The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

### Explanation of the Articles of the Calendar.

These pages are calculated for Toronto and Quebec, and for ordinary purposes will serve with sufficient accuracy for every city in Canada.

**MOON'S PHASES.**—This Table gives the times for the two meridians when the moon passes the geocentric longitudes of 0°, 90°, 180° and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

**TWILIGHT.**—In this table are given the times at which twilight begins in the morning and ends in the evening, *i. e.*, the times when the sun's centre is 18° below the horizon.

**GREATEST ELONGATION OF THE POLE STAR.**—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following table.

Degrees of Latitude.....	42°	43°	44°	45°	46°	47°	48°	49°	50°
1st Correction for Degrees.....	-5' 58"	-4' 5"	-2' 5"	0' 0"	+2' 12"	+4' 22"	+6' 59"	+9' 34"	+12' 18"
2nd Correction for each minute of latitude.....	+ 1.9"	+ 2.0"	+ 2.1"	+ 2.2"	+ 2.3"	+ 2.5"	+ 2.6"	+ 2.7"	

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar, or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the table by the number of minutes in the latitude.

Thus for latitude 43° 20'...1st correction = - 4' 5"	2nd correction + 2.0 × 20 = + 40"
" " 47° 40'... " = + 4' 32"	" " + 2.5 × 40 = + 1' 40"
" " 45° 10'... " = 0' 0"	" " + 2.2 × 10 = + 0' 22"

**THE PLANETS.**—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of Toronto.

When the planetary day is shorter than the mean solar day, and commences soon after the midnight of the preceding day, the planet will sometimes arrive a second time on the meridian before the expiration of the actual civil day. From analogous causes a planet will sometimes rise twice or set twice in the same civil day. When two culminations occur in the same day, or two risings or settings, the times of both are registered.

The times of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction both for Toronto and Quebec.

The civil times both for the rising and setting of the Moon's centre are given for every day for Toronto and Quebec.

The MOON'S MERIDIAN ZENITH DISTANCES are given to the nearest tenth of a degree for Toronto. They are not corrected for parallax or refraction.

The column SUN ON MERIDIAN gives the time that a watch should shew when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shews to the nearest tenth of a day the Moon's age at Toronto Noon.

The column, MOON ON THE MERIDIAN, gives the mean time at which the moon's centre passes the meridian of Toronto. When in the column headed Moon's rising or setting or Moon on meridian the letters A.M. occur, unaccompanied

any number, they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, but that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

The column, UPPER TRANSIT OF POLE STAR shows for every day the mean time at which the Pole Star makes its upper transit across the meridian of Toronto. It passes in the morning from April 9 to October 9, and in the afternoon for the rest of the year. On October 9 there will be a second transit, occurring at 11h. 58m. 21s. p.m.

The four last columns, although computed for Toronto, will serve with sufficient accuracy for the whole of Canada.

The time at which the lower transit of the Pole Star occurs may be found by adding 11 h. 58 m. 2 s. to the time of its preceding upper transit.

From the time of the upper transit of the pole star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following table, the times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the setting of a Star, add the same number to the time of its meridian passage. Those stars marked (.....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

Eclipses.

In the year 1867 there will be two Eclipses of the Sun, and two of the Moon.

1.—An annular eclipse of the Sun, March 5-6, 1867, invisible in Canada.

II.—A partial eclipse of the Moon, March 19, 1867, partly visible at the stations in the annexed table, which gives the local astronomical time at which the different phases that are visible take place. At the time of last contact with the penumbra the point of contact will be below the horizon.

The first contact with the shadow occurs at 112° from the northernmost point of the moon's limb towards the East, and the last contact at 107° towards the West.

Magnitude of the eclipse (Moon's diameter = 1) 0.803.

The first contact with the penumbra will occur before the rising of the Moon; and at the time of the first contact with the shadow, the Moon, or the point where the first contact with the shadow takes place, will be below the horizon.

The first contact with the shadow occurs at 31° from the northernmost point of the Moon's limb towards the East, and the last contact at 69° towards the West.

Magnitude of the eclipse (Moon's diameter = 1) 0.693.

The mean temperature of the year 1865 was 44°.92, or 12.75 in excess of the average of 25 years. The deviation of the monthly means above or below their respective averages and irrespective of sign had an average amplitude of 2°.51, the average amplitude in 25 years being 1.23. The highest temperature was observed on September 14th, when the thermometer marked 100°.5 Fahn., and the lowest on February 13th, when -10° was recorded, giving a range of 105°.5 for the year.

