(Cross out one)

1. Name Shimadzu Seisakusho, Sanjo Plant Code # 22 - 18

2. Prefecture: Kyoto Year Built 1919

3. Reparations Status.

(a) Listed by SCAPIN No. 629

(b) Deleted by SCAPIN No.

(c) Rec. for Deletion

(d) Rec. for Addition
(Not yet Listed)

4. Products.

	Items	Percent
Prewar:	Reduction gears	37 %
	X-Ray apparatus	34 %
	Vacuum pumps	11 %
	Electric furnaces and dryers	8 %
	Precision and Optical instru.	10 %
During War:	Aircraft and munition parts	49 %
	Reduction gears	23 %
	Precision and Optical instru.	9 %
	X-Ray apparatus	17 %
	Vacuum pumps	2 %
Post War:	X-Ray apparatus	28 %
	Reduction gears	26 %
	Bulb making machine	11 %
	Vacuum pumps	10 %
	Precision and Optical instru.	25 %

5. Year War Production Began? 1940

6. Is Plant Now in Operation? Yes

7. Size of Company:

	No. Machines	No. of Employees
Prewar:	665	1,601
During War:	2,055	8,406
Post War:	2,019	1,596

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

c. Condition of Plant None % Percent Damaged.

g. Remarks: This factory is divided into three (3) sections the East, West and North. During the war the North and half of the West section produced Air-raft and Munition parts, while the rest of the West section and the East section produced only civilian materials. The East section is not contained on the Reparations list due to the above fact. This plant is producing a small percentage of mining machinery besides the list of products set forth on the reverse side of this form. The East section was removed from reparations by 9th Ind GHQ, SCAP, dtd 22 Oct. 1946. to letter from Kyoto Mil Govt Team, subj: "Release of Shimazu Ind. Ltd., Sanjo Plant from Reparations List," dtd 10 July 1946.

Signed Enos L. Commons Jr., Capt. USAF

FACTORY INFORMATION

No. 1

1. Name of Company
   A. Present Name. Shimadzu Seisakusho Ltd.
   B. Former Name. Ditto

2. Name of Plant.
   A. Present Name. Sanjo Works
   B. Former Name. Ditto

3. Location of Company and Plant
   A. Location of Company. 18 Nishinokyo Kuwabaracho, Nakagyoku, Kyoto.
   B. Location of Plant. Ditto

4. Representatives of Company and Plant
   A. Rep. of Company Yosuke Suzuki, President.
   B. Rep. of Plant Genzaburo Hiratsuka, Director & Manager.

5. Date Incorporated and Commenced Operation of Company and Plant.
   A. Date incorporated- Company. In March 1875, started the business as a Private enterprise, and incorporated into Stock Co. in Sept. 1917.
   B. Date commenced operation- Plant. Oct., 1917

6. History of Plant.

Since the establishment, the Works continued the production of various kind of Precision Instruments, X-ray Apparatus, Chemical and Physical Appliances, Reducing Gears, Material Testing Machines, Spinning Nozzles for Artificial Fibre, Electric Furnaces, etc. Along with the expansion of business, some of the manufacturing items were removed tc other or newly constructed Works. We were forced to make some instruments for air craft and some munition parts, during the War, but they were produced in the West and North Sections of the Works which were enlarged during the War, but we could continue the production of our regular lines for civilians in the East Section of the Works even during the War. After the war, we are producing some new items under the permission from the Army besides the regular lines.
In Jan. 1946, the Works was placed under custody for reparation, but the East Section of the Works has been exempted from custody.
In Aug. 1946, the half of the West Section and the whole North Section were occupied as the Depot by the Army.

7. Area and Floor Space of Plant.
   A. Area. 52,729 tsubo
   B. Floor Space. 25,755 tsubo

8. Yearly Production from 1934 to 1936.

1934	3,655,000 Yen
1935	3,811,000 Yen
1936	4,448,000 Yen

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

9. Yearly Production from 1937 to 1945.

1937	Yen	6,291,000	1942	Yen	22,004,000
1938		9,121,000	1943		31,129,000
1939		11,816,000	1944		46,937,000
1940		16,815,000	1945		40,675,000
1941		22,100,000			

10. Post-war Production.

A. Date and Authorities permitted to reconvert to produce Civilian Commodities.
1. 24 Nov. 1945, by the 6TH ARMY.
2. Revised 13 Aug. 1946.

