## MOTORCADE GROWS WITH ENTHUSIASM

Secretary Rhoades Calls for More Cars for Mammoth Junket

50 AUTOS PLEDGED  
Half a Hundred Cars Will Pull Out at 8:30 Tomorrow

More automobiles are wanted for the motor caravan that is to leave the chamber of commerce tomorrow morning at 8:30 for an all day tour of the various towns of the San Fernando valley and the Tujunga-Sunland district. J. M. Rhoades, secretary of the chamber of commerce who has had charge of all arrangements for this trip has covered the route to be followed by the caravan three times; he said this morning that already 40 automobiles have been pledged to take part in the caravan and that he wants at least 10 more to make good the promise that there would be 50 automobiles leave Glendale for the trip.

All arrangements for the trip have been completed and an excellent luncheon has been arranged for participants in the trip at the Porter Hotel in San Fernando. This luncheon will be served at noon and there will be no danger of delay in reaching that city at the time specified as the caravan will travel on a schedule similar to the one used by railroad trains. Only a few minutes will be spent in each city and arrangements have been made for a reception committee to meet the caravan in each town.

When the travelers arrive in a town the public square will be closed to traffic for about 15 minutes. The truck with Kelly's orchestra will drive to the center of the square and the other machines of the train will form a circle around the truck. After a speech of welcome by the reception committee of the town some speaker from Glendale will talk for a few minutes and the remainder of the time in town will be spent getting acquainted. The merchants making the trip will be allowed to distribute business cards and advertising novelties. The mayor of each town to be visited will deliver an address of welcome to the travelers on their arrival in the city.

Among notable speakers on the caravan will be the chamber of commerce it is expected that Supervisor Henry Wright of this district will attend.

When the party arrives in the Sunland-Tujunga district an address of welcome will be made by John Stevens McGroarty, who will then join the party for the remainder of the trip. Two official photographers will accompany the party as will representatives of both the Glendale daily papers, the Los Angeles papers and a special

## BURGLARS HOLD UP F. S. JULIAN IN HIS HOME

Surprised in Residence They Draw Revolvers and Make Getaway

"Don't move or I will blow your head off" is the great threat which F. S. Julian, 1002 So. Central avenue was met when he entered his home about 9:45 p. m. Monday night and made general recommendations in regard to the city parks, viz.: That the city park be improved Kenilworth park and acquire other park sites as soon as possible.

Citizens will remember that a bond issue of \$22,000 was voted for the purpose of completing the purchase of this park and building the long promised swimming pool therein. This report will be submitted to directors of the chamber at their meeting this noon.

Another general meeting of the civic committee will be held Thursday evening at 6 o'clock at the Glen Inn when other matters which have been referred to the committee will be taken up.

**MACHINE HITS BOY**  
An accident in which one boy was knocked to the ground was reported to the police today by Harry Wesley, 123 Maryland avenue. Mr. Wesley said that he was driving a car on Brand boulevard near the street and as he was passing a group of boys playing in the street one of them, Robert Rogers, years old ran in front of the machine. He was knocked to the ground. The car was stopped once and the boy crawled under it.

Young Rogers, who was badly bruised was taken to the hospital at the Chamber Apartments. Mr. Wesley and Doctors and Duncan called.

## Learn About Poets This Evening From Pen of One of Them

You can learn something about poets from one of them this evening if you will read "The Listening Post." Mr. Foley speaks of Longfellow, a poet who knew nothing about wireless, but who wrote of shooting a song into the air and it finding lodgment in the heart of a friend. He had vision, says Mr. Foley. He knew that every song sung, every good deed done, every kind word said and every smile sent forth, put into the air as it were, would somewhere, sometime, somehow comfort, strengthen, encourage and inspire someone.

Henry James in his comment on the news of the day speaks of the value of a college diploma. He doesn't hold the diploma as valuable in itself but he says if four years of study does not benefit the individual, giving him a useful insight into human nature, teach him something of the world outside, then the case is hopeless from the start, diploma or no diploma.

Dr. Frank Crane advises young women to go west and Della Stewart says that time can alter even truth. John Pilgrim has another mad streak but gets over it; there are good editorials, scientific facts, poetry, paragraphs and other good things on the editorial page tonight. Read it.

## GLENDALE CREDIT MEN PLAN NICE PICNIC

Decide to Make It an Event to Be Remembered

Hold your hats, folks, the Glendale Credit Association is going to have a mid-summer picnic. And it's going to be a hum-dinger, too. It has not been exactly decided just where this outing will be held. The suggestion has been made that it be held on the summit of Old Baldy and that airplanes be used as transportation. Several of the more conservative merchants believe it would be a good stunt to charter a train and go to some section a hundred miles or so distant from Glendale, while some feel that it would be a good thing to hold it close-by, possibly at the Glendale municipal park, where the picnicers could take advantage of the new swimming pool, nevertheless.

Wherever it is held it is a foregone conclusion that there will be something doing every minute, and prizes will be given for every little stunt.

A committee consisting of Dr. Roy V. Hogue, W. C. Page of the Ray Furniture company, Arthur Dibbern, jeweler, and H. S. Webb of the Webb Dry Goods store, has been selected to take care of the details of this outing and that committee is hard at work at this time in its effort to determine just what would be the best course to take. It is understood that it will be held about the middle of July, and during the day stunts, games, etc., will be held, the merchants being hosts for the day.

## ACQUISITION OF PARK SITES IS RECOMMENDED

Committee of C. of D. Reports to the Directors Today

The following new members were taken into the Chamber of Commerce today at the weekly meeting and luncheon of the Board of Directors:

Acme Cesspool Co. (Frank J. Raible), 307 N. Commonwealth, Los Angeles, cesspool pumping and construction; Bassell Apts., (Mrs. J. B. Ketter), Brand and Lexington Drive; Laura J. Brown, 102 S. Brand, Homopathic M. D.; Chas. J. Bruck, 1241 S. Orange, cement contractor; A. L. Burson, 375 W. Broadway, plaster contractor; Casa Verdugo Garage (Harry L. Campbell), 1207 N. Central, auto repairing; Judson M. Gibbs, 508 W. Lexington, cement contractor; Glendale Ice Delivery (Albert G. Gilruth, Mgr.), 110 E. California; Glendale Monument Works (C. H. Ambrosch), 1727 S. Brand, monuments; Leo Kanner, 233-35 N. Brand, department store; Gracia M. Mosier, 1322 N. Louise; Murphy's Repair Shoe Shop (Julian B. Murphy), 1428 S. San Fernando road, shoe repairing; Tropic Ice Delivery (Perry Swab), 336 West Cypress; Watts & Fulton (Irving F. Watts), 433 W. Colorado, tile contractor; Woods-Beekman Lumber Co., (W. E. Woods, V. P.) Beverly Hills, lumber.

## BONUS BILL IS TO BE PASSED

WASHINGTON, April 18.—Senate republicans in caucus today agreed to pass a soldier bonus bill at this session of congress.

The caucus, by a vote of 26 to 9, went on record as favoring the action and instructed republican members of the senate finance committee to reach out a bonus bill "within a reasonable time."

It was further decided to call up the tariff bill on Thursday and to proceed with it with all possible speed.

## ART EXHIBIT OPENS HERE APRIL 30

Work of Sculptors of Southern California to Be Shown

AT CHAMBER COM.

Work of Famous Men and Women Will Be Seen

The first Glendale art exhibition will open in the Chamber of Commerce on April 30 and continue on May 5, 6, 8 and 9, under the auspices of a local committee with the assistance of the Sculptors' Guild of Southern California, which includes in its membership, most of the prominent sculptors in this part of the country.

The big room of the Chamber will be filled with the best work of sculpture that is obtainable in the south and, as the first exhibition it will be notable.

Among those who will show their work are Ella Buchanan, Carlos Romanelli, designer of the gateway of the Sellig Zoo, considered one of the best creators of animals in plastic art circles, Romanelli will show his Dante, a bust which earned for him the Prix de Roma some years ago, and brought him recognition at the University of California.

F. Tolles Chamberlain, better known in the east as a member of the National Sculptor's Society will also exhibit Julia Brachen Wendt whose work, History, Science and Art is in the rotunda of the Los Angeles Museum will also show some of her studies.

Finn Frohlick, a student of Daniel Chester French, who is doing a fountain for Pasadena, who is one of the busiest members of the Guild will have exhibits present.

The famous "Blow Winds Blow" figure, modelled by Katherine Beverley Ingels will be one of the striking figures shown. This unique piece of work, was awarded the Charles H. Barker medal by Besse Potter Vonnonh, the critic.

There will be a few nudes by Frank Wesley and an unique feature will be some sculpture in wood by Andrew Bjurman.

The moving spirit of the exhibition are H. C. Swartz, secretary of the Sculptors' Guild of Southern California and Bert Smart, of the California Conservatory of Music and Richardson D. White of the public schools.

The exhibition will be open during the afternoon free to children of the public schools, who will come to exhibition in classes. They will be received by Mr. Swartz who will give a lecture upon art.

In the evening the exhibition will be open, a fee of twenty-five cents being charged for the purpose of defraying the expenses.

"We plan to have each evening featured with a separate entertainment by one of the local societies," said Mr. Smart, who is chairman of the committee of arrangements. "One of the exhibitors will be present each evening to explain the exhibits and there will be a musical program. It will all be very informal, with the idea of establishing a cultural center in Glendale. Just what these programs will be will be announced later."

## NEW MEN ENTER THE C. OF C.

The following new members were taken into the Chamber of Commerce today at the weekly meeting and luncheon of the Board of Directors:

Acme Cesspool Co. (Frank J. Raible), 307 N. Commonwealth, Los Angeles, cesspool pumping and construction; Bassell Apts., (Mrs. J. B. Ketter), Brand and Lexington Drive; Laura J. Brown, 102 S. Brand, Homopathic M. D.; Chas. J. Bruck, 1241 S. Orange, cement contractor; A. L. Burson, 375 W. Broadway, plaster contractor; Casa Verdugo Garage (Harry L. Campbell), 1207 N. Central, auto repairing; Judson M. Gibbs, 508 W. Lexington, cement contractor; Glendale Ice Delivery (Albert G. Gilruth, Mgr.), 110 E. California; Glendale Monument Works (C. H. Ambrosch), 1727 S. Brand, monuments; Leo Kanner, 233-35 N. Brand, department store; Gracia M. Mosier, 1322 N. Louise; Murphy's Repair Shoe Shop (Julian B. Murphy), 1428 S. San Fernando road, shoe repairing; Tropic Ice Delivery (Perry Swab), 336 West Cypress; Watts & Fulton (Irving F. Watts), 433 W. Colorado, tile contractor; Woods-Beekman Lumber Co., (W. E. Woods, V. P.) Beverly Hills, lumber.

**FLAPPERS ASK AID**  
CHICAGO, April 18.—Members of the "Flappers club" appealed to Mayor Thompson for protection against "pittiful publicity." They charged ministers slandered them in sermons.

**NEGRO BANDITS**  
KANSAS CITY, April 18.—H. B. Meador, cashier of the Southeast State bank, was robbed of \$11,784 by two negro bandits, who forced him at the point of a gun to leave a Prospect avenue car here today.

## BLOW WINDS BLOW

Work of Kathleen Beverley Ingels, which will be seen at Glendale's First Art Exhibition, beginning April 30

## Our Radio Entertainment

The radio entertainment at the Glendale Press building tonight will be an improvement over that of last night. The rendition of Wednesday night will be better than that of tonight. This is the progression of improvement with the establishment of a new station.

The program last night showed a little static interference but the music swelled out in big volume; ample guarantee of the power of the apparatus installed by the Glendale Daily Press.

In fact, the instrument was so powerful that it was heard better blocks away from the Press building than close to the building.

As yet the announcement of programs is not organized by the broadcasting stations and an evening before the receiver is filled with surprises for the audience. Now and then a voice will boom forth in golden lyrics and be followed by the voice of a preacher proclaiming eternal truths. Order is coming to the new discovery of humanity and in time it will be confined within a harness of routine that will enter the lives of the people as a part of their existence.

In bringing the big station of distribution to Glendale, the Glendale Daily Press has added a pleasant hour to the evening rides about town that come with the summer nights; made the city just a little more pleasant to live in; lifted it a little forward in the progress of things.

The pleasure of the audience before the building last night is ample return. We hope to make the Press building a meeting place for Glendale folks these coming summer nights.

**HURRAH FOR OUR SIDE**  
NEW YORK, April 18.—Miss Maude Roydon, one of England's best known women preachers, arrived here expressing approval of flappers, short skirts and women smoking, and disapproval of prohibition.

**TEA POT DOME**  
WASHINGTON, April 18.—President Harding seems no reason why the Tea Pot Dome, Wyoming, naval oil reserve should not be developed, so long as the concern involved "does business honestly," it was said at the White House today.

## HUNDREDS HEAR PRESS RADIO MUSIC

First Concert Draws Big Crowd in Evening to Brand Boulevard

SKEPTICS PRESENT

First Demonstration Is Success; Static Conditions Not Good

Several hundred Glendale people gathered in front of the Glendale Press office last night to hear the wireless concert sent out by Los Angeles and Pasadena broadcasting stations and caught by aerial of the Press wireless apparatus. The concert lasted from 6:45 until 7:30, and it was a treat to those who attended. There were many in the audience who were skeptical about all this "wireless stuff," but those who came to scoff remained to marvel, and after the concert these were the strongest boosters for the transmitting of the voice by wireless.

The Press wireless apparatus was assisted in the reproduction of the music by the magnavox, the purpose of which is to amplify or increase the sound-radiations received by the receiving apparatus. A little difficulty was experienced last night in tuning the receiving instrument with the transmitter. Both instruments must be tuned alike or the maximum of efficiency cannot be secured. The Press receiving apparatus is now in good shape and the concert to be held tonight will be much improved.

Last night's program consisted of the following:

Miss Harris, the artist pupil of Charles Bowes, sang the aria from the first act of "La Tosca," and the "Birthday Song." Mr. Lott rendered two Kipling numbers entitled "Road to Mandalay" and "Rolling Down to Rio." Mrs. Charles Bowes was accompanist for the singers.

The dramatic soprano voice of Miss Harris was well adapted to the selections. Her renditions were creditable.

Mr. Lott's deep baritone voice went forth in great power to the audience "listening in."

News bulletins were broadcast and selections from "Bedtime Stories" were read, concluding the program.

The programs at 12:30 yesterday included a song by Hildren Hanson Hostetter, "The Nightingale," and "The Year at the Spring," accompanied by Blanche King Owen.

Mrs. Hostetter yesterday announced she would sing the aria from "Aida" with the Royal Marine band the 30th inst. at Lincoln Park.

The poem, "Trees," by Joyce Kilmer, was transmitted.

Musical selections and news briefs were broadcast from 3:30 to 4 p. m.

Maurea Rathburn, representing the Chamber of Commerce, announced the chamber is keeping open house where radio broadcasting is received. The public is invited to the second floor of the building, he said.

## THORNYCROFT TO CLOSE SURELY

Sen. Johnson Wires Sec. Rhoades to Rescind Order is Impossible

That the Thornycroft Sanitarium will be closed to former service men who are suffering from tuberculosis and are charges of the Public Health Service, after April 30, was indicated in telegram received last night by Secretary James M. Rhoades of the Chamber of Commerce from Senator Hiram W. Johnson in response to the telegraphic appeal from Mr. Rhoades that the veterans be allowed to remain at the Glendale institution.

