Suggestions and Recommendations

for the Benefit of Patrons
purchasing Goods through our

MAIL ORDER DEPARTMENT.

By carefully observing our suggestions and recommendations customers may rely upon the prompt execution of their requirements, as the staff and facilities of our MAIL ORDER DEPARTMENT are very complete.

When Placing an Order,

write anything that does not pertain directly to the same subject, such as inquiries, complaints, etc., on a separate sheet, so that each can be transferred directly to the department to which it belongs for prompt attention without conflicting with each other and causing vexatious delay.

When sending for any article it is **not necessary to cut the leaves of the catalogue** for enclosure. Simply quoting catalogue page and number and designating **size, color and finish**, as the case may be, will be sufficient.

Any article not represented in our catalogue can be supplied at the same price and frequently from five to twenty per cent. less than charged elsewhere.

Substitution.

It is simply impossible in every case to supply the exact goods illustrated, especially as the demand gradually absorbs the supply obtainable; therefore permit us, in order to avoid delay, to **substitute**, relying on our good taste and judgment to send as good or a better article than ordered.

When granting permission, use the phrase, "**substitution allowed**," but unless so instructed we shall not feel at liberty to vary from the order.

Correspondence.

All correspondence must be addressed to **LUDWIG BAUMANN & COMPANY, Nos. 500-514 Eighth Avenue, New York City, N. Y.**, in order to receive prompt attention. We will not be responsible for orders sent to any of our employees.

Count everything you put in your letter, checks, orders or whatever form it is in, whether intended for goods, prepaid expressage, or both, and tell us what the amount is and your wishes as to its disposition.

By almost every mail we receive letters which bear neither date, signature nor address, some of which contain money. Too great care cannot be taken in respect to distinctness of name and address.

Every time you write to us, no matter how often, it is necessary you should sign your name legibly and give your full address—Post-office, County and State.

Married ladies will save confusion of accounts by invariably using their husband's initials, as we have no way of knowing that Mrs. Charles Jackson and Mrs. Anna Jackson are one and the same person.

If Mr., Miss or Mrs. is not given, we are liable to call a gentleman "Madame" or a lady "Sir," a mistake which the customer can assist us to avoid.

Avoid sending money by open mail. It exposes to temptation every one through whose hands the letter may pass, and is liable to a loss without a chance of recovery, while Post-office Express money orders, bank drafts and certified checks can be replaced with but little trouble or delay.

Special Notice—Agents.

Make no payments to any agent, solicitor, salesman or employee. All remittances should be made direct to **LUDWIG BAUMANN & COMPANY, Nos. 500-514 Eighth Avenue, New York City, N. Y.**

We employ no agents.

C. O. D.

Where the bill amounts to over \$5.00, we will ship C. O. D. by express if one-fifth of the amount is remitted with the order as a guarantee of good faith. This, however, is not a desirable way of buying goods, as the expense includes all charges, both for expressage on goods to you and for return of money to us. This adds materially to the cost of your purchase without any corresponding advantage to you, as express companies decline to permit packages to be opened before delivery. Goods cannot be sent by freight C. O. D.

Shipment of Goods.

Daily deliveries of furniture by our own trucks to points in New York, New Jersey, Long Island, Staten Island, Westchester County and other suburbs without charge.

Beyond, subject to special arrangement where a sufficiently large quantity of furniture is purchased. See inside back cover and read our special offer.

We cannot send goods on approval or subject to inspection, as the railroad companies decline to accept shipments on this understanding. We guarantee all goods as represented.

State clearly in your order how you wish goods to be sent, whether by freight or express, naming the line, if any preference exists.

We pack all goods carefully and mark packages plainly and properly according to instructions, making delivery to a express or freight company in this city in perfect condition without charge for boxing or cartage, but with this our responsibility ends.

Prices

have been fixed for strict **CASH PURCHASES**; hold good only in our **MAIL ORDER DEPARTMENT**, and are subject to changes and fluctuations of the market.

Terms in our Mail Order Department

are invariably ready cash with order, or C. O. D. (Collect on Delivery). No goods sent C. O. D. without a deposit of at least one-fifth of the amount of order as a guarantee of good faith, which deposit will be deducted from the total amount of bill and goods sent C. O. D. for the balance.

Small orders amounting to \$5.00 or under cannot C. O. D. On such pre-payment in full is therefore required.

