workers had a busy month. The hide market continued quiet though leather prices were well maintained. Tanners and curriers were somewhat dull. Notwithstanding unsettled market conditions affecting rubber, manufacturers were very busy.

Food and tobacco preparation.—Business was reported up to the average in the baking trade. Confectioners reported a good Easter trade. Flour prices continued firm, with a slight upward

tendency. Tobacco workers generally, had a fair month.

Miscellaneous.—Barbers, retail clerks and laundrymen reported favourable conditions. Hotel, restaurant and theatre employés were active.

Unskilled labour.—There was a pronounced demand for this class and already the supply was absorbed at many points. The early cessation of operations in the lumber camps temporarily increased the supply in certain districts. Compared with the corresponding period of the previous year, the month was an exceptionally busy one.

Canadian Trade and Revenue.

Foreign trade.—During February, 1910, the total value of imports entered for consumption was \$30,341,462, compared with \$23,188,668 in February, 1909. For the first eleven months of the fiscal year ending February 28, 1910, the total value of imports entered for consumption was \$332,391,669, compared with \$264,260,430 in the corresponding period of 1909. The total value of domestic exports during February, 1910, \$15,337,043, compared with \$14,235,101 in February, 1909. The total value of exports for the first eleven months of the fiscal year ending February 28, 1910, was \$257,012,262, compared with \$224,205,610 during the corresponding period of 1909. In February, 1910, there was an increase in exports of the fisheries, animals and their produce, agriculture and manufactures and a decrease in exports of the mine, and the forest. The grand total of Canadian trade for February, 1910, amounted to \$46,291,201, compared with \$38,088,827 in February, 1909. For the first eleven months of the fiscal year ending February 28, 1910, total Canadian trade was \$610,577,981, as against \$506,464,674 in the same period of 1909.

According to reports of Trade Commissioners received at the Department of Trade and Commerce, Canada, there is a good demand for Canadian raw and salted hides and for fish manure in Japan; for Canadian flour in Sweden; for Canadian pulp for paper making in China;

for Canadian products generally, in Guatemala; and for a superior quality of Canadian paper in Mexico.

Imperial trade.—In Great Britain and the different dominions of the Empire, openings for Canadian products were reported as follows: For Canadian bacon, vehicle wood stock, fish hides, and for small wood goods in Great Britain; for Canadian maple flooring, drilling ropes, steam drills and tools in South Africa, and for Canadian products generally, in British Honduras.

Domestic trade.—Spring trade opened up in satisfactory volume, with winter lines well sold out. The mild weather, which enabled agriculturists to go on the land, caused some quietness in country trade. Easter millinery openings were well patronized. The movement of general groceries was active. The early opening of navigation will greatly stimulate the movement of heavy merchandise.

The February bank statement shows an increase of \$5,800,000 in capital account, due to an addition of \$4,000,000 to the capital of the Merchants' Bank and \$2,000,000 to that of the Sterling Bank, with the removal of \$200,000, the capital of the Bank of St. Stephens, N.B., which went into liquidation. Circulation was over \$7,000,000 above that of February, 1908. Domestic deposits declined but current loans have increased nearly \$100,000,000 during the year and \$11,500,000 during February.

The Bank of British North America declared net profits of \$321,624 compared with \$205,420 last year. The sum of \$100,000 was added to reserve fund.

Negotiations were begun and concluded between representatives of the Canadian and United States' Governments with a view of preventing the application of the maximum tariff rates of the latter country against the Dominion. By agreement the Canadian Custom's tariff was amended by reducing the duties on a stated list of articles.

The revenue of the Dominion continues to show a large expansion over that of last year, indicating a steady increase in the trade of the country. There is a considerable surplus over the expendi-

ture on account of the consolidated fund. The revenue for the month of February amounted to \$8,173,937, showing an increase of \$1,606,751 over the corresponding month of last year. This brings the total for the eleven months of the current fiscal year to \$89,684,460. An increase of \$14,179,637 is thus shown over that for the same period of 1909.

Notes.

Real estate prices were reported upward in many centres.

The annual meeting of the Ontario Land Surveyors' Association was held at Toronto, March 8-10.

The Canadian Cement Association had its second annual exhibition at London, Ont., March 29-31.

A branch employment bureau was opened by the Government of Ontario, in Brantford.

The meeting of the legislative board of the Brotherhood of Locomotive Engineers was held at Ottawa.

It was stated that within the past twelve months the pupils in five of the Ottawa public schools had deposited \$2,114 in the Penny banks.

The Educational Association of Ontario held its annual convention at Toronto during March. The teaching of manual work and domestic science was discussed at some length.

At the Hudson Bay Company's annual fur sales in London, Eng., March 7-10, the number of skins offered was larger than last year. Prices for choice qualities were very high.

The Ontario Good Roads Association held its annual convention at Toronto on March 2-4. W. H. Pugsley, Richmond Hill, was elected President, and Colonel J. E. Farewell, Whitby, Secretary-treasurer.

