The copy filmed here has been reproduced thanks to the generosity of:

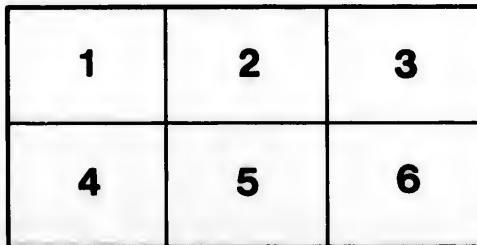

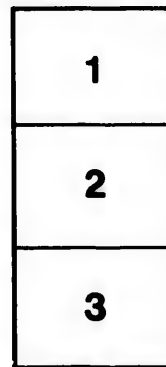

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

EXPLANATION OF THE CALENDAR PAGES.

LEFT HAND PAGE.

Columns.

- 1 & 2. Days of the month and of the week.
- 3 & 4. Rising and setting of the *upper limb* of the Sun.
5. The Sun's declination for the same as the Equation, 6th column.
6. Equation of Time (or quantity by which the Sun is *slow* or *fast* of the clock at noon, apparent, not mean, time, at Greenwich). Equation of time is the difference between *mean* and *apparent* time. There are only four periods of the year when this difference is nothing, viz:—About April 15, June 14, September 1, and December 24, as may be seen on reference to this column.
7. Length of Days in Hours and Minutes.
- 8 & 9. The rising and setting of the Moon.
10. The time of the Moon's southing, or passing the meridian,—this column also gives the time of Highwater at Parrashoro', Horton, Cornwallis, Hantsport, Windsor, Newport, Truro, &c.
11. The Moon's place in the Signs, or Constellations of the Zodiac.

At the top of the columns on this page is given the Moon's Phases, or times of new and full moon, and of the First and Last Quarters, or quadratures of the Sun.

RIGHT HAND PAGE.

Columns.

1. The days of the Month.
2. Holidays, Anniversaries, &c.

5. " " " " Annapolis, N. S., St. John, N. B., and Portland, Maine.
6. " " " " St. John's, Nfld.,—of that tide which immediately precedes the southing of the Moon.

All the calculations are made to mean solar time.

Apogee is that point in a planet's orbit in which it is farthest from the earth.

Perigee is that in which it is nearest to it.

Lunation the time from new moon to new moon again.

Pernumbra a partial shadow, resulting from the diminished light of the sun to the earth or moon, during a solar or lunar eclipse, appearing as partial.

Aphelion—That part of a planet's orbit farthest from the Sun.

Ecliptic the plane of the earth's orbit extended to the starry sphere.

Perihelion is that part of a planet's orbit nearest the Sun.

Declination is the distance of a heavenly body from the Equinoctial line.

Elongation—Angular distance of a planet from the Sun, as seen from the earth.

THE NEW YEAR
 Let us welcome here
 The glad New Year,

With songs of praise, heartfelt, sincere;
 And a respite give to the weary heart,
 To enable it better to bear its part
 'Mid the sorrows and woes that may upstart
 In its path through the coming year.

THE FARMERS' FRIEND.

HORSES BALLING—The balling of snow on horses' feet may be materially lessened, by making the upper side of the shoe wider than the lower side, so that the inner edge will be bevelling outward. If constructed in this way the balls of snow would more readily fall out than if held by square-sided shoes. The suggestion is worthy the attention of blacksmiths, or those who have horses to be shod. At best, damp snow will pack into the shoe; but if the lower side of the opening be the widest, it will be more likely to drop out.

REMEDY FOR CHOKED CATTLE.—As soon as you discover that the creature is choking, take hold of the windpipe, below the potatoe, or whatever it is, with both hands, having one thumb on each side, and work out. If that fails, take a horse-shoe and put into the mouth to hold it open, then run the hand down the throat and take it out. An ox once choked with a potatoe will throw it out by giving him two or three spoonfuls of Cayenne pepper.

THE FAMILY FRIEND.

HOME PLEASURES.

