

Prva CC zvučna skulptura

Ivan Bon / Edi Bon (MistakeMistake)

Napravljena je od papira i malog zvučnika povezanog na pojačavač kojim se emituju zvuci. Ona svojim oblikom moduliše zvuk koji se emituje kroz nju. Licencirana pod licencom Creative Commons (CC-SA) pa svako može da je preuzme i sklopi na osnovu priložene šeme, i emituje zvuke koji su dostupni pod istom licencom u bilo kojim dimenzijama u ovoj proporciji.

This is the first sound sculpture licensed under the Creative Commons license (CC-SA). It is made of paper and sound speaker driver connected to amplifier. It emits sounds licensed with the same license. Sculptures modulate the sound by the standing waves. Since the sculpture is hand made, the sound distortions and modulations are unpredictable. Everyone can download it, as well as the sounds and make it according to the scheme presented here

(all licensed under CC-SA).
