CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician
William A. Ruff, Assistant

This is one of a series of reports on service establishments presenting the findings of the 1935 Census of Business. The statistics were compiled by the Bureau of the Census from information collected in 1936 in a field canvass covering every State, city and county, in the United States. Funds for the Census were provided by the Works Progress Administration.

Reports on service establishments are prepared by Ralph C. Janoschka, Chief of the Service Division, assisted by Albert A. Eisenstat.

SERVICE ESTABLISHMENTS: 1935

PLAN OF PRESENTATION

- VOLUME I UNITED STATES SUMMARY---contains summary tables for the United States, by geographic divisions and States, and by kinds of business. The data presented include number of establishments, total receipts, active proprietors and firm members, average number of employees for the year, annual pay roll, employment by months, sex of employees, classification of employees according to occupational groups, and analysis of receipts. In addition, analytical tables present general statistics for establishments classified according to size based on volume of receipts.
- VOLUME II STATISTICS FOR STATES, COUNTIES, AND CITIES---presents number of establishments, total receipts, active proprietors and firm members, average number of employees for the year, and annual pay roll, by States, counties, and cities and places of 2,500 or more inhabitants. Data for States, and for cities of 25,000 or more inhabitants, are presented by kinds of business; statistics for counties, and for cities of less than 25,000 inhabitants, however, are shown only in totals for all kinds of business combined.
- VOLUME III MONTHLY EMPLOYMENT---presents number of paid employees for each month of 1935, average number of employees for the year, and number of active proprietors and firm members by kinds of business, for States and for cities of 500,000 or more inhabitants.

SERVICE ESTABLISHMENTS: 1935VOLUME IUNITED STATES SUMMARY

This volume, which is one of a series of three on the Census of Service Establishments, presents summary tables for the United States, by geographic divisions and States, and by kinds of business. In addition, data for each of several kinds of business, which are important from the standpoint of number of establishments, volume of business, employment, and pay roll, are presented separately by geographic divisions and States in Table 1 (general statistics); in Table 2 (establishments and receipts by size of establishment); and in Table 5 (employment and pay roll, for a specific week).

While some of the data included in this volume have previously been published, and in more geographic detail (See Volumes II and III in "Plan of Presentation", which appears on the second page of this report), the data on size of establishment, based on volume of receipts; employment, pay roll, and sex of employees as of a specific week; analysis of receipts; and Negro proprietorships, have not been heretofore published in connection with the 1935 Census of Service Establishments.

NATURE OF THE SERVICE FIELD.---The Service phase of the Business Census covers a heterogeneous group of kinds of business, whose common characteristic lies in the fact that they are all primarily engaged in the sale of service, as distinguished from establishments dealing in merchandise, which are covered by the Censuses of Wholesale and Retail Trade, and the Census of Manufactures. However, not all establishments which would qualify as service businesses, in a broad interpretation of the term, are included in the Census. The professional field, the financial, educational, transportation, construction, and diverse other fields of business activity, which are enumerated in greater detail in subsequent pages of this volume, either were not covered by the Census of Business, or are included in its other phases.

Totals for all service establishments combined, as are presented in this volume, are significant only from the standpoint of the contribution they make toward the completion of the business picture of the particular area to which they apply. On the other hand, the figures presented for individual kinds of business, relating as they do to single recognized fields of business activity, obviously have a very definite value both to individuals engaged in the respective fields, as well as to organizations or individuals interested in such statistical data purely from a marketing or sociological standpoint.

SCOPE OF THE CENSUS.---For the purpose of 1935 Census, service establishments are classified into four major groups: Personal Service Establishments such as barber shops, beauty parlors, photographic studios, etc.; Business Service Establishments, such as billboard advertising businesses, dental laboratories, employment agencies, sign painting shops, and other establishments rendering a service to business; Repair Services and Custom Industries which are subdivided into three groups: (1) Automotive Repairs and Services (excluding general repair garages, which are included in the Retail Census) such as automobile paint shops, automobile top and body repair shops, battery and ignition repair shops, tire repair shops, and automobile laundries, (2) Other Repair Services such as blacksmith shops, radio repair shops, and watch, clock, and jewelry repair shops, and (3) Custom Industries, such as cabinetmaking shops, grist mills, printing and publishing shops, and other custom industries and small manufacturing establishments not covered by the Census of Manufactures, since the value of product of each establishment is less than the minimum necessary to classify the place of business as a manufacturing plant. The Miscellaneous Services classification includes commercial mounting and finishing establishments, typewriter rental shops, livery stables, and other establishments which could not properly be classified in any of the three above-mentioned groups. Definitions of all classifications presented in the following tables may be found on Pages viii to xxv of this report. Aside from the kind of business classifications for which data are presented, more than three thousand kinds of business were canvassed, the figures for which are included in the "Other Service" groups. The classifications shown separately represent the more important kind of business groups, as measured by volume of receipts and number of establishments.

Banks and other financial institutions, real estate agencies, insurance companies, construction companies, certain types of transportation agencies, and trade associations, are covered in other phases of the present Census of Business. The 1935 Census of Business does not include doctors, lawyers, or dentists; power laundries or cleaning and dyeing plants; religious or charitable institutions; hospitals or sanitariums; public utilities; educational institutions; or government-operated enterprises--all of which were omitted from the Census because they are being adequately covered by other statistical series, or because of the virtual impossibility of securing accurate data regarding their activities.

As in the 1933 Census, restaurants, dairies, general repair garages, and small bakeries and ice cream manufacturers whose value of product for the year is less than \$5,000 and who sell primarily to the consumer, are included in the Census of Retail Trade.

Following is a list of kinds of businesses which were included in the Census of Service Establishments for 1933 but which have been included in other phases of the 1935 Census of Business as indicated:

Advertising agencies. (Covered as a separate phase of the Business Census.)

Aviation field service. (Transferred to the Transportation phase of the 1935 Business Census.)

Broadcasting stations. (Covered as a separate phase of the Business Census.)

Cartage and trucking establishments. (Included in reports for the Transportation Census.)

Delivery service. (Included in reports for the Transportation Census.)

Electrical repair shops. (Shops primarily engaged in electric wiring and fixture installation were transferred to Construction Census, while those engaged primarily in appliance repairs are retained in the Census of Service Establishments.)

Elevator service (repair). (Included in reports for the Construction Census.)

Plant-owned laundry and dry-cleaning collecting and distributing agencies. (Are included in the reports for the plants made in connection with the 1935 Census of Manufactures. In the 1933 Census, such agencies were included in the Service Census.)

Plumbing and heating repair shops. (Included in reports for the Construction Census.)

Storage warehouses. (Included in reports for the Transportation Census.)

Tinsmith and roofing shops. (Shops not engaged in construction work are retained in the Service Census, except those shops reporting in connection with the Manufactures Census - see Definitions of Classifications. Shops doing construction work were transferred to the Construction phase of the present Census.)

Tourist camps. (Covered in a separate report of the Business Census.)

The following table presents United States totals for 1933 for the above kinds of business, insofar as they are available.

STATISTICS FOR 1933 FOR KINDS OF BUSINESS INCLUDED IN THE SERVICE PHASE
OF THE 1933 CENSUS BUT INCLUDED IN OTHER PHASES OF THE CENSUS OF BUSINESS FOR 1935

Kind of Business	Number of Establishments	Receipts (add 000)	Number of Proprietors	Average Number of Employees	Total Pay Roll (add 000)
Cartage and trucking establishments	25,102	\$174,875	25,196	59,769	\$57,501
Advertising agencies	1,095	166,265	822	9,586	22,477
Storage warehouses	2,517	72,085	1,968	24,137	24,415
Broadcasting stations	374	55,140	184	7,543	13,292
Plumbing and heating repair shops	6,608	27,217	7,419	8,128	6,289
Delivery service	577	8,550	583	4,966	4,150
Tourist camps	5,846	8,483	7,921	2,490	1,157
Elevator service (repair)	141	1,546	145	529	644

A number of kinds of business are included in the 1935 Census of Service Establishments which were not covered by the 1933 Census. The 1935 United States totals for the more important of such additional

kinds of business are presented below.

STATISTICS FOR 1935 FOR KINDS OF BUSINESS NOT INCLUDED IN THE CENSUS OF AMERICAN BUSINESS FOR 1933					
Kind of Business	Number of Establishments	Receipts (add 000)	Number of Proprietors	Average Number of Employees	Total Pay Roll (add 000)
Printing and publishing shops (Less than \$5,000 value of product)	12,640	\$31,891	15,004	10,259	\$6,271
Saw mills and planing mills (Less than \$5,000 value of product)	9,129	14,163	10,319	15,745	4,264
Molasses, sorghum, and syrup mills	1,708	398	1,765	257	50
Cider mills and presses	404	264	451	97	41
Other industries (Less than \$5,000 value of product)	17,071	48,603	16,814	20,870	13,102
Cotton compresses	155	9,175	9	5,150	3,627
Transportation terminals (independently operated)	188	8,326	79	2,659	3,148

In view of these important changes in scope, comparisons of 1935 aggregates with 1933 aggregates are not recommended. (Detailed descriptions of changes in scope of the kinds of business classifications for which data are presented, are included in the "Definitions of Classifications" following.) However, the majority of kinds of business were canvassed on bases comparable with those of the 1933 Census and comparisons for most kinds of business are, therefore, significant. Places of amusement, such as theaters, amusement parks, dance halls, etc., and hotels and tourist camps, are covered in separate series of reports.

In drawing definite conclusions from the details of the accompanying tables, it should be borne in mind that irregularities and deficiencies in coverage are more pronounced in certain classifications than in others. Such irregularities and deficiencies in coverage are noted in detail under "Definitions of Classifications". Likewise, the current Census has been affected by incomplete coverage in some areas, occasioned by the fact that it was impossible to secure reports from a small number of establishments, due to the absence of legislation which, during regular census years, makes reporting mandatory.

AREA AND PERIOD COVERED.---The canvass covering the forty-eight States and the District of Columbia was conducted in the first eight months of 1936. The activities of establishments for the calendar year 1935 were reported. Seasonal establishments and new enterprises reported for that part of the year during which they were in active operation.

SCOPE OF THE REPORT.---The tables contained in this report present a complete summary of the data furnished by service establishments which reported to the Census. It will be found, however, that some items on which information was requested (see schedule Form 40 appended to volume), such as operating expenses, and the members of proprietors' families working regularly in the business, were omitted from the tabulations. The irregularity in the reporting of these items was so great as to impair the significance of such totals as might have been obtained. Even for some of the items for which results are shown, such as sex of employees, and number of employees and pay roll by occupational classes, it was necessary to restrict tabulations to those reports in which information furnished on these items was not obviously erroneous.

EXPLANATION OF TERMS

ESTABLISHMENTS.---Only recognized places of business are considered establishments. A place of business to be classified as a service establishment must have been primarily engaged in providing service--that is, fifty per cent or more of the revenue of the establishment must have been derived from the sale of service. If more than fifty per cent of the total operating revenue of the establishment represented receipts from the sale of merchandise, such establishment was included in the Census of Retail Trade. Each unit of a chain is considered a separate establishment. Service concessions, operated independently in connection with other businesses, are classified as separate establishments. An individual's residence was considered a place of business if a sign indicated that the occupant was engaged in a service business. Businesses showing total receipts of less than \$100 for the year are not considered establishments for purposes of the Census, and are not, therefore, included in the service tabulations. Approximately 16,000 reports were received for such businesses.

KINDS OF BUSINESS.---Ordinarily, the classification of an establishment was determined by the kind of business designation as reported. If, however, the report for an establishment disclosed that the preponderance of receipts was from an activity other than that designated, the place of business was classified according to the kind of business from which the major portion of the receipts was derived. An example is the establishment, reported as a storage garage, but showing receipts from sale of gasoline and oil in excess of receipts from automobile storage. Such place of business, regardless of its designation as a service establishment, was classified as a filling station and included in the Census of Retail Trade.

RECEIPTS.---Receipts represented total revenue of the establishment less refunds for returned merchandise and allowances. Receipts were reported in answer to the following items under Inquiry 3 of the report form:

- a. Receipts for services (Such as haircutting, shoe repairs, storage, mechanical repairs, window cleaning, etc.)
- b. (Applies only to places of amusement, covered in a separate Business Census report.)
- c. Receipts from sale of merchandise including receipts from sale of meals and from fountain (deduct returned goods and allowances)
- d. Receipts from other sources (Specify sources)
- e. Total operating receipts (sum of a, b, c. and d)

In all cases where receipt figures are given in the following tables, with the exception of the analysis of receipts table (Table 7), they represent the total of amounts reported under item e, "Total operating receipts".

PROPRIETORS.---Only those proprietors and firm members devoting the major portion of their time to the business are included. Members of the families of proprietors who were actively employed in, and who devoted the major portion of their time to the business, are not included as proprietors unless they actually owned an interest in the business. Those family members (other than proprietors) receiving a stated wage are considered employees. The inquiry on proprietorship does not, of course, apply to incorporated businesses.

EMPLOYEES.---The number of employees working during the pay period ending nearest the fifteenth of the month was reported for each of the twelve months of 1935. The average number of employees for the year (full-time and part-time combined) represents a total of the reported employment for these twelve months, divided by twelve. However, in all tables, the total of the "average number of employees" column, represents the sum of the detail of that column, rather than the true average number of employees for the table total, which would be obtained by dividing the sum of the monthly employment by twelve. This same method of treatment likewise explains the failure of sub-totals in the "average number of employees" column to agree exactly with the true averages for the respective sub-divisions.

Employees include salaried officers of corporations, other executives, office and clerical employees, salesmen, operatives, etc.

FULL-TIME EMPLOYEES.---Persons regularly engaged for work for four or more hours per day or for more than three full days per week. Employees working on a full-time basis in seasonal establishments are considered as full-time employees.

PART-TIME EMPLOYEES.---Persons employed less than four hours a day or for less than three full days per week. (Indications are that this definition of part-time employees was not closely followed in a number of instances.)

EXECUTIVES AND SALARIED CORPORATION OFFICERS.---Includes two types of employees: (a) salaried officers of corporations, such as presidents, vice presidents, secretaries and treasurers, the general auditor and other persons appointed by the Board of Directors; (b) other hired executives, such as office managers, sales managers, credit managers, and others who devote the major portion of their time to responsible administrative and supervisory duties. Data for this classification were reported for a "specific week".

OFFICE AND CLERICAL EMPLOYEES.---Includes stenographers, office secretaries, bookkeepers, auditors, accountants, clerks, etc., devoting the major portion of their time to clerical work, as distinguished from

administrative duties. Data for this classification were reported for a "specific week".

OPERATIVE EMPLOYEES.---Includes those employees who perform some physical operation which requires skill or training, such as barbers, beauty parlor operators, or shop mechanics. Data for this classification were reported for a "specific week".

SEX OF EMPLOYEES.---Represents a distribution by sex of the combined number of full-time and part-time employees on the pay roll for a "specific week".

PAY ROLL.---Pay roll represents the salaries, wages, bonuses, and commissions, paid employees (including executives and salaried corporation officers) during the year. It does not include compensation of proprietors and firm members.

SPECIFIC WEEK.---The data presented on employees by sex, and on employment and pay roll for a specific week, were reported for the week ending October 26, 1935.

DEFINITIONS OF CLASSIFICATIONS

PERSONAL SERVICES

BARBER SHOPS.---This classification includes all barber shops with the exception of those operated as a part of another business, such as a retail store or hotel. Barber shop concessions (operated independently) in other establishments are included in this classification. Barber colleges and barber shop concessions on trains and steamships are not included in the Census. The receipts reported include revenue from other services rendered in barber shops, such as shoe shining and manicuring, as well as receipts from the sale of small quantities of merchandise. Employees in these establishments include those engaged on a straight salary, and those working on a percentage or commission basis. The barber shop operating a beauty parlor as part of the same establishment, is covered by the Barber and Beauty Shop classification.

BARBER AND BEAUTY SHOPS.---Places of business which operate beauty parlors in combination with barber shops are included in this classification. As in the case of both the barber shop and the beauty parlor, receipts in some cases include revenue from other sources, mainly from the sale of small quantities of merchandise, principally cosmetics. Likewise, employees in these establishments include those working on a commission basis as well as those engaged on a straight salary.

BATHS AND MASSEURS' ESTABLISHMENTS (Turkish, etc.)---Turkish and other health baths operated as distinct establishments are included in this classification. Because many of these establishments are operated as concessions or operated by other establishments such as sanitariums and hotels, coverage of this activity is incomplete. For this reason, separate statistics are not shown in the individual State tables for this classification, but are included in the classification "Other Personal Services".

BEAUTY PARLORS.---All beauty parlors operated as separate businesses are included, but the classification does not include beauty parlors operated by department stores, women's ready-to-wear stores, or other businesses. Beauty parlors operated as concessions in retail stores are included. Schools for the instruction of beauty parlor operators are included, providing a charge is made for the services performed by the students. Revenues from the incidental sale of cosmetics and hair goods are included in total receipts. Establishments engaged essentially in retailing cosmetics, though rendering beauty parlor service as well, are included in the Census of Retail Trade.

CLEANING, DYEING, PRESSING, ALTERATION, AND REPAIR SHOPS.---This classification consists primarily of establishments engaged in pressing,

repairing, and altering clothing for the individual. The majority of the establishments included, press and repair clothing on their own premises, but seldom do their own cleaning or dyeing. Cleaning and dyeing agencies (establishments doing no cleaning or dyeing, but operated solely as points for the collection and distribution of clothing), if independently operated--that is, if not owned, either in whole or in part, by a cleaning and dyeing plant--are also included in this classification. Cleaning and dyeing agencies owned and operated by plants are included in the reports submitted for the plants in connection with the Biennial Census of Manufactures. Valet shops (the term designating establishments which in addition to the cleaning, pressing and repairing of clothing, render a hat cleaning, shoe shine, and shoe repairing service) are included in this classification. Dry cleaning and dyeing plants reporting receipts for a full year's operation during 1935 of less than \$5,000 are also included. The latter operate, for the most part, in a manner similar to the cleaning and dyeing shop, in that they deal direct with the consumer. Establishments generally known as "Tailor Shops" are included, unless engaged primarily in making clothes to order and reporting fifty per cent or more of their total receipts from the sale of such clothing--in which case they are included in the Census of Retail Trade. Hat cleaning is usually done by the general dry cleaning plant, which reports in connection with the Census of Manufactures, or by the shoe shine parlor. The few establishments engaged solely in hat cleaning are, therefore, included in the classification "Shoe Repair Shops and Shoe Shine Parlors".

FUNERAL DIRECTORS, EMBALMERS, AND CREMATORIES.---Undertaking, particularly in rural areas, is frequently reported in connection with retail furniture establishments. Every attempt was made to accurately classify those establishments which reported both undertaking and the sale of furniture, and to include as service establishments only those places of business essentially engaged in undertaking and embalming. This classification also includes crematories which in the 1933 Census were included in the classification "Other Personal Services". All revenue from the sale of caskets, burial clothing, etc., are included in service receipts.

FUR REPAIR AND STORAGE SHOPS.---This classification includes only those establishments engaged essentially in fur repairing and fur storage. The services of fur repairing and storage are performed, for the most part, by retail furriers which are included in the Retail Census. For the purposes of this Census, "furriers" are included in the Census of Retail Trade if more than fifty per cent of their total receipts are from the sale of merchandise from stock, or from the sale of fur goods made to order. In 1933, such establishments were included in the Census of Retail Trade provided one-third or more of their total receipts were from retail sales. This classification is not shown separately in the individual State tables but is included in "Other Personal Services".

LAUNDRIES (not including power laundries).---This classification includes all classes of laundries other than power laundries, which are

canvassed biennially in connection with the Census of Manufactures. The establishments covered by this classification are, for the most part, French and Chinese hand laundries and independent laundry agencies. The latter group of establishments (not owned by the power laundries) merely act as collecting and distributing agencies and do no actual laundering on their premises. Laundry agencies owned by a plant were classified in the Census of American Business for 1933 as service establishments, but have been omitted from the Business Census for 1935 since they are included in the report for the plant submitted in connection with the 1935 Census of Manufactures. Chains of agencies and cooperatively owned agencies, not owned or operated by power laundries are included in this classification. Power laundries reporting less than \$5,000 receipts for a full year's operation in 1935 are also included in this classification. Hand laundries are included irrespective of the volume of receipts if the majority of the work was done by hand without the use of power-laundry equipment.

PHOTOGRAPHIC STUDIOS.---This classification includes establishments engaged in portrait and/or commercial photography. Those establishments primarily engaged in film developing, and in the printing and finishing of photographs are not included, nor are street photographers who have no established places of business. In the larger cities, comparisons with 1933 figures are not significant because of the inclusion, for the first time, in the present Census, of the large specialized commercial photographic studios, which are engaged primarily in servicing advertising agencies, publications, and other industrial users of photography. Revenue from photography is considered to be from the sale of service and not from the sale of pictures. However, some studios--mostly the smaller establishments--report receipts from the sale of merchandise, consisting principally of picture frames.

RUG CLEANING AND REPAIRING SHOPS.---This classification includes establishments engaged primarily in the cleaning of rugs provided the receipts from such services are less than \$5,000. (Establishments with annual receipts of \$5,000 or more from the cleaning of rugs are included in the Biennial Census of Manufactures.) Many of these establishments are also engaged in the repair of rugs. Their total receipts in many cases exceed \$5,000 because the shops engaged primarily in rug repairing are not considered manufacturing establishments. Total receipts of these establishments include, aside from the receipts from service sales, some revenue from the sale of new and rewoven rugs.

SHOE REPAIR SHOPS AND SHOE SHINE PARLORS (including hat cleaning).---Establishments included in this classification are engaged principally in the repair of footwear and the shining of shoes. Shoe shine or shoe repair service conducted in connection with a retail business or with another service business is not included. Receipts for this classification include gross revenue from the sale of merchandise such as shoe laces, shoe polish, and similar articles. In the Census of American

Business for 1933, shoe shine parlors and shoe repair shops were shown separately. Because both services are frequently rendered by the same establishment, these classifications have been combined. Since hat cleaning is being done to a considerable degree in connection with shoe shine parlors, the few establishments engaged solely in performing this service, are included in this classification. (For further details on hat cleaning, see "Cleaning, Dyeing, Pressing, Alteration, and Repair Shops" under Definitions of Classifications.)

OTHER PERSONAL SERVICES.---The kinds of business comprising this classification do not warrant separate presentation because of the relative unimportance of the number of establishments and total receipts represented. This classification is not uniform in all State tables, having been amplified in some cases to include other kinds of business which could not be shown separately because of incompleteness in coverage, or because of the disclosure of the operations of individual establishments which would result. The following are some of the more important kinds of business included in this classification:

- Corset repair shops
- Costume and dress suit rental agencies
- Glove repair shops
- Hosiery repair shops
- Millinery repair shops
- Physical culture schools and gymnasiums
- Scalp treatment establishments
- Shirt repair shops
- Textile weaving shops

BUSINESS SERVICES

ADJUSTMENT AND CREDIT BUREAUS, AND COLLECTION AGENCIES.---Mercantile and consumer credit reporting bureaus and privately operated collection agencies are included in this classification. Receipts, as a rule, represent only charges for services. In addition, cooperatively organized bureaus and agencies (with the exception of adjustment, credit, and collection departments of trade associations) are included. Receipts of cooperative organizations consist for the most part of assessments to the various members, usually prorated according to the amounts of service rendered.

AUCTIONEERS' ESTABLISHMENTS (service only).---Only those establishments engaged primarily in rendering service are included in this classification. If fifty per cent or more of the receipts of an establishment were derived from the sale of its own merchandise, the establishment was included in the Census of Retail Trade. Real estate auctioneers

are included in this classification. Receipts represent charges for services rendered plus the sale of incidental merchandise. Statistics for auctioneers' establishments are not shown separately in the individual States tables but are included in the classification "Other Business Services".