The following telegram from Senator Johnson is self-explanatory:

"Washington, D. C., April 15, 1922.

"Glendale Chamber of Commerce: James M. Rhoades, Secretary. "Secy Glendale L. A. Co. Calif. "Your telegram referring to order closing hospital in Glendale duly received. Immediately took matter up with director of the Veterans' Bureau and presented your protest. The Director and the Bureau state order was made after full investigation and that order would not be rescinded. I have presented your protest to the President as you desired.

"Hiram W. Johnson."

**FIGHT FARE**  
CHICAGO, April 18.—Petitions requesting a temporary injunction restraining the Illinois commerce commission from authorizing a six-cent fare for Chicago surface lines were filed by the surface lines company in the court of Federal Judge Page here today.

## Press Radio Concert for This Evening

The following wireless programs will be caught by the Press receiving station and passed on to those who are in front of the Press office:

It begins at 12:30 p. m. with news bulletins and music, vocal and instrumental. This program last until 1:30.

At 3:30 The Times will be "on the air" with the latest news of the city and reports on affairs from world points until 4 o'clock.

Ethel Jenks, soprano, who is singing at the Long Beach Fashion Show under direction of Peggy Hamilton, The Times fashion editor, and Vivian Ingraham, Orpheum favorite, will sing in the evening program, which lasts from 6:45 until 7:30. W. M. Garland, Los Angeles rector, will invite real estate boards of the United States to trek to San Francisco May 31, June 1, 2 and 3 in "The End-of-the-Trail Caravan"—national convention of realtors.

The Pasadena station will also send over a program and the Kinema theatre will furnish entertainment.

## LON HADDOCK TO ADDRESS FORUM OF C. OF C.

Senior Member of Glendale Heights Subdividers Explain Success

Members of the Glendale Chamber of Commerce are unusually fortunate in that they will be given an opportunity to hear Howard Edward Cavanah and Beatrice Huntley Cavanah, tenor and mezzo-soprano, in several numbers Thursday night at the monthly forum meeting of the organization. These two singers, who have studied and filled concert engagements in Paris and other European and eastern music centers, are artists in every sense of the word. Music critics all over the country have commented favorably on their work and it is the people of Glendale who will have an opportunity to hear these two singers. At present they are conducting a music conservatory in this city at 520 North Kenwood street and another in Los Angeles.

Enonah Hopkins, harpist, has also consented to play several numbers for the Glendalians at the forum meeting. It has been said that Miss Hopkins is the greatest harpist that has ever thrilled audiences in Southern California, and after hearing her one can readily believe the truth of this statement. Mildred Pray will accompany Mr. and Mrs. Cavanah on the piano.

The principal speaker for the evening will be Lon Haddock of Glendale. Mr. Haddock is a member of the Haddock-Nibley real estate firm of Glendale and Los Angeles.

Following is the program for the meeting:

V. M. Hollister, president, presiding.

Community singing—"America," led by Mr. and Mrs. Howard Cavanah.

Mezzo-soprano solos—(a) In an Old Fashioned Town (Squiers), (b) Somehow I Knew (Gray), Mrs. Howard Cavanah.

Tidings from the Los Angeles Chamber of Commerce, Charles P. Bayer.

Harp solos—selected, Mrs. Enonah Hopkins—Lon P. Haddock.

Vocal duets—(a) O Lovely Night (Ronald), (b) I Need So Much (Metcalf), Mr. and Mrs. Howard Cavanah.

Open forum—Conducted by Jas. M. Rhoades, secretary.

Tenor solos—(a) Smilin' Through (Penn), (b) Duna (McGill), Howard Cavanah.

Miss Mildred Pray, accompanist.

## WORK ON SCHOOLS IS PROGRESSING

Acacia Unit Ready for Plaster and Grand View Walls Up

On the Columbus Avenue campus the two small buildings on the South side have been moved to the West side to make room for the first unit of the new school plant, four rooms for which the building contract has been let and on which work will begin very soon, as the contractor is now ready to go to work.

The new unit on the Acacia Avenue grounds of four school rooms and administration offices, is sufficiently advanced for the plaster coat on the outside. Inside finishing has not yet started. The contractor promises to have it completed by the close of school.

The walls of the new Grand View school are well up and completion is promised by the first of August.

On the campus of the Glendale Avenue Intermediate the Turk residences has been moved off and everything is ready for work to begin. Part of the material is already on the ground.

## RED-GERMAN PACT WRECKS CONFERENCE

Lloyd George Struggles in Effort to Save the Situation

DELEGATES ENRAGED

France Would Force Russia and Germany to Retire From Genoa

The commercial treaty signed at Genoa by Russia, and Germany marks the turning point in Europe's recovery.

The two powers, invited to Genoa in chains, have notified the world that they will refuse to wait as prisoners any longer their economic freedom.

There is danger of a Russian-German alliance developing out of the present agreement only if the allies allow it. The new treaty between Russia and Germany should be followed by cooperation among all the European nations for mutual salvation. If the allies respond in this way to the Russo-German gesture, all will be well.

If the allies pursue the French idea of revenge, then Russians and Germans undoubtedly will begin to consider a formal military alliance for mutual protection.

There is no treachery involved in the agreement. Both Germans and Russians are fighting for their lives. Neither nation is pledged to frame its foreign policy to accord with the views of the allies. Instead of a betrayal, the Russo-German treaty is a move toward Genoa amity and restored international confidence. It probably is destined to prove the most important result of the Genoa gathering.

The conference is no longer a debating society. It is a field of battle.

## GET TOGETHER MEETING IS POSTPONED

Secretary Rhoades Announces Delay Without Definite Date

The get-together banquet of the chamber of commerce directors, city council and representatives of the various civic organizations to have been held tonight has been postponed until a date next week. The exact date has not been decided as yet.

In postponing the banquet Mr. Rhoades, secretary of the chamber of commerce, said that the chamber's banquet would be postponed as there were several men invited to attend the banquet who were to attend the Y. M. C. A. affair tonight and that the chamber did not want to conflict with the plans of any other organization. Those who were invited to attend the postponed banquet of the chamber of commerce will be notified when a date has been set for the banquet and meeting.

**THE WEATHER**  
Southern California, Los Angeles and vicinity: Fair tonight and Wednesday.

## JINGLING JAZZ OF THE NEWS

By Bert Marple

Three hundred Glendale boosters will mender up the valley. To show the folks that Glendale's on the map; The order comes from Washington that Thornycroft must lock up. Each hero boy is told to take his cap.

Two other cops are hired for to catch the speed fanatics. The breaker of the law will go to jail; And fifteen brand new members join the C. of C. this morning. The "bird rock" will leave for Europe without fail.

The credit men of Glendale say they'll hold the summer picnic. They'll entertain their friends—and pay the bills; "No outfall sewer for Glendale," say the many straw vote voters. The "bird rock" service furnished some thrills.

The council goes to Fullerton to note the lighting standards. Upon the schools' the bulldozers make progress; Four hundred Glendale people hear the "classy" wireless concert. There'll be one more this evening at The Press.

**The Barton Bedtime Stories**  
THE STARS KNOW IT ALL!  
By JOHN BARTON  
(Copyright, 1921, by Associated Newspapers)

Night had settled down over Dr. Muskrat's Pond while he was trying to understand who the Headless Hunter of the wild goose flock could possibly be. It was an airplane. But they didn't know it was. Anyway, they couldn't tell him so. Think how you'd describe one to some little wild boy who'd never seen even an automobile and you'll know why.

He couldn't imagine what had scared them so. If they had been hen-birds with their young along he'd just have smiled at their tale, but the Gray Ganders were bold wings and fighters all. And what they told seemed perfectly impossible to him. As he said himself, that's just why he had to believe them.

"Well," he sighed, "the stars are ready." And there they shone, clear and steady, on the smooth water, as though to make sure he could read them. "If this strange creature comes from the sky, they'll surely know about him. Twinklers bright, what danger do you see for the sky-divers you shine on?"

He whisked around and fastened his eyes on them. The geese sat watching him with breathless attention, as his old eyebrows twitched and tightened. At last:

"Fear may outfly the fast, but faster still  
Can the wingless fall."  
He shook his head. "No, no. That can't be right. It doesn't rhyme. Wait—what's—oh—  
"The drops from a splash; a deft  
"beak catches one,  
But never all."  
"Yes, yes," exclaimed Hotspur, the flight leader, excitedly, before the words were out of his mouth. "That's just what I felt—the last part. I did give the scatter call. But I see now if I'd beak-dived first before I broke the flock it would have been better. That terrible Thing couldn't put up its wings and

**BICYCLE WORKS TO HOLD TOURNAMENT**  
The Glendale Bicycle Works at 120 North Brand boulevard will hold a bicycle tournament in the display window of their shop. The first tryout will be held Tuesday night, another one Wednesday night, and the first real race will be held Thursday night at 7:30 with a second one on Saturday night.

This contest is being put on through the Davis Bicycle company and there are several valuable prizes to be awarded.

The racing bicycle stands on an indoor racer and instead of racing up and down the streets, there is a speedometer attached to the wheel which shows exactly the number of miles ridden.

This contest should prove of interest to many Glendale boys and girls. Come out and win a valuable prize.

**LUTHERAN CHURCH GROWING RAPIDLY**  
We are justly proud of the rapid development of our city. Glendale has doubled her population in the last two years, and it will be of special interest to many to learn that the First Lutheran Church has trebled its membership in a little more than one year.

Dr. H. C. Funk became the permanent pastor of the congregation January 1st, 1921. During this time 103 members have been added to the church. Thirty new members were enrolled on Easter Sunday, and the attendance crowded the building to its utmost capacity.

Mrs. Robert McAdams, a former resident of Glendale, and then known as Miss Ruby Farnsworth, is the guest of her sister, Mrs. John Torrey of West California street, and will be here for about ten days.

**NOW OPEN**

NOTICE OF ENTERING AN ASSESSMENT FOR INSTALLING A WATER MAIN AND OTHER WORK UNDER RESOLUTION NO. 1363 OF THE COUNCIL OF THE CITY OF GLENDALE, IN BOOK ENTITLED "ASSESSMENTS AND LIENS FOR WATER MAIN EXTENSIONS" IN THE OFFICE OF THE SUPERINTENDENT OF PLANT AND PRODUCTION.

Public notice is hereby given that the Superintendent of Plant and Production of the City of Glendale did, on the 15th day of April, 1922, enter in a record book entitled "Assessments and Liens for Water Main Extensions," on file in his office, an assessment for the cost and incidental expenses of the work done by him in pursuance of Resolution No. 1363 of the City Council of said City, ordering the same, passed by said Council January 26, 1922, and entitled,

"A Resolution of the Council of the City of Glendale ordering the installation of a water main on a portion of Dryden Street and on a portion of Campbell Street in said City." All persons interested are hereby required to file with the City Clerk of the City of Glendale their objections, if any they have, to the confirmation of said assessment by said City Council within thirty (30) days after the date of the first publication of this notice, which date of first publication is April 15, 1922.

P. DIDERICH,  
Supt. of Plant and Production of the City of Glendale.

**SALMON CATCH**  
Fifty per cent of the salmon used in the United States comes from Alaska.

drop down a hundred feet the way we can. We'd be out of its sight in an instant. Oh, you've found us our answer all right, sid."

Now the whole flock came crowding around the wise old beak, thanking him and begging him to thank his stars for them. "There, there," said he, "They're your stars."

And There They Shone, Clear and Steady, on the Smooth Water, as Though to Make Sure He Could Read Them.

too. Remember that when you fly beneath them. They only keep their eyes on my Pond because they know I'm always here to listen to them. Fair flying all."

Wings whirled. The great birds were off, flocking gaily northward. The doctor stared after them. "Remarkable, very remarkable," he commented. "I wonder who's next?"

CITY PRINTING

NOTICE OF STREET WORK

PUBLIC NOTICE IS HEREBY GIVEN THAT THE COUNCIL OF THE CITY OF GLENDALE, ON THE 6TH DAY OF APRIL, 1922, DID AT ITS MEETING ON SAID DAY, ADOPT A RESOLUTION IN ORDER TO BRING THE FOLLOWING IMPROVEMENT TO BE MADE, TO-WIT:

SECTION 1. That the public interest and convenience require and it is the intention of the Council of the City of Glendale to order the following work and improvement to be done, to-wit: First: That

EVERETT STREET from the southerly curb line of Lomita Avenue to the northerly line of Chestnut Street and from the southerly line of Chestnut Street to the northerly line of Maple Street, including all intersections of streets or alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 474, Profile No. 834, and Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 39.

Second: That a four (4) inch Class "B" cast iron water pipe be laid in Everett Street and across intersecting streets and alleys, along a line seventeen (17) feet easterly of and parallel to the westerly line of Everett Street, on pipe to extend from a line seventeen (17) feet northerly of and parallel to the southerly line of Lomita Avenue to the southerly line of Chestnut Street, including all intersections of streets and alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 474, Profile No. 834, and Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 39.

Third: That a cement sidewalk of the width of five (5) feet be constructed along each side of the roadway of Everett Street from the southerly line of Lomita Avenue to the northerly line of Chestnut Street and from the southerly line of Chestnut Street to the northerly line of Maple Street, including all intersections of streets and alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 474, Profile No. 834, and Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 39.

Fourth: That a cement sidewalk of the width of five (5) feet be constructed along each side of the roadway of Everett Street from the southerly line of Lomita Avenue to the northerly line of Chestnut Street and from the southerly line of Chestnut Street to the northerly line of Maple Street, including all intersections of streets and alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 474, Profile No. 834, and Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 39.

Fifth: That all of the roadway of Everett Street between curb lines from the southerly line of Lomita Avenue to the northerly line of Chestnut Street and from the southerly line of Chestnut Street to the northerly line of Maple Street, including all intersections of streets and alleys, be graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 474, Profile No. 834, and Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 39.

That pursuant to the Act of the Legislature of the State of California, approved February 27, 1933, and the Acts amendatory thereto, Serial bonds bearing interest at the rate of 7 per cent per annum shall be issued to represent assessments of Twenty-five (\$25.00) Dollars or over for the costs of said work or improvements; said Serial bonds shall extend over a period ending nine (9) years from and after the second day of January, every year after their date, until the whole is paid; and the interest shall be payable semi-annually by coupon on the second days of January and July, respectively, at the rate of 7 per cent per annum on all sums unpaid, until the whole of said principal and interest is paid.

SECTION 4. That the City Engineer is directed to make a diagram of the proposed work or improvement as described herein and to pay the cost and expense thereof. Such diagram shall show each separate lot, piece or parcel of land, the area, location of the same to the work proposed to be done, all within the limits of the assessment district, and such other matters as are required by law.

SECTION 5. All Maps, Cross-sections, Plans and Profiles referred to herein are on file in the office of the City Engineer of said City. All Specifications referred to herein are on file in the office of the City Clerk of said City. Said Maps, Plans, Cross-sections, Profiles and Specifications are hereby referred to for a more particular description of said work and made a part hereof.

The district to be assessed to pay the costs and expenses of said work and improvement is described in the Resolution of Intention No. 1454, to which said Resolution reference is hereby made for further particulars of said work.