Now stir the fire, and close the shutters fast,
 Let fall the curtains, wheel the sofa round,
 And while the bubbling and loud-hissing urn
 Throws up a steamy column, and the cups
 That cheer, but not inebriate wait on each,
 So let us welcome peaceful evening in.

Who is wise? He that is teachable Who is mighty? He that conquers himself.
 Who is rich? He that is contented. Who is honored? He that honoreth others.

THE FARMERS' FRIEND.

THE MULE.—A correspondent of the *Wisconsin Farmer* sums up the merits of the mule as compared with the horse, as follows:—1. He is much more easily and cheaply raised than his cousin, the horse. 2—He eats but little more than half as much when untrained. 3—He is satisfied with and thrives upon a coarser and less expensive kind of provender. 4—It costs less to keep him in harness and in shoes. 5—He is proportionately stronger. 6—He is very much tougher. 7—He is less liable to disease. 8—He has more sense and docility. 9—He is better adapted to some important kinds of work. 10—He is a true puller, and, when loaded a quicker traveller. 11—He sells for a better price. 12—He lives more than twice as long. 13—He is better looking! [No accounting for taste.] 15—In nothing but fleetness is he excelled by the horse.

SOUND ADVICE.—A Scotchman, telling the secret of his success in farming, thus concluded: "Above all things, Sandie, never get in debt; but if you do, let it be for manure."

THE FAMILY FRIEND.

MAKE home attractive. When a child begins to hate his home, he has already reached the "border states" on his way to the devil's territory. Be careful how you trust your sons with a night-key: it has opened to youth many a door to ruin. If your children are away from home at night, you should know, if possible, where they are.

THE FARMERS' FRIEND.

HEAVES IN HORSES.—Horses fed in part on carrots seldom suffer from heaves; they will be found to have a silky coat as well as a loose hide, and enjoy far better health than when hay and oats alone are used. Three quarts of carrots and three quarts of oats will sustain a horse much better than six quarts of oats. When the carrots form part of the feed, all the oats will be digested and assimilated; but, when oats alone are fed, the dung will be found to contain whole oat shells, undecomposed starch, amounting to more than half the quantity of oats consumed. The floor of every cutting box should be ribbed or opened so as to permit all dust to pass down before the hay reaches the cutting knives. Many horses are rendered asthmatic by being fed on dusty hay, and, consequently, every means calculable to remove the dust should be resorted to.

Notwithstanding the various opinions which now prevail in regard to shoeing horses, all will confess that a shoe with a concave surface next the ground is the only proper one to apply.

EVERGREENS.—The best time to transplant evergreens is when the tree begins to push its buds, or a little after. From the middle of April to June, in this latitude, is a good period. A calm, warm, cloudy day should be chosen for transplanting. The roots of an evergreen should never be allowed to get dry, or become chilled, when taken up. It is the exposure of the roots to such influences that kills so many of these trees. Care also should be taken to save all the roots. They are more injured by cutting the roots than other trees.

THE FARMERS' FRIEND.

MEADOWS.—As soon as these are dry enough to bear feet without injury to the turf, they should be carefully picked of all loose and projecting stones. Stumps should be dug or pulled out, accidental brush or other rubbish removed, and small hillocks levelled down.

Meadows which were top-dressed with coarse manure in autumn or winter, which was more or less spread in lumps, should be harrowed as early as possible, so as to break those lumps and spread the whole uniformly. Cattle droppings, on meadows or pastures, should be finely beaten to pieces and well scattered over the surface, as soon as the frost will admit, and before the frost has all disappeared from the soil. It is scarcely necessary to mention that no good farmer ever allows either his meadows or pastures to be touched by a hoof early in spring while the ground is soft.

The best oil for harness is one quart neat's foot oil, four ounces beef's tallow, and three table-spoonfuls of lampblack; add four ounces of beeswax for use in summer weather.

THE FAMILY FRIEND.

