AN EFFECTIVE PLANTING OF ARCHIAS'
HARDY PERENNIALS AND SHRUBS

ARCHIAS' SEED STORE
CORPORATION
SEDALIA, MISSOURI U.S.A.

WHO'S WHO IN THE ARCHIAS' CORPORATION

ARCHIAS' "SURE SEEDS" are internationally famous for reliability, quality and productiveness and are annually planted exclusively, by many thousands of gardeners, farmers and amateurs, who depend on their reputation for satisfaction, selecting from the large number of worth-while varieties, that are grown both for pleasure and profit as Archias' "Sure Seeds" are of the best the World produces. **Sure to Grow, Sure to Please and Best that Money can Buy.** In the above illustration we show a picture of Leon Archias, pioneer seedsman and florist, who devoted his life to the growing of seeds and plants for the trade and

known to our older customers for his sincere, generous and untiring efforts to help his patrons in every way in his power to win success.

Leon Henry Archias, our president and active member, has devoted many years to the growing, selecting and improving the quality of seeds and plants and has traveled extensively both in this country and Europe in quest of improved and superior quality seeds and plants. He is a member of the American Seed Trade Association since 1903, one of the founders of the Missouri Seed Dealer's Association, a founder and past president of the Missouri State Florists' Association, past director and member of the Society of American Florists and Ornamental Horticulturists and was elected in 1920 a director of the Florists' Telegraph Delivery Association for the State of Missouri, which he still holds. He is also connected with several of Sedalia's most prosperous institutions and a Director of two of them.

Leon Henry Archias, Jr., our Treasurer, is also manager of our Floral Department. He is always "on the job" and personally superintends the filling of your orders for cut flowers for all occasions, funeral designs, sprays and other arrangements, plants and nursery stock. He has grown up in the business and never fails to place a **Golden Stamp of Guaranteed Satisfaction** on every order that leaves his department—which by the way is a big one.

The above three, Leon Archias, Leon Henry Archias and Leon Henry Archias, Jr., represent three generations of Seedsmen and Florists to the American public.

Last but not least we show our Mr. Leo A. Kipping, Vice-President and Manager of our Seed and Supply Departments. Mr. Kipping has been actively identified with our business for twenty-five years and devotes his entire time and energies to the selecting of "Sure Seeds" and supplies and the directing of an army of employees in the prompt and accurate filling of your worthy orders, regardless of size. No order is too large or too small for Mr. Kipping and when it leaves our establishment you may rest assured it is as full of the Archias' Quality as it can be and bound to please.

We thank our many friends for their kindness and liberal orders in the past, solicit your future patronage and ask you to kindly have your friends send their orders with yours this season, for Archias' "Sure Seeds," Plants and Supplies, a favor which we will appreciate. Heartily wishing you a Prosperous New Year, we are,

Sincerely Yours,

Archias' Seed Store Corp.

MISSOURI STATE FAIR

This is not the oldest but is undoubtedly the BEST STATE FAIR in the UNION. Our customers should visit the Missouri State Fair, which will be held at Sedalia this year August 18-25 in elegant new fire-proof buildings. Big premiums are offered in every department and competition is open to the world. We want every planter of Archias' "Sure Seeds" to grow something for this Fair—and come yourself—make your headquarters at Archias' Seed Store and at our Greenhouses, where YOU will always be WELCOME. Thus we will become better acquainted. Rooms and other accommodations will be secured on request. Do not hesitate to write us.

