1871.

LILIUM AURATUM.

THE GOLDEN RAYED QUEEN OF LILIES.

Large Flowering Bulbs,

35 cents to \$1.00 each.

REMARKS TO PURCHASERS.

OUR EXTENDED EXPERIENCE IN THE SELECTION AND importation of Bulbous Roots, has given us an opportunity of knowing where to procure the best and most healthy grown Bulbs, as well as the most desirable varieties; and in making this selection care has been taken to name only those varieties which we believe will give entire satisfaction to the grower. The utmost care will be observed in packing, and no pains will be spared to have every Bulb in good order and true to name. We shall be prepared to send out Bulbs from the first week in September, and will continue to fill all orders in rotation as received.

Parties unacquainted with the different varieties of Bulbs may do well to leave the selection to us, simply stating whether the Bulbs are wanted for Pot, Glass, or Garden culture; all such orders will be filled in the most judicious and liberal manner.

BULBOUS ROOTS BY MAIL.

Post Paid to all parts of the United States. All Parcels by express to be paid by the Purchaser, unless by special agreement.

The new postage law authorizes the sending of Bulbs, Flower Roots, Cuttings and Seeds at the rate of two cents for every four ounces weight, the weight of any one parcel not to exceed four pounds. Under this law, any of the Bulbs named in this Catalogue will be mailed as above upon receipt of the prices quoted.

In giving orders please state explicitly by what conveyance they are to be forwarded, and if by express or railroad, the names of the parties to whose care they are to be consigned at the various places of transshipment. When no particular route is designated, we forward according to the best of our judgment. Orders from unknown correspondents to insure attention, must invariably be accompanied with cash or a satisfactory reference.

We earnestly request our correspondents to be particular and give their *Names, Post Office, County and State in full, distinctly written.*

HOW TO SEND MONEY.

In making a remittance, purchasers will please be particular, and send a sufficient amount to cover their orders. When only a part of the amount is remitted, goods will be sent only to the amount of the remittance. Should the remittance exceed the amount of the goods sent, the balance will be returned to the purchaser with the goods.

Remittances can be made in current Bank Bills, Post Office Orders, Registered Letters, or by draft on New York, Boston or Philadelphia. Post Office orders are preferable to all others, as there is no possibility of loss; but when these cannot be obtained, Registered Letters are surest to reach their destination. The cost of the Post Office order, Draft, or registering the letter, may be deducted from the remittance, on orders amounting to \$2.00 and upwards. Orders should be addressed to

RICHARDSON & GOULD.

P. O. Box 5134.

245 Broadway, New York.

THE HYACINTH.

HYACINTHS MAY BE PLANTED IN THE OPEN GROUND AT ANY time from September to December. In open Winters, or at the South, they may be planted as long as the ground can be worked. Any well drained garden soil is easily rendered suitable for growing Hyacinths. If the soil is of a strong adhesive nature; add two inches of sharp sand and as much well decayed manure. The soil should be well dug to the depth of fourteen inches, and raised from two to four inches above the level of the walks, taking care to mix the sand and the manure with the soil; open loamy soils will require merely a liberal dressing of manure and deep digging. Plant the Bulbs four inches deep and from six to eight inches apart. Before Winter sets in cover the beds with two or three inches of decayed leaves, straw or manure, which will benefit them and help keep out the frost. This should be removed as soon as hard frosts are over.

Culture of Hyacinths in Pots.

The Hyacinth will grow in almost any light sandy soil. But to cultivate them most successfully, they should be planted in a mixture composed of one-half decomposed turfy loam, with the remainder equal parts of well rotted manure, leaf mould, and river sand, thoroughly incorporated together. The pots used for single Bulbs should be about five inches in diameter; some prefer to plant two, three, or five Bulbs in pots of proportionate size which will produce a fine display. In potting, each Bulb should remain two-thirds above the surface of the soil. When thus planted, water them well to imbed the bulbs firmly within the soil; after potting place them in a cool dark place, so as to encourage a strong development of roots before the Bulb starts at the top. This may be done by burying the pots to the depth of five or six inches in the open ground for six weeks; or they may be placed in a cool cellar, covering the pots with five or six inches of sand. Remove them from such situation as soon as the roots reach the bottom of the pot. When the pots are brought from the bed or the cellar, keep them shaded until the leaves get green; then place them on the green-house shelf or parlor window. They will need moderate watering until they begin to grow, when water should be freely given, and an abundance of air in mild weather.