C. L. HILL, Street Superintendent of the City of Glendale, 4-18-22

PUBLIC NOTICE IS HEREBY GIVEN THAT THE COUNCIL OF THE CITY OF GLENDALE, ON THE 6TH DAY OF APRIL, 1922, DID AT ITS MEETING ON SAID DAY, ADOPT A RESOLUTION IN ORDER TO BRING THE FOLLOWING IMPROVEMENT TO BE MADE, TO-WIT:

SECTION 1. That the public interest and convenience require and it is the intention of the Council of the City of Glendale to order the following work and improvement to be done, to-wit: That

DRYDEN STREET from the westerly curb line of Pacific Avenue to the easterly curb line of Kenilworth Avenue, including all intersections of streets or alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Plan No. 498, Profile No. 837, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

Second: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Dryden Street from the westerly curb line of Pacific Avenue to the easterly curb line of Kenilworth Avenue, including all intersections of streets and alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Plan No. 498, Profile No. 837, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

CITY PRINTING

NOTICE OF STREET WORK

Plan No. 498, Profile No. 837, and Specifications for said work adopted by the Council of the City of Glendale and designated as Specifications No. 39.

First: That a cement sidewalk of the width of five (5) feet be constructed along each side of Dryden Street from the westerly curb line of Pacific Avenue to the easterly curb line of Kenilworth Avenue, including all intersections of streets or alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Plan No. 498, Profile No. 837, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

PITMAN AVENUE from the southerly line of Dryden Street to the northerly curb line of Gilbert Street, including all intersections of streets or alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Plan No. 498, Profile No. 840, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

Second: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Pitman Avenue from the southerly line of Dryden Street to the northerly curb line of Gilbert Street, including all intersections of streets and alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Plan No. 498, Profile No. 840, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

Third: That a cement sidewalk of the width of five (5) feet be constructed along each side of Pitman Avenue from the southerly line of Dryden Street to the northerly curb line of Gilbert Street, including all intersections of streets or alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Plan No. 498, Profile No. 840, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

Fourth: That all of the roadway of Pitman Avenue between curb lines from the southerly line of Dryden Street to the northerly curb line of Gilbert Street, including all intersections of streets, be graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Plan No. 498, Profile No. 840, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

That pursuant to the Act of the Legislature of the State of California, approved February 27, 1933, and the Acts amendatory thereto, Serial bonds bearing interest at the rate of 7 per cent per annum shall be issued to represent assessments of Twenty-five (\$25.00) Dollars or over for the costs of said work or improvements; said Serial bonds shall extend over a period ending nine (9) years from and after the second day of January, every year after their date, until the whole is paid; and the interest shall be payable semi-annually by coupon on the second days of January and July, respectively, at the rate of 7 per cent per annum on all sums unpaid, until the whole of said principal and interest is paid.

SECTION 4. The City Engineer is directed to make a diagram of the proposed work or improvement as described herein and to pay the cost and expense thereof. Such diagram shall show each separate lot, piece or parcel of land, the area, location of the same to the work proposed to be done, all within the limits of the assessment district, and such other matters as are required by law.

SECTION 5. All Maps, Cross-sections, Plans and Profiles referred to herein are on file in the office of the City Engineer of said City. All Specifications referred to herein are on file in the office of the City Clerk of said City. Said Maps, Plans, Cross-sections, Profiles and Specifications are hereby referred to for a more particular description of said work and made a part hereof.

The district to be assessed to pay the costs and expenses of said work and improvement is described in the Resolution of Intention No. 1455, to which said Resolution reference is hereby made for further particulars of said work.

C. L. HILL, Street Superintendent of the City of Glendale, 4-18-22

NOTICE OF PUBLIC WORK

Public notice is hereby given that the Council of the City of Glendale on the 6th day of April, 1922, did at its meeting on said day, adopt a Resolution of Intention No. 1456, to order the following improvement to be made on a portion of the street:

MARYLAND AVENUE be opened and laid out from the southerly line of Pacific Avenue to the northerly line of Pacific Avenue, including all intersections of streets or alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Plan No. 498, Profile No. 840, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

The district to be assessed to pay the costs and expenses of said work and improvement is described in the Resolution of Intention No. 1456, to which said Resolution reference is hereby made for further particulars of said work.

C. L. HILL, Street Superintendent of the City of Glendale, 4-18-22

MOTORCADE GROWS WITH ENTHUSIASM

(Continued from page 1)

cartoonist representing the Los Angeles Evening Herald. Mr. Rhoades said this morning that the trip is not for men only and requests that the business men bring their wives with them. People who have no automobiles are requested to accompany the party as there will be seats provided for them in the various machines.

W. M. Townsend, Glendale manager for the Automobile Club of Southern California will lead the caravan over the entire route. The auto club car will be followed by the automobile bearing President Val Hollister of the chamber of commerce. The second automobile will carry Mayor Spencer Robinson and the city council. Kelly's orchestra will follow the mayor and city council in a truck loaned to the city for the occasion by the Page Furniture company.

Dr. Jessie Russell, City Manager William J. Reeves and other speakers will ride in a new Cadillac loaned for the occasion by the sales agency for that machine in Glendale. Dr. Russell will speak at the Porter hotel at luncheon as a representative of the women of Glendale. City Manager Reeves will be the speaker at Tujunga.

The trip is the fact that the cavalcade will leave promptly at 8:30 a. m. from the chamber of commerce, and will return to Glendale about 6:30 p. m. The party will leave on time and wait for no one.

Following is the schedule and program to be followed by the trade caravan: Leave Glendale at 8:30 a. m. April 19, arrive at Monterey at 2:30; arriving at Zelzah at 2:45; leaving Zelzah at 3; arriving at Tujunga at 9:30; leaving Tujunga at 10:15; leaving Sunland at 10:45; arriving at San Fernando at 11:30. Lunch at Porter hotel. Leave San Fernando at 1 p. m., arriving at Owensmouth at 1:45; leaving Owensmouth at 2; arriving at Marlon at 2:15; leaving Marlon at 2:30; arriving at Monterey at 2:45; leaving Zelzah at 3; arriving at Van Nuys at 3:30; leaving Van Nuys at 4:15; arriving at Lankershim at 4:30; leaving Lankershim at 5; arriving at Burbank at 5:30; leaving Burbank at 6; arriving home at 6:30.

CITY PRINTING

THE 6TH DAY OF APRIL, 1922, DID AT ITS MEETING ON SAID DAY, ADOPT A RESOLUTION IN ORDER TO BRING THE FOLLOWING IMPROVEMENT TO BE MADE, TO-WIT:

OAK STREET from the westerly line of Central Avenue to the easterly line of Columbus Avenue and from the westerly line of Columbus Avenue to the easterly line of Kenilworth Avenue, including all intersections of streets or alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 472-W, Profile No. 50, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

Second: That a four (4) inch iron water pipe be laid in Oak Street and across intersecting streets and alleys, along a line fifteen (15) feet northerly from and parallel to the southerly line of Oak Street, said pipe to extend from a line eighteen (18) feet easterly of and parallel to the westerly line of Central Avenue to the easterly line of Pacific Avenue, including all intersections of streets or alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 472-W, Profile No. 50, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

Third: That galvanized iron service pipes of the sizes and at the locations shown on Map No. 472-W, be laid in Oak Street from the westerly line of Central Avenue to the easterly line of Pacific Avenue, including all intersections of streets or alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 472-W, Profile No. 50, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

Fourth: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Oak Street from the westerly line of Central Avenue to the easterly line of Pacific Avenue, including all intersections of streets and alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 472-W, Profile No. 50, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

Fifth: That a cement sidewalk of the width of five (5) feet be constructed along each side of Oak Street from the westerly line of Central Avenue to the easterly line of Pacific Avenue, including all intersections of streets or alleys, except those already graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 472-W, Profile No. 50, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

Sixth: That all of the roadway of Oak Street from the westerly line of Central Avenue to the easterly line of Pacific Avenue, including all intersections of streets, be graded to the official line and grade, be graded to the official grade heretofore established therefor, the same to be done in accordance with Map No. 472-W, Profile No. 50, and Specifications therefor, adopted by the Council of the City of Glendale and designated as Specifications No. 39.

That pursuant to the Act of the Legislature of the State of California, approved February 27, 1933, and the Acts amendatory thereto, Serial bonds bearing interest at the rate of 7 per cent per annum shall be issued to represent assessments of Twenty-five (\$25.00) Dollars or over for the costs of said work or improvements; said Serial bonds shall extend over a period ending nine (9) years from and after the second day of January, every year after their date, until the whole is paid; and the interest shall be payable semi-annually by coupon on the second days of January and July, respectively, at the rate of 7 per cent per annum on all sums unpaid, until the whole of said principal and interest is paid.

SECTION 4. The City Engineer is directed to make a diagram of the proposed work or improvement as described herein and to pay the cost and expense thereof. Such diagram shall show each separate lot, piece or parcel of land, the area, location of the same to the work proposed to be done, all within the limits of the assessment district, and such other matters as are required by law.

SECTION 5. All Maps, Cross-sections, Plans and Profiles referred to herein are on file in the office of the City Engineer of said City. All Specifications referred to herein are on file in the office of the City Clerk of said City. Said Maps, Plans, Cross-sections, Profiles and Specifications are hereby referred to for a more particular description of said work and made a part hereof.

The district to be assessed to pay the costs and expenses of said work and improvement is described in the Resolution of Intention No. 1457, to which said Resolution reference is hereby made for further particulars of said work.

EFFICIENCY IS KNOCKED HARD BY KNOX

George H. Knox, president of the Knox Institute of Industrial Efficiency of Los Angeles, was the principal speaker at the luncheon of Credit Men's Association of Glendale, held in the Chamber of Commerce auditorium yesterday noon. He took for his subject "The Most Expensive Thing in Business."

Among the various things mentioned as expensive were the inefficient employe, inattention to business, etc. After this fifteen minute address, which received the close attention of the 48 members present, the following resolution was adopted: "Resolved that a vote of thanks be extended to the Glendale Chamber of Commerce for its endeavor to secure for the people of Glendale lower carfare between Glendale and Los Angeles."

The meeting was under the direction of H. S. Webb, vice president of the organization, the president, C. E. Neale, being in San Francisco.

ace Royal, is an emotional actress of international renown, while Ray Gallagher is well known both upon the stage and screen as a leading man of many talents.

Ralph Allan has told these facts because he wants the public to know they are not coming to see any ordinary affair—quite to the contrary—nothing of its kind has ever before been presented in Glendale, nor anything of a higher class of character, whether in art, talent or refinement.

Since the T. D. and L. eliminated vaudeville these special added attractions that will be seen there will be just as stated by Mr. Allan, "exceptional, novel, of the highest class—specialties in art, drama and music—nothing short of truly the best. Watch the T. D. and L. and come and see." "The Last Shot" is the first of the many things planned for the patrons of the T. D. and L. theatre.

DRINK FRU-BER-EE at soda fountains. Fruity, winery tang!—Adv.

RECIPE TO CLEAR A PIMPLY SKIN

Pimples, sores and boils usually result from toxins, poisons and impurities which are generated in the bowels and then absorbed into the blood through the very ducts which should absorb only nourishment to sustain the body.

It is the function of the kidneys to filter impurities from the blood and cast them out in the form of urine, but in many instances the bowels create more toxins and impurities than the kidneys can eliminate, then the blood uses the skin pores as the next best means of getting rid of these impurities which often break out all over the skin in the form of pimples.

The surest way to clear the skin of these eruptions, says a noted authority, is to get from any pharmacy about four ounces of Jad Salts and take a tablespoonful in a glass of hot water each morning before breakfast for one week. This will prevent the formation of toxins in the bowels. It also stimulates the kidneys to normal activity, thus coating them to filter the blood of impurities and clearing the skin of pimples.

Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia. Here you have a pleasant, effervescent drink which cleanses the blood and is excellent for the kidneys as well.—Adv.

NATIONAL REALTOR TO STUDY ADS OF MANY PAPERS

An exhibit of the real estate pages of the newspapers of the United States and Canada will be an interesting feature at the convention of the National Association of Real Estate Boards, at San Francisco, May 31 to June 3, according to E. P. Hayward, secretary of the Glendale Realty Department.

The public relations department of the National Association has invited all the daily newspapers of general circulation of the United States and Canada to send to San Francisco for the exhibit sample pages of the real estate sections of any regular issue of the paper of 1922. Real estate editors may select any issue they please except pages of special editions which are not desired. Each newspaper may send two pages but these pages must be from the same edition and issue of the paper. They must be mounted flat on cardboard slightly larger than the pages.

The exhibit will demonstrate to realtors and real estate news editors the methods of handling real estate news in various parts of the United States and Canada.

A committee of judges will select the best exhibit, taking into consideration subject matter, method of presentation, accuracy, printing and make-up. A certificate signed by the judges and President Irving B. Hiett will be presented to the real estate editor of the newspaper judged to have the best exhibit. The certificate will declare that this newspaper was judged to have exhibited the best real estate news section at the convention of the National Association of Real Estate Boards.

POOR LIGHTING CAUSES TRAGEDY A poorly-lighted street intersection and dim lights on the machine driven by Robert W. Roach, aged 17, living at 449 West California avenue, are blamed for the death of William H. Korts, of 341 Salem street Sunday night.

The accident occurred Saturday night at the intersection of Wilson and Central avenues. Mr. Korts died Sunday night at the Glendale hospital and sanitarium. Mrs. Korts, who was with her husband at the time of the accident, is prostrated. Robert Roach, the driver of the car that injured Mr. Korts, was taken before Police Judge F. H. Lowe yesterday morning. No charge was filed against him. He was released to appear Thursday morning at the coroner's inquest, over the body of Korts to be held at the Jewel City Undertaking parlors on North Brand boulevard.

COLORFUL SETTING MARKS NEW FILM

The pathos of the working girl's life, the beauty—and humor—"love's young dream," the vivid color of a fine atmospheric setting in the "Irish Ghetto" of New York—these and other elements in the whimsical story of "The Gutter-Singer" will hold the interest when this Universal comedy-drama starring Gladys Walton is seen at the Glendale Theatre tonight.

It is the story of the flapper with a plot that utilizes the best abilities in this sort of characterization of the girlish star. Miss Walton's clever interpretations of such roles have won her a universal fame. Because of her athletic grace and her youthful character she is better fitted for portrayals of this type than any other actress of the screen today.

The story opens with an exhibition of hot blood on the part of Mazie, the shop girl heroine. Seeing a young man in dress clothes being beaten up by a street gang of ruffians, she jumps into the fray with two fists, ten finger-nails and a lot of pep. The man in the dress suit looks so much like the hero of Harold Hetheridge's love story in "Sloppy Stories!" But he turns out to be a soda fountain clerk. And, being young, Irish and good hearted, Mazie still considers him her hero and loves him just as much.

Reading the "Sloppy Stories" sentimental yarn the minute each issue comes on the stand is the way Mazie settles her own difficult problems. She seeks advice in the way the noble Lord Lytton, hero of the tale, and his milkmaid sweetheart, handle their own trials and tribulations.

Throughout the action of "The Gutter-singer" the hero and heroine of the magazine serial are the models by which Mazie and her gentleman soda clerk sweetheart guide their own footsteps. And through this strange comparison by means of a story within a story, as the story goes on a subtle satire on the old nobility is built up.

BREAK CHEST COLDS WITH RED PEPPER

Ease your tight, aching chest. Stop the pain. Break up the congestion. Feel a bad cold loosen up in just a short time. "Red Pepper Rub" is the cold remedy that brings quickest relief. It cannot hurt you and it certainly seems to end the tightness and drive the congestion and soreness right out.

