REDUCTION OF CUSTOMS DUTIES.

On Monday night resolutions will be proposed in the House of Commons, with a view to the proposed changes in the Coffee and Timber Duties, which, if passed on that night, as they are likely to be, the new duties will take effect on Tuesday.

THE REVENUE UNDER FREE TRADE.

The revenue accounts for the year and the quarter ended the 5th instant, which will be found in another part of this paper, continue to exhibit the most gratifying results. The income of the year shows an increase of no less than 446,119/, while that of the year shows an increase of no less that 470,112, while that of the quarter shows the still greater proportionate increase of 283,051*l*. But these simple results are more important when it is remem-bered, first, that the comparisons are made with periods when already large increases had taken place compared with the im-mediate preceding years;—and second, that the last year's and quarter's income have been subjected to large reductions, on account of taxes remitted during the past year.

In 1850, after the 5th of April, taxes were reduced and repealed as follows :-

Sugar a	nd molasses	******	331,073
Stamps			520,000
Bricks	*************		456,000
		Total	1.307.073

Total And yet, notwithstanding these reductions, the income of the year is 446,119*l* more than that of the preceding year. In the Customs department the reductions amounted to 331,073*l*,

which took effect from the 5th of July; yet the receipts of that branch of the revenue show an excess on the year of 195,299*l*, and on the quarter of no less than 115,682*l*, notwithstanding the suspension of some branches of trade pending the decision of the House of Commons on the reductions proposed in the Budget of the year.

In the Excise department the reductions of the year amounted to In the Excise department the reductions of the year amounted to 456,000*l*, which took effect from April, so that they affect the entire year. Nor is this all. A very considerable sum was charged to the Excise receipts of the year, in discharge of the drawback of one-half the duty which had been paid on the bricks in stock when the duty was repealed. Yet notwithstanding these reductions, the receipts of the Excise are 332,311*l* in Excess for the year, and 121 (632) for the quarter excess for the year, and 121,063l for the quarter.

In the Stamps department the reduction in the year amounted to 520,000*l*. This reduction did not take effect nominally until the 10th October; but in reality the receipts were affected from the time the change was announced early in the session, for the the time the change was announced early in the session, for the completion of the majority of transactions was postponed till after the 10th of October, with a view to the great reduction then to take effect. On the receipts of the year there is accordingly a reduction of 248,905/; but the fact that in the quarter there is an increase of 9,883/ (and the quarter of last year with which it is compared was not affected by any contemplated changes), shows how satisfactorily the lower scale of stamps is operating in respect to transactions in real property. The receipts of the Post Office for the quarter show an increase of 41,000/; and notwithstanding all that has recently been said as to the decline of the Property Tax, the receipts for the quarter also exhibit an increase to the amount of 20,342/.

also exhibit an increase to the amount of 20,342*l*. Whatever may be said of the depression existing among par-ticular classes of the community, nothing could speak more clearly or conclusively as to the great prosperity of the bulk of the com-munity, and especially of the masses of the labouring population, than the facts elicited by these returns. The best admitted test of the condition of the people is the revenue from Excise and Customs, but more especially the former, as it is derived more exclusively from articles of the most general consumption; and it is in this particular department that the increase is the largest.

These returns confirm the gratifying facts which, from month to These returns confirm the gratifying facts which, from month to month, it has been our pleasing duty to remark upon, as the periodical returns of Trade and Navigation have been issued. It is true that there is a class who affect (for it is nothing but the sheerest affectation) to doubt the honesty of returns connected with trade, issued by the public departments of the Customs and the Board of Trade, because they do not sustain their predictions of the results of Free Trade; but will those persons affect also to doubt the truthfulness of the Boardon 2. It will chose doubt the truthfulness of the Revenue returns? It will at least not be supposed that a department will charge itself with large sums of money, for which it must account, which have not been received.

Which, then, of all the Protectionist predictions have been rea-lised? The most prominent and the most alarming that was relied lised? The most prominent and the most alarming that was relied upon against Free Trade, was that public credit could not be maintained under such a system. For years, even many who admitted the "abstract justice" of Free Trade, always ejacu-lated "But the Debt!" It was in vain that we and others urged that the public credit could not be rendered more secure by the fact, that a large portion of the taxes did not flow into the Ex-change. Well after the enveryment will one envery Lact, that a large portion of the taxes did not flow into the Ex-chequer. Well, after the experience of some years, will any one be found to assert that public credit is not more secure with Free Trade than with Protection! Again, what has become of the pre-diction that the Bank of England would be drained of its gold? What has become of the assertion that we could not "fight hostile tariffs with Free Trade":—that we might admit, but foreign countries would continue to exclude:—that our imports might in-curace but our export a would diminish on account of mehitory. crease, but our exports would diminish on account of prohibitor tariffs? In 1842 the declared value of our exports was 47,381,000*ℓ*, and in 1850, 70,000,000*ℓ*. What, then, of the prediction that our manufacturers would be ruined and our artisans without employment? We will refer to two statements only as being conclusive ; the one of the increased employment of the people-the other of their increased command over articles of the most ordinary consumption.

First. From 1842 to 1850, the population has increased by about 12 per cent.; during the same period the consumption of

2

These simple facts speak in language the most forcible, of the increased employment of the people—of the increased command which that employment has given to the masses of the people over the necessaries and the luxuries of life; and they supply the best explanation of the rapid and continued improvement of the revenue which has occurred year after year, with little exception, since the first inauguration of the Free-Trade policy in 1842.

SACERDOTAL ENCROACHMENTS.

THERE are dangerous spirits which are never laid to sleep, and noxious tendencies which no lapse of time and no change of circumstances seem able to eradicate ;—which reappear in unchecked rigour age after age ; which flourish in every soil and under every polity ; which seem endowed with indestructible vitality and with perpetual youth ; which survive the most sweeping and crushing of political convulsions ; and on which even intellectual and social progress exercise only a partial and temporary influence. Checked in one of their evil manifestations, they break out under some new modification elsewhere ;—suppressed in one form, they transmigrate into another shape ; and walk abroad, immortal and trinuphant, while we are gibbetting the carcase, and demolishing the tomb. Of all these evil spirits, that of priestly ambition and ecclesiastical tyranny is perhaps the most tenacious of life, the most universal, the most inventive, and the most adaptable. Conquered in a thousand conflicts, it is never permanently crushed. It allies itself with despotism ; it flourishes in republics ; it breathes the breath of life even amid the institutions of a sober and constitutional freedom ; it exists equally in the most sectarian and the most catholic of countries ; science cannot extinguish it ; mental culture may defeat it, but affords seemingly no guarantee against thereiteration of its attacks ; the frivolities of fashionable life do not sap its energies ; no rank, however high or low, is exempt from its encroachments ; the nineteenth century is scarcely free from it than the ninth ;—for the root from which it springs, the pabulum on which it feeds, the weaknesses on which it builds its empire, are all deep and permanent in human nature.

There have been periods of history, when the sacerdotal spirit rode rampant and unquestioned; others, again, when it was compelled to retire before the reaction which its oppressions had aroused; others, when it once more raised its head, and renewed its aggressive operations. The present time is one of these. On all hands we hear of Spiritual Tyrannies; on every side we see Sacerdotalism under various disguises, or with its nakedest pretensions, grasping at its old dominion, and marching forward to the conquest of provinces that have been wrested from it. It is necessary to watch these aggressions with the most unsleeping vigilance, and to repel them with the most prompt and resolute severity, from whichever side they may assail us; for there is this peculiarity about the spirit of priestly domination, that it is never discouraged;—however vigorously repulsed, it never holds itself as beaten, but is always ready to renew the assault at the first favourable moment, and sits ever watching its opportunity with that cold, patient, inextinguishable greed, which in the end tires out every other passion. Of all foes to the dearest interests of the human race we

Of all foes to the dearest interests of the human race we regard sacerdotal ambition as one of the most deadly and the most insidious. It is, by its very nature, the sworn enemy of civil and mental freedom. It may ally itself with this or that free form of government, with this or that intellectual movement, for the furtherance of temporary and accidental aims; but the condition of its success is the intellectual thraddom of mankind. It has a "vested interest" in darkness. It can attain its ends only by the subjection of other minds, by inducing men to abnegate their judgment and subordinate their wills to the decisions of an organised and banded few. By professing to be the guardians of sacraments essential to salvation, which it lies in their option to administer or to withhold; or by proclaiming themselves to be the sole depositaries of a truth which it is vital rightly to embrace; or by assuming that they are the only competent judges of what conduct and opinions fit a man for membership with a community to which real or imaginary advantages attach, —priests of various religions have contrived to obtain an anomalous and most oppressive hold upon the minds of the laity, which, while noxions and intolerable to the last degree, it is extremely difficult and perplexing to know how to meet. The priests of the Romish and of part of the Anglican community take the first ground; and, if granted to them (as among Catholics it almost universally is), there can be no limit to their despotism, except the inadequate and ever-varying one which may be furnished either by their conscience, or their fears of a revolt, if oppression should be pushed too far. For it is clear that if the regular and timely reception of the sacraments are essential to salvation, a priesthood has the power to compel all believers to *any* course of conduct, on any public or private matters, however purely secular and apparently order, may be satisfied that the individual priest, or the priestly order, may be stepping beyond their app [April 12,

or his sacerdotal tyrant. When the civil power is strong, and is wielded by a resolute and peremptory hand, or when intellectual activity and general enlightenment have rendered ecclesiastical authority tottering and precarious, priestly wisdom generally withdraws or leaves in abeyance all more extreme and question-able pretensions, confines its dominion to its purely spiritual province, and carefully avoids collision with the secular arm. But all this is mere prudence, and involves no abdication of its wider and more monstrous claims, which are merely put by for a more convenient season. When Catholicism is in bad odour, and has been discredited or hunted down; or when it has an Elizabeth, a Cromwell, or a Napoleon to deal with, it puts forward only its spiritual character, assumes a meek and apostolic air, leaves, with a lofty grace, the world to the powers of this world, and confines its interference to ecclesiastical regulations and doctrinal decrees. But when it can do so with safety, and without obvious risk of meeting a sharp and damaging rebuff, it loses no opportunity of proclaiming to the world that its pretensions are no whit abated, that it still claims supreme and uncontrolled dominion over every civil and social proceeding by which the interests of The Church or the position of her people can be affected in the remotest man-ner. We pointed out a week or two ago a proof of this in the conduct of the Sardinian clergy, whose head did not hesitate to refuse "extreme unction" to an eminent minister of the Crown, for the crime of having given his Sovereign the most judicious advice respecting the administration of justice in his dominions, but which advice the Archbishop considered to trench upon the privileges of the priesthood. In the same kingdom another Archbishop excommunicated a royal commissioner who had been ordered to obtain information regarding some trust revenues where malversation or mismanagement was suspected. It is clear that no more insolent or unendurable sacerdotal pretensions were ever no note marked with the church in the height of her mediaval omnipo-tence; and it is equally clear, both from these specimens and from the very nature and groundwork of her claims, that nothing but her own prudence and dread of ignominous defeat withholds her from the attempt to enforce similar pretensions in these islands. Can any one doubt that, if the Church of Rome saw the faintest prospect of success—if she were not aware that such a course would be the most fatally injudicious she could pursue--she would not endeavour to exercise over the proceedings of Catholic cabinet ministers in England precisely the same authority as she assumed over the conduct of poor Santa Rosa in Sardinia? Can we doubt that she would conceive herself *entitled* to compel an English Prime Minister or Home Secretary, on peril of a refusal of the last sacraments, to initiate and advocate whatever measures She-that is her priestly dignitaries-deemed most conducive to her prosperity and strength; and that she would exercise such compulsion *if she dared*? Indeed, the conduct of the Irish Bishops in relation to the Queen's Colleges, and the systematic discouragement of the mixed schools by many of the priests, do not leave us in any doubt as to the interference which the sacerdotal order would exercise over every department of civil and social life, if their power were equal to their will, or rather if they did not fear to peril their authority over the minds of the laity by stretching it too far. It is evident enough, that if the priests choose from the altar to denounce the National Schools, they have influence sufficient over their flocks to empty them at once ; and if their oppo sition to the New Colleges has not yet been implicitly submitted to by the Catholic gentry and middle classes of Ireland, submission can at at any time be enforced, by means of the sacraments, whenever the priests are at all unanimous in choosing to risk the consequences of doing so. The power they possess, being a power of opinion, and capable at any time of being carried into effect by the wielding of spiritual terrors, is of a nature which the secular arm cannot meet except at a disadvantage. It has no suitable weapons for the unequal contest. The State cannot compel a priest to unlock the gates of Heaven to an honest citizen whom he priest to unlock the gates of Heaven to an nonest citizen whom he is resolved to exclude; —to punish him for refusing ghostly conso-lation to a recalcitrant Catholic for acting as a good subject, would be a stretch of power and an over-riding of conscience which would be vehemently denounced as persecution, and which only the extremest necessity—if even that—could justify; —to persuade the layman to set his priest at defiance as having ventured out of his appropriate sphere of authority, would be to make him cease to be a Catholic;—yet it rests only with any rash or overbearing minister of the Romish Church at any moment to place the State in this dilemma :--either to compel him, on pain of civil punishment, to administer the rites of the Church-to use the keys of Heaven and Hell—at its bidding, and not according to his own conscience —(in which case the Queen and not the Pope is the supreme head of the Catholic Church); or to submit to have its subjects sentenced to the most fearful penalties for acting in the manner their duty as Englishmen and their judgments as enlightened citizens command them to do-(in which case the Pope and not the Queen is the ruler of these realms). It is useless to say that this case is a mere chimerical supposi-

It is useless to say that this case is a mere chimerical supposition, because no ecclesiastical dignitaries will be rash enough to push matters so far, in this country at least, as to place Englishmen between two such harassing alternatives. We fully admit that it is not easy to imagine sacerdotal ambition overleaping itself in so flagrant a manner. We believe, moreover, that gene-

1

THE ECONOMIST.

rally speaking the faith of our countrymen would give way before their allegiance, and that they would defy their priest rather than act dishonourably to their Queen and country. But we wish to call attention to the fact that the self-restraining prudence of the priesthood is the only guarantee we possess against the probability of every British Catholic being daily placed between the two horns of this dilemma; and that we have nothing to guarantee us from the worst and most dangerous of the two alternatives being chosen, except the general mental enlightenment of our countrymen, and the probability that their love for freedom and fairplay will prove stronger than their habit or theory of spiritual prostration. We have had ample warning to watch the progress of sacerdotal encroachment with a vigilant and jealous eye; and we believe that our only hope of safety from the painful necessity of imposing the sternest and most rigid fetters on ecclesiastical authority, lies in the conviction of ecclesiastics that these will be resorted to, if needful, with the consent of an overwhelming majority of the community; and in the diffusion and confirmation in all ranks of a love of unfettered intellectual freedom on all subjects which can engage human thought which would render any attempt to stretch spiritual authority too far manifestly hopeless and suicidal. We may feel perfectly certain that if ever Englishmen should show a sufficient degree of supineness and subjection to priestly influence, the attempts of Sardinia would be repeated here on a smaller scale. We hold our security against such attempts only on the tenure of perpetual and lynx-eyed watchfulness.

Recent circumstances have turned the whole force of national indignation and alarm on the subject of ecclesistical tyranny against the encroachments of the Church of Rome; and we have said enough to show that we are not disposed to under-estimate the danger to be apprehended from that sagacious and persevering priesthood. But it is not in that quarter alone-perhaps not in that quarter chiefly—that the lust for spiritual domination is apparent and aggressive. Wherever the sacerdotal order exists the same grasping ambition to rule the consciences, and through them the actions of men, shows itself undying and unchanged. It belongs not to the special church, but to the priestly caste. It exists as distinct, as pernicious, as insatiable, though not yet as powerful, in the Anglican as in the Romish hierarchy. It is perceptible in both parties which divide the Church of Eng-land between them, though in different degrees and under some-what varying manifestations. Among the Evangelical clergy there are numbers who seek to gain influence over the minds of their flocks through the medium of dogmas of which they are the authorised expounders, and the correct apprehension and sub-missive reception of which dogmas are, in their creed, essential to the safety of the soul. The union of these two propositions na-turally gives them an influence which they are not slow to seize and to improve. By perpetually harping on the assertion that reason is an unsafe and insufficient guide, that to trust to it for the solution of difficulties or the discovery of religious truth is a reliance which, if not criminal, verges at least close on criminality, and that to accept humbly is more meritorious than to question keenly,-they strike at the root of all mental health, strength, and implicitly their spiritual pastors. As soon as the mind is taught to abdicate its faculties, to dread their exercise, and to doubt or deny their conclusions, the work of evil is accomplished; it is prepared for slavery, and falls easily into the fetters or the leadingstrings of any despot who chooses to assume the functions of its governor. It soon ceases to exercise its powers where that exer-cise might lead to fallacies and dangers; it goes on every occa-sion to the authority to whom it has resigned the right of judgsion to the authority to whom it has resigned the right of judg-ing for it and directing it; it sits a helpless tool at the feet of the pastor who first asserted and has since realised and generated its helplessness; and becomes a most loyal subject of a most relent-less empire. How few families in the higher or the middle ranks would not afford us specimens of the victims of this deplor-able prostration of the understanding and the will,—chiefly it is true among the female sex;—ladies who literally never think for themselves, who have no opinion of their own on any subject, but who, whatever be the matter in discussion, think everything con-clusively settled by quoting some saying of their spiritual pastor ! This evil is a very sore one, and fraught with far deeper dangers than at first appear ;—for not only is most painful and injurious than at first appear ;--for not only is most painful and injurious discord introduced into the bosom of families by this intrusion of a third and exotic element; not only does an external, unharmonising, irresponsible power take the guides and external, innar-place which should be occupied either by the good sense and good feeling of the individual, or by the sounder or more practised understanding of the husband or the father;—but it is easy to see how unsafe and even noxious must be the influence exercised upon the expanding and impræssible mind of the child by a methor upon the expanding and impressible mind of the child by a mother upon the expanding and impressible mind of the child by a mother who feeds it not from the fresh free fountains of her own spirit, but upon the cold, foreign, "funeral-baked meats," which she retails to it at second-hand. It is not by a generation thus brought up under the weakening and paralysing shade of Sacerdo-talism that civil rights or mental freedom can be maintained, or could be won could be won.

The mode in which the Puseyite portion of our elergy establish their dominion is more analogous to that of the Romish priests. They stand towards their flocks in the relation not only of guides to truth, but of dispensers of salvation. They seek to guide the conduct fully as much as the opinions of those who hear them. By making external observances, aitendance at the services, performance of the injunctions, and reception of the rites of the Church, prominent and essential portiens of religious duty, they acquire the power and the pretext needed for interference in the daily life, and almost for dictating the daily actions of each communicant. They produce mental slavery, rather through the influence of habit than by direct inculation; and, thus managed, the operation is as certain and fatal, and even more insidious and irresistible. When, to more common and widely sanctioned observances, they add the encouragement of "confession," and the acceptance of vows, the circle is complete, and the chain is rivetted for ever. It is so easy in the excitable and enthusiastic period of youth to persuade devotees of either sex that vows, whether of celibacy, of poverty, or of clerisy, are acceptable service, and that the violation of such vows, however extorted, would be a deadly sin,—that any tendency in this direction on the part of our Anglo-Catholic clergy should be most vigilantly watched. We have heard of cases which satisfy us that it is no imaginary danger. It is chiefly among the higher classes, and even in fashionable circles, that this form of priestly ambition has hitherto met with the richest success; and it is generally united with so much real virtue, so many estimable qualities, so much genuine devotion to a cause which is not devoid of grandeur, and so much acuteness of logic in reasoning from unsonad though admitted premises,—that its ascendancy and progress are no matter for rational surprise. Still it is an aggression on intellectual liberty which, as paving the way for aggressions on political and civ

Those who have paid any attention to the recent history of Methodism, are painfully aware that precisely the same spirit of encroachment and despotism which we have described as charac-terising the priesthood of the two great Established Churches of Christendom, has shown itself among the Wesleyan clergy. is in all points identical ; it is marked by the same symptoms, but intensified in their evil and vulgarised in their manifestations by the lower and less cultivated condition of the class of men who display them. The Wesleyan body, now very numerous, very ably organised, very powerful, and very rich, is ruled by a vast com-mittee, called The Conference, composed of ministers, and of ministers only. No laymen are admitted to share its deliberations For along time the functions of this assembly were or its power. or its power. For along time the functions of this assembly were virtually confined to such regulations of their internal affairs, and such discussions of sectarian interests or doctrinal matters, as a Presbytery might fairly decide. But gradually, and by steady and persevering efforts, it has ended in usurping and enforcing, by means of its power of degradation and expulsion, a men-tal and civil tyranny over all Methodists, both lay and clerical, to which Rome only can supply a parallel. Many of the more enlightened both of the preachers and of the laity naturally. more enlightened both of the preachers and of the laity naturally resented this thraldom, and endeavoured, by argument at meeting and discussion through the press, to pave the way for a reform but the Conference met their exertions in a style of insolent and high-handed pretension which even in these days is something almost astounding. A series of papers were published by the Reformers, entitled *Fly-Sheets*, denouncing the abuses of which they had to complain, and urging the propriety of restoring the original authority of local bodies, and contining Conference to its primitive function of a sort of court of appeal, or central super-vising power. The well-known and systematic despotism of the Conference rendered it imperative that these Fly-Sheets should be published anonymously, unless the authors were prepared to encounter instant expulsion from the connection, and that entire incapacity to further their objects, which such severance from the body they desired to reform would necessarily involve. The Cou-ference, however, not only promptly resolved to punish with degradation and expulsion all who had thus dared to criticise their conduct-not only formally proclaimed that the mere fact of discussing the proceedings and principles of the ruling hierarchy was a crime worthy of the highest penalty they could inflict, (and what Pope could have done mote?)—but resorted to a mode exactly analogous to that of the Inquisition for discovering the offender The leaders drew up a declaration denying all connection with the authorship of the obnoxious parers, and demanded the signature to this paper of all the Wesleyan preachers. Happily a sufficient number refused to submit to this monstrous and indecent tyranny, to baffle the object of its promoters. They then took another course even more extreme : they summoned a number of suspected individuals, and asked them the direct question : "Are you the Author of the Fly-Sheets?" And on their refusal to answer such unwarrantable and inquisitorial demand, *formally expelled them* for contumacy. A short time after, the leaders of the Conference went a step further; a preacher of the name of Walton was pub-licly reprimanded and degraded for supposed connection with the writings of the reforming party;—the chief testimony against him being that of a brother minister, who, having been incau-

im being that of a brothe

tiously left alone in his study, had looked over some manuscripts surreptitiously, and seen some of the obnoxious sentiments among them! To have omitted to visit such dishonourable proving on the part of one of their body with severe censure, was bad enough : to have received and acted on such scandalous testimony was worse have received and acted on such scandatous testimony was worse still ;--but the Conference went yet further; they passed a formal vote, declaring that in their opinion this mean violator of private confidence "had acted an honourable part." Nay more, Mr Walton having refused, on plea of a pledge of secresy, to give up the name of the friend who had entrusted the obnoxious manu-script to him, the chief man in the Conference, the Pope of the Methodists, "reminded him that his *prior* obligation was to Christ and his Church, and to his bretteren in the ministry; and that no cubscenant pledge could release him from this prior obligation " subsequent pledge could release him from this prior obligation." Now, here we see four features that used to be considered distinctive characteristics of Romanism,—peremptory prohibition of all criticism on ecclesiastical proceedings; inquisitorial operations to extract information from recusants or suspected men; the canonisation of meanness and dishonesty when employed in the service of the Church or of the priestly caste; and the scouting of the obligations of truth and fidelity where the interests of "the order " could be served by breaking through them.