Culture of Hyacinths in Glasses.

The Bulbs should be so placed that only the base of each will touch the water. Then remove them to a cool dark place. When the glasses are moderately filled with roots, which will be in about two or three weeks, they should be exposed to the light and air as much as possible. The water should be changed once in two or three weeks, or if a small lump of charcoal is placed in the glass it will not be necessary to change the water so often. (Rain or soft water is the best). Care should be taken that they are not exposed to frost, as it would not only burst the glass, but injure the fibres to some extent. Single Hyacinths generally succeed best in water, but those of the double designated thus * are also adapted for water.

Culture of Hyacinths in Moss.

The Hyacinth will grow and bloom in flower pots, vases, &c. filled with fresh moss, as well as in earth or water. Place the moss loosely in the pot or vase, on which plant the Hyacinth, covering the Bulb with the moss, then moisten the whole, which should be repeated two or three times a week. Narcissus, Early Tulips and Crocus may be treated in the same way. It is well to give the Crocus as much air as possible in their first stage of growth, by placing them outside of the window when there is no danger of frost.

DOUBLE HYACINTH. Page 4.

HYACINTHS.

THE majority of the Single Flowered varieties are more effective than the Double. All the Single varieties succeed well in water, and those of the Double designated thus.*

DOUBLE RED, (of various shades.)

Acteur, rose, shaded with deep pink... \$o 25 Alida Catharina, deep rose..... 25 *Bouquet Royal, delicate rose..... 35 *Bouquet Tendre, deep red..... 30 *Comtesse de la Coste, delicate rose... 30 *Czar Nicholas, pure rose, large..... 25 Diadem of Flora, large rose..... 30 Eendragt, deep pink, very fine... 30 *Frederick the Great, fine large truss... 80 *Grootvorst, delicate blush... 30 Honneur d' Amsterdam, rose, shaded, 40 Hugo Grotius, light red, good truss... 30 Il Pastor Fido, delicate rose... 30	*Lord Wellington, delicate light rose. \$o 75 Madame Zoutman, rosy crimson... 30 Mathilde, blush white, purple eye..... 35 *Maria Louisa, fine red... 35 *Panorama, bright red... 30 *Perruque Royal, light rose... 40 Princess Royal, dark red, purple eye... 35 Rose Mignonne, light rose, fine truss... 30 Rouze, pourpre et noir, very dark... 40 *Regina Victoria, salmon rose... 35 Sans Souci, very deep crimson... 90 *Sir Joseph Paxton, deep red... 75

Miniature Hyacinths.

THE Miniature Hyacinths require but a small glass or pot, and the same cultural treatment as the larger flowering varieties, succeeding well in water, sand or moss. They are very interesting and a valuable acquisition for arranging alternately with the larger Hyacinths, Narcissus, or taller growing plants. This section is well adapted to please the children to whom it can be made a continual source of pleasure. Little Nellie or Willie can each have their favorites in name or color, and may vie with

more experienced cultivators in producing a fine display of bloom from their miniature flower stands. We have imported a fine stock of the following named varieties:

Price, 15 Cents Each; - - - - \$1.50 per Dozen.

Those marked thus * are double.

- *Annie, bright pink.
- *Alice Maud, carmine.
- *Albert, light blue.
- Flora, satin rose.
- George, delicate porcelain.
- *Jessie, pure white.

- *Jennie, pure white.
- Lizzie, dark red.
- Minnie, delicate pink.
- Nellie, pure white.
- Uncle Sam, deep blue.
- *Willie, dark blue.

TULIPS.

THE following choice collections of beautiful Tulips will be found particularly worthy of notice. The Tulip in its different varieties comprise a most valuable class of hardy bulbs; they are indispensable for the decoration of the garden during the spring months, or for indoor culture during the winter and early spring; their brilliant dazzling colors and splendid markings, embracing mostly every variety of shade, their ease of culture and extreme hardiness, has secured them a place not surpassed by any other bulb. Mode of culture: same as for Hyacinths. The bulbs should be planted four to six inches apart and covered three to four inches deep.