B. Items and Quantity produced after Grant of Permission.

DESCRIPTION OF ITEM PRODUCED	QUANTITY	VALUE (1,000 Yen)	REMARK

Class II	531
Class III	57

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

C. Number of Machines and Equipment.
Number Inventoried and Number necessary for continuing Civilian Production.

DESCRIPTION	NO.	NECESSARY NO.	REMARK (No.in operation)
Machine tool	1,443	468	314
Secondary metal forming & cutting machine	26	22	20
Miscellaneous metal working machine	72	57	55
Electrical rotating equip.	47	14	14
Compressor & pump	8	6	3
Miscellaneous machinery & equip.	4	2	2
TOTAL	1,600	569	404

D. Complete List of Machinery and Equipment.

As per attached list.

12. General Condition concerning Maintenance of Reparation Machinery and Equipment.

A. Machines of Class I & 2 un-operated.	1,148
B. Machines of Class 3 un-operated.	48
C. Operating Machines	404
D. Machines lent & dispersed	283

E. Protecting measure

As our works comes under category B of reparation plants specified in the "Maintenance Guide" made out by the Ministry of Commerce & Industry on approval of the Occupation Authorities, the protecting measures we are taking may be summarised as follows:

I. Periodical Attendance
The periodical attendance is to be performed every 6 months in accordance with SCAP IN 1751, Annexed Paper No.5 "Cleaning & Internal Packing".

II. Oiling
Any portions unable to be greased as well as rotating parts are to be oiled once a month.

III. Additional Attendance
Once or twice a month, all the machines are to be inspected and cleaned so as to be free from any bit of the eventual rusting or partial deficiency of greasing which may otherwise be left to deteriorate the machines.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715 013

In practising the above measures, our attention are paid not only to the oiling or greasing but also to the function of machines. Especially as to operating machines, our practice is that we let our operators inspect and clean the machines under their charge for about 10 minutes every day after they finished their daily work and further we get our maintenance engineers to overhaul the machines for detection of any rusting or any shortage of parts.

13. Purchasers of Products

A. Export	0%
B. Markets in Japan	100%
C. Occupation Forces	0%

14. Condition of Operation.

A. No. of Employees

	ADMINISTRATIVE	TECHNICAL	LABORERS	OTHERS	TOTAL
Male	151	126	1,015	39	1,331
Female	101	0	68	0	169
Total	252	126	1,083	39	1,500

B. Condition of Production.

The monthly production has reached recently quite near to our formed plan, but it is now under much worrying conditions due firstly to the workers' uneasiness under increasing cost of living which gives bad effect to their production spirit, secondly to shortage of electric supply in winter and thirdly to government financial stringent policy.

These three unfabourable factors are giving bad effect to our production.

SHIMADZU SEISAKUSHO LTD.

KYOTO MILITARY GOVERNMENT TEAM
APO 713 (Kyoto, Honshu)

27 Nov. 1946

SUBJECT: Movement of Reparations Machinery

TO : Shimazu Seisakusho, Sanjo Kojo

THRU : Kyoto Liaison Office

1. You are authorized to move the eighty-three (83) reparations machines from the present location to building #5 in the West Section of the Sanjo Works, with the understanding that these machines will be maintained as prescribed in current directives. Permission is also granted for the use of the present storage building, for the manufacturing of X-Ray requisites.

FOR THE COMMANDING OFFICER:

ENOS L COMMONS JR
Capt., Ord.
Res & Ind Officer

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715 013

Kyoto Prefectural Government Office.

Nov. 21, 1946.

TO : The Commanding Officer,
Kyoto M.G.Team.

SUBJECT: Recommendation on petition for your permit to use a building and remove reparation machines.

K.K.Shimazu Seisakusho has presented a petition for your permit to use a building and move reparation machines, which is attached herewith. The above company wants to use the building in which the reparation machines of Jugo Works are stored and to move those machines stored to the West Section of Sanjyo Works, for the purpose of increased production of floresoent and intensifying screens for X-ray purposes, which are much required to-day.

We shall be very glad, if you'll give your kind permit to the company.

K. Shimizu
Senior Liaison officer
Kyoto Liaison Office.

T. Sankai
TORASAKU SANKAI
Chief of the Section
of Commerce & Industry.

Pressure & Compound Gauges
Printing & Weaving Machines
Etc.

