To the Buying Printer

HIS American Line Type Book shows specimens of the latest and best in type designs; the faces popular with all leading advertisers and the large buyers of printing. One reason for the increasing demand for American Type—and which, by the way, makes it *The Best Type*—is the fact that the designs are brought out in Families. One of the popular American Line Families is known as the Cheltenham Family, consisting of Cheltenham Oldstyle, Cheltenham Wide, Cheltenham Italic, Cheltenham Bold, Cheltenham Bold Italic, Cheltenham Bold Condensed, Cheltenham Bold Condensed Italic, and the latest addition, Cheltenham Outline.

Other notable American Type Families are the Century Expanded Series, Globe Gothics, Florentines, Copperplate Gothics, Alternate Gothics, Jensons, and the "Post" Family. Many of these are shown for the first time in this American Line Type Book.

In addition to the diversified range of type faces shown in this book, the printer will also find the most attractive line of Decorative Material ever presented. In Brass Rule the selection offered is the largest ever shown, both in plain faces and distinctive faces, which are unexcelled for advertising display.

Everything required for the most complete printing office outfit can be selected from the pages of this Type Book, and the price list of Wood Goods, Printing Material and Printing Machinery will be found an authentic Purchaser's Guide for Printers.

For a large selection of both plain and ornamental type faces not shown in this Specimen Book, printers are referred to the 1900 Desk Book, a copy of which was placed in every printing office in the country.

Job Type Fonts

PRI NT ERS will please notice that in this *American Line Type Book* all Cap and Lower Case job fonts have been put up and priced separately. This will enable the printer to order an additional font of either Caps or Lower Case when extra characters are required. By ordering additional fonts of either Caps or Lower Case, the use and value of the font is permanently increased. The Job Fonts are all put up to best selected schemes, and the price of every font is based upon its exact pound rate.

Job Type by the Pound

¶ In fonts of 25 pounds and multiples up to 36 point, and above 36 point in 50 pounds and multiples, Job Type is sold by the pound at reduced prices, according to character of face and quantity ordered. Write our nearest Selling House for estimate.

Body Type Fonts

¶ The Body Type shown in this *American Line Type Book* is put up in packages as indicated by the following table :

FONT	CAPS		SMALL CAPS		POINTS		FIGURES		LOWER CASE		SPACES		QUADS	
	lbs.	oz.	lbs.	oz.	lbs.	oz.	lbs.	oz.	lbs.	oz.	lbs.	oz.	lbs.	oz.
25 lbs.	2	8	1	8	1	1	1		14	11	2	8	2	8
50 lbs.	5		1	8	2	2	2		29	6	5		5	
100 lbs.	10		3		4	4	4		58	12	10		10	

¶ Printers desiring extra Caps for a 25-pound font can so order, in which case they will receive two and a half pounds of Caps; or, if desiring a larger quantity of Caps, can order Caps for a 50-pound font, in which case they will receive five pounds of Caps.

¶ The same rule applies to Small Caps, Points, Lower Case, and Spaces and Quads. We will supply packages of the weights given above, or any multiples thereof, of any of our Body Type fonts, at regular prices and without delay.

¶ References, Braces and Dashes, Leaders, Fractions and Commercial Marks are not put up with regular Body Type fonts, but if wanted must be ordered in about the following quantities or multiples thereof: References, one-half pound; Braces and Dashes, one pound; Leaders, three and five pounds; Fractions, one pound; Commercial Marks, one pound.

American Lining System

American Point Line *American Point Body*
American Point Set

Every face on **Common Line** will line at the bottom with all faces cast on the same body and line; and by using point leads each size will line with all other sizes cast on either **Common, Title or Script Lines**. This explanation also applies to *Title* and *Script Lines*.

The example on this page illustrates practically the 6, 8, 10, 12, 14, 18, 24, 30, 36, 48, 54, 60 and 72 Point sizes of Lining Jenson Condensed, aligned with point justification. To better illustrate the system, one-point brass rule was used in aligning the thirteen sizes—each fine line representing a one-point lead.

- I. **American Common Line**—the line common to the majority of faces.
- II. **American TITLE LINE**—includestype faces in cap fonts or with short descenders.
- III. **American Script Line**—embraces Script and other faces with long descenders.

The **American Lining System** is the perfection of the systems adopted by the foundries of this country. The value of the **American Lining System** is here exemplified in the use, **without justification**, of different type faces cast on the **American Common Line**—a feature that must commend itself to **Printers** for its simplicity and **practical use**.

Allowance for Old Type and Other Metals

☐ Old type (clean and unmixed with other metals), electrotypes, leads and brass, delivered at foundry free, will be taken at current prices in exchange for new type or printing material.

☐ Customers sending in old metal are requested to mark their names on all packages, and to forward by mail a shipping receipt or bill of lading, with the net weight of each kind of material, as soon as shipment is made. Compliance with this request will aid in identifying shipments and prevent errors. Ship as "old metal" to secure low freight rate.

☐ *Special Notice.*—Zinc plates, metal containing zinc, or type and other plates mixed with zinc plates, will not be received at any price. Type, electrotype plates, leads and brass must be packed separately as the value of each differs.

Q All faces of type shown in this book are cast on the American Line with the exception of Tiffany Text shown on page 40*h* which is cast on the original line to preserve the characteristic features of the design. Also the following Typewriter faces shown on pages 88*a*, 88*b*, 88*c* and 88*d*: Ribbon-Face Typewriter, 10 Point American, Yost, Standard, and Stenograf Typewriter—all of which are cast on their original line.

WHEN, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these, are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that whenever any government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on

Prudence, indeed, will dictate that governments long established should not be changed for light and transient causes; and, accordingly, all experience hath shown that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing

ROBERT EMMET'S LAST SPEECH. HIS REPLY TO THE PROPOSED SENTENCE OF DEATH TO BE PRONOUNCED ON HIM

Della Robbia Initial

WHAT have I to say why sentence of death should not be pronounced upon me according to law? I have nothing to say which can alter your predetermination, or that it would become me to say with any view to the mitigation of that sentence which you are here to pronounce, and by which I must abide. But I have that to say which interests me more than life, and which you have labored, as was necessarily your office in the present circumstances of this oppressed country, to destroy. I have much to say as to why my reputation should be rescued from the load of false accusation and calumny which has been heaped upon it. I do not imagine that, seated where you are, your minds can be so free from impurity as
 I am going to
 state. I only wish, and it is that
 may suffer it to float down you
 by the foul breath of prejudice
 more hospitable harbor to she
 which it is at present buffeted
 Were I only to suffer death, at
 your tribunal I should bow in
 that awaits me without a murmur
 of the law which delivers me
 through the ministry of that law
 to consign my character to obli-
 vion there must be guilt somewhere

HAMILTON ON LEGAL RIGHTS

AFTER all our doubts and our suspicions and speculations on the subject of government we must return at last to an important truth, that when we have formed a constitution upon free principles, when we have given a proper balance to the many different branches of administration, fixed the representation upon pure and equal principles, we may with safety furnish it with all the powers necessary to answer in the most ample manner the purposes of government. The great desiderata are a free representation and mutual checks. When these are obtained all our apprehensions of the extent of powers are unjust and imaginary. One branch of the legislature is to be elected by the people, by the same people who choose state representatives. Its members are to hold their office two years and then return to their constituents. Here the people govern. Here they act by their representatives. You have also a senate, constituted by your state legislatures, by men in whom you place the highest confidence, and forming another representative branch. Then again you have an executive magistracy created by the form of an election which merits universal admiration. *In the form of this government and in the mode of legislation you find all the checks*

 this I speak with the confidence of intimate knowledge, and with the con-
 solation that appertains to that confidence. Think not, my Lords, I say
 this for the petty gratification of giving you a transitory uneasiness; a man
 who never yet raised his voice to assert a lie will not hazard his character
 with posterity by asserting a falsehood on a subject so important to his
 country, and on an occasion like this. Yes, my Lords, a man who does

Their protestations are full of zeal against the enemy of the public ; but their measures are so inconsistent that all their professions become suspected. By confounding you with a variety of projects, your resolutions are perplexed and they lead you from executing what is in your power by engaging you in schemes not reducible to practice. Observe

CHARACTER AND EXTENT OF ALL CIVILIZATIONS DURING THE FABULOUS PERIOD OF GRECIAN HISTORY

"Wood-cut" Initial 7225

THE world of fable, far back in the shadowy past of Grecian history, opens with a variety of strange legends of gods and goddesses who were anterior, as well as superior to the race of mortals. Chaos, Earth, Ocean and Heaven, Night, Sleep, Dreams, and Time, personified, as well as Jupiter, Apollo, Neptune, Vulcan, Juno, Venus, and Minerva, are represented by the Grecian muse as marrying and intermarrying, and begetting sons and daughters, some, of god-like natures, and others,

By some, the principle of semi-historical interpretation has been assumed; and by others the allegorical. The semi-historical interpretation, leaving out of the fabulous legend whatever is miraculous, highly colored, or extravagant, retains only a series of credible incidents: of which all that can be asserted is, that they may or may not be true—they may be matters of fact, or they may be plausible fiction. The allegorical interpretation represents the poetic legends as conveying to the early Greeks, religious, physical, and historical knowledge, under the veil of symbols and allegories. Doubtless both modes of interpretation are partially correct, and will apply to particular cases; but the semi-historical is never to be adopted unless some collateral evidence

The propensity of the Greeks to personify natural powers and agents may be regarded both as the basis of their religion and their legendary history. And when Earth, Ocean, and Heaven personified are placed at the beginning of celestial beings it is not wonderful that rivers, fountains and other natural objects viewed as only rational existences should form the connecting link with humanity. Thus by a figure of speech, the tributary streams and fountains may be spoken of as the sons and daughters of Ocean; and when the latter was converted into a god, it required no great effort of the Greek imagination to select from his numerous progeny here and there one, like Inachus, whose

THE GREEK REVOLUTION

IN the year of 1481, Greece, the early and favored seat of art, science and literature, was conquered by the Turks after a fierce and bloody contest that lasted more than forty years. The Venetians, however, were not disposed to allow its new masters quiet possession of the country; and during the sixteenth and seventeenth centuries it was the theatre of most obstinate wars between them and the Turks that continued till 1718, when the Turks were confirmed in their conquest by treaty. Although the Turks and Greeks never became a single nation and the strained relation of conquerors and conquered never ceased, yet the Turkish rule was quietly submitted to until the year 1821, when, according to previous arrangements, on the 7th of March Alexander Ypsilanti, a Greek, and then major-general in the Russian army, proclaimed from Moldavia the independence of Greece at the same time giving assurance to his countrymen of the aid of Russia in the approaching contest. But the Russian emperor declined to inter-

of the plain of Argos was dry and barren. The word *danos* signifies *dry*,—whence perhaps the derivation of the word *Danaï*, often applied to the Greeks, meaning the *people of the thirsty land of Argos*. The personification of their name thus became a hero, Danaus. Again,—springs are the *daughters of the earth*, as they are called by the Arabs; the nymphs of the springs are therefore daughters of Danaus, that is, of the thirsty land; and, as a confirmation, in some degree, of this view of the legend, the names of four of the daughters of Danaus were the names of springs. One of the most important and widely disseminated of the classic legends of antiquity is that of the hero-god Hercules. At first view nothing can be more monstrous, more at variance with every principle of *chronology*, and more replete with *contradictions than the barren legend of the adventures*

HOME GEOGRAPHY

How these Needs are Met.—The first hundred pages of this volume attempt to supply a foundation by treating first, such common things as soil, hills, valleys, industries, climate, and the government, which are part of every child's environment; and secondly other features, as the mountains, rivers, lakes, and ocean, which, though absent from many localities, are still very necessary as a preparation for later study. Definitions, however, are not relied upon for giving the child this extra knowledge but detailed descriptions and discussions instead. This by no means involves neglect of the child's environment from the time the unfamiliar matter is introduced.

Relationship to Mankind.—According to the definition of geography—which treats of the relations between man and the earth—a hill or a lake is worthy of mention only because it bears a relation to us, the men upon the earth; considered by itself it is not a part of geography. Each chapter which takes up one of the above subjects, either closes with the bearing of the given topic upon mankind or it deals with the human relationship throughout.

Earth as a Whole.—The most difficult portion of our task has been that which presents the earth as a whole. That a bird's-eye view should be given at a very early period in the child's instruction is not bad, but it is not so easy in a limited space to support the principal facts with a sufficient detail to produce very bright pictures. The things commonly included in the study, such for instance as the latitude and longitude, should be omitted. They have also found that many other minor subjects usually presented are comparatively irrelevant to the geographic

PLEASANT it was, when woods were green,
and winds were soft and low, to lie amid
some sylvan scene, where, the long drooping
boughs between, shadows dark and sunlight
sheen alternate come and go; or where the
denser grove receives no sunlight from above,
but the dark foliage interweaves in one un-
broken roof of leaves, underneath whose sloping eaves the
shadows hardly move. Beneath some patriarchal tree I lay
upon the ground; *his hoary arms uplifted he*, and all the broad
leaves over me clapped their little hands in glee, with one con-
tinuous sound, — a slumberous sound, a sound that brings the
feelings of a dream, as of innumerable wings, as, when a bell
no longer swings, faint the hollow murmur rings o'er meadow,
lake, and stream. And dreams of that which cannot die, bright
visions, came to me, as lapped in thought I used to lie, and gaze

Fancy has been quelled, old *legends of the monkish page*, tra-

and chronicles of eld. And, loving still these quaint old themes,
e'en in the city's throng I feel the freshness of the streams, that,
crossed by shades and sunny gleams, water the green land of
dreams, the holy land of song. Therefore, at Pentecost, which
brings the Spring, clothed like a bride, when nestling buds un-
fold their wings, and bishop's caps have golden rings, musing
upon many things, I sought the woodlands wide. The green
trees whispered low and mild; it was a sound of joy! They
were my playmates when a child, and rocked me in their arms
so wild! Still they looked at me and smiled, as if I were a boy,
and ever whispered, mild and low, "Come, be a child once
more!" *And waved their long arms to and fro, and beckoned*

The American Line Leaders shown herewith are the only correctly proportioned and accurately cut Leaders ever designed and cast. These have been cut in five distinct series, with a uniformity and harmony in the grading of the different sizes which will be appreciated by discriminating printers. This perfection has been attained only through the use of newly invented tools belonging exclusively to the American Type Founders Company. On this page is an impression of each size of the five styles.

These Leaders are cast from Copper Alloy type metal, which excels all other makes in lightness and in wearing qualities. For the special convenience of printers they are put up in job fonts of three and five pounds and sold at regular body type rates, the same as charged when ordered in bulk.

The American Line Leaders line accurately with all American Line faces cast on larger or smaller bodies by justification with Point Leads and Slugs. A practical illustration is given on the following page.

Accented Letters

We make a vast number of accented letters for both body and job type for use in the Spanish, French, German, Swedish, Norwegian, Danish, Italian, Portuguese, Polish and Bohemian languages. We print below assortments of accents used in various languages, for the information of our customers, who will be informed upon application as to which of these accents can be supplied for any size or series of type. Accents not in common use in this country will be cut to order at a special price.

The following lower case accented letters of Roman and Italic are furnished to order only with the body type for which they are made, and a number of these accented letters can also be furnished in capitals and small capitals.

Correspondence School of Printing

Prospectus 1906

There is pleasure in printing for those who merely do the work. But to those who delve into its mysteries, there's inspiration. Its difficulties are not exactly what they once were, but every little trouble overcome, and every bit of technique mastered adds to the fascination.

And it is because we want them to enjoy a full measure of typographic perfection that we wish to get in closer touch with printers, so that we may carry them, step by step, through the various branches of the art, until they are fully capable in producing perfect work, from the artistic, mechanical and the technical standpoints. With this end in view we have established the Correspondence School of Printing.

Fortunately there is no study which can be more readily pursued by mail than printing. Forms can be sent by freight, proofs can be safely sent by mail at slight expense, and work can be easily and inexpensively submitted to our instructors for criticism, a trained corps of which are engaged for this special purpose.

Our course consists of a thorough instruction through correspondence in

Proclamation

In accordance with ancient customs, sent down to posterity by illustrious forefathers, Thursday, the 30th day of November, has been set apart as a day of Thanksgiving.

Now, therefore, American Type Founders Company hereby solemnly proclaims that, in order to worthily meet the demands of its customers, its storehouses have been filled to bursting with the essentials to procure money for the feast.

On that day of days may the members of its great and growing family of printers unite in rendering thanks, eat, drink and be merry, and enjoy the festival royally.

Given at each salesroom throughout the United States.

Della Robbia for Circular Work

As to any fixed religion, these tribes either worshipped only one god, or paid adoration to numerous deities. The latter supposition seems by far the more probable. A spontaneous religious feeling, unconnected with any glimmerings of traditional revelation, would probably arise in the bosoms of the rudest barbarians, however they might be situated; but the character of this natural religion would doubtless be varied or modified by the circumstances of climate, soil, scenery, and mode

HE probable origin of the Cecropian fable exhibits the same personifying propensity of the Grecian mind. During the heroic age the Greeks appear to have had no fixed laws established by legislation. Public opinion and usage, based upon principles of natural equity, and confirmed and expounded by judicial decisions, were the only sources to which the weak and injured could look for protection as well as redress. Private differences were most often settled by private means; but in quarrels which threatened to disturb the peace of the community, the public compelled the injured party to accept, and the aggressor to pay, the compensation established by custom. As among the savages of America, and even among our early Saxon ancestors, the murderer was very often

ALDO MANUCCIO, BORN IN THE CITY OF BASSANO, SUCCEEDED

NICHOLAS JENSON at the noted city of Venice and turned to a good account the latter's admirable fonts of type. He also made many advances in the art of printing, the most notable of which is the invention of the style of type now known as Italic. It was said to be founded on the handwriting of the famous Petrarch, whom it closely imitates

THESE beautiful letters were made originally for the Ladies' Home Journal by the American Type Founders Co., from drawings by Wm. Martin Johnson. ¶ The requirements called for a composite modernization of popular oldstyle faces, retaining all of their desirable features, while eliminating those proven undesirable. ¶ It was further stipulated that the Meriontype letters must be interusable with the letters of the Bulfinch, or sister series. ¶ With the single exception of this last, the fulfilment of the requirements is plainly evident. The feature of interuse is the more valuable simply because of its being nonevident. And yet the two faces are in no sense identical. ¶ There has been sent to printers about 50,000 copies of Meriontype specimens and a like number of Bulfinch specimens. ¶ Over 1,000,000 copies of Meriontype and Bulfinch specimens are sent out each month in the Ladies' Home Journal, for which these types were specifically cast. ¶ Examine any issue of the Ladies' Home Journal for a beautiful, practical showing of Meriontype and Bulfinch, handsomely arranged and printed, and you will appreciate their many merits

REPUTATION IS MORE READILY MADE BY THE USE OF NEW AND ATTRACTIVE TYPE DESIGNS

Than by any attempted new use of old faces. Reputation is of value in the printing business as it means the obtaining of important work at non-competitive prices. The type which is now new, and is becoming exceedingly popular is the Tabard Series. The use of this type in conjunction with the Tabard Borders ensures a most effective departure from the beaten tracks. Many of the larger printing houses throughout the country are now recognizing the importance of having all the latest types, borders and ornaments to meet an increasing demand from a discriminating patronage for the latest and best things in printing fashions. The American Type Founders Company produces each year more original type or border designs than all other foundries

DECORATING THE HOME AND
MAKING THINGS BEAUTIFUL

It is the frame, the setting and the background, call it what you will, that creates the atmosphere of the home. To be distinct, it is the walls, floors and windows, and the manner in which they are treated that brings comfort and refinement or—the reverse. The harmony of color, beauty of proportion and consistency of furnishing; these are the things that give an indefinable air to a home; a charm, the reason for which we don't stop to analyze, but the absence of which, people of good taste very quickly detect. To have a beautiful and comfortable home of one's own ought to be the ambition of every sensible individual of mature age: and how to make that home as beautiful as one's purse will permit is an art in which every one should be interested. House decoration is an art that requires study. No matter how good your taste or your judgment: no matter how keen your eye for color or your brain to plan you cannot keep fully informed as to what is going on in the world of manufactures. There is where the decorator is needed.

HOW ELEVEN KINGS GATHERED AN ARMY AGAINST KING ARTHUR, AS

THE MARVELOUS ESCAPADES AND ADVENTURES OF THESE KNIGHTS

THREE kings came unto the castle of Bedegraine and there found passing fair fellowship, and well besene, whereof they had great joy and wanted nothing. This was the cause of the northern host: that in the despite and the rebuke thereof they swore the oath. And those six kings by their means themselves give other kings; and thus they began to swear and how they swear that for weal nor woe they would not be other till they had utterly destroyed Arthur. And the Duke of Burgundy would bring with him five thousand men of arms; and the King of France swore King Brandegoris of Stranggore that he would bring with him also on horseback. Then swore King Clarence that he would bring three thousand men of arms. The King of Scotland would bring the hundred knights, that was a passing goodly company; and the King of Denmark would bring four thousand men on horseback; and the King of Norway King Lot, a passing good knight, and Sir Gawain, a passing good knight, and Sir Gawayn, a passing good knight, and Sir Gawayn, a passing good knight, that they would bring men or arms, both men and arms, both that their whole host was of clene men of arms, and a-foot ten thousand, of good men's bodies, and they were soon ready and mounted, and they sent forth messengers that the eleven kings had lain siege unto the castle of Camelot, and made them to tell the direction that the King of France told it to Arthur, and by King Ban and Bors' commandment to destroy all the country afore them, and the King of France. The king and the hundred great knights met together the nights afore the battle, that there arose a terrible storm, and they destroyed their castles and their villages, and after that came the King of France and bare it all away. There she weaves by night and day
A magic web with colors gay
She has heard a whisper say
A curse is on her if she stay
To look down to Camelot.
She knows not what the curse may be
And so she weaveth steadily,
And little other care hath she,
The Lady of Shalott.

And moving through a mirror clear,
That hangs before her all the year,
Shadows of the world appear.
There she sees the highway near
Winding down to Camelot;
There the river eddy whirls,
And there the surly village churls,
And the red cloaks of market girls,
Pass onward from Shalott.

Sometimes a troop of damsels glad
An abbot on an ambling pad,
Sometimes a curly shepherd lad,
Or long-haired page in crimson clad,
Goes by toward Camelot;
And sometimes through the mirror blue
The knights come riding two and two
She hath no loyal knight and true,
The Lady of Shalott.

THE CUSHING STYLE IS POPULAR AND USEFUL FOR VARIOUS GOOD REASONS

USHING types always print clearly, wear long, and make *exceptionally sharp, durable electros*. These features, in combination with the departure in roman letter which the face presents, have made them very popular with *printers and publishers everywhere*, and until now the constantly increasing demand has established them as a standard type fashion. An examination of any considerable amount of the printed matter that is put out by printers of all classes all over the country will disclose the *great extent* to which the Cushing types are being used. ANCIENT SPOTS ON THE MOON: BEING A FEW EXCERPTS FROM THE WORKS OF SOME OF THE LATE SCIENTISTS AFTER OBSERVATION IN THE MOST FAVORED LOCALITIES

It requires no telescope *to perceive* on the surface of the moon several wide *spots or patches*, which appear dark in comparison with that more brilliant portion of the lunar surface that lies about them, and with an opera glass their outlines can be very distinctly seen. These are the seas of Galileo and they yet retain that name in the Latin form *mare*. At first these were believed to be real seas, filled with water, but modern astronomers are now convinced that they contain no water; the opinion has been widely taught that they are empty sea beds whose waters disappeared ages ago. Lately, a modification of this view is expressed by Mr. Thomas G. Elger an English authority on the subject. It is possible, even probable, that at

A remote period in the evolution of our satellite these lower regions were occupied by water; but that their surface, as it now appears, is actually this old sea-bottom seems to be less likely than that it represents the consolidated crust of some semi-fluid or a viscous material which has welled forth from orifices or rents communicating with the interior and which overspread and partially filled these immense hollows, more or less overwhelming and *destroying many formations* which

BOOKS with decoration are needed. Those that classified under the name of light reading, and intended for study, but for amusement or practical information, may receive ornament in many forms from occasional lines in red ink or border lines of brass rule to elaborately engraved head-bands, initials, and tail-pieces, broad borderings of flowers or explanatory illustrations, inks of many colors, or a text block of some eccentric or peculiar design. These are some of many methods of making a book for an amount of skill, patience attained. An amateur soon in a painstaking manner by is so expensive, and quite poor. Yet he hopes to get the desired for the text, which seems to

Ornamentation is not to be undervalued who undertakes it should be sure that it is not pure meddlesomeness. A picture, an engraving or a picture, can be spoiled by additions that divert the attention from the subject. The common fault of the amateur is to fill up of black space with needless decorations. The running title of the book, when not of extreme width of the measure, is filled with border that make it and its paging insignificant, or it is fenced off from the text by rules that annoy and do not help the reader. Concerning Mythology

HEAVEN prosper all our good purposes, and give virtue to put them in execution! Be not offended at my well-meant wish: one of your former favorites, whose fellow all antiquity you are sure had never produced, says an old thing prettily. At the birth of Venus, or Beauty, the Gods held a grand feast; to which among all the other deities came Plenty, the son of Foresight; and, as is usual on such occasions, Poverty came likewise a-begging, and hung on about the door. Towards the end of the entertainment, Plenty being intoxicated with nectar, for there was yet no wine, went into the garden of Jove, and oppressed with the celestial liquor sunk down in sleep. Poverty spied him in this plight. Cupid, in first place, like his mother, is perpetually in want: and far from being beautiful or blooming, as most people imagine, he is eager, ravenous and rough; wandering about barefoot, without house or habitation; sleeping before doors, or by the wayside under the open sky, and constantly accompanied with

NOTE Could any body, do you imagine, take it into his head after reading this allusion, that the author of it actually believed the little fluttering thing he has so exquisitely described to be a real divine person, and would worship him accordingly as a God? One should think not: especially as this very parable has been taken for an argument of his unbelief of the whole train of his national divinities, whom he revered in obedience to the laws of his country, and professed himself incapable of explaining their natures and mystical generation. Or, on the other hand, would it not be as absurd to say, that it had no meaning at all? It must be a strange turn of mind that could lead to either: for to believe it literally, or to condemn it for want of ingenuity, are equally preposterous.

to the ingenious Physiognomist who tells us That the chief indications of men's dispositions are to be found in their countenances and center particularly in their looks, even their very souls appearing through their eyes to an intelligent spectator, as through the gates and avenues of the mind: and that a set, simple look, for example, little moist eyes, moving eye-brows and softened features, are signs of a man being contemplative, thoughtful and given to learning, and particularly the belles-lettres. Again, that a dark, humid eye, open and frequently fixed, is a sign of thought and perception; but if it likewise looks mild and benign, it further betokens worth and ingenuity; for such, says he, was the eye and looks of the wise and worthy Socrates. Perhaps you will hold yourself a better judge of the following aspects, which he describes much to the same purpose. Eyes says he, standing frequently open, without winking, looking gentle and humane, swimming in a transparent fluid, show the person to be contemplative, a lover of knowledge,

To the Master Printer,

Dear Sir:-

This work can best be done by printing through crepe chiffon stretched on the galleys, leaving the cloth a little slack. And using Process Inks. This method gives most satisfactory results when used on a platen press. At all times have the chiffon washed thoroughly with soap and water before using. When on a cylinder press, use Japanese silk of good quality, but light in weight. Put the silk through the same preparations as the chiffon; lock it up loosely in the form, between the type and the furniture; draw several impressions from double thickness of stock to be used on job so as to form a matrix of the cloth. Use CLEAN rollers and bearers. Use ribbons that are made from the same ink, for filling in names and addresses.

You then have the assurance that the ink used in printing will exactly match the ribbon used on the typewriter for filling in the address.

Distribute the Process Ink on the plate as usual, then put in form. The first few rollings will saturate the silk with ink and it will act as an inked ribbon, giving an impression like that of a typewriting machine. The silk will last a long time and when filled up can be washed in benzine and used again.

Gentlemen:-

Imitation typewritten letters are the most profitable specialty open to the job printer. They can be turned out as fast as any job press will run. Your customers need them, and if you cannot do the work, will purchase elsewhere. You must have special ink and type adapted for this work, then a few cents for silk completes the outfit.

Our Process Inks and Typewriter Ribbons exactly match. We guarantee them. It is a waste of time to try and match a customer's ribbon. Print the job and send the ribbon with it.

Our ribbons and process inks are used by the largest concerns. Write us for complete instructions for this work.

Typewriter ink will not dry or harden, so the press needs no washing from day to day. The particular kind of cloth used is not important. The crepe chiffon, China or Japanese silk or regular ribbon cloth are used. The ribbon cloth is heaviest and gives most weight to the type face. Crepe chiffon is the lightest. China silk is usually used. The work is done on lined or hard finish paper. By varying the cloth from crepe chiffon through China silk up to the ribbon cloth, the operator can get any desired weight of face. In other words, our New Model type will print very light with chiffon, moderately light with China silk, and will give a heavy blurred impression with the ribbon cloth.

To the Wide-awake Printer,

Dear Sir:-

An exceedingly simple and at the same time convenient process for printing through silk in the production of imitation typewritten letters is to have the silk attached to the grippers.

A rather heavy piece of China silk is pasted on the grippers and left a little slack to prevent smearing. The form is "locked head to the left-hand guide." If two-on is worked, lock the form tail down. After running twenty impressions, the ribbon will be saturated and the press ready and even. In order to prevent the paste from sticking to the sheets, the cloth should be pasted only on top of the grippers by placing the ribbon on the platen and pulling the grippers down on it, then applying the paste to the top.

