Select List of POT GROWN STRAWBERRY PLANTS

Potgrown strawberry plants are much superior to the ordinary ground layers usually sold, as there is no loss of fine roots in taking them up. They can be transplanted at any season with scarcely any check to their growth. The sooner potgrown plants can be set out after June 1st, the larger they will grow, and the more they will produce the following spring.

Those marked (P.) have pistillate or imperfect flowers and must be planted near perfect-flowering kinds, in order that the flowers may fertilize. The varieties not so marked are bi-sexual, or perfect flowering, and can be planted alone. When properly pollenized the pistillate varieties are the most prolific.

Our list includes all the newest and best standard varieties, extra strong, healthy plants. We exercise the utmost care in packing for shipment, which is of great importance to the purchaser.

Directions For Culture

Strawberries require rich, well tilled soil. The plants should be set 15 inches apart, in rows 2 ft. apart. 100 plants will plant 4 rows 30 ft. long, if set above distance apart. For horse cultivation, set plants 2 ft. apart in rows 3 feet apart. 7,260 plants at this distance will plant an acre. Firm the plants well in the soil, keeping them thoroughly cultivated and cut off all runners. About the middle of December, cover the bed with salt meadow hay, straw or leaves. In April, as soon as the plants show indications of growth, push the covering away from the plants to allow them to come through. This mulching protects the plants from cold in the winter and heat in the summer, keeps the fruit clean and prevents the growth of weeds.

	Per 100	Per 1000
AUGUST LUTHER. One of the best early varieties. Is very prolific, fruiting early and continuing until practically every berry reaches a good size. Berries are uniform in size and shape; color, dark red.	\$7.50	\$70.00
BARRYMORE. Resembles Marshall but is much better bearer....	7.50	70.00
BIG JOE. Late, ripening at the same time as the Chesapeake. Very large and productive. In flavor it is one of the best; firm and a good shipper. Succeeds upon almost all soils and under all conditions	7.50	70.00
BRANDYWINE. Berries are large, firm and solid, excellent in quality, with fine aromatic flavor. A vigorous grower, succeeding on any soil. Mid-season to late.....	7.50	70.00
BUBACH (P). The most popular of all large strawberries. Plant is very productive, completely covering ground about it with berries which are roundish, slightly flattened. Mid-season.....	7.50	70.00
CHESAPEAKE. One of the best strawberries grown. It is very large, of fine form, as late as Gandy and in flavor ranks with "Marshall" and "Wm. Belt".....	8.00	75.00
EARLY JERSEY GIANT. Extra early. Berries very large, scarlet-crimson color, has mild, wild strawberry flavor. Large and of vigorous growth	8.00	75.00
EDMUND WILSON. A unique variety. Enormously prolific. The berries are very large, globular or bluntly heart shape, of deep maroon color, with smooth surface and quite firm.....	8.00	75.00

STRAWBERRY PLANTS—Continued.

	Per 100	Per 1000
GANDY. The standard late variety by which all other late varieties are compared. A strong, compact grower with large, firm berries of finest flavor	\$7.50	\$70.00
GIANT RUBY (P). Very productive, vigorous plants; immense berries of excellent flavor, ripening soon after the early sorts.....	8.00	75.00
GLEN MARY. A superb variety of large size, great productiveness and good quality.....	7.50	70.00
McKINLEY. For large size, beauty, great productiveness and high quality, it stands high among strawberries, ripening in mid-season	7.50	70.00
MARSHALL. One of the richest flavored strawberries grown. Always the leader. Dark, crimson when fully ripe, and of large size. A superb variety. Mid-season.....	7.50	70.00
NEW YORK. Berries are very large, some rather pointed while others are thick and broad; dark scarlet with no green sides or tips; quality is good. Mid-season.....	7.50	70.00
NICK OHMER. A superb variety for the home table, free from rust and bears heavy crops of large, dark glossy red berries, highly colored all the way through and of superior flavor. Medium late..	8.00	75.00
SCOFIELD. On account of its extra large berries, everyone admires it. Flavor rich and aromatic. Strong foliage with thick broad leaves	7.50	70.00
SENATOR DUNLAP. Fruit is large, dark red in color, and has very rich flavor. Exceedingly prolific. Medium to late.....	7.50	70.00
SHARPLESS. Berries are very large, irregular in shape and of good quality. One of the best for table use. Mid-season.....	7.50	70.00
STEVEN'S LATE. A new variety, fruiting very late in the season, yielding large crops of fine berries.....	7.50	70.00
SUCCESS. It is the best of the large, early varieties that we have fruited. The plant is exceptionally vigorous and prolific. Berries are bright crimson.....	8.00	75.00
WM. BELT. Berries are always of large size and good quality; flesh is solid, meaty, deep crimson in color. It begins to ripen quite early, continuing until almost the close of the season.....	8.00	75.00

EVERBEARING OR FALL-FRUITING VARIETIES

ADVANCE. Fruit nearly round, of good size, color deep crimson, berries solid and of fine flavor.....	10.00	90.00
AMERICUS. A fall bearing variety of thrifty growth; good yielder and shipper; fruit of medium size; and has given satisfaction wherever tried	10.00	90.00
PROGRESSIVE. One of the best fall-bearing sorts; strong grower; berries round, deep crimson. It begins to ripen with second earlies bearing fruit until late fall.....	10.00	90.00
SUPERB. A healthy grower. The berries are a rich blood red from surface to center. Aromatic and of excellent quality.....	10.00	90.00

NOTE: Varieties not mentioned in above list, we can supply at advertised prices.