Date 1 Nov. 1946

PETITION

Shimadzu Seisakusho Ltd.

To: Major Harold C. Sheffield,
Chief of the Kyoto Military Government Team.

For the increased production of fluorescent and intesifying screens for X-ray purposes, we intend to have the present equipment removed to a certain building thought to be most suitable for the fulfilment of the idea. To realize this our scheme, we shall first have to obtain your permission to use the building, (ref. picture annexed) because of the reason that the machines in that building are now under custody.

83 machines (specifications, as per annex) formerly belonged to our Jugo Works and now being kept in the building, shall naturally have to be removed to a building in the West Section of our Sanjo Works, and they shall surely be stored in good order for the Reparation in strict accordance with the directives.

Appealing to your generous consideration, we wish to have your kind permission for

1) The use of the building, where 83 machines under custody are placed, for the manufacturing of X-ray requisite

2) The removal of 83 machines under custody from present building to the building (No. 5) in the West Section of our Sanjo Works

CMO RECORDS ACC

KYOTO MILITARY GOVERNMENT TEAM
APO 713 (Kyoto, Honshu)

4 Nov. 1946

SUBJECT: Release of Machinery from Reparations

TO : Commanding General, Hq I Corps, APO 301 (Kyoto, Honshu)
Attn: Mil Govt Section, Res & Ind Officer

1. The enclosed petition for removal from reparations of certain shops and equipment located in the West Section of the Sanjo Plant of Shimazu Seisakusho K.K. is forwarded for your consideration.

2. The Sanjo Plant of Shimazu Seisakusho is divided into three definate sections; East Section, West Section and North Section. Based upon a former petition of this company the East Section was removed from repara tions by authority of 9th Ind. GHQ, SCAP, dtd 22 Oct. 1946 to Ltr from Kyoto Mil Govt Team, subj: "Release of Shimazu Ind. Ltd., Sanjo Plant from repara tions list, dtd 10 July 1946. However, it was the opinion of GHQ, SCAP that the West and North Sections definately belonged and should remain on the reparations list.

3. The workshops and machinery refered to in the enclosed petition do serve the East Section at the present time and aid in the production of peacetime commodities. But during the war period they also served equally the West and North in aircraft production and it is the opinion of this office that they rightly belong on the reparations list and they this petition should be denied.

AG 004 - BA 1st Ind

Hq I Corps, APO 301, 7 NOV 1946

TO: CG, Eighth Army, APO 343

1. Reference: letter, Kyoto Military Government Team, subject: "Deletion of Section of Shimazu Seisakusho K.K.", dated 7 August 1946, and 1st indorsement, this headquarters, AG 004-BA, dated 13 August 1946. The entire history of the Shimazu Seisakusho K.K., Sanjo Plant was reviewed in the above letter, and returned from your headquarters by 10th indorsement, dated 26 October 1946. Approval was granted for the removal of the east section of the Sanjo Plant from the reparations list.

2. The company has now submitted a second petition for removal of an additional amount of machinery from the reparations list. The statements made by the company in its earlier petition are somewhat at variances with those contained in the present application. It is the opinion of this headquarters that the machines located in the west section of the Sanjo Plant were sufficiently integrated in the wartime operation of the plant to render them subject to reparations. This headquarters concurs in the recommendation contained in paragraph 3, basic communication, that this application be denied.

Shimadzu Seisakusho Ltd.

To : Major Harold C. Sheffield
Chief of Kyoto Military Government Team.

Subject: Petition for the Release of Machines placed under Custody for Reparation Plan.

We hereby cordially wish to have the machines (particulars in annex) in the West Section of our Sanjo Works, placed under the custody for reparation, released from the Reparation List for the following reasons.

Within the West area of our Sanjo Works, we have the following plants and buildings which are all the subsidiary facilities, common to the workshops in the East Section of the Sanjo Works and also to all Shimadzu Works for the production of civilian requisits. For instance, the castings, forgings and the tools as well as their repairs required by the whole Shimadzu Company for the civilian products had been and are being done mostly in the casting and forging workshops and the tool workshops, there.