NEW FLEDBUG TRAP—SURE THING.—Take a board, say a foot wide and four feet long, punctured with many holes with a small bit, put it beside the headboard and next to the bed and pillows; if there is a bug about the bed, he will find the way to the holes in the board soon. Take it out of its place every morning, hold it over the fire or water, and give it a few raps with a hammer, then put in place and repeat. This is catching the *insect* in a hurry and upon philosophical principles—the best antidote we have yet heard of.

THE FARMERS' FRIEND.

EARLY POTATOES.—New potatoes are a great luxury in July, and a little attention and forethought now will enable us to have them upon our tables a fortnight or three weeks earlier than those of our neighbours who may be less disposed to force the season. Select a quantity of seed potatoes sufficient for our first planting, and spread them evenly in the centre of a heap of horse manure, and there let them sprout. As soon as the frost will permit, remove them carefully, and plant in a piece of warm, well-pulverized ground, taking care not to break the sprouts, and give to each hill a generous shovelfull of fine barn-yard manure. After they break the soil, the subsequent frosts may nip the tender shoots; but, if well covered, the roots will continue to grow, and the gain in time over unsprouted seed in producing an early crop will be quite surprising to those who have not planted in this manner.

In milking, the hands should be dry and clean, as wet hands crack the teats in cold weather, and dirt injures the skin.

REMEDY AGAINST MOTHS.—An ounce of gum camphor, and one of the powdered shell of red pepper, are macerated in eight ounces of strong alcohol for several days, then strained. With this tincture, the furs or cloths are sprinkled over, and rolled up in sheets.

FRECKLES may be reduced very considerably in depth of colour by the use of a weak solution of chloride of lime or soda, in union with glycerine, viz : chlorinated soda, $\frac{1}{2}$ ounce; glycerine, 1 oz.; rosewater, 10 $\frac{1}{2}$ ounces. Use night and morning freely, with a sponge.

THE FARMERS' FRIEND.

WASH FOR FRUIT-TREES.—Put a pailful of water in a tub, and stir in three quarts of fresh cow manure, one quart of soft soap, two quarts sifted wood ashes, and add urine enough to make the mixture of the consistency of white-wash. Apply this to the trunks and limbs of the tree early in June, with an old broom. The manure and ashes form a coating which the rain gradually removes, leaving a clean-glossy bark, and also carrying fertility into the soil.

A correspondent of the *London Journal of Horticulture* recommends sulphuric acid for destroying weeds in gravel walks—a solution of seven parts of water to one of acid being used. If chalk or lime abound, the acid is speedily neutralised, and the weeds spring up again.

THE APPLE TREE BORE is a sad pest of the orchard. To repel this beetle from depositing its eggs upon the bark, the tree, towards the latter part of May, and until the end of June, should be rubbed with soft soap, or have some other alkaline substance applied to it. The application must be repeated, as copious rain washes it off. Dusting the butts of the trees thickly with air slacked lime, is also thought to be a good method.

THE FAMILY FRIEND.

A MEDICAL PRESCRIPTION.—Dr. Abernethy did almost as much good to his patients by his sharp wit as by his medicines, and innumerable stories are told of his dry humor. Here is a good one that we do not remember to have seen before.

His prescription to a wealthy patient was: "Let your servant bring you three or four pails of water and put it into a wash tub; take off your clothes, get into it and from head to foot rub yourself well with it, and you'll recover."

"This advice of yours seems very much like telling me to wash myself," said the patient.

"Well," said Abernethy, "It is open to that objection."

THE FARMERS' FRIEND.

NOTES FOR JULY.—Hoe and weed corn, potatoes, and all other crops; run the cultivator through them when the opportunity offers. Buckwheat and turnips may be sown this month. Make early preparation for harvesting; repair barn, vehicles, and tools. Get the best tools in the market; the extra cost of a good article may be earned in a day's work. Clover should be cut while in bloom. Timothy and red-top do not ripen till a fortnight after clover; they should be cut while the seed is in full mild, and before it is so ripe as to shake out when handled. Cut down and root out weeds before seeding; gather flowering herbs, and dry quickly in the sun.