There does not seen to be any attempt or desire on the part of the Conference to conceal the extent of their pretensions, or to throw any "decent drapery" around the naked tyranny which they claim to administer. They seem rather to love to announce their claim of spiritual domination in all its unsurpassed enormity.

their claim of spiritual domination in all its unsurpassed enormity. This law, for example, stands upon their minutes :— Let no man, nor number of men, in our connection, on any account or occa-sion, circulate letters, coll meetings, do, or attempt to do, anything new, till it has been first appointed by the Conference. One of their most active members is solemnly affirmed to have said, by way of asserting and illustrating their unquestionable power,—" Do you know that we have a law by which the Con-"ference could expel a man for tying his shoes the wrong way if it " pleased ?" The following is a description of them by one who is himself a Methodist, though anxions for the reform of the ruling is himself a Methodist, though anxious for the reform of the ruling

is himself a Methodist, though anxious for the reform of the ruling body and the restoration of the lay element to its due place :---When the generation of these great and glorious men had passed away, there areas a few leading minds in Conference infected with the maxims and vanities of worldly polity, who soon wandered away from the good old paths along which their sainted forefathers had so successfully travelled. They began to desire the pomps, luxurles, and distinctions of other churches, and became greedy of privilege and power. The influence of the laity they regarded as hostlike to their ambitious prospects of ministerial supremacy, and they resolved therefore to curtail, and if possible to desiroy, that influence altogether. Through a long series of years, with remarkable perseverance and industry, they bent their energies to accomplish this fatal resolution, and their success has been as complete as their exertions have been unwearied, so that now the preachers have neither liberly nor rights remaining. Destroy the lay element in the Curch-persuade the people to re-ign their rights and privileges into the hands of the ministry, and observe a ready obelience to their commands in all matters ecclesiastical-get them to subscribe to the dogma, that they are not to judge God's ministers, but that God's ministers are to judge them ;---and then you have a completed priviled that God's ministers are to judge them ;---and then you have a completed priviled and degenerate people, a mystery of inquity, and a spiritual despotism that will rival Rome itself ----in one word, you iquity, and a spiritant despotism that will rival Rome itself -in one word, you ave Mathodism as it is. It is clear, then, that the encroachments on liberty of thought lis

and action which we are called on to resent and repel, do not threaten us from one quarter only; that they do not proceed from a foreign and external enemy alone, but from active and enter-prising bodies within the national fold, and haunting our daily steps. Our foes are those of our own household. It would be a blind and fatal error to suppose that when we have repelled Papal assumptions, we shall have beaten down and trampled under foot the demon of sacerdotal despotism. We shall only have de-feated one assault, and made good the defence of one breach in the fortifications of our freedom. From within and from without, by night and by day, in silence as in tumult, before us, behind us, and on either side of us,—spiritual ambition is ever busy at its task, and is never so formidable as when it is most single-minded, conscientious, and fanatical. It watches each unguarded moment with a keen and unsleeping sagacity which partakes at once of an instinct and a passion. Every relaxation of our vigilance, every retrogression in our national intelligence, every remission in our retrogression in our national intelligence, every remission in our mental activity, every false step in our political proceedings, every fresh obeisance to the Baal of hypocrisy and humbug, every suc-cessive sacrifice to the false and hollow conventionalities of the outside life of society,—will be the occasion of a fresh victory to the worst enemy which Reason and Liberty have now to fear.

FRANCE AND GERMANY. WE have latterly said nothing of either France or Germany, because there has been nothing to notice. For many months these countries were a continual source of annoyance to the rest of Europe. They were either getting up insurrections or putting them down; either destroying constitutions or fabricating them anew; either overturning Governments or sacrificing the liberties of the people; and they gave us something to notice in the poli-tical mischief they were perpetrating. Now they are quiet, pas-sive, inert; and seem to have relapsed into their old habits of seeking enjoyment rather than of stirring up the bitter waters of political strife. If they are less interesting to the politician, less delightful to the insurrectionists, they are infinitely more useful They were either getting up insurrections or putting Europe.

3

to the merchant, to society, and humanity. The complaint of them that we now hear is that they do not trade enough, notwithstanding loads of flour are coming from France, and heaps of corn coming or to come from Germany. The demand in them for colonial sugar, coffee, for woollens and cottons, and cutlery, is doing good each in its sphere, but not enough; and no small part of their inability to do more is due to those mischievous exertions which only a short time ago made them so interesting to politicians.

politicians. They are now becoming politically interesting from their inertia. Turbulent France is quiet. Her busy statesmen-whose ambitious intrigues kept her people in commotion and Europe in alarm, either fearing the responsibility of government, or become convinced, from experience, that to govern now is neither a plea-sant, an easy, a lucrative, nor even a safe employment-stand cloof from affairs, and actually leave the country without an aloof from affairs, and actually leave the country without an administration, except that of the chief clerks, as it were, of the different departments; who, accepting office as a matter of necessity, secure its emoluments, execute its duties, but are relieved from its serious responsibilities. They can lose neither reputation nor fortune by failure. France is now interesting, therefore, from her quietness, her tranquillity, her peace, and her prosperity, in conjunction with a Government destitute of political and legislative activity, and only endowed with as much executive power as suffices to keep the administration of the laws tolerably steady. Her present condition, under such peculiar circumstances, makes her a study for politicians, if she be not so terrible as when she was overrunning Europe with her armies. Whether she will continue to be interesting in this sense, or become unquiet and alarming, now that she has recovered—according to the last telegraphic information-a ministry with political and legislative activity, of which M. Leon Faucher seems the guiding spirit, united with some Royalists and some personal friends of the President, is a doubt which we must leave to be solved by time. We are rather inclined, however, to think, in the present transition condition of political knowledge, that a ministry composed of clerks is safer for France than a ministry composed of parliamentary notabilities.

Germany, too, so long in a state agitation, has settled down into quietness since her active politicians found a means of comfortably employing themselves, according to their usual fashion, in protocolling at Dresden. It is true that their labours have been worthless, like most of their preceding labours in constitution making, but they have not like them been injurious. Though they will end probably in a return to the Old Diet of Frankfort, they have served to make better known to each other the sentiments of the different ruling powers, have rubbed off their asperities, and made them capable of hereafter rolling on more quietly together. made them capable of hereafter rolling on more quietly together. The intelligence from Germany for some days has indicated the total failure of the negotiations at Dresden to give Germany a new contitution, and nothing remains, apparently—nothing else at least is now suggested—though to that there is some opposition, than to re-establish the Federal Diet at Frankfort as it was con-stituted after the treaty of Vienna. Probably that is the wisest solution of the difficulty. It will promote rather than disturb the tranquillity which begins to prevail throughout Germany. It offers, it is true, no means of political improvement: it was a very offers. it is true, no means of political improvement; it was a very inefficient contrivance for any great purpose as it was a very worked; it was merely a means of occupying some unquiet political notabilities and keeping many more in check; but if it did nothing else, and prevented unnecessary things being done, it helped to pre-serve quietness and peace. Though it neither extended freedom per improved the period in the period. serve quietness and peace. Though it neither extended freedom nor improved the national institutions, under its nominal sway the merchant carried on his trade, and the agriculturist cultivated his fields in peace. Its restoration will tend to good, though it offer neither hope nor guarantee for political improvement. In fact that must come, and can only come from the gradual im-provement in the political opiuions of the nation, in which the members of the Diet, the statesmen, and monarchs, though they may do little to promote it, will in due time fully share.

There is one great and palpable advantage in the restoration of the Old Diet. It is consonant to the treaties existing with other States, and seems agreeable to the views of their Governments. On this point we beg to quote the principal part of Lord Palmerston's answer to some questions put by Mr Anstey on Thursday evening :-

ing :--Some time ago an intimation had been made to her Majesty's Government with reference to the intention of Prussia and Austria to propose the incorpo-ration within the Germanic Confederation of territories not hitherto belonging to that confederation, as not having formed part of the ancient German empire. The House was aware that the 53d article of the treaty of Vienna declared that the Germanic Confederation should consist of certain sovereigns and sovereign princes, the Emperor of Austria and the King of Prussia being included within it, in respect of all such of their possessions as had belonged to the ancient Germanic empire. In accordance with this stipulation, the Duchy of Posen, parts of North Russia, Galicia, Hungary, and the Itatian States of Austria, were not included in the confederation. It was, ther fore, the opinion of her Majesty's Government, when they heard of the intention referred to, that this intention would be inconsistent with the puble law of Europe, unless it had the consent of all the parties to the treaty of 1815 ; and, accordingly, her Majesty's Government so early as the 3d of De-cember last made a remonstrance on the subject to the Courts of Berlin and Vienna. Soon after, France addressed to those Courts a remonstrance on the subject of a more formal nature, and subsequently her Majesty's Government, in

ł

addition to renewing their remonstrances at Berlin and Vienna, had addressed notes on the subject to each of the States forming the Germauic Confederation. Nothing as yet had been decided in the matter; knowing as all must the great value which Austria and Prussia had always attached to the treaty of Vienna, the respect which it was to be confidently supposed those Governments would, on principle, pay to contracted engagements, and the vast importance, more especially to those two great powers, of the treaty of Vienna, that the develop which so many of the powers of the continent held their possessions, he could not entertain a doubt but that the treaty would be observed; and that the intention intimated, which seemed to have been hastily and lightly adopted, without, perhaps, a sufficient attention to the stipulations which it contravened, would be abandoned. By a brief reference to the state of Enrope at the poriod of the

By a brief reference to the state of Europe at the period of the treaty of Vienna, the reader will see the justice of the view taken by Lord Palmerston of that document in respect to the German Princes, and the reason why on them of all men it is of such binding obligation. It is the title deed of their power. The greater part of Germany had been conquered by France; it was broken into fragments, and it had ceased to be an empire or a national power. The Sovereigns did not recover their independence by their own means. It was the result of the conjoint operations of Europe, and they were indebted to their allies and their people for their restoration. It was part of their subsequent policy, however, to govern in spite of their people, and to deny them political reform. They, therefore, were in fact replaced in power and retained in power by the public law of Europe, enforced by the armies of Europe. It would seem, too, by the tutelage in which Austria has placed herself to Russia, and by the interference of France and England, and probably of Russia, when Austria and Prussia proposed to make a new political arrangement that Germany has never yet recovered her political independence. She did not reconquer it from Bonaparte, and she has not reconquered it since. The dependence of nation on nation in the commonwealth of Europe has been continually and wonderfully manifested ever since the epoch of the first French revolution, which kindled the sympathies or the antipathies of all the classes and all the nations of Europe. The movements of the public mind in any one state have never ceased to be of intense interest in every other. But besides the mutualy-interwoven dependence of the people of Europe, the political form of Germany and her political existence depend—which is not the case with either France or England—on the public law of Europe. Germany is a state created by a treaty, and it is only by observing the treaty that the state can be preserved. It may become Austrian or Prussian, or be divi

THE LIVE CATTLE MARKET.

THE world seems to need a lesson of forbearance, and the lesson is accordingly given. A short time ago Government was everywhere overstraining its power, obstinately refusing to make the least concession to the growing multitude, who must have room and liberty or they perish, and Government was suddenly made to understand, by a much too fierce correction, that it had carried its pretensions too far, and ought of its own accord to have practised a little forbearance. Then license got the upper hand, and, bearing itself with more arrogance and insolence than old authority, speedily disgusted even its friends, and was put to shame almost as soon as it had time to display the hateful predominance of its selfwill. We have seen precisely the same thing in parishes and in kingdoms. Those in possession of office have arrogantly trampled on a minority till all patience has been loct, and the men who would yield nothing suddenly found themselves driven altogether from power. So it is with the Corporation of London. For more than forty years that body has resisted many reasonable demands to remove and amend Smithfield Market. It has insisted on continuing rigorously to exercise all the powers granted to it by a charter of Edward III.; and, in order to raise 5,000/ or 10,000/ a-year on the increasing inhabitants of the metropolis, it would neither promote, as was its duty, nor permit the establishment of more convenient live cattle markets. At length the obstinacy of the Corporation has exhausted the patience of the public, and now the market will be entirely put down.

On Wednesday the bill introduced by the Corporation, to make a tardy improvement, was thrown out, and the second reading of a bill, brought in by the Government, assented to, which will enable it to establish a live cattle market in a convenient spot, removed from the metropolis, and extinguish for ever the long-complained-of "Smithfield nuisance." If the Corporation had shown a little forbearance, the members of the House of Commons and the public would have greater respect for its vested rights, and the Corporation might have retained its power over the market, had it been in time a consenting party to placing it beyond the bounds of the city. It has carried its pretensions too far, and, for want of a little timely deference to opinion, the market will be removed from under its jurisdiction. Power may be legitimate, and rights may have the sanction of law; but both must be exercised with prudence, meckness, and forbearance to be lasting.

cised with prudence, meekness, and forbearance, to be lasting. What is to be substituted for Smithfield is not yet decided. The bill introduced by the Government is to be referred to a Select Committee, and from that will issue the new plan. All that has een settled by the inquiries of a Committee of the House of

Commons and of a Government Commission, and now by a vote of the Honse, is, that the live cattle market in the heart of the metropolis must be shut up. The decision carries with it nothing to regret, except the disturbance of those interests, corporate and others, that have clustered round the old spot. But such changes are continually going on in society, and the owners of property in the neighbourhood of Smithfield, the salesmen who are interested in the continuance of the market, the money-takers, the mem-bers of the Corporation whose influence will suffer, are no more justified in requiring the Legislature to protect them against necessary improvements, than were the roudside publicans in re-quiring the Legislature to prevent the formation of railroads. The only difference in the two cases, and the only reason that gives a shadow of a justification to the complaints of the Corporation and of those interested in Smithfield, is, that the market there is established by the authority of the State, and the State is now about to take certain presumed advantages from one spot and one series of persons, and confer them on another spot and on different per-sons. The complaints and their justification have their source in the fact, that the market is established by the authority of the State, and the change is to be made by the same authority. The alteration is not wholly brought about, like alterations in the channels of trade, the substitution of machinery for hand-labour, and of railroads for common roads, by the natural progress of society. It does not spring from a cause beyond the reach of the Legislature, (although the increase of population, the main cause of the present unsuitableness of the market, is beyond its control,) for, by its authority, the old market was and the new one is to established. be

We are not ourselves aware of any difference in principle between the supply of live cattle and the supply of meat, or bread, or flour, or wheat, or tea, or sugar, which should make the Legislature pertinaciously continue to prescribe and regulate live cattle markets, after it has in general come to the conclusion that all markets and the means of supplying them are best left to the self-interest of individuals. It limits its care even as to live cattle markets chiefly to the metropolis and a few large towns, and all the little towns and villages of the country are supplied with joints and steaks, and chops and soup meat, without any necessity for the Legislature troubling itself about their markets for oxen, sheep, and pigs. The difference in fact certainly is, for oxen, sheep, and pigs. The difference in fuct certainly is, while there is no difference in principle, that live cattle markets were, in ancient and ignorant times, monopolised and regulated as a part of the police of towns; and to preserve order in the streets of the metropolis, the Corproation, which was then a real legislating and governing body, was at once privileged and empowered to establish and control a live cattle market. The practice has The practice has continued, and the Legislature, now acting on the exceptional fact in contradiction to the established principle-not content with merely prohibiting a live cattle market within a certain number of miles of St Paul's, even if that be necessary when the Corporation privileges are at an end—proposes to select new sites for markets, and establish them under new regulations. In con-tinuing to act on this exceptional fact, we hope the Legislature will remember that the very same cause which had made Smith-field a nuisance—though it is only a nuisance as a market, for beasts, pigs, and sheep never toss and gore-the increase of population, is continually altering all the relations of society, and will, in a great variety of modes, influence the conditions of things around the new markets as it has determined those around Smithfield.

Amongst the changes which are connected with the multiplication of the people, and which can only take place where persons are numerous to use and profit by them, are the wonderful facilities of communication which distinguish this age. Already, by bringing supplies of meat from distant parts of the country, they have made the nuisance of one single cattle market in the heart of the metropolis less unbearable. Had Smithfield continued to be the sole source of our supply, it must long ago have been very much enlarged, and placed under more stringent regulations. Such a change, involving a diminition of the evils of Smithfield from a natural cause, suggests the doubt whether the establishment of new live cattle markets, under the direction, superintendence, and control of the Legislature, be so necessary as seems generally to be supposed. If the doubt have a reasonable foundation, it is better to mention it now, before the Legislature wastes its labours on a thankless and perhaps mischievous task, than complain of its work when completed.

Our market report for the week before last states "that 1,600 carcases of meat arrived up to Newgate and Leadenhall markets" alone in "the week preceding." That is only a portion of the supply of dead meat which London receives ; but that is no inconsiderable quantity, in proportion of the supply it obtains Smithfield. Even now a considerable quantity of meat is weekly brought from Aberdeen Leith, &c., to London. If already, then, in the natural course of things, London has come to derive an increasing proportion of its supplies as meat, and a diminishing proportion as live cattle, to be slaughtered in and about the metropolis ; and if the facilities of communication with all parts of the country are continually increasing, it becomes a question whether it would not be wise to fall in with the course of Nature, and encourage, or certainly not thwart, the tendency to procure the whole of the supply in a slaughtered state.

The great objection to relying on this one source is the difficulty of distributing the meat when it arrives in London. Already, in consequence of the great quantities at some of the railway stations, the butchers experience great inconvenience in obtaining the tions, the butchers experience great inconvenience in our annug the parcels sent to them from the country. But the railway in pro-cess of completion between the North-Western and Blackwall lines will facilitate the distribution of goods, and more facilities will no doubt be created. It will probably, therefore, be worth consideration, whether the Legislature should take any measures for securing a live cattle market for the metropolis, and should not leave the supply of meat to the influence of the ordinary principles by which most other markets are regulated. It was stated in the debate on Wednesday, that slaughterers,

neats'-foot oil factors, cat and rabbit fur dressers, cat-gut factories, bladder-blowers, &c., were general concomitants of the live cattle market. It was also said that the cattle should be slaughtered without undergoing the fatigue of being driven to distant slaughter-houses;—two classes of facts belonging to the subject, which indicate that the cattle should be slaughtered as near as possible to where they are fed, and that the various unwholesome manufactories connected with slaughtering cattle should be as much spread as possible, in order to avoid intensifying deleterious gases which alone make them poisonous. On these accounts, however agreeable it may be to all the butchers of the metropolis to have a large number of cattle brought to a spot for them to choose from, it seems reasonable, so far as legislation is concerned, to avoid establishing one or two great cattle markets, and rather to encourage individuals to make their purchases how and where they like at distant places, and slaughter cattle as far as possible from the town, and as near as possible to the field where each beast is fed. The main consideration, however, is how most effectually to secure a supply of meat for the metropolis, and, as experience has amply shown that no Legislature can provide for that, while it *can* be and is provided for by private enterprise, the Legislature, now that the Corporation monopoly is to be put down, should "henceforth no more interfere with live cattle markets, except for purposes of police, than with markets for wheat, or tea, or sugar.

SUGAR REFINING.

WE give insertion to the following letters on the various topics in connection with sugar refining. We have received Mr Coles printed letter, with a request that we will insert it either entire or not at all. As we cannot this week do the former, we are obliged, for the present at least, to do the latter :--

for the present at least, to do the latter :--To the Editor of the Economist. In the sum of 2,652d is left "to cover all expenses and profils" on refining 201,000 whiles of Hawana sugar. Reducing this to English money and weight, we kare 2214 for prefining 3,938 cwt, or at the rate of 1s 14 per cwt. Every refiner in this kingdom will agree with me this is impossible. The mistake arises from your own statement, mapper of the 5th. The Dutch refiner having exported all he could receive the draw-back on, v.s., 139,648 8-9 kilos yould obviously sell the remaining 22,000 kilos of tumps and loaves for house consumption, and would receive more than 27d per 100 kilos of two paper of the streament of the Eucle of 18 5d per cwt, a given in a total of 6,72d to cover all expenses and profits, in the place of 2,652, or at the rate of 2 so 10d per cwt. Admitting your sizement of the Eucle for given the trade of a so 10 kilos given the finer shares that allower by our Government. The tops of the set of the A state of 18 5d per cwt, or 5d more than the present duties on colonial sugars here: whilst their drawback being at the rate of 15 s 8d per cwt, is 18 1d above that allower by our Government. The finer shows a good average, still the assumed profits (giving the benefit of the Dutch receives of the Dutch forwernment. The finer shows a good average, still the assumed profits (giving the benefit of the Dutch receives) are too low to carry on the trade, and consequently there must be some bounty alight of a profitable conversion of the lower products of a refinery, by means of distilation, so carefully prohibited the this country by our Excise laws. I would hope, however, with the sciencies means at yoor dispose, you will cause further induity to parameter and thus solve an enigma which puzzles the whole trade, and seriously however, with the sciencies of a state by our dispose in your will agrees further induity to how the yiele a profitable conversion of the puzzles the whole trade, and seriously h

To the Editor of the Economist SIB,—Your paper of 5-h inst. contains your reply to "A London Sugar Refiner." If you will study your calculation again, you will find that you are in error. You allow a quantity of refined sugar to be exported from Holland sufficient to satisfy the whole dut, (less 5 per cent) with which the refiner is chargeable. The resi-due, as you justly observe, he will have to sell for home consumption; yiz., 22,000 kilos of lump, and 38,000 kilos of bastard and treacle. He will sell them, of course, at the home consumption price; yiz., bastard and treacle at 2^{sh}; lumps, not as you state at 27ff, but at a price in proportion to it, better quality, say, 58ff. Having stready satisfied his bond by exporting the required quantity, he can have no more duty to pay upon what he sells at home. You have clearly, therefore, understated his profit, and your calculation falls to the ground.

he ground. It is evident that the Datch Government underestimate the quantity that should be xported to satisfy the duty. The refiner sells the balance at home free of duty, and his constitutes his bounty.—I remain, your obedient servant, AN OLD SUGAR REFINER.

Bristol, April 8, 1851, P.S.-You have not accounted for the fact mentioned in my last, that the Dutch refiner is offering for sale here his lump sugar at almost the same price as his raw sugar. What but a bounty enables him to do this?

We had appended to the above the letter of "An Old Refiner," together with some comments upon it; but great press of matter obliges us to omit them for the present.

FREE TRADE AND RETALIATION.

WE readily give insertion to the following letter from Mr Anderson, which, we regret, was received too late for insertion last week. Mr Anderson asks, "Is it the principle of Free Trade to permit " a foreign nation to wage with impunity a fiscal war upon our April 12,

1

" shipping to its proved detriment"? Here lies the whole question, And what is good with regard to ships is equally good with re-gard to calicoes, iron, or any other class of British products. What Free Trade really demands is, that we at least, so far as we can, are bound to remove every impediment to our commerce, and to cheapen our products as much as is possible. We may greatly regret that others will not follow our example; but that is no reason why we should aggravate the evils of their restrictions by imposing similar ones ourselves. If retaliation is good with regard to ships, then it is good with regard to other articles of trade. Shall we then commence a war of tariffs with every country in the world which still adheres to the protective principle? Shall we impose restrictions on our navigation with Spain? Shall we restore a high differential duty on French wine, because they impose a high differential duty on English coal compared with that from Belgium? Shall we place a high duty on Prussian timber in place of reducing it, because they persevere in high protective duties on our manufactures? Shall we place a high duty on American on our manufactures? Shall we place a high duty on American corn, provisions, and timber, because they impose high duties on our iron and manufactures? These are the questions that have been discussed for the last thirty years :-- the Protectionists always contended for retaliation--the Free Traders for "fighting hostile tariffs with free imports." The latter policy has been adopted. England has adopted Free Trade. Almost all other countries continue their policy unchanged as yet, though everywhere there are symptoms of a movement towards Free Trade. What have been the consequences? We have successfully fought hostile tariffs with free imports. And our efforts have increased by no less than 50 per cent. in nine years. less than 50 per cent. in nine years.

We must again ask, what advantage it could be to the curers of fish in Orkney, if, in addition to a high import duty in Spain on fish imported in English ships, they had also to pay a high export duty at home, if exported in Spanish ships?

But Mr Anderson asks, why was there a clause left in the Navigation Bill giving to the Queen in Council the power of retali-liating? This is not our business to answer. We were always averse to such a clause. But even though in an extreme case, where new restrictions were imposed, some might deem it right to exercise such a power, yet was there any excuse in the case of Spain? The Spanish law is but the same as when we repealed our Navigation Laws. Their commercial tariff is even liberalised since then. And what time has elapsed for negotiation? One year and three months. But if we now act against Spain, why not against France ?- why not against Portugal ?

For our own parts, we wish to see British commercial law alone consulting British interests on the whole—all trades made as open and free as possible, altogether irrespective and independent of the acts and policy of other countries. Experience has already shown how sound such a practice is.

To the Editor of the Economist. SIR,—I will feel obliged by your giving insertion to the following few remarks on the article which appeared in the ECONOMIST of last week, headd, "Playing with Principles." The chief objects of the writer of that article appear to be to denounce my motion in the House of Commons on Thurday, 27th ult, on the differential dutics levied on British shipping in the Spanish ports, as grossly inconsistent with the viscoile of Free Trade and that the representation inconsistent with the principles of Free Trade, and that the proposition involved in it, if adopted, would lead to highly injurious results in reference to our trade with Spain.

My delinquency, indeed, in respect to his assumption of "playing with prin-The provide the provided of th had, your screen is by far too transparent to do it.

But to the two points on which we are at issue. And, first, How was my motion inconsistent with the principles of Free Trade? Is it the principle of Free Trade to permit a foreign nation to wage with impunity a facal war upon our shipping to its proved detriment, when we have the means of redress in our our supping to its proved detriment, when we have the means of redress in our hands, and can use that means without detriment to any other British interest— nay, even with advantage to important branches of foreign trade? If so, I repudiate such a description of Free Trade. I stated facts in the House, and have endeavoured to farther illustrate them in a letter in the Times of yester-e day, showing that this can be done without danger of condemning "our peoply to eat dear oranges and dear nuts, to drink dear wine, or to raise the price o oil and woel to our manufacturers". oil and woel to our manufacturers." And particularly from the example of the United States of America, I think I have shown that, while no perceptible enhancement of the cost of these articles which the writer enumerates would ensue, the adoption of my proposition, by driving dear ships and indolent and unskilful masters and mariners out of the transit trade with Spain, and substi-tuting cheap freights with quick and safe transit, would both improve and ex-tend our trade with that country. Without meaning app discussed

Without meaning any disrespect to the writer, I will decline to follow him through all the windings of his arguments, in which he has, I consider, con-founded cases having litle or no analogy, as well as displayed a want of infor-mation on some important practical facts. I take this course, because I am able to place in opposition to his views the opinion of partice fully as capable, and I think more so, of taking a practical view, and forming a correct conclusion upon such a question as either the writer or myself.

