Focus on C and use rule:
 $8/9 > 8+8$
 i.e. change 8 in C to 8
 (nothing to do) and add 8 to d,
 which leads to next diagram

Subtract $C \times L = 8 \times 9 = 72$ from DE

Subtract $C \times M = 8 \times 9 = 72$ from EF

Revise up: add 1 to C and
 subtract 999 from DEF
 Remainder in DEF is zero, so
 that

$998001 / 999 = 999$

Done!