It was announced that an Ottawa civic by-law, requiring that newsboys and other boys be not allowed on the streets after nine o'clock in the evening will be enforced.

The Government of Manitoba announced the appointment of a Commission to investigate the question of technical and mechanical education in the province. The Honourable G. R. Coldwell, Minister

of Education, will be chairman of the Commission.

Extensive improvements of the water front will be undertaken by the Montreal Harbour Commissioners, during the coming season and the season of 1911, at an estimated expenditure of \$6,000,000.

With the object of avoiding accidents in transporting explosives and inflammable materials a series of lectures to trainmen throughout Canada have been arranged by the leading Canadian railway companies.

A deputation of workmen from Hull, Que., had an interview with the Right Honourable the Prime Minister, the Honourable the Minister of Labour, and the Honourable the Postmaster General, on March 5, in support of the cooperative legislation recently introduced into the House of Commons.

The Workmen's Store Company, Limited, (cooperative) of Dominion, N.S., reported sales during the last six months amounting to \$38,420, an increase of \$4,123 over the previous term. Profits amounted to \$4,515, of which \$451 was added to the reserve fund. A dividend of ten per cent. to members was passed. The present number of the latter is 226.

A conference of representatives of the Federal and Provincial Governments was held at Ottawa, on March 29, for the purpose of discussing the question of the relative jurisdiction of the Provincial Legislatures and the Federal Parliament, in reference to the incorporation of companies, and the rights of companies so incorporated.

The personnel of the Public Utilities Commission of the Province of Quebec, as authorized by legislation passed in 1909, was announced during March, as follows: F. W. Hibbard, Chairman; Sir George Garneau and François Charles Laberge.

In the Speech from the Throne, with which the Legislature of Quebec was opened on March 15, a grant was requested for the foundation of a school of forestry, and a larger grant for an agricultural school at Ste. Anne de la Pocatière. Authorization for the payment of higher salaries to school inspectors and the professors in Normal schools was requested.

A delegation representing the executive of the Trades and Labour Congress of Canada, for the Province of Quebec, waited on the Honourable the Premier of the Province and members of the Cabinet during March. Consideration was requested to the following proposals:—

The abolition of property qualification in municipalities; the amendment of the law so that the salaries of labourers may be protected in the event of insolvency; the enforcement of hygiene in manufactories, especially in foundries; the reduction of the maximum number of working hours in a week, which is now sixty; the uniformity and reduction in the price of school books; the revoking of the charter of the Provincial Association of Barbers; the establishment of employment bureaus by the Government.

An association known as the Employers' Association of Waterloo County, was recently organized at Berlin, Ont. A free labour bureau has been established in connection with the Association, through which its members will in future obtain their help. The constitution of the Association calls for the appointment of a Board of Conciliation and Arbitration for the consideration and investigation of differences between employers and employés.

In reply to the memorial presented to the Government of British Columbia, by British Columbia Executive of the Trades and Labour Congress of Canada,* the following reply was received.

With reference to section 1 and 2, asking for the abolition of property qualifications for holding public office and for the abolition of the election deposit, it is not the intention of the Government to alter the law in this respect at the present time.

No. 3. By the amendment to the Assessment Act, while the exemption on incomes still remains at \$1,000, the tax has been decreased during the session just closed from 1½ per cent. It has not been found possible to abolish the poll tax; without such a tax the great majority of Asiatics would altogether escape taxation.

No. 4. The Government does not see its way to interfere with the present arrangements as to hours of labour.

No. 5. At the present time there is in Government contracts a provision that the contractor shall pay all persons employed by him not less than the wages current in the district in which the work is being carried on for competent workmen and labourers.

No. 6. Provision was made in the estimates this year for a grant of \$20,000 to the Tranquille Sani-

*See the *Labour Gazette* for March, 1910, p. 948-9.

tarium, and the Government has decided to give that institution the same aid towards maintenance as hospitals receive under the Hospital Act. The erection of a building for advanced stages of tuberculosis is now receiving attention from the Government.

No. 7. At the session just ended, the Government brought in legislation providing for the inspection of tramways.

No. 8. The question as to bakeries will be taken up with the inspector.

No. 9. The executive has decided that the provisions with reference to the holding of inquests are sufficiently stringent to fully safeguard the public interest.

No. 10. The amendment to the Land Act passed at the present session, deals principally with the tenure of timber licenses. The Government is awaiting the final report of the Commission before deciding upon the general policy to be pursued regarding timber. 

No. 11. The Government does not at present contemplate the establishment of parental schools. Legislation has been passed bringing into force the Juvenile Courts Act, and the Government desires to observe the effects of its workings.

No. 12. With regard to the amendments to the School Act, submitted by the Vancouver school board, it is the intention of the Education Department to extend the principle of issuing free text books, so as eventually to include all public and High schools. The cost at the present time, however, is too great to permit of this being done at once.

No. 13. An amendment to the Steam Boiler's Inspection Act, 1901, has been passed at the present session to meet certain cases, but this does not affect the efficiency of the Act regarding qualification for engineers.