I presented a petition to the House in support of my motion signed by forty-seren mercantile times and shipowners of the city of London. Among the merchants were some of the most eminent firms in this city, containing mem-bers whose long connection and intimate knowledge of the trade with Spain, combined with superior talent, entitled their opinion to the highest considera-tion. These merchants, so far from considering my proposition calculated to injure their trade, look upon it as the best means for extending it.

But let me ask the writer a question. He has made some allusion to Mr. Gladstone's proposition during the discussion on the Navigation Bill. That

proposition was to make the concession to foreign shipping in our Navigation Laws conditional on their first making equal concessions to our shipping. The Government admitted the principle of mutual concessions, but proposed that we should begin first, giving to the Crown the power of retaliating upon those countries who might not reciprocate our concessions, and for that purpose the 10th and 11th clauses in the act were inserted. In short, the same prior ple was involved in the proposition of the Government, now become law, as in has of Mr Gladatone; the only difference being in the mondus operandi. His was a condition precedent; their's a condition subsequent. And they were all Free Traders. Traders

1851.]

was a condition precedent; their's a condition subsequent. And they were all Free Traders.
Now, sir, jif the clause in question is to remain inoperative in such an outrageous case of non-reciprocity[as that of Spain; for what purpose, in the name of common sense and hone by, was it enacted? And being enacted as it was with the concurrence of most, if not all of the leading Free Traders, with what justice am I chargeable, as a Free Trader, with inconsistency in proposing that it should be put in operation in such a flagrant case as that of Spain?
Let it be borne in mind that I am dealing with a question of free navigation. I want fairplay and no favour for British shipping, and the removal of unfair obstructions to British commerce; and I contend that the inconsistency rests with those professors of Free-Trade principles who opposed my proposition for effecting these objects.
With regard to our freaties with Spain, my antagonist has done me some service, without perhaps intending it. I quoted these treaties to show that Spain and violated every one of them, and that there was no "most favoured nation " condition to prevent our dealing with Spain in the same way as we have dealt with Belgium in retailaring differential duties. He has reminded me of a circumstance which I had overlooked, and which seems to put beyond a doubt the correctness of my opinion on that part of the question, namely, that the British Government and the British Parliament decided, some years since, that the freaties with Spain were of no more value than waste paper. We have, therefore, a *tabula resa* to proceed upon whenever we may determine to have this differential duties.

treaties with Spain were of no more value than waste paper. We have, there-fore, a tabula rasa to proceed upon whenever we may determine to have this differential daties question settled. And now, sir, for what the writer is pleased to term the *ridiculous* part of the exhibition. Having made up my mind to adopt the suggestion of Mr Cardwell-namely, that having, by bringing the subject before the House, strengthened the hands of the Government, I would promote the object in view better by leaving it for a while in their hands, rather than by pressing the motion to a division, I proposed to withdraw it. The somewhat unusual course was taken, f.r what I considered a party purpose, to oppose the withdrawal. The motion being thus taken out of my hands, I recorded my vote against its being at this time pressed further on the consideration of the House, the question being that the House should go into committee the next day to consider it. In doing so. The House should go into committee the next day to consider it. In doing so, I cannot see how I acted either inconsistently or ridiculously. I have for-tunately the testimony of members of the House of much greater experience

than myself to the contrary. In conclusion, I feel that the discussion in Parliament which I have been the humble means of cliciting will be of considerable benefit. And I do not intend to let the matter drop while Spain continues to exclude our ships from her ports, and to obstruct our commerce in the manner in which she has done for twenty-seven years.— I am, Sir, your obedient servant, Norwood, Surrey, 2nd April. ARTHUR ANDERSON.

Agriculture.

A WET MARCH .- AUTUMN PLOUGHING

The very heavy rains of last month seem to have thrown the spring work of the farmer greatly behind, not only on the heavy soils, but on much of the light land as well. The frequently-occurring showers, too, have since kept the land in a damp and sticky state. To the light soils this will not be of much consequence, as sufficient intervals of dry weather have occurred to permit spring corn to be sown, and the preparations for turning may yet he accomplicated in seasonable time. preparations for turnips may yet be accomplished in seasonable time. But even on the driest soils the advantages of autumn ploughing are becoming more and more apparent; and on the heavy soils, which have not been well prepared in the autumn, there is this year a very indifferent prospect, either for mangold wurzel or turnips. Indeed, the farmer who means to grow roots on strong land with anything like certainty, must not only plough and clean his root-ground in the au-tumn, but must lay on his manure at the same time; then, heavy land, tumn, but must lay on his manure at the same time; then, heavy land, having been ploughed clean and manured, and well laid up to receive the winter's alternations of weather, is nearly as safe for a root crop as light land; and after a plant has been established, will grow a much heavier weight per acre. The preparation of the land in spring will then require no ploughing, and there will be no necessity for compres-sing the soil in carting on manure. The chief reason why clay-land farmers find it so difficult, or, as many believe, so impossible to grow roots, is, that they attempt to prepare their land in the spring, and put off until that season all that they should have done in the autumn. Last year they failed to get a root crop, because the spring was too dry, and by the time they had pulverised the land and laid on the manure, the soil had become too dry for the mangold or turnip seed to vegetate: this year there is ground for fearing that the soil will to vegetate: this year there is ground for the mangold or turnip seed to vegetate: this year there is ground for fearing that the soit will become too adhesive before the seeds can be sown. Another point of great importance in growing roots on clay land, is to make an artifi-cially good seed bed, by drilling in with the seed a large quantity of ashes, fine mould, or the like. Some of the most successful growers of roots on clay drill in from 30 to 40 bushels of ashes, with a certain quantity of hones gueno ways dust or other light means to the certain quantity of bones, guano, rape dust, or other light manure, to the acre; and with such aids, and where the land has been well prepared and and with such aids, and where the land has been well prepared and manured in the autumn, a failure of plant or crop is scarcely heard of. We have heard it objected to laying on the manure in the au-tumn, that it will be washed away by the winter rains; but the ex-periments of Mr Way and Mr Thompson, as to power of clay to ab-sorb manure, distinctly prove the fallacy of this objection, at least, as regards clay soils; and if the occupier of clay hand which has been deeply drained, will watch the water issuing from his drains, he will be satisfied, from its clearness, that none of his manure is carried off by the drainage water.

be satisfied, from its clearness, that hold of the body by the drainage water. We referred to the paper on this subject, which is in the 25th num-ber (1850) of the Royal Agricultural Society's Journal, at the time of its publication, and it is one well worthy of the attention of farmers. The want of autumn manuring and preparation on heavy land will be

severely felt this season, which is one calculated to read to all farmers, especially to clay-land farmers, a grave lesson upon the necessity of looking a-head and preparing their land in the autumn. No doubt this implies some additional activity, and probably some extra outlay to begin with, but when the system has been once established, it will be an actual saving in the cost of cuitivation. Farmers are rapidly losing their delusive hous of protection. an actual saving in the cost of cultivation. Farmers are rapidly losing their delusive hope of protection, and all who are intelligent admit, that there is much to be done on their own farms which has never yet been attempted, and many improved applications of means they have hitherto neglected, from which they may derive more benefit than they can get through protection.

SPIRIT OF THE TRADE CIRCULARS.

(From Mesers Drale, Brothers, and Co.'s Circular) Havana, March 8, 1951. Our sugar market has presented little animation during the past month. Of late, however, the planters have shown more disposition to meet the lower offers of purchasers, and more business has consequently been done, but the less favour-able accounts just received from the U. S. and Europe will again check trans-tions and a forther dealing in prices may be backed for. The weather conable accounts just received from the U. S. and Europe will again otherk trans-actions, and a further decline in prices may be booked for. The weather con-tinues very favourable, and the supplies from the interior are larger than any previous year at the same period. The exports, on the other hand, are pro-portionately large, amounting during the past month to 49,128 boxes from this port, and 25,360 from M stanzas, and the stock at both places may be estimated at about 130,000 boxes. Our quotations range as follows:—

Foreign Correspondence.

From our Paris Correspondent.

From our Paris Correspondent. Paris, April 10, 1851. The whole week has been spent in abortive and almost ridiculous attempts to compose a new and definitive Cabinet. Whenever a new combination was tried by Louis Napoleon, it was always with the posi-tive condition that M. Baroche and M. Fould would be accepted among the new ministers. Hethought of obtaining an alliance with the moderate members of the Lett represented by M. Odilon Barrot. But M. Odilon Barrot had given a programme which could not be ad-mitted; he demanded the repeal of the law of May 31st, and the re-relar revision of the Constitution. If the majority refused the revigular revision of the Constitution. If the majority refused the revi-sion, he declared that Louis Napoleon ought to abandon the Govern-

ment to the new President, who would be returned by the people. The President refused to adhere to the second condition, and M.

The President refused to adhere to the second condition, and M. Baroche said that he could not promote the repeal of the law which he had proposed to the Assembly. M. Odilon Barrot added that M. Baroche and M. Fould had been obliged by recent defeats in the Assembly to give in their resigna-tion, and a Cabinet would incur the risk of being in direct hostility with that same majority if those men were admitted among its members.

that same majority if those men were admitted among its members. The President and his two favourites began then to negociate with the Legitimists. They had despatched to Venice M. Falloux in order to propose to the Count de Chambord a sort of confederacy be-tween the Elysee and the Legitimists. They received favourable information from Venice, and they already imagined that they would easily obtain the support of that party. They proposed seats in the new Cabinet to M. Vatimesuil and M. Benoist d'Azy. It was already believed that the arrangements were accepted by all the candidates, but the receiving of the Legitimits curved such an ellipseed but the majority of the Legitimists opposed such an alliance, and obliged M. Vatimesuil and M. Benoist d'Azy to withdraw from the combination.

A third combination was also tried with the Orleanists. Proposals had been made to M. Malleville. It was said that M. Changarnier would be promoted to the dignity of Marshal of France, and his com-mand of the army of Paris restored to him. But M. Malleville re-fused as well as M. Barrot and M. Vatimesuil to become the colleague of M. Baroche, against whom they had so recently made a coalition.

It seems that the composition of the new Cabinet is become impos-sible, as long as the President continues to impose the names of M. Baroche and M. Fould, and to demand the support of the other political parties of the Assembly. He will be obliged either to take his Cabinet entirely from among

He will be obliged either to take his Cabinet entirely from among the Bonapartists,—but then it is nearly certain that such a Cabinet will not have a majority in the Assembly, wor to choose it from among the Theirs party, without a tineture of Bonapartists; and this Cabinet, which would propose the repeat of the Electural Law of May 31st, would be equally defeated by the L gittinists and Orleanists. It seems then that the present situation is very critical, and nobody sees how Louis Napoleon will extinct themself from it. It is, how-ever, indispensable to recompose a definitive Government. Other members of the transitory Cabinet themselves have urged the Pre-sident to deliver them from their awkward position.

THE ECONOMIST.

[April 12,

١

۱

M. Vaisse, the provisional Minister of the Interior, has besides presented that the reports of the Prefects were very discouraging, and it was necessary to have a strong Government to repress the the intrigues of the Socialists. Indeed the Socialists are making the intrigues of the Socialists. Indeed the Socialists are making great progress in many departments, and chiefly in the south. Even in Paris there is a beginning of popular agitation, which is due to the sad state of manufactures. More than 10,000 workmen are without employment; those who have been preserved in the work-shops have scarcely sufficient work to occupy themselves, and spare time excites them to occupy themselves with politics. If this want of work should continue long, and the operatives cannot earn their usual wages, they might again be excited to riots and disturbances, and they would endanger the whole society. The transitory Cabinet urged for their motives the President to

and they would endanger the whole society. The transitory Cabinet urged for their motives the President to hasten the formation of the definit. Cabinet, and new negotiations were begun yesterd y. M. Leon Faucher has been summoned to the Elysee, but he will not easily find eight colleagues. He has indeed great ability, but his stiff and haughty demeanour prevents him from obtaining the sympathy of the representatives who profess his new neiticed engineers.

from obtaining the sympathy of the representatives who profess his very political opinions. The President of the Republic has already lost a part of his popu-larity, and it is every day more prohable that he will be obliged to abandon his high situation in May 1852. Nearly all the newspapers have abandoned him. He is now supported but by two papers, the *Constitutionnel* and the *Patrie*. The journal *Le Pags*, which was en-tirely favourable to the Elysee, has chosen M. Lamartine as his dictator in chief, and the project of a prolongation of the powers by the Assembly is rejected by nearly all the papers. The National Assembly have decided, yesterday, that they would take a whole week's holiday during Easter. But they will probably recall such a decision if the definitive Cabinet be not named before that time.

named before that time.

HALF PAST-FOUR .- The market was very dull, and the prices of our securities were not stirring. Every stockholder was waiting for the formation of the new Cabinet. A new ministerial list was circulating, But it does not seem to be more definite than those of the last few days. It was composed in the following manner :--M. Buroche, at the Interior; M. Rouher, Justice; M. Fould, Finance; Gen. Randon, at the War Department; M. Buffet, for the Navy; M. Chasseloup Laubat, for the Foreign Affairs; M. Bocher, at the Board of Trade; M. Giraud, at the Public Worship; M. Magne, at the Public Works. According to another report, the Cabinet would be formed with M. Leon Fancher, M. Drouyn de Lhuys, M. Magne, and General Rostolan.

Rostolan.

The Three per Cents. varied from 59f 45c to 57f 50c; the Five per Cents. from 92f 90c to 93f 5c; the Bank Shares from 2,110f to 2,105f 50c; Northera Shares from 477f 50c to 476f 25c; Strasburg from 373(75c to 372(50c; Nantes from 281f 25c to 280f; Marseilles from 206(25c to 207f 50c.

FRENCH IMPROVEMENTS IN GRINDING.

To the Editor of the Economist. Sin,—One fact tells more with some people than a hundred arguments, and it were hardly possible to offer a more apposite or striking confirmation of the fruth of Lord Grey's remarks, in the House of Lords on Monday se'nnight, re-lating to "the adoption in this country of the improved processes which had been long in use in France" in the business of milling, than 's furnished by the follow-ing extract from a letter just received from one of our correspondents—a country miller—who serve—

ing extract from a letter just received from one of our correspondents—a country miller—who says:— "I beg to inform you that our grinding with Hanor Valekes 'Aërator' has im-proved the strength of our flour, and at the same time has enabled us to take out of 50 qrs of 60lbs wheat, 5 per cent, more of line flour than we used to take. We con also grind so much closer than we used to do when without the 'Aërator,' that I am satisfied if I had a good French fluish to our flour. "I expect before the summer is over to have two other pair of stones with the patent 'Aërator." To this mothing used he added, event that what holds seed in the events are

patent 'Alerator.'' To this nothing need be added, except that what holds good in the experience of an individual miller may, we believe, be extended to that of the entire class (with rare exceptions), or uno disc ownes; and one of the greatest advan-tages which the Exhibition is calculated to effect, will be the opening of the eyes of some of our producers to the superior means and methods adopted abroad in many departments of industry. In the special view of demonstrating to the milling interest of this country with what excellent instruments the quarries and *addlers* of La Fertiésou-Jourre supply their competitors abroad, we are at this moment landing, or the Emerald from Boulogne, a pair of French mill-stones, mounted with Valcke's apparatus, and described by our Paris correspondents as "deux meules de choic, propres à faire la mouture bien finie, comme on la fait fei."

finie, comme on la fait jei." These mill-stones will be deposited in the Exhibition building, in Hyde park, and we see no cause why the English miller, after availing him-elf of the manu-facturing applituces within his reach from across channel should, "*cetaris puribus*," fall short in that race of competition to which his business is most properly liable.—We remain, Sir, your obedient servants, East India chambers, City, April 2nd, 1851. G. BALLEY, TONS, AND Co.

LORD STANLEY'S COTTON STATEMENTS.

To the Editor of the Economist. DEAR SIR.-I have sent a few lines to the Times to point out a second fal-lacy in Lord Stanley's cotton statistics. He ascribes the diminution in the home consumption to be diminution of capital. Now, according to Holt's tables, it appears that the consumption was as

PRINCIPAL BUSINESS OF THE WEEK.

HAUTAL BUSINESS OF THE WEEK. HOUSE OF LORDS.—Friday:—Routins.—Monday:—Mutiny Bill and Marine Mu-tiny Bill read a second time Tursday:—Courts Courts Extension Bill in committee. Thus 4d. y:—Mutiny Bill and Matine Mutiny Bill passed. HOUSE OF COMMONS.—Friday:—The Budget—Acts of Parliament Abbreviation Act Repeal Bill went through committee. Mo-day:—Mr. Herries amendment on the Income Tax motion rejected. Taesday:—Select Committee on the Law of Church Raves appointed—Bill to encourage the construction of Lodging-houses read a first time—Sir H. Barron's motion for a committee of the House on the state of Ireland negatived. Wednesday:—Snithf.id Enlargement Bill lost on second reading—Smith-fiels Market Removal Bill passed second reading and referred to select committee. Thursday:—Sir W. Molesworth's motion on Colonial Expenditure debated and acj nurned.

HOUSE OF LORDS.

Monday, April 7. The Mutiny Bill and the Marine Mutiny Bill were respectively read a second time, on the motion of the Duke of Wellington. Their lordships adjourned at a quarter to 6.

Their lordships adjourned at a quarter to 6. Tuesday, April 8. The County Courts Extension Bill was discussed in committee. The discus-sion was opened by the Lord Chancellor, who repeated his criticiams upon the details of the measure; his of jections, however, being principally directed against the clause conferring jurisdictions in equity. The bill, he said, would make the county court judges neither more nor less than Masters in Chancery, in relation to which they had neither experience nor knowledge. Lord Brougham as-erted that the noble and learned lord had totally mistaken the effect of the bill, and quoted the authority of Lord Lyndhurst in favour of transferring certain portions of business in the Master's office to local judica-tures. He declared, moreover, that if the provision to which objection was made were struck out, he should not press the bill. Lord Cranworth and Lord Chancellor. The clause was retained, the Lord Chancellor declining to divide upon it. Considerable discu-sion took place upon several of the remaining olyages,

Considerable discu-sion took place upon several of the remaining clauses, one of which were struck out, especially those relating to reconcilement. Their lordships then adjourned.

Thursday, April 10. The Mutiny and Marine Mutiny Bills were read a third time and passed. Nearly the whole of the remainder of the sitting was devoted to the presenta-tion of petitions.

Friday, April 11. The County Courts Extension Bill was read a third time and passed; and the Patent Law Amendment Bills were read a second time and referred to a select committee.

Lord Brougham having moved the second reading of the Law of Evidence Amendment Bill, proceeded to describe its provisions, and was [LEFT SPEAKING.]

HOUSE OF COMMONS. Friday, April 4.

Friday, April 4. [CONTINUED FRAM OUR LAST.] The Chancellor of the Exchequer prefaced his autouncement of the changes he intended to make in the financial scheme of the year with an elaborate array of the reasons whereon he had founded the proposals originally laid before the house. In selecting the taxes that were to be abolished or reduced, he had not sought to produce striking effects or stract popularity, but had solely considered the real advantage of the tax.pryers, and especially that of the industrial classes. He retained the fullest faith in the principles that had inspired our recent policy, and led to the removal of birdens upon articles of general consumption and raw materials. His financial scheme was drawn up in perfect consistency with this principle; so far from finding the pressure of taxation extreme, there was never a time when, as he belle wed, the people were more prosperous, and their contributions for the public service more easily spared; and this happy facility he attributed to the heneflown effects of free trade. Sir C. Wood afterwards detailed the new urrangements of his budget. He had no serious change to make either in the estimates of income or expens diture given some weeks since, and he sholl on of the duty on grass seeds appeared to be universally censured, and he should, th refore, give them up. In the reduction of the duty on coffee and foreign timber he still persisted. He considered the basis on which he had proposed to heave these imposts unob-ments. In the energy to inversally censured, and he should, the refore, give them up. In the reduction of the duty on coffee and foreign timber he still persisted. He considered the basis on which he had proposed to leave these imposts unob-jectionable, and the reasons he had urged in defence of the change perfectly sound. The coffee duty would consequently be reduced to 4d per lb; the foreign timber duties be cut down to one-half the present amount. To the original proposition respecting the window tax he admitted the justases of the exception that it wanted uniformity. It was therefore his intention to sweep away the whole tax, as calculated by the number of windows, and substitute a house tax levied upon old and new houses of animal value above 200, at a uniform rate of 0d in the pound for dwelling-houses, and 6d for buildings con-taining shops. This arrangement he justified by a cupious production of argu-ments and facts, declaring that it would give full scope for all sanitary im-provements, and exempt abut 500,000 houses, now paying window duty, altogether from taxation. If the change were carried out, the present amount of duty, 1,880,000 would be reduced to about 720,000, which sum would be contributed by 400,000 of the best houses, belonging to the classes most able to

١

A.

pay, while all other dwellings, 1,150,000 in number, would be left unvisited by the tax-gatherer. The whole result of the finance scheme was to strike off 1,490,000l from the estimated income of the year, leaving a permanent surplus of about 350,000l, and a sthe reductions would not take immediate effect, placing some 900,0001 to the credit side of the public account, at the end of the current year. Against this balance the Chancellor of the Exchequer hinted that the demands of the Kaffir war would have to be reckoned. The Chancellor of the Exchequer concluded by urging some preliminary pleas in behalf of a renewal of the ie tax.

of the income tax. Mr Herries complained that Sir C. Wood had unfairly introduced a subject Which by previous arrangement was to have been postpoled until Monday. He declared that the doctrines laid down by the Chancellor of the Exchequer involved a perpetuation of that tax, and he trusted to induce the house to pause before they adopted the incubus for ever. Lord R. Grosvenor did not object to the income tax, if it could be prevented for the events done

Mr Hume inquisitorial. Mr Hume inquired what became of the Exchequer balances of money which from b

Mr Hume inquired what became of the Exciteduer balances of money which had of late been frequent and large in amount? He combatted the policy of keeping or using a surplus for any other purpose than the relief of taxation. The income tax he considered less oppressive than many other burthens upon industry, and would consent to a ratio of 7 per cent. in order to remove various items of the excise and custom daties.

items of the excise and custom duties. Mr Trelawny contended that it was necessary to pay off debt when the Exchequer was well filled, lest we should find it impossible to borrow money in a time of urgency. Mr H. Baille maintained that if the income tax were made permanent, it ball the state of the

should be modified, and its intolerable injustice rectified by a classified assess

Williams wished to have the window duty abolished, without the draw

back of a new house tax; and entered into various calculations to show that the revenue could well afford the boon. Lord Duncan approved the new finance scheme as a decided improvement upon the old plan.

Sir B. Hall reserved any opinion he might entertain respecting the income tax, but intended to divide the house on the question of the house tax at the stage.

proper stage. Mr Spooner having inquired as to the proposed period for which the income tax was to be extended. The Chancellor of the Exchequer stated that he should ask for a new lease

of three years.

of three years. Mr Henley apprehended that we were embarked upon a course which would end in an inextricable embarrassment, unless the expenditure was cut down, or new sources of revenue opened. Mr M Gregor approved the income tax, and denounced the course taken by

Mr M Gregor approved the income tax, and denounced the course taken by the opposition against it. Alderman Sidney was pleased with the new arrangement of the budget ex-cepting only the rate of taxation imposed upon shops in the metropolis. Mr W. Brown supported the Government plan of finance. Sir De Lacy Evan declared his objection to the new house tax. Mr Stanford thought the only superiority to be found in the new scheme was its greater uniformity in the mode of rating the house tax.

Its greater unitormity in the mode of rating the house tax. Mr Wakley highly recommended the system of raising revenue by taxes upon property, and hoped to see the masses wholly exempted from taxation. He nevertheless considered that many modifications were necessary, and a gradu-ated scheme should be devised of rating the tax upon various descriptions of

income. Mr T. Baring declared that the minister had yielded the window tax to an sigitation from without, and relieved a class of comparatively wealthy tax-payers while pretending to feel sympathy for the industrious masses. He pro-ceeded to encource various principles of finance, and held up to scorn the triffing balance which the Government, in reckless disregard for the public credit, in-tended to keep in the exchequer. Lord. J. Russell repeated the announcement of the Chancellor of the Ex-herement that the hunce of the present wear would be 200 doubt with a surger

Lord. J. Russell repeated the announcement of the Chancehor of the Ex-chequer that the balance of the present year would be 900,000*l*, with a perma-nent surplus of 350,000*l*. This, he contended, was no such despicable sum, and he retorted upon Mr Baring that, a few years ago, when, himself propounding a finance scheme, he had expressed ample satisfaction with a margin of only or cool 90.0002.