RAT KILLING RECIPE.—Cut clean fine sponge in pieces of pea size, fry well in hog's lard, and expose in infested place about the houses, barns, granaries, gardens, etc., keeping cats and dogs shut up. The rats eat it greedily, but do not as readily digest it, the gastric juice, and especially water, if accessible to them to drink, swells the sponge, and noise in rathom is the result. The dose proves fatal in most cases.

THE FAMILY FRIEND.

There are four kinds of readers,—the sponge, the funnel, the strainer, the sieve. The sponge sucking up all; the funnel taking at one end and letting out at another; the strainer separating the wine from the lees; the sieve dividing the bran from the fine flour.

Health is impaired, and oven life lost sometimes, by using imperfect, unripe, musty, or decaying articles of food. The same money's worth of a smaller amount of food is more nutritious, more healthful, and more invigorating, than a much larger amount of what is of an inferior quality.

THE FARMERS' FRIEND.

THE POTATOE ROT.—To prevent potatoes from the disease or rot, put a spoonful of salt into each hill, so as to have it dissolve and go down to the roots. It will cool the ground and prevent the rot; and even if the rot has commenced, the salt will cause the rot to go off, and leave a scar around the potatoe plain to be seen. Put the salt on when the potatoe vines are nearly grown. The extra quantity of potatoe will more than pay for the salt.

A NOSEGAY THAT WILL KEEP TILL CHRISTMAS.—Take a wooden box, large enough to hold as many flowers without pressure as you intend to preserve;—make the box tight, to exclude light and air; place at the bottom a sheet of white paper, then a layer of nice young cut flowers, next another sheet of paper, and so alternately flowers and paper till the box be full. Close the box carefully—place in a cellar or damp room. At Christmas you will have a nosegay as beautiful as in the middle of summer.

THE FAMILY FRIEND.

A QUART of flour weighs one pound, a quart of corn meal one pound and two ounces, a quart of butter one pound one ounce, a quart of loaf sugar one pound, a quart of white sugar powdered one pound one ounce, a quart of best brown sugar one pound two ounces; ten eggs weigh one pound, though this depends somewhat on the size; sixteen large table-spoonfuls make a half pint.

A man may be known by three things: by his conduct in money matters; by his behaviour at the table; by his demeanor when angry.

THE FARMERS' FRIEND.

TO DESTROY CANADA THISTLES.—Leaves are the lungs of plants. Kill the leaves and the plant will die. If Canada thistles are cut off even with, or below the surface of the ground, the operation being repeated as often as they make their appearance, they will be effectually destroyed. This process should especially be carried on in the latter part of summer. A thorough eradication of the top growth about the last of August or the first of September is of the greatest importance.

SAVE YOUR POULTRY DUNG.—It is worth vastly more than stable manure. It is well to keep a little moist loam mixed with it, to absorb the ammonia, which is very strong, and readily unites with the humic acid of the ground. For any choice garden plot, or a small bit of ground requiring extra manuring, this is the stuff to apply.

COW'S TEATS CRACKING.—Never wet them with milk; but use at each milking a little milk or molasses. Either will prove a remedy.

THE FAMILY FRIEND.

A SURE RULE FOR COOKING EGGS.—Put them into cold water; when the water boils, take out your eggs, and they will be found "just right."

Give heed to the least of God's commandments, and fly from sin; for one sin leads to another sin.

Consider three things when tempted to sin: There is an eye that sees thee; There is an ear that hears thee. All thine actions are recorded in a book.

Accustom thy tongue to say, I know nothing.

THE FARMERS' FRIEND.

FARM WASTE.—One of the greatest wastes of many, and perhaps most farms, is the excrementitious matter of the family, and also of the domestic fowls. The first is buried upon some farms, generation after generation, in deep vaults below the surface. Fowls are allowed to roost here and there and everywhere; on trees, in the barn, over the wagon, or on top of some of the farm buildings. The manure, if carefully saved and well applied, that a large stock of poultry would make in a single season, would nearly pay for the erection of a plain poultry house. The carcasses of dead animals is another of the foolish wastes of some farmers. The body of a dead horse is worth more than an ordinary sucking colt; and the body of a dead cow is worth more than a vermin covered spring calf, with all his life.