No. 14. The executive council does not contemplate Government ownership of coal mines, lumber industries, or telephones as requested in this section.

II.—REPORTS OF LOCAL CORRESPONDENTS.

Mr. W. B. McNeill has been appointed correspondent to the *Labour Gazette* for the city and district of Regina, Sask., in place of Mr. Hugh Peat, resigned.

SYDNEY, N.S. AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were active throughout the month. All the large industries were busy, and most of the smaller concerns enjoyed a share of the prosperity common to this district. The tone of business in general, is very good, and a marked improvement in all trades is expected by May. The mild winter contributed greatly to the volume of business done. Sydney Harbour, excepting during a few days, was open and free from ice, and coal was shipped from International Pier without hindrance from either harbour or drift ice. The continuance of the Ferry service throughout the winter months was something new to this Island, and probably the greatest evidence of the mild weather conditions. So far no drift ice has appeared, and vessels report the gulf clear of ice. The coal trade was active being retarded only in the strike district. All the large coal companies of the Island report increased outputs during March.

Since the beginning of the strike at the Dominion Collieries no effort was made to operate No. 6 Colliery, but preparations are being made to restart it at an early date. This was the only colliery completely idle for any length of time. All the other collieries are giving good results.

During the month of February, the Nova Scotia Steel & Coal Company produced 61,105 tons of coal; made 8,035 tons of coke; 4,489 tons of pig iron, and 6,702 tons of steel. This Company has 80,000 tons of coal in the bank and is still adding to it. Unless work is interrupted a very busy season is expected.

The Sydney Steel Works were very active, every department being fully employed. The work of constructing the coke-ovens is being rapidly pushed forward, and two shifts of bricklayers are employed at the work. The output of steel has heretofore been limited by the supply of coal, but sufficient ovens will be in readiness by the first of June to overcome this difficulty and give a supply of coke which will enable the furnaces now in operation, to produce to the greatest capacity.

The excavations for the two 400-ton mixers; for blast furnace number eight, and the Bessemer vessels are complete, and work on the foundation is well under way. An improved method of handling ore has been devised and heavier machinery is being installed, the unloading

grabs now being placed, will lift at least, fifteen tons.

One of the four blast furnaces in operation will be blown off on the first of April for the purpose of relining. An effort will be made to have this furnace in operation again by the first of June.

Some time ago the City of Sydney took a plebiscite which favoured the granting of a bonus of \$50,000 to a company which proposed the erection of rolling mills. The amount of money to be invested in the mills will be one and a quarter million dollars; the number of men employed varying from 300 to 400, most of whom will be skilled mechanics. Wire nails of all sizes; wire fencing and railway bolts will be three of the first products of the mill, there being a large market for these articles in this Province. As soon as a suitable site can be selected construction work on the mill building will begin.

The Sydney Cement works had a busy month, and were awarded a contract of 12,000 tons by the Dominion Iron & Steel Company.

The woodworking factories had fairly steady employment, and report good prospects ahead.

The building trades were quiet and a number of men were out of employment during the winter, and while they look forward to a fair amount of work by the beginning of May, they state there is no foundation for the report of unusually busy times next summer. Four brick buildings will be erected at an aggregate cost of \$130,000.

Transportation by rail was not very heavy, but water transportation was heavier than is common to the March months.

Wholesale and retail business was active.

The Council of the City of Sydney forwarded an Act known as the "Fair Wage Schedule" to the legislative Parliament now sitting in Halifax. The schedule sets forth a minimum rate of wages for twenty different classes of labour, ranging from seventeen and one-half cents per hour for ordinary labourers to forty-five cents per hour for bricklayers, and nine-hour day included.

The skilled trades were generally active, with unskilled labour plentiful.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month was in general, active; the different trades having up to the average employment considering the season. There were a few idle days in the collieries due in one case to a shortage of cars, and in another case to the breaking out of a fire in one of the mines. With this exception, however, the month was favourable, and there was an increase of 2,000 tons in the output compared with 1909. In February, the total output for the district was about 40,000 tons. Manufacturing industries, with the exception of the Rifle Sight Company, which was inactive, had an active month. No changes in rates of wages or hours of employment have occurred.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Quiet conditions prevailed.

Lumbering.—Activity was reported. The cut will be below the average owing to the mild weather.

Mining.—This industry was active, daily outputs having been generally good. At the beginning of the month, some of the overground men at the Allan shafts were discharged, the reason assigned being that owing to the small number of men working underground, it was considered advisable to hoist coal only three days per week, the underground men working six days per week as usual making coal ready to hoist. The fire in the back mine at Stellarton, supposed to be caused by spontaneous combustion, was at the end of the month reported to be under control. Preparations were being made in the Drummond colliery to sink another lift in the main seam slopes, which means another advance beyond the 8,000 feet distance last

reported. The section known as the Fire Clay mine at this colliery has resumed operations after a suspension of some weeks. A fairly large order has been secured by the Drummond Company for slack coal.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet. Jewelers reported business fair; the other metal trades were active. Printers and pressmen were active. Tailors and garment workers reported fair conditions. Boot and shoe workers were busy, saddlers were active. Business was reported fair by barbers, hotel, restaurant, theatre and laundry employes. Clerks were active. Railway and street railway employes were active as were also hackmen, draymen, teamsters and expressmen. Unskilled labour was quiet.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month has been quiet, but there was a decided improvement over February. The building trades have improved considerably, among the permits issued being ones for fine new residences, a large storage house, and two extensive altering jobs. Work on the post office has been pushed with much vigour. Contractor Keefe has now employed some fifty men, and with the present rate the work should be completed by the end of June.

