# ARCHIAS' GIANT DARWIN TULIPS

*The most beautiful of all Tulips*

● per dozen 45c  
25 for 85c  
100 for only \$3.25

Remarkably brilliant bedding Tulips of largest size, unsurpassed for May blooming. Flowers of finest form borne on extremely long stems, very desirable for cutting.

**Late Flowering ● for the open ground only**

**PLANTING.** Plant four or five inches deep and six inches apart in raised beds or borders so that the beds are slightly above the level of adjacent lawn or walks.

## SINGLE EARLY TULIPS

This class gives us the first bright flowers in spring, usually blooming about the middle of April to the first of May. The uniformity of their height and their upright short stems make them very desirable for planting in beds, parkways and similar locations. They are particularly good for forcing and pot culture, blooming very early and of dwarf habit.

**ARTUS.** Bright scarlet, good forcer and bedder. Height 14 inches. 45c per doz.; \$3.25 per 100.

**COTTAGE MAID.** C. 9 in. Delicate rose, center of petals feathered white. Height 12 inches. 50c per doz.; \$3.90 per 100.

**DUCHESSE DE PARMA.** C. 15 in. Very large, fine flower of orange-scarlet, yellow edge. Height 15 inches. 60c per doz.; \$4.25 per 100.

**KEIZERSKROON.** Scarlet, edged with golden yellow; very large flowers. Height 16 inches. 70c per doz.; \$5.25 per 100.

## Archias' Superfine Bedding HYACINTHS Extra Large

These are selected named sorts, grown in Holland, best adapted for beds and borders in the garden or for florists' greenhouse forcing for cut flowers and are of such superior quality as to be used in immense quantities for both purposes. Especially desirable where a grand display is desired at a low cost. If you wish bulbs for house culture and pots, we would strongly advise you to use the named sorts as the individual spikes will be larger and more perfect.

### Directions for Planting Strawberries

For small gardens, plant 12x30 inches apart. For field culture, plant 1½x3 feet, requiring 8,000 plants per acre. Well drained, rich soil. Fertilize with Vigoro or Vegetable Special Fertilizer. Do not use stable manure as it will attract grubs and cut worms. Mulch in fall.

### Archias' Delicious Table Grapes

Every home should have a dozen or more Grape vines planted on an arbor or along the garden fence. They are delicious to eat fresh from the vines; can be made into the most health producing grape juice; and jelly—well who doesn't like grape jelly? Once planted the Grape vines will continue to yield for years with practically no special attention. Our Grapes are strong, well rooted plants that are sure to grow for you.