BILLBOARD ADVERTISING SERVICE.---Establishments included in this classification are engaged chiefly in the preparation and presentation of poster displays (principally outdoor) on their own or rented signboards. The revenue of these establishments is derived from rentals of space on display boards and from other sources, such as fees received for the preparation of display advertisements. The receipt figures reported include amounts passed on as commissions to advertising agencies and to the various organizations engaged in the sale of billboard space. Operative employees of these establishments are engaged in the repairing and maintenance of display boards and the posting of advertisements. Usually the selling function is undertaken by a separate organization, and for this reason, few plants maintain an extensive sales force.

BLUEPRINTING AND PHOTOSTAT LABORATORIES.---Laboratories engaged principally in the reproduction of drawings, plans, maps and other copy, by blueprinting or photostating, are included in this classification. Establishments reporting fifty per cent or more of their total receipts from the sale of merchandise are included in the Census of Retail Trade.

COIN OPERATED MACHINE RENTAL AND REPAIR SERVICE.---This classification includes establishments engaged in the operation or rental and repair of coin-operated amusement or vending machines. Such machines are placed in retail stores or other establishments frequented by the public, and these stores participate in the revenues of the machine, usually on a percentage basis. In some cases the machines are leased, and the entire revenues accruing as a result of their operation by the public, revert to the lessee. Establishments which are primarily engaged in the sale of merchandise through coin-operated machines are included in the Census of Retail Trade. Establishments which are operated solely as places of amusement, maintaining a number of coin-operated machines for the use of the public, are not covered by this classification but are included in the Census of Amusement Places. While a number of reports were received for individual machines operated in retail establishments, they are not included in the Census, since they are not regarded either as establishments or concessions. Statistics for this classification are not shown separately in the individual State tables but are included in the figures for "Other Business Services".

COURT REPORTING AND PUBLIC STENOGRAPHIC AGENCIES.---This classification includes establishments providing court reporting service and general public stenographic service. Public stenographers who maintain no separate places of business but are engaged as part-time employees of business offices are not included in the Census. Some public stenographic agencies supply, in addition to stenographic service, a mailing and

telephone service. These are included in this particular classification when the greater part of their receipts are derived from the stenographic service rendered. In some cases, a mimeographing or multigraphing service is conducted as a secondary phase of the business. The coverage of this kind of business is incomplete due to the lack of a uniform understanding on the part of enumerators as to the type of activity which was to be canvassed. Statistics for this classification are not shown in the individual State tables but are included in the classification "Other Business Services",

DENTAL LABORATORIES.---This classification includes laboratories making plates, bridges, inlays, porcelain work, etc., for the dental profession. Many of the larger of these establishments were at one time taken in the Biennial Census of Manufactures. They are now, however, as in the 1933 Census, included in the Census of Business irrespective of volume of receipts, except when also engaged in the manufacture of dental equipment. The private laboratories of dentists are not included in this Census. Establishments which are engaged in the sale of dental equipment and/or supplies for the dental profession are included in the Census of Retail Trade. Receipts of dental laboratories are considered as being from the sale of service, rather than from the sale of merchandise.

DISINFECTING AND EXTERMINATING SERVICE.---Establishments primarily engaged in the extermination of insects, rodents, germs and parasites, from building, bedding, furniture and clothing are covered by this classification. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services",

DUPLICATING, ADDRESSING, MAILING, AND MAILING LIST SERVICE.---Establishments engaged principally in providing mimeographing, multigraphing, rotaprinting, multilithing, planographing, addressographing, and mailing services are included in this classification. Establishments engaged in the compilation and sale of mailing lists are also included. Printing plants frequently provide such services. (Printing plants are included in the Biennial Census of Manufactures whenever they report annual receipts in excess of \$5,000. When the receipts are less than \$5,000, they are included as service establishments under the classification "Printing and Publishing Shops".) Many of the establishments included conduct stenographic, typewriting or mailing services as minor phases of their business. Establishments engaged solely in writing copy for direct mail advertising are not included in this classification but are covered in "Other Business Services".

EMPLOYMENT AGENCIES.---This classification includes only those establishments that are privately owned and operated. Government-operated agencies and those operated in connection with schools, welfare institutions, professional associations, or trade unions are not included. Many employment agencies render other business services such as

duplicating or public stenographic service as a secondary activity.

FREIGHT FORWARDERS AND CUSTOM HOUSE BROKERS.---This classification includes establishments engaged primarily in the assembly of small shipments of freight into larger shipments (carloads, truckloads, etc.) for delivery to a single destination, or to several points on an established route. Some establishments own and operate transportation equipment (freight cars, loading apparatus, etc.). Others merely maintain service offices. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

INSURANCE CLAIM ADJUSTMENT OFFICES (independently operated).---This classification includes establishments engaged in the adjustment of claims against the various types of insurance carrier companies (fire, casualty, life, accident, etc.). Claim adjusting departments of insurance carriers are not included in this classification. Such departments are included in the carriers' reports which are made in connection with the Insurance phase of the Business Census. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

LINEN, COAT, APRON, AND OVERALL SUPPLY SERVICE.---Establishments included in this classification supply uniforms, aprons, table covers, towels, etc., to restaurants, barber shops, beauty parlors, offices, and other establishments. They collect the soiled supplies and deliver the laundered and repaired replacements as required. The establishments rendering these services usually contract with a commercial laundry for the laundering of the articles which they supply. Establishments which launder linen and apparel, in addition to performing a supply service, are not included in this classification but report in connection with the Biennial Census of Manufactures as power laundries, providing their annual receipts for laundering are more than \$5,000. They are included in this classification, however, when they report receipts from laundering of less than \$5,000 per annum. In a few cases, receipts from the sale of merchandise are reported, which represent supplies sold to customers.

PHOTO FINISHING LABORATORIES.---These laboratories are engaged primarily in the developing of films and in photoprinting and enlarging for amateur photographers. Agencies for photo finishing laboratories located in retail stores or other service establishments are not included in this classification. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

SIGN PAINTING SHOPS.---This classification includes shops engaged primarily in sign painting. Establishments engaged in office-door and window lettering, commercial poster work, and canvas lettering are also

included. Receipts of these establishments include some revenue from the sale of signs as well as from the maintenance of signs. Establishments engaged primarily in the sale of signs, paints, painters' supplies, etc., but which also do sign painting, are included in the Retail Census.

TICKET AGENTS AND BROKERS AND TRAVEL BUREAUS.---Only transportation ticket agents and brokers (including Travel Bureaus) operating independently of transportation companies are included in this classification. Theater ticket agents and brokers are included in "Other Business Services". Receipts for this kind of business represent the agents' or brokers' commissions. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

TITLE AND ABSTRACT COMPANIES.---This classification includes establishments engaged in title abstracting and title guarantee service. The 1933 Census included only abstract companies. With the addition of the Insurance phase of the Census, reports were secured for title insurance and guarantee companies. These title companies have been included in the Service rather than the Insurance phase of the Census because of the importance of the service function performed, and because it was frequently impossible to distinguish between such establishments (many title companies reported on the Service and Amusement schedule) and places of business engaged only in title abstracting. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

WINDOW CLEANING SERVICE.---Establishments in this classification are engaged in cleaning windows in office buildings, apartment houses, stores, homes, and other types of buildings. Maintenance personnel of office buildings, and individuals engaged in window cleaning, who have no established places of business, are not included.

OTHER BUSINESS SERVICES.---A large number of kinds of business for which separate data are not presented due to the relative unimportance of the number of establishments and total receipts represented in each classification, are included in this classification. The classification was amplified in the individual State tables to include other kinds of business which could not be shown separately because of incompleteness in coverage, or because of the disclosure of operations of individual establishments. The following are some of the more important kinds of business included in this classification:

- Advertising representatives
- Armored car service
- Booking agents' offices
- Bottle exchanges
- Building cleaning service
- Business brokers
- Business, financial, and statistical reporting service
- Copywriters

Cotton compresses
Detective agencies
Distributing service
Messenger service
Packing service
Press clipping service
Protective agencies
Public address systems
Stevedoring service
Theater ticket agents and brokers
Ticker service
Transportation terminals (independently operated)
Truck freight brokers' offices
Weighing service
Window display service

REPAIR SERVICES AND CUSTOM INDUSTRIES

AUTOMOTIVE REPAIRS AND SERVICES (excluding general repair garages):

AUTOMOBILE LAUNDRIES.---Establishments engaged primarily in the washing and polishing of automobiles are included in this classification. Automobile laundries reporting more than fifty per cent of their receipts from the sale of merchandise are included in the Census of Retail Trade. Automobile laundries operated in connection with automobile storage and repair garages are not included.

AUTOMOBILE PAINT SHOPS.---Includes establishments engaged essentially in automobile painting and refinishing. Many automobile top and body repair shops maintain their own paint departments. Such departments are not included in this classification but are considered as part of the top and body repair shops, which are covered by a separate classification.

AUTOMOBILE RADIATOR SHOPS.---Establishments primarily engaged in the repair of automobile radiators are included in this classification. Some of these shops also do specialized welding and minor automobile top and body repair work. In addition, many are engaged in automobile glass installation, while still others are engaged in battery recharging and ignition repairing.

AUTOMOBILE RENTAL SERVICE.---This classification covers establishments engaged in the rental of automobiles and trucks, including those renting automobiles on a "drive-it-yourself" basis. Establishments which rent specialized automotive transportation equipment such as ambulances are also included.

AUTOMOBILE STORAGE GARAGES.---The establishments covered by this classification are mainly those primarily engaged in the live-storage of automobiles. Warehouses engaged in the dead-storage of automobiles are not covered by this classification but are included in the Transportation phase of the Business Census. General repair garages and filling stations, which provide storage for automobiles as secondary activity, are included in the Retail Census. Many storage garages, in addition to the storing of cars, report receipts for numerous other services such as washing and lubricating cars, repairing brakes, axles, etc.

AUTOMOBILE TOP AND BODY REPAIR SHOPS.---Many establishments included in this classification also render other specialized automotive repair service such as upholstery repair, glass installation, and radiator repair. Ordinarily, these establishments also maintain their own automobile paint departments. Receipts for this classification include revenue from the sale of automobile parts, and from the sale of gasoline and oil. Where receipts from the sale of merchandise or from general automotive repair work exceed fifty per cent of the total receipts, the establishment is included in the Census of Retail Trade.

BATTERY AND IGNITION REPAIR SHOPS.---This classification includes establishments engaged in the rental, charging, repair, and storage of batteries, as well as those engaged in ignition repair. Many of these establishments also repair automobile radios, as a minor phase of their business. Others sell gasoline and automobile parts. Establishments reporting more than fifty per cent of their total receipts from the sale of merchandise or from general automotive repairs are included in the Census of Retail Trade.

PARKING LOTS.---Only those parking lots reporting more than fifty per cent of their total receipts from the parking facilities afforded are included in this classification. Otherwise, they are included in the Census of Retail Trade. In the 1933 Census, parking lots were considered retail establishments whenever receipts from the sale of merchandise equaled more than one-third of the total receipts. Most parking lots are engaged in selling gasoline, and in rendering such additional services as washing and lubricating automobiles.

TIRE REPAIR SHOPS.---For the purpose of the 1933 Census, tire repair shops reporting more than one-third of their total receipts from the sale of merchandise were classified as retail establishments and included in the Retail Census. For the purpose of this Census, however, such establishments are classified as retail stores only when more than fifty per cent of their total receipts are from the sale of merchandise. Many establishments engaged in tire repairing do other specialized automotive repair work, such as brake relining, battery repairing, and radiator repairing. Automobile parts, gasoline and new and used tires, comprise the principal lines of merchandise sold.

OTHER AUTOMOTIVE REPAIRS.---This classification includes establishments specializing in automobile brake repairing, relining, and adjusting, and those specializing in automobile spring, axle, and wheel repair

service. These services are also performed to some extent by general repair garages which are included in the Census of Retail Trade.

OTHER REPAIR SERVICES (except apparel and shoes):

ARMATURE REWINDING SHOPS.---Establishments included in this classification are engaged primarily in rewinding armatures and in repairing motors. Wholesalers and retailers of electrical goods (occasionally engaged in armature rewinding) are classified as armature rewinding shops providing more than fifty per cent of their total revenue is derived from this activity; otherwise, they are included in the Retail or Wholesale phase of the Census. A portion of the total receipts shown for this classification includes receipts from sale of electrical appliances and electrical parts. Statistics for this classification are shown in the United States Summary tables but are not shown separately in the individual State tables. They are included in the classification "Other Repair Services".

BICYCLE REPAIR SHOPS.---For the purpose of the 1933 Census, establishments engaged in bicycle repairing were classified as retail establishments when they reported sales of merchandise amounting to more than one-third of their total receipts. For the purpose of the present Census, establishments reporting as bicycle repair shops are not considered retail establishments unless more than fifty per cent of their total receipts are from the sale of merchandise. A number of these establishments, primarily engaged in bicycle repairing, are also engaged in repairing motorcycles and in the rental of bicycles and motorcycles. Many bicycle repair shops are also engaged in repairing baby carriages and electrical appliances. Statistics for bicycle repair shops are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

BLACKSMITH SHOPS.---While this classification includes establishments reporting blacksmithing as their principal kind of business, many of the establishments included are also actively engaged in farm implement, automobile, and general machinery repair. Some blacksmith shops, in addition to their regular business, report gasoline sales. Comparative statistics for this classification are not significant due to the fact that establishments reporting as blacksmith shops for the one Census would report under another specialized mechanical repair service designation in the other census.

ELECTRICAL APPLIANCE REPAIR SHOPS.---This classification includes mainly small shops engaged in repairing electrical appliances (washing machines, vacuum cleaners, irons, etc.). As in the 1933 Census, electrical contractors and electrical shops engaged primarily in housewiring are not included in this classification. They are, however, included in the Construction phase of the present Census. Electrical appliance repair shops reporting more than fifty per cent of their total receipts from the sale of merchandise are included in the Retail Census. The basis of classification differs from that used in 1933, in that shops

reporting more than one-third of their total receipts from the sale of merchandise were classified as retail stores in that Census. This classification does not include establishments engaged in the repair of electric or neon signs. Such establishments are covered in "Other Business Services".

HARNESS AND LEATHER GOODS REPAIR SHOPS.---Establishments included in this classification are engaged primarily in the repair of harness, saddlery, luggage and other leather goods. Some of these establishments are also engaged in the repair of boots and shoes. For the purpose of the 1933 Census, establishments engaged in harness and leather repair work were included in the Retail Census when one-third or more of their total receipts were from the sale of merchandise. Such establishments are not included in the Retail phase of the present Census unless more than fifty per cent of their total receipts are from the sale of merchandise.

LOCKSMITH AND GUNSMITH SHOPS.---The majority of the establishments included in this classification are engaged primarily in cutting keys and repairing locks. Gun repairing, in most cases, constitutes a minor activity although some establishments engaged exclusively in the repair of firearms are included. In addition to repairing locks and guns, many of the establishments included are engaged, to some extent, in repairing electrical appliances, bicycles, and radios. Locksmith and gunsmith shops reporting more than fifty per cent of their total receipts from the sale of merchandise are included in the Census of Retail Trade.

MUSICAL INSTRUMENTS REPAIR SHOPS.---Included in this classification are those establishments engaged primarily in the repair of musical instruments other than pianos and organs. Teachers of music, rendering an instrument repair service, but maintaining no establishments for this purpose, are excluded from the Census. Many of the establishments included in this classification are also engaged in selling new and second-hand musical instruments. When more than fifty per cent of the total receipts of these establishments are reported as derived from the sale of merchandise, such establishments are included in the Census of Retail Trade. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

PIANO AND ORGAN TUNING AND REPAIR SERVICE.---Only establishments primarily engaged in the tuning and repairing of pianos and organs are included in this classification. Much of this service is rendered by individuals who derive most of their revenue as teachers of these musical instruments. Such persons, unless operating from recognized places of business, are omitted from the Census. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

RADIO REPAIR SHOPS.---This classification includes those establishments engaged primarily in the repair of radios. Radio dealers and

radio repair departments of retail establishments are not included. Radio repair shops reporting more than fifty per cent of their total receipts from the sale of merchandise are included in the Census of Retail Trade. For the purpose of the 1933 Census, such establishments were included in the Retail Census when more than one-third of their total receipts were derived from the sale of merchandise. Receipts from radio repairing are also reported by many establishments classified as "Electrical Appliance Repair Shops".

REFRIGERATOR SERVICE AND REPAIR SHOPS.---This classification covers, essentially small shops engaged almost exclusively in the servicing and repairing of domestic and commercial electric refrigerators. Most of the repairs to refrigerators and commercial refrigeration units are made by repair departments of the dealers or manufacturers. Such departments are not included in this classification, except in some few instances, where operated as separate establishments. Refrigerator repair shops are included in the Census of Retail Trade, whenever receipts from merchandise sales amount to more than fifty per cent of the total receipts of the establishment. This differs from the 1933 Census in that these establishments were classified as retail stores whenever receipts from the sale of merchandise equaled one-third or more of total receipts. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

SAW AND TOOL SHARPENING AND REPAIR SHOPS.---Included in this classification are establishments engaged primarily in sharpening saws and tools--many of which render, in addition, a general repair service. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

TYPEWRITER REPAIR SHOPS.---This classification includes those establishments engaged primarily in the repair of typewriters. The repair of adding machines and various other business machines frequently constitutes an important additional activity. Establishments renting typewriters are included in this classification when receipts from such rentals do not constitute a major portion of the total receipts of the establishment. Otherwise, typewriter rental establishments are included in a separate classification under the "Miscellaneous Services" group. Total receipts of some establishments include receipts from the sale of such merchandise as reconditioned typewriters, typewriter ribbons, and other typewriter supplies. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

UPHOLSTERY AND FURNITURE REPAIR SHOPS.---Establishments included in this classification are engaged primarily in furniture upholstering and/or furniture repairing. Repair departments of retail establishments, and upholstery and furniture repair establishments reporting more than fifty per cent of their receipts from the sale of merchandise, are not

included. In 1933, such establishments were classified as retail stores when more than one-third of the total receipts represented merchandise sales. Many of the shops included in this classification manufacture some furniture.

WATCH, CLOCK, AND JEWELRY REPAIR SHOPS.---Shops reporting more than fifty per cent of their total revenue from retail sales are included in the Census of Retail Trade. This differs somewhat from the basis of classification used in 1933 when such an establishment was considered a retail store providing more than one-third of the total receipts were from the sale of merchandise. Many of the smaller watch, clock, and jewelry repair shops rendered other repair services, such as electrical appliance repairing, bicycle repairing, etc.

OTHER REPAIR SERVICES.---Included in this classification are a large number of repair shops engaged in various specialized repair services for which separate data are not presented due to the relative unimportance of the number of establishments and total receipts represented in each classification. These shops frequently sell parts and other merchandise, and when an establishment's retail sales exceed fifty per cent of the total receipts, the establishment is included in the Census of Retail Trade. This differs somewhat from the basis of classification in 1933 when such an establishment was considered a retail store provided more than one-third of the total receipts were from sales of merchandise. This classification was amplified in the individual State tables to include other kinds of business which could not be shown separately because of incompleteness in coverage, or because of the disclosure of operations of individual establishments which would result. The following are some of the more important kinds of business included in this classification:

Awning and tent repair shops	Iron repair shops
Beer pump, coil cleaning and repair service	Lawn mower repair shops
Blade, knife, and scissors repair shops	Mirror repair shops
Boat repair shops	Scale repair shops
Business machine repair shops	Sewing machine repair shops
Cash register repair shops	Stove repair shops
Cylinder grinding shops	Tool repair shops
Electric sign repair shops	Umbrella repair shops
Fountain pen repair shops	Windmill, pump, and well repair service
Implement repair shops	General repair shops

CUSTOM INDUSTRIES:

CABINETMAKING SHOPS (including woodworking).---This classification covers mainly those establishments primarily engaged in the repair of articles made from wood. Establishments manufacturing wooden articles are included when the value of products for the year is less than \$5,000.

CIDER MILLS AND PRESSES.---Cider mills and presses are included in this classification when operated either on a custom basis or when reporting a value of product of less than \$5,000. Commercially operated mills and presses reporting a value of product for the year of \$5,000 or more are included in reports of the Census of Manufactures.

GRIST MILLS.---This classification includes grist mills reporting total receipts of less than \$5,000 per annum, as well as larger mills engaged primarily in custom grinding. Such mills are not covered in the Biennial Census of Manufactures. Custom grinding is quite frequently done by feed stores which report as retail stores. Many custom grist mills are also operated in connection with blacksmith or farm implement repair shops, and such establishments are classified according to the service from which the major portion of receipts is derived. The coverage of grist mills in the 1933 Census was incomplete due to a misunderstanding on the part of enumerators as to the type of custom mills which were to be canvassed. The 1933 figures for this classification are not, therefore, comparable with the figures presented for 1935.

HEMSTITCHING, EMBROIDERING, AND BUTTONHOLING SHOPS.---Included in this classification are shops engaged in hemstitching, embroidering, and buttonholing, which sell their services direct to the consumer. Departments of retail stores doing such work are not included; nor are contract buttonholing shops. This latter group is included in the classification "Other Custom Industries". Many shops report receipts from the sale of merchandise. When such receipts are more than fifty per cent of the total receipts, the establishment is included in the Census of Retail Trade.

MACHINE SHOPS.---This classification covers small machine shops that are engaged primarily in repair services. It also includes those engaged in manufacturing when the annual value of product is less than \$5,000. (Machine shops with a value of product of more than \$5,000 are covered by the Biennial Census of Manufactures.) The machine shops of manufacturing plants or those shops operated as departments in other establishments are not included in this classification. Many machine shops render other services such as welding, blacksmithing, and in some cases automobile repairing.

MATTRESS RENOVATING AND REPAIR SHOPS.---This classification includes only those establishments which are engaged exclusively in renovating and repairing mattresses. Mattress manufacturers (covered by the Biennial Census of Manufactures), and retail dealers (included in the Retail Census), frequently render a similar service. Mattress renovating and repair shops are classified as retail establishments whenever fifty per cent or more of their total receipts are derived from the sale of merchandise.

MOLASSES, SORGHUM, AND SYRUP MILLS.---Molasses, sorghum, and syrup mills are included in this classification when operated either on a custom basis or when reporting a value of product for the year of less

than \$5,000. Commercially operated mills reporting a value of product for the year of \$5,000 or more are included in the Biennial Census of Manufactures.

PRINTING AND PUBLISHING SHOPS.---This classification includes printing and publishing establishments not reporting in connection with the Biennial Census of Manufactures, because the value of product for the year was less than \$5,000. Many of these establishments are engaged in the printing and publishing of rural newspapers. The receipts for this classification include revenue from the sale of advertising, from subscriptions, and from job printing. Establishments engaged essentially in retailing stationery, though rendering a printing service as well, are included in the Census of Retail Trade.

SAW MILLS AND PLANING MILLS.---This classification includes all saw mills and planing mills engaged primarily in custom work, as well as those commercially operated reporting a value of product for the year of less than \$5,000. Commercially operated mills reporting a value of product for the year of \$5,000 or more are included in the Biennial Census of Manufactures.

THRESHING, CORN SHELLING, HAY BALING, AND OTHER AGRICULTURAL SERVICES.---Peanut picking, hulling, harvesting, grain cutting and binding, plowing, and silo filling and cutting, and other services rendered the farmer are also among those included in this classification. Receipts for these establishments are in most cases small and employment is highly seasonal. In Florida and California, this classification includes a number of large establishments performing highly specialized and technical services. These establishments are engaged primarily in the care of orchards or in dehydrating fruits. Coverage for the classification is incomplete because of the seasonal nature of the business and the inaccessibility to the enumerator of many establishments which properly should be included as agricultural service establishments. The coverage of these kinds of business in the 1933 Census was even more incomplete due to a misunderstanding on the part of enumerators as to the types of custom businesses which were to be canvassed. The 1933 figures for this classification are not, therefore, comparable with the figures presented for 1935.