The other ribbons are also used this way, the material used depending on the effect desired, the chiffon giving the lightest face and cleanest impression.

The ribbon must invariably FIRST BE WASHED THOROUGHLY WITH SOAP AND WATER, RINSED AND THEN DRIED. If it blurs, run blotting paper through to take off the surplus ink.

Messrs. Ambitious Printers:

The work of the typewriters using large type is closely imitated by using our 12 Point New Model Smith-Premier No. 3. There are hundreds of job presses running constantly on this typewriter work in the large cities. The rapid increase in the mail order business and use of follow-up systems has created an enormous demand for this work, and no hustling printer can afford to overlook this avenue for profit.

This is our New Model Smith-Premier No. 3 printed through silk. All American Typewriter faces are made from dies furnished by the makers of the typewriter and duplicate the typewritten work. If you wish to match the work of any typewriter not mentioned here, send us a sample and we can undoubtedly furnish the type you want.

If the addresses are to be filled in on a typewriter, have the stenographer write a sample letter. Use this as a color sheet and have the pressman work to it. You can vary the depth of color on the press and not on the typewriter. Hence the pressman must work to the typewritten color sheet. When addresses are not inserted this typewritten color sheet is not necessary.

Dear Sir:-

The American Type Founders Company is the leading merchant in Printing Machinery and Printer's Supplies, and as such its policy is to offer only such manufactures as are standard and of superior value to the printer. To give the longest and most satisfactory service in proportion to the selling price of an article is the best evidence of superior value, and by this standard the Machinery and Materials which it handles have been selected.

As the productions of the American Type Founders Company are the admitted standard of excellence throughout the world, due regard for the reputation of its own productions will not permit it to recommend anything that is not the best procurable in its class.

In the line of type faces to enable the printer to handle orders for imitation typewritten letters, the American Type Founders Company is the acknowledged leader. In this American Line Type Book will be found specimens of such type faces, matching the work of leading makes of typewriting machines. A foundry, principally for German type, was established at Germantown, Pennsylvania, about the year 1735, by Christopher Saur, or Sower, a printer, who executed in German the first quarto Bible printed in America, as well as other valuable books in the German language. Three editions of the Bible were printed--viz., in the years 1743, 1763 and 1776, the latter two by his son. In 1739 Saur published a newspaper in Germantown.

An abortive attempt was made about 1768 to set up a foundry at Boston by a Mr. Mitchelson from Scotland, and another in Connecticut in 1679 by Abel Buel. In 1775, Dr. Franklin brought from Europe to Philadelphia the materials for a foundry; but little use of them was made.

John Baine, a type founder of Edinburgh, sent a relative to this country with tools for a foundry at the close of the Revolutionary war, and soon after came over himself. They carried on the business till 1776, when Mr. Baine died, and his kinsman returned to Scotland.

A Dutch founder, Adam G. Mappa, settled at New York about 1787, and cast Dutch and German faces, as well as Roman styles and several Oriental alphabets. Want of capital prevented his success, and many of

To cast off manuscript with accuracy and precision is a task which requires great attention and mature deliberation. The trouble and difficulty are much increased when the copy is not only irregularly written (which is generally the case), but also abounds with interlineations, erasures and variations in the size of paper. At times, so numerous are the alterations and additions as to baffle the skill and judgment of the most experienced calculators of copy. Such an imperfect and slovenly mode of sending works to the press cannot be too strongly censured.

To the Advertising Printer,
Looking for Profit.

Dear Sir: This is a specimen of our new 6 Point American Typewriter, which has been cut to meet the requirements for a small size Typewriter face for use in reproducing typewritten letters where the space is limited. There is a constantly increasing demand for printing of this character on the part of large manufacturers and merchants who are desirous of reproducing for advertising purposes fac-simile copies, in reduced form, of business correspondence.

The 6 Point American Typewriter is put up in job fonts of usable size, and the fonts of Caps and Lower Case are put up separately (in accordance with our usual custom), and consequently printers can order additional fonts of Lower Case or Caps as may be required in order to strengthen their font for a special purpose.

Many offices are developing an almost independent business along these lines of Imitation Typewritten Letters and the reproduction of fac-simile letters in reduced form, and find it extremely profitable. Would not a personal canvass among the leading manufacturers and merchants in your own locality prove exceedingly remunerative to you? But a small outlay is needed for a supply of Typewriter Type in order to enable you to successfully enter this field.

The American Type Founders Company makes a very complete line of Typewriter Type in faces which match the work of leading machines. And these faces have been cut for use in printing through silk (which gives the closest imitation of a regular typewritten letter), and also the regular faces, which do not require any special appliances but are designed for printing direct with the ordinary printing ink.

Then there is the Ribbon-Face Typewriter (specimens of which will be found on page 88b) also used for printing in the regular way, without any silk attachment and which gives a marvelous reproduction of the typewritten effect, making it difficult to distinguish the result from the work of a regular typewriting machine. Better results are obtained with the Ribbon-Face Typewriter Type by using the Record Ink prepared especially for use with this type and sold by all Selling Houses of the Company.

Instructions for use of New Model Typewriter faces, designed for printing through silk, are given on preceding pages. We can supply all requirements for necessary material, also typewriter ribbons exactly matching the shade and color of ink used in printing the body of the letter, these ribbons being designed for use on the machines in filling in the names and addresses.

Selling Houses Conveniently Located

Mr. Printerman,
Typewriterville.

Dear Sir:-

This is a sample of the work printed direct from our Ribbon-Face Typewriter Type on an ordinary printing press. This is the Type that produces the True Ribbon Effect.

Compare under a glass with a regular "typewriter" letter. No difference discernible. No apparatus, no manipulation; set the gauges and go ahead.

The characters are A B C D E F G H I J K
L M N O P Q R S T U V W X Y Z a b c d e f g h
i j k l m n o p q r s t u v w x y z & \$ £ - /
() " % # 1 2 3 4 5 6 7 8 9 0 . , : ; ' _ ?

Any printer can now successfully print "fac-simile" typewriter circulars in unlimited numbers, easily and quickly with profit.

We recommend the use of Record Inks made expressly for printing with the Ribbon-Face Typewriter Type. These Inks are made in Purple, Blue, Green and Black, and Typewriter Ribbons are supplied to match these shades.

DESIGNER OF

TYPE

TO THE MASTER PRINTER:

In All Lands.

Dear Sir:-

The American Type Founders Company expends more each year than all other type founders in the world in producing new types and showing them attractively. With its immense business and great facilities it can afford to do this as no other founder can.

It will cost no more to buy American type than it will to buy inferior designs or imitations. We are sending you continuously beautiful Specimens showing our new types, borders and ornaments. Not only in this rapidly enlarging our business, but if our material is used effectively it will largely increase your business.

Your customers can be induced to order a vastly increased amount of printing if you show them how they can increase their trade by having you furnish them with up-to-date styles in printing.

The experiment is worth your trial; it will pay you a big percent. on your investment--many times the legal rate.

Our interest is your interest, and your interest is our interest. If you order some of our latest type, borders and ornaments now, you will get profitable results.

STANDARD TYPEWRITER

The Standard Typewriter is a reproduction of the work done by the Remington Standard Machine--the matrices being obtained from facsimile impressions furnished by the manufacturers. This face commends itself to the printer producing imitation typewritten letters, being easy to read, does not tire the eye, matches work of Standard Typewriter, and because the type is clean cut and durable.

There is a constantly increasing demand for the printing of imitation typewritten letters, and in all the leading cities wide-awake printers are taking advantage of this and increasing their facilities for doing this work.

Imitation Typewriter Inks--Purple, Blue, Black, Green and Red--are shown in the Specimen Book of Printing Inks recently issued by the American Type Founders Company--if you have not a copy of this, write the nearest Selling House.

The Printer

NOT listed with the few are the printing offices that contain what might truthfully be called Miscellaneous Collections of Accidental Initials. In a few instances the letter required is found to meet the requirements. Much better is this Missal Series

MARK that, Series! Every letter and in seven sizes made just like any other type and is cast on the square of its body, filling same without any shoulder. Used with any face in book or job work

SHOWN in combination with Cloister Black, Cheltenham Oldstyle, and this, the Meriontype. The Missal Initial Series is fully as useful in the modern printing office as any requisite that has served to build up the modern office. In short, Missal Initials are Modern Requisites

Helps For the Printer

Bulfinch Attractors

A series of pictures for attracting the eye and for exciting interest. Usable as illustrations in connection with catchy phrases, a million or more of which are applicable

Chap-Book Directors

A series of indexes, or lists, in every required size and of several striking patterns. In the field which they are intended to cover, they are decidedly "it"

Flemish Borders

Usable in many classes of work, but are particularly adapted to ecclesiastical printing, show cards, catalogue covers, etc. Made in three sizes and five patterns

Handsome Type Faces

Look through this book, and one cannot but wonder why printers are not more successful, for the secrets of success are herein disclosed

The First Empire

Founding of Babylon

The primal great government of human origin was the Babylonian empire. One hundred and fifteen years after the flood, Nimrod, son of Cush and great-grandson of Noah, entered into the land of Shinar on the River Euphrates surrounded the great tower Babel with walls and settled therein with his associates and followers, thus founding a city which was named Ba-bel-on or Babylon, first city in the world's history. ¶ After founding of Babylon he went north into the country of Assyria and founded a city on the bank of the Tigris which he called Nineveh, in honor of his son Ninus. ¶ Nimrod is represented as "mighty hunter before the Lord," and is supposed to have engaged in arduous work of hunting with two great objects in view

Book of St. Luke

Continuation of the Sixth Chapter

22 Blessed are ye, when men shall hate you, and when they shall separate you from their company, and shall reproach you, and cast out your name as evil, for the Son of man's sake.

23 Rejoice ye in that day, and leap for joy: for, behold, your reward is great in heaven: for in the like manner did their fathers unto the prophets.

24 But woe unto you that are rich! for ye have received your consolation.

25 Woe unto you that are full! for ye shall hunger. Woe unto you that laugh now! for ye shall mourn and weep.

26 Woe unto you, when all men shall speak well of you! for so did their fathers to the false prophets.

27 But I say unto you which hear, Love your enemies, do good to them which hate you.

28 Bless them that curse you, and pray for them which despitefully use you.

29 And unto him that smiteth thee on the one cheek offer also the other; and him that taketh away thy cloak forbid not to take thy coat also.

30 Give to every man that asketh of thee; and of him that taketh away thy goods ask them not again.

31 And as ye would that men should do to you, do ye also to them likewise.

32 For if ye love them which love you, what thank have ye? for sinners also love those that love them.

33 And if ye do good to them which do good to you, what thank have ye? for sinners also do even the same.

34 And if ye lend to them of whom ye hope to receive, what thank have ye? for sinners also lend to sinners, to receive as much again.

35 But love ye your enemies, and do good, and lend, hoping for nothing again; and your reward shall be great, and ye shall be the children of the Highest: for he is kind unto the unthankful and to the evil.

36 Be ye therefore merciful, as your Father also is merciful.

37 Judge not, and ye shall not be judged: condemn not, and ye shall not be condemned: forgive, and ye shall be forgiven.

The Sixth Avenue Mission

Open the Year Through for the Needy

JOYOUS news to announce to our friends and beneficiaries in the fact that the doors of the Sixth Avenue Mission at last have been thrown open to all those who desire to take advantage of the shelter and assistance we willingly offer. Our aim is to lend a helping hand to the deserving man or woman, ever keeping in mind the fact that life is sweet even though we may be homeless. Believing that better days are in reserve for all mankind we have chosen this method of encouraging the unfortunate. May we ask your cooperation in furthering all of this work. A detailed description of the new building and its furnishings will be out in pamphlet form in a few days and it will be a pleasure to forward you a copy. It undoubtedly will interest you, as it illustrates intelligently the many advantages modern science in architecture has given the society. It will give in tabulated form a statement of expenditure of the Mission's funds to date.

Valley Forge Pottery

This ware is a product of hard fire. The aim is not only to produce beautiful form, decoration and color, but by the high temperature reached to give to the dead glaze a texture and a quality seldom found outside the ancient Chinese pots. Dull yellows, blues, browns, greens, pinks, grays and blacks, in many shades and varieties of effect, represent the widest range in color. Human, flower and animal forms are used in decoration. We believe it better to bring out a limited edition of a beautiful and carefully thought out design, varying in each piece the color and glaze effect, than to seek and execute hastily a new design for each piece. A catalogue, for which we are often asked, would be unsatisfactory, for each piece is taken up and the price made according to its individual value. This description will also give an idea of what we are doing in tiles suitable for fire-places and interior decorations.

Standard

FOR years these Tudor Black letters have been in conspicuous service in nearly every printing office in the land; they are today more popular than before. Their great legibility and their graceful and dignified shapes make them preferred in all places where the less easily read old Black Letter would be unsatisfactory. Tudor Black is a standard fashion in type, and all printers who use it will unhesitatingly testify to its serviceableness. The small expense of a big font makes of the series a peculiarly useful one

A HAPPY FACE IS A FACE
THAT GIVES JOY, AND THE
CHELTENHAM—SO APT,
SO FITTING—IS THIS KIND

CIT is undoubtedly the *most popular type face* that has been brought out in recent years. Judging by the *satisfaction* with which it was received the design was a most *fortunate* one, and it came at an opportune time measured by the demand which immediately sprang up. Scarcely had the *American Type Founders Company* finished the *fourteen sizes* in the *Cheltenham Oldstyle series* when requests came for an *Italic series* to go with it. The present series of *Cheltenham Italic* was the result. Its introduction met with an *immediate success*, and orders came in from the largest publishers and job printing offices, until now it is hardly possible to pick up a publication of any merit without a showing of the complete series of both the *Cheltenham Oldstyle* and the *Cheltenham Italic* being prominently displayed therein. A still further demand necessitated designing the other Cheltenham shown on following pages.

In fact, many among the most prominent advertisers in the country have *requested* that this face be the one used to *display their matter* as it so fittingly challenges the eye of the reading public.

The distinguished character of the *Cheltenham family* is so pronounced that the first glance reveals a design of decidedly unusual character that shows *qualities never before attained* in any other type face. *It is in a class by itself.* In cutting the other *Cheltenham*s to complement the *Cheltenham Oldstyle* the same lines that gave distinction to the first series were followed, and all have been as satisfactory as the original one.

*The Largest Type Family Ever
Brought Out
— and it is still growing*

Cheltenham Family

THE Cheltenham Family is notable in the Printing World—the largest and most complete series embodying the family idea ever brought out. Wherever type is used to convey a message, there you will find the Cheltenham in favor. ¶ Cheltenham Oldstyle was the original member of the family, and was instantly adopted as the favorite here and introduced into foreign foundries under special arrangements.

¶ Very shortly Miss Cheltenham Italic was presented, and her dainty form and graceful outline appealed to the eye of all.

¶ Next came the lusty twins, Master Cheltenham Bold and Miss Cheltenham Bold Italic, and their strength made direct appeal to discriminating publishers and large advertisers.

¶ Master Cheltenham Bold Condensed was the next member, and a candidate for printorial honors which met with the same reception accorded his two predecessors.

¶ Now comes his Tom-Boy sister, Miss Cheltenham Bold Condensed Italic, as like Sir Bold Condensed as two peas in a pod. And what a team for Commercial Printing and all forms of Advertising Display—*two winners!*

¶ And Sir Cheltenham Wide—how like the founder of the Family—a trifle extended in the Lower Case features, to fit this member for usefulness where the requirements so often demand a more extended face than the regular Cheltenham. The Caps of Cheltenham Oldstyle are used with this letter.

¶ Miss Cheltenham Bold Outline—who may withstand the winsome features of this later addition to the Family-useful, distinctive and altogether adapted for either plain or two-color printing! The Outline registers with the Cheltenham Bold and has been cut for use with that face as a two-color letter.

Rivers Over Their Banks From Disastrous Cloudburst

A heavy rain has fallen over many Northern states and considerable damage has been done. The Brazos River at Byran is rising at the rate of a foot an hour. With the rains along the lower river last night and today, the expectation is that the river will go over its banks at noon tomorrow below Byran and indications appear now that the flood will exceed that of 1899, the highest known. At points below Byran the river is rising fast. About half of Harisburg is today under water

TYPE DESIGN AN IMPORTANT FACTOR
There Come Times When Every Man In Business Stops
and does a little of good hard thinking

Lining Florentine Oldstyle No. 502

MANY old historians contend that the art of printing was introduced and first practiced in England by Caxton, who, by his travels abroad and residence of many years in other countries, in the affairs of trade, had an opportunity of informing himself of the method and process of the art. By the encouragement of the Abbot of Westminster, first set a press in the Abbey, and began to print books from it after the year 1471. But the appearance of a book bearing an earlier date took from Caxton the glory of being the first to introduce printing in England.

HELEN OF TYRE

What phantom is this that appears
Through the purple mist of the years,
Itself but a mist like these?
A woman of cloud and of fire;
It is she; It is Helen of Tyre,
The town in the midst of the seas.

O Tyre! In thy crowded streets
The phantom appears and retreats,
And the Israelites that sell
Thy lilies and lions of brass,
Look up as they see her pass,
And murmur "Jezebel!"

Then another phantom is seen
At her side, in a gray gabardine,
With beard that floats to his waist;
It is Simon Magus, the Seer;
He speaks, and she pauses to hear
The word he utters in haste.

He says: "From this evil fame,
From this life of sorrow and shame,
I will take and make thee mine;
Thou hast been Queen Candace
And Helen of Troy, and shalt be
The Intelligence Divine!"

Oh, sweet as the breath of mom,
To the fallen and forlorn
Are whispered words of praise,
For the famished heart believes
The falsehood that tempts and deceives,
And the promise that betrays.

Exterminator Moth Solution

Wayside 398

This exterminator has been so successful in destroying moths and insects that are injurious to plant life that it is approved by the moth commissions of nine states and by everyone using it. Mix one quart with ten gallons of water and spray all affected bushes and trees thoroughly in dry weather. Two applications kill all moths, eggs and larvae.

Failure Impossible

If design, workmanship, price—and last, but not by any means least—the type faces are up-to-date. The successful printer of today is the one who is ever on the lookout for new methods of attracting the attention of prospective customers, and once having them, by prompt and efficient service holding them. Obsolete type should be discarded, as it only takes up valuable space, and its place can easily be filled by a carefully selected assortment of appropriate series of American Line Type made only by

ADVERTISING THAT ADVERTISES

is the sort desired by persons seeking publicity for their wares. When buying anything you go to the place which has a reputation of affording the best. Anyone can buy space and fill it. But everybody cannot buy space with discrimination.

Advertising agents are primarily for this purpose, and those agencies are the most dependable which have the largest clientele of successful advertisers.

In This Respect We Lead

We make plans, write advertisements, booklets and follow-up letters free of all charge for those whose advertising we place, and for others at reasonable rates

The recent complications in the business field and that have prompted one perhaps of the best informed of all political economy to compile and publish in an attractive book and forms a very excellent treatise on what should be the relations between each corporate interests involved. Many complex questions of national importance are intelligently answered.

The author of this volume is an exceedingly well informed man, having been connected in many capacities with several of those recent financial troubles which are far-reaching in their effects. He has acted as estimator, and has found himself at one time or another occupying either an experienced

PRELUDE.

As treasures that men seek,
Deep-buried in sea-sands,
Vanish if they but speak,
And elude their eager hands;

So ye escape and slip,
O songs, and fade away,
When the word is on my lip
To interpret what ye say.

Were it not better, then,
To let the treasures rest
Hid from the eyes of men,
Locked in their iron chest?

I have but marked the place,
But half the secret told,
That following this slight trace
Others may find the gold.

CROSS COUNTRY RIDING IN BAYERS

CHAPTER VIII

THERE was a time when to burlesque drag-hunting and to jeer at those who rode across country to the scent of aniseed was the popular business of the daily press and the pleasure of its many readers. We are all familiar with those self-satisfied individuals who, in their missions fulfill upon every hue and cry with which they are met or that is beyond. And those who were pioneer drag hunters are busily slating probably it during the most scoffing. brought us their message. Demoralizing as it certainly was to humanity's former ideals, philosophic, theologic and poetic, it bore the spirit of an absolute conviction and must be heard as it will convince you. What a contrast this winged botany of our day is to that of a hundred years ago! The flower, no longer is the non-committal, structural, botanical specimen only. It is no longer the example of mere arbitrary independent creation, reverently and solely referred to as the one orthodox delight of man. The blossom whose unhappy fate was bemoaned by the sad poet because forsooth it must needs to blush unseen or waste its glad sweetness on the desert air, is found alone in the musty hortus siccus of a blind and deduced past. In a recent number of the *Technical Journal*, an article by Charles W. White says: "Any printer with an informed mind and an artistic taste must have rejected a goodly portion of the faces shown in any of the specimen books, and been abundantly justified in doing so. The faces that have disappeared belong to a period in the history of American printing which it is more agreeable to remember little of. It was the time of the extremely common, in types and printing. There was little originality displayed by the type founders, who were content with producing an occasional new face of doubtful merit, and who kept all the old faces firmly fixed in their specimen books. THIS is an American Line Type pre-eminent for printing Newspapers, Catalogues, Brochures and other advertising literature. Easily read, attractive to the eye, and possessing individuality which makes it distinctive. **¶** Still another point in its favor is the absence of hair lines, which will appeal forcibly to the buying printer on account of increased durability and wearing qualities. **¶** The Century Expanded was cut on the Benton Punch Cutting Machine, the product of which is the closest approach possible to absolute accuracy. The counters are deeper, and the bev-els are truer, and are invariably of uniform slope. This makes it possible to preserve the character of the face even after the type has had long use, which is always impossible in hand cut type or that produced by ordinary methods.

Can't be Beat

There can be none better than "best," and the best type is American. Don't think for a minute that the good work is beyond you. In proper material is the secret of profit in production. Ads like these are put together exactly as a modern building is constructed. We design the parts so they can be easily assembled to form modern structures as per the whim of the typotect. That's all there is to it: a judicious selection of material like this

Critical Review of the Celebrated Books in the Royal Library at Stockholm Finely Illustrated

"Woodcut" Initial 7224

ONE of the most costly books in the world is a copy of the Bible in the Royal Library at Stockholm, and there is not another like it in existence. It is another monument to the zeal as well as

the artistic skill and courage of the early monks, written on skins which were used in making being one yard in length and four inches in width. The covers were of solid planks four inches thick. The contrast between the monk poring over his manuscript and the art of bookmaking

THE DESIGNER

HIS RELATIONSHIP TO THE PRINTER

Roycroft Initial

DESIGNING and manufacturing of type, to fully meet present day requirements, demand more than artistic study and skill. The type founder, to be successful, must not only thoroughly understand all the needs of the printers, but must anticipate them. To do this intelligently, he must be well informed as to what is going on in all branches of the business and in all parts of the country. That is the position which is so prominently occupied by the

Printing Types And Material of All Kinds

The American Type Founders Company is the most extensive of the world's dealers in printshop machinery and material. Its salesrooms are located in the largest city of every business district of importance in the United States, and it also has special dealers distributed throughout the principal printing centres of the universe. There is absolutely nothing that goes into the equipment of a modern plant it cannot furnish. It makes a specialty of cylinder and job presses and paper cutters, at liberal rates.

PRINTERS sometimes have unknowingly misused this series, wherein two styles of letters are included, failing thereby to obtain the completeness of detail planned for by the designers.

Roycroft Initial

The long s and its combinations are : f, s ; fh, sh ; fi, si ; fl, sl ; ft, st. It is very effective in antique work. It should not be concluded that a strict following of all these directions is necessary to produce good work, but better results will be obtainable if they are very closely adhered to. The readiness with which these faces conform to certain lines of work becomes at once apparent, and with the assistance of their special characters give a fascinating charm to antique publications.

The special characters should be used as follows :

- M In words the letters of which are open.
 - R Use as a final letter in all-cap words.
 - h As a final letter, never otherwise.
 - m As a final letter, only.
 - n As a final letter, exclusively.
 - t As a final letter, but not too frequently.
 - u In words having no descending letters.
 - ct Wherever possible, as "attracted."

Announcement Arts and Crafts School of Albion

The Arts and Crafts School of Albion has been organized for the purpose of giving to as many as possible of the boys of Albion an opportunity for instruction in handicraft, and to foster an interest in artistic and beautiful handwork based upon the principles of good design.

In addition to the educational value of the work to the student, when his own work shall meet with the approval of the instructor he will reap some pecuniary benefit for himself therefrom, besides helping to make the school more self-supporting

Electricity in Your House

Means Real Economy

THERE is not only HOW LITTLE IT COSTS, and the consequent saving in expense to be considered, but the saving in health, the saving in time, the addition to the comforts of life, the accentuation of the ease of living in a real modern way, inexpensively; these are not only considerations but conditions that present themselves to the economical house-keeper. Electricity that supplies LIGHT in your home will run a revolving fan—operate a machine or heat an iron without dirt or trouble in your sewing-room—conveniently heat a chafing dish or boil coffee; LIGHT, HEAT and POWER supplied from one source.

In this connection housewives will be interested in the display of Electrical Cooking Utensils now being exhibited in the basement of our store and in use in all the best hotels

PEDIGREED MARES

Our breed mares are famous for their speed-producing qualities, and some of the fastest horses now on the track were bred in our stables. We have a large number of yearlings and two-year-olds for sale. These colts are all warranted sound and kind; well broken to harness; show good action, and signs of great speed. If you are desirous of purchasing, an examination of our stock would show you that our stable has no equal and we are confident that you would find something in our stock to suit you

The Uncertain
Period of Grecian
History

Extending from the close of the Trojan war to the first of the war
with Persia, 1183 to 490 B. C. — 693 years

THE immediate consequences of the Trojan war, as represented by Greek historians, were scarcely less disastrous to the victors than to the vanquished. The return of the Grecian heroes to their own country is represented by Homer and other early writers to have been full of tragical adventures, while their long absence had encouraged usurpers to seize many of their thrones; and hence arose fierce wars and internal commotions, all of which greatly retarded the progress of Grecian civilization.

Among these petty revolutions, however, no events of general interest occurred until about sixty years after the fall of Troy, when the people from Epirus,¹ passing across the mountain chain of Pindus,² descended into the rich plains which lie along the banks of the Peneus,³ and finally conquered the country, to which they gave the name Thessaly; driving away most of the inhabitants, and reducing those who remained to the condition of serfs or agricultural slaves

1. The country of Epirus, comprised in the present Turkish province of Albania, was at the north-western extremity of Greece, lying along the coast of the Adriatic Sea, or Gulf of Venice, and bounded on the north by Macedonia, and on the east by Macedonia and Thessaly. The inhabitants in early times were probably Pelasgic, but they can hardly be considered ever to have belonged to the Hellenic race, or Grecians proper. Epirus is principally distinguished in Grecian history as the country of the celebrated Pyrrhus. The earliest oracle of Greece was that of Dodona in Epirus but its exact locality is unknown. There was another oracle of the same name in Thessaly. Map No. 1.

2. Pindus is the name of the mountain chain which separated Thessaly from Epirus. Map No. 1.

3. Peneus, the principal river of Thessaly, rises in the Pindus mountains, and flowing in a course generally east, passes through the vale of Tempe, and empties its waters into the Theraic Gulf, now the gulf of Salonica, a branch of the Aegean Sea, or Archipelago. Map No. 1.

Porcelains and Cut Glass

Domestic and Imported

Porcelains sold by this house are conceded by best judges of porcelain ware as the finest produced in the world, and our present showing of Porcelains and Glass was made expressly for us by famous manufacturers, both at home and abroad. We also have a separate department devoted expressly to the needs of hotels, boarding houses and steamships in which we carry large stocks of Tableware at economic prices, and the men in charge give all their time to this branch of the trade

by Military Executive

It is believed that part of the Japanese fleet is now taking up a position south of Formosa, and that Admiral Togo's plan is to engage with the Russians there. The Japanese get orders from this city at night time. Martial law, which was first declared at Tamsui, Island of Formosa, and subsequently made general throughout the Island, has been followed by the selection of a military governor and pillaging of stores has been stopped

AMERICAN LINE BEST

The excellence attained in the American Line is unquestionably highly appreciated by printers generally. It has made possible the easy alignment of type of one size with that of any other. The American Point Line System has also been introduced into Foundries across the water. Order a font of American Point Leads to simplify alignment. They do the trick without any waste. That a saving of much time is gained by the use of point line type is proven by the fact that nearly all good printing offices immediately adopted it

To Attract Attention

In the majority of advertising matter it is necessary to go a little out of the way to attract much attention. In other words, the business represented must toot its horn loud enough to insure attention before it attains a hearing

—American Printer

A good, snappy illustration on a new type design will furnish the requisite wind to insure a proper tooting of the horn. It is material of this kind that is the exclusive product of the American Type Founders Co. Such material is shown in this Type Book

CONTRACT FOR BUILDING WARSHIPS

Delaware Builders Make Business Visit Abroad to Complete Details For Enormous Naval Armament

Charles M. Swinton and Silas Young will sail for Russia within the next few weeks, where they hope to close negotiations with the Russian Ministry for the construction of ten battleships and their accessories, together with other naval armament, at a total cost of \$100,000,000.