Nothing has such concentrated, penetrating heat as red peppers. When heat penetrates right down into cold congestion, such as colds, sore, stiff joints relief comes at once. The moment you apply Red Pepper Rub you feel the tingling heat. In three minutes the congested spot is warmed through and through. When you are suffering from a cold, rheumatism, back-ache, stiff neck or sore muscles, just get a jar of Rowles Red Pepper Rub, made from red peppers at any drug store. You will have the quickest relief known. Always say "Rowles."

Truths in Epigram

A man who is good enough to shed his blood for his country is good enough to be given a square deal afterward.
More than that no man is entitled to, and less than that no man shall have. — Roosevelt (1858-1918).

Ship me somewhere east of Suez, where the best is like the worst, where there aren't no Ten Commandments an' a man can raise a thirst. — Kipling (865).

RUSSIAN HORRORS

A dispatch coming by Associated Press states that American drivers of relief wagons in Russia have been slain. The populace, frenzied by famine could not wait orderly distribution of food. They killed the horses and ate them. The situation is so desperate that other drivers have quit. Anxious as they may be to help the victims of bolshevism, they see no utility in sacrificing their own lives. Accompanying this news is reiteration of the report that Russians have even been reduced to cannibalism in some regions.

Aside from the tragic aspect which such information lends to the whole Russian situation, it achieves another and distinct interest when considered in relation to the Genoa conference. There sit the chiefs of bolshevist rule, or their direct representatives, and assume to tell the world how it should be conducted. One thinks naturally of the old admonition: "Physician, heal thyself."

Bolshevism has treated Russia cruelly and unjustly. While the peasants have been reduced, to starvation, the soviet government has found it possible to maintain a vast military organization. This it fed by preying upon the productive labor of the country. From this labor it took at last the possibility of even scant reward, and labor ceased. The avowed purpose in keeping up military strength was aggression. Bolshevism aspired to wreck civilization even as it had caused domestic wreck. The energy thus expended could have been turned to useful purpose. Failure so to turn it was complete. Prior to the reign of Lenine and Trotzky, a paper ruble was worth 51 cents in gold. With 51 cents in gold one may today buy 168,000 Russian rubles. And Lenine and Trotzky aspire to rule the nations of the earth, while even in enlightened America the parlor bolshevist and the journalistic bolshevist, squeak and scribble.

THE BURGLAR EXPLAINS

Men engaged in the study of crime recently listened to several inmates of a prison. The prisoners were urged to be frank. The most intelligent on the lot was serving time for burglary. He did not hesitate to state what influences had shaped his career. While it is possible that he said nothing new, his testimony upheld theories that have been advanced often from other angles than that from which a felon gets his view.

This prisoner said that temptation was strong upon the young chap who desired to make a good appearance, particularly in the presence of the girl he admired. He wanted to "put up a good front." He was likely to find that the attentions regarded by the girl as her due, involved far greater expense than a moderate salary could stand. It then became the purpose of the young fellow to get the money somehow.

Having ventured into crime, there followed the discovery that criminals are organized. They have their lawyers, their professional bondsmen and professional witnesses. A defense is ready for any member of the gang who is caught. The lone operator, without money and membership in the organization, is likely to "be sent over the road." The gangster, on the other hand, has every chance for escape that a crooked lawyer and perjured testimony can provide.

Perhaps there is no fresh lesson in this. It bears out the opinion derived from observation. The truth of it is so plain that one does not have to be a participant in crime to understand the methods of criminals. There really is an underworld, with binding, if unwritten laws. It is governed by a system that is the foe of society, and is deadly and secret.

AN OMISSION CORRECTED

When Henry Watterson died there were many reviews of his useful and picturesque career. He was represented as the last of a fine old school of journalism, which was true. In citing others who had belonged to this school the names most often mentioned were those of Horace Greeley and Charles A. Dana. This omitted a number well worthy of a place. Among the names so omitted was that of the late Harrison Gray Otis of the Los Angeles Times.

The journalist of the type deserving to be classed with Watterson was the one whose individuality had been so woven into the paper he developed and controlled, that the paper seemed to be the personal expression of the man. It never was considered apart from the man. This was as notably the case with the Los Angeles Times as with any daily that ever won to influential station. The Times, which General Harrison lived, was General Harrison. It was the map of his intellect. In every department it was the crystallization of his idea. Its policy was his guiding principle given form. Even now that for several years he has rested from his labors, upon the great daily that he brought from small beginnings, is the mark of his character and his genius.

In less populous communities a similar phenomenon has from time to time been observed. Once the Omaha Herald was the spirit of Dr. George L. Miller made visible. In similar fashion Edward Rosewater dominated the Omaha Bee.

TUMULTY GETS IN WRONG

Joseph P. Tumulty, long the private secretary of President Wilson, is meeting grief face to face. The individual in the seat of the mighty is subjected to more or less rough treatment. If he seeks to pro-

ject himself to a plane of greatness, without really belonging to exalted station, the missile of criticism surely finds him.

Tumulty wrote a book purporting to be the biography of Wilson, but actually produced an autobiography. This failed to please anybody. It was neither biography nor good autobiography. The titular subject of it failed to exhibit enthusiasm in any public way. The friends of Wilson started to voice indignation, and haven't finished yet. Gentlemen whose professional work is the reviewing of literary products sprayed biting and condemnatory ink all over the volume, and showed desire to heave the ink-well at the author.

Now Tumulty seems to have issued a canard. There was delivered at a democratic gathering, through the agency of Tumulty, a message said to have come from the ex-president. Mr. Wilson says that it was not his message, that he never uttered himself in the manner indicated, that he sent no message and was far from being in humor to send one. Tumulty explains that he had taken the liberty of repeating what Mr. Wilson had said in a casual conversation, thus getting himself into worse plight.

Evidently Tumulty was so long in the limelight that the current having been turned off, he still wants a glare upon him even though it come from a tallow-dip of his own lighting.

PURSuing PLEASURE

Young Mr. Rockefeller is quoted as condemning the pursuit of pleasure. Doubtless in this very act, he was pursuing pleasure. The individual who rebukes the pursuit of pleasure has in mind such activities as strike others as pleasing, and for which he has no taste. The miser finds delight in heaping up money. The waster finds his delight in scattering money. Doubtless a fair view would deem both of them to be wrong, with the ethical advantage slightly favoring the waster.

Many are so constituted that the spectacle of people engaged in enjoying themselves is objectionable to them. If the type of enjoyment they behold others having is different from their own chosen type, upon their hands in horror. "This must be stopped!" they proclaim. "The world is going to the dogs!" They really believe this, and the thought makes them so miserable that they are happy.

The pursuit of happiness is a constitutional right. There are frivolous methods of pursuit. The happiness towards which some so blithely laugh and dance their way, to others appears not to be worth the effort of attainment. But if the striver after happiness thinks the goal has been won, that is a personal affair with him or her. It does not interfere with the individual of more serious purpose, such as grasping wealth and power, and repute for high morals or intellectuality. It need not disturb the unpurged, for it gives them a chance to exercise their talent for austere criticism. Herein lies their pleasure, even though they do not realize, but believe themselves to be responding to the stern call of duty.

GO WEST, YOUNG WOMAN

By DR. FRANK CRANE

A lady writes to me from New York a letter from which I select the following:

"This is no doubt an unusual letter and may seem a joke to you, but it is a tragedy in my life.

"I am a dressmaker, thirty-six years old, have never had a beau, and am facing old age alone, which does not appeal to me at all. Some people say there are many things in life for a woman besides marriage. To me, however, marriage is and always has been the main thing. Yet I have never had an offer.

"I have always lived in New York city and am contemplating leaving New York to look for a husband. Could you advise me in what city and state I would have the best chance?"

Why not? Why is this not a sensible request, and why should this lady be brushed aside with a cheap attempt at wit?

I am entirely of the lady's opinion that marriage is about the most important thing in any normal human being's life.

I once heard a man say—and he had been married twice and ought to know—that he could wish for his children no greater good fortune than congenial and happy marriage.

Perhaps more men and certainly more women owe their success and their contentment to good luck in marriage than to any other cause. And by the same token more sheer wretchedness has been caused by an unfortunate marriage than by any other thing.

All this being the undoubted case, why should not a young woman of sound sense look around for those circumstances where the prospect of successful marriage is best?

And in deciding this matter one point should be kept in mind, and that is that the older centers of population are unfavorable for unmarried women. That is to say, for such as have only their personal attractions to offer and do not possess the additional attraction of plenty of money.

This is true for the same reason that the older centers of population are unfavorable for young men who want to make something of themselves. Horace Greeley advised young men to go west. The spirit of that advice still holds good.

If I were a young woman and lived in New England or New York, or any of the older and more settled communities, I would, other things being equal, pack up my things and go to Seattle, or Winnipeg, or Denver and points west. And this for the simple reason that the market is better in those regions. There are more men there who appreciate wives who can be helpmates for them in the carving out of their fortunes.

There are fewer dudes, lounge lizards, and decadents, all of whom regard women as playthings. There is perhaps a still better field for the unmarried woman in Australia and New Zealand.

These are countries of pioneers, and the pioneer is usually the soundest of the human stock.

Therefore I say that if I were a red-blooded young woman I would take my courage in my hand and go west, where the chances are better of finding the pioneer type of man, of building my future in his rugged companionship, and of becoming the mother of virile and normal children.

(Copyrighted by Dr. Frank Crane)

THE LISTENING POST

Longfellow was a poet. As you know. The Cambridge poet, as he has been called. But he was more than that. He was a poet of home and childhood and men and women and things like that.

There is no local poet. A poet is universal or he is not a poet at all. Because a poet is human. And humanity is universal. Just as a truth cannot be local. It cannot be cribbed and cabined and confined. It is universal, or it is not a truth.

So Longfellow was a poet of universal things. The Psalm of Life is universal. With its simple truth. The admonition that "still achieving, still pursuing," we shall "learn to labor and to wait." That is what life is. Laboring and waiting.

Some are not willing to labor. And some are not willing to wait. But labor does not achieve its destiny in a moment.

The share the blacksmith forges does not achieve its destiny at the forge. It does not achieve its destiny until it has turned the furrow and the seed has been sowed and the harvest reaped.

And when the bread is offered for the sustenance of life, then has the share achieved its destiny.

Waiting, as necessary. Just as when the sword is forged. Its destiny is not achieved until it has been wielded in the cause of right and justice.

Again there has been labor and waiting.

But to get back to Longfellow: He wrote a poem one time. With vision. For real poets have vision. They see into the fair and far distances of eternal years. As Tennyson did when he spoke of the argosies of the air.

He knew nothing about airships. But vision told him that they were coming. And he wrote of them. And so Longfellow wrote of "shooting a song into the air."

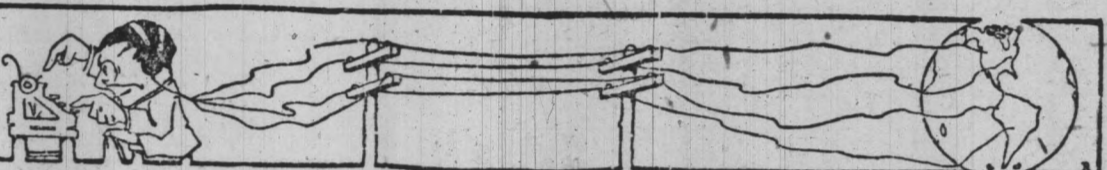

He knew nothing of wireless. No one had ever stood and sung into the air, knowing that the song might be heard by hundreds of thousands.

But he had vision. He knew that every song sung. Every good deed done. Every kind word said. Every smile sent forth. Are things put into the air.

And somewhere, sometime, somehow, somebody hears them. Feels them. Is comforted by them. Is strengthened and encouraged and inspired.

So Longfellow was a poet. And he had the vision to see that you can shoot a song into the air. And somewhere it will be found. In the heart of a friend.

JAMES W. FOLEY

SONGS OF THE POETS

April Rain—Robert Loveman (1864)

It is not raining rain for me, It's raining daffodils; In every dimpled drop I see Wild flowers on the hills.

The clouds of gray engulf the day And overwhelm the town; It is not raining rain to me, It's raining roses down.

It is not raining rain to me, But fields of clover bloom, Where any buccanering bee Can find a bed and room.

A health unto the happy, A fig for him who frets! It is not raining rain to me, It's raining violets.

OBSERVED AT A GLANCE

By HENRY JAMES

Conan Doyle seems to be arousing more sympathy for himself than enthusiasm for his beliefs.

People who think \$15 a week all the wage a woman needs, never have tried to live on \$15 a week.

Ex-President Wilson seems to have repudiated Tumulty, a situation likely to jar the latter's belief that the former executive would be helpless without him.

Russians have been killing the drivers of American relief wagons, and eating the horses. Showing again the beauty of bolshevist rule.

Germany has been informed that disinclination to pay a debt does not abate the obligation.

Persons agitated over organization of ku kluxans in this state, should cease reading yellow paper faxes, and thus recover their calm.

Possession of a college diploma does not assure the holder a job, though if the employer is a reasonably intelligent person, the diploma ought to help.

It is said the Egyptians had folding beds 4000 years ago. Of course. Probably also the phonograph and a radio system.

Doubtless James Rolph of San Francisco could be mayor up there indefinitely if he chose.

Pity the poor film actress whose salary was cut to a pittance of \$2000 weekly. Of course she struck and flew the coop.

EASTERN POINT OF VIEW

SAVE ARMY AND NAVY [New York Herald]

The United States government needs the rigid practice of economy, and every wise economy that is put into effect is praiseworthy. But it is sound judgment to consider whether an economy policy in any particular case might not cost in the end more than it saved. A policy which stripped the navy of its indispensable officers and men to save a few million dollars is not a policy for Americans to commend or for congress to accept.

The country might as well have no navy at all as to have fleets of warships unable to give effective service for lack of trained crews to man and operate them. The country might as well sink its navy as to let it rust and decay.

When the navy department declares it requires a force of 90,000 men merely to operate the treaty fleet, it would be a very serious matter to cut the total strength needed for all naval service 10,000 lower than the 90,000 essential to the treaty fleet alone.

In the same way the slash of the army to a bare-bone minimum where it would be insufficient even for national police service would expose the country to many hazards. A force of only 125,000 to look after our possessions and interests in the Philippines, Hawaii, the Panama canal zone, the West Indies and along the country's southern border, and to man the great fortifications on our thousands of miles of coast line along the Atlantic and the Pacific would be altogether inadequate, and congress should

JUST BETWEEN OURSELVES

By DELLA STEWART

Time can alter even truth. Not in its fundamental principles, but in its minor adjustments. Those of us who are older have often heard the old saw: "Whatever is worth doing at all is worth doing well." It was probably true in our mothers' time, when days moved along in a leisurely fashion, when stability and real worth were the approval marks of fabric and usage.

But today is different. Changes succeed each other so rapidly, vogues are quickly followed by others, different and novel. Machine work has largely supplanted hand work. Womanly interests have broadened wonderfully. The whole world has grown busier, quicker of speed.

The hours so patiently spent in fine handwork by our mothers, the exquisite finishing of each seam and ruffle, the multiplication of intricate detail of fancy work, the patient scrubbing of floors and woodwork, the daily polishing of stoves and utensils, which of us have time for all that now? Yet who shall say that the slighting of such processes, which is the rule today is not provocative of greater good?

It may be a dangerous thing to declare, but most of us think that there can be a judicious slighting of once considered essentials. A little less of fine handwork, a standard of general cleanliness instead of over-much scouring, a simplifying of social obligations—these all help the busy woman to find time for myriad other self-developing or altruistic efforts.

