NUMBERING SYSTEM OF
ARMY SERVICE FORCES MANUALS

The main subject matter of each Army Service Forces Manual is indicated by consecutive numbering within the following categories:

M1 - M99 Basic and Advanced Training
M100 - M199 Army Specialized Training Program and Pre-
Induction Training
M200 - M299 Personnel and Morale
M300 - M399 Civil Affairs
M400 - M499 Supply and Transportation
M500 - M599 Fiscal
M600 - M699 Procurement and Production
M700 - M799 Administration
M800 - M899 Miscellaneous
M900 - up Equipment, Materiel, Housing and Construction

* * *

HEADQUARTERS, ARMY SERVICE FORCES,

INTRODUCTION

Purposes of the Civil Affairs Handbook

The basic purposes of civil affairs officers are (1) to assist the Commanding General by quickly establishing those orderly conditions which will contribute most effectively to the conduct of military operations, (2) to reduce to a minimum the human suffering and the material damage resulting from disorder and (3) to create the conditions which will make it possible for civilian agencies to function effectively.

The preparation of Civil Affairs Handbooks is a part of the effort to carry out these responsibilities as efficiently and humanely as is possible. The Handbooks do not deal with plans or policies (which will depend upon changing and unpredictable developments). It should be clearly understood that they do not imply any given official program of action. They are rather ready reference source books containing the basic factual information needed for planning and policy making.

INTRODUCTORY COMMENTS

A. TOTAL POPULATION GROWTH

Japan Proper has grown from an estimated population of 26,000,000 persons in 1720 to a population of 73,000,000 persons in 1940. During the period up to 1870 the gross population was in a state of flux, but after this date the total population has been steadily increasing. The period of greatest rate of growth (7.9%) for Japan as a whole occurred between 1925 and 1930. Although the 1940 population, a third of which is urban, is greater than at any previous time, the decline in rate of increase is becoming apparent. This is true both in the rural and urban areas. For Japan as a whole the rate of growth between 1935 and 1940 was 5.6% as contrasted to 12.5% for the six largest cities. In general, the larger cities have grown at a more rapid pace than the smaller cities, a condition probably due to the concentration of industry in the large urban centers as well as to the areal expansion of cities.

The total population of Japan Proper increased over 4,000,000 persons in the five year period of 1935-1940. This increase was not uniform throughout the 47 major divisions. These divisions varied in population from less than half a million persons (Tottori-ken, 484,390) on the northern shore of the west end of the main island to approximately seven and one-half million persons in Tōkyō-fu (7,354,971). Of the total increase more than a third occurred in the two major divisions of Tōkyō-fu and Ōsaka-fu having together seventeen percent of the total population in 1940. The divisions containing the six great cities of Japan, namely Tōkyō, Ōsaka, Yokohama, Nagoya, Kyōtō, and Kobe included 31 percent or nearly a third of the total population in 1940. It is obvious from such figures that there has been a great movement of people toward the large cities.

Hokkaidō, primarily a rural area, is the outstanding exception with a conspicuous increase in total population, perhaps due to the development of mining and industry, particularly since the statistics show that there is now an apparent excess of males. Since this industrial development has been accompanied by a rapid process of urbanization the increase in the population of Hokkaido has been only in part an increase of the rural areas. The rural increase is primarily due to a government sponsored system of immigration, not to an unassisted movement of individual farmers.

The increase of the population in the urban prefecture is only partly the result of rural-urban migration. The natural increase rate

RESTRICTED

in the cities and urban divisions has been fairly high. In 1930 approximately four-fifths of the people of Japan were living in the prefecture of their birth. Greater rural-urban migration, however, probably has taken place since 1930, and even since 1940, than is indicated by the statistics on place-of-birth as of 1930.

Throughout all history Japan has been considered densely populated. The population has grown in accordance with the pattern of western peoples, with the growth of the last 20 years of reflecting a "modernization" trend. Assuming various fertility and mortality rates in terms of the 1935 population, the 1970 population may well increase to between 85 to 95 millions. Caution is necessary, however, in making such predictions because assumptions must be made concerning the trends in births, deaths and migration during both the war and the post-war periods.

Since 1930 the rate of population increase has been moderating. Although the gross increase between 1930 and 1935 represented a smaller percentage than in the preceding five years the 4.8 million persons represented the largest numerical increase on record. A decline of approximately 1,000,000 in the gross increase occurred in the 1935 to 1940 period with a corresponding decrease in the rate of growth. The actual decrease was greater than these official figures indicate, however, since the 1935 census did not include the armed forces outside Japan Proper, whereas the 1940 census enumerated persons in the armed forces as residing with their families in their "home" districts.

B. BIRTH AND DEATH RATES

The only published data available concerning the complete national census of Japan taken in 1940 is the total population, by sex, for prefecture and minor divisions. The latest age distributions which would permit careful analysis of trends in fertility and mortality are those of the censuses of 1930 and 1935. Figures are available in fairly great detail through 1938 for birth, death, and natural increase rates from official Japanese statistical sources, but for data after 1938 only a few figures reported to the Japanese Diet have been gathered.

From 1920 to 1937 the birth rates for Japan as a whole declined steadily from 34.8 to 30.6 per 1,000 population. During the same period death rates were also declining. The rate of natural increase reached its peak during the intercensal period 1925-1930 with a rate of 14.2 per 1,000 persons and declined to 13.7 in 1937. In 1938, the effects of the war were evident in a decrease in the birth rate and an increase in the death rate. This situation only served to augment the already declining

rate of natural increase. Japanese officials claim that the birth rate increased and the death rate decreased from 1940 through 1942, but pending the availability of detailed statistical tabulations this report must be received with considerable skepticism.

Birth, death, and natural increase rates have declined in both urban and rural areas. Although the decline in urban areas was to be expected on the basis of a general knowledge of the influences of urbanization on demographic rates, the decline in birth and death rates in rural areas is equally apparent. The use of crude birth and death rates for rural-urban comparisons in Japan is dangerous, however, since the heavy migration of young adults to the cities tends to increase birth rates and decrease death rates in the cities, and at the same time tends to decrease birth rates and increase death rates in the rural areas. The use of more refined measures which eliminate the disturbing influence of differences in age and sex structure confirms the picture given by the crude rates. The gross reproduction rate has declined in both urban and rural areas as officially defined, although the relative decline has been much greater in urban areas. Similarly, mortality as measured by life table values has declined in both urban and rural areas, although the age incidence of the declines is quite different. The large cities and the urban areas have made the greatest savings in the lives of infants and children, whereas rural areas have made greater savings of the lives of adults.