Mr. Swinton admitted yesterday that Mr. Young and himself would leave for St. Petersburg to discuss and probably conclude negotiations with the Russian government. These negotiations have been in progress for several weeks. It was stated, however, that the propositions which Mr. Swinton made on behalf

of the Martinburg Steel Company have not been closed. It was known among the large shipbuilders of the world that Russia proposes to begin immediately the reconstruction of its navy and tentative propositions have been given by several English and German concerns to the Russian government, but when the

NEW MONEY FOR OLD AT SUB-TREASURY

**KIND UNCLE SAM HAS EXPRESSED THERE \$3,000,000
FOR CHRISTMAS PRESENTS**

A Christmas gift in cash, whether to your wife or your bootblack, is received with greater appreciation when the banknotes are crisp or the coin new and shining.

Uncle Sam, who is a sort of Santa Claus, knows this, so he has sent \$3,000,000 in freshly-engraved yellow and greenbacks and newly-coined gold pieces to the Wall street Sub-Treasury.

"New money for old" is now the Aladdin-like cry there. But no one can get more than \$300 in new money without paying a small premium—the express charges on it from the mints to the Sub-Treasury.

Uncle Sam, who loves all his children, demands this premium so that any fellow will have a chance to get a bright \$5 gold piece and put it in baby's bank.

MADISON LAKES

Four limpid lakes, — four Naiades
Or sylvan deities are these,
In flowing robes of azure dressed ;
Four lovely handmaids, that uphold
Their shining mirrors, rimmed with gold,
To the fair city in the West.

By day the coursers of the sun
Drink of these waters as they run
Their swift diurnal round on high ;
By night the constellations glow
Far down the hollow depths below
And glimmer in another sky.

Fair lakes, serene and full of light,
Fair town, arrayed in robes of white,
How visionary ye appear !
All like a floating landscape seems
In cloud-land or a land of dreams,
Bathed in a golden atmosphere !

ANNOUNCEMENT

THAT DESIGN IN A TYPE FACE IS THE THING TO LOOK FOR IS AGAIN DEMONSTRATED IN THIS DISPLAY OF THE COPPERPLATE GOTHICS. NOTE THE EFFECT OF COPPERPLATE ENGRAVING IN THE CARDS AND ANNOUNCEMENTS. THE JOHN HENRY AND THE BOWER FOUNDRY LETTER HEADS SET IN THE STYLE USED BY LITHOGRAPHERS ARE VERY GOOD EXAMPLES OF THE AMOUNT OF HARMONIOUS DETAIL OFTEN DESIRED, BUT IMPOSSIBLE TO OBTAIN WITHOUT THE USE OF THESE SERIES. ATTENTION IS CALLED PARTICULARLY TO THE FACT THAT THE HEAVY AND LIGHT ARE CAST THE SAME SET, MAKING EMPHASIS EASY. THE 6 AND 12 POINT FONTS LINE AT THE BOTTOM WITHOUT THE USE OF LEADS.

THE COPPERPLATE ENGRAVER AND THE LITHOGRAPHER FIND CONSTANT USE FOR A CONDENSED LETTER AT TIMES ON ACCOUNT OF LACK OF SPACE, BUT MORE FREQUENTLY TO OBTAIN THE PROPER BALANCE AND COLOR,

THE PRINTER WILL FIND IN THESE TWO SERIES THE STRENGTH AND VIRILITY OF THE NORMAL LETTER WITH THE REQUISITE LEANNESS NECESSARY FOR LIMITED SPACE, AT THE SAME TIME EFFECTING THAT HARMONY OF FORM SO MUCH TO BE DESIRED.

CHILDREN'S AMUSEMENT

Yourself and family are invited to help make merry at an entertainment tendered the children, on the lawn of our residence, Monday afternoon, August eighteenth, nineteen hundred six. There will be plenty of music and a programme of sports arranged, which will be followed by a toy balloon ascension. A good time for the little ones.

Music

*Only Sensual Gratification in Which Mankind May Indulge to Excess
Without Injury to Moral or Religious Feelings*

Music ennobles those who study it, as well as those who hear. It entertains and fascinates both the young and old. Mankind loves and admires it, even worshiping those who produce it. Food, raiment, shelter, then music; who can contest Music's right to the fourth place as a human necessity?

FINE PRINTING AN INVESTMENT

THE trade magazines pertaining to the printing business, together with the fine specimen sheets that are issued so frequently by the American Type Founders Co., have become the principal mediums for demonstrating the possibilities of type, ink and paper from an artistic standpoint. These three forces depend each upon the other, but the effectiveness of this great combination rests mainly on the manufacture of the type; the quality of its metal and the beauty of its face being absolutely necessary to the completion of good work. The finest line of type faces ever designed and cast are those originated and produced by high-class artists and mechanics employed by us.

A FEW REMARKS ON PRINTING
WORTH READING

CALLING to mind a story I heard told not long ago by a prominent photographer, I will relate the same one to you. He said: “When I was quite new at the business I always used to take the greatest pains to get every picture to please me, and very often the customer would say, ‘It’s not a bit like me.’ Now I put the plates through in the least possible time and results are fifty percent better.”

DOESN’T it often seem as though foremen of some printing shops resemble the picture taker? Hours of time, multitudinous explanations, lots and lots of gray matter are spent upon a job which the customer in very many instances rejects. It is fairly safe to assert that the simplest and most direct method of getting effects will, in nine cases out of ten, please the customer, as well as be productive of the least unpleasantness.

Picturesque Sunland

THE mecca for pleasure seekers and home builders. No Winter climate to contend with, and no rainy season like most tropical lands. This resort has been opened to those who are seeking permanent homes in a health-giving climate and in a land that is not city-spoiled. The streets are wide and shady with luxuriant trees. Good water in abundance. All proper restrictions. A booklet for the asking.

GREETING TO
OUR FRIENDS

For more than a
quarter of a century
we have kept in close
touch with the wants of
the public. This careful
and continued watch of
the interests of mem-
bers of this community
has given us intimate
knowledge of their re-
quirements in matters
of general and personal
supplies and also in the
more elaborate articles
of texture for raiment.
Therefore, we are in a
most favorable position
to fully and intelligently
cater to their needs to
a mutual satisfaction

Satisfy the Soul's Spirit? Etc.*

THE PUBLISHERS desire to call your attention to the above work they now have in preparation, and the following pages, which will give an outline of the History. This volume will, in every respect, be a most valuable contribution to Monasterian History. No expense has been spared by the publishers in the mechanical execution of the book. The first edition will be limited to only five hundred copies, printed on fine paper, illustrated with portraits of well known men, including Benjamin Gillmore, John Dinon, George Henderson, Benjamin Kellogg, Henry George Buckingham, Frank Cobb, James Kane, Harry Sinclair, and others. Each copy will be as represented, and the binding will be dignified and handsome.

Your advance subscription is solicited for this volume before February 16, 1906. The price to advance subscribers, sending in their orders before that date, will be \$3.50 by express prepaid.

Orders will be entered as soon as received. Subscription blank enclosed. The book will be published by April 16, 1906. Sold only direct from the publishers.

The first thing to impress one in Spanish paintings of today is the expression of realism. Every Spaniard in art closely observes nature. STRATHMORE TYPE SERIES

THE Strathmore type face was designed by a well-known Eastern artist who has had much to do with the work on editions de luxe brought out in recent years by some of our greatest publishing houses. In his endeavor to strike upon some original style of letter he was compelled to make diligent search through many large libraries. By chance he was given access to one of the greatest private libraries in New York City, and after much deliberation partly adopted a style considerably used by Spanish sculptors and artists hundreds of years ago, then considered paramount in all things pertaining to art. That the artist has modified the original style to one that meets the requirements of the printer of today goes without saying, and we feel a confidence in prophesying that the Strathmore will be included among our most prominent type faces. The Series will comprise fourteen sizes—from six to seventy-two point—and will be ready for the market at an early date. The several ornaments that are shown with this series will also be classed among the best recently introduced to the ever progressive printer.

PRINTERS SHOULD BE WARY IN SELECTING THEIR TYPES

Strathmore Initial Square

PRINTER, when choosing type, should not only attend to the cut of the letter, but should as well observe if its shank is perfectly true, and that it lines or ranges with accuracy, and is of an equal height. Then the quality of the material of which it is composed and the finish of the letter itself demand particular attention. The ease with which type faces of an inferior grade may be made through the facilities afforded of multiplying matrices by the electrotype process instead of cutting direct has also led to the use of poor metal and to the sale of types without due regard to nicety of finish and exactness of body and standing. ¶ It is important that types should have a deep face with strong, beveled sh bases or foundations u the ceriphs or hairline and that the letters sh have a deep nick, whic should be different fro other fonts of like bord in the same house. ¶ A Manuccio, born at Bas succeeded Jenson at V and turned to good acc the latter's admirable fonts of type. He also made many advances i the art of printing, the most notable of which is the invention of the style of type now known as Italic. It was first used in an octavo edition of Viril issued by him in 1501, and Pope Leo X. gave him a letter of privilege, entitling him to the sole use of the type he had invented. It is said to have been founded on the handwriting of Petrarch, which it closely resembles. ¶ Italic was largely employed to distinguish such parts of a book

ROMAN letters were employed in MSS. from the fifth to about the close of the twelfth century, when what are called Gothic letters (and afterwards Old English) came gradually into use; these continued for several centuries, when, in most countries, they were superseded by the Roman characters. All printing was in black letter down to 1465, when Sweinheim & Pannarrz, in Subiaco near Rome, produced a volume, which they entitled Lactantius, in characters approaching to the actual forms of our modern types. In 1467, they made improved characters and printed about

Reach of Police and Friends

The Leader says the police have asked assistance to trace two rich personages well known in Moscow social circles, who have been kidnaped and are being held for ransom by Anarchists. A draft for 1,000,000 roubles, drawn by one of the prisoners and indorsed by the other, was cashed by a banker in St. Paulusville.

THE LAST LEAF

I saw him once before,
As he passed by the door
And again
The pavement stones resound
As he totters o'er the ground
With his cane.
They say that in his prime,
Ere the pruning hook of Time
Cut him down,
Not a better man was found
By the erier on his round
Through the town.

Clothes have more effect upon us than we imagine. Our deportment depends greatly upon our dress. Make a man get into some seedy, worn-out rags, and he will skulk along with his head hanging down, like a man going out to fetch his own supper beer. But deck out the same article in gorgeous raiment and fine linen, and he will strut down the main thoroughfare, swinging his cane and looking at the girls, as perky as a bantam cock.

18 Point No. 12418

18 Point Rule

Rule larger than 12 point is not called for in regular fonts in sufficient quantities to make it advisable to carry regular scheme fonts in stock. It is sold by the piece according to prices in Tables H and I on page 675.

As a basis for figuring we give below schemes for fonts of 18 point rule, weighing approximately 3, 5 and 10 pounds.

3 POUND FONT

1 to 4 ems by one-half ems—4 pieces each.
5 to 14 ems by ems—2 pieces each.

The above pieces (see Tables H and I on page 675), amount to \$4.44.

5 POUND FONT

1 to 4 ems by one-half ems—4 pieces each.
5 to 10 ems by ems—3 pieces each.
11 to 18 ems by ems—2 pieces each.

The above pieces (see Tables H and I on page 675), amount to \$7.05

10 POUND FONT

1 to 4 ems by one-half ems—4 pieces each.
5 to 18 ems by ems—3 pieces each.
19 to 25 ems by ems—2 pieces each.

The above pieces (see Tables H and I on page 675), amount to \$13.21.

Miters (18 point), 2½ ems pica long inside, would amount to 72 cents per set and 5 em miters \$1.04 per set, figured from Table H (using outside measure) and the charge for mitering in Table F.

Quantity Discounts on Cut Rule

The prices in Tables H and I are subject to the following quantity discounts in addition to regular discounts, if order for rule of **one body and face ordered at one time** equals or exceeds (exclusive of notching charges):

\$10 00	The quantity discount is	5 per cent.	\$50 00	The quantity discount is	15 per cent.
\$20 00	The quantity discount is	10 per cent.	\$100 00	The quantity discount is	20 per cent.

This discount to be deducted before the regular discount on brass rule. Notching charges are NOT subject to the Quantity discount, but are subject to the regular discount.

Corner Quads—Brass and Metal

The use of Corner Quads insures a better junction of mitered corners by preventing them from slipping past each other. They are made in both brass and metal, and sold at the following prices:

Brass Corner Quads, made on both 2 point and 3 point body, in sets of four, per set	\$0 20
Metal Corner Quads, made on both 6 point and 12 point body, in sets of four, per set	0 15

Circular Quads

Size of largest circle

Circular Quads, price per font \$3 50

Angular Quads

These quads, introduced by us, are for setting rules and lines at an angle. When there is occasion for their use they are invaluable time-savers. They are of ordinary space and quad height.

Fonts, four of all sizes \$1 50

Every character is cast on en-quad set, and only en-quads and 4-to-em spaces are used for spacing. By setting sticks to a multiple of 10 Point, spacing and justification become mere child's play; in fact, this type is self-spacing. Although the face is large, on examination it will be found that Time-Saving Mail List Type is quite as condensed on the average as ordinary Mail List Type. Price same as 10 Point Roman.

United States Signal Flags

Explanation of Weather Signals

Clear or Fair Weather—WHITE, SQUARE FLAG. Print No. 1 in black. Displayed alone, indicates fair weather, stationary temperature; displayed with No. 4 above it, indicates fair weather, warmer; displayed with No. 4 below it, indicates fair weather, colder.

Rain or Snow—BLUE, SQUARE FLAG. Use No. 2, or print No. 6 in blue over No. 1 in black. Displayed alone indicates rain or snow, stationary temperature; displayed with No. 4 above it, indicates rain or snow, warmer; displayed with No. 4 below it, indicates rain or snow, colder.

Local Rain—WHITE AND BLUE, SQUARE FLAG. Use No. 3, or print No. 7 in blue over lower half of No. 1 in black. Displayed alone, indicates local rain, stationary temperature; displayed with No. 4 above it, indicates local rain, warmer; displayed with No. 4 below it, indicates local rain, colder.

Temperature Signal—BLACK, TRIANGULAR FLAG. Print No. 4 in black. Displayed in conjunction with other signals, as above described.

Cold Wave—WHITE, SQUARE FLAG, BLACK CENTER. Print No. 5 in black. Displayed alone indicates temperature will fall 20° or more, to a minimum of 32° or less. When displayed with No. 1, indicates fair weather, cold wave.

Explanation of Wind Signals

Storm—RED, SQUARE FLAG, BLACK CENTER. Print No. 10 in red over No. 5 in black. When displayed, indicates that storm of marked violence is expected. *Hurricane*—Indicated by two storm flags displayed one above the other.

Cautionary—RED, SQUARE FLAG, WHITE CENTER. Print No. 10 in red over No. 1 in black. When displayed, indicates that the winds expected will not be so severe. Well-found, seaworthy vessels can meet them without danger.

Easterly Winds—RED PENNANT. Print No. 9 in red over No. 8 in black. When displayed above either Cautionary or Storm Flags, indicates northeasterly winds; when below, southeasterly; when alone, that special information of storms is to be obtained by calling on Signal Officer in charge.

Westerly Winds—WHITE PENNANT. Print No. 8 in black. Displayed above either Cautionary or Storm Flags, indicates northwesterly winds; below, southwesterly.

TYPE FOUNDERS CO.

The Flemish Border

Originated and Cast by American Type Founders Co.

For One and Two Colors

Usable at all seasons of the year, and in multiform classes of printed matter. Particularly adapted to all ecclesiastic work, striking advertisements, show cards covers, etc. Merit Cards for Sabbath Schools will become peculiarly attractive to little children if Flemish Borders in two colors are used in their construction. It will be remarked that while the prices quoted are exceptionally low, the font quantities are so liberal as to more than supply the requirements of any ordinary job

Bewick Borders

In the use of Decorative Material, made in the form of individual border units, the compositor is brought next door to the designer. With such movable units a booklet cover can be designed which will prove quite as effective as could be secured through use of a specially engraved design and at much less cost, and with the added advantage that in this form the material is available for still further combinations in other work.

Individual Border Units or Embellishers in this form are subject to an almost endless variety of arrangement suitable for cover designs, leaflets or other forms of advertising display, when the buyer of printing desires a distinctive design.

Chaucer Borders

There is an originality and distinctiveness in border characters or embellishers of the Chaucer designs which impart to printing all of the flavors of an engraved design. They are an immediate and pronounced departure from the ordinary product of the type foundry, and the universality with which these have been adopted the country over indicates the introduction of a new style of typography. The result cannot fail to be a marked increase in the use of all forms of printed matter for trade extension

Pabst Borders

The majority of type display is for the purpose of commercial advertising, the demands for which are continually increasing, and the requirement on the part of the buyers of printing is for modes of expression which shall catch the eye. The American Type Founders Company has been quick to appreciate this coming demand, and this American Line Type Book makes available a wealth of Decorative Material which the wide-awake printer will be quick to turn to practical advantage in the extension of his business. Never before have printers been offered such distinctive type faces with border designs which harmonize and which bear so plainly the earmarks of having been designed for a specific purpose

Of prime importance and value among the Decorative Material that is shown in the American Line Type Book is this new series of borders, called Panel Borders, designed to be used for the building of panel typography of the style which has of late had such a vogue. These borders are cast in long pieces and may be more quickly and easily handled than brass rule. The open space between the characters tends to simplify press work, while the flexibility of such material makes it much more economical than brass rule. These Panel Borders are in stock and may be had at any house of the American Type Founders Company.

These Ornaments are cast in a cored type mould, with as little shoulder as possible on the inside of the wreaths, so that type lines may be set close up. A great variety of designs may be quickly and easily produced with these inexpensive Ornaments

Laurel Ornaments

Are designed to work separately and with the Laurel Borders shown on page 739. Wreaths may be enlarged symmetrically by using the single piece

Knickerbocker Ornaments in Display

The Arthur I. Moffatt Co.

Originator & Maker Men's Fine Clothes Exclusively

In Lams Row, near Huntington Boulevard

¶ This series of Ornaments has a wide range of usefulness, where an original design is required for color work. Put up in usable fonts at popular prices. The large characters have been cast in different designs, so that a variety of combinations may be made when used as a border, enabling the printer to secure still more of the engraved effect by avoiding repetition. A separate price has been given to the individual characters, so that at very little cost a variety of distinctive designs is made possible

Whether or no 'tis best to take advantage of the improvements that are offered as the type founding science daily progresses. Is not the status of the printing art governed thereby?

American Type Founders Co.

A series of pictures for attracting the eye and arousing the interest, thereby increasing the value of printed matter. They are intended to illustrate catchy phrases (a million or more of which are applicable), a few of which are printed. Cast like type, in two sizes, 72 and 96 Point. Great aids to the printer

On the succeeding pages are shown specimens of the standard faces in Wood Type as well as additional designs which are entirely new in wood letter. This selection has been made with reference to securing the best possible results in the production of fine poster printing.

Any style can be furnished in any size desired, and in the following table we give prices for all sizes up to 100 lines pica. Complete Specimen Book will be sent upon application.

By reference to the Revised Price List and the Scale of Fonts it will be found an easy matter to determine the price of any style of Wood Type in any desired size. First determine the kind of font desired—whether caps only, or caps and figures, or caps, lower case and figures. Then determine the size of font desired, whether 3A's, 4A's or 5A's. When this is determined you will have the total number of characters in the font. See in what class the particular style is listed and find the price per letter. By multiplying the total number of pieces by the price per letter you obtain the list price.

REVISED PRICE LIST PER LETTER

The prices for all sizes of each style of type shown in this book can be found in this Revised Price List. The left-hand column gives the size of type, or lines pica. The letters L, M, N, etc., at the top of table, give the class to which the letter belongs, and the figures in the different columns give the price per letter. The sizes of fonts are given on this page in the Scale of Fonts.

Always state whether CAPS alone are wanted, or CAPS and FIGURES, or CAPS, LOWER CASE and FIGURES, or CAPS and LOWER CASE, and how large a font or number of A's.

Give full directions for shipping, unless it is desired to leave the matter to us, in which case we will ship the cheapest way, freight or express.

Wood Type is priced by the letter, and sold in various sized fonts, as under. Font orders are

subject to a liberal discount; small sort orders are subject to a smaller discount than is allowed on fonts. 3 A cap font contains 75 letters; 3 a lower-case font contains 65 letters; 4 A cap font contains 106 letters; 4 a lower-case font contains 90 letters; 5 A cap font contains 120 letters; 5 a lower-case font contains 104 letters. Figures are put up separately, 26 in each font.

REVISED PRICE LIST PER LETTER

Please bear in mind that End Wood Type is made in any size. A wood-type letter, in exact proportion, increases in width and length. Example: If a 12-line letter is 2 inches wide, the same letter in 15-line will be 2½ inches wide, the increase being ¼ each way.

Hamilton Newspaper Files

Made of cherry, finished in oil, with brass fastenings and polished steel thumb-screws. The method of opening and closing this file is novel and simple. The clasp end of file has a flat-headed thumb-screw (see cut) which is passed through a slot and by giving the screw a quarter turn the file is securely locked. When the head is turned parallel with the file it opens instantly.

Price each \$1 25

Patent New Departure Type Cases

Shows at AA how the three-ply bottoms are set into the front and side rails, so that the case slides on the rails instead of on the case bottoms.

Shows three-ply case bottom which will not warp or crack

Our Cases all have patent "New-Departure" three-ply bottoms, which prevent splitting, warping and shrinking. These bottoms are set into the side and front rails (see AA) so that the case slides on the side rails. As the grain of the side rails and of the cross-runs in stands and cabinets run the same way, the cases slide much easier and with considerable less wear and tear.

Patent Clasp Cases

These cases are of unusual strength owing to the use of a brass clasp over the corner of each box and a long pin which is driven through center of each clasp and clinched, holding the partitions firmly to the bottom of the case. This feature in combination with our New Departure case bottoms, makes these cases the strongest and most durable, especially for body type in newspaper offices.

Adjustable Lead and Slug Cases

These cases have slotted rails at the front and take in adjustable strips. The arrangement is such that the case can be divided into various compartments, the variation being by single Picas. This will enable the printer to lay out this case to accommodate leads and slugs all of one length or varying by Picas, such as 4, 5, 6, 7, 8, etc., or any other arrangement desired.

The No. 1 is made without a center bar, as shown. The No. 2 has a center bar running the long way, which is also slotted on both sides.

Russell Tabular Case

This is specially designed for tabular work; has boxes for all special characters as marked, and will save at least twenty per cent of the compositor's time on table work. On the left-hand side are twenty-eight compartments for the odd characters and diacritical marks, also twenty-one boxes at the front for brass rule and brass leaders. On the right-hand side of the case are twenty-four boxes of equal size for piece fractions, and six large boxes at the front for quads and leaders. In the center of the case, at the front, are very large boxes for the main figures, spaces and quads, also small boxes for the thin spaces and points; at the back are fourteen boxes of medium size for the main fractions.

This case can be adapted with profit to a variety of uses.

Quarter Cases

Carpenter Quarter Case

This Case is most useful in tabular and other intricate work. It is intended to set on the ends of the lower cases in the center between two lower cases, but not interfering with the same. It rests on top of the cases and the lugs on the back end hold the case from slipping off at the front. It also has a lip at the front which enables other small cases to be put on top of this case and remain in place without danger of slipping off. It has double spaces for fives and ciphers, the figures most used. It has compartments for justifying material and special sorts.

Carpenter Quarter Case . . . Price \$0 75

Individual Lead or Rule Case

In this a compositor may keep his much-valued 12-to-Pica and other thicknesses of leads for justifying purposes, his pickups of dashes, rule, etc. The case can be kept in his drawer or on his galley rest. It has boxes from 1 to 9½ ems (varying by ems) from 10 to 20 ems (varying by ems) and from 20 to 24 ems (varying by two ems). It is also useful for holding a small font of labor-saving brass rule. Size 7x7½ inches over all.

Eight of these cases just fill an ordinary blank case.

Harris Rule Cases

No. 1 Harris Rule Case holds two complete fonts of Labor-Saving Rule, each weighing 8 pounds, or 16 pounds in all. Each half of this case holds eighteen pieces each length from 1 to 8½ ems (varying by ems) and eighteen pieces each from 9 to 18 ems (varying by ems) and nine pieces each 19, 20, 21, 22, 24, 26 and 28 ems, besides right and left miters.

No. 2 Harris Rule Case holds one complete font of 16 pounds weight or less. It has compartments for thirty-six pieces each from 1 to 9 ems long (varying by ems), eighteen pieces each from 10 to 24 ems long (varying by ems), and eighteen pieces each of 26, 28, 30, 32, 34 and 36 ems long, besides boxes for right and left miters. A large proportion of small lengths allowed for.

Nos. 3 and 4 Harris Rule Cases are designed to be used together to hold a font of rule suitable for a large office, weighing 32 pounds or less. Two and in some cases four boxes are used to hold the most-used sizes. Each case has its proportion of the small sizes, so that if it is desired to carry one case to a compositor's stand for use in rule work, the other is available in its regular place with a good working font. These cases have compartments for seventy-two pieces each from 1 to 9 ems long (varying by ems), thirty-six pieces each from 10 to 24 ems long (varying by ems) and eighteen pieces each from 25 to 36 ems long (varying by ems) and boxes for right and left miters.

In Harris Rule Cases the rule cannot fall flat—must always stay on end. Generous provision is made for the smaller sizes—the most valuable sizes in a labor-saving font. The cases may be used in sets or separately, as Nos. 1 and 2 are complete in themselves. Four of them fit into a Full-Sized Blank Case.

Made the same size as the Harris Rule Cases. To meet requirements of border and ornament fonts, the short partitions are movable; but, being closely fitted, they will remain where placed. Size of small boxes can thus be readily adjusted.

Wisconsin Combination "Quarter" Cases

Shows four "Quarter" Cases in a Full-size Blank Case. Price \$3 00

"Quarter" Cases supply a means of keeping signs, borders, accents and split fractions where they can be found. They can be placed on a cap case, on a stand, or on the stone, convenient to hand of compositor. In setting mathematical work, foreign languages, dictionaries and special catalogues, these "Quarter" Cases will prove invaluable. We show a few schemes for laying signs, fractions, etc., but various other uses will suggest themselves.

Leader Boxes

The Hamilton and May Leader Boxes on a Case

Here are two styles of Leader Boxes. The Hamilton Box is flat and can be carried about the office and set on any flat surface. If placed on a case it covers some of the type boxes, as shown in the illustration. The May Box is adjusted to the back part of the case and covers part of the lower-case box only when adjusted to a lower case, as shown in the illustration.

May's Leader Box

Hamilton Leader Box, per dozen

May's Patent Leader Box, per dozen

Both of these Leader Boxes are very handy devices, and each is very useful for certain purposes. For the job man the Hamilton Box is probably the best, as it can be used anywhere about the office, carried to the job bank or used on a stone. For the type compositor the May's Box is undoubtedly the best, as it does not cover the type boxes when in use and is placed in a certain position and kept there. Leader boxes should be provided for every size job type in the office. Size of Hamilton Box, $5 \times 8 \times 1\frac{1}{4}$ inches. Size of May's Box, $4\frac{1}{2} \times 6\frac{1}{2} \times 1\frac{1}{2}$ inches.

Eureka Lead Rack, capacity 180 pounds

Four-tier Wisconsin Lead Rack ; 4 to 12½ by ens
13 to 60 by ems twice

The Eureka Lead Rack is substantially constructed in two sections, each section holding lengths from 4 to 28 ems, varying by single ems. One section may be used for leads and the other for slugs. The partitions in this Rack are placed on an incline to prevent the leads and slugs from falling. These partitions are also inclined backwards, so that the material cannot be easily thrown from the case by a slight jar. Size of Rack 14½ × 28½ inches. Compartments are 5½ inches wide inside.

Takes leads from 4 to 12½ ems (varying by ens) and from 13 to 60 ems (varying by ems) the length being stamped over each compartment. Compartments are eight inches high. Capacity 750 pounds of leads and slugs.

Four-tier Wisconsin Lead Rack \$9 00

Has two compartments each for all sizes in the two-tier rack, and is similar in design and construction. Capacity 1500 pounds of leads and slugs.

The Boston Lead Rack is made in four sections, which are sold separately if desired. The different lengths which go in each section are stamped over each compartment, as shown in cut. A line gauge for determining lengths is attached to each section. The four sections accommodate lengths from 4 to 7, varying by ens, and from 7 to 60, varying by ems. The front of each section measures 8½ × 17½ inches. Compartments are 6¾ inches high.

New York Space-Saving Case Stands

New York Double Stand

New York Quadruple Stand (see end view below)

These are space-saving, rent-reducing stands. Two New York Double Stands, holding sixty cases in racks and four pairs cases on top, occupy eighteen square feet of floor space, as against thirty square feet occupied by two ordinary double stands, holding at most forty-eight cases in racks and four pairs cases on top—a saving of twelve square feet. Two Double City Stands occupy a floor space of twenty-five square feet against seventeen feet occupied by one Quadruple New York Stand—a saving of eight square feet. This saving is obtained by making the racks correspond to size of cases exactly, bringing forward the cap cases so that they do not overhang at the back of stand (as they do on ordinary stands) and extending the lower cases several inches into the alley.

End view of New York Window and Quadruple Stands

Other Points of Superiority

The lower cases project into the alley several inches, affording the compositor ample leg room, and allowing him to get closer to the type. The angle of the lower case is just right for rapid type setting. The upper case is raised above the lower, and brought forward closer to the compositor's hand, while not obstructing the figure boxes of the lower case. The cases are held on strong iron brackets, securely screwed to a hard-wood top, which is perfectly smooth, and very useful for storing tied-up matter or for other purposes.

