APPLICATION FOR PERMISSION TO OPERATE AS SUB-CONTRACTOR

Dear Sir,

Our Yokohama Refinery has been engaged in the manufacture of various kinds of lubricating oils, asphalt and grease since 1933. Even after the war we have been continously producing neck grease for rolling mills under the direction of the government authorities.

Fortunately the said refinery has not sustained any war damage. Therefore, we are in a position to undertake full operation immediately with the available 240 bbl/day machine oil treating plant, various tanks, piping, pumps and warehousing facilities which are accessories for the 500 bbl/day Badger type Vacuum Distillation Plant.

In this connection the San Joaquin topped crude has onee been processed at our refinery. Therefore, if this crude can be effectively processed into lubricating oil it becomes possible to augment the lubricating oil, which is in short supply, by our refinery operating as a sub-contractor plant to process same for Nippon Oil Yokohama Refinery.

We attach hereto our manufacturing plan for this sub-contract processing, and shall appreciate your giving this application your favorable consideration.

Yours very truly,

KOA OIL CO., LTD.

E. Noguchi

Eizaburo Noguchi,
President & Director.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 45013

I. Manufacturing Program (Basis of one month)

1) Feed Oil

Name : San Joaquin Topped Crude

Quantity: 2,000 KL/Mon. (12,500 Bbl)

2) Property of Feed Oil (Nippon Oil's Data)

2 Litre Vacuum Distillation (Pressure 5 mm. Hg.)

Distillate (% by Vol.)	Temp. (C)	Sp. Gr. (A.P.I.)	Visc. 50°C	Redwood 100°C	Flash Pt. (C)	Pour Pt. (C)	Color (Union)
I.B.P.	110	---	---	---	---	---	---
10	170	24.0	37	---	117	---	1-1.5
20	207	20.2	55	---	165	-16	2-2.5
30	253	16.9	130	---	188	-16	3-3.5
40	278	14.5	458	---	210	- 6	4-4.5
50	288	12.5	---	114	232	7	6
55	302	12.0	---	---	---	---	---
Blended 40% - 55%		12.2	---	120	205	---	---
Residuum 45%							
Melting Pt. (C)		56.5					
Penetration 25°C		10					
Ductility 25°C		95 above					

3) Quantity Manufactured (Monthly)

Depending on the above data and our refining experience of the San Joaquin topped crude we anticipate the amount of monthly production to be as follows:

20	208	12.5	—	114	232	7	6
55	302	12.0	—	—	—	—	—
Blended 40% - 55% Residuum 45%		12.2	—	120	205	—	—
Melting Pt. (C)		56.5					
Penetration 25°C		10					
Ductility 25°C		95 above					

3) Quantity Manufactured (Monthly)

Depending on the above data and our refining experience of the San Joaquin topped crude we anticipate the amount of monthly production to be as follows:

Products	Production Yield (% Vol)	Monthly (Bbl)	Monthly (KL)
110 Dynamo oil	2.8	350	56
120 Machine oil	7.2	900	144

To : Mr. Hisaji Tokunaga
Director,
Bureau of Mines, MITI.

From : Yaichi Sasaki
President,
Nippon Oil Company, Limited

Subject : Application for Approval of Sub-contract Work by Koa Oil Yokohama Refinery.

Date : February 24, 1950

Dear Sir :

We thank you for the special considerations which have made possible the import of crude oil for our Yokohama Refinery. Processing has already commenced but, as you have been informed, the properties of the crude oil have brought about a more than expected quantity of fuel oil and all efforts for its disposal are being made at present. In the meantime, it would not be desirable to place this fuel oil in storage in the light of the present demand for oil products.

We, therefore, would like to utilize the installations of the neighboring Koa Oil Yokohama Refinery in order to speedily process the oil into finished products which will most readily meet the demand.

We would greatly appreciate your kind consideration in granting approval for the use of the Koa Oil refinery as a sub-contract plant for our refinery as shown on annexed paper. Furthermore, concerning this matter, the Koa Oil Company is presenting a separate application for sub-contract processing work for which we hope due consideration will be given.

Yours truly,

Y. Sasaki

Y. Sasaki
President,

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

NIPPON OIL COMPANY

DATE September 17, 1949

TO : ESS/IND GHQ SCAP APO 500

FROM : Nippon Oil Co., Ltd.
Marunouchi, Tokyo.

SUBJECT : Petition for permission to resume laboratory work.

Sir :

The Central Technical Laboratory of Nippon Oil Co. has ceased its operation since November 27, 1946 in conformity with the requirements under article of the memorandum (AG 695 ESS/IND SCAPIN F 1236) concerning "Pacific Coast Refinery". But recently the Yokohama Refinery of Nippon Oil Co. was released the restrictions as well as other Pacific Coast refineries according to the new memorandum AG 463.7 ESS/IND SCAPIN 2027.

At present major part of our Yokohama Refinery and this laboratory compounds are occupied by the 8th Army for JOSCO service and also one of the buildings of this laboratory has been used as JOSCO's office. Though there is another building is left still for Nippon's own use for convenience, the laboratory work itself has been ceased as mentioned above.

Here then, we wish to have the permission to resume the laboratory work as soon as possible owing to fcllowing reasons.

1. This laboratory, located in premises of Yokohama Refinery, Nippon Oil Co. is equipped to handle refinery products quality control and testing besides the research works as technical centre of the company. So this laboratory is essential to resume refining operations at Yokohama Refinery.

2. Though it is located in centre of JOSCO operations at Takara-cho Terminal, to date no trouble has been experienced in Nippon Oil Co. either with the 8th Army or JOSCO.

3. Nippon Oil Co. has been obliged to do services in testing all imported oil products since April 1 of this year, because the former Petroleum Distribution Kodan's Testing Laboratory located at Sumida Depot was returned to Nippon Oil.

4. It is a matter of fact that the almost all imported products are unloaded in Yokohama area to-day. And the

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

tests of those products are yet being made at Sumida Depot as there is no suitable testing facilities for imported products in Tokyo-Yokohama area. But the work at Sumida Depot is very inconvenient and inefficient owing to its far site and poor traffic facilities. So if we could resume work of our Yokohama Laboratory it would be very economical and efficient for both importing, marketing business sides and Nippon Oil Co. side.

5. It is believed that the laboratory operation in the second building does not interfer the JOSCO's compounds and JOSCO also would never object to the resuming of this laboratory.

In view of the foregoing reasons, we wish for your kind consideration on reopening of our laboratory work.

Yours cordially,

NIPPON OIL COMPANY

Shigeru Hayashi

Director
Chief of Refining Dept.
Chief of Central Tech. Laboratory