If the trends continue, the declines in fertility and mortality have made inevitable and eventual decline in the total population of Japan. How soon that decline depends essentially on the relation of the rapidity of the decline of the birth rate and the death rate in the future, and, consequently, essentially on the war and the post-war history of Japan. Entirely aside from the question of the ultimate future of the population of Japan, the trends in past vital rates had already slowed the rate of natural increase between 1935 and 1940. At the same time, the demands of preparation for total war had intensified greatly the flow of migrants to the cities. The changes in the detailed patterns of population distribution between 1935 and 1940 must be interpreted against this background of declining fertility, declining mortality, and increasing migration from the rural areas to the cities.

C. GROWTH OF CITIES

The growth in the number of official cities or "shi" in Japan has been very apparent, especially in the ten year span between 1930 and 1940. In 1930 there were 109 shi, in 1935, 127 shi, and in 1940 there were 168 incorporated cities or "shi". At the time of the 1940 census

RESTRICTED

- xii -

approximately 38 percent of the total population of Japan lived in the 168 "shi", with 75 percent of the urban population living in cities of 100,000 and over. By April 1941, the number had increased to 182 due to the large number of new incorporations, and the urban population of Japan was increased to 38.8 percent in terms of the 1940 census figures and the 1941 boundaries. The reorganization of the existing shi and the amalgamation of small town and villages into new shi explains the increase of the number of shi in Japan. Although reported only through the foreign broadcasts, it is known that a number of boundary changes have taken place since 1941.

The increase in the number of cities from October 1, 1940 to May 1, 1941 indicates the trend existing in the expansion of areas and movement to the cities. The absence of any increase of population, however in the small communities under 50,000 since 1930 and the tremendous increase in the population of the large cities can only be explained by the migration movement from the rural areas to the urban centers. In the 47 ken or major divisions of Japan, the urban percentage of the total population varies from a high of 93 percent in Tōkyō-fu to a low of 7.5 percent in Shimane, one of the less densely populated ken.

D. SEX RATIOS

The effects of the war have intensified the decline in rate of growth. This is apparent in the sex ratio showing an excess of 214,000 males in 1935 and only 18,000 in 1940. The mobilization of men for military duty should not have affected these figures, for in the 1940 census all men who were serving in military capacities were enumerated as though they were home.

The exclusion from the 1940 Census of persons who migrated as civilians unattached to the army would reduce sex ratios in Japan Proper. The Japanese who moved to the Empire, to Manchuria, or to occupied China to exploit the business and commercial possibilities were predominantly male, and were not included in the census of October 1, 1940. In addition, many men who were in Japan on October 1, 1935 had lost their lives in Manchuria or in China by October 1, 1940. In general, there was an excess of males in the cities, a deficit of males in the rural areas, indicating a movement of males from rural areas into the cities.

Tokyo-fu, with the largest population of any major district in Japan, had a sex ratio of 106.7, one of the highest in Japan. The presence of a large number of males in relation to females in cities probably indicates the heavy industrial development of the area. In contrast, Tottori-ken with its less than half a million people, only one fiftieth of which live in the cities, has a sex ratio of 93.4. This again reflects the movement

RESTRICTED

RESTRICTED

- xiii -

of the male population from the rural areas of Japan into the urban and industrialized areas and, consequently, a decreased rate of growth. Osaka-fu and Kanagawa-ken each with more than 70 percent of the population in the shi have relatively high sex ratios. These two major divisions also highly industrialized regions. Kyoto-ken, Aichi-ken, and Hyogo-ken with 70 percent, 54 percent, and 45 percent urban population respectively and each with large city areas, have approximately a uniform sex ratio of 100. There is roughly an inverse correlation in the sex ratio and the total population, a fact closely tied in with the larger urban populations in the more populous prefectures.

The sex ratio for Japan Proper in 1940 was 100.3. Only eleven ken however had ratios of 100 or more. For the most part these ken included important urban areas. In contrast, thirteen ken have sex ratios of 96 or less. In most cases these ken are rural in character and have populations of less than two millions persons.

E. LIMITATIONS OF AVAILABLE CENSUS MATERIAL

Very little published material is available concerning the 1940 population census of Japan. In so far as it is known no official volumes have been published and have reached the United States. Consequently, the only available censuses for Japan are those of 1920, 1925, 1930, and 1935. The latest officially published information concerning Japanese population appears to be dated around 1941. Since it is known that war economy causes great shifts in population, it is evident that considerable dislocation and disruption in trends of population have taken place in Japan within the last three years. As pointed out, even the 1940 Census will not show the results of movement of population due to the war because the military personnel were listed in their home districts rather than in the district in which they were located. It is probably true that changes have occurred in the birth and death rates to eventually affect the future trends. Data are lacking as to the nationality composition, age, occupational groups, and birth and death rates for divisions of Japan Proper in recent years. It is understood that an Empire Census was taken in 1944, but nothing is known here about the scope or results. The taking of a census during war-time probably indicates a need by the Japanese for further information concerning their people. Additional studies and maps are being prepared utilizing the data presented in the accompanying tables.

F. SOURCES AND ACKNOWLEDGEMENTS

Original Japanese sources formed the basis of the translation of the data presented in the tables of this release. It has been possible to present the 11,503 shi, machi and mura in accordance with the order of minor divisions previously established in the published

RESTRICTED

RESTRICTED

- xiv -

Sawada list.^{1/} The 1940 figures have been taken from Horei zensho,^{2/} and Toshi Nenkan.^{3/} In all cases the 1940 population figures were given in Japanese numerals.