Our Gilt Edge Guarantee

Most of the failures with seeds are entirely beyond our control and they render it impossible for us to guarantee success, and therefore we want it plainly understood that while we exercise great care to have all seeds, plants and bulbs, pure and reliable, and also true to name, we do not give any warranty, express or implied, as to description, quality, productiveness or any other matter, of any seeds, bulbs, plants or trees which we send out, and we will not be in any way responsible for the crop. No officer, agent or employe of this company is authorized to make any warranty whatsoever. If the purchaser does not accept the seeds, bulbs or plants on these conditions, notify us at once and we will give instructions for disposition of same, and the money that has been paid for same to us will be promptly refunded. It is to our interest, however, to have everything of the highest quality obtainable, and we would not furnish seeds of doubtful quality for several times the price that we receive for them, as it would injure us more than it would the purchaser. However, we have so much confidence in our seeds that we hereby agree to refill any order for vegetables or flower seeds free of charge should they prove otherwise than as we represent them. We know of no responsible seed firm which guarantees seeds any further than this. Compare with other catalogs and you will find that we are right.

Rocky Ford Melon

CULTURE—Late in the spring drop 20 seeds in hills 5 feet apart. When up large enough thin out to three or four plants; work the same as watermelons. The following list contains none but choice varieties.

SLUG-SHOT KILLS MELON BUGS. (See page 58.)

Rocky Ford Melon

The select Rocky Ford Seed which we offer is grown in the Rocky Ford, Colo., district by a grower who raises seed only and who we know does not ship his marketable melons, saving the culls for seed, as do many of the so-called seed growers in that region. This melon is too well known to need much description. The ideal type has a small seed cavity, thick, luscious flesh, high flavor, and can be eaten almost to the rind. Flesh is green in color, except a tinge of yellow at the center. Netting should be heavy. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

Archias' Selected Pollock No. 10-25

An improvement on the Salmon-Tint Pollock No. 10-25 Rocky Ford, is considered the most desirable type of the Rocky Ford melons and a vast acreage of this sort is now grown in the famous Rocky Ford melon district. Several years ago the Rocky Ford Cantaloupe Seed Breeders' Association began a systematic effort to develop a salmon-fleshed melon that would meet every requirement of their needs, and Salmon-Tint No. 10-25 is the result of their efforts. This is an early melon of the solid netted type that is so very desirable. Very small seed cavity, with thick, luscious flesh of genuine salmon tint shading to green near the rind. Splendid keeper, stands shipping well. Ripe fruit in 75 to 80 days. Pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 50c; lb., \$1.75, prepaid.

Pollock's 10-25 Melon

MUSKMELONS—Continued

New Muskmelon, Burrell's Gem

It was hard to beat the Rocky Ford, and yet it has been done. The new variety has salmon flesh of unusual thickness, and a flavor that can hardly be surpassed. The flesh is 1½ to 2 inches thick, the rind is heavily netted, slightly ribbed and very thin. The melons grow to an average size of 6 inches in length and 4½ inches in diameter, and weigh about 2 pounds apiece.

They are ideal shipping melons, and notwithstanding the thin rind have stood shipment from Colorado to New York in perfection. The Burrell Gem has brought more money in the open market than any other variety. A dozen melons were picked from one hill.

We recommend this new melon very highly and encourage very extensive planting. Pkt., 5c; oz., 15c; ¼ lb., 35c; lb., \$1.00.

Gold Lined Netted Rock Melon

Archias' Champion Market

A well-known sort. The melons grow very uniform in size and shape, ranging from 4 to 5½ lbs. each; light green and rich, sweet flavor; heavy netting and handsome appearance. Pkt., 5c; oz., 15c; ¼ lb., 35c; 1 lb., \$1.00.

Honey Dew Melon

Honey Dew produces a melon with smooth, almost white rind, measuring about six inches in diameter by seven to eight inches long. The green flesh is thick and is of a peculiar sweet flavor, resembling a well-ripened banana—to have the melons in the best condition we suggest gathering as soon as they slip from the vine and store in a cool place for two or three days before serving, as they apparently are at their best when a trifle overripe. Pkt., 10c; oz., 20c; ¼ lb., 65c; lb., \$2.25, postpaid.

Livingston's Tip Top

The melons are round in form, well ribbed, with light green skin which becomes slightly netted when ripening, and average 7 inches in diameter. The flesh is quite thick, bright salmon in color and flavor. Pkt., 5c; oz., 15c; ¼ lb., 35c; 1 lb., \$1.00.

