

THE NEW PACIFIC MAIL STEAMSHIP "SACRAMENTO."—The New York Tribune of April 20th, contained a list of the vessels recently completed or in progress at the various shipyards in that city. Among the rest we notice an allusion to the new side wheel steamship Sacramento, which is owned by the Pacific Mail Steamship Company, and is to be put on their line between San Francisco and Panama. The hull of the new steamer was by William H. Webb; her machinery was constructed by the Novelty Iron Works. Her dimensions are as follows: length on deck, 304 feet; breadth of beam 40 feet 6 inches; depth of hold to spar deck, 28 feet 6 inches; draught of water, 16 feet; tonnage, 2,647 tons. The frame is built of white oak, chestnut live oak and haematao or larch, and fastened with copper and tree nails. The floors are modeled and 16 inches thick. The frames are from 14 to 20 inches thick. The frames are 36 inches apart at the centres, and around them are double-laid and diagonal iron straps, 4 inches wide by seven-eighths of an inch thick. The vessel is coppered, and contains three athwartships water-tight bulk heads. She is provided with vertical beam engines, one cylinder 100 inches in diameter, and the stroke of piston 12 feet. She has four tubular boilers in her hold. Her water wheels are made of iron, and have a diameter of thirty eight feet. It will be seen from this description that the Sacramento is a large and powerful vessel, fashioned after the latest plan of water tight compartments, and is probably fitted up in a style not less handsome and comfortable than that of the Golden City, which we believe came from the hands of the same builders.—S. F. Bulletin.

THE fact of the adulteration of wine, not only in Paris but in the wine producing districts, is established by the *Moniteur Vinicole*. It states that an hotel keeper of Saumes lately went to a wine growing country to purchase white wine. Having concluded a purchase of 15 casks, 60 francs each, he observed, "Your wine is not bad; how much water have you added to each cask?" "What do you mean?" said the wine grower. "The wine in my cellar is always pure." "Come, you might induce others to believe that; but do not fear, I know how that is managed. You do nothing worse than others of your trade. Is not the water you add all your profit? Besides, I likewise add water to my wine, and I ask you the question in order that I should not make any mistakes as to the quantity." "Well, then, since you know, on the word of an honest man I have not added more water than the value of one cask." "That's right, I like candor," said the innkeeper, "you see that we understand each other. We say 900 francs for the 15 casks; that makes 840 for the 14." "No, no, I can not consent to that; we agreed for 900 francs and—." "I hope you do not believe me to be such a fool as to pay you for a cask of water. Take what I offer or I will lodge an information against you." The seller accepted the money. M. Martel, one of the principal brandy merchants of Cognac, has died suddenly.

CHINESE BARBARITY.—A person during the last few days hearing dismal howlings and strange sounds proceeding from the corner of Stockton and Sacramento streets, determined at last to ascertain the cause, and instituting a search, found that a human being was nailed up in a box which stood near a filthy pool of water under the sidewalk on Stockton street. The interior of the box was dark, and it was from this that the strange voice proceeded. Summoning the police, the box was broken open, and from its dark interior a miserable, emaciated Chinese boy was dragged forth, who, when out, could not stand up. He was carried to a hack and taken to the Hospital. The Judge of the Police remarked that he thought he could not live. Two Chinamen were in court, summoned to make an explanation of the matter, one of whom stated that the boy was his brother, and was an idiot.

AT WORK ON THE RIVER.—Captain Pierce left Sacramento the other day with the Goodman Castle, for the purpose of building a wing dam at the Sacramento Bar, below this place, to dam the channel of the river at that point. The Captain has with him a working gang of twenty men and a barge laden with 30,000 feet of lumber. Captain Pierce has previously done some good work on the river both snagging and damming, and when he gets through with his present job considerable time and fuel will be saved to the boats in making the trips from Sacramento to Red Bluff.—*Indep.*

On Friday night last, about 9 o'clock, Dr. Hitchcock, the Visiting Physician of Alcatraz Island, was visiting the fort to see his patients, with a boat load of ladies and gentlemen, was fired into by the guard stationed there, and a soldier in the boat named Nugent had his arm badly shattered by the shot. The party failed to give the countersign and the guard is blameless.