Acknowledgement is made to the United States Board on Geographical Names for checking and approving the spellings as changed from the Nippon Shiki Romaji system as given in the Sawada list to the Modified Hepburn System of Romanization. All spellings of new shi, machi, and mura, as well as the areal changes that took place between 1935 and 1940, were supplied by the Japanese Section, Division of Orientalia, Library of Congress. Acknowledgement is made also to the Far Eastern Branch, Office of Strategic Services for a loan of a personal copy of Horei zensho, the copy used in the translation of the census data. Data and ideas have been used freely from two current articles, various issues of Population Index and an American Geographical Society publication on Japan.^{4/} Otherwise the responsibility for the form, the translation, and the tables and text material of this release belongs to the Population Section, Division of Geography and Cartography, Department of State. Any comments regarding possible errors or additions in the accompanying tables will be appreciated.

in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Osarizawa-mura in Kazuno-gun was changed to a machi in 1936.
- 2/ Arase-mura in Kitaakita-gun was changed to Ōani-mura in 1937.
- 3/ Iidakawa-mura in Minamiakita-gun was changed to a machi in 1936.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

1/ Aburakawa-machi in Higashitsuguru-gun was abolished and was incorporated into AcMori-shi on June 1, 1939.

2/ A part of Iwaki-mura in Nagatsuguru-gun was incorporated into Naka-mura in Nishitsuguru-gun since October 2, 1938.

3/ In 1937 Onoe-mura was amalgamated with Kanata-mura and became Onoe-machi.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

Fukui-ken

-3-

- 1/ Wada-mura and Kida-mura in Asuha-gun incorporated into Fukui-shi in 1936. Higashilago-mura in Asuha-gun was abolished and was incorporated into Fukui-shi on August 1, 1939.
- 2/ Tsuruga-machi and Matsubara-mura in Tsuruga-gun were abolished and were made a new city, Tsuruga-shi, on April 1, 1937.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

Sources: Hōrei zensho: compiled and published by Naikaku, April 1941: pp. 559-653. Naikaku Kokuji No. 6, (Notification No. 6 of the Cabinet).

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ A part of Noda-mura in Shinobu-gun was incorporated into Fukushima-shi on October 1, 1937.
- 2/ A part of Machikita-mura in Kitaazumi-gun was incorporated into Wakamatsu-shi in April, 1937.
- 3/ Taira-machi and Hirakubo-mura in Iwaki-gun were abolished and were made a new city, Taira-shi, on June 1, 1937.
- 4/ Matsukawa-mura changed to a machi in 1936.
- 5/ Fukuyama-mura changed to a machi in 1937.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Yasui-mura incorporated into Ōgaki-shi in 1936.
- 2/ Takayama-machi and Onada-machi in Ōno-gun were abolished and were made a new city, Takayama-shi, on November 1, 1936.
- 3/ Tajimi-machi in Toki-gun was abolished and a new city, Tajimi-shi, was established on August 1, 1940.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

May 5, 1944.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Sano-mura in Gumma-gun was abolished and was incorporated into Takasaki-shi since October 2, 1938.
- 2/ Hirosawa-mura incorporated into Kiryū-shi in 1937.
- 3/ Iesaki-machi Uehasu-mura, and Koro-mura in Sawa-gun were abolished and a new city, Iesaki-shi, was established on September 13, 1940.
- 4/ Osaka-mura changed to a machi in 1936.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

Sources: Hōrei zensho: compiled and published by Naikaku, April 1941: pp. 559-653. Naikaku Kokuji No. 6, (Notification No. 6 of the Cabinet).

Nihon Chimei Daijiten 1937-38. (Great Dictionary of Japanese Place Names). (Referred to as the Sawada list).

GE:CEC/RKW:dmr
June 1, 1944

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Yoshiwa-mura and Kurihara-machi in Mitsugi-gun were incorporated into Onomichi-shi on April 1, 1937. Samba-mura in Numakuma-gun was abolished and was incorporated into Onomichi-shi on July 1, 1939.
- 2/ Mihara-machi, Itosaki-machi, Yamanaka-machi, and Nishino-mura in Mitsugi-gun, and Tanoura-mura and Sunami-mura in Toyota-gun were abolished and a new city, Mihara-shi, was established on November 5, 1936.
- 3/ Fūchu-mura in Aki-gun changed to a machi in 1937.
- 4/ Mukaihara-mura in Takada-gun changed to a machi in 1937.
- 5/ Nishikuchi-mura in Toyota-gun was abolished and was placed under Setoda-machi in 1937.
- 6/ Yatsugi-mura in Putami-gun was incorporated into Tōkaichi-machi in 1937.

- 4/ Takahama-mura and Akaho-mura in Shikama-gun were incorporated into Shikama-machi in 1937. Shikama-machi in Shikama-gun was abolished and the same area was made a new city, Shikama-shi, on February 11, 1940.
- 5/ Hioka-mura in Kako-gun was incorporated into Kanogawa-machi in 1937.
- 6/ Shirahama-mura changed to a machi in 1936.
- 7/ A part of Sugano-mura in Shisō-gun was incorporated into Nishikurusu-mura in Ibo-gun since October 2, 1939.
- 8/ Shiyo-mura, Ozaki-mura, and Shinhamamura incorporated into Akō-machi in 1937.
- 9/ Takao-mura changed to a machi in 1936.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

Sources: Hōrei zensho; compiled and published by Naikaku, April 1941: pp. 559-653. Naikaku Kokuji No. 6, (Notification No. 6 of the Cabinet).

Nihon Chimei Daijiten 1937-38. (Great Dictionary of Japanese Place Names). (Referred to as the Sawada list).

GE: CBO/SS:hll
May 27, 1944.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Yasumuro-mura, Arakawa-mura, and Tegama-mura in Shikama-gun incorporated into Himeji-shi in 1936.
- 2/ Oda-mura in Kawabe-gun was incorporated into Amagasaki-shi in 1936.
- 3/ Sumoto-machi in Tsuna-gun was abolished and the same area was made a new city, Sumoto-shi, on February 11, 1940.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

1/ Hitachi-machi and Sukegawa-machi in Toga-gun were abolished and were incorporated into one and made a new city, Hitachi-shi, on September 1, 1939.