The warmest day of the year was August 3rd, having a mean temperature of 76°.67; and the coldest day January 17th, with a mean temperature of 1°.77.

The yearly range of the barometer was 1.647, or 0.036 below the average of the past 25 years. The yearly mean pressure 29.6330 was above the average of the past 18 years by .0167. The highest pressure 30.354 was noted at 9 p.m. on November 10th, the lowest 28.707 at 11 a.m. on 22nd March.

The amount of rain which fell during the year was less than the average of the preceding 24 years by 3.356 inches. The month in which the greatest amount of rain fell was May, over 17 days, during which period 1.005 inches of water were precipitated. The most average rainy month during the past 24 years was November, with an average fall of 3.765. The most rainy month was September, 1843, when 3.760 inches fell; and the least rainy month was September, 1848, when only 3.115 inches were precipitated.

The amount of snow which fell during the year was less than the average of the preceding 23 years by 0.01 in inches. The month in which the greatest amount of snow fell was March, over 18 days, during which period 18.9 inches fell. The most average snowy month during the past 24 years was February, with an average fall of 18.1. The most snowy month was February, 1846, when 46.1 inches fell; and the least snowy month was December, 1851, when 10.7 inches only fell.

The number of nights possible to Aurora during the year was 201, as follows: in January, 13; February, 13; March, 11; April, 14; May, 20; June, 18; July, 24; August, 22; September, 23; October, 19; November, 11; December, 13. Number of Auroras observed 55, distributed over the year as follows: in January, 3; February, 4; March, 2; April, 4; May, 5; June, 5; July, 7; August, 8; September, 7; October, 9; November, 1; December, 0.

Mean elasticity of aqueous vapour was in January .086, February .105, March .169, April .203, May .278, June .432, July .402, August .434, September .458, October .240, November .186, December .129; mean for the year being .259; average for the past seven years being .260.

In the following summary several of the results of the year 1865 are compared with the averages derived from a series of years, as well as with the extreme values of analogous results given by the same series:

\* The average lowest monthly mean of cloudiness in column (2) is the least of the thirteen monthly means derived each from thirteen years, and does not include the lowest months in each year, as these fall differently in different years. This explains why the highest minimum in column (1) should be less than the average minimum. The average value of the greatest as well as of the least monthly means of the several elements, and given in column (2), are similarly obtained, and therefore do not necessarily lie between the numbers in columns (3) and (4).

In the case of the warmest days, or the highest temperatures in each year, and other analogous quantities, the averages in column (2) are derived from the corresponding values in each year, independently of the time of their occurrence, and must of necessity lie between the numbers in columns (3) and (4).

LETTERS RATE.

Letters posted in Canada addressed to any place within the Province *pass*, if prepaid, for 5 cents per ½ oz., but if posted unpaid such letters are charged 7 cents per ½ oz.

On Letters to Nova Scotia, New Brunswick, and Prince Edward's Island, the rate is 5 cents per ½ oz., with optional prepayment.

The rate on Letters to the United Kingdom is, by Canadian Packet,  
 Not exceeding ½ oz. . . . . 12½ cents.  
 Exceeding " and not exceeding 1 oz. . . . . 25 "  
 and so on, increasing one rate of postage for each additional half ounce.

And by Cunard Packet, 17 cents per ½ oz., &c.  
 Letters for the United Kingdom must be prepaid, or they will be charged a fine of 6d. sterling on delivery.

Letters for British Colonies and Possessions beyond Sea, and Foreign Countries, via England, must be prepaid.

The rate on letters for the U. States, is 10 cents per ½ oz.  
 " to Cuba . . . . . 21 cents per ½ oz.

There is a further charge on delivery of letters addressed to British Columbia.

Letters . . . . . 10 cents per ½ oz.  
 Newspapers . . . . . 2 cents each.

MAILS FOR CANADA FROM ENGLAND.

Two Ocean Steamers carrying mails for Canada leave Liverpool in each week, viz.: a Canadian Packet on every

Thursday, via Derry on Friday, sailing to Quebec in summer and Portland in Winter, by which the Postage rate is 6d. stg. per ½ oz.; and a Cunard Packet every Saturday, via Cork on Sunday, bringing Mails for Canada, alternately to Boston and New York, by which the Postage rate to Canada is 8d. stg. per ½ oz.