TINSMITH SHOPS.---This classification includes small shops primarily engaged in sheet metal repair work and in the manufacture of tinware, gutters, ventilators, etc., with annual receipts of less than \$5,000. Establishments reporting a value of product for the year of \$5,000 or more are covered by the Biennial Census of Manufactures provided they are not engaged primarily in construction work, such as the erection of gutters, ventilators, etc. Such establishments are included in the Construction Census. Roofing repair shops which were included with tinsmith shops in the 1933 Census are now included in the Construction Census.

WELDING SHOPS.---This classification includes shops reporting receipts of less than \$20,000. Welding shops reporting receipts in excess

of \$20,000 are included in the Biennial Census of Manufactures. Many of the shops included in this classification perform other repair services in addition to welding.

OTHER CUSTOM INDUSTRIES.---Included in this classification are various manufacturing plants reporting total receipts of less than \$5,000 per annum, as well as larger plants engaged primarily in custom work. Such establishments are not covered in the Biennial Census of Manufactures. Awning and tent manufacturing establishments are excluded from the Census of Manufactures whenever they report annual receipts of less than \$20,000; such establishments are included in this classification. Many of these establishments, in addition to manufacturing, are engaged in repair work and report total receipts in excess of \$5,000. Over fourteen hundred different kinds of manufacturing establishments are included. The most important types are:

Awning and tent manufacturers	Concrete products manufacturers
Bottling works	Cosmetics manufacturers
Bookbinding establishments	Diamond setters
Broom manufacturers	Engraving establishments
Brick manufacturers	Fur goods manufacturers
Custom butchers	Ice manufacturers
Canning establishments	Medicine manufacturers
Candy manufacturers	Plating and electro-plating establishments
Cheese manufacturers	Pattern making establishments
Chemical manufacturers	Soft drink manufacturers
Cigar manufacturers	Wine manufacturers
Contract tailor shops	

MISCELLANEOUS SERVICES

LANDSCAPE GARDENING AND TREE SURGERY SERVICE.---This classification includes establishments engaged in landscape gardening and tree surgery. Some of the establishments included show receipts from the sale of such merchandise as shrubs and plants of various kinds. An establishment, to be included in this classification, must report more than fifty per cent of its total receipts from service sales. When more than fifty per cent of the total receipts are from the sale of merchandise, the establishment is considered a nursery and omitted from the Census. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Miscellaneous Services".

LIVERY STABLES.---This classification includes establishments engaged in the rental of horse-drawn livery. Usually, such establishments also rent saddle horses. Some stables are likewise engaged in the boarding and care of privately owned saddle horses. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Miscellaneous Services". Establishments

engaged primarily in the rental of saddle horses are classified as "Riding Academies" and included in the Census of Amusement Places.

OTHER MISCELLANEOUS SERVICES.---Included in this classification are establishments which could not properly be classified in any of the other major groupings. Following are some of the more important kinds of business covered:

Art repair shops	Office equipment rental service
Automobile tag service	Phonographic recording and
Boat storage and repair service	electrical transcription
Carpet and linoleum laying	service
Check rooms	Picture framing and gilding
Commercial mounting and	service establishments
finishing service	Scaffold and ladder renting service
Designers establishments	Scavenger service establishments
Floor surfacing establishments	Taxidermists
Furniture rental establishments	Toll bridges
House moving establishments	Typewriter rental shops
	Window shade cleaning and repairing
	establishments.

GENERAL ANALYSIS

CONCENTRATION OF SERVICE ESTABLISHMENTS.---Of the 574,708 service establishments reporting to the Census, 383,556, or 67%, are accounted for by twelve kinds of business. These 383,556 establishments reported \$1,113,942,000, or 55%, of the receipts of all service establishments; 327,835, or 52%, of the total number of employees; \$256,286,000, or 45%, of the total pay roll; and 389,819, or 67%, of the total number of active proprietors and firm members of all service establishments.

The following table shows for these twelve major kinds of business, relationships between such basic items as establishments and receipts, receipts and employees, and employees and pay roll, based on totals for the United States.

RELATIONSHIPS BETWEEN NUMBER OF ESTABLISHMENTS, RECEIPTS, NUMBER OF EMPLOYEES,
AND ANNUAL PAY ROLL, FOR TWELVE MAJOR KINDS OF BUSINESS

Kind of Business	Average Receipts Per Estab- lishment	Average Receipts Per Employee*	Average Number of Employees* Per Estab- lishment	Average Annual Compensa- tion Per Employee*
Automobile storage garages	\$ 9,854	\$3,934	2.5	\$1,005
Automobile top and body repair shops	5,928	3,193	1.9	1,045
Barber shops	1,728	2,607	.7	683
Barber and beauty shops	4,718	1,826	2.6	788
Beauty parlors	2,802	2,203	1.3	747
Cleaning, dyeing, pressing, alteration, and repair shops	2,282	3,631	.6	630
Funeral directors, embalmers, and crematories	13,417	6,276	2.1	1,085
Laundries (not including power laundries)	2,500	3,340	.7	574
Photographic studios	4,653	4,105	1.1	1,085
Shoe repair shops and shoe shine parlors (including hat cleaning)	1,796	4,385	.4	650
Upholstery and furniture repair shops	2,816	4,086	.7	860
Watch, clock, and jewelry repair shops	2,081	8,593	.2	876

* Full-time and part-time employees combined.

ESTABLISHMENTS CLASSIFIED BY SIZE.---Service establishments are, for the most part, small businesses, more than half of which are operated solely by proprietors and members of their families, the volume of their receipts not justifying the employment of paid personnel. Of the total number of establishments covered by the Census, 203,078, or 35.3%, reported receipts per establishment for the year 1935, amounting to less than \$1,000, and an additional 226,834 establishments, or 39.5% of the total number, reported receipts amounting to more than \$1,000, but less than \$3,000. The 429,912 establishments each of whose receipts for 1935 were less than \$3,000, represent 75% of the total number of service establishments, but account for only \$494,935,000, or 24%, of the total receipts. While establishments in this size group account for only 141,455, or 22%, of the total number of employees, they represent 442,002, or 76%, of the total number of active proprietors and firm members of all service establishments.

In contrast to the situation for establishments reporting less than \$3,000 receipts, the 3,385 establishments, (.6% of the total number), each of which reported receipts in excess of \$50,000, account for

\$464,877,000, or 23%, of the total receipts; for 132,364, or 21%, of the total number of employees; and for 996, or .2%, of the total number of proprietors of all service establishments. It is significant to note that a large majority of the 3,385 places of business in this group are business service establishments.

The chart on the following page shows, for twelve major kinds of business, the relative importance of establishments and receipts in each of three size groups, based on totals for the United States.

MONTHLY EMPLOYMENT.---Total employment of service establishments shows a steady increase from January through October, when the peak of 678,910 employees was reached, an increase of 7% over the average for the year. Following is an index of monthly employment in all service establishments, for 1935, based on the average employment for the year:

January	92.4	July	101.9
February	92.8	August	103.7
March	94.6	September	105.7
April	96.1	October	107.0
May	97.6	November	105.2
June	99.1	December	103.9

While November shows a decline of 1.8 points from the preceding month, and December a decline of 1.3 points from November, such declines do not justify the assumption of the beginning of a definite downward trend in contrast to the upward trend apparent in the earlier months. On the contrary, this decline of three points is attributable for the most part, to the decrease in employment in several highly seasonal kinds of business, the employment in which drops off perceptibly in the last two months of the year. Agricultural services, landscape gardening, and custom saw mills, are some of the more important kinds of business that are largely responsible for the downward trend from the peak month which is indicated in the index of employment for all service establishments.

The chart on page xxx shows the fluctuation in monthly employment, based on the average number of employees for the year, for eleven of the major kinds of business which account for 53% of the total employment of all service establishments. None of these kinds of business are affected by seasonality to an appreciable extent.

With the exception of the few kinds of business whose operations are of a highly seasonal nature, the remaining kinds of business follow the same general trend indicated in the chart. Of the 72 kind of business classifications for which data are presented in Table 4, 54 classifications, which account for 89% of the total employment of all service establishments, show a generally consistent increase to the peak month which in each case occurs in the last quarter of the year. While a constant increase in employment, month by month, is not indicated in all kinds of business, a scrutiny of the monthly employment in each of the kinds of business which show a deviation from the upward trend,

SERVICE ESTABLISHMENTS CLASSIFIED ACCORDING TO SIZE BASED ON VOLUME OF RECEIPTS: 1935

Relative importance of number of establishments and of total receipts for 12 major kinds of business

discloses that such occasional falling off of employment is comparatively slight, and could hardly be regarded as a significant change in the trend.

In drawing conclusions concerning trends of employment in service establishments, it should be borne in mind that the entry of new establishments and the withdrawal of others, are factors which, while they influence the employment picture to some extent, cannot be measured from information collected in connection with the Census.

CLASSIFICATION OF EMPLOYEES BY OCCUPATIONAL GROUPS.---Inquiry 6 of the questionnaire (see Form 40 in Appendix) calls for a classification of full-time and part-time employees and their pay rolls according to the following occupational groups:

- a. Executives and salaried corporation officers
- b. Office and clerical employees (not including selling employees)
- c. Operative employees
- d. Other employees

This information was requested for the week ending October 26, 1935. (While highly seasonal businesses were requested to report instead one week of normal employment during the active season, the data compiled were restricted to establishments reporting for the week of October 26.)

Inasmuch as only 168,991, or 29.4%, of the total number of service establishments reporting in connection with the Census supplied the breakdown of employment requested, the data are presented on a "number of establishments reporting" basis, rather than on a census basis.

Table 5 presents, for the United States, employment and pay roll data for three of the four above-mentioned occupational classifications, the classification "Operative employees" having been combined with "All other employees" because of frequent inconsistencies in reporting in certain kinds of business where the line of demarcation between "Operative employees" and "Other employees" is not very distinct. The United States summary table by kinds of business is restricted to those kinds of business having a total of 1,000 or more full-time employees, businesses for which data are not presented separately being included in the "Other services" classifications. Data for part-time employees are presented only for all occupational classes combined.

While 29.4% of the total number of service establishments are represented, the size of the sample varies for each of the individual kinds of business. For this reason statistics by states are presented for only those kinds of business for which it is believed a representative sample has been secured (kinds of business for which at least 20,000 employees were reported for the specific week). The occupational classifications presented for the five kinds of business, statistics for which are shown by geographic divisions and States represent significant combinations of the four occupational groups for which data were requested.

VARIATION OF EMPLOYMENT IN SERVICE ESTABLISHMENTS: 1935

(FOR 11 MAJOR KINDS OF BUSINESS)

PERCENT OF AVERAGE

In the case of funeral directors and crematories, "Executives and salaried corporation officers" and "Office and clerical employees" are shown as a single classification, and "Operative employees" and "Other employees" are likewise combined. In the case of barber shops; beauty parlors; cleaning, dyeing, pressing, alteration, and repair shops; and shoe repair shops and shoe shine parlors--where operatives are a distinct group and where executives and office and clerical employees are decidedly infrequent--statistics are presented for "Operative employees" and for "All other employees", the latter group consisting of a combination of the three classifications "Executives and salaried corporation officers", "Office and clerical employees", and "Other employees".

Of the 301,213 full-time employees reported by service establishments supplying employment and pay roll data by occupational groups, 11,736, or 3.9%, are executives or salaried corporation officers, 29,215, or 9.7%, are office and clerical employees, and 260,262, or 86.4%, are operative employees and other employees. Executives and salaried corporation officers received weekly compensation amounting to \$655,632, or 11.5%, of the total pay roll; office and clerical employees received \$672,416, or 11.7%, of the total pay roll; and all other employees received \$4,401,326, or 76.8%, of the total pay roll.

Average salaries based on employment and pay roll data as reported for any one specific week do not, of course, take into account such factors as bonuses paid on a yearly, quarterly, or monthly basis, amounts received by operatives in the form of tips, etc.

SEX OF EMPLOYEES.---Inquiry 6 of the questionnaire also calls for a classification by sex of full-time and part-time employees combined, for the week ending October 26, 1935. This information is presented for the United States in Table 6, by kinds of business and by geographic divisions and States, for the same 168,991 establishments which reported the classification of employees by occupational groups.

Of the 398,622 employees reported by service establishments which furnished data on sex of employees, 108,668, or 27.3%, are women. Beauty parlors have the highest ratio of female employment (90.8%), hemstitching, embroidering, and buttonholing shops are second (80.5%), and court reporting and public stenographic agencies are third (69.6%). On the other hand, the employees of livery stables, saw mills and planing mills, blacksmith shops, and grist mills, as would be expected, are virtually all men (100%, 99.8%, 99.4%, and 99.1%, respectively).

Oregon, the District of Columbia, and Wisconsin show the highest ratios of female employment for service establishments (34.1%, 33.9%, and 33.3%, respectively). The States showing the lowest ratios of female employment are Alabama, Mississippi, North Carolina, and Louisiana (13.4%, 14.7%, 15.8%, and 15.9%, respectively).

ANALYSIS OF RECEIPTS.---Of the \$2,029,302,000 receipts of service establishments, \$1,970,920,000, or 97.1%, were derived from the sale of

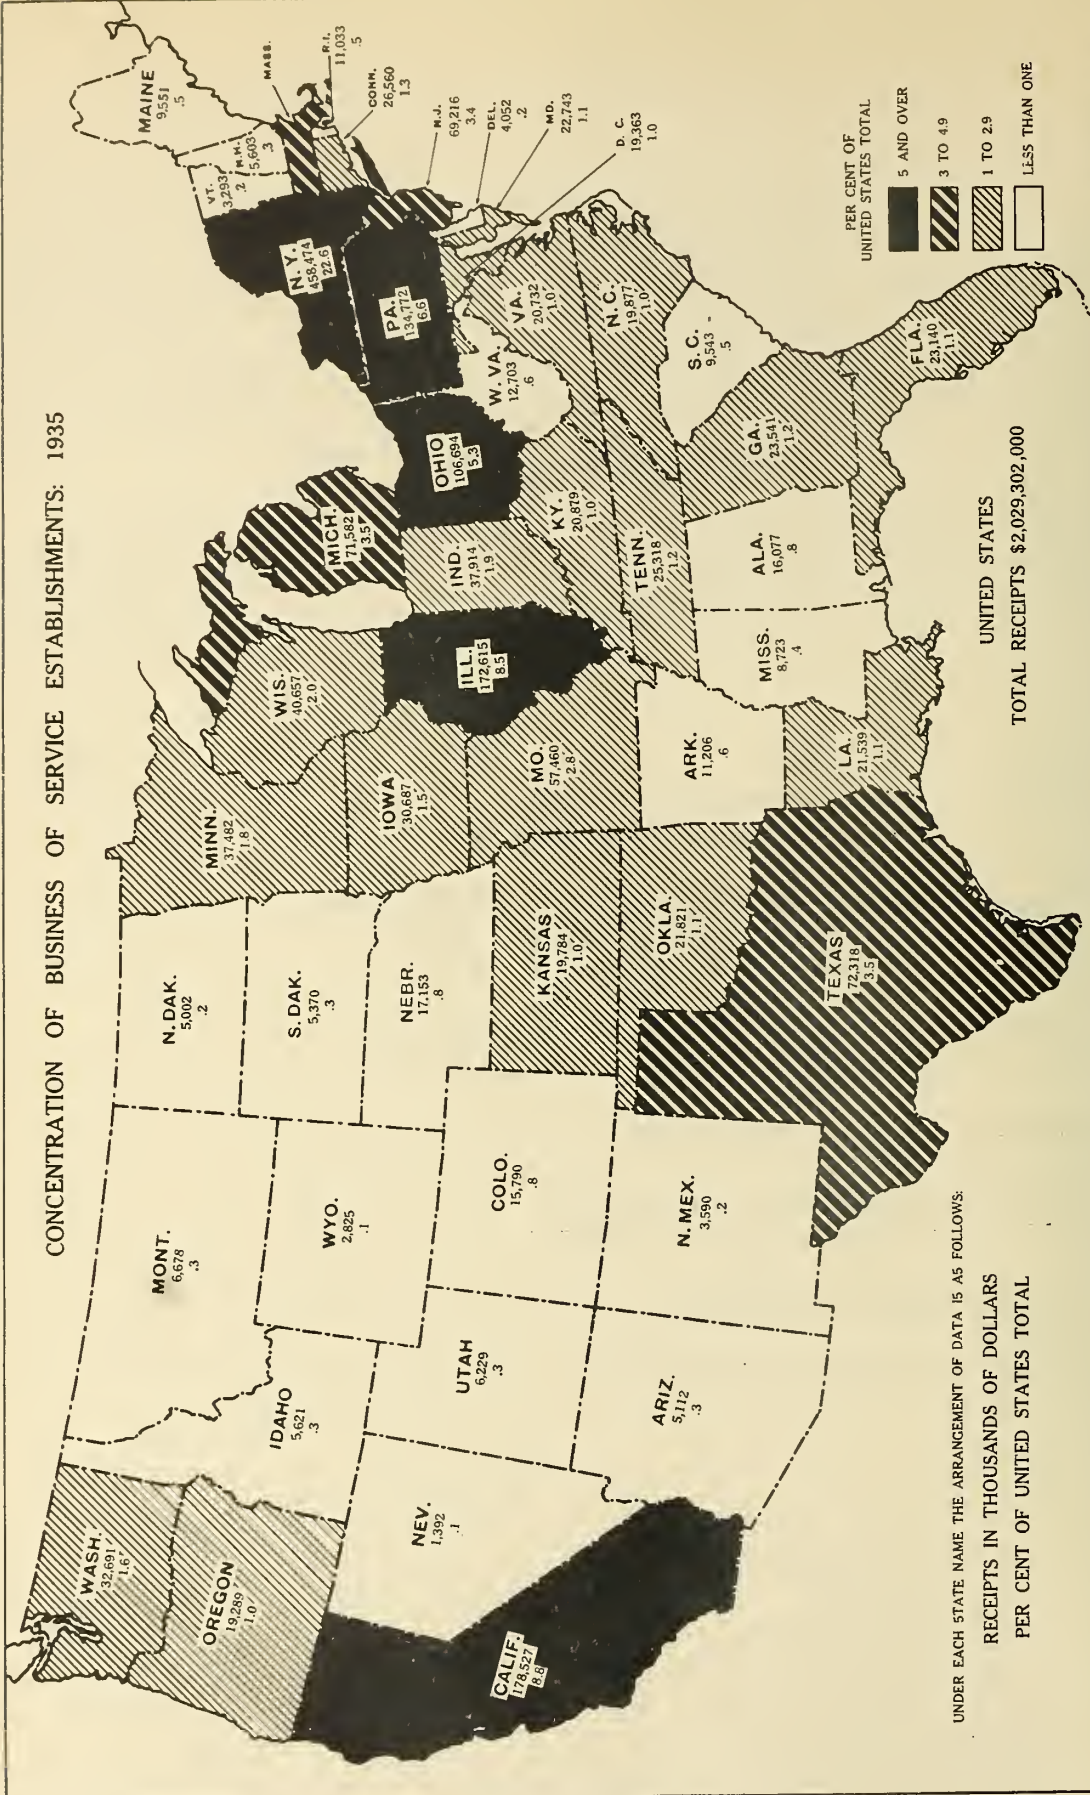

service; \$49,104,000, or 2.4%, from the sale of merchandise; and \$9,278,000, or .5%, from other sources. Receipts from the sale of merchandise are largely made up of the merchandise sales of automobile storage garages; watch, clock, and jewelry repair shops; cleaning, dyeing, pressing, alteration, and repair shops; and beauty parlors. These four kinds of business alone account for \$20,223,000, or 41.2%, of the total receipts from the sale of merchandise for all service establishments.

In order to give a more complete picture of the volume of business represented by the Service field, tables analyzing the sales of retail establishments (merchandise sales, service sales, etc.) for the United States, by kinds of business and by geographic divisions and States, are presented in the Appendix.

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential*. Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only*.

DANIEL C. ROPER, *Secretary of Commerce.*

WASHINGTON

SERVICE AND AMUSEMENT
SCHEDULE

CENSUS OF BUSINESS : 1935

SUPERVISOR'S DISTRICT
No.
State
ENUMERATION DISTRICT
No.
County
CONSECUTIVE NUMBER
OF REPORT
No.

A separate report should be prepared for each service establishment (including personal service, business service, and mechanical repair service) or place of amusement. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form. The report should cover, if possible, the full year's operation for the calendar year 1935, even if ownership has changed during the year. If more convenient, a twelve-month period ending within a month before or after December 31, 1935, may be covered.

1. DESCRIPTION OF ESTABLISHMENT:

a. NAME OF ESTABLISHMENT

b. NAME OF OWNER RACE (*not for corporations*)
(White, Negro, Oriental, other)

c. LOCATION OF ESTABLISHMENT { State County Township
Name of city, town, or village
Street and number 1
Is this street and number located within the corporate limits of the city, town, or village
named above? (*Yes or No*) 2
d. ADDRESS (HOME OFFICE OR BUSINESS ADDRESS) OF OWNER 3
e. LEGAL FORM OF ORGANIZATION { Individual proprietorship Corporation
(Place check mark in proper square) Partnership Other (*specify*) 4
f. WAS THIS ESTABLISHMENT OPERATING DURING ANY PART OF 1933? (*Yes or No*) 5
g. NUMBER OF SERVICE OR AMUSEMENT ESTABLISHMENTS OWNED BY THIS ORGANIZATION ANYWHERE IN THE
CONTINENTAL UNITED STATES (*including the establishment covered in this report*) 6
(CODE—Do not use)

2. KIND OF BUSINESS:

a. KIND OF BUSINESS 6
(Give the usual name or designation for the kind of business from which the major part of the operating receipts is derived)

EXAMPLES.—Barber shop; beauty parlor; photographic studio; shoe repair shop; employment agency; radio repair shop; watch, clock, and jewelry repair shop; automobile rental service; storage garage; motion-picture theater; motion-picture and vaudiville theater; legitimate theater; billiard parlor; bowling alley; swimming pool; etc.

b. List other business activities (*in addition to that specified under 2a*) conducted by the owner from this establishment. 7
(CODE—Do not use)

3. TOTAL OPERATING RECEIPTS:

		Key
a. Receipts for services (Such as hair cutting, shoe repairs, storage, mechanical repairs, window cleaning, etc.)	\$	E-1
b. Receipts from amusements or for the use of other recreational facilities (<i>admissions, fees, other charges</i>)	\$	E-2
c. Receipts from sale of merchandise including receipts from sale of meals and from fountain (<i>deduct returned goods and allowances</i>)	\$	E-3
d. Receipts from other sources (<i>specify sources</i>):	\$	E-4
e. TOTAL OPERATING RECEIPTS (<i>sum of a, b, c, and d</i>)	\$	{ A-1 E-5

4. OPERATING EXPENSES (not including cost of merchandise):

<p>a. Total pay roll for the year 1935 for full-time and part-time employees (salaries, wages, bonuses, and commissions) \$..... <small>(Do not include proprietor's or partners' compensation, but include that of officers of corporations)</small></p> <p>b. All other operating expenses (rent, interest, traveling expenses, advertising, overhead, and all other operating expenses except pay roll) \$.....</p> <p>c. TOTAL OPERATING EXPENSES (a plus b) \$.....</p>	<p>Key</p> <p>A-2</p> <p>B-1 E-6</p>
<p>d. How much of the total pay roll (a, above) was paid to part-time employees? \$.....</p> <p>e. Total rent for 1935 \$..... <small>(Answer question e only if establishment is located in rented premises)</small></p> <p>1. Was any part of the premises subleased, used for living quarters, or for other purposes not connected with the business reported on this form? (Yes or No)</p>	<p>Key</p> <p>A-3</p> <p>E-7</p>

5. PROPRIETORS AND FIRM MEMBERS (does not apply to corporations):

<p>a. Total number of proprietors and firm members (including those reported under 5b below)</p> <p>b. Number of proprietors and firm members devoting major portion of their time to the business.....</p> <p>c. Number of members of families of proprietors or firm members who are regularly working, full-time or part-time, in the business but to whom no stated salary is paid:</p> <p style="margin-left: 40px;">1. 18 years of age or over.....</p> <p style="margin-left: 40px;">2. Under 18 years of age.....</p>	<p>Key</p> <p>B-2</p> <p>A-4 B-3</p> <p>B-4</p> <p>B-5</p>
---	--

6. PAID EMPLOYEES AND PAY ROLLS:
(Do not include in this inquiry persons reported in inquiry 5, above)

EMPLOYMENT AND PAY ROLL DATA FOR FULL-TIME AND PART-TIME EMPLOYEES FOR ONE WEEK ONLY
(Give figures for week ending Oct. 26, 1935. For highly seasonal businesses, report instead one week of normal employment during active season)

Week covered: From, 1935, to, 1935

		Full-time		Part-time	
		Number of paid full-time employees during the week	Pay roll for the week for full-time employees (salaries, wages, bonuses, and commissions)	Number of paid part-time employees during the week	Pay roll for the week for part-time employees (salaries, wages, bonuses, and commissions)
		ITEM	Field 1	Field 2	Field 3
a. Executives and salaried corporation officers.....	C-1		\$.....		\$.....
b. Office and clerical employees (not including selling employees).....	C-2		\$.....		\$.....
c. Operative employees.....	C-3		\$.....		\$.....
d. Other employees.....	C-4		\$.....		\$.....
e. TOTAL (sum of a, b, c, and d).....	C-5		\$.....		\$.....