Early Dwarf Duc Van Thol Tulips.

ALL the Duc Van Thols in their several colors, are the earliest, have exceedingly gay colors, and are of low compact growth (four to five inches). They are admirably adapted for very early beds out of doors, and are excellent for flowering in the house during the winter in sand, moss or water.

Late Flowering Single Tulips for the Garden.

This section is known from the others by their taller growth and later bloom. They are of fine form and great beauty. These are the Florist's favorites, and are extensively grown for competition. The leading colors are pure white, and golden yellow ground tints, with diversely beautiful flamed striped and feather-like margins.

Fine Mixed Tulips.

DOUBLE and single, early and late,—for grouping or mixed borders. Seventy-five cents per dozen ; \$5.00 per hundred.

POLYANTHUS NARCISSUS.

THE Narcissus is unrivalled for spring gardening, for beds, clumps and borders. The pure whites with yellow and citron cups, and the bright yellows with orange cups, form a striking contrast. The flowers are exceedingly fragrant, and nothing can be more desirable for flowering in pots in the house. They require the same treatment as the Hyacinth ; only when planted in the open border they require to be planted at least five inches deep, and well protected by a covering of litter.

CROCUS.

ONE of the earliest flowers of spring and a universal favorite, being neat, dwarf and compact in growth, and varied and gay in color. They can hardly be too liberally planted in every garden. They succeed well in any ordinary rich garden soil. Plant the bulbs about two inches deep, and before winter sets in, cover the bed with a little litter or straw, to prevent the bulbs being thrown out by the frost. For flowering in pots—hedge-hogs, or in any of the various contrivances that are used instead of pots, strong bulbs of the seedling varieties should be selected ; let the bulbs be only half covered with mould ; use good rich sandy soil, and secure perfect drainage ; give them a liberal supply of water during the blooming season.

CROWN IMPERIALS.

AN old-fashioned but noble class of bulbous plants, remarkable for their highly ornamental appearance and early blooming, with their clusters of pendant bell-shaped flowers surmounted with a tuft of green leaves. They are admirably adapted for mixed borders, shrubberies and centres of beds. They succeed well in any common garden soil.

RANUNCULUS.

FOR beauty of form and brilliancy of color, the Ranunculus is probably unequaled by any other flower. It requires a good depth of rich garden soil. Should the natural soil be unsuitable, remove it to the depth of two feet, replacing it with rich fresh pasture or garden loam, this should form the foundation of the bed to the extent of one foot, on this should be laid a dressing of well decayed manure; half a foot upon this, for the top of the bed, should be placed a layer of fibrous yellow loam, mixed with well dried cow dung and leaf mould. Plant the tubers in drills two inches deep, and each drill six or eight inches apart. Protect them from severe frosts with a good layer of perfectly dry litter or leaf mould, which should be removed previous to the plants appearing above the ground. It is necessary to water them freely, and maintain a uniform moist surface in dry seasons, as the Ranunculus forms its roots near the surface, and is unable to withstand a dry parched soil. In watering do not wet the leaves, but soak the bed well twice a week in dry, hot weather. When the foliage has become quite yellow, the tubers should be lifted, gradually dried, and placed away in a cool airy situation.

A N E M O N E S .

THESE are highly ornamental hardy tubers, and are well adapted to either pot or border culture. The colors are exceedingly brilliant, and the markings, stripes and belts, beautiful. The Anemone will succeed in much less enriched soil than the Ranunculus, but in other respects the same general treatment will answer. For pot culture, use any rich porous compost, and secure good drainage; plant three or four roots in a five or six inch pot, place them in a moderately cool situation, give very little water till the plants appear; in Spring, remove them to the window or green-house.

ZEPHYRANTHES.

THE bulbs are similar to the Crocus, and produce from one to three very beautiful lily-like flowers. For pot culture they have few equals—coming into flower, within three weeks after planting, at any time during the winter. They may be kept dry, and planted in the open border about the first of May. For a good effect three bulbs should be planted in a four inch pot.

Candida, hardy, white.....	20c.	\$2 00
Rosea, hardy, rose.....	30	2 00

GLADIOLUS, (*Hardy Varieties.*)

THE following varieties of this popular class of plants are perfectly hardy, and will thrive in any good garden soil. They are very effective when planted in large clumps.