1. Casting workshops for non-ferro metal alloy.
2. Forging workshops
3. Tool workshops
4. Material resuscitating workshops

5. Workshops for electricity, telephone and plumbing accomodations of the works.

6. Warehouses and dumps for materials and products.

The machines listed on the annex for the release from reparation are the minimum for carrying on the whole Shimadzu Works, and in case the machines are taken away, it will certainly give a serions blow to the business of our whole organization.

We shall be greatly obliged to you if you will kindly take the above fact in your kind consideration and let us have the machines released from the Reparation List.

9 September 1946

SUBJECT: Inventory of Reparations Machinery, Shimazu Seisakusho

THRU : Commanding Officer, Tokai-Hokuriku Mil Govt Region,
Hq & Hq Det., APO 710

TO : Commanding Officer, Hyogo Military Government Team, APO 317

1. The Kawasaki Aircraft Factory, Gifu Kojo, of this prefecture has machinery which is probably suitable for reparation purposes loaned to the Shimazu Seisakusho Company, Kuwabara-cho, Ninokyo, Chugyo ku, Kyoto city. Since this company is also listed for reparations, it is requested that the machinery listed below be inventoried in its present location. The custodian of the Kawasaki Aircraft Co. also desires that this machinery be inventoried in this manner rather than having to go to the useless trouble and expense of moving this machinery.

2. The machinery is listed as follows:

15 drilling machines.
5 milling machines.
1 shaper.

EDWARD L. LITTLETON

Shimadzu Sanjo Works

Petition for exemption from occupation of the buildings, the equipments and the materials of Shimadzu Sanjo Works under Custody for Reparation.

1. Sections of Sanjo Works

The Works is divided into 3 sections of East, West and North distinctly by wall or river.

East Section: Here only civilian requisites have been made continually all the time since before the war, and even during the war. After the war, having obtained reconversion permission, the same production is being continued.

According to the release paper APO-713 dated 4 November, 1946, the East Section of the Sanjo Works has been entirely released from the reparations list and from custody and control for reparation purposes, as seen on the attached copy of the release paper, and we understand that the East Section is beyond the limits of your present investigation of the buildings equipments and materials of the plants under custody for Reparation, and we wish none of them will be taken away from this Section.

West and North Sections: In July, 1946, in these two Sections, all 8 buildings with 7,400 tsubo floor spaces and land of 25,000 tsubo, where air craft parts were produced in war time, were occupied by occupation force, and a part of the West Section is left to us.

The workshops in this part of the West Section are fully in operation for producing mostly the parts of the machines or

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

instruments for other Shimadzu Works, and all the plants and equipments here are absolutely necessary for continuation of whole Shimadzu business, as it is very difficult for other Shimadzu Works to get from outside source such proper machine or instrument parts which are being supplied to them from here.

There is no idle workshop there, and we earnestly wish to have these all buildings and equipments exempted from ~~occupation~~ taking away.

Store-Houses: Sanjo Works Store-Houses are also the Central Store-Houses for all 8 Shimadzu Works.

Since November 1945, we had to supply already large quantities of various materials by several times to occupation force, and the quantities of the materials left to us at present are of the minimums required for continuation of our whole Shimadzu productions.

In view of the fact that the material can not be easily replaced, we wish no more request of its supply will be made to us.

Full particulars of each item are as follows:

2. Buildings (please refer to the attached blue print of their locations):

The use of buildings under Custody for Reparation in the West Section;

a. W-1 Building. Here 918 machines under custody for reparation are stored, and nothing can be taken away from here for keeping them in good order.

b. W-5 Building. Here 128 machines under custody for reparation are stored, and nothing can be taken away from here for keeping

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

then in good order.

c. W-6,7 Buildings. These are in operation as non-ferro metal alloy casting workshops.

d. W-12 Building. This is used for storing, packing and shipping work of our bulky and heavy products, and only the one with us to deal with heavy products.

The crane installed here is under custody for reparation, and this building cannot be taken away for keeping the crane in proper conditions.

e. W-13,17 Buildings. These are used as workshops of bulb making machines which are requisites for re-establishment of Japanese industry and also making tools to be used in the all Shimadzu Works. Here 172 machines under custody for reparation are used for the above products under the reconversion permission we obtained. For keeping the machines in good conditions for reparation purposes, these buildings cannot be taken away.

f. W-15,18,20,21,22,26,27,28, Buildings. These are used as central Store-Houses of materials for all Shimadzu Works, and their storing capacity is the minimum to store all materials required for continuation of whole Shimadzu productions.

g. W-25 Building. This is used as forging workshop for all Shimadzu Works, and the machines used here are under custody for Reparation, and for keeping them in good order, this building cannot be taken away.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

3, Plant Equipments:

All workshops in Sanjo Works are in operation, and the equipments of the workshops are all in use, and any of the equipments is taken away, it will give bad effect at once to the production, and we wish to have them exempted from taking away.