Osage or Miller's Cream

Flesh quite thick and of a rich salmon color, growing from 2 to 3 feet in length; is early. Pkt., 5c; oz., 15c; ¼ lb., 35c; 1 lb., \$1.00.

Gold Lined Netted Rock

This is the Rocky Ford with the tinge of yellow around the seed cavity bred up to the highest state of perfection from the rust-resisting strain. The heavy netting forms a rind so hard that it will ship to the far Eastern markets with practically no deterioration. The flavor outclasses all other strains of Rocky Ford. Pkt., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.00, postpaid.

Improved Early Hackensack

This valuable variety is ready for the market fully 10 days ahead of the well-known Hackensack; weighs 5 to 10 lbs. each. Pkt., 5c; oz., 10c; ¼ lb., 30c; 1 lb., 85c.

Banana

The flesh is rich salmon color, very sweet and melting in quality, very thick, almost solid. Pkt., 10c; oz., 15c; ¼ lb., 50c; 1 lb., \$1.50.

Montreal Market

Nearly round, very showy, flat at the poles, skin netted and green; grows very large, often reaching 20 lbs.; flesh thick, of good flavor, very sweet. Pkt., 5c; oz., 10c; ¼ lb., 30c; 1 lb., 85c.

Also the following good melons at pkt., 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 85c: TURK'S CAP, PAUL ROSE, LONG YELLOW CANTALOUPE, CHICAGO MARKET.

A Few Suggestions About Sowing, Etc.

We give here a few general rules which will be helpful to beginners. The soil best suited to flowers is a light, rich loam, which should be as fine and smooth as possible. Should the soil be heavy, mix with sand to lighten it. Sow the seed either broadcast or in rows, and cover in proportion to the size of seeds—a good general rule is to cover two or three times the size of the seed—and press the soil firmly.

Small seeds cannot come up if covered deep. Water with a fine spray, and do not allow the soil to dry out. Sow annuals early in the spring. Some sorts should be started in the house early in seed boxes, earthenware pans, or flower pots. When three or four leaves have formed, transplant to similar boxes one inch apart, or in the open ground if warm enough.

A Wonderful Tree Tomato

Archias' Missouri Giant

The "Jumbo" of All Tomatoes

The largest fruited of the Climbing Tomatoes, bearing enormous crops from early harvest until killed by frost. Solid-meated, fine flavored, well colored, bright red fruit, ripening well up to the stem; unexcelled for keeping, shipping, canning, preserving or prepared fresh for the table. The greatest drouth resisting large tomato known, holding its large size and fine quality during the entire summer, when other varieties are dried up. Shape round and smooth. The yield of this tomato is simply enormous, one bushel having been picked off a single plant in one picking. Well cultivated plants have attained the height of 10 feet and 9 feet across. This should not be classed with other so-called Tree Tomatoes of some houses, as it is the only genuine Giant Tree Tomato of the kind now in existence. Price, full size pkt., 20c; 3 pkts. for 50c; 1/4 oz., 40c; 1/2 oz., 75c; 1 oz., \$1.25; by mail, postpaid.

Ponderosa

Livingston's Stone Tomato

The Greatest Canning Tomato in the World.

We venture to assert that more of the Livingston's Stone Tomato is annually being grown than any other half-dozen varieties taken together.

Introduced in 1891. This variety has attained immense popularity with canners, Southern growers and market gardeners everywhere. Its solidity and carrying qualities are remarkable. Its color is a desirable red. Its shape perfectly smooth, and thicker from stem to blossom end than most varieties, making it very handsome and salable. Nobody finds any fault with this variety, but all speak in the highest terms of its beautiful color, its wonderful yielding qualities, its unequalled firmness, or some other of its good points. Archias' Hay and Pasture Grasses

Alfalfa or Lucerne

(Medicago Sativa)

FACTS ABOUT ALFALFA:

"There is no state in the Union in which Alfalfa cannot be successfully grown."