The British Post Office forwards letters to Canada by the first packet sailing after the letter is posted, unless the letters bear a special direction—"By Canadian Packet" or "By British Packet"—and in that case they are kept over for the Packet designated. "By Canadian Mail" is not a distinctive superscription; for any Mail for Canada is a "Canadian Mail," by whatever Packet forwarded.

REGISTRATION OF LETTERS.

Persons posting Letters containing value, should be careful to require them to be registered, and to obtain from the Post Master a Certificate of receipt for Registration.

The charge for Registration, in addition to the Postage, is as follows, viz.:

On Letters to any other place in Canada, or British North America . . . . . 2 cents.  
 On Letters for the United States . . . . . 5 "  
 On Letters for the United Kingdom . . . . . 8 "  
 On Letters for British Colonies or Possessions, sent via England . . . . . 25 "

On Letters for France and other Foreign Countries, see France an amount equal to the postage rate.

Both the postage charge and registration fee must in all cases be prepaid.

Registration is not an absolute guarantee against the miscarriage or loss of a Letter; but a Registered Letter can be traced when an Unregistered Letter cannot, and the posting and delivery or non-delivery can be proven. A Registered Letter is thus secured against many of the casualties which, from incorrect address, forgetfulness of the receiver, or other error, may affect an Unregistered Letter.

MISCELLANEOUS CHARGES.

The charge on Parcels by the Parcel Post, which is limited to places within the Province, is 25 cts. per lb. (with 3 cts. additional if Registered.)

Newspapers published in Canada may be sent by Post from the office of publication, addressed to any place in Canada, at the following rates, if paid quarterly in advance by either the publisher at the post office where the papers are posted, or by the subscriber at the delivering post office:

**NEWSPAPERS BY MAIL FROM ENGLAND OR UNITED STATES.**

Newspapers received from England by the Canadian Packet Mails are delivered free.

Newspapers from England by the Cunard Packet Mails are charged 2 cents each on delivery. (This is the American transit charge.)

United States Newspapers, brought by mail into Canada, are charged one cent each on delivery.

**PERIODICAL PUBLICATIONS.**

The rate on all Periodicals, other than Newspapers, passing by mail in Canada, save such as may be addressed to or received from the United Kingdom, and such as are exempted from postage by Statute, will hereafter be one cent per 1 oz. weight of package containing periodical matter, whether the package contain one or more numbers.

Any fraction of 4 oz. to be charged as a full rate.

On Periodicals posted from the office of publication or by News Agents or Booksellers, to regular subscribers within

the Province, this rate may remain to be collected on delivery, and must in such cases be marked upon the packages and charged in the Letter Bills, but when mailed to go out of the Province such Periodical matter must be prepaid by Postage Stamp. British and United States Periodicals may be posted in Canada by News Agents and Booksellers to regular subscribers in the Province under this regulation.

Transient Periodical matter posted in Canada must in all cases be prepaid by Postage Stamp.

The above rate will be payable on delivery on all Periodical matter received from the United States, except that Canadian Editors may receive Exchange Periodicals from the United States free of Canadian Postage.

Periodicals, printed and published in Canada, may be posted addressed to any place in the United Kingdom by Canadian Packet, on prepayment by Postage Stamp of two cents each number.

This rate will be applicable to all classes of Canadian Periodicals posted as above for the United Kingdom, the exemptions to which certain classes of Canadian Periodicals are entitled, extending to such numbers only, as are addressed from the Office of publication to places within the Province.

**POSTAGE RATES ON MISCELLANEOUS MATTER.**

Patterns or samples of merchandise and goods for sale may be posted in Canada to be forwarded to any place within the Province, on prepayment by postage stamp of a rate of one cent, per ounce, under the following regulations:

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples however of seeds, drugs, and so forth, which cannot be sent in open covers, may be enclosed in bags of linen or other material, fastened in such a manner that they may be readily opened; or in bags entirely closed, provided that they be transparent, so that the officers of the Post Office may be able to satisfy themselves as to the nature of the contents.

The Packet may bear on the *outside* the address of the sender, in addition to the address of the person for whom it may be intended; also a trade mark and numbers, and the price of the article enclosed; *inside*, there must be no enclosure but the samples or patterns themselves; the particulars however of the trade marks, numbers and price, may be marked on the articles themselves, instead of on the outside of the Packet, at the option of the sender.

