# PATENTEE'S MANUAL;

CONTAINING

### A LIST OF PATENTS

GRANTED BY THE UNITED STATES

FOR THE

### ENCOURAGEMENT OF ARTS & SCIENCES,

ALPHABETICALLY ARRANGED,

**FROM 1790 то 1830.** 

TO BE CONTINUED BY SUPPLEMENTS.

ALSO, THE

## Laws of Congress for granting Patents;

WITH

A DIGEST OF ALL THE DECISIONS

Which have taken place in the Courts of the United States respecting Patents.

BY WILLIAM ELLIOT.

### City of Washington:

PRINTED BY S. A. ELLIOT, ELEVENTH ST.

SOLD BY THE BOOKSELLERS IN WASHINGTON, PHILADELPHIA,
NEW-YORK, BOSTON, &c.

1830.

#### District of Columbia, to wit:

BE IT REMEMBERED, that on the eighth day of March, in the year of our Lord one thousand eight hundred and thirty, and of the Independence of the United States of America the fifty-fourth, William Elliot, of the said District, hath deposited in the office of the Clerk of the District Court for the District of Columbia, the title of a book, the right whereof he claims as proprietor in the words following, to wit:

"THE PATENTEE'S MANUAL;
Containing a list of patents granted by the United States for the encouragement of arts and sciences, alphabetically arranged, from 1790 to 1830. [to be continued by supplements.] Also the laws of Congress for granting patents; with a digest of all the decisions which have taken place in the courts of the United States respecting patents. By William Elliot."

In conformity to the act of the Congress of the United States, entitled, "An Act for the encouragement of learning, by securing the copies of maps, charts, and books, to the authors and proprietors of such copies during the times therein mentioned," and also to the act, cutitled, "An Act supplementary to an act, entitled, "An Act for the encouragement of learning, by securing the copies of maps, charts, and books, to the authors and proprietors of such copies during the times therein mentioned," and extending the benefits thereof to the arts of designing, engraving, and etching historical and other prints."

In testimony whereof, I have hereunto set my hand, and affixed [SEAL.] the public seal of my office, the day and year aforesaid.

> EDMUND I. LEE, Clerk of the District Court for the Dist, of Columbia,

### PREFACE.

EVER since the establishment of the Patent Office, the honest and ingenious inventor has found it very difficult to obtain that kind of information which should enable him to take out such a patent as would secure to him the exclusive use of his improvements according to the provisions of the patent laws. To take out a secure patent, it is absolutely necessary that the applicant shall ascertain, 1st, how far the invention is new; and 2dly, how far the rights of the public, and inventors are concerned.

To ascertain the first point, viz.: whether the invention be new, the applicant must consult the records and models of the Patent Office; and such other means of information as are afforded in Encyclopedias, and other works of science. For this purpose the list of patents herewith offered to the public will be found very useful: as it is only necessary for the applicant to refer to this alphabetical list, and he will there find the names and residences of all those who have taken out patents on the subject or subjects in which he is interested; and he must either visit the Patent Office, and examine the models and records for himself, or write to the Superintendent of the office for information: the first is certainly the best mode.

The second point, viz.: how far the rights of the public, and inventors are concerned, can only be ascertained by examining the decisions which have taken place in the courts of the United States; and for this purpose, the Digest herewith given will be found of great use. This part of the work is taken from "Coxe's Digest," a volume every way worthy of its distinguished author.

A correct copy of the patent laws of 1793 and 1800 are also

herewith subjoined.

The subject of the Patent Office is again brought before Congress; and it is hoped it will meet with more attention than it has hitherto done. Mr. Adams, in his message to Congress in 1825, says, "The laws relating to the administration of the Patent Office are deserving of much consideration, and perhaps susceptible of some improvement;" and every day's experience proves the justice of the remark. In making these improvements the great objects of the Constitution and Law ought always to be kept in view, so that whatever is done ought to be, "to promote the progress of science and the useful arts, by securing for limited times, to authors and inventors the exclusive right to their respective writings and discoveries."

There is no institution in this country deserves more the attention of Congress than the Patent Office. For, by means of it, the genius of our country is brought out, fostered and pro-

tected; and the honor and interest of the nation are deeply concerned in having the duties of that Office ably discharged. For it entirely depends on the good or bad, on the wise or unwise administration of this office whether it is a blessing or a curse to the nation.

The greatest evil attending the patent law is, that, a number of idle, worthless persons, obtain patents for the most trifling objects, often neither new nor useful; and impose on the ignorant by a sort of license, signed by the President, Secretary of State, and Attorney General, under the title of "patent." Such men have collected millions of dollars from the honest farmer and mechanic; and filled our courts of law with vexatious suits.

To stop this growing evil it is suggested that the 9th section of the patent law of 1793, be so altered, or explained, as to prevent the issuing of patents for inventions that are not new and useful—'useful,' in contradistinction to frivolous and mischievous inventions. At present it stands, In case of interfering applications, three persons are to be appointed as arbitrators, whose decision as to the granting of the patent shall be final. Now, by considering a patent that has been already granted, and an invention already known, the same as interfering applications; then the matter would be settled by arbitration, as the law directs; and frivolous and improper patents would be prevented from being issued, and the public rights defended.

The first section of the patent law ought certainly either to be explained or altered: For it now says, "That any citizen of the United States, alleging that he has invented any new and useful art, machine, &c or an improvement upon such art and machine, which has not been known or used before the application, may petition, &c." Let Congress say what antecedent belongs to the word "application;" for as it now stands it proves a fruitful

source of litigation.

And it would be well, perhaps, to add a new section to the patent law; allowing caveats to be entered for specific times, to prevent the ingenious being robbed of their inventions before they are perfected. This would also be the means of allowing time for taking out perfect patents at once; and which would not require patents for amended specifications, as at present, subjecting inventors to the payment of double patent fees.

W. E.

#### PATENT LAWS.

An ACT to promote the Progress of useful Arts; and to repeal the Act heretofore made for that purpose.

Sect. 1. Be it enacted by the Senate and Manse of Representatives of the United States of America, in Congress useembed, That when any person or persons being a citizen or citizens of the United States, shall allege that he or they have invented any new and useful art, mechine, manufacture, or composition of matter, or any new and useful improvement or any art machine, manufacture, or composition of matter, not known or used before the application, and shall present a petition to the Secretary of State, signifying a desire of obtaining an exclusive property in the same, and praying that a parent may be granted therefore, it shall and may be lawful for the said Secretary of State, to cause lotters patent to be made out in the name of the United States, bearing test by the President of the United States, reciting the allegations and suggestions of the said petition, and giving a short description of the said invention or discovery, and thereupon granting to such petitioner or petitioners, his, her, or their heirs, administrators or assigns, for a term not exceeding fourteen years, the full and exclusive right and liberty of making, constructing, using, and vending to others to be used, the said invention or discovery, which letters patent shall be delivered to the Attorney General of the United States, to be examined; who, within fifteen days after such delivery, if he finds the same conformable to this act, shall certify accordingly at the foot thereof, and return the, same to the Secretary of State, who shall present the letters Patent thus certified, to be signed, and shall cause the seal of the United States to be thereto affixed; and the same shall be good and available to the grantee or grantness, by force of this act, and shall be recorded in a book, to be kept for that purpose, in the office of the Secretary of State, and delivered to the patenter, or insorder.

said started recorded in a book, to be keep for that purpose, in the onice of the Secretary of State, and delivered to the patentice, or his order.

Secr. 2. Provided always, and be it further enacted, That any person, who shall have discovered an improvement in the principle of any machine, or in the process of any composition of matter, which shall have been patented, and shall have obtained a patent for such improvement, he shall not be at liberty to make, use or vend the original discovery, nor shall the first inventor be fat liberty to use the improvement: and it is hereby enacted and d. clared, that simply changing the form or proportions of any machine, or composition of matter, in any

degree, shall not be deemed a discovery.

Sect. 3. And best further enacted, That every inventor, before he can receive a patent, shall swear or affirm, that he does verily believe, that he is the true inventor or discoverer of the art, machine, or improvement, for which he solicits a patent, which oath or affirmation may be made before any person authorized to administer oaths, and shall deliver a written description of his invention, and of the manner of using, or process of compounding the same, in such full, clear and exact terms, as to distinguish the same from all other things before known, and to enable any person skilled in the art or science, of which it is a branch, or with which it is most nearly connected, to make, compound, and use the same. And in the case of any machine, he shall fully explain the principle, and the several modes, in which he has contemplated the application of that principle or character, by which it may be distinguished from other inventions; and he shall accompany the whole with drawings and written references where the nature of the case admits of drawings, or with specimens of the ingredients, and of the composition of matter, sufficient in quantity for the purpose of experiment, where the invention is of a composition of matter; which descriptions signed by himself, and attested by two witnesses, shall be filed in the office of the Secretary of State, and certified copies thereof shall be competent evidence, in all courts, where any matter or thing, touching such patent right, shall come in question. And such inventor shall moreover, deliver a model of his machine, provided the Secretary shall deem such model to be necessary.

Secr. 4. And be it further enacted, That it shall be lawful for any inventor, his executor or administrator, to assign the title and interest in the said invention, at any time, and the assignee having recorded the said assignment, in the office of the Secretary of State, shall thereafter stand in the place of the original inventor, both as to right and responsibility, and so the assignces or as-

signs, to any degree.