Work along the waterfront has, at times, been extremely busy. With several consignments of immigrants arriving and large shipments of sugar and general cargoes, longshoremen were well occupied, but the demand was, as usual, equal to all emergencies.

The Provincial Secretary's Report for the year ending September 30, 1909, shows that 138 companies were incorporated, which is sixty-one in excess of the record of the previous year. The

following is the record of companies incorporated since the Act became law:—

Year ended 30th Sept.	1900	5 Companies
" " "	1901	23
" " "	1902	34
" " "	1903	58
" " "	1904	55
" " "	1905	62
" " "	1906	91
" " "	1907	89
" " "	1908	77
" " "	1909	138
Total		632

The number of joint stock companies registered was 649, against 631 for 1908, being the largest number registered since the Act was passed.

Three additional stations of the Fishermen's Union of Nova Scotia were incorporated during the year, making a total of thirty. The new stations are No. 28, Morristown, Antigonish County; No. 29, Malignant Cove, Antigonish County; No. 30, Port Hood, Inverness County. Three companies were incorporated under the "Act to Facilitate the Incorporation of Farmers' Fruit, Produce and Warehouse Associations," viz.—

The Aylesford Fruit and Produce Shipping Company, Limited, head office, Aylesford, Kings County; capital, \$8,000, 160 shares. The Kingston Fruit Company, Limited; head office, Kingston, Kings County; capital, \$6,000, 120 shares. The Waterville Fruit Company, Limited; head office, Waterville, Kings County; capital, \$10,000, 100 shares.

Among important measures pertaining to labour introduced into the Provincial Legislature during the present session were:—

"A Bill to Reorganize Labour Unions." This Bill provides that all companies, corporations and other employers of labour shall recognize united bodies of workmen and labour unions. After the passing of the Act any company, etc., refusing to recognize such labour bodies shall be liable to a penalty of \$100 for each and every day (for the first thirty), and to a penalty of \$200 subsequent to the first thirty days. A second Bill is, "An Act to amend the law with respect to compensation to workmen for acci-

dental injuries suffered in the course of their employment." The measure is based upon the terms of the British, Quebec, and Alberta Acts, and was referred, after its introduction by Premier Murray, to a Committee of the House, who are hearing evidence.

A third Bill, also introduced by the Premier, is entitled "An Act relating to the hours of labour in shops and offices". It is based somewhat on the lines suggested by the Commission on Hours of Labour, and stipulates that no assistant shall be employed in or about any shop or office:—

(a) For more than sixty hours, excluding meal times, in any one week;

(b) For more than ten hours, excluding meal times, except on one day of the week, when the employment may be for twelve hours, and

(c) For more than six hours continuously, without an interval of at least one hour for meals. Allowances are made for stock-taking and other special work, etc., and the act applies, in addition to clerks, etc., motormen or conductors on any electric railway or tramway, and no person shall be employed for more than six days in any one week. The penalty imposed is a fine of not less than \$10 and not more than \$50 for each person employing contrary to the provisions of the Act, or imprisonment for a period not exceeding three months. The Bill was referred to a committee, and when openly discussed before that body, met with much opposition.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Some wholesale prices prevalent near the end of month were:—

Butter, creamery, boxes, 27c. to 28c. per lb.
 Butter, creamery, 30 lb. tubs, 27c. to 28c. per lb.
 Butter, creamery, prints, 28c. to 29c. per lb.
 Butter, dairy tubs, 20c. to 24c. per lb.
 Butter, dairy prints, 22c. to 25c. per lb.
 Butter, dairy rolls, 24c. per lb.
 Cheese, large, 13c. to 13½c. per lb.
 Cheese, twins, 13½c. to 14c. per lb.
 Eggs, 24c. per dozen.
 Peef, forequarter, 7c. to 9½c. per lb.
 Peef, hindquarter, 8c. to 11c. per lb.
 Lamb, 10c. to 11c. per lb.
 Mutton, 6c. to 7c. per lb.
 Veal, 7c. per lb.
 Pork, 10c. to 11c. per lb.
 Turkey, 20c. to 23c. per lb.
 Chickens, 14c. to 17c. per lb.
 Geese, 15c. to 18c. per lb.