Gladiolus Byzantinus, crimson purple.....	10c. each,	\$1 00 per doz.
“ Communis flora alba, white.....	10	“ 1 00 “

Bulbocodium.

Very beautiful dwarf species resembling the Colchicum, adapted for beds or edgings.
Bulbocodium vernum, dark purple, 10 cents each, \$1 00 per dozen.

CYCLAMEN.

THESE charming Plants are among the most desirable for Winter-house blooming. They are of very neat, compact habit and rich variegated foliage; their graceful little elegant flowers, varying from snow-white to crimson—which continue in bloom for nearly three months—secure for them universal admiration. They are easily cultivated in pots, in a mixture of turfy loam and sandy peat, or leaf mould and silver sand. They should be allowed to dry away in May, keeping the Bulbs in sand through the Summer.

Atkinsi alba.....	\$1 50 each.

OXALIS.

AN interesting class of small bulbs, producing vast quantities of brilliant flowers during the Autumn and Winter months. They should be potted early, in light porous soil.

Finest named varieties, 20c. each; \$2 00 per dozen. Fine mixed, \$1 00 per dozen.

SCILLA SIBERICA.

HYACINTHUS BOTRYOIDES, (Grape Hyacinth)

SCILLA.

These are among the most beautiful of Early Spring Flowering Bulbs. They are all quite hardy with the exception of Peruviana, and succeed well in any good light soil in the open ground. They are also very suitable for pot culture; are of dwarf habit averaging six inches in height, with gracefully pendant bell-shaped flowers. Peruviana produces large erect trusses of bloom.

Scilla Hyacinthoides , blue.	10c. each, \$1 00 per doz.
“ Peruviana , dark blue, very handsome,	75 “ “ “

SPRING SNOWFLAKE. Page 28.

COLCHICUM AUTUMNALIS. Page 29.

LILIUM LANCIFOLIUM.

THE LILY—(Liliaceae.)

No garden should be without a collection of this highly interesting and truly magnificent family of plants; they are perfectly hardy, and of the easiest culture. They are unequalled for the border or for large masses and beds, and admirably adapted for pot culture, for the decoration of the green-house or conservatory; they thrive best in a mixture of light turfy-loam and leaf-mould, but will flourish in almost any soil or situation. After once planting, they require very little care, and should not be disturbed oftener than once in three years, as established plants bloom more freely than if taken up annually. In the following list will be found some very fine and rare varieties.

Japan Lilies.

		Each.	Per doz.
<i>Lilium auratum</i> , the golden rayed Queen of Lilies and most beautiful of all the Lily family, extra large, flowering bulbs from.....	35 to	\$ 2 00	3 50 to 10 00

Splendid Novelties.

LILIUM TIGRINUM FLORE PLENO.

Double Flowering Tiger Lily.

We take pleasure in offering the above extraordinary and very rare Lily. Introduced into this country a short time since by Thomas Hogg, Esq., during his late residence in Japan.

While many other varieties have claimed and merited universal admiration, this excels them all, it being a plant of stately habit, growing from four to six feet high, foliage dark green, very long, bearing an immense number of very double bright orange red flowers, spotted with black. Our stock being limited, we offer but few at the following very low price :

Extra large bulbs, giving from 30 to 40 flowers.....	\$5 00 each.
Small, but flowering bulbs.....	2 00

New Japanese Lilium.

L. FORTUNEI.

A VERY showy and attractive variety; it is of noble aspect, growing to the extent of six and seven feet high, the lower flower stems running out far and free from the stalk, thus giving the inflorescence a pyramidal outline. A great number of flowers are borne on each stem, which are of a rich deep scarlet color, distinctly spotted with black. 50 cents each, \$4.50 per dozen.

Lilium Humboldtii.

FROM California, a splendid new variety, color golden yellow, spotted with scarlet, flowers drooping on long peduncles, a magnificent plant of stately habit, from five to seven feet in height. \$1.00 each.

Lilium Washingtonianum.

A NEW variety, a native of California, and one of the most beautiful Lilies yet introduced. Flowers erect, pure white, with bright scarlet spots. They are produced in great numbers, and are delightfully fragrant. Very rare. \$1.50 each.

DOUBLE TIGER LILY. Page 23.