<p>f. How many of the total number of employees shown above (full-time and part-time combined) are.....</p> <p style="margin-left: 40px;">Males.....</p> <p style="margin-left: 40px;">Females.....</p> <p>g. How many of the total number of employees shown above (full-time and part-time combined) are Negroes?.....</p> <p>h. Total number of paid employees (full-time and part-time combined) working during the pay period ending nearest the 15th of each month of 1935:</p>	<p>Key</p> <p>B-6</p> <p>B-7</p> <p>B-8</p>

STATISTICS FOR STATES, COUNTIES, AND CITIES

JANUARY, 1937

UNITED STATES DEPARTMENT OF COMMERCE

Daniel C. Roper, Secretary

BUREAU OF THE CENSUS

William L. Austin, Director

CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician

William A. Ruff, Assistant

This is one of a series of reports on service establishments presenting the findings of the 1935 Census of Business. The statistics are based on information collected in 1936 in a field canvass, with funds provided by the Works Progress Administration.

Number of service establishments, total receipts, number of active proprietors, average number of employees for the year, and annual pay roll are presented by States, counties, and cities and places of 2,500 or more inhabitants. Table 1 presents data by States for detailed kind of business classifications. Table 2 presents by States totals for counties, cities and places of 2,500 or more inhabitants, and remainders of counties. Table 3 presents information for each city of 25,000 or more inhabitants for as many kinds of business classifications as justify separate treatment and as can be shown without disclosing the operations of individual establishments. The arrangement of cities in Table 3 is alphabetical within each State.

Reports on service establishments are prepared by Ralph C. Janoschka, Chief of the Service Division, assisted by Albert A. Eisenstat.

SERVICE ESTABLISHMENTS: 1935

--o--

GENERAL EXPLANATIONS

SCOPE OF THE CENSUS.---The Census was taken by enumerators who visited each business establishment. A separate report was secured for each place of business, even though two or more establishments were under the same ownership. The Census includes only businesses which could be readily identified by the enumerators and does not include businesses conducted from the residence of the proprietor without a sign or other means of identification.

For the purpose of the 1935 Census, service establishments are classified into four major groups: Personal Service Establishments, such as barber shops, beauty parlors, photographic studios, etc.; Business Service Establishments, such as billboard advertising businesses, dental laboratories, employment agencies, sign painting shops, and other establishments rendering a service to business; Repair Services and Custom Industries which are subdivided into three groups: (1) Automotive Repairs and Services (excluding general repair garages which are included in the Retail Census) such as automobile paint shops, automobile top and body repair shops, battery and ignition repair shops, tire repair shops, and automobile laundries, (2) Other Repair Services such as blacksmith shops, radio repair shops, and watch, clock, and jewelry repair shops, and (3) Custom Industries, such as cabinetmaking shops, grist mills, printing and publishing shops, and other custom industries and small manufacturing establishments not covered by the Census of Manufactures, since the value of product of each establishment is less than the minimum necessary to classify the place of business as a manufacturing plant. The Miscellaneous Services classification includes commercial mounting and finishing establishments, typewriter rental shops, livery stables, and other establishments which could not properly be classified in any of the three above mentioned groups. Definitions of all classifications presented in the following tables may be found on Pages vii to xxi of this report. Aside from the kind of business classifications for which data are presented, more than three thousand kinds of business were canvassed, the figures for which are included in the "Other Service" groups. The classifications shown separately represent the more important kind of business groups, as measured by volume of receipts and number of establishments.

Banks and other financial institutions, real estate agencies, insurance companies, construction companies, certain types of transportation agencies, and trade associations, are not included in the Service tabulations but are being covered in other phases of the present Census of Business. The 1935 Census of Business does not include doctors, lawyers, or dentists; power laundries or cleaning and dyeing plants; religious or charitable institutions; hospitals or sanitariums; public utilities; educational institutions; or government-operated enterprises—all of which were omitted from the Census because they are being adequately covered by other statistical series, or because of the virtual impossibility of securing accurate data regarding their activities.

As in the 1933 Census, restaurants, dairies, general repair garages, and small bakeries and ice cream manufacturers, whose value of product for the year is less than \$5,000 and who sell primarily to the consumer, are included in the Census of Retail Trade.

Following is a list of kinds of businesses which were included in the Census of Service Establishments for 1933 but which have been included in other phases of the 1935 Census of Business as indicated.

- Advertising agencies. (Covered as a separate phase of the Business Census.)
- Aviation field service. (Transferred to the Transportation phase of the 1935 Business Census.)
- Broadcasting stations. (Covered as a separate phase of the Business Census.)
- Cartage and trucking establishments. (Included in reports for the Transportation Census.)
- Delivery service. (Included in reports for the Transportation Census.)
- Electrical repair shops. (Shops primarily engaged in electric wiring and fixture installation, were transferred to the Construction Census, while those engaged primarily in appliance repairs are retained in the Census of Service Establishments.)
- Elevator service (repair). (Included in reports for the Construction Census.)
- Plant-owned laundry and dry-cleaning collecting and distributing agencies. (Are included in the reports for the plants made in connection with the 1935 Census of Manufactures. In the 1933 Census, such agencies were included in the Service Census.)
- Plumbing and heating repair shops. (Included in reports for the Construction Census.)
- Storage warehouses. (Included in reports for the Transportation Census.)
- Tinsmith and roofing shops. (Shops not engaged in construction work are retained in the Service Census, except those shops reporting in connection with the Manufactures Census - see Definitions of Classifications. Shops doing construction work were transferred to the Construction phase of the present Census.)
- Tourist camps. (Covered in a separate report of the Business Census.)

The following table presents United States totals for 1933 for the above kinds of business, insofar as they are available.

STATISTICS FOR 1933 FOR KINDS OF BUSINESS INCLUDED IN THE SERVICE PHASE OF THE 1933 CENSUS BUT INCLUDED IN OTHER PHASES OF THE CENSUS OF BUSINESS FOR 1935

	Number of Estab- lishments	Receipts (add 000)	Number of pro- prieters	Average Number of Employees	Total Pay Roll (add 000)
Cartage and trucking establishments	23,102	\$174,875	25,196	59,769	\$57,301
Advertising agencies	1,095	166,265	822	9,586	22,477
Storage warehouses	2,517	72,085	1,968	24,137	24,415
Broadcasting stations	374	55,140	184	7,543	13,292
Plumbing and heating repair shops	6,608	27,217	7,419	8,128	6,289
Delivery service	577	8,550	583	4,966	4,130
Tourist camps	5,846	8,483	7,921	2,490	1,157
Elevator service (repair)	141	1,546	145	529	644

A number of kinds of business are included in the 1935 Census of Service Establishments which were not covered by the 1933 Census. More important among such additions are the following kinds of business, the 1935 United States totals for which are presented below.

STATISTICS FOR 1935 FOR KINDS OF BUSINESS NOT INCLUDED
IN THE CENSUS OF AMERICAN BUSINESS FOR 1933

	Number of Estab- lishments	Receipts (add 000)	Number of Pro- priators	Average Number of Employees	Total Pay Roll (add 000)
Printing and publishing shops (Less than \$5,000 value of product)	12,640	\$31,891	13,004	10,259	\$6,271
Saw mills and planing mills (Less than \$5,000 value of product)	9,129	14,163	10,319	15,745	4,264
Molasses, sorghum, and syrup mills	1,708	398	1,765	257	50
Cider mills and presses	404	264	451	97	41
Other industries (Less than \$5,000 value of product)	17,071	48,603	16,814	20,870	13,102
Cotton compresses	155	9,175	9	5,150	3,627
Transportation terminals (independently operated)	188	8,326	79	2,659	3,148

In view of these important changes in scope, comparisons of 1935 aggregates with 1933 aggregates are not recommended. (Detailed descriptions of changes in scope of the kinds of business classifications for which data are presented, are included in the "Definitions of Classifications" following.) However, the majority of kinds of business were canvassed on bases comparable with those of the 1933 Census and comparisons for most kinds of business are, therefore, significant. Places of amusement, such as theatres, amusement parks, dance halls, etc., and hotels and tourist camps, will be covered in a separate series of reports.

In drawing definite conclusions from the details of the accompanying tables, it should be borne in mind that irregularities and deficiencies in coverage are more pronounced in certain classifications than in others. Such irregularities and deficiencies in coverage are noted in detail in "Definitions of Classifications". Likewise, the current Census has been affected by incomplete coverage in some areas, occasioned by the fact that it was impossible to secure reports from a small number of establishments, due to the absence of legislation which, during regular census years, makes reporting mandatory.

AREA AND PERIOD COVERED.---The canvass covering the forty-eight States and the District of Columbia was conducted in the first eight months of 1936. The activities of establishments for the calendar year 1935 were reported. Seasonal establishments and new enterprises reported for that part of the year during which they were in active operation.

EXPLANATION OF TERMS

ESTABLISHMENTS.—Only recognized places of business are considered establishments. A place of business to be classified as a service establishment must have been primarily engaged in providing service—that is, fifty per cent or more of the revenue of the establishment must have been derived from the sale of service. If more than fifty per cent of the total operating revenue of the establishment represented receipts from the sale of merchandise, such establishment was included in the Census of Retail Trade. Each unit of a chain is considered a separate establishment. Service concessions, operated independently in connection with other businesses, are classified as separate establishments. An individual's residence was considered a place of business if a sign indicated that the occupant was engaged in a service business. Reports for businesses showing total receipts of less than \$100 for the year, of which approximately sixteen thousand were received, are not considered establishments for purpose of this Census, and are, therefore, not included in the Service tabulations.

KIND OF BUSINESS.—Ordinarily, the classification of an establishment was determined by the kind of business designation as reported. If, however, the report for an establishment disclosed that the preponderance of receipts was from an activity other than that designated, the place of business was classified according to the kind of business from which the major portion of the receipts were derived. An example is the establishment, reported as a storage garage, but showing receipts from sale of gasoline and oil in excess of receipts from automobile storage. Such place of business, regardless of its designation as a service establishment, was classified as a filling station and included in the Census of Retail Trade.

RECEIPTS.—Receipts represent total revenue of the establishment less refunds for returned merchandise and allowances. Receipts were reported in answer to the following inquiries:

- a. Receipts for services (Such as hair cutting, shoe repairs, storage, mechanical repairs, window cleaning, etc.)
- b. Receipts from amusements or for the use of other recreational facilities (admissions, fees, other charges)
- c. Receipts from sale of merchandise including receipts from sale of meals and from fountain (deduct returned goods and allowances)
- d. Receipts from other sources (Specify sources)
- e. Total operating receipts (sum of a, b, c, and d)

In all cases, where receipt figures are given in the following tables, they represent the total of amounts reported under item e, "Total operating receipts (sum of a, b, c, and d)".

A subsequent report on Service Establishments will contain data analyzing receipts as classified above. Final Retail Trade reports will show receipts for services for such kinds of business as render service in addition to their retailing activities.

PROPRIETORS.—Only those proprietors and firm members devoting the major portion of their time to the business are included. Adult members of the families of

proprietors who were actively employed in, and who devoted the major portion of their time to the business, are not included as proprietors unless they actually owned an interest in the business. Those members of a family (not proprietors) receiving a stated wage were considered employees. The inquiry on proprietorship does not, of course, apply to incorporated businesses.

EMPLOYEES.—The average number of employees working during the pay period ending nearest the fifteenth of the month was reported for each of the twelve months of 1935. The average number of employees for the year (full-time and part-time combined) represents a total of the reported employment for these twelve months, divided by twelve. In drawing conclusions concerning part-time compensation, it should be remembered that part-time employment for the individual employees may vary from one hour a week to any part of a week which would not normally constitute full-time employment. Employees include salaried officers of corporations, other executives, office and clerical employees, salesmen, operatives, etc.

FULL-TIME EMPLOYEES.—Persons regularly engaged for work for four or more hours per day or for more than three full days per week. Employees working on a full-time basis in seasonal establishments are considered as full-time employees.

PART-TIME EMPLOYEES.—Persons employed less than four hours a day or for less than three full days per week.

PAY ROLL.—Total pay roll represents the salaries, wages, bonuses, and commissions, paid full-time and part-time employees (including executives and salaried corporation officers) during the year. It does not include compensation of proprietors and firm members.

DEFINITIONS OF CLASSIFICATIONS

PERSONAL SERVICES

BARBER SHOPS.—This classification includes all barber shops with the exception of those operated as a part of another business, such as a retail store or hotel. Barber shop concessions (operated independently) in other establishments are included in this classification. Barber colleges and barber shop concessions on trains and steamships are not included in the Census. The receipts reported include revenue from other services rendered in barber shops, such as shoe shining and manicuring, as well as receipts from the sale of small quantities of merchandise. Employees in these establishments include those engaged on a straight salary, and those working on a percentage or commission basis. The barber shop operating a beauty parlor as part of the same establishment, is covered by the Barber and Beauty Shop classification.

BARBER AND BEAUTY SHOPS.—Places of business which operate beauty parlors in combination with barber shops are included in this classification. As in the case of both the barber shop and the beauty parlor, receipts in some cases include revenue from other sources, mainly from the sale of small quantities of merchandise, principally cosmetics. Likewise, employees in these establishments include those working on a commission basis as well as those engaged on a straight salary.

BATHS AND MASSEURS' ESTABLISHMENTS (Turkish, etc.).—Turkish and other health baths operated as distinct establishments are included in this classification. Because many of these establishments are operated as concessions or operated by other establishments such as sanitariums and hotels, coverage of this activity is incomplete. For this reason, separate statistics are not shown in the individual State tables for this classification, but are included in the classification "Other Personal Services".

BEAUTY PARLORS.—All beauty parlors operated as separate businesses are included, but the classification does not include beauty parlors operated by department stores, women's ready-to-wear stores, or other businesses. Beauty parlors operated as concessions in retail stores are included. Schools for the instruction of beauty parlor operators are included, providing a charge is made for the services performed by the students. Revenues from the incidental sale of cosmetics and hair goods are included in total receipts. Establishments engaged essentially in retailing cosmetics, though rendering beauty parlor service as well, are included in the Census of Retail Trade.

CLEANING, DYEING, PRESSING, ALTERATION, AND REPAIR SHOPS.—This classification consists primarily of establishments engaged in pressing, repairing, and altering clothing for the individual. The majority of the establishments included, press and repair clothing on their own premises, but seldom do their own cleaning or dyeing. Cleaning and dyeing agencies (establishments doing no cleaning or dyeing, but operated solely as points for the collection and distribution of clothing), if independently operated—that is, if not owned, either in whole or in part, by a cleaning and dyeing plant—are also included in this classification. Cleaning and dyeing agencies owned and operated by plants are included in the reports submitted for the plants in connection with the Biennial Census of Manufactures. Valet shops

(the term designating establishments which in addition to the cleaning, pressing and repairing of clothing, render a hat cleaning, shoe shine, and shoe repairing service) are included in this classification. Dry cleaning and dyeing plants reporting receipts for a full year's operation during 1935 of less than \$5,000 are also included. The latter operate, for the most part, in a manner similar to the cleaning and dyeing shop, in that they deal direct with the consumer. Establishments generally known as "Tailor Shops" are included, unless engaged primarily in making clothes to order and reporting fifty per cent or more of their total receipts from the sale of such clothing--in which case they are included in the Census of Retail Trade. Hat cleaning is usually done by the general dry cleaning plant, which reports in connection with the Census of Manufactures, or by the shoe shine parlor. The few establishments engaged solely in hat cleaning are, therefore, included in the classification "Shoe Repair Shops and Shoe Shine Parlors".

FUNERAL DIRECTORS, EMBALMERS, AND CREMATORIES.---Undertaking, particularly in rural areas, is frequently reported in connection with retail furniture establishments. Every attempt was made to accurately classify those establishments which reported both undertaking and the sale of furniture, and to include as service establishments only those places of business essentially engaged in undertaking and embalming. This classification also includes crematories which in the 1933 Census were included in the classification "Other Personal Services". All revenue from the sale of caskets, burial clothing, etc., are included in service receipts.

FUR REPAIR AND STORAGE SHOPS.---This classification includes only those establishments engaged essentially in fur repairing and fur storage. The services of fur repairing and storage are performed, for the most part, by retail furriers which are included in the Retail Census. For the purposes of this Census, "furriers" are included in the Census of Retail Trade if more than fifty per cent of their total receipts are from the sale of merchandise from stock, or from the sale of fur goods made to order. In 1933, such establishments were included in the Census of Retail Trade provided one-third or more of their total receipts were from retail sales. This classification is not shown separately in the individual State tables but is included in "Other Personal Services".

LAUNDRIES (not including power laundries).---This classification includes all classes of laundries other than power laundries, which are canvassed biennially in connection with the Census of Manufactures. The establishments covered by this classification are, for the most part, French and Chinese hand laundries and independent laundry agencies. The latter group of establishments (not owned by the power laundries) merely act as collecting and distributing agencies and do no actual laundering on their premises. Laundry agencies owned by a plant were classified in the Census of American Business for 1933 as service establishments, but have been omitted from the Business Census for 1935 since they are included in the report for the plant submitted in connection with the 1935 Census of Manufactures. Chains of agencies and cooperatively owned agencies, not owned or operated by power laundries are included in this classification. Power laundries reporting less than \$5,000 receipts for a full year's operation in 1935 are also included in this classification. Hand laundries are included irrespective of the volume of receipts if the majority of the work was done by hand without the use of power-laundry equipment.

PHOTOGRAPHIC STUDIOS.---This classification includes establishments engaged in portrait and/or commercial photography. Those establishments primarily engaged in film developing, and in the printing and finishing of photographs are not included,

nor are street photographers who have no established places of business. In the larger cities, comparisons with 1933 figures are not significant because of the inclusion, for the first time, in the present Census, of the large specialized commercial photographic studios, which are engaged primarily in servicing advertising agencies, publications, and other industrial users of photography. Revenue from photography is considered to be from the sale of service and not from the sale of pictures. However, some studios--mostly the smaller establishments--report receipts from the sale of merchandise, consisting principally of picture frames.

RUG CLEANING AND REPAIRING SHOPS.---This classification includes establishments engaged primarily in the cleaning of rugs provided the receipts from such services are less than \$5,000. (Establishments with annual receipts of \$5,000 or more from the cleaning of rugs are included in the Biennial Census of Manufactures.) Many of these establishments are also engaged in the repair of rugs. Their total receipts in many cases exceed \$5,000 because the shops engaged primarily in rug repairing are not considered manufacturing establishments. Total receipts of these establishments include, aside from the receipts from service sales, some revenue from the sale of new and rewoven rugs.

SHOE REPAIR SHOPS AND SHOE SHINE PARLORS (including hat cleaning).---Establishments included in this classification are engaged principally in the repair of footwear and the shining of shoes. Shoe shine or shoe repair service conducted in connection with a retail business or with another service business is not included. Receipts for this classification include gross revenue from the sale of merchandise such as shoe laces, shoe polish, and similar articles. In the Census of American Business for 1933, shoe shine parlors and shoe repair shops were shown separately. Because both services are frequently rendered by the same establishment, these classifications have been combined. Since hat cleaning is being done to a considerable degree in connection with shoe shine parlors, the few establishments engaged solely in performing this service, are included in this classification. (For further details on hat cleaning, see "Cleaning, Dyeing, Pressing, Alteration, and Repair Shops" under Definitions of Classifications.)

OTHER PERSONAL SERVICES.---The kinds of business comprising this classification do not warrant separate presentation because of the relative unimportance of the number of establishments and total receipts represented. This classification is not uniform in all State tables, having been amplified in some cases to include other kinds of business which could not be shown separately because of incompleteness in coverage, or because of the disclosure of the operations of individual establishments which would result. The following are some of the more important kinds of business included in this classification:

- Corset repair shops
- Costume and dress suit rental agencies
- Glove repair shops
- Hosiery repair shops
- Millinery repair shops
- Physical culture schools and gymnasiums
- Scalp treatment establishments
- Shirt repair shops
- Textile weaving shops

BUSINESS SERVICES

ADJUSTMENT AND CREDIT BUREAUS, AND COLLECTION AGENCIES.---Mercantile and consumer credit reporting bureaus and privately operated collection agencies are included in this classification. Receipts, as a rule, represent only charges for services. In addition, cooperatively organized bureaus and agencies (with the exception of adjustment, credit, and collection departments of trade associations) are included. Receipts of cooperative organizations consist for the most part of assessments to the various members, usually prorated according to the amounts of service rendered.

AUCTIONEERS' ESTABLISHMENTS (service only).---Only those establishments engaged primarily in rendering service are included in this classification. If fifty per cent or more of the receipts of an establishment were derived from the sale of its own merchandise, the establishment was included in the Census of Retail Trade. Real estate auctioneers are included in this classification. Receipts represent charges for services rendered plus the sale of incidental merchandise. Statistics for auctioneers' establishments are not shown separately in the individual State tables but are included in the classification "Other Business Services".

BILLBOARD ADVERTISING SERVICE.---Establishments included in this classification are engaged chiefly in the preparation and presentation of poster displays (principally outdoor) on their own or rented signboards. The revenue of these establishments is derived from rentals of space on display boards and from other sources, such as fees received for the preparation of display advertisements. The receipt figures reported include amounts passed on as commissions to advertising agencies and to the various organizations engaged in the sale of billboard space. Operative employees of these establishments are engaged in the repairing and maintenance of display boards and the posting of advertisements. Usually the selling function is undertaken by a separate organization, and for this reason, few plants maintain an extensive sales force.

BLUEPRINTING AND PHOTOSTAT LABORATORIES.---Laboratories engaged principally in the reproduction of drawings, plans, maps and other copy, by blueprinting or photostating, are included in this classification. Establishments reporting fifty per cent or more of their total receipts from the sale of merchandise are included in the Census of Retail Trade.