TO PREPARE GREEN CORN FOR WINTER.—Cut it from the cob without scalding, and spread on plates. Keep it as near the stove as possible, and stir it often. It will dry quickly and keep well. When preparing it for the table, it is much better to change the water after it has soaked half an hour.

VERY PALATABLE AND WHOLESOME BROWN BREAD.—Graham Flour, Indian Meal and Rye Meal, one quart each; or, if Rye Meal cannot be had, 1 pint of rye flour—or this may be omitted—mix together, thoroughly—adding a little salt, put in 7 or 8 gills of molasses, according to taste—dissolve in a very little lukewarm water 2 1/2 tea-spoonfuls soda—and add to the flour and meal—add one quart of sour milk or butter-milk—mix well. Steam in a covered pan 3 or 4 hours; then bake in a quick oven for 20 minutes. When stale, this bread may be warmed and freshened by being put in the steamer for 15 or 20 minutes. This is a most excellent bread, and for dyspeptics is invaluable.

THE FARMERS' FRIEND.

LICE ON CATTLE.—The *Boston Cultivator* recommends the use of fine sand, as a preventive and cure for lice on cattle. Haul into the barn a few loads of loam or fine sand, and spread it under the stock during the winter. If any of the creatures are lousy when coming to the barn in the autumn, throw some of the sand or loam upon them; it fills the hair and causes the lice to roll off, but does not kill the nits; the application must be repeated two or three times a week, until every generation is exterminated. Bulls are noted for their freedom from lice, and it is probably owing to their habit of pawing up earth and throwing it over their bodies.

It is the custom in Yorkshire to give cows something to eat during the milking to keep them pleased under the process, but many think they can be trained to stand perfectly still, much better in the absence of food.

WELCOME CHRISTMAS!

Thrice welcome, Christmas!—happy, festive time,—
 The happiest time in all the circling year,—
 We bless thy coming, for thou bring'st us hours
 Of unalloyed delight. Blessed Christmas time!
 How gloriously grand thy origin,—
 The birth-morn of the world's Redeemer!—
 Pass not away, till thou hast writ, in deep
 And lasting characters, upon our hearts,
 The heaven-born name of Love.

THE FARMERS' FRIEND.

To KEEP POTATOES.—Dust over the floor of the bin with lime, and put in about six or seven inches deep of potatoes, and dust with lime as before. Put in six or seven inches more of potatoes, and lime again; repeating the operation till all are stowed in that way. One bushel of lime will do forty bushels of potatoes, though more will not hurt them; the lime rather improving the flavor than otherwise.

SANDY SOILS CAN BE STIRRED TOO MUCH.—A correspondent of the Farmer and Gardener thinks the New Jersey farmers use the plow, harrow, and cultivator too frequently, and the roller too seldom. Sandy soils are too full of air, and require much heavy rolling to make them compact and retentive of moisture.

Cows.—Cows should be kept warm and comfortable, and well bedded. They should be fed regularly; and the hay, before given them, should be well shaken and dusted. An occasional change of food would be beneficial.

DIRECTIONS FOR THE DAILY READING OF HOLY SCRIPTURES IN PRIVATE.

The whole Bible may be read through in a year, by reading *three* chapters on each working day, and *five* chapters on each Sabbath.

To accomplish this, read every day *two* chapters in the Old Testament, omitting the Psalms, Proverbs, Ecclesiastes, and Solomon's Song. Read, in addition, every working day, *one* chapter, and every Sabbath day *three* chapters in the New Testament, Psalms, Proverbs, Ecclesiastes, and Solomon's Song.

The New Testament, with the above four books in the Old Testament, furnishes the supply just named for the year, less eight chapters. To supply this deficiency, read together two of the 22 divisions of Psalm cxix., the short Psalms cxvi. with cxxxi. and cxxxii., and Psalms cxxxiii. and cxxxiv.