The Window Stand is a rearrangement of the Double Stand, so that it occupies a square area, and is very suitable for placing opposite a window.

Oviatt Iron Case Stand and Galley Rack

Oviatt Iron Case Stand and Galley Rack

Has the largest capacity of any stand made to hold cases with ordinary fronts. It is made throughout of heavy angle iron with steel runs and will stand more abuse than any other case stand or rack. The heavy iron frame sits flush on the floor and is amply braced at the corner of each tier of cases and galley rack. The frame is strongly riveted and the corners reinforced. The steel runs are extra strong and are firmly riveted to the angle iron frame.

The complete stand provides working spaces for four compositors, besides giving case room on the two unoccupied ends for 40 full size or Rooker cases and 40 single column 16-inch galleys, with the option of increasing this case room by the addition of 40 quarter cases for the storage of sorts, accents, brass rule, etc.

The brackets on top are made flush with the heavy wooden top. When desired, the brackets on top may be made to overhang the stand proper at no additional cost.

When made to hold 80 Rooker cases, 40 quarter cases and 40 single column 16-inch galleys, the stand has a floor space of 49 × 65½ inches. By omitting the quarter cases the galley rack may be arranged to hold 40 double column 16-inch galleys. If the galley rack is omitted the floor space of the stand is reduced to 41 × 65½ inches over all.

Eagle Double Case Stand

Eagle Angle Iron Steel Run Case Stand with Paneled Sides

For ease, comfort, convenience and economy of floor space the Eagle Double Case Stand is a success, the superior of any case stand manufactured. It was built to satisfy the demand of city printers for a stand which would take the maximum number of ordinary front cases.

It is built of either angle iron or wood as desired, has steel runs, with or without paneled sides and back, and has a case stop attachment to prevent the cases running through to the front of the stand.

When built of wood the best kiln dried hardwood is used throughout and the parts are firmly bolted together. It is built flush with the floor, thus preventing the accumulation of dirt or anything else underneath the stand. The iron brackets on top project over the front of the stand $8\frac{1}{2}$ inches and provide sufficient knee room for the compositor to work freely either standing or sitting. Two pairs of brackets are provided. A dumping bank running the full length of the stand is placed in the rear.

The stand holds 42 full-size cases having ordinary fronts, 19 in each tier and four additional cases on top. Finished in antique oak and varnished, and when paneled sides and backs are provided, it is to all intents and purposes a cabinet and is almost dust proof.

When made of angle iron the entire frame is firmly riveted together, thus providing an almost indestructible piece of furniture which will withstand indefinitely any weight that can be crowded into the cases. When panels are desired they are inserted into the iron frame and are firmly fastened. They are of hardwood finished in antique oak and varnished. All iron work which shows on the exterior is finished in black enamel.

When Eagle Case Stands are made in wood they can be shipped knocked-down, but when made of angle iron they cannot be knocked-down.

We have made quite a number of these stands in angle iron with paneled sides and back to take cabinet front cases. This construction allows provision for 54 cases in the racks and two pairs of cases on top. We will be pleased to quote prices on this combination on application.

OPTION: Purchasers desiring special assortment of cases in lieu of California Job Cases, can make selection to suit their requirements. If higher-priced cases are selected, the difference in price is added to the list price of the cabinet.

Wisconsin Window Cabinet

All Hard Wood

Specially designed for placing in front of a window, as it does not obstruct the light, of which the cases on top get the full benefit. Two men may work undisturbed at the sides, while the job cases in front are convenient for other men. The top is flat, and useful for holding tied-up type.

These cabinets have the patent tilting bracket and galley rest, which enables a compositor to empty his stick without leaving the cabinet by simply tilting his lower case, as shown in the cut, thus exposing the galley. Weight crated about 375 pounds. Width 35 3/4 inches; height 44 inches; depth 20 3/4 inches.

- No. 1 Wisconsin Window Cabinet with 2 pairs of patent tilting brackets, 18 full-size California job cases, and 2 pairs of news cases on top \$36 00
- No. 2 Wisconsin Window Cabinet with 2 pairs of patent tilting brackets, 23 full-size cases and steel runs, and 2 pairs of news cases on top, same height as No. 1 47 00

Patent Tilting Case Bracket

Used on Wisconsin Window and Polhemus Cabinets

B B (outline) shows bracket holding case in position for setting. Shaded cut shows bracket tilted up, allowing compositor to empty on galley below lower case, which is more clearly shown in cut of Wisconsin Window Cabinet printed above. These brackets are also supplied with all Polhemus Cabinets.

Per pair \$2 00

Ink and Roller Cabinets

A very necessary article of printing-office furniture. The use of it will result in a saving of ink and rollers, which will speedily pay for the cost of the cabinet.

- No. 1, with shelf for ink, shelf for brayer and ink slab, and brackets to hold 6 eighth and 6 quarto rollers \$ 6 50
- No. 2, with shelf for ink, shelf for brayers and ink slabs, and brackets for 6 each eighth, quarto and half-medium rollers 9 50
- No. 3, with shelf for ink, shelf for brayers and ink slabs, and brackets to hold 12 each eighth, quarto and half-medium rollers 13 00

Polhemus Cabinets

All Hard Wood

The object of the Polhemus Cabinet is to save time and space. Time is lost on the ordinary cabinets by stationing the compositor in front of twenty cases, all frequently in use by other men, who, when setting or distributing from them, keep the man at the cabinet idle. On the Polhemus Cabinets the job cases are unobstructed, and the compositor stands at the back, where he cannot be interrupted. If he is setting solid matter he can empty his sticks, without walking a step, on a galley kept under his lower case, as the cases are held by the Patent Tilting Bracket and Galley Rest. Illustrated in cut below.

Every inch of space on the Polhemus Cabinets is utilized to advantage. The galley top or bank is a most useful addition. The space between the cases is used as a sort of a galley cabinet. The top is flat, and tied-up matter may be kept on it, as the iron case brackets admit of easy access to the space under the cases and galley top. The brackets which hold the cases project into the alley eight inches, giving the compositor plenty of knee-room, while saving floor-space.

- No. 6 Double Polhemus Cabinet, complete with 50 full-size California job cases in two tiers, 2 pairs of full-size news cases on top, a galley top, and 2 pairs of Hamilton patent tilting brackets (no sort drawers or galley cabinet). Weight about 700 pounds **95 00**
- No. 7 Single Polhemus Cabinet, complete with 25 full-size California job cases in one tier, 1 pair of full-size news cases on top, a galley top, and 1 pair of Hamilton patent tilting brackets. Weight about 325 pounds **47 00**

Choice of Cases

Unless otherwise specified, cabinets will be shipped with assortment of cases as indicated above. Triple, regular job or italic, cap or lower cases, can be furnished, if desired, at the same prices. If rule, border or script cases are ordered, the difference in cost of cases will be added to list price. Cabinets are constructed of ash, with antique oak finish.

Porter Patent Extension-Front Steel-Run Cabinets

The sides of these Cabinets are extended four inches beyond the fronts of the cases. These extensions serve the printer in two ways: (1) A case near the top of a cabinet may be taken from its rack and placed in a more convenient position for setting from, and will be held by the extensions without withdrawing another case. This cannot be done on any other cabinet. (2) The extensions permit cases to be drawn out further from racks than is possible in other cabinets, making it easier to set out of the rear boxes. In addition, these cabinets have all the best points of other cabinets, such as steel runs, New-Departure cases, hard wood throughout, and are stronger than any other cabinets. The extension sides make it practicable to use high cabinets, containing more cases in a tier than can be advised where ordinary cabinets are used.

No. 7 Porter Steel-Run Double Tier Cabinet

Brass Label Holders

Systematic printers should order their Cabinets fitted with Brass Label Holders. By displaying on the case fronts samples of the type contained in a cabinet much loss of time is avoided. These Brass Label Holders are attached to cases at 5 cents per case, list.

Dimensions of Porter Steel Run Cabinets in Inches

	Height	Width	Depth
23 Case Cabinet 43	35½	22
25 Case Cabinet 46	35½	22
30 Case Cabinet 53	35½	22
40 Case Cabinet 68	35½	22
50 Case Cabinet 84	35½	22
60 Case Cabinet 99	35½	22

As to Construction—No other Cabinet equals this in points of solidity and carrying capacity. The runs are flat pieces of steel, which are placed between strips of wood as shown above, and a steel rod is run from top to bottom of the Cabinet through the steel runs and intervening wooden strips and then firmly locked with steel pins. The wooden strips between the pieces of steel are firmly fastened to the side rails of the Cabinet. This method of construction practically consolidates the whole side of the Cabinet, including steel runs, intervening wooden strips, side rails and panels into one piece, and there is no possibility of the Cabinet becoming wrecked or giving out at any point under any strain that can be applied to it while in use.

A Great Saving in Space is attained by using the Steel Runs, which allow the Cases to be placed more compactly in the Cabinet. The capacity of the type cases for holding type is not reduced in the least, as regular Cases are used.

All these Cabinets have paneled ends with moulded edges, and are made of ash finished in antique oak. Being dust-proof, like all our Cabinets, these Steel Run Cabinets insure the preservation of the delicate type faces and thereby increase the profits of the printing office.

Porter Extension-Front Steel-Run Cabinets

In addition to having steel runs the Porter Cabinet is built with extension front, allowing any case to be drawn out and placed at a convenient height without necessity of using another case as a rest. The depth of the extension front is four inches. These cabinets are regularly fitted with California job cases, but if desired, other styles can be substituted to order. The use of Brass Label Holders on the case fronts will save much time and be found a great convenience.

Brass Label Holders are attached to Cases at 5 cents per Case, list

The Case Runs in Porter Cabinets are flat pieces of steel fitted between strips of wood and firmly locked together by steel rods passing through all. No chance for anything to work loose or rickety. With this style of construction and with New Departure Cases, a man can stand on the outer edge of a case fully drawn so that the back tier of type compartments are accessible. This is a most severe test and no other style of construction will withstand it.

The Extension Front enables the compositor to draw any case well out beyond the others, and makes the back tier of type boxes as accessible as any boxes in the case. It also permits the top or bottom cases to be drawn out and placed at the proper height for setting purposes without partly drawing another case to be used as a rest.

All these Cabinets are fitted with the Patented New Departure Cases. The merits of these Cases are now well known. They ride upon the side rails only, and the bottoms do not come in contact with the case runs.

New Departure Type Cabinets

Filled With New Departure Type Cases, the Latest, Most Compact and Economical of Modern Type Cabinet Construction

In these days when most modern printing offices are fast outgrowing their present quarters, it is essential that economy of space receive the greatest consideration. A short time ago it was not thought possible to make Type Cabinets with more than 18 Cases in a single tier and have the Cabinets the right height for type-setting purposes. Even this was a great advance over the old style Case Stand which accommodated but eight or twelve Cases in a single tier.

We now present our New Departure Cabinets. These Cabinets which possess all the advantages of other Cabinets have the remarkable feature of combining from 25 to 33 Cases within the height of 43 inches, the correct height for a Flat Top Cabinet with Cases and Brackets on top for type-setting.

This represents a gain in one jump of 33½ per cent in Case capacity over the best Steel Run Construction heretofore offered printers.

Sectional View of New Departure Type Cabinet Showing Flat Steel Runs

This result has been made possible by the use of our Flat Steel Runs which we illustrate. These Runs are thin pieces of steel of great strength, fitted into saw-kerfs in the sides of the Cabinet and held in place by means of lips on the ends of the Runs so that such Runs cannot possibly get out of place or become loose. These Flat Steel Runs were originated and perfected by us more than ten years ago and have been in continual use in our Steel Run Stands since that time. They have given such universal satisfaction that we have decided to incorporate them in a line of modern Steel Run Cabinets, feeling sure that the printers will appreciate this new departure and will be quick to take advantage of the large saving in case capacity. We have found that the cost of constructing these Cabinets is somewhat less than the regular steel run construction, therefore our prices on these Cabinets are somewhat lower than other Cabinets. We can, however, guarantee that in points of strength and beauty these Cabinets are not surpassed by any other Cabinets of our manufacture.

Where compactness is essential in order to save space we unqualifiedly recommend these Cabinets to our customers, believing they will give perfect satisfaction.

These Cabinets are constructed of hard-wood finished in antique oak, the ends are tastefully paneled and moulded and the fronts ornamented and fitted with bronze pulls. The cases are of our best new departure pattern covered with paper on the inside; the paper absorbs the moisture and prevents it from entering the bottom.

Brass Label Holders attached to Cabinets at an additional price of 5 cents per case, list.

All the Cabinets listed above with six exceptions contain Cases of standard depths, 1¾ inches outside the front, and such cases require no further description. The six special Cabinets we describe more particularly on this and the following page.

No. 51 contains 33 Two-third size Cases, size 16¾×21¾ inches outside measure. These Cases have a uniform depth of one inch outside the front and are deep enough for all medium and small sizes of metal type without doubling fonts. Height of Cabinet 43 inches, which is convenient for type-setting purposes when cases and brackets are placed on top.

No. 57 contains 33 Three-quarter size Cases, size 16¾×23½ outside measure. These Cases have a uniform depth of one inch outside the front and are deep enough for all medium and small sizes of metal type without doubling fonts. Height of Cabinet 43 inches which is convenient for type setting purposes when cases and brackets are placed on top.

Special sizes made to order at proportionate prices

All the above prices and descriptions are for Flat Top Cabinets. Add to the prices given for single tier Cabinets \$3.00 and for double tier Cabinets \$6.00 if wanted with Galley Tops.

No. 63 contains 33 Full-size Cases, size 16 $\frac{1}{2}$ × 32 $\frac{1}{4}$ inches outside measure. These Cabinets have a uniform depth of one inch outside the front and are deep enough for all medium and small sizes of metal type without doubling fonts. Height of Cabinet 43 inches, correct for type-setting purposes.

No. 64 contains 28 Full-size Cases, size 16 $\frac{1}{2}$ × 32 $\frac{1}{4}$ inches outside measure. These Cases are of four different depths; five Cases are $\frac{3}{4}$ inch deep; ten Cases are one inch deep; ten Cases are standard, 1 $\frac{1}{2}$ inches deep and three Cases are extra deep being 1 $\frac{3}{4}$ inches, all measured outside the front. Height of Cabinet 43 inches, convenient for type-setting purposes when cases and brackets are placed on top.

No. 69 is a two tier Cabinet containing 66 Full-size Cases, size 16 $\frac{1}{2}$ × 32 $\frac{1}{4}$ inches outside measure. There are 33 cases in each tier, all these cases have a uniform depth of one inch outside the front and are deep enough for all medium and small sizes of metal type without doubling fonts. Height of Cabinet 43 inches, convenient for type-setting purposes when cases and brackets are placed on top.

No. 70 is a two tier Cabinet containing 56 Full-size Cases, size 16 $\frac{1}{2}$ × 32 $\frac{1}{4}$ inches outside measure. There being 28 Cases in each tier of four different depths; five Cases are $\frac{3}{4}$ inch deep; ten Cases are one inch deep, ten Cases are standard 1 $\frac{1}{2}$ inches deep and three Cases are extra deep being 1 $\frac{3}{4}$ inches deep, all measured outside the front. Height of Cabinet 43 inches, convenient for type-setting purposes.

All of the six special Cabinets mentioned above have a uniform height of 43 inches which is the correct height for type-setting purposes. These Cabinets represent an achievement in type case construction never before attained. Heretofore the most compact Cabinets have only contained 25 Cases in the height of 45 inches; here we have Cabinets containing 33 Cases all within a height of 43 inches and all of the Cases deep enough for practical purposes except for the very largest fonts of metal type. In the two Cabinets, No 64 and 70, containing Cases of four different depths, we have a result of 28 Cases within 43 inches and some of these cases are unusually deep thus accommodating the very largest sizes of metal type.

Proof Reader's Desk

A new article of printing office furniture which will be found useful in any printing office and indispensable in all large offices, where much proofreading is done. It is strongly and substantially built of

hardwood and nicely finished, of neat appearance, and conveniently arranged after ideas furnished by proof readers on some of the large daily papers.

There is a 12 inch back with retaining ends to prevent papers from falling off. In the center there is a 22 inch writing bed on a slope. This bed is 14 inches from front to back, with a 4 inch flat face at the back for inkstands, etc. This writing bed is hinged and can be raised. Underneath it papers can be conveniently kept and secured under lock.

In the table, underneath the writing bed, is a drawer, 22 inches in width, 17 inches deep.

At the end of the writing bed are two 7 inch spaces to accommodate copy spindles. Copy hooks are arranged on the back and ends, and a pen rack is also placed on the back, over the writing bed.

Roll-Front Case Racks

An entirely new feature in case racks. There has been a constant demand for a case rack that would take the old cases and utilize them in the form of a cabinet. Many printers have desired to do away with the ordinary case racks and substitute a cabinet, and thus increase the life of the type by keeping it free from dust; but on account of the expense involved and the fact that their old cases could not be sold or utilized, they have hesitated in making the needed improvement. This new case rack solves the problem. These Roll-Front Case Racks are equal to cabinets in every way, and they really are cabinets and not case racks in the ordinary sense of the term. They are fitted with steel runs, and they are thoroughly up-to-date. The roll front is fitted with the finest brass desk lock. A single lock secures the entire tier of cases.

These racks are made of ash, finished in antique oak, same as regular high-grade cabinets.

Twentieth-Century Unit Type Cabinet

One Unit, with Top and Base. Height 18 $\frac{1}{2}$ inches

With the use of Unit Cabinets additions can be made from time to time to meet requirements and provide for additional faces of type. No matter how many Units are built into a section the whole always presents the appearance of a complete cabinet. Each Unit has a total height of 12 $\frac{1}{2}$ inches. The base and top each add 3 inches to the height. There are five different depths of cases, the shallowest having an outside depth of one-half inch, allowing ample room for most 6, 8 and 10 point fonts of type. The bottom case in each Unit is of an extra depth, which will be found useful for holding fonts of 60 and 72 point and larger sizes of type. The top or cap pieces are made in style A and Style B. Style A is a plain cap piece, 3 inches high. Style B cap piece is also 3 inches high, but the space inside the cap is utilized by a blank drawer 30 inches long by 18 inches wide and 2 inches deep, inside measure. The moulding in front forms the front of the drawer, which is filled with small wooden sort boxes 3×3 inches in size—six rows in depth and ten rows in width, making a total of sixty sort boxes, 1 9-16 inches deep inside.

Prices of Unit Type Cabinets with Full Size California Job Cases

In ordering care should be taken to specify cap and base pieces as they are not included with order for Units unless specially mentioned.

Unit A, 10 cases various depths	\$17 50
Unit B, 8 cases, 7 of regular depth	15 00
Unit C, 8 blank cases for electrotypes	13 00
Unit D, indexed electrotypes cases	16 00
Cap piece, Style A plain	3 00
Cap piece, Style B drawer and 60 sort boxes	7 50
Base piece	1 50

The style Unit A has 10 cases of five different depths. The three top cases have an outside depth of $\frac{3}{8}$ inch; the next two, $\frac{1}{2}$ inch; the next one, 1 inch; the next three, 1 $\frac{1}{2}$ inch, which is our regular case, and the bottom case has an outside depth of 1 $\frac{3}{4}$ inches. This case is convenient for large poster fonts.

The style Unit B has 8 cases, 7 of which are of the standard depth as put in all our regular cabinets. The top case is shallower and has an outside depth of 1 inch.

No. 6 Wood-Type Cabinet with Galley Top

Wood-Type Cabinets

Very substantially constructed of hard wood. The cases are slotted on the sides, and have movable strips which may be adjusted to Picas. The cases in the Mammoth Cabinet (23×44 inches) have a center bar, and cases in the Regular Cabinet (23×32 inches) have no center bar.

These Cabinets afford the most economical method of keeping wood type. The top of Cabinet is available for use in laying out lines. They save the time lost in climbing to shelves, and the wood type is kept clean and is less liable to warp.

Occupies 9 square feet of floor space and affords 140 square feet for storage of type.

Nos. 6, 12 and 18 Cabinets containing 60 Cases

Indexed Electrotype Cabinets

Fitted with the special case illustrated below, each furnished with strong adjustable slotted partitions, each case numbered in front, and each section in the case designated by initial label, for which a secure holder is provided. The cuts in each lengthwise section are separated and held in place by shallow crosswise slats. An Index Book is furnished with each cabinet in which the cuts are indexed as follows:

ORIGINAL CUT			NAME OF CUT	ELECTROTYPES		
DRAWER	SECTION	DIVISION		DRAWER	SECTION	DIVISIONS
12	D	3	Bicycle	31	E	1 2 3
12	A	2	Lawn Mower	33	A	4 5 6
12	E	3	Sewing Machine	35	B	1 2 3
12	D	4	Factory Plant	30	C	7 8 9

These Cabinets meet in every respect the requirements of not only printers but of all manufacturing concerns that use cuts largely. Printers will do a favor to their customers of this class by calling their attention to these new Cabinets. They are substantially and handsomely made of ash, finished in antique oak. The cases slide on steel runs, so that they take up the least possible space.

Case furnished in Indexed Electrotype Cabinets

Note that every cut is in a distinct compartment, and that as many sections and divisions of sections can be made as are desired. The plan of the index printed above refers to the case shown here.

Flat-Top Sixteen-Case Electro Cabinet

Electro and Cut Cabinets

These Cabinets are filled with blank cases and are made of polished ash with bronze case pulls. The cases have extension backs. In addition to the ordinary use of the printer, these Cabinets can be recommended to advertisers for keeping their wood cuts, etc., for keeping samples of hardware, confectionery, fancy stationery, for seeds, and for many other purposes.

All sizes can be supplied with galley tops at an advance of \$3.00 on flat-top prices, but galley tops are not recommended except on 20-case cabinets.

Handy Letter Board Cabinets

For the storage and safe keeping of job work these cabinets are unrivaled. Their cost will be saved in a few months by the prevention of pil. They occupy a floor space of 16 × 19 inches, with letter boards of 12 × 15 inches inside, and are made of hard wood throughout, in a solid and substantial manner. Boards are closed at sides and back and are rabbeted in front to receive galleys. They are well-named "Handy." For job work within their size, these small boards are much superior to the larger boards usually put under imposing tables, as it is a back-breaking job to get a form from the large boards when they are full of type.

It is distinctly an economy to place dead and live forms in such a receptacle as this, rather than to incumber useful space on an imposing stone, the type on which is always liable to damage. The protection they afford from dust is also worthy of consideration.

Particular attention is directed to the galley cabinets of larger capacity. They are very desirable in large offices and are designed to carry an immense weight of type safely. All these cabinets are made of hard wood. All flat-top cabinets are made same style as the one-tier cabinet illustrated above. All galley-top cabinets same as the three-tier cabinet shown on this page.

The galley-top cabinets are of much stronger construction than the flat-top, and may be ordered with with or without galley top, as desired, at the same prices.

Dorsey Compositor's Working Cabinet

Patent applied for

This cabinet is the same height as the ordinary news stand. Sloping top for galley rest is the same size as the ordinary lower case. At upper edge of the slope there is a flat surface or shelf eight inches wide for copy, cuts, furniture, leads, slugs, etc. Galley rack or holder at side takes one job galley 15½ × 22 inches, one 12½ × 18 inches, and two regulation column galleys. Two drawers at top, each having two compartments. Below these are five letter boards for standing type. In the bottom there is a large open space for general storage purposes. A piece of composing room furniture that printers will like and several of them placed about large composing rooms will make it possible for compositors to expedite their work.

This cabinet occupies but little room and can be placed at the end of a regular case stand or type cabinet. The sloping top affords a good place for the compositor to lay out his work. Shipping weight 300 pounds.

Manitowish Type Cabinet

Manitowish Type Cabinet

The Features Embraced in this Cabinet are as follows:

Sort Cabinet—A series of six Sort Drawers which run through the Cabinet and can be drawn from either side; each drawer divided into 16 compartments of equal size; each compartment will hold 5 pounds of type; each drawer 80 pounds, making the capacity of the six Sort Drawers 480 pounds.

Galley Cabinet—Two separate compartments, each compartment fitted with eight pairs of detachable Galley Brackets, giving storage to 16 Double Column Gallies. Spring roll curtains, Yale locks.

Manitowish Type Cabinet

Galley Drawers—A series of six Tilted Galley Drawers immediately above the Sort Drawers in the center of the Cabinet. These Galley Drawers run through the Cabinet and can be drawn from either side. Compositors can dump type into these Gallies while working at the Cases and the Gallies can be withdrawn from the Cabinet and carried about the office as required. These inclined Galley Drawers are furnished full brass lined or all wood with heavy bottoms as desired.

Galley Boards—The usual Galley Boards accompany the Tilting Brackets and are fitted under the lower Cases. Each board will hold a Double Column Galley. There is also a Galley Board for holding a Quarter Size Rule Case or other Quarter Size Case between the two Lower Cases, as illustrated.

Galley Dump—This Dump is of an improved pattern with a blank working space at each end. The central part is arranged into a Lead and Slug Bank with a division bar through the center. This Lead and Slug Bank is fitted with adjustable divisions and the rim and center divisions are slotted by variations of single picas so that the Bank can be arranged for lengths as required and changed at will.

Brackets—Two pairs of Patent Tilting Brackets support the News Cases and there are 16 pairs of detachable Galley Brackets. There are three special iron Brackets which support the full length Bank.

Manitowish Type Cabinet—Continued

Cases—In the body of the Cabinet there are 60 Full Size California Job Cases all coming within the height of 41 inches from the floor to the flat top—something unprecedented in Type Cabinet construction. There are 30 cases in each tier and like the Unit Cabinet these cases are arranged in three series of ten cases each. The cases are of varying depths same as the Unit Cabinet, as follows:

- | | |
|---|---|
| 3 top Cases of each series have an outside depth of $\frac{5}{8}$ inch. | 1 Case has an outside depth of 1 inch. |
| 2 Cases have a depth (outside) of $\frac{3}{4}$ inch. | 3 Cases have an outside depth of $1\frac{1}{8}$ inches. |
| | 1 Case has an outside depth of $1\frac{3}{4}$ inches. |

The shallow cases are the most convenient for the laying of small sizes of type and the deep cases for large sizes. Large poster fonts can be conveniently laid in the $1\frac{3}{4}$ inches case in each series, of which there are six in the Cabinet. This arrangement of cases shows a gain of 25 per cent in case capacity over any other Steel Run construction made.

Cabinet for Monotype Parts

This Cabinet contains two trays, each holding six molds. The trays are divided so that it is impossible for one mold to touch or scar another. Two shelves are provided for wedges; each shelf divided into fifteen spaces. A place is thus provided for each wedge where it can be instantly found and where it cannot be marred or injured.

There are 28 spaces for Matrix Cases.
 There are four Sort Drawers. These Drawers are divided into thirty-seven grooves in which the Matrices are stood on end. A bar across the center of the Drawer divides it so that the Matrices, taken from the Matrix Case in changing, are put above the bar in the same groove from which the Matrices below the bar are taken to replace those in the Matrix Case.

Suitable holders are provided for all tools, as shown by the illustration, including wrenches, screw-drivers, pica gauges, etc. These are placed upon the door of the Cabinet, on metal pegs. Shipping weight 75 lbs.

Roller Bracket

The New York Case Bracket is one of the best ever brought out. It was made originally in connection with the New York Stands shown on page 1018, and its use in connection with this stand proved a saving of 40 per cent in floor space occupied. The Bracket is so made that the upper case is raised above the lower and brought forward closer to the compositor's hand while not obstructing the figure boxes of the lower case.

Challenge Lamp Holder

A most convenient and safe attachment for holding a lamp over the compositor's case. It will be readily understood by reference to the cut that the fount holder A can be instantly raised from C to B, as shown by the dotted lines, to adapt the position of the light to suit the compositor. Small

thumb screws at the top of B and C, with suitable recesses in A, retain the light perfectly stationary in any position.

Working Galley or Job Bank

16½ × 32¼ inches, same as Full Size Case

The entire surface including the main working space and the other compartments for sort boxes, rule cases, etc., is full brass lined with heavy sheet brass. All division strips are also brass lined on both sides. The brackets are of cast iron japanned, and fit into removable sockets which can be fastened to the end of a cabinet as shown, to the wall, or any convenient place.

Description—At the right is a compartment into which can be placed a quarter size rule case like the Harris Case shown. At the top is a space 4½ × 18 inches filled with 16 removable type or sort boxes with metal bottoms screwed to the rims. At the upper left hand corner is a space 4½ × 4¼ with a heavy zinc cover. This space is for working tools like imposing rule, bodkin, etc. At the front is the main working space, size 9¾ × 23 inches, with open end at the left fitted with a lip on open end to serve as a rest for brass galley. Type matter can be quickly and safely transferred from the galley to Working Bank. Weighs complete with sort boxes and brackets, 56 pounds.

Form Racks

The Form Rack illustrated herewith meets all the requirements for strength and space occupied. They are strong and substantially built, nicely finished of hardwood the same as our regular line of cabinets, and take up a surprisingly small amount of floor space considering the number of forms accommodated. The three bottom boards where the forms rest are covered with iron turned at the edges and firmly fastened as shown in the illustration. This prevents wear and tear which would otherwise occur when heavy forms are pushed into the racks. The use of these racks will clear up the office, allow more stone room and minimize the danger of pied forms.

Lower compartments in all Racks are 36 inches in the clear, middle compartments 24 inches and upper compartments 13½ inches.