The particulars of the equipment are as follows:

a. Electric Fans:

a-1 One in E-4 Building (exempted from reparation list) is used for cooling metal plated glass which is accessary of optical instruments.

a-2 One in E-7 Building (exempted from reparation list) is used for testing the quality of agricultural instruments.

b. Radiators:

All radiators are installed for warming rooms of the buildings located in East Section which are exempted from reparation list. in Buildings E-5, E-6, E-20 and E22, the radiators have been specially installed for preventing dusts, as these buildings are used for production of precision instruments which should be free from dust as much as possible.

c. Transformers:

All the transformers installed in Sanjo Works are used as source of electric power, and all of them ~~being~~ belong to the Haiden Kaisha. The terms of the lease is already expired, but under the fact that those transformers cannot be replaced at present, they cannot be returned to the owners yet.

In case they are taken away from the Works, the Works has to

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

stop its operation at once, as they are the only source of electric power for the Works.

d. Water closets:

Those used at present are all difficult to dismantle, and can not be replaced under the present conditions.

e. Motors for Blowers (ϕ HP 37)

These 37 motors are used with Unit-heaters for warming rooms of Precision Instruments Workshops. In case they are taken away from the workshops, the production of the precision instruments will be badly effected.

f. Boilers:

All boilers are in operation for cooking food of workers, washing their hands and also for warming process of products.

To dismantle any of them will give bad effect directly and indirectly to the production, as they can not be replaceable at present.

The particulars of the boilers are as follows:

(a) Sectional Type Boiler, Heating area 19.4m², Max. Pressure, 0.5 kgr/cm².

This is used for warming rooms in E-1 Building, exempted from reparation list.

(b) Sectional Boiler, Heating area 21.20m², Max. Pres. 0.55kgr/cm².

This is used in Building E-1 for warming rooms in co-operation with the other under above (a).

(c) Vertical Type Boilers 2, 40kg/h and 30kg/h

These are used in Buildings E-5 and E-6, exempted from

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 773013

reparation list, for food cooking and for hot water for washing workers' hands.

(d) Vertical Boiler, 40 kg/h
Used in Buildings E-1, E-10, E-16, E-17, E-20 and E-22, exempted from reparation list, for food cooking and also for hot water for washing workers' hands.

(e) Tsunekichi Boiler, Heating area 10M^2, Max. Pres. 8.45kgr/cm^2.
Used in Buildings E-5, E-6, E-20 and E-22, exempted from reparation list, for warming workshops of Precision Instruments which are badly effected by dusts.

(f) Vertical Mitoku Boilers 2.40 kg/h
Used for Buildings E-8, E-9 and E-29, exempted from reparation list. This boiler is indispensable for the casting workshops for bathing, food cooking and hand washing for their workers.

(g) Vertical Mitoku Boiler, 40 kg/h
Used for Buildings E-23, E-24, E-25 and E-27, exempted from reparation list, for bathing, food cooking and washing hands for their workers, and the boiler can not be replaceable.

(h) Stoker Automatic Coal Feeders with blower,
2 of 1 HP. 75Kg/h
Used in co-operation with Sectional Boilers mentioned - above (2) & (b)

(i) D.I.F. No. 1200 Coal Feeder and Blower, 5HP 545 kgr/h
Used in co-operation with Tsunekichi Boiler mentioned above (E) and can not be separable from the boiler.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

(j) Smoke Pipe of iron plate, 60cm. diam. x 600cm. long. x 3.2 thick.

Used with Sectional Boilers (a) and (b), and without this pipe, the Boilers can not be in operation.

6. Pumps 7.

All of these pumps are in operation for filthy water from water closets and for feeding and drawing water to and from Boiler. The pumps for the filthy water are indispensable in sanitary stand point of view.

