# Strategy

**WIKIMEDIA**  
FOUNDATION

# Timeline

# FY2016/17 Annual Plan

## Improve existing tools

Improve heavily-used editing and review tools with a focus on performance, productivity, and accessibility.

## Reduce technical debt

Take steps toward there being only one editor, one parser, and one user interface library.

## Invest in new technologies

Introduce machine-learning, extend machine-translation, and migrate toward structured data.

## GOAL: 2: Improve editing experience by reducing technical debt

What is your objective / workflow?	Who are you working with?	What impact / deliverables are you expecting?
<b>Objective 1: Improve the wikitext format</b>  Remove Tidy dependency from MediaWiki output	LAST QUARTER	
	Parsing, Operations, Security and Community Liaisons	Deploy (disabled by default) Tidy replacement service and deploy ParserMigration extension in production.
	NEXT QUARTER	
	Parsing and Editing Design	Parsoid has a linter that can identify errors in wikitext. We are going to deploy a Linter extension to the Wikimedia cluster that collects these errors and surfaces them to editors.

## GOAL: 2: Improve editing experience by reducing technical debt

What is your objective / workflow?	Who are you working with?	What impact / deliverables are you expecting?
<b>Objective 3: Streamline metadata editing</b>  Improve architecture of rich media file annotations	LAST QUARTER	
	<b>Multimedia</b> , WMDE and Operations (DBA)	Use annotations on files as a prototype for multiple content streams and structured metadata on Commons, by replacing the ImageAnnotations gadget with an extension (yet to be deployed).
	NEXT QUARTER	
	<b>Multimedia</b> , Security, Performance, Services, Reading and Community Liaisons	Pick up the work on 3D file support by getting the 3d2png service and 3D extension into production, and working with Reading on MediaViewer integration.

QUARTERLY OBJECTIVE INCOMPLETE; ANNUAL OBJECTIVE CONTINUES

## GOAL: 2: Improve editing experience by reducing technical debt

What is your objective / workflow?	Who are you working with?	What impact / deliverables are you expecting?
<b>Objective 4: Standardize User Interfaces</b>  Refine and apply the style guide	LAST QUARTER	
	<b>UI Standardization</b> and Editing Design, Editing Front-end engineers and TPG	Refine and apply the overhauled style guidelines in current Editing products and in parts of MediaWiki core.
	NEXT QUARTER	
	<b>UI Standardization</b> and Editing Design, Editing Front-end engineers and TPG	Provide MediaWiki core with a base set of CSS rules which follow style guidelines.

QUARTERLY AND ANNUAL OBJECTIVES COMPLETE

Our color choices are inspired from black, white, and ink blue. Typography has roots in traditional typefaces.

## Colors

The color palette represents our character and brings a hint of freshness to our products.

## Accent colors

Accent colors are used to emphasise actions and highlight key information. Blue is a natural choice in our context, where it has been the default color used for links, conveying the idea of action.

There are three shades provided for situations where you need a lighter (Accent90), regular (Accent50) or darker (Accent10) version.

Accent50 provides a blue which is suitable to be used for text and as background. When used as link text it provides sufficient contrast with black text to notice the difference. When used as background, it provides enough contrast with white text to keep the text readable.

## GOAL: 3: Invest in new types of content creation, curation and collaboration tools

What is your objective / workflow?	Who are you working with?	What impact / deliverables are you expecting?
<p><b>Objective 1: Expand the Content Translation Tool</b></p> <p>Stabilize Content Translation for going out of beta</p>	LAST QUARTER	
	<p>Language with Editing Design, Parsing, CLs, Tech Ops and Release Engineering</p>	<p>Template support for Content Translation tool, introduced at the end of Q1 has been improved. All templates including infoboxes are now supported. Editors have full control over the parameters using the basic template editor, and cleaner wikitext is created. They do not have to add templates manually after publishing a page.</p>
	NEXT QUARTER	
	<p>Language, VisualEditor, Parsing, Editing Design, CLs, Tech Ops and Release Engineering</p>	<p>First phase of work to replace the existing editing interface in Content Translation with Visual Editor. This will be concluded in Q4.</p>