Alfalfa produces from 3 to 7 tons of hay to the acre.

It has as much protein as Wheat bran. It does not exhaust the soil; it enriches the soil. It will grow 3 to 5 crops a year.

Alfalfa in money value is worth 45 per cent more than other Clovers and 60 per cent more than Timothy.

Ten milch cows can be fed on less than 2 acres by soiling.

One acre will pasture 20 pigs for 6 months.

Fed to dairy cows Alfalfa maintains the flow of milk equal to June Grass. It can be chopped fine with corn meal. Such a mixture is worth more a pound than the original corn meal.

Many interesting facts in addition to the above might be cited about Alfalfa. It would hardly be possible to say too much about Alfalfa; it is a working plant which is changing the destiny of many farming sections.

"Its long, branching roots penetrate far down, push and crowd the earth this way and that, and thus constitute a gigantic subsoiler. These become an immense magazine of fertility. As soon as cut they begin to decay and liberate the vast reservoir of fertilizing matter below the plow, to be drawn upon by other crops for years to come."

Prepare the land thoroughly and sow seed at the rate of 15 to 20 pounds per acre, with a broadcaster or grass seeder. Cover with a brush or light harrow. Young plants are quite tender, and the land must be free from weeds until they become established. Lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00. See page 29 for Nitragin for Inoculating.

Grimm Alfalfa

The Genuine Minnesota "Lyman" Strain

The much advertised Grimm Alfalfa is truly a wonderful acquisition to the Northern farmer. Originated in Minnesota by Wendelin Grimm many years ago—selected from the hardiest plants year after year until it is a fixed type of extreme vigor. The crown of the plant is receding, so is protected by the surface of the soil and is very heavily stooling, one root often producing 300 to 400 shoots. Roots are fibrous and branching, instead of the long tap root. A variety

especially adapted for shallow soil in cold regions. The flowers are variegated—purple predominating. Some growers report larger yields of Grimm than other strains, giving a leafier, finer hay. Our seed is guaranteed genuine. Archias' "Sure Brand" quality, lb., 65c; 5 lbs., \$3.00; 10 lbs., \$5.50, postpaid.

Hubam Sweet Clover

This New Giant Annual White Sweet Clover

Originated in 1916 at the Iowa State Experiment Station, where 500 samples which grew to a height of four feet and matured seed much earlier than the rest. These seeds were carefully saved and planted the following season, yielding enormous returns. In 1918 small samples were sent to other experiment Stations and to leading seed growers. Many tests in all parts of the country showed growths of from 6 to 8 feet in 1918, while in 1920 the clover grew to 9 feet high in 3½ months, or just twice the growth first reported by the Iowa Station. Growth of from 7 to 10 feet have been reported from nearly every state and from many foreign countries.

Beekeepers should plant a few rows of Hubam Sweet Clover, as it yields enormous quantities of honey of superior quality all summer and fall. Sow 12 lbs. per acre broadcast or 4 lbs. in drills.

Our stock has been obtained from the originator's stock. Last season this seed sold readily as high as \$1.50 per lb., with not near enough to supply the demand. We are offering new crop seed at 75c per lb., postpaid, by express or freight, lb., 60c; 5 lbs., \$2.75; 10 lbs., \$5.00.

A Field of Archias' Recleaned Red Clover

Sudan Grass

Sudan Grass

A New Forage Crop of Immense Value to the Middle West

The U. S. Department of Agriculture introduced this new forage plant into the United States in 1909, the seed being brought from Sudan, Egypt, and seed produced was distributed the following year to experiment stations of the different states. The fifth crop has been grown in the United States under widely varying climatic conditions. The results have been so satisfactory that it is now established as one of our permanent forage crops.