SO,0007. **Mr** Disraeli satirised the inconsistency of the ministers whose magnificent speeches prefaced such contemptible projects. The grandiloquent boast of a surplus had dwindled down to a pairry 300,0002, and this appeared likely to vanish under examination. He denounced the vacillation that led the Govern-ment to withdraw the trafing boon they had at first offered to the suffering agriculturists. If Mr Herries's motion should hereafter fail, the hon, member approximation of the pair to the surprise the averlap the first offered to the suffering surprise the surpris agriculturists. If Mr Herries's motion should hereafter fail, the hon. member announced his intention of submitting to the house whether the surplus which the Government dealt with so capriciously should not be devoted to the relief of agricultural distress.

Lord Ebrington eulogised the finance scheme of the Government

After a few words from Mr Frewen, Mr Wawn accepted with gratitude the relief offered by the abolition of the window tax, and which would be especially agreeable to householders in the

country. Mr Labouchere stated some facts showing the advantages that had followed

Mr Labouchere stated some facts showing the advantages that had followed the recent change in the navigation laws. Col. Sibthorp gave notice that he should propose a resolution exempting tenant farmers and military officers from the income tax. Colonel Thompson preferred the new finance project, as a further realisation of the principle that the taxes should be pail by the rich and not by the poor. Mr Alcock could not vote against the income tax, when its abolition would destroy all hones of setting rid of the duty on malt.

Mr Alcock could not vole against the income tax, when its about destroy all hopes of getting rid of the duty on malt. Mr Hudson denied the prosperity of the Sanderland shipbuilders. Mr Labouchere justified the statement he had made to that effect. Mr L. Heyworth spoke a few words in favour of direct taxation.

The wote before the committee, one of supply, was then agreed to, and the

ho use resumed. The Acts of Parliament Abbreviation Act Repeal Bill went through com-

mittee The house adjourned at a quarter past 12 o'clock.

Monday, April 8. A new writ has been ordered to issue for the Leith Boroughs, in the room of Mr Rutherford, who had been appointed a Judge of Session. The report from the committee of ways and means having been brought up,

up, Mr Herries moved the resolution of which he had given notice, setting forth that the income tax had been intended, and ought to have been a temporary measure, and declaring that the renewal should now be limited to such an amount as might be deemed necessary in the existing state of the revenue to provide for the expenditure sanctioned by Parliament, and for the maintenance of public credit. The hoa, member quoted the authority of various officials in the present and former ministries, and of other distinguished statesmen, to show

that the general understanding on which the income tax was originally granted that the general understanding on which the income tax was originally granted had been a temporary concession to financial necessity. He argued from the nature of the impost, its unjust and inquisitorial character, and the general un-popularity that attended it, that its continuance was only to be endured so long as the crisis in which it originated should exist. This, he contended, had now passed away, and pointed to the improvement of the revenue and expanding surplus now acknowledged by the Chancellor of the Exchequer in proof of the assertion. Among all the taxes which financial prosperity would enable us to abolish he assigned the first place to the income tax. The actual surplus for the year he estimated at two millions, and recommended that 2-7ths of the income tax should be remitted, causing a sacrifice of revenue to the extent of 1,500,0002, and suggested that certain regulations in the assessments of the window duties which must in this case be retained, would remove all the sanitary objections to which must in this case be retained, would remove all the sanitary objections to that impost.

The Chancellor of the Exchequer vindicated his consistency with the past, by showing that his opposition to the income tax when first proposed was offered with a special reserve of those very justifications that could now be pleaded, viz., the abolition of taxes upon consumption, such as the corn, sugar, and timber duties. The renewal of the tax in 1845 was asked for by Sir R. Peel solely for the purpose of commencing those experiments in taxation, and in that proposition he had himself concurred. Remarking that the comparative injustice of the several schedules in income assessed to the tax was a matter of great doubt, he urged many arguments to prove that it would be unwise to restrict the new tax to a period of a single year. He proceeded to justify his own scheme of finance, contending that the taxes which he proposed to remove were more injurious than the income tax, and besides promised to expand under alleviation so much as ultimately to replace the whole amount of revenue sacri-ficed at first. He commented upon the significant omission of a corn duty from the financial proposition enunciated by Mr Herries, and dwelt upon the inconsistencies betweenhis plan and that of Lord Stanley. The Chancellor of the Exchequer con-cluded by declaring that he did not, even now, wish to have the income tax voted in perpetuity, but to be continued for a while, for the sake of those more burden-some duties which it had enabled them to abolish. Mr Prinsep characterised the propositions of Sir C. Wood as instances of class legislation. None of his remissions would yield the slightest benefit to the labouring classes. The Chancellor of the Exchequer vindicated his consistency with the past, by

lab

bouring classes. Mr F. Peel, without giving an unreserved assent to the whole scheme of the finance minister, supported the renewal of the income tax. He reminded the house of the circumstances under which that tax had been imposed and con-tinued from time to time, with the progressive intention of reducing the burdens on articles of consumption. Since 1842 no less than 10 millions of duties had on articles of consumption. Since 1842 no less than 10 millions of duties had been struck off, yet the public revenue now showed that the customs and excise receipts were higher by one million annually than they were before. This policy was, however, still uncompleted; and the abolition of the income tax would fould was, however, still uncompleted; and the abolition of the income tax would leave a large deficiency in the Exchequer, to supply which they would find it necessary to re-impose some of the indirect taxes. While any protective duties remained, he could not consent to abandon the tax upon income. At the same time, he did not altogether approve the Government mode of distributing their surplus. The window duty might have been retained in great measure under the modification of a house tax, which, as a criterion of expenditure, appeared to be a more just basis of taxation than the amount of income. Mr. Thering consumed the pulsibility which had led the Government to form

Mr T. Baring censured the pliability which had led the Government to form Mr T. Baring censured the pliability which had led the Government to form their finance schemes according to the behasts of popular agit.tion. Confessing to a strong preposession in favour of maintaining a handsome surplus by way of eccurity, he could not consent to forego so large a proportion of the existing margin as was proposed by Mr Herries, although he coincided in the principle on which his resolution was based. The hon, member went on to criticise the theory, and the details of the income tax, remarking upon its injustice, and deducing from the contraction shown in the aggregate of Schedule D, the con-clusion that either the incomes from industry were dwindling under the operation of free trade, or that the subjects were guilty of most extensive frauds. The reduction of the window duty was a partial benefit, conceded merely for a popular purpose. purpo

Mr Wilson declared that the resolution now before them brought into antasar which desined the resolution how before the brought most and onion two great parties, one wishing to reimpose protective duties, the other esirous of following out the policy that had actuated the Governments for some desirous of fo desirous of following out the policy that had actuated the Governments for some years past. He then entered, in much detail, into the financial and commercial history of the country since the prevalence of free trade principles, showing how rapidly the public revenue had filled up the chasms occasioned by reduction, and how vast had been the expansion of exports and imports in almost every article known to British commerce. Denying the validity of the doetrine that any tax, if politic in itself, was to be repudiated merely because it had been called a war tax, the hon. member complained that the agriculturists were never contented with their share in the general advantages from a diminution of burdens, but required some exclusive boons devised for their benefit as a class. The census tables proved that the per centage of the population depen-dent upon agriculture was perpetually decreasing; he enlarged upon the neces-sity of throwing open the channels of industry in other directions. Mr Brooker objected to the income tax chiefly because it would enable the Government to pursue the subidal policy in which they had embarked. He also believed it was essentially unjust in its operation, especially upon the farmers, who were forced to pay an income tax even upon their losses. Rent was a symptom of pro-perity far more undeniably than any of the signs so fre-quently paraded before them, and in rent there had been a reduction of twenty per cent, or more. He denounced the vair-glorious elap-traps that had been uttered on the score of the enhanced production and cheapness of comyears past. He then entered, in much detail, into the financial and commercial

per cent, or more. He denounced the vain-glorious clap-trap been uttered on the score of the enhanced production and cheap iess of commo-lities.

Mr Slaney believed that the free trade policy had proved not less beneficial to th

The starty beneficial that to ther classes, The spooner read extracts from "Hunsard," to prove that the present ministers, when not in offics, had declared the income tax unjust, unequal, and fraudulent.

ministers, when not in once, had declared the income tax unjust, unequal, and fraudulent. Mr Reynolds, intending to oppose the renewal of the income tax, which he had apported on a previous occasion, explained the considerations whercom he had arrived at his new opinion. Lord C Hamilton found that the vote for three years was equivalent to a renewal of the income tax to perpetuity, and called on the house to refuse it, unless some attempt were made to smooth away its injustice and inequality. Mr S. Crawford also declined to vote for the tax in all its opprosedueness, which the Chancellor of the Exchequer could not be persuaded to modify. Sir R. H. Inglia urged various objections to the details of the income tax, but confessed that the proposition of Mr Herrise left all the evide it contained uncluster. The house divided on Mr Herrise left all the evide it contained uncluster. The house divided on Mr Herrise left all the evide it contained uncluster. The house divided on Mr Herrise left on evide its contained uncluster. The house divided on Mr Herrise left on evide its contained uncluster. Mr Disraeli's amendment stood next on the paper, but after some conversa-tion it was agreed to take the debate upon that ameniment on Friday. The resolution set forth the necessity of devoling the surplus to the relief of the owners and occupiers of land.

owners and occupiers of land.

Mr Hume repeated the notice he had given of an amendment for restricting

Mr Cobden wished for some opportunity of taking the sense of the house upon the question whether the ns-essment of the tax could not be improved. The report was then brought up and agreed to.

The other business was then disposed of, and the house adjourned at a quarter Dast one.

The Chancellor of the Exchequer, in answer to a question from Mr T. Baring, stated that it was not his intention to make any alteration in the Treasury Minute, or in the practice of the Excise Office, sanctioning the mixture of chi-cory with coffice.

cory with coffee. Mr Trelawny moved for and obtained, after some debate, a select co ider the law of church rates.

Lo d Ashley moved for leave to bring in a bill to encourage the construction of od ding-houses for the working classes. The noble lord showed the im-portance of this question in its moral and sanitary consequences, and dwelt portance of this question in its moral and sanitary consequences, and dwelt noon the success which had hitherto attended the experiment in London. The bill, he observed, would be simply permissive; in fact, nearly a transcript of the measure for the establishment of baths and washhouses, which had been attended by signal benefit. The noble lord then described its main provisions. It might be adopted in any borough. The council of any borough adopting the act might charge the expenses on the borough fand; and on requisition, the clurchwardens of any parish might convene a vestry meeting to determine whether the act should be adopted, but the resolution afficing its adoption not to be deemed to be carried unless two-thirds of the vestry voted for it; the vestry to adapt, but the commissioners to carry out the act, and the overseers to be empowered to levy the money necessary to bring it into operation. Vestries of two or more parishes might concur in adopting the provisions of the act. The council or commissioner would be empowered to adapt old lodging-houses, or to purchase ground on which to erect new ones. They were also to make by-laws, control of commissioners would be empowered to adapt our looging-induces, or in-purchase ground on which to erect new ones. They were also to make by-laws, subject to the approval of the Secretary of State; and to make charges, subject to the approval of the Poor Law Board; but no person receiving parochilt relief to be allowed to be a tenant of any of the proposed lodging-houses. After some observations in favour of the motion from Mr Slaney and Mr

Hu

Sir G. Grey assented willingly to the introduction of the bill, but cautioned Sir G. Grey assented willingly to the introduction of the bit, but that the the house against expecting measures of this character to remove directly the social evils upon which the noble lord had dwelt. They were to be diminished rather by individual effort, and by modifications in the law where it interposed obstacles to the comfort and improvement of the people. At the same time he obstacles to the comfort and improvement of the people. wished success to the scheme, and he thought the country was much indebted to the noble lord for having brought it forward. Mr Stanford, Mr Fox, Lord C. Hamilton, and Mr Labouchere having seve-

rally addressed a few observations to the house, leave was given to bring in bill. the

the bill. The bill was subsequently brought in, and read the first time. A lengthened debate took place upon a motion by Sir H. W. Barron, " that this house will resolve itself into a committee to take into consideration the rate of Ireland, with a view to relieve the distress there existing." This motion was, upon a division, lost by a majority of only nine; the ayes being 129, and the noes 138. The result was received with loud cheering. The other orders were then disposed of, and the house adjourned. *Here then disposed of, and the house adjourned.*

Wednesday, April 9.

Wednesday, April 9. The house met at noon, and, after receiving a great number of petitions upon the subject, proceeded to the discussion of the three metropolitan market bills. Mr B. Denison withdrew the Metropolitan Cattle Market Bill, and, Sir J. Dake having moved the second reading of the Smithfield Enlargement Bill, Mr Christopher opposed this bill. There was no desire, he said, to deprive the city of London of any of its privileges, and if that corporation had consented to the removal of the market f om Smithfield they might have retained the control of its - but they had obtimately referred to concern in the views of a com-

control of it ; but they had obstinately refused to concur in the views of a committee of that house, and of the royal commission, persisting in keeping up a most intolerable grievance, merely enlarging the area of the market, at the expense of 1,000,000*l*. The Smithfield Market Removal Bill, on the other hand, was fair in its principle, and the Government had offered to refer it to an im-partial select committee. Mr Christopher dwelt upon various objections, estab-li-hed by evidence, to the present site of the market, as regarded the grazier, the consumer, and the public, and moved that the second reading be deferred for six months

for six months. The amendment was seconded by Mr Fitzroy. Sir C Knightley opposed the removal of the market. He had been in the habit of sending cattle to Smithfield for 40 years, and had always found the market to be admirably arranged. If the inhabitants of the locality did not desire its removal, what business, he asked, had other people with the matter? Sir H. Verney advocated a change of site, which was required by the vast interest of the requiring the test of history. The required by the vast

increase of the population and by the wars of lairage. A metropolitan market ought to be accessible by rail. Mr W. Williams wished both bills to be referred to the committee. He could

not consent to the Government bill as it stood, which gave too much power to the ommissioners

Seymer supported the city plan, as did

Sir J. Dake, who, on the part of the city pian, as did some need, to let both bills go to a select committee. The corporation did not object to the Government making as many mark to as they pleased, so long as they did not take away the city market. He pointed out the advantages of the composition plan which market are did and a set of the they did not take away the city market. He pointed out the advantages of the corporation plan, which would remedy all grievances, whereas that of the Go-wernment left most of the evils as they were, and would greatly increase the price of meat.

price of meat. Mr C. Lewis supported the amendment, and detailed the proceedings from which the Government measure had resulted, the city having, until the appoint-ment of the royal commission, resisted all change. The question for the house now to decide was, not whether the city plan was a great improvement, which he admitted, but whether it was expedient that a cattle market in the heart of the metropolis should be pro-tuated, or that it should be removed to a more convenient place,—a question in which the Government, as a Government, had no interest.

Iderman Sidney supported the corporation bill, by which, he contended,

Bir Alderman Sinney supported the corporation bin, by which, he contended, the crueity to animals and the inconveniences sustained in the public thorough-fares, justly charged against the existing market, would be entirely obviated. Mr Hume said the simple question was, which of the two plans, looking at the evidence, was preferable; and all the city corporation asked was a fair

inquiry. Mr Wakley considered that the offer of Sir J. Dake, to refer the two plans to an impartial committee, was a very fair one. If the market was removed out of London, he believed it would increase the price of meat, which was a serious question. He hoped the Government would allow both bills to go before a

Sir G. Grey, with reference to this suggestion, observed that the two schemes and not be termed competing. The evidence before the house enabled it to

decide a point which it ought not to cast upon a committee, namely, which of

the two conflicting schemes should be adopted. Mr Stafford was opposed to the removal of the market, especially when the Government had not themselves fixed upon a definite site. Mr W. Miles, treating this as a question whether Smithfield market should be abolished or not, thought no one could have read the evidence without coming to the conclusion that, enlarge the present market as they would, the plague-

uld remain.

spot would remain. Mr Osborne reminded the house that they were about to vote upon the question whether the two bills should be referred together to a committee. Mr S. Wortley denied that the alternative presented to the house was, as Sir G. Grey had stated, whether one of the two localities should be preferred; the Government had suggested no locality. The real question was, whether the corporation, being in possession of a valuable market, which was inadequate to existing wants, and came forward with a scheme which the commissioners had described as a vast improvement, were not entitled to an inquiry? The corporation bill was opposed by Sir B. Hall and Mr Mackinnon, and sup-ported by Mr Mastermon. Lord J. Russell said it was his duty, as a member of thet house if the im-

Lord J. Russell said it was his duty, as a member of that house, if the in-terests of his constituents did not coincide with those of the kingdom at large, to prefer the latter. The question, he observed, was not as to two competing schemes, but whether Smithfield market should be removed form its present site

schemes, but whether Smithfield market should be removed form its present site to another to be selected by commissioners. With an increasing population, it would almost be impossible to enlarge the present area sufficiently without destroying valuable property, a_sacrifice to be compensated by an increase of tolls. This was part of a great 'public question, affecting the health of 2,500,000 of the community. Mr Mowatt opposed the bill, which was supported by Sir H. Halford. Loop a division the amendment was carried by 245 against 124 so that the

Upon a division, the amendment was carried by 246 against 124; so that the On the order for the second reading of the Smithfield Market Removal Bill, ыш

Sir G. Grey said he intended to move that it he referred to a select com-mittee of nine members, to be norminated by the committee of selection. Various explanations were asked and given upon the subject of this bill, against which a protest was entered by Mr S. Wortley, on the ground that it.

transferred to the Crown a chartered right of the city of London. A division took place, when the second reading was carried by 230 against 65. Upon the question that the bill be referred to a select committee. Mr Hume complained that the corporation had not had a fair hearing, and

protested against depriving the city of the management of its own affairs, and giving it to commissioners, paid by public money. Lord J. Russell justified the conduct of Government, who had only a public giving it to

object in view.

Sir H. Willoughby characterised the bill, which took away chartered rights lihout compensation, as a direct act of confiscation. Mr S. Wortley inquired of the chair whether the city could by counsel oppose

the hill ?

The Speaker replied in the affirmative. After some further discussion the bill was referred to a select committee. A proposal to defer the second reading of the Religious Houses Bill provoked short debate.

The remaining orders occupied the house until 6 o'clock.

Thursday, A pril 10.Mr Disraeli explained that his motion for this evening was not intended to operate against the repeal of the window tax, but to raise the question of the right of the agriculturists to fiscal relief.

right of the agriculturists to necal refer. Considerable discussion took place in reference to the petition of one Edwards, who had been committed to prison by the St Alban's Election Committee for an alleged breach of privilege. The Attorney-General defended the conduct of the committee, and a motion made by Mr Aglionby, on the subject, was ulti-metels withdraws. mately withdrawn.

the committee, and a motion made by Mr Aglionby, on the subject, was ulti-mately withdrawn. Sir William Molesworth then brought on his motion upon the colonial expen; diture of the United Kingdom. This expenditure he declared to be excessive-and he went into statistics, showing that for the year 1846-7. (since which time there were no complete returns.) the whole colonial military expenditure amounted to 4,000,0001. He adverted, in succession, to the condition of each of the colonies, stated what reductions he thought should be made in regard to each, and argued that our military stations should be ms few as possible, and should be selected so as to cost as little as possible. If our colonies were go-verned as they ought to be, no troops ought to be maintained in them at the expense of the United Kingdom, except for strictly Imperial purposes, and the expense of all troops required for local purposes should be paid by the colonists, He then argued that our policy with regard to our colonies had not been a wise one, inasmuch as it had not tended to teach them self-reliance. Of course, however, so long as representative institutions, were refused to the colonist, they must not be held answerable for the results or expenses of the policy of this country. He examined the course which we had adopted in South Africa, con-tending, that with the termination of each ware we had added to our territories, and thus sown the seeds of another war, and declaring that we could never civi-lize the Kafra, and that all we could do was to exterminate those upon our frontier. Commenting at great length upon the government of Sir H. Smith, who, he said, was with Lord Grey responsible for the present war, he described the Cape of Good Hope as not worth the price we should have to pay for it. He concluded a speech of extraordiuary length by moving two resolutions, one to the effect that steps should be taken to reliver this country from expenses of the character he had denounced, and the other to the effect that it was expedient to give to such of the colonies ns were not military stations or convict settle-ments, ample powers for their local self-government. Mr Urquhart seconded the motion, declaring that if the Government of this

ountry did not put down the colonial department, that department would put down

with our colonial empire. Mr Hawes believed that the policy advocated by Sir W. Molesworth, which Mr Hawes believed that the policy advocated by Sir W. Molesworth, which was based entirely upon pecuniary considerations, would be deeply injurious to the colonies, and would injure the best interests of the empire. Moreover, Sir W. Molesworth would find it very difficult to distinguish between what were "colonies proper" and colonies which were military establishments. He would not, however, deny that the expenses of maintaining the present military esta-blishments in the colonies were coupled of being reduced, but the consequence of Sir W. Molesworth's plan would be to abandon nearly the whole of our colo-nial possessions. And then, having abandoned them, other countries would be invited to come forward and bid for them. He did not believe that our states-men or merchants were prepared to take any such course, nor were such views entertainel in the colonies themselves. Therefore, he should oppose the motion, not on account of the money, but of the principle. Defending the conduct of those who had entered into the Kuff war, which he asserted was necessary to protect our fontier, he proceeded to deny that the colonists could take care of themselves without the intervention of the mother country. He reputated the notion that there was any connection between the necessity or utility of local self government, and the maintenance of an army and navy for the purposes of self-government, and the maintenauce of an army and navy for the purposes of Imperial control. He went on to say that Sir W. Molesworth's plan would re-

393

1

duce our trade with the colonies, and increase that of the United States by 25 per cent. Good faith with our emigrants demanded that we should keep posses-sion of territories to which they had gone out on the faith that Government would secure their lives and property. He defended the conduct of Lord Grey, who had, he said, used due diligence in dealing with the South African difficulty ; and he stated that the Government had been gradually reducing the estimates for the colonies from 220,000/ to 180,000/ annually. He concluded by moving the previous question. previous question. the

the previous question. Mr Adderley thought that the Cape question might be reserved for the pre-sent, but remarked that Sir W. Molesworth's plan contemplated doing no more with the colonies generally than Lord Grey himself proposed to do with Canada. He advocated the necessity of retrenchment, but said that it could not be hoped for while the colonial expenditure was caused by a department not under the control of the house. He supported the motion. Mr E.H. Stanley opposed it, in a speech of considerable length, concluding by declaring that the adoption of the plan would be the abandonment of our colo-niar empire.

niaj empire.

declaring that the adoption of the plan would be the abandonment of our colo-nia₁ empire. Mr Cohden remarked that Sir W. Molesworth had been charged with arguing upon pecuniary considerations, but the fact was that there never was a period in history when the state of parties depended more upon pounds, shillings, and pence. He conceived this a fair opportunity (not afforded by the Manchester school.) for a fair vote for the reduction of expenditure. Lord John Russell said that the question was a most important one, for it was not a question of saving money, but of the maintenance or desolation of the empire. He denied that the colonies would or could remain attached to the mother county, when our military establishments for their defence should be withdrawn. They must fail into the arms of other countries, and then, when we engaged in war, these colonies would become hostile stations. For there was no denying, that although we might be animated by the most benevolent feeling towards foreign nations, our great place was an object of envy to many other states, who would be only too ready to attack us if they saw us disposed to shrink from the assertion of our empire. And setting even this aside, the honour and reputation of the country would grievously suffer when we came to hear of butchery and destruction of our failow-countrymen where we had settled them. Contending that the difference of races in most of our colonies would make it impossible to grant them the constitutions desired by Sir W. Molesworth, he said that great reductions had been made in our colonial ex-penditure, and that more might follow, but he should feel it his duty to resist the motion. The debate was ediumrned till Tuesday. the motion

The debate was adjourned till Tuesday

Friday, April 11.In answer to a question from Mr Agionby, respecting the Jewish Disabilities Bill

Lord John Russell said that he proposed to take the second reading of this

Lord John Russell said that he proposed to take the second reading of this bill on Monday, the 12th of May. Some unimportant business having been disposed of. Mr Disraell, after presenting petitions praying for a relief of agricultural distress, then proceeded to say that after the notice which had been taken of the acknowledged distress existing among the agricultural classes, he felt that Her Majesty's Government, and he might say the House of Commons, also had refused to give their stipping to a one of the most important of the classes in this refused to give their attention to one of the most important of the classes in this [LEFT SPEAKING.] country.

COURT AND ARISTOCRACY.

The MAJESTY and the Royal Family continue at Buckingham Palace. On Monday the Queen and Prince Albert, accompanied by the Prince of Wales and Prince Alfred, again visited the Exhibition building in Hyde park. On Thursday Her Majesty and Prince Albert, with the Princess Royal and the Princess Alice, visited the British Museum. It is understood to be Her Majesty's intention that State Balls shall take place on Monday, the 5th of May, and on Monday, the 19th of May; and a concert on Monday, the 12th of May.