SECT. 5. And be it further enacted, That if any person shall make, devise and use, or sell the thing so invented, the exclusive right of which shall as aforesaid, have been secured to any person by patent, without the consent of the patentee, his executors, administrators or assigns, first obtained in writing, every person, so offending, shall forfeit to pay the patentee, a sum that shall be at least equal to three times the price, for which the patentee has usually sold or licensed to other persons, the use of the said invention; which may be recovered in an action on the case founded on this act, in the circuit court of the United States,

or any other court having competent jurisdiction.

Sect. 6. Provided always, and be it further enacted, That the defendant in such action shall be permitted to plead the general issue, and give this act and any special matter, of which notice in writing may have been given to the plaintiff or his attorney thirty days before trial, in evidence, tending to prove, that the specification filed by the plaintiff, does not contain the whole truth relative to his discovery, or that it contains more than is necessary to produce the described effect, which concealment or addition shall fully appear to have been made, for the purpose of deceiving the public, or that the thing, thus secured by patent, was not originally discovered by the patentee, but had been in use, or had been described in some public work, anterior to the supposed discovery of the patentee, or that he had surreptitiously obtained a patent for the discovery of another person: in either of which cases, judgment shall be rendered for the defendant, with costs, and the patent shall be declared void.

Secr. 7. And be it further enacted, That where any state before its adoption of the present form of government, shall have granted an exclusive right to any invention, the party claiming that right, shall not be capable of obtaining an exclusive right under this act, but on relinquishing his right under such particular state, and of such relinquishment, his obtaining an exclusive right under this act shall be sufficient evidence.

SECT. 8. Ind be it further enacted, That the persons, whose applications for patents, were, at the time of passing this act, depending before the Secretary of State, Secretary at War, and Attorney General, according to the act, passed the second session of the first Congress, entitled, "An act to promote the progress of useful arts," on complying with the conditions of this act, and paying the fees herein required, may pursue their respective claims to a patent under the same.

Sect. 9. And be it further enacted, That in case of interfering applications the same shall be submitted to the arbitration of three persons, one of whom shall be chosen by each of the applicants, and the third person shall be appointed by the Secretary of State; and the decision or award of such arbitrators, delivered to the Secretary of State, in writing and subscribed by them, or any two of them shall be final, as far as respects the granting of the patent. And if either of the applicants shall refuse or fail to choose an arbitrator, the patent shall issue to the opposite party. And where there shall be more than two interfering applications, and the parties applying shall not all unite in appointing three arbitrators, it shall be in the power of the Secretary of State to appoint three

arbitrators for the purpose

SECT. 10. And be it further enacted, That upon oath or affirmation being made, before the judge of the district court, where the patentee, his executors, administrators or his assigns reside, that any patent which shall be issued in pursuance of this act, was obtained surreptitiously, or upon false suggestion, and motion made to the said court, within three years after issuing the said patent, but not afterwards, it shall and may be lawful for the judge of the said district court, if the matter alleged shall appear to him to be sufficient, to grant a rule, that the patentee, or his executor, administrator or assign, shew cause why process should not issue against him to repeal such patent. And if sufficient cause shall not be shown to the contrary, the rule shall be made absolute, and thereupon the said judge shall order process to be issued against such patentee, or his executors, administrators or assigns, with costs of suit. And in case, no sufficient cause shall be shown to the contrary, or if it shall appear, that the patentee was not the true inventor or discoverer, judgment shall be rendered by such court for repeal of such patent; and if the party, at whose complaint the process is sued, shall have judgment given against him, he shall pay all such costs, as the defendant stall be put to, in defending the suit, to be taxed by the court, and recovered in due course of law.

Szer. 11. And be it further enacted, That every inventor, before he presents his partion to the Secretary of State, signifying his desire of obtaining a patent, his p. For lot. Secretary of State, signifying his disarc of obtaining a patent, shall pay ato. Treasiny thirty colors, for which he shall take duplicate receipts, one of which receipts he shall deliver to the Secretary of State, when he promiss his puttien, and the money, thus paid, shall be in full for the sundry safety, to be preformed in the office of the Secretary of State, consequent on such patient, as the shall pays to the account of the kine in that office. on such paths in a 71 stall pass to the account of cherk-threen that onice. Crowledge accounted at the said office, of any part parent and any part part parent that has been grant the the person obtaining sactive pass and pay at the rate of twenty cents, for every copy-sheet of one handled word, and or every copy of a drawing, the party obtaining the same shall juy two deliats; of which payments an account shall be rendered, annually of the Tree my of the United States, and they shall also pass to the account of clerk-line is the office of the Scorebary of State.

S. cr. 12. Ind be it for there enacted, That the act passed the tenth day of April,

in the year one thouse and seven hadred and rinety, entitled, "An act to promot the progress of useful arts," be, and the same is hereby repealed. Provided atmars, That nothing, contained in this act, shall be construed to invalidate art parts, that as have being ranted under the authority of said act; and all parts as under said act, their executors, administrators or assigns, shall be considered to the unit of the pure with the property of the violation of their rights,

Provided, such violations shall be committed after the passing of this act.

JONATHAN TRUMBULL, Speaker of the House of Representatives.

JOHN ADAMS, Vice-President of the Uni ed States and President of the Senate.

Approved, --- February 21, 1793: GEORGE WASHINGTON, President of the United States.

An ACT to extend the privilege of obtaining patents, for useful discoveries and inventions, to certain persons therein mentioned, and to enlarge and define the penalties for viola-

ting the rights of Patentees.

SECT. 1. Be it enacted, by the Senate and House of Representatives of the United States of America, in Congress assembled, That all and singular the rights and privileges given, intended or provided to citizens of the United States, respecting patents for new inventions, discoveries, and improvements, by the act, entitled "An act to promote the progress of useful arts, and to repeal the act heretofore made for that purpose," shall be, and hereby are extended and given to all aliens, who at the time of petitioning in the manner prescribed by the said act shall have resided for two years within the United States, which privileges shall be obtained, used, and enjoyed, by such persons, in as full and ample manner, and under the same conditions, limitations, and restrictions, as by the said act is provided and directed in case of citizens of the United States. the said act is provided and directed in case of crizens of the United States. Provided always, That every person petitioning for a patent for any invention, art or discovery, pursuant to this act, shall make each or affirmation before some person duly authorized to administer oaths, before such patent can be granted, that such invention, art or discovery hath not, to the best of his or her knowledge or belief, been known or used either in this or any foreign country; and that every patent which shall be obtained pursuant to this act, for any invention, art or discovery, which it shall afterwards appear had been known or used reserving to such any legition for a nation shall be uttenly used. previous to such application for a patent, shall be utterly void.

SECT. 2. And be if further enacled, That where any person hath made, or shall have made, any new invention, discovery, or improvement, on account of which a patent might, by virtue of this or the abovementioned act, be granted to such person, and shall die before any patent shall be granted therefor, the right of applying for and obtaining such patent, shall devolve on the legal representatives, of such person in trust for the heirs at law of the deceased, in case he shall have died intestate; but if otherwise, then in trust for his devisees, in as full and ample manner, and under the same conditions, limitations and restrictions, as

the same was held or might have been claimed or enjoyed by such person, in his or her life time, and when application for a patent shall be made by such legal representatives, the oath or affirmation provided in the third section of the be-

forementioned act, shall be so varied as to be applicable to them.

Secr. 3. And be it further enacted, That where any patent shall be, or shall have been granted pursuant to this or the abovementioned act, and any person without the consent of the patentee, his or her executors, administrators or assigns first obtained in writing, shall make, devise, use, or sell the thing whereof the exclusive right is secured to the said patentee by such patent, such person so offending shall forfeit and pay to the said patentee, his executors, administrators or assigns, a sum equal to three times the actual damage sustained by such patentee, his executors, administrators, or assigns, from or by reason of such offence, which sum shall and may be recovered, by action on the case founded on this and the abovementioned act, in the circuit court of the United States, having jurisdiction thereof.

Szer. 4. And be it further enacted, That the fifth section of the abovementioned act, entitled "An act to promote the progress of useful arts, and to repeal the act heretofore made for that purpose," shall be and hereby is repealed.

> THEODORE SEDGWICK, Speaker of the House of Representatives. THOS. JEFFERSON, Vice President of the United States, and President of the Senate.

Approved-April 17th, A.D. 1800.

JOHN ADAMS, President of the United States.

#### DIGEST OF DECISIONS ON PATENTS.

1. An assignce of part of a patent right cannot maintain an action in his own name, for a violation of the patent. Tyler et al. v. Truet, 6 Cranch, 524.

2. The act of January 21st, 1808, ch. 117. (4 Bior. 135.) for the relief of Oliver Evans, does not authorize those who erected his machinery, between the expiration of his old patent and the issuing of the new one, to use it after the issuing of the latter. Evans v. Jordan et al. 9 Cranch, 199.

3. Under the sixth section of the patent law of February 21st, 1793, ch. 156.

(2 Bior. 348.) the defendant pleaded the general issue, and gave notice that he would prove, at the trial, that the machine, for the use of which, without license, the suit was brought, had been used previous to the alleged invention of the plaintiff, at several places which were specified in the notice, or some of them, "and also at sundry other places in Pennsylvania, Maryland; and elsewhere in the United States." The defendant having giving evidence as to some of the places specified, held, that evidence as to other places, not specified, was admissible; but that the court possess the power, which will be exercised, to prevent the plaintiff from being injured by surprise. Evans v. Eaton, 3. Wheat. 454. 1 Peters, 322. S. C.

4. Testimony, on the part of the plaintiff, that the persons of whose prior use of the machine the defendant had given evidence, had paid the plaintiff for li-cences to use the machine, since his patent, ought not to be absolutely rejected,

though entitled to very little weight. Ibid.