Sudan is a tall, annual grass, reaching a height of from seven to nine feet when planted in rows and allowed to mature for a seed crop; broadcasted and cut "in the bloom" for hay, about four feet.

The hay is softer than Johnson Grass or sorghum, the stems are smaller and more leafy. It is, however, entirely distinct, being strictly an annual, hence not spreading like Johnson Grass. It dies each year like sorghum and millet, and must be seeded each spring. It stools very freely, throwing out many stems from one crown.

It is easily cured and handled as a hay crop. Stock of all kinds eat it readily and will leave any other hay for it.

For a seed crop plant 2 lbs. seed per acre in rows 36 inches apart. For hay crop broadcast or drill 12 to 20 lbs. to acre. Yields 500 to 1,000 lbs. seed or

three tons cured hay per cutting per acre with three cuttings per season. Price, 35c per lb., postpaid. Not postpaid, lb., 30c; 5 lbs., \$1.35; 10 lbs., \$2.50. Special price on 100-lb. lots.

Every Garden Needs Nitragin

(3 in one) Bacteria Fertilizer for

Peas, Sweet Peas and Beans

Insures a better quality, larger crops and faster growth. Nitragin germs feed the plant nitrogen, taking it from the air in the soil. This helps to make the plants strong and vigorous. The germs greatly multiply the nodules (lumps) on the small hairy roots. Each lump is stored up nitrogen plant food. The more lumps, the more fertile the soil. You mix Nitragin with the seed and plant in the usual way. NITRAGIN is the original—(consult any library. Endorsed by Agricultural Departments, Experiment Stations and thousands of users.

ARCHIAS' SEED CORN GROWN FOR SEED, SELECTED, GRADED AND TESTED

Archias' Golden Mortgage Lifter

What we have claimed for Archias' Golden Mortgage Lifter in former years has been verified the past season. No Corn has given better satisfaction or yielded better grain than this justly celebrated variety.

This wonderful variety, first introduced by us in 1893, has gained great favor among the corn growers everywhere. The large amount of corn produced on so small a cob surprises everyone. Our illustration will give you an accurate idea of this wonderful corn.

Archias' Golden Mortgage Lifter is what you have been seeking. It is all corn. It is early. It is prolific. It has strong, stiff stalk and stands up well. It will outyield any other early corn. It has the smallest cob of any large grain. Is rich in oil. It will fatten faster than any corn grown. It suits the grain dealer and tops the market. It takes first prize wherever shown.

The best up-to-date 100-day corn in existence. Its broad, closely-set leaves make it a valuable fodder corn. It will please you, and it's the corn you want.

A valuable variety for stock feeders. It is of handsome shape and color and largely grown for exhibiting at fairs, corn shows, and is used in many corn schools as a standard for judging. Our Reid's Yellow Dent was grown from prize-winning stock, and no better can be found. If you wish to win prizes at the fairs do not fail to plant our strain of Reid's Yellow Dent. Missouri Pride

Missouri State Fair
SEDALIA
AUGUST 18-25

Archias' Missouri Pride

(YELLOW)

A grand, large, medium early, yellow corn of perfect shape, size and color. A wonderful yielder, not quite as early as the Iowa Gold Mine, but larger and more prolific, consequently more profitable.

Ears measure 9 to 11 inches in length, $7\frac{1}{2}$ to $8\frac{1}{2}$ inches in circumference, with very deep grain, set firmly on the cob; cob small for size of grain, 16 to 20 rows of kernels on cob. Medium size stalk, solid, plenty of foliage.

An all-round profitable corn for the farmer, whether grown for market or for feeding. No corn grower will make a mistake in planting Archias' Missouri Pride. As our stock is limited would advise ordering early. Price of Archias' Missouri Pride, per packet, 10c; per pound, by mail, prepaid, 30c. By express or freight, 1 qt., 30c; peck, \$1.25; $\frac{1}{2}$ bu., \$2.00; bu., \$3.75; 2 bu., \$7.00. Sacked free.