A POCKET has been struck in a quartz ledge at Drytown, Amador county, the rock from which, pounded in a hand mortar, yields from \$200 to \$400 per day.

The Sanitary Festival of Trinity county resulted in securing \$5,266 for the Soldiers' Relief Fund.

A TOUCHING INCIDENT OF THE BATTLE FIELD.—An army correspondent of the *Tribune* gives the following account of a touching incident in the late battle in the Wilderness:

Far down the plank road where Hancock fought, beyond the thickest rebel dead, lay a boy severely wounded, perhaps not less a soldier than he was but a boy. He had fallen the day before, when we were farthest advanced, and had remained unmolested within the rebel lines. They had not removed him, and he was alone with the rebel dead when I rode up. The poor fellow was crawling about gathering violets. Faint with loss of blood, unable to stand, he could not resist the tempting flowers, and had already made a beautiful bouquet. Having caused a stretcher to be sent for, I saw him taken up tenderly and borne away, wearing a brave, sweet, touching smile.

EARTH IN THE SACRAMENTO RIVER.—Dr. Logan, of Sacramento, publishes in the *Pacific Medical and Surgical Journal*, in which he makes a calculation as to the amount of solid matter that floats past Sacramento in the of the river:

We are not aware that a sectional area admeasurement of the river has been made; but estimating the amount of water which passes down the river each second during high water, at 327,600 cubic feet we find on an average there are carried in suspension past Sacramento City—a certain portion being deposited as is shown by the elevation of the low as well as high marks on the chart)—150,569, 12 and 380 486ths grains per second, 38,717 and 7-10ths tons every hour, more or less, according to the stage of the American river—this affluent, owing to mining operations, being always most charged with detritus. The solid material thus ascertained to be suspended in water is mud, on calculation, to be sufficient to cover in one year a square mile to the depth of 256 and 5-10ths feet.

SURGEON ON NEGROES.—A London correspondent of the *Witness*, a loyal saucy journal, published at In-anapolis, sends to that paper an account of an interview with the Rev. Mr. Spurgeon and adds: "Of course he inquired about the war in America. Naturally enough, the conversation turned upon the negroes, whereupon Mr. Spurgeon said:

"We in England are getting a little tired of the negroes—we are beginning to find them out. A year or so ago a negro was qua a pet with us, and when one came to us we made much of him; but now too many of them are coming—they come over in squads, and are very ignorant and conceited; we are very willing to help them to be free, to give them money; but we do not want any more to do with them."

ALL insane people, says the *Bee*, are not confined in insane asylums. There are people in this State so crazy as to write and send money for printing and circulating such nonsense as that Queen Victoria is the birth to a son of Jesus Christ, and has become the mother of the future Kingdom of Heaven, and that for this purpose she was a widow! A handsomely printed pamphlet before us contains such ravings.

THE NORTHERN MINES.—Almost daily, says the *Shas Courier*, we are shown letters from Banck, Canon City, Owyhee, Lewiston another rich (in imagination) localities. A few—a very few—say they are doing well, but will not advise their friends to go there. The majority, and a very large one at that, say they are only going to get enough money to get home to Shasta.

A NEW WINE PRESS.—Mr. Elisha W. Walton of Drytown Amador county, has invented a wine press which is also applicable to compressing almost any substance, however bulky. The machine is very compact and simple, easily washed and capable of exerting most any desirable power. Mr. W. has made application for a patent for the same through the Agency connected with the office.—*Mining Journal*.

A VALUABLE MINE.—It is stated that the Morgan & Muncey claim Reese River, nets its owners about \$400 per day. Messrs Morgan & Muncey of the entire claim, which contains 400 et, and is not incorporated. The number of largely paying unincorporated claimers exceeds the number of such claims having a corporate existence.

