FIELD REPORT

Date: 23 January 1951 **Time:**

Place: Kyushoji Temple, Fukuchiyama City, Kyoto Prefecture

Purpose: To raise the standard of leaders of social organizations and adult education through discussion and workshops under the guidance of experts in specialized fields of social education.

Attendance:

1. Social Education personnel of the Kyoto Prefectural Office
2. CPH staffs and members of the advisory committee
3. Youth leaders
4. Women leaders

Program:

This is one of the social education conferences which are being held in the different areas of the Kyoto Prefecture.

Great number of participation, even among women leaders (approximately 40) is evident that great interest and enthusiasm were shown in the meeting, especially, as great number of them were forced to walk a great distance to the meeting place due to snowstorm that held up all transportation.

ADULT EDUCATION PROGRAM

of Kyoto Prefecture

1950

(The following information is based upon the "Guide for Adult Education Courses" - Vol. 7 of Series of Social Education Materials, May 1950, Social Education Section, Office of the Kyoto Prefectural Board of Education. - M. K.)

I. Aims of the Adult Education Courses:

TO MAKE TOWNS AND VILLAGES MORE COMFORTABLE TO LIVE IN

All people have the same hope to improve our town or village into a better and more comfortable community to live in. The problems of our village are our common problems. It solely depends upon our will whether our village will be improved or degraded. We should be quick in finding what needs to be improved, so that it will not be too late to take steps towards betterment. It may be a very good idea to publish a paper, "Village Voices," to keep the people informed of the details of the community. Let's set up the day of the month for intestinal parasites test, since there are many people carrying them. Let's improve bathing facilities and drainage, since there are so many flies. It is the shortest cut for us to solve problems one by one to construct a more comfortable community to live in, and, at the same time, is it not the surest way to bring up a new democratic Japan? This Adult Education Program has been set up to let the people be aware of those problems of which they have not been aware before.

TO ELEVATE INDIVIDUAL CHARACTERS

Each of the members of the community must be an excellent member and useful for the advancement of the community. We cannot claim that the whole community is happy by the fact that just one person or a group of people are happy. Let's throw away such an attitude, melancholy and complaining and whispering behind the back. We will speak out frankly, and work together brightly helping one another. Let's combine our strengths to bring forth our bright community. For this purpose is this Adult Education Program set up, so that we can polish up our characters to discharge individual responsibilities.

ADULTS' SCHOOL, ADULT EDUCATION COURSES

Post-war Japan has been seriously suffering both internally and externally. Society has been promptly changing. We must have better understandings of those complex problems and sound judgment, by which we can

DECLASSIFIED E.O. 12065 SECTION 3 NSC/MRS NARS

consider the matters of the community. For this purpose are the old knowledge not useful which we learned while we were young. Do we not need to learn again to advance with the progress of the era. So, the adult education courses are offered, which is, so-called school for adults.

LET US SELECT GOOD LEADERS FROM AMONG OURSELVES

Good leaders are scarce in the village. It is a big problem to invite noted lecturers from faraway. Would it be impossible for us to assure such lecturers among ourselves in our community? Let us learn with more earnestness. Apparently will there good leaders come out. For this purpose are the Adult Education Courses offered to produce good leaders and instructors.

TO LEARN NEW TECHNIQUES AND KNOWLEDGE

What is the intensive system of farming, for instance, what is the rearrangement of farming land, what is a union? There are many things to improve in order to mechanize the various facilities in the farming country, use of power and the labor of horses and cows, improvement of farming tools, etc. There must be many people who are anxious for new ideas on fertilizing system, storage, testing procedures, etc. We must learn new techniques and knowledge for the improvement of farming. For this purpose are the Adult Education Courses offered to the people on the job.

TO ENJOY LIFE MORE

Let's cultivate ourselves more so that we shall be able to appreciate music, fine arts, literary works, and other cultural works. All of us are interested in listening to many phases of our hobbies. For this purpose are the Adult Education Courses offered to let the participants enjoy their attendance.

TO LEARN HOW TO DISCUSS AND HOW TO EXPRESS OUR OWN IDEAS

Let's participate in this Program and speak out our own views on any subjects to be presented. It is not easy to deliver clearly one's views before the audience. We must learn how to speak to other people. We must also know how to hold a meeting, how a democratic organization should be, and so forth. It's our hope that all of us will become good discussion participants by speaking out our own views clearly and listening to others generously.

II. Responsibility for the Adult Education Program in a local community:

The head of each town or village is entirely responsible for the adult education in the community. He is the person who should be always standing on the front line of any project for the welfare of the people and improvement of their life. Schools and CPHs will come along following him if he has this enthusiasm. School people will not initiate this program, but the mayor should.

III. Management of the Adult Education Courses:

The mayor, responsible for the total Adult Education Program of the community, should set up the Adult Education Management Committee by which the well-balanced and varied program will be constructed to meet the needs of the community people. The members of the Committee must be selected from among all different levels and organizations in the community. If there have been the CPH Advisory Committee or the Social Education Committee or both already set up, the committees will carry out the same functions. It is also desirable to invite the assistant mayors, the revenue officer, representatives of the town or village assembly, principals and teachers, representatives of PTA, women and youth organizations, the fire and police stations, the court, many other associations of lawyers, farmers, doctors, nurses, religious and cultural organizations and so forth.

It is advisable to set up some sub-committees since this Committee must carry out many different kinds of services.

(a) Curriculum Committee:

The committee will study the needs of people and find out what subjects should be offered. Members must be specialists in education and include those lecturers who will handle the subject-matters.

(b) Finance Committee:

The committee will make necessary budget and be responsible for the finance business.

(c) Education Center Committee:

The committee will choose the Education Center, and furthermore will consider on the facilities, whether or not, for instance, there are adequate number of chairs, the lights are bright enough, etc.

(d) Public Relations Committee

(e) Others:

Cooperation Committee,
Take-Care Committee, Guard Committee, etc.

IV. Subjects and Participants.

V. Practical Ways of Conducting the Courses.

VI. Adult Education Program as basic services of CPHs.

VII. Lecturers and Discussion Leaders.

VIII. Three Ways of Discussion.

IX. What is "Recreation"?

adult schools can best be housed in school building in order to make use of school equipments. The infrequent lecture course can still be given in CPH's.