Fishing.—Local fishermen had a quiet month. On March 22 the schooner *Ella May* brought in the results of a most successful trip on the Western Bank. The cargo consisted of 6,500 halibut, which was purchased by the Halifax Cold Storage Company. The schooner *Stanley Hubley* brought in 5,000 pounds of fresh fish, and the *Helen Maud*, 1,000 pounds.

Lumbering.—Owing to the extreme mildness of the winter, lack of snow, etc., the cut has fallen to about fifty per cent. of the usual, and has been the poorest for some years.

Mining.—Mining operations will be pursued in Musquodoboit on an extensive scale, the metals sought being silver and lead.

Manufacturing was more active than in March, 1909.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were dull, but carpenters and joiners showed an improvement. Lathers and plasterers were fair. Painters showed much activity as compared with last month. Plumbers and gasfitters were dull. Stone cutters and builders' labourers were dull. Electrical workers and boiler-makers had a fair month. Blacksmiths had a better month than last. Other lines were about normal.

Printers, pressmen and bookbinders had a good month. Tailors showed a decided improvement. Ice cutters and drivers had a good month, not because of a good ice crop, which will be the smallest for years, but many were engaged in the endeavour to secure ice by night work. The icemen usually harvest some 25,000 tons; this year, owing to the mild weather it is not expected that more than 17,000 tons will be stored. Barbers and meat cutters were busy. Maintenance-of-way men and railway employes generally, were well employed. Unskilled labour was fairly active.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Unusually fine weather prevailed throughout the month of March. The

absence of snow had a serious effect upon the lumber industry. Many men were compelled to leave the woods much earlier than was anticipated, and for a few weeks there were a number out of employment.

The strike at Springhill still continues without any signs of peace. The Company has been operating on a small scale but so far has failed to procure competent miners in any numbers and outside of the strike, industrial conditions have a steady upward tendency. There will, however, be but little building in Amherst this year. Considering the fact that the population of the town has doubled in ten years, it is only natural that a period of rest should follow a period of rapid expansion. The established industries are all in active operation and all of them are assured that the coming summer will be an active and busy period in their history.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Quietness prevailed in this industry, but farmers are already preparing for spring work. Farm produce continued high.

Fishing.—The early breaking up of the ice hampered the smelt fishing, but the fishermen are now at work preparing for the lobster season which opens in about a fortnight.

Lumbering.—There was practically no snow in March, and with the woods bare and the swamps open it was almost impossible to carry on lumbering operations. The cut will be fully forty per cent. short of what was estimated. Prices are good.

Manufacturing.—All the factories are steadily employed and all report business improving.

Mining.—Work has been brisk in all the mines except at Springhill, where the strike still continues.

CONDITION OF PARTICULAR TRADES .

Bricklayers and masons have had but little work, but carpenters and joiners were fairly busy. Painters and paper-hangers were active, with plumbers busy.

Iron moulders were busy, and iron workers had plenty of work. Machinists

were well employed, with electrical workers and blacksmiths busy, and boiler makers fairly active.

Woodworkers were fairly busy, but upholsterers report business dull. Car builders were well employed, with pattern makers fairly active.

Printers were working overtime, and pressmen were well employed.

Journymen tailors were well employed, with garment makers very busy, and boot and shoe makers well employed.

Butchers were well employed. Ice cutters have had a busy time, but the ice crop has been difficult to handle this year owing to its thinness.

Trunk makers were very busy.

Barbers were well employed, but with furriers business was dull. Stenographers were active.

For unskilled labour, work was rather scarce, but will probably improve next month with better weather conditions.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month of March showed a slight improvement over February. Little was done in the way of building, excepting the assembling of material. In Charlottetown, the completion of the new building for the Canadian Bank of Commerce and the fitting up by the Island Cold Storage Company of their plant at the east end of the city, were two of the principal features of the situation. The Bill authorizing the Government of Prince Edward Island to guarantee bonds for this Company, to assist in establishing cold storage for the public and the Bill giving the city power to exempt a certain portion of the property of the Company from taxation, passed their second reading in the Legislature. Merchants and shippers report conditions of trade normal for the time of year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hauling of oyster mud and routine work on the farm, occupied the farmers during the month, which was not marked by any unusual features.

Fishing.—Operations in this line were quiet during the month, but the usual preparations for building traps, etc., were made against the opening of the lobster season.

Railroad construction and employment. Construction work on the railroad was stopped during the month and the usual train service was maintained. On account of the two winter steamers coming to this port earlier in the season than usual and as the bulk of the freight is for this city, the business done by the railroad was smaller than in other years.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers and plasterers had a dull month. Painters, decorators, paper-hangers, plumbers, gas, steamfitters and stonecutters were active.

Builders' labourers had a dull month. Other skilled trades were normally active, though tanners were dull. Unskilled labour remained dull.

Iron moulders, workers and helpers, machinists and engineers, steam engineers, electrical workers, linemen, blacksmiths, sheet metal workers were active.

Woodworkers, upholsterers, carriage and wagon makers and car builders were active.