Ideal Form Truck

Ideal Form Truck No. 2

This is an improved style of Form Truck, made with the trough for holding the chase hung below the center, making it very much easier to handle a large chase with a heavy form. The axle is made of steel, and consequently it is practically indestructible. The Ideal Form Truck will be found an indispensable adjunct to every well-equipped press room, and will prevent accidents which frequently happen in sliding chases along the floor. Made in two styles, with iron tire and with rubber tire.

Ideal Form Truck with rubber tire 5 00

Standing Galleys

Made to Order

Buyers may have these made to any dimensions they desire, at prices proportionate to those quoted below for the sizes and styles commonly used.

The space underneath may be utilized in various ways. In place of the case racks as shown in the cuts, galley shelves and racks or letter boards can be put in. In ordering Standing Galleys, or in sending for estimates of cost, it is necessary to be explicit as to measurements and other requirements.

The regular width of single columns is three inches; of double columns, six inches; but may be varied. The column strips are made of the same material as ordered for the top.

Challenge Type-High Machine

The only device on the market at a moderate price that will reduce cuts to type-high and make them true and even when they have become warped from any cause. Passing all cuts or plates mounted on wood through this machine before the form is sent to press saves one-half the time usually spent in make-ready.

Wrought Iron Horizontal Standing Galley

The Wrought Iron Galleys with columns running horizontally (see cut) have iron racks and all-brass tops. The brass strips screwed on top are L-shaped making the partitions only a little wider than column width, but leaving enough room for the fingers to lift the type, thus reducing the width of the top, making it more convenient to reach the upper rows. The columns are made to any desired length and width. The cut on this page shows the No. 6 size, which is 12 feet long with iron racks for 32 full-size cases.

Imposing Tables with Letter Boards

No better disposition of the space underneath an imposing table can be made than to use it for letter boards. If the type is dead, it is shifted from the stone to the board without loss of time; if the matter is alive, it is handy for imposition.

These tables are made in the most substantial manner of hard wood, and are strongly and firmly bolted together. The boards are made of hard wood, closed at sides and back, and are rabbeted in front to receive galley when sliding off type.

Coffins—When coffins only are desired they can be had in any size at 75 cents per running foot the long way.

A “coffin” is a hard wood frame which serves as a bed for the stone, protects its edges, and affords a rest for galleys when used for sliding off matter.

Iron Top Imposing Table

There is no imposing surface which can compare for durability and satisfactory service with the Iron Type Imposing Table. This will outlast marble or slate twenty times over and will always be in good condition. The iron imposing surface is made of 1¾ to 2 inch stock, the thickness of the stock depending upon the size of the surface. They are heavily braced underneath by strong webs running in both directions. The surface is planed perfectly flat and is free from sand and blow holes and other imperfections. The iron imposing surface is used without a coffin, thereby increasing the working space. Can be furnished with a brass covered top if desired.

Iron imposing surfaces of any size made to order at uniform price of 3 cents per square inch. They are usually made with a three-eighth inch rabbet on all sides, but this may be increased or decreased as desired. Surface as large as 60×120 inches can be supplied in one casting, but it is recommended that all sizes above 80 inches be made in two or more sections. When this is done the sections are accurately fitted together and held in their proper position by means of dowel pins, at no extra charge over the price of 3 cents per square inch.

Patent Steel Furniture

Has been in satisfactory use in the largest offices for years. Made of machinery steel on regular bodies, guaranteed accurate to point system and thoroughly reliable. Invaluable for use in color work and blank work as it eliminates the trouble arising from shrinkage due to changes in temperature, experienced in use of wood furniture. In blank work the steel furniture can be quickly thrown around the blank spaces instead of filling them in the ordinary way with wood or metal furniture. It pays for itself many times over in the time and trouble saved as well as in the accuracy secured over the use of ordinary material. Write for descriptive circular giving sizes and prices.

Cast Iron Furniture

Made light in weight but braced to withstand the maximum lock-up strain without deterioration. It cannot be "locked" out of shape, does not change size when heated and its use decreases the liability of spring in the form. Made in the regular standard labor-saving sizes and guaranteed accurate. Write for descriptive circular and prices.

Wells Long Wood Quoins

These new Quoins with their long bearing surface will increase the use of wooden quoins to a still greater extent. About the only advantage the metal quoin has over a wooden one is the long bearing. In using these quoins a perfect lock-up is secured, for the quoins are so long that a great pressure is secured without severe driving.

There is only one shape or style and any two quoins make a pair.

They are beveled on one side only. No time is lost in looking for rights and lefts and this is the secret of their success.

Straight furniture can be used and no side sticks are required. Every practical printer will appreciate this great advantage.

These quoins are improved by a top notch which greatly assists in unlocking the forms. They are made in four sizes, all working in pairs with straight furniture or they can be used singly with side sticks. Printers will recognize the superior advantages of this improved wooden quoin. They are put up in neat paper boxes, properly labeled, each box holding 100 quoins.

The above cuts show the top face of the Wells Long Wood Quoins in their exact size. Beveled one way only.

Hamilton Patent Cutting Stick

Consists of a main body piece (A), made to fit the groove of your paper cutter. The body piece has a groove or recess in it which holds a small strip (B) one-quarter of an inch square. This removable strip is a cutting surface and is held in place by a steel clamp (D). The cutting strips being square can be used on four sides, giving the same service as the ordinary sticks.

See that B?

- A** is the body piece made to fit groove in cutter.
B is the cutting strip on which knife strikes. It is one-fourth inch square, and is just as effective as if it were one and one-quarter inches square, also cheaper and always fits.
C is the steel clamp which holds the cutting strip and prevents warping.
D is the screw which grips the clamp to the body piece.

How to Order

1—Give size square the main body piece is to be. Be particular on this point and see that groove in cutter is accurately measured. 2—Give length of stick. 3—State how far from front edge of stick the knife strikes. 4—State whether knife cuts from right to left or left to right. In ordering cutting strips give the exact length required. All strips are cut to a standard uniform gauge and are sure to fit.

John Thomson "Colt's Armory" Printing Presses

Sizes and Styles—The Quarto Medium is built in the Style One and Style Two constructions. The Style One is provided with two form rollers and the Style Two with three form rollers.

The Half Medium and the Half Super Royal are now built in the Style Two-A, Style Five-A and Style Six-A constructions.

Adaptations—The Quarto Medium Style One is a *high-speed* press. It can be operated quite as rapidly as the "disk" type of machine; can be made ready more quickly; has far more effective distribution, and will produce better results.

The Quarto Medium Style Two is better adapted, through its greater distribution, for halftone and color printing.

The Half Medium and the Half Super Royal in the Style Two-A construction are equal to the average requirements of high class printers.

The Half Medium and the Half Super Royal in the Style Five-A construction are much stronger machines than the Style Two. They are adapted for all that the Style Two is capable of doing and also for a much heavier range of work, especially in the way of halftone, chromotype and tint printing.

The Half Medium and the Half Super Royal in the Style Six-A construction are modifications of the Style Five, adapting them for nearly all that can be done on the Styles Two and Five and also for certain classes of embossing, book-cover stamping and the like, hot or cold.

Operation of Cutting and Scoring Presses

The usual rate of operation in regular practice is from 20 to 30 impressions a minute, that is, 1200 to 1800 an hour; but 2100 and even 2400 an hour is not infrequent. In this connection, attention may be called to an important physical principle, too frequently overlooked, namely: that the pressure which may be obtained increases much more rapidly than the rate of operation. In other words, one relation is direct, and the other is as the square of the velocity. Thus, say, while an increase of operation from 1200 to 2400 impressions an hour would double the speed, or as 1 is to 2, this makes it possible to obtain four times the pressure between the bed and the platen, or as 1 is to 4. Hence, while it is not possible to overload the press at the lower safe speeds, that is because the fly-wheels will "stall" and not carry over, it is quite possible, due to the greatly increased momentum or kinetic energy, to do so at higher speeds. Therefore, the safer practice is to have all the heavy forms, which are intended to be fed at fast speed, first made ready at a lower speed. This establishes the pressure; and after that the only limit to the speed is the character of the job and the ability of the feeder. In fact, this is good practice for another reason, namely: it calls for more skill in the make-ready and increases the "life" of the die.

NOTE: — A new enlarged model "Colt's Army" Crank Action Cutting and Scoring Press will shortly be ready for the market. Size 28 x 41 inches inside of chase.

John Thomson Press Company's "Colt's Armory" Cutting and Scoring Presses

The Style 5 Press differs from the Style 4 Press as follows: The frame is of an entirely new design and is about 4 inches higher; therefore does not require to be raised from the floor to bring it up to proper feeding height; actual dimensions of base are 42 x 48 inches as against 31 x 42 inches of the Style 4. It therefore covers considerably more floor space, which is an advantage, and especially so on weak or shaky floors. It weighs 4,370 pounds gross, 3,865 net.

Size inside of regular cast-iron chase 20 x 30 inches. Special patent built-up steel chases size inside 20 3/4 x 32 inches, furnished to order price \$7 each net. Face of platen 20 3/4 x 32 inches. The standard adjustment between the bed and the face of the platen cutting plate is for "type high," 0.920 inch, cutting rule. Steel cutting plate 1/8 inch thick.

Floor space without feed tables, 54 x 62 1/2 inches. Face of feed table, 18 x 28 inches. Floor space of table base, 18 1/2 x 18 1/2 inches. Space through which press will pass assembled 54 inches; wholly dismembered 42 inches. Center of pinion shaft to floor 24 inches. Face and diameter of loose and driving pulleys, 3 3/8 x 17 3/8 inches. A double belt is recommended width 3 1/2 inches. The fly-wheels must revolve toward the feeder; they make 5 1/4 revolutions to each impression.

Gally Improved Universal Printing Press

Gally Universal Style No. 4

To meet the demand of those printers who require a larger press than the 14 × 22 inches; to publishers using ready prints, in small towns, for one-page work; blank-book makers and others, who do not have constant need for a cylinder press, we offer the Style No. 4 Universal. This press is built in one size only, 17 × 25 inches inside chase, on new lines and no expense has been spared in this new production, now offered to the trade for the first time.

The frame is of a solid, modern design and is proportionately heavier than the 14 × 22 inches; the bridge, fly-wheel, hook connection and cam lever are heavier; the cam-way in the large gear wheel is of an improved design, requiring a larger friction roller; the gear wheel has the steel section in the rim like the Style No. 2 and Style No. 3 Universals; the carriage ways are of a new design, the carriage slot being perpendicular its full length; an adjustable counterweight to balance the weight of the carriage, when carrying one, two, three or four form rollers is a new feature; this press has the long pinion shaft with the outside floor support like the Style No. 3 Universal and the new style double inking device without springs is a part of the regular equipment.

The following small parts are included: five steel chases, one roller mould (for which a set of cast rollers will be substituted, if preferred), six form roller stocks, four distributor roller stocks, two vibrator or ductor roller stocks, twelve roller wheels (six large and six small) two iron lateral distributors or changers, two feed tables and one set of wrenches. No treadle fixtures are supplied with this press. Each press is shipped with ink fountain and side power fixtures, including tight and loose pulleys, and the improved belt shifter and brake combined.

Gross weight complete, crated for domestic shipment, 3300 pounds. Floor space required including feed tables and stands in position, 40 inches from front to back and 60 inches sideways. Pulleys, 16 inches diameter with 3/4 inches face, carrying a 3 1/2 inch belt; the fly-wheel makes eight (8) revolutions to each impression and the press will require about 1 1/2 H. P. to operate it.

Gally Universal Paper-Box Cutting and Creasing Press

See "Paper-Box Making" note on this page

This is the only Cutting and Creasing Press on which the cutting form can be placed out of center without injury to the cutting rule or detriment to the work. Mr. Gally's latest patented improvement on these presses holds the platen to perfect register on an unbalanced form. This is a very important matter, as is fully understood by all those engaged in the manufacture of folding paper boxes and similar articles.

Making Folding Paper-Boxes

The process of making folding paper boxes is simple. The stock used is manila board, made specially for the purpose. A cutting and creasing press is the same as an ordinary printing press, except that it is larger, has to be stronger, and does not require an inking apparatus. The shape of a box having been decided on, a form is set up with steel cutting and brass creasing rules, the former to cut out waste margins and to make slits, and the latter to crease or score the lines on which the stock in the box must bend when set up for use. It is usual to cut and crease as many boxes at one time as can be cut out from a full-sized sheet. The box leaves the press flat. It is then folded once and glued on one edge, and delivered flat. Any printing required is done before cutting and creasing. Any good compositor will understand the process after reading above explanation and examining a folded paper box. The gluing is done by a machine of moderate cost.

Gally Universal Stamping Press

This is a very powerful press, built especially for stamping book covers, making signs and photo-mounts. The only fast-running press made that is sufficiently powerful to do this kind of work satisfactory. Speed at least 1800 impressions per hour.

Gally Universal Embossing Press

These are the largest Embossing Presses made, and combine strength, power, speed and facility for handling work easily in a degree equalled by no other press. They are designed for extra heavy hot or cold process embossing, and book-cover stamping ("smashing"). Nothing better demonstrates the correctness of the mechanical principles on which Gally Universal Presses are built than their applicability to all degrees of power and strain. Every other type of platen press has its limitations—a point where it gets unwieldy and inefficient.

-----------------------------------	---------

The Peerless Job Press

Peerless Speed—Rapidly without noise or jar. Easy to feed as there is an absolute rest for that purpose. Easy to run by treadle. Quick make-ready.

Peerless Comfort—All the impression screws in sight and easy to get at. The throw-off arrangement has a natural movement and is very handy. The gear-wheel is placed below the feeding level—an important advantage over the obstructing gear of Gordon presses. No obstructions to feed or delivery.

Peerless Impression—Has a very powerful compound toggle movement with stalwart supporting side arms. The full force of the impression acts directly upon the center of the platen, making the Peerless platen strongest where all others are weakest. All movements are direct and do not depend on fast-wearing cam rollers and cam ways.

Peerless Strength and Durability—Proved by the numerous Peerless presses which are in use for embossing and extra heavy work. No other disc press has been found able to stand this strain. The small amount of repair bills on presses put to these exceptional uses is further proof of their strain-bearing capacity.

Challenge-Gordon Job Press

This press is constructed on correct mechanical lines out of the best iron and steel in a thoroughly equipped modern factory. The result is a strong, well-built up-to-date machine that is giving satisfaction. It has many special features such as the patented impression throw-off which holds the eccentric shaft absolutely stationary both on and off the impression; counter-balanced platen prevents wear on cam and cam roller and makes the press run noiseless and easy; patented depressible gripper bar and grippers; gear wheels are extra wide; forged steel crank shafts and connecting rods on all sizes, with cut steel pinions on the 12 × 18 and larger sizes; equalized platen lock, locks both sides of the platen firmly and instantly; large ink disc, noiseless and absolute in operation. It is a rapid, noiseless, and easy running machine.

American Job Press Counter

For Platen Presses

We place this counter on the market after testing its merits thoroughly and believing that the printer will appreciate a reliable counter with which he can keep an accurate record of the number of impressions on his job presses. The counter registers only when the impression is on.

There is absolutely no strain whatever on the counter or attachment, the movement being positive and easy and when once it is set needs no further attention. It can be attached to almost any Gordon press. Give size and make of press when ordering.

Any number wheel can be set forward or backward without disturbing the others.

There are no screws used in the entire construction and the parts are so put together that they cannot get out of order or become disarranged while in use.

The pawls or dogs are so made that there are no corners to wear off and thus make the counting uncertain.

American Counting Machine

Has no superior for strength, accuracy, reliability. Can be set to zero, or any number, with the fingers with the greatest ease. There are no springs inside this counter, and all movements of the figure-dials are so positive that it is impossible for them to miss registering. The case may be screwed to the wall or on a table, and the lever can be set to any position and will work from front to back. The figures are cast solid, nickel-plated, and are very legible.

Muller Patent Halftone Softening Hammers and Punches

Invaluable in pressrooms where halftone or process plates are used, as their use on the first job usually results in a saving which more than equals their first cost. Used for softening the harsh edges of vignettted cuts, whether original halftones, electrotypes, stereotypes or wood engravings. The Hammers are made with lines on each end to match any screen and the edges are softly tapped thus softening them as if by magic. Unlike a hand tooled edge, the effect of the Hammer is not noticeable on the printed page, but the vignettted edge or other lightened spot appears as if it were re-etched and not touched with a tool.

Cranston Newspaper Press

Two-Roller with Rack and Cam Distribution

The castings of the box frame style are solid, not only giving the press a massive appearance, but the required resistance for heavy impressions in cut work and with full forms. The sizes are desirable ones for general book and newspaper work, taking a full-size newspaper form without crowding.

The press is fitted with air springs with extra long cylinders and adjustable plungers, tapeless delivery, with wheels adjustable to any size sheet; simplex slider motion—the simplest device known for regulating the motion of the sliders; brake, rack guard; iron feeder's stand; feed guides that are capable of finest adjustment; large size form rollers, register rack and segment; deep fountain, with cover, which will hold a large supply of ink; a simple adjustment for regulating the fountain roll, and rack and cam distribution.

The gripper motion is smooth and noiseless in operation.

The tracks have solid ends with oil reservoirs, which prevent any leakage of oil from the ends of the track. The track steels are heavy and dove-tailed into the casting. The track is supported under the impression by two heavy girt studs, which rest directly on the girt and hold the track firmly in place under the impression.

The bed has steel runners and is heavily webbed, and is additionally supported under the impression by two truck rollers which can be adjusted by means of eccentric bushings.

The fly cam is continuous. The fly is carefully balanced, is supplied with adjustable fingers, and can be removed in a moment from the press.

The middle tapeless delivery pulley is solid on one side, to permit of the use of a sheet slitter—which can be furnished, if desired. The tapeless delivery pulleys are removable instantly to any position on the shaft.

We have recently placed on this machine new fountain brackets, carrying the fountain high up above the form. This arrangement permits the raising of the steel distributor roller, so that the form rollers, which are of iron pipe, can be easily and quickly removed from the machine.

Each machine is furnished with hard packing, wrenches, two sets of roller stocks, one set of which is cast ready for immediate use, and a complete countershaft.

With Back-up Motion

Cranston Improved Newspaper Press has all the features of the Cranston Newspaper Press, and in addition, it has a long register rack and segment and a back-up motion. The back-up motion is so arranged that it can be operated by foot pedal when the belt is on the loose pulley and the machine backed up at quarter speed. The back-up parts are all of iron and steel, and are substantially constructed on correct mechanical principles, and do not get out of repair. The new style back-up motion is an excellent feature of the machine and can be recommended.

Whitlock Two Revolution Pony Press—Two Rollers

F. o. b. Factory

Built with front fly delivery as shown above or with carrier (printed-side-up) delivery

One of the most profitable investments for the up-to-date printer. It does a great deal of work formerly run on job presses. It is so constructed as to be alike available for the printing of half tones in black or three-color as well as blanks, headings, booklets, etc., etc. Embodied in its construction are the main features of our Four Roller Press. The Simple, Swift and Smooth Running Bed Motion, the Heavy Sole Plate, the Box Type Bed, the Closed Periphery Cylinder, the Tipping Fountain, the Trip and Back-up motion, etc., combine to make it easily the Simplest, Swiftest, Smoothest Running, Most Durable, Most Convenient, Most Productive and hence the Most Profitable of all Pony Presses.

Manufactured in two sizes

Bed 27 × 31	Type 22 × 27	Sheet 24 × 29	Speed 3000 per hour
Bed 27 × 40	Type 22½ × 36	Sheet 25 × 38	Speed 2600 per hour

Each press is furnished with hard packing, slitter, counter, jogger, two sets of stocks (one set cast in lieu of moulds) press tools and steam fixtures (or large pulley and out-board bearing for direct belted motor.)

Whitlock High Speed Two Revolution Newspaper Press

F. o. b. Factory

Built only with Tapeless Rear Delivery

In this Press are incorporated all the essential features of our Four Roller Press. It has a Heavy Sole Plate, Four full length Tracks supported by the double arched Center Girder with Box Type Bed and Closed Periphery Cylinder, four Air Springs, Trip and Back-up Motion. The Two Roller Rack and Screw Distribution is ample and efficient. The Tapeless Rear Delivery permits of the ready attachment of direct connected Folding machine. The Press throughout is Simple, Convenient and Durable. It is the fastest Two Revolution Newspaper Press built. While guaranteed to run up to 2000 per hour on a good foundation, many users run it at 2300 to 2500 per hour. The best press unquestionably, for small dailies with circulation of from one to five thousand.

Whitlock Two Revolution Four Roller Press

F. o. b. Factory

Built with front fly delivery as shown above or with carrier (printed-side-up) delivery

This Press is specially designed to do not only the finest halftone printing in black and three colors, but also to be equally efficient for the general work of the modern printing office, having special regard for the production of work of the finest quality in the largest quantity, at the least possible cost. Its various patented and modernised features have been in use long enough and tested severely enough to warrant the claim that the Whitlock is the Swiftest, Smoothest Running, Simplest, Most Durable and Most Efficient of all the two revolution presses.

The Bed Motion is Simple, Durable and Exact and permits of the operation of the machine at the very highest speed known to printing press mechanics, without jar.

Four Air Springs set in pairs at each end, take up the thrust of the bed. A simple lever quickly adjusts them (in pairs) for more or less air as speed or form requires.

All the Four-Roller presses are built with four full length steel-faced tracks in which run more than the usual number of steel friction rollers whose peculiar shape forms a perfect preventative to any side lash of the bed and besides which, in their travel, carry the oil so that the tracks are thoroughly lubricated.

The Box Type Bed has a bottom surface and not merely the usual cross ribbing. This fully doubles the strength of the Type Bed. It is besides scraped absolutely true—a time saver in making type forms ready.

The cylinder is much larger in diameter than is commonly used, thereby lessening considerably the wear on type and plates. Its periphery is closed-cast (no openings for grippers or blanket-clamp rod) thereby doubling its strength. This, with the heavy Sole Plate, the heavy Double Arched Girder, the four Full-length Tracks, and the Box Type Bed, contrive to make an impressional capacity unequalled by any other press.

The Fountain is not bolted fixedly to the frames but may be tipped to any angle. This forces the ink down on the fountain roller thereby preventing color from working light. It also saves ink waste.

All Ink Rollers are interchangeable, being of same diameter. Old Form Rollers can be used as Angle Rollers, thus saving roller expense.

The Angle Rollers are geared and driven in the same direction with the moving Ink Plate and at the same speed by a simple Rack and Gear Driving Mechanism—avoiding the use of belts and trains of gears.

The Fountain Ductor Roller deposits the ink, not on the Ink Plate, but upon the first Angle Roller, and makes more than one complete revolution before returning to the Fountain Roller, thus cutting up the ink more effectually than on any other two revolution machine.

The Hinged Roller Frame with Roller-Lifting device is so finely balanced that an easy swing of a lever lifts the top Riding and Vibrating Rollers from off the Form Rollers, the Form Rollers being lifted away from the form at the same time.

Trip and Back-up Motion, both, are on all our Presses. The Trip cannot be broken through improper timing. The Back-up operates by friction and acts instantly at highest speed without any damage to the press.

Concentration in construction is closely followed, Whitlock Presses being shorter, narrower and lower than any other two revolution machines.

Built in the following sizes

Bed 46 × 65	Type 41 × 61	Sheet 43 × 63	Speed 1700 per hour
Bed 41 × 52	Type 36 × 48	Sheet 38 × 50	Speed 1860 per hour
Bed 35 × 47	Type 30 × 43	Sheet 32 × 45	Speed 2000 per hour
Bed 29 × 42	Type 24 × 38	Sheet 26 × 40	Speed 2200 per hour

Each press is furnished with hard packing, slitter, counter, jogger, two sets of stocks, (one set cast in lieu of moulds) press tools and steam fixtures, (or large pulley and out-board bearing for direct belted motor.)

Diamond Cylinder Press

Designed especially for Country Newspapers, Low Priced yet fills all
Requirements of the Country Office

Diamond Cylinder Power Press No. 14
Built also for Hand Power

The Power Diamond Cylinder is a very handsome machine constructed on correct mechanical principles. The power attachment consists of a driving shaft with fly wheel and pulleys, with pinion meshing into a large gear wheel to which is connected a lever operating a connecting arm pivoted on the frame; this arm has adjustable connections to the bed and gives a simple positive motion to the machinery. The machine is provided with a reliable throw-off, operated by the feeder's foot, thus leaving both hands free and preventing the spoiling of paper.

Design—The Diamond was designed to meet the demands of country newspapers for a reliable, low-priced press to run editions up to 3000 copies. In design, material, construction and workmanship, the highest standard is maintained.

Construction—The frame is strong and compact; the iron being put where it is needed and the appearance of the machine is fine and symmetrical.

Ink Distribution—The ink fountain is the celebrated Challenge Book Fountain, with screws conveniently placed to regulate the supply, furnishes the ink to a ductor roller which then carries it to a rider roller, and it in turn to a vibrating roller resting upon the two form rollers. These ink form in both directions as it is carried back and forth in the bed of the press. Rollers can be easily and quickly removed.

Impression—The cylinder is heavy and unyielding under the impression strain: the journals at both ends run in anti-friction, oil retaining roller bearings, a single, simple screw and lock nut at each end of the cylinder adjusts the impression to a hair. The bed is heavy, finely machine finished, evenly balanced. The motion is made free and easy by bearing upon three anti-friction steel rollers on the line of impression, making it absolutely rigid.

Feed Board—The feed board is large and well finished. It has sockets to fit over supporting standards and can be removed instantly by simply lifting it off, and can be put back without any adjustment of any kind.

Sheet Delivery—The sheets are delivered by an apron ingeniously adjusted to bring the papers out as they are printed, and delivers them on a finely finished delivery table. This table can be removed to save floor space when not in use. All the movements are positive, and the grippers, the movement of the cylinder, the arrangement of the tympan and the various mechanisms are easy to operate and will work in a satisfactory way. Number 4 Diamond Hand Power . . . \$350 00 Number 14 Diamond Steam Power . . . \$450 00

No. 4 Diamond Hand Power is a six-column folio; size of bed $24 \times 32\frac{1}{2}$ inches, and will print any size of smaller sheet without any special adjustment; floor space 40×43 inches, the delivery table extending 30 inches back of the frame; speed 700 to 900 impressions per hour; shipping weight 2100 pounds.

The hand power machine is a strictly one man machine. The operator stands on the crank side of the press, grasping the handle with his right hand, and feeding the papers to the guides with his left. That is all that is necessary, the press does the rest. The press when made, is ready for the power attachments, which can be added without sending the press to the factory and is instantly set up, ready to start. Outside of the power attachments, the hand and power machines are the same.

No. 14 Diamond Steam Power is a six-column folio; size of bed $24 \times 32\frac{1}{2}$ inches; will print any smaller size sheet without any special adjustment; floor space 40×43 inches; the delivery table extending 30 inches back of the frame; speed 800 to 1200 impressions per hour; shipping weight 2500 pounds.

Brower Drum Cylinder Press

Made in one size only, bed 26 × 38 inches. Suitable for standard 7-column newspapers and job, book and poster printing that will go on 24 × 36 sheet

The above cut shows the new Brower Drum Cylinder Printing Press for which we are the exclusive selling agents. Every one familiar with cylinder presses will immediately recognize it as belonging to the old original Campbell type—the best all-around hand power cylinder press hitherto built.

That the Brower Drum Cylinder Press forms a class by itself and completely meets the wants of hundreds of offices will be seen in the following enumeration of its salient features, among which are several important new inventions, besides that of the new Brower bed-movement:

Tapeless delivery, sheet slitter, receding opening and closing gripper studs, hinged feed board, side feed-gauge holding-bar, feeder's stand, quickly detached fly, two tracks with bed rollers $2\frac{3}{4}$ inches wide, adjustable bed, hold-down gibs and guides, improved cylinder boxes and impression screws, patent adjustable bed rack shaft bearings, patent adjustable cam movement for actuating fountain roller, compression springs throughout, the strongest cross-stay in any press of its size, adjustable roller bearers, a first-class book ink fountain with full complement of knife adjusting thumb-screws, table distribution, $3\frac{1}{4}$ -inch form rollers, 2-inch fountain-duct and plate rollers, all journals of extra length, all shafts of extra diameter, strongly braced cylinder and bed, and patent adjustable chase head bearing. In fact, in completeness and efficiency the Brower drum is the equal of presses that sell for more than double its price.

The new Brower Drum gives perfect register and a rigid and sharp impression. It runs lighter than any other drum press of its size, and is as nearly "fool proof" as a cylinder press can be made. By hand power it will print more sheets in a given time than any other drum cylinder press of like size; by motor power, without springs, it may be safely run at from 600 to 750 impressions per hour; and with springs it will print and deliver 1500 sheets per hour. It runs with practically no vibration and does not have to be bolted to the floor. The weight of the press when in position is over 4000 pounds.

Practically every metropolitan newspaper has adopted the 7-column page and the pronounced trend of country weeklies, semi-weeklies and dailies is to follow suit, as a page of that number of columns makes up more conveniently and handsomely than one of any other number. It is also the sized page that seems to be best liked by the public. A 7-column quarto drum press could not possibly be run by hand power and a motor power press of this size is huge, unwieldy, costly to run and costly to buy. But where 7-column quarto papers are desired the ready print houses furnish them folded once, thus fitting them for the Brower 7-column folio drum, the only hand power drum made today of any size.