5. Although it is not settled whether, under the general patent law, improvements on different machines can be comprehended in the same patent, so as to give a right to the exclusive use of the several machines in combination; yet the act of January 21st, 1308, ch. 117. (4 Bior. 135.) for the relief of Oliver Evans, authorizes the issuing to him of a patent, for his invention, discovery, and improvements in the art of manufacturing flour, and in the several machines applicable to that purpose. Ibid.

6. The act of Congress for the relief of Oliver Evans does not purport to decide the fact that he was the original inventor, but leaves the question of invention and improvement open to investigation under the general patent law. Ibid.

7. Under the 6th section of the patent law of February 21, 1793, ch. 156.

(2. Bior. 348.) if the thing secured by patent had been in use, or had been described in a public work, anterior to the supposed discovery, the patent is void, whether the patentee had a knowledge of this previous use or description or not. *Ibid.* 1 Peters, 392. S. C.

8. Oliver Evans may claim under his patent the exclusive use of his inventions and improvements in the art of manufacturing flour and meal, and in the several machines which he has invented, and in his improvements in machines previously discovered. But where his claim is for an improvement on a machine, he must shew the extent of his improvement, so that a person, understanding the subject, may comprehend distinctly in what it consists. Itid.

9. The act for the relief of Oliver Evans is engrafted on the general patent law, so as to give him a right to sue in the Circuit Court of the United States, for any infingement of his patent rights, although the defendant may be a citizen of

the same state with himself. Ibid.

10. A party cannot entitle himself to a patent for more than his own invention; and if the patent be for the whole of a machine, he can maintain a title to it, only by establishing that it is substantially new in its structure and mode of

operation. Evans v. Eaton, 7 Wheat, 356.

11. If the combinations existed before in machines of the same nature, up to a certain point, and the party's invention consists in adding some new machinery, or some improved mode of operation to the old, the patent should be limited to such improvement; for if it includes the whole machinery, it includes more than his invention, and therefore cannot be supported. Ibid.

12. Where a patent is taken out for an improvement, the specification ought to describe what the improvement is, and the patent should be limited to such improvement. *Ibid.* 1 Peters, 322. S. C. 3 Wash. C. C. R. 443.

13. It is no objection to the competency of a witness, in a patent cause, that he is sued in another action for an infringement of the same patent. Evans v. Het-

tick, 7 Wheat. 453.14. The 6th sec. of the patent act of February 21, 1793. ch. 156. (2. Bior. 348.) which requires a notice of the special matter to be given in evidence by the defendant under the general issue, does not include all the matters of defence of which the defendant may avail himself; and where the question asked was, whether the machine used by the defendant was like the model exhibited in court of the plaintiff's patented machine, it was held that no notice was neces-

sary to authorise the inquiry. Ibid.

15. Under the 10th section of the patent act of Pebuary 21, 1793, c. 156. (2. Bior. 348.) upon granting a rule by the judge of the District Court, upon the patentee, to shew cause why process should not issue to repeal the patent, the patent is not repealed de facto, by making the rule absolute: but the process to be awarded is in the nature of a scire faciae st common law to the patentee to shew cause why the patent should not be repealed with costs of suit; and upon the return of such process, duly served, he proceeds to try the cause upon the pleadings filed by the parties and the issue joined thereon: if the issue be an issue in fact, the trial is to be by a jury; if of law, then by the court. Exparte Wood, 9 Wheat. 603.

16. In such a case, a record is to be made of the proceedings antecedent to the rule to shew cause why process should not issue to repeal the patent, and upon which the rule is founded. Ibid.

17. The clause in the patent law authorising suits in the Circuit Courts stands on the principle that they are cases arising under a law of the United States .-

Osborn et al. v. Bank United States, 9 Wheat. 733.

18. A. having obtained a patent for a new and useful improvement, to wit, a machine for making watch chains, brought an action under the 3d section of the patent act of April 17, 1800. c. 179. (3 Bior. 342.) against B. for an alleged vio-lation of his patent right. On the trial an agreement was proved between the defendant and C. by which the former agreed to purchase of the latter all the watch chains, not exceeding five gross a week, which he might be able to manu-facture in six months, and C. agreed to devote his whole time and attention to the manufacture of the watch chains, and not to sell or dispose of any of them so as to interfere with the exclusive privilege secured to the defendant of purchasing the whole quantity, which it might be practicable for C. to make: and it was proved that the machine used by C. with the knowledge and consent of the defendant, in the manufacture, was the same as that invented by the plaintiff; and that all the watch chains thus made by C. were delivered to the defendant according to the contract. Held, that if the contract was real and not colourable, and if the defendant had no other connexion with C. than that widel grew out of the contract, the facts proved did not amount to a breach by him of the plaintiff's patent right. Keplinger v. De Young, 10 Wheat. 353.

19. Such a contract, connected with evidence from which the jury might legally infer, either that the machine to be employed in the manufacture of the patented article was owned wholly or in part by defendant, or that it was hired to defendant for the time specified, under colour of a sale of the articles to be manufactured with it, and with intent to invade the plaintiff's patent right,

would amount to a breach of his right. Ibid.

20. Under the patent act of February 21, 1793, ch. 156. (2 Bior. 348.) if the patentee has sold out a monety of his patent right, a joint action lies by himself and his patentee for a violation of it.

\*\*Hittenure v. Cutter, 1 Gallis, 429.

21. The making of a patented machine fit for use, and with design to use it for profit, in violation of the patent right, is of itself a breach of the patent

right for which an action lies. Ibid.

22. If there be a mere making and no user proved, nominal damages are to be recovered. Where the law gives an action for a particular act, the doing of that act imports of itself a damage: every volation of a right imports some damage, and if none other be proved, the law allows a nominal damage. Ibid. White-more v. Cutter, 1d. 476.

23. The taking of the oath required by the patent act, previous to the issuing a patent, is but a pre-requisite to the granting of the patent, and in no d-gree essential to its validity; and if not taken, still the patent is valid. Id. 429.

24. No defect or concealment in the specification will avoid the patent, unless

it arose from an intention to deceive the public. Ibid.

25. The 6th sec. of the patent act does not enumerate all the defences of which the defendant may legally avail himself: he may give in evidence that he never did the act attributed to him, that the patentee is an alien not entitled under the act, or that he has a license or authority from the parentee. Itself.

der the act, or that he has a license or authority from the patentee. *Ibid.* 26. The first inventor is entitled to the benefit of his invention, if he reduce it to practice and obtain a patent therefore: and a subsequent inventor cannot, by obtaining a patent, oust the first inventor of his right, or maintain an action against him for the use of his own invention. *Woodcock v. Parker et al.* 1 Gal. 438

<sup>2</sup>7. If the machine for which the patent was obtained, substantially existed before, and the plaintiff made an improvement only therein, he is entitled to a patent for the improvement only, and not for the whole machine; and where, under such circumstances, the patent comprehends the whole machine, it is too broad, and therefore void. *Ibid.* 

28. It is not necessary to defeat the plaintiff's patent, that a machine should previously have existed in every respect similar to his own; for a mere change of

former proportions will not entitle a party to a patent. Ibid

29 If he claim a patent for a whole machine, it must in substance be a new machine; that is, it must be a new mode, method or application of mechanism to produce some new effect, or to produce an old effect in a new way. *Bid.* 

30. If one who has invented merely an improvement, take out a patent for the whole machine, his patent is too broad and utterly void. Whittemore v. Cutter,

1 Gallis. 476.

31. When a specific machine already exists, producing certain effects, if a more addition is made to such machine, to produce the same effect in a better manner, a patent cannot be taken for the whole machine, but for the improvement only. *Ibid.* 

32. In like manner, if to an old machine, some new combinations be added, to produce new effects, the right to a patent is limited to the new combinations. *Ibid.* 

33. A patent can in no case, be for an effect only, but for an effect produced in a certain manner, or by a peculiar operation. For instance, no patent can be obtained for the admeasurement of time, or the expansive operations of steam: but only for a new mode or new application of machinery to produce these effects: and therefore if new effects are produced by an old machine, in its unaltered state, no patent can be legally supported, for it is a patent for an effect only. *Ibid.* 

34. On the other hand, if well known effects are produced by machinery, in all its combinations entirely new, a patent may be claimed for the whole meetine.

35. So if the principles of the machine are new, either to produce a new or an old effect, the inventor may well entitle himself to the exclusive right of the

whole machine. Ibid.

36. By the principles of a machine, as these words are used in the statute, is not meant the original elementary principles of motion which philosophy and science have discovered, but the modus operandi, the peculiar device or manner of producing any given effect. The expansive power of steam, and the mechanical powers of wheels have been understood for ages; yet a machine may well employ either the one or the other, and yet be so entirely new in its mode of applying them, as to entitle a party to his patent for his whole combination. Id 37. It is not sufficient to give validity to a patent, that the specific machine, with all its combinations and effects did not exist before; for if the same effects

were all produced by the same application of machinery in separate parts, and the party merely combined them together, or added a new effect, such combination would not sustain the patent; as the artist, who added a second-hand or repeater to a watch, could not have been entitled to a patent for the whole watch.

[ Ibid.

38. Nor will the patent be protected if the patentee was the inventor of all the material improvements in the old machine, if he suffered them to be used fully and freely, by the public at large, combined with all the usual machinery; for in such case, he must be deemed to have made a gift of them to the public. Ibid.

39. By the terms "actual damage" which the plaintiff may recover under the patent law, are meant such damages as he can actually prove, and has in fact sustained, as contradistinguished from mere imaginary or vindictive damages, which

in personal torts are sometimes given. Ibid.