COIN-OPERATED MACHINE RENTAL AND REPAIR SERVICE.---This classification includes establishments engaged in the operation or rental and repair of coin-operated amusement or vending machines. Such machines are placed in retail stores or other establishments frequented by the public, and these stores participate in the revenues of the machine, usually on a percentage basis. In some cases the machines are leased and the entire revenues accruing as a result of their operation by the public, revert to the lessee. Establishments which are primarily engaged in the sale of merchandise through coin-operated machines are included in the Census of Retail Trade. Establishments which are operated solely as places of amusement, maintaining a number of coin-operated machines for the use of the public, are not covered by this classification but are included in the Census of Amusement Places. While a number of reports were received for individual machines operated in retail establishments, they are not included in the Census, since they are not regarded either as establishments or concessions. Statistics for this classification are not shown separately in the individual State tables but are included in the figures for "Other Business Services"

COURT REPORTING AND PUBLIC STENOGRAPHIC AGENCIES.---This classification includes establishments providing court reporting service and general public stenographic service. Public stenographers who maintain no separate places of business but are engaged as part-time employees of business offices are not included in the Census. Some public stenographic agencies supply, in addition to stenographic service, a mailing and telephone service. These are included in this particular classification when the greater part of their receipts are derived from the stenographic service rendered. In some cases, a mimeographing or multigraphing service is conducted as a secondary phase of the business. The coverage of this kind of business is incomplete due to the lack of a uniform understanding on the part of enumerators as to the type of activity which was to be canvassed. Statistics for this classification are not shown in the individual State tables but are included in the classification "Other Business Services".

DENTAL LABORATORIES.---This classification includes laboratories making plates, bridges, inlays, porcelain work, etc., for the dental profession. Many of the larger of these establishments were at one time taken in the Biennial Census of Manufactures. They are now, however, as in the 1933 Census, included in the Census of Business irrespective of volume of receipts, except when also engaged in the manufacture of dental equipment. The private laboratories of dentists are not included in this Census. Establishments which are engaged in the sale of dental equipment and/or supplies for the dental profession are included in the Census of Retail Trade. Receipts of dental laboratories are considered as being from the sale of service, rather than from the sale of merchandise.

DISINFECTING AND EXTERMINATING SERVICE.---Establishments primarily engaged in the extermination of insects, rodents, germs and parasites, from building, bedding, furniture and clothing are covered by this classification. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

DUPLICATING, ADDRESSING, MAILING, AND MAILING LIST SERVICE.---Establishments engaged principally in providing mimeographing, multigraphing, rotaprinting, multilithing, planographing, addressographing, and mailing services are included in this classification. Establishments engaged in the compilation and sale of mailing lists are also included. Printing plants frequently provide such services. (Printing plants are included in the Biennial Census of Manufactures whenever they report annual receipts in excess of \$5,000. When the receipts are less than \$5,000, they are included as service establishments under the classification "Printing and Publishing Shops".) Many of the establishments included conduct stenographic, typewriting or mailing services as minor phases of their business. Establishments engaged solely in writing copy for direct mail advertising are not included in this classification but are covered in "Other Business Services".

EMPLOYMENT AGENCIES.---This classification includes only those establishments that are privately owned and operated. Government-operated agencies and those operated in connection with schools, welfare institutions, professional associations, or trade unions are not included. Many employment agencies render other business services such as duplicating or public stenographic service as a secondary activity.

FREIGHT FORWARDERS AND CUSTOM HOUSE BROKERS.---This classification includes establishments engaged primarily in the assembly of small shipments of freight into larger shipments (carloads, truckloads, etc.) for delivery to a single destination, or to several points on an established route. Some establishments own and operate transportation equipment (freight cars, loading apparatus, etc.).

Others merely maintain service offices. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

INSURANCE CLAIM ADJUSTMENT OFFICES (independently operated).---This classification includes establishments engaged in the adjustment of claims against the various types of insurance carrier companies (fire, casualty, life, accident, etc.) Claim adjusting departments of insurance carriers are not included in this classification. Such departments are included in the carriers' reports which are made in connection with the Insurance phase of the Business Census. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

LINEN, COAT, APRON, AND OVERALL SUPPLY SERVICE.---Establishments included in this classification supply uniforms, aprons, table covers, towels, etc., to restaurants, barber shops, beauty parlors, offices, and other establishments. They collect the soiled supplies and deliver the laundered and repaired replacements as required. The establishments rendering these services usually contract with a commercial laundry for the laundering of the articles which they supply. Establishments which launder linen and apparel, in addition to performing a supply service, are not included in this classification but report in connection with the Biennial Census of Manufactures as power laundries, providing their annual receipts for laundering are more than \$5,000. They are included in this classification, however, when they report receipts from laundering of less than \$5,000 per annum. In a few cases, receipts from the sale of merchandise are reported, which represent supplies sold to customers.

PHOTO FINISHING LABORATORIES.---These laboratories are engaged primarily in the developing of films and in photoprinting and enlarging for amateur photographers. Agencies for photo finishing laboratories located in retail stores or other service establishments are not included in this classification. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

SIGN PAINTING SHOPS.---This classification includes shops engaged primarily in sign painting. Establishments engaged in office-door and window lettering, commercial poster work, and canvass lettering are also included. Receipts of these establishments include some revenue from the sale of signs as well as from the maintenance of signs. Establishments engaged primarily in the sale of signs, paints, painters' supplies, etc., but which also do sign painting, are included in the Retail Census.

TICKET AGENTS AND BROKERS AND TRAVEL BUREAUS.---Only transportation ticket agents and brokers (including Travel Bureaus) operating independently of transportation companies are included in this classification. Theatre ticket agents and brokers are included in "Other Business Services". Receipts for this kind of business represent the agents' or brokers' commissions. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

TITLE AND ABSTRACT COMPANIES.---This classification includes establishments engaged in title abstracting and title guarantee service. The 1933 Census included only abstract companies. With the addition of the insurance phase of the

Census, reports were secured for title insurance and guarantee companies. These title companies have been included in the Service rather than the Insurance phase of the Census because of the importance of the service function performed, and because it was frequently impossible to distinguish between such establishments (many title companies reported on the Service and Amusement schedule) and places of business engaged only in title abstracting. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

WINDOW CLEANING SERVICE.---Establishments in this classification are engaged in cleaning windows in office buildings, apartment houses, stores, homes, and other types of buildings. Maintenance personnel of office buildings, and individuals engaged in window cleaning, who have no established places of business, are not included.

OTHER BUSINESS SERVICES.---A large number of kinds of business for which separate data are not presented due to the relative unimportance of the number of establishments and total receipts represented in each classification, are included in this classification. The classification was amplified in the individual State tables to include other kinds of business which could not be shown separately because of incompleteness in coverage, or because of the disclosure of operations of individual establishments. The following are some of the more important kinds of business included in this classification.

- Advertising representatives
- Armored car service
- Booking agents' offices
- Bottle exchanges
- Building cleaning service
- Business brokers
- Business, financial, and statistical reporting service
- Copywriters
- Cotton compresses
- Detective agencies
- Distributing service
- Messenger service
- Packing service
- Press clipping service
- Protective agencies
- Public address systems
- Stevedoring service
- Theatre ticket agents and brokers
- Ticker service
- Transportation terminals (independently operated)
- Truck freight brokers' offices
- Weighing service
- Window display

REPAIR SERVICES AND CUSTOM INDUSTRIES

AUTOMOTIVE REPAIRS AND SERVICES (excluding general repair garages):

AUTOMOBILE LAUNDRIES.---Establishments engaged primarily in the washing and polishing of automobiles are included in this classification. Automobile laundries reporting more than fifty per cent of their receipts from the sale of merchandise

are included in the Census of Retail Trade. Automobile laundries operated in connection with automobile storage and repair garages are not included.

AUTOMOBILE PAINT SHOPS.---Includes establishments engaged essentially in automobile painting and refinishing. Many automobile top and body repair shops maintain their own paint departments. Such departments are not included in this classification but are considered as part of the top and body repair shops, which are covered by a separate classification.

AUTOMOBILE RADIATOR SHOPS.---Establishments primarily engaged in the repair of automobile radiators are included in this classification. Some of these shops also do specialized welding and minor automobile top and body repair work. In addition, many are engaged in automobile glass installation, while still others are engaged in battery recharging and ignition repairing.

AUTOMOBILE RENTAL SERVICE.---This classification covers establishments engaged in the rental of automobiles and trucks, including those renting automobiles on a "drive-it-yourself" basis. Establishments which rent specialized automotive transportation equipment such as ambulances are also included.

AUTOMOBILE STORAGE GARAGES.---The establishments covered by this classification are mainly those primarily engaged in the live-storage of automobiles. Warehouses engaged in the dead-storage of automobiles are not covered by this classification but are included in the Transportation phase of the Business Census. General repair garages and filling stations, which provide storage for automobiles as a secondary activity, are included in the Retail Census. Many storage garages, in addition to the storing of cars, report receipts for numerous other services such as washing and lubricating cars, repairing brakes, axles, etc.

AUTOMOBILE TOP AND BODY REPAIR SHOPS.---Many establishments included in this classification also render other specialized automotive repair service such as upholstery repair, glass installation, and radiator repair. Ordinarily, these establishments also maintain their own automobile paint departments. Receipts for this classification include revenue from the sale of automobile parts, and from the sale of gasoline and oil. Where receipts from the sale of merchandise or from general automotive repair work exceed fifty per cent of the total receipts, the establishment is included in the Census of Retail Trade.

BATTERY AND IGNITION REPAIR SHOPS.---This classification includes establishments engaged in the rental, charging, repair, and storage of batteries, as well as those engaged in ignition repair. Many of these establishments also repair automobile radios, as a minor phase of their business. Others sell gasoline and automobile parts. Establishments reporting more than fifty per cent of their total receipts from the sale of merchandise or from general automotive repairs are included in the Census of Retail Trade.

PARKING LOTS.---Only those parking lots reporting more than fifty per cent of their total receipts from the parking facilities afforded are included in this classification. Otherwise, they are included in the Census of Retail Trade. In the 1933 Census, parking lots were considered retail establishments whenever receipts from the sale of merchandise equaled more than one-third of the total receipts. Most parking lots are engaged in selling gasoline, and in rendering such additional services as washing and lubricating automobiles.

TIRE REPAIR SHOPS.---For the purpose of the 1933 Census, tire repair shops reporting more than one-third of their total receipts from the sale of merchandise were classified as retail establishments and included in the Retail Census. For the purpose of this Census, however, such establishments are classified as retail stores only when more than fifty per cent of their total receipts are from the sale of merchandise. Many establishments engaged in tire repairing do other specialized automotive repair work, such as brake relining, battery repairing, and radiator repairing. Automobile parts, gasoline and new and used tires, comprise the principal lines of merchandise sold.

OTHER AUTOMOTIVE REPAIRS.---This classification includes establishments specializing in automobile brake repairing, relining, and adjusting, and those specializing in automobile spring, axle, and wheel repair service. These services are also performed to some extent by general repair garages which are included in the Census of Retail Trade.

OTHER REPAIR SERVICES (except apparel and shoes):

ARMATURE REWINDING SHOPS.---Establishments included in this classification are engaged primarily in rewinding armatures and in repairing motors. Wholesalers and retailers of electrical goods (occasionally engaged in armature rewinding) are classified as armature rewinding shops providing more than fifty per cent of their total revenue is derived from this activity; otherwise, they are included in the Retail or Wholesale phase of the Census. A portion of the total receipts shown for this classification includes receipts from sale of electrical appliances and electrical parts. Statistics for this classification are shown in the United States Summary tables but are not shown separately in the individual State tables. They are included in the classification "Other Repair Services".

BICYCLE REPAIR SHOPS.---For the purpose of the 1933 Census, establishments engaged in bicycle repairing were classified as retail establishments when they reported sales of merchandise amounting to more than one-third of their total receipts. For the purpose of the present Census, establishments reporting as bicycle repair shops are not considered retail establishments unless more than fifty per cent of their total receipts are from the sale of merchandise. A number of these establishments, primarily engaged in bicycle repairing, are also engaged in repairing motorcycles and in the rental of bicycles and motorcycles. Many bicycle repair shops are also engaged in repairing baby carriages and electrical appliances. Statistics for bicycle repair shops are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

BLACKSMITH SHOPS.---While this classification includes establishments reporting blacksmithing as their principal kind of business, many of the establishments included are also actively engaged in farm implement, automobile, and general machinery repair. Some blacksmith shops, in addition to their regular business, report gasoline sales. Comparative statistics for this classification are not significant due to the fact that establishments reporting as blacksmith shops for the one Census would report under another specialized mechanical repair service designation in the other census.

ELECTRICAL APPLIANCE REPAIR SHOPS.—This classification includes mainly small shops engaged in repairing electrical appliances (washing machines, vacuum cleaners, irons, etc.). As in the 1933 Census, electrical contractors and electrical shops engaged primarily in house-wiring are not included in this classification. They are, however, included in the Construction phase of the present Census. Electrical appliance repair shops reporting more than fifty per cent of their total receipts from the sale of merchandise are included in the Retail Census. The basis of classification differs from that used in 1933, in that shops reporting more than one-third of their total receipts from the sale of merchandise were classified as retail stores in that Census. This classification does not include establishments engaged in the repair of electric or neon signs. Such establishments are covered in "Other Business Services".

HARNESS AND LEATHER GOODS REPAIR SHOPS.—Establishments included in this classification are engaged primarily in the repair of harness, saddlery, luggage and other leather goods. Some of these establishments are also engaged in the repair of boots and shoes. For the purpose of the 1933 Census, establishments engaged in harness and leather repair work were included in the Retail Census when one-third or more of their total receipts were from the sale of merchandise. Such establishments are not included in the Retail phase of the present Census unless more than fifty per cent of their total receipts are from the sale of merchandise.

LOCKSMITH AND GUNSMITH SHOPS.—The majority of the establishments included in this classification are engaged primarily in cutting keys and repairing locks. Gun repairing, in most cases, constitutes a minor activity although some establishments engaged exclusively in the repair of firearms are included. In addition to repairing locks and guns, many of the establishments included are engaged, to some extent, in repairing electrical appliances, bicycles, and radios. Locksmith and gunsmith shops reporting more than fifty per cent of their total receipts from the sale of merchandise are included in the Census of Retail Trade.

MUSICAL INSTRUMENTS REPAIR SHOPS.—Included in this classification are those establishments engaged primarily in the repair of musical instruments other than pianos and organs. Teachers of music, rendering an instrument repair service, but maintaining no establishments for this purpose, are excluded from the Census. Many of the establishments included in this classification are also engaged in selling new and second-hand musical instruments. When more than fifty per cent of the total receipts of these establishments are reported as derived from the sale of merchandise, such establishments are included in the Census of Retail Trade. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

PIANO AND ORGAN TUNING AND REPAIR SERVICE.—Only establishments primarily engaged in the tuning and repairing of pianos and organs are included in this classification. Much of this service is rendered by individuals who derive most of their revenue as teachers of these musical instruments. Such persons, unless operating from recognized places of business, are omitted from the Census. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

RADIO REPAIR SHOPS.—This classification includes those establishments engaged primarily in the repair of radios. Radio dealers and radio repair departments of retail establishments are not included. Radio repair shops reporting more than fifty per cent of their total receipts from the sale of merchandise are included in the Census of Retail Trade. For the purpose of the 1933 Census, such

establishments were included in the Retail Census when more than one-third of their total receipts were derived from the sale of merchandise. Receipts from radio repairing are also reported by many establishments classified as "Electrical Appliance Repair Shops".

REFRIGERATOR SERVICE AND REPAIR SHOPS.—This classification covers, essentially small shops engaged almost exclusively in the servicing and repairing of domestic and commercial electric refrigerators. Most of the repairs to refrigerators and commercial refrigeration units are made by repair departments of the dealers or manufacturers. Such departments are not included in this classification, except in some few instances, where operated as separate establishments. Refrigerator repair shops are included in the Census of Retail Trade, whenever receipts from merchandise sales amount to more than fifty per cent of the total receipts of the establishment. This differs from the 1933 Census in that these establishments were classified as retail stores whenever receipts from the sale of merchandise equaled one-third or more of total receipts. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

SAW AND TOOL SHARPENING AND REPAIR SHOPS.—Included in this classification are establishments engaged primarily in sharpening saws and tools—many of which render, in addition, a general repair service. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

TYPEWRITER REPAIR SHOPS.—This classification includes those establishments engaged primarily in the repair of typewriters. The repair of adding machines and various other business machines frequently constitutes an important additional activity. Establishments renting typewriters are included in this classification when receipts from such rentals do not constitute a major portion of the total receipts of the establishment. Otherwise, typewriter rental establishments are included in a separate classification under the "Miscellaneous Services" group. Total receipts of some establishments include receipts from the sale of such merchandise as reconditioned typewriters, typewriter ribbons, and other typewriter supplies. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

UPHOLSTERY AND FURNITURE REPAIR SHOPS.—Establishments included in this classification are engaged primarily in furniture upholstering and/or furniture repairing. Repair departments of retail establishments, and upholstery and furniture repair establishments reporting more than fifty per cent of their receipts from the sale of merchandise, are not included. In 1933, such establishments were classified as retail stores when more than one-third of the total receipts represented merchandise sales. Many of the shops included in this classification manufacture some furniture.

WATCH, CLOCK, AND JEWELRY REPAIR SHOPS.—Shops reporting more than fifty per cent of their total revenue from retail sales are included in the Census of Retail Trade. This differs somewhat from the basis of classification used in 1933 when such an establishment was considered a retail store providing more than one-third of the total receipts were from the sale of merchandise. Many of the smaller watch, clock, and jewelry repair shops rendered other repair services, such as electrical appliance repairing, bicycle repairing, etc.

OTHER REPAIR SERVICES.---Included in this classification are a large number of repair shops engaged in various specialized repair services for which separate data are not presented due to the relative unimportance of the number of establishments and total receipts represented in each classification. These shops frequently sell parts and other merchandise, and when an establishment's retail sales exceed fifty per cent of the total receipts, the establishment is included in the Census of Retail Trade. This differs somewhat from the basis of classification in 1933 when such an establishment was considered a retail store provided more than one-third of the total receipts were from sales of merchandise. This classification was amplified in the individual State tables to include other kinds of business which could not be shown separately because of incompleteness in coverage, or because of the disclosure of operations of individual establishments which would result. The following are some of the more important kinds of business included in this classification:

Awning and tent repair shops	Iron repair shops
Beer pump, coil cleaning and repair service	Lawn mower repair shops
Blade, knife, and scissors repair shops	Mirror repair shops
Boat repair shops	Scale repair shops
Business machine repair shops	Sewing machine repair shops
Cash register repair shops	Stove repair shops
Cylinder grinding shops	Tool repair shops
Electric sign repair shops	Umbrella repair shops
Fountain pen repair shops	Windmill, pump, and well repair service
Implement repair shops	General repair shops

CUSTOM INDUSTRIES:

CABINETMAKING SHOPS (including woodworking).---This classification covers mainly those establishments primarily engaged in the repair of articles made from wood. Establishments manufacturing wooden articles are included when the value of products for the year is less than \$5,000.

CIDER MILLS AND PRESSES.---Cider mills and presses are included in this classification when operated either on a custom basis or when reporting a value of product of less than \$5,000. Commercially operated mills and presses reporting a value of product for the year of \$5,000 or more are included in reports of the Census of Manufactures.

GRIST MILLS.---This classification includes grist mills reporting total receipts of less than \$5,000 per annum, as well as larger mills engaged primarily in custom grinding. Such mills are not covered in the Biennial Census of Manufactures. Custom grinding is quite frequently done by feed stores which report as retail stores. Many custom grist mills are also operated in connection with blacksmith or farm implement repair shops, and such establishments are classified according to the service from which the major portion of receipts are derived. The coverage of grist mills in the 1933 Census was incomplete due to a misunderstanding on the part of enumerators as to the type of custom mills which were to be canvassed. The 1933 figures for this classification are not, therefore, comparable with the figures presented for 1935.

HEMSTITCHING, EMBROIDERING, AND BUTTONHOLING SHOPS.---Included in this classification are shops engaged in hemstitching, embroidering, and buttonholing, which sell their services direct to the consumer. Departments of retail stores doing such work are not included, nor are contract buttonholing shops. This latter group is included in the classification "Other Custom Industries". Many shops report receipts from the sale of merchandise. When such receipts are more than fifty per cent of the total receipts, the establishment is included in the Census of Retail Trade.

MACHINE SHOPS.---This classification covers small machine shops that are engaged primarily in repair services. It also includes those engaged in manufacturing when the annual value of product is less than \$5,000. (Machine shops with a value of product of more than \$5,000 are covered by the Biennial Census of Manufactures.) The machine shops of manufacturing plants or those shops operated as departments in other establishments are not included in this classification. Many machine shops render other services such as welding, blacksmithing, and in some cases automobile repairing.

MATTRESS RENOVATING AND REPAIR SHOPS.---This classification includes only those establishments which are engaged exclusively in renovating and repairing mattresses. Mattress manufacturers (covered by the Biennial Census of Manufactures), and retail dealers (included in the Retail Census), frequently render a similar service. Mattress renovating and repair shops are classified as retail establishments whenever fifty per cent or more of their total receipts are derived from the sale of merchandise.

MOLASSES, SORGHUM, AND SYRUP MILLS.---Molasses, sorghum, and syrup mills are included in this classification when operated either on a custom basis or when reporting a value of product for the year of less than \$5,000. Commercially operated mills reporting a value of product for the year of \$5,000 or more are included in the Biennial Census of Manufactures.

PRINTING AND PUBLISHING SHOPS.---This classification includes printing and publishing establishments not reporting in connection with the Biennial Census of Manufactures, because the value of product for the year was less than \$5,000. Many of these establishments are engaged in the printing and publishing of rural newspapers. The receipts for this classification include revenue from the sale of advertising, from subscriptions, and from job printing. Establishments engaged essentially in retailing stationery, though rendering a printing service as well, are included in the Census of Retail Trade.

SAW MILLS AND PLANING MILLS.---This classification includes all saw mills and planing mills engaged primarily in custom work, as well as those commercially operated reporting a value of product for the year of less than \$5,000. Commercially operated mills reporting a value of product for the year of \$5,000 or more are included in the Biennial Census of Manufactures.

THRESHING, CORN SHELLING, HAY BALING, AND OTHER AGRICULTURAL SERVICES.---Peanut picking, hulling, harvesting, grain cutting and binding, plowing, and silo filling and cutting, and other services rendered the farmer are also among those included in this classification. Receipts for these establishments are in most cases small and employment is highly seasonal. In Florida and California, this classification includes a number of large establishments performing highly specialized and technical services. These establishments are engaged

primarily in the care of orchards or in dehydrating fruits. Coverage for the classification is incomplete because of the seasonal nature of the business and the inaccessibility to the enumerator of many establishments which properly should be included as agricultural service establishments. The coverage of these kinds of business in the 1933 Census was even more incomplete due to a misunderstanding on the part of enumerators as to the types of custom businesses which were to be canvassed. The 1933 figures for this classification are not, therefore, comparable with the figures presented for 1935.

TINSMITH SHOPS.---This classification includes small shops primarily engaged in sheet metal repair work and in the manufacture of tinware, gutters, ventilators, etc., with annual receipts of less than \$5,000. Establishments reporting a value of product for the year of \$5,000 or more are covered by the Biennial Census of Manufactures provided they are not engaged primarily in construction work, such as the erection of gutters, ventilators, etc. Such establishments are included in the Construction Census. Roofing repair shops which were included with tinsmith shops in the 1933 Census are now included in the Construction Census.

WELDING SHOPS.---This classification includes shops reporting receipts of less than \$20,000. Welding shops reporting receipts in excess of \$20,000 are included in the Biennial Census of Manufactures. Many of the shops included in this classification perform other repair services in addition to welding.