CALIFORNIA PEANUTS.—It is still on the increase in California. It is said that the crop for the present year promises to be several hundred per cent. greater than any former one. See idea of the importance of this crop manifested from the fact that a firm in this city paid \$5,000 for the crop of one ranch on the Sacramento, last year; and the same ranch will have double the crop this year.—*Min. Jour.*

PUGILISTIC.—Joe Coburn, the celebrated pugilist, left New York city the 14th, by the steamship City of Washington, for England, where he is to go into training for the "mill" with Jess Mace. Joe is accompanied by his trainer Cusick, and was escorted to the ship by Izzy Lazarus, Capt. Saunders, Henry Hill and others of his most intimate friends and admirers.

ED. RYAN, who lately maltreated a couple of colored men, at Sacramento has been sentenced to imprisonment for eighteen months in the county jail.

LEGAL NOTICES.

Administrators Sale. Notice is hereby given that the undersigned Administrator of the Estate of LONDON GLASCOCK, deceased, will pursuant to an order of the Hon. the Probate Court of Sutter County, sell at Public Auction to the highest bidder in U. S. Gold Coin in the Town of Knight's Landing.

N. B.—Don't mistake the name and number—same floor with LIGHT & PIERSON, Dentists. June11-1f

Grape Culture.

The year the vines are set out, the land should be planted with some low crop, if planted at all, and well tilled through the summer. Only a single vine should be allowed to grow from each root. The vine, receiving the whole force of the root, will be large and strong in the fall. In November it should be cut back to about one foot above the ground, the height of the lower wire on the trellis that is to be. The joints will be very short on the vine, near its base, and the buds will be nearly opposite each other, a foot above the ground from which the horizontal vines will grow the next year.

TRAINING.

The two vines are trained each way on the lower wire, and tied to it from time to time as they increase in length. After reaching six feet, the distance given to each vine on the trellis, it should be turned up and trained to one of the upright wires. All the laterals should be pinched off beyond the second leaf. If the land is in good condition and well tilled, and vines well cared for, the canes will be as large as a man's finger in the fall, and the vines able to mature a moderate crop of fruit the next year. The last of November these vines should be cut back to the lower wire, and the vines left on the trellis for winter. In the spring of the third year, one or more shoots will start from each of the joints in the base vines. Enough of these should be allowed to grow to fill the trellis, say one foot apart, and all the rest rubbed off. These are tied from time to time to the upright wires through the summer, and the laterals pinched off beyond the second leaf. From two to four bunches of fruit will set on each of these upright vines. Only two of the best should be allowed to grow; the rest should be pinched off when in blossom; the laterals should be pinched off at the same time. This causes the fruit to set full and makes the bunches large and compact. The ground must be well tilled, and everything done at the right time through the summer. This will insure a small crop of six pounds of fine fruit to each vine.

WHEN TO PICK.

Isabellas should hang upon the vines till frost comes. One or two sharp nights improves the flavor wonderfully. The gathering period is rarely before October. Pick them when dry and lay them in boxes holding about one bushel each, made of lath, open at the bottom and sides. These boxes are placed in a safe, dry place, where the air can freely circulate through the fruit. As soon as the stems are dry they are ready for market. They should then be looked over, packed in paper boxes, and shipped. Fruit grown, picked, and packed in this manner will always command the highest price in market, and pay the grower a large profit.

TO GET WELL-RIPENED FRUIT.