40. The rule of damages where the user of a machine is proved, should be the value of the use of such a machine, during the time of the illegal user. *Ibid.*41. Where merely the making of the machine is proved, as no actual damages

have been sustained, the jury should give only nominal damages. Ibid.

42. The jury are to estimate the plaintiff's single damages, and the court will

treble them in awarding the judgment. Ibid. 43. The sale of the materials of a patented machine by the sheriff, on an execution against the owner, is not such a sale as subjects the sheriff to an action for

an infringement of the patent right, under the patent act of April 17, 1800, ch. 179. (3 Bior. 342.) Sawin et al. v. Guild, 1 Gallis. 485.

44. The making of a patented machine, to be an offence within the purview of the patent act, must be the making with intent to use for profit, and not for the mere purpose of philosophical experiment, or to ascertain the verity and exactness of the specification. *Ibid.* 

45. The original inventor of a machine is exclusively entitled to a patent for it-

Odiorne v. Winckley, 2 Gallis. 51.

46. If another person invent an improvement on such machine, he can entitle himself to a patent for the improvement only; and does not thereby acquire a right to patent and use the original machine; and if he obtain a patent for the whole machine, and not for the improvement, only, his patent is too broad, and therefore void. Ibid.

47. The material question in patent causes, is, not whether the same elements of motion, or the same component parts are used, but whether the given effect is produced substantially by the same mode of operation, and the same combination of powers in both machines. Mere colourable differences or slight improvements cannot shake the right of the original inventor. *Ibid.* 

48. It is a presumption of law that when a patent has been obtained, and the specifications and drawings recorded in the Patent Office, every person who subsequently takes out a patent for a similar machine, has a knowledge of the prece-

ding patent. Ibid.

49. The proceedings under the 10th sec. of the patent act of February 21, 1793, ch. 156. (2 Bior. 348.) are in the nature of a scire facias at common law to repeal a patent. Stearns v. Barrett, 1 Mason. 153.

50. Upon a judgment rendered in the District Court on such a suit, error lies to the Circuit Court. Ibid.

51. The scire facias in such a case ought to contain a direct allegation or suggestion that the patent was obtained surreptitiously, or upon false suggestion, and to call upon the defendant for that cause only, to shew cause why the patent should not be repealed. Ibid.

52. In this proceeding the defendant's possession of the patent is so far prima facie evidence of his right as that the onus probundi is cast on the plaintiff, who is bound to prove that the patent was obtained surreptitiously or upon false sug-

gestion. Itid.

53. By the expression "true inventor" in the statute is undoubtedly meant the sole and exclusive inventor, for if the machine were the joint invention of several persons, neither of them could claim to be the true inventor, having an enclusive right to the patent, but the interest would be a joint or common interest in the whole. In such a case therefore, if a party were to obtain a patent for the invention, having sworn that he was the true inventor, he would, in the language of this act, obtain it upon "false suggestion," and as such false suggestion would be a surprise and fraud upon the government, it might well also be deckared to be obtained "surreptitiously." Ibid.

54. If a patent has been obtained by the plaintiff upon the defendant's refusal to submit to an arbitration, according to the 9th sec. of the act of February 21, 1793, ch. 156. (2 Bior. 348) and the defendant subsequently obtain a patent for the same invention, this is not conclusive proof that the latter was obtained sur-

reptitiously or upon false suggestion. Ibid.

55. The sole object of such an arbitration is to ascertain who is, prima facie, entitled to the patent, but when once obtained, the patent is liable to be repealed or destroyed by precisely the same process, as if it had been issued without objection. Ibid.

56. The law allows a party a patent for a new and useful invention, and by "useful invention" is meant, not an invention, in all cases superior to the modes

now in use for the same purpose, but useful in contradistinction to frivolous and mischievous inventions. Lowell v. Lewis, 1 Mason, 182.

57. The patentee must describe in his patent in what his invention consists, with reasonable certainty, otherwise it is void for ambiguity. If it be for an improvement in an existing machine, he must in his patent, distinguish the new from the old, and confine his patent to such parts only as are new; for if both are mixed up togeth-

er, and a patent is taken for the whole, it is void. Ibid.

58. But if the invention is definitely described in the patent, so as to distinguish it from what is before known, the patent is good, although the specification does not describe the invention in such full and exact terms, that a person skilled in the art or science of which it is a branch, would construct or make the thing invented; unless such defective description or concealment were with intent to deceive the public. Ibid.

59. As among inventors, he who is first in time has a prior exclusive right to

the patent for the invention. Ibid.

60. In an action for the infringement of a patent right, the law gives to the plaintiff treble the actual damages sustained by him: and the rule is to allow him treble the amount of the profits actually received by the defendant, in consequence of his using the plaintiff's invention. Ibid.

61. The jury are to find the single damages, and the court to treble them in awarding judgment. Ibid. Gray et al. v. James et al, 1 Peters' C. C. R. 394.

62. By "useful invention" in the patent act of the United States, is meant an invention which may be applied to a beneficial use in society, in contradistinction to an invention which is injurious to the morals, the health or the good order of society. Bedford v. Hunt et al. 1. Mason, 302. Kneass v. Schuylkill Bank, C. C. U. S. P. Oct. 1820. MS.

63. It is not necessary that the invention should be of such general utility, as to supersede all other inventions previously in practice, to accomplish the same

purpose. *Ibid.* 1 Mason, 302.
64. Nor is it important that its practical utility should be very limited, for the law does not look to the degree of utility. *Ibid.*65. The statute declares it to be a good defence to an action for the infringe-

ment of the patent right, that the thing secured by the patent was not originally discovered by the patentee, but had been in use, or had been described in some public work, anterior to the supposed discovery of the patentee. Ibid.

66. The first inventor, who has put the invention in practice, and only he, is entitled to a patent. Every subsequent patentee, although an original inventor may be defeated of his patent right, upon proof of such prior invention being

put into use. Ibid.

67. Any patent may be defeated by shewing that the thing secured by the patent, had been discovered and put into actual use, prior to the discovery of the patentee, however limited the use or the knowledge of the prior discovery

might have been. Ibid.

68. A joint patent may well be for a joint invention, but not for a sole invention of one of the patentees: if each of the patentees obtain separate patents for the same invention, as his exclusive invention, and afterwards both obtain a joint patent for the same as their joint invention, they are estopped by the joint patent. from asserting any title under the several patents. Burret et al. v. Hall et al. 1 Mason, 447.

69. If several patents are taken out by several patentees for a several invention, and the same patentees afterwards take out a joint patent for the same as a joint invention, the parties are not absolutely estopped from asserting the invention to be joint, but the former patents are very strong evidence against a joint invention. *Ibid.* 

70. A patent may be for a new combination of machines to produce certain effects; and this whether the machines constituting the combination be new or old. But in such case, the patent being on the combination only, it is no infringement of the patent to use any of the machines separately, if the whole combination be not used. Ibid.

71. A patent cannot embrace various distinct improvements or inventions, but in such case the party must take out separate patents: and if the patentee has invented certain improved machines, which are capable of a distinct operation, and also has invented a combination of those machines to produce a connected result, the same patent cannot at once be for the combination and for each of the improved machines, for the inventions are as distinct as if the subjects were entirely different. Ibid.

72. If the patent be for an improved machine, or for an improvement of a machine, for the meaning of the terms is substantially the same, then the patent must state in what the improvement specifically consists, and it must be limited to such

improvement. Ibid.

73. If therefore the terms be so obscure or doubtful that the court cannot say which is the particular improvement which the patentee claims, and to what it is limited, the patent is void for ambiguity; and if it covers more than the improvement it is void, because it is broader than the invention. Ibid.

74. Where a combination of machinery already exists up to a certain point, and the patentee makes an addition or improvement to the machinery, he must

confine his patent to the improvement. Ibid.

75. If an invention consist in a new combination of machinery, or in improvements upon an old machine to produce an old effect, the patent should be for the combined machinery or improvements on the old machine, and not for a mere mode or device for producing such effects, detached from the machinery. Ibid.

76. An inventor cannot, under the patent laws of the United States, have two subsisting valid patents, at the same time, for the same invention. The first that he obtains, while it remains unrepealed, is an estoppel to any future patent for the same invention, founded upon the general patent act. Odiorne v. The Amesbury Nail Factory, 2. Mason, 28.

77. Where a party claims several distinct and independent improvements in the

77. Where a party claims several distinct and independent improvements in the same machine, and procures a patent for them in the aggregate, he is entitled to recover against any person who shall use any one of the improvements so patented, notwithstanding there has been no violation of the other improvements. Mondy v. Fiske et al. 2 Mason, 112.

78. Where a patent is for a new combination of existing machinery or machines, and does not specify or claim any improvements or invention, except the combination, unless that combination is substantially violate, the patentee is not entitled to any exempt, although parts of the mechinery are used by another. entitled to any remedy, although parts of the machinery are used by another, because the patent, by its terms, stands upon the combination only. Ibid.

79. Where a patentee, in his specification, states and sums up the particulars of his invention, and his patent covers them, he is confined to such summary, and he cannot afterwards be permitted to systain his patent by showing that some part which he claims, in his summing up, as his invention, though not in fact his invention, is of slight value or importance in his patent. His patent covers it; and if it be not new, the patent must be void. Ibid.

80. The jury may, in a case for infringing a patent, give the plaintiff, as part of his actual damage, such expenses for counsel fees, &c. as have been necessarily incurred in vindicating the plaintiff's right by a suit, and which are not taxable in the bill of costs. Boston Manufacturing Co. v. Fiske et al. 2 Mason, 119.