1 Pump is in use as accessory of Boiler for feeding and drawing water.

6 Pumps are in use for water closets.

h. Storage Batteries, 50 of 300 A.H.

These are all in use with the local telephon switch board for Sanjo Works compound, and in case they are taken away from there, the very busy telephon communications between so many workshops and offices in the compound will stop instantly to very bad effect to the Works operation at large.

i. Mercury Vapour Rectifier:

One of the two is in use for charging storage batteries for telephon switch board, and the other is being used for making electric source of direct current which is very important in connection with our products.

4. Materials of Factory Plant:

The stocks in hands of all kinds of the materials specially the -

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

materials in connection with electricity, are well centralized in Sanjo Works Store-Houses for all Shimadzú factories, and in case the stocks in Sanjo Works get too Short, it will give bad effects to the productions all Shimadzu Works including most important workshops in the East Section of Sanjo Works which have been exempted from the list of reparation purposes, and also other important Shimadzu Fushimi Works and Shimadzu Murasakino Works which are entirely free from reparation list from the begining.

Conditions of the present stock of the materials:

(1) Electric Wires:

Of larger sizes over 30 mm^2, there is a surplus in stock, but of smaller sizes under 22mm^2, there is no surplus in stock.

(2) Lighting and Wiring Appliances:

The stock of these appliances is only enough for replacement of the present use in all Shimadzu Workshops.

(3) Iron Tubes:

There is no stock of new iron tubes, but we expect to have shortly some of old tubes dismantled at workshops in result of alterations of workshop plans. Those old tubes will be used for maintaining the necessary plants in order.

(4) Cast Iron Tubes:

These are those dismantled, but as proper care has been paid to them, they look just as new, and we can supply with them.

(5) Iron Tube Joints and Valves:

There is a surplus in stock of larger sizes over $1\frac{1}{2}$ inch. but no surplus of smaller sizes under 1 inch.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

No. 9

5. Main and Secondary Materials of Products:

The stocks of these materials are also centralized in Sanjo Works Store-Houses to meet requirements of all Shimadzu Works.

We had to supply good quantities of these materials directly or indirectly for occupied force, and our present stocks of them are less than the minimum quantities required by all Shimadzu works for continuation of our productions.

(1) Main Materials of Products:

Steel: 473 tons including 33 tons ordered to sell under Emergency Acts Dealing with Concealed Articles.

Wire and Non-Ferro Metal:

These are to be used for the production of X-ray apparatus and Precision Instruments.

The present stock of them is not sufficient to meet the orders in hand of those products.

Insulators: The stock in hand is specially for X-ray apparatus, and most of them can not be used for other purposes.

Screws: The stock covers very many different sizes, and they are not suitable for common uses.

Stocks in General:

Due to the natures or kinds of our products covering so many different lines, there are so many varieties of the main materials in stock which are specially good for us, and most of them are not suitable for common uses.

(2) Secondary Materials of Products:

Oils, Paints and Fuels. The present stock of these materials is

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

very short and can not be obtainable, and we are having difficulty with the present stock not enough to meet our requirements.

As stated above we have no surplus stock in general except of steel, and we wish to repeat here that we hope they will not be exacted away from us except steel.

The materials which have specially kinds of products in their own remarks columns in the report of our present stocks have been already applied for the production to meet orders for export, orders from occupation force and orders of instruments and machines required for re-establishment of Japanese industry, and the materials without such remarks are to be commonly applied for other production.

For your reference, the following 2 annex sheets are attached.

Annex 1 "Estimated quantities of main materials to be consumed in Sanjo Works only for 1 month"

Annex 2 "Production Plan of Sanjo Works for Jan. - June 1947"

Shimadzu Sanjo Works.

Manager G. Hiratsuka.

KYOTO MILITARY GOVERNMENT TEAM
APO 713 (Kyoto, Honshu)

4 Nov., 1946

SUBJECT: Exemption from Reparations

TO -: Local Section of Japanese Home Ministry

THRU : Kyoto Liaison Office

1. The East Section of the Sanjo Plant of the Shimadzu Seisakusho K.K., together with all machines which normally were a part of this plant, is hereby released from the reparations list and from custody and control for reparations purposes.