Maybe it isn't the old saw that has been outgrown with the passing of year. Maybe it's merely our definition of "well" that has changed.

not let anybody make it believe that the reduced force would be adequate.

Congress will make no mistake to give the most careful consideration to this very vital matter of national defense and international prestige.

INCOME TAX AN ENDLESS CHAIN

[St. Paul Pioneer Press]

It is all a delusion and a snare that most of the income tax is paid on or about March 15, June 15, September 15 and December 15. It is being paid every day of the year, the taxpayers following each other in an everlasting merry-go-round. We are all in a lock-step to the collector's office, though many may not know it. The manufacturer pays a tax and adds it to the price of his goods to the jobber. The jobber passes the manufacturer's tax, together with his own, to the wholesaler. The wholesaler repeats the pyramid process, the retailer does the same, and the consumer pays all the previous taxes to the retailer. That is not the end of the chain. The consumer has only one way to recoup himself, which is to buy less goods, and thus the impost is passed to the retailer, the wholesaler, the jobber, the manufacturer, and round about again. The farmer may have had an unprofitable year, and paid no tax directly to the government, but he has to contribute his share in helping to pay other people's taxes in everything he buys. The salaried man or woman or the laborer may have exemption equal to his earnings, but cannot escape any more than the poorest farmer. Those who draw salaries greater than their exemptions undoubtedly pay the largest amount in proportion directly to the revenue collector, as it is almost impossible for them to conceal their earnings.

There is no more fatuous folly than the talk of politicians about framing a tax so that it will hit the capitalists or the rich harder than others. It can't be done.

COMMENT ON DAY'S NEWS

By HENRY JAMES

A long editorial reaches the desk. It is on the subject of college education. It sets forth the uselessness of a diploma. Its strong intimation is that the holder of a diploma would be wise to conceal the fact of being burdened by such handicap. There is just a grain of logic in the article. For the most part it is nonsense. The wisdom of inveighing against education is not plain.

Of course the college graduate who regards a diploma as full equipment for entering into the activities of life outside the classroom must be of a mental fiber hardly robust enough to stand the wear and tear of contact with circumstances. He or she might be a veritable store of book knowledge and yet be inefficient.

If four years of study does not benefit the individual, give him a useful insight into human nature, teach him something of the world outside, then the case was hopeless from the start, diploma or no diploma.

No applicant for a job, unless the position in view be scholastic; if endowed with ordinary discretion, would present a diploma along with other credentials of character and fitness. He might be asked if he had been graduated from college. Were he to reply in the affirmative, and by reason of the reply be rejected, he would have occasion to congratulate himself upon having escaped working for a chump.

No reason yet has come to light why the unspeakable Semenoff should have been admitted to this country. Many American soldiers who had served in Siberia knew that he was a ferocious butcher. The American Legion protested against his coming. The protest was in ample time to have caused the closing of the gates against him. Yet he was allowed to come, and arrived apparently full of confidence that his murders and his brigandage would not be remembered. He even thought he could raise money here.

Just now the man is in a prison cell, and lucky to be there. He must be a problem to the authorities. It would be hard to cite a rule making proper the mere shooting of a notorious assassin beyond the three-mile limit.

Circumstances do alter cases. One supposed mail robber killed another supposed mail robber while the two were seeking to escape from jail. Instead of getting a golden reward for this he will be tried for murder.

It would be hard work to suggest better treatment than shooting, for a robber of the class making a business of crimes of violence. The job, however, ought to be left to a discreet representative of the law.

France is far from being alone in the belief that Germany is not so utterly unable to pay reparation as its diplomats represent.

When other nations need money with which to meet obligations, they levy taxes. Germany declines to be so radical as to levy taxes, and yet in the United States, a fairly prosperous place, the average citizen walks to the tax collector's office once in so often.

Arbuckle was so long on trial that he appeared towards the last to be a martyr. The jury acquitted him with celerity and a whoop. The jurors declared singly and collectively that not a shadow of a case had been made against him.

And this is the same Arbuckle whom for a time the spirit of San Francisco suggested hanging to a lamp-post. The same one that organized women declared must be punished to the limit, and they'd like to name the limit.

Anyhow, everybody said, and believed, that he couldn't come back. It is possible that he will come back. It is even conceivable that he will be welcome as he comes. The public seldom cherishes a prejudice, and its facility in the art of forgetting is a wonder.

It cannot be affirmed with assurance that there is an abounding faith in Japan. Nevertheless when it has signed an agreement with stronger powers, policy naturally suggests that the agreement be kept.

Japanese is trying its customary hanky-panky just now with China. In Shantung, where it had no rights, Japan spent money in the fashion ordinarily ascribed to a drunken sailor. Now it turns China's property back to China, and seeks to exact a bill for its own extravagance there.

Very Nipponese, one might say.

WATCHING THE PARADE

By JOHN PILGRIM

This morning I started for Dick Ferris' office with my hair standing on end. My neck was so red that people thought I had a bandanna handkerchief around it. Fire flashed from my eye. When I burst in through his mahogany door it was so mad I stuttered. "Why," I began, and that was as far as I got for a while. I had to run a finger inside my collar to keep from choking. "Why didn't you—"

"I'm not going to touch that job before the fifteenth of next month," said Dick Ferris, calmly.

It knocked me a twister. Dick has always been one of the sort of fellows who has an excuse for every occasion. He never minded doing a bit of lying, if need be, to smooth over a rough spot in the road. Sometimes two or three men were on his heels at the same time for the same cause, and Dick would give each one of them the particular excuse he thought would be accepted. He was always in hot water. Half his time was taken up in excusing himself. He wore a permanent wrinkle over his eyebrows.

"I've made up my mind to quit lying and dodging," Dick said to me the morning that I gave my Vesuvian exhibition. "All my life I've done the very best I could for people, but I've been so afraid of hurting their feelings or hearing a few rough words that I've dodged and wriggled whenever I failed to make good through no fault of my own. Now I've quit. I'm going to tell the truth—and I do not care whether it is diplomatic or not—and I'll take up that job of yours on the fifteenth of next month and not a day before. And if you don't like it, Jones runs a very good law office right across the street."

So I cooled off and gave Dick the good cigar some one had just given me and which I was saving to smoke after lunch and apologized for my behavior and told him to bear me in mind and rush the job through as soon as he could. And went out in the sun and thought.

We've been bullying Dick Ferris in our town ever since I can remember, just because he has been so gentle and easy-going that he tried to be decent to every one of us, and knew no other way of being going to be stiff and truthful we'll have to alter our system. It never decent to a lot of bores except to lie a little now and then. But if he is pays to fight a man who is ready to fight back.

DO YOU KNOW THAT?

All pruning should be finished before the time when the buds start to swell and leaves to form.

The myth that a Y-saped stick carried inverted will turn over when it is above the point where a successful well can be dug has been controverted for centuries. The United States geological survey has issued a voluminous bulletin on the subject.

Constantinople consumes about 1000 tons of sugar per month.

SOCIETY LODGES - CLUBS - CHURCHES

MISS CRAIG IS EASTER HOSTESS

Miss Florida Craig, daughter of Judge and Mrs. Gavin W. Craig of 460 West Colorado, Eagle Rock, was hostess Saturday afternoon at a charming Easter party at which about 12 of her chums in Glendale High were entertained.

BARD SECTION ENDS STUDY

At the meeting of members of the Shakespeare Section of which Mrs. A. H. Montgomery is curator, and which was held Monday afternoon at the home of Mrs. E. W. Kingsley on North Louise street, the study of the Act IV of Richard III was completed.

At the business session arrangements were made for the holding of an open meeting the third Monday in May at the home of Mrs. William Hunter, 107 East Lomita. Plans were also completed for the big card party and dance which the section is giving Friday night at Odd Fellows' Hall as a benefit for the club house fund.

PACIFIC P. T. A. MEETING

The April meeting of the Pacific P. T. A. will be held at the school Thursday afternoon at 3:15. Mrs. P. S. McNutt will speak on Parliamentary Law. Mrs. Mabel Hahn will speak on the Near East Relief and Spencer Robinson has promised to render several vocal numbers. The new P. T. A. song will also be sung.

JOLLY PARTY HIKE UP MOUNT BALDY

On Sunday a jolly group motored up Mt. Baldy where they enjoyed cooking their dinner over a camp fire and did quite a bit of hiking. Those who enjoyed this wonderful day in the mountains were the Misses Lois and Violet Mock, Miss Farnham, Elaine Buttrude, Eloise Truitt and Rebecca Hodge. One of the mothers who chaperoned the party took them to the beach in her car.

MRS. E. L. YOUNG ENTERTAINS CLUB

Mrs. E. L. Young of West Milford street is entertaining the Milford Street Card Club this afternoon. It ordinarily meets on Friday but was advanced this week because of the big card party and dance by the Shakespeare Section of the Tuesday Afternoon Club Friday evening which members are planning to attend.

HI GIRLS AT THE BEACH

A group of high school girls who enjoyed a beach party Saturday included Alice Farrow, Josephine Farnham, Elaine Buttrude, Eloise Truitt and Rebecca Hodge. One of the mothers who chaperoned the party took them to the beach in her car.

PIONEER NEIGHBORS HAVE LUNCHEON

A group of ladies who were at one time neighbors of near Pioneer club, and who are known as the Pioneer club, will be entertained Wednesday at luncheon by Mrs. A. R. Chappell of 333 Vine street.

WHY GO TO LOS ANGELES

To buy high class millinery, sport goods, neck wear, corsets, brassieres, sweaters, skirts and hosiery when you can save from 15 to 25 per cent on the same article in Glendale at the Ladies' Toggery Shop, 133 S. Brand Blvd.—Adv.

Sign up today for the bicycle races starting today at Glendale Bicycle Woods, 120 North Brand boulevard.—Adv.

Natural wave and color! Extra pieces of hair, to aid your own hair replacement and rest, are made during our spare time. Perfectly matched and designed for YOU from the finest type of human hair.

At prices so satisfactory, because this work 'fills in' between your beauty work.

Mrs. NELLO BEAUTY SHOP 123 West Broadway Phone 492-J

THE ROLAND BAGGS LEAVE FOR EAST IN AUTOMOBILE

Will Take Southern Route With Des Moines as Objective

Mr. and Mrs. Roland Baggs of 347 West Acacia avenue, left this morning by automobile for Des Moines, Iowa. Mr. Baggs drove out here last fall from Des Moines, with his father and mother, Mr. and Mrs. H. D. Baggs, at which time he married Miss Laura Jenks of North Carolina, whom he had met there while in army service.

They expect to camp along the road and from here will go to San Diego. Their next visit will be at Dallas, Texas, with Mrs. Baggs' brother who is attending college there. They will also stop at all other points of interest along the way, and to be on the road about a month.

COLUMBUS P. T. A. CAFETERIA TO BE IMPROVED

Women Feel it Has Demonstrated Its Service to Children

One of the most active of the many enterprising Parent-Teacher associations in the city is the Columbus Avenue P. T. A., which has this year established a cafeteria in the school.

At a called meeting of the executive board held at the home of the president, Mrs. C. H. Thompson on West Milford street Monday afternoon, it was agreed that the board should make a thorough survey of the cafeteria to determine what immediate steps could be taken for its improvement in the way of equipment and in other directions, and also with a view to plans for next year. At the present time it is feeding about one-third of the pupils in the school.

The committee accordingly adjourned to the school where the quarters devoted to the cafeteria were critically inspected and where an inventory was taken of the equipment. It was decided to engage a carpenter to make certain changes which will make for convenience, also to install a needed sink. Plans were also made for improvement of the kitchen which will make it possible to feed a much larger number of children. These will be taken up with the board of education in connection with a request for an appropriation to renovate the cafeteria and hall leading to it, and to provide a place for the girls' bicycles which are now stored in the corridor.

After this work the ladies returned to the home of Mrs. Thompson where a social hour was enjoyed.

Mrs. Edith Elrod of 1615 Gardena avenue accompanied by her three sons, Ronald, Rollis and Kenneth, and Mrs. Elrod's parents, Mr. and Mrs. A. L. Greenlaw who are here from the east, took a long motor trip Sunday, traveling 200 miles in about the hours of 12 o'clock and 8:30. They went to Ventura over the Conejo grade, stopping in the various towns en route and returned by way of Santa Paula, Fillmore, etc.

RECIPES PRESENTED DAILY BY KATE BREW VAUGHN

Carrot Croquettes One cup cooked carrots, one cup cooked peas, one cup white sauce, one egg, salt, pepper and grating of nutmeg. Press the carrots and peas through a sieve, they go thru more easily if warm. Add seasoning, unseasoned egg and white sauce and set away to chill. Form into croquettes, roll in crumbs and egg and fry in deep fat.

Scalloped Baked Potato and Cheese Peel the left-over potatoes as soon as the meal is over. When ready to use, season them well with salt, pepper and melted butter. In a buttered baking dish arrange alternate layers of potatoes, grated cheese and white sauce, having sauce on top. Sprinkle very lightly with buttered crumbs and heat in oven.

Sweet Potato Croquettes Put through a meat grinder, using the finest cutter, enough cold boiled sweet potatoes to make one and one-half cups. Add one tablespoon melted butter, half a tablespoon brown sugar, beaten yolk of one egg, salt, pepper, cinnamon, and mace to taste. Mix well to gether, make into small croquettes, roll in fine crumbs, in egg and in crumbs again. Fry in deep fat.

MRS. ANDERSON IS HONORED BY GUILD

The ladies of St. Mark's Guild entertained Monday afternoon with a delightful afternoon tea in honor of Mrs. Helen A. Anderson, who left today for her home at Ypsilanti, Mich. The affair was given at the home of the president, Mrs. Mortimer Baker, 215 West Milford street.

Mrs. Anderson has done a great deal of work for the Guild during her visit here and they presented her with two pretty California scenes, framed in such a manner that they may be used for book ends.

At the close of a pleasant social afternoon, refreshments of fruit salad and wafers, tea and cakes were served by the hostess.

The guest list included Mrs. Helen A. Anderson and her daughter, Mrs. Gertrude Bassett, Mrs. Louis McOmber, Mrs. Frank England, Mrs. Potter, Mrs. Graham, Miss Ellen Williams, Mrs. F. S. Card, Mrs. Galer and the hostess, Mrs. Mortimer Baker.

MISS EASTMAN IS HOSTESS

Entertains in Honor of Francis Sullivan's Birthday

Miss Naomi Eastman of 604 West Salem street, entertained at a charmingly appointed dinner party Monday evening in honor of the birthday of Francis Sullivan, also of Glendale.

A dainty color scheme was carried out in pastel shades of pink and lavender, the table being centered with a beautiful bouquet of sweet peas. Places were marked with Easter place cards and tiny baskets containing little chickens. At each place was a ribbon and the guests were requested to pull it, bringing forth a favor from a large Easter basket at each end of the table. Mr. Sullivan was also presented with a large birthday cake.

WOMEN'S AUXILIARY INITIATES FOUR

The women's auxiliary of the American Legion, of which Mrs. Chalmers Day is president and Mrs. L. T. Rowley secretary, met in regular session Monday evening and initiated four candidates. The new ritual adopted at the last national convention was used for the first time and is considered an improvement on the original one.

At the business session, \$10 was donated to the relief fund of the local Legion post, in addition to the regular monthly contribution towards the rent of the headquarters.