Any sample or pattern Packet containing a letter, or otherwise violating the conditions of the preceding rules, will be rated and treated as a letter.

The rate of one cent, per ounce is to be prepaid by postage stamp, and, if such rate is not fully prepaid by the stamps affixed, the Packet is to be rated with the deficient postage and a fine of five cents in addition.

Packets of samples and patterns may be registered on pre-payment by postage stamp of a registration fee of 5 cents in addition to the postage rate, and provided such Packets be duly handed in to the post office for registration.

No Packet of samples or patterns must exceed one pound in weight.

These regulations apply only to the transmission of Packets of samples and patterns within the Province of Canada, and will not in any manner interfere with the regulations governing the exchange of samples and patterns with the United Kingdom, or with the foreign countries to which the same advantage extends, namely, France, Belgium, Italy, German States, and Denmark.

No provision as yet exists for the exchange of such matter with the other British Provinces or Colonies, with the United States or with other foreign countries than those above named.

Book manuscript, and printers' proof-sheets (whether corrected or not), maps, prints, drawings, engravings, photographs when not on glass or in cases containing glass, and sheet music (whether printed or written), may pass in covers open at the ends or sides, and provided that no letter, or other communication intended to serve the purpose of a letter, be enclosed therein, on pre-payment, when posted in Canada, by postage stamp of the ordinary printed matter rate of one cent, per ounce; or upon payment of that rate on delivery of such matter when received in the mails from the United States.

POSTAGE OF BOOKS, PATTERNS AND SAMPLES.

Patterns of merchandise, and samples, may be forwarded between Canada and the United Kingdom, France, Italy, and the German States, by the Canadian Packet mails, at book post rates, and subject to the following conditions:

There must be no writing or printing other than the address of the person for whom the packet is intended, the manufacturer's or trade mark and number, and price of the article.

Any infringement of the above regulations will render the packet liable to be treated and charged as a letter.

Samples of seeds, drugs, and similar articles intended for delivery within the United Kingdom, are now allowed to be sent in bags entirely closed, provided such bags be transparent, so that the officers of the Post Office may be able to satisfy themselves as of the contents.

The rule which prohibited the transmission through the Post, as patterns, of articles of cutlery, &c., has been rescinded; and scissors, knives, razors, forks, steel pens, nails, keys, watch machinery, metal tubing, pieces of metal or ore, and such like articles, are now allowed to be forwarded by the Post as samples, provided they be packed and guarded in so secure a manner as to afford complete protection to the contents of the mail bags, and to the persons of the officers of the Post Office. Such articles, however, must be so packed that they may be easily examined; and it is made a rule that any packet containing such articles, which may be found to be insufficiently guarded, shall not be forwarded through the Post.

None of the articles named in the next preceding paragraph may be sent as patterns or samples to any place abroad, except Germany, Belgium, and the British Colonies, and not to the se places when addressed *via* France.

A packet of patterns or samples sent to France, must not exceed 18 inches in length, width or depth; a packet to any other place abroad must not exceed 24 inches in length or 12 inches in breadth or depth.

A packet of patterns or samples sent to Germany or Belgium must not exceed 8 oz. in weight.

No Packet of patterns or samples must exceed 24 oz. in weight.

Bags entirely closed, even though they may be transparent, must not be used for the transmission of seeds to foreign parts.

No prints or printed matter will be allowed to pass by book post between the United Kingdom and Canada, unless printed on paper, parchment or vellum.

Chambers are held each day in Common Law and Chancery by one of the judges of the said courts, for such business relating to suits therein as may be transacted by a single judge out of court. Routine business in Chancery Chambers, by a recent order, is also taken before T. W. Taylor, the Judges' Secretary. *Clerk, Common Law*—William B. Howard. *Reporter Common Law Chambers*—Henry O'Brien.

**HEIR AND DEVISEE COURT.**—Commissioners, the Judges of the Superior Courts, and such other persons as may be

appointed by commission under the Great Seal. Their duties are to determine claims to lands in Upper Canada, for all the no patent has issued from the Crown in favour of the proper claimants, whether as heirs, devisees or assignees. Sittings at Toronto, first Monday in January and July in each year. *Clerk of Commissioners*, W. B. Howard.