Two things must always be well considered and nicely adjusted to insure a good crop of well-ripened fruit. The first is, to leave just as much fruit on the vines as they will develop to large, compact bunches, fully ripened. The other, is, to trim the vines, and at the proper time, as to fully set the fruit, make the bunches and berries large, and fully ripen the whole crop. If too much fruit is left on the vines, and they are too closely trimmed, the fruit cannot fully mature, because there is not foliage enough left on the vines to ripen it. On the other hand, if the vines are not trimmed at all, the berries mostly drop off, leaving the bunches small, and loose, and but little fruit on the vines, and that quite poor and uneven. I have grown, and have seen in other grounds, the best fruit on vines trimmed as here described. The crop this year will amount to from 15 to 20 pounds to the vine, or from 4,000 to 6,000 pounds to the acre. In trimming the vines this fall, the bearing canes must be cut back to near the base vines, and the new canes for bearing next year at the top of the trellis, and all the laterals close, and the vine laid down for the winter, as before. The trimming, and renewal for bearing wood, should be the same for the fifth year, and each year thereafter, as described for the fourth year. The fifth year the vines will be in full bearing, and will produce, if rightly tilled, thinned, and pruned, from 7,000 to 10,000 lbs. of large, handsome, well-ripened fruit per acre, worth to the grower from \$300 to \$1,200, according to variety and demand. If the readers would give this address of Mr. President Ainsworth the attention it deserves, they would without doubt learn something new in the department of horticulture. The facts here presented are reliable, and in the face of the startling figures of profits which have been introduced, the owner of a five acre lot within ten miles of a market, who does not proceed at once to plant fruit trees and fruit vines must certainly lack enterprise or acquisitiveness, or both. Fruit growing, aside from its profits, is the very poetry of agriculture, but when one can grow grapes at a profit of \$400 per acre, it is poetry of the sublimest kind—it pays.

MASON & HAMLIN'S CABINET ORGANS. CONGRATULATE you on the introduction of a new musical instrument, long wanted, and sure to find its way into every household of taste and refinement. L. M. GOTTSCHALK

As compared with melodeons, harmoniums, &c., the Cabinet Organ is certainly superior in quality and volume of tone, while its power of expression can hardly be too highly praised. WILLIAM MASON.

BEST of their class of which we have any knowledge. MORE THAN 200 EMINENT ORGANISTS.

In every respect far superior to anything of the kind I have ever seen, whether in Europe or America. GEO. WASHBURN MOGAN.

NEXT to a church organ, and that good sized one, the best instrument with which we are acquainted to accompany church song. New York Musical Review.

EXCEEDS in my estimation every other instrument of this general class. THOMAS HATINGS.

THE favorable testimony of nearly every organist or pianist of note in his country, together with that of certain distinguished foreign authorities, has forestalled our appreciative comments upon the excellence and value of these carefully made instruments. New York World.

ONCE hearing them will satisfy the most skeptical that they are just what the church has been waiting for. New York Observer.

REALLY very effective and beautiful instruments. J. WELL MASON.

GRAND accompaniment for the congregation singing. IRENEUS.

A VERY efficient church organ, brought within a small compass; not easy to get out of order, and sold at a low price. New York Examiner.

NEVER seen anything of the kind which interested me so much. GEORGE F. ROOT.

SURPASSES anything in this line I have seen, whether French or American. In plain or elegant cases, with one to twelve stops. Price \$85 to \$500 each.

A. KOHLE, San Francisco. Wholesale and Retail Agent. Orders promptly attended to. mar 5-3m

PARTICULAR NOTICE. The undersigned, thankful for the liberal patronage bestowed for many years upon the firm of

A. DESPECHE & FIELD —AND— FIELD & CO., Respectfully inform their friends and the public that in order to be up with the times, and to supply a want in this community, they have taken the

SPACIOUS SALESROOM No 75 and 77 J Street. ONE BLOCK ABOVE their old location, where they intend keeping in addition to their large stock of

WINE, BRANDIES AND LIQUORS OF ALL KINDS, and Exclusive Department for the sale of FINE GROCERIES. And every article usually kept in the best regulated establishments of the larger Eastern cities and Europe.

Alers and consumers are invited to call upon us and look through our stock, as we are confident they will find it to their interest in making purchases.

FIELD & CO. Formerly A. Despecher & Field, Nos. 75 & 77 J. st. bet. 3d & 4th. SACRAMENTO. June11-tf
