Legend

Countries affected by

- Conflict / Displacement
- Floods
- Severe weather / Tropical Cyclones

Tropical Cyclone Intensity

- Tropical Depression
- Tropical Storm

SOUTH SUDAN - Population Displacement

- Displacement figures remain very high but "stable".
- Ongoing fighting in Renk (Upper Nile) is creating additional displacement in the area.
- Possible negative impact on aid programs as government circular published excludes all UN agencies and diplomatic missions and organisations such as IGAD, USAID, etc.

Sources: UN, ECHO

SOUTH SUDAN - Presence of aid workers across Darfur

- 5 540 aid workers working for international aid agencies in Darfur. 97% of these aid workers are Sudanese nationals.
- Since the end of 2013, the number of aid workers has decreased by 20%. This decrease has occurred against the backdrop of increasing humanitarian needs in Darfur, where some 400 000 people in 2014 have been newly displaced.

Sources: UN, ECHO

SUDAN – South Sudanese refugees

- UNHCR indicates the displacement of 92 970 South-Sudanese into Sudan with approximately 41 901 in White Nile State and 29 018 in Khartoum. Arrivals rate in White Nile State has increased from 500/600 people per week to around 1 000 people.
- All sites in White Nile State, which is the area of concern, considering the current arrival rate are currently beyond capacity.
- At present no concrete plans of authorities to scale up on additional arrivals. Access for UNHCR staff to White Nile sites remains a concern as only short term travel permits were granted.