2/ Nakaya-mura incorporated into Tsucimura-machi in 1937.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Ono-machi, Togashi-mura, Yonemaru-mura, Kuratsuki-mura, Katazu-mura, and Awagasaki-mura in Ishikawa-gun were incorporated into Kanazawa-shi in 1935. Minma-mura and Sakiura-mura in Ishikawa-gun and Osaka-mura in Kohoku-gun were incorporated into Kanazawa-shi in 1936.
- 2/ Nanao-machi, Higashiminato-mura, Yatogō-mura, Tokuda-mura, Nishiminato-mura, Ishisaki-mura, and a part of Wakura-machi in Kashima-gun were amalgamated to be made a new city, Nanao-shi, since October 2, 1938.
- 3/ Shio-mura in Hakui-gun was changed to a machi in 1936.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zenaho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or groups of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Sendai-machi in Satsuma-gun was abolished and a new city, Sendai-shi, was established on February 11, 1940.
- 2/ Higashichikiki-mura changed to a machi in 1937.
- 3/ Ōsaki-mura changed to a machi in 1936.
- 4/ Higashikata-mura changed to a machi in 1936 and renamed Koniya.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

Sources: Hōrei zensho: compiled and published by Naikaku, April 1941: pp. 559-653. Naikaku Kokuji No. 6, (Notification No. 6 of the Cabinet).

Nihon Chimei Daijiten 1937-38. (Great Dictionary of Japanese Place Names). (Referred to as the Sawada list).

1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Takemiya-mura incorporated into Kumamoto-shi in 1936. Shimizu-mura in Hōtaku-gun incorporated into Kumamoto-shi on August 1, 1939.
- 2/ Yatsushiro-machi, Ōtagō-machi, Uyanagi-mura, and Matsutaka-mura in Yatsushiro-gun were abolished and a new city, Yatsushiro-shi, was established on September 1, 1940. Ōtagō-mura changed to a machi in 1936.
- 3/ Menda-mura changed to a machi in 1937.
- 4/ Yunome-mura changed to a machi in 1937.
- 5/ Shimotsufu-kae-mura amalgamated with Ōdadoko-mura and renamed Shimoda-mura in 1937.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ A part of Ukyō-ku in Kyōto-shi was incorporated into Nakayō-ku, Kyōto-shi, since October 2, 1938.
- 2/ Sasabe-mura, Araga-mura, and Shimotoyotomi-mura in Amada-gun were incorporated into Fukuchiyama-machi in 1936. Fukuchiyama-machi in Amada-gun was abolished and a new city, Fukuchiyama-shi, was established on April 1, 1937.
- 3/ Shiso-mura, Takano-mura, Nakasujimura, Ikeuchi-mura and Amauchi-mura in Kasa-gun were incorporated into Maizuru-machi in 1936. Maizuru-machi in Kasa-gun was abolished and was made a new city, Maizuru-shi on August 1, 1938.
- 4/ Shimmaizuru-machi, Nakamaizuru-machi, Kurahashi-mura, Yohoro-mura and Shiraku-mura in Kasa-gun were incorporated into one and a new city, Higashimaizuru-shi, was established in August, 1938.
- 5/ Yodo-mura in Otokuni-gun was incorporated into Yodo-machi in Kuze-gun in 1937.

Sources: Hōrei zensho: compiled and published by Naikaku, April 1941: pp. 559-653. Naikaku Kokuji No. 6, (Notification No. 6 of the Cabinet).

Nihon Chimei Daijiten 1937-38. (Great Dictionary of Japanese Place Names). (Referred to as the Sawada list).

GE: CBO/SS: hll
May 30, 1944.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Fujimizu-mura in Anō-gun was incorporated into Tsu-shi in 1936. Takajaya-mura in Ichishi-gun was abolished and was incorporated into Tsu-shi on July 1, 1939.
- 2/ Nishikuwana-machi in Kuwana-gun was incorporated into Kuwana-machi of Kuwana-gun on March 20, 1937. Kuwana-machi in Kuwana-shi was abolished and a new city, Kuwana-shi, was established on April 1, 1937.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

Sources: Hōrei zensho: compiled and published by Naikaku, April 1941: pp. 559-653.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Kogakura-mura, Doinokubi-mura, Kosakaki-mura, and Nishiurakami-mura in Nishisonoki-gun were incorporated into Nagasaki-shi on April 1, 1938.
- 2/ Ainoura-machi in Kitamatsura-gun was incorporated into Sasebo-shi on April 1, 1938.
- 3/ Shimabara-machi, Sugitani-mura and Annaka-mura in Minamitaki-gun were abolished and a new city, Shimabara-shi, was established on April 1, 1940.
- 4/ Isahaya-machi, Oguri-mura, Ono-mura, Uki-mura, Matsuyama-mura, Motono-mura, and Nagata-mura in Kitatakaku-gun were abolished and a new city, Isahaya-shi, was established on September 1, 1940.
- 5/ Taira-mura changed to a machi in 1937.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Horei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

1/ A part of Higashiichi-mura in Soekami-gun was incorporated into Nara-shi on April 1, 1939.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area of classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some Divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

1/ Kashiwazaki-machi in Kariha-gun was abolished and a new city, Kashiwazaki-shi, was established on July 1, 1940.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

Sources: Hōrei zensho: compiled and published by Naikaku, April 1941: pp. 559-653.
Naikaku, Kokuji No. 6 (Notification No. 6 of the Cabinet).

Nihon Chimei Daijiten 1937-38. (Great Dictionary of Japanese Place Names). (Referred to as the Sawada list).

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Yawata-mura, Takio-mura, and Higashiōita-mura in Ōita-gun were incorporated into Ōita-shi on August 15, 1939.
- 2/ Higashi-mura incorporated into Kitsuki-machi in 1936.
- 3/ Kitayafu-mura amalgamated with Minamiyufu-mura in 1935, and renamed Yufuin-mura.
- 4/ Tsuruoka-mura and Kamikatada-mura incorporated into Saeki-machi in 1937.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Uno-machi and Hibi-machi in Kojima-gun were abolished and a new city, Tamano-shi, was established on August 3, 1940.
- 2/ Kanaoka-mura in Jōdō-gun was incorporated into Saidaiji-machi of Jōdō-gun in 1937.
- 3/ Nazukawa-machi in Tsukubo-gun and Niwase-machi in Kibi-gun were abolished and a new machi, Kibu-machi, was established in Tsukubo-gun since October 2, 1936.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Kamiishi-mura in Semboku-gun was incorporated into Sakai-shi on February 11, 1938. Gokanoshō-mura and Mozu-mura in Semboku-gun and Kanaoka-mura in Hinamikawachi-gun were incorporated into Sakai-shi on September 1, 1938.
- 2/ Habugō-mura in Sennan-gun was incorporated into Kishiwada-shi on March 3, 1938.
- 3/ Toyonaka-machi, Asada-mura, Sakuraidani-mura, and Kumanoda-mura in Toyono-gun were abolished and a new city, Toyonaka-shi, was established on October 15, 1936.
- 4/ Fuse-machi, Mito-mura, Kosaka-machi, Okibe-mura, Kusune-machi, and Nagase-mura in Nakakawachi-gun were abolished and a new city, Fuse-shi, was established on April 1, 1937.
- 5/ Ikeda-machi in Toyono-gun was abolished and was made a new city, Ikeda-shi, on April 29, 1939.
- 6/ Suita-machi, Kishibe-mura, and Chisato-mura in Mishima-gun and Toyotsu-mura in Toyono-gun were abolished and a new city, Suita-shi, was established on April 1, 1940.
- 7/ Yagi-mura in Sennan-gun was incorporated into Haruki-machi in Sennan-gun in 1937.