REGARDING errors, everybody makes them. It is, therefore, not surprising that in a business of our magnitude mistakes will sometimes occur in spite of all conceivable precautions. In such case, write us as pleasantly as possible on the subject, when any rectification required will be made the moment the matter is called to our attention.

Introduction.

WITH this we submit, for the inspection of our friends and the public at large, a new edition, completely revised from beginning to end of our now famous "GUIDE TO HOUSEFURNISHING," comprising Section II.

The time which has intervened between the publication of our preceding editions in connection with the fact that articles of furniture, like many other necessary commodities, are subject to the ever-changing dictates of fashion—which exacts from the manufacturer the constant production of new styles and designs on the advent of each new season—has rendered the compilation of a new **UP-TO-DATE EDITION** an imperative necessity.

Particular attention is called to the fact that **never before** have such goods as we illustrate here been thrown on the market to sell at the **EXCEPTIONALLY LOW** prices quoted.

Many **NEW SPECIALTIES** have been added to our already extensive stock, all of which are fully described in these pages under their respective departments.

We are open to Cash or Time propositions from any State of the Union. Having all requisite facilities for the handling, packing and dispatching of shipments to remote sections or foreign ports, we make this one of our **DISTINCTIVE SPECIALTIES**.

When filling orders from parties whose distant location precludes all possibility of a call in person, it is our rule to be doubly particular by making the choicest possible selection that stock on hand will permit. This invariably insures perfect and entire satisfaction, and as we are the only firm who do not hesitate to guarantee our goods to be substantial, durable, well-finished and in every respect exactly as represented, or "**MONEY REFUNDED**," purchasers will find it to their advantage to entrust us with the execution of their orders.

Again, it makes no difference whether articles intended for transportation are delicate or bulky, our methods of packing are so perfect and our packers so skillful that shipment can be made anywhere with absolute safety.

This was so clearly and forcibly expressed by one of our out-of-town patrons that, for the benefit of all concerned, we are tempted to reproduce the letter here, which reads as follows:

Wallingford, Conn.

DEAR SIR: I received furniture from you yesterday, and am very well satisfied with the way it was shipped, for I think the packing would have been good enough to send it around the world. Yours respectfully,

A. G.—t.

In all respects we shall continue, as in the past, to sell at close prices for **CASH** or **ON TIME**, making **TERMS** and **PAYMENTS** to meet the requirements of all who call and arrange matters in person.

With appreciative acknowledgment for the countless letters of commendation received from gratified customers from all parts of the country, at home and abroad, whom we have succeeded in pleasing, we print a few for which room can be found, and tender our sincere thanks for past patronage to the many whose wants have been supplied through our **MAIL ORDER DEPARTMENT**. That redoubled efforts will be made to merit its continuance is our fixed determination.

A ten-story fire-proof annex with elevator service, electric light, steam heat, automatic fire-alarm and sprinkler system has been added to our main block of buildings, thereby giving more room and affording greater opportunities for the proper display of the large and varied stock we carry, comprising **CARPETS, CROCKERY, BEDDING, GLASS, KITCHEN and STOVE WARE** combined with **HOUSE FURNISHINGS** in general, in fact everything and anything required for **COMPLETE HOUSEKEEPING**, all under one roof. From the top of our building a beautiful bird's-eye view of the city, river and surrounding territory can be obtained. Visiting strangers are cordially invited to call, when in town. Special attention and courteous treatment accorded to all without any obligation to purchase unless so inclined.

Repeating our grateful acknowledgments for past favors, we remain,

Voluntary Testimonials

FROM the mass of letters on file we submit a few more testimonials selected at random, but for obvious reasons refrain from printing the names of our customers in full, using initials instead, as others would simply misuse this information for their own benefit and to our disadvantage.

Any one residing in the localities mentioned, wishing to confirm the statements made, preliminary to placing an order, will be furnished by mail, on application, with the full name and address of the person whose signature corresponds with the initials attached to any of the letters herewith appended.

Cornwall, N. Y.

Sirs: The Mattress came in good shape yesterday, and is entirely satisfactory. In the near future may give you a larger order. Respectfully yours, Mrs. L. P—y.

Natchez, Miss.

Dear Sir: I received my Table on the 5th, and was delighted with it; was also much pleased at the care and attention you gave in packing it. Please accept many thanks for same. It has already been very much admired.

Mrs. R. S—w.

Somers, N. Y.

Gents: Chair received safely and gave entire satisfaction. Thanks for promptness. Yours, F. H—t.

.. Stove Department ..