Improved Leaming

A quick growing yellow variety, highly esteemed by those who have grown it. It usually produces two ears to the stalk. It is one of seven varieties recognized by the Illinois Experiment Station, where it has been first in yield more times than any other variety. The improved Leaming, has been selected for a richer color—a beautiful brownish yellow—a deeper and somewhat rougher kernel. The ears average about 10 inches long and weigh three-fourths to one pound each. The stalks are of medium height, with many broad leaves, making it one of the best sorts of ensilage and fodder. Numerous tests at the experiment station show it high in protein and oil content, making it valuable to the live stock grower and feeder. By mail, postpaid, lb., 25c; 3 lbs., 60c. By freight or express, qt., 25c; pk., 75c; $\frac{1}{2}$ bu., \$1.25; 1 bu., \$2.25; 2 bu., \$4.25; 5 bu., \$10.00. Sacked free.

Iowa Gold Mine Corn

A popular Yellow Dent corn, originated in Iowa. This corn, since its introduction a few years since, has attained wide popularity. The ears are of good size and shape, and of a bright, golden-yellow color, has very long grains and small red cob; matures in about 95 days and has given fine satisfaction throughout the corn belt. Our seed was grown direct from headquarters stock. By mail, postpaid, 1 lb., 25c. By freight or express, qt., 25c; pk., 75c; 1 bu., \$2.25; 2 bu., \$4.25; 5 bu., \$10.00.

Legal Tender Yellow Dent

It is one of the best main crop Yellow Dent we have, being large and deep grained. It yields immensely; ears 10 to 12 inches long; grains $\frac{3}{4}$ to $\frac{5}{8}$ inch in length, and run well up to 20 rows on the ear. They have a glossy orange-yellow body, with lemon-yellow cap; a load of Legal Tender is a thing of beauty. Try a bag of it. By mail, postpaid, 1 lb., 25c. By freight or express, 1 qt., 25c; pk., 75c; 1 bu., \$2.25; 2 bu., \$4.25; 5 bu., \$10.00. Sacked free.

Archias' Golden Beauty

For general planting in this section we know of no corn that will give better satisfaction than the big, handsome, Golden Beauty. It is the largest grained and finest corn in appearance we have ever seen. The ears are of perfect shape, as shown in cut, which was made from a photograph of an average ear. The cob is so small and the grain so large and broad that a single grain will almost cover the end of the cob when broken in half. It is a beautiful golden yellow color, and of fine quality for grinding. It matures in about 110 days and yields big crops. We recommend the Golden Beauty as the handsomest and largest grained corn in cultivation, and is sure to please every farmer who grows it. By mail, per lb., 25c; 3 lbs., 60c. Johnson County White Dent The Grand Sweepstakes Corn of America

Ever since the National Corn Exposition at Chicago, fall of 1907, the agricultural papers have had a great deal to say about this wonderful corn from Indiana, that netted its owner, Mr. L. B. Clore, a total of \$7,536.50 in cash and special prizes.

Johnson County White Dent is a very highly bred pure white corn, adapted to all the corn belt.

The shape of the ear is cylindrical, slightly tapering, white kernel and cob; tips of ears fill well, a large per cent being completely covered with grain; butts deeply rounded with medium shank; kernels uniform and wedge-shaped; ears averaging about 10 inches in length.

Our stock is Missouri grown, one year from the originator.

Johnson County White Dent Seed Corn

Boone County White

A pure bred white corn of very large size and high fattening and milling qualities. It is rather a late variety, maturing in from 115 to 120 days, and cannot be recommended for planting north of Missouri and Kansas. For general planting throughout this state and farther south it will give highly satisfactory results in all soils and seasons. Years of scientific breeding and patient selection have developed this variety into the largest yielding white corn known.