- 8/ Kitanakodōri-mura in Sennan-gun was incorporated into Sano-machi in Sennan-gun in 1937.
- 9/ Kashihara-machi in Minamikawachi-gun, Katashimo-mura and Katakami-mura in Nakakawachi-gun were abolished and were incorporated into one to be made a new machi, Kashihara-machi, in Nakakawachi-gun since October 2, 1938.
- 10/ Sangō-mura in Kitakawachi-gun was changed to a machi in 1936.
- 11/ Suminodō-mura in Katakawachi-gun was changed to a machi in 1937.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

- 1/ Hasuike-mura changed to a machi in 1935.
- 2/ Tajiro-mura changed to a machi in 1936.
- 3/ Nishiyamashiro-mura changed to a machi in 1936 and renamed Yamashiro.
- 4/ Ōmachi-mura changed to a machi in 1936.
- 5/ Fukuji-mura changed to a machi in 1936, and renamed Shiraishi.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

1/ Hikone-machi, Matsubara-mura, Aonami-mura, Kitaoyagi-mura, Fukumitsu-mura, and Chimoto-mura in Inukami-gun were abolished and a new city, Hikone-shi, was established on February 11, 1937.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

Sources: Hōrei zensho: compiled and published by Naikaku, April 1941: pp. 559-653. Naikaku Kokuji No. 6, (Notification No. 6 of the Cabinet).

Nihon Chimei Daijiten 1937-38. (Great Dictionary of Japanese Place Names). (Referred to as the Sawada list).

GE:CBO/RKW:hgd
May 25, 1944.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

1/ Hachiman-mura and Kamona-machi in Myōtō-gun were incorporated into Tokushima-shi on April 1, 1937. Kamo-machi in Myōtō-gun was incorporated into Tokushima-shi on October 1, 1937.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

Sources: Hōrei zensho: compiled and published by Naikaku, April 1941: pp. 559-653. Naikaku Kokuji No. 6, (Notification No. 6 of the Cabinet).

Nihon Chimei Daijiten 1937-38. (Great Dictionary of Japanese Place Names). (Referred to as the Sawada list).

* A lack of data for 1940 indicates a change between 1935 and 1940 in area or classification of minor districts. All shi, gun, machi, and mura are listed here in order as given in the 1935 Sawada list. On the other hand, some divisions are listed in 1940 Hōrei zensho list and not in Sawada 1935 list. Data for 1940 for the "new areas" are given at the end of each gun or group of cities. Details of area and name changes are given in separate footnotes if available.

1/ Hamanaka-mura in Kaisō-gun was made a machi and a new name, Shimotsu-machi, was given on June 1, 1938.

Compiled from data on file in the Division of Geography and Cartography, Department of State.

Sources: Hōrei zensho; compiled and published by Naikaku, April 1941; pp. 559-653. Naikaku Kokuji No. 6, (Notification No. 6 of the Cabinet).

Nihon Chimei Daijiten 1937-38. (Great Dictionary of Japanese Place Names). (Referred to as the Sawada list).

YAMAGUCHI-KEN: TOTAL POPULATION, BY SEX, 1940 CENSUS,
BY SHI, GUN, MACHI, AND MURA.

III. SUPPLEMENT

JAPAN: TOTAL POPULATION, BY SEX, 1940 CENSUS, BY KEN, SHI, GUN, MACHI AND MURA

(SUPPLEMENT TO RELEASE NO. 112)

In the utilization of the population data printed in the Division of Geography and Cartography, Department of State, Release Number 112 entitled: JAPAN: TOTAL POPULATION, BY SEX, 1940 CENSUS, BY KEN, SHI, GUN, MACHI AND MURA, additional information has become available concerning area changes among the minor civil divisions during the period between 1935-1940.

In most cases the machi or mura marked by asterisks in the original tables can now be explained. If areas were listed in 1940 and did not exist in 1935, or if the reverse was true, attempts were made to indicate the changes regarding the transfer of territory between 1935 and 1940. The attached supplementary footnotes are listed alphabetically according to Ken name. The page numbers refer to those in the original release. The machi and mura names are given according to the Modified Hepburn System of transliteration as used in the tables.

In many cases a method of statistical computation has been used to determine the changes that have occurred. The 1935 populations of machi or mura no longer listed in the 1940 census within any particular gun have been added together and generally, the 1940 population of any new shi, machi, or mura may indicate a normal increase in population over the 1935 total of those not listed. Studies have been made of the Shi areas in 1940. In questionable cases a check has been made on maps to see if the areas are located adjacently according to the assumed transfers. It is safe to assume that the grouping as indicated in the attached list with the same limitations supplements the original list of footnotes.

Any errors discovered in this listing should be brought to the attention of this Division.

SUPPLEMENTARY FOOTNOTES BY KEN BY PAGE

(In some cases assumptions have been based only on evidence relating the 1935 and 1940 areas and populations in terms of statistics and geographical location.)