MONCTON, N. B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market in March was healthy. The Marven Biscuit Factory which has been running on nine hours per day, during the winter, resumed the ten-hour day on March 28, with a full staff. The

Paul Lea Woodworking Company also changed from eight hours per day to ten hours. This Company is employing forty operatives and is sanguine as to the outlook in building operations. Abrams Sons, machinists, employing fifteen machinists and a full staff of thirty-two hands, report very active conditions, with orders enough to ensure a very successful season. The Record Foundry & Machine Company, while reporting trade in the Maritime Provinces as stationary, owing to the extensive development of business in the West, and the increased output thereby called for, is actively operating and reports shipments so far this year, as treble that of last. Building permits to the amount of \$12,000 have been so far issued, and it is expected that the amount of building will exceed that of 1909. The staff of the Intercolonial Railway Company's machine shops have been increased by a number of transfers from the Halifax works. Customs collections show a decrease from February, 1909. Wholesale trade continues good and retail trade average. An increase of pay retroactive from April, 1909, was given to boiler-makers' helpers and lowpurd boiler makers in the Intercolonial Railway Company's shops, averaging two cents per hour, and affecting about twenty-five hands. No other material changes in wages or hours of labour were noted, and no unrest on the part of the employes.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The Provincial Dairy School at Sussex opened on March 22, with a large attendance. It includes a home dairy course, a creamery maker's course, and a cheese maker's course. Two large parties of farmers and farm labourers brought out under local Government auspices from Great Britain are expected here in April. General farming conditions were quiet. The maple sugar season has been early and good. Evaporated cream sugar sells at twenty cents to twenty-five cents per pound, ordinary sugar at eighteen cents, and candy at twenty-five cents.

Fishing.—Quietness prevailed.

Lumbering.—Milling was active.

Mining.—Quietness prevailed.

Railroad construction and employment.—The Transcontinental estimates for February were small, totalling only \$97,946 on the six New Brunswick contracts. Two steam shovel crews are at work, one at Miramichi crossing and one at North branch, where there are large fills. The abutments of Cams' river bridge are finished, and the superstructure of steel is being put together. Track-laying is nearly completed between Moncton and Napadogan.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers and plasterers were dull. Painting, decorating and paper hanging were becoming active at the close of the month. Plumbers were fairly busy at repair work, but stonecutters and builders' labourers were dull.

Ironmoulders, workers and helpers were steady. Machinists, engineers, electrical workers and linemen were busy. Blacksmiths and boiler-makers were active. Horseshoers had a fair month.

Woodworkers were active, also upholsterers. Carriage and wagon makers were quiet. Carmen were busy. Shingle weavers in most localities were active.

Printers reported steady and fairly active conditions.

Journeymen tailors and garment workers, towards end of the month were active. Hatmakers and milliners were very active.

Bakers and butchers were active.

Leather workers were busy.

Barbers were active. Clerks and stenographers were steady, but with limited demand. Hotel, restaurant and theatre employes were busy. Laundry workers were active.

Freight and passenger traffic are both becoming more active towards end of month. The very large immigrant arrivals at the ports of Halifax and St. John made active conditions in railway circles and created a good demand for special crews, consequently good time was made by operating employes. Freight

handlers were busy, and teamsters and expressmen active.

The demand for unskilled labour is still light, but average for this season of the year, and no doubt will very materially brighten during April.

DISTRICT NOTES.

Sackville.—At a recent meeting, the Town Council voted ten year's exemption from town taxes and free sewerage and water for the Enterprise foundry, and twenty year's tax exemption each for the Sackville Woodworkers' Company and the Paper Box Company.

ST. JOHN, N. B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With the advent of spring the labour market continued to improve. Several business firms are about to remove to new and more commodious quarters, and in consequence extensive alterations are being made, giving employment to a large number of masons, carpenters, painters and plumbers. On March 12, the *Daily Sun* and *Evening Star* ceased publication, having been purchased by the *Telegraph Publishing Company*. On Monday, the fourteenth March, the *New Star* made its appearance, being published by the employes of the late *Evening Star* from the press of the *Standard*.

Two of Stetson, Cutler & Company's mills started sawing on March 26, after being closed down for a month. Murray & Gregory, Randolph & Baker, and Cushing's mills will recommence operations at the end of March. It is expected that the David Craig Company will start work early in May, manufacturing concrete slabs, and it is thought 150 men will be employed. The American Schooner *Harold J. McCarthy* cleared from this port March 18, for Santiago, Cuba, with a cargo of 3,336 barrels of potatoes. Up to March 26, there have

been filed at the Custom House, cargoes for eighty-one steamships, in connection with the winter port business. These vessels took away Canadian goods valued at \$14,037,841, and foreign goods valued at \$3,480,124, making a total valuation of \$17,517,965. Bank clearings for the four weeks ending March 24, were \$5,423,693, and for the corresponding period last year, \$4,504,424, being \$919,269 greater in 1910 than in 1909, and \$76,773 less than during the four weeks ending February 24 of the current year. Deposits at the Savings Bank during the month of February were \$46,379.96, and withdrawals \$61,843.87. The Customs receipts for the month of February amounted to \$109,285.29, and that of the same period last year, were \$101,667.21, showing an increase of \$7,618.08. The Inland Revenue receipts for February were \$13,764.86, while those of the corresponding period last year were \$13,726.42.