81. An invention or improvement, for which a patent has been obtained, must be useful, within the meaning of the patent law, or the patent is void. Lungdon v. De Groot et al. 1 Paine, 203.

82. Whether the usefulness of an invention be matter of fact to be left to the

jury, or whether the court is to decide it as matter of law, Query? Ibid.
83. It seems, however, that if, on the plaint: ff's own showing, the invention appears to be useless, and an imposition on the public, the court should so direct

the, jury. Ibid.

An invention of an ornamental mode of putting up thread, which gave it no additional value, but merely made it sell more readily at retail, and for a larger price, is not a useful invention within the meaning of the patent law. Ibid.

84. Under the patent act of February 21st, 1793, c. 156. (2 Bior. 348.) a patent is valid, aithough the invention may have been in use for years anterior to the date of the patent, if the patentee was the inventor. Goodyeas v. Mathews, 1 Paine, 300.

85. A patent for an entire machine is valid, although the invention consists only of an improvement on such machine; but the patentee is entitled to an exclu-

sive use of no more than his improvement. Ibid.

86. The first section of the patent act of February 21st, 1793, c. 156. (2 Bior. 343.) construed in connexion with the other sections of the act, means that the invention should not be known or used as the invention of any other person than the patentee, before the application for the patent. Morris v. Huntingdon,

1 Paine, 348.

87. If the invention has got into use while the inventor was practising upon it, with a view to improve it before applying for a patent, such use does not invalidate the patent; and the motive for the delay is a question for the jury. Ibid.

88. One who has patented his invention, cannot take out a new patent for the same invention, until the first is surrendered, repealed, or declared void. *Ibid.* 

89. The obstacle of an invalid patent may be removed by having it declared void after a verdict against it, or by having a vacatur entered ex purte in the Department of State, on a surrender of the patent. But the provisions of the sixth section of the act do not enable a patentee to declare his own patent void, and a verdict in a suit on the second patent, in favour of such patent, does not

avoid the first patent. *Ibid.*90. It seems, that on surrendering a patent and taking out a new one, the latter should be only for the unexpired part of the fourteen years since obtaining the

first patent. Ibid.

91. Quary? Whether a new patent can be taken out where a patent has been

declared void under the sixth section of the act. Ibid.

92. On an application for an injunction to restrain the infringement of a patent right, it should be stated, in the bill or by affidavit, that the complainant is the inventor, and the bill must be sworn to: it is not sufficient that this fact was sworn to when the patent was obtained. Sullivan v. Redfield et al. 1 Paine, 441.

93. To obtain the injunction, the case should be such as to leave little, if any

doubt in the mind of the court, as to the validity of the patent; especially if it rests upon the complainant's own showing, without any opposing testimony. *Ibid.*94. The act of February 13th, 1319, c. 430. (§ L. U. S. 369.) does not alter the principles on which injunctions are issued, but merely extends the jurisdic-

tion of the Circuit Courts to parties to whom it did not before extend. Ibid.

95. The established rules which govern courts of equity on such applications, are, that where there has been an exclusive possession of some duration, under the patent, an injunction will be granted without putting the party previously to establish the validity of his patent at law; but when the patent is recent, and it is attempted to be shown that the specification is bad, or otherwise that the patent ought not to have been granted, the court will not take the decision upon itself, but will send the party to establish his patent at law. Ibid.

96. A patent for an improvement should describe the machine in use, that it

may be known in what the improvement consists. *Ibid.*7 One had patented "a new and useful inprovement in the steam tow boat;" but the specification did not mention the invention as an improvement, but simply described a tow boat: Held, that the specification was broader than the patent, and therefore bad. Ibid.

98. The invention should be so clearly described as to enable the public to

put it in use. Isid.

99. The specification described the invention as "consisting essentially in attaching the packet to the steamboat, with ropes, chains, or spars, so as to communicate the power of the engine from the towing vessel to the vessel taken in tow, and kept always at convenient distance; the manner of applying the power varying with the circumstances in some measure." Held, bad for uncertainty. Ibid.
100. To obtain a patent under the laws of the United States, the party must

be the original inventor in reference to the whole world, it is not sufficient that he be the first inventor within the United States. Reutgers v. Kanowers et al.

1. Wash. C. C. R. 168. Evans v. Eaton, 1 Peters' C. C. R. 323.

101. One who is the inventor of an improvement in the principle of a machine, has the same right to the use of it, as the inventor of the original machine had to that: aliter if it be only in the form or proportion. Ibid. Grey et al. v. James et al. 1 Peters' C. C. R. 394.

102. It is for the jury to decide whether the specification discloses the whole truth relative to the discovery, or whether any thing material has been concealed

with intent to deceive. Ibid.

103. Where the patentee grants the machine, or agrees to deliver it, he cannot recover damages for the use of it against his grantee, for the agreement implies necessarily the right to use it in any manner the grantee pleases, or to rent it to another. Ibid.

104. Where a suit is brought against A. and B. for the infringement of a patent right, the plaintiff may recover against one, though no proof is given against the other, for all torts are joint and several, and plaintiff may recover against one defendant, though the other be acquitted. *Ibid.*105. It is a sufficient objection to the validity of a parent, that the allegations and suggestions of the petition are not recited in it. *Evans v. Chambers*, 2

Wash. C. C. R. 125.

If they be substantially set forth, it is a sufficient compliance with the requisi-

tions of the law. Ibid.

106 In order to entitle the plaintiff to recover for a violation of his patent right, the fact must be made out to the satisfaction of the jury, that he was the original inventor in relation to every part of the world: nor is it material, provided the same invention had been previously made, any where else, that the plaintiff knew of such prior discovery. Dawson v. Follen, 3 Wash. C. C. R. 311. 107. Under the act of Congress, of January 21, 1808, ch. 117. (4 Bior. 135.)

and a patent taken out pursuant to it, Oliver Evans might recover damages for the use of a machine violating his patent, after notice of the patent, although the machine might have been constructed prior to the passing of the law.—

Evans v. Weiss, 2 Wash. C. C. R. 342. 3 Hall's Am. L. Journ. 180. S. C.

108. Under the general patent law, the plaintiff has a right to recover against a person who erected a machine prior to the issuing of a patent, and made use

of it afterwards. Ibid.

109. The patentee of an invention, notwithstanding he had given the benefit of his invention to another, may recover for the violation of his patent, not having assigned away his whole title and interest in it, and no deed of assignment having been recorded in the office of the Secretary of State. Purk v. Little et al. 3 Wash. C. C. R. 196.

110. In an action for the violation of a patent right, the declaration need not aver that the preliminary steps to obtain a patent, were taken, because if it aver that the patent was granted in the form prescribed by law, the court, upon demurrer,

will presume that every thing was rightly done to obtain it. Ex'rs. of Fulton v. Myers, C. C. U. S. P. Oct. 1818. MS.
111. But it is fatal on general demurrer, if the declaration omit to aver that a patent did issue; it is not sufficient to allege it was made out in due form, under the seal and in the name of the United States, by which there was granted, &c.

The law prescribes that the patent so made out shall be delivered to the petitioner, and that no person can receive it till he has taken the oath and made the disclosure required in the 2d section. Ibid.

112. It is necessary to aver the attestation of the President, and it is not to be

presumed from the foregoing general allegation. Ibid.

113. The certificate of the Attorney General forms no part of the patent. Ibid. 114. It is not necessary that the declaration should particularly designate in what the improvement consists; it is sufficient that the breach stated be as broad us the right set forth in the declaration and granted in the patent. Ibid.

115. In an action for the violation of a patent, where the patent and specification are so ambiguous as to leave it uncertain whether the grant is for an improvement in the making a certain instrument, or in the mode of using it, the affidavit may be referred to, for the purpose of explanation. Petibone v. Derrin-

ger, C. C. U. S. P. Oct. 1818. MS.

116. If two machines be substantially the same, operating in the same manner to produce the same result, though they vary in forms, proportions and degrees of utility, they are the same in principle, and the discoverer of the latter is entitled to a patent only for an improvement. Evans v. Eaton, 3 Wash. C. C. R. 443.

117. In an action for the violation of a patent, the defendant, under the gencral issue, without notice of the special matter may give in evidence the act of Congress, respecting patents, as well as some other matters than those enumerated in the sixth section; such as alienage of plaintiff, and license by him to use the invention. But he cannot give in evidence that the invention is not new, nor can that circumstance however apparent, be judicially noticed by the jury.

Kneass v. Schuylkill Bank, C. C. U. S. P. Oct. 1820. MS.

118. Under the general issue defendant cannot give evidence of any of the

grounds of defence enumerated in the sixth section, but he may make objections to the validity of the patent of a different kind, such as the want of a specification or written description as required by the 3d section, or a specification ambig-

uous and unintelligible, which is the same as no specification. *Ibid.*119. These are defects in the plaintiff's title, apparent upon the face of the documents, on which the title is founded.

On the same ground, defendant may object that the patent is broader than the discovery; that it is for an improvement which is not distinguished in the specification from the original invention;

that the suggestions of petition are not recited substantially in the patent. 1bid.

120. A mistake of the word painting for printing in the patent is immaterial, if explained, by other parts of the patent and specification, so that there can be no

mistake. 1bid.

121. It is no objection to the validity of a patent that the mode of performing

an operation, common and well known, is not described. Ibid.

122. An action for the violation of a patent right may be sustained against a corporation, when acting in that character, it directs an act to be done, which infringes the patent. Ibid.