<u>KEN AND GUN</u>	<u>PAGE</u>	<u>FOOTNOTES</u>
AICHI-KEN Niwa-gun and Haguri-gun	2	Nishinari-mura in Niwa-gun and Haguri-mura in Haguri-gun were incorporated in Ichinomiya-shi.
Kitashidara-gun	3	Inahashi-mura and Busetu-mura in Kitashidara-gun, apparently consolidated to make Inatake-machi.
AKITA-KEN Yamamoto-gun	4	Noshirominato-machi, Sakaki-mura, and Shinonome-mura in Yaamoto-gun were incorporated into Noshiro-shi.
CHIBA-KEN Awa-gun	8	Tateyamahōjō-machi, Nako-machi, and Funakata-machi in Awa-gun were incorporated into Tateyama-shi.
Higashikatsushika-gun	9	Yahashira-mura in Higashikatsushika-gun apparently consolidated with Matsudo-machi.
EHIME-KEN Onsen-gun	10	Horie-mura, Shiomi-mura, Hisaeda-mura, Wake-mura, Mitsuhamamachi, Mibu-mura, and Kuwabara-mura in Onsen-gun were incorporated into Matsuyama-shi.
Ochi-gun	10	Tachibana-mura in Ochi-gun was incorporated into Imabari-shi.
Shūsō-gun	10	Taga-mura in Shūsō-gun apparently was incorporated in Niugawa-machi.
Uma-gun	10	Noda-mura and Tsune-mura in Uma-gun apparently were combined to make Nagatsu-mura.
Iyo-gun	10	Gunchū-mura in Iyo-gun apparently included Gunchū-machi.
Kitauwa-gun	11	Tachimajiri-mura in Kitauwa-gun apparently combined with Yoshida-machi.

<u>KEN AND GUN</u>	<u>PAGE</u>	<u>FOOTNOTES</u>
HOKKAIDŌ Shiribeshi-shichō	26	No evidence is available concerning the change of political jurisdiction of Asari-machi and Takashima-mura in Shiribeshi-shichō.
Sōya-shichō	27	Esashi-mura was apparently divided and a portion of it became Kato-mura in Sōya-shichō.
Rumoe-shichō	27	Horonobu-mura in Rumoe-shichō probably divided with a part becoming Toyotomi-mura.
HYŌGO-KEN Arima-gun	28	Dōjō-mura in Arima-gun probably made another mura under name of Michiba.
Akō-gun	29	No evidence is available concerning the change in political jurisdiction of Naba-machi in Akō-gun.
IBARAKI-KEN Naka-gun	31	Minato-machi in Naka-gun apparently became Nakaminato-machi in same gun.
Naka-gun	31	Nakano-mura and Kawata-mura in Naka-gun probably were incorporated into Katsuta-machi in same gun.
Taga-gun	31	Kokubu-mura, Kawarago-machi, and Ayukawa-mura in Taga-gun apparently combined into Taga-machi, same gun. Also, Matsubara-machi apparently became Takahagi-machi in same gun.
Niihari-gun	32	Azuma-mura in Niihari-gun apparently incorporated into Tsuchiura-machi in same gun.
Tsukuba-gun	32	Kashima-mura and Nagasaki-mura in Tsukuba-gun apparently incorporated into Tanihara-mura in same gun.
ISHIKAWA-KEN Kashima-gun	34	Wakura-machi in Kashima-gun was divided and part of it included in Nanao-shi and remainder apparently made Tazuruhama-machi in Kashima-gun.
IWATE-KEN Iwate-gun	36	Kuriyagawa-mura in Iwate-gun was incorporated into Morioka-shi.

<u>KEN AND GUN</u>	<u>PAGE</u>	<u>FOOTNOTES</u>
KAGAWA-KEN Kita-gun and Kagawa-gun	38	Furutakamatsu-mura, Yashima-machi, Kita-mura, in Kita-gun, and Ōta-mura and Sagita-mura in Kagawa-gun have been incorporated into Takamatsu-shi.
KANAGAWA-KEN Tachibana-gun	41	Inada-machi, Miyasaki-mura, Mukaioka-mura, and Ikuta-mura in Tachibana-gun were incorporated into Kawasaki-shi.
Kamakura-gun	41	Kamakura-machi and Koshigoe-machi in Kamakura-gun were incorporated into Kamakura-shi.
KUMAMOTO-KEN Kamimashiki-gun	45	Takio-mura and Mizukoshi-mura in Kamimashiki-gun were consolidated and made Takimizu-mura, same gun.
MIYAGI-KEN Monō-gun	51	Takaki-mura in Monō-gun was made a machi and renamed Yamoto in same gun.
MIYAZAKI-KEN Koyu-gun	53	Uwae-mura in Koyu-gun apparently incorporated into Takanabe-machi, same gun.
NAGASAKI-KEN Higashisonoki-gun	57	Nishiō-mura and Takematsu-mura in Higashisonoki-gun were apparently consolidated with Ōmura-machi of the same gun.
NIIGATA-KEN Kitakambara-gun	60	Kōnuma-mura in Kitakambara-gun apparently consolidated with Shibata-machi, same gun.
Nakakambara-gun	60	Ogikawa-mura in Nakakambara-gun apparently consolidated with Niitsu-machi, same gun.
Kariha-gun	61	Kujiranami-mura in Kariha-gun has been consolidated with Kashiwazaki-machi, same gun.
ŌITA-KEN Ōita-gun	63	Beppo-mura in Ōita-gun apparently consolidated with Tsurusaki-machi in same gun.

RESTRICTED

- 103 -

<u>KEN AND GUN</u>	<u>PAGE</u>	<u>FOOTNOTES</u>
OKAYAMA-KEN Wake-gun	65	Katakami-machi in Wake-gun apparently renamed Katayama-machi.
Kume-gun	66	Shitorihigashi-mura, Shitorinaka-mura in Kume-gun apparently consolidated and renamed Shitori-mura in same gun. Tatsukawa-mura may have joined Yuge-machi in same gun.
OKINAWA-KEN Shimajiri-gun	68	Iheya-mura in Shimajiri-gun apparently divided and a new mura established under name of Ijina in same gun.
ŌSAKA-FU Sennan-gun	69	Amaka-mura and Higashikatsuragi-mura in Sennan-gun consolidated with Kishiwada-shi.
Minamikawachi-gun	69	Chiyoda-mura and Amano-mura apparently consolidated with Nagano-machi in Minamikawachi-gun.
Kitakawachi-gun	70	Furumiya-mura and Morozutsumi-mura in Kitakawachi-gun became Manta-machi in the same gun.
Kitakawachi-gun	70	Information is incomplete to absolutely determine the allocation in 1940 of a number of machi or mura listed in the 1935 Sawada List. Nevertheless the following facts have been determined: Hirakata-machi in Kitakawachi-gun in 1940 had a total population of 32,619 in contrast with 7,393 in 1935. In all probability, the area was enlarged to include adjoining machi or mura. Sangō-machi in Kitakawachi-gun had a population of 14,700 in 1940 and only 8,813 in 1935. Likewise Moriguchi-machi in Kitakawachi-gun had a population of 25,482 in 1940 and only 11,678 in 1935.