LIGHT HOUSES.

On the coast of Nova Scotia, and on the coast of New Brunswick, in the Bay of Fundy, Cape Race, Newfoundland, Gulf and River St. Lawrence, and Strait of Belle Isle.

MEAGHER'S BEACH—East side Halifax Harbor. *A fixed light.*

SAMBRO ISLAND—West entrance Halifax Harbor. *A fixed light.*

CROSS ISLAND—Entrance to Lunenburg Harbor. *Two lights—flash light above, fixed light below.*

IRON-BOUND ISLAND LIGHT—Off the entrance of LaHave River. *A bright, flash light of ten seconds duration, followed by an eclipse of thirty seconds. The lantern is placed on a square wooden tower, painted white on the southern side of the Island, and is visible from all points of approach. Elevation seventy-five feet above sea level.*

PORT MEDWAY—*A fixed, white light* on Admiralty head, W. side of the entrance of the port. Building square, painted *white with black square* in the centre of seaward sides, forty feet above sea level, and stands within thirty fathoms of the shore.

LIVERPOOL—South-end of Coffin's Island. *A plain, revolving light.*

FORT POINT harbor light, at the head of Liverpool harbor, southern entrance of the river. *A bright, fixed light*, visible from all points of approach, and must be left on the larboard hand when entering the harbor.

RAGGED ISLAND HARBOR LIGHT.—On Gull Rock, off the entrance of the harbor. Building square, and painted *white*, exhibiting a *clear, white light*, at an elevation of fifty-one feet above the sea level, and is situated in lat. 43° 39' N., and long. 64° 66' W.

SHELburne—McNutt's Island. *Two fixed lights*, one above the other.

BARRINGTON—Baccaro Point, east side of the entrance to Barrington Bay. *A flash light of fifteen seconds.*

CAPE SABLE ISLAND—On Cape Sable, in the County of Shelburne. *A red, fixed light* The building is an octagon, and is *painted white*.

SEAL ISLAND—The first light on approaching the Bay of Fundy is on the south point of Seal Island. *A plain, white light*, elevated about eighty feet above high water mark, and may be seen, on approaching the Island, from any point of the compass. A very dangerous rock, under water, but upon which the sea always breaks, called Blonde rock, about three and one-third miles S. by W., by compass, from the Light House. Between this rock and the Island there are some dangers: the ground is rocky throughout, and large vessels, therefore, ought not to attempt passing between them.

PUBNICO HARBOR LIGHT—A Beacon Light on the S. E. side of the entrance to Pubnico Harbor, situate on the E. side of the entrance to the Bay of Fundy, about thirteen miles northerly of Cape Sable. Building square, painted *white*. *A fixed, red light*, on the seaward side, twenty-eight feet above high water level, (rise and fall twelve feet,) and stands fifteen fathoms from low water mark. The point of beach is bold.

THE MOUNT ALLISON
ACADEMY AND COLLEGE,
SACKVILLE, NEW BRUNSWICK.

PARENTS having sons to be educated, and young men, who are wisely intending to seek for themselves the benefit of a good education, are requested to notice that a thorough course of study, both Academic and Collegiate, either partial or complete, may be prosecuted at MOUNT ALLISON, *under most advantageous circumstances.*

Sackville, being a quiet country village, pleasant and remarkably healthy, easy of access, and yet sufficiently removed from most of the occasions of distraction, temptation and danger for the young, which so abound in cities and large towns, is a most suitable place for educational institutions.

The Academy and College Buildings are in extent and adaptation to the purposes for which they have been erected, incomparably superior to any others in the Eastern Provinces of British America.

The general plan, and all the regulations, domestic and disciplinary, as well as scholastic, in both institutions, are those which have been ascertained, by sufficient trial, to be best calculated to promote the comfort and to facilitate the improvement of students.