METROPOLIS.

BANQUET TO HER MAJESTY'S MINISTERS .- On Wednesday night the Lord BANQUET TO HER MAJESTY'S MINISTERS.—On Wednesday night the Lord Mayor received Her Majesty's Ministers, and a number of ladies and gentlemen invited to meet them, at dinner at the Mansion house, where arrangements for the occasion had been made, such as to indicate the chief magistrate's high consideration for so distinguished a party. The scene of the entertainment was, as usual, the Egyptian hall, which was gorgeously decorated and brilliantly illuminated for the occasion. Speeches were made by Lord J. Russell, the American Minister, the Marquis of Abercorn, Lord Palmerston, the Attorney-General. &c. General, &c.

EQUALISATION OF POOR-BATES IN THE CITY .- On Wednesday a deputation of gentlemen connected with the City Association for establishing an equalis-ation of the rate for the relief of the poor throughout the city waited, by appointment, upon Mr Baines. After some conversation, Mr Baines said, I reply, that the Commissioners had been for some time impressed with the neces-sity which existed for a material alteration in the poor-law rating and the law of settlement, and he thought it was right that the Legislature should step in to make the necessary alter thous in the statute. At present, however, in con-sequence of the unsettled state of public affairs, he could make no further pro-mises upon the subject. EAST INDIA HOUSE.—On Wednesday a ballot was taken at the East India m

EAST INDIA HOUSE.—On Wednesday a ballot was taken at the East India house for the election of six directors, in the room of retiring ones. The election fell on Mr John Cotton, Mr John Loch, Mr Charles Mills, Mr William Henry Chicheley Plowden, M.P., Mr Henry Shank, and Mr Henry St George Tucker. HEALTH OF LONDON DURING THE WEEK —The official report says:—The last week has witnessed a great improvement in the public health. The deaths in the metropolitan districts, which had ranged above 1,400 in the last three weeks of March, fell in the week ending last Saturday to 1,059. But this is still a high rate of mortality, not only as compared with what prevails in country districts, under conditions more favourable to health, but also with that which the population of London usually suffer at this period of the year. In none of the ten corresponding weeks of 1841-50, while the average of these weeks awa 946, which, if a correction be made for increase of population, will become 1,032. Compared with the latter estimated result, the deaths registered last week show an increase of 27. Last week the births of 808 boys and 752 girls, in all 1,560 children, were registered. The average of six corresponding weeks in 1845-50 children, werg registered. The average of six corresponding weeks in 1845-50 was 1,333. The mean reading of the barometer for the week was 29:907 in. The mean temperature was 43.5 deg.

PROVINCES.

COVENTRY ELECTION.—It was stated on Wednesday, that Mr Strutt had been returned for Coventry; but the report proved to be incorrect. On the morning of the nomination (Monday) Alderman Geach, of Eirmingham, a Radioal Re-former and Anti-state-churchman—pledged to bouschold suffrage and the ballot, and against any legislative action on Papal aggression—was put up, and went to the poll. The result was—Geach, 1,669; Strutt, 1,091; msjority for Geach, 578.

AYLESBURY ELECTION .- On Thursday the nomination of candidates for the ATLESBURY ELECTION, --On Thursday the nomination of candidates for the representation of the borough and hundred of Aylesbury, in the room of Mr Calvert, unseated on petition, took place in the town hall. The show of hands was in favour of Mr Bethell. A poll was demanded on behalf of Mr Ferrand. WEST SOMERST ELECTION.--Mr Gore Langton was returned on Thursday

out opposition.

REPRESENTATION OF OXFORDSHIRE -At a meeting of the Oxfordshire Protection Society, held on Saturday, and which was well attended, it was fully resolved to oppose the return of Mr Harcourt and Lord Norreys at the next general election. The names of the Marquin of Blandford, M.P., Sir Henry Willoughby, Bart, M.P. for Evesham, and Mr Stone, of Streatly, a barrister of

Willoughby. Batt., M.P. for Evesham, and Mr Stone, of Streatly, a barrister of some eminence and a large landed proprietor of the county, were mentioned. THE BOLLER EXPLOSION AT STOCKPORT.—After four adjournments, and the examination of several eminent civil engineers, the coroner's jury has returned a verdict strongly censuring the engineer employed, and recommending, "that with a view to guard against imperfect boilers for the fature, a certain standard to be adopted—any twice the extent of pressure intended to be applied; and that all boilers be tested and stranged or registered by a responsible and ap-pointed authority prior to their removal from the makers' premises!" PERVENTS TO ROME AT LEEDS.—Within the last few days considerable ex-citement has existed in Leeds in consequence of its becoming known that five clergymen of St Saviour's and two of the clergy connected with other places of worship, as well as twelve or fourteen laymen, had become converts to the Catholic church. On Thursday evening they made a public profession of that faith.

faith.

PATENT LAWS REFORM-At a meeting of persons desirous of a reform in the present law affecting patents, held on Tuesday, in the Manchester Town Hall-Mr W. Fairbairn, C.E., in the chair-it was resolved, "That it be an iastruction to the secretary, in any corre-pondence he may have with parties on the subject, to state that it is the earnest desire of this meeting that the first cost of a patent should in no case exceed the sum of 104.

IRELAND.

IRISH ELECTIONS.—The Cork journals announce that a letter has been re-ceived from Mr William Fagan, stating that last week terminated his career as a public and Parliamentary man " for ever."—In Longford the Liberals are still at sixes and sevens. Mr Serjeant Shee, it seems, in anticipation. no doubt, of a general election, declines the prospect of a six months' seat in Parliament —an honour not to be attained without some pecuaiary sacrifice.—The contest for Enniskillen promises to be an extremely force one. Both candidates and Of a general electron, definites in property of a general electron, definites in property of the general sectors, definites and without some pecuniary sacrifice.— The contest for Enniskillen promises to be an extremely fierce one. Both candidates and their friends are equally confident of success. The nomination took place on Wednesday, and the polling was fixed for yesterday.—The council of the Irish Tenant League have been inviting Mr John Stuart Mill, the eminent writer on political economy, to allow himself to be put in nomination for an Irish county on tenant-right principles. Mr Mill has replied in a letter, dated "India House, March 28," and after acknowledging in flattering terms the honour which the proposition conferred on him, he write thus :—"If it were in my power to into Parliament at present, I should be highly gratified at being returned for a purpose so congenial to my principles and convictions, as the reform of the pernicious system of landed tenure, which more than any other cause keeps the body of the agricultural population of Ireland always on the verge of starvation."—The Limerick Chronicle reports the failure of seed pota. The POTATE CROP.—The Limerick Chronicle reports the failure of seed pota.

THE POTATE CROP.—The Limerick Chronicle reports the failure of seed pota-toes in a field of two acres in the North Liberty barony. The "skillenes" are represented to have entirely decayed from the constant rains of the early part of the season.

The season. EMIGRATION.—In the beginning of the last week, so great was the influx of emigrants at Dublin, that some of the agency hu es advanced the fares for passages to New York and New Orleans; but on Friday the former rales were restored. Every day the quays are crowded by farmers, small traders, and their families, seeking passages across the Atlantic. Generally they appear to be people in comfortable circumstances, presenting no trace whatever of poverty or the effects of famine, and there are amongst them many healthy, cheerful-looking young men and women, apparently rejoicing at the prospect opened by leaving their native country for America. THE NEW PARLIAMENTARY FRANCHISE.—The registry for the county of Tipperary, under the New Franchise Act, has just been completed, and the re-sult gives a total of 6,760 voters. In the borough of Clonmel the number registered is 835, and in that of Cashel 111, so that the new act has made no material addition to the constituency of either place.

FOREIGN AND COLONIAL.

SPAIN.

Letters from Paris dated Wednesday have advices from Madrid of April 7 as follows—The Cortes have been dissolved to-day, in three months there will be a new election. M. Bertran de Lys, Minister of Foreign Affairs, is named Minister of the Interior ad interim. M.

Arteta passes to the Public Works. It may be supposed that this important resolution taken by the cabinet has been determined on by the adoption of the particular vote of M. Millare Alonzo, seconded by MM. Mon, Pidal, San Luis and other ancient ministers, who were to take a part in these dis' cussions.

DENMARK.

DENMARK. Advices from Copenhagen are of the 2nd inst. The papers publish the text of the propositions which will be submitted to the Assembly of Notables. They declare the integrity of the Danish Monarchy under the same Government representation-fleet and flag. The case of Lauenberg, how-ever, is reserved for future consideration. The Duchies of Holstein and Lauenburg will remain part of the Germanic Confederation

Confederation.

They will have their own Diets; in all state questions they will be repre-

nted in the Conneil. The Duchy of Schleswig will have its separate Diet and Administration. Certain institutions will belong to the two Duchics of Schleswig and Holstein

The Holstein army is now completely disbanded.

NORWAY. More communist disturbances have taken place in Norway. At Dron-theim, on the 16th ult, about 300 persons assembled in front of an hotel, in which the respectable inhabitants of the town were having a ball in honour of the queen's birthday, and began crying "Down with the burghers!" They afterwards sent a volley of stones against the windows, and not only broke every pane, but injured several persons in the room. A detachment of soldiers came up, and arrested some of the rioters. The latter dispersed about town, and broke the windows of several houses. The next evening the disturbances were renewed, and were of a more serious character. The people resisted the military, and four national guards were cut in the head with sharp instruments. About 320 rioters were arrested.

AUSTRIA.

AUSTRIA. The latest dates from Vienna are to the 6th. The official organs of the Austrian Government make no mention of the acknowledged failure of the Dresden Conferences. The Neuighkeits Bureau from Vienna of April 5th, says, the answer of Prince Schwarzenberg to the last Prussian note was yesterday despatched to Berlin. It contains the result of the negociation between Prussia and Austria, which is, that Prussia returns to the old diet. The question of the presidency, which was pending, is settled by a reference to the fifth article of the Bundesacte, which awards the presidency to Austria. A strong ultramontane feeling prevails in Austria. Count Leo Thun's decree in favour of the hierarchy and Papal supremacy is accepted and enforced with great eagerness. The depreciation of the paper currency begins to tell heavily upon the people of Austria.

PRUSSIA. Without waiting for the final answer from Vienna, which could perhaps be pretty nearly anticipated, Prussia has determined to enter the old confeder-ation, and thus reconstruct it in all its integrity. This resolution has been intimated to the other powers at Dreaden; the summonses to the States which are more particularly the allies of Prussia have also gone forth, and they will also send their representatives to the old imperial city. In no quarter is any opposition made or expected: the Hause-towns are as ready as the small States to join in the retirement from the weary and barren contest. Though not yet an accomplished fact, for all purposes of argument or calculation of political probabilities, the old Confederative Constitution of 1815 may be considered as re-established. Despatches received from Vienna on the Sth do not refer to the turning point the German question—viz., the offer of Prussia to accede to the Frankfort Diet.

On the 12th inst, the Second Chamber will adjourn for the Easter recess.

TURKEY.

Advices from Bosna Serai are of the 20th ult. The Fort of Jaiza has been evacuated by the insurgents and occupied by the Sultan's troops The Seraskier was slightly wounded in the engagement.

AMERICA.

Advices from New York are to the 26th ult. They are of little importan

tance. The accounts from Gold Bluff do not confirm the flattering statements which have been made of the mineral wealth of that region. The gold is found among the sand in particles so small that it cannot be separated by the ordinary process of washing.

the ordinary process of washing. A shocking massacre was committed on the Chagres river about the last of February. The victims were eleven persons, passengers on board the steam ship "Empire City," from New York—eight men, two women, and a child. As soon as the facts were known, a public meeting of the American citizens, at Panama, was held, in order to take measures for the apprehension of the murderers. Four persons have been captured, against whom there is sup-posed to be strong evidence of guilt. Latest accounts from Central America describe the country as being in a very ansettled condition. The recent defeat of the army of San Salvador by General Carrera, led to the apprehension that he might pursue his progress even to Truxillo. Mr. Chattield has published a document claiming for the Mosquito King the territory reaching to Truxillo. The blockading of Tigre Island has been abandoned by the English fleet, which has sailed toward Guatemala.

Guatemala,

Accounts from Kingston, Jamaica, are up to the 14th ult. The cholera was fast disappearing

CAPE OF GOOD HOPE. Cape Town papers are to the 10th of February, being two days later than the last advice

The only intelligence of importance contained in these papers is the an-nouncement of the relief of Forts Cox and White, which had been effected by the column commanded by Colonel Mackinnon. Just before the post left Graham's Town an express arrived from General Somerset, stating that a combined attack on Fort Beaufort was expected the following morning.

BIRTHS. On the 7th inst., in Lowndes square, the Lady Vivian, of a daughter. On the 7th inst., at Bute house, Petersham, the Lady Louisa Whitmore, of a

daughter. On the 7th inst., at Bourne park, Kent, the wife of Matthew Bell, Esq, of a daugh-

ter. MARRIAGES. On the 27th ult., at the British Embassy, Florence, by the Rev. G. Robbins, Bal-carres Dalrymple Wardiaw Ramsay, E-q., second son of the late Robert and Lady Anne Wardiaw Ramsay, and Capitain, 75th Regiment, to Anne Margaret, only daugh-ter of the late Edward Collins, Esq., f Frowlesworth, in the county of Leicester. On the 5th inst., at All Saints', South-impton, by the Rev. C. S. Fanshawe, Captain John Shepherd, Royal Navy, to Anna, second daughter of Admiral Dick. DEATHS. On the 5th inst., at Hatford home news Nummeh, the Dowaser Lady Trevelyan.

DEATHS. On the 6th inst., at Hatford house, near Morpeth, the Dowager Lady Trevelyan. On the 7th inst., at his residence, York Crescent, Clifton, in the 83rd year of his age, Thomas Browne, Esq., Vice-Admiral of the Red. On the 5th inst., at his brother's residence, in Leicester, Major Thomas Cradock, in his 66th year.

COMMERCIAL AND MISCELLANEOUS NEWS.

The election for Governor and Deputy Governor took place at the Bank of England this week, when the recommendation of the directors was adopted by the selection of Mr Thomson Hankey, jun., and Mr J. G. Hubbard. A company under a Royal charter has just been formed, called the Trust and

Loan Company of Upper Canada, with the view of lending money in that pro-vince, on the security of rates, tolls, or assessments, or on mortgages of real estate, thus supplying the capital which is essential to its progress.

estate, this supplying the capital which is essential to its progress. The directors of the General Screw Steam Shipping Company, encouraged by the success which has attended the opening of the postal service between this country and the Cape of Good Hope by their screw ships, have determined upon the extension of the line to the Mauritius, Ceylon, Madras, and Calcutta, which will be carried out without delay by ships of 1,700 tons burden, and 300 horse power, now in the course of construction for this service.

The shipping returns of the Board of Trade for the month ending the 5th March exhibit the following results :- Entered inwards-

3 8,413 362,816 370,337 With regard to the coasting trade the tonnage entered inwards was 877,179 in the month ending March 5, 1849; 958,481 in 1850; and 961,638 in 1851. The clearances outwards were 919,636 in February, 1849; 990,792 in 1850; and 1,022,212 in 1851.

1,022,212 in 1851. The Belgian Government have published the return of the working of the postal reform, consequent on the introduction of postage stamps and cheap postage, with a view to relieve the commercial interests of Belgium. The receipts for inland postage in 1848-9 were 123,2227, and in 1849-50, 104,0567. This result is considered satisfactory in comparison with the large reductions made, and it is found the revenue is advancing. On Wednesday the North American mail steamers commenced sailing from the working of the Wednesday and offer the 16th inst. form

On Wednesday the North American mail steamers commenced sailing from Liverpool twice a-month on the Wednesdays, and, after the 16th inst., from New York twice a-month on the Saturdays, up to the 19th July, after which they sail three times a-month. The Cunard line of steamers are advertised to leave Liverpool weekly, commencing from Saturday last, and from America, ou Wednesday, the 23rd inst. The Grand Surrey Canal Company have notified a reduction in their charges, which will date from the 31st ult. The alteration is the same as that recently adopted by the Commercial Dock Company, with the exception that a monthly, and not a weekly rent, will be substituted for the quarterly terms hitherto cus-tomary.

The dividend declared on Thursday at the meeting of the Royal Mail Steam Packet Company was at the rate of 2*l* per share, free of income tax, for the last six months of the year 1850. The report and accounts were received in a very gratifying manner by the shareholders.

The Archbishop of Canterbury has instituted proceedings against the Rev. S. Caffin, a Kentish clergyman, for Puseyite practices, and proposes to deal with other Romanising priests.—*Church and State Gazette.* At Berlin, judgment has been passed in favour of Prince Albert's claim to an annual rent of 3,750l out of the estate of the late Duke. Lord Seymour and Mr Cornewall Lewis have brought in a bill for disafforest-ing the forest of Hainault in Essex. A petition signed by the whole of the jury has been forwarded to Mr Locke, King, M.P. for East Surrey, for presentation through the Home Secretary praying for a commutation of the sentence of death passed upon the men left for execution, and lying in Horsemonger lane gaol, who were convicted at the last assizes of the robbery and murder of Mr Hollest. It is based upon the string conviction of the jury that neither of the men, Levi Harwood nor Samuel Jones, fired the shot, but that it was fired by the approver, Hiram Smith. On Saturday a number of young men, dressed in red uniform, and furnished

Ones, nreuses snot, out that it was bread by the approver, Hiram Smith. On Saturday a number of young men, dressed in red uniform, and furnished with apparatus for cleaning clothes and shoes, were stationed in the vicinity of the Exhibition building and west end thoroughfares. They are all lettered, and wear badges inscribed "The Shoeblack Society." They have been selected to these offices from the London ragged schools, previous to being assisted to emi-grate. grate.

grate. The fruits of the purchase of a bloodhound by the Lincoln Association are, that while 70 sheep were slaughtered in the neighbourhood of the city during the first two months of last year, not six have been slaughtered during the two past months of the present year.—*Lincoln Gazette*. A sale of fifteen bulls, of the Durham race, took place a few days since at the experimental establishment at Pin, in France. The prices obtained varied from 1,050f to 2,110f; the average being about 1,524f for each animal.

h

THE ECONOMIST.

M. Sellier, an ex-professor, a landowner, and mayor of an important commune in the department of the Nievre, has just been fined 50f by the Tribunal of Correctional Police of Clamcoy, for having given in the evenings gratuitous lessons in writing and arithmetic to his servants and other persons, ten in number. The law does not allow such teaching without an authorisation. The Executive Committee have issued another red-lettered handbill, warning

exhibitors, native and foreign, that the Exhibition will positively and un doubtedly open on the 1st of May. Mr Wegg Prosser, M.P. for the county of H. reford, has, it is said, joined the Romish church.

The Electric Telegraph is already in full operation between Turin and Felizz no.

Literature.

ITALY IN 1848. By L. MARIOTTI. Chapman and Hall, Piccadilly THE national unity of the Italians, which is so much boasted of by some persons as the sure means of regenerating Italy, is not very favourably illustrated by the present volume. Signor Mariotti is himself a member of the d'Azeglio or moderate party, and his differences with Signor Mazzini and his friends is blazoned forth at every page. Not only leading Italians differ, but they differ so heartily and so widely, that they can neither conceal their differences, nor suppress expressions that can only exasperate them. We presume that Signor Mazzini will find it necessary to take notice of what Signor Mariotti says, exemplifying the national contentions rather than the national unity. Besides the discord thus practically manifested, the volume contains much evidence that national unity is little known in Italy, except as a theory. Whoever builds his hopes of the regeneration of that country on such a sentiment, must be content to wait till it be formed.

Signor Marioth says, exemplifying the national contentions rather than the national unity. Besides the discord thus practically manifested, the volume contains much evidence that national unity is little known in Italy, except as a theory. Whoever builds his hopes of the regeneration of that country on such a sentiment, must be content to wait till it be formed. It is quite true that "a sudden movement of the people," whom the governing bodies all over Europe had supposed to be completely drilled into unswerving habits of submission, in Italy dubbed by Signor Mariotti " the national feeling," but more correctly also described as "a blind instinct with the many,"—it is quite true that a sudden movement "had been for a moment more than a match for all existing powers. It had forced four of the Italian princes along with it; it had perplexed, struck dumb European diplomacy; it had strained—all but snapped—the chains of what is revered as the fate of nations." But a similar "blind instinct," or the agitation of a few, had had precisely similar effects at Paris, Berlin, Vienna, Hungary, &c., and had, in like manner, more than struck dumb—more than perplexed European diplomacy: it had for the moment snapped all the chains which nations usually rever as the blessed means of social salvation. But nobody can now believe that the overthrow of the throne of Louis Philippe, the insurrection that drove away Prince Metternich, the disturbances that frightened the King and ministers of Prussia, or even the more protracted war in Hungary, were the results of a permanent mational feeling, or were the produce of anything more than a very temporary and very blind impulse or instinct on the part of the people.

The phenomena are not, therefore, less curious nor less important but rather more curious and more important. They confirm the theory, frequently lost sight of by those who still rely on military organisation as the means of social order and civilisation, that the people are the basis of all power, and that no throne is safe, no power strong, no society secure, except it rest on the affections, habits, opinions, and convictions of the people. From them are gathered all the means of bureaucratic rule and military organisation, and when they become hostile to their rulers, no system can, in spite of them, be long preserved, or its continuance even for an hour relied on. What can guard against such sudden outbreaks ? What can insure the perpetual zeal of officials and the perpetual obedience of soldiry? Not a system of government or discipline which is a mere bundle of protocols or orders of the day, destitute of a living soul, except as that is found in the multitude ; and those who rely on either will find themselves, most probably ere long, again subduced by a "blind instinct" or impulse in the many. There is no means by any kind of theory or contrivance to govern a nation in spite of itself, and there is no alternative but to govern it for itself, and by its own affections, opinions, and convictions. The supposed blind instinct was, in one respect, very far sighted It saw clearly enough that Louis Philippe, and Prince Metternich, the Prussian bureaucracy, Marshal Radetzky, supported by Croats, and the Italian Princes, did not, as they pretended, promote the hap piness and welfare of those they undertook togovern. That was and is a permanent conviction pervading the masses, supported by theory, justified by facts, and deserving the name of a national, or even a universal feeling ; but at the some time there is another national crumversal feeling existing side by side with this, namely, that some Louis Philippe, some Prince Metternich, some Prussian bureaucracy, some

The supposed blind instinct was, in one respect, very far sighted It saw clearly enough that Louis Philippe, and Prince Metternich, the Pruesian bureaucracy, Marshal Radetzky, supported by Croats, and the Italian Princes, did not, as they pretended, promote the hap piness and welfare of those they undertook to govern. That was and is a permanent conviction pervading the masses, supported by theory, justified by facts, and deserving the name of a national, or even a universal feeling existing side by side with this, namely, that some Louis Phillippe, some Prince Metternich, some Prussan bureaucracy, some Marshal Radetzky, and some Italian Princes, are necessary for the safety of society. The individuals, and what they did, were not approved of, but the system which they were supposed unworthily to carry out. There is a general or universal that the system must be preserved, on which is founded the power of the individuals; but when the individuals so conduct themselves as to make it palpable to all that in their hands the system must be worked failure, their power totters to its fall, and the system must be worked by others. In nearly all Europe as well as in Italy, there was and is a

401

981,869

[April 12.

conviction that the individuals in possession of power did not and do not effectually understand or work the system ; but there neither was nor effectually understand or work the system; but there neither was nor is there any preparation to substitute for them other individuals or to change the system. In this respect, the impulse was everywhere blind, and the consequence is, that everywhere there is only a mere change of names and forms, or the restoration of nearly the old men and the old forms. In Paris the impulse was as blind as at Vienna. At both places there was the same desire to get rid of the old men, but to retain the old system; and in France, M. Ledru Rollin and the republicans, and M. Louis Napoleon and the imperialists, and in Germany Messrs Gagern and Schmerling and the theorists, did not, in spirit, depart from the old contrivance. It was still coercion and not, in spirit, depart from the old contrivance. It was still coercion and for similar objects, only administered by other hands. We are quite sure, too, from the language held by Signor Mazzini and his friends, and by the actions of his party when in power, that the Italians are just

ITALIAN UNITY. Only two months later the Italian nation was no more. Of those four princes, one threw himself on the ground at Rome, and, unable to do more, offered all the resistance of passive inertia ; another, in Tuscany, was ready, though with greater cautiousness, to follow the same course; whilst a third, the most utterly de-pised of the number, ventured on an open outbreak with the people, and, by

de-pised of the number, ventured on an open outbreak with the people, and, by a single stroke, annihilated it. It was not merely a prince that deserted the national cause in Southern Italy: out of seven millions of souls, the kingdom of Naples hardly supplied one combatant for the War of Independence, — after the 15th of May hardly subscribed one farthing. It could not be the King's might that put a check on all individual enthusiasm; volunteers would have been suffered, as they had actually been suffered, to march, either singly or in masses. Fut the Neapo-litan people had vanished. The 15th of May had thrown it into consternation and stupor: to that, again, apathy and inertia had succeeded; more fatal, more hopeless, be cause more habitual. The leaders of the multitude were still astir, indeed, but most of them had lost sight of the main object; sugaged in a hope-less struggle against local evils,—in some instances, too, strange to say, almost unconsciously won over to the views of the author himself of those evils. The following passage is nn eloquent description of the impulse

The following passage is an eloquent description of the impulse under which the Italians acted :-

PATRIOTISM. PATRIOTISM. Even during the first panic and dissolution of all Austrian order, the Lom-bards had not summoned sufficient courage to meet them—the main body of them—in the open field. Had it not been, therefore, for any other purpose than to prevent Radetzky from turning the open plain and the smaller towns and villages into a smoking wilderness, it was necessary to set up the cry, "Italy to the rescue!" As a Milanese deputy, soliciting the aid of the Sardi-nian army, had expressed himself from the balcony of his hotel at Turin, "The Lombards had made the revolution; it was now for the Piedmontese—indeed for the whole Italian natiom—to make the war." Nor was Italy deat to the call—indeed she anticinated it. Not only did she

Lombards had made the revolution; it was now for the Piedmontese—indeed for the whole Italian nation—to make the war." Nor was Italy deaf to the call—indeed she anticipated it. Not only did she not wait for the consummation of the victories of Milan and Venice, but she did not even need the signal of the Lombard outbreak. The revolt at Vienna turned every head in Italy. From the first announcement of that event there was a general rising of the people of Florence, Naples, and Rome. The Impe-rial arms were torn down from the palaces of the Austrian embassies; at Rome on the 21st of March, at Florence on the 23d, at Naples on the 26th. The same scenes, and even stranger, were performed at Leghorn, Civitavecchia, all over the Tuncan and Roman provinces, and far away in the Italian colonies on the Bosphorus, at Pera and Galata. We have the evidence of unconcerned foreign ministers to the effect that these outrages, equivalent to a declaration of war, were perpetrated in the most open and clamorous manner; not by the mob merely, but by men apparently of the higher orders, acting in the presence of innumerable crowds, before the very windows of royal residences, under the sympathy and applause. Austrian ministers, after vain demands for reparation backed by Prussian and Russian diplomacy, quitted their residences, with loud protests against so flagrant a violation of the laws of nations. The challenge could not have been given more simultaneously by the whole of Italy: nor were the deeds far from corresponding with the tone of those proud words of defiance. All Italy was eagerly rushing to arms: 2,000 na-tional guards from Bologna broke into the Modenese territory on the first report of a popular outbreak. Citizen and regular troops from Leghorn, the whole body of studente from Pies, set forth on their march across the Apennines, with-out waiting for guidance or orders. The youth of Turin and Genoa stormed for strus and deliberate rulers. Masses of armed men were mustering in the streets of Rome. Naples was dragge

"It is the will of God !" was the cry; the same as in the (ld wars of the oss. Such tears of joy as were then shed Italian eyes were unused to time Cross.