2. The East Section of this plant will be returned to the control of it's rightful owners for production of items essential to the peace-time Economy of Japan.

from the reparation list. Present main products here are;
Spectrograph,
Precision & Optical Instruments, Vacuum Pumps, Surveying
Instruments, Speed Reducing Gears, X-ray Apparatus, Coiling machine
grid machine for making lamps & bulbs,
~~Screens, Projectographs~~, Winches for mining & etc.

West Section; 5 Workshops are here in operation which are under petition for exemption from reparation list. These workshops are of Foundry, Forging, Alloy Casting and Tool Making, and most products made here are to be used in all Shimadzu Works.

2 workshops are storing the machines under custody for reparation purpose, and 2 workshops are being occupied by Army Engineering Section for depot.

North Section; All buildings and land here are being occupied by Army for the depot.

2) Detached Workshops

Shimadzu Seisakusho Ltd.

In 1875, first established by late Genzo Shimadzu to make scientific instruments for education.

In 1917, organized in the present form of incorporated company.

Present Capital, Authorized Yen 72,000,000.

Paid up Yen 36,000,000.

Business, has been gradually developed in past 72 years in keeping pace with Japanese civilization. We are (producing and since before and even during the War,) various kinds of instruments necessary for education, laboratory, health, industry, agriculture and navigation, and carrying on 8 Works in operation at present.

Kinds of Products:

Before the War: Scientid Instruments, Chemical & Physical Apparatus, Chemical Analytical Scales, Precision & Optical Measuring Instruments, Vacuum Pumps, Material Testing Apparatus, Speed Reducing Gears, X-Ray Apparatus (chiefly for coal mining) Rotor Driving Pumps & Nozzles, Gear Cutting Machines, Electric Motors, & etc.

During the War: Besides almost all above civilian products, some Works produced Instruments for air crafts, and their parts, such as Carburetors, Boost Controllers, Fuel Pumps, Gun Sights, Bomb Release Gears, Gun Sights, Drawing

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 113013

and even during the War.

Business, has been gradually developed in past 12 years in keeping pace with Japanese civilization. We are producing since before the War various kinds of instruments necessary for education, laboratory, health, industry, agriculture and navigation, and carrying on 8 Works in operation at present.

Kinds of Products:

Before the War: Scientic Instruments, Chemical & Physical Apparatus, Chemical Analytical Scales, Precision & Optical Measuring Instruments, Vacuum Pumps, Material Testing Apparatus, Speed Reducing Gears, X-Ray Apparatus chiefly for coal mining, Rayon Spinning Pumps & Nozzles, Electric Furnaces, Electric Meters & etc.

During the War: Besides almost all above civilian products, some Works produced instruments for air crafts, and their parts, such as Carburetors, Boost Controllers, Fuel Pumps, Lubricators, High Pressure Gauges, Gun Sights, Drawing Tables, Pitot Tubes, Sextants & etc.

After the War: Besides most of the lines which have been all the time produced since before the war, Wood Working Machines, Auto Scales, Surveying Instruments, ~~Sextants~~, Water Pumps for Farming, Carburetors for Motor Cars & Auto-cycles, and Winches for mining & etc. Moreover, Electric Ranges, Toasters, Grills and Ovens, Fryers, Room Heaters, Hypochlorinator, Temperature Controllers for Hot Water Boilers and Refrigirators for occupied force.

Works & Shops

1) Sanjo Works: The main works, on which all other Shimadzu Works depend more or less. This Works consists of 3

chiefly for coal mining

During the War; Besides almost all above civilian products, some Works produced instruments for air crafts, and their parts, such as Carburetors, Boost Controllers, Fuel Pumps, Lubricators, High Pressure Gauges, Gun Sights, Drawing Tables, Pitot Tubes, Sextants & etc.

After the War; Besides most of the lines which have been all the time produced since before the war, Wood Working Machines, Auto Scales, Surveying Instruments, ~~Sextants~~, Water Pumps for Farming, Carburetors for Motor Cars & Auto-cycles, and Winches for mining & etc. Moreover, Electric Ranges, Toasters, Grills and Ovens, Fryers, Room Heaters, Hypo-chlorinator, Temperature Controllers for Hot Water Boilers and Refrigirators for occupied force.

Works & Shops

1) Sanjo Works: The main works, on which all other Shimadzu Works depend more or less. This Works consists of 3 sections, East, West & North.

East Section; Here, only ~~one~~ civilian products have been made continually since before the war up to present even during the war, and this Section has been exempted