OTHER CUSTOM INDUSTRIES.---Included in this classification are various manufacturing plants reporting total receipts of less than \$5,000 per annum, as well as larger plants engaged primarily in custom work. Such establishments are not covered in the Biennial Census of Manufactures. Awning and tent manufacturing establishments are excluded from the Census of Manufactures whenever they report annual receipts of less than \$20,000; such establishments are included in this classification. Many of these establishments, in addition to manufacturing, are engaged in repair work and report total receipts in excess of \$5,000. Over fourteen hundred different kinds of manufacturing establishments are included. The most important types are:

Awning and tent manufacturers	Concrete products manufacturers
Bottling works	Cosmetics manufacturers
Bookbinding establishments	Diamond setters
Broom manufacturers	Engraving establishments
Brick manufacturers	Fur goods manufacturers
Custom butchers	Ice manufacturers
Canning establishments	Medicine manufacturers
Candy manufacturers	Plating and electro-plating establishments
Cheese manufacturers	Pattern making establishments
Chemical manufacturers	Soft drink manufacturers
Cigar manufacturers	Wine manufacturers
Contract tailor shops	

MISCELLANEOUS SERVICES

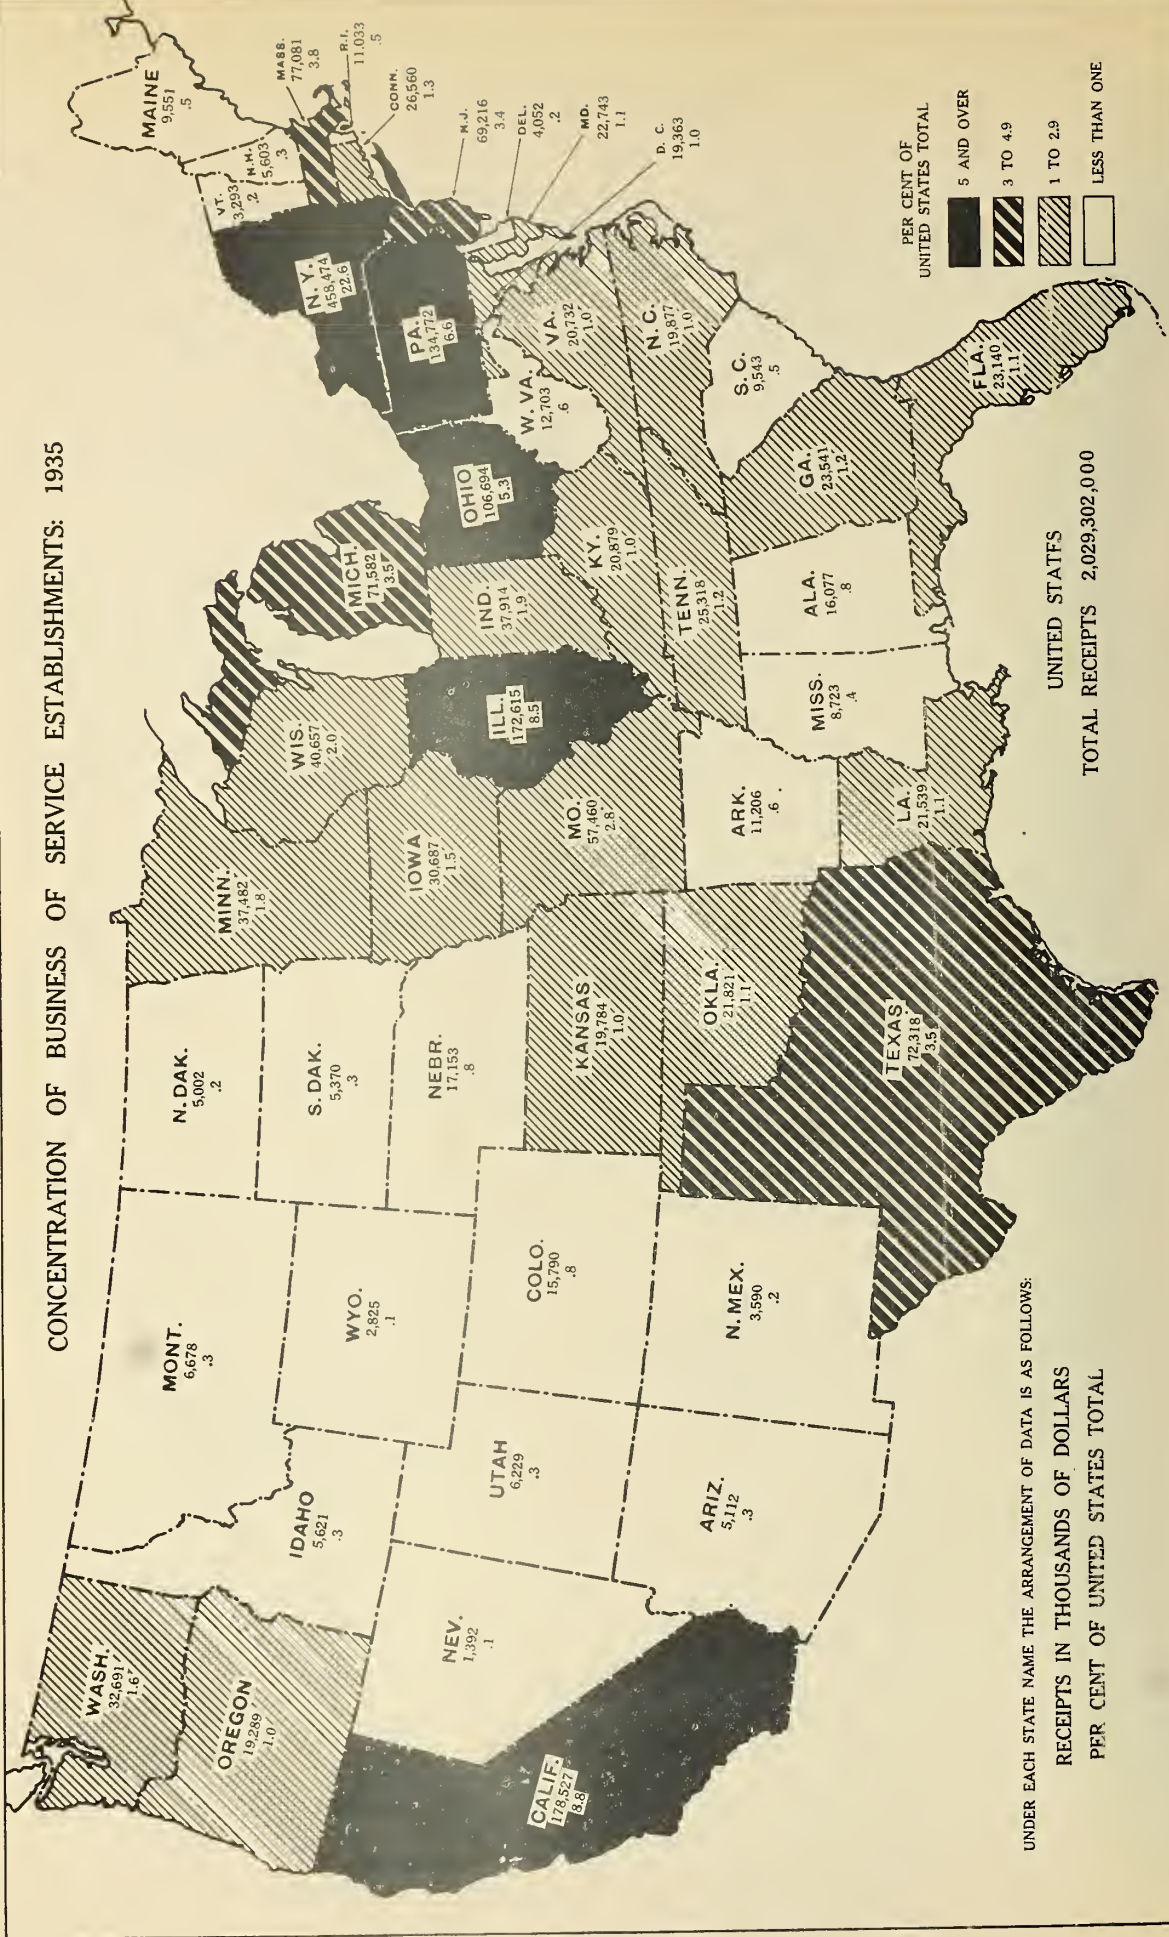

LANDSCAPE GARDENING AND TREE SURGERY SERVICE.—This classification includes establishments engaged in landscape gardening and tree surgery. Some of the establishments included show receipts from the sale of such merchandise as shrubs and plants of various kinds. An establishment, to be included in this classification, must report more than fifty per cent of its total receipts from service sales. When more than fifty per cent of the total receipts are from the sale of merchandise, the establishment is considered a nursery and omitted from the Census. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Miscellaneous Services".

LIVERY STABLES.—This classification includes establishments engaged in the rental of horse-drawn livery. Usually, such establishments also rent saddle horses. Some stables are likewise engaged in the boarding and care of privately owned saddle horses. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Miscellaneous Services". Establishments engaged primarily in the rental of saddle horses are classified as "Riding Academies" and included in the Census of Amusement Places.

OTHER MISCELLANEOUS SERVICES.—Included in this classification are establishments which could not properly be classified in any of the other major groupings. Following are some of the more important kinds of business covered:

Art repair shops	Office equipment rental service
Automobile tag service	Phonographic recording and
Boat storage and repair service	electrical transcription
Carpet and linoleum laying	service
Check rooms	Picture framing and gilding
Commercial mounting and	service establishments
finishing service	Scaffold and ladder renting service
Designers establishments	Scavenger service establishments
Floor surfacing establishments	Taxidermists
Furniture rental establishments	Toll bridges
House moving establishments	Typewriter rental shops
	Window shade cleaning and repairing
	establishments.

SECTION TWO - AREA TABLES

The remainder of this volume is comprised of two series of tables as follows:

Table 2. - Presents totals for each county and for each city of 2,500 or more inhabitants, and the remainder of each county, arranged alphabetically within each state and county.

Table 3. - Presents data, by kinds of business for each city of 25,000 or more inhabitants, arranged alphabetically by States. As many kinds of business are presented for each city as justify separate treatment and as can be shown without disclosing the operations of individual establishments.

ESTIMATED POPULATION BY STATES, JULY 1, 1930 TO JULY 1, 1936

For convenience in making certain computations and comparisons by States, there is shown below an estimate prepared by the Bureau of the Census as of July 1 of each year 1930-1936, incl.

Division and State	Census population, April 1, 1930	Estimated Population - *

*Pay roll includes no compensation for proprietors and firm members of unincorporated businesses. Number of employees includes both full-time and part-time employees (average for the year). 1/Includes custom industries, and small manufacturing plants not included in the Census of Manufactures for the reason that the value of product of each establishment is less than the minimum necessary to be classed as a manufacturing plant. 2/Less than \$500. 3/ Average less than one. 4/ Includes two miscellaneous service establishments which are not shown separately in order to avoid disclosing business of individual establishments.

*Pay roll includes no compensation for proprietors and firm members of unincorporated businesses. Number of employees includes both full-time and part-time employees (average for the year). 1/Includes custom industries, and small manufacturing plants not included in the Census of Manufactures for the reason that the value of product of each establishment is less than the minimum necessary to be classed as a manufacturing plant. 2/Less than \$500. 3/ Average less than one. 4/ Includes one miscellaneous service establishment which is not shown separately in order to avoid disclosing business of individual establishment.

*Pay roll includes no compensation for proprietors and firm members of unincorporated businesses. Number of employees includes both full-time and part-time employees (average for the year). 1/Includes custom industries, and small manufacturing plants not included in the Census of Manufactures for the reason that the value of product of each establishment is less than the minimum necessary to be classed as a manufacturing plant. 2/ Less than \$500. 3/ Average less than one.

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential*. Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only*.

DANIEL C. ROPER, *Secretary of Commerce.*

Form 40
CENSUS OF BUSINESS
Federal Works Project

**DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS
WASHINGTON**

**SERVICE AND AMUSEMENT
SCHEDULE**

CENSUS OF BUSINESS : 1935

SUPERVISOR'S DISTRICT No.
State
ENUMERATION DISTRICT No.
County
CONSECUTIVE NUMBER OF REPORT No.

A separate report should be prepared for each service establishment (including personal service, business service, and mechanical repair service) or place of amusement. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form. The report should cover, if possible, the full year's operation for the calendar year 1935, even if ownership has changed during the year. If more convenient, a five-month period ending within a month before or after December 31, 1935, may be covered.

DESCRIPTION OF ESTABLISHMENT:

a. NAME OF ESTABLISHMENT

b. NAME OF OWNER RACE (*not for corporations*)
(White, Negro, Oriental, other)

c. LOCATION OF ESTABLISHMENT { State County Township
Name of city, town, or village
Street and number
Is this street and number located within the corporate limits of the city, town, or village named above? (*Yes or No*)

d. ADDRESS (HOME OFFICE OR BUSINESS ADDRESS) OF OWNER

e. LEGAL FORM OF ORGANIZATION { Individual proprietorship Corporation
(Place check mark in proper square) Partnership Other (*specify*)

f. WAS THIS ESTABLISHMENT OPERATING DURING ANY PART OF 1933? (*Yes or No*)

g. NUMBER OF SERVICE OR AMUSEMENT ESTABLISHMENTS OWNED BY THIS ORGANIZATION ANYWHERE IN THE CONTINENTAL UNITED STATES (*including the establishment covered in this report*)

1
2
3
4
5
(CODE-Do not use)

KIND OF BUSINESS:

a. KIND OF BUSINESS
(Give the usual name or designation for the kind of business from which the major part of the operating receipts is derived)

EXAMPLES.—Barber shop; beauty parlor; photographic studio; shoe repair shop; employment agency; radio repair shop; watch, clock, and jewelry repair shop; automobile rental service; storage garage; motion-picture theater; motion-picture and vaudeville theater; legitimate theater; billiard parlor; bowling alley; swimming pool; etc.

b. List other business activities (*in addition to that specified under 2a*) conducted by the owner from this establishment.

6
7
(CODE-Do not use)

TOTAL OPERATING RECEIPTS:

a. Receipts for services (Such as hair cutting, shoe repairs, storage, mechanical repairs, window cleaning, etc.)	\$	E-1
b. Receipts from amusements or for the use of other recreational facilities (<i>admissions, fees, other charges</i>)	\$	E-2
c. Receipts from sale of merchandise including receipts from sale of meals and from fountain (<i>deduct returned goods and allowances</i>)	\$	E-3
d. Receipts from other sources (<i>specify sources</i>):		
.....	\$	E-4
.....	\$	{ A-1
TOTAL OPERATING RECEIPTS (sum of a, b, c, and d)	\$	{ E-5

4. OPERATING EXPENSES (not including cost of merchandise):

- a. Total pay roll for the year 1935 for full-time and part-time employees (salaries, wages, bonuses, and commissions) \$.....
- b. All other operating expenses (rent, interest, traveling expenses, advertising, overhead, and all other operating expenses except pay roll) \$.....
- c. TOTAL OPERATING EXPENSES (a plus b) \$.....
- d. How much of the total pay roll (a, above) was paid to part-time employees? \$.....
- e. Total rent for 1935 \$.....
- 1. Was any part of the premises subleased, used for living quarters, or for other purposes not connected with the business reported on this form? (Yes or No)

Key
A-3
E-7

Key
A-2
B-1
E-6

5. PROPRIETORS AND FIRM MEMBERS (does not apply to corporations):

- a. Total number of proprietors and firm members (including those reported under 5b below)
- b. Number of proprietors and firm members devoting major portion of their time to the business.....
- c. Number of members of families of proprietors or firm members who are regularly working, full-time or part-time, in the business but to whom no stated salary is paid:
 - 1. 18 years of age or over.....
 - 2. Under 18 years of age.....

Key
B-2
A-4
B-3
B-4
B-5

6. PAID EMPLOYEES AND PAY ROLLS: (Do not include in this inquiry persons reported in inquiry 5, above)

EMPLOYMENT AND PAY ROLL DATA FOR FULL-TIME AND PART-TIME EMPLOYEES FOR ONE WEEK ONLY
(Give figures for week ending Oct. 26, 1935. For highly seasonal businesses report instead one week of normal employment during active season)

Week covered: From, 1935, to, 1935

ITEM	Full-time		Part-time	
	Number of paid full-time employees during the week	Pay roll for the week for full-time employees (salaries, wages, bonuses, and commissions)	Number of paid part-time employees during the week	Pay roll for the week for part-time employees (salaries, wages, bonuses, and commissions)
	Field 1	Field 2	Field 3	Field 4
a. Executives and salaried corporation officers.....	C-1	\$.....		\$.....

CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician

William A. Ruff, Assistant

This is one of a series of reports on service establishments presenting the findings of the 1935 Census of Business. The statistics are based on information collected in 1936 in a field canvass, with funds provided by the Works Progress Administration.

Number of paid employees for each month of 1935, average number of employees for the year, and number of active proprietors and firm members are presented in Table 4 for States and cities of 500,000 or more inhabitants, for as many kinds of business as show an average of twenty-five or more employees in a given area. In addition these data are presented for the United States, by geographic divisions and States, separately for those kinds of business which have an average for the United States of more than 10,000 employees.

Reports on service establishments are prepared by Ralph C. Janoschka, Chief of the Service Division, assisted by Albert A. Eisenstat.

SERVICE ESTABLISHMENTS: 1935

PLAN OF PRESENTATION

- VOLUME I UNITED STATES SUMMARY—contains summary tables for the United States, by geographic divisions and States, and by kinds of business, and summary statistics for cities of 500,000 or more inhabitants. The data presented include number of establishments, total receipts, active proprietors and firm members, average number of employees for the year, and annual pay roll, employment by months, sex of employees, classification of employees according to occupational groups, and analysis of receipts. In addition, analytical tables present general statistics classified according to size of establishment based on volume of receipts.
- VOLUME II STATISTICS FOR STATES, COUNTIES, AND CITIES—presents number of establishments, total receipts, active proprietors and firm members, average number of employees for the year, and annual pay roll, by States, counties, and cities and places of 2,500 or more inhabitants. Data for States and cities of 25,000 or more inhabitants are presented by kinds of business; statistics for counties and for cities of less than 25,000 inhabitants, however, are shown only in totals for all kinds of business combined.
- VOLUME III MONTHLY EMPLOYMENT—presents number of paid employees for each month of 1935, average number of employees for the year, and number of active proprietors and firm members by kinds of business, for States and for cities of 500,000 or more inhabitants.

Census of Business Form 40 - Service and Amusement Schedule

SERVICE ESTABLISHMENTS: 1935VOLUME IIIMONTHLY EMPLOYMENT

This volume, which is one of a series on the Census of Service Establishments for 1935, presents an analysis of the data on average number of employees for the year, contained in Volumes I and II of the series. Number of employees for each month of 1935, average number of employees for the year (based on the reported monthly employment), and number of active proprietors and firm members, are presented in this volume, for the United States by kinds of business, and by geographic divisions and States, and for States and cities of 500,000 or more inhabitants, for as many kinds of business as show an average of twenty-five or more employees in a given area. In addition, data are presented for the United States, by geographic divisions and States, for each of those kinds of business which have an average for the United States of more than 10,000 employees. Summary tables for the United States by kinds of business, and by States, showing number of establishments, total receipts, active proprietors and firm members, average number of employees for the year, total pay roll, and full-time and part-time pay roll, are presented in the Appendix.

PERSONNEL.—Service establishments are, for the most part, small businesses of the proprietorship or partnership type, 55% of which have no paid employees. The employees represent little more than half the total personnel, the balance being accounted for by active proprietors and firm members. The 574,708 establishments included in the Census of Service Establishments, report a total of 580,840 active proprietors and firm members, and 634,232 employees, an average of slightly more than one proprietor and of slightly more than one employee per establishment. Barber shops, which alone account for more than a fifth of the total number of establishments, are operated, to a great extent, solely by proprietors. Similarly a large number of establishments, particularly in the personal services group, and in the repair services and custom industries group, have no paid employment.

The following table presents, by kinds of business for the United States, the number of establishments operated solely by proprietors, the number reporting employment, and the average number of employees for the year.

ESTABLISHMENTS HAVING EMPLOYMENT, AND NUMBER OF EMPLOYEES, FOR THE UNITED STATES, BY KINDS OF BUSINESS: 1935				
Kind of business	Total number of establish- ments	Number of establish- ments having no employment	Number of establish- ments having employment	Employees (full-time and part- time). Avg. for year

Threshing, corn shelling, hay baling, and other agricultural services	22,051	7,510	14,541	9,335
Tinsmith shops	2,318	1,320	998	1,407
Welding shops	3,448	1,699	1,749	3,180
Other industries	17,071	6,152	10,919	20,870
Miscellaneous services:				
Landscape gardening and tree surgery service	881	312	569	3,525
Livery stables	248	75	173	358
Other miscellaneous services	4,820	1,964	2,856	13,599

1/ Includes custom industries, and small manufacturing plants not included in the Census of Manu-
factures for the reason that the value of product of each establishment is less than the minimum
necessary to be classed as a manufacturing plant.

Establishments reporting paid employment.—While the average num-
ber of employees per establishment for the 259,632 service establishments
reporting paid employment is only 2.4, such average for individual kinds
of business ranges from .4, in "Molasses, sorghum, and syrup mills", to
16.9 in "Other business services". Those kinds of business averaging two
or more employees, while they account for 63% of the total employment of
all service establishments, represent only 40% of the total number of
establishments reporting paid employment. An analysis of the "Business
service" group, where the average number of employees per establishment
is particularly high (8.4), discloses that only 20,715 of the 259,632
service establishments reporting paid employment, or slightly less than
8%, come within this group. It is significant, however, that this rela-
tively small number of establishments account for 174,526 employees, or
nearly 28% of all paid employment.

Personnel other than paid employees and proprietors.—In addition
to proprietors and paid employees, members of proprietors' families who
are regularly working in the business, but to whom no stated salaries
are paid, contribute to the personnel structure of service establishments
to an extent which cannot be accurately determined from the information

collected in connection with the Census. While data on this subject were called for on the schedule (see Inquiry 5, item c, Form 40 in Appendix), because of frequent misinterpretation of this item and consequent error, the results are not presented.

TRENDS OF EMPLOYMENT DURING 1935.—Total employment of service establishments shows a steady increase from January through October, when the peak of 678,910 employees was reached, an increase of 7% over the average for the year. Following is an index of monthly employment in service establishments, for 1935, based on the average employment for the year:

January	92.4	July	101.9
February	92.8	August	103.7
March	94.6	September	105.7
April	96.1	October	107.0
May	97.6	November	105.2
June	99.1	December	103.9

While November shows a decline of 1.8 points from the preceding month, and December a decline of 1.3 points from November, such declines do not justify the assumption of the beginning of a definite downward trend in contrast to the upward trend apparent in the earlier months. On the contrary, this decline of three points is attributable for the most part, to the decrease in employment in several highly seasonal kinds of business, the employment in which drops off perceptibly in the last two months of the year. Agricultural services, landscape gardening, and custom saw mills, are some of the more important kinds of business that are largely responsible for the downward trend from the peak month, as indicated in the index of employment for all service establishments.

The following table presents indices of monthly employment, based on the average employment for the year, for eleven of the major kinds of business, which account for 53% of the total employment of all service establishments. None of these kinds of business are affected by seasonality to an appreciable extent.