L. Lancifolium Præcox.

THIS remarkable Lily is closely allied to the well-known Lancifolium Album but a more vigorous plant, growing from three to four feet high, and bearing from twelve to eighteen flowers on very long peduncles; color, pure white, with a slight rose tint on the ends of the petals; form perfect; petals nearly alike, more reflexed than in the other varieties of the species. The fringe in the center of the flower is very long and fine, giving it an exquisite appearance. This Lily is perfectly hardy, and is readily propagated by scales and offsets.

We offer this Lily (while in stock) at \$3.00 each for large flowering Bulbs.

Miscellaneous Bulbs and Roots.

	<i>Ea.</i>	<i>Doz.</i>
Alstromœria, mixed colors.....	\$ 30	\$3 00

Dicentra (*Dielytra*) Spectabilis.

ONE of our most graceful and beautiful spring and summer flowering plants, equally at home in the conservatory, sitting-room and flower border.

Price, 25 to 50 cents each; \$2.00 to \$4.00 per dozen.

Pæonies.

THESE have now become indispensable to every garden; some of them begin to bloom with Tulips, while others finish with the Summer Roses. They are all hardy, and admirably adapted to the climate of our most northern States, growing well in almost all situations, and even flourishing under the shade of trees.

We offer a large stock (all Herbaceous) of every shade and color, double and single, mostly rose-scented.

E. Wolf & Son's Black, Red and Blue Solid-Ink Pencils in Cedar.

These Pencils are an excellent substitute for Pen and Ink, as they possess indelibility combined with the convenience of the lead pencil. They are particularly recommended for office, warehouse, and general use, and will be found highly advantageous where dispatch is necessary and the writing required to be preserved for any length of time. They are also well adapted for writing on Garden Labels of all descriptions, the action of the air, rain, etc., not having the slightest effect upon them. Price, 30 cents each ; \$3.00 per dozen.

Page's Pump and Sprinkler

COMBINES MOST OF THE ADVANTAGES OF A HAND WATERING POT, A GREEN-HOUSE SYRINGE, A LIGHT FORCE PUMP AND GARDEN ENGINE, IN ONE.

☞ This Portable Pump is very simple in construction, light to carry, easy to operate, adapted to a greater variety of uses than any other, and is sold at a price so low as to be within the means of nearly every family. It has a new Sprinkling Apparatus, which is generally acknowledged to be the simplest, cheapest and most efficient Sprinkler ever invented. With this attached to Page's lightest Force Pump, water can be spread fine as mist over a space from two inches to ten feet square, or change instantly to a "coarse spray," or a "single jet," thrown thirty or forty feet. It is the first Sprinkler ever made to do that instantaneously, and without any change of nozzles. It is also a

SMALL FRUITS.

Strawberry Plants.

EMBRACING all that are now considered worthy of cultivation. When the plants are ordered at prices quoted, by the dozen, they will be mailed, post-paid, without extra charge, to any part of the United States. At the *Fifty or One Hundred Price*, if ordered by mail, *25 cents additional must be sent for postage*—the freight on all packages by express to be paid by the purchaser. No order will be accepted for less than One Dozen Plants of a variety.

Agriculturist.—Extra large, irregular conical, with long neck, large specimens, coxcomb-shaped; color, reddish crimson; flesh, deep red, sweet; plant a very strong grower, hardy and productive; succeeds well on almost all soils; a valuable variety for home use; rather soft for distant market. 50c. per doz.; \$1 50 per hund.; \$12 00 per thous.

Barnes's Seedling.—Very large, conical; color, bright crimson; flesh firm, sub-acid; berries very handsome and solid. Very valuable as a market berry. 50c. per doz.; \$1 50 per hund.; \$12 00 per thous.

Brooklyn Scarlet.—Medium, conical, bright scarlet; flavor sweet and rich; plant hardy and productive. This is the most valuable early variety for home use. 50c. per doz.; \$2 00 per hund.; \$15 00 per thous.

Burr's New Pine.—Medium, regular, roundish, conical; flesh soft, very juicy, sweet, highly perfumed, very early. 50c. per doz.; \$2 00 per hund.