CONDITION OF PARTICULAR TRADES.

Shingle weavers were dull, but other branches of the skilled trades were from busy to active, with unskilled labour dull.

DISTRICT NOTES.

The Cedars, Long Reach.—The grist mill and blacksmith shop were destroyed by fire, March 25. The loss is estimated at \$3,000.

Fredericton.—The Mail Publishing Company has been organized to carry on a general printing and publishing business.

Sackville.—The Fawcett foundry has resumed operations, The Town Council has granted a ten year's remission of taxes to the Enterprise Foundry Company, and to the Paper Box Company and Woodworkers an exemption from taxation for twenty years.

St. Stephen.—The executive of the Charlotte County Wiremen's Union and representatives of the sardine packers of Eastport, Maine, and Lubec, Maine, had a satisfactory conference at the Windsor Hotel on March 17, at which prices were fixed at \$12 until August

and \$6 thereafter. At a meeting held in January a price of \$6 per hogshead for the whole season was agreed upon, but later the Deer Island Union made terms with the packers of \$12 from the opening of the season until August, and \$6 for the remainder of the season. The Bank of Nova Scotia will erect a two-storey stone building opposite the Post Office.

NEWCASTLE, N. B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been very quiet, the month of March being the quietest month in the year. There are four industries here to give employment in the winter season, and there are many men idle, from the time the men come out of the lumber woods, about the last week of February, until the mills start sawing, about the last week in April. The cut this winter has been greater than was expected, and is nearly up to former years. The factories are rushed with work. The Stothart Merchantile Company's door and sash factory is busy summer and winter. Lamont's factory is running full time, with orders always on hand. The Company has three steamboats under way, at present, to be ready as soon as navigation opens. Conditions are active in R. G. Anderson & Sons.' furniture and upholstering factory, they having orders ahead to keep them busy for six months. The foundries are very busy, mostly at mill work, and getting steamboats ready for the opening of navigation.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are not doing much at present, as the hauling is now broken up. The prospects are for an early opening. The winter has been very mild, and stock looks very well.

Fishing is now over and has been a failure.

Lumbering is now about over for the season. Only the teams are in the woods hauling off the yards. The prospects are good for stream driving.

Railroad construction.—The Drummond Company has its road about completed, from the Intercolonial Railway Company's road to deep water. They are now busy building docks for shipment of iron ore.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons are not doing much at present, the season has not opened yet. Carpenters and joiners are fairly well employed. Painters, decorators and paperhangers are in their busy season. Machinists' engineers are busy, as there are always many repairs to be done every spring, getting the mills and steamboats ready for the opening of navigation. Carriage and wagon-makers are unusually busy just now; the snow going away so early has rushed the work. Journeymen tailors are rushed with work, but state it has been a very quiet winter. Ice cutters and drivers have had a good season for storing, and the quality is very good, being over two feet thick and clear.

Unskilled labour is in excess of the demand and has been so all winter, as there was very little snow shoveling.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and E. Little, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of March showed a marked improvement in various industries compared with the previous month; this was due in a great measure, to spring trade. Special activity was reported in the iron working trades, getting ready for the opening of navigation. Coasting navigation was opened by the leaving of the steamer *Aranmore*, for the lower St. Lawrence, on March 24, eleven days earlier than last year. The work on the new freight shed, on the Com-

missioner's wharf, to replace the one destroyed by fire last fall, was progressing rapidly. The first merchant steamer from Quebec for the North shore this season, the R.M.S. *General Wolfe*, left port on March 24, and returned on March 30. Navigation is fairly opened and a number of schooners from the lower parishes arrived in port on March 25 and 26. The steamer *Mahone*, from the North shore arrived in port on March 25. A labour dispute arose during the month in the two corset factories, the men in the ironing department refusing to sign an engagement for a year on the same terms as before. These men were discharged and replaced by others, no stoppage of the work occurring. About eight men hands were involved.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This is the dull season for farmers, the country roads being very bad.

Lumbering.—The mild weather caused the closing of many lumber camps. It is expected that the cut will hardly equal that of last year. The men returning from the camps were well satisfied with their winter's work.

CONDITION OF PARTICULAR TRADES.

Carpenters and joiners were active and painters busy, but the other building trades were from quiet to dull. Ship-builders, shipwrights and caulkers were active, boiler makers were very busy, and the other metal trades busy. Carriage and wagon makers were active. The printing trades were from busy to active; linotype operators were scarce. The clothing trades reported active conditions. Butchers, bakers and confectioners were busy. Ice handlers were in their dull season. Cigar makers and tobacco workers were quiet. Activity prevailed in the leather trades. The opening of the Provincial Legislature, on March 15, tended to improve labour conditions among hotel and restaurant employés and carters. Railway employés had an active month. Steamboatmen were busy. Street railway employés

and cabmen were quiet, and ship labourers and longshoremen dull. The supply of unskilled labour was in excess of the demand.