RESTRICTED

<u>KEN AND GUN</u>	<u>PAGE</u>	<u>FOOTNOTES</u>
		Tonoyama-machi (5,734) and the following mura - Kawagoe (2,966), Iwafune (1,474), Yamada (2,962), and Kuzuha (1,990) in Kitakawachi-gun were not listed in the 1940 census list but had the populations in 1935 as indicated.
		In all probability, the four mura and one machi listed above were incorporated into one of the three machi having a relatively large increase between 1935 and 1940. Even though these areas are located on maps, it has not been possible to decide into which machi they have been incorporated.
SAITAMA-KEN Kitaadachi-gun	72	Shiba-mura, Shingō-mura, Hatogaya-machi, and Kamine-mura, in Kitaadachi-gun were incorporated into Kawaguchi-shi.
Kitaadachi-gun	72	Omaki-mura and Mimuro-mura in Kitaadachi-gun were incorporated into Urawa-shi.
Iruma-gun	72	No evidence is available concerning the change in political jurisdiction of Ueki-mura in Iruma-gun.
Iruma-gun	72	Tanomezawa-mura in Iruma-gun was incorporated into Kawagoe-shi.
Iruma-gun	72	Yamane-mura in Iruma-gun apparently consolidated with Moro-mura in same gun.
SHIMANE-KEN Ano-gun	76	Sakka-mura and Hanenishi-mura in Ano-gun apparently consolidated and made Hisade-machi in same gun.
Naka-gun	77	Tsuno-mura and Watatsu-mura in Naka-gun were apparently combined with Gōtsu-machi in same gun.
SHIZUOKA-KEN Fuji-gun	78	Shimada-mura in Fuji-gun apparently consolidated with Yoshiwara-machi in same gun.

<u>KEN AND GUN</u>	<u>PAGE</u>	<u>FOOTNOTES</u>
TOCHIGI-KEN Nasu-gun	80	Naka-mura in Nasu-gun apparently made a machi under name of Okawa.
TŌKYŌ-FU Ogasawara-jima	83	The island group of Ogasawara-jima probably was organized differently in 1940 than in 1935. The change could not be determined.
TOYAMA-KEN Kaminiikawa-gun	86	Shinjō-machi, Shima-mura, Hariwara-mura, Hamakurosaki-mura, Ōhirota-mura, Higashiwase-machi, Toyota-mura, and Hirota-mura in Kaminiikawa-gun were all consolidated into Toyama-shi.
Shimoniikawa-gun	86	In Shimoniikawa-gun nine mura and one machi appearing in the 1935 list are not in the 1940 list. On the other hand, two machi are listed in 1940 and not in 1935. It is not clear what combinations of incorporation may have taken place. The areas in question are listed here with 1935 populations:
		Shimoniikawa-gun
		Ishida-mura 3,045
		Taie-mura 1,258
		Muratsubaki-mura 1,940
		Ōfuse-mura 1,977
		Mikkaichi-machi 3,743
		Maezawa-mura 1,560
		Ogyū-mura 2,277
		Wakakuri-mura 1,591
		Urayama-mura 1,729
		Oritate-mura 1,839
		Total 20,950
		These probably were put into Sakuraimachi 17,326 (1940) and Higashiyamura 3,270 (1940).

<u>KEN AND GUN</u>	<u>PAGE</u>	<u>FOOTNOTES</u>
TOYAMA-KEN (Cont.) Nei-gun	86	Nishikureha-mura (5,266-1935 census) may have become Kureha-mura (6,174-1940 census. Information is not available concerning Shimmei-mura (1,043-1935 census) and Furusawa-mura (1,378-1935 census). These three mura (as listed in 1935) are not listed in the 1940 census.
Nishitonami-gun	87	Sannō-mura and Ōtaki-mura in Nishitonami-gun apparently consolidated with Fukuoka-machi in same gun.
WAKAYAMA-KEN Kaisō-gun	88	Nozaki-mura, Minato-mura, Kimiidera-machi, and Sanda-mura in Kaisō-gun were consolidated into Wakayama-shi.
Nishimuro-gun	88	Setokanayama-mura in Nishimuro-gun apparently made a machi under name of Shirahama.
YAMAGUCHI-KEN Kumage-gun	92	Mitsui-mura, Shimata-mura, Asanae-mura, and Mii-mura in Kumage-gun apparently consolidated to make Hikari-machi.
Tsuno-gun	92	Kubo-mura Kudamatsu-machi, Suetakeminomi-mura, and Hanaoka-mura in Tsuno-gun probably became Shimomatsu-shi.
Tsuno-gun	92	Taika-mura apparently changed to Kushihama-machi in Tsuno-gun.
Saba-gun	92	No evidence is available concerning the change in political jurisdiction of Nishinoura-mura in Saba-gun.
YAMANASHI-KEN Kitakoma-gun	94	Sarashina-mura in Kitakoma-gun may have been included with Ubaishi-mura in Kitakoma-gun when incorporated into Nirasaki-machi.
Minamitsuru-gun	95	Mizuho-mura in Minamitsuru-gun apparently changed to Shimoyoshida-machi.

February, 1945.

IV. APPENDIX

The February 1944 Population Census

The actual census data obtained in February 1944 is not available. The following description of the preliminary arrangements for taking the census is useful only as a basis for interpreting Japanese census data.

It was stated by the Japanese Government that the 1944 population census, which was to be conducted throughout Japan on 22 February 1944, was for the purpose of repulsing the war strength of the enemy. It was stated that the government would be providing at that time material which would effect the mobilization of military strength, the mobilization of industrial fighters, the strengthening of transportation, the harmonization of the distribution of the food stuffs, etc. In other words this census was to be a stock-taking prior to the all-out attack.