123. Upon a plea of not guilty, the plaintiff must prove, not only that defendant has made a machine, but that it substantially resembles that for which the plaintiff had a patent. Dixon v. Mayor, C. C. U. S. P. April, 1821. MS.
124. It is not a defence that plaintiff was not himself the original projector of

the improvement, if the patent was taken out with the knowledge and assent of the original projector and not in fraud of his right. *Utid.*125. The plaintiff must in all cases prove an infringement of his right subsequent to the date of his application, or patent; but if defendant attempts to avoid the patent, by shewing that plaintiff was not the original discoverer, the patent will be considered as relating back to the original discovery. Ibid.

Buc 870

10

Ber

tode

be:

126. It lies on the defendant to shew that some other person than the patentee was the original inventor; it is the point of his defence and he must substantiate

127. It is not enough that the thing designed to be embraced by the patent should be made apparent on the trial, by a comparison of the new with the old machine. The patent or specification must distinguish the new from the old, so as to point out in what the improvement consists. Ibid.

128. Under a notice that the defendant will prove the prior use of the machine in the United States, he will not be permitted to give evidence of a prior

use in England. Ibid.

129. In patent causes, the rule is to grant an injunction on filing of the bill and before a trial at law, if the bill state a clear right, and verifies it by affidavir. Isaacs v. Cooper. C. C. U. S. P. Oct. 1821. MS.

130. If it state an exclusive possession of the invention, the injunction is granted, though the court may entertain doubts as to the validity of the pa-

131. But if there be glaring defects in the patent or specification, it is refused. Ibid 132. Where the patent is modern, and objections are made to the patent or

specification, the court will not act till the right is establised at law, which the court will order. Ibid. 133. If the bill does not set forth a possession by the plaintiff of his invention,

at any particular time, it is defective. Ibid. 134. If the answer demes that defendant uses plaintiff's invention, the injunc-

tion will be refused. Ibid.

135. In an action for the violation of a patent right, it is sufficient under the plea of the general issue, for the defendant to give notice that the plaintiff is not the inventor of the machine for which the patent was obtained, if that constitutes the defence, without stating in the defence who was the inventor, or who had previously used the machine. Evans v. Kremer, 1 Peters' C. C. R. 215.

136. If in such notice the defendant specifies some persons who used the ma-

chine, he may prove the use of it, by others not named in the notice. *Ibid.*137. A legislative grant of an exclusive privilege in an invention, for a definite period, does not imply an irrevocable contract with the people, that at the the expiration of the period the invention shall become their property. The legislature may revive the grant, but if they refuse to do so, at the end of the period the invention may be used by any one. Evans v. Eaton, 1 Peters' C. C. R. 322.

138. The patent granted to O. Evans, contains no grant of a right to the several machines, but is confined to the improvements in the art of manufacturing flour by those machines; although the act of Congress, authorizing the grant of the patent, authorized it to be issued for the several machines, as well as for the entire improvement. Ibid.

139. The schedule annexed to letters patent, is part of the patent, so far as

it is a description of the machine, but no farther. *Ibid.*140. A patent may be for a new and useful act: but it must be practicable and explicable, and referrable to something which may prove it to be useful. *Ibid.*141. The grant of an exclusive privilege by the patent, can be only for the

discovery recited and described in the patent and specification. Ibid.

142. A machine or an improvement may be new and entitled to a patent, al-

though parts of it were before known and used. *Ibid.*143. The combinations of old machines to produce a new and useful result,

is a discovery for which a patent may be granted. Ibid.

144. One who has obtained a patent for such a combination, cannot recover in an action against one for using one of the known machines of which the combination is formed. Ibid.

There is no limitation to the period in which the defendant, under the general issue, may give in evidence that the patentee was not the original inventor.

Ibid.

146. Where two machines are substantially the same, and operate in the same manner to produce the same result, they must be in principle the same. Gray et

al. v. James et al. 1 Peters' C. C. R. 394.

147. A patent "for an improvement in the art of making nails, by means of a machine which cuts and heads the nail at one operation," is not a grant of an abstract principle, nor is it the grant of the different parts of any machine, but of an improvement applied to a practical use, effected by a combination of various mechanical powers to obtain a new result. Ibid.

148. It is not sufficient to invalidate a patent that the specification is materially defective, unless the patentee intended by concealment of parts of the machine to deceive; and where practical mechanics are enabled to supply any omission in the specification, such an intention will not be presumed. *Ibid.* 

149. After a patent has been obtained for an invention or discovery, the disuse of it by the patentee is not an abandonment of the rights of the patentee to the same, but they continue for fourteen years from the date of the patent. 16:8:

150. There being no act of Congress conferring on the Circuit Courts of the United States, a right to take cognizance, as a court of equity, of a case under the patent law, between citizens of the same state, that court cannot take cognizance of such a cause. Livingston et al. v. Van I genet al. 4 Hall's Am. L. Jour. 56.

151. Drawings annexed to a specification, and referred to by numbers or letters in the specification, constitute a part of the specification, and may be refer-

red to in aid of the description to give it certainty. \*\*Larl v. \*\*unwer, 4 Mason. 152. A combination, though simple and obvious, yet if entirely new, is pa tentable; and it is no objection, that up to a certain point old machinery is made Ibid.

155. The patent law of the United States differs from that of England in many respects. A mere public use by others, before taking out a patent, on a sale thereof by the inventor, is not decisive against him here as it is in England .-Millers v. Silsbee. Ibid.

156. An inventor may abandon his invention and surrender it to the public. This inchoate right once gone cannot afterwards be resumed at pleasure. Pennock

and Sellers v. Dialogue, 2 Peters'.

157. The true meaning of the words in the patent law, "not known or used before the application;" is, not known or used by the public, before the applica-

158. An inventor is not permitted to hold back, for a long period of time, his invention; enjoying a monopoly : as this would retard the progress of the useful

arts. Ibid.

159. A patent is not sustainable in law when the first suggestions of the pa-

tentee for obtaining it were not true. Ibid.

160. The true construction of the patent law is, that the first inventor cannot acquire a good title to a patent, if he suffer the thing invented to go into public use, or be publicly sold for use, before he make application for a patent. This voluntary act, or acquiescence in the public sale or use is an abandonment of his right; or rather, creates a disability to comply with the terms and conditions of the law; on which alone a patent can legally be granted. Ibid.

### APPLICATION FOR A PATENT.

#### PETITION.

To A. B. Secretary of State of the United States.

The petition of C. D. of —, in the County of —, and State of —, re-

spectfully represents-

That your petitioner has invented a new and useful improvement in not known or used before his invention, the advantages of which he is desirous of securing to himself and his legal representatives, he therefore prays that letters patent of the United States may be issued, granting unto your petitioner, his heirs, administrators or assigns, the full and exclusive right of making, constructing, using and vending to others to be used, his said improvement; your petitioner having paid - dollars into the treasury of the United States, and complied with other provisions of the patent law.

County of \_\_\_\_\_, \{ es. [OATH.] \}
On this \_\_\_\_ of \_\_\_\_, 183-, beforethe subscriber, a justice of the peace, in and for the said county, personally appeared the aforenamed C. D., and made solema oath [ or affirmation] according to law, that he verily believes himself to be the true and original inventor, or discoverer of the machine (art, invention, or improvement, composition of matter, etc.) above specified and described; and that he is a citizen of the United States.

\_\_\_\_, Just. Pcace.

The specification, signed before two witnesses, is accompanied by a model, perspective drawing or drawings and references; all of which are filed in the Patent Office; unless duplicate drawings are sent, then one is affixed to the patent.

### ALPHABETICAL LIST

OF ALL

## PATENTS AND PATENTEES

ON RECORD IN THE PATENT OFFICE.

#### A

Ashes, pot and pearl. Samuel Hopkins	July 31,	1790
Ashes, pot and pearl, furnace for. Edward Ryan -	April 29,	
Ash, pot, improvement in manufacturing. Edward Ryan	Nov. 19,	1796>
Ash, pot, manufacturing. William Forbisher	Nov. 17,	1796
Alkali, from marine salt, extracting from kelp. John Nazro	July 6,	
	March 16,	1799
Air Pump, ventilator for ships		
, for mines, &c. Richard Robotham	Oct. 10,	1801
Antibilious Pills. Thomas H. Rawson	July 24,	
Astronomical Quadrant. Matthew C. Groves - 4	Sept. 3,	
Antibilious stomach cordial. Simon Lazarus	Dec 21,	
Apples, machine for paring. Moses Coates, Coatsville, Penn.	Feb. 14,	
Antisceptic gas, improvement in the mode of obtaining. Peter		
De La Bigre, and J. B. M. Picornell	March 24,	-
Antibilious Pills. Thomas H. Rawson, New London, Conn.	April 4,	
Alcohol, improvement in the method of distilling. Lemuel J.	,	
Hilborn, Freehold, N. York, and Biddis, Philadelphia	June 4,	~
Air, or Bellows Pump, for raising water. Daniel M. Miller	March 5,	7800 H
Auger, improvement. Christopher Hoxie	July 12,	1804
Ashes, mode of manufacturing. Joseph Bellows, jun. and Ebe		
White	Dec. 29.	
Andirons, improvement in. John Stickney, Baltimore -	May 4,	802
Anti-Stream-Boat Wm. Wadsworth, Hartford, Connecticut	July 17,	1806
Artificial Slate, or Tile. Thomas Woodsend -	Aug. 7.	
Auger, improvement in. William Hale, Champlain. New York	Feb. 7,	1807
Axle, and box of carriages. Cyrenus Beach, New Jersey -	June 26,	
Anglet for taking and laying down angles. B. Dearbon, Boston	April 29,	1808
Alarm Bell for fire engines. James P Parke, Philadelphia	Dec. 19,	
Astronomical Time-keeper. Theodore Newell, Sheffield, Mass	. July 7,	1809
Auger. See Screw. Ezra L'Hommidieu.		,
Apples, machine for pairing. Steph. Cruttenden, Guilford, Conn.	Aug. 25,	-
Auger for mining. Perkin Nichols, Boston	May 18,	25 10
Auger. Stetson and M. Selree, Georgetown, Ken	Dec. 11,	6 %
10		