We handle only the very best makes of different manufacturers whose stoves have stood the test of time, and found to be the popular favorites by reason of giving the greatest satisfaction. Plenty of selected No. 1 iron has been used in their castings and fittings, and every name stamped on each stove will be recognized as that of a leading manufacturer. When ordering, be sure to give the **number** of the stove, next the **size**, and last **whether** intended for **burning coal or wood**. This is important, as the fixtures used for each are entirely different. These consisting of iron plates for wood; or fire bricks for coal and can be ordered separately or together. When no preference is expressed coal fixtures are always sent.

Every stove guaranteed, good Bakers, Burners and Heaters. Shipped blacked, and one joint of pipe with elbow included **free of charge**.

New Castings, Bricks, Grates, etc., for any stove in this catalogue can always be ordered from us, and will be supplied at a very low cost.

PENINSULAR STEEL RANGES.

HOTEL AND FAMILY SIZES.

After an exhaustive inquiry, searching for a reliable steel Range, representing the best value for the least outlay, we have selected the "Peninsular" Planished Steel Ranges, as fulfilling all requirements.

Locomotive Jackets are made of **Planished Steel**. Exposed, it always looks well, wears better, and being highly polished by a secret process always retains the lustre.

Guaranteed no Paint or Japan applied to burn off, and none to cover up cheap material or poor workmanship. Steel radiates quickly, giving immediate and full benefit of fire, saving at least 25 per cent. in fuel.

The flues are **asbestos lined**. Asbestos being a fire proof mineral and a non-conductor, effectually retains all the heat within the Range, forcing it in the direction of the oven.

To increase their baking and roasting effectiveness, the **ovens are well ventilated**.

These Ranges are **hand riveted** every **two inches** with steeple head rivets, **twice** as many compared to others, making them **tighter, stronger** and **more lasting**.

Outside highly polished by such a process as to always retain its lustre. Fitted with **duplex grate**.

The **top** of each Range has **six full sized solid covers**. Instead, a French top having one reducing cover divided into rings of different sizes can be substituted without extra charge, but will only be sent when the order sent us reads "**with French Top**."

The **Peninsular Hotel Ranges** suitable for **Hotels, Cafes, Restaurants, Public Institutes, etc.**, all sizes and kinds. Close quotations given on application by submitting specifications of exactly what is wanted in this line.

The annexed print shows our Hotel Range of the single fire, double oven style. With all the advantages of construction as explained above it includes a high shelf, plate warmer, canopy top, nickel towel bar dryer, drop down tea pot bracket shelves. Low warming closet, water back with couplings attached to a 30 gallon pressure, Galvanized hot water boiler standing on an ornamental base, and an independent charcoal broiler mounted on a handy shelf.

