8. Logistics.

a. General. Logistically, October was an active month for helicopter resupply of the five battalions OPCON to 3d Marines. All resupply missions were accomplished at Vandegrift Combat Base, which provides Classes I, III, IV, and V supplies to support battalions located in the Northern I Corps and DMZ Areas. All other resupply was brought from Dong Ha by convoy for the Camp Carroll Contonement.

b. Supply.

12. Intelligence

a. Significant Events. During the early part of October, the enemy fought a delaying action along Route #1022s in the Demilitarized Zone, to cover withdrawal north across the Ben Hai River of ground elements of the 320th NVA Division and of unidentified artillery units. The largest contact was with an enemy company on 8 October. After that date, enemy activity was minor and isolated for the remainder of the month.

(1). Route 1022S had been discovered by visual aerial reconnaissance and verified by aerial photography during September. Running through the southern Demilitarized Zone from XD 964677 to XD 980685 to XD 997707, it crossed into North Vietnam over underwater bridges. Along this road, elements of 52d Regiment, 320th NVA Division, occupied a series of blocking positions during the first eight days of October. By 9 October the enemy had withdrawn across the Ben Hai River.

(2). Along Route 1022S, five enemy artillery positions were discovered. The guns had been withdrawn north, but six hundred ninety eight 152mm and ninety 85mm artillery rounds were found. The remains of two tracked vehicles that could have been used to tow artillery pieces and to haul artillery ammunition were also found. Likewise, during the period of the enemy's withdrawal, numerous vehicles were heard while the underwater bridges hit daily by air and artillery were repaired at night.

SECRET

(3). Since it completed its withdrawal, on 8 October the 320th Division has remained in North Vietnam. Enemy activity in the AO of 3d Marines then consisted of sniping and mining, coupled with infiltration and exfiltration of small groups through the area.

(4). Many new and well-used trails were discovered during operations in the extreme western portion of the AO, between 8 and 28 October. Some of the trails were well-constructed, and included handrails and steps on the steep portions. Log footbridges had been constructed across streams. Numerous bunkers and shelters were found along and near the trails, almost all of them unoccupied.

(5). Three NVA prisoners were captured during operations the West. All three had been separated from their units and were captured without difficulty. Of these prisoners, one did not know his parent unit; and one was from the 246A Regiment, which he stated was organic to the 304th Division (246th Regiment is carried as subordinate to the 338th Division). Details concerning supply routes were given by the prisoner from the transportation unit. This led to the discovery of trails, but not of supply caches.