Cross. Such tears of joy as were then shed itanian eyes were under to under out of memory. The alarm spread far and wide. The commotion was felt in Switzerland and France; at Corfu and Malta; at Constantinople and in Egypt; in Spain and Algiers; at New York and Montevideo. Wherever an Italian heart beat, there—truth must be said—was a soldier of the country. No consideration of age or infirmity, no private interest or domestic tie, proved a hindrance: old military men, grown hoary in the pursuit of humble literary occupatione, girt on a sword that had laid inactive since Napoleon. Unrecognisable by long

absence, denaturalised by long exposure to distant climates, by the adoption of outlandish manners, they stood on that native soil they had long given up all hope to revisit. A moving sight and -ublime, was that meeting of exiles under the walls of Mantua and Verona. Thither most of them repaired; many actu-ally having, many refusing to have, any other home than the camp. The nation was active and alive, but it had no principle of co-herence; no commonline of action had ever been chalked out for such

a contingency, no preparations for it had been made; while the Austrian Government, having long perfected its plans for subduing and keeping down the Italians, the task was comparatively easy to re-establish its dominion. We obtain from such faots a conviction that the praises dominion. We obtain from such facts a convector that the praces heaped on Marshal Radetzky are out of proportion to his merits, ex-cept that we may admire great energy in carrying out these planes at a period when other men are in their second childhood. Sad and terri-ble it is for us, and sad and terrible it will be for our children, to find ble it is for us, and sad and terrible it will be for our children, to find

ble it is for us, and sad and terrible it will be for our children, to find society thus a prey to a system, ruinously destructive, in the hands of the Metternichs, the Louis Philippes, and the Frederick Williams, and begetting at times "blind instincts" that, however ultimately they may correct it, are for the moment still more ruinously destruc-tive, compelling society, as its only resource, to go back to the old system and the old men. Signor Marioti's book is a detailed and minute history of the events in Italy in 1848. It is the only complete account of them which has yet appeared in an English dress, and the author has made good use of all the Italian, French, German, and English sketches of them that have previously been published. The book is elequently and pleasantly written, but it is nevertheless as ad record of hasty mis-takes, of earnest patricism misled, of zeal without knowledge, of the miserable quarrels of ignorance and ambition, of the foolish intrigues and rivalry of some, and the silly vanity and imbecility of others, that and rivalry of some, and the silly vanity and imbecility of others, that soon brought the outstand to an inglorious end. It is a complet soon brought the outstand to an inglorious end. It is a complet account of a mournful subject—a great multitude foiled, by ignorance and dissension, in the pursuit of freedom. There are, perhaps, too many petty criticisms in the work, small passages of arms with small authors—such as Mr. Macfarlane and writers in the "Quarterly Reauthors—such as Mr. Macfarlane and writers in the "Quarterly Re-view"—which tend to degrade what would otherwise be an excellent history of a series of events, very important in our social progress, to the rank of a controversial pamphlet. Signor Mariotti should be con-tent with telling the truth, and should not remind the reader that it may not be true by placing before him the party misrepresentations or the wilful perversions of forgotten writers. He weakens the force of his own narrative, by requiring the reader to examine and weigh contradictory assertions at almost every mare. Nevertheless, the contradictory assertions at almost every page. Nevertheless, the book will be popular, and will redeem the story of Italian struggles in 1848 from the wilful falsities of some writers and the ignorant misrepresentations of others.

MONK; or, the Fall of the Republic and the Restoration of the Monarchy in England in 1660. By M. GUIZOT. Translated from the French by ANDREW R. SCOBLE. Henry G. Bohn, York street, Covent garden.

garden. THERE are few characters in English history less generally known and understood than Monk, the restorer of the monarchy. A success-ful soldier under the republic, he was left, after the death of Crom-well, almost without a military rival in possession of the command of the best organised portion of the army. Richard Cromwell was en-tirely out of the field, the remains of the several parliaments that had existed head least authority and Monk was required to decide the best organised portion of the army. Richard Cromwell was en-tirely out of the field, the remains of the several parliaments that had existed had lost all authority, and Monk was required to decide whether he would set up for himself, or bring in Charles II. He was far advanced in life; though accustomed to administer the affairs of an army, or even a country dominated over by an army, he probably mistrusted himself to govern the kingdom: the attempt would have been very dangerous. His predilections, like the habits of the people, were monarchial; and, though some dissimulation was necessary to accomplish his object peaceably and without bloodshed, he took the wise resolution to restore the monarchy. There was perhaps no alternative. The genius of Cromwell could not secure a worthy suc-cessor to his power; the republic had not lasted a day; i was a mere form to transmit the royal power to the most successful of the hostile generals; it was unsuited to the condition of property in the country, and to the manners of the people and of the age. There were no democratic republics, except the small Swiss cantons, in Europe. The restoration of the monarchy in the person of Monk or of a Stuart, was the only possible solution of the difficulty. Monk aspired not to it himself, and therefore he handed it over, with the willing consent of the bulk of the nation, to Charles II. The principal desire of M. Guizot in compiling a life of Monk is to present him as a model to some French general who may like him restore a monarchy. He has so exclusively looked at this object, that he has overlooked many of the circumstances which make France at present very different from England in 1660. Cromwell was a suc-cessful general against Charles Ist, and possessed a power *k* had won from the King Bonaparte was a successful general against the ene-mies of France ; he won nothing from its monarchs: what he con-quered at home was anarchy and the republic, and the power he built up was less that of the old monarchy than that of his

mies of France; he won nothing from its monarchs: what he con-quered at home was anarchy and the republic, and the power he built up was less that of the old monarchy than that of his own genius and a new 'empire. He was great by conquests abroad; Cromwell can scarcely be said to have enlarged the boundaries of the monarchy. Another successful general in France, uniting in himself all the power of the army, would be the heir to the power of Bonaparte, not to that of the Bourbons, and for his own sake must keep that for himself, which Monk found it both prudent and necessary to give back to Charles. He must be a president, a dictator, or an emperor. He must govern under a modern form. He could scarcely be a restorer either of the elder or the younger Bourbon. There had not been sufficient time from the breaking out of the civil war in 1642 to 1660, 18 years, to break up the habits of the English; nor were their in-stitutions so completely swept away as the institutions of the old monarchy in France. Corporations, tribunals, and local ar-rangements, were all preserved. Since the beginning of the

۶

THE ECONOMIST.

French revolution, which destroyed most of the monarchical institutions and the peculiar right of property best adapted to them, more alterations have taken place in society than occurred in any previous two centuries. Not only France, but all the countries around France have in that time made a great progress in democratic institutions. Republicanism in spirit is common in Europe and flourishes in form cores the Atlantic. There is not at present in countries around France have in that time made a great progress in democratic institutions. Republicanism in spirit is common in Europe and flourishes in form across the Atlantic. There is not at present in France, and there does not seem likely to arise a similar narrow con-tingency to that in which Monk had to act. So far as holding up Monk as an example to some French general goes, M. Guizot has lost his labour; his book we apprehend is, like his policy, a failure. His essentially narrow mind makes him a bad statesman; he compre-hends a point of detail better than general principles; and he is as likely to be deceived in his hopes of a restoration as in his coercive exertions to preserve a monarchy, which, under a selfish prince and a succession of bad ministers, had again become essentially corrupt. Apart from the temporary political object M. Guizot has in view, the book is a welcome addition to our literature. It is a succinct narrative of Monk's life, and increases our knowledge of that dark and very doubtful man. It has the great advantage too of being cheap as well as readable. There was a time when such a work, in the first ten years of its existence, would only have been given to the public in a quarto form, hot-pressed, printed in large type, and sold for a guinea. It forms one of Mr Bohn's shifting series, and shows something like a twentyfold increase of the accessibility and utility of literature within the recollection of an ordinary life. Monk began something like a twentyfold increase of the accessibility and utility of literature within the recollection of an ordinary life. Monk began his career as a soldier, and he may be said to have died in harness. He commanded the fleet in the war against the Dutch, six years after the restoration, and was vigorously engaged at the time of the Plague and of the Great Fire in inspiring the people with hope and repairing the ruins. He seems to have been essentially a money-making, com-promising, careful man, with no high principles either of private honour or public virtue. Patriotism, much tess than convenience and profit, was the motive for his actions. One extract will show the nature of the book and the character of the man :--

MONK AFTER THE RESTORATION. After the disbanding of the army, Monk retained no influence beyond that which he derived from his aptitude to business, and from a devotedness, the humble reserve of which rendered his counsels as convenient as they might sometimes be useful. During the earlier years, his knowledge of men and things contributed, in as great a degree as his power, to insure him a con-siderable share in the government, and the Scotter of State. Nicelas number reserve of which rendered his counsels as convenient as they might sometimes be useful. During the carlier years, his knowledge of men and things contributed, in as great a degree as his power, to insure him a con-siderable share in the government; and the Secretary of State, Nicolas, a man of business, who had been attached to his royal masters for thirty years, said, "That if the general had not been an instrument in the King's restoration, yet he deserved all the bounties his majesty had bestowed upon him, for his services after the King's return." He declined no proof of devotedness. Being appointed one of the commissioners charged to try the regicides, he did nothing either to aggravate or to moderate the sev.rity of the proceeutions; and co-operated shortly after in the condemnation of the Marquis of Argyll, with a disgraceful abandonment of his own honour. He felt no partiality for the marquis, whose skill in intrigue had been constantly employed for the purpose of disturbing the tranquility of his administration in Scotland; and he had injured him more than once with Cronwell. But between these two cautious men the mutual wish to do each other mischief was rarely displayed; and the letters of the marquis to the Monk in particular were full of protestations of attachment to the government of the Protector. When, after the restoration of 1661, Argyll was arrested in London, and taken back to Scotland, to be there tried on a charge of high treason, he was accused of participation in the death of Charles I., and of a formal and active adhesion to Cronwell's government. The proofs did not appear sufficient, and the party who were anxious to destroy Argyl feared they would lose their victim. The Earls of Glencairn and Rothes repaired to London with all speed, to excite Monk and Clarendon in the affair, and deprive the marquis of the support given him by the Earl of Lauderdale. The Scottish parliament was in session for the trial, and on the point of pro-ceeding to discuss the evidence, when a loud k

Henceforward the court was too sure of Monk too think it necessary to treat him with deference. His advice, though generally good, was seldom followed; he withdrew it without ill-temper or persistence, and, though never eager to offer, never refused to give it. Careful not to encroach upon the jurisdiction of others, he took no pains to defend his own against the inroads of any man who was powerful or in favour. His behaviour was that of a courtier who has his fortune to make with everybody; and everybody knew that money could atone for many wrongs, with the Duke of Albemarle. He was even accused of allow-ing himself to be too easily blinded with regard to the profits derived by his wife from the nomination to appointments in the royal stables, of which he had the disposal. The manners and habits of the duchess, more vulgar and less imple than those of her husband, were the langhing-stock of a witty and jocular court, and cast a shade of ridicule over the life of the old general, which a person held in far greater respect would have found considerable difficulty in resisting. Henceforward the court was too sure of Monk too think it necessary to treat

DOMESTIC PIGS; their Origin and Varieties, Management with a View to Profit, &c. By H. D. RICHARDSON. With Illustrations. A New Edition. W. S. Orr and Co., Amen corner.

WE did not anticipate that we should find much amusement in this little book, however valuable it seemed likely to be to pig breeders and fatteners. We were agreeably disappointed, and mean and and fatteners. We were agreeably disappointed, and mean and vulgar as the subjects of pigs and troughs, and swilling and breeding may be, they are entirely divested of those attributes in thes-pages, and are fit to be introduced into any drawing room. The chapter on "the wild original," is as pleasant a little piece of natura history and sportsman's adventures as we have for some time met-with, not forgetting the slaughter that Mr Cumming Gordon calls

NOMIST. 403
Sport. All the points of the management of the domestic animal are clearly described, and gourmands as well as pig breeders and fatteners should study this book; the former more justly to select and appreciate what they eat, and the latter to insure success to their exertions. A small extract, useful perhaps to those who keep one pig, will show the manner in which the writer treats his subject:-THE FIGS' STRE.
They observe that a greater proportional proft will be realised by keeping, moment's reflection as to feeding, the principle, in fact, being identical with that interact or any to prefer keeping a small number of pigs, or even perhaps one or two, in which case such accommodation as I have been describing would be more than superfluous. In this case, a single had, well, sheltered from indicating and hould will be found to answer; a small stone trough, or, if such court ourcounding its door, in which the tenant may feed, obey the calls of nature, and when in merry mood, which swine frequently are, disport himself, from the powerful jaws and strong teeth of the user, who would otherwise another in substine, will be found to answer; a small stone trough, or, if such from the powerful jaws and strong teeth of the user, who would otherwise prior back in sunshine, will be found to answer; a small complete the necessary further could will be experised and that a strict attent into the describing within the describing and should heline outward; shoug the lowest side should also be a draw durated, but, under circumstane s, sufficient, accommodation is the interfunction is proteined in the strict site, it to be particularly the a describing would be sed ortiers, that the foor of the hut and that a strict attent into to cleaning inclusions in course and when in merry mood, which swine frequently are, disport himself, the powerful jaws and strong teeth of the user, who would otherwise the outward; should not answer; a small atom trough will be a stready and that. Even how even, th

Persons ought not, therefore, to poison pigs by miasmata any more than human beings; and it seems, from obvious reasons, that the precept as to pigs is more likely to be carried into effect by their owners, than as to peasants by those who undertake to look after their dwellings and provide for their welfare.

THE ECLECTIC REVIEW. New Series. April, 1851. Ward and Co., Paternoster row. WE cannot say that the present aspect of affairs is encouraging to the State-educationists. What with the bickerings that have oc-curred between the National Society and the Committee of Council over that small instalment of their claim already granted—what with the reception given to Mr Fox's bill—what with the rival scheme which the "National Public School Association" has now to contend with—and what with the opposition which this rival scheme itself meets from the Roman Catholics—there seems but little approach towards the anticipated unanimity. On the contrary, events more and more clearly show that only by a despotic control, which will hardly be submitted to by the English people, can anything like a uniform system of public instruction be established. And indeed so palpable is this truth becoming, that even the partisans of the several projects before the public hint, more or less plainly, at coercive regu-tations, and manifest towards their adversaries an intolerance at which they would stand aghast were it shown on behalf of any but their own pet ideas. their own pet ideas.

The current number of the Eclectic Review contains an able article on "The Rival Educational Projects," in which these tyran-nical tendencies are well exposed. Amongst other evidences of the

nical tendencies are well exposed. Amongst other evidences of the animus of the S-cular Education party are quoted the provisions of Mr Fox's late bill, which, whether still addered to or not in detail, may be fairly assumed to exhibit the general principles of the body to which Mr Fox was the mouthpiece, and of which the presetn "National Public School Association" is the offspring:--It proposed that a County Board of twelve men, nominated in the first instance by Parliament, and of whom only the two worst attenders were to retire annu-ally, should have the power of drawing up a plan of education, and enforcing it in every school in the county.--of sametioning all the school-books to be used in every school,---if any parish should neglect to establish school-hooks to be used in examiners, without whose certificate no person shull be employed as school-boardseter. How evidently the same spirit stil continues is shown by quota-tions from a late speech of Dr Watts, an agent of the present Asso-ciation, who said-

ciation, who said-

They were trying to convince the public that the system was a right one; and if they could prove that it was a right one, so that the majority obtained an enactment for it, it would be right to thrust it down the throats of the minoobtained

an enactment for it, it would be right to thrust it down the throats of the mino-rity by any and every means !!! The religious clucation scheme of Mr Richson is shown to be qually oppressive. After giving an abstract of the bill embodying it, which provides "that the reading of the Holy Scriptures in the Authorised Version shall be a part of the daily instruction of the scholars;" and which thus excludes, though it still taxes, all who do not receive the Authorised Version; the writer goes on to say— Between this plan and the secular plan of the "National Public School Asso-ciation" there is an edifying reciprocation of intolerance. As the secular plan would shut out from participation in the school-rate all schools where religion is taught, so Mr Richson's plan would equally shut out all schools where religion is not taught. . . . The supporters of each of these priots see clearly the injustice done by the other, but have no perception of the injustice done by their own project. As it is.

o in project. Did space permit we would gladly quote more at length. As it is, we commend the article to the rival Manchester parties, as showing in detail how inevitably all plans for educating by taxation end is tyranny, and as giving them a hint of the wide discontent and pro-bably resistance which either of their schemes, if carried out, will meet with.

FRIDAY NIGHT. The preceding accounts, compared with those of last week. exhibit.

9	
In increase of Circulation of	£147,466
A decrease of Public Deposits of	133,790
An increase of Other Deposits of	3 6,606
An increase of Securities of	\$3,107
A decrease of Bullion of	339.523
A decrease of Rest of	576,693
A decrease of Reserve of	442,153

The present returns show an increase of circulation, 147,4661; a de-crease of public deposits, 133,7907, consequent on the quarterly pay-ments which are made at this time; an increase of private deposits, 306,6064; an increase of securities, 83,1071; a decrease of bullion, 139,5237; a decrease of rest, 576,6937, consequent on the payment of the dividends on Bank Stock; and a decrease of reserve, 442,1537. The important feature in the returns is the large reduction of bullion. The Government has, we believe, sent 100,0007 to the Cape of Good Hope; there is a demand for some gold for China, but that leaves up-wards of 200,0007 withdrawn more than can readily be accounted for. The Money Market continues easy, and good bills are scarce, so that the balance rather turns in favour of the borrowers. The com-mencement of the payments for the dividends have increased the supply of money, but the terms of the market remain the same as last The present returns show an increase of circulation, 147,4661; a de-

supply of money, but the terms of the market remain the same as last

week. The Exchanges are improved, and gold is now more likely to return from the continent than to go thither. We have heard that, in the course of the week, the Bank has again parted with a good deal of bullion, but we must wait till next week's returns to see to what ex-

The Funds have undergone through the week but very trifling va-riations, and to-day prices have advanced an's, and business increased. We subjoin our usual list without further comment :--

In that useful work, the half-yearly epitome of "Railway Intel-ligence," published by Mr Mihill Slaughter, the Secretary to the Stock Exchange, the fourth number of which is just published, it is stated of railways, that in the half-year ending 31st December, 1850, the number of miles open for traffic was 6,621; miles in course of construction, 551; miles not commenced, 4,831. Total of miles yuthorised 12,003 allowence heing made for 170 miles learned suthorised, 12,003, allowance being made for 179 miles legally abandoned.

The progress of railways may be learned from the following ex-tent from Mr Slaughter's tables :-

It it also interesting to learn from the same work that the number of persons permanently employed by railways was in June, 1849, 55,968, and in June, 1850, 60,325, being in the former case an average of 10.27, and in the latter, 9.56 per mile of railway opened. The number of stations constructed was in 1849, 1850, and 1851, 2,030; at the former period there was 1,504 miles constructing, and 103,816 persons employed in the work; at the latter, the number of miles constructing was 864, and the persons employed, 58,884. The work contains much more such useful information.

The dissolution of the Cortes of Madrid is treated as a ruse merely to get rid of engagements it is much more troublesome than pleasant to keep. Of all the Governments of Europe that of Spain seems to have the least regard for the reputation of honesty, and to be the most ready to repudiate its promises, whenever it finds keep-

ing them inconvenient. The last news from California is fatal to the hopes of those who were to load all the navies of the world with golden sand. The

Pacific News says :--The Chesapaske returned from Gold Bluff on Standay, and, from the number of passengers who returned in her, the public will get the impression that the "fortune for all," which was supposed to be in that particular lecality for the mere picking up, is not of as golden a nature as was anticipated. From one of the passe gers of the Chesapaske we learn that the bank in the vicinity of the Bluff, and for several miles north and south of it, contains large quantities of black sand, in all of which may be found wast is termed "scale gold," but in particles so fine as to prevent its being separated from the sand by the ordinary process of washing, and that mining cut only be made profitable by the labour of well-organised companies, alded by such machinery extended his examination to the Bluff, but his impressions were anything but satis-factory. He expresses the opinion, however, that the same obstace to success pre-sents itself there as in the case of the saud found upon the beech, and that the whole indertaking will ce long be abandoned, because of the expense and labour attending the separation of gold from the foreign substances with which it is found to be so thoroughly mixed.

The news concerning the quicksilver mines is more agreeable. The Placer Times says :-

Quicksilver mines have been worked to some extent for many years in California, but until the dicovery of gold little attention has been bestowed upon them. For some months part quicksilver has been offered in our market from the New Almaden nines. The principal mines to California are the Guadupe and New Almaden, and are situated in the ame neighbourbood, four miles distant from each other, about eight miles from San Joie, and can be reached by a good road at all sensons of the year. The yield from the ore is almost past belief. S5 per cent, of pure mercury not being uncommon.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille discount (new tariff quotation), which, at the English must price of \$117s10gd per ounce for standard gold, gives an exchange of 25:10; and the exchange at Paris on London at short being 25:02g, it follows that gold is 0:30 per cent denses in Paris them in London

on London at short being 25 025, it follows that gold is 0.30 per cent dearer in Paristhan in London. By advices from Hamburg the price of gold is 4255 per mark, which, at the English mint price of 3/ 17s 105d per ounce for standard gold, gives an exchange of 13.55; and the exchange at Hamburg on London at short being 13.55, it follows that gold is 0.12 per cent dearer in London than in Hamburg. The course of exchange at New York on London for bills at 60 days sight

The course of exchange at New York on London for bills at 60 days sight is 1105 per cent; and the par of exchange between England and America being 109 23-40 per cent, it follows that the exchange is nominally 0.92 per cent in favour of England; and, after making allowance for difference of in-terest and charges of transport, the present rate leaves a profit on the importation of gold from the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT. The Wheat Market was dull to-day, but there is a want of wheat in fine condition, much of that which comes to market giving the millers, as they say, water to grind as well as corn. The supplies of flour from abroad continue. 6,100 sacks and barrels were imported into London in the week ending April 10, but the wharves are not so full as they were a month ago, and much of what remains is of an inferior quality.

quality. As the farmers continue to complain, it seems right to mention that the average price of grain is now higher than it was at this period last year, though the quality this year is very inferior. Thus, last year at this time the average price of wheat was 38s 1d, now it is 38s 4d : last year also only 80,311 quarters had been sold according to the *Ga-*sette returns, this year the amount is 80,789. There is not one species of grain of which more has not been brought to market this year and sold at higher prices than last year, in spite of the large importations from grain of which more has not been brought to market this year and sold at higher prices than last year, in spite of the large importations from France. Oats are now 2s 2d dearer per quarter than they were at the same time last year, and rye is 2s 5d. Flour is from 1s to 2s per sack dearer than it was last year. The farmers have obviously passed the worst, and as they are benefitted as well as all other classes by the general reduction of prices, they have little more to complain of now than they usually have. From the length of time required to complete all their operations, they must, as the rule, be the debtors of other men whose products are brought to market in shorter periods; and this indebtedness, which socially is of immense advantage, as it prevents the growers of food from being the masters of the other productive classes, is the principal reason why farmers, as the rule seldom make great fortunes. The heaviest of their burdens, we be-lieve, is the interest they generally have to pay. The Colonial Produce Markets continue dull, but sugar has been firm to day; the demand was brisker, and the article was in many cases held or withdrawn for an advance. Refined sugar is in moderate demand.

moderate demand.