A good many members have been added recently and the outlook for the organization the coming year is very encouraging.

DEATHS AND FUNERALS

WILLIAM H. KORTZ 4321 West Salem street passed away Sunday night as the result of an automobile accident which occurred Friday evening, in which both he and Mrs. Kortz were injured.

Building Permits M. D. Burke, four rooms and garage, 333 West Palmer, \$2700.

TEEN-YOUTH TUESDAY CLUB'S NEXT PLAY

Rehearsals Are in Progress for May Sixteenth

The drama section of the Tuesday Afternoon Club which will meet Friday at the home of Mrs. Charles A. Parker on North Orange street, is having extra morning sessions occasionally at the home of its curator, Mrs. Raymond E. Chase to rehearse the morality play "Every Youth" which will give as a club program May 16.

MISS EASTMAN IS HOSTESS

Entertains in Honor of Francis Sullivan's Birthday

Miss Naomi Eastman of 604 West Salem street, entertained at a charmingly appointed dinner party Monday evening in honor of the birthday of Francis Sullivan, also of Glendale.

A dainty color scheme was carried out in pastel shades of pink and lavender, the table being centered with a beautiful bouquet of sweet peas. Places were marked with Easter place cards and tiny baskets containing little chickens.

After the dinner an enjoyable evening was spent in playing bingo, dancing and various amusing contests. Miss Dorothy Hunt won high score at bunks for ladies and William Sullivan high score for gentlemen.

Mr. and Mrs. Francis Gordon won prizes in a guessing contest in which they were asked to guess what firms various advertisements represented.

Covers were laid for Miss Grace Cranston, Miss Dorothy Hunt, Mr. and Mrs. Francis Gordon, Mr. and Mrs. William Sullivan, Ray Engle, Francis and Robert and Albert Sullivan, Mr. and Mrs. O. D. Eastman and the clever hostess, Miss Naomi Eastman.

7TH GRADE PUPILS TO HOLD BENEFIT

The P. T. A. benefit to be given at the intermediate school Friday night by pupils of the seventh grade under the direction of Miss Payne and Miss Gladys Sharpe is arousing great interest in the hearts of parents and children.

All the mysteries of the program have not been announced but the grade mothers are promising that every-body will have a sweet time because of their part in the bazaar which will be given in connection with the entertainment.

MRS. GROVER ADAMS GIVES AFTERNOON TEA

Mrs. Grover Adams of 417 West Maple street entertained recently at a charming afternoon tea. The afternoon was devoted to music and sewing after which dainty refreshments were served.

Guests included Mrs. Richard Gilbert, Mrs. George Ruggles, Mrs. Harry Boring, Mrs. Frank Nichols, Mrs. Richard Cowley, Mrs. May Hepburn and Mrs. Mary Howley.

NOTICE OF STREET WORK PUBLIC NOTICE IS HEREBY GIVEN THAT THE COUNCIL OF THE CITY OF GLENDALE, ON THE 6TH DAY OF APRIL, 1922, DID, AT ITS MEETING ON SAID DAY, ADOPT A RESOLUTION OF INTENTION, NUMBER 1455, DECLARING AS FOLLOWS: SECTION 1. First: That

MAPLE STREET

From the easterly line of Sycamore Canon Road to the westerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

Second: That a six (6) inch Class "B" cast iron water pipe be laid in Fischer Street and across intersecting streets and alleys, along a line fifteen (15) feet easterly and parallel to the southerly line of Fischer Street, together with all connections, valves, fire hydrants and appurtenances, all as shown on Plan No. 501, Profile No. 841, and in accordance with Specifications No. 41, for furnishing and laying cast iron water pipe in the City of Glendale.

Third: That a cement sidewalk of the width of five (5) feet be constructed along each side of Maple Street, from the easterly line of Sycamore Canon Road to the westerly curb line of Verdugo Road, except where sidewalks have already been graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

Fourth: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

Fifth: That all of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SIXTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SEVENTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

EIGHTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

NINTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

TENTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

ELEVENTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

CITY PRINTING

Canon Road to the westerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

Second: That a six (6) inch Class "B" cast iron water pipe be laid in Fischer Street and across intersecting streets and alleys, along a line fifteen (15) feet easterly and parallel to the southerly line of Fischer Street, together with all connections, valves, fire hydrants and appurtenances, all as shown on Plan No. 501, Profile No. 841, and in accordance with Specifications No. 41, for furnishing and laying cast iron water pipe in the City of Glendale.

Fifth: That all of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SIXTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SEVENTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

EIGHTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

NINTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

TENTH: That a cement curb of the class designated as Class "B" in the hereinafter referred to Specifications be constructed along each side of the roadway of Fischer Street from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications therefor, adopted by the Council of the City of Glendale and known as Specifications No. 42, for furnishing and laying cast iron water pipe in the City of Glendale.

SECTION 3. First: That from the southerly line of Maple Street to the northerly curb line of Verdugo Road, including all intersections of streets and alleys, except those portions as are already graded to the official line and grade, be graded to the official line and grade, and the elevations designated thereon, and said pipe connections, valves, and appurtenances shall be constructed in accordance with the Plans and Profile therefor, designated as Plan No. 49, Profile No. 733, and in accordance with Specifications there

## "Christian Science—God's Law"

A Lecture

By

WILLIAM D. KILPATRICK

Member of the Board of Lecturership of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

The lecturer was introduced by Arthur P. Care, First Reader.

You have been invited here this evening to listen to a lecture upon God; to hear what Christian Science has to offer upon God and His Christ. Many of you are familiar with the teachings of Christian Science, some of you have a slight knowledge of what Christian Science is, while a few of you, possibly, will tonight gain your first impressions of what Christian Science brings to the world. In any event, you are all welcome and we shall strive, in the brief period at our disposal, to present our subject in the simplest possible manner so that even "he who runs may read."

Men are beginning to think for themselves as they have never done before; the great impetus of freedom and democracy which has of late come to the world, has, in large measure, freed thought from its fetters of conventionalism and formalism and has rendered it remarkably receptive of truth. Men are rapidly learning not to depend on the dictum of others for their insight into heaven nor their longer content to sustain themselves on the broken reed of materialism in their search for bodily health. That dogmatism, scholasticism and religious creeds, together with drugs and physics, are being weighed in the balance and found wanting. There is a new proof in the whole-hearted, eager and enthusiastic manner in which mankind is gradually and certainly embracing the saving graces of this new-old religion of Christian Science.

Christian Science comes to you, my friends, with a glorious promise and with a reason for the hope that is in it. It says to those who are sick, those who are sorrowful, those who are weary, those who are poor, "Come unto me, in the words of Jesus, 'Come unto me, all ye that labour and are heavy laden, and I will give you rest. Take my yoke upon you, and learn of me; for I am meek and lowly in heart; and ye shall find rest unto your souls. For my yoke is easy, and my burden is light.'" Christian Science offers you sure success from sorrow and from pain; has a panacea for all your ills and your misfortunes and it comes with a heart full of love and compassion, with healing in its wings and with a world of joy and happiness for all. In Christian Science the sackcloth and ashes are exchanged for the oil of gladness. As foretold in the vision of St. John, "And I saw a white robe and I said, 'What shall we give thee, for thou shalt be clothed in white robes; and there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain; for the former things are passed away.'"

The pathway of Christian Science has not been an easy one to traverse. The movement has not reached its present position in the world over a pathway strewn with roses. Its progress, from its very inception, has been beset by tremendous odds, both from within and without. It has not been without its Judases. Other religious denominations have not tendered it the right hand of fellowship which might have been expected from them, nor has it met with ready favor at the hands of differing forms of healing. It has been the object of much open opposition finding expression through pulpit and press and legislative enactments instigated by its opponents. And why, pray do you suppose Christian Science has found itself the target for these arrows of opposition? Why has it been so maligned and misrepresented? Why, for the very same reason that the Holy Nazarene was persecuted from city to city, from country to country; for the same reason that he was vilified and ridiculed; for the same reason that he was stoned and spat upon; for the same reason that he was sentenced to death on the cross and for the same reason that he suffered and endured the agonies of Calvary and was simply because—he healed the sick and brought comfort to the sinning and sorrowful; because he healed the sick through prayer and by spiritual means alone, to the complete discredit of all material so-called methods of healing; simply because he taught a complete salvation from sin without the fettering and annulling requirements of scholastic theology and without bowing before the formalism of the creeds and ritualistic dogmas of priest and rabbi. Had Jesus never healed the sick spiritually; had he never taught that it is sinful to resort to material means for healing; had he never comforted and reclaimed the sinner without the show of hollow cant and more than worthy ceremony, the world never would have witnessed that awful tragedy on Calvary and there would be no Christian religion today—no scientific religion.

Likewise, had Christian Science been unable to accomplish these same healing and reenergizing works of the Master in the same manner and through the same means that he did, in strict obedience to his commands, his teachings and his precepts, never would have been the object of the misrepresentation, persecution and intolerance to which it has been so often subjected. It was inevitable that Jesus should have suffered the agonies of Calvary and it is inevitable that any religion following in his footsteps and obeying his command to go into all the world, preach the good news to the sick and raise the dead shall bear his cross of ridicule and condemnation, shall drink his cup of bitterness and humiliation, until it prove to an unwilling and

skeptical world its words by its works.

### Spiritual Healing Restored

Christian Science has come to humanity to restore to it the lost art of healing which the great Master-Christ, Jesus the Christ, declared should exemplify the understanding of those truths of existence which he gave the world some twenty centuries ago. One can hardly read the New Testament without a firm conviction that much of the vitality given it by the life and works of Jesus has been lost or eliminated throughout the intervening centuries. Jesus taught that it was his understanding of God and God's government of His universe which enabled him to do the works of healing and regeneration he so freely accomplished throughout His brief ministry and of which he said in no unmistakable terms, "He that believeth on me, the works that I do shall he do also."

Jesus' mission on earth was to establish with men that understanding of God which would enable them to do the very works that he did. He said, "Ye shall know them by their fruits," and in explanation of this saying you will recall that near the close of his earthly ministry, to emphasize to his disciples the fruitfulness of merely external appearances of piety—the fig tree which, to all outward appearances, was a worthy example of its species, but which, on intimate acquaintance, proved to be entirely devoid of fruit but profuse in beautiful and promising foliage. Jesus taught that his works of healing and regeneration were not of a miraculous nature but were indigenous to the correct understanding of God which he came to give us. Jesus came to establish the kingdom of heaven on earth for all mankind throughout all time for all men, in the right here and now. In that mighty prayer, given us in his Sermon on the Mount, we find these words: "Thy kingdom come. Thy will be done in earth as it is in heaven." That which enabled the disciples of Jesus' time to heal the sick, cast out demons and even raise the dead was intended for you and me just as much as for the disciples; otherwise the marvelous works and teachings of Jesus are of no avail as our Savior. There is nothing in the Bible and in the teachings and works of the Master to excuse us in the least for neglecting the sick by prayer and healing means. In the sixteenth chapter of St. Mark's Gospel Jesus gave this explicit command to all mankind, through the medium of his disciples—"These signs shall follow them that believe; in my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick and they shall recover." And it is not a glorious thing to know that at last we have been awakened, through Christian Science, to the recognition of the fact that that command was for you and for me, and that we have been given, through Christian Science, that understanding of Jesus' teachings which makes the fulfillment of that command a present and immediate possibility, and that you and I may know enough right here and now to assist in establishing the kingdom of heaven on earth?

### Spiritual vs. Material Law

If you will carefully follow the life of Jesus as given in the New Testament and consider his works in connection with what he taught you will discover that what he did was merely to establish as a demonstrable fact what he taught, and that what he taught and did were said and done in accord with, and in explanation of, some immutable ever-present, universal law. You will see, in other words, that his words and works were looking to the establishment with men of a divine omnipotent, spiritual law which will eventually rule all mankind to the complete extinction of any so-called opposed law and its effects. The world had always been accounting law to be that which had to do with the material universe and had looked, and still does look, upon law to be that which has to do with materiality or matter. In fact, if you will consider for a moment, you will agree that we have never associated law with anything but with matter. All material or physical manifestations of whatever name or nature—all material phenomena—claim to be the products or outcome of some material law. Everything cognized in the experience of mortals from the cradle to the grave is claimed to exist or to transpire because of a law of matter, and if we will carefully analyze our concept of this entire material existence we will find that we have attributed all material conditions, phenomena and manifestations to God. "Have we not?" Have we not always looked upon everything of which we have been cognizant through the medium of the senses of seeing, hearing, feeling, tasting and smelling to be God-ordained and manifestations of a divine cause of which we have had no particular knowledge? We have merely taken these apparent material conditions to be matter of fact, without question, and have submitted to the misery and want and resultant therefrom as inevitable visitations of a divine providence of which we were supposed to know little or nothing until,

perhaps, we had passed the portals of another existence. We have hardly once stopped to consider what Jesus said and did about these conditions which we have so long attributed, in our ignorance, to God. But when, by Christian Science, we have been called to a halt in our loose and reckless methods of thinking about God and man, and about Jesus and his works, we have been brought face to face with the fact that there is hardly a word uttered by Jesus or his apostles which does not completely deny, controvert and overthrow some so-called material, or physical law. And if we will follow him in his three years' work with men in his effort to establish the kingdom of heaven on earth we will find that in those three years there is not a single evidence of material existence, not a single so-called law governing our material living, and material phenomena which forms a part of our daily experience, that Jesus did not utterly annul through his intelligent application of what he termed the Law of God which he characterized as the "truth" which he said would make us all free, whether known or understood. "Ye shall know the truth," Jesus said, "and the truth shall make you free." That is, ye shall know and understand this Law of God which I here expound and prove to you and this knowledge shall give you power over all things material, thereby setting you free from these so-called laws which have so long held mankind in bondage. Jesus said, "Think not that I am come to destroy the law or the prophets; I am not come to destroy but to fulfill." And then he proceeded to break down and destroy every physical law of which we have any cognizance, through his application of God's law.

And this Law of God—this Law, the knowledge and application of which Jesus should make free—is what Christian Science has come to re-establish with men. Those wonderful works of Jesus prove conclusively that laws of matter are not God's Laws and that God's Laws are not only superior but are actually laws of annihilation to so-called material laws and thereby prove that a material law is a misconception of what constitutes true law. Now, it is pretty evident that Jesus, in his presentation to humanity of a law higher and more powerful than so-called material law, did not give to mankind a law of his own inventing. He established through all time the golden thread which runs as a golden thread throughout all history. The existence of this Law of God can be traced throughout the lives of the prophets and patriarchs, coming to light at intervals in the history of humanity when some one, through pure spirituality, rose high enough to see through the mists of the material and glimpse the glories of an existence wherein man may be found in the image and likeness of his Maker, subject only to the Law of God—the Law of God. As we contemplate with prayerful care the life and works of our Master, as we study carefully all that he said in connection with his many wonderful works, we become impressed, more and more, with the gratifying conviction that the understanding and application, in our daily living, of the truths, or laws, which he expounded constitute that Comforter which Jesus said he would send to us and which will, when understood and applied by us, free us from all those to which we have hitherto considered mankind naturally subject.