Adequate provision is made for thoroughly teaching all the branches of Science and Literature which are included in the curricula of the best conducted Educational Institutions of either Great Britain or America. The United Faculty of the Associated Institutions,—Academy (male branch) and College,—includes eleven competent Instructors, viz: Six Professors, one Tutor, two Teachers, and two Assistant Teachers, each duly qualified for the work of instruction in his respective department.

Students completing the prescribed Collegiate curriculum, and passing the required examinations, will receive the usual University degrees.

Students belonging to the Academy have the privilege of attending any of the College Classes and Lectures for which they are prepared.

☞ *The Academic year consists of three Terms of 14 weeks each; the first of which begins the last Thursday in July; the second, the first Thursday in November; and the third, the second Thursday in February.*

☞ *The expenses for Board, Washing, Fuel, Lights, &c., and Tuition, (in all branches except Music) are, in the Academy, from \$110 to \$150; and in the College from \$130 to \$150, N. B. cur. per annum.*

GRAHAM'S PAIN ERADICATOR, AND MAGNETIC OIL,

Is the best remedy in use for the following Complaints:

RHEUMATISM, NEURALGIA, SPINAL COMPLAINTS, FELON or WHITLOW,
SORES, ERYSIPELAS, SALT RHEUM, BRUISES, SPRAINS, BURNS,
SCALDS, FROST BITES, HIVES, DIPHTHERIA, INFLUENZA,
ASTHMA or PHTHISIC, PAINS IN THE CHEST,
SIDE or BACK, EAR ACHE, &c., &c.

This invaluable preparation has been placed before the public only at the repeated and urgent solicitation of many who had used it with decided benefit, after every other available means had failed. It is a purely vegetable preparation, free from any mineral substance, and prepared from some of the best medicinal trees and herbs, in the most concentrated form.

It quickly and effectually reduces inflammation, and eradicates pain and humour, and from its *magnetic effect* gives tone to the nerves, and strength to the muscles; it is also free from any thing disagreeable or injurious in its use.

The following Testimonial will be sufficient to recommend it, and a trial will prove its efficacy:—

"We the undersigned inhabitants of Cornwallis, having observed the astonishing effects resulting from the use of GRAHAM'S PAIN ERADICATOR, and having used it ourselves, and in our families, with the best success, for the removal of complaints for which it is intended, confidently recommend it to the public as surpassing any other Liniment or Painkiller in use.

WILLIAM MURRAY, Pastor of the North Cornwallis Presbyterian Church.

JAMES PARKER, Pastor of the 3rd Cornwallis Baptist Church.

JAMES G. HENNIGAR, Wesleyan Minister, Canning, Cornwallis.

JOHN R. KEAN, Pastor of the Congregational Church, Canning, Cornwallis.

DAVID FREEMAN, Pastor of the Baptist Church, Canning, Cornwallis."

Signed also by a large number of Magistrates and other influential inhabitants of Cornwallis, whose names may be seen on the Circulars accompanying the bottles.

PRICE 25 CENTS.

TRUSSES.

Every desirable style of most popular patterns. Particular attention, however, being directed to the merits of a

NEW SPRING LEVER TRUSS,

which has been proved by the experience of many wearers, during two years past, to be the *best Truss* yet invented—affording, as it does, a circular inward and upward lifting action, while worn with such comfort that the wearer, after short experience, is almost unconscious of its presence. A pamphlet descriptive of the Truss will be sent to the address of any person enclosing two blue stamps.

THE SINGER SEWING MACHINES.

OUR LETTER A FAMILY SEWING MACHINE is fast gaining a world wide reputation. It is beyond doubt the best and cheapest and most beautiful of all Family Sewing Machines yet offered to the public. No other Family Sewing Machine has so many useful appliances for Hemming, Binding, Felling, Tucking, Gathering, Gauging, Braiding, Embroidering, Cording, and so forth. No other Family Sewing Machine has so much capacity for a great variety of work. It will sew all kinds of cloth, and with all kinds of thread. Great and recent improvements make our Family Sewing Machine most reliable and

most durable, and most certain in action at all rates of speed. It makes the interlocked stitch, which is the best stitch known. Any one, even of the most ordinary capacity, can see, at a glance, how to use the Letter A Family Sewing Machine. Our Family Sewing Machines are finished in chaste and exquisite style.