Charles Downing.—Berries medium to large, of most excellent flavor. It is one of the most hardy, vigorous, and prolific varieties in cultivation; no collection should be without it. 50c. per doz.; \$1 50 per hund.; \$12 00 per thous.

Downer.—One of the very best early varieties. Medium, globular, light scarlet; flesh soft, acid, but highly perfumed; very early and productive. 50c. per doz.; \$1 50 per hund.; \$12 00 per thous.

Hovey's Seedling, (True)—A well-known magnificent berry; plant hardy and luxuriant; bears large crops; berries very large and delicious; a superior variety for the market. 50c. per doz.; \$2 00 per hund.; \$15 00 per thous.

Jucunda.—Extra large, conical, very regular in shape and size; glossy crimson; flesh solid, white and juicy; the plants are hardy, and very productive on heavy soil. This is the most profitable variety for market where the soil and situation are favorable. 50c. per doz.; \$2 00 per hund.; \$15 00 per thous.

Kentucky.—A new seedling from Downer's Prolific; berries large, bright red, sweet and delicious, and ripen later than other large berries; fruit stalks long and erect; plants hardy and vigorous. \$1 00 per doz.; \$5 00 per hund.; \$40 00 per thous.

Lennig's White, or White Pine Apple—Large, globular; white, with a fine blush; flesh solid, pure white, melting, and of a most exquisite pine-apple flavor. The plant is a strong, healthy grower, continues a long time in bearing, and is very productive. For family use, and especially for preserving, this variety has no superior. 50c. per doz.; \$2 00 per hund.; \$15 00 per thous.

Michigan Seedling.—Very late; fruit medium, roundish conical, scarlet, high-flavored, sub-acid. The fruit stems are very stout and hold the trusses well up; foliage very large, dark green; plants exceedingly hardy and prolific. \$1 00 per doz.; \$5 00 per hund.; \$40 00 per thous.

Napoleon III.—Fruit very large, flattened, beautiful scarlet, and of exquisite flavor; flesh moderately firm, white, perfumed; an excellent amateur variety. \$1 00 per doz.; \$5 00 per hund.; \$40 00 per thous.

Nicanor.—Has given general satisfaction during the past season, both for market and home use. It is of good uniform size, unexceptionable shape, solid, sweet and juicy. It ripens with the earliest, is very prolific, and for hardness second to no variety. 50c. per doz.; \$1 50 per hund.; \$12 00 per thous.

President Wilder.—This plant is hardy, robust, vigorous, and very productive. The foliage is handsome and well developed; leaf dark green, roundish, obovate, deeply serrated, of great substance, with stiff, short foot-stalks, and stands the extremes of heat and cold without injury. The flower stalk is stiff and erect, the flowers perfect. The fruit is large, some specimens attaining to more than five inches in circumference; and many berries this year weighed more than an ounce avoirdupois each. Their color is brilliant crimson scarlet; form obtusely conical; the flesh rosy white, very juicy, but sufficiently firm for market; flavor rich and sprightly, inclining to sweet, with a distinct aroma of the Alpine or wood strawberry; seed small; season late. The Massachusetts Horticultural Society offered their highest prize (a silver cup valued at \$25) for the best four quarts of strawberries, of any variety, open to all competitors, and the prize was awarded to the "PRESIDENT WILDER." \$1 00 per doz.; \$5 00 per hund.; \$40 00 per thous.

Seth Boyden, or Boyden's No. 30.—Berries larger than any other American variety; roundish, conical, with neck; dark scarlet. The plant is a very vigorous grower; perfectly hardy. 50c. per doz.; \$1.50 per hund.; \$12.00 per thousand.

Triomphe de Gand.—Very large, conical, often coxcomb shaped; bright, glossy scarlet; flesh very firm, sweet and juicy; late, continues a long time in bearing. A most beautiful variety; requires clay soil and good cultivation. 50c. per doz.; \$1.50 per hund.; \$12.00 per thousand.

Triumph of America.—Berries large, uniform, oval shape, deep crimson color, sub-acid taste; good grower and best adapted to heavy soils; on sandy soil superior to other large varieties. 50c. per doz.; \$2.00 per hund.; \$15.00 per thousand.

Victoria. (Trollope's).—Very large, nearly globular, regular; light pale scarlet; sub-acid, flat; moderately productive; its great merit is size and beauty. 50c. per doz.; \$2.00 per hundred; \$15.00 per thousand.