	INDICES OF MONTHLY EMPLOYMENT: 1935											
	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Barber shops	96.4	96.7	97.5	98.6	99.6	100.7	100.6	101.1	101.6	102.4	102.2	102.6
Barber and beauty shops	96.1	96.3	96.8	98.3	98.8	99.9	101.1	101.6	102.1	102.6	102.9	103.5
Beauty parlors	92.0	92.2	93.9	97.2	99.3	101.4	101.1	101.0	102.7	105.0	106.2	108.0
Cleaning, dyeing, pressing, alteration, and repair shops	92.3	91.9	94.5	97.5	99.0	99.4	99.7	100.8	104.6	107.4	106.7	106.2
Funeral directors, embalmers, and crematories	98.9	99.0	99.6	98.9	99.4	99.1	99.7	99.7	100.7	101.8	101.3	101.9
Laundries (not including power laundries)	95.3	95.4	95.8	97.0	98.2	99.5	101.2	102.6	102.5	103.6	104.1	104.7
Photographic studios	93.3	93.5	94.9	96.7	99.6	100.3	98.8	99.1	100.8	104.4	107.1	111.5
Shoe repair shops and shoe shine parlors (including hat cleaning)	95.3	95.4	96.4	98.2	99.2	100.0	100.2	100.8	103.6	104.5	103.6	102.8
Adjustment and credit bureaus, and collection agencies	97.2	97.3	98.2	98.5	98.7	99.3	100.4	100.8	101.6	102.9	102.3	102.7
Automobile storage garages	97.4	97.7	97.9	98.1	98.9	99.0	99.2	99.5	100.9	102.8	103.8	104.7
Automobile top and body repair shops	92.0	93.1	95.2	97.7	100.6	101.7	103.1	103.3	103.9	104.3	102.9	102.1

With the exception of the few kinds of business whose operations are of a highly seasonal nature, the remaining kinds of business follow the same general trends indicated in the above table. Of the 72 kind of business classifications for which data are presented in Table 4 (see page 1), 54 classifications, which account for 89% of the total employment of all service establishments, show a generally consistent increase to the peak month which in each case occurs in the last quarter of the year. While a constant increase in employment, month by month, is not indicated in all kinds of business, a scrutiny of the monthly employment in each of the kinds of business which show a deviation from the upward trend, discloses that such occasional falling off of employment is comparatively slight, and could hardly be regarded as a significant change in the trend.

In drawing conclusions concerning trends of employment in service establishments, it should be borne in mind that the entry of new establishments and the withdrawal of others, are factors which, while they influence the employment picture to some extent, cannot be measured from information collected in connection with the Census.

GENERAL EXPLANATIONS

SCOPE OF THE CENSUS.—The Census was taken by enumerators who visited each business establishment. A separate report was secured for each place of business, even though two or more establishments were under the same ownership. The Census includes only businesses which could be readily identified by the enumerators and does not include businesses conducted from the residence of the proprietor without a sign or other means of identification.

For the purpose of the 1935 Census, service establishments are classified into four major groups: Personal Service Establishments such as barber shops, beauty parlors, photographic studios, etc.; Business Service Establishments, such as billboard advertising businesses, dental laboratories, employment agencies, sign painting shops, and other establishments rendering a service to business; Repair Services and Custom Industries which are subdivided into three groups: (1) Automotive Repairs and Services (excluding general repair garages, which are included in the Retail Census) such as automobile paint shops, automobile top and body repair shops, battery and ignition repair shops, tire repair shops, and automobile laundries, (2) Other Repair Services such as blacksmith shops, radio repair shops, and watch, clock, and jewelry repair shops, and (3) Custom Industries, such as cabinetmaking shops, grist mills, printing and publishing shops, and other custom industries and small manufacturing establishments not covered by the Census of Manufactures, since the value of product of each establishment is less than the minimum necessary to classify the place of business as a manufacturing plant. The Miscellaneous Services classification includes commercial mounting and finishing establishments, typewriter rental shops, livery stables, and other establishments which could not properly be classified in any of the three above-mentioned groups. Definitions of all classifications presented in the following tables may be found on Pages xiii to xxx of this report. Aside from the kind of business classifications for which data are presented, more than three thousand kinds of business were canvassed, the figures for which are included in the "Other Service" groups. The classifications shown separately represent the more important kind of business groups, as measured by volume of receipts and number of establishments.

Banks and other financial institutions, real estate agencies, insurance companies, construction companies, certain types of transportation agencies, and trade associations, are not included in the Service tabulations but are being covered in other phases of the present Census of Business. The 1935 Census of Business does not include doctors, lawyers, or dentists; power laundries or cleaning and dyeing plants; religious or charitable institutions; hospitals or sanitariums; public utilities; educational institutions; or government-operated enterprises—all of which were omitted from the Census because they are being adequately covered by other statistical series, or because of the virtual impossibility of securing accurate data regarding their activities.

As in the 1933 Census, restaurants, dairies, general repair garages, and small bakeries and ice cream manufacturers, whose value of product for the year is less than \$5,000 and who sell primarily to the consumer, are included in the Census of Retail Trade.

Following is a list of kinds of businesses which were included in the Census of Service Establishments for 1933 but which have been included in other phases of the 1935 Census of Business as indicated:

- Advertising agencies. (Covered as a separate phase of the Business Census.)
- Aviation field service. (Transferred to the Transportation phase of the 1935 Business Census.)
- Broadcasting stations. (Covered as a separate phase of the Business Census.)
- Cartage and trucking establishments. (Included in reports for the Transportation Census.)
- Delivery service. (Included in reports for the Transportation Census.)
- Electrical repair shops. (Shops primarily engaged in electric wiring and fixture installation were transferred to the Construction Census, while those engaged primarily in appliance repairs are retained in the Census of Service Establishments.)
- Elevator service (repair). (Included in reports for the Construction Census.)
- Plant-owned laundry and dry-cleaning collecting and distributing agencies. (Are included in the reports for the plants made in connection with the 1935 Census of Manufactures. In the 1933 Census, such agencies were included in the Service Census.)
- Plumbing and heating repair shops. (Included in reports for the Construction Census.)
- Storage warehouses. (Included in reports for the Transportation Census.)
- Tinsmith and roofing shops. (Shops not engaged in construction work are retained in the Service Census, except those shops reporting in connection with the Manufactures Census - see Definitions of Classifications. Shops doing construction work were transferred to the Construction phase of the present Census.)
- Tourist camps. (Covered in a separate report of the Business Census.)

No separate statistics were compiled in connection with the 1933 Census for Aviation Field Service, Electrical Repair Shops, Plant-owned Laundry and Dry-cleaning Collecting and Distributing Agencies, and Tinsmith and Roofing Shops. The eight remaining kinds of business, however, represented, in 1933, 40,260 establishments, 44,238 proprietors, and an average of 117,148 employees.

Following are the more important kinds of business included in the 1935 Census of Service Establishments which were not covered by the 1933 Census:

- Printing and publishing shops (Less than \$5,000 value of product)
- Saw mills and planing mills (Less than \$5,000 value of product)
- Molasses, sorghum, and syrup mills
- Cider mills and presses
- Other industries (Less than \$5,000 value of product)
- Cotton compresses
- Transportation terminals (independently operated)

These seven kinds of business, included for the first time in the Census of Service Establishments, represent 41,295 establishments, 42,441 proprietors, and an average of 55,037 employees.

In view of these important changes in scope, comparisons of 1935 aggregates with 1933 aggregates are not recommended. (Detailed descriptions of changes in scope of the kinds of business classifications for which data are presented, are included in the "Definitions of Classifications" following.) However, the majority of kinds of business were canvassed on bases comparable with those of the 1933 Census and comparisons for most kinds of business are, therefore, significant. Places of amusement, such as theaters, amusement parks, dance halls, etc., and hotels and tourist camps, will be covered in a separate series of reports.

In drawing definite conclusions from the details of the accompanying tables, it should be borne in mind that irregularities and deficiencies in coverage are more pronounced in certain classifications than in others. Such irregularities and deficiencies in coverage are noted in detail in "Definitions of Classifications". Likewise, the current Census has been affected by incomplete coverage in some areas, occasioned by the fact that it was impossible to secure reports from a small number of establishments, due to the absence of legislation which, during regular census years, makes reporting mandatory.

AREA AND PERIOD COVERED.—The canvass covering the forty-eight States and the District of Columbia was conducted in the first eight months of 1936. The activities of establishments for the calendar year 1935 were reported. Seasonal establishments and new enterprises reported for that part of the year during which they were in active operation.

EXPLANATION OF TERMS

ESTABLISHMENTS.---Only recognized places of business are considered establishments. A place of business to be classified as a service establishment must have been primarily engaged in providing service--that is, fifty per cent or more of the revenue of the establishment must have been derived from the sale of service. If more than fifty per cent of the total operating revenue of the establishment represented receipts from the sale of merchandise, such establishment was included in the Census of Retail Trade. Each unit of a chain is considered a separate establishment. Service concessions, operated independently in connection with other businesses, are classified as separate establishments. An individual's residence was considered a place of business if a sign indicated that the occupant was engaged in a service business. Businesses showing total receipts of less than \$100 for the year are not considered establishments for purposes of the Census, and are not, therefore, included in the service tabulations. Approximately 16,000 reports were received for such businesses.

KIND OF BUSINESS.---Ordinarily, the classification of an establishment was determined by the kind of business designation as reported. If, however, the report for an establishment disclosed that the preponderance of receipts was from an activity other than that designated, the place of business was classified according to the kind of business from which the major portion of the receipts was derived. An example is the establishment, reported as a storage garage, but showing receipts from sale of gasoline and oil in excess of receipts from automobile storage. Such place of business, regardless of its designation as a service establishment, was classified as a filling station and included in the Census of Retail Trade.

PROPRIETORS.---Only those proprietors and firm members devoting the major portion of their time to the business are included. Adult members of the families of proprietors who were actively employed in, and who devoted the major portion of their time to the business, are not included as proprietors unless they actually owned an interest in the business. Those members of a family (not proprietors) receiving a stated wage were considered employees. The inquiry on proprietorship does not, of course, apply to incorporated businesses.

Employees include salaried officers of corporations, other executives, office and clerical employees, salesmen, operatives, etc.

EMPLOYEES.---The number of employees working during the pay period ending nearest the fifteenth of the month was reported for each of the twelve months of 1935. The average number of employees for the year (full-time and part-time combined) represents a total of the reported employment for these twelve months, divided by twelve. However, in all tables, the total of the "average number of employees" column, represents the sum of the detail of that column, rather than the true average number of employees for the table total, which would be obtained by

dividing the sum of the monthly employment by twelve. This same method of treatment likewise explains the failure of sub-totals in the "average number of employees" column to agree exactly with the true averages for the respective sub-divisions.

FULL-TIME EMPLOYEES.---Persons regularly engaged for work for four or more hours per day or for more than three full days per week. Employees working on a full-time basis in seasonal establishments are considered as full-time employees.

PART-TIME EMPLOYEES.---Persons employed less than four hours a day or for less than three full days per week.

DEFINITIONS OF CLASSIFICATIONS

PERSONAL SERVICES

BARBER SHOPS.---This classification includes all barber shops with the exception of those operated as a part of another business, such as a retail store or hotel. Barber shop concessions (operated independently) in other establishments are included in this classification. Barber colleges and barber shop concessions on trains and steamships are not included in the Census. The receipts reported include revenue from other services rendered in barber shops, such as shoe shining and manicuring, as well as receipts from the sale of small quantities of merchandise. Employees in these establishments include those engaged on a straight salary, and those working on a percentage or commission basis. The barber shop operating a beauty parlor as part of the same establishment, is covered by the Barber and Beauty Shop classification.

BARBER AND BEAUTY SHOPS.---Places of business which operate beauty parlors in combination with barber shops are included in this classification. As in the case of both the barber shop and the beauty parlor, receipts in some cases include revenue from other sources, mainly from the sale of small quantities of merchandise, principally cosmetics. Likewise, employees in these establishments include those working on a commission basis as well as those engaged on a straight salary.

BATHS AND MASSEURS' ESTABLISHMENTS (Turkish, etc.)---Turkish and other health baths operated as distinct establishments are included in this classification. Because many of these establishments are operated as concessions or operated by other establishments such as sanitariums and hotels, coverage of this activity is incomplete. For this reason, separate statistics are not shown in the individual State tables for this classification, but are included in the classification "Other Personal Services".

BEAUTY PARLORS.---All beauty parlors operated as separate businesses are included, but the classification does not include beauty parlors operated by department stores, women's ready-to-wear stores, or other businesses. Beauty parlors operated as concessions in retail stores are included. Schools for the instruction of beauty parlor operators are included, providing a charge is made for the services performed by the students. Revenues from the incidental sale of cosmetics and hair goods are included in total receipts. Establishments engaged essentially in retailing cosmetics, though rendering beauty parlor service as well, are included in the Census of Retail Trade.

CLEANING, DYEING, PRESSING, ALTERATION, AND REPAIR SHOPS.---This classification consists primarily of establishments engaged in pressing,

repairing, and altering clothing for the individual. The majority of the establishments included, press and repair clothing on their own premises, but seldom do their own cleaning or dyeing. Cleaning and dyeing agencies (establishments doing no cleaning or dyeing, but operated solely as points for the collection and distribution of clothing), if independently operated—that is, if not owned, either in whole or in part, by a cleaning and dyeing plant—are also included in this classification. Cleaning and dyeing agencies owned and operated by plants are included in the reports submitted for the plants in connection with the Biennial Census of Manufactures. Valet shops (the term designating establishments which in addition to the cleaning, pressing and repairing of clothing, render a hat cleaning, shoe shine, and shoe repairing service) are included in this classification. Dry cleaning and dyeing plants reporting receipts for a full year's operation during 1935 of less than \$5,000 are also included. The latter operate, for the most part, in a manner similar to the cleaning and dyeing shop, in that they deal direct with the consumer. Establishments generally known as "Tailor Shops" are included, unless engaged primarily in making clothes to order and reporting fifty per cent or more of their total receipts from the sale of such clothing—in which case they are included in the Census of Retail Trade. Hat cleaning is usually done by the general dry cleaning plant, which reports in connection with the Census of Manufactures, or by the shoe shine parlor. The few establishments engaged solely in hat cleaning are, therefore, included in the classification "Shoe Repair Shops and Shoe Shine Parlors".

FUNERAL DIRECTORS, EMBALMERS, AND CREMATORIES.---Undertaking, particularly in rural areas, is frequently reported in connection with retail furniture establishments. Every attempt was made to accurately classify those establishments which reported both undertaking and the sale of furniture, and to include as service establishments only those places of business essentially engaged in undertaking and embalming. This classification also includes crematories which in the 1933 Census were included in the classification "Other Personal Services". All revenue from the sale of caskets, burial clothing, etc., are included in service receipts.

FUR REPAIR AND STORAGE SHOPS.---This classification includes only those establishments engaged essentially in fur repairing and fur storage. The services of fur repairing and storage are performed, for the most part, by retail furriers which are included in the Retail Census. For the purposes of this Census, "furriers" are included in the Census of Retail Trade if more than fifty per cent of their total receipts are from the sale of merchandise from stock, or from the sale of fur goods made to order. In 1933, such establishments were included in the Census of Retail Trade provided one-third or more of their total receipts were from retail sales. This classification is not shown separately in the individual State tables but is included in "Other Personal Services".

LAUNDRIES (not including power laundries).---This classification includes all classes of laundries other than power laundries, which are

canvassed biennially in connection with the Census of Manufactures. The establishments covered by this classification are, for the most part, French and Chinese hand laundries and independent laundry agencies. The latter group of establishments (not owned by the power laundries) merely act as collecting and distributing agencies and do no actual laundering on their premises. Laundry agencies owned by a plant were classified in the Census of American Business for 1933 as service establishments, but have been omitted from the Business Census for 1935 since they are included in the report for the plant submitted in connection with the 1935 Census of Manufactures. Chains of agencies and cooperatively owned agencies, not owned or operated by power laundries are included in this classification. Power laundries reporting less than \$5,000 receipts for a full year's operation in 1935 are also included in this classification. Hand laundries are included irrespective of the volume of receipts if the majority of the work was done by hand without the use of power-laundry equipment.

PHOTOGRAPHIC STUDIOS.---This classification includes establishments engaged in portrait and/or commercial photography. Those establishments primarily engaged in film developing, and in the printing and finishing of photographs are not included, nor are street photographers who have no established places of business. In the larger cities, comparisons with 1933 figures are not significant because of the inclusion, for the first time, in the present Census, of the large specialized commercial photographic studios, which are engaged primarily in servicing advertising agencies, publications, and other industrial users of photography. Revenue from photography is considered to be from the sale of service and not from the sale of pictures. However, some studios--mostly the smaller establishments--report receipts from the sale of merchandise, consisting principally of picture frames.

RUG CLEANING AND REPAIRING SHOPS.---This classification includes establishments engaged primarily in the cleaning of rugs provided the receipts from such services are less than \$5,000. (Establishments with annual receipts of \$5,000 or more from the cleaning of rugs are included in the Biennial Census of Manufactures.) Many of these establishments are also engaged in the repair of rugs. Their total receipts in many cases exceed \$5,000 because the shops engaged primarily in rug repairing are not considered manufacturing establishments. Total receipts of these establishments include, aside from the receipts from service sales, some revenue from the sale of new and rewoven rugs.

SHOE REPAIR SHOPS AND SHOE SHINE PARLORS (including hat cleaning).--- Establishments included in this classification are engaged principally in the repair of footwear and the shining of shoes. Shoe shine or shoe repair service conducted in connection with a retail business or with another service business is not included. Receipts for this classification include gross revenue from the sale of merchandise such as shoe laces, shoe polish, and similar articles. In the Census of American

Business for 1933, shoe shine parlors and shoe repair shops were shown separately. Because both services are frequently rendered by the same establishment, these classifications have been combined. Since hat cleaning is being done to a considerable degree in connection with shoe shine parlors, the few establishments engaged solely in performing this service, are included in this classification. (For further details on hat cleaning, see "Cleaning, Dyeing, Pressing, Alteration, and Repair Shops" under Definitions of Classifications.)

OTHER PERSONAL SERVICES.—The kinds of business comprising this classification do not warrant separate presentation because of the relative unimportance of the number of establishments and total receipts represented. This classification is not uniform in all State tables, having been amplified in some cases to include other kinds of business which could not be shown separately because of incompleteness in coverage, or because of the disclosure of the operations of individual establishments which would result. The following are some of the more important kinds of business included in this classification:

- Corset repair shops
- Costume and dress suit rental agencies
- Glove repair shops
- Hosiery repair shops
- Millinery repair shops
- Physical culture schools and gymnasiums
- Scalp treatment establishments
- Shirt repair shops
- Textile weaving shops

BUSINESS SERVICES

ADJUSTMENT AND CREDIT BUREAUS, AND COLLECTION AGENCIES.—Mercantile and consumer credit reporting bureaus and privately operated collection agencies are included in this classification. Receipts, as a rule, represent only charges for services. In addition, cooperatively organized bureaus and agencies (with the exception of adjustment, credit, and collection departments of trade associations) are included. Receipts of cooperative organizations consist for the most part of assessments to the various members, usually prorated according to the amounts of service rendered.

AUCTIONEERS' ESTABLISHMENTS (service only).—Only those establishments engaged primarily in rendering service are included in this classification. If fifty per cent or more of the receipts of an establishment were derived from the sale of its own merchandise, the establishment was included in the Census of Retail Trade. Real estate auctioneers

are included in this classification. Receipts represent charges for services rendered plus the sale of incidental merchandise. Statistics for auctioneers' establishments are not shown separately in the individual State tables but are included in the classification "Other Business Services".

BILLBOARD ADVERTISING SERVICE.—Establishments included in this classification are engaged chiefly in the preparation and presentation of poster displays (principally outdoor) on their own or rented signboards. The revenue of these establishments is derived from rentals of space on display boards and from other sources, such as fees received for the preparation of display advertisements. The receipt figures reported include amounts passed on as commissions to advertising agencies and to the various organizations engaged in the sale of billboard space. Operative employees of these establishments are engaged in the repairing and maintenance of display boards and the posting of advertisements. Usually the selling function is undertaken by a separate organization, and for this reason, few plants maintain an extensive sales force.

BLUEPRINTING AND PHOTOSTAT LABORATORIES.—Laboratories engaged principally in the reproduction of drawings, plans, maps and other copy, by blueprinting or photostating, are included in this classification. Establishments reporting fifty per cent or more of their total receipts from the sale of merchandise are included in the Census of Retail Trade.

COIN-OPERATED MACHINE RENTAL AND REPAIR SERVICE.—This classification includes establishments engaged in the operation or rental and repair of coin-operated amusement or vending machines. Such machines are placed in retail stores or other establishments frequented by the public, and these stores participate in the revenues of the machine, usually on a percentage basis. In some cases the machines are leased, and the entire revenues accruing as a result of their operation by the public, revert to the lessee. Establishments which are primarily engaged in the sale of merchandise through coin-operated machines are included in the Census of Retail Trade. Establishments which are operated solely as places of amusement, maintaining a number of coin-operated machines for the use of the public, are not covered by this classification but are included in the Census of Amusement Places. While a number of reports were received for individual machines operated in retail establishments, they are not included in the Census, since they are not regarded either as establishments or concessions. Statistics for this classification are not shown separately in the individual State tables but are included in the figures for "Other Business Services".

COURT REPORTING AND PUBLIC STENOGRAPHIC AGENCIES.—This classification includes establishments providing court reporting service and general public stenographic service. Public stenographers who maintain no separate places of business but are engaged as part-time employees of business offices are not included in the Census. Some public stenographic agencies supply, in addition to stenographic service, a mailing and

telephone service. These are included in this particular classification when the greater part of their receipts are derived from the stenographic service rendered. In some cases, a mimeographing or multigraphing service is conducted as a secondary phase of the business. The coverage of this kind of business is incomplete due to the lack of a uniform understanding on the part of enumerators as to the type of activity which was to be canvassed. Statistics for this classification are not shown in the individual State tables but are included in the classification "Other Business Services".

DENTAL LABORATORIES.---This classification includes laboratories making plates, bridges, inlays, porcelain work, etc., for the dental profession. Many of the larger of these establishments were at one time taken in the Biennial Census of Manufactures. They are now, however, as in the 1933 Census, included in the Census of Business irrespective of volume of receipts, except when also engaged in the manufacture of dental equipment. The private laboratories of dentists are not included in this Census. Establishments which are engaged in the sale of dental equipment and/or supplies for the dental profession are included in the Census of Retail Trade. Receipts of dental laboratories are considered as being from the sale of service, rather than from the sale of merchandise.

DISINFECTING AND EXTERMINATING SERVICE.---Establishments primarily engaged in the extermination of insects, rodents, germs and parasites, from building, bedding, furniture and clothing are covered by this classification. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

DUPLICATING, ADDRESSING, MAILING, AND MAILING LIST SERVICE.---Establishments engaged principally in providing mimeographing, multigraphing, rotaprinting, multilithing, planographing, addressographing, and mailing services are included in this classification. Establishments engaged in the compilation and sale of mailing lists are also included. Printing plants frequently provide such services. (Printing plants are included in the Biennial Census of Manufactures whenever they report annual receipts in excess of \$5,000. When the receipts are less than \$5,000, they are included as service establishments under the classification "Printing and Publishing Shops".) Many of the establishments included conduct stenographic, typewriting or mailing services as minor phases of their business. Establishments engaged solely in writing copy for direct mail advertising are not included in this classification but are covered in "Other Business Services".

EMPLOYMENT AGENCIES.---This classification includes only those establishments that are privately owned and operated. Government-operated agencies and those operated in connection with schools, welfare institutions, professional associations, or trade unions are not included. Many employment agencies render other business services such as

duplicating or public stenographic service as a secondary activity.

FREIGHT FORWARDERS AND CUSTOM HOUSE BROKERS.---This classification includes establishments engaged primarily in the assembly of small shipments of freight into larger shipments (carloads, truckloads, etc.) for delivery to a single destination, or to several points on an established route. Some establishments own and operate transportation equipment (freight cars, loading apparatus, etc.). Others merely maintain service offices. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

INSURANCE CLAIM ADJUSTMENT OFFICES (independently operated).---This classification includes establishments engaged in the adjustment of claims against the various types of insurance carrier companies (fire, casualty, life, accident, etc.). Claim adjusting departments of insurance carriers are not included in this classification. Such departments are included in the carriers' reports which are made in connection with the Insurance phase of the Business Census. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

LINEN, COAT, APRON, AND OVERALL SUPPLY SERVICE.---Establishments included in this classification supply uniforms, aprons, table covers, towels, etc., to restaurants, barber shops, beauty parlors, offices, and other establishments. They collect the soiled supplies and deliver the laundered and repaired replacements as required. The establishments rendering these services usually contract with a commercial laundry for the laundering of the articles which they supply. Establishments which launder linen and apparel, in addition to performing a supply service, are not included in this classification but report in connection with the Biennial Census of Manufactures as power laundries, providing their annual receipts for laundering are more than \$5,000. They are included in this classification, however, when they report receipts from laundering of less than \$5,000 per annum. In a few cases, receipts from the sale of merchandise are reported, which represent supplies sold to customers.