The use of the Brower Drum will bring about many economies. Two pages may be set up and printed before the office becomes congested, as is usually the case on the day of publication. The last two pages can go to press very much later than if four had to be made up, locked up and made ready at one time. Consequently, local news, when printed on the Brower, can be brought down to within a few minutes of the time of issue. The chief economies lie in the greatly reduced first cost of the press and in supplying the very small amount of power required to run it.

When a 6-column or smaller paper is preferred the Brower 7-column press is as cheap a press and as small a press as it is desirable to print it on. A smaller drum press would not run any lighter, would not occupy materially less floor space, and its first cost would be about the same. It seems to be very evident therefore that the Brower 7-column drum will most fully meet the requirements of thoughtful publishers.

Brower Cylinder Press, 7-column folio, f.o.b. Chicago \$650 00

This price includes either a large fly wheel for hand power, or (if specifically called for in original order) a small fly wheel and side power fixtures. These latter attachments provide for running the press by motor power up to 600 to 750 per hour. The small fly wheel is crowned and of the right diameter to belt direct from electric motors.

Attachments for Brower Drum Cylinder Press

Patent Air Springs, including piston, bell cranks, shafts and air controlling and release valves . **\$25 00**

Vibrator, including steel tube vibrator, cut gears and studs to drive same, also adjustable form roller sockets **25 00**

The above attachments may be purchased and applied at any time, as all parts of the press are made on the interchangeable plan.

Equipment—Each press will be properly packed for shipment and each press will be provided with the following articles: Rubber blanket, sheet slitter, one set of composition rollers, one extra set of roller stocks, wrench and screw driver.

Ideal Hand Cylinder Press

The type form on this press is stationary. The Cylinder is moved over the tympan by link belts running over sprocket wheels at each end of the press, and it prints a sheet at each forward or backward movement. The cylinder is made of steel, and is held firmly to the tracks by truck-wheels which run in a groove on the under side of the tracks. The boxes which hold the cylinder at each end, and in which it revolves, are connected by a stretcher rod running above the cylinder, which prevents side friction. The impression is regulated by four screws—two on each side—which raise or depress the bearers on which the cylinder runs. An effective inking apparatus is supplied, but is extra. A number of Ideal Presses are in use, and intending purchasers may gather how satisfactory they are to the users by reading the following extracts from a great many commendatory letters received.

"My wife ran off 300 an hour on it the first day it was put up." *** "With it our inexperienced pressman has made the following speed: 750 impressions in 75 minutes; 475 in one hour; 100 in 11 minutes. We run a regular lick of 100 every 15 minutes, or 400 per hour." *** "The press is so simple that the veriest novice can set it up, and so light-running that a boy may operate it with ease." *** "It is far superior to my old Washington for speed and quality of work."

Ideal Inking Apparatus

Inking Apparatus attached to side of Ideal Hand Cylinder Press

There are two inking cylinders (A) and (B), one of which (A) revolves by means of the hand crank, and while revolving it automatically vibrates. The inking roller (D) rests on the inking cylinders and receives its supply of distributed ink. When the roller (D) is pushed toward the form, the automatic sheet-steel drop-leaf ink table (C) descends on the bed of the press and the roller (D) passes easily on to the type form. When the roller returns, the ink table (C) resumes its perpendicular position automatically. The Ideal Inking Apparatus is not furnished with the Ideal Press unless specially ordered.

Tribune Newspaper Folder

All Iron Frame
Working Parts Steel and Iron

All Movements Positive
No Sprocket Chains or Lost Motion

The Tribune Folder is of the highest grade of construction and efficiency, without a superior for its purpose on the market, and sold at such moderate net prices as to make so-called "cheap" folders highly expensive in comparison—durability and reliability considered. It has no makeshift devices. It folds on the same principle as the high-grade book machines. The simplest folder made.

Made in one size only, 36×48 inches, which takes in any size sheet, whether folio or quarto, from 22×32 to 36×48 inches.

Paster and trimmer can be furnished at time of purchase or added afterward.

Made with three- and four-fold deliveries. Three-fold work is delivered in a receiving box while four-fold work is delivered in a packer as shown in illustration.

In the hands of a competent operator it will fold ordinary sixteen- and thirty-two-page work.

Weight about 900 pounds. Power required, about one-tenth of one horse-power. Speed 3000 folio or quarto sheets per hour.

Prices f. o. b. Factory

For a straight 3 or 4 fold machine, hand feed	\$450 00
Same with 8 page Paster and Trimmer	475 00
Fixtures for attaching to press, extra	75 00
Insetting Attachment inserts a two-page or four-page sheet or supplement between the fourth and fifth pages of a publication, folding either ten or twelve pages and pasting and trimming the entire publication, extra	150 00
Covering Attachment outsets two pages upon eight pages, making a ten-page publication; or outsets a four-page cover or supplement upon eight pages making a twelve-page publication. It pastes and trims. Extra	150 00

The price of this reliable and durable folder is little more than asked for inferior affairs which in the end prove most expensive and least satisfactory. Folder made to do perfect work for many years.

Eclipse Newspaper Folder

Built in a Square Cast Iron Frame

The Eclipse is a high-grade folder at a low price, perfectly constructed in every detail, fully warranted for five years and contains all the up-to-date improvements, including tight and loose drive pulleys, spring cushion roller boxes, steel-gauges, individual tape stands, non-stretchable tape, separate third and fourth fold delivery, the improved self sharpening trimmer and the drop roll feed. All machines are equipped without extra charge with automatic side register so that the paper is automatically straightened; even if it is not properly fed into the machine. The paster is so constructed that it operates only when the paper passes under it thus making it impossible for the paste to get on the rollers. These machines are sent to any responsible publisher on 30 days trial and sold strictly on their merits. They will handle any size sheet from 22×30 to 36×48 and are built to handle 4, 6, 8, 10, 12, 16, 18 and 20 page newspaper work.

Eclipse Folder for four- and eight-page work, including trimmer, f. o. b. Factory	\$200 00
Attaching to press, extra f. o. b. Factory	75 00

In addition to the above folder for regular newspaper work, the manufacturers also build the Eclipse Job and Periodical Folders. They are made in different combinations to handle the line of work indicated by the title. Quotations made on application. Send sample sheet with specifications of work to be done.

Galley Proof Presses

Chandler & Price Proof Press

Built in the most substantial manner, thoroughly braced with accurate bed and cylinder. The cylinder is much heavier than on the average proof press and consequently gives a much better impression.

Brown & Carver and Oswego Power Paper Cutters

Brown & Carver Hand Clamp Power Paper Cutter
Eleven sizes, 34 to 84 inches. Sizes and prices at bottom of page

Cuts work up to one-half inch wide and the knife rises six and one-half inches.

Table is grooved to prevent sheets wedging under gauge—or the table is plain if desired. It is several inches lower than before and is arranged for putting on two side extensions in front for handling work before and after cut.

The back gauge is in three parts regularly (or in two parts, or one part if desired) and when split, the section forms a side gauge so that work can be cut near the center of knife as well as at the side of the machine. The back gauge is close to the side gauge for small work.

The knife is bolted solidly to the bar and is instantly adjusted for level or wear by a turn of the connecting rods.

The direct crank motion to the knife bar never allows knife to fall short or to cut into the stick.

The clamp is balanced to run the entire distance up or down with one spin of the wheel. The clamp is provided with a flat removable plate for fine work, which otherwise might be marred by the clamp fingers.

Solid clamp and back gauge cutting up to 3½ inches are furnished to order.

Pulleys furnished regularly on side shown in cut, but can be furnished on opposite side to order.

The fast screw movement for back gauge with wheel divided to sixteenths is furnished regularly on cutters 34-inch to 74-inch.

Quick cable movement with indicator reading to sixteenths will be furnished instead of screw movement if desired without extra charge to order.

A treadle attachment is furnished (to order extra on 34-inch, 38-inch, 44-inch and 50-inch) for bringing the clamp down to work instantly without running clamp down by hand.

The 57-inch to 74-inch machines can be started from either side by the bar across front.

The power movement shown in Brown & Carver catalogue on 57-inch cutter for operating back gauge is furnished to special order only (extra). This labor-saving device moves the back gauge backward or forward by power, a lever swung to the right or left controlling both the direction and the speed. Its indicator wheel reads the position of the back gauge to sixteenths, and if desired a micrometer pointer can be attached to read to less than thousandths.

Friction clutch, cut gears, steel shafts, brass rule, case-hardened steel bolts, iron of a durable quality. All machines subjected to a running test before leaving the works. Illustrated catalogue free.

The Clamp on these machines may be operated as on the regular Hand Clamp Cutters or it may be brought down to the work quickly by treadle and will lock automatically on the work or return to the top as desired. A partial turn of the Hand Clamp Wheel will give full clamping pressure and a partial turn in reverse while foot is held on treadle will release the clamp so it will rise automatically to the top. These machines are furnished regularly with Cable Gauge Movement (screw movement if desired) and Pilot Hand Clamping Wheel (Round Rim Clamping Wheel if desired). Other equipment is the same as regular Hand Clamp Cutters.

Brown & Carver Power Cutters, Auto, Regular; Automatic Clamp and Foot Treadle

B. & C. Automatic Clamp

These machines pack, clamp and cut a pile automatically. The steel indicator band registers position of Back Gauge. The Clamp may be brought down by treadle to see exactly where knife is going to cut. These machines cut as accurately as the Brown & Carver Hand Clamp Cutters. The Automatic Clamp is independent of the knife and is powerful and reliable. The stroke is fast and clean. The mechanism is the simplest and there are few moving and wearing parts.

The table is grooved, plain if desired, front scored 1 inch lines with brass rule graduated to sixteenths of an inch, back graduated to sixteenths of an inch. Interlocking Clamp and Back Gauge cut work up to 3/4 inch. Removable Flat Plate for Clamp prevents clamp fingers indenting fine work. Back Gauge is in three parts. Cable Gauge Movement. Clamp rises 6 inches.

Oswego Power Cutters, Hand Clamp

Also arranged for Hand Drive

These are lively running, accurate Cutting Machines. The base is webbed directly under the clamping and cutting strain rendering the machine absolutely rigid. The Clamp rises 4 1/4 inches. The Clamp and Back Gauge interlock allowing work to be cut up to one-half inch. The Back Gauge is in two parts on 26-inch and 36-inch sizes, in three parts on 36-inch size. Screw movement for Back Gauge is furnished regularly, Cable movement furnished to order. The Hand Wheel is graduated to insure the movement of Back Gauge. The Table is plain (not grooved); front scored in 1/2 inch squares with brass rule graduated to sixteenths of an inch, back graduated to sixteenths of an inch. The handles on the clamping wheel render clamping easy. (Round Rim Clamping Wheel furnished if desired). The Friction Clutch is thrown out automatically after every cut and the knife stopped at the top by a positive brake.

Oswego Hand Wheel Drive Cutters

The driving mechanism of these machines is powerful and geared so the machine is easily driven by hand power. The Table is plain (not grooved); front scored in 1/2-inch squares with brass rule graduated to sixteenths of an inch, back graduated to sixteenths of an inch. Extra long Back Side Gauge. Detachable Front Side Gauge can be adjusted in and out. The Clamp and Back Gauge interlock allowing work to be cut up to 1/2 inch. The Clamp rises 3 1/2 inches. Back Gauge is in 2 parts, the split part is flush on one side forming another side gauge near the middle of machine. This allows the knife to be worn equally. Pilot Hand Clamping Wheel (Round Rim Hand Clamping Wheel if desired). Gauge Screw Movement. The Hand Wheel is graduated to measure the movements of Back Gauge.

Advance Power Paper Cutter

This well known and reliable cutter is made in the two useful sizes, 30 and 33 inches. It has the patent side frame protector which prevents paper trimmings from wedging between the knife and side frame, which is the cause of so many breaks. The throw off stops the knife at the highest point of the stroke automatically, can be thrown off and backed up at any point by hand. All cut gears. The clutch, clutch pinion, intermediate gear and intermediate pinion are cut out of solid steel. Easily squared back gauge. Side gauges back and front. Strong, well built and thoroughly reliable and fully guaranteed. Prices on skids, packed for shipment, f. o. b. Factory.

Challenge Power Paper Cutter

The 36-inch Challenge Power Paper Cutter is a machine of fine proportions and great strength. It is entirely within control of the operator without moving from his position. The automatic throw off is positive; the knife bar is counterbalanced, doing away with all danger of the knife running down prematurely. The knife stops instantly at any point, up or down, when the clutch is thrown off. The clamp is geared at both ends and is quickly and easily operated by the hand wheel at the left of the cutter. By this arrangement, also, powerful clamping is secured. These cutters are provided with front and back and stationary side gauges; an extra reversible side gauge in front, interlocking back gauge and clamp; broad faced sections on clamp to prevent creasing stock; split back gauge; brass figured rule in bed, back and front; also hand wheel is provided for backing up the knife. Steel is used for all shafts, screws, studs, clutches and driving gears. Gibs and set screws in side frame take up wear of knife bar. Cut gears give an easy, noiseless motion. Patented side frame protector prevents paper shavings from wedging between knife and side frame which is the cause of so many breaks in paper cutters.

"Howard Gem" Lever Paper Cutter

Size	Squares	Price
30-inch	30 inches	\$175 00
32-inch	32 inches	200 00

This is the **Original "Howard Gem" Lever Cutter**. It has been improved from time to time and is a popular lever cutter.

It is a very heavy, compact and rigid machine; powerful compound leverage makes it cut exceptionally smooth and easy. Clamp has large hand wheel and quick-acting screw. Knife cuts clean and true. It is provided with interlocking back gauge and clamp for cutting narrow widths. It is also supplied with the "easily squared" split back gauge and stationary side gauges back and front on both sides. Half-inch cutting sticks with eight cutting surfaces. Gibs and set screws in side frames to take up wear of knife bar. The lever is extra long and heavy, counterbalanced and adjustable to any desired position.

Peerless Gem Paper Cutters

Superior in every detail and in the leverage, cutting with greater ease to operator, and returning from cut with the least possible exertion, owing to the perfect balance. The frame is stronger, heavier and better braced; the knife thicker and deeper, insuring a truer cut and longer life; the lever is adjustable; the balance weight is now hung inside the frame, thus saving floor room. There are split back gauges, side gauges, and front and back enameled measuring gauges. Unexcelled in construction, materials used and finish.

Chandler & Price Paper Cutter

It is built from new designs by scientific methods. It has ample metal properly distributed to withstand strains. The back gauge and clamp interlock, clamping as narrow as one-half inch. The fingers of the clamp have a broad surface, to avoid creasing the stock, all gauges are accurately squared with the knife. The back gauge extends to within one inch of side gauge, and is divided and adjusted for book trimming or squaring small work. All parts are interchangeable, and accurately fitting replacements may be ordered by number.

Made by one of the most reliable builders of printing machinery in the world.

Premium Card Cutter

This is the popular, general, all-round machine, with a twelve-inch blade, meeting the requirements of a medium-sized cutter. A distinctive advantage is secured by a peculiar arrangement of the joint, by means of which a sheet of any length may be cut. By the simple adoption of a spring overhead, connected by a cord attached to the handle, the cutter is adapted to rapid work where a great number of small pieces of uniform size are to be cut.

The Boston Self-Regulating Wire Stitching Machine

No. 3 Boston Wire Stitcher with Electric Motor Attachments, showing Saddle Table that becomes a Flat Table when tipped back. Capacity, two sheets to exceeding three-eighths inch.

In presenting the Boston Wire Stitching Machine to printers and binders, we wish to direct particular attention to its time and labor-saving features and to the elimination in its construction of the faulty ideas of competitive practice.

The "Boston" is original throughout, being a radical departure from everything heretofore brought out in this line. Its adjusting, feeding, cutting and clinching mechanisms are new, correct mechanically and manufactured in a most thorough and painstaking manner under the personal supervision of the inventor in its own newly-equipped factory.

Simplicity is its chief feature, and one which has met the enthusiastic approval of over six hundred users in all sections of the country. All working parts are composed of single pieces of specially prepared steel, easily replaced when worn and so inexpensive that cost of maintenance is reduced to a minimum.

Motor equipment extra according to power requirements.

The Boston Self-Regulating Wire Stitching Machine

Prospective purchasers of this kind of machinery are invited to examine the "Boston" at any of our houses and to note particularly the following points of superiority.

Single Adjustment—All parts brought to absolute adjustment by turning a hand wheel.

Gravity Tension for Wire—No springs, nuts or screws. Changes of wire made instantly.

Wire Guide—Lined with felt, prevents wearing of guides and injury to wire.

Wire Straightener—Always removes kinks and curls from the wire.

Wire Feed—"Grip" is circular and in contact only while feeding. Automatically changes position each time stitcher is threaded.

Cutter—Made of one piece of specially prepared steel and working in plain sight.

Bender—Bends and guides the legs and head of each staple perfectly.

Driver—Single piece of hardened steel, reversible and easily replaced when worn.

Supporter—Over which staple is formed and supported when driven.

Clinchers—In open space and never in contact with points of wire.

The Boston Self-Regulating Wire Stitching Machine

No. 7 Boston Wire Stitcher showing Flat Table in working position, Saddle Table below

Capacity two sheets to full seven-eighths of an inch, taking news, book, coated and similar papers to its full limit.

Designed for heavy, flat stitching, but takes small work perfectly. Built on the lines of the No. 4, having the same superior table features, except that the flat table is larger and heavier, with more front and side room.

Wire used 30 to 24 round, 20 x 24 flat.

The heaviest and best seven-eighths inch Wire Stitcher ever made.

The Wire Feeder

The wire feeder, simple and accurate in operation, is in contact with the wire only during the forward movement of feeding, returning to its position without scraping across the wire. The steel sector, the principal part of the feeding device, operates directly on a cam, without rolls, ratchets, eccentrics and the many small parts generally employed. It is the only perfect feed. The feeding grip is circular, having many contacts, and changes position automatically each time the stitcher is threaded. This is a new and important feature for the first time worked out.

The Wire Cutter

The wire cutter is an important working part of all wire stitchers, one which is most frequently replaced. In all stitchers excepting the "Boston" this is made of two single parts, with the accompanying screws, springs and bolts. In the "Boston" the cutter is one piece of hardened steel working in plain sight and always ready as seen in the illustration. It can be replaced instantly by removing the iron strap below the face plate and pulling forward the cutter plunger. Frequent and costly accidents cannot result from the cutter being placed out of position, as in other stitchers.

Clinching the Staple

The clinchers are new in principle and consist of two parts, clinchers and clincher points. They are far superior to those used in other machines, in which the points of the wire come in contact with them as the staple is being driven. In the "Boston" the clinchers do not operate until the staple is fully driven, the points of the wire are never in contact with the clinchers, and the clinch is made by the clincher points acting against the entire support of the driver, the latter being delayed in its return for this purpose. The result is the much desired smooth, even, flat clinch, increasing the binding power of wire, and preventing damage to and wrinkling of stock, the inner pages of which are usually marred by defective clinching. Clinchers are easy to clean or replace.

The Boston Self-Regulating Wire Stitching Machine

Something New

We illustrate here a new feature in stitching machines and possible only in the "Boston" owing to its remarkable simplicity.

Figure 1 shows the actual size of the regular half-inch stitch for which the Nos. 3 and 4 machines are fitted. If desired, special extra parts can be furnished at moderate cost for making a three-eighths inch stitch possible on the same machine, with a consequent larger saving in wire. Figure 2 illustrates this stitch, actual size.

The change in the machine can be made in three minutes, and consists of replacing the driving bar, supporter and cutter plunger, and slightly shifting the feed sector—work which can be done by the operator.

Fig. 1.

Fig. 2.

Electric Equipment

On page 1093 is shown a No. 3 "Boston" equipped with one-sixth horsepower individual electric motor.

This equipment is the best and most compact ever devised for a stitching machine. Where a 110, 220 or 500-volt direct current power or lighting service is in use, these equipments can be furnished complete ready for wiring. In case they are to be attached to the lighting circuit, all that is necessary is to remove the glass bulb and screw in the stitcher extension wire plug, after the fashion of an ordinary extension lamp. We can also provide motors for alternating current 104 to 110 or 208 volts, cycles 60 or 125 per second. These motors will operate on single, two or three phase circuits.

It will be noticed that this electric equipment takes up but little space beyond the frame of the stitcher; that a special foundation plate is furnished, to which are attached rolls making it possible to wheel the machine to any part of the workroom. The equipment is the same on all sizes.

Boston Staple Binder

Patent Applied For

Foot Power and Hand Power

The Boston Staple Binder like the Boston Wire Stitcher is built on new lines with valuable features never before used in a stapler. It is the nearest approach to a stitcher yet devised, and its work is neater and better than some of the old line stitchers. It is difficult to distinguish its stapling from the best wire stitching.

Sticks of staples are placed in the machine, at the right hand side as shown in the illustration, just as taken from the box, and may be changed as often as necessary with absolutely no loss, thus saving 25 to 50% over other machines.

A supporter (an exclusive feature) prevents buckling staples, and permits the use of finer wire than heretofore possible. The result is cleaner work.

Clinchers are the same as in the regular Boston Wire Stitching Machines, and operate effectively for even, flat clinching.

The driver is a single piece of steel and can be instantly replaced when necessary. Instant replacement of worn or broken parts is an important feature.

The foot power Boston Stapler has a pedestal and table, as shown in the illustration; the hand power is screwed to a bench or table.

The capacity of both styles is three-sixteenths of an inch, flat or saddle work.

Boston Bindery Tables

Patent applied for by the maker

Adjustable to any angle, also to height of any Wire Stitcher

Flat

Saddle

Magazine

May be used with every make of Wire Stitching Machine

These strong and convenient tables are made by the Boston Wire Stitcher Company to use with the Boston Wire Stitchers, but they are equally desirable for all Wire Stitchers. Every table will operate as a magazine, a saddle or a flat table, and be found valuable in binderies where heretofore a carpenter has had to rig up a stationary affair, admitting of no change. The change in position is accomplished by manipulating the clamps shown in the saddle illustration, the work of a few seconds. Tables are adjustable to any angle; also up and down to conform to the height of the iron table on stitching machine. Base is of iron and heavy enough to counter-balance any work placed on the tops. These tables fill a long-felt need in binderies and are the only equipment on the market for this work.

The success of every wire-stitching machine depends largely upon the quality of the wire used. This wire is the best made. There is no economy in poor wire.

A spool holds five pounds of wire. A case contains 200 spools (100 pounds). Spools are 10 cents extra each and are returnable less transportation charges. Do not return spools without previously sending us notice as such notice may enable us to save you some expense.

The table on next page will save users of wire a great deal of time and enable them to estimate accurately the cost of wire in each job and the amount necessary to order.

Table Showing Number of Wire Staples to One Pound of Wire

To ascertain the number of staples to one pound of wire, measure full length of wire in staple, go to first column on left of table and pass down same until you reach the size that corresponds with staple measured; pass along to right until you reach size of wire used, shown by top row of figures. Example: If your staple measures 1½ inches and the size of wire is No. 28, there are 11,940 staples to one pound as shown in table.

Extra Heavy Rosback Progress Power Perforator

Has hardened tool steel die, guaranteed for five years. Directly under the center of the head and in line with the side rods. Feed gauge for feeding paper into the machine enables you to finish the sheet one way, once through the machine no matter how many perforations on, thus saving handling of the stock the number of times as you have perforations on, minus one.

Automatic sheet delivery on a round hole Perforator has heretofore been unknown. The Progress is the only Perforator on the market equipped with this feature. In the cut of rear view of this machine you will see the sheet just being delivered.

Genuine Rosback Foot Power Perforator

The Original Independent Punch Perforator

This machine is built strong and durable, and makes a perfect perforation. The frame is securely braced and bolted so as to prevent its being racked or twisted out of shape by transportation or otherwise, causing undue wear of the needles and die. A very excellent feature of this machine, and one that will be appreciated by the operator, is the sliding steel plates on front of needle bar (see cut) which enables him to easily and quickly provide for stubs of checks, etc., rendering a portion of the needles inoperative. To do this loosen the thumb screws on the sliding plates, move the plates to a position over that portion of the paper to be perforated, tighten the thumb screws, and the perforator is ready for work. That portion over which the space or spaces between the plates occur will remain unperforated. The stripper has a heavy flanged back, consequently it is stiff and will not spring. The bed on which the die plate is fastened is about 1/2 inch thick, insuring a solid cutting surface.

Perfection Perforator Feed Gauge

It comprises two steel side tracks each 21 inches long which afford ample room for the largest paper used and are fastened to the front table of the Perforator by two wood screws. A movable carriage travels on these tracks by means of pinions secured to the shaft which insures an absolutely parallel movement. The carriage is provided with an adjustable straight edge for truing up the paper when printed matter is not square with the edge of the sheet.

Progress Perforator Feed Gauge

A simple and accurate feed gauge for use on any round-hole perforator. Can be readily attached without any change in the perforator. The "Progress" does not require the removal of stops or sliding them to back of gauge. When not in use can be swung back out of the way by loosening the screw.

Rosback Hand Perforator

This perforator makes a round hole—fifteen to the inch. A needle accidentally bent can be removed and another inserted in its place by simply removing the screws A and B and detaching the needle stop, removing the defective needle and replacing it with a new one—the whole operation requiring but a few minutes' time. In like manner any number of needles can be easily removed so as to perforate any length from 1 to 10 inches.

Damon Perforating and Scoring Machine

This perforator and scorer consists of a depressible or disappearing, interchangeable steel blade (either with perforating or scoring surface) acting in connection with a base plate or lever all secured within a steel casing and operated by a rubber pressure-quad glued to the tympan, which presses against the lever, bringing blade into position just before taking impression.

Locks in form and saves time and rollers by perforating (or scoring) and printing at one impression.

- 1—Creasing blade.
- 2—Perforating blade in position to take impression.
- 3—Perforator with blade depressed.
- 5—Pressure quad.
- 6—Pressure quad glued on carboard.

The Kane Perforator

Cheap, simple and effective device, quickly attached to job-press. Makes perfect perforation at time of printing without cutting rollers, printing a black line across sheet or causing annoyance to feeder.

The perforator is less than three-sixteenths of an inch in width and consequently may be used on all ordinary work. An impression on tympan will show just where the perforator should be placed.

McNamara Gripper Perforator

The McNamara Gripper Perforator and Scorer is bolted on the gripper bar the same as any ordinary gripper; cuts clean and sharply without any perceptible wear; is small and compact enough to allow type to be set close, and yet it will perforate any thing with accuracy and precision, and being carefully built, it has infinite strength and durability. It will not cut because it does not touch the ink rollers or cause hard work for the feeder. Can be attached easily and quickly to any platen press.

Sterling Round Cornering Machine

This machine is for round cornering booklets, catalogues, cards of all kinds, labels, folders, calendar backs and an endless variety of other work.

It is the most popular machine for the purpose ever devised, and over 5000 of them have already been sold.

The machine is self-clamping and very rapid. Every part is made with the utmost care.

The price is \$15, including one knife of the size generally used, but we have four other styles at \$1.25 each.

The operation of the Sterling is so simple and the price so low that no enterprising concern can afford to get along without one of these wonderful machines.

Some of the Many Attachments for the Sterling

The Sterling is like the "Elastic Book Case" always complete but never finished.

We illustrate the Pedestal Foot Power Attachment on which a Sterling can be mounted in a few minutes, allowing the operator to sit down when using the machine, leaving both hands free for guiding the stock.

The price of this attachment is only \$15 and it will be appreciated by every owner of a Sterling, because it will increase the utility of the machine to a very great extent.

We also illustrate the Perforating Attachment which can be added to any Sterling and will prove a great convenience.

The system of gauges is the finest ever devised and they can be instantly adjusted for handling any particular size or shape of work, and are so constructed that adjustments can be made to the hundredth part of an inch.

This attachment costs \$18, and when added to a Sterling you will have the best 10-inch Perforator on the market.

Space will not permit us to show the other attachments for punching of all kinds, including the loose leaf and card index work, eyeletting, stabbing and indexing.

Send to our nearest branch for special illustrated catalogue regarding the Sterling and what it will do.

Tatum Adjustable Paper Punches

This is the standard round-hole punch that is supplied with each of the three styles of Tatum Adjustable Paper Punches. The Punch and Die are shown separately.

Both punch and die are securely mounted in a way that insures their perfect alignment. Changing punches and setting the members to any desired position in the machine can be done quickly and accurately by any boy or girl without using wrench or screwdriver. In regular punching members the throat depth from front to back is 2 inches but a special throat depth adjustable to 8 inches can be provided when desired. As regularly supplied with Tatum Punches, the standard

holders will accommodate any of the 16 stock sizes of round hole punches and dies from No. Y, diameter ⅜ inch to No. 46, diameter ⅞ in. When special punching members or attachments for open hole or

Tatum Adjustable Paper Punches—Continued

special shapes are wanted with a machine there will be a deduction of \$7.50 each for the standard round hole punch not taken in the regular equipment of the machine. The most distinctive feature of these punches is, that in this member both the punch and die are securely mounted in a single casting or holder in such a way that their perfect alignment is assured under all conditions. This obviates tedious if not impossible adjustment necessary when the punch and die are separately mounted and it insures at once a correct fit and perfect punching surface, and avoids the possibility of chipping the die. Combination punching members are made for special requirements such as punching two or more holes at fixed distances from each other for loose-leaf ledgers, etc. These punches are mounted in a gang in a single casting that insures them against the slightest variation, no matter how, when or where the member may be used. Write for catalogue showing these special combination punches in gangs.

Punch Heads

This construction of punch head is entirely new and is designed for the greatest convenience in punching a large range of round-hole work. It admits of five changes in size of hole; two heads may be spaced any distance apart up to the width of the machines.