A very large, fat, heavy ear, tapering only slightly from butt to tip, rounding off nicely within an inch of the top; 18 to 24 rows of about 50 kernels each carried out to the full length of the ear; tips and butts that are exceptionally well filled out; the entire surface of the cob is completely covered with a solid layer of grains one-half to three-quarters of an inch deep. White cob of medium size, which, together with its depth of grain, gives it a remarkably high selling percentage. Don't fail to try it. By mail, postpaid, 1 lb., 25c. By freight or express, qt., 25c; pk., 75c; 1/2 bu., \$1.25; 1 bu., \$2.25; 2 bu., \$4.00; 5 bu., \$9.50. Sacked free.

How to Make a Hot Bed— By L. H. Archias

Select a well-drained spot and make the pile of manure 15 to 18 inches deep; or a foot of soil may be dug out and filled in with manure well tramped down. Place the frame on it. Then put 4 inches of good soil all over the surface. Throw some manure or soil up against the outer boards to hold the heat. Put on the sash and keep tight for three or four days. Keep a thermometer in the bed, and when the temperature falls to 75 degrees seed may be sown with safety. The temperature in a hot bed should not be allowed to go above 70 degrees in the day, nor below 50 at night. With a hot-bed the amateur can start almost any kind of vegetable or flower seed. By sowing such vegetables as egg plant, pepper, tomatoes, etc., and such flowers as heliotrope, scarlet sage, vinca, verbenas, etc., along in March it is possible to have nice, stocky plants ready to set out as soon as the weather conditions are favorable, insuring early returns from the vegetables, and a long season for the flowers.

Archias' Self-Watering Flower Box

ARCHIAS' SELF-WATERING FLOWER BOX

Designed to meet a long-felt want to overcome many objections to wooden boxes and other types of metal boxes as well as to meet the requirements of the plant itself.

Archias' Self-watering Flower Box has a double wall. The air space between the outer and inner walls keeps the inner wall cool, the dirt will not dry out and roots become baked. You can water from either end of the top of the box. A channel runs the entire length of the box in the center. This system makes watering easy, regardless of where the box is. Over-watering plants is as detrimental as not watering enough. It has a method of drainage which prevents giving the plants an over-supply.

Archias' Self-watering Flower Box, in addition to being the ideal window box for summer use, is also the ideal box for indoor use in winter. You can give this box plenty of water and at the same time not get any on the floor. Each box is made 8 1/4 inches wide, 6 1/2 inches deep.

Queen Incubators

Stop hatching weak chicks with cheap incubators. A Queen costs but little more, and the extra chicks that live and grow soon pay the difference. Both Queen walls are built of genuine California Redwood, which is unusual in these days of imitation and cheap substitution. Redwood does not absorb the odor from the hatching eggs. Cheaper woods and pasteboard lining in iron and tin machines retain the odors, to weaken and kill the hatching chicks. Write for catalog on Queen Incubators and Supplies.

Keeps Bacteria Out of Milk

WHAT B-K IS—KILLS BACTERIA

B-K is a dairy sterilizer and purifier. Destroys Foul Odors—B-K destroys the odors and kills the bacteria which causes them—leaves no odor of itself.

Simple and Practical.

B-K is Not an Adulterant or Preservative—It is not put into milk or dairy products, but is used as a rinse to sterilize the containers. Its use, according to directions, violates no law.

More effective than steam as ordinarily used, it is cheap, clean, harmless, and does not taint. B-K is sold on a positive guarantee to please or money refunded. Write for circular giving full information, mailed free.

Price of B-K: 1 qt. bottle, \$1.25; 1 gal., \$3.00. (The cost of a gallon of dilution ready for use is less than one cent.)

The perfect milk substitute—the best since 1800. Write today for free book, "How to Raise Calves"

Blatchford's Calf Meal

It is shown by government records and statistics that the slaughter of cattle in the United States between the years 1900 and 1910 increased 66 per cent; that the slaughter of calves during that period increased more than 500 per cent. Take advantage of the opportunity. Raise your calves without milk.