Coffee is very dull, and it begins to be feared that the Ceylon and other colonists engaged in coffee growing will suffer much from the present condition of the market.

The demand for tea continues to be good. At the sales on Thursday common congou sold from $\frac{1}{4}$ d to $\frac{1}{4}$ d dearer; other species of congou were $\frac{1}{4}$ d cheaper. The quantity cleared in the week ending the 3rd instant was 553,629 lbs, against 495,059 lbs in the corresponding week of last year. The Cotton Market has been extremely limited this week, only

The Cotton Market has been extremely limited this week, only 650 bates of Surat and 200 bates of Madras having been sold privately; publicly only 50 bales of Madras and 400 of Surat were sold. The much larger quantity offered was taken in. The state of the markets here is contingent on the reports from the States, which continue to be more favourable than was expected. It will be seen by our tables, published in another place, that the quantities on hand "in the ports" " received at the ports," " exported to Great Britain," and " stock on hand and on shipboard," are all greater in 1850-1851 than in 1849-1850. 1850

1850. We learn on excellent authority, and state the fact for the consola-tion of our shipowners, that the British ship Sandford, Capt. Cullan, has been chartered from Calcutta to New York at 41 7s 6d for salt-petre &c., although several American vessels were seeking charter, and the ruling rates to England for the same article was only 31 5s to 31. 7s 6d. The British clipper Numa has been chartered at a high rate from Malaga to New York with the new fruit. This trade is the

[April 12,

THE ECONOMIST.

clipper trade of the Yankees ; their vessels frequently carrying two Captains, so keen is the competition ; one for day, one for night.

The Ballimore American gives the following account of the arrival of the first cargo from San Francisco, California :- The brig General Pinckney, Capt in Cooke, arrived at this port 15th instant direct from San Francisco, in 121 days. She brings a full cargo of hides, horns, and merchandise, consigned to her owners, Messrs N. Rogers and Co. This is said to be the first cargo received direct from that port at any Atlantlic port since California has been attached to the United States. The General Pinckney sailed from Baltimore for Sacramento City on the 25th March, 1850, and has therefore been absent ten days less than one year. days less than one year.

It is satisfactory, we are informed, to the timber trade, that the Chancellor of the Exchequer adheres to the proposed reduction of foreign duty, proposing, for all sufficient reasons, that the moiety shall now be abated, and the remainder when the revenue and in-creasing supply warrants. The Government has gained much in mer-cantile opinion by adhering to the financial arrangements, and boldly withstanding the loud but most unreasonable outcry against the principles of their Budget.

The sound commercial view is, that with raw materials cheap, such as bricks, iron, and wood, the advantage in building new houses will far exceed the house tax; while no tax is more a tax on pro-perty than the one levied on every house worth 20/ a year and up-wards. The shipbuilder's claim, too, for untaxed wood is unan-swerable. Ships are no longer protected. The expensive wood used by the cabinet maker has been free of duty for some years, and now the carpenter justly claims to have his common material free also of discriminative rate.

It is already clearly seen how the remission of duty will bear on the trade of the year. The amount to be remitted may be computed as equal to 12 per cent on the present gross value of foreign wood; of which one-third will induce the increase of foreign shipments, and the remaining two-thirds will benefit the consumers; if, as has more often been the effect of the reduction of duty, foreign wood be im ported on a largely increased scale, the consumers will soon reap the whole benefit in reduced price. A small advance in the price of foreign whole benefit in reduced price. A small advance in the price of foreign wood here, as well as in the Baltic and in Norway, is therefore now demanded, and subject to the benefit of the reduced duty, will be obtained. The supply of colonial wood being less extensive than usual, prices thereof are in no respect affected, nor does the prospect of increased competition from foreign timber affect the usual extent of sales of colonial timber made at this period of the year at the out-ports, especially in Ireland and our western coast.

ports, especially in Ireland and our western coast. It is curious to find a company formed in England for working the iron mines of India, but there is such a company, which possesses by grants from the Madras Government, the exclusive right of raising iron ores throughout the Madras provinces in which the magnetic iron ores are found, and proposes to work these mines by English capital. There is nothing English capital will not undertake to per-form, and to which it is not applied. The Indian Iron Company is the proper supplement of these companies by which English capital undertook to work the mines of Brazil and New Spain. The new company expects to supply India, and compete with Swedish and Russian iron in the English markets.

INDIGO.

The next quarterly sales have been fixed for the 13th May, prompt 9th August. The declarations commenced on Wednesday last, and amounted yesterday afternoon to nearly 3,000 chests. There has been a steady business doing in indigo this week; of Bengal and similar sorts the purchases have been limited to small lots for immediate consumption, but of Madras there were bought within the last few days about 200 chests, the whole at full Feb-ruary prices. ruary prices.

We have again to report our market in a very sluggish state. The busicess done in yara has been on the most limited scale; the only buyers of any importance are the Germans, but they will not purchase more than their immediate wants require, which indicates one good feature, and that is the very small stocks of yarn in Germany. India qualities are more neglected that they have been for some months past; and our home manufacturers are also doing very little. Under such circu natances it is not surprising to find prices 4d to 4d lower than last week. Cloth is Ekswise extremely dull in almost every description, with many instances of lower rates being submitted to. The chief purchases of the week have been for India and China; our home trade being still insetive, and other markets give no symptoms of improvement. There is nothing of interest in the foreign news received this week.

讀

[April 12.

BRADFORD, April 16.—The long continued panelity of buyers of combin ⁶ wools appears to have somewhat terminated; and since last Thursday, con-idderably more lookers have been in the market, and where anything wort h the value has been offered, some lots have been taken for a-sorting up the spinners' stocks, which must now, from the long cessation from buying, have been far worked into. Notwithstanding this continued fitness, wool has not given way in price at all in accordance with the expectations of the spinners, who generally find a great anxiety to clear out prior to cly day; from the difficulty in buying from the growers to replace, stocks are more firmly held, and the chances are that the trade will continue unsatisfactory both to the holders here and the consumers, who complain loudly of their unenviable avocation. There is no fixed price for any particular kind but the staple article. Middle wethers may be quoted from 11d to 12d, accord-ing to make and country. The firmuess evinced by the holders of combing wools, coupled with the diminished production, has given a tone of stability to the price of yarns, and the long absence of huying by the shipping houses has had the effect of bringing them again into the market; but so universally low are the prices at which they are buyers, that this has only the effect of making spinners more determined to narrow down the working of their machinery till a remunerating price can be realised; for all hopes of relief from wool being at a lower price appear at present at an end. The spirit of the manufacturers are now anything that how yn, for to realise prime cost is impossible ; the fill in the price of piece goods being out of all proportion with the reduced price of yarns. As the latter has now made a stand, any further hope from this source appears improbable. Cobourgs and Oldeans have not leen moved in quantities except at very bid prices for some time, and mixed Alpacas, though not lower in prices than last year, are equally as profitles, from the great adv on goods.

LEEDS, April 8.-On Saturday there was more done at the cloth halls than has been the case for some time back, but to day the market has only been a quiet one. There has been no alteration to notics in prices, and stock do not increase.

HUDDERSFIELD, April 8 .- Our market to-day, although pretty well at-HODDERSFIELD, April 8.—Our market to-day, although prefy we are tended by buyers, has sourcely been an average one; bushness has not been so brisk in the cloth hall; stocks look heavier than they have done for some time; most of the exchanges have been in light goods and fances, and checks of new pattern. The watchouses have been brisk during the week in the American trade. In the wood market there has not been so much doing. As there is not much change in the price of the raw material, it is most likely there will be an advance in the finished goods.

ROCHDALE, April 7.—The flarnel market to-day has been quiet and in-active, and much like that of last Monday. In kerseys and coarse goods three has been very little doing, and the purchases have been upon a much more limited scale. The wool dealers complain of the little demand for the raw material that still because the former limit.

limited scale. The wool dealers complain of the little demand for the raw material, but still keep up the former prices. HALFAX, April 5.—The worked trade presents no noticeable feature of variation since our last; the demand for most descriptions of goods being still languid, and the merchants manifesting great reluctance to purchase. In the yarn market there have been more sales, under the impression that prices are as the lowest; but the spinners are producing less, as the quota-tions are very unsatisfactory. More wool has changed hands, partly from the spinners having run out of stock, and partly from the belief that the rates are as low as they are likely to be; but the increased business has had no operation upon prices. no operation upon prices.

CORN.

AMERICAN CORN AND FLOUR MARKETS.

AMERICAN CORN AND FLOUR MARKETS. New Yorks, March 26.—GRAIN.—Holders of wheat have evinced an in-reased desire to realise, and as the demand is very light, the market favors buyers. Canada is entirely nominal at 97 to 100 cents, and some further parcels have been shipped from first hands. The sales are 5,000 bushels white Genesce, part at 1 dol 13c for good; and 2,500 prime Ohio, 1 dol, for milling. Corn has been dull, and is lower, there being a fair supply and moderate inquiry for home use, and little or none for export; the sales are 33,000 bushels, closing at 644 to 65 cents for Jersey and Southern yel-low, and 664 for a lot of very handsome white Jersey for starch. FLOUR AND MEAL.—Holders of flour have officed their stocks more freely since our last, and as there is no export demand, and that for home use is quite moderate, prices of State and low grade Western, together with New Orleans, have receded 64 cents, the latter more, the market closing heavily for almost all descriptions at our revised notations. New Orleans, that series of or com-mon to good branks. Canada is steady at 4 dols 624c to 4 dols 55c for com-mon to good branks. Canada is steady at 4 dols 624c to 4 dols 55c for some time past, but the arrivals as yet have been small. The canals of the State will be opened for navigation 15th prox. The sales of domestic were -5a ut rads 3:500 bbls. LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY MORNING.

There was an increased quantity of wheat from Easex and Kent at Mark lane on Monday, and the best sumples met a fair steady sale at the prices of the previous work. The imports of foreign wheat were quite mo-derate, yet more than sufficient for the wants of the day: sales were eff cted to only a moderate extent, without any quatable variation in the value of good fresh samples. The quantity imported consisted of 2,730 que from Alex-

andris, 47 qrs from Antwerp, 3,698 qrs from Barletta, 1,100 qrs from Catanis, 200 qrs from Dunkirk, 105 qrs from Hamburg, 22 qrs from Harlin gen, 1,250 qrs from Ibrail, 1.384 qrs from Rostock, and 850 qrs from Rotter-dam, making a total of 11,356 qrs. The arrivals of flour coastwise were 3,571 sacks, by the Eastern Counties Railway 5,628 sacks, and 4,468 sacks from France; select marks met a moderate sale at scarcely any change in price. There were fair arrivals of English barley, with 6,342 qrs foreign, the latter consisting chiefly of one cargo of 4,600 qrs from Alexandria; the trade for this article was firm and healthy, at full prices for all sorts. Beans and peas were quite as d.ar, and each article in moderate request. Rather more oats came forward than during the previous week ; 1,636 qrs from our own coast, 330 qrs from Scotland, 5,440 qrs from Ircland, and 11,410 qrs from own coast, 330 qrs from Scotland, 5,440 qrs from Ireland, and 11,410 qrs from foreign ports, making a total of 18,818 qrs. A fair demand for consump-tion was experienced, and quite as much money was obtained for fresh and sweet parcels; the dealers did not purchase freely, anxious to clear off their own stocks whilst the market continues buoyant, and prices range somewhat higher than for the past few months, and the consumption remains on an enlarged scale.

larged scale. There were moderate imports at Liverpool on Tuesday, yet a limited business was transacted in wheat, prices being rather in favour of the buyer, although the difference was scarcely quotable, whilst from the scarcity of Indian corn an advance of 1s per qr was established; the best yellow American brought 32s per 480 lbs. Fair imports took place at Hull, and the farmers brought forward a moderately good quantity of wheat, which commanded full prices, but no advance: average, 36s 4d on 1,038 qr². Malting barley was dearer. Very little good English was offering for sale. There was an increased arrival of wheat at Lee Is, amounting to 8,964 qrs, and less activity prevailed at that market than during the previous week:

and less activity prevailed at that market than during the previous week; but as no disposition was evinced to press sales, prices were unaltered: average, 41s 3d on 1,937 qrs. At Ipswich the deliveries from the farmers were limited, but millers were

the only buyers, the merchants showing no disposition to purchase, and no variation consequently took place: average, 40s 7d on 516 qrs. The fresh arrivals of English wheat at Mark lane on Wednesday were very

The fresh arrivals of English wheat at Mark lane on Wednesday were very limited, but there was a moderate import of foreign. Scarcely any English was offering for sale, and the extent of business in foreign was limited, being mostly confined to a few sales of the better qualities at Monday's currency. Some fine "Catania" commanded 40s per qr, which would weigh from 64 to 65 like park busied to 65 lbs per bushel.

to 65 lbs per bushel. The averages announced on Thursday were 385 4d on 80,784 qrs wheat, 225 10d on 40,943 qrs barley, 175 on 22,067 qrs oats, 238 11d on 139 qrs rye, 258 11d on 4,970 qrs beans, and 248 8d on 809 qrs peas. The fresh arrivals of English grain at Mark lane on Friday were only moderate, but there were fair imports of foreign, and a good supply of flour from France. There was not much passing in wheat; the sales were at Mon-day's currency. Flour was in moderate demand without change in the value. Barley was fully as dear, malting samples in demand. Oats realised previous rates. previous rate

TRANSACTIONS OF THE WEEK.

(For Report of This Day's Markets see " Postscript.") MINCING LANE, FRIDAY MORNING.

MINCING LANE, FRIDAY MORNING. SUGAR.—The demand continues inactive, but prices have not experienced any material decline during the week, the market being moderately sup-plied. About 1,100 casks West India found buyers to yesterday (Thursday) at last week's rates. On Tuesday 183 casks 160 barrels Barbadoes were all sold, and the lower qualities went cheap: fine yellow, 42s to 42s 6d; low to good, 38s to 41s 6d; brown, 35s to 37s 6d per cett. The stock shows a large deficiency compared with that of last season at same period. There is no improvement in the deliveries, which are steady. Several cargoes foreign of the new crop have arrived since the 4th inst. The stock of all kinds at the close of last week was estimated at 51,528 tons. estimated at 51.523 tons.

estimated at 51,523 tons. Mauritius.—There is no improvement in the demand, and 5,937 bags offered on Tuesday about half sold at provious rates: middling to good genery, 403 to 403 6d; low to middling strong greyish, 37s to 39s; good, 39s 6d to 40s per cwt. The deliveries are steady, and the stock on 5th inst. showed a decrease of

Set. A limited business has been done by priva'e contract, and the lower

while Behares, so to so of, good while Cosh is taken in, as best output event. A limited business has been done by private contrast, and the lower descriptions are very dult. Other East India, -5,536 bags Penang submitted on Taesday were all disposed of at low prices: middling grey to good white, 38s to 40s 64; low to middling syrupy yellow and grey, 34s to 36s; low to good brown, 32s 6d to 31s; very dark and heavy, 26s 6d to 31s per cwt. Foreign.-Two floating cargoes of yellow Havana have been sold this week at 21s 6d and 22s 6d; also a cargo of brown Pernams, 10s; and 300 cases brown Maraim at 55s. At auction, 196 casks new Cuba sold steadily from 40s to 42s 6d for middling to good grocery, and one lot brown, 38s. The sound por-tion of 800 boxes yellow Havana was taken in, 37s 6d to 40s 6d per cwt. Refined,--A moderate amount of business has been done in this market at the decline last quoted. Brown goods cannot be bought under 47s; imiddling to good and fine titlers have sold at 48s to 50s 6d. Wet lumps and pieces remain as last quoted. Bastards are dult at 29s to 37s. Treacle is selling at 12s 6d to 19s. Several sales have been made in foreign refined sugars to the home trade. The bondel market remains flat at last week's rates. Crushed is held at 28s to 193. Several sales have been made in foreign remeet sugars to the some states. The bonded market remains flat at last week's rates. Crushed is held at 28s to to 28s 6d. Datch rather quiet. Loaves are uniftered; 10 b, 30s 6d to 31s 6d. MOLASES.—The sales in West India have been very limited. COFFEE.—The Budget of Friday last contained no new feature as regards this configure to the sales of the sales in the sale of the sales higher rates, while Cylon

article, and foreign descriptions have brought rather higher rates, while C-yloa experienced a considerable decline; good ordinary native selling at 394, or 3s be-low the closing quotation on that day: 40s has since been paid for several par-cels, but the market latterly became rather quiet. 197 casks, 300 bags plutation Cels, but the market latterly became rather quiet. 197 casts, 300 bags plintation partlysold at irregular prices: a few lots good brought 674; how mid to mid colou y, 51s to 59s; ordinary to fine fine ordinary, 47s to 59s; pea berry, 55s to 59s per cwt. Mocha has been in good demand at 2s to 3s advance, about two-thirds of 795 bales, 1,383 half bales, finding buyers; the latest price obtained being 68s to 71s for middling to fair clean garblel yellow, razged 62s to 65s 6d. Costa Rica is held for rather higher rates, and 1,099 bags were chiefly taken in, a few lots bringing is to 2s advance, from 46s to 51s for ordinary to fine ordinary. 1350 bass good ordinary Bio were taken in at 61s per cert.

lots bringing 1s to 2s advance, from 46s to 51s for ordinary to fine ordinary. 1,350 bags good ordinary Rio were taken in at 41s per owt. CocoA.—There has been a large arrival of West India, and the market is quiet. Foreign remains nominally unaltered, TEA.—A moderate amount of business has been done by private contract this week. Common congous have continued in demand, finding ready buyers at 1s 0;4 to 1s 0;d, low 1s: good and fine are extremely duil. Yesterday 11,632 pkgs were submitted at public sale, when a larger proportion sold than for some time past, but at rather lower rates in several instances; common con-gong add at the above onnetion. When medium to good went rather, chapter gous sold at the above quotation, while medium to good went rather cheaper than before. Young hysons were heavy of sale, and former rates not quite maintained; middling gunpowders sold at very full prices. Only one vessel has arrived here since the 4th instant.

Bice. The market has been quiet, and few transactions are reported at pre-vious rates. The stock of East Indicis 20,833 tons, against 20,203 tons at same period last year. No alteration in cleaned. 30 casks Carolina offered by public sale were taken in at 17s per cwt.

PIMENTO .- The sales are confined to a few parcels at previous rates. There

public sale were taken in at 17s per cvt. PIMENTO.—The sales are confined to a few parcels at previous rates. There is a very heavy stock. PEPPER.—Common kinds of black have been quiet. 560 bigs 260 robins Alepp were taken at 34d to 34d, and 165 hags Malabar at 34d to 34d per lo for grey. The stock continues moderate. White is wanted and rather scarce. OTHER SPICES.—63 cages 10 boxes brown nuturegs sold at last week's rates, from 28 4d to 38 6d for ordinary to good. 60 cases mace brought full prices; or-dinary to fair, 28 1d to 24 5d per lb. All kinds of ginger are quiet. 2,131 bag-Alfrican were partly sold at 35 sto 35s 6d; 112 barrels Jamica went at 31 as to 64 5s; 835 bags Bengal partly sold at 16s 6d to 17s 64 for common un-scraped. The quarterly cinnamon sales are fixed for the 28th inst. "Rum.—Rather more business has been done in West India. Some Demeraras have sold at 284d to 28 5d per gallon, for 37 per cent, overproof. SALTPETIE —The market has been quiet. 2,185 bags Bengal were chiedly sold; the better qualities at high prices; other kinds went rather easier; refrac 7 to 5, 28s 6d to 29s 6d; 181 to 7h, 25s 6d to 26a, 300 bags Madras were taken in at 29s per cwt, for 54 refrae. The deliveries are steady. NITRATE SODA.—This article is quiet at 14s 6d per cwt. Cochinetat.—152 bags Hondraras silvers in public sale were chiefly sold at rather lower rates, mildling bringing 3s 3d to 3s 4d; a few lots good, 3s 6d to 2s 7d, being for the latter extreme rates. T29 bags, chiefly in second hands, only partly found buyers: Honduras blacks, 3s 9d to 4s 3d; Mexicon, 3s 4d per b; remainder taken in above the value. The stock shows a further increase. GAMIEM.—522 bales were partly sold at 16s, and 520 baskets at 15s 6d, with a few has 15s per cwt. Duces, &c.—The public sales vesterday were rather large, and contained

GAMBIER.-522 bale a few L ts 15s per cwt.

The basis of the second sec

cept f r the better qualities.

OILS.—The demand for all kinds of common fish continues rather limited. There are not sellers of cod under 377 10s. Southern has been very duil, owing to the public sales declared. Sperm has latterly met with rather more inquiry. The linseed market is steady at last week's rates, 33s 3d per cwt being the rates on the spot. 200 casks palm in public sale were partly sold at 28s to 29s per cwt. per cwt.

per cwt. LINSEED -- The market is quief. Fine Black Sea may be quoted at 49s. More business has been done in linseed cakes, and stocks of foreigu are much reduced; but English made are worth 7l per ton. HEMP. - All kinds of Russian are very dull as quoted for some time past.

HEMP.—All kinds of Russian are very dull as quoted for some time past. Manilla continues rather source. TALLOW.—A very large business was done in the early part of the week at 495 for first sort Petersburg Y. C. on the spot, and there have since been further buyers at that price. Sides have been made at 395.6d to arrive next month, and the market has a firm appearance. There appears to be every prospect of a short supply from St Petersburg this season, and also a very con-siderable falling off from Suth America, while Australia may be expected to ship a larger quantity than in any former year. The stock on Mond y was 36,281 cashs, against 30,555 casks in 1850.

POSTSCRIPT. FRIDAY EVENTIO. SUGAR.—The market was quiet to day. About 250 casks West India found bayers at yesterday's rates, and the week's business amounted to ',33 casks.— Mauritius.—The public sales were large, comprising 11,659 bags, but about two-thirds taken in at fall rates; remainder sold as previously quoted: good to ine grocery brought 39s to 42s 61; crystal ised gray and yellow, 39s to 42s 64 Madriss—The lower qualitie sold at rather easier rates, and a few lots grainy yellow brought 41s to 43s 64, but 2,260 bags were chiefly bunght in. Reflocel—The market was quiet to-day. COFFEE.—107 chesis 50 bags planation Ceylon sold at extreme rates. 1,478 bags East India taken in at 44s to 43s for iow Batavia and Java. 568 bags Costa Rica sold at previous rates, from 46s to 51s; one lot good, 575 per cwt. PIMENTO —610 bags sold steadily at 4§1 to 491, being extreme rates. PEPPER.—64 bags white were partly disposed of from 6§4 to 7§4 per lb, for middling to good.

A set we consist and the party subject of non-oid of the set of the observation of the set of the s

ADDITIONAL NOTICES.