Consumes either coal, coke or 24-inch lengths of wood

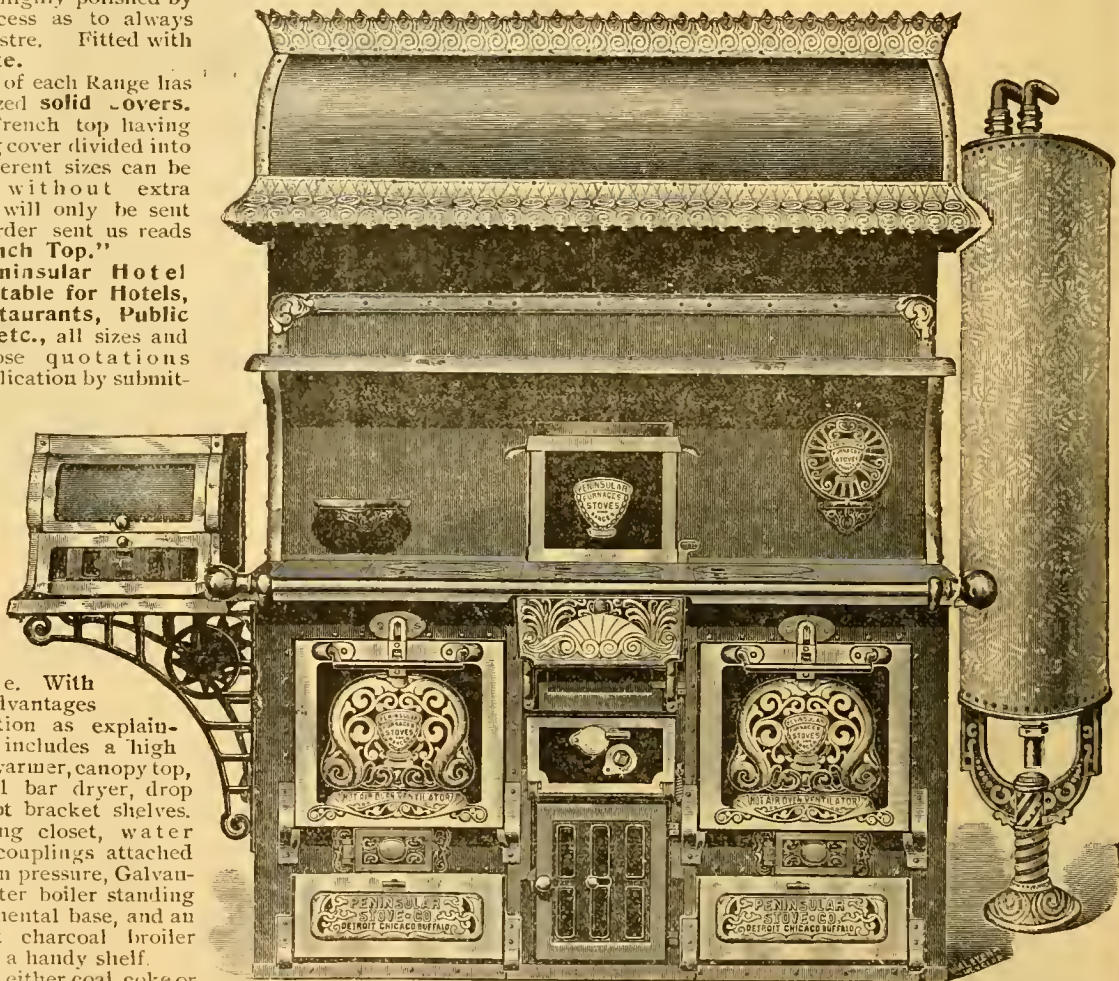

Choice given of either a French top or solid covers having a cooking surface 32x56 inches, supplied with 8 or 9 inch holes

Price complete \$137.50, \$139.00 each

ONE LETTER OUT OF MANY.

Guilford, Conn.

Dear Sirs:

I have received the stove. Am pleased to state that I am more than satisfied. Shall make it my business to deal with you in the future for what things I shall need, knowing you are honest in your business transactions.

Very respectfully,

W—R B. B—N.

STOVE DEPARTMENT—Continued.

No. 20—THE SUCCESS.

An air-tight wood heater; burns chunks, kuots, chips, straw, cobs, trash or anything used for fire except coal.

Interior lined with sheet steel plates. The hot blast draft heats the air before it reaches the fuel, thus producing perfect combustion. The cover to ash opening is fastened securely to prevent blowing off.

The feed opening is 12½ inches in diameter; ash opening, 7 inches.

Equal to any coal stove for keeping a fire over night.

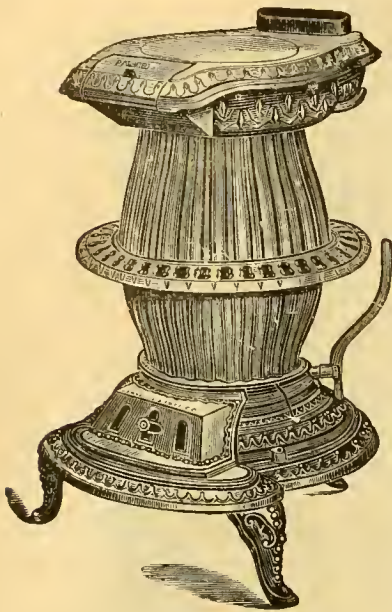

This is the greatest value ever given in the stove line at the low prices quoted.

After a certain number have been sold the foundry reserve the right to advance the rates, which will compel us to increase our prices in proportion.

As nothing can be gained by delay, if such a stove is needed, our advice is to **order at once.**

Made in four sizes of smooth sheet iron or polished sheet steel.

A most finely proportioned square stove, unsurpassed in all parts requiring strength and durability. The hot air columns are located at side of back flue, with opening at bottom for cold air, and exit at top from large hot air chamber, thereby making it a most effective ventilating stove, constantly keeping the air of the room in circulation and heating the upper rooms as well. Has full Nickeled top, Nickeled base, and large name plate, covering front of base, top of strikingly artistic design. Foot rails are of unique pattern and beautifully Nickeled. Mica doors are large, with graceful swell. Heavy fire pots supplied with draw center grate or duplex. Tea kettle attachment at rear. Perfect combustion, economy of fuel, freedom from gas and simplicity of operation make it one of the most desirable stoves ever constructed.