We find, with reassurance, that this Law of God is a law of life—not of death; a law of health—not of sickness; a law of abundance—not of lack and limitation; a law of harmony—not of discord; a law of peace—not of strife; a law of love—not of hate. And if we could but comprehend what this law of love means, how sadly this old world needs love, the love that Jesus gave to the world and of which the apostle spake when he said "Love is the fulfilling of the law." What a ministry of love was that of Jesus. Could aught be compared to that love which endured, without murmuring, the world's hatred and scorn that you and I might understand that the Law of God is omnipotent and omnipresent; that we might know that there are no material conditions over which this Law of God has not all power? It was this love expressed through Jesus which enabled him to prove that there is no death, and whereby he emerged from the tomb to perpetuate through the ages man's inalienable right to life eternal. Writing of this experience of Jesus, Mary Baker Eddy, the Discoverer and Founder of Christian Science, says on page 44 of her book, "Science and Health with Key to the Scriptures":

"The lonely precincts of the tomb gave Jesus a refuge from his foes, a place in which to solve the great problem of being. His three days' work in the sepulchre set the seal of eternity on time. He proved life to be deathless and Love to be the master of hate."

### Universality of God's Law

Harking back through the ages to the earliest periods of human history we find in the lives of Patriarch and prophet ample evidence that this Law of God has been understood and proven in a greater or less degree at various times throughout the centuries. The forty years struggle of the Israelites in the wilderness under the leadership of Moses furnishes us numerous examples of the ability of mankind to overcome human or mortal conditions through the understanding and

correct application of God's Law. In the very beginning of their flight from Egypt these worshippers of the true God were confronted with an impassable sea on one side of them and the pursuing Egyptians on the other with the result that through Moses' understanding of, and ability to apply, this ever-present Law of God the waters were divided and the Israelites passed through on dry land, thus escaping from their enemies. This ever-present Law of God fed and sustained them when it seemed humanly impossible to obtain food or drink. You will recall how the manna was furnished them in the desert and how Moses brought forth water from a rock in a dry and parched country. Then following through the centuries every now and then we find some spiritual character bringing to light the wonders of God just as did Moses and Jesus in the healing of the sick, the raising of the dead and countless other ways. In the Book of Kings we read how, through his understanding of God's omnipotent Law, Elisha caused the axehead that works the son of the Shunamite mother; how he multiplied one small pot of oil so that all the vessels at hand were filled to running over; how one hundred men were fed on twenty barley loaves with much left and to spare. Then in the Book of Daniel we read of the hunger of the lions and how the three Hebrew young men, Shadrach, Meshach and Abed-nego, demonstrated the ability of God's Law to save them from the furnace of fire and to deliver them therefrom without so much as the smell of smoke remaining to the sniff of their attendants. And so throughout all history are we confronted with the unmistakable evidence of the forever existence of this Law of God which is always at hand, always available and applicable to our every need if we will but understand and apply it. In the first Psalm we have this most reassuring promise:

"Blessed is the man that walketh not in the counsel of the ungodly, nor standeth in the seat of the scornful. But his delight is in the law of the Lord; and in his law doth he meditate day and night. And he shall be like a tree planted by the rivers of water, that bringeth forth his fruit in his season; his leaf also shall not wither; and whatsoever he doeth shall prosper."

The Bible is full of just such promises, my friends, and, what is more, it is full of accounts, for our instruction and guidance, of the wonderful works accomplished by those who have learned and understood and put into practice this Law of God.

### Life and Works of Jesus

Coming back to Jesus time, we find in the life and teachings of the humble Nazarene the most complete explanation and exposition of this Law of God ever given to mankind. In his turning the water into wine at the wedding feast, his first public demonstration of the power of God's Law, he at once proved that all true law is spiritual or mental, and what we term matter is, of itself, not a lawmaker; that all the so-called laws of matter may be annulled and set aside completely by an intelligent application of God's Law. In his healing of the son of the nobleman at Capernaum when he was a long distance from the sick man, and in his instantaneous transportation to the coast of Galilee Jesus not only proved the omnipotence of God's Law over material manifestations but he proved, at the same time, that even material existence, as such, is but the product of a mistaken mental concept, and that time and place and space are but phases of this mental misapprehension. When he walked the waves he completely overcame one of the most unvarying material laws of which we have any knowledge. In this instance Jesus proved that true substance is not materially composed and that there is but one true attraction, the attraction of God, or God's Law. When he fed the thousands with five loaves and fishes Jesus repeated and emphasized what Moses and Elisha had accomplished centuries before. In each of these instances it is proven that not only is man's supply infinite and ever available but that the multiplication enjoined upon man by God, in the first chapter of Genesis, is a process dependent upon the Law of God and not upon any human concept of propagation and increase. And what did the many, many instances of healing of the sick, the maimed, the halt and the blind, by Jesus, accomplish for us? These thousands of instances of healing, most of them instantaneous, show us that there is a Law of God which we can apply, can heal all our ills, be they what they may; that God is not the author of sickness and that matter has no authority nor power in itself to create, to heal or to alleviate sickness and disease. When he raised from the bier the son of the widow of Nain, when he called forth Lazarus from the tomb and when he accomplished his own resurrection he proved not only the power of God's Law to overcome what we have thought to be a most relentless law of material existence, but he proved, in addition, that through the experience of death we are not ushered into the glories of a heavenly existence. Jesus' final exit from the tomb, in his ascending, shows conclusively that the only roadway to heaven lies in the overcoming, through the application of God's Law, of all material conditions of existence, even to that of death which we have been so erroneously taught is a step-

ping stone to heaven. If there are two things which stand out above everything else in the teachings and works of Jesus they are, first, that death is an enemy which must be overcome through the correct understanding and application of God's Law and, second, that heaven is not a locality of some where in the blue empyrean but that heaven is, rather, a divine state of consciousness which may and must be obtained here and now through mental regeneration. "The kingdom of heaven is at hand," not afar off, did he not? And you will recall that on one occasion he was asked relative to the whereabouts of heaven and when it should come and his reply was "The kingdom of God cometh not with observation, neither shall they say, Lo here, or Lo there; for, behold, the kingdom of God is within you."

And then, long after Jesus' time do we find the record of the accomplishment of many wonderful works, by his disciples and by members of the early Christian Church that exemplify and emphasize the omnipotence of the Law of God. Both religious and profane history furnishes us with ample evidence that the healing work accomplished so freely by Jesus was carried on for many generations after his time.

### True Salvation

And after all, my friends, is it not self-evident that if the world is ever to be Christianized it must come about because of tangible, unmistakable evidences of healing and regenerating such as Jesus accomplished and which he said we should be able to accomplish also because of our understanding of the Law of God which he came to establish with us? We have for years and years been sending our good, noble, self-sacrificing missionaries into the countries of the unchristian, or heathen, with the hope that we could bring them to Christ through preaching without practice, with the result that today but a very small percentage of earth's population can be called Christian. This is because we have been unable to offer our heathen brethren the tangible and unmistakable signs of Christly understanding which Jesus said should follow them that believe—they that understand God's Law and the method of its application. When we have gone to one and told him of the beauties of God and the joy, the peace and the comfort that come with a demonstration of the understanding of God and His law and have proven through the healing of the sick, the comforting of the sorrowful and the saving of the sinful, that what we have said is true and demonstrable here and now, we have gone a long way towards winning him to Christ.

It is bound to acknowledge that God as a God of omnipotence and Love because he has seen the unmistakable proof. And is not this, I ask, the only way we are ever going to save the world for Christ and from its sin, its sickness, its poverty and its misery? A concrete and forcible example of this came to my attention some time ago. I was returning in a small city in the west and saw a man who had evidently been of the Jewish faith. Some years prior to this time this man was conducting a successful business in that city when he was suddenly stricken down with paralysis or some such affliction. He was utterly incapacitated, was compelled to give up active supervision of his business and was confined to his home, a "wheeled chair." This condition continued until one day a banker in that city, a Christian Scientist, who had known this merchant, went, with a friend, also a Christian Scientist, to see him. The banker said to this poor, crippled, helpless fellow: "Now, my man, I have known you for some time and I have never seen you with a great deal of sadness. You can not look after your business, you are under heavy expense, your business is running down and needs your care, and we have come to you, simply as friends come, to offer you what we can to help you out of your dilemma. We are both Christian Scientists and we know that if you will give up your business and your home, and if you will give up your property and your condition, you can be set free. Your condition can be and you and your business can be and you will be free. The merchant heard, with respect, what they had to say and after they had finished he said, "I thank you, gentlemen, very much for your interest in my condition. I know nothing whatever about Christian Science, have never heard of it, that I am aware of, but if it has anything to do with what I wish, I will try it." Closing with the statement, "I know too much about that fellow already." The banker and his friend gave up trying to assist him at that time and left. Time went on, the merchant grew worse, he lost his business entirely, all his means had been dissipated in his efforts to regain his health. When things got to a pitiful stage the banker and his friend decided to try it again. They went to him and told him that their previous talk with him had not discouraged them and they were back to offer him once more the wonderful blessings of Christian Science. This time the man's attitude was different. His experience with the nature had wrought him ready to try anything that offered relief. He said that his every effort had gone in his quest for health, that he had tried every remedy known to material medicine without avail, and that there seemed nothing left but to try Christian Science. A Christian Science practitioner was secured and that same man was completely restored to health. He is now the proprietor of a prosperous business in that little city and he and his wife are earnest workers in the little Christian Science Church there. Happy? You never saw two happier people in your life. Now, what could have in-

duced that man to turn from his prejudice to learn of Jesus the Christ but his wonderful experience of healing?

And that, my friends, is the mission of Christian Science, to turn men to God, to Jesus, to Christ, through those works which Jesus enjoined on all mankind as the only evidence we can ever give of our Christianity—of true salvation. With Isaiah we cry, "Ho, every one that thirsteth, come ye to the waters, and he that hath no money; come ye buy, and eat, come buy wine and milk without money and without price."

Prayer. And now the question of how to bring into action this ever-present law of God, how to apply it to our present needs, how to heal the sick, comfort the sorrowful and save the sinner, as Jesus did, naturally presents itself. This, my friends, is accomplished in Christian Science solely through the prayer of understanding rather than of compulsion or persuasion—the elimination, through spiritualization of consciousness, of that which St. Paul characterized as the carnal mind, the mortal mind, thus allowing that mind to be manifested in us "which was also in Christ Jesus."

We have been sadly blinded to the teachings of Jesus and to the wonderful understanding of his disciples by the materialistic systems based upon materiality, by the befogging inconsistencies of creedal and formal religions, by superstitions, material beliefs, fears, hatred, malice, envy, jealousy and revenge. Much, even that we have considered beautiful and at times helpful has been a hindrance to us in gaining the clarified vision necessary to our spiritual advancement. And it is this vast array of mental misconceptions, this dense web of materiality, which must be removed from our mental horizon before our "eyes shall see the glory of the coming of the Lord,"—before we can begin to experience in our daily lives those wonderful blessings which the Bible has undoubtedly created for us. And it is through constant prayer and self-immolation that these mental barriers are removed from our consciousness and the sunlight of God's ever presence is borne in upon us. As we begin to work in Christian Science and begin to understand what true prayer is, and how to pray as Jesus did, we begin to think, feel, envy, jealousy, hatred, revenge and the like, the procurers of all disease, with confidence and meekness and trust and love and charity and forgiveness; we begin to replace our concept of God's creation to be crassly material with the understanding that the universe and man are pure and spiritual; we begin to break the fetters of creed and dogma and ritual and emerge into the freedom of the Christ. And as we progress in prayer and understanding, God's Law begins to manifest itself to us and through us, in proportion to our purification of consciousness, in better health, better morals, better living, better business and more love for God and all mankind, and a more harmonious condition generally. We begin then to understand a little of what Jesus meant when He said, "If ye have faith as a grain of mustard seed, ye shall say unto this mountain, 'Remove hence to yonder place'; and it shall remove; and nothing shall be impossible unto you." We begin to see how Jesus accomplished his wonderful works and to appreciate how far we have still to traverse, how much genuine purifying we have yet before us, before we are able to fully obey His command to "go and do likewise." It is through prayer that we gain our atonement, our atonement with God, with truth, with love, and with confidence, whereby we can go with confidence to the bedside of the sick and bid them "arise and walk"; to the charnel house of the sinner and command the "evil spirit" to come out of him and to the tomb of the dead and bid those asleep in materiality to "come forth."

### Mary Baker Eddy

Jesus taught and demonstrated conclusively this Law of God, but none of the writers in the New Testament have left us a practical, usable rule for its application. Just as the demonstration of this Law has appeared throughout human history from time to time, when the spirituality of the age permitted, so the discovery of the rule of its practical application was to have come at the proper time and in the proper way. It was destined to come at a period when mankind should be ready to receive it, and through a people capable of understanding and perpetuating it among the nations. So it was only natural, and in accord with God's Law, that it should have been revealed first to a nation in whom spiritual freedom had been exemplified in political and religious freedom—a nation whose struggles for freedom had prepared it for this higher light. This great light was revealed to Mary Baker Eddy, the discoverer and founder

of Christian Science, in the year 1866. Her discovery was made at the proper time. It could not have come sooner nor later. Christian Science is not an invention nor is it what some have been pleased to call it—"one of the new religions." It is the Law of God. Mrs. Eddy's discovery and her wonderful achievement in establishing a church for the perpetuation of this discovery are not the results of chance nor of circumstance. Christian Science is the fulfillment of prophecy and has come to us in due time and order in accord with God's directing. Mrs. Eddy never claimed to be anything but the discoverer and founder of this great Truth, but it will be long before the world will have begun to properly appreciate what she has done for mankind and what trials and vicissitudes were her lot in standing before the tremendous opposition to her first risings in the new tongue. The discovery of this Science which delivers mankind from all bondage is part of the divine plan for humanity's salvation extending throughout the centuries. This guiding light has been placed in the hands of Christian Scientists to be kept burning. Let us all see to it that the light be not dimmed by carelessness, by negligence, by faithlessness, nor by any lack of appreciation of what Mrs. Eddy has done for humanity, lest, perchance, the world be again engulfed in the gloom of a fruitless Christianity.

With the charge placed upon Mrs. Eddy to take the vineyard, care also the charge to water and care for it—the charge to provide the means whereby this great discovery could be perpetuated to posterity. This charge Mrs. Eddy has faithfully fulfilled in the establishment of one of the greatest and grandest church organizations the world has ever seen—the great Mother Church, The First Church of Christ, Scientist, Boston, Massachusetts, with its network of branch churches extending to nearly every part of the civilized world. No one individual in all history has ever accomplished what Mrs. Eddy accomplished in so short a time and the fruits of her planting bear ample evidence of her fitness for the role of discoverer and founder of this great movement. For a part of the plan established by Mrs. Eddy for the perpetuation of her discovery to mankind we have the Manual of the Mother Church. This Manual contains the Church by-laws and the method of Church government devised by Mrs. Eddy. On this Manual rests the entire superstructure of the Christian Science movement.

My Christian Science friends in this Manual contain the stability of your Church. Cherish it! Guard it! Obey it! Mrs. Eddy has incorporated the fundamental teachings of Christian Science in her book, "Science and Health with Key to the Scriptures." This is the textbook of the Christian Science denomination. Through its study the secrets and obscurities of Holy Writ have been made plain and instead of a book of mystery the Bible has come to be the chart of life for thousands upon thousands to whom it has heretofore been closed.