PHOTO FINISHING LABORATORIES.---These laboratories are engaged primarily in the developing of films and in photoprinting and enlarging for amateur photographers. Agencies for photo finishing laboratories located in retail stores or other service establishments are not included in this classification. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

SIGN PAINTING SHOPS.---This classification includes shops engaged primarily in sign painting. Establishments engaged in office-door and window lettering, commercial poster work, and canvas lettering are also

included. Receipts of these establishments include some revenue from the sale of signs as well as from the maintenance of signs. Establishments engaged primarily in the sale of signs, paints, painters' supplies, etc., but which also do sign painting, are included in the Retail Census.

TICKET AGENTS AND BROKERS AND TRAVEL BUREAUS.---Only transportation ticket agents and brokers (including Travel Bureaus) operating independently of transportation companies are included in this classification. Theater ticket agents and brokers are included in "Other Business Services". Receipts for this kind of business represent the agents' or brokers' commissions. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

TITLE AND ABSTRACT COMPANIES.---This classification includes establishments engaged in title abstracting and title guarantee service. The 1933 Census included only abstract companies. With the addition of the Insurance phase of the Census, reports were secured for title insurance and guarantee companies. These title companies have been included in the Service rather than the Insurance phase of the Census because of the importance of the service function performed, and because it was frequently impossible to distinguish between such establishments (many title companies reported on the Service and Amusement schedule) and places of business engaged only in title abstracting. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

WINDOW CLEANING SERVICE.---Establishments in this classification are engaged in cleaning windows in office buildings, apartment houses, stores, homes, and other types of buildings. Maintenance personnel of office buildings, and individuals engaged in window cleaning, who have no established places of business, are not included.

OTHER BUSINESS SERVICES.---A large number of kinds of business for which separate data are not presented due to the relative unimportance of the number of establishments and total receipts represented in each classification, are included in this classification. The classification was amplified in the individual State tables to include other kinds of business which could not be shown separately because of incompleteness in coverage, or because of the disclosure of operations of individual establishments. The following are some of the more important kinds of business included in this classification:

- Advertising representatives
- Armored car service
- Booking agents' offices
- Bottle exchanges
- Building cleaning service
- Business brokers
- Business, financial, and statistical reporting service
- Copywriters

Cotton compresses
 Detective agencies
 Distributing service
 Messenger service
 Packing service
 Press clipping service
 Protective agencies
 Public address systems
 Stevedoring service
 Theater ticket agents and brokers
 Ticker service
 Transportation terminals (independently operated)
 Truck freight brokers' offices
 Weighing service
 Window display service

REPAIR SERVICES AND CUSTOM INDUSTRIES

AUTOMOTIVE REPAIRS AND SERVICES (excluding general repair garages):

AUTOMOBILE LAUNDRIES.---Establishments engaged primarily in the washing and polishing of automobiles are included in this classification. Automobile laundries reporting more than fifty per cent of their receipts from the sale of merchandise are included in the Census of Retail Trade. Automobile laundries operated in connection with automobile storage and repair garages are not included.

AUTOMOBILE PAINT SHOPS.---Includes establishments engaged essentially in automobile painting and refinishing. Many automobile top and body repair shops maintain their own paint departments. Such departments are not included in this classification but are considered as part of the top and body repair shops, which are covered by a separate classification.

AUTOMOBILE RADIATOR SHOPS.---Establishments primarily engaged in the repair of automobile radiators are included in this classification. Some of these shops also do specialized welding and minor automobile top and body repair work. In addition, many are engaged in automobile glass installation, while still others are engaged in battery recharging and ignition repairing.

AUTOMOBILE RENTAL SERVICE.---This classification covers establishments engaged in the rental of automobiles and trucks, including those renting automobiles on a "drive-it-yourself" basis. Establishments which rent specialized automotive transportation equipment such as ambulances are also included.

AUTOMOBILE STORAGE GARAGES.---The establishments covered by this classification are mainly those primarily engaged in the live-storage of automobiles. Warehouses engaged in the dead-storage of automobiles are not covered by this classification but are included in the Transportation phase of the Business Census. General repair garages and filling stations, which provide storage for automobiles as a secondary activity, are included in the Retail Census. Many storage garages, in addition to the storing of cars, report receipts for numerous other services such as washing and lubricating cars, repairing brakes, axles, etc.

AUTOMOBILE TOP AND BODY REPAIR SHOPS.---Many establishments included in this classification also render other specialized automotive repair service such as upholstery repair, glass installation, and radiator repair. Ordinarily, these establishments also maintain their own automobile paint departments. Receipts for this classification include revenue from the sale of automobile parts, and from the sale of gasoline and oil. Where receipts from the sale of merchandise or from general automotive repair work exceed fifty per cent of the total receipts, the establishment is included in the Census of Retail Trade.

BATTERY AND IGNITION REPAIR SHOPS.---This classification includes establishments engaged in the rental, charging, repair, and storage of batteries, as well as those engaged in ignition repair. Many of these establishments also repair automobile radios, as a minor phase of their business. Others sell gasoline and automobile parts. Establishments reporting more than fifty per cent of their total receipts from the sale of merchandise or from general automotive repairs are included in the Census of Retail Trade.

PARKING LOTS.---Only those parking lots reporting more than fifty per cent of their total receipts from the parking facilities afforded are included in this classification. Otherwise, they are included in the Census of Retail Trade. In the 1933 Census, parking lots were considered retail establishments whenever receipts from the sale of merchandise equaled more than one-third of the total receipts. Most parking lots are engaged in selling gasoline, and in rendering such additional services as washing and lubricating automobiles.

TIRE REPAIR SHOPS.---For the purpose of the 1933 Census, tire repair shops reporting more than one-third of their total receipts from the sale of merchandise were classified as retail establishments and included in the Retail Census. For the purpose of this Census, however, such establishments are classified as retail stores only when more than fifty per cent of their total receipts are from the sale of merchandise. Many establishments engaged in tire repairing do other specialized automotive repair work, such as brake relining, battery repairing, and radiator repairing. Automobile parts, gasoline and new and used tires, comprise the principal lines of merchandise sold.

OTHER AUTOMOTIVE REPAIRS.---This classification includes establishments specializing in automobile brake repairing, relining, and adjusting, and those specializing in automobile spring, axle, and wheel repair

service. These services are also performed to some extent by general repair garages which are included in the Census of Retail Trade.

OTHER REPAIR SERVICES (except apparel and shoes):

ARMATURE REWINDING SHOPS.---Establishments included in this classification are engaged primarily in rewinding armatures and in repairing motors. Wholesalers and retailers of electrical goods (occasionally engaged in armature rewinding) are classified as armature rewinding shops providing more than fifty per cent of their total revenue is derived from this activity; otherwise, they are included in the Retail or Wholesale phase of the Census. A portion of the total receipts shown for this classification includes receipts from sale of electrical appliances and electrical parts. Statistics for this classification are shown in the United States Summary tables but are not shown separately in the individual State tables. They are included in the classification "Other Repair Services".

BICYCLE REPAIR SHOPS.---For the purpose of the 1933 Census, establishments engaged in bicycle repairing were classified as retail establishments when they reported sales of merchandise amounting to more than one-third of their total receipts. For the purpose of the present Census, establishments reporting as bicycle repair shops are not considered retail establishments unless more than fifty per cent of their total receipts are from the sale of merchandise. A number of these establishments, primarily engaged in bicycle repairing, are also engaged in repairing motorcycles and in the rental of bicycles and motorcycles. Many bicycle repair shops are also engaged in repairing baby carriages and electrical appliances. Statistics for bicycle repair shops are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

BLACKSMITH SHOPS.---While this classification includes establishments reporting blacksmithing as their principal kind of business, many of the establishments included are also actively engaged in farm implement, automobile, and general machinery repair. Some blacksmith shops, in addition to their regular business, report gasoline sales. Comparative statistics for this classification are not significant due to the fact that establishments reporting as blacksmith shops for the one Census would report under another specialized mechanical repair service designation in the other census.

ELECTRICAL APPLIANCE REPAIR SHOPS.---This classification includes mainly small shops engaged in repairing electrical appliances (washing machines, vacuum cleaners, irons, etc.). As in the 1933 Census, electrical contractors and electrical shops engaged primarily in housewiring are not included in this classification. They are, however, included in the Construction phase of the present Census. Electrical appliance repair shops reporting more than fifty per cent of their total receipts from the sale of merchandise are included in the Retail Census. The basis of classification differs from that used in 1933, in that shops

reporting more than one-third of their total receipts from the sale of merchandise were classified as retail stores in that Census. This classification does not include establishments engaged in the repair of electric or neon signs. Such establishments are covered in "Other Business Services".

HARNESS AND LEATHER GOODS REPAIR SHOPS.---Establishments included in this classification are engaged primarily in the repair of harness, saddlery, luggage and other leather goods. Some of these establishments are also engaged in the repair of boots and shoes. For the purpose of the 1933 Census, establishments engaged in harness and leather repair work were included in the Retail Census when one-third or more of their total receipts were from the sale of merchandise. Such establishments are not included in the Retail phase of the present Census unless more than fifty per cent of their total receipts are from the sale of merchandise.

LOCKSMITH AND GUNSMITH SHOPS.---The majority of the establishments included in this classification are engaged primarily in cutting keys and repairing locks. Gun repairing, in most cases, constitutes a minor activity although some establishments engaged exclusively in the repair of firearms are included. In addition to repairing locks and guns, many of the establishments included are engaged, to some extent, in repairing electrical appliances, bicycles, and radios. Locksmith and gunsmith shops reporting more than fifty per cent of their total receipts from the sale of merchandise are included in the Census of Retail Trade.

MUSICAL INSTRUMENTS REPAIR SHOPS.---Included in this classification are those establishments engaged primarily in the repair of musical instruments other than pianos and organs. Teachers of music, rendering an instrument repair service, but maintaining no establishments for this purpose, are excluded from the Census. Many of the establishments included in this classification are also engaged in selling new and second-hand musical instruments. When more than fifty per cent of the total receipts of these establishments are reported as derived from the sale of merchandise, such establishments are included in the Census of Retail Trade. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

PIANO AND ORGAN TUNING AND REPAIR SERVICE.---Only establishments primarily engaged in the tuning and repairing of pianos and organs are included in this classification. Much of this service is rendered by individuals who derive most of their revenue as teachers of these musical instruments. Such persons, unless operating from recognized places of business, are omitted from the Census. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

RADIO REPAIR SHOPS.---This classification includes those establishments engaged primarily in the repair of radios. Radio dealers and

radio repair departments of retail establishments are not included. Radio repair shops reporting more than fifty per cent of their total receipts from the sale of merchandise are included in the Census of Retail Trade. For the purpose of the 1933 Census, such establishments were included in the Retail Census when more than one-third of their total receipts were derived from the sale of merchandise. Receipts from radio repairing are also reported by many establishments classified as "Electrical Appliance Repair Shops".

REFRIGERATOR SERVICE AND REPAIR SHOPS.---This classification covers, essentially small shops engaged almost exclusively in the servicing and repairing of domestic and commercial electric refrigerators. Most of the repairs to refrigerators and commercial refrigeration units are made by repair departments of the dealers or manufacturers. Such departments are not included in this classification, except in some few instances, where operated as separate establishments. Refrigerator repair shops are included in the Census of Retail Trade, whenever receipts from merchandise sales amount to more than fifty per cent of the total receipts of the establishment. This differs from the 1933 Census in that these establishments were classified as retail stores whenever receipts from the sale of merchandise equaled one-third or more of total receipts. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

SAW AND TOOL SHARPENING AND REPAIR SHOPS.---Included in this classification are establishments engaged primarily in sharpening saws and tools--many of which render, in addition, a general repair service. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Business Services".

TYPEWRITER REPAIR SHOPS.---This classification includes those establishments engaged primarily in the repair of typewriters. The repair of adding machines and various other business machines frequently constitutes an important additional activity. Establishments renting typewriters are included in this classification when receipts from such rentals do not constitute a major portion of the total receipts of the establishment. Otherwise, typewriter rental establishments are included in a separate classification under the "Miscellaneous Services" group. Total receipts of some establishments include receipts from the sale of such merchandise as reconditioned typewriters, typewriter ribbons, and other typewriter supplies. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Other Repair Services".

UPHOLSTERY AND FURNITURE REPAIR SHOPS.---Establishments included in this classification are engaged primarily in furniture upholstering and/or furniture repairing. Repair departments of retail establishments, and upholstery and furniture repair establishments reporting more than fifty per cent of their receipts from the sale of merchandise, are not

included. In 1933, such establishments were classified as retail stores when more than one-third of the total receipts represented merchandise sales. Many of the shops included in this classification manufacture some furniture.

WATCH, CLOCK, AND JEWELRY REPAIR SHOPS.---Shops reporting more than fifty per cent of their total revenue from retail sales are included in the Census of Retail Trade. This differs somewhat from the basis of classification used in 1933 when such an establishment was considered a retail store providing more than one-third of the total receipts were from the sale of merchandise. Many of the smaller watch, clock, and jewelry repair shops rendered other repair services, such as electrical appliance repairing, bicycle repairing, etc.

OTHER REPAIR SERVICES.---Included in this classification are a large number of repair shops engaged in various specialized repair services for which separate data are not presented due to the relative unimportance of the number of establishments and total receipts represented in each classification. These shops frequently sell parts and other merchandise, and when an establishment's retail sales exceed fifty per cent of the total receipts, the establishment is included in the Census of Retail Trade. This differs somewhat from the basis of classification in 1933 when such an establishment was considered a retail store provided more than one-third of the total receipts were from sales of merchandise. This classification was amplified in the individual State tables to include other kinds of business which could not be shown separately because of incompleteness in coverage, or because of the disclosure of operations of individual establishments which would result. The following are some of the more important kinds of business included in this classification:

Awning and tent repair shops	Iron repair shops
Beer pump, coil cleaning and repair service	Lawn mower repair shops
Blade, knife, and scissors repair shops	Mirror repair shops
Boat repair shops	Scale repair shops
Business machine repair shops	Sewing machine repair shops
Cash register repair shops	Stove repair shops
Cylinder grinding shops	Tool repair shops
Electric sign repair shops	Umbrella repair shops
Fountain pen repair shops	Windmill, pump, and well repair service
Implement repair shops	General repair shops

CUSTOM INDUSTRIES:

CABINETMAKING SHOPS (including woodworking).---This classification covers mainly those establishments primarily engaged in the repair of articles made from wood. Establishments manufacturing wooden articles are included when the value of products for the year is less than \$5,000.

CIDER MILLS AND PRESSES.---Cider mills and presses are included in this classification when operated either on a custom basis or when reporting a value of product of less than \$5,000. Commercially operated mills and presses reporting a value of product for the year of \$5,000 or more are included in reports of the Census of Manufactures.

GRIST MILLS.---This classification includes grist mills reporting total receipts of less than \$5,000 per annum, as well as larger mills engaged primarily in custom grinding. Such mills are not covered in the Biennial Census of Manufactures. Custom grinding is quite frequently done by feed stores which report as retail stores. Many custom grist mills are also operated in connection with blacksmith or farm implement repair shops, and such establishments are classified according to the service from which the major portion of receipts is derived. The coverage of grist mills in the 1933 Census was incomplete due to a misunderstanding on the part of enumerators as to the type of custom mills which were to be canvassed. The 1933 figures for this classification are not, therefore, comparable with the figures presented for 1935.

HEMSTITCHING, EMBROIDERING, AND BUTTONHOLING SHOPS.---Included in this classification are shops engaged in hemstitching, embroidering, and buttonholing, which sell their services direct to the consumer. Departments of retail stores doing such work are not included, nor are contract buttonholing shops. This latter group is included in the classification "Other Custom Industries". Many shops report receipts from the sale of merchandise. When such receipts are more than fifty per cent of the total receipts, the establishment is included in the Census of Retail Trade.

MACHINE SHOPS.---This classification covers small machine shops that are engaged primarily in repair services. It also includes those engaged in manufacturing when the annual value of product is less than \$5,000. (Machine shops with a value of product of more than \$5,000 are covered by the Biennial Census of Manufactures.) The machine shops of manufacturing plants or those shops operated as departments in other establishments are not included in this classification. Many machine shops render other services such as welding, blacksmithing, and in some cases automobile repairing.

MATTRESS RENOVATING AND REPAIR SHOPS.---This classification includes only those establishments which are engaged exclusively in renovating and repairing mattresses. Mattress manufacturers (covered by the Biennial Census of Manufactures), and retail dealers (included in the Retail Census), frequently render a similar service. Mattress renovating and repair shops are classified as retail establishments whenever fifty per cent or more of their total receipts are derived from the sale of merchandise.

MOLASSES, SORGHUM, AND SYRUP MILLS.---Molasses, sorghum, and syrup mills are included in this classification when operated either on a custom basis or when reporting a value of product for the year of less

than \$5,000. Commercially operated mills reporting a value of product for the year of \$5,000 or more are included in the Biennial Census of Manufactures.

PRINTING AND PUBLISHING SHOPS.---This classification includes printing and publishing establishments not reporting in connection with the Biennial Census of Manufactures, because the value of product for the year was less than \$5,000. Many of these establishments are engaged in the printing and publishing of rural newspapers. The receipts for this classification include revenue from the sale of advertising, from subscriptions, and from job printing. Establishments engaged essentially in retailing stationery, though rendering a printing service as well, are included in the Census of Retail Trade.

SAW MILLS AND PLANING MILLS.---This classification includes all saw mills and planing mills engaged primarily in custom work, as well as those commercially operated reporting a value of product for the year of less than \$5,000. Commercially operated mills reporting a value of product for the year of \$5,000 or more are included in the Biennial Census of Manufactures.

THRESHING, CORN SHELLING, HAY BALING, AND OTHER AGRICULTURAL SERVICES.---Peanut picking, hulling, harvesting, grain cutting and binding, plowing, and silo filling and cutting, and other services rendered the farmer are also among those included in this classification. Receipts for these establishments are in most cases small and employment is highly seasonal. In Florida and California, this classification includes a number of large establishments performing highly specialized and technical services. These establishments are engaged primarily in the care of orchards or in dehydrating fruits. Coverage for the classification is incomplete because of the seasonal nature of the business and the inaccessibility to the enumerator of many establishments which properly should be included as agricultural service establishments. The coverage of these kinds of business in the 1933 Census was even more incomplete due to a misunderstanding on the part of enumerators as to the types of custom businesses which were to be canvassed. The 1933 figures for this classification are not, therefore, comparable with the figures presented for 1935.

TINSMITH SHOPS.---This classification includes small shops primarily engaged in sheet metal repair work and in the manufacture of tinware, gutters, ventilators, etc., with annual receipts of less than \$5,000. Establishments reporting a value of product for the year of \$5,000 or more are covered by the Biennial Census of Manufactures provided they are not engaged primarily in construction work, such as the erection of gutters, ventilators, etc. Such establishments are included in the Construction Census. Roofing repair shops which were included with tinsmith shops in the 1933 Census are now included in the Construction Census.

WELDING SHOPS.---This classification includes shops reporting receipts of less than \$20,000. Welding shops reporting receipts in excess

of \$20,000 are included in the Biennial Census of Manufactures. Many of the shops included in this classification perform other repair services in addition to welding.

OTHER CUSTOM INDUSTRIES.---Included in this classification are various manufacturing plants reporting total receipts of less than \$5,000 per annum, as well as larger plants engaged primarily in custom work. Such establishments are not covered in the Biennial Census of Manufactures. Awning and tent manufacturing establishments are excluded from the Census of Manufactures whenever they report annual receipts of less than \$20,000; such establishments are included in this classification. Many of these establishments, in addition to manufacturing, are engaged in repair work and report total receipts in excess of \$5,000. Over fourteen hundred different kinds of manufacturing establishments are included. The most important types are:

Awning and tent manufacturers	Concrete products manufacturers
Bottling works	Cosmetics manufacturers
Bookbinding establishments	Diamond setters
Broom manufacturers	Engraving establishments
Brick manufacturers	Fur goods manufacturers
Custom butchers	Ice manufacturers
Canning establishments	Medicine manufacturers
Candy manufacturers	Plating and electro-plating establishments
Cheese manufacturers	Pattern making establishments
Chemical manufacturers	Soft drink manufacturers
Cigar manufacturers	Wine manufacturers
Contract tailor shops	

MISCELLANEOUS SERVICES

LANDSCAPE GARDENING AND TREE SURGERY SERVICE.---This classification includes establishments engaged in landscape gardening and tree surgery. Some of the establishments included show receipts from the sale of such merchandise as shrubs and plants of various kinds. An establishment, to be included in this classification, must report more than fifty per cent of its total receipts from service sales. When more than fifty per cent of the total receipts are from the sale of merchandise, the establishment is considered a nursery and omitted from the Census. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Miscellaneous Services".

LIVERY STABLES.---This classification includes establishments engaged in the rental of horse-drawn livery. Usually, such establishments also rent saddle horses. Some stables are likewise engaged in the boarding and care of privately owned saddle horses. Statistics for this classification are not shown separately in the individual State tables but are included in the classification "Miscellaneous Services". Establishments

engaged primarily in the rental of saddle horses are classified as "Riding Academies" and included in the Census of Amusement Places.

OTHER MISCELLANEOUS SERVICES.---Included in this classification are establishments which could not properly be classified in any of the other major groupings. Following are some of the more important kinds of business covered:

Art repair shops	Office equipment rental service
Automobile tag service	Phonographic recording and
Boat storage and repair service	electrical transcription
Carpet and linoleum laying	service
Check rooms	Picture framing and gilding
Commercial mounting and	service establishments
finishing service	Scaffold and ladder renting service
Designers establishments	Scavenger service establishments
Floor surfacing establishments	Taxidermists
Furniture rental establishments	Toll bridges
House moving establishments	Typewriter rental shops
	Window shade cleaning and repairing
	establishments.

TABLE 4. MONTHLY EMPLOYMENT, BY KINDS OF BUSINESS

Employees, full-time and part-time combined, by months and average for the year

Kind of Business	Active propri- etors and firm members	Employees (full-time and part-time). Average for year	NUMBER OF EMPLOYEES ON PAY ROLL NEAREST THE 15TH OF EACH MONTH											
			January	February	March	April	May	June	July	August	September	October	November	December

* Includes no compensation for proprietors and firm members of unincorporated businesses. 1/Includes custom industries, and small manufacturing plants not included in the Census of Manufactures for the reason that the value of product of each establishment is less than the minimum necessary to be classed as a manufacturing plant.

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential*. Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only*.

DANIEL C. ROPER, *Secretary of Commerce.*

CENSUS OF BUSINESS : 1935

A separate report should be prepared for each service establishment (including personal service, business service, and mechanical repair service) or place of amusement. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form.

The report should cover, if possible, the full year's operation for the calendar year 1935, even if ownership has changed during the year. If more convenient, a twelve-month period ending within a month before or after December 31, 1935, may be covered.

1. DESCRIPTION OF ESTABLISHMENT:

a. NAME OF ESTABLISHMENT

b. NAME OF OWNER RACE (*not for corporations*)
(White, Negro, Oriental, other)

c. LOCATION OF ESTABLISHMENT { State County Township
Name of city, town, or village