The cut shows the five punches in their positions. In operation but one punch is used in each head. To change the size of hole remove the punch and insert in its proper place one of the other punches. The lower dies do not have to be removed. No. 5 A has five punches of the following diameters: $\frac{1}{8}$, $\frac{1}{16}$, $\frac{3}{32}$, $\frac{1}{4}$ and $\frac{5}{16}$ -inch.

Style D Punch Head is a single round-hole punch head with deep throat. It will admit $\frac{1}{4}$ inch of paper and punch hole a maximum of $1\frac{1}{8}$ inch from edge of sheet. Fitted with any size punch up to $\frac{3}{8}$ inch in diameter. Heads with larger punch than $\frac{3}{8}$ inch will cost extra. Style D head is adapted for use on machines provided with adjustable back-stop.

Combination Shoot-Board and Type-High Machine

This machine will take blocks of ten inches wide and any length. The carriage or guide frame for plane being moveable from side to side while operating, blocks of the full width of the bed can be shaved at one locking. The cuts or plates are laid face downward on the bed, locked, and then shaved until the knife or file cuts no more, when they will be even type-high. If blocks are too low lay sheets of paper or cards below them to raise high enough for shaving, and afterwards glue these sheets to bottom of cut, or place them between plate and wood.

For trimming slugs, rules or furniture (wood or metal of any size) cutting miters and squaring the sides of blocks, the guide frame is taken off and the plane used upon the side of the bed. It can be used as a bench vise, being handy for holding blocks when you want to take off or put on an electrotype plate. For warped blocks, the plates should be taken off, both top and bottom shaved and the plate remounted.

American Lead and Rule Cutter No. 20

Recent improvements make the American Lead and Rule Cutter the best machine on the market for cutting linotype slugs. In the new model it is impossible for the Front or Lower Gauge to slip or be forced out of position in cutting heavy slugs or rules. The accurate register of the gauges is absolutely maintained. The novel method of adjusting and locking the gauges, together with several other improvements, met with the immediate approval of leading printers everywhere, and today the American Lead and Rule Cutters are generally conceded to be by far the best cutters made, not in one point, but in all points. To begin with, the gauges can be set instantly, effecting a very material saving in time. They are locked automatically, there being no screws to change from one hole to another, etc. They cannot possibly slip, are accurate, and, what is more, are guaranteed to remain so. The flaring notches in the gauge rods are engaged by four teeth of corresponding taper, which, in turn, are held firmly in position by a strong spring. These teeth seat on their sides and do not touch at the bottom, which renders them self-centering and also compensates for wear, it being obvious that any wear in the teeth will merely permit them to mesh the deeper. The grooved bed makes it impossible for thin material to get under the gauge.

The construction of the Front Gauge makes it not only possible but easy to gauge extremely short measures with unequalled speed and precision.

American Lead and Rule Cutter No. 20 Gauges to 105 picas, by nonpareils \$10 00

American Lead and Rule Cutter No. 30

The Micrometer or Point Gauge which comes with the American Lead and Rule Cutter No. 30 Cutter only, can be set quickly and accurately from one nonpareil to forty-five picas by points. This is a decided convenience in cutting odd or very short pieces; for instance, when in need of a few additional spaces for some odd body such as 14 or 20 point, they can be cut quickly and accurately with the aid of this device.

The Bed and Gauge Rods are graduated to picas and numbered every five ems, the back rod to indicate the measure when reversed and extended beyond the end of the bed. The cutting mechanism is unsurpassed, being operated by a compound lever with double link connection and provided with a straight cut for leads, and a shear

cut for brass. A rigid guide prevents the knives springing from their work. The support avoids any sag in the material between the front gauge and the knives. In cutting short pieces it may be swung back out of the way. The extra foot at the left end of the bed serves to steady the machine if placed on an uneven surface.

American Lead and Rule Cutter No. 10

This is a good serviceable machine particularly adapted to small offices and for cutting odd lengths. The gauges are graduated to Picas and numbered every five ems. The bed-gauge is reversible and is graduated and numbered so as to show the measure in both positions. This gauge is held as in a vice by means of a compression screw. The front gauge is held with the customary thumb-screw.

Hercules Steel-Rule Cutter

This machine is made especially to cut steel cutting, creasing and scoring rule, and is the most powerful cutter ever built. It will cut 6 point tempered steel rule and heavy brass rule and slugs like cheese, and leave no burr edge. It is especially adapted for the use of paper-box makers, label printers, paper novelty manufacturers, and all who cut tempered steel-rule or heavy brass rule and slugs. The

knives are extra hard and seldom require sharpening. They are set into a slot which exactly fits them so that no adjustment is necessary. Can be taken off and put on quickly. The front gauge will allow a cut of 6½ inches, and the back gauge, which is twenty-five inches in length is graduated to Picas and half-Picas.

Patent Upright Miter Machine

A strong, well-built, accurate machine. The cutting or shaving head has a positive up-and-down motion, and must cut as much at the bottom as at the top, as it cannot slip. The knife is regulated by set-screw. The sliding gauge is the best of its kind, enabling the operator to feed the rule up to the knife, but affords a positive check at the point where the desired length is reached. The bed is graduated, and is made movable, so that the whole cutting-edge of knife can be used. This machine is mounted in a strong, shallow, wooden box, which catches the shavings, and has at the front end an emery board on which the burr of the rules may be rubbed off.

Improved Horton Mailer

Has no equal says the Ladies Home Journal

The American Type Founders Company has had the general agency for the Horton Mailers during nearly ten years, and in that time almost two thousand machines have been sold. Some of the largest publishing houses in the country—like the Curtis Publishing Company of Philadelphia—after testing all the leading mailing machines on the market, are now using the Horton Mailers exclusively, as they have been found to do the best and most rapid work. The Horton Mailers have been improved until they are as perfectly constructed and durable as it is possible to make them.

Figures are automatically advanced consecutively 1 to 99999. Quickly taken apart for cleansing without removing any screws. Figures are cut on steel wheels. Only the size and style of figures shown under cut are carried in stock, others being made to order at an extra charge. Price of Model 27, each \$14 00

Serial Numbering.—Letters engraved upon extra plungers or steel slides may precede the figures, instead of the prefix "No." Letter wheels are also furnished.

Model No. 28 for General Job Work

Model No. 28 is the same in every respect as Model No. 27, except that it is made with six instead of five wheels. Capacity, 1 to 999999. Price of Model 28, each \$18 00

Models Nos. 27 and 28, are carried in stock at all selling houses for immediate delivery.

Numbering Backward—All models are made to number backward (to avoid turning the sheets or reversing them afterward) without extra charge, but they must be specially made to order.

Special Work—Machines will be made to repeat any number of times and then advance automatically, or to skip as many numbers as required at each impression. Special numbering mechanism for rotary printing machines of any size or speed. Quotations upon request.

Model No. 29 for Numbering Cash Sale Books

Same construction as Model No. 27 but designed to number consecutively from 1 to 50 or from 1 to 100, and upon reaching the limit of its capacity, it automatically changes to 1 and repeats, without re-setting. "0" is usually made to represent 100, thus requiring but two wheels—a serviceable construction which is recommended. Same machines for numbering backward if desired. The most durable machine for this purpose ever produced. Size, 2 Wheels, 1⅞ × ⅞ inches; 3 Wheels, 1⅝ × ⅞ inches.

Model No. 29 is also made with figures of Models No. 27 and No. 32 without extra charge. Size, 1½ × ⅞ inches.

No. 29

FAC SIMILE IMPRESSION

Model No. 31 for Numbering Baggage Checks, Cotton Tags, Lottery Tickets, Pawn Tickets, etc.

An automatic machine made with any size figures from one quarter inch to one inch in height. The design and construction is the same as Model No. 27. All of these machines are more than type-high, but are used with entire success on ordinary printing presses by mortising the bed or re-adjusting the platen. In mortising the bed (which need not weaken the press in any way) the machinist fits an iron block which is inserted and the mortise closed, when it is desired to use the press for regular work. The numbering is far superior to that of any hand or paging machine, and by working several machines to a form the cost is reduced to a minimum or entirely eliminated. Size of machine with 6 wheels, ¾ inch figures, 3 inches long, 2 inches wide, 1¾ inches high.

Prices quoted on application.

FAC SIMILE IMPRESSION

A type-high dating machine designed to be locked in a form. Steel wheels are engraved with dates for twenty years, and set by hand as required, without unlocking the form. Size $1\frac{1}{4} \times 1\frac{1}{8}$ inch. Price of Model 33, each \$10 00

Model No. 39 for Ticket Printing and Special Job Work

Designed for strip tickets where the numbering is placed upon the end of the ticket running cross wise. Made with five, six or more wheels. Plunger can be placed above or below the figures as required. Prices quoted upon application.

Model Nos. 40 and 41 for Special Job Work

Designed for such work as may require special large figures. Frequently used for cash sales books, baggage checks and tickets of all kinds. The figures in this Model are as high as can be made in a type-high machine, but more extended figures can be had if desired. The figures shown in the illustration are stock machines.

FAC SIMILE IMPRESSION

Model No. 51, a Numbering Machine for Special Work

View, showing a section of a frame with a plunger and two numbering heads

Adapted for numbering bond coupons, tickets, trading stamps and similar forms of work where there is no room for plungers. Works on job or cylinder presses. No special attachments of any kind. Quickly adjustable in any part of the frame without removing it from the chase. If required, frames can be so constructed that the machines can be taken out of the frames without unlocking the chase. Frames are operated by plungers at each end.

Frames made any length, from 6 to 24 inches, operating from 1 to 20 numbering heads. Numbering heads made with any number of wheels and with any style of figures desired. Prices upon application.

Models No. 45 and No. 46, Typographic Perforating Machines

How it is Used—Designed to be locked in the form separately, when there is no printing or numbering to be done, or imposed together with typographic numbering machines and entirely surrounded with type matter.

No Tympan Attachments—No attachments of any kind are necessary on the tympan, and the strength of the tympan remains practically unimpaired.

Bates Typographic Perforating Machines

The Construction—The driving head—Model No. 46—consists of a metal block, (70 × 92 points) in which the plunger and a powerful main spring are mounted. The case containing the perforating blade—Model No. 45—(18 points) is easily assembled to the driver. The blades are made in uniform lengths of two and three inches and all of them in line are interlocked and operated by one driving head which may be so located in the form that the plunger driving the mechanism strikes the tympan beyond the margin of the stock to be perforated.

The Operation—This plunger, when at rest, is above "type-high" and as the impression is made, its depression raises the perforating blade or blades to a position in which the cutters are slightly more than "type-high."

Tool-Steel Cutters—The cutters are made of tool-steel, carefully hardened and tempered, and every part of the machine is made upon the interchangeable system.

Scoring—Creasing or scoring blades may be quickly substituted for perforating blades and used in the same cases with the same driving head.

Any Press—It may be successfully operated upon either platen or cylinder presses, but upon the latter it is designed to perforate in line or parallel with the cylinder only.

Model No. 50 with Indicator

Price \$15 00

A Departure—This Model embodies the highest achievements in the art of Numbering Machine construction.

Every Part of Steel—All metal parts are made of steel, including the wheels contributing rigidity and strength with minimum weight.

Blue Steel Frame—The frame is most substantial, being made of drawn steel ¼-inch thick and is beautifully finished and blued.

Self-Inking—The figures are automatically inked before each impression, from a thick felt pad. The pad holder may be instantly removed from the machine for re-inking.

Gauge—An accurate steel gauge plate assures printing precisely upon a line.

No. 13 "Force" Typo Numberer

The mechanism of the No. 13 "Force" Typo Numberer enables the machine to be made in the most compact form for size of figure and number of wheels, having a single bearing self-locking plunger, avoiding friction and spring pressure on rotation of wheels.

The plunger is made of solid pieces of steel with direct action to operate numbering wheels, which takes the place of the complicated movable plates that contain the serial letter or number. The single bearing plungers are interchangeable (Fig. 2) and supplied with No. or any character engraved or blank if required.

The new No. 13 will work in conjunction with any Typograph Numbering Machine now in use and

can be made to a minimum size of 1¼ x ¾ inches. Any size of figure and capacity for numbering can be supplied.

Model 125—5 Wheel, List Price . \$14 00

The Low Plunger is one of the improvements of the New Model Wetter and permits of working this machine on any make of cylinder or job press, also allows the rollers to ink all figures perfectly; a positive advantage, especially during cold weather when rollers are hard.

Removal "No." Slide—The prefix "No." on all Wetter Machines can be removed and another letter for serially numbering, or any character inserted in its place without removing the machine from the press. This can be done in a moment and is a positive advantage over other machines.

Plunger Can Be Locked so that any number can be printed any number of times and this can be done without removing machine from press. This is a distinctive feature of the Wetter.

All Wetter machines are equipped with an italic "No." to precede figures. Also a blank slide to be used when only the figures are desired to print. We will furnish without extra charge a gothic or Roman "No." slide in place of the italic, if mentioned when ordering.

Superior Construction

All Wetter machines have large non-breaking plunger springs; are made of the best materials and all working parts are hardened and tempered and every machine guaranteed. All parts interchangeable.

The Steel Figure Wheels

On Wetter machines are finished flat on the face; figures are cut deep and true to size.

All our Houses carry in stock Models 125 and 126

Any Wetter Machine can be made on special order, with the plunger on the reverse end or at any distance from the figures desired, for any special work. Or any style machine can be made to number backward or figures cut reverse for numbering on tissue paper; skipping wheels can be furnished to skip any number from 1 to 10, and other special combinations for numbering checks, bonds, coupons, baggage checks, etc., where there are more than one on a page. We issue a special circular giving full particulars. Wetter Machines can also be made to print one number any number of times, and then automatically advance to the next higher number.

Genesee Slitter for Cylinder Presses

The Genesee cuts while sheet is held by grippers. Knife and slot in band are beveled to fit exact. Will not throw sheet out of register. Can be adjusted to cut on any part of form. Does not interfere with running of press. When not in use, knife can be thrown back out of way instantly. Will not shear off at ends, but makes a clean true cut. Can be attached to any cylinder press. Full instructions sent with each Slitter.

The Slitting Band is made of specially tempered steel of the best quality obtainable.

The Springs are double re-enforced so as to amply provide for keeping the tension exact.

The Special Spring Knuckle Joint which we use to hold the knife keeps a uniform pressure at all times on the cutting edge.

The Gauge being part of the knuckle joint, is absolutely rigid at all times and adjusts the band to a hairs breadth in perfect alignment. It also, when necessary, will cut the blanket if decided to sink the band for very fine work.

The Solid Steel Bar supporting cutter is made of the best machine steel and will stand any strain. Wing nuts at each end of bar—compact, easily adjusted and removed.

Extra care has been taken in the tempering of the knives to give them a hard, sharp cutting edge that is durable and will last longer than others designed for a like purpose.

No bulky, cumbersome piece of machinery but a clean, compact up-to-date machine that does perfect work and a valuable addition to any press.

Rouse Job Stick

The Rouse Job Stick is a mechanically perfect Composing Stick for quick adjustment to Picas or Nonpareils. It has several novel features, the most important perhaps, being the method of adjustment.

This is accomplished by means of a series of regular holes (a full Pica from center to center) in the rear wall of the stick, with a steel rack mounted in the knee to engage them. By turning a small lever located under the clamp, a half revolution, the rack is moved exactly six points and automatically locked in position, thereby effect-

ing the change from Picas to Nonpareils. The knee which is extremely rigid, is held in place by an improved clamp that extends clear into the corner where most needed. The Stick is graduated to Picas and numbered every five ems. The measures are correct, and owing to our perfect methods of manufacture the perforations are absolutely uniform, the only possible variation being in the knee. As every one of these is fitted to a hardened steel standard of known accuracy, this difference is scarcely perceptible.

Spring Tongue Gauge Pin

This is the most satisfactory pin made. It meets almost every requirement of the pressman.

Flexible Side Gauge Pin

Flexible Side Gauge Pin

May be placed directly under the gripper where it comes down upon the tympan. The sheets are fed to the curved spring arm. The pin is made of fine thin steel, and having teeth, is adjustable and prevents the sheets slipping under.

Extension Feed Guides

The cut shows the method of securing the guides between platen and platen bail, so that sheets may be fed below the lower edge of the platen.

Perfect Register Gauge Pin

Pastes on like a quad, has a thin steel clip which strikes into tympan and prevents sheets from slipping under gauges, and is adjustable after pasting on.

Screw Adjusting Gauge Pin

The prong should be inserted a quarter inch below the feeding line and forced snugly home. The base may be secured to the tympan with paste or glue if desired. The adjustment is got by means of the screw and nut with absolute precision and without weakening the hold of the pin to tympan.

Cylinder Side Guide

The bendable brass tongue is adjustable in every direction.

Secured to feed-board by the sharp point shown in outline in cut, which is placed at the side of pillar, so that hair adjustments may be got by simply turning the pillar to the desired position.

Acme Plate Cleaning Brush

Acme Plate Cleaning Brush No. 3

This is the only brush that will thoroughly clean a half-tone plate. They are made of fine spun specially prepared metal and are designed for cleaning halftones and can also be safely used for cleaning electrotypes and stereotypes.

When a process plate reaches the printer it is generally filled with the refuse of previous washings and these it is impossible to remove with the ordinary bristle brush. A single brush will do very satisfactory work, but the best results are gained by use of two brushes, one to use in cleaning the cut with benzene and the other to use on the cut dry.

The No. 1 Brush is 3/4 of an inch wide by 5 1/2 inches long. The No. 3 Brush is 2 1/2 inches wide by 4 1/4 inches long.

Directions for Use—Use the first Brush exactly as you would a bristle brush. When cleaning a half-tone plate rub the Brush the way the screen runs. In cleaning a plate of any kind pour the benzene over the plate. If cleaning a dry form pour the benzene on the brush in the usual way. After the cut has become thoroughly dry use the second brush, being careful to brush the cut in the same direction as the screen.

Dillingham Press Punch

Is secured to the tympan of platen presses in same manner as a feed guide and punches clean hole in card or paper simultaneously with the printing on jobs which have a margin of one inch or more. The method of working this punch is clearly shown in accompanying halftone. The slightly curved

spring is placed under the upper tympan sheet and the sheet to be punched is fed over this curved spring and under the punch with no more trouble than in feeding to gauge pins. The punch is secured to the tympan by paste or glue or (better still) by a mixture of paste and glue. Two or more punches can be used on one sheet. Punching and printing can be done simultaneously on a variety of work, such as window cards, programmes, orders of dance, souvenirs, etc. Made with three size holes, Nos. 1, 2 and 3, as per diagram. No. 3 will be sent unless otherwise ordered.

Bullock Ejector Press Punch

One or more may be locked in a type form and will cut a clean, round hole $\frac{1}{8}$, $\frac{3}{16}$ or $\frac{1}{4}$ inch in paper or card stock at the same time the job is printed. This punch will not clog as each piece cut is automatically thrown out by the ejector as soon as the impression is released and falls on the floor. The ejector also protects the rollers from any danger of injury from the cutter.

Wesel Patent High Steel Quoin

The design of this Quoin is such as to effectually overcome all tendency to rise or loosen in the form even on the longest runs. It is made of steel, $\frac{11}{16}$ -inch high and is rabbeted along the bottom. The effect of this rabbet is to release the pressure at the foot and to grip the matter firmly and evenly at the top. Will be found of exceptional value on work where a permanent lock-up is absolutely imperative.

Wesel Patent High Steel Quoins are made $\frac{11}{16}$ -inch high. The No. 1 is 4 inches long, is $\frac{3}{4}$ -inch wide when closed, and 1 inch wide when spread. The No. 2 Quoin is 3 inches long, $\frac{3}{4}$ -inch wide when closed, and $\frac{3}{4}$ -inch wide when open. Ordinary Hempel Keys fit the two sizes. Midget Safety Quoin

Fig. 3 Shows Midget Quoin unlocked

Fig. 2 This cut shows extreme expansion of six points when locked

Midget Quoins are made of hard brass.

Midget Quoins give a safe lock-up in a width of 18 points.

Midget Quoins are useful for locking a form within a form.

It is locked by a tap of a mallet and occupies no more space in length when locked than when unlocked.

Can be used in a space 18 points wide by 120 points long, either outside or inside a form. It is absolutely safe, as when locked it rests against its corresponding flat surfaces, and the harder the surface it bears against the better.

This invaluable Quoin may be used to lock up matter inside a brass circle, or oval, or within a solid border, or in places where no other quoin of wood or metal can be used.

The corners are dovetailed together by our patented method. It is impossible to force them apart without breaking the heavy brass side. The sides are solidly riveted to the bottoms; and the bottoms, which are of standard thickness, are of specially drawn brass. Wesel Galley Bottoms are made absolutely accurate and flat. The sides and back are grooved to give a firm hold for the fingers and hands in lifting.

Clark Patent All-Brass Dumping Galley

For newspaper work. Saves labor of emptying tabular matter, advertisements with borders or set in a number of irregular measures, and prevents all danger of pieing. Has a flexible, tapering end, exact width of the column. The matter is secured for proving by our Patent Foot Clamp; the flexible end is inserted between the column rules, the sides resting on the column rules, and the matter shoved off safely. Made any width desired, from one column to full width of page.

Columns Width	12 inches long		21 inches long

4	7 50	6 25	8 75	7 50
5	8 50	7 25	9 75	8 50

For each additional column in width add \$1 00 to price list. A 12-inch galley takes 8-inch matter; 21-inch, 17-inch matter. Price for galleys 25 inches long, taking 21-inch matter, add \$1 00 to prices of 21-inch galleys. In ordering give width of column and column rules, and state whether galley is wanted with or without scale, which, unless otherwise ordered, is made 14 agate lines to the inch.

Patent All-Brass Linotype Galley

This new Patent Galley is made solely for linotypes, and is the only Galley for holding linotype slugs without any side lock-up. A foot clamp is attached to each galley to hold up the matter in taking proofs. This galley will save all the trouble and the loss of time in handling side sticks, getting quoins to fit, or foot slugs to keep the end line from falling over. One side of the galley is made lower, and the inside of the rims so tapered as to allow inserting and taking out the linotype slugs from the sides very readily. The galley being only one-half of an inch wider than the matter, is conveniently handled and can be placed on the stone, rack or case without taking up valuable space. On a crowded composing table, in the rush of making up the saving of space is of great importance.

Lincoln All-Brass Galleys

Shows the Galley locked at end and side

A good Galley for newspaper work. **Made to order** to hold any regular widths of matter in regular use in an office. The upper side or rim of Galley is strongly hinged to the bottom. This hinged side is dropped when emptying on Galley and when matter is ready for locking-up the side is raised and is held by a spring catch at head of Galley and by the end clamp which locks the sides and end at the same operation. The catch is loosened by turning lever to the right. These Galleys are about one inch wider than the width of column they are made to take.

Challenge Riveted Zinc Galleys

Designed for general use—particularly for storage purposes where it is desirable to keep the forms on the Galleys while taking proofs and correcting. The corners are square where the sides attach to the bottom, thus insuring perfect proofs of type forms. The material used is Compressed Plate Zinc, especially made for this purpose. The sides of Challenge Riveted Zinc Galleys are formed in the shape known as "channel," thus making the galleys stiff, rigid and true, also making them very easy to lift from the stone when filled with type. Challenge Patent Galley Stop

A simple device that will efficiently do what it is intended for. It is a narrow strip of steel curved so that it can be compressed on the same principle as a spiral coil spring, the ends are held against the side of the galley while the type or linotype very firmly and securely wherever placed. The illustration shows the way it is used. It is pronounced a great convenience to linotype men, printers and make-up men. For galleys up to double column in width.

Patent Linotype Brush Machine

For removing burs from linotype slugs. A very necessary machine in offices that do first class linotype work, and in all cases where matrices or electrotype moulds are taken of the linotype slugs. The table for holding the galleys is pivoted on the pedestal and is moveable so that the brush can be made to pass over the slugs at any angle. There is a shield receiver to catch the burs as they are detached by the brush which prevents them from scattering. Two brushes are furnished, one 4-inch and one 7-inch; also a set of fast and loose pulleys. The speed of the brush and pulley should be 300 revolutions per minute.

Price with one 4-inch and one 7-inch brush, and set of pulleys on machine \$75 00

Ingot Casting Apparatus

This Ingot Casting Apparatus should be in every linotype office. By its aid the reduction of scrap metal into ingots is obtained in the shortest possible time and at the least expense. The top part of the frame which holds the pans or moulds is cast in one piece and is firmly bolted to heavy iron uprights. Each mould contains two pans, one on each side, and the moulds are made to work in unison by means of gears.

Style C is made up of two of these double pans. There is a space between the pans to allow the free circulation of air and to assist cooling the pans and contents. Its capacity is 48 ingots.

The water cooling attachment is made up of two special pairs of moulds having water chambers between the pans, the inlet being through the shafts at the crank ends of the moulds and the outlet at the gear ends. The style C Apparatus with water cooling attachment will permit the casting of ingots as fast as the ordinary workman can pour the metal with a hand ladle.

Style B is the same as style C excepting that its capacity is double, there being provision for casting 96 ingots.

The water cooling attachment on this style is made in such a manner as to permit the use of each pair of moulds separately, the machine having two separate connections for the inlet and outlet of water.

The single pan mould has compartments for casting 12 ingots at a time, and was designed for use in offices having but one linotype machine.

Linotype Furnaces

These Furnaces are made of sheet steel, are lined with asbestos, have extra heavy iron pots and the frames are perforated top and bottom to create a draft and admit air to the burner. It is designed in such a manner as to secure even heat over its entire surface, and in connection with the air mixer to guarantee the most perfect combustion. The design of this burner has reduced the consumption of gas materially below that consumed by the old style furnace using from four to eleven individual burners.

Each furnace has a cover, a pipe connecting the pot with the main flue to carry off all flumes from the metal, and a length of flue pipe in which there is a damper.

Make-Up Tables

These are made in three different styles. The Regular Hard Wood Table designed for use in smaller offices, where not subjected to a heavy strain and rough usage.

The Extra Heavy Hardwood Table—very strongly made of the best seasoned hard wood. The sides and ends are strongly bolted to the legs at the top and at the shelf near the bottom. Put together so that it effectually resists the strain occasioned by the rough usage usually accorded it in going to and from the stereotyping room.

They are mounted on double revolving casters. The wheels are set into a revolving bearing which works on a swivel having a roller bearing against the stationary part on the end of the leg. This allows the table to be easily moved in any direction desirable, and adds much to the life of the structure.

All-Iron Make-Up Tables—these are practically indestructible. The frame is made throughout of heavy wrought-iron piping accurately fitted. It is adequately braced both at the top and bottom of all four sides. The top is bolted directly to the iron frame, which also increases its strength. The shelf is made of sheet iron and is firmly clamped to the lower braces.

The table is set on patent double revolving casters of the same description as those used on the extra heavy hard wood frame tables.

Brass-covered tops consist of a sheet of brass about 10 points in thickness, screwed to the regular iron top.

Beating Tables

The frames of these Tables are made of heavy hardwood, the rails being let into the posts and firmly glued and bolted. The elevating top rests upon two machine cut racks, each rack fitting into a heavy cast iron slide which keeps it in a perfectly perpendicular position. Two cut pinions actuate the slide, which in turn being operated by means of a worm gear and being mounted on a heavy steel shaft set into boxes, which are part of the slides which hold the racks. The worm gear is driven by a crank, which takes very slight effort to raise or lower the top. The iron top is finished perfectly flat and true and is free from all imperfections. When the top is at its lowest position it is 33¼ inches from the floor, and when at its maximum height it is 44½ inches from the floor. The table is mounted upon extra heavy double revolving casters, which makes it easy to handle. It is the best and strongest Beating Table it is possible to make.

Mahogany and Iron Patent Stereotype Blocks

To ascertain price of block of any style, add together the length and width measurements, then find the nearest "measurement" in second column of price list, and the price of the style and size of the block required will be found in the same line as the corresponding "measurement" printed in second column, the price of such block will be the price in the next lower measurement.

In sending orders, give the size of block outside, and also the sizes of the largest and smallest plates to be used on the block, always measuring the back of the plate. Unless otherwise stated we assume that all plate measurements given are of the back of plate.

Mahogany and Iron Patent Stereotype Blocks

Important—Read Before Ordering

New, Old and Boston Style—When made regularly, these blocks are 5/8-inch larger each way than size of back of plate, or 3/4-inch larger each way than size of printed matter. The hook, ratchet gutter and clasp brass occupy a space of 9-16 inch, including necessary allowance for taking plate on or off freely, and the two bevells on plate are 3-16 inch wide, or 3/4-inch in all. The block will take on a plate 3/4-inch smaller each way than the largest plate, back dimensions, when the slot in which hook moves is 1 inch, and the smallest plate the block will take is 1 1/4 inches smaller than size of block over all.

Blocks for Narrow Margins—There are instances where it is impossible to get the desired margins on regularly made blocks. In such instances we can reduce the widths of hooks, ratchets and gutters, or increase the variation between largest and smallest plates by lengthening the slots in which hooks move, as conditions allow. Whenever margins are apparently too scant, our long experience will usually enable us to overcome the difficulty. In some cases we make a small special charge for such special work. When the slot in which hook moves is made longer than 1 inch on new style blocks it requires longer pinions and 2 1/2 cents per hook is added to the list price of each 3/4-inch longer than 1 inch.