A neat, square heater of modern architecture, possessing many special valuable features. Burns hard or soft coal. Fire pots are large and with but slight variation in width from top to bottom, the latter feature rendering them easily cleaned without opening of doors, or use poker. Grates can be removed if desired, through ash pit door. Is provided with dust damper, which not only insures freedom from dust when shaking, but acts as a regulator which enables the most inexperienced house-keeper to economize in fuel. The flues are all large enough to insure perfect satisfaction with all kinds of fuel. Gives highest results as a double heater for warming upper rooms, as well as most complete radiation when used as a single stove. Ornamental top and base, with Nickel trimmings. Has haul out fire pot.

An excellent and reliable Oil Heater at a low price. Will heat comfortably in cold weather a room 15 to 20 feet square, burning about 3 quarts of kerosene oil—an indicator on the front shows the quantity of oil at all times and when it needs refilling.

STOVE DEPARTMENT—Continued

These Gas Logs take the place of open fire grates; are very powerful heaters. Made of the best terracotta stone, in perfect imitation of wood. Very strong and durable; will not crack even in the most intense heat. They give a room a most cheerful, subdued and comfortable appearance, making everything therein seem soft and beautiful.

Agate Ware

This is universally regarded as the best kitchen ware ever produced. The articles are made from sheet iron, pressed into shape and coated with a secret composition of enamel, which, for tenacity and power of resisting the action of acids, has no equal. This gives it a surface as smooth and hard as granite and as easily cleaned as china. It will wear for ages and not rust, and is the purest, strongest and most durable, and therefore the cheapest ware for family use ever made.

Nearly every article in this list can also be supplied in either **Blue and White** or **Gray Enameled Ware**, on which quotations are also given for the benefit of those who desire a cheaper grade of goods. Being made by different manufacturers, the shapes may not be exactly like the prints we show, which represent Agate Ware only, but the difference is never very great. We give the same sizes used by the factory when selling these goods to dealers. Oftentimes it will be found that the actual capacity of each is less. For this reason it would be advisable to order one or two sizes larger, above what is actually wanted to insure full measure. Prices on covered goods include tin covers only. Granite covers are extra and should be ordered separately as per quotations on page 36, No. 238.

Aluminum Ware

Aluminum is a very light, beautiful white metal, similar in appearance to silver, but four and one-half times lighter. Unlike silver, will never tarnish. It is practically unaffected by the strongest acids, and is positively the only ware for cooking purposes that is absolutely pure, and in no way affected by any substance used in culinary operations; is as pure as china or glass, the difference being **it will not break.**

Aluminum cooking utensils are light, durable and clean; will not rust or leak; require no scouring, and are everlasting. There is no enamel to crack or scale, no tin to rust, no verdigris of any kind. Highly recommended by physicians, masters of cooking, and other prominent experts as giving better cooked and finer tasting food than any utensils used for domestic purposes.

No. 284—ALUMINUM FLATWARE

Once used is always recommended. Never tarnishes; finely finished in every detail; requires no scouring or polishing; easy and light to handle, and above all clean and wholesome. Cannot be discolored by acid of any kind.

Chafing Dishes.

The Table Tea Kettle, besides being an ornament, is as essential an article as the Chafing Dish.

It is just the thing for a social evening at home, as it aids in serving a cozy lunch, etc.

In the sick room and nursery its value is beyond expression.

Its workmanship is unequalled, either in detail or finish.

NOTE.—Double Tin Lining is an exclusive and important feature of our Chafing Dishes. It prevents the absorption of odors, which is a fault common to dishes not so lined. It protects the food from injurious contact with the under metal, and is easily cleaned. The handles are non-heating, (always cool). The lamps used are the best, because they can always be regulated to give out more or less flame, just as required.

No housekeeper should be without one, for the following reasons: First, removes all rust, dirt or starch from the face of the sad-iron, giving it a clean, smooth surface. Second, contains a cake of wax specially prepared for laundry purposes, giving the articles ironed that much desired gloss, and can be applied to the surface of the iron by passing it over the linen covering the wax. Third, is fire-proof, and can be used as a stand when desired, thus combining three very essential articles. Fourth, the wax and linen can be replaced at a trifling expense, therefore making it an everlasting implement in the household.

No. 411—The Victor Bulge Well Bucket.