Apples, machine for coring and quartering. Cyrus Gates, Rut-
land county, Virginia Dec. 15, 1810
Andirons and fire places. John Sweet, Berkshire, Mass. Feb. 26, 1811
Air, draught, Subignies. Samuel Randall, Providence - March 12, -
Air flue for a chimney. James Macombes, Greenwich, N. Y. Nov. 19, -
Air, difference of rarefied and unrarefied. Sam. Morey, Phil. April 8, 1813
Acids, mode of preparing vegetable. Nath. S. Allison and B. Hug-
ler, Philadelphia June 5, -
Asclepias, manufacture the. George Smith, New York May 28, 1818
Augers. Martin Howe, New York April 2, 1814
Andirons. Willaby Dexter, Winchester, Connecticut May 17, -
Alarm Bell. Ben. E. Freymuth, Philadelphia - Dec, 22, -
Auger. Joseph Brownwell, Otsego, New York - May 16, 1815
Ashes, pot and pearl. Jacob Latting, New York - April 26, 1816
Alternate lift for bricks and mortar. Ben. Dearbon, Boston June 20, 1816
Auger, single twist screw. Ezra L'Hommedieu, Norwich, Conn. July 17,
Anvil and hammer, Charles Josselyn, Pembroke, Mass. Oct. 9,
Alum made from Lignite. Genit Twost, Philadelphia March 3, 1817
Anti-attrition, compound. Edward Motts, Philadelphia Oct. 4,
Archimedian Screw. Jeremiah Black, North Penn. Jan. 17, 1818
Auger to bore rectilinial holes. Cyrus Jackson, Butternuts, N. Y. Feb 14,
Aromatic Steam Bath. J. Deverin & J. B. Isabelle, Lexington. Ken. July 6,
Asiatic Lenitive. Ez. Audler, New York Oct. 26,
Anti-friction Bush. James Rudder, Norfolk, Virginia - Feb. 6, 1819
Anti-friction Bush. James Rudder, Norfolk, Virginia Axle, moveable. Geo. N. Reynolds, Charleston, S. C. Auger, tube Robert Thomas, Richmond co. N. C.  May 22,4  May 22,4
Auger, tube Robert Thomas, Richmond co. N. C May 22,9 Auger, twisted screw. Wm. Holmes, Winchester, N. H. April 4, 1829
Auger, twisted screw. Wm. Holmes, Winchester, N. H. April 4, 1829  Aqueduct pipes made of marble. Thos. B. Robbins, Stockbridge,
Mass March 19, 1821 Anti-dyspeptic Pills. George Smith, New York August 7, -
Andirons improvement in William Pro New York - August 1, -
Anti-dyspeptic Fills. George Smith, New York August 7, - Androns, improvement in. William Pye, New York, - Nov. 16, - Anti-dysenteric medicine. John G. Voight, Rochester, N. York Dec. 4, -
Anti-dysenteric pills. J. C. M. Brockway, Lyme. Conn. March 13, 1822
Auger, for boring post holes. Christopher Hoxie, Hudson, N. Y. July 26, 1824
Apple cutting machine. Andrew Glendening, Loudon co. Va. Sept. 9,
Apples, machine for grating or grinding. Joel Farnham, Tio. N. Y. June 28, 1825
Auger, improvement in the strap. Silas Gore, Shesequin, Penn. July 20, -
Augers, mode of turning any number. Hardin Branch, N. York Aug. 7, 1826
Auger, imp't applied to the. Joseph H. Schreiner, Philad'a Aug. 17,
Anthracite coal applied to generating steam. Daniel Collings and
James D. Gallup, Wilkesbarre, Pennsylvania - Oct. 12, -
Auger for boring hubs, imp't in the. Sheldon Cadwell, Wind-
ham, Connecticut, Nov. 20,
Andirons, pedestal feet for. Edmund Smylie, New-York, Feb. 1, 1827
Do. Feb. 22
Apples, machine for grinding. H. E. Paine, and S. H. Russell, Le-
Roy, Geauga county, Ohio, March 5
Andirons, casting the feet of brass. John Griffiths, New-York, March 15,
Alcohol, mode of extracting by steam. Anson and Norman
Wolcott, Bloomfield, New-York, March 19, -
${f B}$ .

Bark, extract of. John Biddes and Thomas Bidwell, Phil.	Aug. 10, 1791
Bedstead. Ludering Conrad Khun, Phil	Aug. 10,
Bellows. James Rumsey, Berkly county, Va	Aug. 26,
Boats, manufacturing. Peter Gordon, Phil	Aug, 10,
Boats, propelling. Henry Voight, Phil	Aug. 10,
Bark and Wood Sawing. Thomas Harrington, Boston -	May 9, 1792
Bricks, making. David Ridgeway, Phil	March 7,