# Mausolée de Ferdowsi

Revision as of 17:27, 12 January 2017 by Ildranstel (talk | contribs) (Créé en traduisant la page « Tomb of Ferdowsi » (diff) ← Older revision | Latest revision (diff) | Newer revision → (diff))

**Tombeau de Ferdowsi** (persan : آرامگاه فردوسی) est un complexe funéraire composé d'une base de marbre blanche, et d'un édifice décoratif, érigé en l'honneur du poète perse, situé dans la Tus, en l'Iran, dans la province du Khorasan Razavi. Il a été construit au début des années 1930,<sup>1</sup> sous le règne de Reza Shah, et utilise principalement des éléments de l'architecture Achéménide. La construction du mausolée ainsi que son design est un reflet de la culture, et de la situation géopolitique de l'Iran à l'époque. Cet article analyse en détail l'architecture de la tombe et de ses influences.

## Contexte

Ferdowsi, l'influence poète perse et auteur de l'épopée perse, *Shahnameh*, est mort en 1020, à Tous, en Iran (la Perse), dans la même ville qui l'avait vu naître.<sup>2</sup> Pour l'ensemble de sa contribution littéraire Ferdowsi n'a pas été reconnu au cours de sa vie. C'est seulement après sa mort que ses poèmes lui ont valu l'admiration. Pendant des centaines d'années, son lieu de repos était rien de plus qu'un simple sanctuaire-dôme érigé par un maître Ghaznévide du Khorasan, sans aucun édifice permanent en place dans le jardin de sa maison où la fille de Ferdowsi avait initialement enterré son père.<sup>3</sup> Dans les premières années du XXème siècle, l'Iran a commencé à réaliser son rôle essentiel dans la définition de l'identité de l'Iran.<sup>3</sup>

Il n'était pas mis en valeur jusqu'en 1934, quand le gouvernement iranien, alors sous le règne de Reza Shah, premier roi de la dynastie Pahlavi, reconnu la culture et la valeur littéraire de Ferdowsi et érigé une tombe permanente en son honneur.<sup>3</sup>

Une célébration du Millénaire a également été organisée pour le poète, invitant des chercheurs venant Tadjikistan soviétique, d'Inde, d'Arménie et d'Europe (Allemagne, France, Angleterre, etc.) ce qui a conduit à des dons, généralement des étudiants boursiers Parsi, qui ont conduit à la construction d'une statue du poète à l'emplacement de son tombeau. La famille Pahlavi utilisa

## GOAL: 3: Invest in new types of content creation, curation and collaboration tools

What is your objective / workflow?	Who are you working with?	What impact / deliverables are you expecting?
<p><b>Objective 2: Modify &amp; improve curation tools</b></p> <p>Improve edit-review generally and, in particular, provide an edit-review process suited to the needs of new contributors, who, research shows, are particularly vulnerable to rejection.</p>	LAST QUARTER	
	<p><b>Collaboration</b>, Analytics, Research &amp; Data, Editing Design and Community Liaisons</p>	<p>Add ORES good-faith and damaging tests, optimized ORES data display, new filtering UI and a new user filter to the recent changes page.</p>
	NEXT QUARTER	
	<p><b>Collaboration</b>, Analytics, Research &amp; Data and Community Liaisons</p>	<p>Add ORES tests, optimized ORES data display, a new filtering UI and a “New User” filter to the recent changes page (as a beta). Release the ReviewStream machine-readable feed incorporating ORES and other useful edit-review data.</p>

**QUARTERLY OBJECTIVE INCOMPLETE; ANNUAL OBJECTIVE CONTINUES**

# “Learnings”

**WIKIMEDIA**  
FOUNDATION

# January 2017 Editing Department

## What you learned

Did anything unexpected (good or bad) happen?

- Hiring data analyst was complex

What would you do differently if you had to do it again?

- Be more realistic about down-time in Q2
- Set specific product-level metrics at the time of setting goals
- Didn't expedite presenting plan for Wikitext-mode rollout