Made of the best seasoned oak timber, is heavily ironed, nicely finished and varnished. Special attention is called to the improvement on "The Patent Ear," as it protects all four hoops, making it impossible for them to come off. The ear laps around the bottom of stave, and is so stamped that it fits over hoops and runs over top edge into the bucket, and is there clinched by staples. This adds greatly to the strength of bucket, making it in many ways the strongest and most durable on the market.

No. 408—The J. I. C. Oak Stable Pail.

Made either of oak or white cedar, heavily ironed, flush bottom, nicely finished and varnished. Can be used for a variety of purposes. The strap-ear runs down side of bucket, and is so constructed that it fits over hoops and laps under the stave at bottom. The strap is securely fastened with rivets, and it is impossible for hoops to come off. The bottom is so constructed as to come flush with bottom of staves, and cannot be broken by the horse's foot getting in the bucket. Pronounced by all stablemen to be the best stable-pail made.

No. 412—Covered Water Can.

With knob cover to lift off. Especially adapted for drinking-water, as it keeps all dust and trash out. In summer it makes an excellent water cooler. Ice will keep very well in it. Will also make a good sugar or flower bucket, and is insect proof.

Price, large size..... 60c

NOTE.—Electric-welded wire hoops are imbedded by a patent process in grooves in the tub or pail, and clamp the staves so tightly that it is impossible for them to fall off, nor can they be gotten off without the use of force sufficient to ruin the tub or pail. They are made of galvanized wire, welded by electricity. Are double the strength of the old style, riveted flat hoops. Will never fall apart.

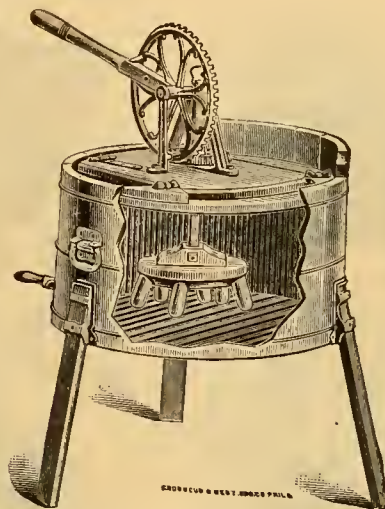

WOODEN WARE—Continued.

No. 413—Improved Cedar Cylinder Churn.

By far the best small, cheap churn made. Made of the best Virginia white cedar, has a double dasher, and the crank is locked to the churn with a clamp and thumb-screw, which prevent leakage. Lock cannot break. The top is large and dasher easily removed. The hoops are of galvanized iron and will not rust.

Capacity,	3	4	7	10 gallons

Prices,	\$1.88	\$2.25	\$2.60	\$3.00

No. 415—The Electric Washer.

This machine is constructed of the best Virginia white cedar, and is stronger, better finished and larger than any round machine on the market. The gearing is improved and fully galvanized. The inside of the machine is fully corrugated, similar to a wash-board, there being no nails or blocks of any kind on the inside: made with large end of tub down, allowing plenty of room for water and clothes. The hoops (of extra heavy galvanized wire) are electric-welded, and warranted not to break or fall off. A square galvanized iron rod is used to work the dolly, making it impossible to tear the most delicate fabric, as this offers nothing in which the clothing can catch.

Price.....\$4.20

No. 415A—Same style machine.

No. 416—"The King" Well Bucket.

Made of best, white oak, tongued and grooved staves, turned smooth inside and out and is warranted not to leak. The strap-ears run down sides of bucket, fit over the hoops and lap under the stave at bottom. Securely fastened with staples, rendering it impossible for hoops to come off. The bucket is so shaped that it lies flat on the water, and dips with more ease than the ordinary bulge bucket.

No. 414—Staff or Dash Churn.

The old way of churning is considered by many the best. Made of cedar and can be safely recommended, as cedar is peculiarly adapted for milk and butter purposes. Knowing the hard usage of a churn and the necessity of the hoops always being tight, this one is fitted with the electric hoop. The wire is heavily galvanized and the top hoop is of galvanized iron.

No. 462—Broiler.

Of peculiar and novel construction, permitting most of smoke and odor from broiling to pass down into the flame instead of escaping into the room. Steaks, chops, etc., are nicely broiled by the direct heat from the flame coming into contact with the meat, and this without any juices dripping into the fire. Simple and easy to clean. Can be used on coal, gas, gasoline or oil stoves.