Patent Ruled Blocks—The largest plate taken on is 1 inch smaller each way (back dimensions) than outside measurements of block, and the smallest plate (back dimensions) is 2 1/2 inches smaller than outside measurement of block when the slot in which hook moves is 1 inch long. For each additional hook add 50 cents to list price, and for each hook less deduct 25 cents. For each additional 1/4-inch added to slot add 2 1/2 cents to list price. All blocks are made 3/4-inch thick unless otherwise ordered.

For each extra hook and pinion add 50 cents to list, and for each hook less deduct 25 cents from list.

Rule Blocks—Prices for blocks with brass rule borders will be quoted on application.

For price of blocks with head brass but no end hooks add to list price of blocks without end hooks as follows: 8 to 16 1/2-inch "measurement" 10 cents, 17 to 27-inch "measurement" 15 cents, 27 1/2 to 38 1/2-inch "measurement," 20 cents.

Steel Pinions 15 cents each. **Hooks** 10 cents each.

Challenge Sectional Blocks

The Expansion System of Printers Blocks

This is a perfectly co-ordinated system of mounts for printing from standard electrotype plates of any size.

The system consists of Register Hooks, each one of the various kinds being designed for a specific purpose, with forms made up of Sectional Bases, either of metal, cast iron or steel, made .759 of an inch high, micro-ground, made on the Point System in regular Pica sizes. In these forms the Register Hooks are placed in any desired position. The height of these bases, with the thickness of the standard electrotype plate .152 of an inch make a perfect printing surface, substantially type high. The Bases are absolutely rigid and accurate and the Register Hooks enable the printer to remove plates quickly for change or make-ready, register them accurately in color work or other fine printing and overcome the mushiness so common in heavy plates mounted on wood.

For color work these blocks are indispensable. The Register Hooks are placed on all sides of the plates; by the use of the key the clutch on one side is released and the one opposite is tightened, the plate being easily moved the smallest fraction of an inch. Each plate can thus be registered independent and with ease.

For book work the Register Hooks are placed on two sides of the plate, front and bottom of page usually, and brass catches opposite them, the Register Hooks being used to fasten and release the plates and the catches to keep them in the same position as one form follows another.

The Challenge System was among the first, if not the very first, that was made for the register of the three color plates and has stood the test for twenty years use. The narrow margin Register Hooks of this System are founded on basic patents.

All Register Hooks are 6×6 ems Pica in size except the Pony Narrow Margin which is 6×7 ems Pica, and being a Ratchet Hook requires a gutter. They are made from one piece of solid brass, the screw, clutch and all other parts are made of tempered steel. They have special openings for cleaning and are finely made and strictly first-class in construction.

The following detailed descriptions and illustrations will give a clear idea of the wide range of this System and enables the printer to select an equipment that will meet his wants. Point System throughout.

Challenge Steel Sectional Blocks

The Challenge Steel Sections may be considered as the basis of this System; they are very light and rigid, micro-ground and full forms of these for large presses can be easily handled. They are made in three sizes, 2×6, 2×8 and 8×8 ems Pica and lined to Pica ems.

Challenge Cast Iron Sectional Blocks

These Blocks are made in fifteen sizes from 4×6 to 16×32 ems Pica, Pica lined. They are micro-ground, will not dent, are light, rigid and accurate and with care will last a life time.

Challenge Metal Sectional Blocks

These are made of hard metal and are an accurate and reliable Block for a small amount of money. They are somewhat heavier than the steel and cast iron. With proper care will prove an entirely satisfactory equipment.

Pony Narrow Margin Hook

This Hook is especially designed for book printing. It is operated with a ratchet and therefore very rapid. A gutter is necessary where this is used. The size of this Hook is 6×7 ems Pica.

Challenge Sectional Blocks

Little Giant Register Hook

In this Hook the screw head is stationary and the clutch moves the full run of the slot. This is a very simple, strong, accurate and durable Hook. It is actuated by a key and is capable of making the most accurate register.

The Quickest Register Hook

Is made on the same principles as the Little Giant, but is much more rapid in its action, one movement of the key entirely releasing the plate. This is very generally used as a companion Hook for book work where the System is partly used in color work and partly on book work.

The Eureka Register Hook

This is the original Hook in which the operating mechanism follows the clutch and the principle is fully protected by patents. The Eureka allows plates to be brought within one-fourth of an inch of each other, and one plate can be made to follow the other without interfering with the operating mechanism. It is the standard Hook for color printers.

The Eureka Swivel Register Hook

This is the Eureka Hook placed in 8x8 solid steel base and is used for registering irregular plates as it can be moved at any angle desired.

The Kyle Register Hook

This Hook is made on the same general principle as the Eureka, but the clutch is at the side of the moving mechanism and therefore plates can be brought together with only the thickness of the clutch between them, one-sixth of an inch. It is the Hook allowing the closest margins of any Hook made.

This cut shows the way all Challenge Register Hooks are open at bottom. This leaves a space entirely through the hook. Steam or hot water can be forced through this opening and the hook thoroughly cleaned without dismantling. Saves a great deal of time and the Hook will last much longer when properly taken care of.

To get an approximate price for complete equipment for register and book work, multiply the number of square inches in the form by .11 for Steel or Cast Iron Sectional Blocks, and by .05 for Metal Sectional Blocks and add the cost of Hooks and Catches. For example: For form 25x30 inches for mounting 16 pages use Steel Sectional Blocks for register work.

Warnock Sectional Register Blocks

The needs of plate (electrotype) printing and halftone and three-color work have led to the devising of many forms of patent base. These may be divided into three general classes: the wooden page block for letterpress edition printing, the sectional block of metal or iron to be assembled into pages or forms and the iron base covering the bed of the press. The last two meet the impression requirements of heavy forms of halftones and the special register needs of three-color work.

A recent invention offers much to the printer who uses patent base and is interested in the economical production of his work. It is the Warnock Sectional Register Block and an investigation of its workings

Fig. 1—Top view of Block

Fig. 2—Inverted Block

show how many advantages are to be gained by its use. Although the block only is referred to in the title, the hook and other devices for holding the plate in position are from the labor-saving point of view perhaps the more important part of the invention.

Fig. 1—Push hook 8 ems long

Fig. 4—Pull hook 8 ems long

Number of Blocks Required to Make 32 Pages of the Following Sizes

384 Units 8 × 8 ems make 32 pages 4 × 5¼ outside measurement
480 Units 8 × 8 ems make 32 pages 4 × 6¾ outside measurement
768 Units 8 × 8 ems make 32 pages 5¼ × 8 outside measurement
896 Units 8 × 8 ems make 32 pages 5¼ × 9¼ outside measurement
1280 Units 8 × 8 ems make 32 pages 6¾ × 10¾ outside measurement

All these pages may be equipped with register hooks on all four sides or with a solid brass catch. In ordering state clearly whether you wish to make-up pages or fill

the bed of press, and if in pages state whether brasses or pull-hooks are to be used. If plate brasses are to be used 96 will be required and only 96 push-hooks are necessary.

Challenge Metal Tie-Up Slugs are grooved on one side so they can be placed around the type pages when being locked up **without removing the string**. This will save many a page from being pried when it is needed. It will save all the time usually consumed in removing the string and consequently will save the time required for putting string around the form when it is again taken from the chase.

Quarto Chase, per pair	12 00	Wrought Iron Job Press Chase	5 00

Dimensions of Material in Chases

Unless otherwise stated in this list or ordered by customers all Chases will be made of steel ¼ inch thick and of the following widths:

Chases, the Length and Breadth of which Measure	Chase with Bars	Chase without Bars
40 inches and smaller	1 inch	1½ inch
41 to 60 inches inclusive	1½ inch	1¾ inch
61 to 80 inches inclusive	1¾ inch	1¾ inch
81 to 100 inches inclusive	1¾ inch	1¾ inch
101 inches and larger	1¾ inch	1¾ inch

The measures given represent the combined length and breadth of the Chase as printed in Length and Breadth columns in price list

Charges for Extra Material

When material is required thicker or wider than regular add to list prices as follows

For each ⅛ inch Wider	For ¼ inch thick steel
40 inches and smaller	\$0 20
41 to 60 inches inclusive	0 30
61 to 80 inches inclusive	0 45

Chases

The sizes given in this Revised Price List are based on the bed measurements of all the cylinder presses made in the United States—a size for each press.

The prices quoted are based on a system introduced several years ago and by using it as explained below, our customers can ascertain the list price of any size or style of Chase required.

Important—In ordering, be careful to send the correct measurements as all Chases are made to order including those listed and cannot be returned. In ordering, state (1) kind of Chase required; (2) inside dimensions of each Chase; (3) outside dimensions of each Chase—or in case of twin Chases, the pair taken together; (4) if twin Chases give width of backs; (5) width of cross-bars (if any)

Chases

To find List Price of Chases not listed add together the outside width and length of Chase and multiply by following factors:

For Skeleton Chase 11 For Twin with Bars or Quarto Chase 22
 For Twin or Folio Chase 19 For Quadruple Chase 28

For News Chase add \$2.00 to list price of Skeleton Chase. For Book or Shifting Bar Chase add \$6.00 to list price of Skeleton Chase. For Book Chase with one bar shifting add \$5.00 to price of Skeleton Chase. For Book Chase with both bars stationary add \$4.00 to price of Skeleton Chase. For extra Bar and pair Dovetails add \$2.00; for Bar only add \$1.00; for pair Dovetails add \$1.00 to the list.

For convenience, measurements ending in fractions will be figured as next full figure. For example: 17 × 20¼ = 37¼ inches, figure 38 inches; 33½ × 45¾ = 79¼ inches; figure 80 inches.

Electric Welded Stereotype Chase

Exactly type high and perfectly square and true. The strongest Stereotype Chase made. Used by a majority of the Metropolitan Daily Newspapers in the United States.

This Chase is welded by electricity which fuses the bars into one piece by the aid of mechanical pressure beginning from the center of the bar and working outwards. In contradistinction to this is the old method of hand forging in which the bars are externally heated and hammered together, allowing flaws in the weld to pass unnoticed. On account of the perfect weld and the accuracy with which the exact degree of heat can be determined, the corners of an Electric Welded Chase are its strongest parts.

Side Wedges, Foot Pieces and Lock-up Screws furnished with each Chase. The end lock-up screw draws back the side wedge.

When ordering, give exact size of type matter over all, width of columns and of column rules.

Stereotype Chase for 6 columns **\$35 00**
 Stereotype Chase for 7 columns **37 00**
 Stereotype Chase for 8 columns **40 00**

Electric Welded Chases with Step Lock

Designed for use on forms where the most accurate register is required. The pressure exerted is uniform and positively square, forms which have been brought into register can be unlocked and relocked without any deviation in register. The lock-up is placed on the inside of the chase and occupies a space of 2 inches on two sides and has a lateral spread of $\frac{1}{8}$ of an inch. Electric Welded Chases with step lock are made to order only. Prices quoted upon receipt of information giving exact size over all of the matter, maximum carrying capacity of the press for which the chase is designed; whether the Chase is to be made of wrought iron or bright steel. Chases for Other Job Presses

Chases for job presses not shown in this catalogue, can only be obtained by sending to the factory. Always send name of press and manufacturer's number and specify whether Chase is to be sent direct from the factory by express or freight. We can make new Chases using old ones as a pattern at an advance over the Chandler & Price Gordon Chases.

McGreal Combination Printer's Chase

Patented

Composed of four pieces with female beveled dovetails on one end and male beveled dovetails on the other end of each piece and when fitted together is rigid and firm. They are made from the finest grade of cold-drawn steel, one and one-half inches wide by five-eighths of an inch thick, all parts interchangeable, accurately fitted at the joints, absolutely square and can be put together and taken apart in a few seconds without hammering or pounding. They will resist one-third more pressure without "giving" than the old wrought-iron chase. The lengths of pieces vary every two inches.

The Combination Printer's Chase can always make the chase a proper size for the form, giving a perfect lock-up in the minimum of time and avoiding the working up invariably caused by a "springy" form.

Useful Information for Printers

How to Estimate

To ascertain the quantity of body type required for a publication, find the number of square inches and divide the same by four, and the quotient will be the approximate weight of type required; but, as it is impossible to set the cases entirely clear, it is necessary to add 25 per cent to the weight of large fonts and 33 1/3 per cent to small fonts, to allow for dead letter.

How to Order Sorts

In ordering sorts always inclose a metal cap H and lower case m of the type you wish to match and plainly state the quantity of each character required. Be sure and inclose sample before sealing envelope inclosing order. Better put sample in a small envelope. Order every article by the exact name and number given in the specimen book. Variations from the book names frequently cause error and delay. **Do not mutilate** a specimen book. It does not help us to receive printed specimens taken from our specimen books. In ordering, write each item on a separate line. Orders written in long paragraphs invite error. Separate the order from the accompanying letter. It will save time.

Type Standards

The following is the standard adopted by the International Typographical Union. The basis of measurement is the lower-case alphabet, from a to z inclusive, and the ems used are the same body as the type measured:

Useful in Ordering Sorts

In ordering sorts **always** send a cap **H** and lower case **m** of the font you wish to match. These letters should be sent, no matter what the characters are that you wish to purchase. The following table shows what each box in the type case will hold:

To Print Consecutive Numbers

Orders to print consecutive numbers are received more or less frequently by every printing office, large or small. In the average office, to print the numbers 1 to 200 consecutively would be quite a task, and when undertaken in the ordinary way with the facilities usually at hand, the cost is so high that the customer usually concludes to get along with something else than printed numbers, and what might be a profitable job is lost to the office.

Suppose an order for two hundred reserved seat numbers from 1 to 200, six copies of each. It is not necessary to set up more than the units 1 to 0. These figures are to be set up, properly spaced, one above the other, as shown in column A of the table annexed.

One hundred and twenty impressions are taken on strips of cardboard cut to the required width. This done, gives the required number of units. Change the gauge pins in a manner to print the same form beside the printed figures to form the tens, as shown in column B of the table. Take twelve impressions of this form on twelve of the already printed strips. The next step is to change the form by taking the top figure (1) and place it at the bottom of the column, so the next impression

0	00	10	20	30	40	50	60	70	80	90

on a strip of the first form will read as shown in column C of the table. We print again twelve strips of the first form. This change of the top figures, 2, 3, 4, 5, 6, 7, 8, 9 and 0, respectively, is repeated eight more times, shown in the table as columns D, E, F, G, H, I, K and L. From each change twelve impressions on the printed slips containing the first form must be made. This will finish the tens, and by changing the form to ten figure 1s and again moving the pins to the left for the space-width of the type, and printing six strips of each the former changes from B to L, gives the hundreds or a continuous run of numbers from 1 to 199 in an edition of six copies. To obtain number 200, print upon the six strips left a figure 2 to head the 00 of column B. In assorting the numbers it will be found that each six copies of the heavy type cannot be used, but this small loss in stock is compensated many times by the advantage derived from the method.

Imposition of Forms

HINTS ON IMPOSITION: A Hand-book for Printers. By T. B. Williams. Leather, 90 pp.
\$1.00 For sale at all Branches of the American Type Founders Company, and recommended
to all who desire the fullest information concerning the imposition of forms.

The make-up should learn to use measuring rule or tape measure and dividers. They are more convenient to measure with than paper, and their use is regarded as evidence of knowledge of the imposition of book forms. The dividers will enable the make-up to verify his measurements quickly. Printers' dividers cost 85 cents.

Ascertain what furniture will be required for the margins of a book form before placing it upon the stone. Time will be saved, and the work will have the appearance of order and neatness.

After a book form is imposed, tighten the quoins, and ascertain by means of a straightedge or square if the pages are of equal length and the head lines or bottom folios are exactly in line. The folios are usually the guides for hand-folding and should receive great attention, otherwise the binder will not secure good register. For the same reason, folios should all be set exactly in the middle of the width of the page.

After a book form has been locked up, it should be tested for squareness with a square. Forms are liable to get twisted or bowed in locking up, especially if the chase is weak. This defect can usually be remedied by loosening the quoins on one side and tightening them on the opposite side.

Margins

The proper allowances for head and back margins depend on judgment and preference to a great degree.

The head and foot margins of a *trimmed* book are usually of equal proportions, but, as the binder will almost invariably find it necessary to cut off more paper from the foot than from the head, the make-up must make sufficient allowance for this extra trim.

When the pages have running heads one-third or less shorter than the width of the page, one-half of the space occupied by the running head is to be considered as part of the head margin. If the folio only is used over a page, the head margin is to be calculated from the top line of the page.

The make-up must know whether a book is to be wire-stitched through the back or sewed through the fold. If wire-stitched through the back, an extra allowance *additional* to the back margin required must be made a little in excess of the space used by the wire. This space varies according to thickness of the book, but is rarely less than three-sixteenths of an inch on *each side* of the back margin, or three-eighths of an inch in the back gutters.

In forms of 32 pages or more it is advisable, where it is possible, to impose the pages so that the sheet may be cut and folded in signatures of half the number of pages, especially when the paper is heavy; but if the form is imposed to fold as one complete signature then it is advisable to deduct enough from the back margin of the inner sections to equal the extra space taken up by the fold of the outside sections.

In imposing forms of 12 or 24 pages, great care must be taken to get the foot and head margins of the inset to be folded in exactly right, and the head and foot margins in such forms should be as evenly divided as possible. More accurate register is obtained when the inset is cut off and folded separately.

Testing Margins

After the proper head and back margins have been decided on, and the pages arranged to conform to them, the form should be tested to ascertain if the foot and front margins are correct. The method is illustrated in the accompanying diagram of a section of a 16-page form.

Gripper Margins

As applied to book forms, the space between the type and the outer edge of the chase at the gripper side is the gripper margin. A gauge showing the gripper margin of each press should be obtained from the pressman. When the paper is placed in its correct position on the type form, the distance between the edge of the paper and the edge of chase should be at least half an inch less than the gripper margin, to permit the pressman to move his form into a suitable place. To make a proper allowance for gripper margin, it is often necessary to place more furniture in the foot margins on the side of the long cross-bar next the gripper than on the other side. The lowest folio of a form should be placed next the gripper edge.

Correct Imposition of Lengthwise Cuts and Tables

The correct rule is that lengthwise tables and cuts shall always read from the foot of page. When a lengthwise cut or table is on one page and the explanatory or descriptive matter on the opposite page, then the cut or table should, if possible, be placed on the page with the even folio

Tests of Correct Imposition

As a general rule, except where for convenience in folding, certain forms are imposed from the center, the lowest (first) folio of a form is placed on the lower left-hand corner. All odd folios are always at the left-hand of the make-up, as viewed from the foot.

The odd and even folios of pages which are side by side in a correctly imposed regular form will, when added together, form a total of one more than the number of pages in a signature. The first and last pages of a signature are always placed side by side—as, for instance, in a 16-page form, where folios 1 and 16 equal seventeen.

Press Points

These are used in forms that are imposed for books, the sections of which are folded by machines. In 16-page forms these points are usually placed exactly 15 inches apart—7½ inches each way from the center of the first fold. The sheets are fed into the folding machine by the point holes to insure register, and the points should be placed exactly in accordance with the instructions of the bookbinder.

When the first side is worked off, transpose pages 11 and 8 in place of 7 and 12, and 7 and 12 in place of 11 and 8.

TWELVE PAGES, BROAD WAY

In this form pages 3, 4, 9 and 10 are folded in. May frequently be used to advantage on booklets and catalogues.

TWELVE PAGES, DEEP WAY

This method is convenient only for deep pages, such as an odd-sized booklet, and the same size of paper used on the two regular forms for twelve pages may be used. Paper should be trimmed.

IMPOSITION OF FOLDERS

The margins of folders are usually equal all around each page, and consequently accuracy in make-up and imposition is necessary. When the sheet is to be backed, turn it the broad way, toward the folio 2. Before printing, paper should be trimmed.

This method of imposition is preferable in forms containing title page, copyright notice and other inductory pages with very little matter in them, as it brings the full pages outside, where they serve as bearers and often prevent slurring.

TWENTY-FOUR PAGES, DEEP WAY

A very satisfactory form, in common use for pamphlets. Careful division of the margins is necessary, the pressman allotting the exact margin to the edge of the sheet to be folded in. Points placed as shown will assist the binder, and should be removed before backing the sheet.

In this form there is an outset of pages 1, 2, 3, 4, 37, 38, 39, 40 instead of an inset.

FORTY PAGES, ONE SIGNATURE

The paper must be trimmed at ends before printing. A point should be placed where shown, about 1/32-inch from the fold, encroaching on main section of form—the pressman to deduct this space from the edge of sheet, which is folded toward the form. The division of margin must be accurate, especially at head and foot of pages.

Price List of Printing and Binding

A Guide for Charging

*Compiled by David Ramaley, St. Paul, Minn. Copyrighted by David Ramaley, 1904

All the tables and prices are calculated on the bases of FIFTY PER CENT ADVANCE ON THE COST OF everything that goes into a complete job of printing. Absolute cost means the price paid for paper stock, inks and labor, and not any part of the wages paid to managers, solicitors or any other expense. The general expense is equal to at least twenty per cent of the output, and may be safely rated at twenty-five per cent, which would leave twelve and one-half per cent profit on these prices. If circumstances are such that the prices of labor and stock are greater than these figures, the employing printer must advance prices by adding a proper percentage. If lower, and competition is sharp, he can reduce prices by a regular discount, not to exceed ten per cent.

Safe Basis on Which to do a Profitable Business

Adapted from the Code of Ethics of the United Typothetæ of America.

The expense of doing business, such as the wear and tear of material, interest on money invested, bad debts, rents, taxes, insurance, book-keeping, and all other items of expense, should be ever before our eyes, and we should never forget that these must be as surely levied on each particular job as its labor costs.

Always have the courage to ask for a fair remuneration for any work offered, resting assured that it will be more profitable to be without a job than to secure one in which there is a temptation to resort to questionable methods in order to avoid a financial loss in its execution.

A master printer should always contend that he is entitled, when asked for an estimate, to know the names of all who are to be requested to bid on the work. He should also insist upon his right, if he desires it, to know all the prices offered for the work and to whom and what price it was awarded.

A master printer should not make estimates for work that he cannot do. It is always unsafe and often unjust to give prices upon a class of work upon which the cost is not positively known and has to be guessed at.

Estimates calling for detailed specifications of separate value of the paper, composition, electrotyping, presswork, ruling, binding, etc., should always be refused.

Explanatory

The prices under the several divisions of each list, such as "100," "250," "1,000," include all regular charges for labor and material to the customer unless otherwise stated, and when there is a variable factor in such prices the amount estimated for such variable factor is quoted, so that the printer can readily adjust the price in accordance with the conditions governing the work.

We figure hand composition at \$1.00 per 1,000 in all work, including locking up or making up, and at 90c per hour for time work. Machine composition, 80c per 1,000.

Paper is included in these prices at an average advance of 50 per cent on cost, unless otherwise stated; but this includes storage, handling, wastage and cutting—items that are never paid for if the printer only adds 10 or 15 per cent to the cost of paper.

Composition

To be figured at \$1.00 per 1,000 ems, and time work 90c an hour.

Alterations to be figured separately from composition, and charged at the hour rate.

Open Advertising Matter on newspapers or programmes to be measured as 8 Point.

Standing Type, 1c per square inch per month.

Presswork

The value of presswork is a difficult problem, because there are so many different grades of work. The prices in the following tables represent the value of good work. Since the introduction of plated papers and halftone work rates may not be large enough for the best service, but on the average of work in an office the figures ought to be considered as fair and reasonable. The figures under the 100 column practically represent the make-ready.

Basis for Figuring Value of Paper

The basis for figuring the value of paper will be 50 per cent on the cost price. This price is to include the proportionate cost of general expense and handling in every way—the opening, cutting, and repack- ing and waste.

Unless there is a special determination by the customer as to the quality of papers, figures will be based on grades of book and writing papers as follows:

Print paper, 2½c, to be figured at	4½	Tub sized, 11c, to be figured at	13

Printing front and back, different forms, add for composition and 75c for first 1000 presswork, and 5c per 100 additional for presswork.

Folded Note Circulars

Using quarter-sheet demy or folio. The figures are based on a short page of 10 point and \$1.00 for each page of composition. The value of a full page (28 square inches) of 12 point is \$1.00; of 10 point, \$1.45; of 8 point, \$2.25; of 7 point, \$2.96 and of 6 point, \$4.00.

The question of gain by duplicating forms and using a larger press is uncertain when examined critically. With four forms you use a pony and reduce time 2½ hours—worth at least \$2.50. On an eighth medium, 10 hours time—worth \$5.00, and deducting cost of plates, \$2.00, leaves only 50c difference between the two forms of working and extra wear of type.

Printing front and back, add for composition only.

24-lb stock will add for paper for each 1000 copies—on 8c paper, 12c; 10c paper, 15c; 12c paper, 19c; 14c paper, 21c; 16c paper, 25c; 18c paper, 28c; 20c paper, 31c.

Folded Letter Circulars

Using half sheet demy or folio. The figures are started on 12 point and \$2.25 for each page of composition. The value of a full page of 10 point is \$3.25; 8 point, \$5.00; 7 point, \$6.60 and of 6 point, \$9.00.

The difference in value of composition becomes an important factor in fixing prices on 3 and 4-page circulars and ought always to be determined by the value of composition on the above basis of measurement.

The above figures include folding which is worth 20c for each 1000 folds. For 2 colors charge \$1.00 for each color except black for washup, and 50 cents for each page of color form makeup, and the presswork scale above for the added number of impression.

For less than 250 copies deduct from the price the rate per 100 in the last column of figures.

Card Scale

The card scale on this page agrees approximately with the card scales issued by various dealers in cardboard. There is no standard scale. Printers should procure the card scale of the dealers who supply them with cards. The "Convenient Card Scale and Table of Prices" compiled by Mr. C. F. Pedrick and copyrighted and issued to the trade by Irwin N. Megargee & Co., dealers in cards, 12 South Sixth street, Philadelphia, will save printers a great deal of time and insure accuracy in estimating. This valuable scale shows at a glance: (1) Cost per 1000 cards of any size after being cut from any kind or quality of board ranging in list price from \$1.00 to \$15.00 per 100 sheets 22 x 28 inches; (2) Which way of the sheet a card of any size will cut to the best advantage; (3) Number of sheets of 22 x 28 inches cardboard required to cut 1000 cards of any size. This scale is printed on a large sheet of bond paper in two colors and applicants for it should inclose ten cents in postage stamps.

Explanation—The first figures in Gothic in the upper left-hand corner of each size indicate the number of sheets required for 1000 cards of that size. The figures in Roman after the dash indicate the number of cards that can be cut from one piece of cardboard, measuring from the lower right-hand corner of the scale (A).
The italic figures outside the scale indicate the number of cuts to a sheet for any size of card not exceeding the size of scale, measuring from the upper left-hand corner (B); and the number of cards procurable from a sheet may be ascertained by multiplying the shortwise and longwise numbers. Example: If a card measures from B longwise to 8 and from B shortwise to 8 the number of cards procurable from one full-sized sheet of 22 x 28 inch card will be 64.

Business Cards

The sizes and figures given for business cards such as 11-91, 64c., stand for 11 full sheets each cutting 91 cards and the value, including cutting of 1000 of such cards, is 64 cents. On the general rule that all the prices given in these tables have a margin of profit the stock figures represent an addition to the cost of 50 per cent.

Round-corner cards will add 30c for each 1000 added to the foregoing figures.

For cheap entertainment cards use \$1.50 scale. For business cards use the \$4.00 scale unless specially requested for another grade.

In colored ink add 50c to the gross price for any number under 1000 and 10c for added 1000. For two forms, two colors, add \$1.00 to the gross price; presswork scale for second form.

Cards backed with another form on cheap grades add \$1.00 and print both sides at once. On grades \$3.00 and over make separate presswork and charge 50c and presswork scale to gross price.

The finer grades of business cards should be rated somewhat higher than common grades on account of the extra care in composition and presswork.

Monthly Statements

Stock-ruled statements are generally made from 20-lb or 24-lb folio and have various designations. The regular size, 8s of folio, is 5½×8½ inches; square statements, 12s of folio, 5¾×5½ inches; yankee statements, 12s of folio, 3¼×8½ inches; infant statements, 16s of folio, 4¼×5½ inches; and gem statements, 18s of folio, 3¼×5½ inches.

Letter Heads

Usually printed on quarter-sheet folio the grades of paper differ very materially, but with the designation of cost values of the stock the figures cover all the grades from a cheap writing to a first-class linen paper. The prices are maximum and may be adjusted by a uniform discount. One-fourth off prices given here will bring most jobs to about the cost value.

Blank Books

In handling blank books, printers should abandon quire figuring of 80 pages, and substitute 100 pages.

Half binding may be either tight or loose smooth back, with paper or cloth sides and leather corners, usually colored leather.

Three-quarter binding is first-class in every respect as to stock, usually russia back and corners, finished with raised cords or hubs and cloth sides.

Full end and band binding and extra russia ends and bands, full gilt back, are well-known to the trade and need not be described. The figures here submitted are for the best of their class as to binding.

The above figures are not intended for books in large numbers, where it may be desirable to set up or electrotype for a full sheet of paper, to save presswork.

Triplicates will add for perforating and numbering 60c for books of 1,000; 30c for books of 500, 50c for books of 250.

Printing on back of forms will add for the composition or plates of the whole size of the sheet and presswork scale.

Omitting numbers reduces price of each 1,000 forms 60c.

Differences in the cost of paper may be adjusted by tenths. Example: Quarter folio, 2 forms on a sheet, for 1,000 forms, paper at 10c, 95c. If at 12c, add 2-10 of 95c, making the paper value \$1.14 and adding 19c to the total value of the job for each 1,000 copies.