The Folding case of the Family Machine is a piece of cunning workmanship of the most useful kind. It protects the machine when not in use, and when about to be operated may be opened as a spacious and substantial table to sustain the work. While some of the Cases, made out of the choicest woods, are finished in the simplest and chastest manner possible, others are adorned and embellished in the most costly and superb manner.

It is absolutely necessary to see the Family Machine in operation so as to judge of its great capacity and beauty.

It is fast becoming as popular for family sewing, as our Manufacturing Machines are for manufacturing purposes.

The Branch Offices are well supplied with Silk, Twist, Thread, Needles, Oil, &c., of the very best quality.

To the Farmer who wants to clothe his sons and daughters, and "men-servants and maid-servants" economically, the Family Sewing Machine will prove indispensable. There are no persons more in want of Family Sewing Machines than the Farmers of America. Next in importance to the feeding of a family, comes the clothing of a family. The farmer uses labor-saving machines to cultivate and harvest his crops. If he does this to get bread, why not use the best labor-saving Sewing Machine to clothe his family? There is as much economy in one case as the other, and if the Farmer has a big family, more, too.

NEW KIND OF FILLING.

DR. MACALLASTER

WOULD RESPECTFULLY call the attention of all to the kind of New Filling which he is using with great success. It is called the

PLASTIC FUSIBLE METAL,

and is applied to the tooth in a plastic state, becoming hard as soon as applied. This new filling has not a particle of quicksilver in it; and in the opinion of the best Dentists of the present day, it is destined to do away with all filling containing quicksilver, which is so injurious to the vitality of the Teeth.

He is also using the VULCONITE RUBBER PLATES for Artificial Teeth, with entire success. Sets made four years ago by Dr. M. are still as good as when first inserted, and in no one case has required repairing. He would advise all who desire Artificial Teeth, to call and examine specimens of work in Rubber, Gold and Silver.

Dr. M. has just received a splendid assortment of

TOOTH BRUSHES,

made to order, and manufactured by the celebrated firm of Morgan Brothers, London.

This Stock of Brushes, the largest in the City, are all of the very choicest patterns, a beautiful article of Goat-Hair, very soft, peculiarly adapted for sensitive gums.

He has taken great pains in having a superior article of BRUSHES made for children, which he offers cheap at his

**WILBOR'S COMPOUND OF
PURE COD LIVER
OIL AND LIME.**

FOR CONSUMPTION, it is the only reliable remedy known. It has, in thousands of instances, restored patients that seemed past hope of recovery; and, in tens of thousands, has arrested the disease in its primary stages, and restored the patient to robust health.

BRONCHITIS.—Its effects in this troublesome disease are very marked. It is necessary to persist in its use for a considerable length of time.

FEMALE DEBILITY.—To sustain and augment the vital forces; to make new, rich and pure blood; to build up the nervous system; to restore energy to the mind and body—nothing can be better adapted than this preparation.

In ASTHMA, GENERAL DEBILITY, EMACIATION, COUGHS, it is a reliable remedy. Nine-tenths of the cases where it is supposed to fail, simply arise from the remedy being abandoned before its beneficial effect became obvious. Be careful and get the genuine, manufactured only by

SAVE YOUR MONEY!
DON'T PAY ONE DOLLAR
FOR A SMALL BOTTLE OF HAIR DYE,
WHEN YOU CAN GET A BOTTLE FIVE TIMES AS LARGE,
Of a BETTER DYE, for the same money.

Wilbor's Monitor Hair Dye
IS SUPERSEDING ALL OTHERS.

It requires no preparation, does not smut or wash off, will not soil the finest linen. One application will last until the hair grows out, when it can be applied at the roots without more trouble than a common hair oil.

It is warranted not to injure the Hair or Skin.