The government warned that the results of this census must at all costs be accurate. Every effort should be made to avoid the use of unreliable statements. The government insisted that a reliance upon the accuracy of this census must be regarded as the mutual responsibility of the entire nation.

A. Time of Census

The time of the census was to be midnight 22 February 1944. It was stated however that the census takers would not come around to the households in the middle of the night, but each household would report the true state of its affairs exactly as they were as of midnight 22 February.

B. Scope and Method of Census

The 1944 census was to enumerate all persons who were in Japan at the time of the census. Military and naval personnel were to be omitted. However, army and navy personnel who were at their homes on midnight 22 February were to be enumerated as a part of the household.

The government emphasized that reports were desired from the heads of all households. The managers of semi-residences, such as boarding houses, hospitals, inns, etc., were to be included and would report in the same manner. The report of the head of the household was to include all persons who were actually in his household at midnight 22 February. The government particularly warned against the deliberate preparation

of false reports which included as actually present near relatives who were not within one's own household and stated that such false reports would infringe existing penal regulations.

There were several exceptions to the plan that the census would include persons actually present in the household. These special cases were to be handled as follows:

- (1) Those who were at places which were not their households, such as government offices or factories, or those who were out on the roads at night at midnight 22 February, but who would return to their households on the day of the 22nd, would be reported by their households as being actually present.
- (2) Those who were on trains, street-cars, or on boats and rafts which were not households, or those who were traveling at night and who previously knew clearly that there would be no opportunity for them to be counted at their domicile, were to be counted as members of the household from which they last departed. Those who did not know clearly in advance - in other words, persons who were unable to make a schedule at the time of departure and who would spend the period of the census on a train - were to report as members of the first household at which they arrived prior to 0800, 22 February.
- (3) Persons who were actually in Japan (including Karafuto) at midnight 22 February were on their own initiative to be enumerated by the nearest census taker or by reporting to a municipal mayor or a town or village head before 25 February, if they knew that they would not be reported at any household.

As for the reports, one declaration form for each person was to be used. A sample declaration form appears on the opposite page as Figure I. Forms were to be distributed to each household by the census takers in advance until 20 February. If forms were not received by 20 February, the people were urged to apply to the census takers or to municipal mayors or town and village heads. The declaration forms were to be filled in by 0800 on the 22nd and were to be presented to the census takers making the rounds.

C. Matters for Investigation

The individual declarations were to contain information on eight specific items: (1) domicile; (2) name; (3) sex; (4) age; (5) marital status; (6) industry to which one belonged; (7) occupational status; and (8) military service.

(2) Reserve or Service in Conscript Reserve; (3) Service in National Army; and, (4) Number.

D. Method of Filling in Declaration.

It was explained that the distribution of declaration forms would be accompanied by the distribution of a one-page explanation sheet entitled "Method of Filling in Declaration". This explanation sheet was intended to serve as a guide for filling in the declaration. It explained in detail what was to be entered on the declaration and was intended to be used for reference. Those filling in the forms were urged not to hesitate to consult the census takers in the event that questions were not answered by reference to the explanation sheet.

E. Results of the Census

It was the opinion of the government that the 1944 census would perform a vital function in the mobilization of military strength and industrial fighters. It was emphasized that it was necessary to carry this project through with the greatest speed. In these circumstances it was pointed out that the so-called regional survey method or Chichō Bansa would be adopted and that later various cities, towns and villages would be made to compile the statistical tables most urgently needed by the government. The government apparently had plans to rely to a considerable extent on the work of the Women's Labor Patriotic Corps or Joshi Kinrō Hokoku Tai and The Volunteer Corps or Teishin Tai. A final admonition was made by the government with respect to those people who would participate in the investigation work, especially in the compilation of statistics. All such workers were warned that it was necessary to preserve strictly the secrecy of such statistics and to take double precautions against enemy attempts at espionage.

Registration of Science Technicians

A. Those Who Must Register

In addition to the February population census the government announced a revised system for the registration of science technicians. In accordance with this revised system for the registration of nationals, declarations of science technicians were to be received by the National Labor Mobilization Office not later than 31 March 1944. Science technicians who were compelled to register were those specializing in engineering, science, agriculture, and psychology at universities and technical schools, those who had graduated from these colleges, and those who had scholarly attainments equal to or superior to this level. These schools and subjects, and those with attainments equal to or superior to this level had been specifically designated in an announcement of the Welfare Ministry

on 21 February 1944. There was no age limit specified for those who came within the terms of these categories as there was in the case of the February population census. Men in the active military or naval service, those in the process of going into the military or naval service, students in Army and Navy schools, civilians attached to the Army and Navy, doctors, dentists, pharmacists, veterinarians, crews of ships, and those adjudged unfit were excluded from the registration.

B. Facts to be Declared and Method

The items to be declared in the technician's registration, in addition to full name, month and day of birth, sex, registered domicile, residence address, academic career and matters related to occupation, were information of personal experience related to scientific technique, title, degrees, scientific technical organizations to which one belonged, and honors which had been received. In making a declaration it was required that a fixed "Science Technician's Declaration" form be used. Two copies of this declaration were issued by the National Labor Mobilization Office together with a set of regulations explaining the details of the form to those who had registered in the national registration. Those who had not received these forms and those who had not registered in the national registration could receive copies by requesting them at the National Labor Mobilization Office.

It was contemplated that when science technicians were engaged in an occupation, they would report to the Welfare Ministry by way of the chief of the National Labor Mobilization Office having jurisdiction over the district in which they were working. If such technicians were not employed, they were to report through the chief of the National Labor Mobilization Office having jurisdiction over the district in which they resided. The government announced that there was a responsibility upon such technicians to inform their employers of the registration before filing the declaration. Provision was made in the declaration for the employers' address, the employers' name or names, and the employers' seals. In the case of declarations of technicians employed in government offices designated by the Ministry of Welfare, they were to be filed in conformity with the regulations entitled "Cases of Special Declarations Based on the Law for Declarations Regarding National Occupational Ability of Technicians Employed in Government Offices". When registration had been completed in the manner outlined above, the "Occupational Ability Declaration Memorandum" was to be delivered to science technicians.
