THE COLLECTION OF COINS.

The collection of coins was begun in 1857—a boy's fancy—and became in later years a recreation from other pursuits. It has so continued, being taken up and dropped again many times; all save the oriental coins having been disposed of long ago. The foundation of the present collection was a number of coins found in a desk belonging to the collector's father, who brought them home from Batavia and Canton—not very many in all, but bringing with them the sentimental interest which all old-time-connected Salemites have for the Far East. The collection as it has taken form is intended to fully represent China and, fairly so, the countries immediately surrounding it; to illustrate the coinage of all countries where oriental inscriptions are found upon the coins, and, incidentally, the places and isles of the sea where Salem ships touched on their eastern voyages and which were familiar names in the counting rooms of the Salem merchants and in so many Salem homes.

Within this scope it is hoped to improve and enlarge the collection as opportunity offers. Just at present important additions are being made to the ancient coins of China. Many parts of the collection are thought already to be sufficiently full for the purpose intended and these groups will not be enlarged, only those of the Far East being much increased. The cabinet containing the collection is so planned that any drawer from among the one hundred and fifty which the base contains may be placed in the

upright and sloping, glazed, top sections and changed from time to time at pleasure, without disturbing the coins themselves, and thus vary the portion of the collection publicly exhibited as desired. A number of oriental coins in the Essex Institute collection, including those received from the Salem East India Marine Society, have been incorporated in this collection. The arrangement of the coins in this list necessarily differs somewhat from the catalog of the books, being much more subdivided.

THE COLLECTION OF BOOKS.

This collection of books and papers has been gathered gradually during the past thirty years, a few have been owned longer, but the larger portion has been obtained within fifteen years. While the chief desire has been to make the series relating to the Far East the most complete, as many books and papers as possible dealing with oriental numismatics in a wider sense have been secured, omitting those relating to the Greek Asiatic rulers. It may appear to some that the Mohammedan countries are unduly represented in this collection, but this has been done purposely to supplement the collection of coins which only includes a comparatively small number from the countries represented by the books in this group.

Besides the books and papers of this collection, there have been added to the catalog the titles of articles on the subject in the books of the China library of the Essex Institute. This special library, now including some three thousand titles, was begun by the gift of a collection of eight hundred volumes on China by the late Thomas Franklin Hunt, and has been greatly augmented from the income of a fund bequeathed in memory of General Frederick Townsend Ward by his sister. This library contains sets of the *Journal and Transactions of the Royal Asiatic Society* and its *China and North China Branches*, the *China Review* and the *Chinese Repository*, besides many other serial publications printed in or treating of the Far East. It will be noted that from this collection many titles have been obtained.

This catalog is not a bibliography of oriental numismatics. It enumerates only such books and papers as are actually available in the Ward Memorial Room of the Essex Institute, where the cabinet of oriental coins is also kept. The collection of books now seems sufficiently large to make it desirable to print a catalog so that those who are interested in the subject may avail themselves of such assistance as it may supply and which the Essex Institute will gladly extend.

Acknowledgments are due to George Francis Dow, the secretary of the Essex Institute, for his valuable suggestions in regard to the form in which this catalog should be prepared and his constant aid in its preparation; to Miss Alice G. Waters, the librarian of the Institute, and her assistants, for their many helpful courtesies to an inexperienced catalog-maker; to Henry A. Ramsden, Esq., of Yokohama, for his advice and great help in securing the important numismatic works in the Chinese and Japanese languages and for his valuable letters on the ancient coins of China; and to Mr. Howland Wood, secretary of the American Numismatic Society, the compiler is greatly indebted for his advice in classifying the books and his assistance in preparing the notes, especially in the Mohammedan series, and for his constant interest.

PUBLICATIONS IN CHINESE.

142. CH' IEN PU TUNG CHIH. 32 volumes or books in three cases, tall 8°, illus. coins and paper money.

"This contains the best historical information of any Chinese [numismatic] work. It is the rarest and most difficult to obtain of any of the works. This copy is from the library of the late F. A. de Villard of the Chinese Customs Service at Shanghai, a most thorough Chinese scholar. His library was one of the best, and it was he who designed the Chinese postage stamps." Letter of H. A. Ramsden.