**COUNTY COURTS.**—Presided over by a resident Judge in each county. Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed £50; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to £100; and to all bail bonds and recognizances of bail given in the County Court, to any amount; but not to cases involving the title to lands, validity of wills, or actions for libel, slander, criminal, or seduction. An appeal lies to either of the Superior Courts of Law. These Courts also possess equity powers, to the amount of £50, subject to an appeal to Chancery.

**SURROGATE COURTS.**—The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting or revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effects in Upper Canada, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Court of Chancery. The County Judges are also Judges of the Surrogate Courts. *Surrogate Clerk*, Sir J. L. Robinson, Bart.

**RECORDERS' COURTS.**—In the Cities of Toronto, Hamilton, London, Kingston, and Ottawa, the Recorder's Court takes the place of the County Sessions, the Justices for Counties having no jurisdiction in the Cities—the care of which is confided to the Recorder, Mayor, Aldermen and Police Magistrate of each. Sessions held first Monday in March, June and September, and third Monday in December. *Recorders*—George Duggan, Toronto; James O'Reilly, Kingston; John E. Start, Hamilton; William Horton, London; J. B. Lewis, Ottawa.

**INSOLVENT DEBTORS' COURTS.**—By the "Insolvent Acts of 1864 and 1865," 27 & 28 Victoria, cap. 57, and 29 Vic. cap. 18, provision is made "for the settlement of the estates of insolvent debtors, for giving effect to arrangements between them and their creditors, and for the punishment of fraud." In Lower Canada, this enactment applies to traders only. In Upper Canada, to all persons whether traders or non-traders. In these courts, the county court judge in each county presides—the only appointments made in pursuance of this statute being those of "official assignees," who are to be nominated "by the Board of Trade at any place, or the council thereof, within the county or district in which such Board of Trade exists, or in any county or district adjacent thereto in which there is no Board of Trade." This important statute is proving a great boon to the community, in enabling parties who from unavoidable circumstance, find themselves paralyzed by helpless liability to obtain relief, and recon- me business.

**DIVISION COURTS.**—For the summary disposal of causes by a Judge; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract amounting to £25; injuries or torts to personal chattels amounting to £10; and personal actions to that amount, if not excepted from their jurisdiction; but not to actions for gambling debts, liquors drunk in a tavern, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, criminal, seduction or breach of promise, or actions against a J. P. for anything done by him in the execution of his office, if he objects to it. **THE NEW MUNICIPAL MANUAL;**

CONTAINING

**THE NEW CONSOLIDATED MUNICIPAL AND ASSESSMENT ACTS,**

WITH COPIOUS EXPLANATORY AND PRACTICAL NOTES,

AND A FULL ANALYTICAL INDEX.

BY ROBERT A. HARRISON, D.C.L.,

BARRISTER-AT-LAW.

THE EDITOR having made Municipal Law his particular study, the forthcoming volume will be deserving of great confidence and wide support. Besides the Municipal Act the work will contain the Consolidated Assessment Act fully annotated. This will be in addition to what the former edition contained. These Acts are nearly allied in their purposes, and it is satisfactory to have both consolidated, and will be still more satisfactory to have both annotated by a gentleman of Mr. HARRISON'S experience.

The price will be \$4 per copy. The Index accompanying will be the most complete of the kind ever compiled in Upper Canada. Nothing will be left undone either on the part of the Editor or Publishers to make the work as complete and reliable as possible. Persons paying in advance will be entitled to receive the work in numbers of 96 pages each. This will enable those who receive the parts in advance in good time to prepare themselves for the administration of the law in the ensuing year. The first part, now ready, contains the part of the Act regarding the qualification of candidates, voters, holding of elections, &c.

FROM 30 years' manual practice in the above branch, and having constructed most of the Machines now at work in various parts of the world, is enabled to offer the most complete and durable machinery, and by confining his manufactory to only two branches, namely, SODA WATER MACHINES and DIVING APPARATUS, and his whole attention being given to these branches, it must be obvious that every part has been the subject of his most careful study, so that any derangement of parts can hardly occur. All the Machines made by S. BARNETT are constructed under his own superintendence, and proved to four times the pressure they are ever required to be worked at. S. B. being so well aware of all the requirements of persons using Machinery where *mechanical assistance cannot be obtained*, has paid full attention to this point, as the great number of testimonials in his possession will prove. He has also lately introduced larger condensers, and more powerful frames than those previously in use, while his prices have not been increased.