It is wonderful to note, when we stop to think of it, how completely Mrs. Eddy's teachings have changed the thinking of almost the entire world, and in so short a time. There are not many departments of the world's daily routine that have not felt the effects, in some degree, of the great change in our method of thinking resultant of the teachings of this modern New England gentleman whose name may not be generally recognized, but the fact is that the practice of medicine itself has undergone probably as great a revolution since the discovery of Christian Science, and because thereof, as any other one department of human activity. Today you will find many physicians who will tell you that they seldom, if ever, resort to the use of drugs or medicines in their ministrations to the sick, and they will go still further and tell you that they recognize that the mental attitude of their patients has much to do with the recovery. The medical schools are now including in their curricula studies tending to direct the medical practitioner in mental methods in his practice. To be sure, some of these changes may not be altogether for the best, for it is recognized by a Christian Scientist that mental manipulation unchecked by Christian morality is often more dangerous than matter manipulation, but, nevertheless, this decided unrest in medical practice and the tendency to drop matter and to drift towards mind unquestionably re-creates the necessity occasioned by the growth of Christian Science.

One day during the recent World War I was walking down Michigan Avenue, in Chicago, when I came upon a huge triumphal arch erected on the lake side of that beautiful thoroughfare to the memory of those brave lads who had made the supreme sacrifice in that terrible struggle. Imagine my surprise on looking up to behold, emblazoned to all the world in great letters over the archway, these momentous words—"THERE IS NO DEATH!" Do you think that would have been possible fifty, ya twenty-five years ago? Does any one doubt for a moment that Mrs. Eddy's "Science and Health with Key to the Scriptures" was directly responsible for that reassuring sentiment? Only a few months ago at the triennial convention of the great Episcopal Church, held in Detroit, at which convention there were hundreds of delegates from every part of the United States, a very urgent demand was presented that the lost art of healing be incorporated a part of the Church activities to prevent the wholesale apostasy from that organization. Resolutions were adopted by that great body looking to the estab-

lishment at no distant date of spiritual healing in the Church. In the city of Los Angeles, very recently, at a conference of clergymen and laymen, representing all the principal churches of that city, "resolutions were adopted urging the formation of a Christian League of Healing along the lines of Jesus' apostleship. None could deny that this constantly growing tendency on the part of churches quite generally to incorporate healing as a part of their church activities has been brought about by the success of Christian Science.

On this point it is interesting now to note the words of the discoverer and founder of Christian Science, Mrs. Eddy, penned many years ago and recorded in her book, "Pulpit and Press," as follows:

"If the lives of Christian Scientists attest their fidelity to Truth, I predict that in the twentieth century every Christian church in our land, and a few in far-off lands, will approximate the understanding of Christian Science sufficiently to heal the sick in his name. Christ will give to Christianity his new name, and Christendom will be classified as Christian Science."

### Conclusion

I often think of Christian Science as a great, beautiful river leading ever on towards eternal contentment and bliss. All of our lives, perhaps, we have been toiling in the muck and mire of materiality along its shores, looking ever earthward for our quiet peace and joy. We have been stumbling blindly along over obstacles of fear, sickness, hatred, revenge, poverty and sorrow; we have been enmeshed and entangled in the undergrowth of religious creeds, bigotries, superstitions and prejudices which grow so profusely along its banks, ever with our gaze bent earthward, never once looking up to gain light and guidance for our journeying. And then one bright day, without knowing why or how, our gaze is lifted from the sordid spectacle and we discover right before us this great river of rest. It has been there all the time but we have been too busy with our earthly wanderings, our petty, selfish ambitions, our struggles and our cares to see it. But this day we are looking up and out and it lies ready to bear us on its quiet bosom to that haven of happiness and peace and contentment for which we have been so long vainly struggling. We stand at its banks watching, wondering, hoping—hoping, almost, it seems, against hope. Close at hand rests a little skiff with its invitation to enter and ride home. We long to take it, but our fear—we fear lest some one may see and perhaps recognize and chide us. But the call is strong and our need is keen. Presently we discern some one approaching. He is kind and lovingly essays to assist us on our journey if we need help. We take courage and determine to try the little boat. We enter and with the help of the oarsmen gently push off into the water. We tremble with fear at first and do not venture far from shore; tremulously we bask in the sunshine of our new found joy; perhaps we have experienced a physical healing; maybe we find surcease from some hidden sorrow; perhaps we taste the affluence of divine Love, and so, for a time, we sail around in our little boat, and the eddies and swift waters of the shore. Then, after a little, we long to go further out. With the first hint of our Father's protection and love we have been content to linger in the quiet waters near the bank without making any effort ourselves to get out into the stream that leads onward. Then, the desire comes to get farther away from our past, envious omens, and to enter the wide, tangled world of materialism through which we have so long been plodding, and we push out a little farther, the while the dear one who has so kindly assisted us is lending what help we seem to need. We proceed cautiously, even watching lest we get too far away from the banks of the stream—those material conditions upon which we have so long depended. We are getting on fairly well when, suddenly, our little craft hits what seems to be a tremendous obstacle underneath the calm surface and we become fearful lest our little bark be completely submerged. The obstruction may have been the argument of fear, or doubt, or sickness, or discouragement, or disappointment in some personality on whom we have been leaning, or any one of many besetting hindrances with which a beginner has to contend. Then, perhaps, in our fright we hurry back to the bank—to our materialism—not yet ready to give up some favorite material remedy, some hidden hate, some cherished grudge, some sinful habit. And so, for a time we again trudge along through the quagmire of our old environment until one day it seems as though we could stand it no longer; that we must go back to the river and try it again. So once more we find ourselves on the brink of that beautiful stream, and there ready for us is the little skiff and the helping hand of the stranger. Once again we enter the boat and again we push out into the waters. This time we do not loiter long in the shadows of the bank but with more courage and determination than formerly we push farther out into the stream, knowing, by this time, that as we encounter and overcome the various obstacles as we meet them, never turning back to our old environment of thought, ever on the alert for the safe channel which leads out into the open bosom of the sea, that at that point in our journey the way will open wider and brighter each day of our voyage until first we encounter the serene seas.

After you leave school you are not expected to ask questions; you are expected to answer them.

## TUJUNGA CHAMBER TO ENTERTAIN DELEGATES

### Junket Trip of Glendale, C. of C. to Be There Tomorrow

TUJUNGA, April 18.—Tomorrow morning at 9:30 the machines which are to make up the party for the junketing trip of the Glendale chamber of commerce are scheduled to arrive in Tujunga. This tour through the cities of the Monte Vista and San Fernando valleys is being sponsored by the Glendale chamber of commerce in order to bring Glendale and Glendale merchants in closer touch with neighboring towns. It is planned to devote about a half hour to each town visited. Dinner will be eaten at San Fernando, where a longer stop will be made.

John S. Knox, vice-president of the Tujunga Chamber of Commerce is in charge of arrangements for the entertainment of the visitors during their half hour stay.

Sunland is to be visited from 10:15 to 10:30. The Sunland Chamber of Commerce has named G. W. Butts chairman of the reception committee.

T. N. T. Club Meeting  
A meeting of the T. N. T. club will be held tonight in the basement of the church. A rule was incorporated in the by-laws of the club at its last meeting providing penalties for non-attendance at meetings. Cards have been mailed to each member informing him of this rule and it is expected that a large number will be present at the meeting. Plans are rapidly being perfected for a dance to be given on April 28, which it is planned to make one of the most delightful social events of the year.

"Daddy" Warnum III  
"Daddy" Warnum is critically ill at his home on North Sunset boulevard. It is believed that his present sickness is a general breakdown after a long and strenuous life as a circuit rider and traveling preacher and evangelist. Attending physicians extend hope of his recovery due to a strong constitution.

## La Crescenta

LA CRESCENTA, April 18.—Perry Whiting has leased his home in Wildwood Canyon which was formerly known as the La Crescenta Lodge, for an Agriculture School possession to be given the first of May.

Particularly beautiful and impressive were the services Easter morning at the Community church. Songs and recitals by all classes filled the Sunday school hour. "Easter Joy," was the theme delivered by Rev. H. A. Kelso for the regular morning hour of worship. A special musical program was given by Mrs. B. H. Smith, Mr. and Mrs. C. Woolley, Mrs. H. A. Kelso and Miss V. Ranius. Spring flowers were used most effectively by the willing workers in the decoration.

## Foley's Friendly Fancies

JAMES W. FOLEY

FIDUS ACHATES

I have a friend who loves me, true,  
A cheerful friend and kind,  
Who's always sunny, never blue,  
And to my failings blind.  
And how his honest laughter rings  
With heartiness and might  
When I tell him the funny things  
I told the folks last night.

I make addresses now and then  
At dinners and the like,  
Each time I rise to speak again  
I make another strike.  
I think quite quickly on my feet,  
It is my brilliant way,  
And on the next day I repeat  
The funny things I say.

With all the humor of my craft  
That runs from smiles to tears,  
I like to tell just how they laughed  
And stormed the hall with cheers.  
I like the laughter as it rings  
And rolls from left to right,  
And next day I repeat the things  
I said to folks last night.

And so he comes and sits with me  
And I tell him the jokes  
With which so humorous and free  
I split the sides of folks.  
And how his honest laughter rings  
With evident delight,  
As I repeat the quips and flings  
I told the folks last night.

"And then I said"—so thus I say,  
And I tell him the joke,  
And he laughs such a hearty way  
I fear that he may choke.  
He misses not a point I make,  
He gets me always right,  
And how I love to see him shake  
At things I said last night.

## MISS MERRILL WINS SHOPPER AD. PRIZE

### Second Goes to Homer Wellman as Contest Closes

Great interest was manifest in the Glendale Daily Press "Shopper's Advertisement Contest," which appeared in our Easter edition last Wednesday. Many subscribers sent in answers and short writings on the advertisements in the competition. Out of the large number of answers the judges decided the prizes should be awarded as follows:

First prize—\$5 in cash to Gwendolyn Merrill, 215 West Los Feliz road, Glendale.

Second prize—A ladies shopping bag or its equivalent in cash, to Homer Wellman, 354 Pioneer Drive.

The best writeup on the advertisements as they appeared on the contest page was written by Gwendolyn Merrill and is as follows: "The Coker and Taylor ad, to my mind presents the greatest attraction. First, because in it are found all the four words, and second each is so placed as to be strong by contrasting with the unpainted opposite of the word. "The picture too of Grandmother's long hours with needle and thread before the sewing machine, longer hours, pot-watching over hot stoves, contrasting with the 20th century, unwatched cooking."

ILLINOIS PICNIC  
Thousands of loyal Illinoisians are waiting for the picnic, which will be held in Sycamore Grove Park, Los Angeles, all day Saturday, April 29, 1922, with basket dinners at noon. The picnic will be held under the auspices of the Loyal Illinoisians co-operating with the federation of state societies and with the local organizations of Illinoisians in Pasadena, Long Beach, Whittier, Pomona, Riverside, etc.

All the usual attractive features of picnics will be there. This is your picnic and you will make it a success. Pass the word along to the scores of thousands of "suchers." Henry J. Brubaker will preside and lead the community songs. If you want to ask questions, phone C. H. Parsons, 10261, at the Illinois headquarters in the Continental National bank.

NEW YORK STATE MEETING  
The New York state society will meet in the Angelus hotel hall, Spring and Fourth streets, Tuesday evening, April 18, for the monthly social with program followed by dancing. President Geo. H. MacNeill will preside and the new California song, "California Calling Me" will be given by Mrs. Stella Gilbert and Mrs. Anna Evans. All New York state folks from every section invited.

MARYLAND SOCIETY  
The Maryland state society under the leadership of the new president, Mr. Edward D. Noonan will meet in the Angelus hotel hall, Spring and Fourth streets, Wednesday evening, April 19. There will be a program of readings and music followed by a social hour. All Marylanders are invited whether members of the society or not.

BURBANK CHORAL CLUB  
The last concert program given by the Burbank Choral Club was a big success for the club and they are working hard for the next one which will be given in the near future in Glendale.

A Year Ago Today  
(From Glendale Daily Press, April 18, 1921)

Glendale Masons are planning for a big night on Wednesday when they will go to Long Beach as guests of the lodge in that city at a reception.

The Glendale company of the California National Guard and Glendale Post No. 127, American Legion, will take part in a military funeral for Fred Schlichter, son of Mr. and Mrs. August Schlichter, of this city, who died April 8 at Quantico, Va. He was serving as a member of the United States Marine Corps and contracted a heavy cold while acting as a guard at the inauguration of President Harding. This is said to have been the direct cause of his death.

The ballroom of the local Elks lodge was resplendent Saturday evening with elaborate decorations in the Elks' colors when the newly installed officers were guests of honor at a ball.

Impressive ceremonies attended the blessing of the corner-stone of the Church of the Holy Family yesterday afternoon at 3 o'clock. A large number of Glendale residents were in attendance as well as many from other cities.

Glendale with a total of \$473,462 in building permits for the month of March nosed out Pasadena for sixth place in the list of California cities for one month as regards the total valuation of building during the month.

Five new members were taken into the church. Mr. and Mrs. A. C. Cobb and Mary Cobb of Los Angeles were guests of H. S. Bissell Saturday. Glenrose Park was the scene of a jolly picnic last Saturday afternoon when Mrs. B. Stine and Mrs. A. Burt entertained the primary classes of the Community Sunday school. Games were played and prizes won by Gene Angier and Jack and Philip Stine. There were some twenty little guests.

## A LECTURE ON CHRISTIAN SCIENCE

(Continued from page 6)

which lie subtly hidden underneath the calm waters, but we soon learn that there is always a way around these seeming obstacles and there is that ever ready hand to help and save when we fear lest our little boat sink. And as we go we learn that these rocks and snares and snags which try to delay and upset us are no part of this beautiful stream, but that they belong to the shores of materialism from which we have but recently departed, and that the farther we are able to pilot our little boat out into the deeper waters of this heavenly stream the farther are we getting away from the snares and wiles of the banks. And then, one day, we become conscious that the old landmarks are fast receding in the dim past, that the shores are fast disappearing, that no longer is there the feeling of dependence on things material, and with a joy and confidence born of experience we find ourselves far from the hidden and treacherous entanglements of the enemy, and thus on and on we go knowing always that the dear Father is ever with us to guide, to protect and to save.

I would not wish you this evening the impression that Christian Scientists claim to have achieved the ultimate of Christian Science. They have not. They have but begun the work leading to the right solution of life's problems. They have had their failures along with their achievements, but they are all striving to become worthy disciples of the great Master. Writing of the accomplishments and the future of Christian Science, Mrs. Eddy has said in Science and Health: "I have never supposed the world would immediately witness the full fruition of Christian Science, or that sin, disease and death would be believed for an indefinite time; but they do aver, that, as a result of teaching Christian Science, ethics and temperance have received an impulse, health has been restored and longevity increased. If such are the present fruits, what will the harvest be when this Science is more generally understood?"

And now, in closing, I wish to leave with you for helpful contemplation those reassuring promises of the Sweet Singer David, given us in the ninety-first Psalm: "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty. He shall cover thee with His feathers and under His wings shalt thou trust: His truth shall be thy shield and buckler. Thou shalt not be afraid for the terror by night; nor for the arrow that flieth by day; Nor for the pestilence that walketh in darkness; nor for the destruction that wasteth at noon-day. A thousand shall fall at thy side and ten thousand at thy right hand; but it shall not come nigh thee. Because thou hast made the Lord, which is my refuge, even the most High, thy habitation; There shall no evil befall thee, neither shall any plague come nigh thy dwelling. For he shall give his angels charge over thee, to keep thee in all thy ways."

HURRAH, BOYS!  
Sign up today for the bicycle races starting today at Glendale Bicycle Works, 120 North Brand boulevard.—Adv.