Wilson. (Wilson's Albany Seedling).—Large, conical; dark crimson; flesh firm, acid and sprightly; the plant succeeds in almost any soil; very hardy and productive. This is the principal variety in the New York market. 50c. per doz.; \$1.50 per hundred; \$10.00 per thousand.

Raspberries.

RASPBERRIES, Blackberries, Currants and Grapes, are too bulky for sending by mail, and can only be sent by express.

Belle de Fontenay.—Large, irregular, conical; deep crimson; flavor good, sub-acid; very hardy; produces a second crop in autumn, 25 cts. each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Brinkle's Orange.—Large orange, sweet and delicious; plant vigorous and productive. The best yellow variety; requires protection in winter. 25 cts. each; \$2.00 per doz.; \$8.00 per hundred.

Clarke.—The hardest and best of the Antwerp varieties. Berries light crimson; very sweet, rich, and high-flavored; canes very strong, erect, and stocky; productive and entirely hardy. 25 cts. each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Davidson's Thornless.—Similar to Doolittle, but earlier and nearly thornless. 25 cts. each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Doolittle's Black Cap.—Large, black, sweet, juicy; early; very productive and hardy; one of the most profitable market berries. \$4.00 per thousand; 15 cts. each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Hudson River Antwerp.—Large and firm, flavor sweet and excellent, highly perfumed, productive; half-hardy. As to quality of fruit has no superior. 25 cts. each; \$1.50 per doz.; \$3.50 per fifty; \$6.00 per hundred.

Lum's Everbearing.—Produces a crop in July equal to the Doolittle, and later in the season, another heavy crop of large and excellent berries, continuing until October. 25 cts. each; \$2.00 per doz.; \$8.00 per hundred.

Mammoth Cluster.—The largest black Raspberry in cultivation; dark brownish black, covered with bloom, juicy and sprightly in flavor; canes very strong and vigorous; leaves large and deep green. Late and very productive. 25 cts. each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Philadelphia.—Medium size, round, dark red, flavor mild; canes erect and strong. The most hardy and productive red Raspberry; succeeds remarkably well on light soil, where most of the half hardy varieties fail. 25 cts. each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Seneca.—Very late; large, glossy black; flavor rich and sprightly. This berry is very firm and one of the best for market. 25 cts. each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Westchester Black Cap Raspberry.—This is a new variety of the Black Cap Raspberry. It is a strong, vigorous-growing variety, perfectly hardy, very productive, being large with a beautiful deep black color, and excellent flavor. It is one week earlier than the Doolittle, and the best flavored of the Black Cap family. 25 cts. each; \$2.00 per doz.; \$5.00 per fifty; \$8.00 per hundred.

Blackberries.

Kittatiny.—Very large, slightly conical. The berries are moderately firm, of sweet, excellent flavor, and perfectly ripe as soon as they turn black. Vigorous grower, hardy, very productive; continues four or five weeks in bearing. 25 cents each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Missouri Mammoth.—A new variety from Missouri. Berries large, very sweet, melting; canes entirely hardy. 25 cents each; \$2.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

New Rochelle, or Lawton.—Very large, roundish oval, juicy and sweet when fully ripe, at which time it is rather soft. As it becomes black several days before it is ripe, it is generally picked too soon; very productive. 25 cents each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Wilson's Early.—Large, oval pointed; flavor rich and good; ripens very early, and matures the whole crop in two weeks. 25 cents each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Dorchester.—Very early. Berries medium size, oblong, flavor very sweet and aromatic; hardy. This is the most valuable early variety for home use. 25 cents each; \$1.00 per doz.; \$3.00 per fifty; \$5.00 per hundred.

Sable Queen.—Early. A very handsome and showy variety; size medium; flavor very good; leaves dark green; canes as hardy as the wild blackberry. 25 cents each; \$2.00 per doz.; \$6.00 per fifty; \$10.00 per hundred.

Currants.

Cherry.—The largest red Currant in cultivation; berries dark red, acid. The most valuable variety for jelly and for the market. 20 cents each; \$2.00 per doz.; \$12.00 per hundred.

Versailles.—Very large, red, bunch long tapering. Less acid than any other variety, and most valuable for table use. 20 cents each; \$2.00 per doz.; \$12.00 per hundred.

