Why we are doing this

***Wikimedia factors:**

#Show that we can handle complex issues

#Show that we are not afraid to take the lead

Goals

Public Domain for Public Works

We want to see all works published by the European Union institutions, national governments and their respective agencies become freely available.

We want the European Union to set the standard and become the global leader in this field.

European Freedom of Panorama

We want Freedom of Panorama to be harmonised throughout the European Union.

Free Use of Orphan Works

We want to remove barriers obstructing the digitisation and use of orphan works.

We want to see orphan works digitised and used in a way that contributes to our culture, science and economy.

We want the European Union to revise its Directive on Orphan Works to fit the digital age in order to preserve these works that may otherwise be lost.

Lessons and Questions

***Advocacy towards legislative change**

#Long-term (e.g. one change in years)

***Advocacy towards shifting political & public narrative**

#Analyse media articles and official speeches?

***Advocacy towards influencing political agenda**

#Never sure which factors influenced most.

***Advocacy towards relationship with institutions**

#Long-term investment, often no immediate effect

➡ Advocacy is about long-term outcomes and gradual impact... not short-term outputs.