143. CH' IEN SHEH TU. Ten parts bound in one vol. said to have been issued in 1842. illus. 8°.

"This is not only a rare work, but also a good one." Letter of H. A. Ramsden.

"This treatise by Sâây K'wân gives representations of several coins to the close of the Ming, with a variety of medals not found in other works."—Alexander Wylie.

144. CH' IN TING CH' IEN LU. (Compendium of numismatics). 16 chapters in 4 parts. illus. 4°.

There are a few annotations in German. A reprint, said to have been issued in 1787, of an illustrated description of Chinese coins published in 1750.

145. CH' IN TING CH' IEN LU. Another, Ningpo edition, issued in 1880.

"The original of this work is a large and expensive treatise or catalog of the Kien Lung museum, worth, perhaps, about \$250. The volumes are very large, about 18 by 24 inches, and the full sized work as a whole is worth something, but the numismatical section has been often reproduced in smaller size. These copies are usually bound in boards. The illustrations are very poor, the originals of most of them never having existed in a genuine condition, and the other data is purely fantastical." Letter from H. A. Ramsden.

146. KU CH'UAN HWUI (16 volumes). SU CH'UAN HWUI (4 volumes). Tall 8°.

Collectively, the twenty volumes are "the standard work on Chinese numismatics in the Chinese language and contain the most reliable information and the most correct illustrations. There are several editions, this copy being one of the later." Letter, of H. A. Ramsden. Referring to this and to the Ch'ien Pu Tung Chih, Mr. Ramsden writes: "A library on Chinese numismatics would be incomplete without these works. There are many other large and important works, but these are the most desirable and trustworthy. The student who could appreciate the subject, applying to use your library, containing as it does the most important works of reference in European languages on eastern numismatics, would be greatly disappointed to find the above lacking."

490. TOKYO KOSEN KWAI. Report: Japanese and Chinese numismatics, parts 1-28, bound in three vols., illus. 8°. In Japanese.

The following books and magazines in Japanese were received too late to be added to the catalog in their proper places or included in the index. They are, however, of sufficient interest and importance to insert a list of them with notes in this catalog, now in the hands of the binder.

These books, with others already cataloged, serve as an indication of the extent to which numismatics are studied and coins collected in Japan. The "rubbings", frequently referred to and so beautifully reproducing the coins,* are made by the Japanese method from specimens owned by different collectors, and sufficient numbers of the magazines are issued to distribute among the members of the society or club, each member furnishing enough rubbings of the coin he wishes included for the edition printed, the ownership of the coin being indicated by stamping the little private seal of the owner in red ink beside the rubbing. In this way, and by the exchange of rubbings among collectors privately, each collector obtains accurate representations of the rare coins in the collections of all the members of the clubs to which he belongs; an example well worthy of imitation among European and American collectors.

491. KOKON SENKWA KAN, by Kuchiki Masatsuna. Originally issued in the Kwansei period, 10th year (1798). 8°. 20 books or pamphlet-like volumes, of which nos. 1-14 and 18-20 are here included. A rare publication, out of print and only obtainable by picking up odd volumes one at a time. It deals chiefly with Chinese coins and includes a volume on casting coins.

*For an account of the method of making the rubbings, see Munro: *Coins of Japan* (No. 162 of this catalog,) p. xvii; for account of numismatic works by Japanese authors, see p. xviii; for lists of books and magazines, see appendix C, p. 265.

495. KOHO DZUKAN, by Nakatani Kozan. Originally issued in the Kyoho period (1716-1735), 1 vol. 8°. A manuscript copy most beautifully executed, the drawings of the coins in India ink being wonderfully accurate reproductions of the originals.

INDEX.

The figures refer to the numbers of the books and papers in the catalog, and not to the pages. In this way direct access may be had to the article sought. The author references are intended to be complete; the other references are not to the titles of the books, but are intended to cover, so far as possible, the subjects treated. The index will, therefore, assist the reader to reach the works and portions of works and papers treating of the particular object of his search. The volume and page citations following the number (488, *i. e.* Numismatic Chronicle) will lead directly to the article; the figure 2 preceding the volume indicates the second series.