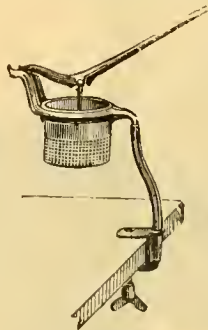

Price.....60c

No. 455—The Crown Self-Basting Baking and Roasting Pan.

Makes tough meats tender, saves at least one-fourth the nutriment that is generally lost through steam, etc., making the meat more digestible. Beyond setting pan in oven, no attention need be given to basting and turning; if overlooked in oven longer than necessary, no matter—the steam will keep the food moist, sweet and fresh. A sheet-metal frame included with each pan.

CHILDREN'S TRAVELING TOILETS.

No. 625.

The mother's comfort. A long-felt want supplied. The miseries of traveling with children made a pleasure. This handy little article, besides being one of the best things ever invented, has the following advantages: In appearance it resembles a handsome lunch or fruit basket, attracting no more attention than such a basket would. The interior is fitted with four spaces, in which can be carried comb, brush, soap-box, toilet paper, etc., besides ample room for small articles of clothing. One of the finest things when traveling at night in sleeping cars and boats. To carry a child from the warm berth through a cold passageway to the toilet is a great danger; also an undisputed fact that public places in general are breeders of disease, and absolutely dangerous for children. This is all done away with by use of the Children's Traveling Toilet. It is perfect in every respect from a sanitary point of view, and indorsed by the leading physicians. Holds no odor, and at the same time allows none to escape. It is equally

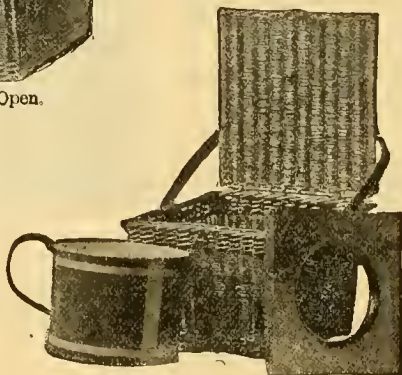

as valuable in the house, as it takes the place of the nursery or toilet chair. Altogether it is more desirable in every way, less cumbersome, takes less than one-third the space, and is cheaper. Can be hung upon a nail, placed on a shelf, or in fact any place where there is ten inches of room. Also serves as a very comfortable seat for children in carriages and public places. Made of fine French willow, very strong, and will last a lifetime with ordinary care. Finished a rich dark brown in color; also cherry, oak or white enamel. Size, 10 inches square, 7½ inches high, weighs about 2½ pounds. Seat of strong wood, nicely beveled.

Picture Department

Recognizing the fact that no well-regulated household is considered complete without being embellished by a few well-selected pictures, we have made it a special feature to include in our stock a **choice assortment of Water Colors, Artotypes, Oil Paintings, Pastels, Colored and Plain, Photogravures, Steel Engravings, Etchings, etc.**

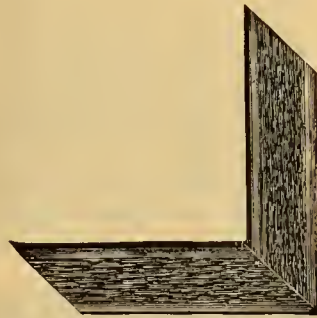

These comprise fac-simile reproductions from the works of celebrated painters and artists, representing **Landscapes, European and American Sceneries, Figures, Historical and Military Subjects, Marine Views, City and Country Sketches, etc.**

All of our pictures are set in **suitable frames**, to harmonize with the subjects represented, either of oak in **Sixteenth Century or Antique finish**, combined with steel or oxidized **trimmings**, or in the latest European creation of **white, blue or pink enamel**, with **raised bisque trimmings** in delicate tints, producing a most novel and pleasing effect.

Lack of space precludes us from cataloguing our entire line, but we merely submit a few culled selections as representative examples of our general stock.