La Hative.—Red; a strong, vigorous grower; ripens earlier than the preceding varieties. 20 cents each; \$2.00 per doz.; \$12.00 per hundred.

White Grape.—Very large, white, transparent, sweet, rich and juicy; the best white Currant, equally valuable for market or home use. 20 cents each; \$2.00 per doz.; \$12.00 per hundred.

Black Naples.—Black, sweet, and of a peculiar flavor; berries, very large, one-half inch and more in diameter. Much prized for jams and jellies. 20 cents each; \$2.00 per doz.; \$12.00 per hundred.

Gooseberries.

Houghton Seedling.—Berries pale red, sweet and tender, vigorous and productive; not affected by mildew. Probably the best American Gooseberry. 25 cents each; \$2.00 per doz.; \$12.00 per hundred.

Grapes,—New Varieties.

Croton.—This *New Hardy White Grape* was grown from the Delaware seed crossed with the Chasselas de Fontainebleau, bunch large, berry of medium size, of light yellowish green color, translucent, and in appearance and quality equal to the foreign grape; one of the earliest in cultivation. We offer strong vines at the following low rates:

Strong vines, one year old.	\$1.50 each.	\$15.00 per doz.
“ two years old	2.50 each.	25.00 per doz.

Senasqua.—Grown from the Concord, crossed with the Black Prince. It is a black grape, bunch and berry varying from medium to large. The vine is vigorous and productive, with firm healthy foliage. The fruit more closely resembles the fleshy foreign varieties than any other that has yet been introduced. It has a fine, brisk, vinous flavor, which is much admired. Strong vines three years old, \$1.50 each; \$15.00 per dozen.

Eumelan.—Introduced by Dr. C. W. Grant. It is very vigorous, hardy and productive. Bunches of large size, elegant form, and proper degree of compactness; berries also of large size, with fine bloom and clear surface, adhering firmly to the bunches long after ripening, and

not falling from the bunches after picking and packing. For late keeping, bearing exposure well, long transportation to market, it is all that can be desired. For making red wine, it has no competitor among American grapes.

Strong vines one year old. \$0 75 each. \$7.50 per doz. \$50. per hund.
 " " two years old. 1.50 each. 15. per doz. 100. per hund.
 Vines for immediate bearing. 5. each. 48. per doz.

Walter.—A seedling of the Delaware crossed with the Diana, equaling the Concord in growth. Color reddish. Berry of medium size. Clusters compact, ripens with the Hartford Prolific, continues to grow sweeter by hanging on the vine. Price \$1 00 each, \$9.00 per doz.

 By mail 35 cents each; \$2 50 per dozen.

SEED POTATOES.

Prices variable according to market.

BRESEE'S CELEBRATED SEEDLINGS.

EARLY ROSE.

The Early Rose has now become the standard variety for earliness, quality and productiveness.

Four Pounds (by mail) \$1. One Peck 75 c. One Bushel \$2. One Bbl. \$5. Ten Bbls. \$40.

BRESEE'S KING OF THE EARLIES, or No. 4.

This is without exception the earliest variety in cultivation, having been carefully tested by many prominent agriculturists and by them pronounced from five to ten days earlier than the celebrated Early Rose. It possesses one great advantage over all other varieties, on account of the dwarf habit of the vines, in consequence of which they can be planted much closer, both in hills and drills than other varieties.

Four Pounds (by mail) \$1. One Peck \$1. One Bushel \$3. One Bbl. \$7.

BRESEE'S PEERLESS, or No. 6.

This is the best of all of Mr. Bresee's Seedlings for the main crop. It is a seedling of the Garnet Chili, and originated from the same seed ball as the Early Rose; skin dull white, occasionally russeted, eyes shallow, oblong, flesh white, mealy, grows to a large size, often weighing from one and a half to two pounds and enormously productive. At a trial before the committee of the Mass. Horticultural Society this variety obtained more votes as to quality than any other of Bresee's Seedlings.

Four Pounds (by mail) \$1. One Peck \$1. One Bushel \$3. One Bbl. \$7. All the older varieties of Potatoes will be furnished at market prices.

RESURRECTION PLANTS.

(Very curious,) by mail, 35 cents each.