DISTRICT NOTES.

Cap Rouge.—Messrs. M. P. and J. D. Davis, contractors for the construction of the pillars for the Quebec bridge, have received a large quantity of machinery, etc., which will be shipped to its destination on the opening of navigation.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued to improve during March, though very few buildings were being carried on. Factories were running full time as usual, but no new industries were started. Commercial activity did not show any changes worth mentioning. Wholesale and retail business was rather quiet. Rates of wages and hours of labour remain the same. There were no strikes or lockouts.

The Quebec Bank has started the construction of a substantial building.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Work was at a standstill, there being plenty of snow yet, although several farmers have started work in the sugar bushes and brought their first crop of maple syrup to the city.

Fishing.—Fishing was rather quiet.

Lumbering.—Lumber firms have still a large number of men working in the bush on the upper St. Maurice valley.

Manufacturing.—Factories have been working full time. The Canada Iron Corporation has started the rebuilding of its Pope Foundry. The Corporation of the city is installing large water filters which are to be ready for next month.

Mining was rather quiet.

Railroad construction.—There was a little work done on the St. Maurice Valley Railroad, between Shawinigan and Grand-Mère.

CONDITION OF PARTICULAR TRADES.

Very few bricklayers and masons were employed. A few carpenters were busy, but nearly all of the other branches of the building trades were quiet. The metal and engineering group had a fairly busy month. Electric workers and linemen had no employment. The woodworking trades were fairly active, as were also the painting, clothing and food and tobacco branches. The ice harvesting has closed. The leather trades were rather quiet this month. Barbers were busy, clerks, stenographers and delivery employés were fairly well employed. Hotel and restaurant employés were rather quiet but theatre employés and laundry workers were very active. Transportation branches were somewhat quiet. Steamboatmen were busy overhauling and refitting for the opening of navigation. The supply of unskilled labour was still in excess of the demand.

DISTRICT NOTES.

Construction has been begun of a cotton factory at Shawinigan Falls.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during the month of March, have been very active. The weather has been good, so that outside work has had a month's start over any year for some time past. Not only have the trades which depend upon the weather been busy, but the machine shops, factories, and other industries have been running full time. The demand for all classes of labour has been better this spring than for the past

couple of years. Preparations are being made for an active time in the building line, and the new concerns which started up last year, such as the scale works, and the Structural Steel Company are beginning to talk of adding additions to the present shops. The Jenckes Machine Company, which employs the largest number of skilled help in Sherbrooke, and has probably the largest shop outside of Montreal, is very busy. They have some very large orders for mining machinery in the west and Maritime Provinces.

The Street Railway By-law granting a franchise for forty years, plus the twelve years of a franchise which the Company has already now, was passed by a majority of 256. The concession has been granted to a practically new company. In return for the franchise and exemption from taxes for twenty years the new Company binds itself to expend some \$500,000 of this amount, \$250,000 will be expended in developing water power, the surplus of which the Company agrees to sell at not less than \$15 a horse power and not more than \$20. The balance will be expended in extending the system throughout the city. As the proposed plans of extension have to be completed by the spring of 1911, this work will give employment to a large number of men throughout the summer. This, together with other work in contemplation, means a bright outlook for all classes.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have commenced their spring work, and ploughing is now general in various sections of the townships. This means that work is about a month in advance of that of many years in the past. Work in the sugar bushes has been actively engaged in during the month, but many predict that the quantity will not equal that of past years, as the sap began to run before those owning sugar bushes were prepared for it. Should the mild weather continue it will mean that those who are short of hay will be able to get their young stock out.

Lumbering.—Operations are over in the woods, and the rivers in many places are filled with logs for the drive. There is a great deal of pulpwood at the various sidings on the railways, but it is moving slowly, and prices have dropped.

Manufacturing.—Concerns are running full time, and in the woollen trade extra help is being advertised for.

The *mining* industry is calling for more men, especially in the asbestos districts.

CONDITION OF PARTICULAR TRADES.

With the advent of open weather the building trade will begin to get busy much earlier than usual. Preparations are being made to begin work on the new Canadian Pacific Railway Company's station and other buildings which the Company will erect here, as well as several other large blocks to be erected by firms and individuals. The metal and engineering trades are busy and the outlook is very bright for some time to come. The woodworking trades are busy, many establishments filling orders for buildings that will be started in the spring. The printing and allied trades have been busy during March. Journeymen tailors have been busy, and those skilled in various branches of the trade have been in demand. Garment workers in wholesale readymade houses have been busy. Bakers and confectioners have been busy, while cigar makers have had a more active month than for some time. Miscellaneous trades have been actively engaged during March, more so than at the same period last month or the same period last year. Railway men have had a busy month, especially where business calls for the transportation of specials with emigrants from the winter ports. Unskilled labour has been in demand.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was active during the past month. Every branch of the