Bird Cages

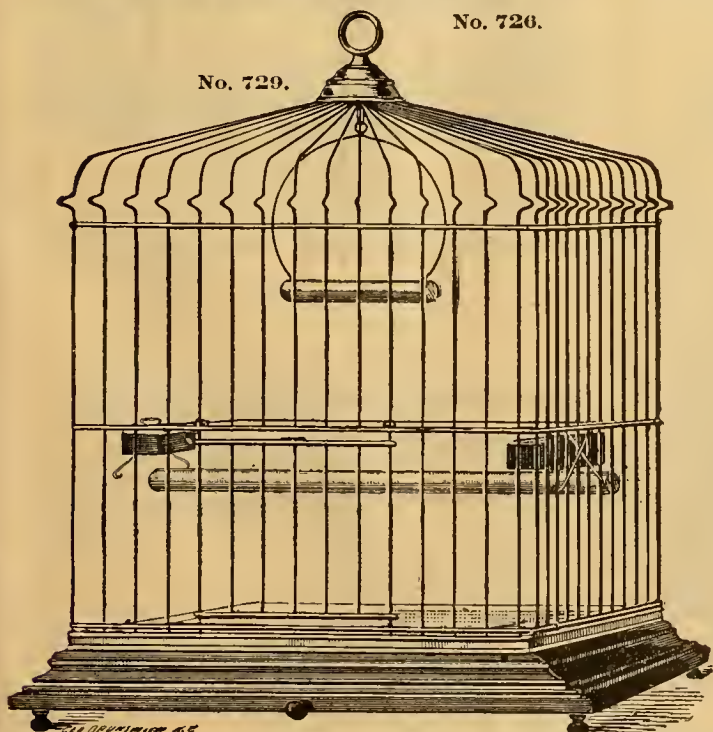

of fine brass wire cloth, bound on the edges with narrow strips of sheet brass, and is attached close to the cage; by raising the guard up the perches can be easily taken out and cleaned, and the bath cup set in without disturbing the bird, with no exertion or trouble. Also prevents the scattering of feed and the splashing of water. Regarding our japanned cages, these are made with neat, narrow, double-punched tin cross-bands, tastefully japanned

Those constructed of solid brass have drilled flat cross bands, wire fastened without solder, lacquered with best French shellac varnish, and will stand any climate. Fitted with ferruled perches, and tinned mats inside of tray; have the never-failing safety sliding spring doors, preventing the bird from escaping; furnished with climaxed feed cups. Attention is directed to the new patent sliding guard $3\frac{1}{4}$ inches high, attached to some of the patterns. This is made in any of the following colors: green, blue or red. The hooks on bottoms are inclosed with sheet metal to avoid rusting. All have sliding doors, and are finished in the best manner.

Suggestions and Recommendations

(Continued from Inside Front Cover.)

Remittances.

Better send too much than too little. All sent in excess is refunded with bill, and having too much saves delay in writing for balance due before goods can be shipped. When money is insufficient, we shall omit goods from the order, or if this is impossible, delay articles until the deficiency for which we shall write has been received.

We prefer that remittances should be made to us when possible by bank drafts on New York, Post-office money orders or certified checks. Either of these methods affords perfect security, as duplicates can easily be obtained if the originals are lost. Postal notes cannot be duplicated if lost. Checks, unless certified, will not be received except on the understanding that shipment will be delayed pending collection. Postage stamps, currency and silver are unsafe unless in registered letters. Express money orders are also desirable, and can be obtained at any office of the American, Wells Fargo & Co. or United States Express Companies, at the following rates:

From 1 cent to \$5.00..	5 cents.	Over \$20.00 to \$30.00..	12 cents.
Over \$5.00 to 10.00..	8 cents.	Over 30.00 to 40.00..	15 cents.
Over 10.00 to 20.00..	10 cents.	Over 40.00 to 50.00..	20 cents.
Over \$50.00, in proportion.			

Always make same payable to the order of

Special Offer.

At the existing small margin of profit goods have been priced; were we to undertake to pay transportation charges besides, we should be doing business at a loss. Being always ready to give our customers the benefit of every concession possible, we have devised a method whereby this can be done under certain conditions.

TO EXPLAIN—The cost of help, such as selectors, checkers, markers, packers, bill clerks, etc., is about the same on an order for \$5.00 as it is on one of \$50.00. Naturally, by receiving large orders, we save on the cost of clerical help, and propose to give this saving to our patrons by paying the freight

charges on orders amounting to the specified sums as scheduled below.

Conditions under which goods will be shipped, transportation charges prepaid.

Providing a remittance in full payment is received with an order for goods.

Amounting to not less than \$5.00.

For shipment to New York,	Delaware,	Maryland,
New Jersey,	New Hampshire,	Dist. of Columbia.
Connecticut,	Massachusetts,	Pennsylvania,
	Rhode Island,	Vermont.

On orders amounting to not less than \$25.00.

For shipment to Maine,	Virginia,	West Virginia,
North Carolina,		South Carolina.

On orders amounting to not less than \$50.00.