ADDITIONAL NOTICES. REFINED SUGAR.—The home marke: for refined sugar continues very famimate, and prices remain about the same as at the end of last week. 6,000 km Belgian hows have been sold a 51s; and 150 tons fleigian at 254 64, a parcel of Ditch lowes at have been sold at 51s; and 150 tons fleigian at 254 64, a parcel of Ditch lowes at the been sold at 51s; and 150 tons fleigian at 254 64, and price of Datch lowes at lowes and crushed quite neglected. Treacle flat. Several parcels of Datch crushed sold at 24s to 26s, f.o.b. a ship in the port of London. DRY Faurt.—The currant markst continues to droop, owing to the quantity of low fruit of ring for sale. Scles of C tesme raisons have been mide at lower prices, but holders are becoming finner. The clearance of both articles are good. No artivals. **GREW Faurt** — The market has improved for oranges, which is likely to conting § two parcels Lisboo, one of Teresira, sold by Keeling and Hunt, at public sale, the former went at a slight advance upon the prices obtained last week. Lemons dull of sale; cold weather checking consumption. More inquiry for nuts, but no disposition to give higher prices; the stock of Bircelona is increasing, and renders buyers cautious.

bird a

putions. SEEDS.-Grain seeds of most descriptions are in batter demand. Rape, canary, and ind seeds concrally are dearer, and find bayers at the quatalons. SEEK-The sikk market has continued extremsly dull all the week, and prices re-min nominally at the same quotations. It is not expected any business of conse-u-nce will be done until manufacturers sell their goods, and importers yield to easier main nom

quences will be a me uniti manufacturers sent their goods, and importens yield to easier rates. Exaction Wood, --There is not any alteration in the English wool trade since las t week's report: the same active demand is apparent, and (at the reduction in price) sales cun readily be made. LEATHER AND HIDES, --We have had a more cheerful market this week at Leaden-hul. The supply was generally ample, and much was sold, at about former prices. The demand was childly for butts of light and middling weights. East lindla kips, of the lower descriptions, continue scarce and in good request. Of call skins also under 40 hs per dozen, the supply is not equal to the demand. We have not any alteration of prices to report on any article. At the public sales of the past week the beavy Cape hides were 4d per 1b lower than at the previous sale. The greater part of the New South Wales hides were with frawn at 34d. The East Todia kips many Cape hides of Als ration to the dides made 74d, one lot 74d. The Mimosa back, all more or less daraged, sold for 8/12s 6d and 6/ per ton. Imports from Jan. It to April 10, 1831

SMITHFIELD CATTLE MARKET.

SMITHIFIELD CATTLE STARKET. MONDAY, April 7.—The arrivals of for-sign stock into London last week were again extensive, the total supply amounting to 2,18 head. During the corresponding period in 1850 we received 1,151; in 1849, 1,061; and in 1848, 1,395 head. Nearly the whole of the foreign sheep have reached us out of the wool. The items of the week's import were—beasts, 400; sheep, 1.57; c s'ves, 232; pigs, 29. Only 300 head have been landed at the various outports, mostly from Ho land; but large importations are anticipated, especially as a further r-duction in freights—the result of increased competition—is pretty generally looked forward to. We hear of no transactions in Spain on English account : and we may assume that speculators, from the heavy lowes sustained last year, will refrain from operating this MEMOD.

The number of foreign beasts and sheep in to-day's market was by no means large;

The number of foreign beasts and sheep in to-day's market was by no means large; but there was rather an extensive supply of large hogs from France. Full average time-of-year supplies of homs-fet beasts came to hand, in excellent condition. The favourable change in the weather, together with the falling off in the quantities of meat on sale in Newgate and Leadenhall, produced rather more firmness in the beef trade, and a good clearance was effected at prices fully equal to those ob-tained on Monday last. The primest Scots sold at from 3s fid to 3s 8d per 8ibs. From Norfolk, Saffolk, Essex, and Cambridgeshire, we received 2,4:03 Scots, short-horns, &c.; from other parts of England, 600 of various kinds; and from Scotland, 30 horned and polled Scots. With sheep we were seasonably well, but not to say heavily supplied. Most breeds were in moderate request, at last week's currency. The best of Down, in the wool, sold at 4s 6d to 4s 8d; cut of the wool, 5s 16d to 4s per 8lbs. A large portion of the supply was composed of clipped tegs. Lambs-the supply of which was small-moved off slowly, at unaltered quotations, viz., 3s to 6s per 8.bs. No arrivals took place from the Isle of Wight. We had only a limited inquiry for calves, but no change was noticed in their value. The pork trade ruled dull, at late figures. April 9, 1849. April 8, 1850. April 7, 1851.

The Railway Monitor.

EPITOME OF RAILWAY NEWS.

sponding period, 1850, 391 5s; showing a decrease of 11 15s. The agreegate receipte for 13 weeks of the present year amount to 2,950,2131; for correspond-ing period of 1850, 2,641,8541; showing an increase of 308,359/.

GREAT WESTERN AND SOUTH WALES.—Special general meetings of these companies are to be held simultaneously on Tue-day next, for the purpose of approving, or otherwise, of an aggreement entered into conditionally by the directors of both companies for leasing, on certain terms and conditions, the South Wales Railway to the Great Western Railway Company. It appears the term of the lease is for 599 years. The South Wales Company are to complete the railway, with all necessary works and conveniences, from Grange Court to Carmarthen, thence to Haverfordwest, and also, when Parliamentary powers shall be obtained, to Milford Haven. When the line is jopened from Grange Court to Swansea, the agreement is to the effect on that portion, including the Bullo Pill Tramway, and successively on the other portions as and when com-pleted. The board of each company to spoint five directors to form a joint committee for working and msnaging the traffic, and otherwise arranging for and in respect of the line to Milford Haven. The Great Western Company are to find the necessary rolling and working stock for the full and efficient working of GREAT WESTERN AND SOUTH WALES .- Special general meetings of these pieted. The bond of each company to appoint of the difference of the hybrid committee for working and managing the traffic, and otherwise arranging for and in respect of the line to Milford Haven. The Great Western Company are to find the necessary rolling and working stock for the full and efficient working of the line. Out of the gross receipts allowance is to be made for the working expenses and other usual and proper deductions. A sum is also to be applied out of the earnings of the line sufficient to defray the interest upon the debenture debt of the company not exceeding 500,000?, when the line is opened between Grange Court and Swansea, 700,000? when opened to Carmarthen, and 1,000,000? when opened to Milford Haven. After these deductions the rent to be paid by the Great Western Railway Company is to be as follows: --For the line between Grange Court and Swansea, 30,500? per annum; from the former place to Carmarthen, 38,500? per annum; and from Grange Court to Milford Haven, 46,000? per annum. In addition to such rent, the South Wales Railway Company are to receive two-hirds of the net profits of the line, the remaining one-third being received by the Great Western Company in con-sideration of the fixed sums so to be paid by them. The South Wales Rail-way Company are to apply to Parliament for power to extend the line to Milford Haven, and the Great Western Railway Company are to support and afford every assistance to such application. The South Wales Company are to provide the requisite accommodation for the traffic, and if additional accommodation be required within or at the expiration of four years, the South Wales Railway Company are to provide the same ; but afterwards, any further accommodation which may become necessary is to be provided at the expense of the two com-panies in the proportion in which they are interested in the receipts. The im-provements in the Bullo Pill Tramway, and the line to the shipping port at Swansea, together with the junctions with the Taff Vale and Western Valleys

RAILWAY SHARE MARKET.

LONDON.

MONDAY, April 7 .- The railway market was not active to-day, and towards

MONDAY, April 1.— The railway market was not active to-day, and towards the close of business prices presented a heavy appearance. TUESDAY, April 8.—There was not much activity in the railway market to-day, and prices towards the close of business assumed a rather dull appearance. WEDNESDAY, April 9.—The railway market was inactive throughout the day, and prices in all respects presented a heavy appearance. THUR-DAY, April 10.—The railway market was in a rather better position to-day, and the appearance of some of the traffic returns gave a firmer tone to prices

prices FRIDAY, April 11 .- Railway shares are nearly all better, although the busi-ness doing is not large.

PUBLIC INCOME AND EXPENDITURE.—A valuable parliamentary paper, ob-tained by Mr Cardwell, has been published by order of the House of Commons. It contains an account of the public income and expenditure for each year since 1822, showing the amount received into the Exchequer, the expenditure under its several heads, the surplus or deficiency of income; the amount of taxes re-pealed, reduced, or imposed, distinguishing the principal items; the total capital of debt funded or unfunded; and the balances in the Exchequer at the close of the year. Since 1822, taxes have been repealed or reduced to the amount of 36,945,5032, and taxes have been imposed to the amount of 9,864,7564, leaving a balance of taxes reduced or repealed to the amount of 27,083,7471. Between 1820 and 1830 the net reductions amounted to 17,078,4091; between 1830 and 1840, to 5,258,6082; and between 1840 and 1850, to 4,746,7304. 1842 and 1830 the net reductions amounted to 17,078,4091; between 1830 and 1840, to 5,258,6082; and between 1840 and 1850, to 4,746,7307. The total revenue for the year 1822 was 54,135,7421; and for 1850, 52,810,6802. From a statement of the value of our imports and exports during the same years, it appears that in 1822 the value of imports into the United Kingdom, calculated at the official rates of valuation, was 30,530,6632; and of exports, 53,464,1237. In 1849 the value of the imports was 105,874,6072; and that of the exports, 190,101,3947.

PATENT LAW AMENDMENT .- Lord Brougham's bill to amend the law PATENT LAW AMENDMENT.—Lord Brougham's bill to amend the law touching letters patent for inventions has just been printed. It contains 22 clauses. By the preamble it is declared to be expedient to make certain additions and alterations in the present law touching letters patent for inven-tions. It is proposed to constitute the Lord Chancellor, Master of the Rolls, and others, commissioners of patents for inventions, of whom three may act. They are to make rules, &C. After petition and report, the commissioners to cause a warrant for sign manual to be made, on which the Lord Chancellor is to issue letters patent. The specifications are to be printed. There is a list of fees in the intended act, showing that letters patent may be obtained for about 20%. Compensation is to be provided for persons affected by the provisions. The act, which is to be called the Patent Law Amendment Act, 1851, it is proposed shall take effect one month from the passing thereof.

For Mr Keating, 79 St Paul's Churchyara. (COPT.) 26 Hertford street, May Fair, February 17, 1851. Str., -In reply to your inquiry. I have no hesitation in suring you, that the Pallmonic Wafers, Female Wafers, athibitous Wafers, or Female Pills, that have so often en advertised with my name, are not mine, nor do I now anything of their composition, nor have I anything hatever to do with them, either directly or indirectly. Your obedient servant, To Mr Keating. CHABLES LOCOCK, M.D.

THE NATIONAL MEDICINE IS

ARR'S LIFE PILLS which are acknowledged to be the best medicine in world.

The attention of all classes has been attracted to the deniable virtues of PARE's LIFE PTLAS, and a vnst ma-ity of the people have evinced their unqualified appro-l of the high character awarded this medicine, and are ly becoming more and more convinced, not only of the icacy, but, to use a more familiar term, the innocency this renovator of the human race. Cases of the most rere description have been cured by their use; and, hough powerful in conquering diseases, they are yet as re and harmless as new milk, and may be administered th confidence to the invalid, however weakly from long health. TO LADIES. PARE'S LIFE PTLAS are especially efficacious in all the

th confidence to the invalid, however weakly from long health. TO LADIES. Pana's LIFF PILLS are especially efficacious in all the riety of allments incident to the Fair Sex. Ladies even the most delicate constitutions will find them partica-ly beneficial both before and after confinement: and general use in Schools they cannot be too strongly commended. They mildly and speedily remove all in Eruptions, Sallowness of Complexion, Nervous ritability, Sick Head-ache, and Depression of Spirits, regularity, or general derangement of the system. None are genuine, unless the words "PARK'S LIFE LLS" are in White Letters on a Red Ground, on the overnment Stamp, pasted round each box; also, the c-simile of the signature of the proprietors, "T. DBERTS and CO., Crane court, Fleet street, London," the directions.

ROBERT IS and COLUMN to the directions. Sold in boxes at Is $1\frac{1}{2}d$, 2s 9d, and family packets at 11s each, by all respectable medicine vendors throughout the world. Full directions are given with each box. $*_{\bullet}*$ Sold by all Chemists. 20

A CLEAR COMPLEXION. GODFREY'S EXTRACT OF ELDER FLOWERS, is strongly recommended for Soften-**CONTRETS EXTRACT OF ELDER** UF FLOWERS, is strongly recommended for Soften-ing, Improving, Beautifying, and Preserving the Skin, and in giving it a blooming and charming appearance, being at once a most fragrant perfume and delightfur cosmetic. It will completely remove Tan, Sun-burn, Redness, &c., and by its balsamic and healing qualities, render the skin soft, pilable, and free from dryness, scurf, &c., clear it from every humour, pimple, or erup-tion; and, by continuing its use only a short lime, the skiu will become and continue soft and smooth, and the complexion perfortly clear and beautiful. Sold in bottles, price 2s 9d, with directions for using it, by all Medicine Vendors and Perfumers. APPETITE AND DIGESTION IMPROVED

APPETITE AND DIGESTION IMPROVED. LEAND DEERRINS' WORCESTERSHIRE SAUCE imparts the most exquisite relish to steaks, chops, and all roast meat gra-vies, fish, game, soup, curries, and salad, and by its tonic and invigorating properties enables the stomach to per-fectly digest the food. The daily use of this aromatic and delicious sauce is the best safeguard to health. N.B.—To guard against imitations, we that the names

N.B.—To guard against imitations, see that the names of "LEA and PERKINS" are upon the label and patent cap of the bottle.

FRANKS'S SPECIFIC SOLUTION OF COPAIBA. TESTIMONIAL—I have made trial of Mr Franks's Solu-tion of Copaiba, at St Thomas's hospital, in a variety of cases of discharges in the male and female, and the results warrant my stating that it is an efficacious remedy, and one which does not produce the usual unpleasants effects of copaiba. (Signed) JosEPH HENRT GEEX, F.R.S., President of the Royal College of Surgeons, London; Senior Surgeon to St Thomas's Hospital; and Pro-fessor of Surgery in King's College, London. Lincoln's inn fields, April 15, 1835. Prepared only by GEORGE FRANKS, Surgeon, at his LABORATORY, 90 BLACKFRIARS ROAD, Lon-don; where it may be had in bottles at 28 9d, 48 6d, and lis each. Also in boxes, at 28 9d and 4s 6d each, or sent free by post at 3s and 5s each. FRANKS'S SPECIFIC CAPSULE, a form of medicine at once safe, sure, speedy, and pleasant, especially applica-iols to mythered mythic processors.

a tonce safe, sure, speedy, and pleasant, especially applica-ble to urethral morbid secretions, &c., commonly called dis-charges, and other allments for which copaiba and cubebs are generally administered, and suited to the convenience of persons travelling, visiting, or engaged in business, as well as those who object to fluid medicines.

HEALTH WHERE 'TIS SOUGHT! HOLLLOWAY'S PILLS. Cure of a Disordered Liver and Stomach,

Cure of a Disordered Liver and Stomach, when in a most Hopeless State.
 Extract of a Letter, from Mr Matthew Harvey, of Chapel Hall, Airdric, Scotland, dated Jan. 15, 1850. To Professor Holloway.
 Stn.,-Your valuable Pills have been the means, with God's blessing, of restoring me to a state of perfect health, and at a time when I thought I was on the brink of the grave. I had consulted several eminent Doctors, who, after doing what they could for me, stated that I had been suffering from a Liver and Stomach complaint of long standing, which during the last two years got so much worse, that every one considered my condition as hopeless. I, as a last resource, got a box of your Pills, which soon gave relief, and by persevering in their use for some weeks, together with rubbing night and morning winch on gave relief, and by persvering in their use for some weeks, together with rubbing night and morning winch on the astonishment of myself and everytody who knows me. (Signed) Martnew Haver.
 Curcofa case of Weaknessand Debility, of Syear's standing.
 Little Thomas street, Gibson street, Lambeth, dated Dec. 12, 1849. To Professor Holloway.
 Sig.-I beg to inform you that for nearly five years I

To Professor Holloway. Sir,--I beg to inform you that for nearly five years I hardly knew what it was to have a day's health, suf-fering from extreme weakness and debility, with con-stant nervous headaches, giddiness, and sickness of the stomach, together with a great depression of the spirits. I used to think that nothing could benefit me, as I had been to many medical men, some of whom, after doing all that was in their power, informed me that they con-sidered that I had some spinal complaint beyond the reach of cure, together with a very disordered state of the stomach and liver, making my case so complicated that nothing could be done for me. One day, being unusually jil and in a very dejected state (I saw your Phils adver-tised, and resolved to give them a trial, more perhap from carlosity than with a hope of being cured; however, I soon found myself better by taking them, and so I went on persevering in their use for six months, when I am happy to say they effected a perfect cure. (Grequently called EDWARD.) Sold at the establishment of Professor Holloway, 244

Sold at the establishment of Professor Holloway, 244 Strand (near Temple Bar), London; and by most all re-spectable druggists and dealers in medicines throughout the civilised world, at the following prices: --lis 14d, 2s 9d, 4s 6d, 11s, 22s, and 33s each box. There is a considerable saving by taking the larger sizes.

CAUTION.—None are genuine unless the words "Hol-loway's Pills and Ointment, London," are engraved on the government stamp, pasted on every pot and box ; with the same words woven in the water-mark of the books of directions wrapped round the medicines. Also, be careful to observe, that the address on the labels to the covers of the pots and boxes, is "244 Strand, London," (and not 240 Strand, London), and that there is no initial, as "H," or any other letter, before the name "Holloway," nor is the word "Genuine" on the labels.

 The capacity of India to produce iron in any quantity, and the excellence of the material, even as rudely manufacture, are facts that that have long been known; yet no adequate measures have hitherto been taken to turn those resources to account, and the Iron markets of Calcutta, Bombay, and Madras, are still supplied from England and Sweden.
 Iron has alwaya@een_made, however, by the natives, and, in the aggregate, to a very great extent; but the manufacture, as conducted by them on the small scale, and without machinery, skill, or capital, has not been attended with the profit or success of which, under efficient arrangements, it is susceptible. In the supply of the Indian market the Iron made in the country must always have an advantage over that of Europe; while in the English market the Indian iron can be supplied of a quality and at a price to compete successfully with the Swedish and Russian.

lity and at a price to compete successfully with the Swe-dish and Russian. Actuated by these considerations, a few gentlemen at Madras, some time ago, formed a Company for the manu-facture of iron and steel by European methods, from the rich iron ores of the south of India, the Government assisting them by pecuniary advances, and by extensive grants of privileges in respect to ore and fuel. In the en-deavour to originate and establish this manufacture in a distant country, with new materials, and in a peculiar climate, many difficulties had to be overcome; but the Company, within the last few years, have succeeded in manufacturing iron of a very superior quality, selling, both in England and India, at rates capable of yielding a great profit. profit. The capital hitherto employed, however, has not been

The capital hitherto employed, however, has not been adequate either to the full development of the undertaking as an investment, or to the increasing demand for the commodity. The argent wants of India for iron for vari-ous purposes, including castings for bridges and other public works, and for the railways especially, have ren-dered it a matter of absolute necessity to supply iron from the country itself. The extent of the demand for railways alone may in some degree he estimated from an authenticated statement that, inclusive of cast-iron sleepers, which it is understood are likely to supersede the wooden sleepers, not less than 700 tons of iron, in various forms, will be required in the construction of every mile of double line, independent of the quantity required for maintenance.

the wooden sleepers, not less than 700 tons of iron, in various forms, will be required in the construction of every mile of double line, independent of the quantity required for maintenance. Much of this iron is required in forms that will hardly admit of its shipment from this country, while it is cer-tain that the existing shipping will not afford the means of transport for the pertion admitting of shipment. The subject has recently undergone the scrious consider-ation of the fovernment, as well as of the parties con-nected with the railways, and the effective extension of the Company's operations has been strongly urged to meet the exigencies of this new state of things. The Company have secured territories yielding ore and fuel to an extent that for all practical purposes may be termed inexhaustible. Their accessibility and quality are also such as to afford the materials for making the finest iron at the lowest cost. These properties comprise exten-sive tracts of mines and forests acquired from nativeland-holders, with exclusive rights from the Madras Govern-ment of raising iron ore throughout all the provinces of their purpose. The Company has two sets of works now in operation, one on either side of the Peninsula—at Beypore and Porto Nvov; both most favourably situated on the coast, at the mouths of navigable rivers. Little addition is re-quired to the buildings or machinery to adapt them to the extended scale of operations contemplated, and a large stock of orces and fuel is on the premises, and kept up by regular course of supply. All materials are deli-vered by contract, or purchased at the works and depots. The ore lying in mass on the sufface, no underground operations are required, whence the ordinary risks of mining enterprise are avoided; and i, the whole charge being merely that of the unskilled labour (in a country where it can be had, in any amount, at 2jd a-day), the cost o the materials of iron making is lower, probably, than in any part of the world. The Company have, moreover, pro

Under these circumstances, it is proposed to create a new Company, with a capital sufficiently large to work the undertaking efficiently, and powers to extend its ope-rations as future exigencies shall require.

rations as future exigencies shall require. It is calculated that on a sale of only 18,000 tons of iron and castings in the year a profit of 14 per cent. on the whole capital can be realised, and the net profit would be in-creased in a much larger proportion on an increased make, for which the means exist to any extent. In the above calculation the most careful estimates of the cost of production, founded on 15 years' experience,

have been taken into account. The selling price of the bar iron has been taken at 8/8s, the average of the ac-rual prices obtained for the last ten years for English iron in the Indian markets, while the Company's iron is, from the purity of its orcs and the mode of its manufacture, much superior, and has hitherto realised on an average '2t per ton. The demand calculated on forms but a small part of that actually existing, wholly irrespective of all prospective increase as dependent on railways or other developments. The iron exported in the last year to India, from Liverpool and London alone, exceeded 55,000 tons, exclusive of any rails. The reports, papers, and calculations on which the esti-mates of production and profits are based, have been sub-mitted to Mr Charles Manby, C.E., and Mr J. E. Cole-man, accountant, who have satisfied themselves of their accuracy, and of the correctness of the results deduced from them.

THE ECONOMIST.

from them. The extent to which the introduction of railways will open a market for the Company's produce it is difficult to estimate, but it must be very great in various ways. Of eventual profit from this source, no account has been taken in the estimates, which it has been the object to found only on established and ascertained data. For this reason also the profits from the manufacture of steel have been omitted, though from the known high quality of steel made from Indian fron, and the extraordinary facilities there can be no doubt of a large revenue being eventually derived from this source also. The parties interested in the Old Company are pre-pared to convey to the New Company their property, leases, and privileges, free from all debts and incum-rances and working ltabilities, up to a day to be agreed on, on the following terms of advantage to the new Shareholders:-1. That the capital of the new Company shall be $4^{190,000}$, divided into 40,000 shares of £10 each; 20,000 fusch shares being denominated Class A, or Preference shares, and 20,00 Class B, or shares entitled to a de-erred divided. The extent to which the introduction of rail

That the works, with all machinery, plant, and stock ores and fuel, of the estimated value of £50,66°, shall

ores and fuel, of the estimated value of $\pounds > 0, 000$, snan paid for in cash. 3. That the forests and mineral property, and the ses, rights, and privileges granted by the East India updaty to the present Iron Company, shall be repre-tied by the sum of £200,000 in Class B Shares of the w Company, which shall be entitled to dividend only as reafter explained. 4. That the annual profits of the undertaking be applied follows : be paid

4. That the annual profits of the undertaking be applied as follows :Ist. In payment of adividend at the rate of 7 per cent. per annum on the amount for the time being called up on the Preference or Class A Shares.
20. In payment of a dividend to the holders of the Class B Shares at the rate of 7 per cent. per annum, on the amount for the time being called up on the Class A Shares.
21. In payment of a dividend to the holders of the Class B Shares at the rate of 7 per cent. per annum, on the Amount for the time being called up on the Class A Shares.
23. Any excess after these payments to be equally divided between the two classes of shares.
35. That, after any period of five years, during which a verage dividend of 7 per cent. on the whole capital of £4.0,000 shall have been paid, all distinction of shares shall cease, and the whole capital be entitled to dividend equally. It is intended that the Company shall be constituted by a Charter of Incorporation or Act of Parliament, limiting the liability of the shareholders.
The Board of Directors will be in London, with the assistance of a subordinate local Board or Agency at Madras.

Matrix. The deposit to be paid on the allotiment of the shares. The deposit to be paid on the allotiment of the shares will be is per share, being after the rate of 10s per cent., the amount limited by the Act 7 and 8 Vict. c. (10, which deposit, less any expenses incurred, will be returned to the shareholders, in the event of arrangements not being made with the East India Company for establishing the undertaking on a satisfactory hasis. It is not expected that the aggregate calls on the Class A Shares will exceed £5 per share during the first year.

exceed £5 per share during the first year. A deed, embedying the provisions which the Directors may consider proper for the regulation of the Company, and for carrying out the objects in view in the proposed or any modified form, will be prepared with the sanction of the Directors; and if any Shareholder shall fail to excente the same for one month after the publication of a notice in the "Times" newspaper, calling on the Proprietors so to do, his shares, with the deposits paid thereon, will become forfielted to the use of the Company. Annification for shares to be made in the annexed form.

PERUVIAN GUANO. — CAUTION TO AGRICULTURISTS. It being notorious that extensive adulterations of this manure are still carried on, ANTONY GIBBS and SONS, as the only importers of Peruvian Guano, consider it to be their duty to the Peruvian Guano, consider it to buy to be carefully on their guard. The character of the parties from whom they purchase will of course be the best security ; and in addition to particular attention to that point, ANTONY GIBBS and SONS think it well to remind buyers that the lowest wholesale price at which sound Peruvian Guano is or has been sold by them during the last two years is £9 5s per ton, less 24 per cent. ton, less 24 per cent.

Any resales made by dealers at a lower price must therefore either leave a loss to them, or the article must be adulterated.