Bricks, manufacturing of. Christopher Bolls, New-York - Jan. 26, 1793
Bricks, manufacturing of. Apollos Kinsley, New-York - Feb. 1, -
Bells, construction and tone of Robert Leslie, Phil Feb. 2,
Bricks and Pan-tiles, manufacture of. Sam. Brower, New-York Aug. 7,
Boats, Vessels and Carriages, machine for propelling. Abijah Bab-
cock. Ohio Dec. 2
Boats, improvement in propelling. Josiah Shackford, - March 21, 1794
Bellows, construction of. James Drake, New Jersey - May 19, -
Bark, grinding of. John Mackley, Penn July 19, -
Boats, improvement in propelling. Daniel Keller, Penn May 25, 1795
Boats and Vessels, propelling. Wm. Peter Sprangue, Penn. June 19, -
Boats and Vessels, propelling. Wm. Peter Sprangue, Penn. June 19, — Boiler for generating steam. See Steam.
Bricks, tempering mortar for and making of. A. Kinsley, N. Y. Dec. 20, -
Beans, cultivating. See Corn.
Bolting Cloths, improvement in. Robert Dawson, Del May 12, 1796
Bolts and round iron, improvement in forging. Clement Rentgen, Nov. 17, -
Boards. See Shingles.
Boiling. See Cooking.
Books and paper. See Ruling.
Bridges, improvement in. Charles W. Peale - Jan. 21, 1797
Bridges, improvement in. John Fowler Feb. 24,
Boats and Vessels, propelling. Jehosaphat Starr - April 28,
Bridges, improvement in. John Stickney June 3,
Bellows, pendulous, &c. Benjamin Wyncoop June 26,
Brick, tiles, &c. improvement in. John Hawkins July 11,
Butter, preserving. Moses Johnson June 30, -
Bridges, improvement in. Timothy Palmer - Dec. 7, -
Boats, &c. machine for propelling. John Martin - Nov. 21, -
Bread, improvement in making. William Banks - Dec. 14, 1798
Balloon, Federal. Moses M'Farland Oct. 28, 1799
Boat for descending rapid streams. Daniel Keller - Nov. 5, Boots and shoes, manufacturing of. Dean Howard - April 10, 1800
Boots and shoes, manufacturing of. Dean Howard - April 10, 1800
Bricks and tiles, machine for making. George Hadfield - May 15, -
Bricks and tiles, machine for making. George Hadfield - May 15, - Bricks, improvement in making. Richard Mansfield - Oct. 24, -
Bricks and tiles, machine for making. George Hadfield - May 15, - Bricks, improvement in making. Richard Mansfield - Oct. 24, -
Bricks and tiles, machine for making. George Hadfield - May 15, — Bricks, improvement in making. Richard Mansfield - Oct. 24, — Brewing with Indian corn. Alexander-Anderson, Phil Jan. 26, 1801
Bricks and tiles, machine for making. George Hadfield - May 15, — Bricks, improvement in making. Richard Mansfield - Oct. 24, — Brewing with Indian corn. Alexander Anderson, Phil Jan. 26, 1801 Boats to ascend rivers, improvement in. David Grieve - Feb. 20, —
Bricks and tiles, machine for making. George Hadfield - May 15, — Bricks, improvement in making. Richard Mansfield - Oct. 24, — Brewing with Indian corn. Alexander Anderson, Phil Jan. 26, 1801 Boats to ascend rivers, improvement in. David Grieve - Feb. 20, —
Bricks and tiles, machine for making. George Hadfield - May 15, — Bricks, improvement in making. Richard Mansfield - Oct. 24, — Brewing with Indian corn. Alexander-Anderson, Phil Jan. 26, 1801 Boats to ascend rivers, improvement in. David Grieve - Feb. 20, — Boring machine for posts. Richard Weems, Annapolis, Md. March 16, — Bark for dying, extract of. Samuel Downing, Trenton, N. J. June 12, —
Bricks and tiles, machine for making. George Hadfield - May 15, — Bricks, improvement in making. Richard Mansfield - Oct. 24, — Brewing with Indian corn. Alexander Anderson, Phil Jan. 26, 1801 Boats to ascend rivers, improvement in. David Grieve - Feb. 20, — Boring machine for posts. Richard Weems, Annapolis, Md. March 16, — Bark for dying, extract of. Samuel Downing, Trenton, N. J. Beaming machine. Ier. Ladd, Charleston, N. H July 17, —
Bricks and tiles, machine for making. George Hadfield - May 15, — Bricks, improvement in making. Richard Mansfield - Oct. 24, — Jan. 26, 1801 Boats to ascend rivers, improvement in. David Grieve - Feb. 20, — Boring machine for posts. Richard Weems, Annapolis, Md. March 16, — Bark for dying, extract of. Samuel Downing, Trenton, N. J. June 12, — Beaming machine. Jer. Ladd, Charleston, N. H July 17, — Boxes for carriages, improvement in. Thos. B. Whitlock,
Bricks and tiles, machine for making. George Hadfield - May 15, — Bricks, improvement in making. Richard Mansfield - Oct. 24, — Brewing with Indian corn. Alexander-Anderson, Phil. — Jan. 26, 1801 Boats to ascend rivers, improvement in. David Grieve - Bering machine for posts. Richard Weems, Annapolis, Md March 16, — Bark for dying, extract of. Samuel Downing, Trenton, N. J. July 17, — Boxes for carriages, improvement in. Thos. B. Whitlock, Mount Pleasant, N. J. — Feb. 23, 1802
Bricks and tiles, machine for making. George Hadfield  Bricks, improvement in making. Richard Mansfield Brewing with Indian corn. Alexander Anderson, Phil.  Boats to ascend rivers, improvement in. O D		
Brick and Tile, machine for making by cutting the mortar. Nath.		
Miller and Philip W. Miller June	5,	1804
Bedstead, improvement in. Ward Gilman and W. Jackson March	19,	-
Buttons, improvement in manufacturing. George W. Robinson,	10	
Providence, Rhode Island March Breaking and cleansing flax and hemp, machine for. O. Roberts,	19,	95.00
Baltimore April	10	
Bell, sheep. See Cow or Sheep.	12,	
Black oak bark. See Quercitron.		
Boring gun barrels, machine for. Nathan Forbes, Providence,		
Rhode Island Dec.	31,	
Bilious cordial, medicinal. Sam. Chamberlaine Dec.		
Beaming machine. Allen Hill, Hinsdale, Mass May		1805
Bark mill. Thomas W. Pryor, Philadelphia May	21	-
Brick, apparatus for. See <i>Tiles</i> .  Boiling, method of, for distilling, &c. —— Eggleston, Prince-		
town, Albany, N. Y May	27.	
Boilers, mode of setting. Eben Jenks, Portland, Maine - June		
Bellows boards, machine for plaining and sawing. John Hinman,	ĺ	
New Haven Conn June	1,	
Bolts, mode of casting for ships. Joseph Share, Baltimore Oct	28,	
Balance pendulum lock. See Locks	1.4	1000
	14,	1806
Brick, machine for making John F. Gould March Boats. See Propelling.	Ι,	
Boxes for carriage wheels. James Gridley, Boston - May	26.	
Boxes for carriage wheels, Levi Brown, Berkshire, Mass. May	30,	
Boxes for carriage wheels, Levi Brown, Berkshire, Mass.  Boring, machine for. Roger Selden - July	17,	
Boots and shoes, improvement in. John Bedford, Philadelphia July	16,	
Brads, machine for cutting. Jonathan Ellis Feb. Bottoms for boots and shoes, of metal. Sam. Milliken, Lexing-	10,	1807
Bottoms for boots and shoes, of metal. Sam. Milliken, Lexing-	10	
ton, Mass Feb.	10,	-
Boots and shoes, improvement in making. W. Montgomery, Philadelphia Feb.	11	_
Butter, mode of making. B. G. and G. Burtis, New York - Feb.		
Bark, mode of applying for hats, &c. Sylvester G. Whipple, Hal-	,	
lowell Mass April	17,	
Bridges, mode of construction. Thomas Pope, New York April	18,	
Bark, machine for grinding. Corns. Tony, Hudson, N. Y. May	7,	
Box, for carriages. See Axle.	0	1000
Boots and shoes, mode of making. Eli Barnum, Mass Jan. Boats, mode of propelling. Philemon Heaton, Mark B. Boys, and	э,	1000
Philemon Heaton		
Boats, etc. See Impelling.		
Boring. See Pressing.		
Brick, mode of making. Asa Frost, Cazenovia, N. Y. Sept.	21,	me
Bo'ls and shot made by pressure. Thos. Bruff, Washington city Oct.	5,	
Boots and shoes. Sam. Chamberlain, Boston Nov. Boiler, for distilling double. Amos Gunn, New Haven, Conn. Dec.	21,	
Bellows. Henry Dotterer, Philadelphia Feb.		1900
Bellows. Henry Dotterer, Philadelphia Feb. Bene oil. William Few, New York March		1009
Bow string, for hatters. Daniel Nicholls, New Milford, Conn. March		-
Boxes, mode of boring for axle trees. A. Brood, Salisbury,	-,	
Connecticut June		
Boiler. See Worm. James Trueman June Boiler and heater. Samuel Bolton, Philadelphia - July Barbal Alkahest, or Magic Lotion. John Hopkins, Phil Aug.		
Boiler and heater. Samuel Bolton, Philadelphia July	7,	
Barbal Alkahest, or Magic Lotion. John Hopkins, Phil Aug. Boxes, mould for running. Samuel Smith, Amherst, Mass. Oct.	17	
Brick and tiles, machine for making. John F. Gould, Newbury-	11,	
port, Mass Oct.	17.	1709
Barilla, mode of manufacturing. George Easterly, Richmond, Va. Feb.	5.	1810
,	-	

	-
Bridges, construction of. Joseph Joshua Dyster, Phil Feb. 23, 18	10
Boxes for carriages. Leonard Farwell, Lancaster, Mass March 5,	
Bridges, construction of. John Templeman, Georgetown, D. C. March 6, -	
Boring machine. Benjamin Hall, Canaan, New York - March 8, -	
Borer, mitre point. Benjamin Hall, Canaan, New York March 8, -	
Bee hives. John Sweet, Bethlehem, Mass April 11, -	
Boxes for wheel carriages. John Nicholson, Herkimer, N. Y. April 28, -	-
Boring machine. John Webster, Barrington, Mass May 1, -	-
Bellows, elastic piston. Henry Dotterer, Philadelphia - May 1, -	-
Bilious pills, Lee's Windham. Samuel Lee, New London, Conn. May 24, -	
Balance scale. Russell H. Wright, Boston June 9, -	-
Breaking horses and cattle. David Cooly, Orange co. N. Y. June 23, -	
Boat and ship building. Wm. Phoebus, New York - June 27, -	-
Bolts, rolling iron round for ships. Clement Rentgen, West Ches-	
ter, Pennsylvania June 27, -	-
Boat, flat-bottomed with moveable keel. S. Buel, Burlington,	
Vermont June 7, -	
Brick, mode of making Joseph B. Harris, Philadelphia - Aug. 21, - Brick and tiles, making. Daniel French, New York - Aug. 22,	
Brick and tiles, making. Daniel French, New York - Aug. 22, - Boiler, improvement in the. Wm. Eaton, Baltimore - Oct. 29, -	
Boiler and steam still. Borden Wilbor and Timothy Soper, Wash-	-
ington, N. Y Feb. 4, 1	811
Bark mill, Luther Gale, Berkshire co. Mass March 20,	-
Boots, mode of forming cossacks. John Morgan, Philadelphia, April 10,	
Brick, mode of manufacturing. James Gregg, New Hampshire May 7,	
Bolts, machine for cutting off the ends of. John Rewey, Berk-	
shire, N. Y July 8,	
Balance bridge. Jonathan Jessup, York Town, Penn July 2,	
Bellows, forge. Charles M. Murtry, New Marlborough, Mass. July 8,	
Boot and shoe making. S. Hitchcomb and J. Bement, Homer,	
	in.
Boilers, circular. John Sizer, New London, Conn Oct. 15,	
Boot lays, manufactory of. John Vernon, Baltimore	
Boxes. See Metallic. Lebbeus Larrebee.	
Boats, &c. constructing. Francis Rotch, New Bedford, Mass. Nov. 29, Bee-hives, constructing. Timothy Stanley, Farmington, Conn. Jan. 6,	
Pedatond improved assydnaught Peter Tilton Welcot Manmouth	
Bedstead, improved easy draught. Peter Tilton Walcot, Monmouth, New Jersey Jan. 6, 1	010
New Jersey Jan. 6, 1 Boot-legs, machine for cramping. N. L. Moore, Smithfield,	1812
Massachusetts Feb. 4,	-
Bridge, rolling draw. Richard Crosbie, Newark, N. J Feb. 17,	_
Boots and shoes, machine for making. Elijah Thayer, Leicester,	
Massachusetts March 14,	
Brick machine. James M'Donald, New York April 1.	
Boring machine. Nath. Gillett and John Smith, Cazenovia, N. Y. April 8.	
Bridges, construction of. Benjamin Conner, Portsmouth, N. H. April 23.	000
Blankets, wool made into. Elkanah Cobb, Georgetown, D. C. April 29,	e~
Boring machine. David Sperry, Colchester, New London,	
Connecticut May 12,	6.10
Buttons, moulds for casting. G. W. Robinson, New Haven,	
Connecticut May 14,	
Boots and shoes, with pegs, &c. R W. Richards, Norwalk, Conn. May 23,	
Bark, mode of grinding, &c. Jos. Richardson and Ben. Stout, June 6,	
Boiler, stone, for sulpour. Ab. H. Quincy, Boston, Mass. June 13, Boats, chain wheels and paddles for. Robert R. Livingston, Cler-	4001
mont, New York June 13, Boots and shoes, elastic hair. Wm. Francis, Roston - June 23	-
